EXECUTIVE SUMMARY

M & T Bank (client) retained Airtek Environmental Corp. (Airtek) to conduct a Phase I Environmental Site Assessment of the property located at 261 Walton Avenue (Block 2344, Lot 60), Bronx, NY 10451 (the subject property). The objective of the assessment was to provide an independent, professional opinion regarding recognized environmental conditions, as defined by ASTM, associated with the subject property. This assessment was requested in association with a refinancing.

This assessment was performed under the conditions of, and in accordance with Airtek's Master Services Agreement (MSA) with M & T Bank, dated April 9, 2007, using ASTM E1527-00, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* as a guideline. Any exceptions to, additions to, or deletions from the ASTM guidelines are described in the report. Details of the work performed, sources of information, and findings are presented in the report. Limitations of the assessment are described in Section 1.4.

The subject property comprises a 27,454 square foot (ft²) lot of land developed with a six-story building, two-story addition, and one-story addition currently owned by Tuck-it-away Associates. The subject property was bounded by Gerard Avenue to the west and Walton Avenue to the east. The subject property was located within a commercial and light industrial setting.

The subject property is further described as Block 2344, Lot 60. As of the date of this assessment, the subject property appeared in the New York City Department of City Planning's (NYCDCP's) City Environmental Quality Review (CEQR) Environmental Designations list. The property was designated as e-designation E-227, referring to properties which fall under the CEQR Hazardous Materials Phase I and II Testing Protocol, air quality concerns, and exhaust stack location limitations. According to records maintained by the New York City Department of Buildings (NYCDOB), the land comprising the subject property was zoned for manufacturing and residential use.

The historical research conducted for this assessment has established the use of the subject property since 1891. An 1891 fire insurance map depicted the subject property as undeveloped. A 1908 fire insurance map depicted the subject property developed with an "electrical specialties" facility and a lumber storage facility. A 1935 fire insurance map depicted the subject property as an automotive wrecking yard. A 1944 fire insurance map depicted the southern half of the subject property as developed with a card and paper warehouse and the northern half as an automotive wrecking yard. A 1951 fire insurance map indicated that one of the structures on the automotive wrecking yard portion of the property was in use for automotive repairs. Fire insurance maps dating from 1977 through 2007 depicted the subject property as developed with a furniture warehouse.

This assessment has revealed the following evidence of the *recognized environmental condition* as defined by ASTM E1527-00, or part of the scope of "all appropriate inquiry" as defined by CERCLA, in connection with the subject property:

- As of the date of this assessment, the subject property appeared in the New York City Department of City Planning's (NYCDCP's) City Environmental Quality Review (CEQR) Environmental Designations list. The property was designated as e-designation E-227, referring to properties which fall under the CEQR Hazardous Materials Phase I and II Testing Protocol, air quality concerns, and exhaust stack location limitations. Fire insurance maps dating from 1935 through 1951 depicted an automotive wrecking yard on the subject property. A 1951 fire insurance map showed an automotive repair facility on the subject property. A 1966 aerial photograph showed the subject property in its current configuration. Based on the availability of historical records, the onsite automotive wrecking yard could have existed onsite from as early as 1909 until as late as 1965. These previous uses indicate the potential usage, storage, and release of solvents and petroleum products which have impacted the subject property.

This finding is a recognized environmental condition because it constitutes evidence of a past release of petroleum products and/or hazardous chemicals onto the subject property. Therefore, Airtek recommends conducting additional onsite analytical investigation in order to determine the presence and extent of any onsite contamination related to these previous property uses.

- As of the date of this assessment, the south adjacent property was developed as a British Petroleum (BP) automotive fueling station. Aerial photographs dating from 1954 through 2006 and

fire insurance maps dating from 1951 and 1980 through 2007 depicted an automotive fueling station on the south adjacent property. The station was listed in the NYSDEC Spills database with an associated closure date, indicating that onsite leak-related contamination was remediated to the satisfaction of the NYSDEC. The spill involved the release of 52 gallons of gasoline. According to the spill description, soil and groundwater contamination had been detected onsite and continued to be detected through the last noted sampling event in 2010. The fueling station was also listed in the Leaking Storage Tank Incident Reports (LTANKS) database. The LTANKS incident was classified as a “known release that creates potential for fire or hazard,” and had no associated closure date.

This finding is a recognized environmental condition because it constitutes evidence of a release of petroleum products and/or hazardous chemicals which have impacted the subject property. Therefore, Airtek recommends conducting additional onsite analytical investigation in order to determine the presence and extent of any onsite contamination related to these previous property uses.

- Fire insurance maps dating from 1944 through 2007 depicted automotive fueling and repair facilities on a northeastern property, upgradient from the subject property. The property was associated with an unresolved NYSDEC Spills incident. The spill was called in on October 11, 1999 in connection with an abandoned gas station. The spill description notes that bedrock was located between one and six feet below ground surface (bgs) across the site and that significant contamination was detected.

This finding is a recognized environmental condition because it constitutes evidence of a release of petroleum products and/or hazardous chemicals which have likely impacted the subject property. Therefore, Airtek recommends conducting additional onsite analytical investigation in order to determine the presence and extent of any onsite contamination related to these previous property uses.

- An automotive fueling station was depicted on the east adjacent property in a 1935 fire insurance map. A plastics manufacturing facility was depicted on the east adjacent property in fire insurance maps dating from 1947 through 1951. Fire insurance maps dating from 1935 through 1951 depicted the north adjacent property as a large fur processing facility. These previous uses indicate the potential usage, storage, and release of petroleum products, solvents, and heavy metals which have impacted the subject property.

This finding is a recognized environmental condition because it constitutes evidence of a release of petroleum products and/or hazardous chemicals which have likely impacted the subject property. Therefore, Airtek recommends conducting additional onsite analytical investigation in order to determine the presence and extent of any onsite contamination related to these previous property uses.

The following environmental conditions, which are not considered to be *recognized environmental conditions* as defined by ASTM E1527-00, or part of the scope of “all appropriate inquiry” as defined by CERCLA, were revealed during this assessment:

- During a December 7, 2011 site visit, Airtek observed petroleum staining beneath elevator equipment located in the basement. NYCDOB Environmental Control Board (ECB) violations were issued in connection with elevator-related infractions on the subject property. Specifically, the violations noted that excessive oil had been applied to the elevator drum (Violation 38059770J) and that the elevator pit was dirty and full of standing water (Violations 38075316J and 38088853H). These findings constitute an environmental concern because of the potential for oil to pool in elevator pit and/or infiltrate the subsurface from cracks or fissures located therein.

This finding is not considered a recognized environmental condition because it does not constitute evidence of a release of petroleum products or hazardous chemicals to the subject property. Airtek recommends conducting regular monitoring and maintenance of the elevator machinery and pit. The elevator pit should be cleaned and inspected for any cracks or fissures through which petroleum products or other contaminants could infiltrate the subsurface of the subject property.

- At the time of Airtek's December 7, 2011 site visit, Airtek observed visible mold growth (VMG) in the basement beneath the subject property's western two-story addition.

This finding is not considered a recognized environmental condition because mold is not an ASTM E1527-00/CERCLA issue. Airtek recommends abating visible mold growth and identifying the sources of any onsite water intrusion which may have cause onsite mold growth and sealing them in such a way as to prevent future intrusion.

- Records reviewed by Airtek indicated that structures on the subject property were constructed in approximately 1931 (see Section 3.2.2). Airtek noted the presence of visible suspect asbestos-containing materials (ACM) during the course of the site walkthrough. Materials noted during the walkthrough were limited to those observable materials (*i.e.*, materials that are readily accessible and visible without dismantling elements of the structure, such as carpet, wallboard, or ceiling panels) which may contain asbestos and do not represent the entirety of total suspect ACM onsite. Visible suspect ACM within the subject property included vinyl floor tiles and associated mastic, wood flooring subfloor, cementitious skim coating, gypsum wallboard, joint compound, brick mortar, door caulking, window caulking, and roofing material.

This finding is not considered a recognized environmental condition because asbestos is not an ASTM E1527-00/CERCLA issue. However, Airtek recommends that, prior to any planned demolition or disturbance of suspect onsite materials an ACM study should be conducted by licensed professionals to determine whether and where ACM is present onsite.

- Lead-based paint (LBP) was commonly used for corrosion protection in the 1960s, and in prime, intermediate, and finish coats well into the 1970s. Records reviewed by Airtek indicated that structures on the subject property were constructed in approximately 1931 (see Section 3.2.2). Therefore, LBP may exist on subject property surfaces.

This finding is not considered a recognized environmental condition because LBP is not an ASTM E1527-00/CERCLA issue. Airtek recommends that, prior to any planned demolition or disturbance of painted materials, an LBP study should be conducted by licensed professionals to determine whether and where LBP is present onsite. Any renovation, repair, or painting of surfaces containing LBP must be conducted by firms certified under the EPA's Lead-Safe Renovation, Repairs, and Painting (RRP) program. In addition, Airtek recommends that painted surfaces on the subject property be maintained in good condition.

- Structures on the subject property were improved with fluorescent lighting. Records reviewed by Airtek indicated that buildings on the subject property were constructed in approximately 1931 (see Section 3.2.2). Many fluorescent light ballasts manufactured prior to 1980 may contain PCBs. Fluorescent light bulbs also often contain relatively small amounts of mercury.

This finding is not considered a recognized environmental condition because PCB light ballasts are considered a *de minimis* environmental issue. However, Airtek recommends that the ballasts be inspected for "No PCBs" labels prior to planned renovation/demolition activities involving the removal of fluorescent light fixtures. According to the NYSDEC, mercury-containing items including but not limited to fluorescent light bulbs and thermostats must be disposed of following guidelines established by either New York's state Universal Waste Rule or the Resource Conservation and Recovery Act (RCRA).

**Phase I Environmental Site Assessment for
261 Walton Avenue
Block 2344, Lot 60
Bronx, NY 10451**

1.0 INTRODUCTION

This report presents the findings of the Phase I Environmental Site Assessment (ESA) of the property located at 261 Walton Avenue, (Block 2344, Lot 60), Bronx, NY 10451 (the subject property). The site reconnaissance was conducted by Mr. Judah Lebow, Project Manager with Airtek, on December 7, 2011 in accordance with the United States Environmental Protection Agency (USEPA)'s "All Appropriate Inquiries" Standard and the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Environmental Site Assessment Process (ASTM Standard E-1527-00) and the scope of work provided to M & T Bank (client) by Airtek. During the site visit, all accessible spaces were accessed for inspection purposes.

1.1 Purposes

The purposes of this Phase I Environmental Site Assessment were:

1. To identify the presence or release of any hazardous substances, hazardous wastes, or petroleum products affecting the subject property;
2. To determine the level of compliance with current environmental standards, laws, regulations and permits (if any) with respect to the subject property;
3. To provide information pertinent to the valuation of the subject property;
4. To evaluate any risk to the health and well-being of the Client's agents, employees, and contractors, as well as to the general public;
5. To identify whether any hazardous substances, hazardous wastes, or petroleum products have been stored, released or disposed of on the subject property; and
6. To identify the need for additional testing to evaluate the scope, location, source and nature of any release of hazardous substances, hazardous wastes, or petroleum products affecting the subject property.

1.2 Detailed Scope of Work

The scope of work for the ESA is in general accordance with the requirements of ASTM Standard E 1527-00. Airtek warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in Airtek's Master Services Agreement (MSA) with M & T Bank, dated April 9, 2007. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying Recognized Environmental Conditions (RECs). No other warranties are implied or expressed.

1.3 Significant Assumptions

Environmental conditions may exist on the subject property that were not evident based on the available information. Airtek cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. Airtek is not responsible for the quality or content of information

from these sources. This assessment employs methodologies intended to provide M & T Bank with information relating to the subject property, and does not represent all-inclusive or comprehensive results.

1.4 Limitations and Exceptions

The findings and conclusions contain all of the limitations inherent in these methodologies referred to in ASTM 1527-00. Specific limitations and exceptions to this ESA are more specifically set forth below, if applicable.

1.4.1 Unavailable Documentation

At the time of this assessment, all requested documents regarding the subject property were made available for review, except for the following:

- Airtek contacted the Fire Department of New York (FDNY) on December 7, 2011 regarding records of storage tanks or releases of hazardous substances at the subject property. As of the date of this report, the FDNY has not responded to Airtek's request. Airtek will forward any responses from the FDNY as an addendum should they significantly change the findings of this report.
- Airtek contacted the NYSDEC on December 7, 2011 regarding records of storage tanks or releases of hazardous substances at the subject property. As of the date of this report, the NYSDEC has not responded to Airtek's request. Airtek will forward any responses from the NYSDEC as an addendum should they significantly change the findings of this report.
- Airtek contacted the NYCDEP on December 7, 2011 regarding records of storage tanks or releases of hazardous substances at the subject property. As of the date of this report, the NYCDEP has not responded to Airtek's request. Airtek will forward any responses from the NYCDEP as an addendum should they significantly change the findings of this report.

The unavailability of these documents did not prevent an evaluation of recognized environmental conditions with regards to the subject property.

1.4.2 Data Gaps

Historical subject property use information was obtained for the time period, 1891 to 2011. Several gaps in use information exceeding five years were encountered during this assessment. Several documents requested as part of this assessment were not available as of the date of this report (see Section 1.4.1). Based on general knowledge of the area and known past uses of the subject property, Airtek did not consider these gaps to be significant.

1.5 Special Terms and Conditions

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the client. No subsurface exploratory drilling or sampling was done under the scope of this work. Unless specifically stated otherwise in the report, no chemical analyses have been performed during the course of this ESA.

Some of the information provided in this report is based on personal interviews, research of available documents, records, and maps held by the appropriate government and private agencies. This information is subject to the limits of historical documentation, availability, and accuracy of pertinent records and the personal recollections of those persons contacted.

The scope of work for this investigation consists of a subject property reconnaissance and a review of available information regarding the Site obtained from relevant regulatory agencies. This report

summarizes the results of the Site reconnaissance and includes a summary of pertinent regulatory files searched with regard to hazardous materials, hazardous wastes or petroleum products. Data gaps if any are identified and mentioned (see Section 1.4.2).

The field investigation included a Site assessment, observation of neighboring properties and verification of permits and building records as necessary. The review and inspection were performed by Mr. Judah Lebow, Project Manager with Airtek.

Airtek has made a reasonable effort, using commonly accepted industry standards, i.e., ASTM Standard E-1527-00, to perform this Phase I ESA. Airtek's inquiry was limited to interviews, review of available documents and visual observations of readily accessible areas of the subject property. Airtek's findings and recommendations regarding the subject property can be found in Section 7.0 of this report.

1.6 Use Reliance

All reports, both verbal and written, are for the benefit of M & T Bank, its affiliates and subsidiaries and all successors and assigns thereof. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of Airtek Environmental Corporation.

2.0 SUBJECT PROPERTY DESCRIPTION

This section describes the location of the subject property, description of the adjacent properties, and subject property area overview.

2.1 Subject Property Location and Legal Description

The subject property comprises a 27,454 square foot (ft²) lot of land developed with a six-story building, two-story addition, and one-story addition currently owned by Tuck-it-away Associates. The subject property was bounded by Gerard Avenue to the west and Walton Avenue to the east. The subject property was located within a commercial and light industrial setting.

The subject property is further described as Block 2344, Lot 60. As of the date of this assessment, the subject property appeared in the New York City Department of City Planning's (NYCDCP's) City Environmental Quality Review (CEQR) Environmental Designations list. The property was designated as e-designation E-227, referring to properties which fall under the CEQR Hazardous Materials Phase I and II Testing Protocol, air quality concerns, and exhaust stack location limitations. According to records maintained by the New York City Department of Buildings (NYCDOB), the land comprising the subject property was zoned for manufacturing and residential use.

2.2 Subject/Adjacent Property General Characteristics

The area surrounding the subject property consisted primarily of commercial and light industrial properties. Adjoining properties were observed (from the subject property or from public access areas) for signs of recognized environmental conditions and their potential to pose an environmental concern to the subject property (Figure 2, Appendix B). The uses and features of adjoining properties are described below.

North: Warehouse

East: Walton Avenue followed by offices, rental storage facility

South: British Petroleum (BP) automotive fueling station

West: Gerard Avenue, followed by the William F. Deegan Expressway

Current visible uses of adjoining properties do not appear to present an environmental concern to the subject property, with the exception of the south adjacent automotive fueling station. Use as an automotive fueling station indicates the potential usage, storage, and release of petroleum products which have impacted the subject property.

2.3 Current Use of the Property

The subject property comprises a 27,454 ft² lot of land developed with a rental storage facility, commercial tenant space in use as a sign making facility, and paved yard. The subject property's main entrance was located along Gerard Avenue, on the property's western border.

Based on observations made during Airtek' site visit, the following information was ascertained:

- Stormwater runoff from the subject property flows into storm drains located along Gerard and Walton Avenues. Stormwater falling on the roof of structures on the subject property flow through drains into a basement sump and is pumped into the municipal sewer.
- The subject property utilizes electricity provided by Con Edison Company.
- The subject property utilizes electrical heaters.
- The subject property utilizes water services provided by the New York City Department of Environmental Protection (NYCDEP).
- Sewerage generated on the subject property is discharged to the municipal sewer system.
- Waste is removed from the subject property on an as-needed basis by private carting company George Demolition Company (GDC).

3.0 RECORD REVIEW

3.1 Standard Environmental Records Sources

Environmental Data Resources, Inc. (EDR) was subcontracted for the task of performing the record search for the subject Site. The following records were reviewed in the EDR Radius Map™ Report:

- 3.1.1** National Priority List (NPL)
- 3.1.2** Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)
- 3.1.3** CORRACTS (Corrective Action Report)
- 3.1.4** Resource Conservation and Recovery Information System (RCRIS)
 - Treatment, storage and disposal sites (TSD Facilities)
 - Large quantity generators
 - Small quantity generators
 - Conditionally exempt small quantity generator
- 3.1.5** Emergency Response Notification System (ERNS)
- 3.1.6** State Hazardous Waste Sites (SHWS)
- 3.1.7** Leaking Underground Storage Tank Incident Reports LTANKS
- 3.1.8** Petroleum Bulk Storage (PBS) Database
- 3.1.9** Chemical Bulk Storage (CBS) Database
- 3.1.10** Major Oil Storage Facilities Database (MOSF)
- 3.1.11** Hazardous Substance Waste Disposal Site Inventory (HSWDS)
- 3.1.12** Spills Information Database
- 3.1.13** Drycleaners
- 3.1.14** Voluntary Cleanup Program (VCP)
- 3.1.15** Manufactured Gas Plants

- 3.1.16** Manifest
- 3.1.17** INST Control
- 3.1.18** Formerly Used Defense Sites (FUDS)
- 3.1.19** Vapor Reopened

The subject property was designated as e-designation E-227, referring to properties which fall under the CEQR Hazardous Materials Phase I and II Testing Protocol, air quality concerns, and exhaust stack location limitations.

3.1.1 National Priority List (NPL)

NPL is EPA's subset of Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. A review of this list did not reveal any NPL sites located within one mile of the subject property.

3.1.2 Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)

CERCLIS contains data on potentially hazardous waste sites that have been reported to the EPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). A review of this list did not reveal any CERCLIS sites located within one-half mile of the subject property.

3.1.3 CORRACTS (Corrective Action Report)

CORRACTS identifies hazardous waste handlers with the Resource Conservation and Recovery Act (RCRA) corrective action activity. A review of this database did not reveal any CORRACTS sites located within one mile of the subject property.

3.1.4 Resource Conservation and Recovery Information System (RCRIS)

- **Treatment, storage and disposal sites (TSD Facilities)**
- **Large quantity generators**
- **Small quantity generators**
- **Conditionally exempt small quantity generator**

RCRIS includes selective information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. A review of the database did not reveal any RCRA-TSD Facilities located within one-half mile of the subject property.

A large quantity generator (LQG) facility is defined as one that generates at least 1,000 kilograms per month (kg/mo) of non-acutely hazardous waste or 1 kg/mo of acutely hazardous waste. A review of the database revealed no LQG facilities within one-quarter mile of the subject property.

A small quantity generator (SQG) facility is defined as one that generates between 100 and 1,000 kg/mo of nonacutely hazardous waste. A review of the database revealed two SQG facilities within one-eighth mile of the subject property. One of the facilities, identified as BP fueling station #48374, is an automotive fuelling station located south adjacent to the subject property. This facility's use and its proximity to the subject property indicates the potential usage, storage, and release of petroleum products and solvents which have impacted the subject property. Based on its distance to the subject property and lack of associated violations, the remaining SQG facility is thought to pose a low risk of adversely impacting the subject property.

A conditionally exempt small quantity generator (CESQG) facility is defined as one that generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. A review of the database revealed one CESQG facility within one-eighth mile of the subject property. Airtek observed no violations associated with the CESQG facilities in the databases reviewed. Therefore, this facility is thought to pose a low risk of adversely impacting the subject property.

3.1.5 Emergency Response Notification System (ERNS)

ERNS records and stores information on reported releases of oil and hazardous substances. A review of this database did not reveal any ERNS records associated with the subject property

3.1.5.1 State Hazardous Waste Sites (SHWS)

SHWS records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. A review of this database did not reveal any SHWS sites within one-quarter mile of the subject property.

3.1.6 State Solid Waste Facilities/Landfill Sites (SWF/LF)

The SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. A review of this database revealed one SWF/LF sites located within one-eighth mile of the subject property. The facility is located downgradient from the subject property, and is therefore thought to pose a low threat of adversely impacting the subject property.

3.1.7 Leaking Storage Tank Incident Reports (LTANKS)

LTANKS records contain an inventory of reported leaking storage tank incidents reported from April 1, 1986 through the most recent update. These tanks can be either underground storage tanks or aboveground storage tanks. A review of this database revealed three LTANKS sites within one-eighth mile of the subject property.

Two of the LTANKS incidents were classified as "known release[s] with minimal potential for fire or hazard," and were listed with associated closure dates, indicating that remediation at these sites has satisfied the NYSDEC. The remaining incident was located at an automotive fueling station south adjacent to the subject property, was classified as a "known release that creates potential for fire or hazard," and had no associated closure date. Based on its proximity and unresolved nature, this incident constitutes evidence of an environmental concern.

3.1.9 Petroleum Bulk Storage (PBS) Database

The PBS database contains registered facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons, including above ground storage tanks (ASTs) and underground storage tanks (USTs). A review of this data revealed 10 UST sites within one-eighth mile from the subject property. Leaking USTs (LUSTs) are listed in Section 3.1.8.

