FEBRUARY 2026

CERTIFICATION STATEMENT

I, Rebecca A. Kinal, P.E., certify that I am currently a New York State registered professional engineer and that this Remedial Action Work Plan was prepared in accordance with all applicable statutes and regulations and in substantial conformance with the Division of Environmental Remediation Technical Guidance for Site Investigation and Remediation (DER-10) and Green Remediation (DER-31).

Rebecca A. Kinal	2/23/2026	
NYS Professional Engineer #082046	Date	Signature

TABLE OF CONTENTS

EXECUTIVE SUMMARY 1
REMEDIAL ACTION WORK PLAN 7
1.0 INTRODUCTION 7
1.1 Site Location and Description 7
1.2 Contemplated Redevelopment Plan 7
1.3 Description of Surrounding Property 8
2.0 DESCRIPTION OF REMEDIAL INVESTIGATION FINDINGS 9
2.1 Scope Summary Remedial Investigation Report 9
2.2 Geophysical Survey and Utility Mark Outs 9
2.3 Groundwater Monitoring Well Elevation and Location Survey 10
2.4 Soil, Groundwater, and Soil Vapor Sampling 10
2.4.1 Soil Sampling Chemical Analyses 11
2.4.2 Groundwater Sampling Chemical Analyses 13
2.4.3 Soil Vapor Sampling Chemical Analyses 14
2.4.4 Summary Chemical Analytical Work Performed 14
2.5 Geological Conditions 15
2.6 Contamination Conditions 16
2.7 Remedial Investigation Report Findings 16
2.7.1 Soil/Fill Contamination 16
2.7.2 Groundwater Contamination 17
2.7.3 Soil Vapor Contamination 18
2.7.4 Conceptual Model of Site Contamination 18
2.8 Significant Threat 19
2.9 Site History 19
2.9.1 Past Uses and Ownership 19

LIST OF ACRONYMS

Acronym	Definition
AWQSGVs	Ambient Water Quality Standards and Guidance Values
BCA	Brownfield Cleanup Agreement
BCP	Brownfield Cleanup Program
BTEX	benzene, toluene, ethylbenzene, and xylenes - collectively referred to as BTEX
bgs	below ground surface
BOA	Brownfield Opportunity Area
C/D	construction and demolition
CAMP	Community Air Monitoring Plan
CCR	Construction Completion Report
CFR	Code of Federal Regulations
cis-1,2-DCE	cis-1,2-dichloroethylene
COC	Certificate of Completion
CPP	Citizen Participation Plan
CQAP	Construction Quality Assurance Plan
CVA	Climate Vulnerability Assessment
CVOC	chlorinated volatile organic compound
DD	Decision Document
DER	Division of Environmental Remediation
DER-10	DER Technical Guidance for Site Investigation and Remediation Document
DER-31	DER Green Remediation Document
DMM	Division of Materials Management
DOT	Department of Transportation
DUSR	Data Usability Summary Report
ECL	Environmental Conservation Law
EDD	electronic data deliverable
EDR	Environmental Data Resources, Inc.
ELAP	New York State Environmental Laboratory Approval Program
EPA	United States Environmental Protection Agency
EQuIS	Environmental Quality Information System
ESA	Environmental Site Assessment
FER	Final Engineering Report
GPR	ground-penetrating radar
HASP	Health and Safety Plan
HAZWOPER	Hazardous Waste Operations and Emergency Response
IRM	Interim Remedial Measures
IRMWP	Interim Remedial Measures Work Plan
ISCO	in-Situ chemical oxidation
mg/kg	milligrams per kilogram
MTBE	methyl tert-butyl ether

Acronym	Definition
MS/MSD	matrix spike/matrix spike duplicate
NAPL	non-aqueous phase liquid
NAVD88	North American Vertical Datum of 1988
NTU	Nephelometric Turbidity Unit
NYC	New York City
NYCDCP	New York City Department of City Planning
NYCDEP	New York City Department of Environmental Protection
NYCDOB	New York City Department of Buildings
NYCDOT	New York City Department of Transportation
NYCOER	New York City Office of Environmental Remediation
NYCRR	New York Codes, Rules and Regulations
NYCT	New York City Transit
NYS	New York State
NYSDEC	New York State Department of Environmental Conservation
NYSDOH	New York State Department of Health
ORC	Oxygen Release Compound
OSHA	United States Occupational Safety and Health Administration
PAH	polycyclic aromatic hydrocarbon
PBS	Petroleum Bulk Storage
PCB	polychlorinated biphenyl
PCE	tetrachloroethylene
PFAS	per- and polyfluoroalkyl substances
PFOA	perfluorooctanoic acid
PFOS	perfluorooctanesulfonic acid
PGWGV	Protection of Groundwater Guidance Value
PGWSCO	Protection of Groundwater Soil Cleanup Objective
PID	photoionization detector
ppb	parts per billion
ppm	parts per million
ppt	parts per trillion
PVC	polyvinyl chloride
QA	quality assurance
QAPP	Quality Assurance Project Plan
QC	quality control
QHHEA	Qualitative Human Health Exposure Assessment
RAO	Remedial Action Objective
RAWP	Remedial Action Work Plan
RCRA	Resource Conservation and Recovery Act
RI	Remedial Investigation
RIR	Remedial Investigation Report
RIWP	Remedial Investigation Work Plan

Acronym	Definition
RRGV	Restricted Residential Use Guidance Values
RRSCO	Restricted Residential Soil Cleanup Objective
SCGs	Standards, Criteria, and Guidance
SCO	Soil Cleanup Objective
SI	Site Investigation
SIM	selective ion monitoring
SIR	Subsurface (Phase II) Investigation Report
SMMP	Soil/Materials Management Plan
SMP	Site Management Plan
SOE	support of excavation
SPDES	State Pollutant Discharge Elimination System
SPLP	synthetic precipitate leachate procedure
SRI	Supplemental Remediation Investigation
SRIWP	Supplemental Remediation Investigation Work Plan
SSDS	sub-slab depressurization system
SSO	Site Safety Officer
SVE	soil vapor extraction
SVOC	semivolatile organic compound
SWPPP	Stormwater Pollution Prevention Plan
TAL	Target Analyte List
TCE	trichloroethylene
TCL	Target Compound List
TCLP	toxicity characteristic leaching procedure
TOGS	Technical Operational and Guidance Series
UIR	Underground Injection/Recirculation
UST	underground storage tank
UUGV	Unrestricted Use Guidance Value
UUSCO	Unrestricted Use Soil Cleanup Objective
VOC	volatile organic compound
µg/L	micrograms per liter
$\mu g/m^3$	micrograms per cubic meter

EXECUTIVE SUMMARY

Site Description/Physical Setting/Site History

This Remedial Action Work Plan (RAWP) was prepared by AKRF, Inc. (AKRF) on behalf of 350 GC Property Owner LLC (the "Volunteer") for the 350 Rising site, located at 350 Grand Concourse in the Mott Haven section of the Bronx, New York (hereafter referred to as the "Site"). The Site is identified on the New York City (NYC) Tax Map as Bronx Tax Block 2341, Lot 42.

The Site was entered into the New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP) on May 4, 2022 with Brownfield Cleanup Agreement (BCA) Index No. C203153-04-22. The Volunteer acquired the Site from 350 Rising LLC (Former Volunteer) in December 2024, and a BCA Amendment was approved by NYSDEC on February 12, 2025 to reflect the change in the BCP Volunteer entity.

The Site also has E-Designations with the NYC Office of Environmental Remediation for hazardous materials, air quality, and noise. The Site is being redeveloped with a mixed-use residential and commercial building. Restricted residential use is proposed for the Site.

Currently, the Site is a vacant, partially concrete-paved lot with no structures. The Site was previously developed with a gasoline service station that included a one-story convenience store, a sales kiosk, and a canopy-covered gasoline dispenser area, which ceased operations in November 2021. All on-site buildings were demolished in July through August 2022.

The surrounding area is developed primarily with automotive, commercial, transit, and residential uses. The underground NYC Transit subway tracks for the 4- and 5-Trains run beneath Grand Concourse, located west-adjacent to the Site.

Summary of the Remedial Investigation Report

The scope included in the Remedial Investigation (RI) Report (RIR) included a 2022 RI and 2025 Supplemental RI (SRI) and are described below.

2022 Remedial Investigation Scope

- A geophysical survey across the Site;
- Advancement of 14 soil borings (RI-SB-16 through RI-SB-29) to either 15 feet below ground surface (bgs) or weathered bedrock (whichever was encountered first), with the exception of the borings retrofitted to monitoring wells described below;
- Four borings (RI-SB-18, RI-SB-21, RI-SB-22 and RI-SB-23) to be retrofitted with monitoring wells (RI-MW-18, RI-MW-21, RI-MW-22, and RI-MW-23) were advanced to approximately 5 feet into the groundwater table for well installation (at approximately 15 to 25 feet bgs). An additional monitoring well (RI-MW-31) was attempted; however, refusal was encountered (on multiple attempts) on shallow weathered bedrock at approximately 14.5 feet bgs before encountering groundwater. Based upon communication with NYSDEC, as groundwater was not encountered above bedrock in the vicinity of the proposed well, the well did not need to be relocated or installed;
- Groundwater elevation survey using the installed monitoring wells; and
- Installation of six temporary soil vapor points (RI-SV-16 through RI-SV-20, and RI-SV-30) across the Site. Soil vapor points RI-SV-16, RI-SV-17, and RI-SV-20 were installed at a depth of approximately 12 feet bgs; while RI-SV-19 was installed approximately 6 inches beneath the concrete slab within the former convenience store. Soil vapor points RI-SV-18 and RI-SV-30 were installed to approximately 10 feet bgs.

2025 Supplement Remedial Investigation Scope

- Advancement of 42 soil borings (within eight designated grids labeled as A1 through A4 and B1 through B4, with borings labeled as SRI-SB-A1-1 through SRI-SB-B4-4) to 15 feet bgs or weathered bedrock, whichever was encountered first.

Soil/Fill Contamination

Based on the results of the RIR, soil is a media of concern at the Site. The following were detected above applicable comparison criteria:

- The volatile organic compound (VOC) ethylbenzene was detected above its Protection of Groundwater Soil Cleanup Objective (PGWSCO) and Unrestricted Use Soil Cleanup Objective (UUSCO), but below its Restricted Residential Soil Cleanup Objective (RRSCO) at a concentration of 9.8 milligrams per kilogram (mg/kg).
- The semivolatile organic compounds (SVOCs) 4-methylphenol, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, dibenz(a,h)anthracene, and indeno(1,2,3-c,d)pyrene were detected at concentrations above their RRSCOs at concentrations up to 4.5 mg/kg [benzo(b)fluoranthene and chrysene]. Two additional SVOCs [4-methylphenol and benzo(k)fluoranthene] were detected above their respective UUSCOs but below their RRSCOs.
- The following five metals were detected above their RRSCOs: barium (max. 1,630 mg/kg), cadmium (max. 4.5 mg/kg), copper (max. 282 mg/kg), lead (max. 1,240 mg/kg), and mercury (max. 43.2 mg/kg). Four other metals (arsenic, hexavalent chromium, nickel, and zinc) were detected above their UUSCOs but below their RRSCOs.
- Polychlorinated biphenyls (PCBs) were not detected above laboratory reporting limits in any of the soil samples.
- The pesticides 4,4'-DDT, aldrin, and dieldrin were detected at concentrations above their UUSCOs, but below their RRSCOs, up to 0.048 mg/kg (dieldrin).
- The per- and polyfluoroalkyl substances (PFAS) perfluorooctanesulfonic acid (PFOS) and perfluorooctanoic acid (PFOA) were detected in one or more soil samples at concentrations above their Unrestricted Use Guidance Values and Protection of Groundwater Guidance Values, but below their Restricted Residential Guidance Values, at concentrations up to 3.21 and 0.92 parts per billion, respectively.
- Visual, olfactory, and photoionization detector (PID) soil screening of the soil borings indicated two petroleum hotspots extending to depths up to 20 to 25 feet bgs (terminus of the borings before refusal on apparent weather bedrock) in the western and southwestern portions of the Site.

Groundwater Contamination

- The VOCs benzene, isopropylbenzene, m/p-xylenes, methyl tert-butyl ether (MTBE), n-propylbenzene, sec-butylbenzene, and toluene were detected in one well (RI-MW-23) above their respective Ambient Water Quality Standards and Guidance Values (AWQSGVs) at up to 32 micrograms per liter (µg/L) (benzene).
- The SVOCs benzo(a)anthracene (max. 0.91 µg/L), benzo(a)pyrene (max. 0.62 µg/L), and phenol (max. 3.3 µg/L) were detected in one well (RI-MW-22) above their respective AWQSGVs. These SVOC concentrations are believed to be attributed to sediment entrained in the sample, due to elevated turbidity in the unfiltered sample.
- Twenty metals were detected in the total (unfiltered) groundwater samples, and five metals (iron, lead, magnesium, manganese, and sodium) were detected above the AWQSGVs in one or more samples.

Total iron was detected in all samples and the blind duplicate sample at concentrations up to 5,100 µg/L; lead was detected in two samples and the blind duplicate sample at concentrations up to 34.4 µg/L; magnesium was detected in all samples and the blind duplicate sample at concentrations up to 52,500 µg/L; manganese was detected in all samples and the blind duplicate sample at concentrations up to 366 µg/L; and sodium was detected in all samples and the blind duplicate sample at concentrations ranging up to 399,000 µg/L. These compounds can likely be attributed to sediment entrained in the samples and naturally occurring compounds

- Nineteen metals were detected in the dissolved (filtered) groundwater samples, and two metals (magnesium and sodium) were detected above the AWQSGVs in one or more samples. Dissolved magnesium was detected in all samples and the blind duplicate sample at concentrations ranging up to 52,400 µg/L; and dissolved sodium was detected in all samples and the blind duplicate sample at concentrations ranging up to 486,000 µg/L. These metals are attributed to naturally occurring compounds in groundwater.
- PCBs and pesticides were not detected above laboratory reporting limits in any of the groundwater samples.
- Eleven PFAS compounds were detected in one or more of the groundwater samples. PFOA and PFOS were detected in all three samples (and the blind duplicate sample) at concentrations ranging from 12.3 to 38.9 parts per trillion (ppt), above their respective NYSDEC Screening Levels.

Soil Vapor Contamination

Six soil vapor samples were collected during the RI, and 37 VOCs were detected in one or more of the soil vapor samples analyzed. Although there are currently no regulatory or published guidance values for VOCs in soil vapor, soil vapor data was used to assess the potential for exposure to receptors and to help define the nature and extent of contamination at the Site.

VOCs associated with petroleum [including benzene, toluene, ethylbenzene, and xylenes, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, 2,2,4-trimethylpentane, 2-hexanone, 4-ethyltoluene, butane, cyclohexane, methyl ethyl ketone, methyl isobutyl ketone (4-methyl-2-pentanone), n-heptane, n-hexane, and MTBE] were detected in one or more samples at concentrations up to 670,000 micrograms per cubic meter (µg/m^3) (2,2,4-trimethylpentane from a diluted analysis of RI-SV-16_20220204).

VOCs associated with solvents [including carbon tetrachloride, cis-1,2-dichloroethylene (cis-1,2-DCE), tetrachloroethylene (PCE), and trichloroethylene (TCE)] were detected in one or more samples at concentrations up to 11 µg/m^3 (PCE in RI-SV-30_20221025).

Qualitative Human Health Exposure Assessment

A Qualitative Human Health Exposure Assessment (QHHEA) was included in the RIR, which was performed to determine whether the Site poses an existing or future health hazard to the Site's exposed or potentially exposed population. The RI and SRI were sufficient to complete the QHHEA. Currently, the Site is a vacant, partially concrete-paved lot with gravel covering the locations of the removed aboveground features of the gasoline service station and Interim Remedial Measure (IRM) underground storage tank (UST) excavation. Therefore, potential actual exposure through dermal contact or ingestion route of exposure is unlikely. After Site redevelopment, direct contact with contaminants in sub-surface soil would be prevented by the building slab. Additionally, with no Site occupants, inhalation of contaminants via soil vapor intrusion is not a concern. However, the potential exists for inhalation of contaminated vapor for any future on-site buildings. A soil vapor intrusion evaluation with confirmatory indoor air sampling will be required prior to occupancy of any future on-site buildings.

Once remediation and redevelopment activities begin, any potential exposure pathway from contaminated soil/fill to construction workers or other off-site receptors will be controlled by implementation of the Health and Safety Plan (HASP) and Community Air Monitoring Program (CAMP).

Summary of the Interim Remedial Measures

IRMs were performed at the Site from 2022 through 2025. These activities included: demolition of the existing Site structures; closure and removal of three out-of-service USTs, fill ports, and vent lines; removal of the former SVE system subgrade components; excavation for a soil hotspot in the northern portion of the Site containing elevated concentrations of lead (non-hazardous); and endpoint soil sampling in locations where excavation and removal activities occurred. These IRM activities were performed in accordance with the NYSDEC-approved work plan dated September 2022 and the IRM Modification Request letter dated February 20, 2025. At completion of the IRM activities, AKRF prepared an IRM Construction Completion Report, approved by NYSDEC in February 2026, to document these IRM activities.

Summary of the Remedy

1. A remedial design program will be implemented to provide the details necessary for the construction, operation, optimization, maintenance, and monitoring of the remedial program. Green remediation principles and techniques will be implemented to the extent feasible in the design, implementation, and Site management of the remedy, as per the NYSDEC Division of Environmental Remediation (DER) Green Remediation guidance document (DER-31). The major green remediation components are as follows:

    a. Considering the environmental impacts of treatment technologies and remedy stewardship over the long term;

    b. Reducing direct and indirect greenhouse gases and other emissions;

    c. Increasing energy efficiency and minimizing use of non-renewable energy;

    d. Conserving and efficiently managing resources and materials;

    e. Reducing waste, increasing recycling, and increasing reuse of materials which would otherwise be considered a waste;

    f. Maximizing habitat value and creating habitat when possible;

    g. Fostering green and healthy communities and working landscapes which balance ecological, economic, and social goals; and

    h. Integrating the remedy with the end use where possible and encouraging green and sustainable re-development.

    As part of the remedial design program, to evaluate the remedy with respect to green and sustainable remediation principles, an environmental footprint analysis was completed. Water consumption, greenhouse gas emissions, renewable and non-renewable energy use, waste reduction and material use were estimated, as well as goals for the project related to these green and sustainable remediation metrics. The project design specifications include detailed requirements to achieve the green and sustainable remediation goals. Further, progress with respect to green and sustainable remediation metrics will be tracked during implementation of the Remedial Action and reported in the Final Engineering Report (FER), including a comparison to the included goals. Additionally, the remedial design program includes a climate change vulnerability assessment to evaluate the impact of climate change on the Site and the proposed remedy.

2. Demolition and abatement (e.g., asbestos, universal waste, etc.) of any remaining materials or foundations from the former gasoline station.
3. Excavation and off-site disposal of soil above RRSCOs and petroleum-related VOCs above PGWSCOs to achieve a Track 2 remedy. At a minimum, this would consist of 5-foot excavation across the Site, with three hotspots to depths of approximately 8.5 to 11 feet bgs, and two petroleum hotspots to depths of 20 to 25 feet bgs. It is estimated that approximately 11,600 cubic yards of contaminated soil will be removed from the Site.
4. Collection and laboratory analysis of confirmatory endpoint samples across the Site at the remedial excavation depth to document remaining concentrations of contaminants in soil after remedial excavation is complete. Endpoint sampling will occur around any additional areas of concern identified during the remedial action based on the sampling frequency outlined in Section 5.4 of DER Technical Guidance for Site Investigation and Remediation (DER-10).
5. A contingency plan for discovery of an unknown source of contamination or areas of concern that may require remediation.
6. Any unknown/unregistered tanks and associated piping, other structures associated with a source of contamination, and/or grossly contaminated soil/fill, if encountered, will be removed in accordance with applicable regulations.
7. Installation of support of excavation (SOE) necessary to enable excavation of contaminated soil/fill. SOE installation will comply with applicable local and state-controlled inspections.
8. A site-specific HASP and CAMP will be implemented during all ground-intrusive Site activities, which includes soil disturbance and loading activities, to monitor levels of VOCs and airborne particulates within the active work zones and around the perimeter of the Site.
9. Screening for indications of contamination (by visual means, odor, and monitoring with a PID soil during all ground-intrusive Site work, including soil disturbance and loading activities.
10. Characterization and off-site disposal of all materials removed from the Site in accordance with all Federal, State, and local rules and regulations for handling, transport, and disposal. Waste disposal facilities will be selected based on the data collected to date and the results of the planned waste classification sampling.
11. Importation of clean fill meeting the requirements of 6 New York Codes, Rules and Regulations (NYCRR) Part 375-6.7(d) to replace the excavated soil and/or to establish the design grades or over-excavated areas. On-site soil that does not exceed RRSCOs for any compound or PGWSCOs for VOCs may be used on-site to backfill the excavation areas or re-grade the Site. Soil exceeding the UUSCO for 1,4-dioxane will not be imported, per DER-10: Appendix 5 - Allowable Constituent Levels for Imported Fill or Soil, Subdivision 5.4(e). If PFOA or PFOS are detected in any sample at or above the RRGVs, it will also be tested by the Synthetic Precipitation Leaching Procedure (SPLP). If the SPLP concentrations of PFOA and PFOS are at or above 10 ppt, the soil will not be reused or imported. Analytical results will be compared to Table 375-6.8(b) of 6 NYCRR Part 375 and submitted to NYSDEC via a *Request to Import/Reuse Soil or Fill* form for review and approval prior to importation and placement on-site. All imported soil or soil proposed for reuse requires NYSDEC review prior to on-site placement. Excavated bedrock from the Site may be reused below the composite cover system (if one is necessary) without the need for sampling unless unsuitable due to visual, olfactory, and/or PID readings indicate contamination.
12. Dewatering in accordance with all federal, state, and local regulations, as necessary, to enable the remedial excavation activities.

