Re: Monthly Progress Report – October 2019
1675 Apartments
1675-1679 Westchester Avenue, Bronx, New York
NYSDEC BCP Site No. C203107

Dear Ms. Barraza:

This Monthly Progress Report has been prepared by AKRF, Inc. (AKRF) to summarize the work performed at the 1675 Apartments site located at 1675-1679 Westchester Avenue in the Bronx, New York [New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP) Site No. C203107] (the “Site”) during the month of October 2019. The following activities were conducted:

- On October 1 and 4, and 7 through 9, 2019, AKRF prepared daily progress reports and submitted them to NYSDEC, the New York State Department of Health (NYSDOH), and New York City Office of Environmental Remediation (NYCOER). The daily progress reports are included as Attachment A.
- Between October 1 and 9, 2019, Remedial Action Work Plan (RAWP) implementation and construction for the new building occurred, including: soil/fill excavation, off-site disposal, and grading; and quarried stone import and placement. AKRF oversaw all ground-intrusive work in accordance with the NYSDEC-approved RAWP, and conducted work zone and community air monitoring in accordance with the Health and Safety Plan (HASP) and Community Air Monitoring Program (CAMP). Water from fire hydrants with reduced pressure zone (RPZ) hookups were used, weather permitting, to mist the Site periodically in an effort to proactively reduce airborne particulate concentrations. The CAMP exceedance is summarized in Table 1. The October 2019 CAMP data summary is included as Attachment B.

Table 1 - October 2019 CAMP Exceedance Summary

Date	Time	Exceedance Type and Location	Presumed or Known Reason for Exceedance	Resolution Action
10/03/2019	7:06	Particulate, Downwind Station No. 2	Equipment set up	N/A

- Between October 1 and 4, 2019, 179.23 tons of non-hazardous soil/fill was disposed of off-site at the Soil Safe Incorporated (SSI) Metro 12 facility in Carteret, New Jersey via 6 truckloads. The soil/fill was excavated from disposal grids WC-01, WC-07, WC-08, and WC-09. The disposal grids are shown on Figure 1.
- On October 1, 2, 7, and 8, 2019, approximately 325 cubic yards of approved stone was imported on-site from the Hamburg Quarry facility in Hamburg, New Jersey via 13 truckloads. The stone was installed on top of compacted subgrade at the location of the proposed future courtyard.
- On October 1 and 2, 2019, approximately 100 cubic yards of structural fill was imported on-site from the Norlite LLC facility in Cohoes, New York via 2 truckloads. The fill was placed in disposal grids WC-09 and WC-10 along the retaining wall on the northern portion of the Site.
- On October 4, 2019, ground-intrusive work was completed within the proposed new building footprint. Between October 4 and 8, 2019, quarried stone was imported and placed across the exposed soil/fill where the proposed future courtyard is located along the northern portion of the Site. Based on the current project schedule, the imported stone will be disposed of off-site, and the courtyard will be completed in Spring or Summer 2020 under AKRF oversight.
- In an October 4, 2019 email, AKRF formally requested to discontinue air monitoring at the Site based on the current Site condition and work. The same day, NYSDEC replied via email indicating that the roving air monitoring and downwind station monitoring could be discontinued. AKRF continued to conduct community air monitoring via the upwind and downwind station located at the corner of Fteley and Westchester Avenues.
- On October 8, 2019, the areas of the Site outside of the new building foundation slabs were temporarily capped with NYSDEC-approved quarried stone. At the request of NYSDEC and NYSDOH, AKRF continued community air monitoring, oversight, and daily reporting through October 9, 2019. AKRF demobilized from the Site on October 10, 2019 after verbal approval by NYSDEC was received.
- On October 9, 2019, members of the NYSDEC and AKRF project teams conducted a conference call to discuss Site progress. During the call, NYSDEC indicated that the project conference call frequency could be reduced from bi-monthly to monthly. NYSDEC requested weekly progress reports be submitted to NYSDEC, NYSDOH, and NYCOER to document construction of the new building superstructure.
- On October 22, 2019, AKRF submitted a letter to NYSDEC and NYCOER to document the suspension of subsurface disturbance activities and AKRF's demobilization from the Site until intrusive activities resume in Summer/Fall 2020. The letter is included as Attachment C.
- AKRF began preparing the Final Engineering Report (FER), which will document the work conducted under the RAWP, HASP, and CAMP.
- AKRF began preparing the Site Management Plan (SMP), which describes procedures required to manage residual contamination left in place at the Site following the completion of the remedial actions.