Records reviewed by EDR revealed four AST sites within one-eighth of a mile from the subject property. Three of the AST facilities were also listed as e-designated properties, indicating the presence of an environmental requirement pertaining to potential hazardous materials contamination, Window/Wall noise attenuation, or air quality impacts on a particular tax lot. Of these three facilities, one was also listed in the NYSDEC Spills database (see Section 3.1.13). Airtek observed no environmental violations listed in association with the remaining AST facility, indicating a low likelihood of adversely impacting the subject property.

3.1.10 Chemical Bulk Storage (CBS) Database

This database contains facilities that store regulated hazardous substances in above ground storage tanks (ASTs) with capacities of 185 gallons or greater and in underground tanks of any size (USTs). A review of this database did not reveal any CBS UST or CBS AST sites located within one-eighth mile of the subject property.

3.1.11 Major Oil Storage Facilities Database (MOSF)

This database contains facilities that may be on shore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. A review of this database did not reveal any MOSF sites located within one-half mile of the subject property.

3.1.12 Hazardous Substance Waste Disposal Site Inventory (HSWDS)

This list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. The database did not reveal any HSWDS sites within one-half mile of the subject property.

3.1.13 Spills Information Database

The NYSDEC Spills and Historical Spills databases contains data collected on spills, which are reported to the NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6NYCRR Section 613.8 (from PBS sources), or 6NYCRR Section 595.2 (from CBS sources). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of this list revealed 19 spills reported within one eighth-mile of the subject property. 16 of these were listed with associated closure dates, indicating that onsite leak-related contamination was remediated to the satisfaction of the NYSDEC. Of these, 10 incidents were classified as either "known release[s] with minimal potential for fire or hazard," or "Possible release with minimal potential for fire or hazard or known release with no damage." An additional closed incident was classified as "No spill occurred. (Not Possible)." Two additional closed incidents were located cross-gradient from the subject property, and an additional closed incident occurred across the Harlem River from the subject property. These closed incidents are thought to pose a low likelihood of impacting the subject property.

The final closed spill incident was located at the automotive fuelling station south adjacent to the subject property. The spill was called in on September 14, 1994, closed on October 28, 2003, and involved the release of 52 gallons of gasoline. According to the spill description, soil and groundwater contamination had been detected onsite and continued to be detected through the last noted sampling event in 2010. This finding constitutes evidence of a likely release of petroleum products which have impacted the subject property.

Of the three unresolved spill incidents, two were located east of the subject property, past a subway line. The likelihood that contamination originating from these incidents facilities would pass through the area of significant subsurface disturbance represented by a buried light rail line is thought to be low.

The final unresolved spill incident, at 315 Grand Concourse, was located northeast and upgradient of the subject property. The spill was called in on October 11, 1999 in connection with an abandoned gas station. The spill description notes that bedrock was located between one and six feet below ground surface (bgs) across the site and that significant contamination was detected. This finding constitutes evidence of a likely release of petroleum products which have impacted the subject property.

3.1.14 Drycleaners

A review of the EDR report revealed no drycleaner sites within one-quarter mile from the subject property.

3.1.15 Voluntary Cleanup Program (VCP)

A review of the EDR report revealed no VCP sites located within one-half mile of the subject property.

3.1.16 Manufactured Gas Plants

A review of the EDR report did not reveal any Manufactured Gas Plants within one mile of the subject property.

3.1.17 Manifest

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to the Treatment Storage and Disposal (TSD) facility. A review of the Manifest database revealed 10 Manifest sites within one-eighth mile of the subject property. Five of the manifests sites were also listed in the Spills, LTANKS, and/or SWF/LF databases (see Sections 3.1.13, 3.1.7, and 3.1.6, respectively). Airtek observed no unresolved violations with the remaining five sites.

3.1.18 INST Control

INST Control sites are sites where institutional controls are present in relation to known contamination on-site. A review of the EDR report did not reveal any institutional controls sites within one-half mile of the subject property.

3.1.19 Formerly Used Defense Sites (FUDS)

Formerly Used Defense Sites (FUDS) are sites where the US Army Corps of Engineers are actively working or planning remediation. No FUDS sites were noted within 1 mile of the subject property.

3.1.20 Vapor Reopened

Vapor Reopened sites are sites which were previously closed by New York State, but which have been reopened as the threat of vapor infiltration has been reevaluated in recent years. No Vapor Reopened sites were located within one-quarter mile of the subject property.

The other listed sites are not expected to present an environmental concern to the subject property because they only hold an operating permit (which does not imply a problem), require no further action, exhibit no evidence of regulatory action, or based upon Airtek' review, are too distant and/or topographically downgradient or crossgradient relative to the subject property to reasonably affect it. For more information regarding the above-mentioned sites, please refer to the EDR-Radius Map with GeoCheck[®] Report included as Appendix 10.5 of this report.

3.2 Additional Environmental Record Sources

3.2.1 Building Department

The NYCDOB maintains records on all properties in the City of New York. According to NYCDOB records, 34 NYCDOB violations were listed for the subject property, 15 of which were open at the time of this assessment. The open NYCDOB violations referred to boiler, construction, and elevator-related infractions onsite.

NYCDOB records indicated that 17 NYCDOB Environmental Control Board (ECB) violations were listed for the subject property, 9 of which were open as of the date of this assessment. The violations were issued in connection with certificate of occupancy, sprinkler, façade, and elevator-related infractions. Specifically, the elevator-related infractions noted that excessive oil had been applied to the elevator drum (Violation 38059770J) and that the elevator pit was dirty and full of standing water (Violations 38075316J and 38088853H). These findings constitute an environmental concern because of the potential for oil to pool in elevator pit and/or infiltrate the subsurface from cracks or fissures located therein.

According to the NYCDOB, the subject property is zoned as MX-13 mixed use.

Airtek did not observe evidence of onsite recognized environmental conditions among the NYCDOB violations reviewed. Copies of the NYCDOB information can be found in Appendix D-3.

3.2.2 NYC Oasis

The website NYC Oasis (<http://www.oasisnyc.net/map.aspx>) maintains records assembled from various public data sources. According to the records reviewed by Airtek, the structures improving the subject property were constructed in approximately 1931.

A copy of the NYC Oasis report is included in Appendix D-3.

3.2.3 Fire Department

Airtek contacted the Fire Department of New York (FDNY) on December 7, 2011 regarding records of storage tanks or releases of hazardous substances at the subject property. As of the date of this report, the FDNY has not responded to Airtek's request. Airtek will forward any responses from the FDNY as an addendum should they significantly change the findings of this report.

3.2.4 New York State Department of Environmental Conservation

Airtek contacted the NYSDEC on December 7, 2011 regarding records of storage tanks or releases of hazardous substances at the subject property. As of the date of this report, the NYSDEC has not responded to Airtek's request. Airtek will forward any responses from the NYSDEC as an addendum should they significantly change the findings of this report.

3.2.5 New York City Department of Environmental Protection

Airtek contacted the NYCDEP on December 7, 2011 regarding records of storage tanks or releases of hazardous substances at the subject property. As of the date of this report, the NYCDEP has not responded to Airtek's request. Airtek will forward any responses from the NYCDEP as an addendum should they significantly change the findings of this report.

3.3 Physical Setting Sources

3.3.1 Topography

The EDR Historical Topographic Map of Central Park, New York, dated 1995 was reviewed for this ESA. According to the contour lines on the map, the property slopes gently from the east to west. The property is located at approximately 25 feet above mean sea level (amsl). The subject property is located approximately 500 feet east of the Harlem River. Only significant landmarks are included on the map. No specific topographic attributes, such as retaining walls, creeks, slopes, etc. are shown. No surface water is depicted as present on or adjacent to the property, nor are production wells or other significant surface features depicted on the topographic maps.

3.3.2 Soils/Geology

According to the Geocheck addendum to the EDR Report, silt loam, loamy sand, sandy loam, and fine sandy loam may be present beneath the subject property, and may be composed of Paleozoic rock of the Ordovician age. Soils in the vicinity of the site are similar in composition and age.

3.3.3 Hydrology

No information was available regarding groundwater quality in the immediate vicinity of the site. However, groundwater in the vicinity of the subject property is assumed to follow the topographic gradient to the west towards the Harlem River.

3.3.4 Flood Zone Information

The Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map was reviewed to determine if the subject property is located in a flood hazard area. According to the map, the subject property is located in Zone X, which denotes areas determined to be outside of the 500-year floodplain (FEMA Panel #360497-0083F, revised September 5, 2007).

3.3.5 Wetlands

The United States Fish and Wildlife Service (USFWS) Wetlands Online Mapper was reviewed to determine if wetlands are located in the vicinity of the subject property. According to the map, no wetlands are located in the vicinity of the subject property.

3.3.6 Oil and Gas Exploration

No oil or gas exploration is known to occur in the region.

3.4 Historical Information on the Property

3.4.1 Aerial Photographs

Aerial photographs, which include the subject and adjoining properties, were reviewed for this report. Photographs from the years 1954, 1966, 1975, 1984, 1995, and 2006, were available for review and are summarized as follows:

Date: February 23, 1954 Scale: 1"=250' Source: EDR

- The subject property was developed with several structures of indeterminate use and arranged in an "L" configuration. The northern portion of the subject property appeared occupied by numerous cars. Walton and Gerard Avenues appeared in their current configuration, bounding the subject property to the east and west, respectively. North, northeast, and southeast adjacent properties were visibly developed with warehouses of indeterminate use. East and west adjacent properties appeared as vacant properties. The eastern side of the south adjacent property was developed with a structure of indeterminate use. Canopies consistent with use as automotive fuelling stations were visible on the south adjacent and northeastern properties.

Date: February 23, 1966 Scale: 1"=500' Source: EDR

- The northern section of the subject property appeared as a paved lot. The west adjacent property appeared developed with the Major F. Deegan Expressway. No other significant changes from the 1954 aerial photograph were observed.

Date: April 1, 1975 Scale: 1"=750' Source: EDR

- No significant changes from the 1966 aerial photograph were observed.

Date: April 27, 1984 Scale: 1"=500' Source: EDR

- The south adjacent property was cleared of all structures except for a canopy consistent with use as an automotive fuelling station. No other significant changes from the 1975 aerial photograph were observed.

Date: March 13, 1995 Scale: 1"=500' Source: EDR

- No significant changes from the 1984 aerial photograph were observed.

Date: 2006 Scale: 1"=500' Source: EDR

- The northeastern canopy was no longer visible. The east adjacent property appeared developed with a warehouse of indeterminate use. No other significant changes from the 1995 aerial photograph were observed.

Airtek observed no readily apparent evidence of potential recognized environmental conditions at the subject or adjoining properties based on the aerial photographs reviewed, with the following exceptions:

- A canopy consistent with the visual appearance of an automotive fueling station was visible on a northeastern property in aerial photographs dating from 1954 through 1984. A similar canopy was visible on the south adjacent property in aerial photographs dating from 1954 through 2006. Based on their proximity, the presence of these structures indicates the potential usage, storage, and release of petroleum products and/or solvents which have impacted the subject property.

3.4.2 *Fire Insurance Maps*

Fire insurance maps typically depict either the locations of manufacturing and industrial facilities within the city limits or potential hazards existing within individual building structures. In many cases, evidence of environmental concern, such as locations of USTs, can be found by reviewing fire insurance maps.

Airtek reviewed fire insurance map depicting the subject and adjacent properties from the complete Sanborn Library collection. Fire insurance maps dated 1891, 1908, 1935, 1944, 1946, 1947, 1951, 1977, 1978, 1980, 1981, 1984, 1986, 1989, 1991-96, 1998, and 2001-07 were available for review and depicted the following:

Date: 1891

- The subject and adjacent properties were depicted as undeveloped.

Date: 1908

- The southern third of the subject property was developed as an "electrical specialties" facility. The subject property's northern two-thirds were developed as a lumber yard and lumber storage facility. The north adjacent properties were developed as a lumber storage facility with associated yard, wood working facility, and an "electrical specialties" facility. Walton Avenue appeared in its current configuration, bounding the subject property to the east. The southeast adjacent property was developed as several offices. The south adjacent property was developed as a lumber storage facility and a piano factory. The east adjacent property was developed as a lumber storage yard. No other significant changes from the 1891 fire insurance map were observed.

Date: 1935

- The subject property was developed as an automotive wrecking yard. The north adjacent property was depicted as a fur dressing and dyeing facility. The southeastern adjacent property was developed as an automotive fuelling station. The south adjacent property was developed as a lumber storage facility. The east adjacent properties were developed as an automotive wrecking yard and brick, cement, and lime factory. No other significant changes from the 1908 fire insurance map were observed.

Date: 1944

- The southern half of the subject property was developed with a card and paper warehouse. The northern half of the subject property was developed as an automotive wrecking yard and several associated storage structures. The property immediately north adjacent to the subject property

was undeveloped, with properties further north developed as fur dressing and dyeing facilities. The northeast adjacent property was developed as an automotive fuelling station. The south adjacent property was developed with a structure of indeterminate use. Major William F. Deegan Boulevard appeared in the configuration of the current Gerard Avenue, bounding the subject property to the west. No other significant changes from the 1935 fire insurance map were observed.

Date: 1946

- No significant changes from the 1944 fire insurance map were observed.

Date: 1947

- The east adjacent property was developed with a plastics manufacturing facility. The south adjacent property was labeled as "MFG [Manufacturing] Cleansers." No other significant changes from the 1946 fire insurance map were observed.

Date: 1951

- One of the structures on the northern half of the subject property previously identified labeled as "storage" was depicted as an automotive repair facility. The western side of the south adjacent property was depicted as an automotive fuelling station. No other significant changes from the 1947 fire insurance map were observed.

Date: 1977

- The subject property was developed with a furniture warehouse and showroom. The north adjacent property previously identified as a fur dressing facility was depicted as a furniture manufacturing facility. A portion of the northeast adjacent property was depicted as an automotive repair facility. The east adjacent property previously identified as a plastics manufacturing facility was shown as a warehouse. The south adjacent property was depicted as vacant. No other significant changes from the 1951 fire insurance map were observed.

Date: 1978

- No significant changes from the 1977 fire insurance map were observed.

Date: 1980

- The south adjacent property was depicted as an automotive fuelling station. No other significant changes from the 1978 fire insurance map were observed.

Date: 1981

- No significant changes from the 1980 fire insurance map were observed.

Date: 1984

- No significant changes from the 1981 fire insurance map were observed.

Date: 1986

- No significant changes from the 1984 fire insurance map were observed.

Date: 1989

- No significant changes from the 1986 fire insurance map were observed.

Date: 1991

- No significant changes from the 1989 fire insurance map were observed.

Date: 1992

- No significant changes from the 1991 fire insurance map were observed.

Date: 1993

- No significant changes from the 1992 fire insurance map were observed.

Date: 1994

- No significant changes from the 1993 fire insurance map were observed.

Date: 1995

- No significant changes from the 1994 fire insurance map were observed.

Date: 1996

- No significant changes from the 1995 fire insurance map were observed.

Date: 1998

- No significant changes from the 1996 fire insurance map were observed.

Date: 2001

- No significant changes from the 1998 fire insurance map were observed.

Date: 2002

- No significant changes from the 2001 fire insurance map were observed.

Date: 2003

- The northeastern property previously identified as an automotive fuelling station was depicted as a car washing facility. No other significant changes from the 2002 fire insurance map were observed.

Date: 2004

- No significant changes from the 2003 fire insurance map were observed.

Date: 2005

- No significant changes from the 2004 fire insurance map were observed.

Date: 2006

- No significant changes from the 2005 fire insurance map were observed.

Date: 2007

- No significant changes from the 2006 fire insurance map were observed.

The following readily apparent evidence of potential recognized environmental conditions at the subject or adjoining properties was noted in the fire insurance maps:

- Fire insurance maps dating from 1935 through 1951 depicted an automotive wrecking yard on the subject property. A 1951 fire insurance map showed an automotive repair facility on the subject property. Based on the dates of available fire insurance maps, the onsite automotive wrecking yard could have existed onsite from as early as 1909 until as late as 1976. Automotive repair could have existed onsite from as early as 1936 until as late as 1976. These previous uses indicate the potential usage, storage, and release of petroleum products and solvents which have impacted the subject property.
- Fire insurance maps dating from 1935 through 1951 depicted the north adjacent property as a large fur processing facility. This previous use indicates the potential usage, storage, and release of solvents which have impacted the subject property.
- Fire insurance maps dating from 1944 through 2007 depicted automotive fueling and repair facilities on a northeastern property. The uses and location of these facilities indicates the potential usage, storage, and release of petroleum products and solvents which have impacted the subject property.
- An automotive fueling station was depicted on the east adjacent property in a 1935 fire insurance map. A plastics manufacturing facility was depicted on the east adjacent property in fire insurance maps dating from 1947 through 1951. This previous use indicates the potential usage, storage, and release of petroleum products, solvents, and heavy metals which have impacted the subject property.
- The south adjacent property was depicted as an automotive fueling station in fire insurance maps dating from 1951 and 1980 through 2007. This use indicates the potential usage, storage, and release of petroleum products and solvents which have impacted the subject property.

3.4.3 City Directories

The EDR City Directory Abstract included information from city telephone listings from the following years: 1927, 1931, 1940, 1949, 1956, 1961, 1965, 1971, 1976, 1983, 1993, and 2005.

261 Walton Avenue was listed in city directory records dating from 1927, 1940, 1949, 1956, 1961, 1965, 1971, 1976, 1983, 1993, and 2005. Listings dating from 1927 through 1956 described the subject property as a paper and card factory. Records from 1961 through 1993 depicted the subject property as a furniture facility. A 2005 city directory record listed Tuck-it-away and Yonkers Contracting Inc. at the subject property.

Adjacent properties were listed in city directory records dating from 1927, 1931, 1940, 1949, 1956, 1961, 1965, and 2005 as a number of residential and commercial tenants. Readily apparent evidence of environmental concerns at the adjoining properties was not noted in the city directories reviewed.

3.4.4 Historical Topographic Maps

Airtek reviewed historic topographic maps for the subject property and vicinity. Historic topographic maps were provided by EDR and are included in Appendix C-3. Maps dated 1897, 1947, 1966, 1979, and 1995

were available for review and depicted the following:

Date: 1897 USGS Quadrangle: Harlem, New York Scale: 1:62,500

- The subject and adjacent properties appeared undeveloped. Walton Avenue appeared in its current configuration, bounding the subject property to the east.

Date: 1947 USGS Quadrangle: Central Park, New York Scale: 1:25,000

- The subject, north, and west adjacent property were improved with development of an indeterminate nature. No other significant changes from the 1897 topographic map were observed.

Date: 1966 USGS Quadrangle: Central Park, New York Scale: 1:24,000

- The subject and adjacent properties were shaded red to indicate the presence of unspecified development. Gerard Avenue appeared in its current configuration, bounding the subject property to the west. No other significant changes from the 1947 topographic map were observed.

Date: 1979 USGS Quadrangle: Central Park, New York Scale: 1:24,000

- No significant changes from the 1966 topographic map were observed.

Date: 1995 USGS Quadrangle: Central Park, New York Scale: 1:24,000

- No significant changes from the 1979 topographic map were observed.

No readily apparent evidence of environmental concerns at the subject property or adjoining properties was noted in the topographic maps reviewed.

3.4.5 Additional Historical Record Sources

No additional historical sources were reviewed.

3.4.6 Prior Assessment Reports

No other environmental reports or assessments were available for review at the time of this assessment.

4.0 SITE RECONNAISSANCE

4.1 Methodology and Limitations

At the time of the site visit, Airtek was accompanied by Mr. Mark Soroka, general manager of Tuck-it-away. Photographs taken at the time of the ESA are included in Appendix A.

4.2 General Observations

During Airtek's December 7, 2011 site visit, the subject property was developed as a six-story rental storage facility Tuck-it-away. A two-story addition in use for rental storage was attached to the west of the six-story structure. A one-story structure was attached to north of the six-story structure, and was in use as Tuck-it-away's office and a commercial tenant space occupied by Harlem Village Digital Signs, a sign-making facility. A cable-driven elevator improved the southeastern section of the onsite structure. At the time of Airtek's site visit, the basement of the onsite building was used to house telecommunications equipment and a defunct combination natural gas/fuel oil-powered boiler. An elevator machine room was also located in the basement. The remainder of the basement was not in use. The basement area beneath the two-story addition appeared to have been previously developed as offices. The roof of six-

story structure was improved with a water tank, a pressure tank, telecommunications equipment, and a chimney that lead to the defunct basement boiler. The remainder of the subject property was developed as a parking lot, the northwestern portion of which was occupied by several shipping containers for rent by Tuck-it-away.

4.3 Hazardous Substances and Petroleum Products

The subject property was assessed for signs of storage, use, or disposal of hazardous materials. The assessment consisted of noting evidence (e.g., drums, unusual vegetation patterns, staining) indicating that hazardous materials are currently or were previously located on the subject property.

Airtek observed no evidence of onsite storage of hazardous substances or petroleum products during the December 7, 2011 site visit, with the exception of petroleum staining beneath the elevator equipment located in the basement.

4.4 Storage Tanks

4.4.1 Underground Storage Tanks (USTs)

The subject property was inspected for evidence of underground storage tanks (USTs) (e.g., vent piping, dispensing equipment, pavement variations).

At the time of the site visit, Airtek observed no evidence of USTs on the subject property.

4.4.2 Aboveground Storage Tanks (ASTs)

The subject property was inspected for evidence of ASTs (e.g. concrete foundations or saddles, pedestals or steel support structures).

Airtek observed a defunct combination natural gas/fuel oil-powered boiler in the basement at the subject property. However, Airtek observed no footings or saddles indicating the location of an onsite AST. Airtek observed a metal plate level with the sidewalk along Walton Avenue which had two holes approximately the size and shape of AST vent and fill piping.

4.5 In-Ground Hydraulic Equipment

The subject property was inspected for evidence of in-ground hydraulic equipment (e.g. hydraulic elevators or lifts that have hydraulic fluid-containing reservoirs or jacks below ground surface). Although not regulated as USTs, hydraulic equipment of this type can be of concern due to the potential for oil leaks from the hydraulic cylinders. Hydraulic fluid in equipment installed in 1978 or before may contain PCBs.

Airtek observed no evidence of in-ground hydraulic equipment at the subject property at the time of the site visit.