13. Groundwater treatment will be performed. This program will consist of surface application of a Regenesis Oxygen Release Compound® (ORC) at the base of remedial excavation in the petroleum hotspots to address groundwater contamination associated with NYSDEC Spill Nos 98-14075 and 01-11974. The ORC application will address potential residual contamination in soil at/below the water table. Following groundwater treatment, four permanent 2-inch diameter polyvinyl chloride (PVC) groundwater monitoring wells will be installed at the Site to monitor petroleum-related VOC concentrations. Quarterly groundwater sample collection will be implemented to evaluate performance of the remedy. Quarterly groundwater monitoring will continue until approved otherwise by New York State Department of Health (NYSDOH) and NYSDEC
14. A soil vapor intrusion evaluation including confirmatory indoor air sampling will be conducted in the future on-site buildings. The soil vapor intrusion evaluation will include indoor air samples collected after the building envelope is completed and the heating, ventilation, and air conditioning system is started. A workplan will be provided for review/comment to NYSDEC and NYSDOH and will include a written evaluation of the soil vapor intrusion exposure pathway, proposed indoor air sampling locations, and a schedule for conducting the sampling prior to occupancy.
15. Recording of an Environmental Easement with the NYC Register to prevent future exposure to any residual contamination remaining at the Site. The Environmental Easement will: require the remedial parties/Site owners to complete and submit a periodic certification of Engineering Controls and Institutional Controls to NYSDEC in accordance with Part 375-1.8 (h)(3); allow the use and development of the Site for restricted residential use as defined by Part 375-1.8(g), although land use is subject to local zoning laws; restrict the use of groundwater as a source of potable or process water without necessary water quality treatment, as determined by NYSDOH and NYC Department of Health; and require compliance with a Site-specific NYSDEC-approved Site Management Plan (SMP).
16. Preparation of an SMP for long term management of residual contamination as required by the Environmental Easement including plans for: 1) Engineering Controls and Institutional Controls, 2) monitoring (including groundwater monitoring), 3) operation and maintenance, and 4) reporting.
17. If Track 2 restricted residential use cleanup is not achieved in certain areas due to SOE limits, the remedy will achieve a Track 4 cleanup in those areas. The contingent Track 4 cleanup would require many of the same elements as the Track 2 restricted residential cleanup, and also the following elements:

    - Construction and maintenance of a composite cover system to prevent human exposure to residual contaminants in soil/fill remaining under the Site, which will consist of: 1) concrete building foundations, which doubles as a demarcation barrier, in areas within the building footprint; and/or 2) paved surfaces underlain by a demarcation barrier in roadway and sidewalk areas. Any fill material brought to the Site will meet the Soil Cleanup Objectives for cover material as set forth in 6 NYCRR Part 375-6.7(d).

    Inclusion of soil management provisions in the SMP, including an Excavation Work Plan.

REMEDIAL ACTION WORK PLAN

1.0 INTRODUCTION

This Remedial Action Work Plan (RAWP) was prepared by AKRF, Inc. (AKRF) on behalf of 350 GC Property Owner LLC (the "Volunteer") for the 350 Rising site, located at 350 Grand Concourse in the Mott Haven section of the Bronx, New York (hereafter referred to as the "Site"). The Site is identified on the New York City (NYC) Tax Map as Bronx Tax Block 2341, Lot 42. A Site Location Map is provided as Figure 1.

The Site was entered into the New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP) on May 4, 2022 with Brownfield Cleanup Agreement (BCA) Index No. C203153-04-22. The Volunteer acquired the Site from 350 Rising LLC (Former Volunteer) in December 2024, and a BCA Amendment was approved by NYSDEC on February 12, 2025 to reflect the change in the BCP Volunteer entity. The BCP Site boundaries are shown on Figure 2.

The Site also has E-Designations with the NYC Office of Environmental Remediation (NYCOER) for hazardous materials, air quality, and noise. The Site is being redeveloped with a mixed-use residential and commercial building. Restricted residential use is proposed for the Site.

This RAWP summarizes the nature and extent of contamination as determined from data gathered during the Remedial Investigation (RI) activities performed in 2022 and the Supplemental RI (SRI) activities performed in 2025. It provides an evaluation of Remedial Action alternatives, their associated costs, and the recommended and preferred remedy. The remedy described in this RAWP is consistent with the procedures defined in NYSDEC Division of Environmental Remediation (DER) Technical Guidance for Site Investigation and Remediation (DER-10), and Green Remediation (DER-31), and complies with all applicable standards, criteria and guidance (SCGs), as listed in Appendix A. The remedy described in this document also complies with all applicable Federal, State and local laws, regulations and requirements. The NYSDEC and New York State Department of Health (NYSDOH) have yet to determine if the Site poses a significant threat to human health and the environment. The RI and SRI for this Site did not identify fish and wildlife resources.

1.1 Site Location and Description

The 31,045 square-foot (0.71-acre) Site is located in the County of Bronx, New York, New York and is identified as Block 2341, Lot 42 on the NYC Tax Map. Historically, the Site was referred to as Lots 42 and 47; Lot 47 was associated with the historical address 370 Grand Concourse before it was merged with Lot 42 into a single lot (identified as Lot 42). The Site is zoned as C6-2A (commercial) with an R8A (residential) equivalent. Currently, the Site is a vacant partially concrete-paved lot with no structures. The Site was previously developed with a gasoline service station that included a one-story convenience store, a sales kiosk, and a canopy covered gasoline dispenser area, which ceased operations in November 2021. All on-site buildings were demolished in July through August 2022.

A boundary map is attached to the BCA as required by Environmental Conservation Law (ECL) Title 14 Section 27-1419. The Site is fully described in the Metes and Bounds provided in Appendix B. The Site location is shown on Figure 1, and a Site Plan is provided as Figure 2.

1.2 Contemplated Redevelopment Plan

The Remedial Action to be performed under the RAWP is intended to make the Site protective of human health and the environment consistent with the contemplated end use. The proposed redevelopment plan and end use is described here to provide the basis for this assessment. However,

the Remedial Action contemplated under this RAWP may be implemented independent of the proposed redevelopment plan.

The proposed redevelopment plan is to construct a 14-story mixed-use commercial and residential building with a cellar. A grocery store will be located on the ground floor, with residential units above. The cellar will include parking, back-of-house uses for the grocery store, and amenity space for the residential apartments. The foundation will be constructed at approximately 15 feet below ground surface (bgs) with two elevator pits at approximately 20 feet bgs (one on the western boundary and one in the southeast corner), except for a 10-foot setback along the northern boundary. In the portion of the 10-foot foundation setback, the foundation will be slab-on-grade constructed at approximately 1-foot bgs with a third elevator pit in the center at approximately 5 feet bgs. The 10-foot setback is required due to structural concerns with the neighboring building to the north. The architectural and structural plans for the redevelopment are included in Appendix C.

Groundwater beneath the Site is from approximately 14 to 16 feet bgs (with the exception of 1 of the 10 monitoring wells, RI-MW-03, measured during the RI at approximately 18 feet bgs), and weathered bedrock is as shallow as 5 feet bgs in some portions of the Site. The foundation will be constructed on top of bedrock in some portions and into, or near, the groundwater table, with the exception of the portion of the foundation that has the 10-foot setback.

The new building will include 304 units; which 227 will be market rate and 77 will be affordable at 80% Area Median Income.

1.3 Description of Surrounding Property

The Site is bounded to the north by residential buildings, followed by East 144th Street; to the east by a vacant vegetated area, followed by Metro North Railroad tracks; to the south by a nine-story hotel, followed by various automotive repair shops; and to the west by Grand Concourse, followed by a U-Haul Storage and Moving facility. The Harlem River is the nearest surface water body, located approximately 1,000 feet southwest of the Site.

The surrounding area is developed primarily with automotive, commercial, transit, and residential uses. The underground NYC Transit (NYCT) subway tracks for the 4- and 5-Trains run beneath Grand Concourse, located west-adjacent to the Site.

Four schools (Community School for Social Justice and Health Opportunities High School both at 350 Gerard Avenue, Family Life Academy Charter School III at 370 Gerard Avenue, and KIPP NYC College Prep High School at 201 East 144th Street) are located within 500 feet of the Site. There are no daycare or health care facilities located within 500 feet of the Site.

A surrounding land use and sensitive receptor figure is provided as Figure 3 for the Site.

2.0 DESCRIPTION OF REMEDIAL INVESTIGATION FINDINGS

The Site was investigated in accordance with the scope of work presented in the NYSDEC-approved RI Work Plan (RIWP) dated June 2022 and SRI Work Plan dated April 2025. The investigations were conducted between January 31 and February 11, 2022, and on October 24, 2022; and between May 19 and May 22, 2025. The RI Report (RIR) was submitted to NYSDEC in July 2025.

2.1 Scope Summary Remedial Investigation Report

The scope included in the RIR is described below and the sampling locations are shown on Figure 2.

2022 Remedial Investigation

The 2022 RI included:

- A geophysical survey across the Site;
- Advancement of 14 soil borings (RI-SB-16 through RI-SB-29) to either 15 feet bgs or weathered bedrock (whichever was encountered first), with the exception of the borings retrofitted to monitoring wells described below;
- Four borings (RI-SB-18, RI-SB-21, RI-SB-22 and RI-SB-23) were retrofitted to monitoring wells (RI-MW-18, RI-MW-21, RI-MW-22, and RI-MW-23) and advanced to approximately 5 feet into the groundwater table for well installation (at approximately 15 to 25 feet bgs). An additional monitoring well (RI-MW-31) was attempted; however, refusal was encountered (on multiple attempts) on shallow weathered bedrock at approximately 14.5 feet bgs before encountering groundwater. Based upon communication with NYSDEC, as groundwater was not encountered above bedrock in the vicinity of the proposed well, the well did not need to be relocated or installed;
- Groundwater elevation survey using the installed monitoring wells; and
- Installation of six temporary soil vapor points (RI-SV-16 through RI-SV-20, and RI-SV-30) across the Site. Soil vapor points RI-SV-16, RI-SV-17, and RI-SV-20 were installed at a depth of approximately 12 feet bgs; while RI-SV-19 was installed approximately 6 inches beneath the concrete slab within the former convenience store. Soil vapor points RI-SV-18 and RI-SV-30 were installed to approximately 10 feet bgs.

2025 Supplement Remedial Investigation

The 2025 SRI included:

- Advancement of 42 soil borings (SRI-SB-A1-1, SRI-SB-A1-1B, SRI-SB-A1-2 SRI-SB-A1-3, SRI-SB-A1-3B, SRI-SB-A1-4, SRI-SB-A1-4B, SRI-SB-A2-1 through SRI-SB-A2-4, SRI-SB-A3-1 though SRI-SB-A3-4, SRI-SB-A4-1 though SRI-SB-A4-4, SRI-SB-B1-1 though SRI-SB-B1-4, SRI-SB-B1-4B, SRI-SB-B2-1 through SRI-SB-B2-3, SRI-SB-B2-3B, SRI-SB-B2-4, SRI-SB-B3-1, SRI-SB-B3-2A, SRI-SB-B3-2B, SRI-SB-B3-2C, SRI-SB-B3-3, SRI-SB-B3-3B, SRI-SB-B3-4, SRI-SB-B4-1A, SRI-SB-B4-1B, SRI-SB-B4-2A, SRI-SB-B4-2B, SRI-SB-B4-3, and SRI-SB-B4-4) in a generally gridded pattern to 15 feet bgs or weathered bedrock, whichever was encountered first.

2.2 Geophysical Survey and Utility Mark Outs

As required by law, Dig Safely New York was contacted to obtain utility mark outs at least three days prior to the start of all ground intrusive work for the SI, RI, and SRI.

On January 31, 2022, as part of the RI, NOVA Geophysical Services performed a geophysical survey, including ground-penetrating radar (GPR), across accessible areas of the Site to investigate the presence of potential underground storage tanks (USTs) and/or utilities. GPR uses electromagnetic wave propagation and scattering to image and identify changes in electrical and magnetic properties in the ground.

The geophysical survey concluded the following:

- Geophysical anomalies resembling potential former utilities (such as sewer, water, gas, electric, and gasoline dispenser lines) were identified throughout the Site; and
- All detected subsurface anomalies and cleared boring locations were marked on-site.

2.3 Groundwater Monitoring Well Elevation and Location Survey

On October 14, 2021 and March 4, 2022, the installed groundwater monitoring wells [including the wells installed during the 2021 Subsurface (Phase II) Investigation (SI)] were surveyed by Fehringer Surveying, P.C. of Seaford, New York, a New York State (NYS)-licensed surveyor. The elevation measurements were taken at the flush-mount manhole cover ("ground surface") and on the north side of the top of the polyvinyl chloride (PVC) casing at each of the monitoring wells. Horizontal location measurements were taken at center of the manhole cover. The vertical datum is the North American Vertical Datum of 1988 (NAVD88), while the horizontal datum is NYS Plane Coordinates Long Island Zone.

Based on site-specific measurements at the monitoring well locations taken on February 11, 2022, the groundwater elevation across the Site ranges from approximately 14.5 to 21.5 feet (NAVD88), or from approximately 14 to 16 feet bgs (with the exception of 1 of the 10 monitoring wells, RI-MW-03, measured during the RI at approximately 18 feet bgs). The inferred groundwater flow direction is southwesterly as shown on Figure 4.

2.4 Soil, Groundwater, and Soil Vapor Sampling

Soil Sampling

For the 2022 RI, 30 soil samples [plus quality assurance/quality control (QA/QC) samples) were collected for laboratory analysis from the borings. Two grab soil samples were collected from each sample location at varying depth intervals. Shallow soil samples were collected from the 2-foot intervals between ground surface and 5 feet bgs. Deep soil samples were collected from the 2-foot interval that exhibited the greatest evidence of contamination [i.e., odors, staining, and/or photoionization (PID) detections]; however, when no contamination was noted, it was collected immediately above the groundwater table or bedrock, whichever was encountered first.

For the 2025 SRI, 109 soil samples (plus QA/QC samples) were collected for laboratory analysis from the borings. At each soil boring location, one 2-foot interval grab soil sample was collected from each 5-foot interval (i.e., 0 to 5 feet bgs, 5 to 10 feet bgs, 10 to 15 feet bgs, etc.). Soil samples were biased to the interval that exhibited the greatest evidence of contamination (i.e., odors, staining, and/or PID detections).

Groundwater Sampling

For the 2022 RI, a total of three groundwater samples (plus QA/QC samples) were collected. No sample was collected from monitoring well RI-MW-21 since it was dry during the sampling event. The monitoring wells were allowed to rest a minimum of one week following installation prior to sampling. Prior to collecting the groundwater samples, the depth to groundwater and the total well depth were measured in each well using an oil-water interface probe attached to a measuring tape accurate to 0.01 feet. Sampling was in accordance with the United States Environmental Protection

Agency (EPA) low-flow groundwater sampling procedure to allow for collection of a representative sample ("Low Stress [Low Flow] Purging and Sampling Procedure for the Collection of Groundwater Samples from Monitoring Wells," dated July 30, 1996). The wells were then purged with a submersible pump. The purged water was monitored for turbidity and water quality indicators (i.e., pH, temperature, dissolved oxygen, oxidation-reduction potential, and specific conductivity) with measurements collected approximately every five minutes. Purging of the wells continued until the turbidity was less than 50 Nephelometric Turbidity Units (NTUs) for three successive readings and water quality indicators had stabilized to the extent practicable. If turbidity and/or water quality indicators did not stabilize after two hours, purging was discontinued and samples were collected. For monitoring well RI-MW-22, the well was purged for over 2 hours and turbidity remained elevated at 197 NTUs at the time of sampling. Groundwater samples could not be collected from monitoring well RI-MW-31 due to the lack of an adequate water column for sampling.

Soil Vapor Sampling

For the 2022 RI, a total of six soil vapor samples were collected. Prior to sampling, approximately three sampler volumes were purged from the sampling points. After purging, tubing was connected to a laboratory-supplied batch-certified clean 6-liter SUMMA canister equipped with a flow regulator to collect a sample over approximately 2 hours. The flow rate did not exceed 0.2 liters per minute during sampling collection. Once sampling was completed, the canisters were closed.

2.4.1 Soil Sampling Chemical Analyses

A list of the soil samples and their analyses is presented in Tables A and B below.

Table A
2022 RI Soil Sample Details

Boring	Soil Sample Depth (feet bgs)	Analytical Parameters
RI-SB-16	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	6-8	VOCs
RI-SB-17	1-3	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	9-11	VOCs
RI-SB-18	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	12-14	VOCs
RI-SB-19	3-5	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	13-15	VOCs
RI-SB-20	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	12.5-14.5	VOCs
RI-SB-21	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	6-8	VOCs
RI-SB-22	0-2, 14-16	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
RI-SB-23	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	12-14	VOCs

Boring	Soil Sample Depth (feet bgs)	Analytical Parameters
RI-SB-24	3-5	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	11-13	VOCs
RI-SB-25	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	5-7	VOCs
RI-SB-26	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	7-9	VOCs
RI-SB-27	1-3	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	12-14	VOCs
RI-SB-28	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	13-15	VOCs
RI-SB-29	0-2	VOCs, SVOCs, Pesticides, PCBs, Metals, Hexavalent Chromium, Cyanide, and PFAS
	13-15	VOCs

Notes:
VOCs – Volatile Organic Compounds
SVOCs – Semi-Volatile Organic Compounds
PCBs – Polychlorinated Biphenyls
PFAS – Per- and Polyfluoroalkyl Substances

Table B
2025 SRI Soil Sample Details

Boring	Soil Sample Depth (feet bgs)	Analytical Parameters^
SRI-SB-A1-1	3-5, 8-10, 13-15	SVOCs and Metals

	15-17	VOCs

Notes:
VOCs – Volatile Organic Compounds
SVOCs – Semi-Volatile Organic Compounds
^ Additional analyses also performed for soil waste characterization purposes.
* Samples collected for SVOCs and Metals lost by the laboratory.
** Only composite sample collected for waste characterization purposes.

2.4.2 Groundwater Sampling Chemical Analyses

The groundwater samples were analyzed for VOCs, SVOCs, PCBs, pesticides, 1,4-dioxane, PFAS, and metals (total and dissolved). Additional details on the analytical methods are included in Section 2.4.4 below.

2.4.3 Soil Vapor Sampling Chemical Analyses

The soil vapor samples were analyzed for VOCs. Additional details on the analytical methods are included in Section 2.4.4 below.

2.4.4 Summary Chemical Analytical Work Performed

The RI and SRI chemical analytical work has been performed under a QA program, which is summarized in Tables C and D below.

Table C
2022 RI QA Program

Factor	Description
QA Officer	The chemical analytical QA/QC was directed by Deborah Shapiro of AKRF.
Third Party Data Validator	The third-party data validation was performed by Lori Beyer of L.A.B. Validation Corp.
Chemical Analytical Laboratory	The chemical analytical laboratory used for the RI was Eurofins of: Edison, New Jersey; Lancaster, Pennsylvania; and Burlington, Vermont.
Chemical Analytical Methods	Soil analytical methods: • TCL VOCs by EPA Method 8260C (rev. 2006) • TCL SVOCs by EPA Method 8270D (rev. 2007) • Pesticides by EPA Method 8081B (rev. 2000) • PCBs by EPA Method 8082A (rev. 2000) • TAL Metals by EPA Method 6000/7000 series (rev. 2007) • Cyanide by EPA Method 9012B • Hexavalent chromium by EPA Method 7196A (rev. 1992) • 21 compound PFAS list by Modified EPA Method 537 Groundwater analytical methods: • TCL VOCs by EPA Method 8260C (rev. 2006) • TCL SVOCs by EPA Method 8270D (rev. 2007) • Pesticides by EPA Method 8081B (rev. 2000) • PCBs by EPA Method 8082A (rev. 2000) • TAL Metals (total and dissolved) by EPA Method 6000/7000 series (rev. 2007) • Hexavalent chromium by EPA Method 7196A (rev. 1992) • 1,4-Dioxane by EPA Method 8270D by SIM • 21 compound PFAS list by Modified EPA Method 537 Soil vapor analytical method: • VOCs by EPA Method TO-15

2.5 Geological Conditions

The stratigraphy of the Site consisted of fill to approximately 4 to 20 feet bgs, characterized by silt with sand, brick, gravel, asphalt, and glass across the Site. The fill was generally underlain by either apparent native soil (silt, sand, and clay with gravel) to the terminus of the borings (5 to 25 feet bgs) or apparent weathered bedrock encountered between 5 to 24 feet bgs. Soil was field screened with a PID to measure relative concentrations of VOCs. PID readings and observations (i.e., odors and the presence of NAPL) are summarized in Table E below. Petroleum-like odors, staining, and/or elevated PID readings [up to 2,665 parts per million (ppm)] were noted in 19 of the 56 borings. Non-aqueous phase liquid (NAPL) was observed in one soil boring, SRI-SB-A1-1B, at approximately 5 feet bgs. No odors or elevated PID readings were observed in the remaining borings. The sample locations are shown on Figure 2.