The following work is planned for November 2019:

- AKRF expects to receive the validated laboratory analytical results of the documentation samples collected on September 24, 2019 and the associated data usability summary report (DUSR) from the third-party data validator. After receipt, AKRF will upload the validated data to the NYSDEC Environmental Quality Information System (EQUIS)[™].
- AKRF expects to receive the survey showing the locations of the documentation samples from the surveyor. After receipt, AKRF will submit the survey to NYSDEC.

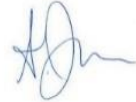

- Members of the NYSDEC, NYSDOH, and AKRF project teams will continue to hold monthly conference calls on an as-needed basis.
- AKRF will continue to prepare weekly and monthly progress reports and submit them to NYSDEC, NYSDOH, and NYCOER.
- AKRF will begin preparing the FER and SMP for submission to NYSDEC and NYSDOH.

Description and Location of Work Activities Performed				
AKRF conducted community air monitoring throughout the work day. Proactive particulate suppression was applied periodically. Exceedances were not detected. Particulate exceedances were detected at the downwind community air monitoring program (CAMP) station #2 at 7:06 [maximum concentration of 0.159 milligrams per cubic meter (mg/m ³), which was recorded during station set up. Roving air monitoring was not conducted due to rain throughout the work day.				
Soil/fill previously excavated from grid WC-07 and WC-8 and staged in grids A2 and B2 was disposed of off site at the Metro 12 facility in Carteret, New Jersey via 3 truckloads.				
Foundation installation continued in grids A3 and B3.

Re: 1675 Apartments – BCP Site No. C203107

Dear Ms. Barraza:

The 1675 Apartments project site, located at 1240 Metcalf Avenue, Bronx, New York (the Site), was enrolled in the New York State Department of Conservation (NYSDEC) Brownfield Cleanup Program (BCP) (Site No. C203107) in May 2018. Under the BCP, a Remedial Action Work Plan (RAWP) was prepared by AKRF, Inc. (AKRF) and approved by NYSDEC in April 2019. The NYSDEC-approved RAWP requires implementation of work zone and community air monitoring, and screening for evidence of contamination during all ground-intrusive work at the Site, including: excavation and grading, loading trucks for off-site disposal, and fill import and placement. Remedial excavation activities occurred between May 10 and October 4, 2019, as documented in the Daily Progress Reports and Monthly Progress Reports submitted to NYSDEC and the New York State Department of Health (NYSDOH). On October 8, 2019, the remaining areas of the Site not capped by the new building foundation slabs were temporarily capped with NYSDEC-approved quarried stone. As such, there is no exposed soil/fill on-site. At the request of NYSDEC and NYSDOH, AKRF continued community air monitoring, oversight, and daily reporting through October 9, 2019. AKRF demobilized from the Site on October 10, 2019 after verbal approval by NYSDEC was received. While the new building superstructure is being constructed, no remedial work is occurring at the Site that requires AKRF oversight under the RAWP.

Remedial work under the RAWP will continue in the Summer/Fall 2020 when the proposed courtyard on the northern portion of the Site will be constructed. Courtyard construction is expected to include: the removal of the quarried stone cover, minor soil/fill grading, documentation sampling, elevation and location surveying, sampling and importation of fill, and installation of courtyard finishing materials (pavers, concrete, vegetation, etc.). Prior to courtyard construction, AKRF will re-mobilize to the Site to oversee the remaining ground-intrusive work, and perform CAMP and roving air monitoring, and daily reporting. Prior re-mobilization to the Site, AKRF will notify the NYSDEC and NYSDOH project managers of the upcoming courtyard work with as much advanced notice as possible.

As requested by NYSDEC in an October 9, 2019 conference call, AKRF will submit weekly progress reports (in addition to monthly progress reports), except during remedial work when daily progress reports will be submitted in lieu of weekly reports. AKRF will also continue holding monthly conference calls with NYSDEC and NYSDOH until they are no longer required by NYSDEC.

Please confirm this approach is acceptable. If you should have any questions, please do not hesitate to contact Deborah at dshapiro@akrf.com or (646) 388-9544 or Amy at ajordan@akrf.com or (646) 388-9864.
