

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

<https://dec.ny.gov/environmental-protection/site-cleanup/regional-remediation-project-information/environmental-cleanup-email-newsletters>

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate the 600 Food Center Drive site ("site") located at 600 Food Center Drive, Bronx, Bronx County. Please see the map for the site location.

Draft Investigation Work Plan

The draft investigation work plan, called a "Remedial Investigation Work Plan," (RIWP) was submitted to NYSDEC under New York's Brownfield Cleanup Program. The investigation will be performed by the New York City Department of Small Business Services ("applicant") with oversight by NYSDEC and the New York State Department of Health (NYSDOH).

How to Comment

NYSDEC is accepting written comments about the Draft RIWP for 30 days, from **December 17 through January 16, 2026**.

- Access the RIWP and other project documents online through the DECinfo Locator: <https://extapps.dec.ny.gov/data/DecDocs/C203104/>.
- Documents also are available at the location(s) identified under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Contact Information" area.

Highlights of the Proposed Site Investigation

The investigation will define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected.

Due to the property's historical use as part of the former Manufactured Gas Plant (MGP) and results from investigations conducted on neighboring sites, it is likely the site may also contain similar MGP-related impacts, such as coal tar and purifier waste.

Key components of the investigation work include:

- Drilling and sampling soil borings to identify possible on-site sources of contamination;
- Collecting soil vapor, sub-slab soil vapor and indoor air samples; and
- Installing and sampling ground water wells to monitor impacts from areas of concern

Next Steps

NYSDEC will consider public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. After the work plan is approved, the activities detailed in the work plan will be implemented.

When the investigation is completed, a report will be prepared and submitted to NYSDEC that summarizes the results. NYSDEC will review the report, make any necessary revisions and, if appropriate, approve the report.

After the investigation, a proposed cleanup plan, called a "Draft Remedial Action Work Plan" will be developed. The cleanup plan will include an evaluation of the proposed site actions, or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description

The 9.6- acre site is a portion of a larger tax parcel, Block 2781 Lot 500, located in a commercial and industrial area known as Hunts Point Food Distribution Center in the Bronx. The site is bound to the north by Anheuser-Busch distribution facility (former Voluntary Cleanup Program Site No. V00412), to the east by the Bronx River, to the south by Farragut Street and a waterfront park, and to the west by the BCP site Railroad Right-of-Way BCP (No. C203102) and Food Center Drive. The site is improved with one building, surrounded by asphalt and reinforced concrete slabs for loading docks, with rip-rap along the eastern perimeter bounding the Bronx River.

Historically, the larger Hunts Point area was part of a MGP operated by Consolidated Edison Company (Con Ed) during the first half of the 20th century until it ceased production in the early 1960s and was demolished in 1966. Gas operations included a coke/oven gas plant, a carbureted water gas plant, a light oil plant, and a liquid petroleum production area. In total, the MGP facility covered approximately 182 acres with 46 structures that were actively involved in gas production. Historic maps indicate the BCP site was used for coal storage with railroad tracks and small structure located in the southeastern portion of the property. Prior to construction of the MGP, the BCP site was primarily undeveloped marsh land, with the eastern shoreline being reinforced with a bulkhead as early as 1911. The site will continue to operate as a food production warehouse.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C203104) at:

<https://appfactory.dec.ny.gov/DERExternalSearch/ERDSearch>

Brownfield Cleanup Program

New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://dec.ny.gov/environmental-protection/site-cleanup/brownfield-and-state-superfund-programs/brownfield>
