Following the 2017 monitoring activities, a *Well Decommissioning Summary, Remedial Activities and Groundwater Analytical Summary for First and Second Quarter 2017* was submitted to the NYSDEC on May 1, 2017. Based on the results of the monitoring events and conversations with the NYSDEC, a closure request was included with that report. Although LNAPL was not detected during the two gauging events, the request was subsequently denied based on elevated dissolved-phase BTEX concentrations at injection well IW-01.

April 2018 Monitoring Event

Prior to receiving the closure denial on May 24, 2018, quarterly groundwater monitoring resumed with the gauging and sampling of all remaining monitoring and injection wells. On April 12, 2018, four wells (IW-01, IW-02, MW-4, and MW-6A) were gauged and sampled in the same methodology as the previous sampling events to evaluate current conditions at the site. Monitoring well MW-2 was inaccessible during this event due to a vehicle being parked over the well location.

Groundwater samples were collected, immediately placed in an iced cooler, and shipped, along with a trip blank, to Eurofins (Lancaster) under chain of-custody protocols. The samples were analyzed for BTEX and MTBE in accordance with USEPA Method 8260.

[1] NYSDEC. 1998. Technical and Operational Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values. June.

During the April 2018 event, dissolved-phase concentrations remained relatively similar to previous results, and no LNAPL was detected. Historical gauging and analytical data are presented in **Table 1**. Groundwater analytical data from the April 2018 event are presented on **Figure 3**. Groundwater contours and the inferred groundwater flow direction from the April 2018 event were unable to be completed due to the location of the remaining monitoring wells and the lack of variation in the data points. The laboratory analytical report for the April 2018 sampling event is included in **Appendix A**.

Proposed Remedial Action

Due to continued elevated dissolved-phase impacts at injection well IW-01, Arcadis proposes periodic VTE events at the site. A typical VTE event entails recovering fluids (LNAPL, groundwater, and soil vapor) from extraction wells using a drop-tube assembly attached to a truck-mounted vacuum blower. The smear zone and/or the saturated zone may be targeted based on the depth of the drop-tube assembly. If the vacuum blower alone is unable to maintain the desired groundwater drawdown, submersible pneumatic pumps can be installed in the recovery wells, but based on the previous VTE data, a drop-tube is expected to be adequate. Recovered groundwater will be temporarily stored in the vacuum truck and disposed of off-site at an approved disposal facility. Extracted soil vapor will be treated with granular activated carbon (GAC) vessels, in series arrangement, before being discharged to the atmosphere. It is anticipated that, in addition to mass recovery via physical extraction, VTE will also enhance aerobic biodegradation beyond the immediate vicinity of the extraction wells by increasing the dissolved oxygen in the vadose zone and groundwater due to enhanced air flow through the formation.

Initially, three 8-hour duration VTE events will be conducted, approximately one event per month for three months. Two weeks following the third VTE event, post VTE groundwater monitoring will be conducted. Based on these analytical results, the duration and frequency of future VTE events will be evaluated and reported to the NYSDEC for review and approval.

All VTE events will focus on extraction from injection well IW-01 to target the remaining mass located in this area. The following data will be collected approximately once an hour during each VTE event:

- applied vacuum at the extraction well
- induced vacuum and liquid level at the observation wells
- VOC concentration (by photo-ionization detector) and flow rate of vapor recovered from the extraction well
- total liquid volume recovered
- temperature, flow rate, and VOC concentration (by photo-ionization detector) of vapor entering and exiting each GAC unit

One hour before the end of each VTE event, air samples will be collected from the inlet of the lead GAC unit and the outlet of the lag GAC unit and sent to a laboratory for BTEX and total petroleum hydrocarbons (C5-C10) analysis. Results of the VTE event will be analyzed to determine the effectiveness of VTE at the site and to determine what changes, if any, might be made to optimize the existing method for subsequent events.

Conclusion

The first of the monthly VTE events is proposed to be conducted in September 2018. If you have any questions or comments about this report, please feel free to contact me at 315.671.9323 (andrew.korik@arcadis.com).

Table 1
Groundwater Gauging and Analytical Data

BP Site NY-17782
370 Grand Concourse
Bronx, New York

Notes:

1. Samples were collected by EnviroTrac.
2. Laboratory analysis was conducted by Lancaster Laboratories located in Lancaster, Pennsylvania.
3. Concentrations reported in micrograms per liter (ug/L) or parts per billion (ppb).
4. U = The compound was analyzed for but not detected. The associated value is the compound quantitation limit.
5. J = Indicates an estimated concentration.
6. ND = Not detected.
7. Bold values indicate that the constituent was detected at a concentration greater than NYSDEC Technical and Operational Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values (NYSDEC 1998).
8. NA = Not Analyzed.
9. NM = Not Measured.
10. NP = No Product.
11. LNAPL = Light non-aqueous phase liquid.
12. BTEX = Benzene, Toluene, Ethylbenzene and Xylene.
13. MTBE = Methyl tert-butyl ether.
14. Elevations reference an arbitrary onsite benchmark.
15. NSVD = Not surveyed to vertical datum.

SAMPLE INFORMATION

Client Sample Description	Sample Collection Date/Time	ELLE#
IW-1 Grab Groundwater	04/12/2018 13:30	9564532
MW-6A Grab Groundwater	04/12/2018 13:45	9564533
IW-2 Grab Groundwater	04/12/2018 14:00	9564534
MW-4 Grab Groundwater	04/12/2018 14:15	9564535
Trip Blank Water	04/12/2018	9564536

The specific methodologies used in obtaining the enclosed analytical results are indicated on the Laboratory Sample Analysis Record.

2425 New Holland Pike, Lancaster, PA 17601 • 717-656-2300 • Fax: 717-656-6766 • www.EurofinsUS.com/LancLabsEnv

Project Name: BP 17782
ELLE Group #: 1933226

General Comments:

See the Laboratory Sample Analysis Record section of the Analysis Report for the method references.

All QC met criteria unless otherwise noted in an Analysis Specific Comment below.
Refer to the QC Summary for specific values and acceptance criteria.

Project specific QC samples are not included in this data set.

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Surrogate recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in an Analysis Specific Comment below.

The samples were received at the appropriate temperature and in accordance with the chain of custody unless otherwise noted.

Analysis Specific Comments:

SW-846 8260C, GC/MS Volatiles

Batch #: D181091AA (Sample number(s): 9564532, 9564534-9564536 UNSPK: P564044)

The recovery(ies) for the following analyte(s) in the MS and/or MSD were below the acceptance window: Ethylbenzene, Xylene (Total)

The relative percent difference(s) for the following analyte(s) in the MS/MSD were outside acceptance windows: Ethylbenzene, Xylene (Total)

Batch #: D181141AA (Sample number(s): 9564533 UNSPK: P566472)

The recovery(ies) for one or more surrogates were below the acceptance window for sample(s) MS

Quality Control Summary

Client Name: ARCADIS (NY) Group Number: 1933226
Reported: 04/25/2018 16:24

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

Method Blank

Sample Acceptance Policy

Samples must be submitted in a manner that meets the criteria listed below. If these criteria are not met, the laboratory will contact the client to discuss how to proceed with testing. If the client decides to proceed with testing, a comment describing the variation will appear on the analytical report.

- Documentation must be complete and include: sample identification, the location, date and time of collection, collector's name or initials, preservation type, sample type, required analyses, and any special remarks concerning the sample.
- Proper sample labeling must include unique identification on a durable (water resistant) label using indelible ink.
- Samples must be collected in appropriate containers with sufficient volume to perform tests. The laboratory will provide appropriate bottleware.
- Samples must be shipped promptly to meet specified holding times with adequate packing materials to prevent damage during shipment and adequate wet ice to meet method temperature requirements (0-6°C, not frozen).
- Please follow all IATA and/or DOT regulations when returning shipment.

Explanation of Symbols and Abbreviations

The following defines common symbols and abbreviations used in reporting technical data:

BMQL	Below Minimum Quantitation Level	**mg**	milligram(s)
C	degrees Celsius	**mL**	milliliter(s)
cfu	colony forming units	**MPN**	Most Probable Number
CP Units	cobalt-chloroplatinate units	**N.D.**	non-detect
F	degrees Fahrenheit	**ng**	nanogram(s)
g	gram(s)	**NTU**	nephelometric turbidity units
IU	International Units	**pg/L**	picogram/liter
kg	kilogram(s)	**RL**	Reporting Limit
L	liter(s)	**TNTC**	Too Numerous To Count
lb.	pound(s)	**µg**	microgram(s)
m3	cubic meter(s)	**µL**	microliter(s)
meq	milliequivalents	**umhos/cm**	micromhos/cm

<	less than
>	greater than
ppm	parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.
ppb	parts per billion
Dry weight basis	Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as “analyze immediately” are not performed within 15 minutes.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Data Qualifiers

Qualifier	Definition
C	Result confirmed by reanalysis
D1	Indicates for dual column analyses that the result is reported from column 1
D2	Indicates for dual column analyses that the result is reported from column 2
E	Concentration exceeds the calibration range
K1	Initial Calibration Blank is above the QC limit and the sample result is ND
K2	Continuing Calibration Blank is above the QC limit and the sample result is ND
K3	Initial Calibration Verification is above the QC limit and the sample result is ND
K4	Continuing Calibration Verification is above the QC limit and the sample result is ND
J (or G, I, X)	Estimated value >= the Method Detection Limit (MDL or DL) and < the Limit of Quantitation (LOQ or RL)
P	Concentration difference between the primary and confirmation column >40%. The lower result is reported.
U	Analyte was not detected at the value indicated
V	Concentration difference between the primary and confirmation column >100%. The reporting limit is raised due to this disparity and evident interference.
W	The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L.
Z	Laboratory Defined - see analysis report

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods.
Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

DEC REMARKS:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"
1/5/04 BPAmoco in operation and taking responsibility for southern half of property. Reference spill #0111974.(KMF).

11/26/2003 Reassigned from O'Dowd to Sun.

01/29/2004-Sun-File Update by Sun: Sun sent a Stipulation Agreement to Hess requiring the complete delineation of the contamination, including the restoration of MW-1 and MW-8, and submittal of the Operation, Maintenance and Monitoring Pla The Department approves the remedial action plan prepared by EnviroTrac, dated July, 2001. The Department set a deadline 2/20/04 for the Respondent to return the signed Stipulation Agreement. (WJS)

03/26/04- The Stipulation Agreement was signed by Hess on 03/10/04 and executed by the Department on 03/24/04. (WJS)

08/11/04-File Update by Sun: On 08/11/04 Sun approves the Investigation Plan submiited July 8, 2004 by Michael Matri, Proj Manager for Hess Corp.The two soil borings/monitoring wells proposed in the Investigation Plan will be used to replace well MW-8 and will be located east and west of the former MW-8 location. The approved letter was mailed to Hess on 08/11/04. (WJS)

NYSDEC SPILL REPORT FORM

DEC REGION: 2 **SPILL NUMBER:** 9814075

SPILL NAME: FORMER HESS STATION 32GRA **DEC LEAD:** AXDORONO

05/09/05-File Update by Sun: On 05/05/05, thr Department held a project review meeting with Hess' Project Manager (Mike Matri) and his consultant (EnviroTrac). Per Mike Matri, EnviroTrac has contacted Metropolitan Transportation Authority (MTA) order to obtain access to delineate along the eastern (up-gradient) portion of the site adjacent to the MTA New York City Trar subway. Currently, Hess drilling contractor, Submmit Drilling Co., Inc., is obtaing the necessary Railroad Protective Liability Policy to satisfy MTA's insurance requirements. The delineation will be conducted once the work is approved by the MTA.(W.

10/27/05: Site reassigned from Sun to Andersen.

10/27/05: Reviewed the second quarterly 2005 update report dated 8/19/05. Additional delineation is still in progress.

12/6/05: Reviewed quarterly report dated 11/22/05. Six monitoring wells sampled on October 6, 2005. Max BTEX 3,309.4 ppb (MW13) and max MTBE 1,250ppb (MW13). Additional delineation delayed while waiting for MTA permit.

1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and ET. Additional delineation is currently awaiting an MTA permit.

3/29/06: Received email from Thomas Bosshard of EnviroTrac : The two (2) up-gradient monitoring wells at the referenced si have been successfully installed. The new monitoring wells will be incorporated into the site's quarterly groundwater monitorir schedule with the second quarter 2006 sampling event scheduled for April 2006. The monitoring well installations and April 2(groundwater monitoring event will be summarized in the site's next quarterly Update Report.

6/12/06: Reviewed the first quarterly 2006 update report. Groundwater samples collected on January 19, 2006. Max BTEX 6,(ppb (MW12), max MTBE 2,830 ppb (MW12). Upgradient on-site wells installed in March. Installation of a well downgradient o MW12 and a RAP required by September 12, 2006.

6/30/06: Meeting on 6/28/06 with Hess, NYSDEC, Quantum, EnviroTrac and GSC. Hess will ask for access to the adjacent R yard to delineate. ORC may be utilized as a remedial method.

7/12/06: Reviewed second quarterly 2006 report. ORM socks in MW12 and 13. ORC socks will be installed in MW15 and MW16. Groundwater samples collected on 4/4/06. Max BTEX 13,571 ppb (MW15). Max MTBE 964 ppb (MW12).

8/23/06: Received email from Erin Goelz of ET. Delineation not possible in the metronorth area east of the site. Delineation possible on Park Avenue, but this is far from the site. Three wells on Park Avenue were proposed. Wells not required by the Department because they are far from the site. RAP due 9/12/06.

8/29/06: Spoke with Ed Russo. A request for an extension for RAP submission will be required because pilot testing will be conducted on site. Local treatment is not feasible
due to subsurface piping on site and the subway nearby. An email request for an extension will be submitted. Power supply a the site may be problematic, ConEdison will be contacted. This site is currently a BP gasoline station.

9/8/06: Received email from Ed Russo. Requested extension until November 30 to submit RAP in order to complete SVE pilo testing on MW's 12 and 13. SVE test tentatively scheduled for October 15. ORC socks will be installed in MW 15 and 16 ASAP. Extension approved.

10/5/06: Received update report dated 9/27/06. Wells sampled on 7/13/06. Fluctuating concentrations. Max BTEX 81,251ppb (MW15), max MTBE 1,650 ppb (MW12). ORM socks installed in MW 15 and 16. Contamination may be in the bedrock. RAP due 11/30/06.

12/7/06: RAP conditionally approved. SVE will be used in six wells, STRE in MW 15 and 16 because could not trench in this area, ORC socks in six wells. Conditions of approval: 1) more agressive groundwater remedial strategy for MW MW 12, 15, 1 and 2)treatment method air effluent.

12/28/06: Reviewed update report dated 12/20/06. Fluctuating gw concentrations. Max BTEX 39,412 ppb (MW15), max MTBI

718 ppb (MW12).

1/17/07: Meeting on 1/16/07. This is the only Hess site not being transferred to Delta. A RAP addedum will be submitted addressing gw contamination.

3/13/07: Reviewed update report. Wells sampled on 1/11/07. Max BTEX 31,608 ppb (MW15), max MTBE 1,140 ppb (MW12). Fluctuating groundwater concentrations. ORM socks installed in MW9, and MW12-MW16. SVE system not installed yet. Emailed Hess, EnviroTrac regarding the SVE implementation schedule, and for details on the existing Well Stripper system o site.

3/15/07: Received email from Ed Russo:" I sent you an email on 2/23 summarizing the well stripper, how it works, etc. Please confirm that you received that email. If not, I
will resend it. If you did receive it and have further questions or comments, let me know and I will provide you with any additio information you may need.

As for the schedule, we are currently working with BP (who currently operates the site) in an effort to connect our system to th BP station's existing electrical system. This would obviously save a great deal of time since CONED has been very slow to provide us new power
drops for some of our other recent systems. We are also working with BP on an access agreement to install the system. Once these issues have been resolved, the system will be installed. Due to the fact that most of the subsurface work is already don the system install will be very quick once the access and electrical issues are finalized."

3/16/07: Received email from Ed Russo:"attached are a picture of the well stripper and a pdf document summarizing how the well stripper works. As you discussed with Dawn
Coughlin of Hess at your recent meeting, we are proposing to install permanent well strippers in MW-12 and MW-13 and bring portable well stripper to the site for periodic full day remediation events (permanent well strippers cannot be installed in MW-1 or MW-16 since these wells are not connected to the remediation system).

The permanent well strippers within MW-12 and MW-13 will be sampled (influent and effluent) on a monthly basis during syst O&M events and the portable well stripper will be sampled for influent and effluent during the periodic remediation events.

Note that we are in the process of working with BP to get access to the site to install the system. In order to expedite the install once access is obtained, we will be ordering the equipment so that we can prepare the shed to be delivered to the site once access is granted."

7/31/07: Received email from Ed Russo:"GW sampling was conducted on the site about 2 weeks ago. We should get data fro the lab this week and will prepare an update report for submittal to you right away. As far as the system goes, we have receiv approval from BP (the current owner/operator of the site) to install the
system. Our electrician is working on getting power from CONED. We have ordered all equipment and are working on buildin the shed in house so that once electrical power is available, we can deliver the system to the site and connect it/start it up. Once we get closer to a start date, I will be in contact with you to schedule start-up so you can be onsite if you'd like."

9/5/07: Reviewed quarterly report. Flucating groundwater concentrations. Wells sampled on 7/20/07. Max BTEX 47,580 ppb (MW15). Max MTBE 681 ppb (MW12). ORM socks replaced in MW9 and MW12 - MW16. SVE system and well strippers not installed yet. Short term remediation events planned for MW15 and MW16. Emailed Ed Russo to followup on system startup date and initiation of short term remediation events.

10/9/07: Received email from Ed Russo:"we have scheduled an on-site meeting with representatives of BP, Delta Consultant (BP's consultant), and EnviroTrac for Monday October
15th. BP and Delta wanted to be fully aware of our proposed work before agreeing to let us proceed. We expect to get the approval to proceed with the sitework at that meeting.

The shed for the remediation system and the control panel have been completed in our shop and can be mobilized to the site

once we obtain the access. Our electrician is ready to go and can get to the site within about a week once we obtain access and CONED involvement will be
minimal since we will be connecting to BP's station electric for our system electrical requirements.

In addition, since the majority of the subsurface work was done a few years ago during the construction of the BP station, only minimal site work is required, so we expect to be able to start the system and short-term remediation events within 4-6 weeks of access approval.

I will send you an update of our progress following the October 15th
meeting.

Edward E. Russo
Senior Project Manager
EnviroTrac Ltd.
5 Old Dock Road
Yaphank, NY 11980
P: 631.924.3001
F: 631.924.5001
http://www.envirotrac.com"

2/14/08: Received email from Ed Russo:"We wanted to let you know that the SVE/Well Stripper system was activated at the referenced site on January 29, 2008. Preliminary data indicates that the system is effectively removing BTEX and MTBE from onsite wells. The initial start-up period will last another week or so and then system O&M will continue on a monthly basis thereafter. A full round of groundwater sampling will be conducted this month and a report summarizing that data and all system data collected to date will be submitted to you before April 30, 2008. If you would like to visit the site to see the system or if you have any questions or comments, please give me a call at (631) 924-3001"

3/12/08: Reviewed Fourth Quarterly 2007 update report dated November 27,2007. Wells sampled on 10/16/07. Max BTEX 16,839 ppb (MW15), max MTBE 727 ppb (MW12). System startup data will be submitted in next report.

4/15/08: Reviewed update report dated April 8th, 2008. SVE and well strippers (WS) in operation, and short term remediation events and WS being conducted in MW-15 and MW-16. Maximum BTEX concentration 3,779 ppb (MW16), maximum MTBE concentration 325 ppb (MW12). General downward trend in contamination.

8/7/08 - Carlson: Reviewed July 2008 Hydrogeologic Status Report. Wells sampled on 6/30/08. Maximum BTEX concentratio 54,315 ppb (MW15). SVE/WS system in operation. Fluctuating concentrations.

10/22/08 - Carlson: Meeting with Hess, Envirotrac, and NYSDEC.

11/17/08 - Carlson: Reviewed October 2008 Update Report. Wells sampled on 8/26/08. Fluctuating concentrations in some wells. Maximum BTEC concentration 1,068 ppb (MW12). System in operation.

2/20/09 - Carlson: Reviewed January 2009 Update Report. SVE and WS in operation. High effluent concentrations in MW15. Effluent concentraions were not measured from MW12,13. Wells sampled on 11/24/08. Hot well MW12 was not sampled (why?).

3/18/09 - Carlson: Meetin
g with Hess and Envirotrac. Not enough water to sample WS effluent in some cases.

NYSDEC SPILL REPORT FORM

DEC REGION: 2 **SPILL NUMBER:** 9814075

SPILL NAME: FORMER HESS STATION 32GRA **DEC LEAD:** AXDORONO

5/7/09 - Carlson: Reviewed April 2009 Update Report. SVE/WS in operation, and monthly STRE from MW15. Wells sampled 2/27/09. Maximum BTEX concentration 390 ppb (MW15). Strong decreasing trends.

5/28/09 - Carlson: Received email from Ed Russo:" while out at the site this week conducting routine GW sampling, our technician noted product (0.18') in MW-15. This well, and the entire
site, has cleaned up dramatically since the system was activated and short term remediation events commenced a couple of years ago. As you can see from the attached photo, the product appears to be fresh gasoline. Our technician has taken a sample of the product and the GW
within the well. We will analyze the GW for BTEX/MTBE as well as ethanol and conduct a fingerprint analysis on the product t try to confirm that it is a new release since this site is an active BP station. The technician did not note any indication of a surface spill and the well seal and manhole have been reported to be in good condition.
Once we get results of the ethanol analysis and fingerprint analysis, we will let you know. If it appears that this may be a new release, we would need to notify BP."

8/7/09 - Carlson: Reviewed July 2009 update report. SVE/WS in operation. STRE on MW15 but high concentrations - effluent should be monitored. MW15 fingerprinting results not included.

8/17/09 - Carlson: Reviewed fingerprinting results of product identified in MW15. Product was found to be weathered gasoline from the old release.

8/19/09 - Carlson: Meeting with Hess. System in operation.

11/17/09 - Carlson: Reviewed October 2009 Update Report. Large decrease in concentration in MW15. System in operation.

1/27/2010 - Carlson: Meeting with Hess. Well stripper wells are often dry.

2/5/2010 - Carlson: Reviewed update report. Low dissolved concentrations.

5/20/2010 - Carlson: Meeting with Hess.

5/27/2010 - Carlson: Reviewed update report. SVE to be shut down due to low recovery.

8/13/2010 - Carlson: Reviewed July 2010 Update Report. Spike in concentration in MW15. SVE shut down due to low recove STRE/well stripper on MW15 monthly.

8/30/2011 - Obligado - Hess is still duing well stripper STRE on wells MW-12 and MW-15 monthly.

10/21/11 - Obligado - This spill is reassigned to Carlson as directed by Brevdo.

11/14/11 - Carlson: Reviewed October 2011 update report. STRE/well stripper on MW15 and MW12 in June and July. Month EFR planned instead of well stripper events from now on.

8/24/2012 - 1Q2012, 4/30/2012, by EnviroTrac. The groundwater was sampled on 2/24/2012. DTW 15.95 to 22.32'. Flows t southeast. EFR on MW-12 and MW-15 on 12/14/2011, 1/5/2012 and 2/6/2012. Joseph Rennie (EnviroTrac), (631) 924-3001, JoeR@EnviroTrac.com

4/26/16 - Raphael Ketani. Yesterday I received the EnviroTrac 4/25/16 Quarterly Update Report. On 12/10/15, 1/20/16 and

2/3/16 VEFRed MW-15. On 2/9/16 MW-9 to 11 and 14 to 16 were gauged. MW- 9 to 11, 15 and 16 were sampled on 2/9/16. Product was not measured in any of the wells. Groundwater was measured at 15.54' and 22.47' below grade and was determined to be flowing southeast. Total BTEX was non-detect at MW-9 to 11, 703.5 ppb at MW-15 and 14.5 ppb at MW-16

7/26/16 - Raphael Ketani. Yesterday I received the EnviroTrac 7/25/16 Quarterly Update Report for the period March to May 2016. On 3/7/16, 4/5/16 and 5/5/16 VEFRed MW-15. On 5/13/16 MW-9 to 11 and 14 to 16 were gauged. MW- 9 to 11, 15 and 16 were sampled on 5/13/16. Product was not measured in any of the wells. Groundwater was measured at 14.90' and 21.59 below grade and was determined to be flowing southeast. Total BTEX was 11.3 ppb at MW-9 and non-detect at MW-10 to 11 3785 ppb (64 ppb benzene) at MW-15 and 20 ppb at MW-16.

10/24/16 - Raphael Ketani. Today I received the EnviroTrac 10/24/16 Quarterly Update Report for the period June to August 2016. On 6/7/16, 7/12/16 and 8/8/16 MW-15 was VEFRed. On 8/22/16 MW-9 to 11 and 14 to 16 were gauged. MW- 9 to 11, and 16 were sampled on 8/22/16. Product was not measured in any of the wells. Groundwater was measured at 14.94' and 21.90' below grade and was determined to be flowing southeast. Total BTEX was non-detect at MW-9 to 11. MW-15 had 11,964.7 ppb BTEX (74.7 ppb benzene). MW-16 had 9.6 ppb BTEX.

While I approved the report, I sent an email to Mr. Russo (631) 924-3001, EDR@ EnviroTrac.com asking for an explanation as to why the BTEX concentrations should increase so much and so quickly at MW-15. I also asked him to have EnviroTrac come up with a means of reducing the contaminant concentrations at this locatic

Mr. Russo responded today to my above email with the following statement:

– in response to your email, please note that the increase in BTEX in MW-15 appears to be related to water table fluctuation. When the water table was lower (in November 2015 and February 2016) BTEX concentrations decreased. The water table ha been higher in May 2016 and August 2016 and the BTEX concentrations have increased.

Please note factors that indicate that our current course of action is the best to continue to address this impact:

1) The overall trend in remediation of this well, despite the past 2 sampling events, has been good. In 2014 product was present in the well and as a result EFR was initiated. Since 2014, product has no longer been detected within the well. Dissolved concentrations of BTEX were as high as 102,391 ug/l in 2014 prior to initiation of EFR.
2) A majority of the BTEX consists of degraded gasoline (xylenes) and through continuing groundwater monitoring of the site this impact has not shown up in downgradient monitoring wells, indicating that it is an isolated area of impact.
3) A remediation system operated to remediate the eastern portion of the site (area of MWs-9 through 14). As depicted on th attached figure, this remediation system could not be connected to the area of MW-15 due to site constraints/underground utilities.

Please also note that we are scheduled to continue to sample the site quarterly and will continue to evaluate our plan moving forward based on quarterly sampling results.

EFR events will continue on a monthly basis.

10/25/16 - Raphael Ketani. I sent a response email to Mr. Russo's 10/24/16 response email. I stated that while EnviroTrac ha interpreted the data to indicate a decreasing trend for the BTEX concentrations in the groundwater at MW-15, staff at the Department have noted that the BTEX concentration in the 8/22/16 groundwater sample is at least 3 times greater than that c the past six samples. Also, despite the drop in the water table and the associated release of some product from the micro channels and pores in the soil, we are still concerned that this location will remain a source of groundwater contamination. We will monitor the quarterly analytical results with the expectation that EnviroTrac will take the necessary action to lessen the contamination in the event that it is consistently very high.

2/1/17 - Raphael Ketani. Today I received the EnviroTrac January 2017 Quarterly Update Report dated 1/31/17 for the period September to November 2016. On 9/6/16, 10/26/16 and 11/9/16 MW-15 was VEFRed. On 11/3/16 MW-10, 11 and 14 to 16 were gauged and MW-10, 11, 15 and 16 were sampled. Product was not measured in any of the wells. Groundwater was

measured at 15.23' and 18.96' below grade and was determined to be flowing southeast. Total BTEX was non-detect at MW- and 11. MW-16 had 3 very low hits and 2 non-detects. MW-15 had 4889.3 ppb BTEX (70.3 ppb benzene).

5/2/17 - Raphael Ketani. I reviewed the EnviroTrac January 2017 Quarterly Update Report dated 4/28/17 for the period Dece to February 2017. On 12/8/16, 1/18/17 and 2/15/17 MW-15 was VEFRed. On 2/27/16, MW-9 to 11 and 14 to 16 were gauged and MW-9 to 11, 15 and 16 were sampled. Product was not measured in any of the wells. Groundwater was measured at 15. and 22.37' below grade and was determined to be flowing southeast. BTEX was non-detect at MW-9 to 11. MW-15 had 879.4 ppb. MW-16 had 9.3 ppb.

I approved the report without comment.

Next, I reviewed the EnviroTrac 4/20/17 Request for Well Abandonments letter. EnviroTrac requests permission to abandon wells MW-12 to 14. The reason for requesting the abandonments is that EnviroTrac claims the groundwate r data has shown very significant decreases in the concentrations for BTEX (98.9%) and for MTBE (99.9%).

I looked at the historical data for wells MW-12 to MW-14. I found that MW-12 hadn't been sampled from 11/21/13 to 8/19/14 because it was not accessible. After this, the well was not sampled up to the 2/27/17 round. Very high to extremely high BTE results were indicated in Table 1 for the past results. MW-13 was sampled sporadically from 2/24/12 to 5/16/14. It was not sampled from 8/19/14 to 2/27/17, except for the 5/13/15 round when the results were non-detect. Past BTEX results for this w as far back as 11/24/08 were generally low. MW-14 had consistently low BTEX results since shortly after it was installed. Also with the exception of some rounds when it was not sampled, the results were non-detect from 2/28/08 to 8/24/12. After this, th results have "D" designations for dry, though there are the letters "NS" for Not Sampled for the rounds from 5/13/15 to 2/27/1

From reviewing the data in Table 1 for MW-12 to MW-14, I determined that wells MW-13 and MW-14 could be abandoned without compromising the monitoring. However, there was insufficient data for making a determination as to whether MW-12 could be abandoned. In light of this, I stated that MW-12 will need to be sampled for at least 3 more rounds before the Department can make a decision regarding abandonment. I sent an official letter today to Mr. Russo, with a C-C to John Engdahl of Speedway, stating the above.

8/1/17 - Raphael Ketani. I reviewed the EnviroTrac July 2017 Quarterly Update Report dated 7/28/17 for the period March to 2017. On 6/8/17, 7/19/17 and 8/8/17 MW-15 was VEFRed. On 5/18/17, MW-9 to 11, 15 and 16 were gauged and sampled. Product was not measured in any of the wells. Groundwater was measured at 14.66' and 21.13' below grade and was determined to be flowing southeast. BTEX was non-detect at MW-9 to 11. MW-15 had 5154.5 ppb. MW-16 had 8.7 ppb BTE

10/31/17 - Raphael Ketani. I reviewed the EnviroTrac October 2017 Quarterly Update Report dated 10/30/17 for the period Ju to August 2017. On 6/8/17, 7/19/17 and 8/8/17 MW-15 was VEFRed and the sock was replaced. On 8/24/17, MW-9 to 11, 15 and 16 were gauged and sampled. Product was not measured in any of the wells. Groundwater was measured at 15.23' and 22.45' below grade and was determined to be flowing southeast. BTEX was non-detect at MW-9 to 11. MW-15 had 8541.3 pp MW-16 had 3.2 ppb BTEX.

1/24/18 - Raphael Ketani. Today I received the EnviroTrac Remedial Work Plan dated 1/24/18. The objective of the proposed plan was to collect the product in the vicinity of MW-15. The well was installed in the weathered schist bedrock. Multi-family residences with basements are located to the north. A subway tunnel is located adjacent to the site beneath the Grand Concourse. Utilities are below the Grand Concourse. Product was detected in the well on 6/8/17, 7/19/17, 9/6/17, 10/18/17 ar on 11/3/17. The thickness varied from 0.01 feet to 0.04 feet.

Due to the proximity of the subway and utilities, EnviroTrac proposes to treat the product by injecting surfactant and recoverin surfactant and product as a combined liquid using the EFR method. BioSolve Pinkwater will be the surfactant of choice. One hundred gallons of Pinkwater as a 5% solution will be injected. The inside of the well will be scrubbed with a brush and surge blocking will take place. The EFR event will take place the day after the injection and will last 8 hours. Three additional injectio and extraction events will take place after this initial event.

On site parameters consisting of depth to product, depth to water and product thickess will be monitored. Wells MW-15 and

MW-16 will be utilized for the monitoring.

Groundwater sampling will continue to take place quarterly. Each sample will be analyzed for BTEX and MTBE.

A work schedule was included in the work plan. I reviewed the schedule and did not have any comments. I approved the work plan.

1/25/18 - Raphael Ketani. I reviewed the EnviroTrac January 2018 Quarterly Update Report dated 1/25/18 for the period September to November 2017. On 9/6/17, 10/18/17 and 11/3/17 MW-15 was VEFRed and the sock was replaced. On 11/17/1 MW-9 to 11, 15 and 16 were gauged and sampled. Product was not measured in any of the wells. Groundwater was measure at 15.31' and 22.59' below grade and was determined to be flowing southeast. BTEX was non-detect at MW-9 to 11. MW-15 l 7012.9 ppb. MW-16 had 11.6 ppb BTEX.

Later, Mr. Rennie and Mr. Russo called to discuss the site and the proposed usage of Pinkwater. They said that they had goc results with the treatment solution as it loosens up the product being held by the soil. I stated that, from my experience, I had mixed feelings about Pinkwater because the results had been mixed. Mr. Russo stated that they'd like to try the treatment solution and that they will send me the results. Mr. Russo added that the reason they want to use the Pinkwater is because th BTEX concentrations are very high in the samples from MW-15. I stated that the groundwater sample results for MW-15 had remained high mostly because xylenes are resistant to breakdown. Mr. Rennie and Mr. Russo agreed. I responded that I had wanted to close the spill case and send a Spill Closure Letter because the product thickness had remained very low. Mr. Russ said that the oil wasn't the issue, just the BTEX concentrations. I finished the conversation by telling them to try the Pinkwater and to send me the results as soon as possible so that I can evaluate whether closure is appropriate. They said they will. Witl that, the conversation ended.

=case manager's note=
Speedway leases the property. The owner is 350 Concourse Realty, LLC at 11 Park Place, Ste. 615, NY, NY, 10007. Mr. Russo said that letters can be sent to both the property owner and Speedway or just to Speedway, who will forward the letters to 350 Concourse Realty.

05/01/2018: This spill case was transferred to A. Doronova - AD. AD
Received the following e-mail from Mr. Rennie:

"Dear Ms. Doronova,

Please find attached the most recent Update Report for the above referenced location.

Sincerely,

Joseph Rennie - Project Manager - EnviroTrac Ltd. - 5 Old Dock Road, Yaphank NY 11980
631.924.3001 (Office) - 631.924.5001 (Fax) - joer@envirotrac.com"

Will review. AD

05/23/2018: Reviewed the report. Site history: Petroleum impacted soils encountered during an underground storage tank (US upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this proje a total of 410.76 tons of soil were removed off site for disposal.

This report covers period from December 2017 – March 2018. On December 13, 2017, January 18, and February 15, 2018 – Enhanced Fluid Recovery (EFR) was performed on MW-15. February 13, 2018 – Performed a surge blocking/well cleaning ev on MW-15 while injecting approximately 100 gallons of a 5% solution of BioSolve® Pinkwater® (surfactant) and water as proposed within the Remedial Action Plan (RAP) submitted to and approved by the NYSDEC in January 2018.
On February 21, 2018 – the consultant did a post surge blocking/surfactant injection well gauging event.

NYSDEC SPILL REPORT FORM

DEC REGION: 2 **SPILL NUMBER:** 9814075

SPILL NAME: FORMER HESS STATION 32GRA **DEC LEAD:** AXDORONO

On March 23, 2018 – six (6) monitoring wells were gauged and sampled.
Wells Gauged: MW-9 through MW-12, MW-15, and MW-16.
Wells Containing LPH: None
Groundwater Depth: 14.98 feet to 21.74 feet
Groundwater Flow: Southeasterly
Wells Sampled: MW-9 through MW-12, MW-15, and MW-16
Maximum Benzene Concentration: 21.6 micrograms per liter (ug/L) in MW-15
BTEX: around 24,000ug/L in MW-15
Maximum MTBE Concentration: 99.4 ug/L in MW-12

The consultant will continue quarterly groundwater sampling, with the next sampling event
scheduled for M
ay 2018. An Update Report summarizing these activities will be submitted to NYSDEC in July 2018. Speedway will continue monthly EFR events.

According to the consultant, it appears that surge blocking/surfactant injection has liberated dissolved phase hydrocarbons in the area of MW-15. EnviroTrac will continue to perform surge
blocking/surfactant injection events/EFR in MW-15. Results from these events will be used to determine if further action shou be taken. AD

07/20/2018: Received the following e-mail from EnviroTrac:

"Dear Ms. Doronova,

Please find attached the latest update report for the above referenced location. Also, please note that monitoring wells MW-9, MW-10, and MW-11 have shown low to ND BTEX/MTBE concentrations for several years and show low to ND VOC STARs compounds concentrations in the most recent groundwater sampling event. As a result, Speedway/EnviroTrac respectfully requests the abandonment of these wells in order to minimize trip hazards.

Sincerely,

Joseph Rennie - Project Manager - EnviroTrac Ltd. - 5 Old Dock Road, Yaphank NY 11980
631.924.3001 (Office) - 631.924.5001 (Fax) - joer@envirotrac.com"

Will review. AD

07/30/2018: Reviewed the report. This report covers monitoring period from March 2018 – May 2018.

On March 12, March 19, & May 4, 2018 – EnviroTrac performed a surge blocking/well cleaning event on MW-15 while injectir approximately 100 gallons of a 5% solution of BioSolve® Pinkwater® (surfactant) and water as proposed within the Remedial Action Plan (RAP) submitted to and approved by the NYSDEC in January 2018.
On March 16, March 20, & May 10, 2018 – Performed Enhanced Fluid Recovery (EFR) on MW-15.
On May 31, 2018 – Gauged and sampled four (4) monitoring wells.