Table E
2022 RI and 2025 SRI Soil Boring PID Readings and Observations

Boring	Boring Depth	Notable PID Readings		Observations (feet bgs)
		ppm	Depth (feet bgs)	
RI-SB-16	15	4.8 – 629	12 -15*	Petroleum-like odors at 13 – 15*
RI-SB-22	20	0.8 – 47.4	3 – 17	Petroleum-like odors at 17
RI-SB-23	20	1.5 – 1,300	12 – 20*	Petroleum-like odors at 20*
RI-SB-25	10^	Non-Detect		Petroleum-like odors at 3
RI-SB-29	20	0.2 – 480	10 – 20*	Petroleum-like odors at 15 – 20*
SRI-SB-A1-1B	15	6.1 – 148.6	2 – 15	Petroleum-like odors and NAPL at 5
SRI-SB-A1-4B	5^	3.5 – 13.8	1 – 5*	Petroleum-like odors at 2
SRI-SB-A2-3	15	3.4	10 – 15	None
SRI-SB-A3-3	15	0.1 – 19.0	1 – 15	None
SRI-SB-B1-4	24^	3.3 – 762.4	12 – 24*	Petroleum-like odors at 14 – 24*
SRI-SB-B1-4B	24^	30.6 – 730.8	20 – 24*[1]	Petroleum-like odors at 20 – 24*
SRI-SB-B2-3	24^	0.4 – 1,588	3 – 24*	Petroleum-like odors at 10 – 24*
SRI-SB-B2-3B	24^	175.2 – 182.4	20 – 24*[1]	None
SRI-SB-B3-2C	20^	0.7 – 2,665	12 – 20*	Petroleum-like odors at 13 – 15

Boring	Boring Depth	Notable PID Readings		Observations (feet bgs)
		ppm	Depth (feet bgs)	
SRI-SB-B3-4	18^	0.3 – 1,750	1 – 18*	Petroleum-like odors at 10 – 18*
SRI-SB-B4-1B	17^	0.7 – 12.7	1 – 15	Petroleum-like odors at 5 – 10
SRI-SB-B4-2B	20^	2.7 – 1,068	13 – 20*	Petroleum-like odors at 13 – 20*
SRI-SB-B4-3	19^	0.3 – 1,192	0 – 19*	Petroleum-like odors at 12 – 19*
SRI-SB-B4-4	20^	8.2 – 1,274	10 – 20*	Petroleum-like odors at 10 – 16

Notes:
^ - Boring encountered refusal at suspect weathered bedrock.
* - PID reading and/or observations was at the boring terminus.
[1] – Boring advanced directly to 20 feet bgs to collect an additional VOC sample based on the corresponding 'A' boring at the same location with no soil sleeves before 20 feet bgs; therefore, there was no soil to log shallower than 20 feet bgs.

2.6 Contamination Conditions

The data compiled were compared to the following SCGs to determine the nature and extent of the contamination area at the Site:

- **Soil/Fill** – NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCOs), Restricted Residential Soil Cleanup Objectives (RRSCOs) for all compounds, and/or Protection of Groundwater Soil Cleanup Objectives (PGWSCOs) for VOCs only; and Unrestricted Use Guidance Values (UUGVs), Restricted Residential Use Guidance Values (RRGVs), and Protection of Groundwater Guidance Values (PGWGVs) for PFAS.
- **Groundwater** – NYSDEC Ambient Water Quality Standards and Guidance Values (AWQSGVs) and PFAS Screening Levels.
- **Soil Vapor** – As standards for soil vapor do not exist, the data is presented without comparative standards

2.7 Remedial Investigation Report Findings

Soil, groundwater, and soil vapor analytical results included the RIR are included in Appendix D. Concentration maps showing analytes detected above applicable standards are shown for soil on Figures 5A through 5D (additionally the PFAS data from the 2021 Phase II Investigation are included); for groundwater on Figure 6; and for soil vapor on Figure 7. The findings of the RIR are summarized in the sections below:

2.7.1 Soil/Fill Contamination

Based on the results of the RIR, soil is a media of concern at the Site. The following were detected above applicable

- The VOC ethylbenzene was detected above its respective PGWSCO and UUSCO, but below its RRSCO at a concentration of 9.8 milligrams per kilogram (mg/kg).

  Acetone was also detected at concentrations up to 0.29 mg/kg, above its respective PGWSCO and UUSCO, but below its RRSCO. According to the associated Data Usability Summary Reports (DUSRs), acetone is common laboratory contaminant but was not detected in the corresponding laboratory blanks; therefore, the data should be used with caution when making decisions regarding detections in field samples.

- The SVOCs 4-methylphenol, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, dibenz(a,h)anthracene, and

indeno(1,2,3-c,d)pyrene were detected at concentrations above their RRSCOs at concentrations up to 4.5 mg/kg [benzo(b)fluoranthene and chrysene]. An additional two SVOCs [4-methylphenol and benzo(k)fluoranthene] were detected above their respective UUSCOs but below their RRSCOs.

- The following five metals were detected above their RRSCOs: barium (max. 1,630 mg/kg), cadmium (max. 4.5 mg/kg), copper (max. 282 mg/kg), lead (max. 1,240 mg/kg), and mercury (max. 43.2 mg/kg). Five other metals (arsenic, hexavalent chromium, nickel, and zinc) were detected above their UUSCOs but below their RRSCOs.
- PCBs were not detected above laboratory reporting limits in any of the soil samples.
- The pesticides 4,4'-DDT, aldrin, and dieldrin were detected at concentrations above their UUSCOs, but below their RRSCOs, up to 0.048 mg/kg (dieldrin).
- Perfluorooctanesulfonic acid (PFOS) and perfluorooctanoic acid (PFOA) were detected in one or more soil samples at concentrations above their UUGVs and PGWGVs, but below their RRGVs, at concentrations up to 3.21 and 0.92 parts per billion (ppb), respectively.
- Visual, olfactory, and PID soil screening of the soil borings indicated two petroleum hotspots to depths up to 20 to 25 feet bgs (terminus of the borings before refusal on apparent weather bedrock) in the western and southwestern portions of the Site.

Soil analytical results from the RIR are included in Appendix D. Concentration maps showing analytes detected above applicable standards are shown for soil on Figures 5A through 5D (additionally the PFAS data from the 2021 Phase II Investigation are included).

2.7.2 Groundwater Contamination

- The VOCs benzene, isopropylbenzene, m/p-xylenes, methyl tert-butyl ether (MTBE), n-propylbenzene, sec-butylbenzene, and toluene were detected in one well (RI-MW-23) above their respective AWQSGVs up to 32 micrograms per liter (µg/L) (benzene).
- The SVOCs benzo(a)anthracene (max. 0.91 µg/L), benzo(a)pyrene (max. 0.62 µg/L), and phenol (max. 3.3 µg/L) were detected in one well (RI-MW-22) above their respective AWQSGVs. These SVOC concentrations are believed to be attributed to sediment entrained in the sample, due to elevated turbidity (197 NTUs) that did not dissipate during low-flow purging and since the sample was an unfiltered sample.
- Twenty metals were detected in the total (unfiltered) groundwater samples, and five metals (iron, lead, magnesium, manganese, and sodium) were detected above the AWQSGVs in one or more samples. Total iron was detected in all samples and the blind duplicate sample at concentrations ranging up to 5,100 µg/L; lead was detected in two samples and the blind duplicate sample at concentrations up to 34.4 µg/L; magnesium was detected in all samples and the blind duplicate sample at concentrations ranging up to 52,500 µg/L; manganese was detected in all samples and the blind duplicate sample at concentrations ranging up to 366 µg/L; and sodium was detected in all samples and the blind duplicate sample at concentrations ranging up to 399,000 µg/L. These compounds can likely be attributed to sediment entrained in the samples and naturally occurring compounds.
- Nineteen metals were detected in the dissolved (filtered) groundwater samples, and two metals (magnesium and sodium) were detected above the AWQSGVs in one or

more samples. Dissolved magnesium was detected in all samples and the blind duplicate sample at concentrations ranging up to 52,400 µg/L; and dissolved sodium was detected in all samples and the blind duplicate sample at concentrations ranging up to 486,000 µg/L. These metals are attributed to naturally occurring compounds in groundwater.

- PCBs and pesticides were not detected above laboratory reporting limits in any of the groundwater samples.
- Eleven PFAS compounds were detected in one or more of the groundwater samples. PFOA and PFOS were detected in all three samples (and the blind duplicate sample) at concentrations ranging from 12.3 to 38.9 parts per trillion (ppt), above their respective NYSDEC Screening Levels.

Groundwater analytical results from the RIR are included in Appendix D. A concentration map showing analytes detected above applicable standards for groundwater are shown on Figure 6.

2.7.3 Soil Vapor Contamination

Six soil vapor samples were collected during the RI, and 37 VOCs were detected in one or more of the soil vapor samples analyzed. Although there are currently no regulatory or published guidance values for VOCs in soil vapor, soil vapor data was used to assess the potential for exposure to receptors and to help define the nature and extent of contamination at the Site.

VOCs associated with petroleum [including benzene, toluene, ethylbenzene, and xylenes (collectively referred to as BTEX), 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, 2,2,4-trimethylpentane, 2-hexanone, 4-ethyltoluene, butane, cyclohexane, methyl ethyl ketone (MEK), methyl isobutyl ketone (4-methyl-2-pentanone), n-heptane, n-hexane, and MTBE] were detected in one or more samples at concentrations up to 670,000 micrograms per cubic meter (µg/m^3) (2,2,4-trimethylpentane from a diluted analysis of RI-SV-16_20220204).

VOCs associated with solvents [including carbon tetrachloride, cis-1,2-dichloroethylene (cis-1,2-DCE), tetrachloroethylene (PCE), and trichloroethylene (TCE)] were detected in one or more samples at concentrations up to 11 µg/m^3 (PCE in RI-SV-30_20221025).

Soil vapor analytical results from the RIR are included in Appendix D. A concentration map showing analytes detected for soil vapor are shown on Figure 7.

2.7.4 Conceptual Model of Site Contamination

The affected media at the Site includes soil, groundwater, and soil vapor. Soil/fill is contaminated with petroleum-related contamination (VOCs, visual, olfactory, and elevated PID readings associated with petroleum), SVOCs, metals, pesticides and PFAS; groundwater is contaminated with petroleum-related VOCs, SVOCs (likely attributed to sediment entrained in the sample), metals (likely attributed to sediment entrained in the samples and naturally occurring conditions), and PFAS; and soil vapor is contaminated with petroleum-related VOCs and chlorinated solvent-related VOCs (CVOCs).

Elevated concentrations of petroleum-related contamination, SVOCs, metals, and to a lesser extent, pesticides and PFAS, were detected in soil/fill across the Site. Elevated concentrations of VOCs, and to a lesser extent SVOCs (likely attributed to sediment entrained in the sample), metals (likely attributed to sediment entrained in the samples and

naturally occurring conditions), and PFAS, were detected in groundwater on the western and southern portion of the Site, and elevated concentrations of petroleum-related VOCs and CVOCs were detected in soil vapor on the southern and western portions of the Site.

The petroleum-related contamination appears to be related to former gasoline stations on the Site, including former USTs and the associated NYSDEC Spill Nos 98-14075 and 01-11974 previously assigned to the Site. The petroleum contamination may be migrating off-site. Interim Remedial Measures (IRMs) were performed in 2022; however, the soil source of petroleum contamination remains.

The SVOCs, metals, and pesticides contamination appears to be related to historic fill. PFAS were detected in both soil and groundwater; however, based on the relatively low levels in soil (below RRGVs) is appears that an off-site source may be contributing to the PFAS detected in groundwater. The CVOCs detected in soil vapor are also likely a result of an off-site source since CVOCs were not detected in the soil and groundwater above their applicable standards.

2.8 Significant Threat

The NYSDEC and NYSDOH have determined that this Site does not pose a significant threat to human health and the environment. Notice of that determination has been provided for public review. A copy of the notice is included in Appendix E.

2.9 Site History

2.9.1 Past Uses and Ownership

Historic records indicate that as early as 1891, the Site was developed with several two- to four-story dwellings and from 1908 to 1935, and the southern portion of the Site was depicted as the NYC and HR Railroad Co. with multiple two- to four-story structures. By 1935, the Site was occupied by automotive related businesses/facilities and uses that included various gasoline filling stations, auto sales, and auto body repair with associated gasoline USTs between 1944 and 2021.

Between at least 1979 and 2001, the Site was occupied by two gasoline filling stations along the northern and southern portions. Between 2003 and 2021, the Site was occupied by a single gasoline filling station in the central portion. Site operations ceased in November 2021, and all on-site buildings were demolished in July and August 2022. The Site is currently listed on the NYSDEC Petroleum Bulk Storage (PBS) database with three closed-removed 12,000-gallon gasoline USTs, and five closed-removed 4,000-gallon gasoline USTs.

Past owners of the Site include: Mobile Oil Corporation in 1979; Amoco Oil Company in 1990; BP Products North America Inc. in 2008; and 350 Rising LLC from 2021 to 2024. The current Site owner is 350 GC Property Owner LLC (from 2024 to present).

2.9.2 Sanborn Maps

Historical fire insurance (Sanborn) maps were reviewed for indications of past uses on or near the Site that may have resulted in the generation, usage, or disposal of hazardous waste. The Sanborn maps are summarized below and included as Appendix F.

Table F
Summary of Sanborn Maps

Year	Comments
1891	**Site:** The Site was developed with several two- to four-story dwellings. A street labeled Ridge Place ran through the Site. Grand Concourse was labeled as Mott Avenue. **Surrounding Properties:** The surrounding area was developed with several one- to four-story structures. The New York Central Railroad tracks, located on the east-adjacent block, were depicted as the Hudson River, New Haven, and Hartford Railroads. Several one- to four-story residential buildings were located to the north, south, east, and west of the Site, including a property labelled Color Works to the northwest. East 140th Street to the southwest of the Site was labeled as Cheever Place.
1908	**Site:** The northern portion of the Site was similar to the 1891 Sanborn Map. The southern portion was depicted as the NYC and HR Railroad Co. with multiple two- to four-story structures, with one labeled as the Engineers Office. Ridge Place was no longer noted. **Surrounding Properties:** The south-adjacent lot buildings were labeled as construction offices for the NYC and HR Railroad Co. The remainder of the Site block was sparsely developed with one- to -four story residential buildings and a wagon builder further south. The northern portion of the west-adjacent lot was depicted with multiple structures labeled as dry color works and a drug store. The public school on the northwestern block was labeled as Public School No. 31. A building labeled as a bakery was depicted north of the Site, and a surgical dressing factory was labeled northeast of the Site across the railroad tracks. A cabinet maker was located southeast of the Site across the railroad tracks. A machine shop and woodworking company were depicted further west.
1922-1928	**Site:** The Site was not depicted. **Surrounding Properties:** The surrounding area was divided into streets.
1935	**Site:** The central portion of the Site was occupied by an auto sales yard with an office, and a one-story auto painting and repair building with an office and a paint shop. The northern and southern portions of the Site remained unchanged, with the exception of the NYC and HR Railroad Co., which was no longer labeled on the buildings. **Surrounding Properties:** The surrounding area was primarily automotive uses. The south- and east-adjacent lots on the Site block were developed with several auto repair, service, and painting shops. Two gasoline filling stations were noted further south, one with four 550-gallon gasoline USTs and the other with three 550-gallon gasoline USTs. The north-adjacent lot was developed with two five-story apartment buildings and Mott Avenue was renamed to Grand Concourse. The west-adjacent block contained: two separate two-story garages with two 550-gallon gasoline USTs each; a private garage and repair shop with three 550-gallon gasoline USTs; a Chevrolet service and show room with one 550-gallon UST; a one-story warehouse for storage of bottles and autos; and one remaining building from the dry color works structures. Further west, a fur dressing and dyeing company, a large baking company, a wagon repair shop, a machine shop, a printer, construction equipment sales and repair, and a carpet cleaning business were noted. A contractor yard was depicted north across East 144th Street, and the surgical dressing factory was now a vacant lot. The eastern block across the railroad tracks was developed with a machine shop, assembling room, blacksmith, private garage, auto house, and ice cream manufacturer with a 550-gallon UST. Further southeast, an auto repair shop with a 550-gallon gasoline UST, contractors' yards, a door and sash factory, and a casket shop were depicted. Southwest across Grand Concourse and East 140th Street, multiple auto garages with gasoline USTs, and auto repair shops were depicted.

Year	Comments
1944-1947	**Site:** The Site was depicted with two separate gasoline filling stations. The northern filling station was noted with four gasoline USTs and the southern filling station was noted with five gasoline USTs. The central portion of the Site was occupied by a two-story residential building noted to be vacant in 1944, and an auto repair shop. All other structures on the Site were removed from the Sanborn map. **Surrounding Properties:** The structures on the south- and east-adjacent lots on the Site block were mostly no longer depicted, with the exception of the two auto repair shops to the south. The lots north-adjacent and further to the south were similar to the 1935 Sanborn map. The west-adjacent block remained mostly unchanged, and the garage on the corner of Grand Concourse and East 140th Street was now depicted as a gasoline filling station with five gasoline USTs. Further west, the wagon repair shop was replaced with a garage and a large laundry corporation with multiple structures depicted. The contractor yard to the north was now developed with a coal yard and office. The auto repair shops on the southeastern block across the railroad tracks were replaced with a garment factory, the casket shop was redeveloped with a plating company, and the door and sash factory was replaced with a welding business. Southwest across Grand Concourse and East 140th Street, the auto garages were replaced with a single filling station with seven gasoline USTs.
1951	**Site:** The central portion of the Site was depicted as auto sales, auto body repair, and upholstery. The remaining buildings were labeled similarly to previous Sanborn maps. **Surrounding Properties:** The east-adjacent lot on the Site block was depicted with a paint spraying structure. The reminder of the Site block appeared similar to the 1947 Sanborn map. The west-adjacent block remained mostly unchanged, other than the demolition of the northern-most structures and replacement with a parking lot. Further west, one of the vacant lots was developed with a laundry plant. The eastern and southeastern blocks across the railroad tracks remained mostly unchanged. Southwest across Grand Concourse and East 140th Street, a private garage was developed on a vacant lot and noted with two gasoline USTs.
1977-1989	**Site:** The northern gasoline filling station was redeveloped and enlarged, replacing the previous filling station, residential building, and auto sales and repair shops. The southern portion of the Site remained unchanged. **Surrounding Properties:** The paint spraying structure was demolished on the east-adjacent lot, and the auto body repair shops and filling station to the south were reconfigured and expanded. An auto body shop was also observed east-adjacent to the Site between 1977-1978. By 1981, both gasoline stations to the south on the Site block were replaced with an auto repair shop and parking lots with no gasoline USTs noted. The west-adjacent block was developed with automotive uses and unnamed warehouses. In 1980, the central warehouse was depicted in the current configuration as the U-Haul Rental and Storage building. Further west and north, the blocks remained mostly unchanged; however, the carpet cleaner and coal yard were no longer depicted. The eastern block across the railroad tracks was now developed with a metal products warehouse, replacing the blacksmith and machine shops. Further southeast, the plating company was no longer depicted, and a filling station with parking was noted on Park Avenue until 1986. By 1989, the lot was noted as parking only. Southwest across Grand Concourse and East 140th Street, an auto service shop with no USTs was noted.
1991-2001	**Site:** The southern gasoline filling station was redeveloped on the western portion and a one-story store was depicted in the southeastern portion of the Site. The northern portion of the Site remained unchanged. **Surrounding Properties:** The Site block and the surrounding area appeared mostly unchanged from previous Sanborn maps, with some additional automotive related buildings in the southern portion of the Site block.

Year	Comments
2002	**Site:** The Site buildings were demolished, and the lots were vacant. **Surrounding Properties:** The Site block and surrounding areas remained similar to the 2001 Sanborn Map.
2003-2007	**Site:** The Site was developed with a large central gasoline filling station and a one-story commercial store in the northern portion. **Surrounding Properties:** The Site block and surrounding areas remained similar to the 2002 Sanborn Map.

In summary, historical Sanborn maps indicated that the Site was developed with several two- to four-story dwellings as early as 1891. From 1908-1935, the southern portion of the Site was depicted as the NYC and HR Railroad Co. with multiple two- to four-story structures. By 1935, the Site was occupied by automotive related businesses/facilities and uses that included various gasoline filling stations, auto sales, and auto body repair with associated gasoline USTs between at least 1944 and 2007.