4.6 Polychlorinated Biphenyls (PCBs)

The subject property was inspected for the presence of liquid-cooled electrical units (transformers, light ballasts, and capacitors), and major sources of hydraulic fluid (elevators and lifts). Such units are notable because they are potential PCB sources.

The subject property was improved with fluorescent lighting. According to historical records reviewed by Airtek, structures improving the subject property were constructed in approximately 1931 (see Section 3.2.2). Many fluorescent light ballasts manufactured prior to 1980 may contain PCBs. Fluorescent light bulbs also often contain relatively small amounts of mercury.

4.7 Wastewater and Storm Water Discharge

The subject property utilizes water services provided by the NYCDEP. Sewerage generated on the subject property is discharged to the municipal sewer system. Stormwater runoff from the subject property flows into storm drains located along Gerard and Walton Avenues. Stormwater falling on the roof of structures on the subject property flow through drains into a basement sump and is pumped into the municipal sewer.

4.8 Discharge Sources / Waste sources

Evidence of industrial, process or other discharge sources (i.e. other than domestic waste water from sinks and toilets) was not observed on the subject property.

Waste is removed from the subject property on an as-needed basis by private carting company George Demolition Company (GDC).

4.9 Oil/Water Separators, Clarifiers, Sumps, and Trenches

The subject property was inspected for evidence of oil/water separators, clarifiers, sumps and trenches (e.g. hatches, manholes, patches on the floor slabs). Although not regulated as USTs, these features can be of concern due to the potential for leaks into the subsurface.

Airtek observed no evidence of oil/water separators, clarifiers, sumps, or trenches on the subject property.

4.10 Radiological Hazards

Airtek observed no evidence of radiological substances or equipment on the subject property.

4.11 Septic Systems

The subject property was inspected for evidence of current or former septic systems (e.g. clean out manhole, records, interviews).

Airtek observed no evidence of septic systems during the course of the site walkthrough.

4.12 Wells

Airtek observed no evidence of wells or cisterns on the subject property.

4.13 Dry Cleaning Operations

Airtek observed no dry cleaners on the subject property, and records reviewed indicate no past use of the subject property as a dry cleaning facility.

5.0 NON-ASTM ISSUES

5.1 Asbestos-Containing Materials

Airtek noted the presence of visible suspect asbestos-containing materials (ACM) during the course of the site walkthrough. Materials noted during the walkthrough were limited to those observable materials (*i.e.*, materials that are readily accessible and visible without dismantling elements of the structure, such as carpet, wallboard, or ceiling panels) which may contain asbestos and do not represent the entirety of total suspect ACM onsite. Visible suspect ACM within the subject property included vinyl floor tiles and associated mastic, wood flooring subfloor, cementitious skim coating, gypsum wallboard, joint compound, brick mortar, door caulking, window caulking, and roofing material.

According to historical records reviewed by Airtek, structures improving the subject property were initially constructed in 1931 (see Section 3.2.2). Therefore, Airtek recommends that, prior to any planned demolition or disturbance onsite materials, an ACM study should be conducted by licensed professionals to determine whether and where ACM is present onsite.

5.2 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in bedrock and soil. The potential adverse health effects associated with radon gas depend on various factors, such as the concentration of the gas and duration of exposure. The concentration of radon gas in a building depends on subsurface soil conditions, the integrity of the building's foundation, and the building's ventilation system.

No formal radon study was conducted on the subject property. However, the New York State Department of Health (NYSDOH) "Measured Basement Screening Radon Levels," dated October, 2008 provides information regarding the general radon levels in the area of the subject property. The report surveyed a total of 91 homes within Bronx County. Of those homes that were tested, 7.70% were found to have radon level of 4 pico curies per liter (pCi/l) or above. According to U.S. Environmental Protection Agency (EPA) guidance document entitled "A Citizen's Guide to Radon" (August 1986), radon exposures in the range of 4.0 pCi/l "are considered average or slightly above average for residential structures. The report results indicate that Bronx County is categorized as having a minor potential for indoor radon problems.

5.3 Lead-Based Paint (LBP)

Lead-based paint (was commonly used for corrosion protection in the 1960s, and in prime, intermediate, and finish coats well into the 1970s. Regulations specifically addressing lead-based paint include Housing and Urban Development (HUD) (1995) guidelines and the Consumer Product Safety Act (1977). These regulations define lead-based paint as containing 0.5% lead by weight (5,000 ppm), and 0.06% lead by weight (600 ppm), respectively, for housing and consumer products. There is no industrial definition. There are specific testing methods for sampling and analyzing lead in paint.

Records reviewed by Airtek indicated that the structures improving the subject property were constructed in approximately 1931 (see Section 3.2.2). Therefore, LBP may exist on subject property surfaces. Prior to any planned demolition or disturbance of painted materials, an LBP study should be conducted by licensed professionals to determine whether and where LBP is present onsite. Any renovation, repair, or painting of surfaces containing LBP must be conducted by firms certified under the EPA's Lead-Safe Renovation, Repairs, and Painting (RRP) program.

5.4 Mold Evaluation

A limited visual inspection for mold growth was performed as part of this investigation. Airtek observed visible mold growth (VMG) in the basement beneath the subject property's western two-story addition. Mold growth may be present in additional areas surveyed on the subject property even if mold is not visible, and Airtek makes no warranty that there is no mold elsewhere on the subject property.

6.0 INTERVIEWS

6.1 Interview with Owner

On December 7, 2011, Airtek conducted an in-person interview with Mr. Mark Soroka, General Manager of Tuck-it-away for approximately 3 years. Mr. Soroka was forthcoming with information with which he had knowledge. According to Mr. Soroka, the subject property was previously used as a furniture store for at least 15 years. Mr. Soroka stated that it was against company policy to allow rental tenants to store hazardous chemicals onsite.

Mr. Soroka was not aware of any hazardous chemicals or petroleum products currently stored on the subject or adjacent properties with the exception of the south adjacent automotive fuelling station. In

addition, Mr. Soroka was not aware of any petroleum products or hazardous chemicals which had been released to the subject or adjacent properties.

Mr. Soroka was asked if he was aware of any of the following:

Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property. Yes _____ No X

Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property. Yes _____ No X

Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Yes _____ No X

6.2 Interview with Site Manager

As of the date of this assessment, Mr. Soroka acted in the capacity of site manager.

6.3 Interviews with Occupants

On December 7, 2011, Airtek conducted an in-person interview with Mr. Eric Ludlum, Manager of Harlem Village Digital Signs for approximately 1.5 years. Mr. Ludlum was forthcoming with information with which he had knowledge. According to Mr. Ludlum, seven years ago the commercial tenant space occupied by Harlem Village Digital Signs had been in use as an office. In the intervening period, the space had been used as a single storage unit. Mr. Ludlum was not aware of any hazardous chemicals or petroleum products stored on the subject property with the exception of a small amount of supplies used during the sign-making process. Mr. Ludlum was not aware of any hazardous chemicals or petroleum products which had been released to the subject or adjacent properties.

Mr. Ludlum was asked if he was aware of any of the following:

Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property. Yes _____ No X

Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property. Yes _____ No X

Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Yes _____ No X

6.4 Interviews with Others

No other interviews were conducted as part of this assessment

7.0 FINDINGS, OPINIONS, CONCLUSIONS, AND RECOMMENDATIONS

Airtek has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-00 of the property located at 261 Walton Avenue (Block 2344, Lot 60), Bronx, New York, 10451, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1 of this report.

This assessment has revealed the following evidence of the *recognized environmental condition* as defined by ASTM E1527-00, or part of the scope of “all appropriate inquiry” as defined by CERCLA, in connection with the subject property:

- As of the date of this assessment, the subject property appeared in the New York City Department of City Planning’s (NYCDCP’s) City Environmental Quality Review (CEQR) Environmental Designations list. The property was designated as e-designation E-227, referring to properties which fall under the CEQR Hazardous Materials Phase I and II Testing Protocol, air quality concerns, and exhaust stack location limitations. Fire insurance maps dating from 1935 through 1951 depicted an automotive wrecking yard on the subject property. A 1951 fire insurance map showed an automotive repair facility on the subject property. Based on the availability of historical records, the onsite automotive wrecking yard could have existed onsite from as early as 1909 until as late as 1965—a 1966 aerial photograph showed the subject property in its current configuration. These previous uses indicate the potential usage, storage, and release of solvents and petroleum products which have impacted the subject property.

This finding is a recognized environmental condition because it constitutes evidence of a past release of petroleum products and/or hazardous chemicals onto the subject property. Therefore, Airtek recommends conducting additional onsite analytical investigation in order to determine the presence and extent of any onsite contamination related to these previous property uses.

- As of the date of this assessment, the south adjacent property was developed as a British Petroleum (BP) automotive fueling station. Aerial photographs dating from 1954 through 2006 and fire insurance maps dating from 1951 and 1980 through 2007 depicted an automotive fueling station on the south adjacent property. The station was listed in the NYSDEC Spills database with an associated closure date, indicating that onsite leak-related contamination was remediated to the satisfaction of the NYSDEC. The spill involved the release of 52 gallons of gasoline. According to the spill description, soil and groundwater contamination had been detected onsite and continued to be detected through the last noted sampling event in 2010. The fueling station was also listed in the Leaking Storage Tank Incident Reports (LTANKS) database. The LTANKS incident was classified as a “known release that creates potential for fire or hazard,” and had no associated closure date.

This finding is a recognized environmental condition because it constitutes evidence of a release of petroleum products and/or hazardous chemicals which have impacted the subject property. Therefore, Airtek recommends conducting additional onsite analytical investigation in order to determine the presence and extent of any onsite contamination related to these previous property uses.

- Fire insurance maps dating from 1944 through 2007 depicted automotive fueling and repair facilities on a northeastern property, upgradient from the subject property. The property was associated with an unresolved NYSDEC Spills incident. The spill was called in on October 11, 1999 in connection with an abandoned gas station. The spill description notes that bedrock was located between one and six feet below ground surface (bgs) across the site and that significant contamination was detected.

This finding is a recognized environmental condition because it constitutes evidence of a release of petroleum products and/or hazardous chemicals which have likely impacted the subject property. Therefore, Airtek recommends conducting additional onsite analytical investigation in order to

determine the presence and extent of any onsite contamination related to these previous property uses.

- An automotive fueling station was depicted on the east adjacent property in a 1935 fire insurance map. A plastics manufacturing facility was depicted on the east adjacent property in fire insurance maps dating from 1947 through 1951. Fire insurance maps dating from 1935 through 1951 depicted the north adjacent property as a large fur processing facility. These previous uses indicate the potential usage, storage, and release of petroleum products, solvents, and heavy metals which have impacted the subject property.

This finding is a recognized environmental condition because it constitutes evidence of a release of petroleum products and/or hazardous chemicals which have likely impacted the subject property. Therefore, Airtek recommends conducting additional onsite analytical investigation in order to determine the presence and extent of any onsite contamination related to these previous property uses.

The following environmental conditions, which are not considered to be *recognized environmental conditions* as defined by ASTM E1527-00, or part of the scope of "all appropriate inquiry" as defined by CERCLA, were revealed during this assessment:

- During a December 7, 2011 site visit, Airtek observed petroleum staining beneath elevator equipment located in the basement. NYCDOB Environmental Control Board (ECB) violations were issued in connection with elevator-related infractions on the subject property. Specifically, the violations noted that excessive oil had been applied to the elevator drum (Violation 38059770J) and that the elevator pit was dirty and full of standing water (Violations 38075316J and 38088853H). These findings constitute an environmental concern because of the potential for oil to pool in elevator pit and/or infiltrate the subsurface from cracks or fissures located therein.

This finding is not considered a recognized environmental condition because it does not constitute evidence of a release of petroleum products or hazardous chemicals to the subject property. Airtek recommends conducting regular monitoring and maintenance of the elevator machinery and pit. The elevator pit should be cleaned and inspected for any cracks or fissures through which petroleum products or other contaminants could infiltrate the subsurface of the subject property.

- At the time of Airtek's December 7, 2011 site visit, Airtek observed visible mold growth (VMG) in the basement beneath the subject property's western two-story addition.

This finding is not considered a recognized environmental condition because mold is not an ASTM E1527-00/CERCLA issue. Airtek recommends abating visible mold growth and identifying the sources of any onsite water intrusion which may have cause onsite mold growth and sealing them in such a way as to prevent future intrusion.

- Records reviewed by Airtek indicated that structures on the subject property were constructed in approximately 1931 (see Section 3.2.2). Airtek noted the presence of visible suspect asbestos-containing materials (ACM) during the course of the site walkthrough. Materials noted during the walkthrough were limited to those observable materials (*i.e.*, materials that are readily accessible and visible without dismantling elements of the structure, such as carpet, wallboard, or ceiling panels) which may contain asbestos and do not represent the entirety of total suspect ACM onsite. Visible suspect ACM within the subject property included vinyl floor tiles and associated mastic, wood flooring subfloor, cementitious skim coating, gypsum wallboard, joint compound, brick mortar, door caulking, window caulking, and roofing material.

This finding is not considered a recognized environmental condition because asbestos is not an ASTM E1527-00/CERCLA issue. However, Airtek recommends that, prior to any planned demolition or disturbance of suspect onsite materials an ACM study should be conducted by licensed professionals to determine whether and where ACM is present onsite.

- Lead-based paint (LBP) was commonly used for corrosion protection in the 1960s, and in prime, intermediate, and finish coats well into the 1970s. Records reviewed by Airtek indicated that structures on the subject property were constructed in approximately 1931 (see Section 3.2.2). Therefore, LBP may exist on subject property surfaces.

This finding is not considered a recognized environmental condition because LBP is not an ASTM E1527-00/CERCLA issue. Airtek recommends that, prior to any planned demolition or disturbance of painted materials, an LBP study should be conducted by licensed professionals to determine whether and where LBP is present onsite. Any renovation, repair, or painting of surfaces containing LBP must be conducted by firms certified under the EPA's Lead-Safe Renovation, Repairs, and Painting (RRP) program. In addition, Airtek recommends that painted surfaces on the subject property be maintained in good condition.

- Structures on the subject property were improved with fluorescent lighting. Records reviewed by Airtek indicated that buildings on the subject property were constructed in approximately 1931 (see Section 3.2.2). Many fluorescent light ballasts manufactured prior to 1980 may contain PCBs. Fluorescent light bulbs also often contain relatively small amounts of mercury.

This finding is not considered a recognized environmental condition because PCB light ballasts are considered a *de minimis* environmental issue. However, Airtek recommends that the ballasts be inspected for "No PCBs" labels prior to planned renovation/demolition activities involving the removal of fluorescent light fixtures. According to the NYSDEC, mercury-containing items including but not limited to fluorescent light bulbs and thermostats must be disposed of following guidelines established by either New York's state Universal Waste Rule or the Resource Conservation and Recovery Act (RCRA).

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting

EXECUTIVE SUMMARY

the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, and dated 09/27/2011 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
2350 FIFTH AVENUE CORP	2350 5TH AVE	1/4 - 1/2 (0.267 mi.) NW	165	689

Class Code: Significant threat to the public health or environment - action required.

EXECUTIVE SUMMARY

VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the VAPOR REOPENED list, as provided by EDR, and dated 08/01/2011 has revealed that there is 1 VAPOR REOPENED site within approximately 1 mile of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
2350 FIFTH AVENUE CORP	2350 5TH AVE	1/4 - 1/2 (0.267 mi.) NW	165	689

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 10/11/2011 has revealed that there are 4 SWF/LF sites within approximately 0.5 miles of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 09/27/2011 has revealed that there are 41 LTANKS sites within approximately 0.5 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 36 HIST LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

TANKS: This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

A review of the TANKS list, as provided by EDR, and dated 10/04/2011 has revealed that there are 2 TANKS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 CBS AST site within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 09/27/2011 has revealed that there are 19 NY Spills sites within approximately 0.125 miles of the target property.

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 14 NY Hist Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 28 RCRA-NonGen sites within approximately 0.25 miles of the target property.

tanks. Dispenser #8 taken out of service because it pumps gas into vapor line when pump handle is off. Reviewed 11/20/02 tank re-test results (received 1/8/03). Retested two regular unleaded and two premium unleaded USTs. All passed. Stage II was not tested because piping system needs to be reconfigured. 12/15/03 Left Paula Skryja voicemail message inquiring about status of site. PBS information shows five unleaded gas USTs were removed. 12/15/03 Spoke with Paula Skryja. Site was taken over from Gaseteria in August 2002. Some repairs were made to risers, no tank problems. Station was temporarily shut down until raze and rebuild. Gaseteria removed tanks 1.5 weeks ago. BP was on-site to oversee tank removal. Station to be back in service March 2004. Paula to forward information regarding initial TTF. (KMF) 12/26/03 Received information from Paula Skryja, BP regulatory assurance specialist. Tanks retested and passed on 11/20/02. Details of UST removal should be obtained from Gaseteria. (KMF) 9/19/05 - Spill transferred from Vought to Obligado 12/5/05 - Obligado - File Review: Baseline Assessment Report, submitted by Delta, 12/2/05. At time of assessment, site was an active GASeteria service station with 4 4000 gallon gasoline USTs and 1 4000 gallon diesel USTs, 3 pump islands. Surrounding landuse is commercial. Sensitive receptor show Harlem River 500 ft southwest of site. Closest school is 1400 ft northeast of site. Bedrock located at 8 to 12 ft below ground surface. Water is located in bedrock fractures between 8 and 15 ft bgs. Gw flows to southwest. Five soil borings conducted on Dec. 20, 2001. Only soil exceedences in one soil boring SB-3 (9-10.2) with 5880 ppb xylenes and 16,100 ppb naphthalene. Total VOCs 81,402 ppb. Three temporary wells installed. Notable ground water results in ppb: (2/6 and 4/19/02) MW1 - benzene 233, ethylbenzene 539, MTBE 3070 MW2 - benzene 52.3, toluene 48, ethylbenzene 575, xylenes 1810, MTBE 122 MW3 - MTBE 50.2 (8/15/02) MW1 - benzene 205, ethylbenzene 435, MTBE 11000 MW2 - benzene 168, ethylbenzene 203, xylene 84.8 MW3 - MTBE 294 UST Closure Report, submitted by AGS, 12/03. On 11/20/03, 5 4000 gallon tanks excavated, Pump islands, piping, vent lines removed. 5 endpoint soil samples collected. Impacts in only one soil sample, UST - SW Bottom, showing 5200 ppb xylenes. SVOC exceedences as well. One gw sample collected from pit water, showing 6.8 ppb benzene, 27 ppb ethylbenzene, 181 ppb xylenes, 89 ppb toluene. Excavated soil was reused as backfill. Recommends preparation of a Subsurface Investigation Work Plan to investigate and delineate the detected contaminants. UST Closure Report Addendum, submitted by AGS, 12/03. Letter report documents collection of seven samples below former seven dispensers and collection of 5 samples at various piping locations. VOCs impacts were not detected. SVOCs were detected mostly PAHs. UST Closure Report Addendum No. 2, submitted by AGS, 9/04. Details discovery and abandonment of 3 unregistered and abandoned 550 gallon USTs. PBS registration number 2-191361 assigned on 9/3/04. 425 gallons of non DOT regulated waste liquid was removed from the two tanks. 3 soil samples were collected around the UST. USTs abandoned by filling with concrete slurry. No VOC exceedences detected from soil samples, minor PAH exceedences. "Upon completion of the rebuilding activities AGS will prepare a Subsurface Investigation Work Plan to investigate and delineate the detected contaminants." 12/7/05 - Meeting with ASR, Gaseteria, DEC. This site is scheduled for investigation in summer 2006. 9/12/06 - Obligado - Emailed multi-site stipulation agreement to Gaseteria on 9/8/06. Sent original on 9/12/06. Due date for workplan is 4/1/06. 6/1/07 - Obligado - Phone conversation with Steve

S105997104

Muller to discuss schedule. New due date for workplan is 8/1/07.
 9/25/07 - Obligado - Spoke to Steve Muller about this site. He requested proposing a workplan to collect samples from tank mat wells to determine if there is ground water contamination. I told him I would not accept this work plan and he must submit a workplan for well installation. He said he would submit the workplan today.
 9/26/07 - Obligado - Received the Investigation Work Plan. 10/26/07 - Obligado - Reviewed the Subsurface Investigation Workplan. It proposes installation of 4 monitoring wells, collection of soil and ground water samples for 8260/8270 , well survey, and submission of summary report within 60 days. Sent approval email to Steve Muller.
 1/30/08 - Obligado - Reviewed Subsurface Investigation Report. 3 monitoring wells were installed. Tank mat wells MWNW and MWSE were also sampled. Soil borings performed above bedrock and samples collected. MWs were installed into bedrock. No VOC impacts in soil above bedrock was above standards, minor SVOC impacts which may be attributable to fill. Ground water impacts in 2 of 5 wells. Tank mat wells MWNW and MWSE were also sampled. Max BTEX is 579 at MW3, 247 at MWSE. The report recommends monitoring for 2 more quarters. I approved the report but required monitoring for 4 quarters at minimum. 5/20/08 - Obligado - Review 1Q08 monitoring report. BTEX from ND to 272 ug/L. MTBE from ND to 9 ug/L. Will continue monitoring. 12/15/08 - Obligado - Meeting with Gaseteria/ASR/DEC. Gaseteria will submit Closure Petition. 2/2/09 - Obligado - Closure petition submitted. 9/14/09 - Obligado - Sent letter rejecting closure petition. Required soil borings in the vicinity of the tanks to document complete removal of contaminated soil, continued sampling of ground water for at least 2 more quarters. 3/12/10 - Obligado - JCB submitted a work plan to install 2 borings and collect soil and ground water samples in the vicinity of ht eUSTs to document contaminated soil removal. I sent an approval letter to JCB via email. I report will be submitted within 90 days. 4/7/11 - Obligado - I reviewed the RIR report. Soil contamination found in soil boring SB4 adjacent to MWSE. GW samples were collected and BTEX in SB4 was 287 ug/l. During the most recent monitoring event, elevated ground water concentrations detected in MWSE. BTEX was detected at 1591 ug/L in MWSE, including 560 ug/L Benzene. Concentrations in this well have been steadily increasing throughout 2010. I emailed Steve Muller to request the most recent data.

