Eastern Environmental Solutions	Tyler Bieler and Mike Kinkead		Track mounted Geoprobe 7822DT	
Description and Location of Work Activities Performed				
<p>The contractor used a track mounted geoprobe to drill 20 borings for collection of soil waste classification samples. AKRF personnel collected samples from Grids WC-A4, WC-A5, WC-A6, WC-A7, and WC-A8 (see figure). Petroleum-like odors and PID readings of up to 30 ppm were noted in one of the soil borings advanced in Grid A4. Excess soil was containerized in a drum. No other signs of gross contamination were noted in the borings. The samples were analyzed for parameters required by the potential disposal facilities.</p> <p>Community Air Monitoring (CAMP) and work zone air monitoring was performed by AKRF.</p>