Wells Gauged: MW-9 through MW-11, MW-15, and MW-16
Wells Containing LPH: None
Groundwater Depth: 14.21 feet to 21.66 feet
Groundwater Flow: Southeasterly
Wells Sampled: MW-9 through MW-11, MW-15, and MW-16
Maximum Benzene Concentration: ND (non-detect) all wells
Maximum MTBE Concentration: 5.0 micrograms per liter (ug/L) in MW-9

BTEX ranges in the site wells from ND in MW-9, MW-10 and MW-11 to 14,600ppb in MW-15.

NYSDEC SPILL REPORT FORM

DEC REGION: 2 **SPILL NUMBER:** 9814075

SPILL NAME: FORMER HESS STATION 32GRA **DEC LEAD:** AXDORONO

Continue quarterly groundwater sampling, with the next sampling event scheduled for August 2018. An Update Report summarizing these activities will be submitted to NYSDEC in October 2018. Speedway to continue monthly EFR events.

According to the consultant, surge blocking/surfactant injection has liberated dissolved phase hydrocarbons in the area of MW-15. EnviroTrac will continue to perform surge blocking/surfactant injection events/EFR in MW-15. Results from these events will be used to determine if further action should be taken. AD

10/29/2018: Received the following e-mail from J. Rennie:

"Dear Ms. Doronova,

Please find attached the latest update report for the above referenced location. Also, please note in our recommendation section that monitoring wells MW-9, MW-10, and MW-11 have shown low to ND BTEX/MTBE concentrations for several years and show low to ND VOC STARs compounds concentrations in the most recent groundwater sampling event. As a result, Speedway/EnviroTrac respectfully requests the abandonment of these wells in order to minimize trip hazards. Please let us know if NYSDEC approves of these well abandonments.

Sincerely,

Joe Rennie

Joseph Rennie - Project Manager - EnviroTrac Ltd. - 5 Old Dock Road, Yaphank NY 11980
631.924.3001 (Office) - 631.924.5001 (Fax) - joer@envirotrac.com "

Will review. AD

11/21/2018: Reviewed the 3rd quarter 2018 report for the monitoring period: June 2018 – August 2018.
Work Performed:
- June 4 & August 7, 2018 – Performed a surge blocking/well cleaning event on MW-15 while injecting approximately 100 gallons of a 5% solution of BioSolve® Pinkwater® (surfactant) and water as proposed within the Remedial Action Plan (RAP) submitted to and approved by the NYSDEC in January 2018.
- June 5, July
2, & August 10, 2018 – Performed Enhanced Fluid Recovery (EFR) on MW-15.
- August 17, 2018 – Gauged and sampled six (6) monitoring wells.

Groundwater Monitoring: Wells Gauged: MW-9 through MW-12, MW-15, and MW-16
Wells Containing LPH: None
Groundwater Depth: 13.47 feet to 21.41 feet
Groundwater Flow: Southeasterly
Wells Sampled: MW-9 through MW-12, MW-15, and MW-16
Maximum Benzene Concentration: 14.1 ug/L)(MW-12)
Maximum MTBE Concentration: 88.8 ug/L in MW-12
Total VOCs Range: ND – 8,788 ug/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for November 2018. A Update Report summarizing these activities will be submitted to NYSDEC in January 2019. Speedway to continue monthly EI events.

According to the consultant, monitoring wells MW-9, MW-10, and MW-11 have shown low to ND BTEX/MTBE concentrations for several years and show low to ND VOC STARs compounds concentrations in the most recent groundwater sampling ever As a result, Speedway/EnviroTrac respectfully requests the abandonment of these wells in order to minimize trip hazards. AI

NYSDEC SPILL REPORT FORM

DEC REGION: 2 **SPILL NUMBER:** 9814075

SPILL NAME: FORMER HESS STATION 32GRA **DEC LEAD:** AXDORONO

12/06/2018: Called and left a message to Mr. Rennie. Later received a call from him. Discussed their recommendations regarding wells MW-9, MW-10 and MW-11. Asked to leave well MW-9 in the annual sampling program since it is most down-gradient well, and approved abandonment of MW-10 and MW-11. Also requested historical data for MW-13 which was sampled consistently. Mr. Rennie said that the location of the MW-13 was rented by the owner and is occupied by vehicles. Requested to sample that well. Asked to look into historic data regarding well MW-15, if there were any possible sources of contamination as remote fill ports, since it is most up-gradient well at the site according to the GW flow direction. Sent the following e-mail to Mr. Rennie as per his request:

"Dear Mr. Rennie,

The Department had reviewed the submitted report with the proposed recommendations and has the following comments:

- DEC approves abandonment of monitoring wells MW-10 and MW-11;
- Monitoring well MW-9 should be kept in the program and sampled on annual basis;
- Monitoring well MW-13 should be sampled on next sampling event and historic data for this well should be provided to DEC
- Vicinity of an up-gradient well MW-15 should be checked on historic documents for possible sources of contamination such as former remove fill ports, etc.

Feel free to contact me if you have any questions regarding this matter.

Sincerely,

Ainura Doronova - Environmental Engineer"

AD

01/29/2019: Received the following e-mail from Ed Russo:

"Ainura – attached is the most recent update report for your review/files.

Let us know if you have any questions or comments.

Thanks.

Edward Russo - Senior Project Manager - EnviroTrac Ltd. - 5 Old Dock Road, Yaphank NY 11980
631.924.3001 (Office) - 631.924.5001 (Fax) - 516.523.6714 (Cell) - edr@envirotrac.com"

Will review. AD

02/13/2019: Reviewed the report. It states that for the monitoring period: September 2018 – November 2018, the following wo was performed at the site:
- September 26, October 12, & November 13, 2018 – Performed Enhanced Fluid Recovery (EFR) on MW-15.
- November 20, 2018 – Gauged and sampled five (5) monitoring wells.

Groundwater Monitoring: Wells Gauged: MW-9 through MW-11, MW-15, and MW-16.
Wells Containing LPH: None
Groundwater Depth: 12.93 feet to 20.28 feet. Groundwater Flow: Southeasterly.

Wells Sampled: MW-9 through MW-11, MW-15, and MW-16.
Maximum Benzene Concentration: 28.2 micrograms per liter (ug/L) (MW-15)
Maximum MTBE Concentration: 2.9 ug/L in MW-9.
Total VOCs Range: ND – 28,680.7 ug/L.

Recommendations: The consultant will continue quarterly groundwater sampling, with the next sampling event scheduled for February 2019. An Update Report summarizing these activities
will be submitted to the NYSDEC in April 2019. Speedway will
continue monthly EFR events.

As approved by the NYSDEC, the abandonment of monitoring wells MW-10 and MW-11 were completed on January 29, 201
MW-13 was able to be accessed on January 29, 2019 and was sampled. If results are favorable, abandonment of this well wi
be proposed. Going forward, MW-9 will be sampled on an annual basis per NYSDEC request. AD

04/30/2019: Received a 1st quarter 2019 monitoring report. Will review. AD

05/16/2019: Reviewed the report. It states that for the monitoring period: December 2018 – February 2019, the following work
was performed at the site:
- December 27, 2018, January 29 & February 20, 2019 – Performed Enhanced Fluid Recovery (EFR) on MW-15.
- January 29, 2019 – Gauged and sampled one (1) monitoring well. Also, two (2) monitoring wells (MW-10 and MW-11) were abandoned as approved by the NYSDEC.
- February 19, 2019 - Performed a surge blocking/well cleaning event on MW-15 utilizing a solution of BioSolve® Pinkwater® (surfactant) and water.
- February 25, 2019 – Gauged and sampled two (2) monitoring wells.

Groundwater Monitoring: Wells Gauged: MW-13, MW-15, and MW-16
Wells Containing LPH: None
Groundwater Depth: 14.25 feet to 16.76 feet. Groundwater Flow: Southeasterly

Wells Sampled: MW-13, MW-15, and MW-16
Maximum Benzene Concentration: 39.1 micrograms per liter (ug/L) (MW-15)
Maximum MTBE Concentration: 6.6 ug/L in MW-13
Total VOCs Range: ND (non-detect) – 25,293 ug/L

The only site well which exhibits elevated levels - is MW-15 with 25,293ppb of TVOCs.

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for May 2019. An Upd
Report summarizing these activities will be submitted to the NYSDEC in July 2019. Speedway to continue monthly EFR even

Will review. AD

07/31/2019: Reviewed the report. It states that for the monitoring period: March – May 2019, the following work was performe
at the site:
- April 22 & May 16, 2019 – Performed EFR on MW-15.
- May 22, 2019 – Gauged and sampled two (2) monitoring wells.

GW sampling:

Wells Gauged: MW-15, and MW-16
Wells Containing LPH: None
Groundwater Depth: 13.98 feet to 14.10 feet
Groundwater Flow: Southeasterly
Wells Sampled: MW-15, and MW-16
Maximum Benzene Concentration: 39.6 micrograms per liter (ug/L) (MW-15)
Maximum MTBE Concentration: 1.8 ug/L in MW-16
Total VOCs Range: 573.7 – 38,224.2 ug/L

Site Historic Remediation Activities:
• February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
• January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
• March 2010 – SVE system shut down due to asymptotic conditions.
• October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
• July 2017 – ORC socks installed in select wells.
• February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for August 2019. An Update Report summarizing these activities will be submitted to the NYSDEC in October 2019. Speedway/EnviroTrac are evaluating the possibility of re-drilling MW-15. EnviroTrac will approach the New York City Transit Authority to determine feasibility of re-drilling the well. AD

10/29/2019: Received the following email from Mr. Rennie:

"Ainura - Please find attached the most recent Update Report for the above referenced location.

Will review. AD

11/22/2019: Reviewed the report. It states that for the monitoring Ppriod: June – August 2019, the following work was perform at the site:
- June 17 & July 29, 2019 – Performed EFR on MW-15.
- August 15, 2019 – Gauged and sampled two (2) monitoring wells.

Groundwater Monitoring:
Wells Gauged: MW-15, and MW-16
Wells Containing LPH: None
Groundwater Depth: 14.98 feet to 15.08 feet
Groundwater Flow: Southeasterly

Wells Sampled: MW-15, and MW-16
Maximum Benzene Concentration: 39.5 micrograms per liter (ug/L) (MW-15)
Maximum MTBE Concentration: 1.2 ug/L in MW-16
Total VOCs Range: 865.8 – 28,614.5 ug/L

GW data:
Well 02/2019 05/2019 08/2019 (TVOCs ppb)

MW-15 25,293 38,224 28,618
MW-16 11 574 866

Well MW-15 indicated high levels of contamination and fluctuating trend. Well MW-16 showed increasing trend in contaminan levels.

Recommendations:
The consultant recommends to continue quarterly groundwater sampling, with the next sampling event scheduled for Novemb 2019. An Update Report summarizing these activities will be submitted to the NYSDEC in January 2020. Speedway/EnviroTr are evaluating the possibility of re-drilling MW-15. EnviroTrac working with the New York City Transit Authority to determine feasibility of re-drilling the well.

Will review. AD

02/05/2020: Reviewed the report. It states that for the monitoring period: September – November 2019, the following work wa performed at the site:

- December 3, 2019 – Gauged and sampled three (3) monitoring wells.

Groundwater Monitoring:
Wells Gauged: MW-9, MW-15, and MW-16
Wells Containing LPH: None
Groundwater Depth: 15.37 feet to 22.57 feet
Groundwater Flow: Southeasterly
Wells Sampled: MW-9, MW-15, and MW-16
Maximum Benzene Concentration: 25.8 ug/L in (MW-15)
Maximum MTBE Concentration: 3.4 ug/L in MW-9
Total VOCs Range: 10.8 – 10,861.4 ug/L

Recommendations:
The consultant recommends to continue quarterly groundwater sampling, with the next sampling event scheduled for February 2020. An Update Report summarizing these activities will be submitted to the NYSDEC in April 2020. Speedway/EnviroTrac are evaluating the possibility of re-drilling MW-15. EnviroTrac is working with the New York City Transi Authority to determine the feasibility of re-drilling the well.

If re-drilling of the well will not result in the lower TVOCs, other remedial actions should be proposed. AD

04/27/2020: Received the following email from Mr. Rennie:

Will review. AD

05/22/2020: Reviewed the report. It states that the following activities were historically performed at the site:
• February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
• January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
• March 2010 – SVE system shut down due to asymptotic conditions.
• October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
• July 2017 – ORC socks installed in select wells.
• February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Current Site Status: Active BP station. For the reported monitoring period December 2019 – February 2020, the following wor was performed at the site:

- Work Performed: February 11, 2020 – Gauged and sampled two
(2) monitoring wells.

Groundwater Monitoring: Wells Gauged: MW-15 and MW-16 Wells Containing LPH: None
Groundwater Depth: 15.37 feet to 15.42 feet
Groundwater Flow: Southeasterly
Wells Sampled: MW-15 and MW-16
Maximum Benzene Concentration: 25.1 micrograms per liter (ug/L) (MW-15)
Maximum MTBE Concentration: ND (non-detect) all wells
Total VOCs Range: 987.1 – 12,268.6 ug/L

GW data:

Well	02/2019	05/2019	08/2019	12/2019	02/2020(TVOCs ppb)
MW-15	25,293	38,224	28,618	10,861	12,268
MW-16	11	574	866	688	987

Both samples wells indicated increases in TVOCs from previous sampling round in December 2019.

Consultant's recommendations:
Continue quarterly groundwater sampling, with the next sampling event scheduled for May 2020. An Update Report summarizing these activities will be submitted to the NYSDEC in July 2020. Access to re-drill MW-15 was granted by the New York City Transit Authority. Drilling will tentatively be completed in May 2020. A summary of drilling activities will be included within the next
update report.

AD

07/30/2020: Received the following email from Mr. Rennie:

"Ainura,

Please find attached the most recent Update Report for the above referenced location. In addition, Speedway/EnviroTrac proposed the abandonment of monitoring well MW-13 on 10/29/2018. As requested by NYSDEC, MW-13 was sampled on January 29, 2019 and has not been accessible since. Results from this groundwater sampling event show low to non-detect (ND) BTEX/MTBE concentrations and VOC STARs compounds concentrations. As a result, Speedway/EnviroTrac respectfull requests the abandonment of MW-13 in order to minimize trip hazards. Please let us know if NYSDEC approves of this well

abandonment.

Will review. AD

09/18/2020: Reviewed the report. it states that the current site status is - Active BP station
For the monitoring period: March – May 2020, the following work was performed at the site:
- May 1, 2020 – Gauged and sampled two (2) monitoring wells.

Groundwater Monitoring:
Wells Gauged: MW-15 and MW-16
Wells Containing LPH: None
Groundwater Depth: 14.60 feet to 14.65 feet
Groundwater Flow: Southeasterly

Wells Sampled: MW-15 and MW-16
Maximum Benzene Concentration: 23.0 micrograms per liter (ug/L) (MW-15)
Maximum MTBE Concentration: 1.0 ug/L (MW-16) all wells
Total VOCs Range: 427.8 – 13,914.7 ug/L

GW data:

Well	02/2019	05/2019	08/2019	12/2019	02/2020	05/2020(TVOCs ppb)
MW-15	25,293	38,224	28,618	10,861	12,268	13,915
MW-16	11	574	866	688	987	428

Recommendations:
Continue quarterly groundwater sampling, with the next sampling event scheduled for August 2020. An Update Report summarizing these activities will be submitted to the NYSDEC in October 2020. Access to re-drill MW-15 was granted by the New York City Transit Authority. Drilling will tentatively be completed in August 2020. A summary of drilling activities will be included
within the next update report.

Recommendations (con't): Speedway/EnviroTrac proposed the abandonment of monitoring well MW-13 on 10/29/2018. As requested by NYSDEC, MW-13 was sampled on January 29, 2019 and has not been accessible since. Results from this groundwater sampling event show low to non-detect (ND) BTEX/MTBE concentrations and VOC STARs compounds concentrations. As a result, Speedway/EnviroTrac respectfully requests the abandonment of MW-13 in order to minimize trip hazards.

There is no data for well MW-13 in this report. Looked into report for 1st quarter 2019. Issued a correspondence to Mark Stell of Speedway approving well MW-13 abandonment. AD

Will review. AD

12/01/2020: Reviewed the report. It states that the current site status is an active BP station.
A Stipulation Agreement for this site was signed on March 24, 2004.

The following remediation activities were historically performed at the site:
- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

For the reported monitoring period: June – August 2020, the following work was performed at the site:
- August 25, 2020 – Pre-cleared three (3) locations: monitoring well (MW)-17, remedial well (REM)-1, and REM-2.
- August 31, 2020 – Installed three (3) wells (MW-17, REM-1, and REM-2) utilizing a drill rig.
- September 11, 2020 – Gauged and sampled two (2) monitoring wells. The new wells were developed prior to the sampling event.

Groundwater Monitoring:
Wells Gauged: MW-16 and MW-17 Wells Containing LPH: None
Groundwater Depth: 14.92 feet
Groundwater Flow: Southeasterly
Wells Sampled: MW-16 and MW-17
Maximum Benzene Concentration: 81.4 micrograms per liter (ug/L) (MW-17)
Maximum MTBE Concentration: 6.3 ug/L (MW-17) all wells
Total VOCs Range: 1,444.7 – 37,674.2 ug/L

Recommendations:
Continue quarterly groundwater sampling, with the next sampling event scheduled for November 2020. An Update Report summarizing these activities will be submitted to the NYSDEC in January 2021. AD

01/28/2021: Received the following email from Mr. Rennie:

"Ainura - Please find attached the most recent Update Report for the above referenced location.

Will review. AD

02/24/2021: Reviewed the report. It states that the current site status is an active BP station.

NYSDEC SPILL REPORT FORM

DEC REGION: 2 **SPILL NUMBER:** 9814075

SPILL NAME: FORMER HESS STATION 32GRA **DEC LEAD:** AXDORONO

A Stipulation Agreement for this site was signed on March 24, 2004.

The following remediation activities were historically performed at the site:
- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

For the reported monitoring period: September – November 2020, the following work was performed at the site:
- November 30, 2020 – Gauged and sampled three (3) monitoring wells.

Groundwater Monitoring: Wells Gauged: MW-9, MW-16, and MW-17
Wells Containing LPH: None
Groundwater Depth: 14.19 – 21.29 feet
Groundwater Flow: Southeasterly

Wells Sampled: MW-9, MW-16, and MW-17
Maximum Benzene Concentration: 12.7 micrograms per liter (ug/L) (MW-17)
Maximum MTBE Concentration: 6.6 ug/L (MW-17)
Total VOCs Range: 5.1 – 1,267.8 ug/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for February 2021. An Update Report summarizing these activities will be submitted to the NYSDEC in April 2021. AD

04/29/2021: Received the following email from Mr. Rennie:

Re: ***Request for Well Abandonments***
Speedway # 1349
370 Grand Concourse
Bronx, NY
NYSDEC Spill # 98-14075

Dear Mr. Ketani,

EnviroTrac Ltd. (ET) was retained by Speedway LLC (Speedway) to prepare the following Request for On-Site Well Abandonments for the property known as Speedway #1349, located at 370 Grand Concourse, Bronx, New York, herein identified as the Site. The purpose of this letter is to request abandonment of three (3) on-site monitoring wells (MW-12, 13, and 14).

The Site currently operates as an active retail gasoline station selling regular, plus, and premium grades of unleaded gasoline. Enclosed as **Figure 1** is an aerial photograph of the site and surrounding area. Relevant site features include a convenience store and a canopy above the dispenser islands as depicted in **Figure 2.**

Existing on-site wells include eight (8) monitoring wells (MW-9, 10, 11, 12, 13, 14, 15, and 16). Historical concentrations of dissolved benzene, toluene, ethylbenzene, xylenes (BTEX) and methyl tertiary butyl ether (MTBE) in groundwater within the on-site monitoring wells are summarized in **Table 1**.

Site History:

- February 1999 - Removal of five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. A total of 410.76 tons of soil was removed. NYSDEC Spill # 98-14075 was generated as a result of impacted soils. Competent bedrock was encountered at a depth of approximately 15 ft. bgs.
- April 2000 - A high vacuum extraction (HVE) pilot test was conducted at the site.
- July 2001 - Hess submitted a Remedial Action Plan (RAP) to the NYSDEC.

- September 2002 through January 2003 – A BP/Amoco station was constructed, which encompasses the former Merit station property and the neighboring former Amoco station property. A total of 1,129.20 tons of soil was removed by Hess from the former Merit station portion of the property during construction activities. All existing monitoring wells were destroyed during construction activities. Six replacement monitoring wells (MW-9 through MW-14) were installed at the former Merit site in December 2002.

- March 2004 - Hess and the New York State Department of Environmental Conservation (NYSDEC) signs a Stipulation Agreement.
- February 2006 - Oxygen releasing material (ORM) socks were installed in MW-12 and MW-13.
- October 2006 – A soil vapor extraction (SVE) pilot test was conducted on-site.
- January 2008 - As approved by the NYSDEC, a SVE system in conjunction with EnviroTrac's Well Stripper (WS) system was activated.
- March 2010 – The SVE/WS system was shut down due to asymptotic conditions.
- October 12, 2011 – Enhanced fluid recovery (EFR) events commenced.
- Present Day – Monthly EFR is conducted on MW-15 and quarterly groundwater sampling is conducted on all on-site wells.

Liquid-Phase Hydrocarbons (LPH):

Based on a review of historical documents, liquid phase hydrocarbons (LPHs) have not been detected at the Site since August 2014, when 0.09 ft of LPH was detected in MW-15. Historical groundwater gauging and analytical data is included as **Table 1**.

Oxygen Releasing Material (ORM) Socks

On January 11, 2007, oxygen releasing material (ORM) socks were installed in wells MW-9 and MW-12 through MW-16. BTEX/MTBE concentrations in all on-site wells, except for MW-15, decreased significantly.

Soil Vapor Extraction (SVE)/ Well Stripper System (WS) Data:

Data from the SVE/WS system, which operated from January 2008 through March 2010, indicated photo-ionization detector (PID) readings of recovered vapor ranging from non-detect (ND) to 36 parts per million (ppm). The system was de-activated in March 2010 due to asymptotic

conditions. **Table 2** summarizes SVE/WS system discharge data and **Table 3** summarizes well stripper sampling data.

Enhanced Fluid Recovery (EFR) Data:

EFR events began on October 12, 2011 in order to remediate concentrations of BTEX/MTBE found in MW-15 and to clean-up residual contaminations still found in MW-12 after ORM socks were installed. MW-12 EFR events occurred from October 2011 through June 2012. During this time, MW-12 BTEX/MTBE concentrations decreased considerably. EFR events on MW-15 are being completed until this day. **Table 4** summarizes EFR monitoring events.

Groundwater Data:

Groundwater monitoring commenced in 2003. The MTBE historical high was 45,000 micrograms per liter (µg/L) from MW-12 in January 2003. The BTEX historical high was 482,100 µg/L from MW-15 in May 2009. During the SVE/WS system's operation, groundwater concentrations of BTEX and MTBE decreased in many of the on-site wells including MW-12 and 13. Well MW-14 has had the lowest concentrations of BTEX/MTBE since its installation and these concentrations have decreased to non-detect over time. The on-site most elevated BTEX and MTBE concentrations are currently 879.4 µg/L (MW-15) and 2.4 µg/L (MW-16), respectively. **Refer to Figure 3** for depictions of site groundwater monitoring data for the most recent groundwater sampling event.

Sensitive Receptors:

Surrounding properties are commercial and residential. An apartment building is located immediately north of the site, which appears to have a basement. On November 2, 1998, no PID readings were detected in on-site storm drains and utility accesses (*Environmental Site Assessment prepared by EnviroTrac September 1999*). According to Tom Tengelson of the NYCDEP, no public water supply wells are located within 1/2-mile of the site *(Environmental Site Assessment prepared by EnviroTrac September 1999*). The nearest waterbody is the Harlem River which is located approximately 1,200 feet west of the site (*Subsurface Hydrocarbon Assessment Report prepared by Delta Environmental Consultants, Inc. July 13, 2001*).

As a result of data and information provided above, Speedway and EnviroTrac respectfully

request abandonment of three (3) on-site monitoring wells (MW-12, 13, and 14) based on the following:

- Groundwater sampling data, which has shown dramatic decreases in BTEX (98.9% reduction since the historical high) and MTBE (99.9% reduction since the historical high) concentrations as a result of SVE/WS system operation, ORC socks, and EFR events.

If you have any questions or comments regarding this report, please contact Matt Butler of Speedway at (732) 738-2924 or myself at (631) 924-3001.

Sincerely,

Ed Russo
Senior Project Manager

RE: Spill #9814075
Speedway #1349
370 Grand Concourse
Bronx, NY

Dear Mr. Russo:

The New York State Department of Environmental Conservation has reviewed the April 20, 2017 EnviroTrac *Request for Well Abandonments* letter with attachments.

As a result of our review, we have determined that wells MW-13 and MW-14 can be abandoned without compromising the groundwater monitoring. However, there was insufficient data in Table 1 for making a determination regarding whether well MW-12 can be abandoned. In light of this, we require that MW-12 be monitored for an additional three quarterly rounds in order to observe whether the analytical results suggest a definite decreasing trend with very low analyte concentrations.

Should you have any questions or wish to discuss the matter, please feel free to call me at (718) 482-4634.

Sincerely,

Raphael Ketani, MS, CPG
Engineering Geologist II

Re: NYSDEC Spill #98-14075
370 Grand Concourse
Bronx, NY

Dear Mr. Ketani:

Please find enclosed the most recent quarterly update report for the above referenced location.

If you have any questions regarding this report, please do not hesitate to contact Matt Butler of Speedway at (732) 738-2924 or myself or Ed Russo at (631) 924-3001.

Sincerely,

Joseph Rennie
Project Manager

ec: Matt Butler (Speedway)

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Raphael Ketani **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Matt Butler	**Project Manager:** Ed Russo

Report Date: January 2017

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: September 2016 – November 2016

Work Performed: September 6 – Performed Enhanced Fluid Recovery (EFR) on MW-15

October 26– Performed EFR on MW-15

November 9 – Performed EFR on MW-15

November 3 – Gauged five (5) monitoring wells and sampled four (4) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-10, MW-11, and MW-14 through MW-16
Wells Containing LPH:	None
Groundwater Depth:	15.23 feet to 18.96 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-10, MW-11, MW-15, and MW-16
Maximum Benzene Concentration:	70.3 micrograms per liter (µg/L) in MW-15
Maximum MTBE Concentration:	1.8 µg/L in MW-16

Current Plans/Proposals: Continue quarterly groundwater sampling, with the next sampling event scheduled for February 2017. An Update Report summarizing these activities will be submitted to NYSDEC in April 2017. Speedway to continue monthly EFR events.

RE: Project: Speedway 1349
Pace Project No.: 30201739

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on November 05, 2016. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Rachel D Christner

QUALIFIERS

Project: Speedway 1349
Pace Project No.: 30201739

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

Note: Whenever there is a discrepancy affecting North Carolina compliance samples, a copy of this form will be sent to the North Carolina DEHNR Certification Office (i.e. out of hold, incorrect preservative, out of temp, incorrect containers)

***PM review** is documented electronically in LIMS. When the Project Manager closes the SRF Review schedule in LIMS. The review is in the Status section of the Workorder Edit Screen.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Raphael Ketani **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: John Engdahl	**Project Manager:** Ed Russo

Report Date: April 2017

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: December 2016 – February 2017

Work Performed: December 8, 2016 – Performed Enhanced Fluid Recovery (EFR) on MW-15.

January 18, 2017– Performed EFR on MW-15.

February 15, 2017 – Performed EFR on MW-15.

February 27, 2017 – Gauged six (6) monitoring wells and sampled five (5) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9 through MW-11 and MW-14 through MW-16
Wells Containing LPH:	None
Groundwater Depth:	15.63 feet to 22.37 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9 through MW-11, MW-15, and MW-16
Maximum Benzene Concentration:	50.5 micrograms per liter (µg/L) in MW-15
Maximum MTBE Concentration:	10.4 µg/L in MW-11

Current Plans/Proposals: Continue quarterly groundwater sampling, with the next sampling event scheduled for May 2017. An Update Report summarizing these activities will be submitted to NYSDEC in July 2017. Speedway to continue monthly EFR events.

RE: Project: GRAND CONCOURSE-SPDWAY#1349
Pace Project No.: 7012290

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on February 28, 2017. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

QUALIFIERS

Project: GRAND CONCOURSE-SPDWAY#1349
Pace Project No.: 7012290

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Raphael Ketani **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: John Engdahl	**Project Manager:** Ed Russo

Report Date: July 2017

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: March – May 2017

Work Performed: March 9, 2017 – Performed Enhanced Fluid Recovery (EFR) on MW-15.

April 19, 2017– Performed EFR on MW-15.

May 15, 2017 – Performed EFR on MW-15 and abandoned MW-14.

May 18, 2017 – Gauged and sampled five (5) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9 through MW-11, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	14.66 feet to 21.13 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9 through MW-11, MW-15, and MW-16
Maximum Benzene Concentration:	53.5 micrograms per liter (µg/L) in MW-15
Maximum MTBE Concentration:	6.4 µg/L in MW-9

Current Plans/Proposals: Continue quarterly groundwater sampling, with the next sampling event scheduled for August 2017. An Update Report summarizing these activities will be submitted to NYSDEC in October 2017. Speedway to continue monthly EFR events. In addition, an ORC sock will be replaced in MW-15 during quarterly groundwater sampling events.

RE: Project: GRAND CONCOURSE SPDWY#1349
Pace Project No.: 7019160

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on May 19, 2017. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

QUALIFIERS

Project: GRAND CONCOURSE SPDWY#1349
Pace Project No.: 7019160

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Raphael Ketani **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: John Engdahl	**Project Manager:** Ed Russo

Report Date: October 2017

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: June 2017 – August 2017

Work Performed: June 8, July 19, & August 8, 2017 – Performed Enhanced Fluid Recovery (EFR) on MW-15 and replaced the ORC sock.

August 24, 2017 – Gauged and sampled five (5) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9 through MW-11, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	15.23 feet to 22.45 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9 through MW-11, MW-15, and MW-16
Maximum Benzene Concentration:	61.3 micrograms per liter (µg/L) in MW-15
Maximum MTBE Concentration:	4.6 µg/L in MW-9

Current Plans/Proposals: Continue quarterly groundwater sampling, with the next sampling event scheduled for November 2017. An Update Report summarizing these activities will be submitted to NYSDEC in January 2018. Speedway to continue monthly EFR events. In addition, an ORC sock will be replaced in MW-15 during quarterly groundwater sampling events.

RE: Project: SPDWAY# 1349 - GRAND CONCOURSE
Pace Project No.: 7028252

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on August 25, 2017. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

QUALIFIERS

Project: SPDWAY# 1349 - GRAND CONCOURSE
Pace Project No.: 7028252

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PACE-MV	Pace Analytical Services - Melville

ANALYTE QUALIFIERS

M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
MS	Analyte recovery in the matrix spike was outside QC limits for one or more of the constituent analytes used in the calculated result.
R1	RPD value was outside control limits.
RS	The RPD value in one of the constituent analytes was outside the control limits.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Raphael Ketani **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: John Engdahl	**Project Manager:** Ed Russo

Report Date: January 2018

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: September 2017 – November 2017

Work Performed: September 6, October 18, and November 3, 2017 – Performed Enhanced Fluid Recovery (EFR) on MW-15 and replaced the ORC sock.

November 17, 2017 – Gauged and sampled five (5) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9 through MW-11, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	15.31 feet to 22.59 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9 through MW-11, MW-15, and MW-16
Maximum Benzene Concentration:	32.9 micrograms per liter (µg/L) in MW-15
Maximum MTBE Concentration:	4.3 µg/L in MW-9

Current Plans/Proposals: Continue quarterly groundwater sampling, with the next sampling event scheduled for February 2018. An Update Report summarizing these activities will be submitted to NYSDEC in April 2018. Speedway to continue monthly EFR events.

Speedway and EnviroTrac will implement remedial actions proposed within the Remedial Action Plan submitted to and approved by NYSDEC in January 2018.

RE: Project: SPEEDWAY #1349
Pace Project No.: 7036422

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on November 22, 2017. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

QUALIFIERS

Project: SPEEDWAY #1349
Pace Project No.: 7036422

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Samantha Kramer	**Project Manager:** Ed Russo

Report Date: April 2018

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: December 2017 – February 2018

Work Performed: December 13, 2017, January 18, and February 15, 2018 – Performed Enhanced Fluid Recovery (EFR) on MW-15.

February 13, 2018 – Performed a surge blocking/well cleaning event on MW-15 while injecting approximately 100 gallons of a 5% solution of BioSolve® Pinkwater® (surfactant) and water as proposed within the Remedial Action Plan (RAP) submitted to and approved by the NYSDEC in January 2018.

February 21, 2018 – Performed a post surge blocking/surfactant injection well gauging event.

March 23, 2018 – Gauged and sampled six (6) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9 through MW-12, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	14.98 feet to 21.74 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9 through MW-12, MW-15, and MW-16
Maximum Benzene Concentration:	21.6 micrograms per liter (µg/L) in MW-15
Maximum MTBE Concentration:	99.4 µg/L in MW-12

Current Plans/Proposals: Continue quarterly groundwater sampling, with the next sampling event scheduled for May 2018. An Update Report summarizing these activities will be submitted to NYSDEC in July 2018. Speedway to continue monthly EFR events.

It appears that surge blocking/surfactant injection has liberated dissolved phase hydrocarbons in the area of MW-15. EnviroTrac will continue to perform surge blocking/surfactant injection events/EFR in MW-15. Results from these events will be used to determine if further action should be taken.

RE: Project: SPEEDWAY #1349
Pace Project No.: 7046080

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on March 23, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton
john.stanton@pacelabs.com

QUALIFIERS

Project: SPEEDWAY #1349
Pace Project No.: 7046080

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: John Engdahl	**Project Manager:** Ed Russo

Report Date: July 2018

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: March 2018 – May 2018

Work Performed: March 12, March 19, & May 4, 2018 – Performed a surge blocking/well cleaning event on MW-15 while injecting approximately 100 gallons of a 5% solution of BioSolve® Pinkwater® (surfactant) and water as proposed within the Remedial Action Plan (RAP) submitted to and approved by the NYSDEC in January 2018.

March 16, March 20, & May 10, 2018 – Performed Enhanced Fluid Recovery (EFR) on MW-15.

May 31, 2018 – Gauged and sampled four (4) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9 through MW-11, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	14.21 feet to 21.66 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9 through MW-11, MW-15, and MW-16
Maximum Benzene Concentration:	ND (non-detect) all wells
Maximum MTBE Concentration:	5.0 micrograms per liter (µg/L) in MW-9

Current Plans/Proposals: Continue quarterly groundwater sampling, with the next sampling event scheduled for August 2018. An Update Report summarizing these activities will be submitted to NYSDEC in October 2018. Speedway to continue monthly EFR events.

It appears that surge blocking/surfactant injection has liberated dissolved phase hydrocarbons in the area of MW-15. EnviroTrac will continue to perform surge blocking/surfactant injection events/EFR in MW-15. Results from these events will be used to determine if further action should be taken.

SPEEDWAY LLC
UPDATE REPORT (cont.)

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Samantha Kramer	**Project Manager:** Ed Russo

Current Plans/Proposals (cont.): **Monitoring wells MW-9, MW-10, and MW-11 have shown low to ND BTEX/MTBE concentrations for several years and show low to ND VOC STARs compounds concentrations in the most recent groundwater sampling event. As a result, Speedway/EnviroTrac respectfully requests the abandonment of these wells in order to minimize trip hazards.**

Naphthalene	ND	ND	ND	NA	NS	397	3.1	10
n-Propylbenzene	ND	ND	ND	NA	NS	308	597	5
Toluene	ND	ND	ND	NA	NS	4,670	1.6	5
1,2,4-Trimethylbenzene	ND	ND	ND	NA	NS	2,370	ND	5
1,3,5-Trimethylbenzene	ND	ND	ND	NA	NS	918	ND	5
m,p-Xylene	ND	ND	ND	NA	NS	8,610	6.8	*
o-Xylene	ND	ND	ND	NA	NS	5,870	5.0	*
Xylene (total)	ND	ND	ND	NA	NS	2,730	1.9	5

* Wells were sampled on 5/31/2018 and 7/2/2018 (MW-9)
- MW-12 was not sampled due to not being accessible.
- Shaded values indicate an exceedance of NYSDEC Groundwater Standards for VOCs.
* Sampling of VOC STARs compounds conducted as requested by NYSDEC.

RE: Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7053492

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on June 01, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

PROJECT NARRATIVE

Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7053492

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: June 08, 2018

General Information:
4 samples were analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

QC Batch: 70307

D6: The precision between the sample and sample duplicate exceeded laboratory control limits.

- DUP (Lab ID: 323404)
  - n-Butylbenzene
  - n-Propylbenzene

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

QUALIFIERS

Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7053492

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6 The precision between the sample and sample duplicate exceeded laboratory control limits.

RE: Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7057314

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on July 06, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

PROJECT NARRATIVE

Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7057314

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: July 12, 2018

General Information:
1 sample was analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: 74511

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 7057007028,7057272011

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

QUALIFIERS

Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7057314

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: John Engdahl	**Project Manager:** Ed Russo

Report Date: October 2018

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: June 2018 – August 2018

Work Performed: June 4 & August 7, 2018 – Performed a surge blocking/well cleaning event on MW-15 while injecting approximately 100 gallons of a 5% solution of BioSolve® Pinkwater® (surfactant) and water as proposed within the Remedial Action Plan (RAP) submitted to and approved by the NYSDEC in January 2018.

June 5, July 2, & August 10, 2018 – Performed Enhanced Fluid Recovery (EFR) on MW-15.

August 17, 2018 – Gauged and sampled six (6) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9 through MW-12, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	13.47 feet to 21.41 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9 through MW-12, MW-15, and MW-16
Maximum Benzene Concentration:	14.1 micrograms per liter (µg/L) (MW-12)
Maximum MTBE Concentration:	88.8 µg/L in MW-12
Total VOCs Range:	ND – 8,788 µg/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for November 2018. An Update Report summarizing these activities will be submitted to NYSDEC in January 2019. Speedway to continue monthly EFR events.