Gasoline stations, auto repair and sales facilities with gasoline USTs, manufacturing, dry cleaners, auto garages, a coal yard, plating, a fur dressing and dyeing company, and painting facilities were noted in the surrounding area as early as 1891.

2.9.3 Previous Environmental Reports

Previous environmental reports are summarized below.

Phase I Environmental Site Assessment – 350 and 370 Grand Concourse, Bronx, NY, AKRF, October 2021

AKRF completed a Phase I Environmental Site Assessment (ESA) in October 2021 for the Site. The assessment revealed the following:

- The Site was observed to be a former gasoline service station, with three 12,000-gallon gasoline USTs within a tank field in the southeastern corner of the Site, two minimally filled 55-gallon drums of a gasoline/water mixture in the rear yard of the convenience store, and nine gasoline pump dispenser islands in the center of the Site. Petroleum-like staining was observed on and around each of the gasoline pump dispenser islands and within the tank field area. Multiple monitoring wells and suspected soil vapor extraction (SVE) system wells were observed throughout the Site, most of which were in a damaged and/or decommissioned condition. Two out-of-service SVE system vaults with associated gauges and hoses were observed near the eastern property line. An unidentified drywell with an unknown discharge point was observed in the northwestern corner of the Site, behind the convenience store.
- The Site was identified on historical Sanborn maps, city directories, and local records, and in the following databases for current and former operations (including various automotive services/repair and petroleum storage/filling uses): NYSDEC Petroleum Spills, Resource Conservation and Recovery Act (RCRA) Generator/Transporter, NYSDEC PBS, and the Environmental Data Resources, Inc. (EDR) Historic Auto Station. NYSDEC Spill Nos. 98-14075 and 01-11974 remain open, which are associated with the Site.
- A review of the historical city directories, Sanborn maps, and regulatory databases identified numerous automotive, commercial, and dry cleaning/laundry uses on adjacent and surrounding blocks as early as 1891.

Subsurface (Phase II) Investigation Report – 350 and 370 Grand Concourse, Bronx, NY, AKRF, October 2021

AKRF prepared a SI Report (SIR) for the Site in October 2021. The investigation was conducted to determine whether current and/or former on-site or off-site activities had adversely affected the Site's subsurface. The investigation included: a geophysical investigation; advancement of 14 soil borings; retrofitting eight borings to permanent groundwater monitoring wells; installation of nine temporary soil vapor points; and collection and laboratory analysis of 28 soil, six groundwater, and nine soil vapor samples. Groundwater was encountered between approximately 12 and 18 feet bgs.

Subsurface materials consisted of historic fill (silt with sand, brick, and gravel) from ground surface to approximately 7 to 17 feet bgs generally underlain by either apparent native soil (silt, sand, and clay with gravel) to the terminus of the borings (between 13 and 25 feet bgs) or apparent weathered bedrock encountered between 7 and 20 feet bgs. Strong petroleum-like odors and elevated PID readings ranged up to 15,000 ppm (max. reading of the PID) were noted in borings SB-02, SB-03, SB-13, and SB-14 at depths ranging between 9 to 21 feet bgs and in SB-15 at a depth of 4 to 5 feet bgs.

A summary of the analytical results (compared to the SCOs at the time of report issuance, 2021) is as follows:

Soil

- Concentrations of one or more VOCs, specifically petroleum-related VOCs, exceeded their respective UUSCOs and PGWSCOs, but not their RRSCOs, in four soil samples at concentrations up to 48 mg/kg (n-propylbenzene). The VOCs were attributed to the former usage of the Site as a gasoline station and auto repair.
- The SVOCs dibenz(a,h)anthracene and indeno(1,2,3-c,d)pyrene exceeded their respective RRSCOs in one sample collected from the top 2 feet from soil boring SB-10 at concentrations up to 1.6 mg/kg (indeno(1,2,3-c,d)pyrene). These SVOCs are considered polycyclic aromatic hydrocarbons (PAHs), a class of compounds commonly found in ash, asphalt, and petroleum products, and may have been attributable to the historic fill material observed in the boring at the corresponding depth, and/or former on-site automobile-related uses, including former USTs, along with the NYSDEC Spill Nos. 98-14075 and 01-11974.
- Barium, copper, and lead were detected at concentrations above their respective RRSCOs in three soil samples analyzed from within the historic fill layer at concentrations up to 1,970 mg/kg (copper). Elevated concentrations of other metals (hexavalent chromium, nickel, mercury, and zinc) were detected above the UUSCOs, but below the RRSCOs in multiple soil samples. These findings were attributed to the historic fill material observed in the borings at corresponding depths; however, the some of the metals detected could have been associated with the former Site usage of leaded-gasoline and/or former auto repair.
- PCBs (Aroclor 1248 and Aroclor 1254) were detected in two samples at concentrations above the UUSCOs, but below the RRSCOs at concentrations up to 0.44 mg/kg. The detected PCBs were attributed to historic fill material but may also be related to former auto repair usage/repair.
- Three pesticides (4,4'-DDE, 4,4'-DDT, and dieldrin) were also detected in samples exceeding the UUSCOs, but below the RRSCOs at concentrations up to 0.057 mg/kg

(4,4'-DDT). The detected pesticides were attributed to historic fill material, which was observed in each of the borings.

- PFOS and PFOA were detected in one or more soil samples collected from the top 2 feet bgs at concentrations up to 11.8 ppb, which may have been attributable to the former Site usage as a gasoline station and auto repair and its fire suppression equipment and/or an off-site source. These PFAS compounds were detected at concentrations above the UUGVs, but below the RRGVs.

Groundwater

- Petroleum-related VOCs were detected above AWQSGVs in four groundwater samples at concentrations up to 17,000 µg/L (m,p-xylenes) located in the west-central and southern portions of the Site, downgradient of the former dispenser islands and tank field. The VOCs were attributed to the former Site usage as a gasoline station and auto repair.
- Two SVOCs (2,4-dimethylphenol and naphthalene) were detected above AWQSGVs in two groundwater samples at concentrations up to 420 µg/L (naphthalene) located in the west-central and southern portions of the Site, downgradient of the former dispenser islands and tank field. These SVOCs may have been attributable to the historic fill material encountered and/or with the open NYSDEC petroleum spills.
- Unfiltered (total) metals, including iron, magnesium, manganese, and sodium, were detected above AWQSGVs at concentrations up to 359,000 µg/L (sodium) in multiple groundwater samples, whereas the filtered (dissolved) sample exceedances were limited to magnesium, manganese, and sodium at concentrations up to 331,000 µg/L (sodium). The exceedances were likely indicative of natural conditions or representative of regional conditions.
- No PCBs or pesticides were detected in any of the groundwater samples collected.
- PFOS and PFOA were detected above their Screening Levels at concentrations up to 165 ppt in one or more groundwater samples, which may have been attributable to the former usage of the Site as a gasoline station and auto repair and its fire suppression equipment and/or an off-site source.

Soil Vapor

- Concentrations of petroleum-related VOCs and CVOCs were identified in the soil vapor samples. The petroleum-related VOCs (concentrations up to 83,000 µg/m^3 of 2,2,4-trimethylpentane) were likely associated with the former on-site gasoline station and auto repair facility. CVOCs were detected in one or more samples at concentrations up to 650 µg/m^3 (PCE).

Remedial Investigation Work Plan – 350 Grand Concourse, Bronx, NY, AKRF, June 2022 (initially drafted December 2021 and finalized June 2022)

Under the BCP, AKRF prepared a RIWP for the Site. The RIWP proposed the collection of soil, groundwater, and soil vapor samples to further define the nature and extent of contamination in on-site soil, groundwater, and soil vapor. The RIWP scope included: a geophysical investigation followed by the advancement of 14 borings (with collection of two samples from each boring), the installation of five permanent groundwater monitoring wells with the collection and laboratory analysis of one groundwater sample from each, and the installation of six temporary soil vapor points with the collection and laboratory

analysis of one soil vapor sample from each. This RIR summarizes the RI activities and the findings.

Interim Remedial Measure Work Plan – 350 Grand Concourse, Bronx, NY, AKRF, September 2022

AKRF prepared an IRM Work Plan (IRMWP) for the Site, which proposed: demolition of the existing site structures (specifically the pump island canopy, pump islands, convenience store, and kiosk) to enable completion of the RI detailed in the June 2022 RIWP; closure/removal of the three out-of-service 12,000-gallon gasoline USTs; removal of the former SVE system subgrade components; excavation and disposal of soil above RRSCOs to 2 feet bgs site-wide, and additional excavation to remediate petroleum-contaminated soil (source material) and soil hotspot in the northern portion of the Site containing elevated concentrations of lead (non-hazardous); implementation of a groundwater treatment program; and importation of clean backfill to establish site grades after excavation. The IRMWP was based upon the findings presented in previous investigations.

Phase I Environmental Site Assessment – 350 Grand Concourse, Bronx, NY, AKRF, November 2024

AKRF completed a Phase I ESA in November 2024 for the Site. The assessment revealed the following:

- The Site was identified on historical Sanborn maps, city directories, local records, and in the following databases for former operations, including various automotive services/repair as well as petroleum storage/filling: NYSDEC Petroleum Spills, RCRA Generator/Transporter, NYSDEC PBS, NYSDEC BCP, Aerometric Information Retrieval System Facility Subsystem, Facility Index System/Facility Registry System, Enforcement & Compliance History Information, New York and New Jersey Manifest, and EDR Historic Auto Station.
- The Site was enrolled in the BCP in 2022. Previous environmental investigations identified petroleum-related VOCs, SVOCs, metals, pesticides, and PFAS in soil; petroleum-related VOCs, SVOCs, metals, and PFAS in groundwater; and solvent- and petroleum-related VOCs in soil vapor. The contamination appeared to be related to a combination of historic fill materials and historic Site operations, including gasoline station and auto repair. NYSDEC Spill Nos. 98-14075 and 01-11974 previously assigned to the Site remain open.
- Typical fire suppression equipment (fire extinguishers and sprinklers under a gasoline dispenser canopy) associated with the former gasoline station at the Site may have included the use of chemicals containing PFAS.
- The regulatory databases, historical Sanborn maps, City Directory listings, and the reconnaissance identified the following adjacent and nearby properties with some potential to have affected the Site subsurface:
    a. U-Haul, located at 350-368 Walton Avenue, west-adjacent to the Site across Grand Concourse, was listed with NYSDEC Spill Nos. 93-07897 and 00-12172 when BTEX- and MTBE-contaminated soil and groundwater were encountered during redevelopment activities at that property. This property was also listed in the RCRA- small quantity generators database for benzene, tetrachloroethylene, and ignitable waste between 1993 and 2023. Multiple rounds of groundwater sampling in 2001 and 2002 showed concentrations of BTEX and MTBE were decreasing.

NYSDEC issued a No Further Action Letter for Spill Nos. 93-07897 and 00-12172 in 2002 and 2003, respectively.

b. Former and/or current gasoline filling stations, automotive facilities, dry cleaners, a coal yard, plating, a fur dressing and dyeing company, painting facilities, and manufacturing facilities.

Interim Remedial Measure Modification Request for 350 Grand Concourse, Bronx, NY, AKRF, February 2025

AKRF prepared an IRM Modification Request in February 2025, which included the following:

- Provide an update to NYSDEC of the work performed in 2022 under the IRMWP by the Former Volunteer, which included: 1) all on-site structures were demolished (specifically, the canopy, dispenser islands, convenience store, and kiosk); 2) three out-of-service 12,000-gallon gasoline USTs, associated piping, and fuel dispensers were removed and documented in a Tank Closure Package and Report submitted to NYSDEC in November 2023; 3) the former SVE system subgrade components were removed; 4) a soil hotspot in the northern portion of the Site containing elevated concentrations of lead was removed; and 5) endpoint soil samples were collected in locations where excavation and removal activities occurred, which were surveyed by a NYS-licensed surveyor.
- Propose Site stabilization activities (disposal of the existing stockpiles generated in 2022 and partial backfill of the then current open IRM excavation areas);
- Confirm that a IRM Construction Completion Report (CCR) would be prepared to document the completed IRM activities (including the Site stabilization activities); and
- Defer the remedial activities not performed as proposed in the 2022 IRMWP until implementation of the full remedy (i.e., additional remedial excavation and groundwater treatment), which would be defined in the forthcoming RAWP that would be prepared following completion of the SRI.

The IRM Modification Request was approved by NYSDEC on March 18, 2025.

Supplemental Remedial Investigation Work Plan – 350 Grand Concourse, Bronx, NY, AKRF, April 2025

AKRF prepared a SRIWP, which proposed the collection of additional soil samples to further delineate the extent of soil contamination identified and fill data gaps to aid in the design of the proposed remedy. Concurrently, during the proposed SRI, soil waste characterization samples were collected for off-site disposal of contaminated Site soil. The SRI findings would be used to develop the Site remedy.

Interim Remedial Measure Construction Completion Report – 350 Grand Concourse, Bronx, NY, AKRF, February 2026

AKRF prepared a CCR to document the IRM activities performed in accordance with the NYSDEC-approved IRMWP dated September 2022 and the IRM Modification Request letter dated February 20, 2025. These activities included: demolition of the existing Site structures; closure and removal of three out-of-service USTs, fill ports, and vent lines; removal of the former SVE system subgrade components; excavation for a soil hotspot in the northern portion of the Site containing elevated concentrations of lead (non-hazardous); and endpoint soil sampling in locations where excavation and removal activities occurred.

Remedial Investigation Report – 350 Grand Concourse, Bronx, NY, AKRF, February 2026

AKRF prepared a RIR to document the findings of RI activities performed in 2022 and SRI activities performed in 2025. On January 31 through February 11, and October 24, 2022, the following RI scope of work was performed by AKRF:

1. The performance of a geophysical investigation across accessible portions of the Site.
2. The advancement of 14 borings with the collection and laboratory analysis of 28 soil samples.
3. The installation of four permanent groundwater monitoring wells with the collection and laboratory analysis of three groundwater samples.
4. The installation of six soil vapor points with the collection and analysis of six soil vapor samples.
5. The performance of a groundwater monitoring well elevation and location survey of the permanent monitoring wells.

On May 19 through May 22, 2025, the SRI scope was performed, which included the advancement of 42 borings with the collection and laboratory analysis of 109 soil samples. The SRI borings were also utilized to collect waste characterization samples, with the waste characterization data included in a separate report.

Soil

- VOCs - Acetone in 23 samples and ethylbenzene in one sample were detected above their respective PGWSCOs and UUSCOs, but below their RRSCOs at concentrations up to 0.29 mg/kg for acetone and at 9.8 mg/kg for ethylbenzene. According to the associated DUSRs, acetone is common laboratory contaminant but was not detected in the corresponding laboratory blanks; therefore, the data should be used with caution when making decisions regarding detections in field samples.
- SVOCs - Six PAHs (a subset of SVOCs) were detected at concentrations above their RRSCOs at concentrations up to 4.5 mg/kg [benzo(b)fluoranthene and chrysene]. An additional two PAHs [4-methylphenol and benzo(k)fluoranthene] were detected above their UUSCOs but below their RRSCOs.
- Metals - All 25 metals were detected in one or more of the soil samples analyzed. The following five metals were detected above their RRSCOs: barium (max. 1,630 mg/kg), cadmium (max. 4.5 mg/kg), copper (max. 282 mg/kg), lead (max. 1,240 mg/kg), and mercury (max. 43.2 mg/kg). Five other metals (arsenic, hexavalent chromium, nickel, and zinc) were detected above their UUSCOs but below their RRSCOs.
- PCBs were not detected in the soil samples analyzed.
- Three pesticides were detected in one or more of the soil samples at concentrations above the UUSCOs, but below their RRSCOs, up to 0.048 mg/kg (dieldrin).
- PFOS and PFOA were detected in one or more soil samples at concentrations above their UUGVs and PGWGVs, but below the RRGVs, including: PFOS (max. 3.21 ppb) and PFAS (max. 0.92 ppb).
- Visual, olfactory, and PID soil screening of the soil borings indicated two petroleum hotspots to depths up to 20 to 25 feet bgs (terminus of the borings before refusal on apparent weather bedrock) in the western and southwestern portions of the Site.

Groundwater

- Seven VOCs were detected above their respective AWQSGVs in one sample, including: benzene (32 µg/L), isopropylbenzene (16 µg/L), m/p-xylenes (28 µg/L), MTBE (13 µg/L), n-propylbenzene (14 µg/L), sec-butylbenzene (5.2 µg/L), and toluene (7.8 µg/L).
- Twenty-five SVOCs were detected in one or more of the groundwater samples analyzed. Three SVOCs were detected at concentrations above their respective AWQSGVs in one sample: benzo(a)anthracene (max. 0.91 µg/L), benzo(a)pyrene (max. 0.62 µg/L), and phenol (max. 3.3 µg/L). These SVOC concentrations are believed to be attributed to sediment entrained in the sample, due to elevated turbidity (197 NTUs) that did not dissipate during low-flow purging and since the sample was an unfiltered sample.
- Twenty metals were detected in the total (unfiltered) groundwater samples, and five metals (iron, lead, magnesium, manganese, and sodium) were detected above the AWQSGVs in one or more samples. Total iron was detected in all samples and the blind duplicate sample at concentrations ranging up to 5,100 µg/L; lead was detected in two samples and the blind duplicate sample at concentrations up to 34.4 µg/L; magnesium was detected in all samples and the blind duplicate sample at concentrations ranging up to 52,500 µg/L; manganese was detected in all samples and the blind duplicate sample at concentrations ranging up to 366 µg/L; and sodium was detected in all samples and the blind duplicate sample at concentrations ranging up to 399,000 µg/L. These compounds can likely be attributed to sediment entrained in the samples and naturally occurring compounds.
- Nineteen metals were detected in the dissolved (filtered) groundwater samples, and two metals (magnesium and sodium) were detected above the AWQSGVs in one or more samples. Dissolved magnesium was detected in all samples and the blind duplicate sample at concentrations ranging up to 52,400 µg/L; and dissolved sodium was detected in all samples and the blind duplicate sample at concentrations ranging up to 486,000 µg/L. These metals are attributed to naturally occurring compounds in groundwater.
- PCBs and pesticides were not detected above laboratory reporting limits in any of the groundwater samples.
- Eleven PFAS compounds were detected in one or more of the groundwater samples. PFOA and PFOS were detected in all three samples (and the blind duplicate sample) at concentrations ranging from 12.3 to 38.9 ppt, above their respective Screening Levels.

Soil Vapor

Five soil vapor samples were collected during the RI, and 37 VOCs were detected in one or more of the soil vapor samples analyzed. Although there are currently no regulatory or published guidance values for VOCs in soil vapor, soil vapor data was used to assess the potential for exposure to receptors and to help define the nature and extent of contamination at the Site.

VOCs associated with petroleum [including BTEX, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, 2,2,4-trimethylpentane, 2-hexanone, 4-ethyltoluene, butane, cyclohexane, MEK, methyl isobutyl ketone (4-methyl-2-pentanone), n-heptane, n-hexane,

and MTBE] were detected in one or more samples at concentrations up to 670,000 µg/m^3 (2,2,4-trimethylpentane).

CVOCs (including carbon tetrachloride, cis-1,2-dichloroethylene, PCE, and TCE) were detected in one or more samples at concentrations up to 11 µg/m^3 (PCE).

2.10 Identification of Standards, Criteria and Guidance

The following remedial SCGs apply to the project and are the performance criteria used to determine whether the Remedial Action Objectives (RAOs) have been met:

- Soil – 6 New York Code of Rules and Regulations (NYCRR) Part 375 UUSCOs, RRSCOs, and PGWSCOs (for VOCs only) (December 2006); 6 NYCRR Part 371 - Identification and Listing of Hazardous Wastes; 6 NYCRR Part 376 - Land Disposal Restrictions; and 6 NYCRR Part 360 - Solid Waste Management Facilities.
- Groundwater – 6 NYCRR Parts 700-706 - Water Quality Standards (June 1998), and Technical Operational and Guidance Series (TOGS) 1.1.1 AWQSGVs and Groundwater Effluent Limitations; *Sampling, Analysis, And Assessment of Per- And Polyfluoroalkyl Substances (PFAS) Under NYSDEC's Part 375 Remedial Programs* (April 2023); and the March 2023 Water Quality Guidance Values to Regulate PFOA, PFOS, and 1, 4-Dioxane.