Remarks: PIPING PROBLEM - RECOMMEND UNCOVER ISOLATE AND RETEST

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

He was not there left message to call me back. -QA 10/05/07: Called Mr. John Lage (LMC) to remind him to send Phase 1 and Phase 2 report. He was not there left message to call me back. -QA 06/26/2008: This spill case was transferred to A. Doronova. - AD 11/2008: To find a current owner. To send an INL. AD 12/22/2008: Called and left a message to Mr. Lage's secretary. Found on ACRIS information that Citicorp North America Inc. (Invine, CA)owns the property now. Was given phone number: (212)816-0885 of Patricia Brigantic (Office of General Counsel for this company). Called and left a message. AD 12/29/2008: Did not receive any response yet. Called and left messages to Mr. Lage and Ms. Brigantic. AD 04/06/2009: Did not receive any response yet. Called few times. Later spoke with P. Brigantic regarding the spill. She asked me to email her this request, in order to forward it to a person in charge of environmental issues in this company. Sent an email to P. Brigantic. AD 04/08/2009: Received an email from P. Brigantic saying: "Ms. Doronova- I have checked internally here at Citi and this does not relate to any of my clients. I have forwarded this information to the 2 co-heads of Citi's litigation dept. and they will assign it to someone. Thanks and regards, Patricia" AD 04/20/2009: Received a phone call from Preston Turner - Associate General Counsel of Citi Litigation Service Center. He was referred this case from P. Brigantic. Informed him about site's situation. Mr. Turner will check his files for this property and get back to us. He also asked for time extention to respond on my e-mail, which was granted. AD 04/22/2009: Received an email from P. Tutner of Citi saying: "Dear Ms. Doronova: This e-mail will confirm our telephone conversation wherein I responded to your e-mail originally sent to Patricia Brigantic of Citigroup, Inc. Citigroup North America, Inc. is a separate legal entity, and will respond to your inquiry. This e-mail will confirm that you have extended the date by which Citigroup North America, Inc. must respond to your inquiry to May 20, 2009. Thank you for the accommodation. Preston Turner Associate General Counsel Citi Litigation Service Center 300 St. Paul Place, BSP17D Baltimore, MD 21202 (410) 332-3687 (443) 450-4314 (Facsimile)" AD 05/18/2009: Received an e-mail from P. Turner saying: "Dear Ms. Doronova: This e-mail will respond to the Division of Environmental Remediation's inquiry below related to NYSDEC Spill No. 9909720, and 315 Grand Concourse, Bronx, NY - Block #02344, Lot #0027 (the "Property"). By e-mail dated April 22, 2009, I confirmed with you the extension you granted to Citigroup North America, Inc. to respond to the inquiry by May 20, 2009. I write to advise you that after inquiry, I have determined that Citigroup North America, Inc. ("CNAI") is not an owner of the Property. CNAI is an assignee of a security interest in the Property, but not an owner. According to the records on file with the New York City Department of Finance, the current owner of the Property is: 315 R.E. CORP., a New York Corporation. 315 R.E. CORP. is the owner by virtue of a Deed from the New York City Economic Development Corporation recorded on August 15, 2000. See enclosed ACRIS Search Results for the Property as of April 20, 2009. CNAI is the assignee of a Mortgage as reflected in the

enclosed January 26, 2004 Assignment of Mortgage, which was recorded in the land records on or about July 27, 2004. For your information, the New York Division of Corporations identifies the following information about 315 R.E. CORP.: Principal Executive Office: 4291 Boston Post Road, Pelham Manor, NY 10803. Chairman/CEO: John Lage. I believe 315 R.E. CORP. is represented by Robert Bernstein, Esquire of Scarsdale, NY (914) 472-8455. As Citigroup North America, Inc. is merely an assignee of a security interest in the Property, and not the owner of the Property, CNAI is not in control of the Property, including any current remediation efforts. If you disagree and contend that CNAI is responsible as a person with merely a security interest in the Property, please let me know. Otherwise, I will respectfully consider this inquiry satisfied. Thank you again for the accommodation in extending the response date to your inquiry. I hope the information I have provided you as to the Property's ownership is useful in your future inquiries related tot he Property. Sincerely, Preston Turner Associate General Counsel Citi Litigation Service Center 300 St. Paul Place, BSP17D Baltimore, MD 21202 (410) 332-3687 (443) 450-4314 (Facsimile)" To send an Outstanding Violation letter to the owner: John Lage 315 R.E. CORP.: 4291 Boston Post Road, Pelham Manor, NY 10803 Also, 315 R.E. CORP. is represented by Robert Bernstein, Esquire of Scarsdale, NY (914) 472-8455. Issued and sent an Outstanding Violation letter to Mr. Lage. Response is due June 18, 2009. AD 06/01/2009: Received some documentation from Mr. Lage. Will review. AD 08/19/2009: Reviewed the submitted data. It includes: - Tank Removal proposal dated November 9, 1999 from Papitto Construction Co., Inc. addressed to Mr. Lage; - Subsurface investigation report (SIR) dated November 4, 1999 prepared by S&W Services, Inc. addressed to Mr. Vincent Papitto of Papitto Construction Co., Inc. The SIR states that S&W Services completed the investigation at the site on October 21, 1999. The site has one 4,000-gallon UST, one 6,000-gallon UST and fourteen 550-gallon USTs. SI included advancement of 14 soil borings around USTs and collection of 14 soil samples for VOCs and SVOCs analysis. Soil boring logs data indicate that the depth to bedrock across the site ranges from approximately 1 foot to 6 feet. VOCs analytical data indicates very highly contaminated areas in the vicinity of soil borings: SB-4, SB-5, SB-7, SB-9, SB-10 and SB-11. High concentrations of SVOCs were found in borings: SB-1, SB-3, SB-4, SB-5, SB-10 and SB-12. The consultant recommended removal of USTs and contaminated fill material. No documentation was submitted on USTs removal. AD 10/29/2009: Searched in PBS base for USTs removal info. This site has PBS# 2-402877. According to PBS Facility Information Report, eight USTs were removed from the site on December 17, 2001. USTs description matches description of the tanks in Tank Removal Proposal from Papitto Construction Co., Inc. To contact Mr. Lage and request submission of the USTs Closure report. AD 01/08/2009: Called and spoke with Mr. Toni Riverra of Boulevard Car Wash and requested to submit USTs closure and removal report. AD 09/07/2010: Called and spoke with Mr. Riverra of Boulevard Car Wash regarding the reports submission. He told me that another Phase I investigation was performed by Hydroteck in 2005. requested to submit Phase I report from 2005 and UST closure report from 2001 till November 7, 2010. AD CAR WASH A WHILE AGO WAS A GAS STATION-SITE ASSESSMENT PERFORMED WHICH SHOWED SOIL TO BE CONTAMINATED.

Remarks:

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BP AMOCO STATION #17782 (Continued)

S106002004

activities. Replaced with three 12000gal gas USTs in a separate tank cavity. Lab analysis of the gasoline tank field post-ex soil samples identified MTBE in excess of TAGM in the four bottom samples (tank-2, tank-3, tank-4 and tank-5). MTBE concentrations ranged from 1500ppb(tank-5) to 7740ppb(tank-3). Total BTEX was non-detect in all soil samples. No soil was excavated during tank pulls. Delta proposes conducting a Geoprobe assessment in the vicinity of the former tank field to delineate soil concentrations. 12/31/03 Received SHAR (Delta, 12/22/03) Report only covers the southern half of the existing BP service station. The northern half is managed by Amerada Hess, formerly occupied by a Merit station. Site plan shows 6 monitoring wells on the northern portion of the property.(see spill #9814075) 1360 tons of petroleum-impacted soils were removed during raze and rebuild. Six soil borings were advanced around the former tank field and pump islands to depths between 11.5 and 20ft bgs. Lab analysis of soil samples did not identify VOCs in excess of TAGM. Three soil borings were converted to temporary 1" wells. Groundwater samples collected identified between nine and fourteen VOCs in excess of GWQS in all three samples. MTBE concentrations ranged from 2820ppb(SB-1/water) to 11500ppb(SB-2/water). Delta installed three 2" permanent monitoring wells in June/July 2003 to depths between 19.9 and 21.4' bgs. Underlying bedrock was encountered in one of the three borings at 21.5'. Additional groundwater samples were collected. Lab analysis identified VOCs in excess of GWQS in all three samples. 1/5/04 Discussed site with J. Sun, PM for Hess(#9814075). He will look for signed STIP from Hess for northern section of property. May have existing remediation system on property. 1/29/04 Received 4Q2003 monitoring report(Delta, 1/21/04). Max BTEX 29936ppb(MW-5) and max MTBE 2860ppb(MW-4). MW-2 is clean. 1/29/04 Joe Sun sent out stip to Hess. 3/24/04 Hess stip executed. 4/22/04 Received 1Q2004 monitoring report. DTW 12.5-19'bgs. Total BTEX from 10ppb(MW-2) to 15962ppb(MW-1). MTBE from 6.9ppb(MW-2) to 1720ppb(MW-3). 10/14/04 2Q04 monitoring report received. DTW 13-18'bgs. BTEX from 12ppb(MW-2) to 16174ppb(MW-1). MTBE from 3ppb(MW-2) to 1160ppb(MW-1). 4/7/05 Received 3Q04 and 4Q04 monitoring reports. 3Q04- BTEX ranged from ND(MW-2) to 18124ppb(MW-1). MTBE ranged from ND(MW-2) to 424ppb(MW-3). 4Q04- BTEX ranged from 1ppb(MW-2) to 16084ppb(MW-1). MTBE ranged from 9ppb(MW-2) to 507ppb(MW-3). 11/9/05: Reviewed quarterly report dated 9/29/05. Three wells sampled on 6/10/05. No LNAPL present. Max BTEX is 22437ppb (MW1) and max MTBE is 328ppb(MW3). 11/25/05 3Q05 - DTW 11.82-19.30'bgs. No LNAPL present. BTEX from 0.5ppb(MW-2) to 9858ppb(MW-1). MTBE from 2ppb(MW-2) to 559ppb(MW-3). 3/28/06 4Q05 sampling conducted 12/28/05 on three MWs. DTW 11.74-17.91'bgs. BTEX from 34ppb(MW-2) to 31268ppb(MW-1). MTBE from ND(MW-1) to 131ppb(MW-3). MW-1 is problem well. Concentrations in downgradient well(MW-3) are fluctuating. Hess has system operating on northside of property. 6/8/2006 - Feng - project reassigned to RJFeng. (RJF) 9/29/2006 - Feng - Portfolio meeting with BP and Delta. The site has limited access to trucks due to the canopy. Delta will keep quarterly monitoring. (RJF) 1/4/2007 - Feng - 1Q2006, 10/18/2006, by Delta. Groundwater sampled and gauged 3/3/2006. 3 monitoring wells. DTW 12.23' to 18.31' bg. Flows southeast. No LNAPL. MW-1, 13,489 ppb BTEX, 23.8 ppb MTBE. MW-2, 1.4 ppb BTEX, 2.1 ppb MTBE. MW-3, 60.4 ppb BTEX, 81.4 ppb MTBE. (RJF) 2/6/2007 - Feng - 2Q2006, 12/11/2006, by Delta. Groundwater sampled and gauged 6/30/2006. 3 monitoring wells. DTW 10.82' to 17.93' bg. Flows east-southeast. No LNAPL. MW-1, 14,887 ppb BTEX, 8.6 ppb MTBE. MW-2,

133.62 ppb BTEX, 0.4 ppb MTBE. 16.69 ppb BTEX, 30.4 ppb MTBE. Checked with Hess PM, RAP for SVE and ORC socks approved, but not implemented yet. (RJF) 5/29/2007 - Feng - 3Q2006, 1/22/2007, by Delta. Groundwater sampled and gauged 9/26/2006. 3 monitoring wells. DTW 11.98' to 18.02' bg. Flows to southeast. LNAPL in MW-1 (0.02'). MW-1, 9,882 ppb BTEX, 7.7 ppb MTBE. MW-2, 0.45 ppb BTEX, 2 ppb MTBE. MW-3, 9.8 ppb BTEX, 20.6 ppb MTBE. (RJF) 8/15/2007 - Feng - 4Q2006, 7/2/2007. Groundwater sampled 12/13/2006. All 3 monitoring wells were sampled. DTW 12.09' to 18.14' bg. Flows to southeast. No LNAPL. MW-1, 17,027 ppb BTEX, <50 ppb MTBE. MW-2, BTEX ND, 1.7 ppb MTBE. MW-3, 21.7 ppb BTEX, 31.5 ppb MTBE. (RJF) 11/21/2007 - Feng - 1Q2007, 8/30/2007. Groundwater sampled 3/28/2007. All 3 monitoring wells were sampled. DTW 11.76' to 17.77' bg. Flows to southeast. No LNAPL. BTEX range ND to 10,616 ppb (MW-1). MTBE range 1.1 ppb to 13.6 ppb (MW-3). (RJF) 3/20/2008 - Feng - eDoc Quarterly Monitoring Report 3Q2007, 4Q2007 and 1Q2008. (RJF) 6/26/2008 - 3Q2007, 2/25/2008. Active service station. The monitoring well network was gauged and sampled on 8/22/007. The site was not sampled in 2Q2007. 3 monitoring wells were gauged and sampled. DTW 11.30' to 17.66' bg. Flows to southeast. No LNAPL. BTEX range ND to 9,528 ppb (MW-1). MTBE range ND to 14.2 ppb (MW-3). 4Q2007, 2/25/2008. Active service station. The monitoring well network was gauged and sampled 11/14/2007. 3 monitoring wells. DTW 12.27' to 18.54' bg. Flows to southeast. NO LNAPL. BTEX range ND to 10,323 ppb (MW-1). MTBE range N Dto 26.2 ppb (MW-3). 1Q2008, 3/10/2008. Active service station. The monitoring well network was gauged and sampled 2/7/2008. 3 monitoring wells. DTW 12.45' to 18.49' bg. Flows to southeast. NO LNAPL. BTEX range 1 ppb to 10,600 ppb (MW-1). MTBE range 1 ppb to 25 ppb (MW-3). (RJF) 10/29/2008 - 2Q2008, 9/20/2008, by Delta. Active station. The monitoring well network was gauged and sampled 6/27/2008. 3 wells were gauged. NO LNAPL. DTW 11.66' to 18.62' bg. Flows to southeast. 3 wells were sampled. BTEX range 0.67 ug/L to 9,770 ug/L (MW-1). MTBE range ND to 14.0 ug/L (MW-3). (RJF) 3/4/2009 - 3Q2008, 12/11/2008, by Delta. Active station. The monitoring well network was gauged and sampled 9/4/2008. 3 wells were gauged. LNAPL in MW-1 (0.02'). DTW 11.95' to 18.09' bg. Flows to southeast. 3 wells were sampled. BTEX range ND to 10,540 ug/L (MW-1). MTBE range 1.1 ug/L to 7.2 ug/L (MW-3). 4Q2008, 1/30/2009, by Delta. Active station. The monitoring well network was gauged and sampled on 12/17/2008. 3 wells were gauged. LNAPL in MW-1 (0.03'). DTW 11.57' to 17.57' bg. Flows to southeast. 3 wells were sampled. BTEX range ND to 9,980 ug/L (MW-1). MTBE range ND to 8.3 ug/L (MW-3). (RJF) 8/14/2009 - Reviewed Drilling Work Plan, dated 6/29/2009, by Delta, pdf copy via email. Delta proposes to install 2 monitoring wells northwest and southwest of MW-1. Email comments to Delta requiring one more downgradient well at the east side of the canopy. Revision due 9/2009. (RJF) 9/1/2009 - 2Q2009, 8/5/2009, by Delta. Active station. The monitoring well network was gauged and sampled on 6/29/2009. 3 wells were gauged. NO LNAPL. DTW 10.87' to 17.20' bg. Flows to southeast. 3 wells were sampled. BTEX range ND to 10,407 ug/L (MW-1). MTBE range ND to 7.1 ug/L (MW-3). (RJF) 9/11/2009 - email from Delta. attached with the SHAR of 12/29/2003. Delta installed SB-6 at the east side of the canopy/tanks. The boring was advanced to 11.5 feet bgs. Weathered bedrock was encountered at approximately 8 feet bgs and there was no overburden saturation. soil sample taken from 9-11.5 feet, no VOCs/SVOCs detected. Delta requested not to install the well over there as required by DEC 8/14/2009. (RJF) 3Q2009, 12/7/2009, by ARCADIS. 3 wells were gauged

S106002004

and sampled on 9/25/2009. LNAPL in MW-1 (0.01'). Max benzene 81 ug/L (MW-1). Max BTEX 6,200 ug/L (MW-1). Max MTBE 6.3 ug/L (MW-3). ARCADIS requests to reduce the monthly gauging to quarterly based on the intermittent nature of LNAPL occurrence in MW-1. 4Q2009, 2/5/2010, by ARCADIS. 3 wells were gauged and sampled on 12/30/2009. DTW 11.34-17.20' bg. Flows to east-southeast. NO LNAPL. max benzene 34 ug/L (MW-1). Max BTEX 7,900 ug/L (MW-1). Max MTBE 5.2 ug/L (MW-1). Due to project transition, the monthly gauging did not occur in October, November or January 2010, but has now resumed. Installation of 3 additional wells was proposed to DEC 12/2009 and will schedule field upon approval. 3/16/2010 - Reviewed Investigation Work Plan revision, dated 3/8/2010, by ARCADIS. ARCADIS proposes to install 3 monitoring wells, MW-4 west of the canopy, MW-5 south of the canopy in between MW-1 and MW-2, MW-6 east of the canopy. Work plan is approved. Report due 6/2010. (RJF) 5/21/2010 - 1Q2010, 4/28/2010, by ARCADIS. 3 wells were gauged and sampled on 3/12/2010. DTW 19.73-21.33' bg. Flows to east-southeast. NO LNAPL. Max benzene 52 ug/L (MW-1). Max BTEX 7,500J ug/L (MW-1). Max MTBE 4.5J (MW-1). The 3 new wells are scheduled to be installed in 5/2010. ARCADIS requests reduce monthly gauging to quarterly. 08/26/10: This spill case is transferred from R. Feng to J. Kolleeny. Reviewed Results of 2nd Quarter 2010 GW Monitoring and Subsurface Hydrocarbon Assessment Rpt by ARCADIS, both dated 8/16/10 (in eDocs). 2nd Quarter 2010 sampling shows high dissolved contam in well MW-1. Subsurface Invest Rpt. summarizes install'n & sampling of 3 new soil borings, two of which were converted into mon wells (3rd boring hit refusal on presumed bedrock w/o hitting GW). Borings found saturated zone soil contam at MW-4, and significant GW impacts at MW-4 and MW-5. ARCADIS proposed adding new wells to mon program, continued quarterly mon, and evaluation of remedial technologies, feasibility study and remedial action plan. I sent letter (in eDocs) to Jon Armstrong of BP, cc's to Ray Wagner and Andrew Korik of ARCADIS, asking for addt'l delin wells to north & west of most contaminated wells (MW-1, MW-4 & MW-5), with work plan for wells due by 9/17/10 and RAP due by 12/3/10. - J. Kolleeny 08/30/10: Spill no. at adjacent former Merit Station to north of site (cleanup being managed by Hess) is 9814075; see rpts in eDocs for GW data. - J. Kolleeny 09/01/10: On 8/27/10 received email from Ray Wagner of ARCADIS: "I believe we can accommodate you on request to add Former UST areas to site plans, where applicable, and we have this info. We will begin this process; please keep in mind there may be a little lag in updating some sites as we will be pulling figures from archive site files sent from Delta. I would like to have a call with you to discuss recently submitted investig rpt for BP station 17782 and your request for addt'l delin wells to west & north of MW-4. Merit site to north has wells just north of MW-4, and stepping out to west of MW-4 is limited due to subway and street. Please let me know if you would be available to discuss this later today or early next week." Spoke with Ray later that day, asked if he could send site plan showing northern half of site (former Merit Station), where cleanup is being managed by Hess. On 8/30/10, he sent figure and 2009 rpt by EnviroTrac showing wells on north portion of site and GW data. I sent email: "Thanks for fig. and rpt. Have you been able to find out anything about location of former USTs at former Amoco station?" He replied he would have that info by 9/1/10. On 9/1/10, received email from Andrew Korik of ARCADIS showing former UST locations on former Amoco & Merit portions of site (in eDocs). I sent email to Andrew & Ray of ARCADIS, cc to Jon Armstrong of BP:

"Thanks for sending site plans with former UST locations. I looked over fig. and 2009 EnviroTrac rpt sent few days ago by Ray, and I also looked at more recent EnviroTrac rpt (July 2010) for northern (former Merit sta.) portion of site, and I see that monitoring well "MW-4" on southwestern part of that site has either been destroyed or is not being sampled. Therefore, I believe that an add'l well to north of ARCADIS well MW-4 on former Amoco site, near former property line, is warranted. In light of constraints posed by nearby subway & Grand Concourse, I will not at this time ask for add'l delin wells west of contam area represented by wells MW-1, MW-4 & MW-5. Please contact me if you have questions." - JK 09/07/10: On 9/2/10, received email from Andrew Korik of ARCADIS with attached site plan showing proposed add't'l well location as requested (in eDocs). Email stated: "Per your rqst, see attached fig which shows location of one add't'l mon well proposed to be installed near former property boundary north of our existing MW-4. With your approval, we will schedule install'n & sampling of this well in accordance with procedures outlined in 3/8/10 Work Plan, approved by NYSDEC. Please contact me if you have any questions. Due to proximity of subway tunnel under street and portion of sidewalk, well may need to be moved 5 or 10 ft to east pending comments from NY MTA. Thank you." On 9/7/10, I sent email reply, with cc's to Ray Wagner of ARCADIS & Jon Armstrong of BP: "I would prefer if you could install new well about 5 ft to south of proposed location shown on attached drawing. However, I understand that final location of well may be largely determined by presence of subsurface utilities. Please consider this email as authorization to proceed with install'n of add't'l mon well. Well should be installed in accordance with procedures outlined in 03/08/10 Work Plan approved by NYSDEC. Feel free to contact me if you have any questions." Andrew wrote back: "Will try to install per your preference, assuming field conditions allow." - JK 11/22/10: Received email from Andrew Korik of ARCADIS: "Just wanted to update you on work at BP site 17782 at 350 Grand Concourse. We installed and sampled add't'l well along sidewalk as requested. I am just wrapping up combined 3rd quarter rpt/well install'n rpt and expect to have something to you next week. We are also reviewing remedial alternatives and will be developing a RAP shortly." - J. Kolleeny 03/01/11: Reviewed Results of 3rd Quarter 2010 GW Monitoring and Intall'n of Add't'l GW Mon Well rpt by ARCADIS dated 12/3/10 (in eDocs). Results of Sept. 2010 GW sampling show MW-1 had 4,050 ug/L total BTEX (down from 7,890 ug/L in June 2010), MW-4 had 6,390 ug/L tBTEX (down from 13,600 ug/L in July 2010). New well MW-6A was intalled as requested by DEC; soil samples showed VOC detections but no TAGM 4046 exceedances in sample at GW interface (12.5-13 ft bgs), but significant exceedances in soil sample from below water table (18-18.5 ft bgs), including 15 mg/kg ethylbenzene, 73 mg/kg m,p-xylene, 19 ug/L o-xylene, 42 mg/kg 1,2,4-trimethylbenzene, and 14 mg/kg 1,3,5-trimethylbenzene. GW sample from new well MW-6A, taken in Oct. 2010, was very contaminated, with 12,500 ug/L tBTEX and over 15,000 ug/L total VOCs. Rpt recommendations state quarterly GW monitoring will continue, with MW-6A added to mon program, and that RAP will be prepared and submitted to DEC in Jan. 2011. - J. Kolleeny 04/08/11: Reviewed 4th Quarter 2010 GW Monitoring and Analysis Rpt by ARCADIS, dated 3/7/11 (in eDocs). Results of Nov. and Dec. 2010 GW sampling show MW-1 had 6,150 ug/L total BTEX in Nov. 2010 (up from 4,050 ug/L in Sept. 2010) and increased to 10,700 ug/L tBTEX in Dec. 2010; MW-4 had 9,520 ug/L tBTEX in Nov. 2010 (up from 6390 ug/L in Sept. 2010) and increased to