Monitoring wells MW-9, MW-10, and MW-11 have shown low to ND BTEX/MTBE concentrations for several years and show low to ND VOC STARs compounds concentrations in the most recent groundwater sampling event. As a result, Speedway/EnviroTrac respectfully requests the abandonment of these wells in order to minimize trip hazards.

RE: Project: SPEEDWAY #1349
Pace Project No.: 7062636

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on August 22, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

PROJECT NARRATIVE

Project: SPEEDWAY #1349
Pace Project No.: 7062636

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: August 29, 2018

General Information:
6 samples were analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

QC Batch: 80640

CH: The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased high.

- DUP (Lab ID: 370887)
  - Naphthalene
- LCS (Lab ID: 370781)
  - Naphthalene
- MW-10 (Lab ID: 7062636001)
  - Naphthalene
- MW-12 (Lab ID: 7062636003)
  - Naphthalene
- MW-15 (Lab ID: 7062636004)
  - Naphthalene
- MW-16 (Lab ID: 7062636005)
  - Naphthalene

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

PROJECT NARRATIVE

Project: SPEEDWAY #1349
Pace Project No.: 7062636

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: August 29, 2018

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

QC Batch: 80640

D6: The precision between the sample and sample duplicate exceeded laboratory control limits.

- DUP (Lab ID: 370887)
  - Naphthalene

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

QUALIFIERS

Project: SPEEDWAY #1349
Pace Project No.: 7062636

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

CH	The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased high.
D6	The precision between the sample and sample duplicate exceeded laboratory control limits.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Brian Davis	**Project Manager:** Ed Russo

Report Date: January 2019

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: September 2018 – November 2018

Work Performed: September 26, October 12, & November 13, 2018 – Performed Enhanced Fluid Recovery (EFR) on MW-15.

November 20, 2018 – Gauged and sampled five (5) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9 through MW-11, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	12.93 feet to 20.28 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9 through MW-11, MW-15, and MW-16
Maximum Benzene Concentration:	28.2 micrograms per liter (µg/L) (MW-15)
Maximum MTBE Concentration:	2.9 µg/L in MW-9
Total VOCs Range:	ND – 28,680.7 µg/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for February 2019. An Update Report summarizing these activities will be submitted to the NYSDEC in April 2019. Speedway to continue monthly EFR events.

As approved by the NYSDEC, the abandonment of monitoring wells MW-10 and MW-11 were completed on January 29, 2019. MW-13 was able to be accessed on January 29, 2019 and was sampled. If results are favorable, abandonment of this well will be proposed. Going forward, MW-9 will be sampled on an annual basis per NYSDEC request.

RE: Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7071857

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on November 21, 2018. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

PROJECT NARRATIVE

Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7071857

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: November 29, 2018

General Information:
5 samples were analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: 92617

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 7071380002

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 427772)
  - p-Isopropyltoluene
  - sec-Butylbenzene
  - tert-Butylbenzene

QC Batch: 92810

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 7072021007

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 429172)
  - tert-Butylbenzene

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

QUALIFIERS

Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7071857

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Sam Kramer	**Project Manager:** Ed Russo

Report Date: April 2019

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Site Remediation Activities:

- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: December 2018 – February 2019

Work Performed: December 27, 2018, January 29 & February 20, 2019 – Performed Enhanced Fluid Recovery (EFR) on MW-15.

January 29, 2019 – Gauged and sampled one (1) monitoring well. Also, two (2) monitoring wells (MW-10 and MW-11) were abandoned as approved by the NYSDEC.

February 19, 2019 - Performed a surge blocking/well cleaning event on MW-15 utilizing a solution of BioSolve® Pinkwater® (surfactant) and water.

February 25, 2019 – Gauged and sampled two (2) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-13, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	14.25 feet to 16.76 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-13, MW-15, and MW-16

SPEEDWAY LLC
UPDATE REPORT (cont.)

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Sam Kramer	**Project Manager:** Ed Russo

Groundwater Monitoring (cont.):

Maximum Benzene Concentration:	39.1 micrograms per liter (µg/L) (MW-15)
Maximum MTBE Concentration:	6.6 µg/L in MW-13
Total VOCs Range:	ND (non-detect) – 25,293 µg/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for May 2019. An Update Report summarizing these activities will be submitted to the NYSDEC in July 2019. Speedway to continue monthly EFR events.

RE: Project: SPEEDWAY #1349-GRAND CONCOURSE
Pace Project No.: 7077970

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on January 30, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton
john.stanton@pacelabs.com

PROJECT NARRATIVE

Project: SPEEDWAY #1349-GRAND CONCOURSE
Pace Project No.: 7077970

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: February 07, 2019

General Information:
1 sample was analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: 100111

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 7077971001

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 464640)
  - 1,2,4-Trimethylbenzene
  - 1,3,5-Trimethylbenzene
  - Ethylbenzene
  - Naphthalene
  - Toluene
  - m&p-Xylene
  - n-Propylbenzene
  - o-Xylene

MS: Analyte recovery in the matrix spike was outside QC limits for one or more of the constituent analytes used in the calculated result.

- MS (Lab ID: 464640)
  - Xylene (Total)

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

QUALIFIERS

Project: SPEEDWAY #1349-GRAND CONCOURSE
Pace Project No.: 7077970

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
MS	Analyte recovery in the matrix spike was outside QC limits for one or more of the constituent analytes used in the calculated result.

RE: Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7080821

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on February 27, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

PROJECT NARRATIVE

Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7080821

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: March 05, 2019

General Information:
2 samples were analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

QUALIFIERS

Project: SPEEDWAY#1349-GRAND CONCOURSE
Pace Project No.: 7080821

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Report Date: July 2019

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel wastewater UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Site Remediation Activities:

- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: March – May 2019

Work Performed: April 22 & May 16, 2019 – Performed EFR on MW-15.

May 22, 2019 – Gauged and sampled two (2) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	13.98 feet to 14.10 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-15, and MW-16

SPEEDWAY LLC
UPDATE REPORT (cont.)

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Groundwater Monitoring (cont.):

Maximum Benzene Concentration:	39.6 micrograms per liter (µg/L) (MW-15)
Maximum MTBE Concentration:	1.8 µg/L in MW-16
Total VOCs Range:	573.7 – 38,224.2 µg/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for August 2019. An Update Report summarizing these activities will be submitted to the NYSDEC in October 2019. Speedway/EnviroTrac are evaluating the possibility of re-drilling MW-15. EnviroTrac will approach the New York City Transit Authority to determine feasibility of re-drilling the well.

RE: Project: SPEEDWAY # 1349
Pace Project No.: 7091246

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on May 29, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

PROJECT NARRATIVE

Project: SPEEDWAY # 1349
Pace Project No.: 7091246

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: June 06, 2019

General Information:
2 samples were analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

QC Batch: 116088

CL: The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased low.

- BLANK (Lab ID: 548506)
  - Naphthalene
- LCS (Lab ID: 548507)
  - Naphthalene
- MW-15 (Lab ID: 7091246001)
  - Naphthalene

QC Batch: 116249

CL: The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased low.

- BLANK (Lab ID: 549011)
  - Naphthalene
- DUP (Lab ID: 549233)
  - Naphthalene
- LCS (Lab ID: 549012)
  - Naphthalene
- MS (Lab ID: 549234)
  - Naphthalene
- MW-16 (Lab ID: 7091246002)
  - Naphthalene

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

QC Batch: 116088

S0: Surrogate recovery outside laboratory control limits.

- MW-15 (Lab ID: 7091246001)
  - 4-Bromofluorobenzene (S)

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

PROJECT NARRATIVE

Project: SPEEDWAY # 1349
Pace Project No.: 7091246

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: June 06, 2019

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

QC Batch: 116088

L2: Analyte recovery in the laboratory control sample (LCS) was below QC limits. Results for this analyte in associated samples may be biased low.

- LCS (Lab ID: 548507)
  - n-Butylbenzene
  - p-Isopropyltoluene
  - sec-Butylbenzene

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: 116249

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 7091706002

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 549234)
  - Naphthalene

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

This report shall not be reproduced, except in full,

QUALIFIERS

Project: SPEEDWAY # 1349
Pace Project No.: 7091246

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

CL	The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased low.
L2	Analyte recovery in the laboratory control sample (LCS) was below QC limits. Results for this analyte in associated samples may be biased low.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
S0	Surrogate recovery outside laboratory control limits.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Report Date: October 2019

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel wastewater UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Site Remediation Activities:

- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: June – August 2019

Work Performed: June 17 & July 29, 2019 – Performed EFR on MW-15.

August 15, 2019 – Gauged and sampled two (2) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	14.98 feet to 15.08 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-15, and MW-16
Maximum Benzene Concentration:	39.5 micrograms per liter (µg/L) (MW-15)
Maximum MTBE Concentration:	1.2 µg/L in MW-16
Total VOCs Range:	865.8 – 28,614.5 µg/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for November 2019. An Update Report summarizing these activities will be submitted to the NYSDEC in January 2020. Speedway/EnviroTrac are evaluating the possibility of re-drilling MW-15. EnviroTrac working with the New York City Transit Authority to determine feasibility of re-drilling the well.

RE: Project: SPEEDWAY#1349 GRAND CONCOURSE
Pace Project No.: 70101788

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on August 16, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

John D. Stanton

PROJECT NARRATIVE

Project: SPEEDWAY#1349 GRAND CONCOURSE
Pace Project No.: 70101788

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: August 28, 2019

General Information:
2 samples were analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

QC Batch: 127312

L1: Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.

- LCS (Lab ID: 608009)
  - Ethylbenzene
  - m&p-Xylene
  - n-Butylbenzene
  - o-Xylene
  - p-Isopropyltoluene
  - sec-Butylbenzene
  - tert-Butylbenzene

LS: Analyte recovery in the laboratory control sample (LCS) was outside QC limits for one or more of the constituent analytes used in the calculated result.

- LCS (Lab ID: 608009)
  - Xylene (Total)

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

PROJECT NARRATIVE

Project: SPEEDWAY#1349 GRAND CONCOURSE
Pace Project No.: 70101788

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: August 28, 2019

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

QC Batch: 127312

D6: The precision between the sample and sample duplicate exceeded laboratory control limits.

- DUP (Lab ID: 608010)
  - Benzene
  - Naphthalene
  - o-Xylene

Additional Comments:

Analyte Comments:

QC Batch: 127312

E: Analyte concentration exceeded the calibration range. The reported result is estimated.

- DUP (Lab ID: 608010)
  - 1,2,4-Trimethylbenzene
  - Benzene
  - Ethylbenzene
  - m&p-Xylene

This data package has been reviewed for quality and completeness and is approved for release.

QUALIFIERS

Project: SPEEDWAY#1349 GRAND CONCOURSE
Pace Project No.: 70101788

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6	The precision between the sample and sample duplicate exceeded laboratory control limits.
E	Analyte concentration exceeded the calibration range. The reported result is estimated.
ES	The reported result is estimated because one or more of the constituent results are qualified as such.
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
LS	Analyte recovery in the laboratory control sample (LCS) was outside QC limits for one or more of the constituent analytes used in the calculated result.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Report Date: January 2020

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel wastewater UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Site Remediation Activities:

- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: September – November 2019

Work Performed: December 3, 2019 – Gauged and sampled three (3) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9, MW-15, and MW-16
Wells Containing LPH:	None
Groundwater Depth:	15.37 feet to 22.57 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9, MW-15, and MW-16
Maximum Benzene Concentration:	25.8 micrograms per liter (µg/L) (MW-15)
Maximum MTBE Concentration:	3.4 µg/L in MW-9
Total VOCs Range:	10.8 – 10,861.4 µg/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for February 2020. An Update Report summarizing these activities will be submitted to the NYSDEC in April 2020. Speedway/EnviroTrac are evaluating the possibility of re-drilling MW-15. EnviroTrac is working with the New York City Transit Authority to determine the feasibility of re-drilling the well.

SPEEDWAY LLC
UPDATE REPORT (cont.)

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Recommendations (con't): **Speedway/EnviroTrac proposed the abandonment of monitoring well MW-13 on 10/29/2018. As requested by NYSDEC, MW-13 was sampled on January 29, 2019 and has not been accessible since. Results from this groundwater sampling event show low to non-detect (ND) BTEX/MTBE concentrations and VOC STARs compounds concentrations. As a result, Speedway/EnviroTrac respectfully requests the abandonment of MW-13 in order to minimize trip hazards.**

RE: Project: SPEEDWAY #1349
Pace Project No.: 70114087

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on December 04, 2019. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Devon J. Fox

PROJECT NARRATIVE

Project: SPEEDWAY #1349
Pace Project No.: 70114087

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: December 12, 2019

General Information:
3 samples were analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

QC Batch: 141633

L1: Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.

- LCS (Lab ID: 678452)
  - n-Butylbenzene
  - sec-Butylbenzene

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

QC Batch: 141633

D6: The precision between the sample and sample duplicate exceeded laboratory control limits.

- DUP (Lab ID: 678850)
  - 1,2,4-Trimethylbenzene
  - 1,3,5-Trimethylbenzene
  - Benzene
  - Ethylbenzene

QUALIFIERS

Project: SPEEDWAY #1349
Pace Project No.: 70114087

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6	The precision between the sample and sample duplicate exceeded laboratory control limits.
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Report Date: April 2020

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel wastewater UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Site Remediation Activities:

- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: December 2019 – February 2020

Work Performed: February 11, 2020 – Gauged and sampled two (2) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-15 and MW-16
Wells Containing LPH:	None
Groundwater Depth:	15.37 feet to 15.42 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-15 and MW-16
Maximum Benzene Concentration:	25.1 micrograms per liter (µg/L) (MW-15)
Maximum MTBE Concentration:	ND (non-detect) all wells
Total VOCs Range:	987.1 – 12,268.6 µg/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for May 2020. An Update Report summarizing these activities will be submitted to the NYSDEC in July 2020. Access to re-drill MW-15 was granted by the New York City Transit Authority. Drilling will tentatively be completed in May 2020. A summary of drilling activities will be included within the next update report.

SPEEDWAY LLC
UPDATE REPORT (cont.)

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Recommendations (con't): **Speedway/EnviroTrac proposed the abandonment of monitoring well MW-13 on 10/29/2018. As requested by NYSDEC, MW-13 was sampled on January 29, 2019 and has not been accessible since. Results from this groundwater sampling event show low to non-detect (ND) BTEX/MTBE concentrations and VOC STARs compounds concentrations. As a result, Speedway/EnviroTrac respectfully requests the abandonment of MW-13 in order to minimize trip hazards.**

RE: Project: SPEEDWAY# 1349 2/11
Pace Project No.: 70121601

Dear Mr. Russo:
Enclosed are the analytical results for sample(s) received by the laboratory on February 12, 2020. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Devon J. Fox

PROJECT NARRATIVE

Project: SPEEDWAY# 1349 2/11
Pace Project No.: 70121601

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: February 21, 2020

General Information:
2 samples were analyzed for EPA 8260C/5030C. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

QC Batch: 149756

CH: The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased high.

- LCS (Lab ID: 718561)
  - n-Butylbenzene
- MS (Lab ID: 718714)
  - n-Butylbenzene
- MW-16 (Lab ID: 70121601002)
  - n-Butylbenzene

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

QC Batch: 149745

L1: Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.

- LCS (Lab ID: 718397)
  - n-Butylbenzene
  - sec-Butylbenzene

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

PROJECT NARRATIVE

Project: SPEEDWAY# 1349 2/11
Pace Project No.: 70121601

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: February 21, 2020

QC Batch: 149745

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 70121534002

M0: Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.

- MS (Lab ID: 718968)
  - n-Butylbenzene
  - sec-Butylbenzene
- MSD (Lab ID: 718969)
  - n-Butylbenzene
  - sec-Butylbenzene

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 718968)
  - 1,2,4-Trimethylbenzene
  - 1,3,5-Trimethylbenzene
  - Isopropylbenzene (Cumene)
  - Naphthalene
  - m&p-Xylene
  - n-Propylbenzene
  - o-Xylene
  - p-Isopropyltoluene
- MSD (Lab ID: 718969)
  - 1,2,4-Trimethylbenzene
  - 1,3,5-Trimethylbenzene
  - Isopropylbenzene (Cumene)
  - Naphthalene
  - m&p-Xylene
  - n-Propylbenzene
  - o-Xylene
  - p-Isopropyltoluene

MS: Analyte recovery in the matrix spike was outside QC limits for one or more of the constituent analytes used in the calculated result.

- MS (Lab ID: 718968)
  - Xylene (Total)
- MSD (Lab ID: 718969)
  - Xylene (Total)

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

Additional Comments:

Analyte Comments:

QC Batch: 149745

E: Analyte concentration exceeded the calibration range. The reported result is estimated.

- MS (Lab ID: 718968)
  - 1,2,4-Trimethylbenzene

QUALIFIERS

Project: SPEEDWAY# 1349 2/11
Pace Project No.: 70121601

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

CH	The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased high.
E	Analyte concentration exceeded the calibration range. The reported result is estimated.
ES	The reported result is estimated because one or more of the constituent results are qualified as such.
L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
M0	Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
MS	Analyte recovery in the matrix spike was outside QC limits for one or more of the constituent analytes used in the calculated result.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Report Date: July 2020

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel wastewater UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Site Remediation Activities:

- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: March – May 2020

Work Performed: May 1, 2020 – Gauged and sampled two (2) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-15 and MW-16
Wells Containing LPH:	None
Groundwater Depth:	14.60 feet to 14.65 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-15 and MW-16
Maximum Benzene Concentration:	23.0 micrograms per liter (µg/L) (MW-15)
Maximum MTBE Concentration:	1.0 µg/L (MW-16) all wells
Total VOCs Range:	427.8 – 13,914.7 µg/L

Recommendations: Continue quarterly groundwater sampling, with the next sampling event scheduled for August 2020. An Update Report summarizing these activities will be submitted to the NYSDEC in October 2020. Access to re-drill MW-15 was granted by the New York City Transit Authority. Drilling will tentatively be completed in August 2020. A summary of drilling activities will be included within the next update report.

SPEEDWAY LLC
UPDATE REPORT (cont.)

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Recommendations (con't): **Speedway/EnviroTrac proposed the abandonment of monitoring well MW-13 on 10/29/2018. As requested by NYSDEC, MW-13 was sampled on January 29, 2019 and has not been accessible since. Results from this groundwater sampling event show low to non-detect (ND) BTEX/MTBE concentrations and VOC STARs compounds concentrations. As a result, Speedway/EnviroTrac respectfully requests the abandonment of MW-13 in order to minimize trip hazards.**

RE: Project: SPEEDWAY # 1349
Pace Project No.: 70130219

Dear Mr. Russo:

Enclosed are the analytical results for sample(s) received by the laboratory on May 06, 2020. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Melville

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Devon J. Fox
devon.fox@pacelabs.com

PROJECT NARRATIVE

Project: SPEEDWAY # 1349
Pace Project No.: 70130219

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: May 12, 2020

General Information:
2 samples were analyzed for EPA 8260C/5030C by Pace Analytical Services Melville. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

QC Batch: 159784

D6: The precision between the sample and sample duplicate exceeded laboratory control limits.

- DUP (Lab ID: 769944)
  - Naphthalene
  - Toluene
  - n-Propylbenzene
  - o-Xylene

PROJECT NARRATIVE

Project: SPEEDWAY # 1349
Pace Project No.: 70130219

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: May 12, 2020

Analyte Comments:

QC Batch: 159784

E: Analyte concentration exceeded the calibration range. The reported result is estimated.

- DUP (Lab ID: 769944)
  - n-Propylbenzene

This data package has been reviewed for quality and completeness and is approved for release.

QUALIFIERS

Project: SPEEDWAY # 1349
Pace Project No.: 70130219

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

D6	The precision between the sample and sample duplicate exceeded laboratory control limits.
E	Analyte concentration exceeded the calibration range. The reported result is estimated.

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Report Date: October 2020

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel wastewater UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Site Remediation Activities:

- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: June – August 2020

Work Performed: August 25, 2020 – Precleared three (3) locations: monitoring well (MW)-17, remedial well (REM)-1, and REM-2.

August 31, 2020 – Installed three (3) wells (MW-17, REM-1, and REM-2) utilizing a drill rig.

September 11, 2020 – Gauged and sampled two (2) monitoring wells. The new wells were developed prior to the sampling event.

Groundwater Monitoring:

Wells Gauged:	MW-16 and MW-17
Wells Containing LPH:	None
Groundwater Depth:	14.92 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-16 and MW-17
Maximum Benzene Concentration:	81.4 micrograms per liter (µg/L) (MW-17)
Maximum MTBE Concentration:	6.3 µg/L (MW-17) all wells
Total VOCs Range:	1,444.7 – 37,674.2 µg/L

RE: Project: SPEEDWAY #1349
Pace Project No.: 70144685

Dear Mr. Russo:

Enclosed are the analytical results for sample(s) received by the laboratory on September 03, 2020. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Melville

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Sophia Sparkes

PROJECT NARRATIVE

Project: SPEEDWAY #1349
Pace Project No.: 70144685

Method: **EPA 8270D**
Description: 8270 MSSV PAH
Client: Speedway Envirotrac (New York)
Date: September 16, 2020

General Information:
7 samples were analyzed for EPA 8270D by Pace Analytical Services Melville. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Sample Preparation:
The samples were prepared in accordance with EPA 3545A with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

QC Batch: 176431

CL: The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased low.

- REM-1 (10-12') (Lab ID: 70144685004)
  - Nitrobenzene-d5 (S)

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: 176431

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 70144685001

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 855996)
  - Acenaphthene
  - Anthracene
  - Benzo(a)anthracene

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

QC Batch: 176931

D6: The precision between the sample and sample duplicate exceeded laboratory control limits.

- DUP (Lab ID: 858386)
  - Naphthalene
  - n-Butylbenzene

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

QUALIFIERS

Project: SPEEDWAY #1349
Pace Project No.: 70144685

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

SAMPLE QUALIFIERS

Sample: 70144685001
[1] Sample not collected according to EPA Method 5035A low level specifications. Results may be biased low.

Sample: 70144685002
[1] Sample not collected according to EPA Method 5035A low level specifications. Results may be biased low.

Sample: 70144685003
[1] Sample not collected according to EPA Method 5035A low level specifications. Results may be biased low.

Sample: 70144685004
[1] Sample not collected according to EPA Method 5035A low level specifications. Results may be biased low.

Sample: 70144685005
[1] Sample not collected according to EPA Method 5035A low level specifications. Results may be biased low.

Sample: 70144685006
[1] Sample not collected according to EPA Method 5035A low level specifications. Results may be biased low.

Sample: 70144685007
[1] Sample not collected according to EPA Method 5035A low level specifications. Results may be biased low.

ANALYTE QUALIFIERS

CH The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased high.

CL The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased low.

QUALIFIERS

Project: SPEEDWAY #1349
Pace Project No.: 70144685

ANALYTE QUALIFIERS

D6	The precision between the sample and sample duplicate exceeded laboratory control limits.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
MS	Analyte recovery in the matrix spike was outside QC limits for one or more of the constituent analytes used in the calculated result.
R1	RPD value was outside control limits.

This report shall not be reproduced, except in full,

RE: Project: SPEEDWAY #1349
Pace Project No.: 70146836

Dear Mr. Russo:

Enclosed are the analytical results for sample(s) received by the laboratory on September 16, 2020. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Melville

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Sophia Sparkes

PROJECT NARRATIVE

Project: SPEEDWAY #1349
Pace Project No.: 70146836

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: September 25, 2020

General Information:
2 samples were analyzed for EPA 8260C/5030C by Pace Analytical Services Melville. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

QC Batch: 178867

CL: The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased low.

- BLANK (Lab ID: 869394)
  - Naphthalene
- DUP (Lab ID: 869396)
  - Naphthalene
- LCS (Lab ID: 869395)
  - Naphthalene
- MW-16 (Lab ID: 70146836001)
  - Naphthalene
- MW-17 (Lab ID: 70146836002)
  - Naphthalene

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

QUALIFIERS

Project: SPEEDWAY #1349
Pace Project No.: 70146836

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

CL	The continuing calibration for this compound is outside of Pace Analytical acceptance limits. The results may be biased low.

Analysis Name: VOC 8260 STARS (Water)

Analysis Description / Method: VOCs 8260 STARS List / 8260C

Container Type / Preservative: VOA / HCL

Analytes: 1,2,4-Trimethylbenzene ug/L, 1,3,5-Trimethylbenzene ug/L, Benzene ug/L, Ethylbenzene ug/L, Isopropylbenzene ug/L, Methyl tert butyl ether ug/L, Naphthalene ug/L, Toluene ug/L, Total Xylenes ug/L, m,p-Xylene ug/L, n-Butylbenzene ug/L, n-Propylbenzene ug/L, o-Xylene ug/L, p-Isopropyltoluene ug/L, sec-Butylbenzene ug/L, tert-Butylbenzene ug/L

SPEEDWAY LLC
UPDATE REPORT

Site Address: 370 Grand Concourse Bronx, New York	**Regulatory Agency:** NYSDEC – Region 2 **Regulatory Contact:** Ainura Doronova **Spill #:** 98-14075 **Consultant:** EnviroTrac Ltd.
Speedway Contact: Mark Stella	**Project Manager:** Ed Russo

Report Date: January 2021

Spill Incident Cause: Petroleum impacted soils encountered during an underground storage tank (UST) upgrade project in February 1999. Removed five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel wastewater UST and all associated dispensers, piping and remote fills. During this project a total of 410.76 tons of soil were removed off site for disposal.

Site Remediation Activities:

- February 2006 – Oxygen Releasing Compound (ORC) socks installed in select wells.
- January 2008 – A Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated.
- March 2010 – SVE system shut down due to asymptotic conditions.
- October 2011 – Enhanced Fluid Recovery (EFR) events commenced on monitoring well MW-15.
- July 2017 – ORC socks installed in select wells.
- February 2018 – Injections of Biosolve® Pinkwater® commenced on monitoring well MW-15.

Stipulation Agreement: A Stipulation Agreement was signed on March 24, 2004.

Current Site Status: Active BP station

Monitoring Period: September – November 2020

Work Performed: November 30, 2020 – Gauged and sampled three (3) monitoring wells.

Groundwater Monitoring:

Wells Gauged:	MW-9, MW-16, and MW-17
Wells Containing LPH:	None
Groundwater Depth:	14.19 – 21.29 feet
Groundwater Flow:	Southeasterly
Wells Sampled:	MW-9, MW-16, and MW-17
Maximum Benzene Concentration:	12.7 micrograms per liter (µg/L) (MW-17)
Maximum MTBE Concentration:	6.6 µg/L (MW-17)
Total VOCs Range:	5.1 – 1,267.8 µg/L

RE: Project: SPEEDWAY# 1349 - 11/30
Pace Project No.: 70155499

Dear Mr. Russo:

Enclosed are the analytical results for sample(s) received by the laboratory on December 02, 2020. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Melville

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Julie Litvin

PROJECT NARRATIVE

Project: SPEEDWAY# 1349 - 11/30
Pace Project No.: 70155499

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: December 10, 2020

General Information:
3 samples were analyzed for EPA 8260C/5030C by Pace Analytical Services Melville. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:
The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):
All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:
All criteria were within method requirements with any exceptions noted below.

QC Batch: 188339

v1: The continuing calibration verification was above the method acceptance limit. Any detection for the analyte in the associated samples may have a high bias.

- LCS (Lab ID: 923846)
  - n-Butylbenzene
- MS (Lab ID: 925081)
  - n-Butylbenzene
- MW-16 (Lab ID: 70155499001)
  - n-Butylbenzene
- MW-17 (Lab ID: 70155499002)
  - n-Butylbenzene

Internal Standards:
All internal standards were within QC limits with any exceptions noted below.

Surrogates:
All surrogates were within QC limits with any exceptions noted below.

Method Blank:
All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:
All laboratory control spike compounds were within QC limits with any exceptions noted below.

QC Batch: 188339

L1: Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.

- LCS (Lab ID: 923846)
  - n-Butylbenzene

This report shall not be reproduced, except in full,

PROJECT NARRATIVE

Project: SPEEDWAY# 1349 - 11/30
Pace Project No.: 70155499

Method: **EPA 8260C/5030C**
Description: 8260C Volatile Organics
Client: Speedway Envirotrac (New York)
Date: December 10, 2020

Matrix Spikes:
All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: 188339

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 70155440002

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 925081)
  - Naphthalene

Duplicate Sample:
All duplicate sample results were within method acceptance criteria with any exceptions noted below.

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

QUALIFIERS

Project: SPEEDWAY# 1349 - 11/30
Pace Project No.: 70155499

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

TNTC - Too Numerous To Count

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit - The lowest concentration value that meets project requirements for quantitative data with known precision and bias for a specific analyte in a specific matrix.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

ANALYTE QUALIFIERS

L1	Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results for this analyte in associated samples may be biased high.
M1	Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.
v1	The continuing calibration verification was above the method acceptance limit. Any detection for the analyte in the associated samples may have a high bias.

Remedial Work Plan (RWP)

Speedway # 1349
370 Grand Concourse
Bronx, New York

NYSDEC Spill # 98-14075

January 2018

Prepared For:

Speedway LLC
500 Speedway Drive
Enon, OH 45323

Prepared By:

EnviroTrac Ltd.
5 Old Dock Road
Yaphank, New York 11980

1.0 INTRODUCTION

EnviroTrac Ltd. (EnviroTrac) was contracted by Speedway LLC (Speedway) to develop a Remedial Work Plan (RWP) for Site #1349 (the Site) located at 370 Grand Concourse in Bronx, New York. The RWP is based on the results of historical and recent groundwater sampling data. The goal of this RWP is to address adsorbed and dissolved hydrocarbon impacts that are present at the Site, specifically in monitoring well (MW)-15, which is the final area of concern for New York State Department of Environmental Conservation (NYSDEC) Spill # 98-14075.

1.1 Site Representation

An aerial photograph depicting the location of the Site is presented as **Figure 1** and a site plan is presented as **Figure 2.** The surrounding area consists of commercial and residential use properties. Adjacent land use consists of auto repair shops that are located southeast to the site as well as an apartment building directly to the North. To the west of the site, across Grand Concourse, is a Uhaul facility. Railroad tracks are located to the east of the site.

The Site is an active BP retail gasoline station and Dunkin Donuts selling regular, plus, and premium grades of unleaded gasoline. It is located on the east side of Grand Concourse. The locations of pertinent Site features are depicted in **Figure 2**. The entire site is made up of concrete pavement. The site has been under quarterly groundwater sampling/reporting with monthly Enhanced Fluid Recovery (EFR) events. Groundwater gauging and analytical data and a summary of EFR monitoring are included in **Tables 1 and 2**, respectively.

1.2 Site Geology and Hydrogeology

Groundwater at the site ranges from approximately 14-24 feet below grade surface (bgs) with a regional flow towards the east-southeast. Due to the geologic formations of the area (consolidated bedrock), the groundwater encountered within site wells appears to be perched. According to geologic logs and well construction data during well installation, MW-15 is installed within weathered Schist bedrock. The Geologic Log and Well Construction Details of MW-15 are included in **Appendix A**.

1.3 Potential Sensitive Receptors

The Site is located in an area of mixed commercial and residential land use. Drinking water for the Site and surrounding area is supplied by reservoirs located in upstate New York. Potential sensitive receptors include multi-family residential dwellings with basements located to the north, a subway tunnel located adjacent to the site beneath Grand Concourse, and utility vaults located along Grand Concourse. The closest surface water body is the Harlem River located approximately 1,200 feet to the West.

1.4 Site History

A summary of historical site activities is provided below:

- **February 1999** – The NYSDEC assigned Spill # 98-14075 to the site during the removal of five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. A total of 410.76 tons of soil was removed from the site by Hess Corporation (Hess).
- **March/April 1999** – MW -1 through MW-4 were installed at the site.
- **October 1999** – MW-5 through MW-8 were installed at the site.
- **September 2002 through January 2003** – Construction of a BP/Amoco station, which encompasses the former Merit station property and the neighboring former Amoco station property. A total of 1,129.20 tons of soil was removed by Hess from the former Merit station portion of the property during construction activities. All existing monitoring wells were destroyed during construction activities. Six (6) replacement monitoring wells (MW-9 through MW-14) were installed at the former Merit site in December 2002.
- **February 2006** – Oxygen Releasing Material (ORM) socks were installed in MW-12 and MW-13.
- **March 2006** – MW-15 and MW-16 were installed at the site.
- **January 2008** – As approved by the NYSDEC, a soil-vapor extraction (SVE) system in conjunction with EnviroTrac's (ET's) Well Stripper (WS) system was activated. MW-15 could not be connected to the system due to station utilities, so monthly mobile well stripper events were conducted on MW-15 starting in January 2008 and continuing through July 2011.
- **March 2010** – The SVE/WS was system shut down due to asymptotic conditions. The system effectively remediated the site, with the exception of MW-15, which could not be connected to the system due to station utilities.
- **October 2011** – EFR events commenced.
- **July 2017** – ORM socks were installed in MW-15 in an effort to address BTEX/MTBE concentrations.

- **Present Day** – Monthly EFR is conducted on MW-15 in an effort to address BTEX/MTBE concentrations.

2.0 FREE PHASE PRODUCT AND DISSOLVED CONCENTRATIONS

2.1 Free Phase Product

Free phase product had been detected on three (3) occasions within MW-15 prior to 2015 (0.02' on 5/3/13, 0.21' on 5/16/14, and 0.09' on 8/19/14). Product has been detected since June 2017 on five (5) occasions (0.04' on 6/8/17 and 0.01' on 7/19/17, 9/6/17, 10/18/17, and 11/3/17).

2.2 Dissolved Concentrations

Historically, the maximum concentration of BTEX and MTBE encountered in MW-15 were 482,100 parts per billion (ppb) and 463 ppb, respectively. During the most recent groundwater sampling event conducted on August 24, 2017, BTEX and MTBE concentrations were reported as 8,541.3 ppb and non-detect (ND), respectively. A Water-Table Elevation on August 24, 2017 and Total Dissolved BTEX/MTBE Concentration Map, which summarizes data from the last four (4) sampling events, is enclosed as **Figure 3**. While remedial actions completed to date have resulted in significant improvement in groundwater quality, it is believed that there may be residual product that is affecting the groundwater quality within MW-15. The geologic formation (Schist bedrock) is believed to contribute to the residual product and subsequent dissolved BTEX concentrations being adsorbed and stationary in the vicinity of MW-15. All historic data is shown in **Table 1** - Groundwater Gauging and Analytical Data.

3.0 REMEDIAL ACTION PLAN

Based on residual free phase product and dissolved BTEX concentrations limited to MW-15, and due to the fact that additional drilling/subsurface excavation in the area is not feasible due to underground utilities and the close proximity of the subway, it is proposed that we remediate this localized area of concern utilizing an isolated approach of surfactant and enhanced fluid recovery.

Speedway/EnviroTrac propose to utilize BioSolve™ Pinkwater® as the surfactant to clean the well casing in MW-15. A total of four (4) BioSolve™ Pinkwater® (surfactant) injection events utilizing MW-15 are proposed. BioSolve™ Pinkwater® has a proven record of effective results. The following work plan is designed to desorb, emulsify and recover residual product from the soil matrix.

3.1 Injection Event #1

Inject 100 gallons of BioSolve™ Pinkwater® at 5% solution with water into MW-15. A four (4) inch diameter scrub brush will be used to scrub the solid and screened casing above the groundwater table as well as the screen within the groundwater. Surge blocking will be used in conjunction with the scrubbing so that the surfactant can disperse down the length of the well. This process will be repeated until the 100 gallons of the 5% solution of BioSolve™ Pinkwater® has been used. Extraction utilizing a vacuum truck will be conducted on the following day for eight (8) hours to recover the surfactant and groundwater.

3.2 Injection Event #2, #3, & #4

Injection and extraction amounts will be identical to Injection Event #1, modified per field observations.

3.3 Monitoring/Sampling

On-site parameters to be monitored during injection events include: depth to product (DTP), depth to water (DTW), and product thickness. These parameters will be monitored in MW-15 and MW-16 (nearest MW). Groundwater sampling will continue to be completed quarterly in February, May, August and November. Laboratory analysis will continue to include BTEX and MTBE.

3.4 Proposed Remedial Equipment

The remedial equipment necessary to achieve RWP objectives will include, but not be limited to:

- Tanks, pumps, hoses and tubing for 5% BioSolve™ Pinkwater® injections
- Interface probe
- A four (4) inch well scrub brush
- Vacuum truck

4.0 SCHEDULE

Following approval of the RWP by the NYSDEC, Speedway will execute the following implementation schedule:

Action Item	Duration (Days)
NYSDEC approval of RWP.	-

EnviroTrac will schedule the initial remedial event.	Within 30 days from date of RWP approval
Injection Event #1: inject 100 gallons of 5% BioSolve™ Pinkwater® solution.	Initial Event
Extraction Event #1: extract surfactant and hydrocarbon impacted groundwater.	One day after Injection Event #1
Well gauging and product hand bailing (if product is detected).	1 week after initial event
Injection Event #2: inject 100 gallons of 5% BioSolve™ Pinkwater® solution.	4 weeks after initial event
Extraction Event #2: extract surfactant and hydrocarbon impacted groundwater.	One day after Injection Event #2
Groundwater gauging, monitoring and sampling.	5 weeks after initial event
Injection Event #3: inject 100 gallons of 5% BioSolve™ Pinkwater® solution.	12 weeks after initial event
Extraction Event #3: extract surfactant and hydrocarbon impacted groundwater.	One day after Injection Event #3
Well gauging.	13 weeks after initial event
Injection Event #4: inject 100 gallons of 5% BioSolve™ Pinkwater® solution.	16 weeks after initial event
Extraction Event #4: extract surfactant and hydrocarbon impacted groundwater.	One day after Injection Event #4
Groundwater gauging and sampling	18 weeks after initial event

5.0 REPORTING

A summary of the remedial events will be documented in the routine Quarterly Monitoring Reports. Speedway will notify the NYSDEC if any significant changes occur between reporting periods.