In addition, the following SCGs are applicable to the remedial program at the Site:

- NYSDEC DER-10 – Technical Guidance for Site Investigation and Remediation (May 2010)
- NYSDOH Generic CAMP
- NYSDEC DER-23 – Citizen Participation Handbook for Remedial Programs (January 2021)
- 6 NYCRR Part 372 – Hazardous Waste Manifest System and Related Standards for Generators, Transporters and Facilities (November 1998)
- 6 NYCRR Subpart 374-1 – Standards for the Management of Specific Hazardous Wastes and Specific Types of Hazardous Waste Management Facilities (November 1998)
- 6 NYCRR Subpart 374-3 – Standards for Universal Waste (November 1998)
- 6 NYCRR Part 375 – Environmental Remediation Programs (December 2006)
- 6 NYCRR Parts 595-599, 613, 370, 374-2 – Bulk Storage of Petroleum Tanks and Chemicals; Management of Used Oil (October 2015; November 2015)
- 40 Code of Federal Regulations (CFR) Part 280 – Technical Standards and Corrective Action Requirements for Owners and Operators of USTs
- 29 CFR Part 1910.120 – Hazardous Waste Operations and Emergency Response
- 40 CFR Part 144 – Underground Injection Control Program
- NYSDOH Soil Vapor Intrusion Matrix – NYSDOH Sub-Slab Vapor Concentration which may require monitoring or mitigation ("NYSDOH Vapor Intrusion Guidance Document") (October 2006, updated February 2024)
- NYSDEC Sampling, Analysis, and Assessment of PFAS (April 2023)
- NYSDEC DER-31 – Green Remediation (January 2011)

Additional regulations and guidance may be applicable, relevant, and appropriate to the remedial alternatives and will be complied with in connection with implementation of the remedial program.

However, the list above is intended to represent the principal SCGs that should be considered in evaluating the remedial alternatives for the Site. SCGs for the Site are provided in Appendix A.

2.11 Environmental and Public Health Assessments

2.11.1 Qualitative Human Health Exposure Assessment

The objective of the Qualitative Human Health Exposure Assessment (QHHEA) is to identify potential receptors and pathways for human exposure to the contaminants of concern that are present at, or migrating from, the Site. The identification of exposure pathways describes the route that the contaminants of concern takes to travel from the source to the receptor. An identified pathway indicates that the potential for exposure exists; it does not imply that exposures actually occur.

The RI and SRI are sufficient to complete a QHHEA. The QHHEA was performed to determine whether the Site poses an existing or future health hazard to the Site's exposed or potentially exposed population. The sampling data from the RI and SRI was evaluated to determine whether there is any health risk by characterizing the exposure setting, identifying exposure pathways, and evaluating contaminant fate and transport. The QHHEA was prepared in accordance with Appendix 3B and Section 3.3 (c) 4 of the NYSDEC Draft DER-10 Technical Guidance for Site Investigation and Remediation.

2.11.2 Contaminants of Concern in Respective Media

Based on field and sampling data obtained during the RI and SRI, the contaminants of concern are:

Soil

- The VOC ethylbenzene (acetone, which was also detected in groundwater, is a common laboratory agent; therefore, those detections may not be reflective of on-site contamination);
- The SVOCs 4-methylphenol, benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, dibenz(a,h)anthracene, and indeno(1,2,3-c,d)pyrene;
- The metals arsenic, barium, cadmium, copper, lead, mercury, nickel, zinc, and hexavalent chromium;
- The pesticides 4,4'-DDT, aldrin, and dieldrin; and
- PFOS and PFOA.

Groundwater

- The VOCs benzene, isopropylbenzene, m,p-xylenes, n-propylbenzene, sec-butylbenzene, MTBE, and toluene;
- The SVOCs benzo(a)anthracene, benzo(a)pyrene, and phenol which are likely attributed to sediment entrained in the sample since the sample's turbidity did not stabilize after 2 hours of purging;
- The metals magnesium and sodium can likely be attributed to naturally occurring compounds in groundwater [lead, manganese, and iron detected in the total (unfiltered) samples can likely be attributed to sediment entrained in the samples since these compounds were not detected in the filtered samples]; and

- PFOS and PFOA.

Soil Vapor

- Petroleum-related VOCs and CVOCs.

2.11.3 Potential Routes of Exposure

The five elements of an exposure pathway are:

1. The source of contamination;
2. The environmental media and transport mechanisms;
3. The point of exposure;
4. The route of exposure; and
5. The receptor population.

These elements of an exposure pathway may be based on past, present, or future events. An exposure pathway is considered complete when all five elements of an exposure pathway are documented. A potential exposure pathway exists when any one or more of the five elements comprising an exposure pathway cannot be documented. An exposure pathway may be eliminated from further evaluation when any one of the five elements comprising an exposure pathway has not existed in the past, does not exist in the present, and will never exist in the future.

2.11.4 Exposure Route

An exposure route is the mechanism by which a receptor comes into contact with a chemical. Three potential primary routes exist by which chemicals can enter the body:

- Ingestion of water, fill, and/or soil;
- Dermal contact with water, fill, soil, and/or building materials; and
- Inhalation of vapors and/or particulates.

2.11.5 Potential Receptors

Currently, the Site is a vacant, partially concrete-paved lot with gravel covering the locations of the removed aboveground features of the gasoline service station and IRM UST excavation. The area immediately surrounding the Site includes automotive, commercial, transit and residential uses, with a wooded vacant lot to the east. The anticipated future use of the Site is a mixed-use commercial (grocery store) and multi-family residential building.

On-Site Receptors: The Site is currently vacant. During redevelopment of the Site, the on-site potential sensitive receptors will include construction workers and inspectors. Once the Site is redeveloped, the on-site potential receptors will include employees, grocery store customers, community members, vendors, and inspectors.

Off-Site Receptors: Potential off-site receptors within a 0.25-mile radius of the Site include adult and child residents, commercial and construction workers, pedestrians, trespassers, and cyclists, based on the following:

1. Commercial Businesses – existing and future
2. Residential Buildings – existing and future

3. Building Construction/Renovation – existing and future
4. Pedestrians, Cyclists – existing and future
5. Daycare Facility(ies) – existing and future
6. Schools – existing and future

2.11.6 Existence of Human Health Exposure Pathways

This evaluation consists of the following: contaminant source; contaminant release and transport mechanism; point of exposure; route of exposure; and receptor population.

Human direct contact with the on-site contaminants is mitigated by the majority of the Site currently capped with a concrete-paved surface, with some gravel-covered areas. The concrete pavement was observed to be in moderate condition with some factures, breaks, and open areas. Groundwater is not used for drinking or other potable purposes in the Bronx, and the Site is served by a public water supply that is not affected by Site contamination. Currently there are no on-site buildings where vapor intrusion may occur; however, soil vapor may be impacting off-site buildings.

Once redevelopment activities begin, there will be a potential exposure pathway from construction workers and inspectors coming into direct contact with surface and subsurface soil and fill as a result of construction and excavation activities. In addition, on-site construction workers could potentially ingest or inhale particulates and/or vapors from any exposed contaminated soil and fill. Similarly, off-site receptors could be exposed to particulates and vapors from on-site activities. Preparation and implementation of a Community Air Monitoring Plan (CAMP) and Health and Safety Plan (HASP) during redevelopment activities would prevent the potential exposure pathway from becoming complete. After Site redevelopment, direct contact with contaminants in sub-surface soil would be prevented by the building slab. A soil vapor intrusion evaluation with confirmatory indoor air sampling will be required prior to occupancy of any future on-site buildings.

Once redevelopment of the Site has been completed, there could be a potential exposure pathway from the potential off-gassing of residual organic vapors in the soil and/or groundwater through cracks or openings in the foundations of the any new on-site building or an off-site building.

2.11.7 Overall Human Health Exposure Assessment

Although the Site is currently vacant, during redevelopment and remediation activities, there is a potential exposure pathway from remedial contractors and environmental professionals coming into direct contact from contaminated soil and to off-site receptors from particulates and vapors from on-site excavation activities. Any potential exposure pathway from contaminated surface soil/fill to construction workers or other off-site receptors will be controlled by implementation of a HASP and CAMP. Implementation of this RAWP will prevent the above-mentioned exposure pathways from becoming complete.

2.12 Remedial Action Objectives

Based on the results of the RI, the following RAOs have been identified for this Site.

2.12.1 Soil

RAOs for Public Health Protection

- Prevent ingestion/direct contact with contaminated soil.
- Prevent inhalation of, or exposure to, contaminants volatilizing from contaminated soil.

RAOs for Environmental Protection

- Prevent migration of contaminants that would result in groundwater contamination.

2.12.2 Groundwater

RAOs for Public Health Protection

- Prevent ingestion of groundwater containing contaminant levels exceeding drinking water standards.
- Prevent contact with, or inhalation of, volatiles emanating from contaminated groundwater.

RAOs for Environmental Protection

- Remove the source of groundwater contamination.
- Restore groundwater aquifer, to the extent practicable, to pre-disposal/pre- release conditions.

2.12.3 Soil Vapor

- Mitigate impacts to public health resulting from existing, or the potential for, soil vapor intrusion into buildings at the Site.

3.0 INTERIM REMEDIAL MEASURES

IRMs were performed at the Site from 2022 through 2025. These activities included: demolition of the existing Site structures; closure and removal of three out-of-service USTs, fill ports, and vent lines; removal of the former SVE system subgrade components; excavation for a soil hotspot in the northern portion of the Site containing elevated concentrations of lead (non-hazardous); and endpoint soil sampling in locations where excavation and removal activities occurred. These IRM activities were performed in accordance with the NYSDEC-approved IRMWP dated September 2022 and the IRM Modification Request letter dated February 20, 2025. At completion of the IRM activities, AKRF prepared an IRM CCR, approved by NYSDEC in February 2026, to document these IRM activities. The IRM activities are described in more detail in the sections below.

3.1 Removal of Former SVE System Subgrade Components

On October 25, 2022, AKRF oversaw the removal of the subsurface SVE system piping components in the northeastern portion of the Site. The former SVE system piping ran through a former UST area for five 4,000-gallon gasoline USTs that were previously removed. A maximum PID reading of 66 ppm was detected from this area when removing the former SVE system piping; however, no other signs of contamination were observed (e.g., visual, olfactory, etc.).

3.2 UST and Dispenser Closure Activities

Between October 24 and October 28, 2022, AKRF oversaw the removal of three 12,000-gallon USTs and associated subsurface UST piping components (including fuel lines to the former dispensers) in the southern and central-western portions of the Site. Approximately 400 gallons of contents (gasoline and water) were removed from the three USTs and transported to Advanced Wastewater Treatment Corp. (AWWT), Farmingdale, New York. After cleaning, an additional 175 gallons of gasoline and water mixture were removed from the USTs and transported to AWWT.

UST post-excavation sampling was completed in accordance with the DER-10, which consisted of the collection of six soil sidewall endpoint samples (IRM-EX-024 through IRM-EX-029) at a depth of 7.5 feet bgs: one from each of four sidewalls, with an additional sample collected from the eastern and western sidewalls. Due to the presence of a thick underlying concrete slab, collection of bottom endpoint samples was not feasible. Endpoint samples (IRM-EX-001 through IRM-EX-018) were collected beneath the locations of the former fuel dispenser piping associated with the USTs at depths of 3 to 4 feet bgs in accordance with DER-10, with a minimum of one sample for every 15 linear feet of piping.

A NYSDEC PBS Application and UST Closure Report were submitted to NYSDEC on February 2, 2023 (and resubmitted on November 3, 2023) to update the PBS database (PBS Facility ID # 2-600110) regarding the removal of the USTs.

3.3 Lead Hotspot Removal (Non-Hazardous)

An approximately 10-foot by 10-foot excavation to a depth of approximately 5 feet bgs was performed to remove a lead (non-hazardous) hotspot in the northern portion of the Site identified during the RI. The hotspot was identified at RI-SB-24_3-5_20220131, which had a total lead concentration above its RRSCO. The sample collected from the stockpile for waste characterization purposes had a toxicity characteristic leaching procedure (TCLP) lead concentration below the hazardous waste threshold; therefore, the material was managed and disposed of as non-hazardous material. Endpoint samples (IRM-EX-019 through IRM-EX-023) were collected at the excavation extents and submitted for analysis of lead using EPA Method 6010.

3.4 Contaminated Materials Removal

The contaminated materials removal portion of the IRM included the excavation and off-site disposal of: 1) on-site soil required for excavation and removal of the three 12,000-gallon USTs; 2) soil for removal of the dispenser fuel lines; and 3) soil for removal of the lead (non-hazardous) hotspot. All contaminated soil was removed in accordance with the IRMWP.

Soil was temporarily staged on top of and covered with polyethylene sheeting prior to off-site disposal. Soil was excavated to: 1) approximately 10 feet bgs on the southern portion of the Site for the removal of the USTs; 2) approximately 3 to 4 feet bgs in the central-western portions of the Site for the removal of fuel lines serving the former dispensers; and 3) approximately 5 feet bgs on the northern portion of the Site for removal of a lead (non-hazardous) hotspot.

Based on the results of waste characterization sampling performed, permitted disposal facilities were selected to receive excavated materials from the Site. Waste profiles, a disposal request letter, and analytical data were submitted to the intended receiving facilities and approval letters were obtained.

On March 20 and 21, 2025, 348.95 tons (approximately 230 cubic yards) of material were disposed of at off-site facilities.

4.0 SITE WASTE CHARACTERIZATION

Waste characterization sampling was conducted concurrently with the SRI to ensure handling, transportation, and disposal compliance and allow for direct loading of excavated soil into trucks. Sampling was conducted to achieve an approximate frequency of one sample per 700 cubic yards at a minimum, and equal spatial representation across the Site.

On May 19 through 22, 2025, AKRF oversaw the advancement of borings within grids designated as A1 through A4 and B1 through B4 to depths up to 24 feet bgs to profile material in approximately 75-foot by 50-foot grids. Taking into consideration the proposed excavation plan (for the building and remedial excavation) and the Site's topography, sample depths were chosen to separately characterize each grid vertically in three intervals to 15 feet bgs (0 - 5 feet bgs, 5 - 10 feet bgs, and 10 - 15 feet bgs), with the exception of grid A4 at 10 - 15 feet bgs, due to all four borings in this grid encountering bedrock before 10.5 feet bgs. Furthermore, soil was characterized beyond the proposed construction excavation depth of 15 feet bgs to characterize two petroleum hotspots where the remedial excavation could extend deeper than the construction excavation in grids B1/2 and B3/4.

A Waste Characterization Report, dated July 2024, was prepared following completion of the waste characterization sampling and receipt of laboratory data. The report provides a summary of the analytical results, analytical data tables for all reported constituent compounds, a sample location map, and an interpretation of the data. The Waste Characterization Report will be submitted to the proposed disposal facilities considering accepting on-site soil/fill and is included as Appendix G.

5.0 DESCRIPTION OF REMEDIAL ACTION PLAN

5.1 Evaluation of Remedial Alternatives

This section includes a review of remediation alternatives that were considered for the remedy phase of the BCP. The purpose of completing the alternatives analysis is to identify, evaluate, and select a remedy to address the contamination identified by in the RIR. The RAOs for groundwater and soil include source removal to prevent the potential for exposure and contaminant migration. The RAOs for soil vapor include preventing soil vapor from entering the proposed new Site building. The following performance measures were used to complete the evaluation of remedial alternatives:

- Protection of human health and the environment;
- Compliance with SCGs;
- Short-term effectiveness and impacts;
- Long-term effectiveness and permanence;
- Reduction of toxicity, mobility, or volume of contaminated material;
- Implementability;
- Cost effectiveness;
- Community acceptance; and
- Land use.

The following remedial SCGs apply to the project, and are the performance criteria used to determine if the RAOs have been met:

- 6 NYCRR Part 364 - NYS Waste Transporter Permits
- 6 NYCRR Part 360 - NYS Solid Waste Management Requirements
- 6 NYCRR Part 371 - Identification and Listing of Hazardous Wastes
- 6 NYCRR Part 372 - Hazardous Waste Manifest System and Related Standards for Generators, Transporters and Facilities
- 6 NYCRR Subpart 374-2 - Standards for the Management of Used Oil
- 6 NYCRR Part 375 - Environmental Remediation Programs
- 6 NYCRR Part 376 - Land Disposal Restrictions

Additional regulations and guidance may be applicable, relevant, and appropriate to the remedial alternatives and will be complied with in connection with implementation of the remedial program. The list above is intended to represent the principal SCGs, which should be considered in evaluating the remedial alternatives for the Site.

Remedial Alternative 1 – Track 1 Unrestricted Use Soil Cleanup Objectives

This alternative would include removal and/or treatment of all on-site contaminated soil and groundwater to comply with UUSCOs and AWQSGVs and eliminate any vapor intrusion pathways.

Removal and/or treatment of all on-site contaminated soil to comply with UUSCOs would require excavation to a minimum of 15 feet bgs across the Site, with additional excavation to 20 to 25 feet bgs to remove the two petroleum hotspots. Final excavation depths would be determined based upon the results of endpoint soil samples collected Site-wide. The soil removal/treatment would eliminate the on-Site sources of groundwater and soil vapor contamination. However, the PFAS groundwater contamination is likely attributed, in part, to off-site sources; and the CVOC soil vapor contamination appears to be attributed in full by off-site sources due their absence in the on-site soil and groundwater. Groundwater would require treatment to remediate groundwater to AWQSGVs, and may require specialized treatment technologies to address PFAS. The off-site CVOC soil vapor contamination could be ongoing source for on-site vapor intrusion.

1. Protection of Human Health and the Environment – Partially satisfied, as all soil above UUSCOs would be removed, which would remove any sources of on-site sources of groundwater contamination, thus removing any on-site sources of VOCs in soil vapor. The groundwater petroleum and PFAS contamination would be treated to meet AWQSGVs. However, the off-site source of CVOCs in soil vapor could act as an ongoing source of on-site vapor intrusion.
2. Compliance with SCGs – Partially satisfied, as all soil above UUSCOs would be removed and groundwater would be restored it to pre-release conditions (when considering the petroleum contamination associated with NYSDEC Spill Nos. 98-14075 and 01-11974), thus removing the source of petroleum-related VOCs in soil vapor. Additionally, NYSDEC Spill Nos. 98-14075 and 01-11974 would be closed. However, it may be difficult to achieve the cleanup standards for PFAS in groundwater since they attributed, in part, to off-site sources; in addition it the off-site CVOC soil vapor contamination could be ongoing source for on-site vapor intrusion.
3. Short-term Effectiveness and Impacts – Effective in reducing soil contamination in the short-term, as all contaminated soil would be removed from the Site. There is, however, a risk of short-term impacts to Site workers and the community, as the process of excavating contaminated soil may cause the release of particulates and organic vapors. This risk can be controlled by employing a CAMP and a HASP during remediation and construction.
4. Long-term Effectiveness and Permanence – Partially satisfied, as all soil above UUSCOs would be removed and VOCs in groundwater would be remediated to comply with AWQSGVs, which would lead to a reduction of soil vapor concentrations, and could allow for unrestricted use of the Site. However, off-site sources of PFAS in groundwater and CVOCs in soil vapor contamination could migrate back on to the Site following the remedial action.
5. Reduction of Toxicity, Mobility, or Volume of Contaminated Material – Satisfied, as all soil above UUSCOs at the Site would be removed and contaminant levels in groundwater would be greatly reduced as the on-site sources of contamination would be removed and significant dewatering would be performed to excavate all soil above UUSCOs; therefore, the toxicity, mobility, and the volume of contaminants would be greatly reduced. Additionally, as the on-site source of soil vapor contamination would be removed, the concentrations of contaminants in soil vapor would be reduced.

6. Implementability – Not Satisfied, All soil above UUSCOs at the Site would be removed and contaminant levels in groundwater would be greatly reduced as the on-site sources of contamination would be removed and dewatering would be performed to excavate all soil above UUSCOs. Remediating the groundwater to AWQSGVs may take multiple treatment events to achieve over an extended period of time, and may be difficult to achieve since the PFAS are partially attributed to an off-site source. The soil/fill to be excavated and disposed of off-site will be classified as regulated soil. Disposal/treatment facilities that can accept this type of materials are readily available. However, the PFAS groundwater contamination could require specialized treatment methods. The off-site CVOC soil vapor contamination could be an ongoing source for on-site soil vapor intrusion; therefore, a Track 1 cleanup is not implementable since an Engineering Control would be required to address the offsite CVOC contamination in soil vapor.

7. Cost Effectiveness – Not cost-effective, the structural support required to excavate the entire Site of fill exceeding UUSCOs would be achievable, with the exception of the northern portion of the Site where the north-adjacent building limits the depth of support of excavation (SOE) to about 5 feet bgs. Groundwater would require substantial treatment to address the PFAS contamination.

   Under this alternative, it is assumed that approximately 21,000 cubic yards (33,600 tons) of contaminated soil would be excavated and disposed of off-site, based on the data collected to date. The market rate for the transportation and disposal of non-hazardous, regulated soil (including petroleum contamination) ranges from $60 to $90 per ton, with a blended disposal rate of $75 per ton anticipated for the remediation. Therefore, the soil disposal costs for this project would be on the order of $2,520,000. Approximately 4,100 cubic yards of clean fill would then have to be imported prior to building construction to backfill areas excavated to the subgrade level required for Site redevelopment. Using a market rate of $35 per cubic yard of clean fill, this equals approximately $143,500.

   In-situ chemical oxidation (ISCO) groundwater treatment is estimated to be approximately $500,000.