10,600 ug/L tBTEX in Dec. 2010; MW-6A, not sampled in Nov. 2010, had 12,800 ug/L tBTEX in Dec. 2010 (up a little from 12,500 ug/L in Oct. 2010). Rpt recommendations state quarterly sampling & monthly gauging will continue, and RAP will be submitted in March 2011. - JK 04/11/11: Reviewed Remedial Action Work Plan for Anaerobic Biological Oxidation by ARCADIS, dated 2/28/11 (in eDocs). RAWP proposes injection of sulfate via 5 new injection wells, to enhance bioremediation and address persistent GW contam along west side of site. After 1st injection, one or two rounds of performance monitoring will be performed to determine frequency of addtl injections. I sent approval letter (in eDocs) to Jon Armstrong of BP, cc's to Andrew Korik & Gene Choquette of ARCADIS. - J. Kolleeny 4/11/2011 - Spill transferred back to JFeng. 5/4/2011 - email from Andy Korik "June - we are scheduled to install the injection wells per the approved RAWP starting Monday May 9 at the 350 Grand Concourse site. Please call me if you have any questions. Can we change the monthly gauging to quarterly at these sites where we have not seen product in over 1 year?" 5/5/2011 - email to Andy Korik "Andy, Yes, you can switch from monthly gauging to quarterly gauging for this site. In yesterday's email you said the field work will start on Monday 5/9/2011, how many days are you expected to be in the field? June" email from Andy Korik "The first day will be coring and hand clearing of the borings. I expect the well installations will start on Tuesday and be finished on Thursday - so 4 days on site (3 if things go very quickly)." JF 5/17/2011 - received email attached with 1Q2011 quarterly report. eDoc. JF 5/25/2011 - email from Andy Korik of ARCADIS "June - here is notification that the injection wells were installed at 350 Grand Concourse. Injection well IW-03 could not be installed due to shallow refusal with 4 attempts. We can compensate by increasing injection volumes at the other 4 wells. Still waiting for USEPA approval to inject." Sulfate Injection Well Installation Notification was attached. eDoc. JF 7/11/2011 - 1Q2011, 5/17/2011, by ARCADIS. The groundwater samples were collected on 3/31/2011. 6 wells were sampled. MW-6A located in the north of MW-4 and west of the canopy was installed in 10/2010. NO LNAPL. The site is changed to quarterly gauging. Max BTEX 11,000 ug/L (MW-6A). Max MTBE 12 ug/L (MW-5). Sulfate Injection Well Installation Notification, 5/25/211, by ARCADIS. The installation of four sulfate injection wells took place during the week of May 9 through May 13, 2011. The approved RAWP specified that 5 injection wells to be installed; however, due to refusal at 1.5 to 5 feet depth during 4 attempts to install well IW-03, an injection well was not installed at the proposed IW-03 location. Injection volumes at IW-2 and IW-04 can be adjusted to compensated for the absense of IW-03. They submitted an Inventory of Injection Wells package to USEPA on 5/5/2011. Will notify DEC one week prior to the injection. No soil and groudwater samples taken. JF

Remarks: impacted soil discovered tank removal - will be excvated during rebuild

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND" 4/10/2002 - Mr. Levent Eskicakit at ATC (212-353-8280)submitted a Site Closure Letter (with backup data) in October 2000. Sangesland requested additional rounds of groundwater sampling which was done in Feb 2001, Sept 2001 and January 2002. Samples were taken from 3 wells (MW1, MW2, MW3) The results showed continued declines in BTEX and MTBE levels over time. Samples from the three wells from Feb 2001, Sept 2001 and Jan 2002 all show non-detect for BTEX. In only the Feb 2001 sample there were trace levels of a couple of VOC's, but these were all non-detect by the Sept 2001 sampling. MTBE levels in MW1 have dropped over these last three sampling cycles from 458 (ug/l) to 199 and finally to 138 (Jan 2002) MTBE levels in MW2 have been trace (<5 ug/l) for this period. MTBE levels in MW3 were trace and are now non-detect. Based on this information, the NYSDEC is closing this site out with a "No Further Action" letter. The only exceedance of state standards at this time is for MTBE in MW1. Based on the historical data, the NYSDEC believes

DER Facility ID: 168750
 DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN" 1/5/04 BPAmoco in operation and taking responsibility for southern half of property. Reference spill #0111974.(KMF). 11/26/2003 Reassigned from O'Dowd to Sun. 01/29/2004-Sun-File Update by Sun: Sun sent a Stipulation Agreement to Hess requiring the complete delineation of the contamination, including the restoration of MW-1 and MW-8, and submittal of the Operation, Maintenance and Monitoring Plan. The Department approves the remedial action plan prepared by EnviroTrac, dated July, 2001. The Department set a deadline of 2/20/04 for the Respondent to return the signed Stipulation Agreement. (WJS) 03/26/04- The Stipulation Agreement was signed by Hess on 03/10/04 and executed by the Department on 03/24/04. (WJS) 08/11/04-File Update by Sun: On 08/11/04 Sun approves the Investigation Plan submitted July 8, 2004 by Michael Matri, Project Manager for Hess Corp.The two soil borings/monitoring wells proposed in the Investigation Plan will be used to replace well MW-8 and will be located east and west of the former MW-8 location. The approved letter was mailed to Hess on 08/11/04. (WJS) 05/09/05-File Update by Sun: On 05/05/05, thr Department held a project review meeting with Hess' Project Manager (Mike Matri) and his consultant (EnviroTrac). Per Mike Matri, EnviroTrac has contacted Metropolitan Transportation Authority (MTA) in order to obtain access to delineate along the eastern (up-gradient) portion of the site adjacent to the MTA New York City Transit subway. Currently, Hess drilling contractor, Submmit Drilling Co., Inc., is obtaing the necessary Railroad Protective Liability Policy to satisfy MTA's insurance requirements. The delineation will be conducted once the work is approved by the MTA.(WJS) 10/27/05: Site reassigned from Sun to Andersen. 10/27/05: Reviewed the second quarterly 2005 update report dated 8/19/05. Additional delineation is still in progress. 12/6/05: Reviewed quarterly report dated 11/22/05. Six monitoring wells sampled on October 6, 2005. Max BTEX 3,309.4 ppb (MW13) and max MTBE 1,250ppb (MW13). Additional delineation delayed while waiting for MTA permit. 1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and ET. Additional delineation is currently awaiting an MTA permit. 3/29/06: Received email from Thomas Bosshard of EnviroTrac : The two (2) up-gradient monitoring wells at the referenced site have been successfully installed. The new monitoring wells will be incorporated into the site's quarterly groundwater monitoring schedule with the second quarter 2006 sampling event scheduled for April 2006. The monitoring well installations and April 2006 groundwater monitoring event will be summarized in the site's next quarterly Update Report. 6/12/06: Reviewed the first quarterly 2006 update report. Groundwater samples collected on January 19, 2006. Max BTEX 6,032 ppb (MW12), max MTBE 2,830 ppb (MW12). Upgradient on-site wells installed in March. Installation of a well downgradient of MW12 and a RAP required by September 12, 2006. 6/30/06: Meeting on 6/28/06 with Hess, NYSDEC, Quantum, EnviroTrac and GSC. Hess will ask for access to the adjacent RR yard to delineate. ORC may be utilized as a remedial method. 7/12/06: Reviewed second quarterly 2006 report. ORM socks in MW12 and 13. ORC socks will be installed in MW15 and MW16. Groundwater samples collected on 4/4/06. Max BTEX 13,571 ppb (MW15). Max MTBE 964 ppb (MW12). 8/23/06: Received email from Erin Goelz of ET. Delineation not possible in the metronorth area east of the site. Delineation possible on Park Avenue, but this is far from the site. Three wells on Park Avenue were proposed. Wells not required by the Department

because they are far from the site. RAP due 9/12/06. 8/29/06: Spoke with Ed Russo. A request for an extension for RAP submission will be required because pilot testing will be conducted on site. Local treatment is not feasible due to subsurface piping on site and the subway nearby. An email request for an extension will be submitted. Power supply at the site may be problematic, ConEdison will be contacted. This site is currently a BP gasoline station. 9/8/06: Received email from Ed Russo. Requested extension until November 30 to submit RAP in order to complete SVE pilot testing on MW's 12 and 13. SVE test tentatively scheduled for October 15. ORC socks will be installed in MW 15 and 16 ASAP. Extension approved. 10/5/06: Received update report dated 9/27/06. Wells sampled on 7/13/06. Fluctuating concentrations. Max BTEX 81,251ppb (MW15), max MTBE 1,650 ppb (MW12). ORM socks installed in MW 15 and 16. Contamination may be in the bedrock. RAP due 11/30/06. 12/7/06: RAP conditionally approved. SVE will be used in six wells, STRE in MW 15 and 16 because could not trench in this area, ORC socks in six wells. Conditions of approval: 1) more aggressive groundwater remedial strategy for MW 12, 15, 16, and 2) treatment method air effluent. 12/28/06: Reviewed update report dated 12/20/06. Fluctuating gw concentrations. Max BTEX 39,412 ppb (MW15), max MTBE 718 ppb (MW12). 1/17/07: Meeting on 1/16/07. This is the only Hess site not being transferred to Delta. A RAP addendum will be submitted addressing gw contamination. 3/13/07: Reviewed update report. Wells sampled on 1/11/07. Max BTEX 31,608 ppb (MW15), max MTBE 1,140 ppb (MW12). Fluctuating groundwater concentrations. ORM socks installed in MW9, and MW12-MW16. SVE system not installed yet. Emailed Hess, EnviroTrac regarding the SVE implementation schedule, and for details on the existing Well Stripper system on site. 3/15/07: Received email from Ed Russo: "I sent you an email on 2/23 summarizing the well stripper, how it works, etc. Please confirm that you received that email. If not, I will resend it. If you did receive it and have further questions or comments, let me know and I will provide you with any additional information you may need. As for the schedule, we are currently working with BP (who currently operates the site) in an effort to connect our system to the BP station's existing electrical system. This would obviously save a great deal of time since CONED has been very slow to provide us new power drops for some of our other recent systems. We are also working with BP on an access agreement to install the system. Once these issues have been resolved, the system will be installed. Due to the fact that most of the subsurface work is already done, the system install will be very quick once the access and electrical issues are finalized." 3/16/07: Received email from Ed Russo: "attached are a picture of the well stripper and a pdf document summarizing how the well stripper works. As you discussed with Dawn Coughlin of Hess at your recent meeting, we are proposing to install permanent well strippers in MW-12 and MW-13 and bring a portable well stripper to the site for periodic full day remediation events (permanent well strippers cannot be installed in MW-15 or MW-16 since these wells are not connected to the remediation system). The permanent well strippers within MW-12 and MW-13 will be sampled (influent and effluent) on a monthly basis during system O&M events and the portable well stripper will be sampled for influent and effluent during the periodic remediation events. Note that we are in the process of working with BP to get access to the site to install the system. In order to expedite the install once access is obtained, we will be ordering the equipment so that we can prepare the shed to be delivered to the site once access

S103828392

is granted." 7/31/07: Received email from Ed Russo:"GW sampling was conducted on the site about 2 weeks ago. We should get data from the lab this week and will prepare an update report for submittal to you right away. As far as the system goes, we have received approval from BP (the current owner/operator of the site) to install the system. Our electrician is working on getting power from CONED. We have ordered all equipment and are working on building the shed in house so that once electrical power is available, we can deliver the system to the site and connect it/start it up. Once we get closer to a start date, I will be in contact with you to schedule start-up so you can be onsite if you'd like." 9/5/07: Reviewed quarterly report. Fluctuating groundwater concentrations. Wells sampled on 7/20/07. Max BTEX 47,580 ppb (MW15). Max MTBE 681 ppb (MW12). ORM socks replaced in MW9 and MW12 - MW16. SVE system and well strippers not installed yet. Short term remediation events planned for MW15 and MW16. Emailed Ed Russo to followup on system startup date and initiation of short term remediation events. 10/9/07: Received email from Ed Russo:"we have scheduled an on-site meeting with representatives of BP, Delta Consultants (BP's consultant), and EnviroTrac for Monday October 15th. BP and Delta wanted to be fully aware of our proposed work before agreeing to let us proceed. We expect to get the approval to proceed with the sitework at that meeting. The shed for the remediation system and the control panel have been completed in our shop and can be mobilized to the site once we obtain the access. Our electrician is ready to go and can get to the site within about a week once we obtain access and CONED involvement will be minimal since we will be connecting to BP's station electric for our system electrical requirements. In addition, since the majority of the subsurface work was done a few years ago during the construction of the BP station, only minimal site work is required, so we expect to be able to start the system and short-term remediation events within 4-6 weeks of access approval. I will send you an update of our progress following the October 15th meeting. Edward E. Russo Senior Project Manager EnviroTrac Ltd. 5 Old Dock Road Yaphank, NY 11980 P: 631.924.3001 F: 631.924.5001 <http://www.envirotrac.com>" 2/14/08: Received email from Ed Russo:"We wanted to let you know that the SVE/Well Stripper system was activated at the referenced site on January 29, 2008. Preliminary data indicates that the system is effectively removing BTEX and MTBE from onsite wells. The initial start-up period will last another week or so and then system O&M will continue on a monthly basis thereafter. A full round of groundwater sampling will be conducted this month and a report summarizing that data and all system data collected to date will be submitted to you before April 30, 2008. If you would like to visit the site to see the system or if you have any questions or comments, please give me a call at (631) 924-3001" 3/12/08: Reviewed Fourth Quarterly 2007 update report dated November 27,2007. Wells sampled on 10/16/07. Max BTEX 16,839 ppb (MW15), max MTBE 727 ppb (MW12). System startup data will be submitted in next report. 4/15/08: Reviewed update report dated April 8th, 2008. SVE and well strippers (WS) in operation, and short term remediation events and WS being conducted in MW-15 and MW-16. Maximum BTEX concentration 3,779 ppb (MW16), maximum MTBE concentration 325 ppb (MW12). General downward trend in contamination. 8/7/08 - Carlson: Reviewed July 2008 Hydrogeologic Status Report. Wells sampled on 6/30/08. Maximum BTEX concentration 54,315 ppb (MW15). SVE/WS system in operation. Fluctuating concentrations. 10/22/08 - Carlson: Meeting with Hess, Envirotrac,

S103828392

and NYSDEC. 11/17/08 - Carlson: Reviewed October 2008 Update Report. Wells sampled on 8/26/08. Fluctuating concentrations in some wells. Maximum BTEC concentration 1,068 ppb (MW12). System in operation. 2/20/09 - Carlson: Reviewed January 2009 Update Report. SVE and WS in operation. High effluent concentrations in MW15. Effluent concentrations were not measured from MW12,13. Wells sampled on 11/24/08. Hot well MW12 was not sampled (why?). 3/18/09 - Carlson: Meeting with Hess and Envirotrac. Not enough water to sample WS effluent in some cases. 5/7/09 - Carlson: Reviewed April 2009 Update Report. SVE/WS in operation, and monthly STRE from MW15. Wells sampled on 2/27/09. Maximum BTEX concentration 390 ppb (MW15). Strong decreasing trends. 5/28/09 - Carlson: Received email from Ed Russo:" while out at the site this week conducting routine GW sampling, our technician noted product (0.18') in MW-15. This well, and the entire site, has cleaned up dramatically since the system was activated and short term remediation events commenced a couple of years ago. As you can see from the attached photo, the product appears to be fresh gasoline. Our technician has taken a sample of the product and the GW within the well. We will analyze the GW for BTEX/MTBE as well as ethanol and conduct a fingerprint analysis on the product to try to confirm that it is a new release since this site is an active BP station. The technician did not note any indication of a surface spill and the well seal and manhole have been reported to be in good condition. Once we get results of the ethanol analysis and fingerprint analysis, we will let you know. If it appears that this may be a new release, we would need to notify BP." 8/7/09 - Carlson: Reviewed July 2009 update report. SVE/WS in operation. STRE on MW15 but high concentrations - effluent should be monitored. MW15 fingerprinting results not included. 8/17/09 - Carlson: Reviewed fingerprinting results of product identified in MW15. Product was found to be weathered gasoline from the old release. 8/19/09 - Carlson: Meeting with Hess. System in operation. 11/17/09 - Carlson: Reviewed October 2009 Update Report. Large decrease in concentration in MW15. System in operation. 1/27/2010 - Carlson: Meeting with Hess. Well stripper wells are often dry. 2/5/2010 - Carlson: Reviewed update report. Low dissolved concentrations. 5/20/2010 - Carlson: Meeting with Hess. 5/27/2010 - Carlson: Reviewed update report. SVE to be shut down due to low recovery. 8/13/2010 - Carlson: Reviewed July 2010 Update Report. Spike in concentration in MW15. SVE shut down due to low recovery. STRE/well stripper on MW15 monthly. 8/30/2011 - Obligado - Hess is still doing well stripper STRE on wells MW-12 and MW-15 monthly.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

 DEC Region: 2
 DER Facility ID: 16558
 DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SAWYER" 9/08/03 1541 Hrs Sawyer forwarded pbs report to Sigona for inspection. The pbs registration is overdue. 9/17/03 Rossan performed PBS inspection and found them removing tank for closure which opened another spill because of the contamination. 9/23/03 - Sawyer - Sent contaminated soil letter to 381 Canal Place Management. 2/11/04 1030 Hrs - Sawyer - Sent contaminated soil letter to Pride Furniture, Attention: Joseph Muller. 6/24/05 - Spill Lead_DEC Field changed to "Grathwol". After repeated efforts by M. Haggerty to contact owner (received no cooperation) and 30-day Department letter requesting information was ignored, J. Grathwol visited the site on 2/16/06. Talked with employees of Pride Furniture. They stated they had no knowledge of the spill. Asked me to call back and discuss with owner. Called several times with no success, Pride Furniture staff stated the owner would call me directly, but it did not happen. Pride Furniture is heated by "salamanders", torpedo-shaped heaters - no oil heat. Spill #8709462 is 3 tank failures with gross leaks and was closed because of the multiple spills at the same address. Pride Furniture phone number: 718-585-1400. Recommend this project as potential PIN project. {Grathwol} 9/11/06 assigned to bf 9/11/06 sent ttf old spill letter. bf Undated notes from telephone conference with Schretzmayer in the hard file, entered here 4/22/10: J. Urda case 4/30/09 report - no delineation done yet, wants site visit Phase II investigation Sept. '03 not in file (e-docs). Proposal is to delineate soil and groundwater determination. Will plan be approved by DEC? J. Schretzmayer wants site visit for boring locations. Last page - will send investigation report.
 ----- 9/23/03 cont. soil letter sent
 ttf 001 & 002 closed removed 10/18/03 (not processed) 003 closed in placed 9/17/03 send cont soil letter? ++++++ NOTE:
 Report referred to above is not in the file. bf

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110004505991

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

 DEC Region: 2
 DER Facility ID: 347079
 DEC Memo: 6/18/08 bf: Sent ttf letter to: Ross Sposato Chairmasters, Inc. 200 East 146th St. Bronx, NY 10451 6/30/08 Received letter from Ross Sposato of Chairmasters. Tank tested on 5/9/08 and failed. Tank was excavated and they are in the process of isolating lines. Also received message from him on 6/26/08 stating the same. (718)292-0600 x-205. bf 7/29/08 On 7/14/08, received letter from Ross Sposato of Chairmasters. Advanced Tank retested tank and tank passed. Piping will be replaced. After he receives test results, he will send test results and PBS Application. Called Ross S. (718)292-0600 x-205. Returning his call. Left message that there is no fee for tank test processing. Also, noted that a reply to my letter for tank test failure is required to be prepared by third party and needs to explain contamination and repairs made. bf 8/25/08 Received passing tank test report. on 7/31/08. Reviewed and found it not acceptable because technician did not sign the report. Sent tt return letter to Ross Sposato at address above and included request for tank test failure letter response. bf 9/5/08 Yesterday, received message from Ross of Chairmasters. Info was mailed yesterday. bf 9/13/10 Received call from Ross of Chairmasters. He wanted the status of his tightness test report. I told him I have not received the report nor did I receive a response to the ttf letter. He said that he will fax letter and report to me. bf 9/13/10 This afternoon received fax from ATS that the piping was replaced and there was no spill. Tank tightness test report is still needed to close this case. bf 9/13/10 later this afternoon, received passing tank test report by fax. NFA. bf 9/20/10 Received call from Ross Sposato requesting letter for closure. Faxed amnd mailed it to him. Fax:(718)292-0613. bf

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Updated By: JHOCONNE

Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.58 acres, and is nearly entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. See Figure 1 for the site location and Figure 2 for the site plan. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation and is currently occupied by a self storage facility and art studio space. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Historical Use: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractor s yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA) ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building. Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology: Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow

1000108749

aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Nature and Extent of Contamination: This section summarizes the assessment of existing and potential future environmental impacts presented by the site. In general, environmental impacts may include existing and potential future exposure pathways to fish and wildlife receptors, wetlands, groundwater resources, and surface water. An evaluation of exposure pathways did not identify any current or potential impacts to ecological resources. Site related contamination is impacting groundwater; however, groundwater sampling has indicated that the groundwater plume is limited in extent and has not traveled a significant distance (and not to the Harlem River). The groundwater in Manhattan is not used as a source of potable water. Protection of the groundwater resource will be addressed in the remedy selection process. In addressing the groundwater resource, the Department will consider the current and reasonably anticipated future use of the groundwater in the area and technical practicability of achieving the SCGs. Surface water resources near the site include the Harlem River, which is located 200 to 300 feet to the east of the site. The Harlem River is a Class I saline waterbody, suitable for secondary contact recreation, fishing, fish propagation and survival, but not suitable for swimming. No current or potential site-related surface water impacts have been identified. Neither the River nor groundwater are used as a source of potable water and no non-potable water supply wells or intakes are known to be located in the immediate area.