THIS INDENTURE, made the 3rd day of December, nineteen hundred and SEVENTY-NINE

BETWEEN MOBIL OIL CORPORATION, a corporation duly organized and existing under the laws of the State of New York and having its principal office and place of business at 150 East 42nd Street in the Borough of Manhattan, City, County, and State of New York, originally named Standard Oil Company of New York, that name having been duly changed to Socony-Vacuum Corporation on July 30, 1931, and subsequently duly changed to Socony-Vacuum Oil Company, Incorporated on May 31, 1934 and thereafter on April 29, 1955 duly changed to Socony Mobil Oil Company, Inc., and that name having been duly changed to Mobil Oil Corporation on May 18, 1966,

party of the first part, and 350 Concourse Realty Corp., a N.Y. Corporation, having it's principal place of business at 234 Booth Avenue, Englewood, New Jersey 07631.

BE 407 PAGE 1517

party of the second part,

WITNESSETH, that the party of the first part, in consideration of thirty thousand and no/100 ($30,000) dollars, lawful money of the United States, XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough and County of Bronx, City and State of New York, bounded and described ad follows:

BEGINNING at a point in the easterly side of Grand Concourse (formerly known as Mott Avenue) distant southerly 281.85 feet measured along said easterly side from the southerly side of East 144th Street said point being also in the division line between land of the party of the first part on the south and land now or formerly of Jessie S. Hensler on the north;

running thence easterly along said division line and the easterly prolongation thereof, 100 feet;

thence southerly parallel with said easterly side of Grand Concourse 150 feet;

thence westerly at right angles to said easterly side of Grand Concourse, 100 feet to said easterly side of Grand Concourse;

thence northerly along said easterly side of Grand Concourse, 150 feet to the point or place of BEGINNING.

SUBJECT TO ALL covenants, conditions, restrictions, easements, provisions, exceptions and reservations, if any, contained in former instruments of record.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof,

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises,

TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has caused its corporate seal to be hereunto affixed, and these presents to be signed by its duly authorized officer the day and year first above written.

THIS MORTGAGE, made the 4 day of February, nineteen hundred and eighty

BETWEEN

350 CONCOURSE REALTY CORP., A Domestic Corporation with a place of business at 26 Court St. Brooklyn N.Y.

, the mortgagor,

and

LOWELL HARWOOD and SANFORD HARWOOD, Residing at 175 Long Hill Drive Short Hills N.J. 07078 and 40 Farmstead Rd Short Hills N.J. 07078 resp.

, the mortgagee,

WITNESSETH, that to secure the payment of an indebtedness in the sum of TEN THOUSAND & 00/100 ----------($10,000.00) dollars, lawful money of the United States, to be paid

with interest thereon to be computed from the date hereof, at the rate of thirteen (13%) per centum per annum, and to be paid on the 4 day of September 1981, next ensuing and annually thereafter,

according to a certain bond, note or obligation bearing even date herewith, the mortgagor hereby mortgages to the mortgagee

ALL, that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, ~~lying and being~~ in the Borough and County of Bronx, City and State of New York, bounded and described as follows:

BEGINNING at a point in the easterly line of Grand Concourse formerly Mott Avenue, distant southerly 281.85 feet measured along said easterly line from the southerly line of East 144th Street; thence easterly at right angles to said easterly line of Grand Concourse, 100.00 feet to a point; thence southerly at right angles to the last mentioned course and parallel with said easterly line of Grand Concourse 150.00 feet to a point; thence westerly at right angles to the last mentioned course; 100.00 feet to a point at the easterly line of Grand Concourse; thence northerly at right angles to the last mentioned course along said easterly line of Grand Concourse 150.00 feet to the place and point of BEGINNING.

TOGETHER with all right, title and interest of the mortgagor in and to the land lying in the streets and roads in front of and adjoining said premises;

TOGETHER with all fixtures, chattels and articles of personal property now or hereafter attached to or used in connection with said premises, including but not limited to furnaces, boilers, oil burners, radiators and piping, coal stokers, plumbing and bathroom fixtures, refrigeration, air conditioning and sprinkler systems, wash-tubs, sinks, gas and electric fixtures, stoves, ranges, awnings, screens, window shades, elevators, motors, dynamos, refrigerators, kitchen cabinets, incinerators, plants and shrubbery and all other equipment and machinery, appliances, fittings, and fixtures of every kind in or used in the operation of the buildings standing on said premises, together with any and all replacements thereof and additions thereto;

TOGETHER with all awards heretofore and hereafter made to the mortgagor for taking by eminent domain the whole or any part of said premises or any easement therein, including any awards for changes of grade of streets, which said awards are hereby assigned to the mortgagee, who is hereby authorized to collect and receive the proceeds of such awards and to give proper receipts and acquittances therefor, and to apply the same toward the payment of the mortgage debt, notwithstanding the fact that the amount owing thereon may not then be due and payable; and the said mortgagor hereby agrees, upon request, to make, execute and deliver any and all assignments and other instruments sufficient for the purpose of assigning said awards to the mortgagee, free, clear and discharged of any encumbrances of any kind or nature whatsoever.

AND the mortgagor covenants with the mortgagee as follows:

1. That the mortgagor will pay the indebtedness as hereinbefore provided.

2. That the mortgagor will keep the buildings on the premises insured against loss by fire for the benefit of the mortgagee; that he will assign and deliver the policies to the mortgagee; and that he will reimburse the mortgagee for any premiums paid for insurance made by the mortgagee on the mortgagor's default in so insuring the buildings or in so assigning and delivering the policies.

3. That no building on the premises shall be altered, removed or demolished without the consent of the mortgagee.

4. That the whole of said principal sum and interest shall become due at the option of the mortgagee: after default in the payment of any instalment of principal or of interest for fifteen days; or after default in the payment of any tax, water rate, sewer rent or assessment for thirty days after notice and demand; or after default after notice and demand either in assigning and delivering the policies insuring the buildings against loss by fire or in reimbursing the mortgagee for premiums paid on such insurance, as hereinbefore provided; or after default upon request in furnishing a statement of the amount due on the mortgage and whether any offsets or defenses exist against the mortgage debt, as hereinafter provided. An assessment which has been made payable in instalments at the application of the mortgagor or lessee of the premises shall nevertheless, for the purpose of this paragraph, be deemed due and payable in its entirety on the day the first instalment becomes due or payable or a lien.

5. That the holder of this mortgage, in any action to foreclose it, shall be entitled to the appointment of a receiver.

6. That the mortgagor will pay all taxes, assessments, sewer rents or water rates, and in default thereof, the mortgagee may pay the same.

7. That the mortgagor within five days upon request in person or within ten days upon request by mail will furnish a written statement duly acknowledged of the amount due on this mortgage and whether any offsets or defenses exist against the mortgage debt.

8. That notice and demand or request may be in writing and may be served in person or by mail.

9. That the mortgagor warrants the title to the premises.

10. That the fire insurance policies required by paragraph No. 2 above shall contain the usual extended coverage endorsement; that in addition thereto the mortgagor, within thirty days after notice and demand, will keep the premises insured against war risk and any other hazard that may reasonably be required by the mortgagee. All of the provisions of paragraphs No. 2 and No. 4 above relating to fire insurance and the provisions of Section 254 of the Real Property Law construing the same shall apply to the additional insurance required by this paragraph.

11. That in case of a foreclosure sale, said premises, or so much thereof as may be affected by this mortgage, may be sold in one parcel.

12. That if any action or proceeding be commenced (except an action to foreclose this mortgage or to collect the debt secured thereby), to which action or proceeding the mortgagee is made a party, or in which it becomes necessary to defend or uphold the lien of this mortgage, all sums paid by the mortgagee for the expense of any litigation to prosecute or defend the rights and lien created by this mortgage (including reasonable counsel fees), shall be paid by the mortgagor, together with interest thereon at the rate of six per cent. per annum, and any such sum and the interest thereon shall be a lien on said premises, prior to any right, or title to, interest in or claim upon said premises attaching or accruing subsequent to the lien of this mortgage, and shall be deemed to be secured by this mortgage. In any action or proceeding to foreclose this mortgage, or to recover or collect the debt secured thereby, the provisions of law respecting the recovering of costs, disbursements and allowances shall prevail unaffected by this covenant.

13. That the mortgagor hereby assigns to the mortgagee the rents, issues and profits of the premises as further security for the payment of said indebtedness, and the mortgagor grants to the mortgagee the right to enter upon and to take possession of the premises for the purpose of collecting the same and to let the premises or any part thereof, and to apply the rents, issues and profits, after payment of all necessary charges and expenses, on account of said indebtedness. This assignment and grant shall continue in effect until this mortgage is paid. The mortgagee hereby waives the right to enter upon and to take possession of said premises for the purpose of collecting said rents, issues and profits, and the mortgagor shall be entitled to collect and receive said rents, issues and profits until default under any of the covenants, conditions or agreements contained in this mortgage, and agrees to use such rents, issues and profits in payment of principal and interest becoming due on this mortgage and in payment of taxes, assessments, sewer rents, water rates and carrying charges becoming due against said premises, but such right of the mortgagor may be revoked by the mortgagee upon any default, on five days' written notice. The mortgagor will not, without the written consent of the mortgagee, receive or collect rent from any tenant of said premises or any part thereof for a period of more than one month in advance, and in the event of any default under this mortgage will pay monthly in advance to the mortgagee, or to any receiver appointed to collect said rents, issues and profits, the fair and reasonable rental value for the use and occupation of said premises or of such part thereof as may be in the possession of the mortgagor, and upon default in any such payment will vacate and surrender the possession of said premises to the mortgagee or to such receiver, and in default thereof may be evicted by summary proceedings.

14. That the whole of said principal sum and the interest shall become due at the option of the mortgagee: (a) after failure to exhibit to the mortgagee, within ten days after demand, receipts showing payment of all taxes, water rates, sewer rents and assessments; or (b) after the actual or threatened alteration, demolition or removal of any building on the premises without the written consent of the mortgagee; or (c) after the assignment of the rents of the premises or any part thereof without the written consent of the mortgagee; or (d) if the buildings on said premises are not maintained in reasonably good repair; or (e) after failure to comply with any requirement or order or notice of violation of law or ordinance issued by any governmental department claiming jurisdiction over the premises within three months from the date thereof; or (f) if on application of the mortgagee two or more fire insurance companies lawfully doing business in the State of New York refuse to issue policies insuring the buildings on the premises; or (g) in the event of the removal, demolition or destruction in whole or in part of any of the fixtures, chattels or articles of personal property covered hereby, unless the same are promptly replaced by similar fixtures, chattels and articles of personal property at least equal in quality and condition to those replaced, free from chattel mortgages or other encumbrances thereon and free from any reservation of title thereto; or (h) after thirty days' notice to the mortgagor, in the event of the passage of any law deducting from the value of land for the purposes of taxation any lien thereon, or changing in any way the taxation of mortgages or debts secured thereby for state or local purposes; or (i) if the mortgagor fails to keep, observe and perform any of the other covenants, conditions or agreements contained in this mortgage.

15. That the mortgagor will, in compliance with Section 13 of the Lien Law, receive the advances secured hereby and will hold the right to receive such advances as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

Strike out this clause if not applicable

16. That the execution of this mortgage has been duly authorized by the board of directors of the mortgagor.

This mortgage may not be changed or terminated orally. The covenants contained in this mortgage shall run with the land and bind the mortgagor, the heirs, personal representatives, successors and assigns of the mortgagor and all subsequent owners, encumbrancers, tenants and subtenants of the premises, and shall enure to the benefit of the mortgagee, the personal representatives, successors and assigns of the mortgagee and all subsequent holders of this mortgage. The word "mortgagor" shall be construed as if it read "mortgagors" and the word "mortgagee" shall be construed as if it read "mortgagees" whenever the sense of this mortgage so requires.

IN WITNESS WHEREOF, this mortgage has been duly executed by the mortgagor.

AMOCO

Amoco Oil Company

REEL 1024 PG 0360

S.S. #60380

Lease — Manhattan

26-828-G (10-83)

This Lease, made this 1st day of September, 19 90 by and between 350 Concourse Realty Corp., a New York Corporation, whose address is 218 B.131st Street, Belle Harbor, NY 11694, Lessor, and the Amoco Oil Company, a Maryland corporation, with its main business office at 200 E. Randolph Drive, Chicago, Illinois, 60601, Lessee:

Witnesseth:

1. The Lessor hereby demises and leases to Lessee, the following described premises situated in the Borough of Bronx, County of Bronx, State of New York more particularly described as follows, to-wit:

BEGINNING at a point in the easterly side of Grand Concourse (formerly known as Nott Avenue) distant southerly 281.25 feet measured along said easterly side from the southerly side of East 144th Street said point being also in the division line between land of the party of the first part on the south and land now or formerly of Jessie S. Kersler on the north;

Running thence easterly along said division line and the easterly prolongation thereof, 100 feet;

Thence southerly parallel with said easterly side of Grand Concourse, 100 feet to said easterly side of Grand Concourse;

Thence northerly along said easterly side of Grand Concourse, 150 feet to the point or place of BEGINNING.

SUBJECT TO ALL covenants, conditions, restrictions, easements, provisions, exceptions and reservations, if any, contained in former instruments of record.

Commonly known as: 350 Grand Concourse, Bronx, NY
This instrument prepared by: Wayne A. Lenczycki, 200 E. Randolph, Chicago, IL 60601

Together with all buildings, improvements, equipment, fixtures, appliances, and other facilities of every nature owned or controlled by Lessor and located or to be erected or installed by Lessor thereon; and all rights, alleys, rights-of-way, easements, appurtenances thereunto belonging or in anywise appertaining; and all rights of Lessor in and to any public or private thoroughfares abutting the above-described premises, all being hereinafter referred to as the "demised premises".

To Have And To Hold unto Lessee for a term commencing on the 1st day of September, 19 90, and ending on the 31st day of August ~~XXXX~~ 2005

The rental for the demised premises, certain extension and cancellation privileges, and a purchase option, or options, are more fully set forth in that certain Agreement between the parties hereto, of even date herewith, and this Lease is subject to all the covenants, conditions and terms set forth in said Agreement, which is hereby adopted herein and made a part hereof by reference to the same full extent as if all the covenants, conditions and terms thereof were copied in full herein.

In Witness Whereof, the parties hereto have duly signed these presents and affixed their respective seals the day and year first above written.

ASSIGNMENT OF LEASE

Kelley Drye and Warren LLP
3050 K St, NW
Washington, DC 20007
Attn: Joseph B. Hoffman, Esq.

$258
9116 02

This Assignment and Assumption Agreement ("**Assignment**") is entered into as of this 23 day of October, 2008, by and between BP PRODUCTS NORTH AMERICA INC., a Maryland corporation, f/k/a Amoco Oil Company and successor in interest to BP Exploration & Oil Inc. ("**Assignor**"), whose address is c/o BP America Inc., 28100 Torch Parkway, Warrenville, IL 60555, and ATLANTIS MANAGEMENT GROUP II, LLC, a New York limited liability company ("**Assignee**"), whose address is 555 South Columbus Avenue, Suite 201, Mount Vernon, New York 10550.

WITNESSETH:

WHEREAS, Assignor has entered into (i) a certain Lease (together with any amendments, modifications and riders thereto, the "**370 Lease**") dated as of September 5, 2001, with 131 Realty Corp. (together with its successors and assigns, "**370 Landlord**") as lessor, and Assignor, as lessee, and (ii) a certain Lease (together with any amendments, modifications and riders thereto, the "**350 Lease**"; the 350 Lease and the 370 Lease shall hereinafter be collectively referred to as the "**Lease**") dated as of September 1, 1989, with 350 Concourse Realty Corp. (together with its successors and assigns, "**350 Landlord**"; the 350 Landlord and the 370 Landlord shall hereinafter each be referred to as a "**Landlord**", and collectively as the "**Landlord**") as lessor, and Assignor, as lessee, for certain premises in the aggregate located at 350-370 Grand Concourse, Bronx, New York and legally described on **Exhibit A** attached hereto (the "**Property**");

Block 2391 lot 42 350 Grand Concourse Bronx

WHEREAS, Assignor and Assignee, and certain other parties, have entered into a certain Purchase and Sale Agreement dated July 25, 2008, as amended and assigned (the "**Agreement**"), regarding the sale by Assignor of certain Property (as defined in the Agreement) to Assignee;

WHEREAS, Assignee has agreed to take an assignment of and assume all of Assignor's right, title and interest in and to the Lease from Assignor, and Assignor has agreed to assign all of Assignor's right, title and interest in and to the Lease to Assignee, upon the terms and conditions contained herein.

WHEREAS, in connection with the sale, Assignor is transferring to Assignee any and all of Assignor's right, title and interest in and to those permits, approvals, licenses and contracts,

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 3/28

excluding any lottery, liquor and beverage permits or licenses in favor of Assignor, relating to the Property and described on **Exhibit B** attached hereto (**"Permits and Contracts"**);

NOW, THEREFORE, in consideration of the Agreement, and the mutual covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and pursuant to the terms and conditions of the Agreement, the parties hereto hereby agree as follows:

1. **Assignment.**

Assignor hereby sells, assigns, transfers and sets over onto Assignee without covenant, representation or warranty of any kind, all of its right, title and interest in and to the Lease, as of the date hereof (the **"Transfer Date"**), to have and to hold the same from the Transfer Date for and during the residue of the term of the Lease and any extensions or renewals thereto, subject, however, to all the conditions, covenants, agreements, restrictions, provisions, terms and rentals contained in the Lease, this Assignment, and the Agreement.

Assignor hereby sells, assigns, transfers and sets over onto Assignee whatever interest it may have, if any, in and to the Permits and Contracts, insofar as they are transferable without consent, as of the Transfer Date, subject, however, to all the conditions, covenants, agreements, provisions, terms and payments contained in the Permits and Contracts and the Agreement. If the Permits and Contracts affect more properties than the Property, this Assignment will be deemed to assign the Permits and Contracts only insofar as they affect the Property.

2. **Acceptance.**

Assignee acknowledges that it has read the original or a copy of the Lease assigned hereby and is fully aware of its terms and provisions, and, in consideration of this Assignment, Assignee hereby accepts the same and assumes and agrees to pay all rental due under said Lease from and after the Transfer Date, and to observe and perform all of the covenants, agreements and conditions contained therein on the part of the lessee to be observed and performed from and after the Transfer Date. Assignee further covenants, except as may otherwise be provided in the Agreement, to defend (with counsel reasonably acceptable to Assignor), indemnify, and hold harmless and does hereby waive, release and discharge Assignor, its parents, subsidiaries and affiliates, and their respective directors, officers, partners, members, shareholders, employees, contractors, agents, representatives, successors and assigns (collectively, the **"Assignor Parties"**), from and against any and all losses, liabilities, penalties, damages, claims, demands, suits or actions, judgments and costs and expenses in any manner arising out of the lessee's obligations under the Lease, this Assignment, and the use of the Property by Assignee or its successors or permitted assignees, or anyone acting by, through or under them, from and after the Transfer Date.

In consideration of this Assignment, Assignee hereby accepts the same and assumes and agrees to make any and all payments required under the Permits and Contracts from and after the Transfer Date, and to observe and perform all of the covenants, agreements and conditions contained therein on the part of the Assignor to be observed and performed from and after the

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 4/28

Transfer Date and further covenants to exonerate, save harmless, protect and indemnify the Assignor Parties from and against any and all losses, liabilities, penalties, damages, claims, demands, suits or actions, judgments and costs and expenses in any manner arising out of, or relating to, the Permits and Contracts from and after the Transfer Date. Should Assignee default in any of its obligations under the Permits and Contracts, in addition to Assignor's other rights hereunder or at law or equity, Assignor may cure the default and charge to Assignee the cost of such cure, and Assignee agrees to promptly reimburse Assignor for such charges.

3. **Assignor's Remedies Upon Assignee Default.**

Assignee shall immediately provide Assignor with copies of all notices received from Landlord. In the event of a default by Assignee under the Lease or under this Assignment, which default remains uncured for uncured for ten (10) business days after written notice is given by either Landlord or Assignor to Assignee to cure such default (or, in the event of a default under the Lease, such period of time which is ten (10) business days prior to the expiration of the applicable cure period under the Lease), time being of the essence, then Assignor shall have the right (but not the obligation) in its sole and exclusive discretion, to (i) cure such default at the expense and for the account of Assignee, and/or (ii) declare, by written notice given to Assignee and Landlord (the "**Reversion Notice**"), that all right, title and interest of Assignee in and to the Lease, the Property, all improvements and personal property then located on the Property, and, at Assignor's election, any or all Dealer Supply Agreements and/or Assumed Environmental Liabilities Documents (as such terms are defined in the Agreement) related to the Property (collectively, the "**Reversion Property**") shall immediately and automatically be reverted to and/or vest in Assignor, without any further action being required of Assignor or Assignee to accomplish such reversion and/or vesting (the "**Reversion**"). Upon the delivery of a Reversion Notice, Assignee shall have no further right, title or interest in or to the Reversion Property, and all such right, title and interest shall immediately and automatically revert to and/or vest in Assignor. In no event shall Assignee have any claim against Assignor in connection with any such Reversion, including without limitation any claim for return of any monies paid by Assignee for this Assignment pursuant to the Agreement, and Assignee shall be deemed to have waived any such claims by virtue of having failed to cure the default under the Lease and/or this Assignment within the time permitted hereunder. Assignee and any other occupants shall vacate and surrender the Reversion Property to Assignor immediately upon the giving of such Reversion Notice, and, if such parties fail to vacate the Reversion Property, Assignor shall be entitled to regain possession of the Reversion Property by appropriate proceedings. Assignor may record the Reversion Notice, or a memorandum thereof signed only by Assignor, in the county records where the Reversion Property is located, and no further action shall be required to accomplish the Reversion of record. In addition to any expenses incurred by the Assignor in the event that Assignor, pursuant to this Section 3(i), elects to cure the Assignee's default, Assignee shall also be responsible for all any fees or penalties imposed by the Landlord and any unpaid tax assessments due hereunder. Notwithstanding the foregoing, Assignee shall promptly execute and deliver to Assignor in recordable form any documents requested by Assignor to further evidence any such Reversion. In this Assignment, the term "**business day**" means days other than Saturdays, Sundays, and holidays observed by the United States or the State of New York.

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 5/28

Assignee shall reimburse Assignor upon demand for any costs and expenses, including without limitation attorneys' fees, for any efforts taken by Assignor to cure any default, or to compel Assignee to cure any default, or to accomplish the Reversion, or to otherwise enforce Assignor's rights hereunder. In the event such costs and expenses are not fully paid within five (5) days after Assignor's demand therefor, then interest at the highest interest rate permitted by applicable law shall begin to accrue on the unpaid amount, which interest shall be added to and paid with such amount.

All of the rights and remedies granted to Assignor hereunder in the event of an uncured default by Assignee shall be in addition to any and all rights and remedies which Assignor may have under applicable law or under the Agreement, and the exercise or pursuit of any one such right or remedy shall not be deemed to be an election of rights or remedies, and Assignor may pursue any other such rights or remedies at a later time or at the same time. No failure or delay on the part of Assignor in exercising any of such rights or remedies shall operate as a waiver thereof, and Assignor shall not be deemed to have waived any such rights or remedies, except by an express waiver in writing signed by Assignor and specifying the right or remedy to be waived. Any such express waiver by Assignor of a particular right or remedy in one instance, shall not preclude Assignor from exercising that right or remedy, or any right or remedies, as to any future instances.

4. **Use and Operating Restrictions.**

This Assignment is made by Assignor and accepted by Assignee upon the express condition and subject to the use and operating restrictions, notices, acknowledgments, and covenants described on **Exhibit C** attached hereto (collectively, the "**Use and Operating Restrictions**"). Assignor may, in Assignor's sole and absolute discretion (but shall in no event be obligated to), release and/or waive any or all of the Use and Operating Restrictions at any time, by written instrument duly executed and delivered by Assignor.

5. **Assignee's Indemnification of Assignor.**

Assignee, for and on behalf of itself and its successors and assigns (including, without limitation, all successors to Assignor's interest in and to the Property, the Lease, or any portion thereof (collectively, the "**Assignee Parties**"), by acceptance of this Assignment, hereby agrees, except as may otherwise be provided in the Agreement, to assume responsibility for, and shall defend (with counsel reasonably acceptable to the Assignor Parties), indemnify and hold harmless, and does hereby waive, release and discharge, Assignor and the other Assignor Parties, from and against any and all actions or causes of action at law or in equity, claims, demands, obligations, losses, damages, liabilities, suits, judgments, fines, penalties, payments, costs and expenses (including reasonable attorneys' fees) arising out of or resulting from the use or operation of the Property on or after the Transfer Date, and any use which is in violation of or inconsistent with the Use and Operating Restrictions.

6. **Condition of Property.**

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 6/28

Assignee has accepted Assignor's interest in and to the Property, including without limitation its environmental condition, in its "**AS-IS, WHERE-IS, AND WITH ALL FAULTS**" condition, subject only to any covenants and obligations of Assignor to Assignee which are expressly set forth in the Agreement or any other documents or instruments executed and delivered by Assignor and Assignee pursuant to the Agreement (collectively, the "**Contractual Obligations**"). Assignee acknowledges that the purchase price which it has paid for Assignor's interest in and to the Property reflects: (a) the fact that all of the Use and Operating Restrictions shall be recorded against the Property and shall be binding on Assignee and the other Assignee Parties, (b) the fact that Assignee has agreed to acquire Assignor's interest in and to the Property, including without limitation its environmental condition, in its "**AS-IS, WHERE-IS, AND WITH ALL FAULTS**" condition (subject only to Assignor's Contractual Obligations to Assignee), and (c) the fact that Assignee has agreed to acquire Assignor's interest in and to the Property subject to the presence, whether known or unknown, of any environmental contamination which may have occurred during or prior to the period of Assignor's use and/or operation of the Property (subject only to Assignor's Contractual Obligations to Assignee). Assignee does, by its acceptance of this Assignment, represent and warrant that it is familiar with the condition of the Property and that ASSIGNOR HAS NOT MADE AND MAKES NO WARRANTIES OR REPRESENTATIONS REGARDING THE PROPERTY, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, ITS HABITABILITY, CONDITION OR FITNESS FOR ANY PARTICULAR USE OR PURPOSE. ASSIGNEE AGREES THAT ASSIGNOR'S INTEREST IN AND TO THE PROPERTY IS HEREBY ASSIGNED BY ASSIGNOR AND ACCEPTED BY ASSIGNEE IN ITS "**AS-IS, WHERE-IS, AND WITH ALL FAULTS**" CONDITION EXISTING ON THE TRANSFER DATE, SUBJECT ONLY TO THE CONTRACTUAL OBLIGATIONS.

7. **Assignor's Right of Access and Entry Upon the Property; Cooperation**.

Assignor hereby reserves for itself and the other Assignor Parties the right to enter upon and access the Property (free from any charge or fee) from time to time to remove certain personal property and conduct certain inspections, remediation and other activities, all as more particularly described in the Agreement. Such access shall not be interrupted by any transfer, assignment, conveyance, mortgage, lease, hypothecation or pledge by Assignee or any of Assignee's interests in the Property or the Lease. In the event Assignor is involved in any remediation efforts or in obtaining environmental site closure with respect to the Property for any reason whatsoever, Assignee and each of the other Assignee Parties agrees to cooperate with Assignor and with all local, state, and federal environmental agencies having jurisdiction over the Property (the "**Government**") in obtaining environmental site closure, to commercial standards, for any environmental contamination relating to or arising out of Assignor's prior use of the Property.

8. **Additional Rights.**

Notwithstanding anything to the contrary contained in this Assignment or the Agreement, all of the rights of Assignor and corresponding obligations of Assignee set forth in this Assignment, including without limitation the rights of entry and the Use and Operating Restrictions, shall be deemed to run with the Property and shall continue in full force and effect

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 7/28

and shall be enforceable in accordance with the terms of this Assignment. If Assignee should ever increase or change its interest in the Property, whether by acquiring the fee title thereto or a new or longer lease thereof or otherwise, such rights of Assignor and corresponding obligations of Assignee shall continue in full force and effect and shall apply to and be enforceable against Assignee's increased or changed interest in the Property, all in accordance with the terms of this Assignment. In addition to any other notice obligations of Assignee, pursuant to this Assignment or in the Agreement, Assignee agrees to provide Assignor with at least six (6) months prior written notice of any such increased or changed interest in the Property, or of any expiration or termination of the Lease.

9. **No Further Assignment.**

Assignee shall not transfer or assign the Lease or any portion thereof, or sublease the Property or any portion thereof, or delegate any of Assignee's liabilities, obligations, or responsibilities under the Lease or any portion thereof, to any person or entity without obtaining Assignor's prior written consent (which may be withheld in Assignor's sole and absolute discretion). Notwithstanding the foregoing, Assignee shall have the right to transfer or assign the Lease or any portion thereof, or sublease the Property or any portion thereof, to (i) a dealer that has been designated by Assignee, and fully approved by Assignor as being a fully qualified "Dealer", in its sole and absolute discretion, pursuant to Assignor's then current standard Dealer Lease and Supply Agreement and exhibits and ancillary agreements thereto, and/or (ii) a non-petroleum national franchisee quick-serve restaurant, including, without limitation, Burger King, Dunkin Donuts, and Quiznos; provided, however, that in both (i) and (ii) above the original Assignee named in this Assignment (and any successors and assigns thereof) shall be deemed jointly and severally liable with any and all such sublessees or assignees for all of the duties and obligations of Assignee under this Assignment. For purposes hereof, any change in the controlling equity interest of Assignee (by way of transfer or increase of stock, partnership or membership interests or otherwise) shall be deemed to be a transfer which requires Assignor's prior written consent (which may be withheld in Assignor's sole and absolute discretion). Any purported transfer or assignment of the Lease or any portion thereof, or sublease of the Property or any portion thereof, or delegation of any of Assignee's liabilities, obligations, or responsibilities under the Lease or any portion thereof, by Assignee without Assignor's prior written consent shall be null and void.

10. **Notices.**

All notices required or sent hereunder shall be in writing and delivered in person, by messenger or nationally recognized overnight courier, or by U.S. Mail Certified, Return Receipt Requested, to the address of the other party as set forth in the first paragraph of this Assignment, or to such other address as the parties may from time to time designate. Each such notice shall be deemed served and effective on the date of delivery or refusal, if delivered personally, on the date of the delivery receipt, if delivered by messenger or nationally recognized overnight courier, or the date of mailing shown on the certified mail receipt, if delivered by certified mail.

11. **Entire Understanding.**

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 8/28

This Assignment and the Agreement contain the entire understanding and agreement between the parties hereto relative to the subject matter hereof. No representations or statements, other than those expressly set forth herein, were relied upon by the parties in entering into this Assignment. No modification, waiver of, addition to, or deletion from the terms of this Assignment shall be effective unless reduced to writing and signed by Assignor and Assignee, each of whom expressly waives, releases and forever forswears any right under the law in the State in which the Property is located which permits a contract, by its terms amendable only in writing, to be orally amended. This Assignment is prepared pursuant to the Agreement, and in the event of any conflict between the Assignment and the Agreement, the terms of the Agreement will prevail.

This Assignment is subject to all conditions, covenants, agreements, provisions and terms of the Agreement. This Assignment may be signed by the parties in counterparts, which together shall constitute one instrument, which shall be binding upon and inure to the benefit of the Assignor and Assignor Parties, and Assignee and the Assignee Parties, as the case may be, and any other person or entity expressly noted herein.

EXHIBIT B
TO
ASSIGNMENT AND ASSUMPTION AGREEMENT
(Permits and Contracts)

[NONE]

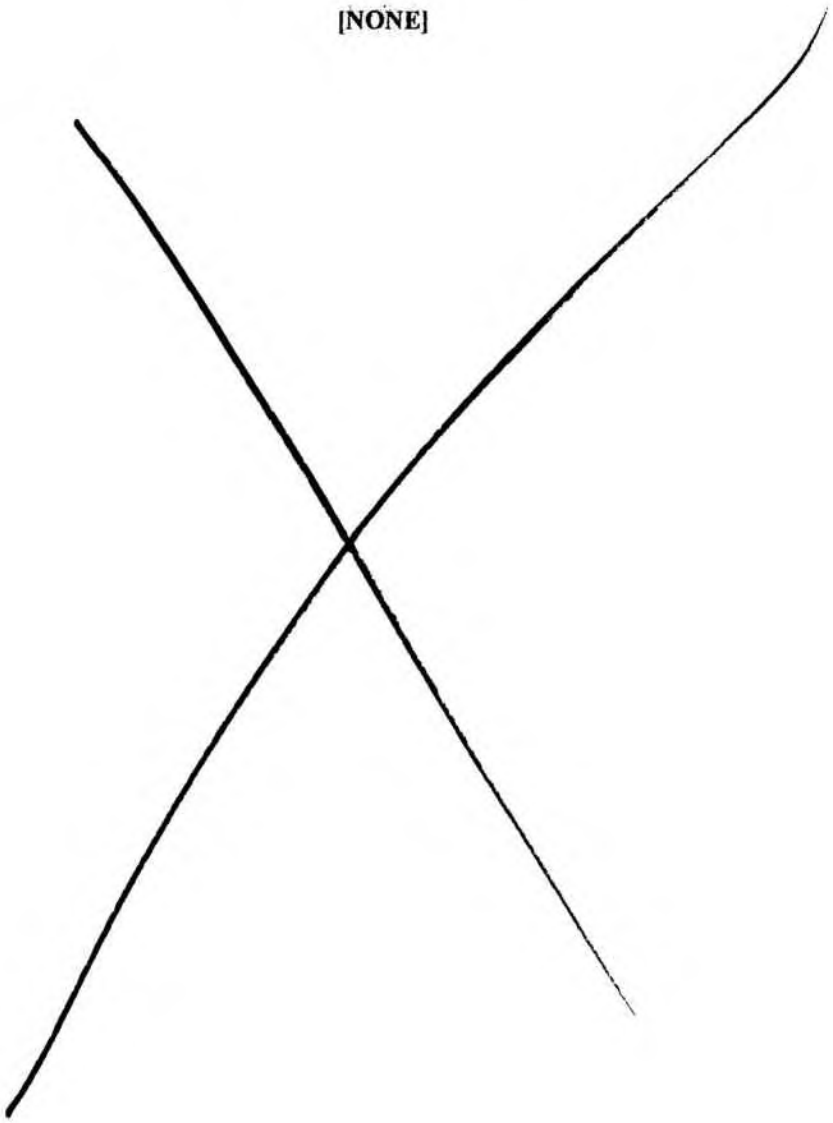

EXHIBIT C

TO

ASSIGNMENT AND ASSUMPTION AGREEMENT

(Use And Operating Restrictions, Notices, Acknowledgements, And Covenants)

Assignee covenants and agrees, for and on behalf of itself and the other Assignee Parties, that the following use and operating restrictions, notices, acknowledgments, and covenants shall run with the land and each portion thereof, shall bind and restrict the Property and each portion thereof, and shall be binding upon and inure to the benefit of the parties, including without limitation, Assignor, the other Assignor Parties, Assignee and the other Assignee Parties, as the case may be, and their respective heirs, devisees, representatives, successors and assigns, and any other person or entity expressly noted herein, and shall bind and restrict the Property for the time periods noted herein:

I. **Petroleum Restriction**: No part of the Property shall be used by Assignee or any other Assignee Party, directly or indirectly, for an automobile service station, petroleum station, gasoline station, automobile repair shop, car wash, or for the purpose of conducting or carrying on the business of selling, offering for sale, storage, handling, distributing or dealing in petroleum, gasoline, motor vehicle fuel, diesel fuel, kerosene, benzol, naphtha, greases, lubricating oils, any fuel used for internal combustion engines, lubricants in any form, automobile parts or accessories, tires, batteries, or other petroleum or petroleum-related products, except for the personal use or consumption of such products by Assignee or its sublessees of the Property, unless any such use is in connection with the operation of the Property as an Assignor branded service station. For purposes hereof, "**Assignor branded service station**" shall mean a service station under the brand BP, Amoco, Arco or any other brand of Assignor or any of its affiliates or their respective successors and assigns.

The above covenants and use restrictions bind and restrict the Property as covenants and restrictions running with the land and each portion thereof, and are deemed to benefit Assignor as a user of, operator of, or supplier of Assignor branded fuels to lands or retail operations in the County in which the Property is located. These restrictive covenants will remain in full force and effect for a term of twenty (20) years from the date of this conveyance whereupon these restrictive covenants will automatically lapse and terminate and be of no further force or effect.

II. **Environmental Matters.**

A. **Environmental Restrictions.** To permit application of environmental corrective action standards or other protective activities that are consistent with applicable law, this conveyance is made by Assignor and accepted by Assignee on the express condition and subject to the following restrictions, notices, acknowledgments and covenants:

1. **Groundwater Exposure Restriction.** No water supply wells of any kind (including, without limitation, water wells used for drinking, bathing or other human

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 16/28

consumption purposes and water wells used for livestock, farming or irrigation) shall be installed or used on the Property (collectively, the "**Groundwater Exposure Restriction**"); provided, however, that the Groundwater Exposure Restriction does not prohibit the installation or use of any compliance wells or any groundwater monitoring, recovery or extraction wells or similar devices used for or related to the performance of any remediation or environmental corrective action work on the Property now or in the future.

2. **Residential Use Restriction.** The Property shall not be used or occupied (if used or occupied at all) for residential purposes, and additionally, no part of the Property shall be used for the purpose of operating a child care or elder care facility, a nursing home facility or hospice, a medical or dental facility, a school, a church or other place of worship, a park or a hospital (collectively, the "**Residential Use Restriction**"). If applicable state environmental laws and regulations define residential use, any use that is deemed to be a residential use by such laws and regulations will also be a residential use as the terms are used herein.

3. **Construction and Excavation Restrictions**.

3.1 **Engineered Barriers and Below-grade Restrictions.** Assignee shall place any engineered barrier on the Property as may be required by the Government. Any building or other improvements constructed on the Property shall have a slab-on-grade foundation, with the top of the slab at or above surface level, except for any building footings and/or underground utilities (the "**Below-grade Restriction**").