   Site preparation costs associated with this remedial action (e.g., installation of support of excavation, excavation equipment/labor, dewatering, added site safety/security measures, legal/engineering fees) would be significantly more when compared to Remedial Alternative 3, discussed below. Dewatering for construction would facilitate remediation of groundwater to AWQSGVs from on-site sources. For the purpose of evaluating cost for this remedial alternative in this RAWP, site preparation costs are estimated to be $4,900,000.

   The total estimated cost for this alternative was $8,063,500 as detailed in Table 1.

8. Community Acceptance – Satisfied, as this alternative would be protective of human health and the environment; however, it would take a significant amount of time and have the longest impact on the community.

9. Land Use – Satisfied, as this alternative would result in the cleanup of the Site for unrestricted use, which would allow for any type of future redevelopment that is permitted by zoning.

10. Environmental Footprint Analysis – Satisfied, as this alternative would incorporate green and sustainable remediation principles, although it would have a bigger environmental footprint than other alternatives due to the higher number of truck trips associated with removing the larger soil volume. An environmental footprint analysis for this alternative is included in Appendix H, which was completed using a NYSDEC-accepted environmental footprint analysis calculator. Water consumption, greenhouse gas emissions, renewable and non-

renewable energy use, waste reduction, and material use were estimated, and goals for the project related to these green and sustainable remediation metrics, as well as for minimizing community impacts, protecting habitats and natural and cultural resources, and promoting environmental justice, were incorporated.

11. Climate Change Vulnerability Assessment – Satisfied, the impact of climate change on the Site and the proposed remedy under this alternative was evaluated. Potential vulnerabilities associated with extreme weather events (e.g., hurricanes, lightning, heat stress and drought), flooding, and sea level rise were identified, and this alternative would incorporate measures to minimize the impact of climate change on potential identified vulnerabilities. The climate vulnerability assessment for this alternative is included in Appendix I.

Remedial Alternative 2 – Track 2 Cleanup with Contingent Track 4 Cleanup

Alternative 2 would include removal of all soil/fill exceeding RRSCOs within the upper 15 feet bgs. It is expected that this will require excavation to approximately 5 feet bgs across the entire site, with three hotspots to remove historic fill contaminants above RRSOCs to depths of approximately 8.5 to 11 feet bgs, and two petroleum hotspots excavated to depths up to 20 to 25 feet bgs. Final excavation depths would be determined based upon the results of endpoint soil samples collected Site-wide. The sources of NYSDEC Spill Case Nos. 98-14075 and 01-11974 would be removed during the remedial excavation of the two petroleum hotspots. Since the on-site sources of groundwater contamination would be removed, residual dissolved petroleum-related contamination in groundwater would be addressed with direct placement of a Regenesis Oxygen Release Compound® (ORC) to treat the groundwater at the base of the excavation in the petroleum hotspots before backfilling. Quarterly groundwater monitoring will be performed following the Remedial Action to evaluate performance of the remedy. The Site Management Plan (SMP) will provide more details concerning the groundwater monitoring program.

1. Protection of Human Health and the Environment – Satisfied, as on-site sources of contamination would be removed and any significant residual contamination would be addressed by natural attenuation and a groundwater treatment program implemented in conjunction with remedial excavation. The contingency site composite cover system would prevent exposure to potential residual contamination. In areas where the Track 2 cleanup cannot be achieved due to SOE and dewatering limitations, a Track 4 cleanup would be implemented for those localized areas, which would include a composite cover system consisting of a minimum of 6-inch concrete slabs or paving or 2 feet of clean soil. Any tanks and associated piping would be removed.
2. Compliance with SCGs – Satisfied, as all sources of contamination would be removed and accessible soil would comply with RRSCOs. Additionally, NYSDEC Spill Case Nos. 98-14075 and 01-11974 would be closed.
3. Short-term Effectiveness and Impacts – Satisfied, as this alternative would be effective in reducing soil/fill contaminant levels in the short term. Mitigation measures, including a HASP and CAMP, would protect and limit the exposure of workers and the surrounding community to contaminated soil, particulates, groundwater, and/or soil vapors during soil removal.
4. Long-term Effectiveness and Permanence – Satisfied, as removal of sources of contamination and the installation and maintenance of Institutional and Engineering Controls, as needed (including installation of a contingency cover system in potential Track 4 areas), would limit exposure of future occupants to any remaining contaminated soil/fill, groundwater, and/or soil vapor, thus achieving the RAOs.

5. Reduction of Toxicity, Mobility, or Volume of Contaminated Material – Satisfied, as the volume of contaminants at the Site would be significantly reduced. Removal of most source material in soil/fill would reduce residual contaminant mobility into groundwater and soil vapor.
6. Implementability – Satisfied, as contaminated soil removal and installation of Engineering Controls (if necessary) could be completed in a relatively short timeframe and the equipment and personnel needed to perform the proposed remedial actions are readily available. The soil/fill to be excavated and disposed of off-site will be classified as regulated soil. Disposal/beneficial reuse facilities that can accept these types of materials are readily available.
7. Cost Effectiveness – Satisfied, as this alternative is the most cost effective.

   Under this alternative, it is assumed that approximately 11,600 cubic yards, or 18,600 tons, of contaminated soil would be excavated and disposed of off-site, based on the data collected to date. The market rate for the transportation and disposal of non-hazardous, regulated soil (including petroleum contamination) ranges from $60 to $90 per ton, with a blended disposal rate of $75 per ton anticipated for the remediation. Therefore, the soil disposal costs for this project would be approximately $1,395,000. Approximately 3,700 cubic yards of clean fill would then have to be imported prior to building construction to backfill excavated areas to the subgrades required for Site redevelopment. Using a market rate of $35 per cubic yard of clean fill, this equals approximately $129,500.

   A groundwater treatment program is estimated to be approximately $100,000.

   Site preparation costs associated with this remedial action (e.g., installation of support of excavation, excavation equipment/labor, dewatering, added site safety/security measures, legal/engineering fees) total approximately $3,450,000.

   The estimated cost for this alternative was $5,074,500 as detailed in Table 2.
8. Community Acceptance –Satisfied, as this alternative would result in a more expedited cleanup of the Site while creating additional affordable housing options in the neighborhood area, which is part of a mayoral initiative set forth in NYC.
9. Land use – Satisfied, as this alternative would result in the cleanup of the Site to the RRSCOs, allowing for its redevelopment for multi-family residential use, consistent with current zoning.
10. Environmental Footprint Analysis – Satisfied, as this alternative would incorporate green and sustainable remediation principles. An environmental footprint analysis for this alternative is included in Appendix H, which was completed using a NYSDEC-accepted environmental footprint analysis calculator. Water consumption, greenhouse gas emissions, renewable and non-renewable energy use, waste reduction, and material use were estimated, and goals for the project related to these green and sustainable remediation metrics, as well as for minimizing community impacts, protecting habitats and natural and cultural resources, and promoting environmental justice, were incorporated.
11. Climate Change Vulnerability Assessment – Satisfied, the impact of climate change on the Site and the proposed remedy under this alternative was evaluated. Potential vulnerabilities associated with extreme weather events (e.g., hurricanes, lightning, heat stress and drought), flooding, and sea level rise were identified, and this alternative would incorporate measures to minimize the impact of climate change on potential identified vulnerabilities. The climate vulnerability assessment for this alternative is included in Appendix I.

5.2 Selection of the Preferred Remedy

Remedial Alternative 1 (Track 1) was reviewed and found to be unacceptable, since it is not as cost-effective as Alternative 2 and has challenges to implement within the project's timeframe. Therefore, Remedial Alternative 1 (Track 1) is not considered a feasible solution.

Remedial Alternative 2 (Track 2 with a Track 4 contingency) achieves the RAOs while being more feasible to implement, cost-effective, and better aligns with the project's timeline. After careful consideration with respect to the evaluation criteria listed, Remedial Alternative 2 is determined to be the preferred remedy, since it adequately addresses the subsurface contamination with the most cost-effective approach.

5.2.1 Zoning

The Site is zoned as C6-2A (commercial) with an R8A (residential) equivalent. The proposed use is consistent with existing zoning for the Site. The NYC Department of City Planning (NYCDCP) assigned an E-Designation (E-442) to the Site for hazardous materials, air quality, and noise as part of the Lower Concourse Rezoning, which was adopted in 2009. The E-Designation program is administered by NYCOER. Currently, the Site is a vacant partially concrete-paved lot with no structures. The Site was previously developed with a gasoline service station that included a one-story convenience store, a sales kiosk, and a canopy covered gasoline dispenser area, which ceased operations in November 2021. All on-site buildings were demolished in July through August 2022.

5.2.2 Applicable Comprehensive Community Master Plans or Land Use Plans

The proposed redevelopment plan is consistent with existing zoning and land use patterns in the surrounding area, and there are no existing neighborhood plans or policies in effect that include the proposed redevelopment site. The neighborhood where the proposed redevelopment site is located is represented by Bronx Community Board No. 1, and currently has a number of capital projects; however, the proposed redevelopment site would not contradict or interrupt any of those projects. Furthermore, the proposed redevelopment incudes a grocery store for the community.

5.2.3 Surrounding Property Uses

The Site is bounded to the north by a three-story residential building and a five-story apartment building, followed by East 144th Street; to the east by a vacant vegetated area, followed by Metro North Railroad tracks; to the south by a nine-story hotel, followed by various automotive repair shops; and to the west by Grand Concourse, followed by a U-Haul Storage and Moving facility. The Harlem River is the nearest surface water body, located approximately 1,000 feet southwest of the Site.

The surrounding area is developed primarily with automotive, commercial, transit, and residential uses. The underground NYCT subway tracks for the 4- and 5-Trains run beneath Grand Concourse, located west-adjacent to the Site.

Four schools (Community School for Social Justice and Health Opportunities High School both at 350 Gerard Avenue, Family Life Academy Charter School III at 370 Gerard Avenue, and KIPP NYC College Prep High School at 201 E. 144th Street) are located within 500 feet of the Site. There are no daycare or health care facilities located within 500 feet of the Site. The surrounding land usage is presented on Figure 3.

5.2.4 Citizen Participation Plan

A Citizen Participation Plan (CPP), submitted to NYSDEC for review in May 2022, was approved in June 2022. The contemplated remedy complies with the CPP. The approved CPP is provided as Appendix J.

5.2.5 Environmental Justice

The Site is located in an Environmental Justice Area. Environmental justice is defined as the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies. Environmental justice efforts focus on improving the environment in communities, specifically minority and low-income communities, and addressing disproportionate adverse environmental impacts that may exist in those communities.

The Site is 100% located in an En-Zone. The Site is also located in the Port Morris Harlem Riverfront Brownfield Opportunity Area (BOA).

5.2.6 Land Use Designations

The proposed redevelopment plan complies with the current land use designation for this Site. The proposed future use of the Site includes affordable housing and commercial uses (a grocery store). This use is consistent with anticipated land use designations for the Site.

5.2.7 Population Growth Patterns

The population requiring affordable housing in NYC is expected to increase in the future. This project will help provide necessary affordable housing units to meet that need and will also be in conformance with the Port Morris Harlem Riverfront BOA and the Mayor's Housing New York: A Five-Borough, Ten Year Plan.

The Site is part of the Bronx County Census Tract 51. According to the 2019 American Community Survey 5-year Profile data, 53.1% of the population in Census Tract 51 are living below the poverty line. The unemployment rate for the Bronx is 13.9% (as of September 2021), compared to NYC unemployment rate of 9.8% (as of September 2021) and the national unemployment rate of 4.8% (as of September 2021).

5.2.8 Accessibility to Existing Infrastructure

The Site is located within one block of stations for the NYCT 4- and 5-Trains (138 Street - Grand Concourse and 149 Street - Grand Concourse), and the Bx1 and BxM4 bus lines. The area is also served by municipal sewers and water, electric, telephone, natural gas, and fiber-optic lines.

5.2.9 Proximity to Cultural Resources

Cultural resources, easily accessed from the Site via public transportation, include various parks, historic sites, museums, and landmarks.

5.2.10 Proximity to Natural Resources

The Site is located in an area of Bronx that does not contain a significant source of natural resources. However, natural resources such as parks and the waterfront are easily accessible from the Site via public transportation, and additionally includes Randall's Island, St. Mary's Park, Mill Pond Park, and Franz Sigel Park.

5.2.11 Off-Site Groundwater Impacts

Based on Site-specific groundwater elevation contour maps, provided as Figure 4, groundwater flows in a generally southwesterly direction beneath the Site. Thus, the contaminants in groundwater could migrate off-site to the southwest. As a Volunteer in the BCP, it is not required to address off-site groundwater impacts. The proposed remedy is intended to remove the source in soil and treat groundwater contamination, thereby preventing any (further) off-site migration of contaminated groundwater.

5.2.12 Proximity to Floodplains

The Site is not located within a floodplain.

5.2.13 Geography and Geology of the Site

Surface topography at the Site is generally level at an elevation of approximately 32 to 38 feet NAVD88, and slopes gently down to the south.

The stratigraphy of the Site consisted of fill to approximately 4 to 20 feet bgs, characterized by silt with sand, brick, gravel, asphalt, and glass across the Site. The fill was generally underlain by either apparent native soil (silt, sand, and clay with gravel) to the terminus of the borings (5 to 25 feet bgs) or apparent weathered bedrock encountered between 5 to 24 feet bgs.

Based on site-specific measurements of the monitoring wells on February 11, 2022, the groundwater elevation across the Site ranges from approximately 14.5 to 21.5 feet (NAVD88), or from approximately 13.9 to 18.1 feet bgs. The inferred groundwater flow direction is southwesterly as shown on Figure 4. Groundwater in the Bronx is not used as a source of drinking water.

5.2.14 Current Institutional Controls and Engineering Controls

Currently, the Institutional Control at the Site is the NYCOER E-Designation. No other Institutional or Engineering Controls are known.

5.3 Summary of Selected Remedial Actions

Remedial activities will be performed at the Site in accordance with this RAWP and the forthcoming NYSDEC-issued Decision Document (DD). All deviations from this RAWP and/or the DD will be promptly reported to NYSDEC for approval and will be fully explained in the Final Engineering Report (FER). The remedy includes the following elements:

1. A remedial design will be prepared to provide the details necessary for the construction, operation, optimization, maintenance, and monitoring of the remedial program. Green remediation principles and techniques will be implemented to the extent feasible in the design, implementation, and Site management of the remedy, as per the DER-31. The major green remediation components are as follows:
    a. Considering the environmental impacts of treatment technologies and remedy stewardship over the long term;
    b. Reducing direct and indirect greenhouse gases and other emissions;
    c. Increasing energy efficiency and minimizing use of non-renewable energy;
    d. Conserving and efficiently managing resources and materials;

e. Reducing waste, increasing recycling, and increasing reuse of materials which would otherwise be considered a waste;

f. Maximizing habitat value and creating habitat when possible;

g. Fostering green and healthy communities and working landscapes which balance ecological, economic, and social goals; and

h. Integrating the remedy with the end use where possible and encouraging green and sustainable re-development.

As part of the remedial design program, to evaluate the remedy with respect to green and sustainable remediation principles, an environmental footprint analysis was completed. Water consumption, greenhouse gas emissions, renewable and non-renewable energy use, waste reduction and material use were estimated, as well as goals for the project related to these green and sustainable remediation metrics. The project design specifications include detailed requirements to achieve the green and sustainable remediation goals. Further, progress with respect to green and sustainable remediation metrics will be tracked during implementation of the Remedial Action and reported in the FER, including a comparison to the included goals. Additionally, the remedial design program includes a climate change vulnerability assessment to evaluate the impact of climate change on the Site and the proposed remedy.

2. Demolition and abatement (e.g., asbestos, universal waste, etc.) of any remaining building materials or foundations from the former gasoline station.

3. Excavation and off-site disposal of all soil within the upper 15 feet that has contaminants above RRSCOs and of all soil that has petroleum-related VOCs above PGWSCOs to achieve a Track 2 remedy [see Tables 3 through 5 for the Soil Cleanup Objectives (SCOs)]. Table 6 provides a summary of the RI soil sample exceedances. At a minimum, this would consist of 5-foot excavation across the Site, with removal of three hotspots where historic fill contaminants exceed RRSCOs to depths of approximately 8.5 to 11 feet bgs, and two petroleum hotspots to depths of 20 to 25 feet bgs. It is estimated that approximately 11,600 cubic yards of contaminated soil will be removed from the Site.

4. Collection and laboratory analysis of confirmatory endpoint samples across the Site at the remedial excavation depth to document remaining concentrations of contaminants in soil after remedial excavation is complete. Endpoint sampling will occur around any additional areas of concern identified during the remedial action based on the sampling frequency outlined in Section 5.4 of DER-10.

5. A contingency plan for discovery of an unknown source of contamination or areas of concern that may require remediation (further described in Section 7.4.10).

6. Any unknown/unregistered tanks and associated piping, other structures associated with a source of contamination, and/or grossly contaminated soil/fill, if encountered, will be removed in accordance with applicable regulations.

7. Installation of SOE necessary to enable excavation of contaminated soil/fill. SOE installation will comply with applicable local and state-controlled inspections.

8. A site-specific HASP and CAMP will be implemented during all ground-intrusive Site activities, which includes soil disturbance and loading activities, to monitor levels of VOCs and airborne particulates within the active work zones and around the perimeter of the Site.

9. Screening for indications of contamination (by visual means, odor, and monitoring with a PID) of soil during all ground-intrusive Site work, including soil disturbance and loading activities.

10. Characterization and off-site disposal of all materials removed from the Site in accordance with all Federal, State, and local rules and regulations for handling, transport, and disposal. Waste disposal facilities will be selected based on the data collected to date and the results of the planned waste classification sampling.

11. Importation of clean fill meeting the requirements of 6 NYCRR Part 375-6.7(d) to replace the excavated soil and/or to establish the design grades or to backfill over-excavated areas. On-site soil that does not exceed RRSCOs for any compound or PGWSCOs for VOCs may be used on-site to backfill the excavation areas or re-grade the Site. Soil exceeding the UUSCO for 1,4-dioxane will not be imported, per DER-10: Appendix 5 - Allowable Constituent Levels for Imported Fill or Soil, Subdivision 5.4(e). If PFOA or PFOS are detected in any sample at or above the RRGVs, it will also be tested by the Synthetic Precipitation Leaching Procedure (SPLP). If the SPLP concentrations of PFOA and PFOS are at or above 10 ppt, the soil will not be reused or imported. Analytical results will be compared to Table 375-6.8(b) of 6 NYCRR Part 375 and submitted to NYSDEC via a *Request to Import/Reuse Soil or Fill* form for review and approval prior to importation and placement on-site. All imported soil or soil proposed for reuse requires NYSDEC review prior to on-site placement. Excavated bedrock from the Site may be reused below the composite cover system (if one is necessary) without the need for sampling unless unsuitable due to visual, olfactory, and/or PID readings indicate contamination.

12. Dewatering in accordance with all federal, state, and local regulations, as necessary, to enable the remedial excavation activities.

13. Groundwater treatment will be performed. This program will consist of surface application of a ORC at the base of remedial excavation in the petroleum hotspots to address groundwater contamination associated with NYSDEC Spill Nos 98-14075 and 01-11974. The ORC application will address potential residual contamination in soil at/below the water table. Following groundwater treatment, four permanent 2-inch diameter polyvinyl chloride (PVC) groundwater monitoring wells will be installed at the Site to monitor petroleum-related VOC concentrations. Quarterly groundwater sample collection will be implemented to evaluate performance of the remedy. Quarterly groundwater monitoring will continue until approved otherwise by NYSDOH and NYSDEC

14. A soil vapor intrusion evaluation including confirmatory indoor air sampling will be conducted in the future on-site buildings. The soil vapor intrusion evaluation will include indoor air samples collected after the building envelope is completed and the heating, ventilation, and air conditioning system is started. A workplan will be provided for review/comment to NYSDEC and NYSDOH and will include a written evaluation of the soil vapor intrusion exposure pathway, proposed indoor air sampling locations, and a schedule for conducting the sampling prior to occupancy.

15. Recording of an Environmental Easement with the NYC Register to prevent future exposure to any residual contamination remaining at the Site. The Environmental Easement will: require the remedial parties/Site owners to complete and submit a periodic certification of Engineering Controls and Institutional Controls to the NYSDEC in accordance with Part 375-1.8 (h)(3); allow the use and development of the Site for restricted residential use as defined by Part 375-1.8(g), although land use is subject to local zoning laws; restrict the use of groundwater as a source of potable or process water without necessary water quality treatment, as determined by NYSDOH and NYC Department of Health; and require compliance with a Site-specific NYSDEC-approved SMP.

16. Preparation of an SMP for long term management of residual contamination as required by the Environmental Easement including plans for: 1) Engineering Controls and Institutional Controls, 2) monitoring (including groundwater monitoring), 3) operation and maintenance, and 4) reporting.
17. If Track 2 restricted residential use cleanup is not achieved in certain areas due to SOE limits, the remedy will achieve a Track 4 cleanup in those area. The contingent Track 4 cleanup would require many of the same elements as the Track 2 restricted residential cleanup, and also the following elements:

    - Construction and maintenance of a composite cover system to prevent human exposure to residual contaminants in soil/fill remaining under the Site, which will consist of: 1) concrete building foundations, which doubles as a demarcation barrier, in areas within the building footprint; and/or 2) paved surfaces underlain by a demarcation barrier in roadway and sidewalk areas. Any fill material brought to the Site will meet the SCOs for cover material as set forth in 6 NYCRR Part 375-6.7(d).
    - Inclusion of soil management provisions in the SMP, including an Excavation Work Plan.

