Job Narrative
460-326580-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/20/2025 11:59 PM, 5/21/2025 11:10 AM, 5/22/2025 4:00 PM and 5/23/2025 4:00 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler received on 5/23/2025 4:00 PM (lab sample IDs beginning with 460-326756) was 4.4°C..

Receipt Exceptions
Receipt temperatures were not recorded on the chain of custody forms for the samples indicated below. Most analytical methods require chilling samples to 4° C. For these methods, the criteria are met if the samples are chilled to below 6° C and above freezing (0°C). Client provided Eurofins all samples on ice and the samples shall be considered acceptable.

Affected samples in job 460-326580:
-samples with lab IDs beginning with 460-326580 (received on 5/20/2025 11:59 PM)
-samples with lab IDs beginning with 460-326644 (received on 5/20/2025 11:59 PM)
-samples with lab IDs beginning with, 460-326694 (received on 5/21/2025 11:10 AM)

Per client request on 5/21, the following sample IDs were corrected: SRI-A3-3 samples should be SRI-A3-4

Due to lab error, the following samples were prepped outside of holding time for VOCs: SRI-A1-3_3-5_20250519 (460-326644-1), SRI-A1-3_7-9_20250519 (460-326644-2), SRI-A1-1_3-5_20250519 (460-326644-5), SRI-A1-1_8-10_20250519 (460-326644-6), SRI-A1-1_13-15_20250519 (460-326644-7), SRI-A1-4_3-5_20250519 (460-326644-10), SRI-A1-4_3-5_20250519 (460-326644-10[MS]) and SRI-A1-4_3-5_20250519 (460-326644-10[MSD]). These samples were canceled by the client since the client recollected these samples.

The Chain-of-Custody (COC) has a disparity between the documented matrix and the matrix received. The following samples are a water, while the COC lists a soil: SRI-FB-3_20250520 (460-326580-4), SRI-TB-3_20250520 (460-326580-25) and SRI-TB-4_20250520 (460-326580-26).

The Chain-of-Custody (COC) was incomplete as received and/or improperly completed:

*Page 4 of the COC was not submitted - the client provided this COC (labeled page 1 of _) on 5/22/25.
*The field and trip blanks on the COC were listed as soils.
*All sample IDs were corrected per client request to include an underscore before the depths instead of a dash.
*Sample SRI-B1-1_3-5" is listed twice with different collection times. The client provided the correct collection times separately.

Several VOA Trip Blanks and Field Blanks were broken and disposed of in the lab: Affected samples are: SRI-FB-1_20250519 (460-326644-29), SRI-FB-2_20250519 (460-326644-30), SRI-TB-1_20250519 (460-326644-31) and SRI-TB-2_20250519 (460-326644-32)

Job Narrative
460-326691-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.
Receipt
The samples were received on 5/20/2025 5:00 PM, 5/21/2025 4:00 PM, 5/21/2025 5:00 PM and 5/22/2025 5:00 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 3.8°C, 4.4°C and 5.6°C for jobs 460- 326691, 460-326877 and 460- 327048.

Receipt Exceptions
The Field Sampler was not listed on the Chain of Custody for jobs 460-326691 and 460-326806

No matrix recorded on the COC for samples 10 or 11. No TAT recorded on the COC. No container totals recorded on the COC.

The Chain of Custody was received without any analyses selected for job 460-326806

Receipt temperatures were not recorded on the chain of custody forms for the samples indicated below.. Most analytical methods require chilling samples to 4° C. For these methods, the criteria are met if the samples are chilled to below 6° C and above freezing (0°C). Client provided Eurofins all samples on ice and the samples shall be considered acceptable.

Affected samples in job 460-326691: Sample IDs beginning with 460-326806 .Courier did not sign or record receipt temperature on the COC of job 460-326806

The following sample had insufficient volume for DRO analysis: A4-3_3-5_20250521 (460-326877-3), B3-4_3-5_20250521 (460-326877-9) and A3-1_3-5_20250520 (460-326691-17).

Subcontract Work
Method EOX by 9023 + % Solids SM2540G: This method was subcontracted to Hampton-Clarke, Inc. The subcontract laboratory certification is different from that of the facility issuing the final report. The subcontract report is appended in its entirety.

GC/MS Semi VOA
Method 8270E: The laboratory control sample duplicate (LCSD) for preparation batch 460-1040354 and analytical batch 460-1040407 recovered outside control limits for the following analytes: Atrazine. This analyte was biased high in the LCSD and was not detected in the associated samples; therefore, the data have been reported.

Method 8270E: The continuing calibration verification (CCV) analyzed in batch 460-1040410 was outside the method criteria for the following analyte(s): 1,4-Dioxane and Benzaldehyde. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Method 8270E: The laboratory control sample and/or the laboratory control sample duplicate (LCS/LCSD) for preparation batch 460-1040352 and analytical batch 460-1040410 recovered outside control limits for the following analyte(s): 2,4-Dimethylphenol. These analytes have been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Gasoline Range Organics
Method 8015D_GRO: Surrogate recovery for the following sample was outside the upper control limit: A3-1_13-15_20250520

Job ID: 460-326691-1 (Continued) Eurofins Edison

(460-326691-19). This sample did not contain any target analytes; therefore, re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Herbicides
Method 8151A: The closing continuing calibration verification (CCVC) associated with batch 460-1040422 recovered above the upper control limit for Silvex (2,4,5-TP). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.
(CCV 460-1040422/30)

Method 8151A: The laboratory control sample (LCS) for preparation batch 460-1040404 and analytical batch 460-1040422 recovered outside control limits for Silvex (2,4,5-TP). This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

Method 8151A: The closing calibration verification (CCVC) associated with batch 460-1040422 recovered above the upper control limit for 2,4,5-T and Silvex (2,4,5-TP). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Hydrocarbons
Method NJEPH: 1-Chlorooctadecane surrogate recovery for this LCS and LCSD was outside control limits but o-Terphenyl surrogate and spike recoveries were within control limits; therefore the data have been qualified and reported.(LCS 460-1040490/2-A) and (LCSD 460-1040490/3-A)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

PCBs
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Pesticides
Method 8081B: The %RPD between the primary and confirmation column / detector exceeded 40% for 4,4'-DDT for the following sample: A2_10-15_20250520 (460-326691-10). The lower value(s) has been reported and qualified in accordance with the laboratory's SOP.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