3.2 **Construction Workers' Caution Statement.** Prior to conducting any intrusive activities with respect to the Property, Assignee and the other Assignee Parties shall cause all construction workers performing or assisting with such activities to be notified of possible petroleum hydrocarbon encounters and appropriately trained and certified in accordance with all environmental, health and safety laws, rules, regulations and ordinances, including, without limitation, any and all Occupational Safety and Health Administration (OSHA) Hazardous Waste Operations and Emergency Response (HAZWOPER) requirements (including, without limitation, those set forth in 29 CFR 1910.120) (collectively, the "**Construction Workers' Caution Restriction**"). Such training shall at a minimum include both an initial 40-hour and future 8 hour refresher training and certifications in compliance with OSHA HAZWOPER requirements and any similar applicable requirements (whether existing as of the date of this conveyance or enacted or promulgated in the future).

3.3 **Removal and Disposal of Soil and Groundwater.** No soils shall be excavated at or removed from the Property, unless the soil is excavated and/or removed (as applicable) in a manner and (in the case of removal of soils) to a disposal facility approved in writing in advance by Assignor, and any management, excavation and removal of soil at or from the Property must be governed by a written soil management plan in form and substance acceptable to Assignor ("**Soil Management Plan**") that will be developed at the time of Assignee's (or any other Assignee Party's) request for removal or excavation of soil. Assignee and the other Assignee Parties shall be solely responsible for the proper and lawful performance and payment of (a) any and all soil excavation, hauling, transportation and disposal pursuant to the Soil Management Plan and (b) any extraction, dewatering and disposal of any groundwater to

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 17/28

be extracted or removed from the Property arising out of or resulting from any development or other construction activities at the Property, including any required testing and treatment of such water (collectively, the "**Soil and Groundwater Removal Restriction**"). Except as may be otherwise expressly provided in the Soil Management Plan that has been approved by Assignor or in the Agreement, Assignor shall not be obligated to pay any costs related to such soil excavation or groundwater extraction or any soil or groundwater removal or disposal, and/or any development of the Property.

3.4 **Relocation of Corrective Action Equipment; Development.** In the event that monitoring wells or other Corrective Action Equipment and any related improvements (collectively, the "**Corrective Action Equipment**") owned by Assignor are: (a) present at the Property on the date of this conveyance in connection with Assignor's Retained Environmental Liabilities (as defined in the Agreement); (b) subsequently required to be present on the Property after the date of this conveyance by the Government in connection with Assignor's Retained Environmental Liabilities; or (c) otherwise installed at the Property by or on behalf of Assignor in connection with Assignor's Retained Environmental Liabilities or otherwise, no Assignee Party will interfere with the use or operation of the Corrective Action Equipment, or damage or destroy (or permit the damage or destruction of) any Corrective Action Equipment. In the event Assignee or any other Assignee Party damages or destroys any Corrective Action Equipment, Assignee or such other Assignee Party (as applicable) shall pay, upon demand, Assignor's costs in repairing or replacing it. Assignee shall submit to Assignor a copy of plans for any construction or relocation of any improvements on the Property, or any excavation, demolition, re-grading, repaving, landscaping or other development activity performed by any person on the Property (excluding work by Assignor and any renovations solely to the interior of buildings that have no impact on Seller's Work (as defined in the Agreement)) at the Property ("**Development**") for Assignor's review and consent at least thirty (30) days prior to the commencement by anyone of any Development activities on the Property. Neither Assignee nor any Assignee Party shall remove or relocate any Corrective Action Equipment without the prior written consent of Assignor. In the event that Assignor consents to any such removal or relocation, then either (at Assignor's sole election): (y) Assignee (or such other Assignee Party (as applicable)) shall perform such removal and/or relocation at its sole cost and expense, pursuant to plans and specifications which have been approved in writing by Assignor, and using contractors acceptable to Assignor (in which event Assignor and its contractors and consultants shall have the right to be present at, and supervise, such removal or relocation); or (z) Assignor shall perform (or cause to be performed) such removal and/or relocation, but all costs and expenses of such removal or relocation shall be borne solely by Assignee or such other Assignee Party (as applicable), and Assignee or such other Assignee Party (as applicable) shall promptly reimburse Assignor for any such costs or expenses paid, sustained or incurred by Assignor.

3.5 **Cooperation.** Assignee and each of the other Assignee Parties agrees to cooperate with Assignor and with the Government in obtaining a No Further Action Determination, to commercial standards, for any Hydrocarbon Release relating to or arising out of Assignor's prior use of the Property in connection with the Retained Environmental Liabilities. Said cooperation may include, but not be limited to, the following: (a) execution of any and all documentation, including restrictive covenants or environmental easements, as may

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 18/28

be necessary, in Assignor's sole discretion, to obtain a No Further Action Determination for the Property (which documentation may impose further use and operating restrictions similar to those set forth in this **Exhibit C** on the use of the Property by Assignee and the other Assignee Parties); (b) attendance at any meetings requested by Assignor relating to a Hydrocarbon Release and remediation efforts on the Property (and/or any Hydrocarbons that may have migrated from the Property to adjacent properties); and/or (c) such other further acts as may be required in order to obtain a No Further Action Determination for any environmental incident relating to Assignor's prior use, ownership or operation of the Property. Should Assignee or any Assignee Party fail or refuse to sign such documentation, or are unavailable to sign such documentation (after reasonable inquiry by Assignor (such reasonableness to be determined by Assignor in its sole discretion)), Assignee or Assignee Parties hereby irrevocably appoint any Environmental Business Manager of Assignor (or any successor corporation thereto) as its attorney-in-fact to sign and execute such documentation for and on behalf of Assignee or Assignee Parties.

Assignee and each of the other Assignee Parties further authorize Assignor to record one or more No Further Action Determinations, deed notices, deed restrictions, environmental easements, or similar notices against the Property.

3.6 **Notice.** Any notices required to be given to Assignor shall be given using the following address:

BP Products North America Inc.
c/o Atlantic Richfield Company, VP Operations
28100 Torch Parkway
Warrenville, IL 60555
Telephone No.: _____
Facsimile No.: 630-821-3386
Site SS #: 60380
Property Address: 350-370 Grand Concourse
Bronx, New York

B. **Duration.** The Groundwater Exposure Restriction, the Residential Use Restriction, the Below-grade Restriction, the Construction Workers' Caution Restriction, and the Soil and Groundwater Removal Restriction, including their related restrictions, notices, acknowledgments and affirmative covenants and those restrictions, notices, acknowledgments and covenants set forth in sections 3.4 and 3.5 above (collectively, the "**Environmental Restrictions**"), shall run with the land and each portion thereof and shall be binding upon and inure to the benefit of Assignor, the other Assignor Parties, Assignee and the other Assignee Parties, and shall remain in full force and effect and bind and restrict the Property, unless and until any of the following occur: (1) the Environmental Restrictions are waived in writing by Assignor, in Assignor's sole discretion; (2) the Environmental Restrictions are released in writing by Assignor; or (3) the term of the Lease shall expire pursuant to its terms (including any extensions or renewals thereof). Assignor may, at Assignee's request, release a portion or portions of the Environmental Restrictions from the Property upon Assignor's receipt from Assignee of an acknowledgment from the Government, obtained by Assignee at its sole cost and expense, that test results demonstrate that the Property meets the then-current soil and groundwater standards for the Property without that portion or portions of the Environmental

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 19/28

Restrictions and that the Government approves the releasing of that portion or portions of the Environmental Restrictions. Notwithstanding the foregoing, in the event that Assignor receives from Assignee (a) a Release Notice (as hereinafter defined) and (b) an original of the Environmental Assumption and Indemnification Agreement attached hereto as **Exhibit A** executed by Assignee, Assignor shall execute and furnish to Assignee within forty-five (45) days of Assignor's receipt of the Release Notice such document as may be reasonably acceptable to Assignor in recordable form releasing the Residential Use Restriction and the Below-grade Restriction (the "Release Document") with respect to the Property as may be reasonably requested by Assignee. For purposes hereof, "Release Notice" shall mean the written notice delivered by Assignee to Assignor requesting that Assignor execute and return to Assignee the Release Document, which notice shall (A) include the Release Document to be executed by Assignor, (B) be sent simultaneously to Kelley Drye and Warren LLP, 3050 K Street, N.W., Suite 400, Washington, D.C. 20007, Attention: Joseph B. Hoffman, Esq., and (C) include the following in all capital, bolded letters on the first page thereof:

> **"THE FOLLOWING REQUEST REQUIRES BP PRODUCTS NORTH AMERICA INC. TO EXECUTE AND RETURN THE ENCLOSED RELEASE DOCUMENT WITHIN FORTY-FIVE (45) DAYS OF RECEIPT."**

The Release Notice shall not be deemed received by Assignor unless it satisfies all of the requirements set forth in (A), (B) and (C) above.

III. **Certain Environmental Acknowledgments, Covenants and Notices.**

A. **Prior Use**. Assignee acknowledges that the Property has been used as a service station or for related purposes for the storage, sale, transfer and distribution of motor vehicle fuels, petroleum products or derivatives containing hydrocarbons.

B. **USTs**. Assignee acknowledges that underground storage tanks and associated product piping systems ("**USTs**") included in, on or under the Property may contain explosive gases and may have been used for the storage of motor fuels containing tetraethyl lead or other "antiknock" compounds which have made such USTs unfit for the storage of water or any other article or commodity intended for human or animal contact or consumption. Assignee expressly agrees not to use or permit the use of any such USTs for such purposes.

C. **Notice of Environmental Restrictions upon Conveyance.** Each instrument hereafter conveying any interest in the Property or the Lease or any portion thereof by Assignee or any of the Assignee Parties shall contain a recital acknowledging the Environmental Restrictions and providing the recording location of this Assignment upon such conveyance substantially in the following form: "The real property described herein is subject to the Environmental Restrictions made by BP Products North America Inc., as Assignor, for its benefit and for the benefit of other parties and persons as set forth therein, and recorded on the _____ day of _____, 2008, in New York City Register's Office at Liber _____, Page ___ and having Document No. _____ as if the same were fully set forth herein." Notwithstanding the foregoing, any failure to include such notice shall not, in and of itself, create any right or

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 20/28

claim that any of the Environmental Restrictions or this Assignment are void, voidable or otherwise unenforceable in accordance with their terms.

IV. **Defined Terms; Successors; Other.**

Unless otherwise expressly noted herein, all initially capitalized terms used in this **Exhibit C** shall have the meanings ascribed to such terms as set forth in the Agreement or the Assignment to which this **Exhibit C** is attached. By accepting an assignment of the Lease (or otherwise succeeding, directly or indirectly, to any of Assignee's right, title or interest in or to the Property), each Assignee Party shall be conclusively deemed to have agreed to and accepted each and all of the terms, provisions and conditions of this **Exhibit C**, and to have agreed to be bound thereby. It is the intention of Assignor and Assignee that the terms, provisions, covenants and restrictions set forth in this **Exhibit C** shall be deemed to have vested upon the execution and delivery of this Assignment by Assignor and Assignee. If any of the covenants or restrictions contained herein shall be unlawful, void or voidable for violation of the rule against perpetuities, then any such covenants and restrictions shall continue only until twenty-one (21) years after the death of the survivor of the now living descendants of President George W. Bush. If any of the covenants or restrictions contained herein shall be unlawful, void or voidable for violation of any other statutory or common law rule(s) or regulation(s) imposing time limits, then any such covenants and restrictions shall continue only for the longest period permitted under such statutory or common law rule(s) or regulation(s). If any term, provision, condition, covenant or restriction in this **Exhibit C** shall, to any extent, be invalid or unenforceable, the remainder of this **Exhibit C** (or the application of such term, provision, condition, covenant or restriction to persons or circumstances other than in respect of which it is invalid or unenforceable) shall not be affected thereby, and each term, provision, condition, covenant and restriction set forth in this **Exhibit C** shall be valid and enforceable to the fullest extent permitted by law. Assignee acknowledges, for itself and the other Assignee Parties, that the breach of any of the covenants or restrictions contained in this **Exhibit C** on the part of Assignee or any other Assignee Party will result in irreparable harm and continuing damages to Assignor and Assignor's business, and that Assignor's remedy at law for any such breach or threatened breach would be inadequate. Accordingly, in addition to such remedies as may be available to Assignor at law or in equity in the event of any such breach, any court of competent jurisdiction may issue an injunction (both preliminary and permanent), without bond, enjoining and restricting the breach or threatened breach of any such covenant or restriction by Assignee or any other Assignee Party. In the event that Assignee or any other Assignee Party shall breach any of the covenants or restrictions set forth in this **Exhibit C**, then Assignee or such other Assignee Party (as applicable) shall pay all of Assignor's costs and expenses (including reasonable attorneys' fees) incurred in enforcing such covenants and restrictions.

[END OF EXHIBIT C TO ASSIGNMENT AND ASSUMPTION AGREEMENT]

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001

EXHIBIT A

TO EXHIBIT C TO ASSIGNMENT OF LEASE

ENVIRONMENTAL ASSUMPTION AND INDEMNIFICATION AGREEMENT

This Environmental Assumption and Indemnification Agreement ("**Agreement**") is entered into as of this ___ day of _____, 20___ by and between BP PRODUCTS NORTH AMERICA INC., a Maryland corporation, f/k/a Amoco Oil Company (and successor in interest to BP Exploration & Oil Inc.) ("**BP**"), whose address is c/o BP America Inc., 28100 Torch Parkway, Warrenville, IL 60555, and ATLANTIS MANAGEMENT GROUP II, LLC, a New York limited liability company ("**Atlantis**"), whose address is 555 South Columbus Avenue, Suite 201, Mount Vernon, New York 10550. Unless otherwise defined in this Agreement, all capitalized terms shall have the meanings assigned thereto in the PSA (as hereinafter defined) or the ASSIGNMENT OF LEASE (as hereinafter defined) as applicable.

WITNESSETH:

WHEREAS, BP and Atlantis, and certain other parties, entered into a certain Purchase and Sale Agreement dated July 25, 2008 (as assigned, the "**PSA**"), regarding the sale by BP of certain Transferred Assets (as defined in the PSA) to Atlantis;

WHEREAS, in accordance with the terms of the PSA, BP assigned its leasehold interest in that certain real property located at 350-370 Grand Concourse, Bronx, New York and commonly known as SS# 60380, as more particularly described on Exhibit A attached hereto and made a part hereof (the "**Property**") pursuant to that certain Assignment of Lease from BP to Atlantis dated October ___, 2008 (the "**Assignment of Lease**");

WHEREAS, a Residential Use Restriction (as defined in the Assignment of Lease) and a Below-grade Restriction (as defined in the Assignment of Lease) were recorded against the Property as part of the Assignment of Lease;

WHEREAS, the Assignment of Lease provides that should Atlantis (a) request that BP release the Residential Use Restriction and/or the Below-grade Restriction and (b) deliver to BP the executed original of this Agreement, BP shall release the Residential Use Restriction and the Below-grade Restriction with respect to the Property by executing the Release Document (as defined in the Assignment of Lease); and

WHEREAS, Atlantis desires for BP to release the Residential Use Restriction and the Below-grade Restriction with respect to the Property in consideration for the Atlantis's covenants set forth herein;

NOW, THEREFORE, BP and Atlantis, in consideration of the mutual promises and covenants contained herein, and for other good and valuable consideration the sufficiency of which is hereby acknowledged, agree as follows:

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001

1. As of the date of this Agreement (the "**Release Date**"), Atlantis hereby fully and completely assumes the responsibility, obligation, and liability for any and all environmental contamination, including, but not limited to, petroleum contamination, on, under, and/or migrating from the Property ("Atlantis's Environmental Assumption"). Atlantis's Environmental Assumption applies regardless of (a) whether Atlantis had knowledge of the environmental contamination when executing this Agreement and (b) when the environmental contamination at issue was released. Atlantis's Environmental Assumption expressly includes, but is not limited to, environmental contamination released prior to the execution of the PSA (including, but not limited to, environmental contamination resulting from the negligence of BP and/or any BP Affiliates (as hereinafter defined)).

2. Pursuant to Atlantis's Environmental Assumption, Atlantis's duties and obligations with respect to the Property include, but are in no way limited to, the performance of any and all environmental remediation and corrective action required by law (including any statute, regulation, rule, ordinance, permit, requirement, and judicial decision) or by any federal, state, or local governmental entity.

3. As of the Release Date, BP and its parents, affiliates and subsidiaries and their respective directors, officers, partners, members, shareholders, employees, contractors, agents, licensees, representatives, successors and assigns (collectively, "**BP Affiliates**") shall have no responsibility, obligation, or liability (to the extent BP and/or BP Affiliates have any responsibility, obligation, or liability) for any environmental contamination, including, but not limited to, petroleum contamination, on, under, and/or migrating from the Property, regardless of when the environmental contamination at issue was released and regardless of whether the environmental contamination resulted from the negligence of BP and/or BP Affiliates.

4. As of the Release Date, Atlantis hereby releases and discharges and covenants not to sue, BP and/or any BP Affiliates from any and all demands, claims, suits, liabilities, damages, costs, and expenses, including but not limited to reasonable attorneys' fees, (collectively, "**Environmental Claims**") arising in any way from or relating in any way to any environmental contamination, including, but not limited to, petroleum contamination, on, under, and/or migrating from the Property ("**Atlantis's Environmental Covenant Not to Sue**"). Atlantis's Environmental Covenant Not to Sue applies regardless of (a) whether Atlantis has knowledge of the environmental contamination when executing this Agreement and (b) when the environmental contamination at issue was released. Atlantis's Environmental Covenant Not to Sue expressly includes, but is not limited to, environmental contamination released prior to the execution of the PSA, including, but not limited to, environmental contamination resulting from the negligence of BP and/or BP Affiliates.

5. As of the Release Date, Atlantis hereby agrees to defend, indemnify and hold BP and BP Affiliates harmless from and against any and all Environmental Claims related in any way to or arising in any way from the presence of environmental contamination on, under, or migrating from the Property. This agreement to defend, indemnify and hold harmless applies regardless of (a) whether Atlantis has knowledge of the environmental contamination when executing this Agreement and (b) when the environmental contamination at issue was released.

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001

The agreement set forth in this Section 5 to defend, indemnify and hold BP and BP Affiliates harmless expressly includes, but is not limited to, environmental contamination released prior to the execution of the PSA, including environmental contamination resulting from the negligence of BP and/or BP Affiliates, and includes Environmental Claims alleging special, incidental, or consequential damages, diminished value, business interruption or other business losses, and bodily injury resulting from exposure to environmental contaminants. In the event that a third party makes a demand or claim or files suit (collectively, a "**Third-Party Claim**") against BP or BP Affiliates that is covered by Atlantis's duty to defend, indemnify and hold BP and BP Affiliates harmless, upon request, Atlantis shall keep BP fully apprised of the status of such Third-Party Claim and shall provide BP with all requested information with respect to such Third-Party Claim. BP and BP Affiliates shall have the right, but not the obligation, to participate, at BP's or BP Affiliates' cost and expense, in the defense of any Third-Party Claim brought against BP and/or BP Affiliates. Atlantis shall cooperate with and supply BP and BP Affiliates with such information and documents requested by BP and BP Affiliates to enable BP and BP Affiliates to participate in the defense of any Third-Party Claim and shall otherwise fully cooperate with BP and BP Affiliates in connection with any such joint defense of any Third-Party Claim in which BP and/or BP Affiliates elects to participate. Atlantis shall not enter into any settlement or other compromise with respect to any Third-Party Claim brought against BP and/or BP Affiliates without the prior written consent of BP and/or those of BP Affiliates named as defendants (which consent shall not be unreasonably withheld).

6. Atlantis acknowledges and agrees that Atlantis's obligations, responsibilities, and liabilities pursuant to this Agreement are personal to Atlantis. Atlantis shall not transfer or assign any of Atlantis's obligations, responsibilities, and/or liabilities pursuant to this Agreement to another person or entity without BP's prior written consent (which may be withheld in BP's sole and absolute discretion) including, without limitation, in connection with (a) any transfer of Atlantis's fee or leasehold interest (as the case may be) in the Property, and/or (b) any change in the controlling equity interest in Atlantis (by way of transfer or increase of stock, partnership or membership interests or otherwise). Any purported transfer or assignment of any of Atlantis's obligations, responsibilities, and/or liabilities pursuant to this Agreement without BP's prior written consent shall be null and void. BP and BP Affiliates, may, in their absolute and sole discretion, assign to a third party their respective rights and benefits pursuant to this Agreement.

7 This Agreement shall not be modified, altered, or amended without the prior written consent of both BP and Atlantis.

8. The provisions of this Agreement shall bind and inure to the benefit of BP and BP Affiliates and BP's and BP Affiliates' respective heirs, legal representatives, successors and assigns and shall bind and inure to the benefit of the Atlantis and its permitted successors and assigns.

9. If any clause or provision of this Agreement is held to be invalid or unenforceable by any court of competent jurisdiction as against any person or under any circumstances, the remainder of this Agreement and the applicability of any such clause or provision to other persons or circumstances shall not be affected thereby. All other clauses or provisions of this Agreement not found invalid or unenforceable shall be and remain valid and enforceable

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001 24/28

10. The provisions of this Agreement and all questions with respect to the construction and enforcement thereof and the rights and liabilities of the parties hereto shall be governed by, and construed and enforced in accordance with, the laws of the State of New York, without regard to such jurisdiction's conflicts of laws principles. BP and Atlantis hereby irrevocably submit to the jurisdiction of the courts of the State of New York and/or federal courts sitting in the State of New York in any action or proceeding arising out of or relating to this Agreement and hereby irrevocably agree that all claims in respect of such action or proceeding shall be heard and determined by such courts.

11. This Agreement may be executed in multiple counterparts all of which when taken together shall constitute one agreement.

12. The parties agree that this Agreement is the result of arms length and bargained for exchange negotiations between sophisticated entities, represented and advised by competent and experienced counsel. It has been and shall be construed to have been drafted by all parties to it, so that any rule of construing ambiguities against the drafter shall have no force or effect with respect to this Agreement.

13. Atlantis acknowledges that, pursuant to the PSA, Atlantis previously assumed certain environmental obligations and liabilities from BP, and agreed to defend, indemnify, and hold BP harmless from the same. The rights and benefits granted by Atlantis to BP pursuant to this Agreement are in addition to those previously granted to BP pursuant to the PSA.

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=2008102901206001

IN WITNESS WHEREOF, the undersigned, each of whom warrants that he or she is duly authorized to bind the party or parties on whose behalf he or she signs, causes this Agreement to be executed.

MEMORANDUM OF LEASE

REC. 213 PAGE 345

1. The name and address of the landlord is TWIN PROPERTIES, INC., a domestic corporation, having its principal office c/o Donald J. Fleishaker, 19 West 44th Street, New York, New York, 10036.

2. The name and address of the tenant is FORD LEASING DEVELOPMENT COMPANY, a Delaware corporation, authorized to do business in the State of New York, having its principal office c/o Americo Realty Department, The American Road, Dearborn, Michigan.

3. The Ground Lease(the Lease) was executed as of the 1st day of February, 1966.

4. The premises covered by the Lease are described as follows:

Parcel A

All that certain piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough and County of Bronx, City and State of New York, bounded and described as follows:

BEGINNING at a point on the easterly side of Grand Concourse (formerly Nott Avenue), distant 231.85 feet southerly from the corner formed by the intersection of the easterly side of Grand concourse with the southerly side of East 144th Street, being the southwesterly corner of Lot 49 on the Land Map; thence SOUTHERLY along the said easterly side of Grand Concourse, 50 feet to the northwesterly corner of Lot 45 on the Land Map; thence EASTERLY and at right angles to Grand Concourse, and along the northerly side of Lot 45 on the Land Map, 89 feet to a corner or angle at the southeasterly corner of Lot 47 on the Land Map; thence NORTHEASTERLY along the land now or late of Catherine E. Sinclair known as Parcel 22, 53 feet to a point on a line drawn from the point of beginning at right angles to the easterly side of Grand Concourse, 105 feet distant from the point of beginning, said point being the southeasterly corner of Lot 49 on the Land Map and the corner or angle at the northeasterly corner of Lot 47 on the Land Map; thence WESTERLY and at right angles to the easterly side of Grand Concourse, 105 feet to the point or place of beginning.

Parcel B (Railroad Parcel)

All that certain piece or parcel of land, together with the improvements thereon, situate in the Borough and County of the Bronx, City and State of New York, described as follows:

BEING an irregular shaped parcel of land having dimensions of two hundred seven and five tenths (207.5) feet, more or less, on the northwest, fifty (50) feet, more or less, on the northeast, one hundred ninety-five (195) feet, more or less, on the southeast and

https://a836-acris.nyc.gov/DS/DocumentSearch/DocumentImageView?doc_id=BK_6720021300345 1/4

forty-one (41) feet, more or less, on the southwest, containing nine thousand three hundred (9,300) square feet of land, more or less, located northwesterly of the tracks and roadbed of the Harlem Electric Division of the railroad of the Lessor and northeasterly of Grand Concourse.

5. The term of the Lease shall commence on the 1st day of February, 1966, and shall end on the 31st day of August, 1973.

6. The right of extension or renewal is as follows: Tenant has the option to extend the term of the Lease for a further period of eight years commencing on the 1st day of September, 1973 and ending August 31, 1981, by giving notice of exercise of such option to Landlord not less than 60 days prior to August 31, 1973.

IN WITNESS WHEREOF, the parties hereto have executed this Memorandum of Lease this 24 day of Mar, 1966.

REC. 242 PAGE 3

THIS INDENTURE, made the 25 day of July , nineteen hundred and sixty-seven

BETWEEN FRANK KLEIN, residing at 5700 N. W. 27th Avenue, Miami, Florida

party of the first part, and F. K. OWNERS, INC., a New York Corporation located, care of, SZOLD & SCHAPIRO, 342 Madison Avenue, New York 17, New York

party of the second part,

WITNESSETH, that the party of the first part, in consideration of One Dollar and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the distributees or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough and County of Bronx, City and State of New York bounded and described as follows:

BEGINNING at a point on the easterly side of Grand Concourse (formerly Mott Avenue) distant 231.85 feet southerly from the corner formed by the intersection of the easterly side of Grand Concourse with the southerly side of East 144th Street being the southwesterly corner of Lot 49 on the Land Map; thence Southerly along the said easterly side of Grand Concourse, 50 feet to the northwesterly corner of Lot 45 on the Land Map; thence Easterly and at right angles to Grand Concourse, and along the northerly side of Lot 45 on the Land Map, 89 feet to a corner or angle at the southeasterly corner of Lot 47 on the Land Map; thence northeasterly along the land now or late of Catherine E. Sinclair known as Parcel 22, 59 feet to a point on a line drawn from the point of beginning at right angles to the easterly side of Grand Concourse, 105 feet distant from the point of beginning, said point being the southeasterly corner of Lot 49 on the Land Map and the corner or angle at the northeasterly corner of Lot 47 on the Land Map; thence Westerly and at right angles to the easterly side of Grand Concourse, 105 feet to the point or place of BEGINNING.

Being the same premises conveyed to the party of the first part by deed recorded in Liber 2691 Page 124.

NO REVENUE STAMPS AFFIXED

TOGETHER with all right, title and interest, if any, of the party of the first part of, in and to any streets and roads abutting the above-described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the distributees or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the costs of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT—THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY.

REC. 242 PAGE 7

THIS MORTGAGE, made the 26th day of July , nineteen hundred and Sixty-seven

BETWEEN F. K. OWNERS, INC., a New York corporation having its office & principal place of business at c/o SZOLD & SCHAPIRO, 342 Madison Avenue, New York City

, the mortgagor,

and SUMMIT HOLDING CO., INC., a New York corporation having its office & principal place of business at 355 Major Deegan Blvd., Bronx, New York

, the mortgagee,

WITNESSETH, that to secure the payment of an indebtedness in the sum of FIFTEEN THOUSAND and no/100 - - - - - - - - - - - - - - - - - - - ($15,000.00) - - dollars, lawful money of the United States, to be paid as follows: $304.15 on the 26th day of August, 1967, and a like sum of $304.15 on the 26th day of each and every month thereafter. Out of the aforesaid monthly payments of $304.15 there shall be first applied a sum sufficient to pay interest at the rate of 8% per annum on the unpaid balance of principal, and the remaining amount not so applied shall be applied in reduction of principal, said payments to continue until the entire unpaid balance of principal is fully paid

with interest thereon to be computed from the date hereof, ~~at the rate of~~ ~~per cent~~ ~~per annum, and to be paid on the~~ ~~day of~~ ~~thereafter.~~

according to a certain bond,

note or obligation bearing even date herewith, the mortgagor hereby mortgages to the mortgagee

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough and County of Bronx, City and State of New York, bounded and described as follows:

BEGINNING at a point on the easterly side of Grand Concourse (formerly Mott Avenue), distant 231.85 feet southerly from the corner formed by the intersection of the easterly side of Grand Concourse with the southerly side of East 144th Street, being the southwesterly corner of Lot 49 on the Land Map; thence SOUTHERLY along the said easterly side of Grand Concourse, 50 feet to the northwesterly corner of Lot 45 on the Land Map; thence EASTERLY and at right angles to Grand Concourse, and along the northerly side of Lot 45 on the Land Map, 89 feet to a corner or angle at the southeasterly corner of Lot 47 on the Land Map; thence NORTHEASTERLY along the land now or late of Catherine E. Sinclair known as Parcel 22, 53 feet to a point on a line drawn from the point of beginning at right angles to the easterly side of Grand Concourse, 105 feet distant from the point of beginning, said point being the southeasterly corner of Lot 49 on the Land Map and the corner or angle at the northeasterly corner of Lot 47 on the Land Map; thence WESTERLY and at right angles to the easterly side of Grand Concourse, 105 feet to the point or place of Beginning.

TOGETHER with all right, title and interest of the mortgagor in and to the land lying in the streets and roads in front of and adjoining said premises;

TOGETHER with all fixtures, chattels and articles of personal property now or hereafter attached to or used in connection with said premises, including but not limited to furnaces, boilers, oil burners, radiators and piping, coal stokers, plumbing and bathroom fixtures, refrigeration, air conditioning and sprinkler systems, wash-tubs, sinks, gas and electric fixtures, stoves, ranges, awnings, screens, window shades, elevators, motors, dynamos, refrigerators, kitchen cabinets, incinerators, plants and shrubbery and all other equipment and machinery, appliances, fittings, and fixtures of every kind in or used in the operation of the buildings standing on said premises, together with any and all replacements thereof and additions thereto;

TOGETHER with all awards heretofore and hereafter made to the mortgagor for taking by eminent domain the whole or any part of said premises or any easement therein, including any awards for changes of grade of streets, which said awards are hereby assigned to the mortgagee, who is hereby authorized to collect and receive the proceeds of such awards and to give proper receipts and acquittances therefor, and to apply the same toward the payment of the mortgage debt, notwithstanding the fact that the amount owing thereon may not then be due and payable; and the said mortgagor hereby agrees, upon request, to make, execute and deliver any and all assignments and other instruments sufficient for the purpose of assigning said awards to the mortgagee, free, clear and discharged of any encumbrances of any kind or nature whatsoever.

AND the mortgagor covenants with the mortgagee as follows:

1. That the mortgagor will pay the indebtedness as hereinbefore provided.

2. That the mortgagor will keep the buildings on the premises insured against loss by fire for the benefit of the mortgagee; that he will assign and deliver the policies to the mortgagee; and that he will reimburse the mortgagee for any premiums paid for insurance made by the mortgagee on the mortgagor's default in so insuring the buildings or in so assigning and delivering the policies.

3. That no building on the premises shall be altered, removed or demolished without the consent of the mortgagee.

4. That the whole of said principal sum and interest shall become due at the option of the mortgagee: after default in the payment of any instalment of principal or of interest for fifteen days; or after default in the payment of any tax, water rate, sewer rent or assessment for thirty days ~~after notice and demand~~; or after default after notice and demand either in assigning and delivering the policies insuring the buildings against loss by fire or in reimbursing the mortgagee for premiums paid on such insurance, as hereinbefore provided; or after default upon request in furnishing a statement of the amount due on the mortgage and whether any offsets or defenses exist against the mortgage debt, as hereinafter provided. An assessment which has been made payable in instalments at the application of the mortgagor or lessee of the premises shall nevertheless, for the purpose of this paragraph, be deemed due and payable in its entirety on the day the first instalment becomes due or payable or a lien.

5. That the holder of this mortgage, in any action to foreclose it, shall be entitled to the appointment of a receiver.

6. That the mortgagor will pay all taxes, assessments, sewer rents or water rates, and in default thereof, the mortgagee may pay the same.

7. That the mortgagor within five days upon request in person or within ten days upon request by mail will furnish a written statement duly acknowledged of the amount due on this mortgage and whether any offsets or defenses exist against the mortgage debt.

8. That notice and demand or request may be in writing and may be served in person or by mail.

9. That the mortgagor warrants the title to the premises.

10. That the fire insurance policies required by paragraph No. 2 above shall contain the usual extended coverage endorsement; that in addition thereto the mortgagor, within thirty days after notice and demand, will keep the premises insured against war risk and any other hazard that may reasonably be required by the mortgagee. All of the provisions of paragraphs No. 2 and No. 4 above relating to fire insurance and the provisions of Section 254 of the Real Property Law construing the same shall apply to the additional insurance required by this paragraph.

11. That in case of a foreclosure sale, said premises, or so much thereof as may be affected by this mortgage, may be sold in one parcel.

12. That if any action or proceeding be commenced (except an action to foreclose this mortgage or to collect the debt secured thereby), to which action or proceeding the mortgagee is made a party, or in which it becomes necessary to defend or uphold the lien of this mortgage, all sums paid by the mortgagee for the expense of any litigation to prosecute or defend the rights and lien created by this mortgage (including reasonable counsel fees), shall be paid by the mortgagor, together with interest thereon at the rate of six per cent. per annum, and any such sum and the interest thereon shall be a lien on said premises, prior to any right, or title to, interest in or claim upon said premises attaching or accruing subsequent to the lien of this mortgage, and shall be deemed to be secured by this mortgage. In any action or proceeding to foreclose this mortgage, or to recover or collect the debt secured thereby, the provisions of law respecting the recovering of costs, disbursements and allowances shall prevail unaffected by this covenant.

13. That the mortgagor hereby assigns to the mortgagee the rents, issues and profits of the premises as further security for the payment of said indebtedness, and the mortgagor grants to the mortgagee the right to enter upon and to take possession of the premises for the purpose of collecting the same and to let the premises or any part thereof, and to apply the rents, issues and profits, after payment of all necessary charges and expenses, on account of said indebtedness. This assignment and grant shall continue in effect until this mortgage is paid. The mortgagee hereby waives the right to enter upon and to take possession of said premises for the purpose of collecting said rents, issues and profits, and the mortgagor shall be entitled to collect and receive said rents, issues and profits until default under any of the covenants, conditions or agreements contained in this mortgage, and agrees to use such rents, issues and profits in payment of principal and interest becoming due on this mortgage and in payment of taxes, assessments, sewer rents, water rates and carrying charges becoming due against said premises, but such right of the mortgagor may be revoked by the mortgagee upon any default, on five days' written notice. The mortgagor will not, without the written consent of the mortgagee, receive or collect rent from any tenant of said premises or any part thereof for a period of more than one month in advance, and in the event of any default under this mortgage will pay monthly in advance to the mortgagee, or to any receiver appointed to collect said rents, issues and profits, the fair and reasonable rental value for the use and occupation of said premises or of such part thereof as may be in the possession of the mortgagor, and upon default in any such payment will vacate and surrender the possession of said premises to the mortgagee or to such receiver, and in default thereof may be evicted by summary proceedings.

14. That the whole of said principal sum and the interest shall become due at the option of the mortgagee: (a) after failure to exhibit to the mortgagee, within ten days after demand, receipts showing payment of all taxes, water rates, sewer rents and assessments; or (b) after the actual or threatened alteration, demolition or removal of any building on the premises without the written consent of the mortgagee; or (c) after the assignment of the rents of the premises or any part thereof without the written consent of the mortgagee; or (d) if the buildings on said premises are not maintained in reasonably good repair; or (e) after failure to comply with any requirement or order or notice of violation of law or ordinance issued by any governmental department claiming jurisdiction over the premises within three months from the issuance thereof; or (f) if on application of the mortgagee two or more fire insurance companies lawfully doing business in the State of New York refuse to issue policies insuring the buildings on the premises; or (g) in the event of the removal, demolition or destruction in whole or in part of any of the fixtures, chattels or articles of personal property covered hereby, unless the same are promptly replaced by similar fixtures, chattels and articles of personal property at least equal in quality and condition to those replaced, free from chattel mortgages or other encumbrances thereon and free from any reservation of title thereto; or (h) after thirty days' notice to the mortgagor, in the event of the passage of any law deducting from the value of land for the purposes of taxation any lien thereon, or changing in any way the taxation of mortgages or debts secured thereby for state or local purposes; or (i) if the mortgagor fails to keep, observe and perform any of the other covenants, conditions or agreements contained in this mortgage.

15. That the mortgagor will, in compliance with Section 13 of the Lien Law, receive the advances secured hereby and will hold the right to receive such advances as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

Strike out this clause if inapplicable.

16. That the execution of this mortgage has been duly authorized by the board of directors of the mortgagor.

17. That in the event the whole or any part of the premises be taken as a result of the exercise of the power of eminent domain prior to payment of the indebtedness secured hereby, the mortgagor shall pay to the mortgagee during the period from the date of such taking to the date of payment of said indebtedness, the difference, if any, between the interest payable thereon at the rate stipulated in the note or other obligation secured hereby and the interest actually paid to the mortgagee by the party exercising the power of eminent domain.

This mortgage may not be changed or terminated orally. The covenants contained in this mortgage shall run with the land and bind the mortgagor, the heirs, personal representatives, successors and assigns of the mortgagor and all subsequent owners, encumbrancers, tenants and subtenants of the premises, and shall enure to the benefit of the mortgagee, the personal representatives, successors and assigns of the mortgagee and all subsequent holders of this mortgage. The word "mortgagor" shall be construed as if it read "mortgagors" and the word "mortgagee" shall be construed as if it read "mortgagees" whenever the sense of this mortgage so requires.