6.0 REMEDIAL ACTION PROGRAM

6.1 Governing Documents

- 6 NYCRR Part 364 - NYS Waste Transporter Permits
- 6 NYCRR Part 360 - NYS Solid Waste Management Requirements
- 6 NYCRR Part 371 - Identification and Listing of Hazardous Wastes
- 6 NYCRR Part 372 - Hazardous Waste Manifest System and Related Standards for Generators, Transporters and Facilities
- 6 NYCRR Subpart 374-2 - Standards for the Management of Used Oil
- 6 NYCRR Part 375 - Environmental Remediation Programs
- 6 NYCRR Part 376 - Land Disposal Restrictions
- 6 NYCRR Part 613 - Petroleum Bulk Storage

6.1.1 Green and Sustainable Remediation and Climate Resiliency

DER-31: Green Remediation provides the framework for DER's approach to remediating sites in the context of the larger environment, a concept known as "Green Remediation". Green Remediation (or greener cleanups) can be defined as "the practice of considering all environmental effects of remedy implementation and incorporating options to minimize the environmental footprint of cleanup actions." It is intended to be a holistic approach which improves the overall sustainability of remedial cleanups by promoting the use of more sustainable practices and technologies. Such practices and technologies are less disruptive to the environment, generate less waste, increase reuse and recycling, and emit fewer pollutants, including greenhouse gases, to the atmosphere. The approach also recognizes the potential for positive economic and social benefits of site reuse and supports coordination of site reuse and remediation to affect the most beneficial and sustainable reuse of the site. Please note that final end use is dictated by local zoning codes. DEC's role is to ensure that the remedy is protective for the intended end use.

The Remedial Action program should build off the sustainable or greener cleanup activities evaluated during the RI. However, if the relevant evaluations were not performed, then similar considerations discussed in earlier sections of this document should be evaluated at this stage. Other considerations:

- Require a Green Remediation Implementation Plan submittal from the selected Contractor to detail procedures and tracking of these items;
- Require a Climate Screening- a high level desktop review of the site and potential changes in climate hazards. If the screening identifies potential exposure to climate hazards, a Climate Vulnerability Assessment (CVA) will need to be conducted. A CVA will identify adaptation measures to account for projected climate hazard exposures.
- For sites susceptible to climate change, require a Climate Adaptation Plan, which will incorporate findings and recommendations from the CVA;

- During construction activities and associated landscape alteration activities, green building strategies such as those outlined in the USGBC LEED should be considered. LEED includes guidelines and recommendations for new construction, and existing building operations and management that fall under six categories important for reducing the environmental impact of facilities of all types:
  - Sustainable sites
  - Water efficiency
  - Energy and atmosphere
  - Materials and resources
  - Indoor environmental quality
  - Innovation in operations
- As noted across the LEED categories, resources other than energy that can be conserved include water, raw materials for materials consumed, topsoil, paper for reports, and landfill space. Conserving one resource typically conserves other resources and has other sustainability benefits. For example, recycling of construction and demolition debris or metal will reduce consumption of landfill space and may also save energy and reduce air emissions by reducing material transportation. Another example is the use of waste-to energy plants for waste disposal rather than landfills in states where these plants are currently operating. This also reduces the consumption of landfill space and results in energy production from the waste processing. Other examples of resource conservation include treated water reinjection, the reuse of treated soil onsite, and the beneficial reuse of sediments.
- The use of "green" construction and project management products and materials such as ecofriendly concrete or the use of native plants for site restoration also advances the sustainability objectives of the project. It is important to understand that green remediation implies minimizing the entire footprint of the remediation project, which includes the environmental impacts of products and materials associated with the project. For example, eco-friendly concrete generally refers to concrete that is produced with a certain percentage of fly-ash (a waste product from the coal-firing process). This type of "green" concrete takes a problematic substance out of the waste stream and reduces the cumulative amount of energy associated with the production of concrete. The use of native plants for site restoration helps to conserve water and eliminate the need for potentially harmful fertilizers and pesticides.

  Other approaches or considerations may be approved by NYSDEC on a case-by-case basis.

6.1.2 Site Specific Health and Safety Plan

A Site-specific HASP has been prepared for the Site and is included in Appendix K. All remedial work performed under this plan will be in full compliance with governmental requirements, including Site and worker safety requirements mandated by the United States Occupational Safety and Health Administration (OSHA).

The Volunteer and associated parties preparing the remedial documents submitted to the State and those performing the construction work, are completely responsible for the preparation of an appropriate Health and Safety Plan and for the appropriate performance of work according to that plan and applicable laws.

The HASP and requirements defined in this RAWP pertain to all remedial and invasive work performed at the Site until the issuance of the COC.

The Site Safety Coordinator will be Ms. Mackenzie Miller. Her resume is provided in Attachment A – of the QAPP (Appendix L).

Confined space entry will comply with all OSHA requirements to address the potential risk posed by combustible and toxic gasses.

6.1.3 Quality Assurance Project Plan

Sampling associated with the Site will be conducted in accordance with the Quality Assurance Project Plan (QAPP) included as Appendix L, which details field screening and sampling methodologies, sample submittal to the laboratory, and reporting requirements. The QAPP includes the project team responsible for implementing the remediation requirements and provisions set forth in this RAWP. All samples will be reported with Category B deliverables and Environmental Quality Information System (EQuIS)™ Electronic Data Deliverables (EDDs), with the exception of disposal sampling.

6.1.4 Construction Quality Assurance Plan

The Construction Quality Assurance Plan (CQAP), provided as Appendix M, provides a detailed description of the observation and testing activities that will be used to monitor construction quality and confirm that remedial construction is in conformance with the remediation objectives and specifications.

6.1.5 Soil/Materials Management Plan

A Soil/Materials Management Plan (SMMP) is included in Section 7.4 of this RAWP. The SMMP includes detailed plans for managing all soils/materials that are disturbed at the Site, including excavation, handling, storage, transport, and disposal. It also includes all of the procedures that will be applied to ensure effective, nuisance-free performance in compliance with all applicable Federal, State, and local laws and regulations.

6.1.6 Erosion and Sediment Control Plan

Erosion and sedimentation control measures will be implemented during remedial/redevelopment activities at the Site in accordance with a Stormwater Pollution Prevention Plan (SWPPP). The SWPPP will be submitted to and approved by the New York City Department of Environmental Protection (NYCDEP) before the commencement of remediation excavation. It will contain requirements regarding stormwater management, erosion and sediment control, construction practices to minimize stormwater contamination, maintenance and inspection procedures, and the SWPPP Coordinator and their duties for the Site.

The erosion and sediment controls will be in conformance with requirements presented in NYS Standards and Specifications for Erosion and Sediment Control.

6.1.7 Community Air Monitoring Plan

Community air monitoring will be performed via two fixed stations at the perimeter of the Site during all ground surface intrusive work (i.e., one downwind and one upwind). In addition to the community air monitoring, air monitoring will be performed on the perimeter of the work zone periodically (at a minimum once per hour) on a roving basis with hand-held equipment based upon wind direction and the location of the intrusive work. The CAMP is provided in Appendix N.

6.1.8 Contractors Site Operations Plan

The contractor performing the proposed remedial excavation will prepare a Site Operations Plan.

The Remedial Engineer will review all plans and submittals for this remedial project (including those listed above and contractor and sub-contractor document submittals) and confirm that they will comply with this RAWP. The Remedial Engineer is responsible for ensuring that all later document submittals for this remedial project, including contractor and sub-contractor document submittals, comply with this RAWP. All remedial documents will be submitted to NYSDEC and NYSDOH in a timely manner and prior to the start of Remedial Action.

6.1.9 Citizen Participation Plan for Proposed Remedial Action

A certification of mailing will be sent by the Volunteer to the NYSDEC project manager following the distribution of all Fact Sheets and notices that includes: (1) certification that the Fact Sheets were mailed, (2) the date they were mailed; (3) a copy of the Fact Sheet, (4) a list of recipients (contact list); and (5) a statement that the repository was populated on [specific date] and that it contained all of applicable project documents.

No changes will be made to approved Fact Sheets authorized for release by NYSDEC without written consent of the NYSDEC. No other information, such as brochures and flyers, will be included with the Fact Sheet mailing.

The approved CPP for this project is attached in Appendix J.

Document repositories have been established at the following locations listed in Table G below and contain all applicable project documents:

Table G
Document Repositories

New York Public Library – Woodstock Branch 761 East 160th Street, Bronx, New York 10456 Phone: (718) 665-6255 Monday – Friday: 10 AM–6 PM Saturday: 10 AM–5 PM Sunday: CLOSED	Bronx Community Board 1 3024 3rd Avenue, Bronx, New York 10455 Phone: (718) 585-7117 Monday – Sunday: 9AM-5PM

In addition, an electronic repository can be accessed via DECInfo Locator at the following link: https://extapps.dec.ny.gov/data/DecDocs/C203153/.

6.2 General Remedial Construction Information

6.2.1 Project Organization

Personnel responsible for implementation of this RAWP are included on the Organization Chart provided as Table H.

Table H
Project Organization

Company	Individual Name	Title	Contact Number(s)
NYSDEC	Javier Perez-Maldonado	Project Manager	(518) 402-8172
NYSDOH	Kristin Kulow	Project Manager	(607) 353-4335
AKRF	Marc Godick	Quality Assurance Officer	(914) 922-2356
	Rebecca Kinal	Remedial Engineer	(914) 922-2362
	Kenneth Wiles	Project Manager	(646) 388-9528
	Mackenzie Miller	Field Team Leader/ Site Safety Officer (SSO)	(631) 357-9404 (cell)
350 GC Property Owner LLC (Volunteer)	Patrick Taylor	Volunteer Representative	(212) 335-2317

Resumes of key personnel involved in the proposed Remedial Action are included in Attachment A of the QAPP (Appendix L).

6.2.2 Remedial Engineer

The Remedial Engineer for this project will be Rebecca Kinal, P.E. The Remedial Engineer is a registered professional engineer licensed by the State of New York. The Remedial Engineer will have primary direct responsibility for implementation of the remedial program for the 350 Grand Concourse Site (NYSDEC BCA Index No. C203153-04-22, No. C203153). The Remedial Engineer will certify in the FER that the remedial activities were observed by qualified environmental professionals under her supervision and that the remediation requirements set forth in the RAWP and any other relevant provisions of ECL 27-1419 have been achieved in full conformance with that Plan. Other Remedial Engineer certification requirements are listed later in this RAWP.

The Remedial Engineer, or designated personnel under her supervision, will coordinate the work of other contractors and subcontractors involved in all aspects of remedial construction, including soil excavation, stockpiling, characterization, removal and disposal, air monitoring, emergency spill response services, import of back fill material, and management of waste transport and disposal. The Remedial Engineer will be responsible for all appropriate communication with NYSDEC and NYSDOH.

The Remedial Engineer, or designated personnel under her supervision, will review all pre-remedial plans submitted by contractors for compliance with this RAWP and will certify compliance in the FER.

The Remedial Engineer will provide the certifications listed in Section 13.1 in the FER.

6.2.3 Remedial Action Construction Schedule

A schedule for performance of the remedial work is included in Section 14.

6.2.4 Work Hours

The hours for operation of remedial construction will conform to the NYC Department of Buildings (NYCDOB) construction code requirements or according to specific variances issued by that agency. NYSDEC will be notified by the Volunteer of any variances issued by NYCDOB. NYSDEC reserves the right to deny alternate remedial construction hours.

6.2.5 Site Security

The Site will be completely closed from public access by using secured construction fencing. No unauthorized personnel will be able to access the Site. During off hours, the active portions of the Site will be completely enclosed within a locked gate.

6.2.6 Traffic Control

It is not anticipated that traffic will be disrupted beyond normal contractor vehicle traffic going to and from the Site during construction. Any sidewalk closures that are required during the course of construction/remediation activities will be conducted in accordance with NYC Department of Transportation (NYCDOT) permits.

6.2.7 Contingency Plan

A contingency plan has been developed and included as Section 7.4.10.

6.2.8 Worker Training and Monitoring

All those who enter the work area while intrusive activities are being performed must recognize and understand the potential hazards to health and safety. All construction personnel upon entering the Site must attend a brief training meeting, its purpose being to:

- Make workers aware of the potential hazards they may encounter;
- Instruct workers on how to identify potential hazards;
- Provide the knowledge and skills necessary for them to perform the work with minimal risk to health and safety;
- Make workers aware of the purpose and limitations of safety equipment; and
- Ensure that they can safely avoid or escape from emergencies.

Construction personnel will be responsible for identifying potential hazards in the work zone. The AKRF project manager will be responsible for ensuring that the training is conducted by the AKRF SSO in accordance with the Site-specific HASP, which is included in Appendix K. Others who enter the Site must be accompanied by a suitably trained construction worker. In addition, any Site workers within the "work zone" must have received the OSHA 40-hour Hazardous Waste Operations and Emergency Response (HAZWOPER) training and will be under a medical monitoring program.

6.2.9 Agency Approvals

The Volunteer has addressed all State Environmental Quality Review Act environmental requirements for this Site. All permits or government approvals required for remedial construction have been, or will be, obtained prior to the start of remedial construction.

The planned end use for the Site is in conformance with the current zoning for the property as determined by NYCDCP. COC will not be issued for the project unless conformance with zoning designation is demonstrated.

A complete list of all Federal, State and local governmental permits, certificates or other approvals or authorizations required to perform the remedial and development work are included as Table 7 will be updated, as necessary, and included in the FER.

All planned remedial or construction work in regulated wetlands and adjacent areas will be specifically approved by the NYSDEC Division of Natural Resources to ensure that it

meets the requirements for substantive compliance with those regulations prior to the start of construction. Nothing in the approved RAWP or its approval by NYSDEC should be construed as an approval for this purpose.

6.2.10 Pre-Construction Meeting with NYSDEC

A pre-construction meeting with members of NYSDEC, NYSDOH, NYCOER, the Volunteer, the construction management team, the excavation contractor, and AKRF will be conducted prior to the start of work under this RAWP.

6.2.11 Emergency Contact Information

An emergency contact sheet with names and phone numbers is included in the Site-specific HASP provided in Appendix K. That document will define the specific project contacts for use by NYSDEC and NYSDOH in the case of a day or night emergency.

6.2.12 Remedial Action Costs

The total estimated cost of the Remedial Action is $5,074,500. An itemized and detailed summary of estimated costs for all remedial activity is attached as Table 2. This will be revised based on actual costs and submitted as an Appendix to the FER.

6.3 Site Preparation

Prior to conducting any intrusive activities for Site remediation, the work zone(s), designated entry points, soil stockpile staging areas, decontamination zones, and truck routes will be established, as applicable. The Site plan will be updated as necessary to reflect any changes in operations during the course of the intrusive work. Particulate control measures, if necessary, will be implemented. Additional details of Site preparation activities are provided in the following sections.

6.3.1 Mobilization

Site mobilization involving security setup, equipment mobilization, utility mark outs, and marking and staking of excavation areas will be performed prior to undertaking any Site remediation activities.

6.3.2 Monitoring Well Decommissioning

Since the remedial excavation will be performed site-wide, existing on-site groundwater monitoring wells will be properly decommissioned in accordance with NYSDEC Commissioners Policy 43 - Groundwater Monitoring Well Decommissioning Policy. The only exception to this is if the full length of the well is to be excavated during remediation. Similarly, existing soil vapor probes will be properly decommissioned unless they are to be fully removed during remediation.

6.3.3 Erosion and Sedimentation Controls

Erosion and sediment control measures will be installed at the Site prior to conducting any ground-intrusive work. These measures will be installed according to all applicable or relevant and appropriate Federal, State, and local laws. The measures will provide for abatement and control of environmental pollution arising from proposed remediation and construction activities. The control measures will include procedures for perimeter Site controls, stabilized construction pads at each construction entrance, equipment decontamination, drainage inlet protection, and particulate suppression. The RE, or her representative, will conduct routine inspections, and any repairs and/or maintenance of control measures will be completed in a timely fashion to maintain the controls in proper

working order. All vehicles leaving the Site will be inspected to ensure that no soil adheres to the wheels or undercarriage. Any situations involving material spilled in transit or mud and dust tracked off-site will be remedied. The access routes will be inspected for road conditions, overhead clearance, and weight restrictions.

6.3.4 Stabilized Construction Entrance(s)

A crushed stone path will be constructed at all truck entrances and exits. All trucks will drive over the path prior to leaving so that they do not get re-contaminated prior to departure from the Site. A laborer will check the trucks as they leave, and will use a hose, shovel, and/or broom to wash off the truck tires and body as it leaves the Site, as necessary.

6.3.5 Utility Marker and Easements Layout

The Volunteer and its contractors are solely responsible for the identification of utilities that might be affected by work under the RAWP and implementation of all required, appropriate, or necessary health and safety measures during performance of work under this RAWP. The Volunteer and its contractors are solely responsible for safe execution of all invasive and other work performed under this RAWP. The Volunteer and its contractors must obtain any Federal, State, or local permits or approvals pertinent to such work that may be required to perform work under this RAWP. Approval of this RAWP by NYSDEC does not constitute satisfaction of these requirements.

The presence of utilities and easements on the Site has been investigated by the Remedial Engineer. It has been determined that no risk or impediment to the planned work under this RAWP is posed by utilities or easements on the Site.

6.3.6 Sheeting and Shoring

Appropriate management of structural stability of on-Site or off-Site structures during on-Site activities include excavation is the sole responsibility of the Volunteer and its contractors. The Volunteer and its contractors are solely responsible for safe execution of all invasive and other work performed under this RAWP. The Volunteer and its contractors must obtain any Federal, State, or local permits or approvals that may be required to perform work under this RAWP. Further, the Volunteer and its contractors are solely responsible for the implementation of all required, appropriate, or necessary health and safety measures during performance of work under the approved RAWP. The SOE plans are provided in Appendix C.

6.3.7 Equipment and Material Staging

Staging and storage of equipment and materials will be contained within the secured Site, or within a secured area on the street/sidewalk in accordance with an NYCDOT permit. By the nature of the work involved in this project, equipment and materials will be moved to different areas within the secured Site as work progresses.

6.3.8 Decontamination Area

A decontamination area will be established adjacent to the work areas, as required. The base of the decontamination area will be covered with 6-mil plastic sheeting as necessary and bermed to prevent spreading of decontamination fluids or potential discharge to the ground surface.

All equipment in direct contact with known or potentially contaminated material will be either dedicated or decontaminated prior to handling less contaminated material or removal

from the Site. All liquids used in the decontamination procedure will be collected, stored, and disposed of in accordance with Federal, State, and local regulations. Personnel performing this task will wear the proper personal protective equipment as prescribed in the HASP (Appendix K).

6.3.9 Site Fencing

The Site will be secured with a locking fence that will be placed around the entire perimeter. During all remedial activities, access to the Site will be limited and all persons entering the Site will be required to sign a log book and meet all applicable health and safety requirements. The Site will be secured during non-working hours.

6.3.10 Demobilization

Restoration of the excavation work will include backfilling and general earthwork to prepare for construction of the proposed foundation elements. Upon completion of the remedial excavation work, any waste materials (i.e., plastic sheet, absorbent pads, etc.) and the decontamination pad will be removed from the Site for proper disposal.

6.4 Reporting

All daily and monthly Reports will be included in the FER.

6.4.1 Daily Reports

Daily reports will be submitted to NYSDEC and NYSDOH project managers by noon of each day following the reporting period and will include:

- An update of progress made during the reporting day;
- Locations of work and quantities of material imported and exported from the Site;
- References to alpha-numeric map for Site activities;
- A summary of any and all complaints with relevant details (names, phone numbers);
- A summary of CAMP finding, including excursions;
- Photographs of site activities;
- An explanation of notable Site conditions.

Daily reports are not intended to be the mode of communication for notification to the NYSDEC of emergencies (accident, spill), requests for changes to the RAWP or other sensitive or time critical information. However, such conditions must also be included in the daily reports. Emergency conditions and changes to the RAWP will be addressed directly to NYSDEC project manager via personal communication.

Daily Reports will include a description of daily activities keyed to an alpha-numeric map for the Site that identifies work areas. These reports will include a summary of CAMP results, odor and dust excursions and corrective actions, and all complaints received from the public.

A Site map that shows a predefined alpha-numeric grid for use in identifying locations described in reports submitted to NYSDEC is attached in Figure 8.

The NYSDEC assigned project number will appear on all reports.