Health Problem: Significant Threat: The site presents a significant environmental threat due to the releases of contaminants from source areas into groundwater. As a result of identified hazardous waste disposal, the Department listed the site as a Class 2 site in the Registry of Inactive Hazardous Waste Disposal Sites in New York in July 1998. A Class 2 site is a site where hazardous waste presents a significant threat to the public health or the environment and action is required. The site remedial program is being performed by 2350 Fifth Avenue Corporation as a Potential Responsible Party (PRP).

People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building. Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants have been found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. Sampling indicates that this may be a result of soil vapor intrusion and/or the off-gassing and intrusion of contaminants from insulating materials that are present under one part of the building's foundation. To minimize the potential for the inhalation of site-related contaminants, a system that ventilates/removes contaminated air was installed beneath the portion of the on-site building with the insulation. Subsequent testing indicated that this system has been successful at reducing the levels of contaminants in

the indoor air and that the installation of a similar system beneath the remaining portion of the building would help to maintain the levels to within background ranges. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

BROWNFIELDS **S109580082**
N/A

BROWNFIELDS:

Program: BCP
 Site Code: 410705
 Site Description: LOCATION: The site is located in an urban industrialized section of the south Bronx at the intersection of 3rd Avenue and the Major Deegan Expressway (I-87) between 135th Street and 136th Street. It is located approximately 1000 feet east of the Harlem River. The property consists of Block 2320, Lot 11 of tax map 20902, and is 0.214 acres in size. SITE FEATURES: The site contains gasoline pumps and concrete islands from a former gasoline station. CURRENT ZONING/USE(S): The site is zoned commercial but is currently vacant.

2477 THIRD AVENUE PROPERTY (Continued)

S109580082

HISTORICAL USE(S): The site was a gasoline filling station from the 1950 s until approximately 1989. Releases of petroleum products to the environment resulted in the site contamination. Previous site investigations were conducted from 2002 to 2008 in response to NYSDEC Spill # 0230034. None of these investigations provided a comprehensive investigation to determine all the impacts on and off the site; however, information was generated to determine that a significant petroleum contamination problem exists. A Remedial Investigation (RI) was completed under the Brownfields Cleanup Program in June 2011. The areas of petroleum contamination were defined in that RI. **SITE GEOLOGY AND HYDROGEOLOGY:** The site is approximately 15 feet above mean sea level. The nearest surface water body is the Harlem River, approximately 1000 west of the site. Groundwater was encountered from 7 to 10 feet below ground surface and was found to flow in a south-southwesterly direction towards the Harlem River.

Env Problem: **NATURE AND EXTENT OF CONTAMINATION:** Based on investigations conducted to date, the primary contaminants of concern in site soils and groundwater are petroleum related compounds. On-site soil samples exceeded Standards, Criteria, and Guidance (SCG) levels for VOCs at one of 14 samples taken in a 2010 investigation. Soil samples were taken from 2.5 to 149 feet below surface. A sample at MW-105 at 9.5 feet below surface included: 1,2,4-trimethylbenzene (up to 480 mg/kg), 1,3,5-trimethylbenzene (up to 110 mg/kg), ethylbenzene (up to 150 mg/kg), naphthalene (up to 17 mg/kg), n-butylbenzene (up to 37 mg/kg), propylbenzene (up to 81 mg/kg), o-xylene (up to 170 mg/kg), p/m-xylene (up to 700 mg/kg), and toluene (up to 12 mg/kg). All of the contaminants at this sample location exceeded the unrestricted use Soil Cleanup Objectives (SCO) and several exceed the commercial SCO. No free product was found. Seven SVOCs were detected in soils at levels exceeding the SCO for unrestricted use. The highest level of soil contamination was found at 9.5 feet below ground surface, however levels met the SCOs near the surface. On-site groundwater standards were exceeded for gasoline related VOCs including: 1,2,4-trimethylbenzene (up to 3,300 ug/L), 1,3,5-trimethylbenzene (up to 820 ug/L), benzene (up to 72 ug/L), ethylbenzene (up to 920 ug/L), toluene (up to 770 ug/L), o-xylene (up to 620 ug/L), m/p-xylene (up to 2,300 ug/L), and MTBE (46 ug/L). These levels of contamination were found in wells in the southern half of the site and wells in the northern part of the site were found to be non-detectable for any contaminants.

Health Problem: Since this site is covered with concrete and asphalt, people will not come into contact with the contamination unless they dig below the surface. People are not drinking the contaminated groundwater since the area is served by a public water supply that is not contaminated by the site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings is referred to as soil vapor intrusion. Because there is no on-site building, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a concern for the site in its current condition. However, the potential exists for the inhalation of site contaminants due to soil vapor intrusion for any future on-site construction. In addition, the potential exists for off-site migration of site-related contaminants in soil vapor.

BROWNFIELDS:

Program: BCP
 Site Code: 443691
 Site Description: Location: The site is +/- 1.8 acres, located at 285 East 138th St. in the Bronx. The Site is bordered on the west by the intersection of Morris and 3rd Avenues, to the north by East 139th St., to the east by residential buildings and the NYC Police Department 40th Precinct, and to the south by East 138th St. Properties surrounding the site are primarily residential, with some commercial and industrial uses. Site Features: The Site is currently occupied by a 7-story residential building which houses low-income senior citizens. The applicant is East One Thirty Eight Housing Develop Fund Co., Inc., which is an affiliate of the West Side Federation for Senior and Supportive Housing (WSFSSH). WSFSSH is a community-based organization that provides supportive and affordable housing for senior citizens and other at-risk populations. Historical Uses: Former uses on the Site include a gasoline filling station with five 550-gallon underground storage tanks (USTs), which occupied the southwest corner of the property for at least 40 years prior to 1968. A parking garage and auto repair facility with 2 USTs occupied the north-central part of the site from at least 1935 through 1978. A metal works was located on the southeast portion of the site from 1951 through 1978, and a mattress manufacturing factory was located on the northwest part of the site from 1944 through 1978. The proposed project involves a complete internal and external renovation of the existing building. The Site would be entering the BCP at the investigation stage. No cleanup track has been identified; however the use of the site will continue to be residential. Geology: The Site lies within an area classified as Urban Land. This soil type consists of urbanized areas where the majority of the surface is covered with buildings, roads, driveways, parking lots, and other manmade structures. Further investigation is required to obtain information on site-specific geology. Hydrogeology: Regional groundwater flow direction in the area of the Site is convoluted and will be determined following the installation of groundwater monitoring wells. May 11, 2011 - the Department signed the Brownfield Cleanup Program Acceptance Letter for this site. June 28, 2011 - the Department signed and executed the Brownfield Cleanup Agreement for this site.

Env Problem: Nature and Extent of Contamination: A Phase I Environmental Site Assessment was submitted as part of the BCP application. It

S109208037

identified several historic uses that may have caused potential subsurface contamination. However, no analytical data were included for review. The nature and extent of contamination, if any, cannot be established until a Remedial Investigation is completed.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

 DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "K FOLEY" 3/04/2003 - Closed Due To The Nature / Extent Of The Spill Report1/2/03 Reassigned From Sigona To Foley. Investigation Being Performed By Spartan Amoco Under Spill #9909670. Open Mobil #9208906.3/3/04 As Per The Closure Request Report Submitted For Mobil By Gsc, Spill #8905353 Initiated A Subsurface Investigation Conducted From 12/11/89-1/10/90 Which Included Installation Of 5 Mws (Mw-1A Thru Mw-5A). Vocs Were Above Groundwater Standards. This Was Summarized In The February 1990 Roux Subsurface Evaluation Report. Mw-1A Through Mw-5A Were Destroyed (4/90-11/91) Due To Construction Activities Conducted By Amoco. Five 4000Gal Gas Usts, One 550Gal Waste Oil Ust, And One 550Gal Fuel Oil Ust And Piping Were Removed From Site.A Subsurface Investigation Conducted In April 1991 Included Installation Of Two Soil Borings And One Monitoring Well(Mw-6). Results Were Summarized In 6/91 Roux Supplemental Subsurface Investigation Report.A Subsurface Investigation Conducted In November 1991 Included Installation Of 11 Monitoring Wells (Mw-1 Through Mw-5 And Mw-7 Through Mw-12) And One Air Sparge Well (Sp-1). Results Were Summarized In A Gti Report.Spill #9208906 Was Issued To The Site On 11/2/92 As A Result Of Contaminated Soil Observed During Amoco Site Construction Activities.

Remarks: 4K TANK FAILED PETRO-TITE. L R = 1 GAL / 30 MIN. CLOSED DUE TO LACK OF ANY RECENT INFO - DOES NOT MEET ANY CLEANUP REQUIREMENTS.

 DEC Region: 2
 DER Facility ID: 218930
 DEC Memo: PBS 2-156590 1/20/04 File review (Foley): Prior to divesting this site in March 1990, a site assessment was performed by Roux (hired by Mobil) which indicated elevated BTEX existed in both groundwater and soil, but no free product was found. Upon transfer of property(8/90), the new owner began to install new USTs. During tank replacement, 875 tons of contaminated soil was removed and disposed of. During construction, two upgradient wells were destroyed. Three downgradient wells remained intact. The two wells which were destroyed showed ND for BTEX during sampling. In May 1991, there was an apparent vapor problem in the kiosk at the now active Amoco station. Amoco installed a venting system to alleviate the problem. Based on this, Mobil installed two borings and one well in the vicinity of the kiosk. The report indicated that the soils surrounding the kiosk did not contain very high levels of BTEX in soil. The monitoring well installed contained 0.01' of product. This well is upgradient of all former Mobil tank areas. Additional constuction at the site for a car wash has destroyed three downgradient wells. Thus, only one well remains on the property. However, upon completion of the construction, up to ten additional wells shall be installed at the site. Wells will be installed after construction is completed. 11/91 Eleven monitoring wells and a sparge point were installed. 12/9/91 MW-11 had 0.84' of product. 1/22/92 MW-11 had 0.21' of product. 2/20/92 MW-11 had 7.16' of product. A vac truck has been scheduled on a biweekly basis to extract LNAPL from MW-11. 3/92 LNAPL was detected in MW-11 (0.07-3.02'). Approx 70gal was extracted from MW-11 on 3/4, 3/13, 3/16 using vac truck. Trace amounts of LNAPL were hand-bailed from MW-11 on 3/18 & 3/27. Water sample from car wash well was collected by Tyree, analyzed by Method 602, and returned ND. 4/92 MW-11 had 0.08-0.18' of LNAPL and approx 2.5gal LNAPL bailed. 6/8/92 An EZY Skimmer was installed in MW-11. 7/92-6/93 No LNAPL was detected in any wells. 1/94-3/94 MW-10 had 0.28' product. MW-11 had 0.01' product. 5/94 MW-11 had trace amount of product. 7/11/94 SVE started. DTW 16' bgs. 6 combination SVE/AS points. Will sample all MWs before sparge system started. 2/8/95 0.01' product in BD-1. BTEX from

S104278682

ND(MW-1) to 30,000ppb(MW-5). 10/27/99 Cross Deegan Realty notified by station operator of possible inventory loss. Alvin Petroleum exposed portions of system over next two weeks. No system leaks were detected. 11/9/99 Alvin Petro. requests a tightness test be performed. Crompco detected a leak in one of the four tanks and reported the failure. 11/10/99 Alvin Petro. exposed and removed remote fill box on the tank that failed test. A coupling that connects the piping to the overflow box was found cracked. The coupling was replaced and system retested tight. 11/16/99 Crompco retested system with FDNY and passed. 11/22/99 Impact Environmental performed a limited subsurface investigation of soil adjacent to coupling and concluded that gasoline had impacted soil/GW. Report states that current owner only intends on addressing contamination from 10/99 spill and not the 1992 spill. 10/31/00 Three wells sampled and gauged. SVE system removed from service. ORC socks in wells MW-1 and MW-5. BTEX from 15ppb(MW-12) to 868ppb(MW-1). MTBE from 31ppb(MW-11) to 49,000ppb(MW-1). 2/5/01 Seven wells sampled. BTEX from ND(MW-12) to 240ppb(MW-1). MTBE from <1ppb(MW-12) to 64,000ppb(MW-7). 4/26/01 Seven wells sampled. MTBE has increased in monitoring wells hydraulically downgradient from the current dispenser island and USTs. MTBE ranged from 14ppb(MW-11) to 920,000ppb(MW-10). BTEX ranged from 12.8ppb(MW-11) to 6,080ppb(MW-10). 10/23/01 Eight wells sampled. BTEX from 14ppb(MW-6) to 4,750ppb(MW-10). MTBE from 18ppb(MW-11) to 270,000ppb(MW-10). 1/17/02 Eight wells sampled. BTEX from ND(MW-5) to 1,794ppb(MW-10). MTBE from 29(MW-5) to 65,000ppb(MW-7). 4/30/02 Six wells sampled. BTEX from ND(MW-5 & MW-6) to 1173ppb (MW-10). MTBE from 7.6ppb(MW-1) to 24,000ppb(MW-5). 5/15/02 Sensitive Receptor survey identified PS 31 approx 850' to the southeast. There are residential and commercial buildings with basements immediately adjacent to the site to the north. A subway tunnel is located beneath E 149th St.

 03/17/03 REASSIGNED FROM ROMMEL TO VOUGHT. 11/18/03 Received CAP/Remediation Plan, 3rd Quarter 2003 monitoring report, and tank test results(pass). 12/10/03 Reassigned from Vought to Foley. See closed spills #0307681, 9208906. Review of Remediation Plan: A SVE/AS system was installed by Handex and operated on the property to address spill #9208906. The system is comprised of four soil vapor extraction wells and six air sparge points. At this time, the system is not operational. A monitoring program is being performed. 11/9/99 Tank system tightness test performed by Crompco indicated a leak near the remote fill box. The leak was repaired. Soil staining and petroleum odor was noted below the fill box. Spill 9909670 was reported. 11/22/99 Impact Environmental started subsurface investigation. Groundwater results exceeded standards. 7/7, 7/25, 10/23/00 Enhanced fluid recovery performed on MW-2 as an IRM. Impact Environmental proposes 1) monthly EFR on hottest wells for 6 months, 2) replacement/upgrade of air sparge equipment installed to address #9208906, 3) SVES to be modified to include MW-2. 9/3/03 Impact Environmental sampling data (for Amoco): BTEX levels range from ND(MW-5, 11, 12) to 1606ppb(MW-6). MTBE ranges from ND(MW-12) to 650,070ppb(MW-6). 10/6/03 GSC sampling data (for Mobil): BTEX ranged from ND(MW-2) to 3800ppb(MW-6). MTBE ranges from 9.8ppb(MW-11) to 1,240,000ppb(MW-6). 11/26/03 Impact Environmental data from 4Q2003 report shows MW-6 and MW-2 to be hot spots. BTEX ranges from ND(MW-12) to 6923ppb(MW-6). MTBE ranges from ND(MW-12) to 869,600ppb(MW-6). 2/2/04 Faxed stip to Mr. Hank Alpert, Cross Deegan

Realty. Due back 2/23/04. (FAX 516-365-1606) 2/11/04 STIP returned. Cover letter states that a previous CAP for spill #9909670 was already approved by DEC and was authorized to develop CAP for spill #0307681 (dated 11/13/03). 2/13/04 STIP fully executed. 3/4/04 Letter received from DDC(Bruce Rottner) to J. Semelmacher. Requests Amoco's participation in DOT reconstruction project instead of reimbursement of cleanup costs. 3/15/04 Called B. Rottner. He explained that he recieved a phonecall from the owners attorney who stated that contamination was from a Dept of Sanitation garage. However, monitoring well on that property was installed and was clean. Spartan will be sending another letter to DDC at which time B. Rottner will forward a copy to me. 3/10/04 Received 1Q04 monitoring report. Need to delineate around MW-6 and MW-2. 6/18/04 Received 2Q2004 monitoring report. 6/30/04 Met with Spartan Petroleum (H. Alpert) and Impact Env. Received hand-delivered letter dated 6/28/04. Site is located on 149th St between Gerard and River Avenues. The site was impacted by a release detected in 1992 while under lease to Mobil Oil. Mobil installed an SVE/AS system. A new release was confirmed and Spartan released Mobil from contractual obligations. As an IRM, EFR was performed on MW-2. Approx 1075gal GW was extracted. An enhanced SVE/AS was run from July 12, 2001 to the present. During the period from 11/9/99 to 3/3/03, there was a steady decline in contaminant concentrations. In May 2003, BTEX concentrations began to increase unexpectedly. A system test was performed and all lines and tanks tested tight. An off-site source was suspected. Identified a NYCDOS truck terminal upgradient. Also found many monitoring wells on the NYSDOS site. Thru a FOIL request, review of the NYSDEC files incide that the NYCDOS site is impacting 99 E 149th St. Request closure. 10/4/04 Received 3Q04 monitoring report. 11/19/04 Met with K. Kleaka and K. Scroope, Impact Env. NYCDOS property on eastside of Gerard Avenue (DOS Manhattan West 9). See spill #s 9513870, 9910856. 11/23/04 Email from J. Kolleeny- City's consultant, LiRo, had been performing EFR on wells with free product for several years until last year when a multi-phase extraction system went on line. A MW along E 149th St has had product in it which LiRo identified as weathered #2FO. Although they have been willing to vac out this well, and the remedial system now has extraction wells near it, LiRo has argued that the product in the well was likely coming from off-site because they claimed there was no DOS tanks at that end of their site. However, the PBS list an old 2000gal heating oil tank and a new (4/03) tank at the site. Asked LiRo to locate these tanks. Will keep me updated. 4/13/05 Spoke to K. Kleaka, Impact Env. Will be proposing to shutdown system soon as recovery is decreasing. Still concerned about DOS site having impacts on property. Proposal will include confirmatory soil sampling. 5/6/05 1Q05- GW sample collected on 3/14/05 from MW-8 did not detect any VOCs. Samples from MW-1 and MW-5 detected concentrations of VOCs but not above GWQS. MW-12 was paved over. Several detected concentrations from MW-2,6,7,9,10 & 11 exceeded GWQS. These concentrations are within ROI of system. Told H. Benjamin that it was not necessary to reinstall MW-12. 5/23/05 Sent email to K. Kleaka, Impact Env. After reviewing the July 2004-Sept 2004 and Jan 2005-March 2005 quarterly reports for Manhattan West 9 (operated by NYCDOS at 125 East 149th St, Bronx), it is not clear that the contamination detected at MW-2 is due to impacts from the NYCDOS facility. Historical data for 99 E 149th St shows a significant spike of MTBE at MW-6(869.6ppm) and at MW-2(191.2ppm). The historical data for the NYCDOS facility, dating back to 2000(with

Database(s)

AMOCO (Continued)

S104278682

some data gaps), does not indicate that the facility is acting as a source of off-site contamination. The only MTBE detection in the NYCDOS wells was in the NW corner of the property(170ppb in 1/00). NYSDOS has been operating a MPE system since 11/12/03. 11/8/05 3Q05 report - Total of 537.84lbs of hydrocarbons removed. Approx 9lbs recovered in last 22 day period. Groundwater concentrations highest in MW-2 at 1420ppb total BTEX and 1500ppb MTBE. MW-6 at 100ppb BTEX and 53ppb MTBE. MW-7 at 10ppb BTEX and 56ppb MTBE. 1/11/06 Met with K. Kleaka and H. Benjamin, Impact. To submit 4Q05 report. Redeveloped sparge points to try and increase efficiency of system which continues to operate. 2/17/06 4Q05 report submitted. SVE continues to operate. Lab analysis from 11/28/05 did not detect VOCs in MW-8. Wells MW-5 and MW-11 had concentrations which did not exceed GWQS. Samples from MW-1,2,6,9,and 10 did exceed GWQS. 3/30/06 1Q06 report submitted. BTEX from ND(MW-1,5,6,8,9,11) to 970ppb(MW-2). MTBE from ND(MW-5,6,8) to 980ppb(MW-2). SVE continues to operate. Total estimated hydrocarbons recovered is 538lbs. 6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM 11/27/06 Reviewed 2nd and 3rd Qtr 2006 Monitoring Reports. Groundwater contamination persists in the area of monitoring well MW-2 (~4000ppb). H. Benjamin of Impact Env. proposed performing a pulse test on the system to see if rebound will occur since the system appears to have reached asymptotic conditions. I sent an email to Mr. Benjamin requesting a map showing the radius of influence for each air sparge and SVE point and that GW contamination at MW-2 must be addressed. I also asked if there was soil contamination at the site. If so, has the SVE system effectively treated it? Must prove by confirmatory soil sampling. Email is in the file. - JAM 02/13/07 Reviewed a letter submitted by Impact Env. and dated January 17, 2007. The letter proposes: 1. All monitoring wells will be redeveloped utilizing a surge block and vacuum truck. 2. Monthly Enhanced Fluid Recovery (EFR) events will be performed on MW-2 to reduce the contaminant concentrations in the surrounding area. Said events will be performed utilizing a 2X4 inch diameter K-Packer on a 2-inch diameter drop pipe to maximize liquid and vapor capture. 3. Groundwater sampling will continue on a quarterly schedule. 4. SVE & Sparge operations will continue with the existing system. I sent an email approving these proposals. Groundwater sampling data and recommendations will be submitted in the next quarterly report. A hard copy of the email will be in the file. - JAM 3/29/07 Reviewed 4th Qtr 2006 Monitoring Report submitted by Impact Env. and dated March 6, 2007. All wells were sampled on November 29, 2006. Results were non-detect for total VOCs except for MW-2, which shows persistent levels of VOCs (2,675ppb Total VOCs). The SVE/AS system continues to operate at the site. According to the report, monthly EFR events on MW-2 should have begun in February 2007 and results will be included in the next Monitoring Report. - JAM 6/21/07 Reviewed 1st Qtr 2007 Monitoring Report submitted by Impact Env and dated May 30, 2007. On February 28, 2007, all wells were redeveloped and EFR events commenced on MW-2 All wells were then sampled on March 1, 2007. Wells MW-1, MW-6, and MW-9 showed non-detect results for total VOCs. Wells MW-5, MW-7, MW-8, MW-10 and MW-11 had slight exceedences for Napthalene (ranging from 68ppb to 100ppb). MW-2 showed a decrease of total VOCs from last monitoring round to 1,936ppb. The SVE/AS system continues to operate. - JAM 12/04/07 Reviewed 2nd Qtr 2007 Monitoring Report submitted by Impact Env and dated Sept 18, 2007. All wells were sampled on June 14, 2007 and monthly EFR events continue on MW-2. Wells MW-1, MW-2, MW-9,