IN WITNESS WHEREOF, this mortgage has been duly executed by the mortgagor.

BEGINNING at a point on the easterly side of Grand Concourse (formerly Mott Avenue) distant 231.85 feet southerly from the corner formed by the intersection of the easterly side of Grand Concourse with the southerly side of East 144th Street being the southwesterly corner of Lot 49 on the Land Map; thence southerly along the said easterly side of Grand Concourse, 50 feet to the northwesterly corner of Lot 45 on the Land Map; thence easterly and at right angles to Grand Concourse and along the northerly side of Lot 45 on the Land Map, 89 feet to a corner or angle at the southeasterly corner of Lot 47 on the Land Map; thence northeasterly along the land now or late of Catherine E. Sinclair known as Parcel 22, 52.30 feet to a point on a line drawn from the point of beginning at right angles to the easterly side of Grand Concourse, 105 feet distant from the point of beginning, said point being the southeasterly corner of Lot 49 on the Land Map and the corner or angle at the northeasterly corner of Lot 47 on the Land Map; thence westerly and at right angles to the easterly side of Grand Concourse, 105 feet to the point or place of BEGINNING.

Said premises being known as and by street number 358 Grand Concourse.

This is a correction deed given to correct the dimension in the third course of the deed from Frank Klein to F.K. Owners Inc. dated 7/25/67 and recorded 7/31/67 in Record Liber 242 P. 3 so as to read,"52.30feet more or less" instead of "59 feet."

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof,

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises,

TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been incumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

THIS INDENTURE, made the 30th day of November, nineteen hundred and seventy six

BETWEEN F.K. Owners, Inc., a domestic corporation having its principal office c/o Sgold, Schapiro & Coster, 300 Madison Avenue, New York, New York,

party of the first part, and

FRANK KLEIN, residing at 1400 Lincoln Road, Miami Beach, Florida,

party of the second part.

WITNESSETH, that the party of the first part, in consideration of

Ten and no/100 ($10.00)---------- dollars,

lawful money of the United States, paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough and County of Bronx, City and State of New York, bounded and described as follows:

BEGINNING at a point on the easterly side of Grand Concourse (formerly Mott Avenue) distant 231.85 feet southerly from the corner formed by the intersection of the easterly side of Grand Concourse with the southerly side of East 144th Street being the southwesterly corner of Lot 49 on the Land Map; thence southerly along the said easterly side of Grand Concourse, 50 feet to the northwesterly corner of Lot 45 on the Land Map; thence easterly and at right angles to Grand Concourse and along the northerly side of Lot 45 on the Land Map, 89 feet to a corner or angle at the southeasterly corner of Lot 47 on the Land Map; thence northeasterly along the land now or late of Catherine E. Sinclair known as Parcel 22,52.50 feet to a point on a line drawn from the point of beginning at right angles to the easterly side of Grand Concourse, 105 feet distant from the point of beginning, said point being the southeasterly corner of Lot 49 on the Land Map and the corner or angle at the northeasterly corner of Lot 47 on the Land Map; thence westerly and at right angles to the easterly side of Grand Concourse, 105 feet to the point or place of BEGINNING.

Said premises being known as and by street number 358 Grand Concourse.

This is a correction deed given to correct the dimension in the third course of the deed from F.K. Owners Inc. dated 7/26/67 and recorded 8/2/67 in Record Liber 243 P. 239 so as to read, "52.50 feet more or less" instead of "59 feet."

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof,

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises,

TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been incumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

MEMORANDUM OF LEASE
26-528-G

THIS MEMORANDUM OF LEASE, made this 5th day of September, 2001, by and between 131 Realty Corp., whose address is 214 Beach 131st Street, Belle Harbor, NY 11694, Lessor, and the Amoco Oil Company, a Maryland corporation, with its principal business office at 1 West Pennsylvania Avenue, Suite 900, Towson, Maryland, 21204, Lessee,

WITNESSETH:

By Lease of even date herewith Lessor has demised and leased to Lessee, the following described premises situated in the City of New York, County of Bronx, State of New York, more particularly described as set forth in Exhibit "A" annexed hereto and made a part hereof.

Together with all buildings, improvements, equipment, fixtures, appliances, and other facilities of every nature (except any and all underground storage tanks, pipes and lines, and stored materials) owned or controlled by Lessor and located or to be erected or installed by Lessor thereon; and all rights, alleys, rights-of-way, easements, appurtenances thereunto belonging or in anywise appertaining; and all rights of Lessor in and to any public or private thoroughfares abutting the above-described premises, all being hereinafter referred to as the "Demised Premises".

To Have And To Hold unto Lessee for a term commencing on the 13th day of June, 2001, and ending on the fifteenth anniversary of the Rent Commencement Date and further subject to one (1) five (5) year option on Lessee's part to Extend.

THE RENTAL FOR THE DEMISED PREMISES, CERTAIN EXTENSION AND CANCELLATION PRIVILEGES, AND ALL OTHER COVENANTS, CONDITIONS AND TERMS ARE SET FORTH IN THAT CERTAIN GROUND LEASE BETWEEN LESSOR AND LESSEE OF EVEN DATE HEREWITH, AND ARE HEREBY ADOPTED HEREIN AND MADE A PART HEREOF BY REFERENCE TO THE SAME FULL EXTENT AS IF ALL THE COVENANTS, CONDITIONS AND TERMS THEREOF WERE FULLY SET FORTH HEREIN.

275608.1

25x10

IN WITNESS WHEREOF, the parties hereto have duly signed this Memorandum of Lease on the day and year first above written.

EXHIBIT "A" REEL 925 PG 1779

SCHEDULE A

PARCEL I (OLD LOT 47):

ALL that certain plot, piece or parcel of land, situate, lying and being in the Borough and County of Bronx, City an State of New York, bounded and described as follows:

BEGINNING at a point on the easterly side of Grand Concourse (formerly Mott Avenue) distant 231.85 feet southerly from the corner formed by the intersection of the easterly side of Grand Concourse with the southerly side of East 144th Street, being the southwesterly corner of Lot 49 on the Land Map;

THENCE southerly along the said easterly side of Grand Concourse, 50 feet to the northwesterly corner of Lot 45 o the Land Map;

THENCE easterly and at right angles to Grand Concourse and along the northerly side of Lot 45 on the Land Map, 89 feet to a corner or angle at the southeasterly corner of Lot 47 on the Land Map;

THENCE northeasterly along the land now or late of Catherine B. Sinclair known as Parcel 22, 52.50 feet to a point on a line drawn from the point of beginning at right angles to the easterly side of Grand Concourse, 105 feet distant from the point of beginning, said point being the southeasterly corner of Lot 49 n the Land Map and the corner or angles at the northeasterly corner of Lot 47 on the Land Map;

THENCE westerly and at right angles to the easterly side of Grand Concourse, 105 feet to the point or place of BEGINNING.

PARCEL 3 (OLD LOT 49):

ALL that certain plot, piece or parcel of land, situate, lying and being in the Borough and County of Bronx, City and State of New York, bounded and described as follows:

BEGINNING at a point on the easterly side of Grand Concourse, formerly Mott Avenue distant 119.90 feet southerly from the corner formed by the intersection of the southerly side of East 144th Sreet and the easterly side of Grand Concourse;

RUNNING THENCE easterly at right angles to Grand Concourse and part of the distance through a party wall, 100 feet to a point;

RUNNING THENCE southerly and parallel with Grand Concourse 111.95 feet to a point;

RUNNING THENCE westerly at right angles to Grand Concourse 100 feet to the said easterly side of Grand Concourse, and

THENCE northerly along the easterly side of Grand Concourse, 111.95 feet to the point or place of BEGINNING.

For conveyancing only, if intended to be conveyed.

Together with all right, title and interest of, in and to any streets and roads abutting the above described premises, to the center line thereof.

USER QUESTIONNAIRE

Environmental Site Assessment – Site Questionnaire
350-370 Grand Concourse, Bronx, NY

Please answer all questions to the best of your knowledge to support the findings of the Phase I Environmental Site Assessment (ESA) for the 350-370 Grand Concourse site (the Property). Please call with any questions or comments.

AKRF Contact:
Office phone:
Cell phone:

Person completing questionnaire: Eileen Glass

Relationship to the Property: Developer

Length of time associated with the Property: 1.5 months

1. Please provide:

   - The reason why the Phase I ESA is being performed. diligence for acquisition

   - The type of property and type of property transaction (for example, sale, purchase, exchange, refinancing, etc.). commercial property (gasoline filling station) - purchase

   - The complete and correct address for the Property (a map or other documentation showing the Property location and boundaries is helpful).
     350 Grand Concourse, Bronx, New York 10451, Block 2341, Lot 42

2. Please provide information regarding the history of the Property, including past uses, deeds, sale/purchase prices, etc.
   Site is former gasoline filling station and convenience store.

3. If the property is undergoing a transaction, does the purchase price being paid for the Property reasonably reflect the fair market value of the Property? Unknown.

   ☐ Yes ☐ No ☐ N/A

   If you conclude that there is a difference, are you aware of whether the lower purchase price is because of an environmental issue or contamination that is known or believed to be present at the Property?

4. Are you aware of any former studies that have been conducted at the Property, including: geotechnical surveys, environmental site assessment reports, spill investigations/remediation reports, asbestos or

lead abatement, former or current environmental permits, licenses, audits, investigations, community right-to-know plans, safety plans, preparedness and prevention plans, spill prevention plans, countermeasure or control plans, or other documentation or correspondence concerning the Property. If yes, please provide copies.

☐ Yes ☐ No

5. Are you aware of any environmental liens or activity use limitations (such as engineering controls, land use restrictions, or institutional controls) that are in place at the Property and/or have been filed or recorded against the Property under federal, tribal, state, or local law?

☐ Yes ☒ No

6. Based on your knowledge and experience related to the Property, are there any other obvious indicators that point to the presence or likely presence of releases or contamination at the Property? Please provide any commonly known or reasonably ascertainable information about the Property that would help the environmental professional identify conditions indicative of contamination, releases, or threatened releases. For example:

   - Are you aware of any spills or other chemical releases that have taken place at the Property?

   ☒ Yes ☐ No DEC Spill Nos. 0111974, 9814075

   - Are you aware of any cleanups that have taken place at the Property?

   ☐ Yes ☐ No Unknown.

   - Are you aware of any specific chemicals or petroleum products that are currently present or once were present at the Property?

   ☐ Yes ☐ No Unknown.

   - Are you aware of any former or current chemical or fuel oil storage, including storage tanks, chemical/pesticide/herbicide use, etc., at the Property?

   ☒ Yes ☐ No Site is former gasoline filling station.

   - Are you aware of the presence of any historic fill, construction and demolition debris, ash, dredge spoils, etc.?

   ☐ Yes ☐ No Unknown.

7. Please provide any information you have on former and/or current buildings, utilities, and operations, including past and present:

- Water: No information.
- Electric:
- Gas/fuel oil:
- Heating and cooling systems:
- Sewer or septic/cesspool:
- Trash collection:
- Hazardous materials storage or use (paint, solvent, pesticides, herbicides):
- Construction/demolition date(s):
- Surveyed drawings, blueprints, subsurface studies, renovation/addition details, etc.:

8. Please advise whether you are aware of the following:

   - Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Property

   ☐ Yes ☒ No

   - Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Property

   ☐ Yes ☒ No

   - Any notices from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous materials at the Property.

   ☐ Yes ☒ No

9. Do you have any specialized knowledge or experience related to the Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☒ No

10. Please provide:

- The identification of all parties who will rely on the Phase I ESA report. TBD

- The identification of the Property contact and how the contact can be reached for the inspection.
  Eileen Glass, email eglass@bolivar.nyc
- Any special terms and conditions that must be agreed upon by the environmental professional.

Spill Closure Presentation

BP 17782

350 Grand Concourse

Bronx, NY

NYSDEC Spill # 01-11974

Site Use and History

- Was originally 2 adjoining gas stations: Merit to the north and Amoco to the south
- Both stations and property redeveloped into a single BP station in 2002
- Spill number 0111974 issued when impacts encountered during tank removal in 2002

Tank Removal – 1999

- Five 4,000-gallon underground gasoline storage tanks and one 550-gallon waste oil tank (reportedly installed in 1977), and associated piping and pump islands were removed from the former Merit station.

Tank Removal – 2002

- Five 4,000-gallon steel gasoline USTs and associated piping and pump islands were removed as part of closure of the Amoco station. MTBE detected above TAGM soil cleanup standards if four of ten post excavation samples (*Underground Storage Tank Excavation Assessment Report, Delta Environmental, 2002* - data not available).

Site Investigations (at former Amoco Station)

- 2002: Geoprobe assessment including advancement of six soil borings (results presented in **Attachment 1**).
- 2003: Monitoring well installation (MW-1, MW-2 and MW-3) and soil sampling (results presented in **Attachment 1**).
- **2010: ARCADIS assumes role of project consultant.**
- 2010: Advancement/installation of MW-4 and MW-5. MW-6 was attempted but the boring was dry at refusal. Several NYSDEC STARS VOC compounds exceeded soil cleanup criteria at MW-4 (results presented in **Attachment 2**).
- 2010: Advancement/installation of MW-6A. Six NYSDEC STARS VOC compounds exceeded soil cleanup criteria (results presented in **Attachment 3**).

Redevelopment and Remediation History

- 1999: 411 tons of soil excavated and removed from the former Merit station.
- 2002: Site is redeveloped into a single BP station. 1,360 tons of soil excavated and removed (manifests provided in **Attachment 4**).
- **2010: ARCADIS assumes role of project consultant.**
- 2011: Four injection wells installed. Hi-vacuum extraction event at IW-04.
- 2012: 23,858 gallons of calcium nitrate solution is injected into IW-04.

Trends/Conclusions

- Mann-Kendall analyses show decreasing VOC concentration trends in all monitoring wells (**Attachment 5**).
- LNAPL last detected in December 2013 (0.01-feet thickness) at IW-01.
- Dissolved VOC concentrations have fallen by an order of magnitude (13-14 ppm to 1 ppm) at the two most impacted wells (MW-4 and MW-6A) since 2010 (**Attachment 6**).
- Available soil data shows limited exceedances of soil cleanup criteria.
- Most recent groundwater data shows benzene exceeding groundwater standards at only one well (MW-1 at 10 ug/L).

Abbreviations:

BTEX = benzene, toluene, ethylbenzene, xylenes
DWN = downward trend
FOD = frequency of detection (# detects / # samples)
Mean = arithmetic mean
MTBE = methyl tertiary butyl ether
NST = no significant trend
SD = standard deviation

Notes:

1 All results are in micrograms per liter (µg/L). Values less than 10 are reported to 2 significant figures. Values greater than 10 are reported to 3 significant figures.

2. Trend results are presented when at least four samples and one detected value are available.

3 Nondetects were assigned a common value less than the minimum detected value (95% of the minimum detected value) (USEPA 2009).

Notes:

1. Samples were collected by EnviroTrac through December 2014 and by Clean Globe Environmental beginning in March 2015.
2. Laboratory analysis was conducted by Lancaster Laboratories located in Lancaster, Pennsylvania.
3. Concentrations reported in micrograms per liter (ug/L) or parts per billion (ppb).
4. U = The compound was analyzed for but not detected. The associated value is the compound quantitation limit.
5. J = Indicates an estimated concentration.
6. ND = Not detected.
7. Bold values indicate that the constituent was detected at a concentration greater than NYSDEC Technical and Operational Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values (NYSDEC 1998).
8. NA = Not Analyzed.
9. NM = Not Measured.
10. NP = No Product.
11. LNAPL = Light non-aqueous phase liquid.
12. BTEX = Benzene, Toluene, Ethylbenzene and Xylene.
13. MTBE = Methyl tert-butyl ether.
14. Elevations reference an arbitrary onsite benchmark.
15. NSVD = Not surveyed to vertical datum.

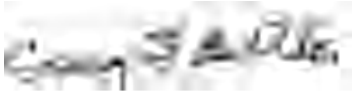
Subject: **Groundwater Monitoring Report Fourth Quarter 2019 and First Quarter 2020**
NYSDEC Spill #01-11974
BP Station #17782
350 Grand Concourse, Bronx, New York

Dear Ms. Feng:

Parsons has prepared the enclosed Groundwater Monitoring Report on behalf of Remediation Management Services Company (RMSC), a BP-affiliated company. The report details groundwater monitoring results from the above-referenced work site. Groundwater samples were collected on December 23, 2019 and on February 14, 2020. The site is on a quarterly monitoring schedule and the next sampling event is tentatively scheduled for June 2020.

If you have any questions or require additional information, please contact the BP project manager (John Frankenthal) at (312) 809-4117 or myself at (315) 552-9680.

Sincerely,



Craig F. Butler, P.E.
Project Manager

BP STATION #17782
GROUNDWATER MONITORING REPORT
(Fourth Quarter 2019 and First Quarter 2020)

Prepared For:	**Remediation Management Services Company**
Prepared By:	**Parsons**
Report Date:	**4/29/2020**

GROUNDWATER GAUGING AND SAMPLING METHODS

On December 23, 2019 and February 14, 2020, depth to water measurements and groundwater samples were collected by Arcadis personnel from four wells (IW-1, IW-2, MW-4, and MW-6A). Monitoring well MW-4 was not accessible during the December event; therefore, it was not gauged or sampled. Monitoring well MW-2 was not accessible during both events; therefore, it was not gauged or sampled. The monitoring wells were gauged for depth to groundwater and for the presence/absence of light non-aqueous phase liquid (LNAPL). The depth to groundwater and presence/absence of LNAPL (if any) were gauged using an oil/water interface probe capable of measuring to the nearest 0.01 foot. The groundwater level measurements were converted to groundwater elevations using top of monitoring well casing elevations. Top of casing elevations were referenced to an arbitrary, on-site datum. No LNAPL was observed in any well during the two monitoring events.

Prior to sampling, the volume of water contained within each monitoring well was calculated using the well diameter and water column height. Whenever possible, a volume of groundwater equivalent to at least three well volumes was purged from each monitoring well using a disposable bailer and/or a mechanical pump with dedicated polyethylene tubing. Groundwater samples were collected using clean, previously unused disposable bailers. The samples were poured from the bailers into laboratory-supplied bottles. The samples were then placed into a cooler, on ice, and transported under chain-of-custody procedures to Eurofins Lancaster Laboratories Environmental of Lancaster, Pennsylvania. Eurofins is a New York State Department of Health-certified laboratory (Certification #10670). The groundwater samples were analyzed for benzene, toluene, ethylbenzene, xylenes (BTEX) and methyl tertiary-butyl ether (MTBE) in accordance with United States Environmental Protection Agency (USEPA) Method 8260C.

GROUNDWATER GAUGING AND SAMPLING RESULTS

Data collected during well gauging activities are summarized in Table 1 and sampling locations are illustrated on Figure 2. Groundwater sampling analytical results for the last four sampling events are depicted on Figure 3. Hydrographs depicting historical groundwater elevation trends for representative monitoring wells are included in Figure 4. The laboratory analytical reports are provided as Appendix A. Historical groundwater analytical data are also provided in Table 1 for reference.

CONCLUSIONS AND RECOMMENDATIONS

Concentrations of BTEX in excess of applicable TOGS WQS (Technical & Operational Guidance Series 1.1.1, Ambient Water Quality Standards and Guidance Values) were detected in each of the four groundwater samples collected during the December 2019 and February 2020 sampling events. BP plans to continue groundwater monitoring at the subject site.

Gauging Notes:
TOC - Top of Casing
LNAPL - Light non-aqueous phase liquid
NP - LNAPL not present
NM - Not measured
* - Corrected for LNAPL if present (assumes LNAPL specific gravity - 0.75)

Analytical Notes:
NYSDEC - New York State Department of Environmental Conservation
TOGS WQS - Technical & Operational Guidance Series 1.1.1, Ambient W
Quality Standards and Guidance Values
Results in bold exceed applicable NYSDEC TOGS WQS
TOTAL BTEX - Sum of benzene, toluene, ethylbenzene and xylenes concentrations
MTBE - Methyl tertiary-butyl ether
ug/L - Micrograms per liter
ND - Not detected
< - Not detected at or above indicated laboratory reporting limit
J - Estimated concentration below the instrument reporting limit

SAMPLE INFORMATION

Client Sample Description	Sample Collection Date/Time	ELLE#
IW-2 Grab Groundwater	12/23/2019 13:35	1231448
IW-01 Grab Groundwater	12/23/2019 12:47	1231449
MW-6A Grab Groundwater	12/23/2019 13:24	1231450
TB-191223 Water	12/23/2019	1231451
FB-191223 Grab Water	12/23/2019 14:00	1231452

The specific methodologies used in obtaining the enclosed analytical results are indicated on the Laboratory Sample Analysis Record.

2425 New Holland Pike, Lancaster, PA 17601 • 717-656-2300 • Fax: 717-656-6766 • www.EurofinsUS.com/LancLabsEnv

Project Name: BP 17782
ELLE Group #: 2081049

General Comments:

See the Laboratory Sample Analysis Record section of the Analysis Report for the method references.

All QC met criteria unless otherwise noted in an Analysis Specific Comment below.

Refer to the QC Summary for specific values and acceptance criteria.

Project specific QC samples are not included in this data set.

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Surrogate recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in an Analysis Specific Comment below.

The samples were received at the appropriate temperature and in accordance with the chain of custody unless otherwise noted.

Analysis Specific Comments:

No additional comments are necessary.

Quality Control Summary

Client Name: ARCADIS (NY) Group Number: 2081049
Reported: 01/06/2020 11:56

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

Method Blank

Analysis Name	Result	LOQ**	MDL
	ug/l	ug/l	ug/l

Explanation of Symbols and Abbreviations

The following defines common symbols and abbreviations used in reporting technical data:

BMQL	Below Minimum Quantitation Level	**mL**	milliliter(s)
C	degrees Celsius	**MPN**	Most Probable Number
cfu	colony forming units	**N.D.**	non-detect
CP Units	cobalt-chloroplatinate units	**ng**	nanogram(s)
F	degrees Fahrenheit	**NTU**	nephelometric turbidity units
g	gram(s)	**pg/L**	picogram/liter
IU	International Units	**RL**	Reporting Limit
kg	kilogram(s)	**TNTC**	Too Numerous To Count
L	liter(s)	**µg**	microgram(s)
lb.	pound(s)	**µL**	microliter(s)
m3	cubic meter(s)	**umhos/cm**	micromhos/cm
meq	milliequivalents	**MCL**	Maximum Contamination Limit
mg	milligram(s)		

<	less than
>	greater than
ppm	parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.
ppb	parts per billion
Dry weight basis	Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as “analyze immediately” are not performed within 15 minutes.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Data Qualifiers

Qualifier	Definition
C	Result confirmed by reanalysis
D1	Indicates for dual column analyses that the result is reported from column 1
D2	Indicates for dual column analyses that the result is reported from column 2
E	Concentration exceeds the calibration range
K1	Initial Calibration Blank is above the QC limit and the sample result is ND
K2	Continuing Calibration Blank is above the QC limit and the sample result is ND
K3	Initial Calibration Verification is above the QC limit and the sample result is ND
K4	Continuing Calibration Verification is above the QC limit and the sample result is ND
J (or G, I, X)	Estimated value >= the Method Detection Limit (MDL or DL) and < the Limit of Quantitation (LOQ or RL)
P	Concentration difference between the primary and confirmation column >40%. The lower result is reported.
P^	Concentration difference between the primary and confirmation column > 40%. The higher result is reported.
U	Analyte was not detected at the value indicated
V	Concentration difference between the primary and confirmation column >100%. The reporting limit is raised due to this disparity and evident interference.
W	The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L.
Z	Laboratory Defined - see analysis report

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods.
Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

General Comments:

See the Laboratory Sample Analysis Record section of the Analysis Report for the method references.

All QC met criteria unless otherwise noted in an Analysis Specific Comment below.

Refer to the QC Summary for specific values and acceptance criteria.

Project specific QC samples are not included in this data set.

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Surrogate recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in an Analysis Specific Comment below.

The samples were received at the appropriate temperature and in accordance with the chain of custody unless otherwise noted.

Analysis Specific Comments:

No additional comments are necessary.

Explanation of Symbols and Abbreviations

The following defines common symbols and abbreviations used in reporting technical data:

BMQL	Below Minimum Quantitation Level	**mL**	milliliter(s)
C	degrees Celsius	**MPN**	Most Probable Number
cfu	colony forming units	**N.D.**	non-detect
CP Units	cobalt-chloroplatinate units	**ng**	nanogram(s)
F	degrees Fahrenheit	**NTU**	nephelometric turbidity units
g	gram(s)	**pg/L**	picogram/liter
IU	International Units	**RL**	Reporting Limit
kg	kilogram(s)	**TNTC**	Too Numerous To Count
L	liter(s)	**µg**	microgram(s)
lb.	pound(s)	**µL**	microliter(s)
m3	cubic meter(s)	**umhos/cm**	micromhos/cm
meq	milliequivalents	**MCL**	Maximum Contamination Limit
mg	milligram(s)		

<	less than
>	greater than
ppm	parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.
ppb	parts per billion
Dry weight basis	Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as “analyze immediately” are not performed within 15 minutes.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Data Qualifiers

Qualifier	Definition
C	Result confirmed by reanalysis
D1	Indicates for dual column analyses that the result is reported from column 1
D2	Indicates for dual column analyses that the result is reported from column 2
E	Concentration exceeds the calibration range
K1	Initial Calibration Blank is above the QC limit and the sample result is ND
K2	Continuing Calibration Blank is above the QC limit and the sample result is ND
K3	Initial Calibration Verification is above the QC limit and the sample result is ND
K4	Continuing Calibration Verification is above the QC limit and the sample result is ND
J (or G, I, X)	Estimated value >= the Method Detection Limit (MDL or DL) and < the Limit of Quantitation (LOQ or RL)
P	Concentration difference between the primary and confirmation column >40%. The lower result is reported.
P^	Concentration difference between the primary and confirmation column > 40%. The higher result is reported.
U	Analyte was not detected at the value indicated
V	Concentration difference between the primary and confirmation column >100%. The reporting limit is raised due to this disparity and evident interference.
W	The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L.
Z	Laboratory Defined - see analysis report

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods.
Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

Dear Ms. Feng:

On behalf of BP Products North America, Inc. (BP), Arcadis of New York, Inc. (Arcadis) is submitting this Groundwater Analytical Summary for the first, second, and third quarters of 2019 at the BP service station located at 350 Grand Concourse in Bronx, New York (**Figure 1**). Field activities were performed on March 01, June 13, and September 30, 2019 and included groundwater gauging and sampling. The site background is described below, followed by a summary of the methodology and findings.

SITE BACKGROUND

The current BP station, constructed in 2002, was formerly two separate gasoline stations located on adjoining properties: A Merit station to the north and an Amoco station to the south. Available records indicate that subsurface petroleum impacts were encountered during tank removal in 2002 and that New York State Department of Environmental Conservation (NYSDEC) Spill Number 01-11974 was issued. The records further indicate that 1,360 tons of petroleum-impacted soils were removed from the site during a station upgrade in 2002. Two subsurface investigations (performed by others) were subsequently conducted in 2002 and 2003. The investigations consisted of the advancement of temporary borings and the installation of three permanent groundwater monitoring wells.

Arcadis began work on this site for BP in 2009. In July 2010, two additional monitoring wells (MW-4 and MW-5) were installed along the western side of the site. A third monitoring well (MW-6) was to be installed along the eastern side of the site; however, a field decision was made not to install a well when groundwater was not encountered in the boring. Currently, environmental monitoring and remediation activities taking place on the northern portion of the site are managed by another consultant hired by Amerada Hess (under Spill Number 98-14074). In October 2010, a sixth monitoring well (MW-6A) was installed at the site near the sidewalk along Grand Concourse to further delineate the extent of petroleum impacts along the west side of the site.

In May 2011, four remedial injection wells (IW-01, IW-02, IW-04, and IW-05), shown on **Figure 2**, were installed to distribute an oxidation enhancing solution throughout the areas of suspected impacts. A fifth injection well (IW-03) was to be installed between injection wells IW-02 and IW-04; however, the borehole could not be advanced to an appropriate depth due to shallow refusal encountered during four installation attempts.

During the third quarter of 2012 (August 14 through August 24), approximately 23,858 gallons of calcium nitrate solution were injected into injection well IW-04.

SPILL CLOSURE AND RE-OPENING

On September 16, 2016, the NYSDEC issued a letter closing Spill Number 01-11974. On October 6, 2016, wells MW-1, MW-3, MW-5, IW-04, and IW-05 were decommissioned in accordance with NYSDEC Commissioners Policy (CP)-43: *Groundwater Monitoring Well Decommissioning Policy*. A tremie pipe was used to inject cement-bentonite grout into the wells from the bottom up. The top 2 to 3 feet of the riser pipe was then broken off below grade, and the well curb-box was removed and patched with concrete. During decommissioning activities, 0.62 feet of light non-aqueous phase liquid (LNAPL) was observed in injection well IW-01, and the remaining wells (IW-01, IW-02, MW-2, MW-4, and MW-6A) were left intact. In response to the observance of LNAPL, a vacuum truck extraction (VTE) event was conducted at injection well IW-01 on November 16, 2016, during which 45 gallons of petroleum-impacted water was removed and properly disposed. Remaining wells, including injection well IW-01, were gauged on November 29, 2016, and no LNAPL was observed.

The NYSDEC was subsequently notified of the LNAPL observation, and on December 7, 2016, issued a letter re-opening Spill Number 01-11974. The NYSDEC required that injection well IW-01 be gauged and sampled for two consecutive quarters. Accordingly, injection well IW-01 was gauged and sampled on January 12, 2017, and April 3, 2017. Measurable LNAPL was not observed during either gauging event. Gauging and analytical results are presented in **Table 1**. According to Arcadis' December 2016 telephone conversation with Mr. Jeffrey Vought of the NYSDEC, if LNAPL was not observed in injection well IW-01 during the January and April 2017 gauging and sampling, the NYSDEC would consider closure of the spill number. Based on elevated concentrations of dissolved benzene, toluene, ethylbenzene, and xylenes (BTEX) in injection well IW-01, and as directed by the NYSDEC in a letter dated May 24, 2018, a Remedial Action Plan (RAP) for multiple VTE events to address residual petroleum impacts was prepared and subsequently submitted to the NYSDEC on July 19, 2018.

VACUUM TRUCK EXTRACTION EVENTS

In accordance with the RAP, three VTE events were conducted just prior to and during the reporting period on December 28, 2018, January 15, 2019, and February 13, 2019. Arcadis provided oversight during vacuum truck operation. Each event was conducted for approximately 8 hours with total fluids (LNAPL, groundwater, and soil vapor) being extracted from IW-01. All liquid extracted during the event was containerized within the vacuum truck and transported off site, under manifest, for disposal. Extracted soil vapor was treated through two vapor-phase carbon vessels in series prior to discharge to the atmosphere.

Prior to and after each event, groundwater and LNAPL were gauged in IW-01. In addition, surrounding monitoring wells were observed during the event to evaluate influence from the applied vacuum and liquid

extraction at IW-01. Due to the minimal volume of liquid recovered and the large area of the vacuum truck, it was not possible to accurately quantify the amount of LNAPL recovered during each event.

Data collected from the three events, as well as data from an historical event conducted in 2011, are included in **Table 2** and **Table 3**.

FIRST, SECOND, AND THIRD QUARTER 2019 WELL GAUGING AND SAMPLING

On March 01, 2019, June 13, 2019, and September 30, 2019, depth to water measurements and groundwater samples were collected from four wells (IW-01, IW-02, MW-4, and MW-6A). Monitoring well MW-2 was not accessible during the three events; therefore, it was not gauged or sampled. **Table 1** presents current and historical data including depth to water measurements, groundwater elevations, LNAPL observations, and analytical results. The following depth to water measurements were observed during the first, second, and third quarter events:

- First Quarter: Depth to water measurements ranged from 12.38 feet below top of casing (TOC) at monitoring well MW-4 to 14.40 feet below TOC at monitoring well IW-01.
- Second Quarter: Depth to water measurements ranged from 11.85 feet below TOC at monitoring well MW-4 to 14.65 feet below TOC at monitoring well IW-02.
- Third Quarter: Depth to water measurements ranged from 13.60 feet below TOC at monitoring well MW-4 to 15.35 feet below TOC at monitoring well IW-01.

LNAPL was not observed during any of the events.

After gauging, each monitoring well was purged of at least three well volumes of groundwater or until dry using a disposable bailer and/or a mechanical pump with dedicated polyethylene tubing. Groundwater samples were collected using clean, previously unused disposable bailers. Upon collection, the groundwater samples were placed in laboratory-prepared sample containers, labeled, immediately placed in an iced cooler, and shipped, along with a trip blank, to Eurofins Laboratories of Lancaster, Pennsylvania, under chain-of-custody protocols. The groundwater samples were analyzed for BTEX and methyl tertiary-butyl ether (MTBE) in accordance with United States Environmental Protection Agency (USEPA) Method 8260C.

LABORATORY ANALYTICAL RESULTS

Analytical results for groundwater samples collected during the first, second, and third quarters of 2019 are provided in **Table 1**, and illustrated on **Figure 2**. The laboratory reports, with chain of custody documentation, are provided in **Appendix A**. The laboratory report provided for the September 2019 sampling event initially contained the following typographical errors: the sample collected from well MW-6A was incorrectly identified as sample MW-64; and, the E qualifier comment given to the total xylene result for the sample from well IW-01 was unclear. To correct the two errors, Eurofins Laboratories issued a revised report correcting the sample description for well MW-6A and clarifying the E qualifier comment for the sample from well IW-01.

Groundwater results for constituents detected above the NYSDEC Technical and Operational Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values (NYSDEC 1998) from the

first, second, and third quarter 2019 sampling events are also summarized below, along with total BTEX concentrations.

First Quarter:

- Injection well IW-01: benzene (6 micrograms per liter [µg/L], estimated), toluene (110 µg/L), ethylbenzene (1,200 µg/L), xylenes (7,400 µg/L), with total dissolved BTEX concentrations of 8,716 µg/L.
- Injection well IW-02: toluene (7 µg/L, estimated), ethylbenzene (820 µg/L), xylenes (2,800 µg/L), with total dissolved BTEX concentrations of 3,627 µg/L.
- Monitoring well MW-4: benzene (61 µg/L), toluene (12 µg/L), ethylbenzene (600 µg/L), and xylenes (840 µg/L), with total dissolved BTEX concentrations of 1,513 µg/L.
- Monitoring well MW-6A: ethylbenzene (55 µg/L) and xylenes (54 µg/L), with total dissolved BTEX concentrations of 109.8 µg/L.

Second Quarter:

- Injection well IW-01: benzene (7 µg/L), toluene (230 µg/L), ethylbenzene (1,400 µg/L), xylenes (11,000 µg/L), with total dissolved BTEX concentrations of 12,637 µg/L.
- Injection well IW-02: ethylbenzene (850 µg/L), xylenes (4,200 µg/L), with total dissolved BTEX concentrations of 5,053 µg/L.
- Monitoring well MW-4: benzene (8 µg/L), ethylbenzene (32 µg/L), and xylenes (56 µg/L), with total dissolved BTEX concentrations of 97 µg/L.
- Monitoring well MW-6A: ethylbenzene (68 µg/L) and xylenes (130 µg/L), with total dissolved BTEX concentrations of 198.5 µg/L.

Third Quarter:

- Injection well IW-01: benzene (7 µg/L), toluene (59 µg/L), ethylbenzene (2,400 µg/L), xylenes (9,200 µg/L), with total dissolved BTEX concentrations of 11,666 µg/L.
- Injection well IW-02: ethylbenzene (1,200 µg/L), xylenes (4,600 µg/L), with total dissolved BTEX concentrations of 5,805.6 µg/L.
- Monitoring well MW-4: benzene (61 µg/L), toluene (8 µg/L), ethylbenzene (220 µg/L), and xylenes (310 µg/L), with total dissolved BTEX concentrations of 599 µg/L.
- Monitoring well MW-6A: ethylbenzene (15 µg/L) and xylenes (65 µg/L), with total dissolved BTEX concentrations of 81.2 µg/L.

CONCLUSIONS AND RECOMMENDATIONS

The 4th quarter groundwater gauging and sampling event was conducted in December 2019. The Laboratory analytical data was not available at the time of this submittal, hence it will be reported with the next report submittal.

Please note that a data tabulation error was reported on Table 1 of the Q3 and Q4 2018 groundwater monitoring reports submitted to NYSDEC on October 26, 2018 and February 22, 2019, respectively. Monitoring wells MW-2R, MW-7, MW-8, and MW-10 do not exist at the site; therefore, references to these wells should be disregarded.

Please contact me at 860-533-9948 or sahithi.rondla@arcadis.com with any questions or comments.

Sincerely,

Arcadis of New York, Inc.

Notes:
1. Laboratory analysis was conducted by Lancaster Laboratories located in Lancaster, Pennsylvania.
2. Concentrations reported in micrograms per liter (ug/L) or parts per billion (ppb).
3. U = The compound was analyzed for but not detected. The associated value is the compound quantitation limit.
4. J = Indicates an estimated concentration.
5. ND = Not detected.
6. Bold values indicate that the constituent was detected at a concentration greater than NYSDEC Technical and Operational Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values (NYSDEC 1998).
7. NA = Not Analyzed.
8. NM = Not Measured.
9. NP = No Product.
10. LNAPL = Light non-aqueous phase liquid.
11. BTEX = Benzene, Toluene, Ethylbenzene and Xylene.
12. MTBE = Methyl tert-butyl ether.
13. Elevations reference an arbitrary onsite benchmark.
14. NSVD = Not surveyed to vertical datum.
15. E = Concentration exceeds the calibration range. The reported concentration is an estimated value.

Notes:
acfm - actual cubic feet per minute
ft TOC - feet from top of casing.
in. Hg - inches mercury.
lbs/ ft^3 - pounds - pounds per cubic foot
lbs/ hr - pounds per hour
lbs/ day - pounds per day
ppm = parts per million
Temp. - temperature in degress F°
*Field PID readings, all other concentrations are estimates

Project Name: BP 17782
ELLE Group #: 2031679

General Comments:

See the Laboratory Sample Analysis Record section of the Analysis Report for the method references.

