Attachment to Section IV - Property Information

1. *A metes and bounds description of the property is required if the proposed site boundaries do not correspond to tax map metes and bounds.*

The Site boundary occupies a portion of the western side of Tax Lot 500 on Block 2781. A metes and bounds description of the property will be provided to the DEC upon entry into the BCP and completion of a survey. A Site plan showing the Site property boundaries is included as Figure 2.

2. *Is the required property map attached to the application?*

A County Tax Map (with adjacent property owners) is included as Figure 3.

10. Property Description and Environmental Assessment

Location

The Site is located in a commercial and industrial use area of the Hunts Point section of the Borough of the Bronx. The Site is an approximate 9.6 acre lot contained within one tax lot identified on New York City tax maps as Block 2781, Lot 500. The Site is bound to the north by Anheuser-Busch, to the east by the Bronx River, to the south by Farragut Street and the Waterfront Park, and to the west by the Railroad Right-of-Way and Food Center Drive. A USGS Topographic Map is included as Figure 1.

Site Features

The Site is currently paved with asphalt and improved with one building, with the investigative area being mostly level terrain. The Site has a chain link fence surrounding the entire property. There is one guarded entrance on the northwestern side of the property along Food Center Drive.

Current Zoning and Land Use

The Site is currently zoned M3-1 (Manufacturing) and is improved with one food distribution warehouse and an asphalt-paved parking lot. Surrounding properties include Anheuser-Busch to the north, mixed commercial and industrial to the south, and the Hunts Point Cooperative Market to the west. A map showing surrounding property use is included as Figure 5.

Past Use of the Site

Historically, the Site was part of the Consolidated Edison Company of New York, Inc. (Con Ed) manufactured gas plant (MGP) that operated from 1926 until the early 1960s. Gas operations included a coke/oven gas plant, a carbureted water gas plant, a light oil plant, and a liquid petroleum production area. In total, approximately 46 buildings or structures existed on the former Con Ed MGP facility that were actively involved in gas production.

Site Geology and Hydrogeology

The Site incorporates approximately 9.6 acres of fairly level land situated in the City of New York, Bronx County, New York. The Site is mapped on the *Central Park, NY and Flushing, NY* Quadrangles of the 7.5 Minute Topographic Map, published by the United States Geological Survey (USGS). Review of the topographic map indicates that the Site is located approximately 10 feet above sea level (NAVD 88).

To date, the subsurface of Site has not been investigated. The soil stratigraphy of surrounding parcels in the Hunts Point peninsula typically contains a 10-15 ft thick layer of fill material including sand, brick debris, coal ash, incinerator ash, coal, wood, and material significantly impacted by MGP-related waste (coal tar and purifier waste). The fill material is underlain by a native clay layer.

Groundwater is typically encountered approximately 5 ft below grade in the Hunts Point Peninsula. Based on the proximity to the Bronx River groundwater is expected to flow to the east. A FEMA Floodplain Map is included as Figure 6.

Environmental Assessment

Due to the Site history as a part of the former MGP and results from investigations of surrounding parcels, it is suspected that 600 Food Center Drive may also contain similar MGP-related impacts to surrounding sites in Hunts Point within the subsurface. A Site map containing the approximate locations of the former Hunts Point MGP structures is provided in Figure 7. The associated gas plant structures of concern found within the Site boundaries are coal piles.

A portion of the Site was also sampled in-situ and was approved for beneficial reuse by NYSDEC as part of the Hunts Point Site C VCA redevelopment project. The proposed excavation was part of the demolition of a relieving platform that was a former MGP waterfront structure, which included the material above the platform and below the platform (mudline material). Sample analytical data is provided in Table 1. Sample locations are provided in Figure 8. Analytical data of the 600 Food Center Drive mudline samples detected exceedances of benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene and dibenzo(a,h)anthracene above Part 375 Commercial Soil Cleanup Objectives (SCOs). While the mudline sample locations are not within the current Site boundaries, the exceedances detected immediately adjacent to Site provide evidence that similar impacts on-site may also exist.

Subject: **Bronx Community Board #2 Repository for Hunts Point Brownfield Cleanup Program Documentation**

Dear Ms. Bell,

This letter will serve as the approval for Bronx Community Board This letter will serve as the approval for the Bronx Community Board (CB) #2 to act as the document repository for Hunts Point Brownfield Cleanup Program Sites. We understand that documents will be sent to the CB by either NYCEDC or directly by your consultant. The CB will hold the documents and allow the public to review them for information and also during public comment periods to allow comments to be provided. Documents can be provided in paper copy, as a CD or both depending on our space for storage. The CB are under no legal obligation to hold these documents and are performing this as a voluntary public service. NYCEDC will notify the CB when each individual site receives a Certificate of Completion (COC) and at that time the CB may discard all documents for that specific Site.

Should you have any questions or need further information, please feel free to contact District Manager Ralph Acevedo at (718) 328 9125 or at ralacevedo@cb.nyc.gov

Attachment to Section X – Land Use Factors

- 2. Attach a summary of current business operations or uses, with an emphasis on identifying possible contaminant source areas. If operations or uses have ceased, provide the date.*

The Site contains an asphalt paved parking lot and is currently improved with one building used for food distribution. The remainder of the site is paved with asphalt and is used for parking and as a roadway, with the exception of the southwest corner of the Site, which contains a greenway. The Site has relatively level terrain throughout. The Site was historically part of the Consolidated Edison Company of New York (Con Ed) manufactured gas plant (MGP), that operated from 1926 until the early 1960s. Previous investigations at adjacent parcels indicate the presence of subsurface impacts from former MGP operations. The subsurface of Site has not been investigated but it is suspected that it may contain MGP-related waste material similar to the adjacent properties.

- 3. Attach a statement detailing the specific proposed use.*

The proposed development project consists of continued operation of the parcel as a food distribution center.