Database(s)

AMOCO (Continued)

S104278682

MW-10 and MW-11 showed exceedences for total VOCs. Wells MW-5, MW-6 were not sampled because they were dry. MW-2 still has the highest level of VOCs, however, it showed a decrease from the last monitoring round to 857ppb from 1,936ppb. The SVE/AS system continues to operate. - JAM Reviewed 3rd Qtr 2007 Monitoring Report submitted by Impact Env and dated Oct 30, 2007. All wells were sampled on Sept 6, 2007 and monthly EFR events continue on MW-2. Results from wells MW-1, MW-2, MW-5, MW-6, MW-7, MW-8 and MW-9 showed non-detect levels for total VOCs. Wells MW-10, MW-11 showed minor exceedences for MTBE (44ppb and 50ppb respectively). Based on the latest result, monthly EFR events appear to have effectively reduced contaminants in MW-2. The SVE/AS system continues to operate. - JAM 4/14/08 Received a call from Hal Benjamin about the Exposure Assessment submitted in March 2008 by Impact Env. They are requesting spill closure and I will get back to him after I review the report. - JAM 5/1/08 Reviewed Exposure Assessment Report. Based on the Exposure Assessment, Impact Env. concludes that the source of contamination has been effectively mitigated and small levels of residual groundwater contamination pose no threat to human health. Impact requests spill closure. I requested a summary of historic soil data associated with this spill. -JAM 6/11/08 Spoke to Hal Benjamin, Impact. An on-site well provides the operating car wash with water. I requested that this well be sampled and results reported in a letter. Spill closure will be reevaluated when results are available. - JAM 8/8/08 Reviewed letter from Spartan dated July 16, 2008. The on-site well that services the carwash was sampled and all analytes were found non-detect. I called Hal and asked the depth at which the car wash well pulls water from and if there are any sampling requirements for that well. He will get back to me. - JAM 11/13/08 Since the on-site car wash supply well did not detect and VOCs and only minor levels of MTBE were detected in two on-site wells, this site poses no threat to human health or the environment. This spill case was closed and an NFA letter was issued to: Henry Alpert Cross Deegan Realty, Corp. 3333 New Hyde Park Rd, Suite 201 New Hyde Park, NY 11042 NFA letter uploaded to eDocs. - JAM WILL REPAIR AND RE-TEST AS OF TOMMOROW'S DATE 11-10-09

"KOLLEENY" TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO ISLAM. 6/28/09-
 The site's impacted soil and GW are being remediated by URS Corp. by operating SVE and In-Situ Oxygen distribution systems (injection of Permeox Plus) respectively. Reviewed the Dec/04-Mar/05 monitoring report. It appears from the presented data that both the systems in-place are not working effectively to remediate soil and GW. URS apprehends of extraction wells short-circuiting and lowering of soil permeability due to Permeox Plus injection. as such,URS recommends expanding of the SVE system by adding additional extraction wells and increasing the blower size capacity to treat the soil. Also, URS recommends installing a GW extraction and treatment system to remove and treat GW contamination. NYSDEC approves these recommendations but requires detailed plan and schedule to be submitted. - II. 9/30/05- Reviewed the April - July/05 monitoring report dt. Sept.7/05. The report states that the three in-place SVE systems are not functioning effectively, based on low vacuum measured in ventilation wells. URS considers modifying the SVE system, and recommends soil sampling prior to that to determine the extent of vadose zone soil contamination. URS is required to submit a work plan to this effect to NYSDEC for review and approval. On the other hand, the groundwater sampling results show that contaminant concentrations have remained relatively unchanged for a substantial period of time. URS recommends installing a groundwater extraction and treatment system to actively remove and treat the dissolved phase groundwater contamination. URS awaiting approval from the Police Building Maintenance Dept. prior to starting design of the system as the proposed system will occupy a significant amount of floor space. In the interim, URS proposes to continue to evaluate alternative remedial strategies including innovative technologies. It appears that no progress has been made in this regard so far since the last reporting period. However, URS is advised to expedite in preparing and submitting their proposed work plans to the Dept.- II 12/9/05- Reviewed the Soil Sampling Plan to Determine the SVE System Effectiveness dt. Oct.28/05 by URS Corp. These soil borings are proposed to modify the on-site SVE system. The proposed ten soil borings (SB-02 to SB-11) locations and plan are hereby approved. It is wonder to note that URS has not submitted anything since they recommended in their Apr.-Jul/05 monitoring report about the installation of a GW extraction and treatment system to actively remove the dissolved phase GW contamination . Also, there is no word about the development of acquiring the required permission from the Police Building Maintenance Dept. in connection with the space required for the water extraction and treatment system.- II 02/13/06: This spill transferred from I.Islam to S.Kraszewski. Reviewed the System Performance Monitoring Report for Aug. - Oct. 2005 submitted by URS on November 29, 2005. The report summarizes the overall effectiveness of the SVE system and in-situ ORC treatment. According to past monitoring reports the performance of the SVE system has dropped significantly. This report reaches the same conclusions of the previous reports. For almost every ventilation well, no detectable vacuum is present, which indicates the presence of preferential pathways for airflow. Those ventilation wells with vacuums are below requirements for an effective SVE system. PID readings for the extraction wells indicate that VOC removal rates have significantly decreased since August and have remained consistently low. The In-Situ ORC injections have kept the DO levels above baseline readings according to readings taken from the

S101658484

monitoring wells. However, the number indicate that ORC injections are decreasing the contamination levels slower that expected. Also, total VOC concentration numbers from each well are elevated but have remained unchanged for several sampling events. URS recommends installing a GW recovery system to address the dissolved-phase contamination. To evaluate the requirements for this system, URS recommends a round of soil samples to be collected. I.Islam recieved the work plan for these soil borings on December 9, 2005 and approved the work. I spoke with Jane Staten @ URS about the current site situation. Due to financial constraints, the SVE system is not running. They have begun to monitor the site again but they are still waiting to hear back about the soil boring and GW extraction proposal. She is sending me the current RP info via email. - SK 02/21/06: Paul Pleho? from URS called to update the site status. It appears that the DDC has approved the GW treatment system and Jane Staten is currently working on submitting a work plan. - SK 04/04/06: Called Jane Staten and left a message to call back. - SK 04/26/06: Jane Staten called with a progress update. Currently, URS has hired a driller for the new contract but they are waiting on the City's approval, which takes roughly a month for the paperwork to go through. They are planning a more in-depth subsurface investigation that includes the saturated zone or GW. Originally, just soil samples were planned to evaluate the need to redesign the SVE system. She said it looks like the system wiull need to be expanded into a grid system which may include the garage area. There is possiblity of a dual-treatment option but that is to be determined. She will send me the adjustments to Imdad's original approval to reflect future activities. - SK 05/01/06: Reviewed Soil Sampling Plan submitted by URS Corp. dated May 1, 2006. URS will advance 10 soil borings in the vacinity of current monitoring, recovery, injection and vent wells to re-assess the the vadose zone. URS may, based on the results, choose to modify the recovery system by introducing a liquid extraction system in tandem with the SVE. Currently, the SVE and in-situ bioremediation injections demonstrate slow progress and effectiveness. URS believes that must address the saturated zone directly. - SK 05/02/06: Sent out approval for soil sampling plan via Email. - SK 06/29/06: Staff attended URS meeting @ 10AM in the 2nd floor conference room. Jane Staten handed out site updates and proposed work schedules for all URS sites. URS plans to start work on the additional soil sampling plan in mid-July to modify the SVE system. The tentative start date is July 12. - SK 07/10/06: Recevied O & M Email from URS. They will be performing Vac Truck work all week at the site, does not mention any boring work. Staff will contact Jane Staten to confirm. Called Jane Staten @ 718-856-5636 (office). VacTron is availalbe to start pre-clearing for drilling. Obstacles like dumpsters and conctruction materials are causing delays. Megan Dascoli @ URS is on-site to supervise the work (Cell: 908-623-0145) - SK 07/12/06: Recived a voice-message from Jane Staten at URS (716-923-1152). It seems that due to lack of access for the utility markout and clutter in the garage area drilling work will be postponed for now. Jane believes that the issue here is safety and a lack of access to the garage simply compounds this problem. She will keep me updated. - SK 10/27/06 Spill case transferred from S. Kraszewski to J. Maisonave. - JAM 01/11/07 Spill number 0301707 (case lead Q. Abidi) is for a fuel oil spill across Alexander Avenue. The consultant working on that spill sampled monitoring well MW-5 associated with spill 9506885 and found some low levels of VOCs above

MAP FINDINGS

S101658484

criteria (MTBE was 280ppb). Currently, URS will perform soil sampling as per the work plan that was approved by the NYSDEC in May 2006. The scaffolding that delayed the drilling event in the past is now down so drilling will occur as soon as possible. I called Jane Staten at URS to make sure groundwater sampling also occurs at the site around the same time. I requested that all wells be put back on the sampling list including MW-5 and MW-7. These two wells were removed from the list after results from two consecutive monitoring events were under criteria. - JAM 6/8/2007 Reviewed Summary of Soil Sampling, and Recommended Remedial Alternative Report submitted by URS and dated June 8, 2007. Residual soil and groundwater contamination are present beneath the sidewalk along Alexander Ave and beneath the Precinct garage, as per soil samples collected between January - April 2007 and groundwater samples collected in March 2007. URS proposes to excavate contaminated soils beneath the sidewalk and apply RegenOx through 12 injection points in the garage and 18 in the sidewalk. Report is uploaded to edocs. - JAM 10/1/07 Reviewed Revision to Previously Recommended Remedial Strategy Report submitted by URS and dated July 24, 2007. URS states that the NYPD has installed a gym in the Precinct garage that had previously been used for miscellaneous storage. The previous remedial strategy proposed installing 12 injection wells inside the garage, however, this will not be possible. URS revised the June 8, 2007 proposed strategy to exclude the work inside the Precinct garage, i.e. injection of RegenOx into 12 injection wells. All remedial work will take place in the sidewalk adjacent to the garage and will include excavation of vadose zone contamination and injection of RegenOx into 25 injection wells. Since the garage is down-gradient from the location of the proposed injection points, it is anticipated that groundwater under the garage will be treated. A letter was issued today conditionally approving the revised remedial strategy. If the groundwater contamination beneath the garage does not improve, other remedial measures must be evaluated. Letter is uploaded to edocs - JAM 12/19/07 Received a call from John Busse at URS. The excavation in the sidewalk may not be cost effective. There are concerns with undermining the precinct building that may increase cost significantly. I recommended either doing a limited excavation around SB-09 (approx. dimensions 10'x12'x10' deep) or using a surfactant enhanced chemical oxidant. The injection must be aimed at the 5'-7' interval and may require installing another well near SB-09. Mr. Busse will evaluate the alternatives and propose in another report. - JAM 1/17/08 Received an email from John Busse on 1/9/08. URS proposes limiting the excavation area to encompass only borings SB-09 and SB-01, and to excavate only to a max depth of 7 feet. This is necessary to avoid compromising the structural integrity of the garage and precinct building. The RegenOx injections will still proceed as planned. This email is uploaded to edocs. I sent a letter approval today. Soil should be screened with a PID and the excavation should be extended in any direction feasible to remove as much contamination as possible. Soil samples from the sidewalls and bottom of excavation should be analyzed for gasoline-related VOCs. This letter is uploaded to edocs. - JAM 5/1/09 Reviewed System Performance Monitoring Report for the 40th Precinct Period through February 2009 submitted by URS dated March 16, 2009. Envirotrac was awarded the contract and completed installing 16 injection wells on October 29, 2009. The first round of RegenOx injections were completed on February 24, 2009. Due to difficulty drilling and unexpected clogged wells, the amount of injection wells

Database(s)

257 ALEXANDER AVE (Continued)

S101658484

was reduced to 18 wells and the amount of RegenOx injected was slightly reduced. The next round of injections is scheduled for May 2009. Groundwater samples were collected on December 2, 2008 from wells MW-1 through MW-07. No VOCs were detected in MW-7. The remaining wells exhibited VOCs above NYSDEC Groundwater Quality Criteria with total VOCs ranging from 14ppb in MW-04 to 39,550ppb in MW-01. URS will continue quarterly groundwater monitoring to evaluate the effectiveness of the RegenOx injections. Report uploaded to eDocs. - JAM 11/16/09 Reviewed the System Performance Monitoring Report through May 2009 submitted by URS dated June 16, 2009. On May 26, 2009, Envirotrac completed the soil excavation beneath the sidewalk along Alexander Ave. Among 5 confirmation soil samples collected from the excavation, VOCs exceeded NYSDEC RSCOs only in the sample collected from the wall adjacent to the street. Approx. 36 tons of contaminated soil was excavated. Injection wells IW-15, IW-17, and IW-19 were in the excavation footprint and were decommissioned. Wells IW-15 and IW-17 were scheduled to be re-installed June 2009. The second round of RegenOx injections was not performed in May 2009. Groundwater samples were collected from five monitoring wells (MW-01, MW-02, MW-04, MW-06 and MW-07) on March 4, 2009. Wells MW-03 and MW-05 were not sampled because MW-03 was dry and MW-05 had an obstruction. No VOCs were detected in MW-04 and MW-07. The remaining 3 wells had total VOCs concentrations ranging from 43ppb in MW-06 to 32,244ppb in MW-01. URS states that the March 4, 2009 groundwater data is not a good gauge of the effectiveness of the remedial work because it was collected before the excavation and only one week after the RegenOx injection. The next round of groundwater sampling is scheduled for June 2009. No additional RegenOx injections have been scheduled. Report uploaded to eDocs. Reviewed System Performance Monitoring through 3rd Qtr 2009 submitted by URS dated September 30, 2009. On June 9 and August 31/September 9, 2009, URS collected groundwater samples from wells MW-01, MW-02, MW-03, MW-04, MW-06 and MW-07. Well MW-05 could not be sampled because of an obstruction. In June VOCs were detected above criteria in wells MW-01 through MW-04 ranging from 25ppb in MW-04 to 4,445ppb in MW-01. In August/September VOCs were detected above criteria in wells MW-01 through MW-03 ranging from 1,414ppb in MW-02 to 10,273 in well MW-01. URS states that the groundwater has improved because of the remedial activities performed. Quarterly groundwater sampling will continue. Report uploaded to eDocs. - JAM 10/25/10 In the quarterly status update meeting with the DDC and URS on 10/19/10, DEC verbally approved recommendation to perform additional ChemOx injections. A work plan will be submitted. - JAM 11-10-2010 The spill was transferred from J. Maisonave to Alex Zhitomirsky, as per V. Brevdo/J. Kolleeny. AZ 2-18-2011 Reviewed System performance monitoring report submitted on Nov. 12, 2010. Discussed this site in a meeting with URS/DDC on 2/17/2011. URS informed DEC that they injection will be postponed due to contractual delays. DEC requested that soil data and soil plume map be included in the ORC injection proposal. Also, results of the hot spot excavation should be included in the Work Plan. AZ 4-11-2011 Discussed the site with Kevin Shenahan. The plume is not delineated on the west side. Total VOC concentrations in MW-1 were about 19,000 ppb in September 2010. At one point the total VOCs contamination was about 40,000 ppb in MW-1. Contamination levels temporarily decreased in MW-1 but went up again. PermeOx injection was performed about eight years ago but the site has not been remediated. ORC injection has been performed. URS

suggested repeating PermeOX injection but on the sidewalk up gradient away from the center of the plume. It appears that the concentrations are increasing downgradient and the plume might migrate downgradient. Wells should installed west of MW-1 downgradient. MW-8 should be sampled. URS is considering RegenOX Injection on the sidewalk. However this injection might not be sufficient to remediate the current levels of contamination. More active approach should be undertaken. URS should submit a Remedial Plan to address the existing contamination levels. Kevin stated that URS will perform a site visit and accessibility study for more aggressive remediation strategy. A rt medial system could be located inside of the gym if the precinct concurs. Tank inventory, soil plume and the excavation area with end point samples will be submitted to DEC. AZ

 DEC Memo: 12/12/05: This spill transferred from J.Kolleeny to S.Kraszewski.
 07/28/06: Two 25K USTs installed in 1948 that stored #4/#6 oil were closed-removed in 1996. One 30K UST that stores #2 oil was installed in 1997 and is currently in service. Soil contamination was encountered during tank replacement. 4 MWs were installed in 1996 and is currently bailing oil/water. NYCHA recommends that a site assessment be performed. - SK 9/26/06: This spill was transferred from S.Kraszewski to J. Kann. -JK

 DEC Remarks: Oil water seporator overflowed spilling a small amount of oil onto the ground and sidewalk less than 1 gallon). After my request the Joe project manager) put down some wipes but showed negative interest in cleaning it up to my satisfaction. Spill was never reported by the spiller which is a violation of 6NYCRR part 613.8. The spill was closed out do to the inability to recover anymore of the spilled product. All the unrecovered product was washed away by that evenings rain event.

DEC Remarks: Engelhardt responded: arrived at 04:30 - Ed Malone NYCHA) and Keith Williams NYCDEP) on scene. Ed updated spill volume to several thousand gallons based on inventory. NYCFD had already sprayed down road and left flushing most of oil into catchbasins. Frank Ocello NYCHA) arrived at 05:00. Winston cleanup contractor) arrived at 05:45. NYCHA had no booms available to block sewers and prevent dispersing of product. Leak resulted from valve in piping of manifolded tanks being left in the wrong position. Instead of unburned oil returning to source tank it filled another tank, eventually overflowing it. At 06:40 Keith Williams received report that Wards Island WPCP was starting to see some oil. Inspected shoreline with USCG - no oil observed. Saccacio arrived at 08:30. Visited pump station at 132nd St and St. Annes - no oil observed in flow chambers or in bar screen roll offs. Engelhardt left scene at 09:45, Saccacio remained. Spill transferred to Saccacio on 3/27/98.

Remark: OIL COMING OUT OF THE FUEL CAP/UNK AMOUNT/STILL COMING OUT OF PIPE/PD ON SCENE

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KOLLEENY" TRANSFERRED FROM Y.KRIMGOLD TO KOLLEENY TO I.ISLAM 5/3/05- The site's soil & GW are currently under remediation by LiRo Engineers by injecting bio-nutrient(through 24 wells) and Iso-Gen Oxygen (through 8 wells). Reviewed the quarterly site monitoring report (Nov./04-Jan./05). Initially, vacuum track was also used to remove Free Product from wells which was followed by bio-nutrient injection. Relative to baseline sampling data, significant improvement in GW quality has been achieved so far in almost all site wells. Installation of ORC socks has been recommended via email for the wells showing persistently high level of Total VOC concentration. Soil investigation is done annually and groundwater quarterly. All wells are found free from Free Product.Installed the quarterly report in the eDoc Folder. - II 7/29/05- Reviewed the Feb.- May/05 monitoring report. Overall GW contamination improved compared to the baseline sampling conducted in 2003. Recent data exhibit low hetero-trophic bacteria count in some of the wells even though DO and other biotreatment parameters are reasonable. The next soil sampling is planned for October 2005. Oxygen delivery system running and site monitoring will continue. Installed the report in the eDoc folder.- II 11/29/05- Reviewed the Jun-Aug/05 site monitoring report dt. Sept. 30/05. The final injection of bio-nutrient occurred in April 21/04. In addition,oxygen supplement through delivery wells started with eight delivery wells have now been reduced to four wells down the road due to failure of the Iso-Gen well controllers. ORC socks were also installed in wells LW-9 and LW-19 in Jan/05 and wells LW-5 and LW-15 in May/05. No free product has been observed recently. August/05 GW sampling results exhibit mixed results as TVOCs concentrations increased at some wells(particularly at LW-10) while decreased at others. But overall significant improvement is observed compared to the baseline samplings conducted in 2003. The consultant LiRo is supposed to resample well LW-10 to evaluate the sudden discrepancy. The proposed upcoming soil sampling plan by LiRo is hereby approved with two additional borings to be advanced adjacent to LW-14 and LW-19. Filed the report in the EDoc folder.- II 03/08/06: this spill transferred from I. Islam to Q. Abidi. 4/19/06: Reviewed Quarterly Monitoring report Sept. 2005 - Dec. 2005. Six groundwater samples were taken on December 28, 2005 during monitoring. Analytical data show four groundwater samples are still contaminated. Free product was not observed during monitoring. Soil samples were taken on December 20, 2005. Two new soil borings were made, LW-9 and LW-11 data shows TVOCs are very high. Only two of five planned soil borings were completed.. LiRo recommends postponing completion of the other soil borings for about six months.They also recommend continuing oxygen delivery system and monitoring at the site. Sent an e-mail to DDC and consultants on 4/19/06 approving these recommendations, and suggesting that the new CM (URS) review all data and evaluate the site to recommend a future course of action. - QA 08/18/06: Transferred to S.Kraszewski. According to the URS Bi-monthly update report on June 9, 2006 URS collected GW samples. VOC analysis revealed no VOCs above GW quality criteria except in LW-09. - SK 10/27/06 Spill case transferred from S. Kraszewski to J. Maisonave. - JAM 12/8/06 Reviewed the Revised Remedial Strategy Report submitted by URS dated November 17, 2006. Site Summary: On Jan. 27, 2003 the DEC approved a remedial strategy by Liro to inject a bio-nutrient slurry and to install the Iso-Gen Oxygen Delivery Sytem (uses a low capacity pump and electrolytic cell