All QC met criteria unless otherwise noted in an Analysis Specific Comment below.

Refer to the QC Summary for specific values and acceptance criteria.

Project specific QC samples are not included in this data set.

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Surrogate recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in an Analysis Specific Comment below.

The samples were received at the appropriate temperature and in accordance with the chain of custody unless otherwise noted.

Analysis Specific Comments:

No additional comments are necessary.

Quality Control Summary

Client Name: ARCADIS (NY) Group Number: 2031679
Reported: 03/12/2019 08:42

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

Method Blank

Analysis Name	Result	LOQ**	MDL
	ug/l	ug/l	ug/l
Batch number: F190702AA	Sample number(s): 9996743-9996747		
Benzene	< 1	1	0.2
Ethylbenzene	< 1	1	0.4
Methyl Tertiary Butyl Ether	< 1	1	0.2
Toluene	< 1	1	0.2
Xylene (Total)	< 5	5	1

LCS/LCSD

Analysis Name	LCS Spike Added ug/l	LCS Conc ug/l	LCSD Spike Added ug/l	LCSD Conc ug/l	LCS %REC	LCSD %REC	LCS/LCSD Limits	RPD	RPD Max
Batch number: F190702AA	Sample number(s): 9996743-9996747								
Benzene	20	19.43	20	18.51	97	93	80-120	5	30
Ethylbenzene	20	18.92	20	18.44	95	92	80-120	3	30
Methyl Tertiary Butyl Ether	20	18.63	20	17.5	93	87	69-122	6	30
Toluene	20	19.13	20	18.59	96	93	80-120	3	30
Xylene (Total)	60	56.86	60	55.79	95	93	80-120	2	30

Surrogate Quality Control

Surrogate recoveries which are outside of the QC window are confirmed unless attributed to dilution or otherwise noted on the Analysis Report.

Analysis Name: BTEX/MTBE
Batch number: F190702AA

	Dibromofluoromethane	1,2-Dichloroethane-d4	Toluene-d8	4-Bromofluorobenzene

Explanation of Symbols and Abbreviations

The following defines common symbols and abbreviations used in reporting technical data:

BMQL	Below Minimum Quantitation Level	**mL**	milliliter(s)
C	degrees Celsius	**MPN**	Most Probable Number
cfu	colony forming units	**N.D.**	non-detect
CP Units	cobalt-chloroplatinate units	**ng**	nanogram(s)
F	degrees Fahrenheit	**NTU**	nephelometric turbidity units
g	gram(s)	**pg/L**	picogram/liter
IU	International Units	**RL**	Reporting Limit
kg	kilogram(s)	**TNTC**	Too Numerous To Count
L	liter(s)	**µg**	microgram(s)
lb.	pound(s)	**µL**	microliter(s)
m3	cubic meter(s)	**umhos/cm**	micromhos/cm
meq	milliequivalents	**MCL**	Maximum Contamination Limit
mg	milligram(s)		

<	less than
>	greater than
ppm	parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.
ppb	parts per billion
Dry weight basis	Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as “analyze immediately” are not performed within 15 minutes.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Data Qualifiers

Qualifier	Definition
C	Result confirmed by reanalysis
D1	Indicates for dual column analyses that the result is reported from column 1
D2	Indicates for dual column analyses that the result is reported from column 2
E	Concentration exceeds the calibration range
K1	Initial Calibration Blank is above the QC limit and the sample result is ND
K2	Continuing Calibration Blank is above the QC limit and the sample result is ND
K3	Initial Calibration Verification is above the QC limit and the sample result is ND
K4	Continuing Calibration Verification is above the QC limit and the sample result is ND
J (or G, I, X)	Estimated value >= the Method Detection Limit (MDL or DL) and < the Limit of Quantitation (LOQ or RL)
P	Concentration difference between the primary and confirmation column >40%. The lower result is reported.
P^	Concentration difference between the primary and confirmation column > 40%. The higher result is reported.
U	Analyte was not detected at the value indicated
V	Concentration difference between the primary and confirmation column >100%. The reporting limit is raised due to this disparity and evident interference.
W	The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L.
Z	Laboratory Defined - see analysis report

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods.
Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

General Comments:

See the Laboratory Sample Analysis Record section of the Analysis Report for the method references.

All QC met criteria unless otherwise noted in an Analysis Specific Comment below.

Refer to the QC Summary for specific values and acceptance criteria.

Project specific QC samples are not included in this data set.

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Surrogate recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in an Analysis Specific Comment below.

The samples were received at the appropriate temperature and in accordance with the chain of custody unless otherwise noted.

Analysis Specific Comments:

No additional comments are necessary.

Quality Control Summary

Client Name: ARCADIS (NY) Group Number: 2049451
Reported: 06/27/2019 23:43

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

Method Blank

Analysis Name	Result ug/l	LOQ** ug/l	MDL ug/l
Batch number: F191772AA	Sample number(s): 1083270-1083274		
Benzene	< 1	1	0.2
Ethylbenzene	< 1	1	0.4
Methyl Tertiary Butyl Ether	< 1	1	0.2
Toluene	< 1	1	0.2
Xylene (Total)	< 5	5	1
Batch number: F191781AA	Sample number(s): 1083272		
Ethylbenzene	< 1	1	0.4
Xylene (Total)	< 5	5	1

LCS/LCSD

Analysis Name	LCS Spike Added ug/l	LCS Conc ug/l	LCSD Spike Added ug/l	LCSD Conc ug/l	LCS %REC	LCSD %REC	LCS/LCSD Limits	RPD	RPD Max
Batch number: F191772AA	Sample number(s): 1083270-1083274								
Benzene	20	20.12			101		80-120		
Ethylbenzene	20	19.53			98		80-120		
Methyl Tertiary Butyl Ether	20	19.33			97		69-122		
Toluene	20	20.46			102		80-120		
Xylene (Total)	60	61.14			102		80-120		
Batch number: F191781AA	Sample number(s): 1083272								
Ethylbenzene	20	21	20	19.22	105	96	80-120	9	30
Xylene (Total)	60	64.36	60	59.88	107	100	80-120	7	30

*- Outside of specification
**-This limit was used in the evaluation of the final result for the blank
(1) The result for one or both determinations was less than five times the LOQ.
(2) The unspiked result was more than four times the spike added.

Quality Control Summary

Client Name: ARCADIS (NY) Group Number: 2049451
Reported: 06/27/2019 23:43

Surrogate Quality Control

Surrogate recoveries which are outside of the QC window are confirmed unless attributed to dilution or otherwise noted on the Analysis Report.

Analysis Name: BTEX/MTBE
Batch number: F191772AA

	Dibromofluoromethane	1,2-Dichloroethane-d4	Toluene-d8	4-Bromofluorobenzene
1083270	95	95	100	108
1083271	94	93	100	98
1083272	96	95	100	100
1083273	98	102	99	96
1083274	98	96	99	93
Blank	94	98	96	92
LCS	95	99	99	94
Limits:	80-120	80-120	80-120	80-120

*- Outside of specification
**-This limit was used in the evaluation of the final result for the blank
(1) The result for one or both determinations was less than five times the LOQ.
(2) The unspiked result was more than four times the spike added.

Explanation of Symbols and Abbreviations

The following defines common symbols and abbreviations used in reporting technical data:

BMQL	Below Minimum Quantitation Level	**mL**	milliliter(s)
C	degrees Celsius	**MPN**	Most Probable Number
cfu	colony forming units	**N.D.**	non-detect
CP Units	cobalt-chloroplatinate units	**ng**	nanogram(s)
F	degrees Fahrenheit	**NTU**	nephelometric turbidity units
g	gram(s)	**pg/L**	picogram/liter
IU	International Units	**RL**	Reporting Limit
kg	kilogram(s)	**TNTC**	Too Numerous To Count
L	liter(s)	**µg**	microgram(s)
lb.	pound(s)	**µL**	microliter(s)
m3	cubic meter(s)	**umhos/cm**	micromhos/cm
meq	milliequivalents	**MCL**	Maximum Contamination Limit
mg	milligram(s)		

<	less than
>	greater than
ppm	parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.
ppb	parts per billion
Dry weight basis	Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as “analyze immediately” are not performed within 15 minutes.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Data Qualifiers

Qualifier	Definition
C	Result confirmed by reanalysis
D1	Indicates for dual column analyses that the result is reported from column 1
D2	Indicates for dual column analyses that the result is reported from column 2
E	Concentration exceeds the calibration range
K1	Initial Calibration Blank is above the QC limit and the sample result is ND
K2	Continuing Calibration Blank is above the QC limit and the sample result is ND
K3	Initial Calibration Verification is above the QC limit and the sample result is ND
K4	Continuing Calibration Verification is above the QC limit and the sample result is ND
J (or G, I, X)	Estimated value >= the Method Detection Limit (MDL or DL) and < the Limit of Quantitation (LOQ or RL)
P	Concentration difference between the primary and confirmation column >40%. The lower result is reported.
P^	Concentration difference between the primary and confirmation column > 40%. The higher result is reported.
U	Analyte was not detected at the value indicated
V	Concentration difference between the primary and confirmation column >100%. The reporting limit is raised due to this disparity and evident interference.
W	The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L.
Z	Laboratory Defined - see analysis report

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods.
Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

TB-20190930 Water	09/30/2019	1164801

The specific methodologies used in obtaining the enclosed analytical results are indicated on the Laboratory Sample Analysis Record.

2425 New Holland Pike, Lancaster, PA 17601 • 717-656-2300 • Fax: 717-656-6766 • www.EurofinsUS.com/LancLabsEnv

Project Name: BP 17782
ELLE Group #: 2066974

General Comments:

See the Laboratory Sample Analysis Record section of the Analysis Report for the method references.

All QC met criteria unless otherwise noted in an Analysis Specific Comment below.

Refer to the QC Summary for specific values and acceptance criteria.

Project specific QC samples are not included in this data set.

Matrix QC may not be reported if site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

Surrogate recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in an Analysis Specific Comment below.

The samples were received at the appropriate temperature and in accordance with the chain of custody unless otherwise noted.

Analysis Specific Comments:

SW-846 8260C, GC/MS Volatiles

Sample #s: 1164800

The concentration reported for Xylene (Total) is estimated since it exceeds the calibration range of the instrument. A further diluted analysis was performed from a previously opened container with headspace and/or outside of the method holding time. The result for Xylene (Total) is 4800 ug/l in this trial.

Quality Control Summary

Client Name: ARCADIS (NY) Group Number: 2066974
Reported: 11/18/2019 13:33

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD was performed, unless otherwise specified in the method.

All Inorganic Initial Calibration and Continuing Calibration Blanks met acceptable method criteria unless otherwise noted on the Analysis Report.

Explanation of Symbols and Abbreviations

The following defines common symbols and abbreviations used in reporting technical data:

BMQL	Below Minimum Quantitation Level	**mL**	milliliter(s)
C	degrees Celsius	**MPN**	Most Probable Number
cfu	colony forming units	**N.D.**	non-detect
CP Units	cobalt-chloroplatinate units	**ng**	nanogram(s)
F	degrees Fahrenheit	**NTU**	nephelometric turbidity units
g	gram(s)	**pg/L**	picogram/liter
IU	International Units	**RL**	Reporting Limit
kg	kilogram(s)	**TNTC**	Too Numerous To Count
L	liter(s)	**µg**	microgram(s)
lb.	pound(s)	**µL**	microliter(s)
m3	cubic meter(s)	**umhos/cm**	micromhos/cm
meq	milliequivalents	**MCL**	Maximum Contamination Limit
mg	milligram(s)		

<	less than
>	greater than
ppm	parts per million - One ppm is equivalent to one milligram per kilogram (mg/kg) or one gram per million grams. For aqueous liquids, ppm is usually taken to be equivalent to milligrams per liter (mg/l), because one liter of water has a weight very close to a kilogram. For gases or vapors, one ppm is equivalent to one microliter per liter of gas.
ppb	parts per billion
Dry weight basis	Results printed under this heading have been adjusted for moisture content. This increases the analyte weight concentration to approximate the value present in a similar sample without moisture. All other results are reported on an as-received basis.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

Measurement uncertainty values, as applicable, are available upon request.

Tests results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff.

This report shall not be reproduced except in full, without the written approval of the laboratory.

Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as “analyze immediately” are not performed within 15 minutes.

WARRANTY AND LIMITS OF LIABILITY - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

Data Qualifiers

Qualifier	Definition
C	Result confirmed by reanalysis
D1	Indicates for dual column analyses that the result is reported from column 1
D2	Indicates for dual column analyses that the result is reported from column 2
E	Concentration exceeds the calibration range
K1	Initial Calibration Blank is above the QC limit and the sample result is ND
K2	Continuing Calibration Blank is above the QC limit and the sample result is ND
K3	Initial Calibration Verification is above the QC limit and the sample result is ND
K4	Continuing Calibration Verification is above the QC limit and the sample result is ND
J (or G, I, X)	Estimated value >= the Method Detection Limit (MDL or DL) and < the Limit of Quantitation (LOQ or RL)
P	Concentration difference between the primary and confirmation column >40%. The lower result is reported.
P^	Concentration difference between the primary and confirmation column > 40%. The higher result is reported.
U	Analyte was not detected at the value indicated
V	Concentration difference between the primary and confirmation column >100%. The reporting limit is raised due to this disparity and evident interference.
W	The dissolved oxygen uptake for the unseeded blank is greater than 0.20 mg/L.
Z	Laboratory Defined - see analysis report

Additional Organic and Inorganic CLP qualifiers may be used with Form 1 reports as defined by the CLP methods.
Qualifiers specific to Dioxin/Furans and PCB Congeners are detailed on the individual Analysis Report.

Re: Subsurface Hydrocarbon Assessment Report
Former Hess Service Station
370 Grand Concourse
Bronx, New York

Dear Mr. Shapiro:

Delta Environmental Consultants, Inc. (Delta) is pleased to submit this Subsurface Hydrocarbon Assessment Report for the Former Hess Service Station located at 370 Grand Concourse in the Bronx, Bronx County, New York (NYSDEC Spill No. 98-14075). This report was prepared by Delta on behalf of 131 Realty Corporation (131 Realty).

Should you have any questions, please do not hesitate to contact me at (914) 765-8198.

Sincerely,

Delta Environmental Consultants, Inc.

Brad Fisher

EXECUTIVE SUMMARY

On behalf of 131 Realty Corporation (131 Realty), Delta Environmental Consultants, Inc. (Delta) has prepared this Subsurface Hydrocarbon Assessment Report to present the results of subsurface assessment activities conducted by Delta at the Former Hess Service Station located at 370 Grand Concourse in the Bronx, Bronx County, New York (the "subject site"). The purpose of this investigation was to document the presence or absence of petroleum-hydrocarbon impacts to the soil and ground water on the subject site.

Historical Records/Previous Investigations

According to a review of an Environmental Data Resources, Inc. (EDR) Report, the subject site (identified as a Merit Service Station) is listed with an "Active" New York State Department of Environmental Conservation (NYSDEC) Spill Number (98-14075) that was assigned subsequent to February 1999 underground storage tank (UST) removal activities. According to a review of previous environmental reports, five (5) 4,000-gallon gasoline USTs and a 550-gallon waste water UST were removed in February 1999 at which time the station was abandoned. Approximately 410 tons of petroleum-impacted soil was removed during the tank excavation activities. Laboratory analysis of post-excavation soil samples identified volatile organic compound (VOC) concentrations in excess of applicable NYSDEC Guidance Values.

Between March and October 1999, eight (8) monitoring wells (MW-1 through MW-8) were installed on the subject site. Monitoring wells MW-1, MW-4, MW-5, and MW-8 are overburden wells and monitoring wells MW-2, MW-3, MW-6, and MW-7 are bedrock wells. Laboratory analysis of soil samples collected during the installation activities identified VOC concentrations in excess of applicable NYSDEC Guidance Values in two (2) of the eight (8) soil samples [SB-2 (16-18') and SB-6 (16-18')].

Ground water samples have been collected from the monitoring wells in April 1999, October 1999, August 2000, and February 2001. The most recent February 2001 ground water sampling report indicated that light non-aqueous phase liquid (LNAPL) was identified in MW-8 (the first time LNAPL was identified on the subject site). Laboratory analysis identified VOC concentrations in excess of applicable NYSDEC Ground Water Quality Standards (GWQS) in five (5) of the six (6) sampled monitoring wells (MW-1, MW-2, MW-4, MW-6, and MW-7). The total BTEX concentrations (sum of benzene, toluene, ethylbenzene, and xylenes) ranged from not detected in MW-4, MW-5, and MW-7 to 21,270 μg/l in MW-2. The methyl tertiary butyl ether (MTBE) concentrations ranged from not detected in MW-5 to 26,000 μg/l in MW-6.

Soil Boring Assessment (June 12, 2001)

On June 12, 2001, Delta advanced five (5) soil borings (SB-1 through SB-5) on the subject site using a hollow stem auger drill rig. The soil borings were advanced to depths between 12 and 17 feet (ft) below ground surface (bgs) at which point the underlying bedrock was encountered. Soil samples were screened on site for total VOCs using a photoionization detector (PID). Soil samples were collected from each of the soil borings from the interval exhibiting the highest PID reading or at the end point of the boring. Five (5) soil samples from the designated intervals [SB-1 (13-15'), SB-2 (16-17'), SB-3 (8-10'), SB-4 (10-12'), and SB-5 (10-12')] were collected from the soil borings. All of the soil samples were

submitted to Flowers Chemical Laboratories, Inc. (Flowers) for analysis of Spill Technology and Remediation Series (STARS)-listed VOCs according to United States Environmental Protection Agency (EPA) Method 8021.

Laboratory analysis of these soil samples identified VOC concentrations in excess of applicable NYSDEC Technical and Administrative Guidance Memorandum (TAGM) Soil Cleanup Objectives to Protect Ground Water Quality (NYSDEC Soil Cleanup Objectives) in two (2) of the five (5) soil samples [SB-1 (13-15') and SB-5 (10-12')]. Specifically, only MTBE was identified in excess of applicable NYSDEC Soil Cleanup Objectives in both of these soil samples. The total BTEX concentrations were all not detected. The sum of all VOC concentrations (total VOCs) ranged from 22 µg/kg in SB-4 (10-12') to 295 µg/kg in SB-5 (10-12').

Ground Water Investigation (June 12, 2001)

Eight (8) monitoring wells (MW-1 through MW-8) were previously installed on the subject site to delineate ground water impacts. On June 12, 2001, Delta gauged the on-site monitoring wells for depth to ground water, presence of LNAPL, and collected ground water samples. Monitoring well MW-1 could not be located, monitoring well MW-3 was dry, and monitoring well MW-8 was identified with 0.03 ft of LNAPL during this sampling event. Ground water samples (MW-2, MW-4, MW-5, MW-6, and MW-7) were collected from monitoring wells (MW-2, MW-4, MW-5, MW-6, and MW-7, respectively). The five (5) ground water samples were submitted to Flowers for analysis of VOCs according to EPA Method 8021.

Laboratory analysis of these ground water samples identified between three (3) and eleven (11) VOC concentrations in excess of applicable NYSDEC Ground Water Quality Standards (GWQS) in three (3) of the five (5) ground water samples (MW-2, MW-6, and MW-7). The total BTEX concentrations ranged from not detected in MW-4 and MW-5 to 19,392 µg/l in MW-2. The total VOC concentrations ranged from 1 µg/l in MW-5 to 27,500 µg/l in MW-2. The MTBE concentrations ranged from not detected in MW-5 to 1,910 µg/l in MW-6.

Conclusions/Future Plans

The laboratory analytical data indicate that the on-site soil and ground water is impacted with petroleum hydrocarbons in excess of applicable NYSDEC Guidance Values. Delta recommends that the identified primary responsible party (PRP) continue remedial actions in general accordance with the proposed Remedial Action Plan (RAP). Upon completion of the RAP, Delta recommends that the RAP be reviewed to determine whether the proposed activities will adequately address the on-site impacts. Delta recommends that the remedial actions be conducted in support of closure of NYSDEC Spill Number 98-14075.

1.0 INTRODUCTION

This Subsurface Hydrocarbon Assessment Report presents the results of subsurface assessment activities conducted by Delta Environmental Consultants, Inc. (Delta), on behalf of 131 Realty Corporation (131 Realty), at the Former Hess Service Station located at 370 Grand Concourse in the Bronx, Bronx County, New York (the "subject site") on June 12, 2001.

The objective of this assessment was to document the presence or absence of petroleum-hydrocarbon impacts to the soil and ground water on the subject site. The scope of work for this assessment included:

- advancement of five (5) soil borings on the subject site using a hollow stem auger drill rig;
- collection of soil samples during soil boring advancement for in-field screening and laboratory analysis;
- collection of liquid level measurements from the eight (8) on-site monitoring wells;
- collection of ground water samples from five (5) of the eight (8) monitoring wells; and
- preparation of this Subsurface Hydrocarbon Assessment Report containing the observations and information obtained from the aforementioned activities.

2.0 SITE CHARACTERIZATION

2.1 Site Description

The Former Hess Service Station is located at 370 Grand Concourse in the Bronx, Bronx County, New York. The subject site is currently improved with an inactive Hess Service Station that was abandoned in February 1999 (portions of the station building were burned in a later fire). The Site Location Map, Figure 1, Appendix A, shows the location of the subject site as seen on the United States Geological Survey (USGS) *Central Park, New York-New Jersey* 7.5 Minute Series Topographic Map. According to this map, the subject site lies on a generally level parcel at an elevation of approximately 40 feet (ft) above mean sea level.

The subject site is an approximately 0.37-acre rectangular-shaped parcel located on the eastern side of Grand Concourse between East 144th Street to the north and East 140th Street to the south. The subject site is currently improved with an inactive Hess Service Station comprised of a kiosk, one-story storage room, and remnants of pump islands and a canopy. According to a review of previous environmental reports (see Section 4.0), five (5) 4,000-gallon gasoline underground storage tanks (USTs), one (1) 550-gallon waste water UST, and the pump islands with associated piping were removed in February 1999. With the exception of the areas disturbed during excavation activities, the subject site is paved with asphalt or concrete. A chain-link fence surrounds a majority of the subject site and the adjoining building serves as the northern property border. Access to the subject site is gained via Grand Concourse to the west. A Site Plan is provided as Figure 2, Appendix A. Photographs of the subject site are provided in Appendix B.

2.2 Surrounding Land Use

Adjoining the subject site to the north is a four-story apartment building with a basement, beyond which are multi-story apartments with street-level commercial, and Hostos Community College. Adjoining the subject site to the south is an Amoco Service Station, beyond which are commercial properties including

auto repair shops and a former service station at the intersection of Grand Concourse and East 140th Street (no monitoring wells were noted on this site). Adjoining the subject site to the east is sloping undeveloped land, beyond which are railroad tracks. Adjoining the subject site to the west across Grand Concourse Avenue is a U-haul rental facility and parking lot, beyond which are multi-use buildings. A subway tunnel runs adjacent to the subject site under Grand Concourse and the sidewalk. A Surrounding Land Use Map is provided as Figure 3, Appendix A. Photographs of representative surrounding properties are provided in Appendix B.

2.3 Sensitive Receptor Survey

A limited sensitive receptor survey investigating potential sensitive receptors in the vicinity of the subject site was conducted as part of this assessment. There are no surface water bodies or potable water supply wells located on or in the immediate vicinity of the subject site. The nearest surface water body is the Harlem River located approximately 1,200 ft west of the subject site. According to a review of an Environmental Data Resources, Inc. (EDR) Report, there are no Federal or State Public Water Supply Wells located within a 2 mile radius of the subject site. The Hostos Community College is located approximately 600 ft north of the subject site. The immediately abutting building to the north has a basement as do a majority of the surrounding apartment buildings. Several underground utility vaults and stormwater management grates were identified along Grand Concourse within 10 ft from the subject site's property border. A subway tunnel runs adjacent to the subject site under Grand Concourse and the sidewalk. These nearby features are depicted on the Surrounding Land Use Map, Figure 3, Appendix A.

3.0 REGIONAL GEOLOGY/HYDROGEOLOGY

According to the *Surficial Geologic Map of New York, Lower Hudson Sheet* (Cadwell, 1989), the surficial geology of the greater area consists of Pleistocene-age glacial till comprised mostly of unstratified and unsorted silt, sand, gravel, and clay. Based on the site's urban setting, the majority of the soil located at the subject site likely consists of fill materials comprised of varying size sand, cobbles, and asphalt. According to the United States Department of Agriculture Soil Survey Classification and Nomenclature System, this soil would likely be referred to as *Urban Land*, because the soil's original composition and structure has been significantly altered by urbanization and development activities.

3.1 Site Geology

There are no predominant geological surface features such as rock outcroppings on the subject site. Site-specific stratigraphy was obtained during soil boring advancement activities and a review of previous environmental reports. The overburden material is comprised of a brown fine to medium grained silty sand with trace gravel ranging in thickness from approximately 17 ft below ground surface (bgs) on the eastern portion of the subject site to greater than 40 ft bgs on the western portion of the subject site (area likely excavated for adjacent subway tunnel). A gneissic bedrock exists beneath this overburden material. Soil boring logs are provided in Appendix C.

3.2 Site Hydrogeology

Ground water movement varies in relation to topography, lithology, elevations of recharge and discharge areas, and man-made influences. Ground water elevations were determined for this site by measuring each monitoring well's top of casing (TOC) relative to an arbitrary benchmark (with an assigned elevation of 100.00 ft), measuring the water level in the monitoring wells relative to the TOC, and computing the reference elevation of the ground water at the time of the measurement. The depth to

ground water on the subject site was measured on June 12, 2001 to be between 14.94 ft bgs in MW-8 to 18.50 ft bgs in MW-6.

The direction of ground water flow within unconsolidated deposits is interpolated between monitoring wells by comparing the ground water elevations in the monitoring wells and taking into consideration the types of influencing factors mentioned above. Refer to Table 1 in Section 5.2 of this report for liquid level measurement data obtained on June 12, 2001. Liquid level measurements were converted to elevations and plotted on a Site Plan to generate a Ground Water Elevation Contour Map, Figure 4, Appendix A. Figure 4 indicates that the ground water flow across the site is generally in a southeasterly direction.

4.0 HISTORICAL RECORDS REVIEW/PREVIOUS INVESTIGATIONS

EDR performed a regulatory agency records review for the subject site and the immediate surrounding area. The information provided by EDR is a compilation of Federal and New York State environmental regulatory agency listings from the records of the United States Environmental Protection Agency (EPA) and the New York State Department of Environmental Conservation (NYSDEC), respectively. According to a review of the EDR Report, the subject site (identified as a Merit Service Station) is listed with the (EPA) as a large quantity generator (LQG) of hazardous waste (EPA ID No. NYD982185928) likely due to their generation of waste water that was stored in a 550-gallon UST. The subject site (identified as a Merit Service Station) is listed with the NYSDEC as a petroleum bulk storage (PBS) facility as having five (5) 4,000-gallon gasoline USTs and one (1) 550-gallon waste water UST installed in November 1977 and closed in November 1998 (tanks were actually removed in February 1999). According to the EDR Report, the subject site (identified as a Merit Service Station) is listed with one (1) "Active" NYSDEC Spill Number (98-14075) that was assigned during the tank removal activities.

Delta reviewed a number of previous environmental reports prepared by EnviroTrac, Ltd. (EnviroTrac) on behalf Merit Oil of New York (Merit) or Amerada Hess Corporation (Hess). These reports included the following: an Underground Storage Tank, Dispenser Islands, Product Piping and Remote Fill Closure Report, dated July 1999; an Environmental Site Assessment Report, dated September 1999; an Additional Environmental Site Assessment Report, dated February 2000; and an Update Report, dated May 17, 2001. In addition, a Ground Water Sampling Report, dated August 2000, prepared by Environmental Alliance, Inc. on behalf of Amerada Hess Corporation was reviewed.

Underground Storage Tank, Dispenser Islands, Product Piping and Remote Fill Closure Report

Between February 17 and 23, 1999, five (5) 4,000-gallon gasoline USTs, one (1) 550-gallon waste water UST, and associated piping and dispensers were removed from the subject site. A total of twenty (20) post-excavation soil samples were collected from the gasoline UST excavation, two (2) post-excavation soil samples were collected from the waste water UST, four (4) post-excavation soil samples were collected from the product dispenser excavations, and seven (7) post-excavation soil samples were collected from the product piping excavation. A total of 410.76 tons of petroleum-impacted soil was excavated and transported off site during the excavation activities.

Laboratory analysis of soil samples collected from the gasoline UST excavation identified volatile organic compound (VOC) concentrations in excess of applicable NYSDEC Guidance Values in eighteen

(18) of the twenty (20) soil samples. One or more BTEX compounds (benzene, toluene, ethylbenzene, and xylenes) were identified in eleven (11) of the samples with total BTEX concentrations ranging from not detected to 86,853 µg/kg. MTBE was identified in eight (8) of the samples with the maximum concentration of 7,850 µg/kg.

Laboratory analysis of soil samples from the waste water UST excavation identified VOC concentrations in excess of applicable NYSDEC Guidance Values in both of the soil samples with total BTEX concentrations ranging from 39,972 µg/kg to 134,300 µg/kg. MTBE was identified in both of the samples with the maximum concentration of 1,580 µg/kg.

Laboratory analysis of post-excavation soil samples from the product dispenser and piping excavations identified VOC concentrations in excess of applicable NYSDEC Guidance Values in six (6) of the eleven (11) soil samples with total BTEX concentrations ranging from not detected to 3,057 µg/kg. MTBE was identified in two (2) of the samples with the maximum concentration of 1,720 µg/kg.

Due to the presence of VOCs in excess of NYSDEC Guidance Values, the NYSDEC was notified and Spill Number 98-14075 was assigned.

Environmental Site Assessment Reports

Between March and April 1999, four (4) soil borings (SB-1 through SB-4) were advanced on the subject site to depths between 25 and 35 ft bgs. The soil borings were then converted to permanent monitoring wells (MW-1 through MW-4, respectively). Monitoring wells MW-1 and MW-4 are overburden wells and MW-2 and MW-3 are bedrock wells. Laboratory analysis of soil samples collected from the soil borings identified VOC concentrations in excess of applicable NYSDEC Guidance values in one (1) of the four (4) soil samples [SB-2 (16-18')] with a maximum total BTEX concentration of 19,640 µg/kg. Laboratory analysis of ground water samples identified VOC concentrations in excess of applicable NYSDEC Ground Water Quality Standards (GWQS) in all three (3) sampled wells (MW-3 was dry at the time of sampling). Total BTEX concentrations ranged from 1,180 µg/l in MW-4 to 22,400 µg/l in MW-2 while MTBE concentrations ranged from 250 µg/l in MW-1 to 310,000 µg/l in MW-2.

In October 1999, four (4) soil borings (SB-5 through SB-8) were advanced on the subject site to depths between 9 and 27 ft bgs. The soil borings were then converted to permanent monitoring wells (MW-5 through MW-8, respectively). Monitoring wells MW-5 and MW-8 are overburden wells and MW-6 and MW-7 are bedrock wells. Laboratory analysis of soil samples collected from the soil borings identified VOC concentrations in excess of applicable NYSDEC Guidance values in one (1) of the four (4) soil samples [SB-6 (16-18')] with a maximum total BTEX concentration of 270 µg/kg. Laboratory analysis of the ground water samples identified VOC concentrations in excess of applicable NYSDEC GWQS in all seven (7) sampled wells (MW-3 was dry at the time of sampling). Total BTEX concentrations ranged from not detected in MW-4, MW-5, and MW-7 to 43,800 µg/l in MW-8 while MTBE concentrations ranged from 3 µg/l in MW-5 to 450,000 µg/l in MW-2.

Ground Water Sampling Reports

In August 2000, the on-site monitoring wells were sampled. Laboratory analysis of the ground water samples identified VOC concentrations in excess of applicable NYSDEC GWQS in six (6) of the seven (7) sampled wells (MW-3 was dry at the time of sampling). Total BTEX concentrations ranged from not

detected in MW-4, MW-5, and MW-7 to 63,890 µg/l in MW-8 while MTBE concentrations ranged from 7.2 µg/l in MW-5 to 15,000 µg/l in MW-6.

In February 2001, six (6) of the eight (8) monitoring wells (MW-1, MW-2, MW-4, MW-5, MW-6, and MW-7) were sampled. Light non-aqueous phase liquid (LNAPL) was identified in MW-8 (the first time LNAPL was identified on the subject site); therefore, no ground water samples were collected. Monitoring well MW-3 was dry at the time of sampling. Laboratory analysis of the ground water samples identified VOC concentrations in excess of applicable NYSDEC GWQS in five (5) of the six (6) sampled monitoring wells (MW-1, MW-2, MW-4, MW-6, and MW-7). The total BTEX concentrations ranged from not detected in MW-4, MW-5, and MW-7 to 21,270 µg/l in MW-2 while the MTBE concentrations ranged from not detected in MW-5 to 26,000 µg/l in MW-6. Fingerprint analysis of the LNAPL sample from MW-8 indicated that the sample was a weathered unleaded premium grade gasoline that does not contain MTBE.

According to recent information obtained by Hess, a Remedial Action Plan (RAP) is being developed to address the on-site petroleum-impacted soil and ground water which will include the installation of a high vacuum dual-phase extraction system and quarterly ground water sampling.

5.0 FIELD EXPLORATION METHODS

Field explorations performed as part of the subsurface assessment activities included the following:

- advancement of five (5) soil borings (SB-1, SB-2, SB-3, SB-4, and SB-5) on the subject site using a hollow stem auger drill rig;
- collection of five (5) soil samples [SB-1 (13-15'), SB-2 (16-17'), SB-3 (8-10'), SB-4 (10-12'), and SB-5 (10-12')] during soil boring advancement for in-field screening and laboratory analysis;
- collection of liquid level data from the eight (8) existing on-site monitoring wells (MW-1 through MW-8); and
- collection of five (5) ground water samples (MW-2, MW-4, MW-5, MW-6, and MW-7) from five (5) of the eight (8) monitoring wells (MW-2, MW-4, MW-5, MW-6, and MW-7) for laboratory analysis.

5.1 Soil Boring Assessment (June 12, 2001)

On June 12, 2001, Delta advanced five (5) soil borings (SB-1, SB-2, SB-3, SB-4, and SB-5) on the subject site to depths between 12 and 17 ft bgs using a hollow stem auger drill rig. The soil borings could not be advanced deeper than the indicated depths due to refusal on the underlying bedrock. These borings were generally advanced in pre-determined locations around the tank mat; however, the placement of the borings was limited by the presence of existing site features. The locations of these soil borings are shown on the Site Plan, Figure 2, Appendix A.

Each four-foot macrocore sample was inspected for visual and olfactory evidence of contamination and screened for total VOCs using a photoionization detector (PID). Olfactory evidence of petroleum-impact was identified during the advancement of soil borings SB-4 and SB-5, and a maximum PID reading of 207 part per million (ppm) was detected in SB-5 between 10 and 12 ft bgs. Soil samples from each four-foot interval were classified in general accordance with the Unified Soil Classification System. Soil boring logs are provided in Appendix C.

From each boring, soil samples from the interval exhibiting the highest PID reading or at the endpoint of the boring were collected for analysis. Five (5) soil samples from the designated intervals [SB-1 (13-15'), SB-2 (16-17'), SB-3 (8-10'), SB-4 (10-12'), and SB-5 (10-12')] were collected. These samples were submitted to Flowers Chemical Laboratories, Inc. (Flowers) for analysis of Spill Technology and Remediation Series (STARS)-listed VOCs according to EPA Method 8021. The analytical results for these soil samples are provided in Section 6.1.

5.2 Monitoring Well Sampling (June 12, 2001)

Eight (8) 4-inch diameter monitoring wells (MW-1 through MW-8) were previously installed on the subject site (see Section 4.0). On June 12, 2001, the monitoring wells were gauged for depth to water and monitored for the presence of LNAPL using a Solinst oil/water interface probe. Monitoring well MW-1 could not be located, monitoring well MW-3 was dry, and monitoring well MW-8 was identified with 0.03 ft of LNAPL during this sampling event. Liquid level measurements for the June 12, 2001 sampling event are provided in Table 1. Prior to sampling, the casing volume of each well was calculated and a minimum of three (3) casing volumes of water were purged from the wells. Dedicated, disposable polyethylene bailers were used both to purge the wells and collect the samples.

Ground water samples (MW-2, MW-4, MW-5, MW-6, and MW-7) were collected from monitoring wells (MW-2, MW-4, MW-5, MW-6, and MW-7, respectively). These ground water samples were submitted to Flowers for analysis of VOCs according to EPA Method 8021. The analytical results for these ground water samples are provided in Section 6.2.

Table 1 - Liquid Level Measurements (June 12, 2001)

Well Number	Depth of Well	Well Elevation	Depth to Water	Water Elevation	Depth to LNAPL	LNAPL Thickness
MW-1	40	36.68	Not Located	Not Located	Not Located	Not Located
MW-2	25	35.65	18.31	17.34	NM	NM
MW-3	22	35.77	Dry	Dry	Dry	Dry
MW-4	25	35.20	15.96	19.24	NM	NM
MW-5	25	36.97	15.25	21.72	NM	NM
MW-6	25	35.06	18.50	16.56	NM	NM
MW-7	26	34.67	17.86	16.81	NM	NM
MW-8	26	35.73	14.94	20.81	14.91	0.03

All measurements in feet.
LNAPL - Light non-aqueous phase liquid.
Liquid level data assumes a specific gravity of 0.75 for LNAPL and water elevation in MW-1 was adjusted accordingly.
NM - LNAPL not measured.

A Ground Water Elevation Contour Map, provided as Figure 4, Appendix A, was generated based on the ground water gauging data listed in Table 1. The Ground Water Elevation Contour Map indicates that the direction of ground water flow is in a southeasterly direction.

6.0 SAMPLING ANALYTICAL RESULTS

6.1 Soil Analytical Results (June 12, 2001)

On June 12, 2001, five (5) soil samples [SB-1 (13-15'), SB-2 (16-17'), SB-3 (8-10'), SB-4 (10-12'), and SB-5 (10-12')] were collected during the soil boring assessment and submitted to Flowers for analysis of STARS-listed VOCs according to EPA Method 8021.

The laboratory analytical results for the soil samples collected during the June 12, 2001 soil boring assessment are provided in Table 2. Analytical results in bold exceed applicable NYSDEC Technical and Administrative Guidance Memorandum (TAGM) Soil Cleanup Objectives to Protect Ground Water Quality (NYSDEC Soil Cleanup Objectives). The Laboratory Analytical Results Report for these soil samples is provided in Appendix C.

Table 2 - Soil Analytical Results (June 12, 2001)

Analytical Parameter	NYSDEC Soil Cleanup Objective (µg/kg)[1]	Soil Sample Locations and Concentrations (µg/kg)				
		SB-1 (13-15')	SB-2 (16-17')	SB-3 (8-10')	SB-4 (10-12')	SB-5 (10-12')
Benzene	60	<12.5	<12.5	<12.5	<12.5	<12.5
Toluene	1,500	<12.5	<12.5	<12.5	<12.5	<12.5
Ethylbenzene	5,500	<12.5	<12.5	<12.5	<12.5	<12.5
Xylenes	1,200	<12.5	<12.5	<12.5	<12.5	<12.5
Total BTEX	NGV	ND	ND	ND	ND	ND
MTBE	120	**175**	69.1	38.8	22.2	**235**
n-butylbenzene	18,000	<12.5	53.5	<12.5	<12.5	<12.5
Naphthalene	13,000	<12.5	<12.5	<12.5	<12.5	25.3
1,2,4-trimethylbenzene	13,000	<12.5	<12.5	<12.5	<12.5	35.1
1,3,5-trimethylbenzene	3,300	<12.5	18.9	<12.5	<12.5	<12.5
Total VOCs	NGV	175	142	39	22	295

1. Guidance value is the Soil Cleanup Objective to Protect Ground Water Quality based on NYSDEC's Technical and Administrative Guidance Memorandum (TAGM), dated January 24, 1994, revised April 10, 2001.
Other than BTEX and MTBE, only compounds detected in at least one sample are shown.
< - Not detected at or above indicated laboratory detection limits.
Total BTEX, Total VOCs - Sum of all BTEX and sum or all VOC concentrations rounded.
NGV - No guidance value available for this parameter.
ND - Concentrations of BTEX and/or VOCs not detected.

As shown in Table 2, laboratory analysis of these soil samples identified VOC concentrations in excess of applicable NYSDEC Soil Cleanup Objectives in two (2) of the five (5) soil samples [SB-1 (13-15') and SB-5 (10-12')]. Specifically, only MTBE was identified in excess of applicable NYSDEC Soil Cleanup Objectives in both of these soil samples. VOC concentrations in excess of laboratory detection limits but below applicable NYSDEC Soil Cleanup Objectives were identified in all of the other soil samples. The total BTEX concentrations were all not detected. The sum of all VOC concentrations (total VOCs) ranged from 22 µg/kg in SB-4 (10-12') to 295 µg/kg in SB-5 (10-12').

Figure 5, Appendix A, Soil Analytical Results Map, illustrates the distribution of total VOCs present in the soil during the June 12, 2001 sampling event. Figure 5 indicates that the maximum total VOC concentration is located at SB-5.

6.2 Ground Water Analytical Results (June 12, 2001)

On June 12, 2001, ground water samples (MW-2, MW-4, MW-5, MW-6, and MW-7) were collected from monitoring wells (MW-2, MW-4, MW-5, MW-6, and MW-7, respectively) and submitted to Flowers for analysis of VOCs according to EPA Method 8021.

The laboratory analytical results for the ground water samples collected from the monitoring wells on June 12, 2001 are summarized in Table 3. Analytical results in bold exceed designated NYSDEC Ground Water Quality Standards (GWQS). The Laboratory Analytical Results Report for these ground water samples is provided in Appendix D.

Table 3 - Ground Water Analytical Results (June 12, 2001)

Analytical Parameter	NYSDEC GWQS (μg/l)[1]	Monitoring Well Locations and Concentrations (μg/l)				
		MW-2	MW-4	MW-5	MW-6	MW-7
Benzene	0.7	**292**	<0.5	<0.5	**3.7**	<0.5
Toluene	5	**3,260**	<0.5	<0.5	**13.3**	<0.5
Ethylbenzene	5	**1,140**	<0.5	<0.5	**25.9**	<0.5
Xylene	5	**14,700**	<0.5	<0.5	**27.6**	1.03
Total BTEX	NGV	19,392	ND	ND	71	1
MTBE	10	**248**	9.76	<0.5	**1,910**	9.4
n-butylbenzene	5	**910**	<0.5	<0.5	<0.5	**33.9**
sec-butylbenzene	5	<10	<0.5	<0.5	**99.5**	**9**
Isopropylbenzene	5	**106**	<0.5	<0.5	**219**	**10.4**
4-isopropyltoluene	5	**214**	<0.5	<0.5	**13.8**	<0.5
Naphthalene	10	**460**	<0.5	<0.5	**22**	0.9
1,2,4-trimethylbenzene	5	**4,710**	<0.5	0.9	**59.7**	2
1,3,5-trimethylbenzene	5	**1,460**	<0.5	<0.5	<0.5	0.8
Total VOCs	NGV	27,500	10	1	2,395	67

1. Guidance value for VOCs is the NYSDEC GWQS based on NYSDEC's STARS Memo #1, dated August 1992.
Other than BTEX and MTBE, only compounds detected in at least one sample are shown.
< - Not detected at or above indicated laboratory detection limits.
Total BTEX and Total VOCs - Sum of all BTEX and sum of all VOC concentrations, rounded.
NGV - No guidance value available for this parameter.
ND - Concentrations of BTEX and/or VOCs not detected.

As shown in table 3, laboratory analysis of these ground water samples identified between three (3) and eleven (11) VOC concentrations in excess of applicable NYSDEC GWQS in three (3) of the five (5) ground water samples (MW-2, MW-6, and MW-7). VOC concentrations in excess of laboratory detection limits but below applicable NYSDEC GWQS were identified in all of the other ground water samples. The total BTEX concentrations ranged from not detected in MW-4 and MW-5 to 19,392 μg/l in MW-2. The total VOC concentrations ranged from 1 μg/l in MW-5 to 27,500 μg/l in MW-2. The MTBE concentrations ranged from not detected in MW-5 to 1,910 μg/l in MW-6.

Figure 6, Appendix A, Ground Water Analytical Results Map, illustrates the distribution of BTEX, MTBE, and total VOCs present in the ground water during the June 12, 2001 sampling event. Figure 6 indicates that LNAPL was identified in MW-8 and the maximum total BTEX and total VOC concentrations are located at MW-2. The figure indicates that the maximum MTBE concentration is located at MW-6.

7.0 SUMMARY

On behalf of 131 Realty, Delta has prepared this Subsurface Hydrocarbon Assessment Report to present the results of subsurface assessment activities conducted by Delta at the Former Hess Service Station located at 370 Grand Concourse in the Bronx, Bronx County, New York on June 12, 2001. The purpose of this assessment was to document the presence or absence of petroleum-hydrocarbon impacts to the soil and ground water on the subject site.

Soil Boring Assessment (June 12, 2001)

On June 12, 2001, Delta advanced five (5) soil borings (SB-1 through SB-5) on the subject site using a hollow stem auger drill rig to depths between 12 and 17 ft bgs at which point the underlying bedrock was encountered. Five (5) soil samples from the designated intervals [SB-1 (13-15'), SB-2 (16-17'), SB-3 (8-10'), SB-4 (10-12'), and SB-5 (10-12')] were collected from the soil borings and submitted to Flowers for analysis of STARS-listed VOCs according to EPA Method 8021.

Laboratory analysis of these soil samples identified VOC concentrations in excess of applicable NYSDEC Soil Cleanup Objectives in two (2) of the five (5) soil samples [SB-1 (13-15') and SB-5 (10-12')]. Specifically, only MTBE was identified in excess of applicable NYSDEC Soil Cleanup Objectives in both of these soil samples. The total BTEX concentrations were all not detected. The total VOC concentrations ranged from 22 μg/kg in SB-4 (10-12') to 295 μg/kg in SB-5 (10-12').

Ground Water Investigation (June 12, 2001)

Eight (8) monitoring wells (MW-1 through MW-8) were previously installed on the subject site to delineate ground water impacts. On June 12, 2001, Delta gauged the on-site monitoring wells for depth to ground water, presence of LNAPL, and collected ground water samples. Monitoring well MW-1 could not be located, monitoring well MW-3 was dry, and monitoring well MW-8 was identified with 0.03 ft of LNAPL during this sampling event. Ground water samples (MW-2, MW-4, MW-5, MW-6, and MW-7) were collected from monitoring wells (MW-2, MW-4, MW-5, MW-6, and MW-7, respectively) and submitted to Flowers for analysis of VOCs according to EPA Method 8021.

Laboratory analysis of these ground water samples identified between three (3) and eleven (11) VOC concentrations in excess of applicable NYSDEC GWQS in three (3) of the five (5) ground water samples (MW-2, MW-6, and MW-7). The total BTEX concentrations ranged from not detected in MW-4 and MW-5 to 19,392 μg/l in MW-2. The total VOC concentrations ranged from 1 μg/l in MW-5 to 27,500 μg/l in MW-2. The MTBE concentrations ranged from not detected in MW-5 to 1,910 μg/l in MW-6.

Conclusions/Future Plans

The laboratory analytical data indicate that the on-site soil and ground water is impacted with petroleum hydrocarbons in excess of applicable NYSDEC Guidance Values. Delta recommends that the identified PRP continue remedial actions in general accordance with the proposed RAP. Upon completion of the RAP, Delta recommends that the RAP be reviewed to determine whether the proposed activities will adequately address the on-site impacts. Delta recommends that the remedial actions be conducted in support of closure of NYSDEC Spill Number 98-14075.

The above information is intended to highlight exceptional data as compared to the upper control limits (Limit) established for each of the parameters. Range exceedances are flagged by integer values in the Range column. The Expected values are derived from historical data. Expected is computed as either the mean or computed directly from another parameter using linear regression. All known correlation rule exceedances are listed as enumerated rule numbers in the Correlation column. Correlation pair rules are defined on the last page.

QA SDG Narrative Summary

Client:	Delta Env.,NY
Project Number:	370 G. C.
P.O. Number:	1559-7E9-V.4318
Date Sampled:	12-Jun-01
Lab Numbers:	4403 - 4407

Sample Handling

Sample handling and holding time criteria were met for all samples.

Samples Collected by Submitter. No unusual events occured during analysis.

Surrogate Compound Recoveries:

The recovery limits were met for all samples as shown in section 1. This represents complete success.

Accuracy / Precision:

The recovery limits were exceeded for 8 compounds in the matrix spike as shown in section 2. This represents a 33.3% success rate.
The recovery limits were exceeded for 8 compounds in the matrix spike duplicate as shown in section 2. This represents a 33.3% success rate.
The RSD was met for all compounds as shown in section 2.

Method Blanks:

No target compounds were found in the method blank in excess of the method limit as shown in section 3.

LCS Check Sample:

The control limits were met for all compounds as shown in section 4.

Standards Traceability:

The t-test limits were exceeded for 1 calibration standard as shown in section 5. This represents a 93.3% success rate.
The t-test limits were exceeded for 1 LCS standard as shown in section 5. This represents a 93.3% success rate.
The t-test limits were exceeded for 1 matrix spike standard as shown in section 5. This represents a 93.3% success rate.

QA SDG Narrative Summary

Client:	Delta Env.,NY
Project Number:	370 G. C.
P.O. Number:	1559-7E9-V.4318
Date Sampled:	12-Jun-01
Lab Numbers:	11706 - 11711

Sample Handling

Sample handling and holding time criteria were met for all samples.

Samples Collected by Submitter. No unusual events occured during analysis.

11706 diluted to keep optimum cal range.

Surrogate Compound Recoveries:

The recovery limits were met for all samples as shown in section 1. This represents complete success.

Accuracy / Precision:

The recovery limits were exceeded for 8 compounds in the matrix spike as shown in section 2. This represents a 33.3% success rate.
The recovery limits were exceeded for 8 compounds in the matrix spike duplicate as shown in section 2. This represents a 33.3% success rate.
The RSD was exceeded for 1 compound as shown in section 2. This represents a 91.7% success rate.

Method Blanks:

No target compounds were found in the method blank in excess of the method limit as shown in section 3.

LCS Check Sample:

The control limits were met for all compounds as shown in section 4.

Standards Traceability:

The t-test limits were exceeded for 1 calibration standard as shown in section 5. This represents a 93.3% success rate.
The t-test limits were exceeded for 1 LCS standard as shown in section 5. This represents a 93.3% success rate.
The t-test limits were exceeded for 1 matrix spike standard as shown in section 5. This represents a 93.3% success rate.

Remedial Work Plan (RWP)

Speedway # 1349
370 Grand Concourse
Bronx, New York

NYSDEC Spill # 98-14075

January 2018

Prepared For:

Speedway LLC
500 Speedway Drive
Enon, OH 45323

Prepared By:

EnviroTrac Ltd.
5 Old Dock Road
Yaphank, New York 11980

1.0 INTRODUCTION

EnviroTrac Ltd. (EnviroTrac) was contracted by Speedway LLC (Speedway) to develop a Remedial Work Plan (RWP) for Site #1349 (the Site) located at 370 Grand Concourse in Bronx, New York. The RWP is based on the results of historical and recent groundwater sampling data. The goal of this RWP is to address adsorbed and dissolved hydrocarbon impacts that are present at the Site, specifically in monitoring well (MW)-15, which is the final area of concern for New York State Department of Environmental Conservation (NYSDEC) Spill # 98-14075.

1.1 Site Representation

An aerial photograph depicting the location of the Site is presented as **Figure 1** and a site plan is presented as **Figure 2.** The surrounding area consists of commercial and residential use properties. Adjacent land use consists of auto repair shops that are located southeast to the site as well as an apartment building directly to the North. To the west of the site, across Grand Concourse, is a Uhaul facility. Railroad tracks are located to the east of the site.

The Site is an active BP retail gasoline station and Dunkin Donuts selling regular, plus, and premium grades of unleaded gasoline. It is located on the east side of Grand Concourse. The locations of pertinent Site features are depicted in **Figure 2**. The entire site is made up of concrete pavement. The site has been under quarterly groundwater sampling/reporting with monthly Enhanced Fluid Recovery (EFR) events. Groundwater gauging and analytical data and a summary of EFR monitoring are included in **Tables 1 and 2**, respectively.

1.2 Site Geology and Hydrogeology

Groundwater at the site ranges from approximately 14-24 feet below grade surface (bgs) with a regional flow towards the east-southeast. Due to the geologic formations of the area (consolidated bedrock), the groundwater encountered within site wells appears to be perched. According to geologic logs and well construction data during well installation, MW-15 is installed within weathered Schist bedrock. The Geologic Log and Well Construction Details of MW-15 are included in **Appendix A**.

1.3 Potential Sensitive Receptors

The Site is located in an area of mixed commercial and residential land use. Drinking water for the Site and surrounding area is supplied by reservoirs located in upstate New York. Potential sensitive receptors include multi-family residential dwellings with basements located to the north, a subway tunnel located adjacent to the site beneath Grand Concourse, and utility vaults located along Grand Concourse. The closest surface water body is the Harlem River located approximately 1,200 feet to the West.

1.4 Site History

A summary of historical site activities is provided below:

- **February 1999** – The NYSDEC assigned Spill # 98-14075 to the site during the removal of five (5) 4,000-gallon single wall (SW) steel gasoline underground storage tanks (USTs), one (1) 550-gallon SW steel waste water UST and all associated dispensers, piping and remote fills. A total of 410.76 tons of soil was removed from the site by Hess Corporation (Hess).
- **March/April 1999** – MW -1 through MW-4 were installed at the site.
- **October 1999** – MW-5 through MW-8 were installed at the site.
- **September 2002 through January 2003** – Construction of a BP/Amoco station, which encompasses the former Merit station property and the neighboring former Amoco station property. A total of 1,129.20 tons of soil was removed by Hess from the former Merit station portion of the property during construction activities. All existing monitoring wells were destroyed during construction activities. Six (6) replacement monitoring wells (MW-9 through MW-14) were installed at the former Merit site in December 2002.
- **February 2006** – Oxygen Releasing Material (ORM) socks were installed in MW-12 and MW-13.
- **March 2006** – MW-15 and MW-16 were installed at the site.
- **January 2008** – As approved by the NYSDEC, a soil-vapor extraction (SVE) system in conjunction with EnviroTrac's (ET's) Well Stripper (WS) system was activated. MW-15 could not be connected to the system due to station utilities, so monthly mobile well stripper events were conducted on MW-15 starting in January 2008 and continuing through July 2011.
- **March 2010** – The SVE/WS was system shut down due to asymptotic conditions. The system effectively remediated the site, with the exception of MW-15, which could not be connected to the system due to station utilities.
- **October 2011** – EFR events commenced.
- **July 2017** – ORM socks were installed in MW-15 in an effort to address BTEX/MTBE concentrations.

- **Present Day** – Monthly EFR is conducted on MW-15 in an effort to address BTEX/MTBE concentrations.

2.0 FREE PHASE PRODUCT AND DISSOLVED CONCENTRATIONS

2.1 Free Phase Product

Free phase product had been detected on three (3) occasions within MW-15 prior to 2015 (0.02' on 5/3/13, 0.21' on 5/16/14, and 0.09' on 8/19/14). Product has been detected since June 2017 on five (5) occasions (0.04' on 6/8/17 and 0.01' on 7/19/17, 9/6/17, 10/18/17, and 11/3/17).

2.2 Dissolved Concentrations

Historically, the maximum concentration of BTEX and MTBE encountered in MW-15 were 482,100 parts per billion (ppb) and 463 ppb, respectively. During the most recent groundwater sampling event conducted on August 24, 2017, BTEX and MTBE concentrations were reported as 8,541.3 ppb and non-detect (ND), respectively. A Water-Table Elevation on August 24, 2017 and Total Dissolved BTEX/MTBE Concentration Map, which summarizes data from the last four (4) sampling events, is enclosed as **Figure 3**. While remedial actions completed to date have resulted in significant improvement in groundwater quality, it is believed that there may be residual product that is affecting the groundwater quality within MW-15. The geologic formation (Schist bedrock) is believed to contribute to the residual product and subsequent dissolved BTEX concentrations being adsorbed and stationary in the vicinity of MW-15. All historic data is shown in **Table 1** - Groundwater Gauging and Analytical Data.

3.0 REMEDIAL ACTION PLAN

Based on residual free phase product and dissolved BTEX concentrations limited to MW-15, and due to the fact that additional drilling/subsurface excavation in the area is not feasible due to underground utilities and the close proximity of the subway, it is proposed that we remediate this localized area of concern utilizing an isolated approach of surfactant and enhanced fluid recovery.

Speedway/EnviroTrac propose to utilize BioSolve™ Pinkwater® as the surfactant to clean the well casing in MW-15. A total of four (4) BioSolve™ Pinkwater® (surfactant) injection events utilizing MW-15 are proposed. BioSolve™ Pinkwater® has a proven record of effective results. The following work plan is designed to desorb, emulsify and recover residual product from the soil matrix.

3.1 Injection Event #1

Inject 100 gallons of BioSolve™ Pinkwater® at 5% solution with water into MW-15. A four (4) inch diameter scrub brush will be used to scrub the solid and screened casing above the groundwater table as well as the screen within the groundwater. Surge blocking will be used in conjunction with the scrubbing so that the surfactant can disperse down the length of the well. This process will be repeated until the 100 gallons of the 5% solution of BioSolve™ Pinkwater® has been used. Extraction utilizing a vacuum truck will be conducted on the following day for eight (8) hours to recover the surfactant and groundwater.

3.2 Injection Event #2, #3, & #4

Injection and extraction amounts will be identical to Injection Event #1, modified per field observations.

3.3 Monitoring/Sampling

On-site parameters to be monitored during injection events include: depth to product (DTP), depth to water (DTW), and product thickness. These parameters will be monitored in MW-15 and MW-16 (nearest MW). Groundwater sampling will continue to be completed quarterly in February, May, August and November. Laboratory analysis will continue to include BTEX and MTBE.

3.4 Proposed Remedial Equipment

The remedial equipment necessary to achieve RWP objectives will include, but not be limited to:

- Tanks, pumps, hoses and tubing for 5% BioSolve™ Pinkwater® injections
- Interface probe
- A four (4) inch well scrub brush
- Vacuum truck

4.0 SCHEDULE

Following approval of the RWP by the NYSDEC, Speedway will execute the following implementation schedule:

Action Item	Duration (Days)
NYSDEC approval of RWP.	-

EnviroTrac will schedule the initial remedial event.	Within 30 days from date of RWP approval
Injection Event #1: inject 100 gallons of 5% BioSolve™ Pinkwater® solution.	Initial Event
Extraction Event #1: extract surfactant and hydrocarbon impacted groundwater.	One day after Injection Event #1
Well gauging and product hand bailing (if product is detected).	1 week after initial event
Injection Event #2: inject 100 gallons of 5% BioSolve™ Pinkwater® solution.	4 weeks after initial event
Extraction Event #2: extract surfactant and hydrocarbon impacted groundwater.	One day after Injection Event #2
Groundwater gauging, monitoring and sampling.	5 weeks after initial event
Injection Event #3: inject 100 gallons of 5% BioSolve™ Pinkwater® solution.	12 weeks after initial event
Extraction Event #3: extract surfactant and hydrocarbon impacted groundwater.	One day after Injection Event #3
Well gauging.	13 weeks after initial event
Injection Event #4: inject 100 gallons of 5% BioSolve™ Pinkwater® solution.	16 weeks after initial event
Extraction Event #4: extract surfactant and hydrocarbon impacted groundwater.	One day after Injection Event #4
Groundwater gauging and sampling	18 weeks after initial event

5.0 REPORTING

A summary of the remedial events will be documented in the routine Quarterly Monitoring Reports. Speedway will notify the NYSDEC if any significant changes occur between reporting periods.

Re: Evaluation of Site Investigations and Remedial Activities pertaining to Spill No's 98-14075 & 01-11974 for 350 & 370 Grand Concourse, Bronx, NY 10451

Dear Mr. Opell,

Advanced Cleanup Technologies, Inc. ("ACT") was given the assignment of evaluating the status and projected duration of remedial activities taking place at 350 & 370 Grand Concourse, Bronx, NY 10451 ("subject property") under NYSDEC Spill No's 98-104075 and 01-11974. The following reports were provided and reviewed by ACT for the subject property:

370 Grand Concourse (NYSDEC Spill No. 98-14075)

Subsurface Hydrocarbon Assessment Report, by Delta Environmental Consultants, Inc. ("Delta") dated July 12, 2001, which indicates:

- NYSDEC Spill 98-14075 was reported in 1999 when petroleum impacted soil was found during the removal of the tanks associated with the former Amoco filling station, at which time approximately 410 tons of soil was removed;
- In 1999, eight monitoring wells were installed at the subject property;
- In 2001, Delta gauged and sampled the five of the eight existing monitoring wells. Delta also installed and sampled five soil borings to 12-17 feet below ground surface, where bedrock was encountered;
- One of the monitoring wells (MW-8), located between Grand Concourse and the former island dispensers, contained 0.03 feet of light non-aqueous phase liquid (LNAPL);
- Soil sample results contained MTBE above applicable NYSDEC Soil Cleanup Objectives. BTEX was not detected in any of the soil samples;

- Groundwater samples contained BTEX and MTBE above applicable NYSDEC Groundwater Quality Standards.

Remedial Work Plan (RWP), by EnviroTrac Ltd. dated January 2018, which indicates:

- The subject property was formerly occupied by two separate filling stations; Merit to the north (370 Grand Concourse) and Amoco to the south (350 Grand Concourse);
- The subject property was redeveloped into a BP filling station in 2002; at which time 1,129 tons of soil was excavated from the subject property and all existing wells were destroyed and replaced with 6 replacement monitoring wells (MW-9 through MW-14)
- Past Remedial Activities included:
    - In February 2006, Oxygen Releasing Compound (ORC) socks were installed in select wells;
    - In March 2006, two additional monitoring wells (MW-15 and MW-16) were installed in the area of concern, located between Grand Concourse and the former filling station dispenser islands;
    - In January 2008, a Soil Vapor Extraction (SVE) system in conjunction with a Well Stripper (WS) system was activated;
    - In March 2010, the SVE system was shut down due to asymptotic conditions;
    - In October 2011, Enhanced Fluid Recovery (EFR) events commenced in monitoring well MW-15;
    - In July 2017, ORC socks were installed in select wells;
- Drilling and subsurface excavation in the area of concern is not feasible due to the presence of underground utilities and the subway along Grand Concourse;
- Proposed remedial activities include the injection of Biosolve® Pinkwater® into MW-15, followed by extraction utilizing a vacuum truck.

Speedway LLC Update Report, by EnviroTrac Ltd. dated July 2020, which indicates:

- Two monitoring wells (MW-15 and MW-16) were sampled for BTEX and MTBE;
- Groundwater results from both wells displayed decreasing trends of Benzene. However both groundwater samples contained BTEX at concentrations above applicable NYSDEC TOGS Ambient Water Quality Standards.

ACT was also provided with a phone conversation memo between the Property Manager and EnviroTrac Ltd. ("EnviroTrac") on July 15, 2020 and an email correspondence with EnviroTrac dated August 19, 2020, which concern the upcoming installation of two sparge wells and one monitoring well in the vicinity of MW-15, scheduled for August 26, 2020. EnviroTrac indicates that these wells will speed up the remedial phase at the subject property, which will take an estimated two years to complete. EnviroTrac also indicates that excavation associated with redevelopment of the site will quicken the remedial phase. EnviroTrac does not believe the residual contamination at the subject property will hinder redevelopment plans.

350 Grand Concourse (NYSDEC Spill No. 01-11974)

Spill Closure Presentation, by Arcadis of New York, Inc. dated October 9, 2015, which indicates:

- NYSDEC Spill No. 01-11974 was reported at 350 Grand Concourse during tank removal in 2002;
- Site investigation and remedial activities included the installation of five monitoring wells, six soil borings, four injection wells, Hi-vacuum extraction of IW-04, and the injection of 23,858 gallons of calcium nitrate solution into IW-04;
- Groundwater quality results indicated a decreasing trend of VOC concentrations in all monitoring wells;
- Soil quality results indicated limited exceedances of soil cleanup criteria.

Groundwater Analytical Summary for First, Second, and Third Quarters 2019, by Arcadis of New York, Inc. dated January 3, 2020, which indicates:

- After closing Spill No. 01-11974 in September 2016, NYSDEC re-opened the spill when light non-aqueous phase liquid (LNAPL) was found while decommissioning injection well IW-01 in October 2016;
- Four vacuum extraction events were conducted at injection well IW-01 in November and December of 2018 and January and February of 2019;
- In March, June, and September 2019, four groundwater samples (IW-01, IW-02, MW-4, and MW-6A) were collected from the area of concern, which is located between Grand Concourse and the former filling station dispenser islands.
- No LNAPL was observed in the four wells during the sampling events. Groundwater samples were analyzed for BTEX and MTBE;
- Depth to groundwater in the wells ranged from approximately 12 to 15 feet below the top of well casings;
- All groundwater samples contained BTEX at concentrations above applicable NYSDEC TOGS Ambient Water Quality Standards.

Groundwater Monitoring Report Fourth Quarter 2019 and First Quarter 2020, by Parsons dated April 29, 2020, which indicates:

- In December 2019, groundwater samples were collected from three wells (IW-01, IW-02, and MW-6A). In February 2020, groundwater samples were collected from four wells (IW-01, IW-02, MW-4, and MW-6A). Groundwater samples were analyzed for BTEX and MTBE;
- No LNAPL was observed in the wells during the sampling events;
- Groundwater results from wells IW-02 and MW-6A displayed decreasing trends of Total BTEX. However, all groundwater samples contained BTEX at concentrations above applicable NYSDEC TOGS Ambient Water Quality Standards.

In summary, the remaining areas of concern include the area between Grand Concourse and the dispenser islands associated with the former filling stations at 350 and 370 Grand Concourse.

Based upon ACT's independent review of the above site investigation and remedial activity reports, we conclude that soil and groundwater contamination is present beneath the subject property above applicable standards. Therefore, NYSDEC Nos. 01-11974(350 Grand Concourse) and 98-14075 (370 Grand Concourse) remain open.

Contractors for both spill numbers are in the process of implementing additional remedial activities at the subject property, including periodic vacuum extraction groundwater remediation events at 350 Grand Concourse and the installation and startup of an air sparge groundwater remediation system at 370 Grand Concourse. Both of these remedial activities are intended to address significant groundwater contamination between the subject property and the Grand Concourse. It is not clear whether other more aggressive remedial activities such as soil excavation or In-Situ Chemical Oxidation would be a more feasible and expeditious means of closing the active spill numbers.

In light of the extensive duration that remedial activities have already taken place at the subject property, the significant level of soil and groundwater contamination remaining beneath the subject property and the contractor's apparent inability to adequately address the areas of concern, remedial activities should be expected to continue for at least another 5 years. The cost for these remedial activities cannot be determined with any degree of certainty from this review alone, but is likely to exceed $500,000.

Please feel free to contact me if you have any questions or comments concerning the above.

Very truly yours,

Paul P. Stewart, MS, QEP
President

Re: Addendum to Evaluation of Remedial Activities
350 & 370 Grand Concourse, Bronx, NY 10451

Dear Mr. Opell,

On August 21, 2020, Advanced Cleanup Technologies, Inc. ("ACT") prepared a letter report evaluating the status and projected duration of remedial activities taking place at 350 Grand Concourse (NYSDEC Spill No. 01-11974) and 370 Grand Concourse, Bronx, NY 10451 (NYSDEC Spill No's 98-104075). That report concluded the following:

> "Based upon ACT's independent review of the above site investigation and remedial activity reports, we conclude that soil and groundwater contamination is present beneath the subject property above applicable standards. Therefore, NYSDEC Nos. 01-11974(350 Grand Concourse) and 98-14075 (370 Grand Concourse) remain open."

ACT's report also estimated the duration and cost of remedial activities as follows:

> "In light of the extensive duration that remedial activities have already taken place at the subject property, the significant level of soil and groundwater contamination remaining beneath the subject property and the contractor's apparent inability to adequately address the areas of concern, remedial activities should be expected to continue for at least another 5 years. The cost for these remedial activities cannot be determined with any degree of certainty from this review alone, but is likely to exceed $500,000."

ACT has since obtained additional updated information about both NYSDEC Spill numbers from Parsons, the current remedial contractor for 350 Grand Concourse, and Enviro Trac, Ltd, the current remedial contractor for 370 Grand Concourse. This letter summarizes ACT's findings and recommendations following our review of this additional information.

Both remedial contractors provided ACT with updated status reports for each portion of the site. Parson's October 1, 2020 report entitled "Groundwater Monitoring Report Third Quarter 2020" contains a summary of groundwater quality beneath the southern portion of the site based upon samples collected from 4 groundwater monitoring wells (IW-1, IW-2, MW-4 and MW-6A) on July 17, 2020. Similarly, Enviro Trac provided an October 2020 "Update Report" summarizing soil and groundwater quality beneath the northern portion of the site following the installation and sampling of one new groundwater monitoring well (MW-17) and two "remedial wells" (REM-1 and REM-2).

The results from these two updated status reports indicate that there continues to be significant soil and groundwater contamination beneath both sites. In fact, the known extent of soil and groundwater contamination indicates that remedial activities that have taken place over the past 20 years have not made any appreciable improvement in soil or groundwater quality beneath either site.

Soil quality beneath 370 Grand Concourse remains grossly contaminated adjacent to the pump islands where 437 mg/kg of gasoline-impacted soil was discovered following the installation of remedial well REM-1 on August 31, 2020. Groundwater contamination beneath 370 Grand Concourse remains orders of magnitude above water quality standards in a newly installed monitoring well (35,000 ug/l in MW-17 on September 11, 2020) and is increasing in existing monitoring wells MW-15 (12,000 ug/l on May 1, 2020) and MW-16 (497 ug/l on September 11, 2020).

At 350 Grand Concourse, grossly contaminated soil was observed at former monitoring well MW-1 before it was abandoned (51,100 ug/kg @ 10-11ft on July 2003) and at existing monitoring wells MW-4 (131,000 ug/kg @18-19ft in July 2010) and MW-6A (107,000 ug/kg at 18-19ft in October 2010). Similarly, grossly contaminated groundwater beneath 350 Grand Concourse remains orders of magnitude above water quality standards in monitoring wells IW-1 (16,605 ug/l on February 14, 2020) and IW-2 (4,600 ug/l on July 17, 2020).

While remedial activities including in-situ chemical injections and enhanced fluid recovery have selectively been implemented at both sites, there has never been a comprehensive investigation of soil or groundwater contamination beneath the combined site to verify if the source of contamination has been located or removed. Some locations where treatment took place have remained the same or actually increased in contamination over time (IW-1 and IW-2 at 350 Grand Concourse and MW-15 and MW-16 at 370 Grand Concourse). Newly installed monitoring well MW-17 at 370 Grand Concourse contains some of the most contaminated groundwater identified beneath both sites to date.

Advanced Cleanup Technologies, Inc.
ENVIRONMENTAL CONSULTANTS

The most recent status reports provided by Parsons and Enviro Trac indicate that remedial activities at both sites are essentially "on hold", since only groundwater monitoring is being performed on a regular basis and the NYSDEC does not appear to be requiring anything more at this time. The cause for the de facto suspension of remedial activities two-fold. Firstly, both active spill sites are actually one large soil and groundwater plume which appears to be emanating from the pump islands and former tank bed at 370 Grand Concourse and migrating in a southerly direction towards 350 Grand Concourse across the western portion of both sites. The NYSDEC project managers for each spill do not appear to be working together to remediate the entire site, which has essentially remained in limbo.

Secondly, only a relatively small amount contaminated soil was removed from the ground when tanks and pump islands were decommissioned at each site (411 tons at 370 Grand Concourse in 1999 and 1,360 tons at 350 Grand Concourse in 2002). As indicated in the documents we have been provided, comprehensive subsurface investigations were never performed before or after that soil was removed, so there is no way of knowing how much or where contaminated soil remains.

As we discussed, closure of both active spills can only occur once the entire site has been completely excavated of all impacted soil to the extent feasible. In light of the above, the cost to remediate the entire site could well exceed 1 million dollars. The duration of remedial activities could remain indefinite under the NYSDEC's current regulatory enforcement posture and status of the active gas station, or could be completed within 6 months if the gas station were closed, petroleum facilities removed and the site fully excavated in anticipation of future development. The cost to remediate the site to an appropriate level that would permit both spills to be closed could well exceed 1 million dollars and does not appear to be practical while the site is being used as an active gas station.

Please feel free to contact me if you have any questions or comments concerning the above.

Very truly yours,

Paul P. Stewart, MS, QEP

Re: 350 & 370 Grand Concourse, Bronx, NY 10451

Dear Mr. Opell,

Previous file reviews performed by ACT have concluded that a significant amount of contaminated soil exists beneath at 350 Grand Concourse (NYSDEC Spill No. 01-11974) and 370 Grand Concourse, Bronx, NY 10451(NYSDEC Spill No's 98-104075).

GS Humane Corp. has asked ACT to analyze the steps needed to decommission the existing gas station in order to allow the site to be improved with a new residential development. The attached timelines have been prepared to evaluate how to best proceed with construction prior to June 15, 2022.

As indicated in the Timelines, the following tasks should be performed prior to commencement of building construction: (1) Pre-Notification Letter for decommissioning the PBS facilities at the site; (2) Decommission the tanks and equipment; (3) Obtain a dewatering permit, install a dewatering system and dewater the site, if required by the NYSDEC to be to expeditiously close both active spills; (4) Excavate contaminated soil on-site and back fill as necessary for construction requirements; and (5) collect end point samples to confirm that contaminated soil has been removed.

It was determined that 350 and 370 Grand Concourse is E-designated by New York City office of Environmental Remediation (OER) for Hazmat, Noise, and Air Quality. A timeline for all of the required tasks to obtain a "Notice To Proceed" is identified in the attached Timeline as "OER VCP Program".

OER will not issue a "notice to proceed" required to obtain a building permit until a remedial investigation has been performed and a Remedial Action Work Plan (RAWP) has been approved. In addition, the OER will also require filing an approved Air Quality and Noise Remedial Action Plan (RAP). As indicated in the attached Timeline, the Air Quality and Noise

RAP should be filed by the developer's architect as soon as approvable building plans have been prepared. Excavation of contaminated soil can proceed following the approval of the RAWP. Following issuance of the "Notice To Proceed", the developer could file for an Early Foundation Approval to begin construction of the foundation.

Alternatively, because of the extensive onsite soil and groundwater contamination, the site could enter into the NYSDEC Bronwfields Cleanup Program (BCP). We have communicated with the deputy director of OER who has confirmed they will accept a NYSDEC approved Decision Document to issue a Notice To Proceed. The NYSDEC BCP requires significantly more investigation, reporting, and remediation requirements. In addition, this alternative would require extensive communications with both OER and NYSDEC. The benefits, however, would include large tax credits for the developer that are significantly increased with affordable housing developments in NYC. It is our opinion that the site should qualify for tangible property tax credits and site preparation tax credits through tax form CT 611. As part of filing to enter the NYSDEC BCP, an Interim Remedial Measure Work Plan (IRMWP) would be filed to excavate contaminated soil on-site and allow for the developer to file for early foundation approval. The Air Quality and Noise RAP would still need to be approved by OER prior to receiving a notice to proceed.

Reporting during both the OER VCP and NYSDEC BCP will also satisfy NYSDEC's requirements to close the existing NYSDEC Spill No. 01-11974 and NYSDEC Spill No's 98-104075. Both regulatory timelines would shift based upon when approvable building plans are prepared but should allow for construction prior to June 15,2022.

Very truly yours,

Paul P. Stewart, MS, QEP
President