MAP FINDINGS

S102147087

to dissociate water into hydrogen and oxygen) on eight wells. In Jan 2005 the number of oxygen delivery wells was reduced to four due to failure of the well controllers. Consequently, Liro installed ORC socs in the other four wells between Jan and May 2005. The bio-nutrient slurry was injected into twenty-four injection wells between Nov 2003 and Apr 2004. URS was retained as the site manager in Mar 2006 and provided this revised remedial strategy because the manufacturer of the Iso-Gen Oxygen Delivery System had gone out of business and continued operation and maintenance of the system requires monthly replacement of the electrolytic cells. URS proposes implementing chemical oxidation followed by enhanced bioremediation if warranted in lieu of the currently approved remedial strategy. RegenOx will be injected in 10 wells at a rate of 200lbs per injection well with injections occurring once a month for 4 months. Additionally, URS proposes advancing 4 soil borings near the previously detected vadose zone soil contamination at monitoring well LW-06 to determine if remedial measures are required. Report uploaded to eDocs. -JAM 1/10/07 Meeting with DDC and URS. Verbally approved Revised Remedial Strategy. - JAM 1/19/07 Reviewed UST Closure Report submitted by James McCullah Co., Inc. dated Nov. 2006. DDC contracted to remove two 2,000-gallon diesel oil tanks and one 1,000-gallon Gasoling tank. The tanks were removed on July 11, 2006. All three tanks were steel, five-foot diameter, double-walled tanks buried approx. four feet below grade. Tanks were found to be in good condition. All piping was also removed. Five end-point soil samples were collected from between 7'-12' below grade and analyzed for VOCs and SVOCs. Groundwater was not encountered before reaching bedrock at 11 feet below grade. No signs of contamination were observed, through olfactory and PID screening. Some VOCs were detected however, no detections were above TAGM. SVOCs in sample 1 were the only detections above TAGM. Report uploaded to eDocs. - JAM 8/17/07 Reviewed Soil Sampling Results Report dated July 31, 2007 submitted by URS. On June 12, 2007, URS advanced four soil borings near monitoring well LW-06. Two soil samples were collected from each and the analytical results showed no VOCs detected above TAGM. On May 1, and 2, 2007, URS collected groundwater samples from 16 monitoring wells. Five wells were inaccessible or dry and could not be sampled. VOCs were non-detectible in eight wells. VOC exceedences were detected in wells with concentrations ranging from 16ppb in well LW-06 to 2,018ppb in well LW-10. Elevated concentrations persist in wells LW-10 and LW-20. Conclusions: Soil analytical show that no VOCs exceed TAGM. However, elevated PID readings were detected during the screening of soil samples, which contradict sample results. URS attributes this to the hot humid weather, which may have affected the PID readings. Petroleum odors were not observed from the soil. Minor SVOCs exceeded TAGM, attributed to urban fill. URS proposes chemical oxidation to address dissolved phase contamination observed. URS will prepare a bid package and perform this work. I expect a remedial summary report when work is completed. Report uploaded to eDocs. - JAM 11/18/08 Reviewed System Performance Report for Monitoring Period July through September 2008 submitted by URS dated October 24, 2008. Franklin was contracted by URS to install the injections wells and on August 1, August 29 and October 10, 2008 completed three rounds of RegenOx injections. Thirty-three injection wells were installed and in each of the three injection rounds, 140lbs of RegenOx and 100 gallons of water was applied in each well. URS collected groundwater samples monthly between July and September, 2008. URS states that

S102147087

groundwater samples show improvement after the RegenOx injection and recommends continuing groundwater monitoring monthly while the injections are still occurring. URS anticipates Franklin will perform the next injections in December 2008. The report is uploaded to eDocs. - JAM 10/19/09 Reviewed the System Performance Report for Monitoring Period October through December 2008 submitted by URS dated February 18, 2009. On December 18, 2008, URS collected groundwater samples from eight wells in the monitoring program. Analytical results showed total VOC concentrations ranging from 43ppb in LW-19 to 4,502ppb in LW-14. Compared with results from the previous sampling event in September 2008, three wells showed decreased total VOCs and four wells showed increased total VOCs. URS states, "After three rounds of RegenOx injections, the groundwater analytical data show fluctuating contaminant concentrations... Franklin is expected to perform a fourth round of injections in March 2009. URS will continue to monitor groundwater quality." This report is uploaded to eDocs. - JAM 11/18/09 Reviewed System Performance Report through 3rd Quarter 2009 submitted by URS dated October 6, 2009. The report summarizes four rounds of RegenOx injections and 2 rounds of groundwater sampling, which occurred after the injections. The four rounds of injections occurred on August 1, August 28, October 14 of 2008 and February 27, 2009. On June 10, and September 17, 2009, URS collected groundwater samples from 12 of the 13 monitoring wells. Well LW-12 was inadvertently missed in June and well LW-20 was dry in September. NO VOCs were detected above GWQS in wells LW-02, LW-04, LW-07, LW-12, and MW-01. The remaining wells had total VOC concentrations ranging from 166ppb in LW-19 to 7,291ppb in LW-14. URS states that the "rebound" effect is attributed to the desorption of contaminants from soils in the northeast portion of the site. This corresponds to the conclusion presented in the ISRP by LiRO submitted in 2002, which noted contamination in the northeast portion of the site that could be attributed to the heating oil system or an unknown source. URS will perform soil sampling in the northeast portion of the site in November of 2009. No RegenOx injections are scheduled. URS is also considering using a stronger oxidant like sodium persulfate. The report is uploaded to eDocs. - JAM 6/9/10 Reviewed the System Performance Report through 4th Quarter 2009 submitted by URS dated February 5, 2010. URS conducted groundwater sampling on December 16 and 17, 2009 and results showed VOC concentrations ranging from 100 ppb in LW-10 to 2,938 ppb in LW-14. URS has performed 4 rounds of ChemOx injections and the results of groundwater monitoring after injections initially showed improvement. According to URS, it appears rebound is occurring in the northeast portion and the source may be from contamination adsorbed on the soil in the smear-zone dissolving into the groundwater. In November 2009, URS performed a limited soil investigation in the northeast portion of the site and found contamination in 5 soil samples collected just above and below the water table in that area (groundwater is at 10ft below grade). URS proposes additional RegenOx injections into existing injection wells to target two areas; the area near wells LW-3 and LW-6, and the other area near borings SB-08, SB-09, SB-10, and SB-11. They also propose installing ORC socks in wells BN-03 and BN-08, located along the sidewalk along 131st Street. Report uploaded to eDocs. I called and left a message with Kevin Shanahan today to discuss the status of the out of service fuel oil tank in the northeast portion of the site. - JAM 6/10/10 Spoke to Kevin Shanahan at URS. I searched the PBS Registration (PBS #

S102147087

2-455849) and found that a 5,000-gallon #2 Fuel Oil UST is listed as "In Service." I asked Kevin to have the tank inspected and if it is in fact out of service, then the tank should be closed and the PBS registration updated. Perhaps the tank should be removed as it may be a source for contamination found in soil and groundwater. If so then contaminated soil should be excavated and the source removed prior to implementing another round of ChemOx injections. He agreed and will get back to me after URS inspects the tank. The latest groundwater sampling report will be issued and when Kevin gets back to me after the tank inspection, I will write a response with DEC's requirements to DDC. - JAM 10/25/10 In the quarterly status update meeting with the DDC and URS on 10/19/10, URS said that the results from the site reconnaissance was submitted in the report dated September 30th. URS will propose additional ChemOx injections to treat residual dissolved phase contamination under a separate letter. - JAM 11/05/2010: This spill case was transferred to A. Doronova. - AD 02/17/2011: Had a quarterly meeting with DDC and URS. Discussed the proposed 5th round of RegenOx injections. Since the previous rounds did not indicate significant improvements in GW quality, asked URS to do USTs inventarization and find out if it is feasible to remove closed-in-place USTs which are acting as a continuous sources of contamination according to a GW contamination plume map. Put RegenOx injection proposal on hold, till the requested info will be submitted to DEC. AD 02/18/2011: Received a Remediation Performance Report, submitted by URS Corporation (URS) and dated February 15, 2011. The report presents groundwater sampling results and states that some of the site's monitoring wells showed elevated levels of VOCs and that one well (LW-20) exhibited free product during the last monitoring round. Based on the data, URS recommends an additional round of RegenOx injections in two areas of the site. Will wait for USTs info before making decision. AD 03/07/2011: Received a call from K. Shanahan of URS regarding feasibility of removal of USTs in question from the site. He said that there are some issues with their removal. Told him that then these areas should be investigated further and long-term remediation will be required. Also he insisted on implementation of RegenOx injections since it was already approved by DDC and they have contractor ready to perform it. Told him that previous rounds of injection did not show significant improvement, and that they should consider different compound for injections. I said that they can submit their proposal for RegenOx application for my review. Later received an e-mail from K. Shanahan saying: "Ainura, Thank you for taking some time this morning to discuss the latest developments for this site. Here is a basic summary of our discussions: 1. URS informed DEC that removal of the closed-in-place 4,000-gallon heating oil UST is not considered feasible due to structural concerns of the adjacent elevator. DEC indicated that if this tank cannot be removed, it may result in a long-term remediation project since any source areas associated with this tank would remain. 2. URS informed DEC that removal of the six closed-in-place 550-gallon USTs is complicated by the presence of the new diesel and gasoline supply piping and electrical conduit running directly over the closed tanks. DEC requested that URS consider protecting the lines and removing the tanks. If the lines are damaged during construction, they could be repaired. URS preliminarily agreed and will arrange for the UST removal in this area. 3. URS requested that DEC approve the limited Regenox Injection Plan URS prepared in December 2010 (see attached). The design is complete and the

S102147087

contractor has been procured for this work. DEC reiterated that they did not feel the four Regenox applications have resulted in significant VOC reductions but they would consider the request to complete this addition work. DEC also suggested that URS look at alternative bioremediation technologies for this site. In summary, URS will have the six closed-in-place 550-gallon USTs removed and DEC will review the attached plan for limited Regenox Injections. If possible DEC will provide URS an approval to move forward. Thanks, Kevin J. Shanahan Project Manager URS Corporation 77 Goodell Street Buffalo, New York 14203 716-923-1215" Reviewed the attached scope of work where URS proposes implement additional round of RegenOx injections in two areas of the site, using ten existing injection wells. Free product will be removed from the affected well (LW-20) before beginning the injections. A summary report with conclusions and recommendations will be provided to DEC. AD 03/10/2011: Discussed this proposal with J. Kolleeny of DEC. AD 03/11/2011: Issued and sent an approval letter with the following comment: " If the RegenOx application is not effective in reducing VOC levels, an alternative remediation approach should be proposed for the site." DL the letter to eDocs. AD 08/25/2011: received an e-mail from Kevin saying: "Ainura, Closed in-place USTs are being removed today, tomorrow and possibly on Monday depending upon utility complications. Kevin J. Shanahan Project Manager URS Corporation 77 Goodell Street Buffalo, New York 14203 716-923-1215" AD

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND" 4:30PM 3/15- CALLED EASTMOND. TANK WAS CORRODED. 2.300 GALLONS IN TANK ROOM. EASTMOND EMPTIED TANK. PUT DOWN SPEEDY DRY. 4/1/99 CHRIS MCNEUR AT MAHA REALTY SAYS SITE WAS CLEANED UP AND TEMP TANKS WERE INSTALLED. OWNER IS THINKING ABOUT EITHER A NEW TANK OR REPAIRING THE OLD ONE. 5/20/99 CHRIS MCNEUR SAID MAHA REALTY NO LONGER MANAGES THIS BUILDING. THE OWNER WENT BANKRUPT AND MANAGEMENT OF THE BUILDING WAS TAKEN OVER BY NEW YORK CITY HPD. 1/17/2002 - Sangesland spoke with Tom Middleton (environmental consultant) who now works for the new owner of the property. Apparently the former property owner lost the building to the city. The city recently sold the building and now the new owner is trying to figure out what needs to be done to bring it into compliance. Mr. Middleton says he believes there is a new tank in the building, but this needs to be confirmed. Sangesland requested a submittal to the DEC including details of the original spill clean up, information related to either the repair or replacement for the subject tank and information on the present owner. As of 1/17/2002, the PBS records are out of date.

Remarks: (expired 1997) The new owner needs to update the PBS information and submit the appropriate PBS information. 3/21/2002 Sangesland received a 1 page letter from State Environmental Services, Inc. (718-265-3355) stating that the tank size was 3,000 (aboveground), it has a concrete Wrap in good condition, the area is clean and shows no leaks, a new seal gasket was installed and the tank and piping system tested tight on March 6, 2002. As of 3/21/2002 the PBS form still was out of date. Sangesland told Mr. Middleton that he needs to get the PBS paperwork straightened out before this spill number will be closed out. 11/19/2003 Sangesland received a copy of an updated PBS form (2-196525) for this site. Now that the PBS has been registered, the spill can be closed out.
 CONTAINED IN A VAULTED AREA. TANK WILL BE REPALCED. EASTMAN CO CLEANED IT UP AND DID INSTALL TEMP. TANKS. ***MAY 20, 1999 UPDATE*** MAHA REALTY NO LONGER MANAGES THE BLDNG. ***NEW YORK CITY HPD TOOK OVER MANAGEMENT*** SEE DEC NOTES PAGE

 DEC Memo: 2/10/05 MT// Leak above product line, owner instructed not to refill tank,but he can use all of the oil currently in the tank. Owner's office 718-454-8555 contact Joe Cohen for the next 3 weeks, Yoshi is the lead person is going on vacation next week for 3 weeks. Owners plan to convert to gas, empty and remove the oil tank and conduct whatever cleanup that is needed.////TTF letter sent 07/18/2005: Called owner of the property at 4 East 132nd Street (Mr. Yoshi of 4 East 132nd Realty LLC) to determine status of cleanup. Yoshi faxed documentation of tank removal that occurred in March 2005. Contents of tank were removed, tank cleaned and purged, fill and vent lines cut, oil lines disconnected and removed, and the tank was cut up and removed. Tank closure was reviewed by a licensed NYC Fire Department Underground Tank Installer and a Certificate of Affidavit was submitted to the NYC Fire Department Bureau of Fire Prevention on April 21, 2005. There was no release of product from tank into the environment. Documentation was determined to be adequate to close spill. No Further Action letter sent to owner. M. Brand DER NYSDEC Albany.

Remarks: ABOVE LIQUID LEVEL LEAK. HAS NOT BEEN CLEANED UP YET.

2613 ft.	Site 3 of 3 in cluster AJ		

LTANKS:

Site ID:	362249
Spill No:	0600278
Spill Date:	4/8/2006
Spill Cause:	Tank Failure
Spill Source:	Unknown
Spill Class:	Known release with minimal potential for fire or hazard. DEC Response. Willing Responsible Party. Corrective action taken.
Spill Closed Dt:	4/10/2006
Facility Addr2:	Not reported
Cleanup Ceased:	Not reported
Cleanup Meets Standard:	False
SWIS:	3101
Investigator:	SFRAHMAN
Referred To:	Not reported
Reported to Dept:	4/8/2006
CID:	64
Water Affected:	Not reported
Spill Notifier:	Fire Department
Last Inspection:	Not reported
Recommended Penalty:	Penalty Not Recommended
UST Involvement:	False
Remediation Phase:	0
Date Entered In Computer:	4/8/2006
Spill Record Last Update:	6/27/2006
Spiller Name:	Not reported
Spiller Company:	UNKNOWN
Spiller Address:	Not reported
Spiller City,St,Zip:	NY
Spiller County:	999
Spiller Contact:	DSP 225
Spiller Phone:	(212) 628-2900
Spiller Extention:	Not reported
DEC Region:	2
DER Facility ID:	312482
DEC Memo:	4/10/2006 Sharif dealt with this spill case. DEP responded to the site. OK to close
Remarks:	Cracked fuel tank which leaked into the sewer.

Material:

Site ID:	362249
Operable Unit ID:	1120351
Operable Unit:	01
Material ID:	2109846
Material Code:	0001
Material Name:	#2 Fuel Oil
Case No.:	Not reported
Material FA:	Petroleum
Quantity:	50
Units:	Gallons
Recovered:	Not reported
Resource Affected:	Not reported
Oxygenate:	False

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011	Source: EPA
Date Data Arrived at EDR: 07/12/2011	Telephone: N/A
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 10/12/2011
Number of Days to Update: 79	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 09/12/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Number of Days to Update: 41	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

Data Release Frequency: Biennially

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

UTM Y (Meters):	4518481.5

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-G8 CENTRAL PARK, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

CENTRAL PARK

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks
Code: OC (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1927 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

APPENDIX E: QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mike S. Zouak, CIH, President

12/13/11
Date

**Airtek Environmental
Corporation**

**Saad Zouak, MS, CIH
President**

Education:

MS, Environmental Engineering
New Jersey Institute of
Technology, Newark, NJ

BS Chemical Engineering
University of Texas, Austin,
Texas

**Professional
Registration/Certifications:**

Diplomat, American Board of
Industrial Hygiene (ABIH)

Member, American Industrial
Hygiene Association (AIHA)

Years with This Firm: 21

Years with Other Firms: 2

Professional Profile

Mr. Zouak founded Airtek in October of 1988. Mr. Zouak, a Certified Industrial Hygienist (CIH), has a 20-year industrial hygiene career that has given him considerable experience in the management of a wide variety of environmental issues. Mr. Zouak has managed all aspects of large-scale environmental remediation projects from the bidding stage through implementation and project documentation in North America.

Environmental Site Assessments

Mr. Zouak oversees Airtek's Environmental Site Assessment Program. He has personally conducted and reviewed hundreds of Environmental Site Assessments (ESA) throughout the past twenty years. Mr. Zouak has developed an in depth expertise in environmental issues that arise in virtually all types of properties, including hotels, apartment buildings, commercial buildings, and development sites. Airtek's ESA clients include lending institutions, NYC agencies, real estate developers and attorneys.

Subsurface Investigation and Remediation

Airtek's Subsurface Investigation and Remediation services, managed by Mr. Zouak, covers a variety of projects, including subsurface investigations, groundwater remediation and testing, sampling and analysis, and remediation system maintenance at contaminated project sites. Mr. Zouak is also experienced in permitting and implementation, site management assistance; enforcement and technical oversight support to agencies and third-party environmental investigations and remediation efforts. Airtek's clients include real estate developers, construction management firms, general contractors, government agencies, and law firms.

Soil and Groundwater Testing

Soil and groundwater testing are a critical component of subsurface investigations and remediation oversight. Mr. Zouak has managed a gamut of environmental projects that involve soil and groundwater testing for volatile and semi-volatile organic compounds as well as Resource Conservation and Recovery Act (RCRA) metals (arsenic, barium, cadmium, chromium, lead, mercury, selenium, and silver) in accordance with United States Environmental Protection Agency (USEPA) guidelines. He is experienced in identifying and testing potential hazardous materials in soil and groundwater.

Indoor Air Quality Investigations

Mr. Zouak has personally reviewed hundreds of indoor air quality (IAQ) investigations. His experience covers IAQ testing for mold, gases (carbon monoxide, oxygen, hydrogen sulfide, methane, etc), hazardous particles (asbestos, lead, man-made vitreous fibers, silica etc), volatile organic compounds, and particulate matter. He is well versed in testing protocols and industry standards relevant to indoor air detection levels and acceptable thresholds. Airtek's IAQ practice also includes indoor air quality investigations in conformance with the U.S. Green Building Council Leadership in Energy and Environmental Design (LEED) guidelines.

Waste Characterization and Hazardous Material Management

Mr. Zouak has managed several high profile large scale projects, such as World Trade Center area buildings deconstruction and demolition. The World Trade Center projects involved the demolition of several buildings requiring extensive dust investigations and waste characterization. Mr. Zouak is experienced in managing physical and chemical waste characterization and in providing plans for the storage, transportation, and disposal of waste.

Environmental Training

Airtek Environmental is an accredited New York State Department of Health (NYS DOH) and the US Environmental Protection Agency (US EPA) environmental training center. Mr. Zouak is a New York State Department of Labor (NYS DOL) and US EPA approved Training Director who supervises all training activities, including over twenty asbestos, lead, construction safety, supported scaffold, and PCB training courses. Airtek has trained thousands of contractors, environmental consultants/engineers, and prominent public agencies such as the New York City Housing Authority (NYCHA) and the New York School Construction Authority (NYSCA).

Experience:

Airtek Environmental Corp., New York, New York

President - Guided growth, development, and quality control of industrial hygiene consultancy and environmental laboratory. Extensive track record in successful completion of large-scale IH contracts for New York City Agencies, including asbestos and lead consulting services. Conducted and reviewed hundreds of Environmental Site Assessments (ESAs). Director of Airtek's Environmental Training Institute, certifying hundreds of students. Supervisor of all mold and Indoor Air Quality (IAQ) testing projects.

Major NYC Lending Institutions – Principal-in-Charge responsible for the inspection and reporting associated with hundreds of Phase I and Phase II Environmental Site Assessments (ESAs). Reviewed hundreds of ESA reports for multiple major lending institutions throughout New York City.

NYC Housing Authority – Principal-in-Charge – responsible for the various asbestos and lead in paint inspections, project monitoring, project design, air monitoring and contractor compliance with regulatory requirements for asbestos and lead abatement projects for Housing Developments.

NYC Board of Education - Principal-in-Charge of AHERA Survey and Management Plan contracts. Guided \$1.5 Million protocol for intensive asbestos inspection program. Developed internal computerized reporting system to meet requirements.

NYC School Construction Authority - Principal-in-Charge responsible for the various asbestos and lead in paint inspections, project monitoring, project design, air monitoring and contractor compliance with regulatory requirements for asbestos and lead abatement projects for Housing Developments.

NYC Department of Design & Construction Schools Task Force - Principal-in-Charge of Asbestos and Lead Paint Management operations for Airtek's sub-consultant contracts with URS Grenier; Lehrer McGovern Bovis; Hill International; and TDX Construction. All CM's have sought to repeat contracts with Airtek.

NYC Human Resources Administration - Principal-in-Charge for extensive program of asbestos inspection in 172 NYC HRA Facilities, including: Day Care Centers; Customer Service Centers; and Administrative Facilities.

Consolidated Edison - Principal-in-Charge– responsible for asbestos inspections, project monitoring, project design and air monitoring for the various facilities in the city of New York.