6.4.2 Monthly Reports

Monthly reports will be submitted to NYSDEC and NYSDOH project managers by the 10th day of each month following the reporting period and will include:

- Activities relative to the Site during the previous reporting period and those anticipated for the next reporting period, including a quantitative presentation of work performed (e.g., tons/cubic yards of material exported and imported, etc.);
- Description of approved activity modifications, including changes of work scope and/or schedule;
- Sampling results received following internal data review and validation, as applicable; and,
- An update of the remedial schedule including the percentage of project completion, unresolved delays encountered or anticipated that may affect the future schedule, and efforts made to mitigate such delays.
- Tracking of green and sustainable remediation metrics determined during the design process should be included in monthly reports.

6.4.3 Other Reporting

Photographs will be taken of all remedial activities and submitted to NYSDEC in digital (JPEG) format. Photos will illustrate all remedial program elements and will be of acceptable quality. Representative photos of the Site prior to any Remedial Actions will be provided. Representative photos will be provided of each contaminant source, source area and Site structures before, during and after remediation. Photos will be included in the daily reports as needed, and a comprehensive collection of photos will be included in the FER.

Progress with respect to green and sustainable remediation metrics will be tracked during implementation of the remedial action and reported in the FER, including a comparison to the goals established during the remedial program. Regular updates to the metrics used (SEFA, SiteWise™ or otherwise approved method) should be included.

Job-site record keeping for all remedial work will be appropriately documented. These records will be maintained on-Site at all times during the project and be available for inspection by NYSDEC and NYSDOH.

6.4.4 Complaint Management Plan

A log of all complaints from the public regarding nuisance or other Site conditions will be compiled by the project manager for submission to NYSDEC and NYSDOH, as appropriate. All complaints will be reported in the daily reports and in the FER.

6.4.5 Deviations from the Remedial Action Work Plan

All deviations from this RAWP will be submitted to NYSDEC and will require prior NYSDEC approval . These deviations will be recorded in both the monthly progress reports and in the FER. At a minimum, the report of the deviation will include the following:

- Reasons for deviating from the approved RAWP;
- Approval process to be followed for changes/editions to the RAWP; and
- Effect of the deviations on overall remedy.

7.0 REMEDIAL ACTION: MATERIAL REMOVAL FROM SITE

Based on data collected to date, removal of materials from the Site will include: (1) excavation and off-site disposal of contaminated soil, as shown on Figure 9; and (2) removal of any unknown USTs, fill ports, and vents (if encountered). The amount of soil to be excavated is approximately 11,600 cubic yards. Additional soil/fill may have to be removed as part of remedial excavation based on the results of the endpoint sampling. All contaminated soil removed from the Site will be disposed of at a facility(ies) licensed to accept such material. Proposed disposal facilities will be submitted to NYSDEC prior to commencing remedial excavation.

7.1 Soil Cleanup Objectives

The applicable SCOs for the Site are PGWSCOs for VOCs and RRSCOs SVOCs, PCBs, pesticides, and metals. Soil and materials management on-site and off-site will be conducted in accordance with the SMMP, as described in Section 7.4.4. Any petroleum storage tank closures will, at a minimum, conform to the criteria defined in DER-10.

Concentration maps showing compounds detected above UUSCOs, RRSCOs, and/or PGWSCOs in soil/fill are shown on Figures 5A through 5D.

7.2 Remedial Performance Evaluation (Post Excavation Endpoint Sampling)

Post-excavation endpoint samples will be collected at the proposed locations as shown on Figure 10. Additional post-excavation soil samples will be collected around any unknown USTs and/or other hotspots encountered on the Site.

7.2.1 End-Point Sampling Frequency

Based on the sampling frequency outlined in Section 5.4 of DER-10, endpoint sampling will include one bottom soil sample for every 900 square feet across the Site and one sidewall sample for every 30 linear feet for the hotspots. This totals 39 bottom endpoint samples and 25 sidewall endpoint samples. If sloping for the hotspot excavations makes collection of sidewall samples there challenging, these sidewall samples will be collected at the bottom of the hotspot at its extents. Due to the presence of SOE to be installed for the excavation at the Site's extents, sidewall samples cannot be collected there.

In addition, a minimum of five endpoint samples consisting of four sidewalls (except where SOE is present) and one bottom sample will be collected from any deeper remedial excavations (including the petroleum hotspots), as well as one additional sample for every 15 linear feet of trench for any associated piping.

7.2.2 Endpoint Sampling and Laboratory Methodology

The endpoint samples will be collected using a decontaminated stainless steel sampling trowel, hand auger, or dedicated wooden tongue depressor and placed directly into pre-sterilized laboratory-issued containers. The sample containers will be properly labeled and immediately placed on ice within a cooler. Sample time, date, and location will be recorded on a chain of custody.

Endpoint samples will be submitted to an NYSDOH Environmental Laboratory Approval Program (ELAP)-certified laboratory for analysis of VOCs, SVOCs, PCBs, pesticides, TAL metals plus hexavalent chromium, and PFAS. In accordance with NYSDEC requirements, QA/QC sampling will be performed; the laboratory will follow the NYSDEC Analytical Services Protocol dated 1995, and Category B deliverables and EQuIS™ EDDs will be issued. Further details regarding the specific sampling

methodologies and analytical procedures are presented in the QAPP, included as Appendix L.

7.2.3 Reporting of Results

The analytical results of the endpoint samples will be tabulated and compared to UUSCOs and RRSCOs; petroleum-related VOCs will be additionally compared to PGWSCOs. The tabulated data as well as the laboratory reports will be included in the FER. All analytical data will be submitted to the NYSDEC database in EDD format via EQuIS™.

7.2.4 Quality Assurance/Quality Control

The fundamental QA objective with respect to accuracy, precision, and sensitivity of analysis for laboratory analytical data is to achieve the QC acceptance of the analytical protocol. The accuracy, precision, and completeness requirements will be addressed by the laboratory for all data. Collected samples will be appropriately packaged, placed in coolers, and either shipped or delivered directly to the analytical laboratory via a courier. Samples will be containerized in appropriate laboratory provided glassware and shipped in plastic coolers. Samples will be preserved to maintain a temperature of 4 °C. Decontamination of non-dedicated sampling equipment will consist of the following: gently tap or scrape to remove adhered soil/fill; rinse with tap water; wash with Alconox® detergent solution and scrub; and rinse with tap water.

One trip blank, one field blank, one blind duplicate sample, and one matrix spike/matrix spike duplicate (MS/MSD) will be collected per every 20 samples and submitted for laboratory analysis with the accompanying field samples. The field blank(s), blind duplicate(s), and MS/MSD(s) will be analyzed for the same parameters as the field sample(s); the trip blank(s) will be analyzed for VOCs only. Additional QA/QC information is provided in the QAPP, included as Appendix L.

7.2.5 Data Usability Summary Reports and Electronic Data Deliverables

A third-party data validator will review the laboratory reports and prepare DUSRs. The validated data will be submitted to the NYSDEC database via EQuIS™. DUSRs and validated data will be included in the FER. The third-party data validator will be Lori Beyer of L.A.B. Validation Corporation of East Northrop, New York and her resume is included in Attachment A of the QAPP, which is included as Appendix L.

7.2.6 Reporting of Endpoint Data in Final Engineering Report

The FER will include a detailed description of endpoint sampling activities, data summary tables, concentration figures showing endpoint sample locations and concentrations compared to applicable standards, DUSRs, and laboratory reports. The analytical laboratory used for endpoint sample analyses and contingency sampling (if any) will be NYSDOH ELAP-certified. Endpoint sampling will be performed in accordance with DER-10 sample frequency requirements.

7.3 Estimated Material Removal Quantities

The removal of materials from the Site will include: (1) excavation and off-site disposal of soil to comply with the SCOs, as shown on Figure 9 (approximately 11,600 cubic yards); and (2) removal of any unknown USTs, fill ports, and vent lines encountered. Endpoint samples will be collected and analyzed to evaluate if the RRSCOs (Track 2 Cleanup) are achieved across the Site, where all sources of contamination (i.e., petroleum contamination) have been removed, and will inform the need for further excavation with respect to attainment of the SCOs. It is noted that the soil removal

quantities from additional excavation cannot be currently estimated, but will be tabulated and included in the FER, if any.

The limited amount of construction and demolition material cannot be estimated at this time. The exact quantities will be included in the FER.

Clean fill meeting the requirements of 6 NYCRR Part 375-6.7(d) may be brought in to replace the excavated soil and establish the grade at the Site (if necessary). On-site soil that does not exceed RRSCOs for any constituent (and PGWSCOs for VOCs) may be reuse on-site with pre-approval by the NYSDEC project manager in accordance with Section 7.4.6.

7.4 Soil/Materials Management Plan

The SMMP describes the procedures to be performed during the handling of soil/fill materials on-site during all intrusive work.

7.4.1 Soil Screening Methods

Visual, olfactory and PID soil screening and assessment will be performed by a qualified environmental professional or experienced field geologist/environmental scientist under the direction of the Remedial Engineer during all remedial and development excavations into known or potentially contaminated material. Soil screening will be performed regardless of when the invasive work is done and will include all excavation and invasive work performed during the remedy and during development phase, such as excavations for foundations and utility work, prior to issuance of the COC.

All primary contaminant sources (including but not limited to tanks and hotspots) identified during Site Characterization, Remedial Investigation, and Remedial Action will be surveyed by a NYS-licensed surveyor. This information will be provided on maps in the FER.

Resumes have been provided in Attachment A of the QAPP (Appendix L) for all personnel responsible for field screening (i.e., those representing the Remedial Engineer) of invasive work for unknown contaminant sources during remediation and development work.

7.4.2 Stockpile Methods

Stockpiles will be inspected at a minimum once each week and after every storm event. Results of inspections will be recorded in a logbook and maintained at the Site and available for inspection by NYSDEC. Stockpiles will be kept covered at all times with appropriately anchored tarps. Stockpiles will be routinely inspected and damaged tarp covers will be promptly replaced. Stockpiles will be routinely inspected and damaged tarp covers will be promptly replaced. Hay bales may be used as needed near catch basins, surface waters, and other discharge points. Water will be available on-site at suitable supply and pressure for use in particulate control.

7.4.3 Materials Excavation and Load Out

The Remedial Engineer or a Qualified Environmental Professional under his/her supervision will oversee all invasive work and the excavation and load-out of all excavated material.

The Volunteer and its contractors are solely responsible for safe execution of all invasive and other work performed under this RAWP.

The presence of utilities and easements on the Site has been investigated by the Remedial Engineer. It has been determined that no risk or impediment to the planned work under this RAWP is posed by utilities or easements on the Site.

Loaded vehicles leaving the Site will be appropriately lined, tarped, securely covered, manifested, and placarded in accordance with appropriate Federal, State, local, and NYS Department of Transportation requirements (and all other applicable transportation requirements).

Vehicles leaving the Site will not be overloaded. The Remedial Engineer's representative will make reasonable efforts to ensure that vehicles are not loaded beyond their NYS Department of Transportation weight rating and that all material is secured beneath the truck bed cover.

A truck wash will be operated on-Site. The Remedial Engineer will be responsible for ensuring that all outbound trucks will be washed at the truck wash before leaving the Site until the remedial construction is complete.

Locations where vehicles enter or exit the Site shall be inspected daily for evidence of off-Site sediment tracking.

The Remedial Engineer will be responsible for ensuring that all egress points for truck and equipment transport from the Site will be clean of dirt and other materials derived from the Site during Site remediation and development. Cleaning of the adjacent streets will be performed as needed to maintain a clean condition with respect to Site -derived materials.

The Volunteer and associated parties preparing the remedial documents submitted to the State, and parties performing this work, are completely responsible for the safe performance of all invasive work, the structural integrity of excavations, and for structures that may be affected by excavations (such as building foundations and bridge footings).

The Remedial Engineer will ensure that Site development activities will not interfere with, or otherwise impair or compromise, remedial activities proposed in this Remedial Action Work Plan.

All contaminated materials and structures that may be remediated (USTs, vaults and associated piping, transformers, etc.) will be removed and end-point remedial performance sampling completed before excavations related to Site development commence proximal to the hotspot or structure.

Development-related grading cuts and fills will not be performed without NYSDEC approval and will not interfere with, or otherwise impair or compromise, the performance of remediation required by this plan.

Mechanical processing of historical fill and contaminated soil on-Site is prohibited.

All primary contaminant sources (including but not limited to tanks and hotspots) identified during Site Characterization, Remedial Investigation, and Remedial Action will be surveyed by a NYS-licensed surveyor. The survey information will be shown on maps to be reported in the FER.

7.4.4 Materials Transport Off-Site

All transport of materials will be performed by licensed haulers in accordance with appropriate Federal, State, and local regulations, including 6 NYCRR Part 364. Haulers will be appropriately licensed and trucks properly placarded.

All trucks loaded with Site materials will exit the vicinity of the Site using only these approved truck routes.

Proposed in-bound and out-bound truck routes to the Site are shown in Figure 11. This is the most appropriate route and takes into account: (a) limiting transport through residential areas and past sensitive sites; (b) use of city mapped truck routes; (c) prohibiting off- Site queuing of trucks entering the facility; (d) limiting total distance to major highways; (e) promoting safety in access to highways; and (f) overall safety in transport.

Trucks will be prohibited from stopping and idling in the neighborhood outside the project Site.

Egress points for truck and equipment transport from the Site will be kept clean of dirt and other materials during Site remediation and development.

Queuing of trucks will be performed on-Site in order to minimize off-Site disturbance. Off-Site queuing will be prohibited.

Material transported by trucks exiting the Site will be secured with tight-fitting covers. Loose-fitting canvas or mesh truck covers will be prohibited. If loads contain wet material capable of producing free liquid, truck liners will be used.

All trucks will be washed prior to leaving the Site. Truck wash waters will be collected and disposed of off-Site in an appropriate manner.

7.4.5 Materials Disposal Off-Site

A properly permitted waste disposal facility will be selected for off-site disposal. The disposal facility(ies) information will be reported to the NYSDEC and NYCOER project managers prior to commencing the disposal activities. The total quantity of material expected to be disposed off-site is 11,600 cubic yards of non-hazardous material. The breakdown by disposal class is pending and will be provided to NYSDEC prior to off-site disposal.

All soil/fill/solid waste excavated and removed from the Site will be treated as contaminated and regulated material and will be disposed in accordance with all local, State (including 6NYCRR Part 360) and Federal regulations. If disposal of soil/fill from this Site is proposed for unregulated disposal (i.e., clean soil removed for development purposes), a formal request with an associated plan will be made to NYSDEC's project manager. Unregulated off-Site management of materials from this Site is prohibited without formal NYSDEC approval.

Material that does not meet Track 1 UUSCOs is prohibited from being taken to NYS recycling facility (6NYCRR Part 360.15 Registration Facility).

The following documentation will be obtained and reported by the Remedial Engineer for each disposal location used in this project to fully demonstrate and document that the disposal of material derived from the Site conforms with all applicable laws: (1) a letter from the Remedial Engineer or BCP Volunteer to the receiving facility describing the material to be disposed and requesting formal written acceptance of the material. This letter will state that material to be disposed is contaminated material generated at an environmental remediation Site in NYS. The letter will provide the project identity and the name and phone number of the Remedial Engineer. The letter will include as an attachment a summary of all chemical data for the material being transported (including Site Characterization data); and (2) a letter from all receiving facilities stating it is in receipt of

the correspondence (above) and is approved to accept the material. These documents will be included in the FER.

Non-hazardous historic fill and contaminated soils taken off-Site will be handled, at minimum, as a Municipal Solid Waste per 6NYCRR Part 360.2. The Remedial Engineer is responsible for assuring material is properly characterized and determining the appropriate disposal methods based on the characterization results.

Historical fill and contaminated soils from the Site are prohibited from being disposed at Part 360.15 Registration Facilities (also known as Soil Recycling Facilities).

Soils that are contaminated but non-hazardous and are being removed from the Site are considered by the NYSDEC Division of Materials Management (DMM) to be Construction and Demolition (C/D) materials with contamination not typical of virgin soils. These soils may be sent to a permitted Part 360 landfill. They may be sent to a permitted C/D processing facility without permit modifications only upon prior notification of NYSDEC DMM. This material is prohibited from being sent or redirected to a Part 360-15 Registration Facility. In this case, as dictated by DMM, special procedures will include, at a minimum, a letter to the C/D facility that provides a detailed explanation that the material is derived from a DER remediation Site, that the soil material is contaminated and that it must not be redirected to on-Site or off-Site Soil Recycling Facilities. The letter will provide the project identity and the name and phone number of the Remedial Engineer. The letter will include as an attachment a summary of all chemical data for the material being transported.

The FER will include an accounting of the destination of all material removed from the Site during this Remedial Action, including excavated soil, contaminated soil, historic fill, solid waste, and hazardous waste, non-regulated material, and fluids. Documentation associated with disposal of all material must also include records and approvals for receipt of the material. This information will also be presented in a tabular form in the FER.

Bill of Lading system or equivalent will be used for off-Site movement of non-hazardous wastes and contaminated soils. This information will be reported in the FER.

Hazardous wastes derived from on-Site will be stored, transported, and disposed of in full compliance with applicable Federal, State, and local regulations.

Appropriately licensed haulers will be used for material removed from this Site and will be in full compliance with all applicable Federal, State, and local regulations.

Waste characterization sampling (see Section 4) has been performed exclusively for the purposes of off-Site soil disposal in a manner suitable to receiving facilities and in conformance with applicable Federal, State and local laws rules and regulations and facility-specific permits. Any additional waste characterization sampling and analytical methods, sampling frequency, analytical results and QA/QC associated with waste characterization activities will be reported in the FER. All data available for soil/material to be disposed at a given facility must be submitted to the disposal facility with suitable explanation prior to shipment and receipt. Waste characterization data will be used solely for complying with requirements for off-site disposal. Waste Characterization sampling cannot be utilized for:

- Delineating the extent of contamination required for remediation at a Site.
- Replacing or substituting data collected as part of Site Characterization and/or Remedial Investigation.

- Replacing or substituting confirmation or documentation sampling as described in NYSDEC DER-10, Section 5.4.
- To modify remedial decisions as formalized in a NYSDEC-approved DD or Record of Decision.

7.4.6 Materials Reuse On-Site

Chemical criteria for on-Site reuse of material have been established by NYSDEC. Reuse of on-site materials, including but not limited to excavated bedrock, must be approved by NYSDEC.

Materials planned for reuse (if any) will be segregated and stockpiled separately from materials slated for off-site disposal. Stockpiles will be placed on and covered with polyethylene sheeting. The stockpiled soil will be analyzed for TCL VOCs, TCL SVOCs, 1,4-dioxane, PCBs, pesticides, TAL metals, and PFAS at the frequency outlined in Table 5.4(e)10 on page 161 of the DER-10. The Remedial Engineer will ensure that procedures defined for materials reuse in this RAWP are followed and that unacceptable material will not remain on-Site.

A "Request to Import/Reuse Fill Material" form will be filed with the NYSDEC project manager for review and approval prior to material reuse on the site.

Acceptable demolition material proposed for reuse on-Site, if any, will be sampled for asbestos.

Concrete crushing or processing on-Site is prohibited, unless NYSDEC has specifically approved on-site processing and reuse of acceptable demolition material.

Organic matter (wood, roots, stumps, etc.) or other solid waste derived from clearing and grubbing of the Site is prohibited for reuse on-Site.

Contaminated on-Site material will not be reused within a cover soil layer, within landscaping berms, or as backfill for subsurface utility lines. This will be expressed in the SMP.

Uncontaminated excavated bedrock from the Site may be reused below the composite cover system (if one is necessary) without the need for sampling unless unsuitable due to visual, olfactory, and/or PID readings indicate contamination. The reuse excavated bedrock must be approved by NYSDEC.

7.4.7 Fluids Management

All liquids to be removed from the Site, including dewatering fluids, will be handled, transported and disposed in accordance with applicable Federal, State, local and regulations. Liquids discharged into the NYC sewer system will be addressed through approval by NYCDEP.

Dewatered fluids will not be recharged back to the land surface or subsurface of the Site. Dewatering fluids will be managed off-Site.

Discharge of water generated during remedial construction to surface waters (i.e. a local pond, stream, river and/or storm sewer) is prohibited without a State Pollutant Discharge Elimination System permit.

If total dewatering capacity exceeds 69.4 gallons per minute (100,000 gallons per day), a water withdrawal permit from NYSDEC will be required.

7.4.8 Demarcation

After the completion of soil removal and any other invasive remedial activities and prior to backfilling, a land survey will be performed by a NYS-licensed surveyor. The survey will define the top elevation of residual contaminated soils (if any). In area(s) where a Track 2 cleanup cannot be achieved (if any), a physical demarcation layer, consisting of orange snow fencing material or equivalent material will be placed on this surface to provide a visual reference. This demarcation layer will constitute the top of the 'Residuals Management Zone', the zone that requires adherence to special conditions for disturbance of contaminated residual soils defined in the SMP. The survey will measure the grade covered by the demarcation layer before the placement of cover soils, pavement and sub-soils, structures, or other materials. This survey and the demarcation layer placed on this grade surface will constitute the physical and written record of the upper surface of the 'Residuals Management Zone' in the SMP. A map showing the survey results will be included in the FER and the SMP.

7.4.9 Backfill from Off-Site Sources

The importation of clean fill from off-site source(s) may be needed to backfill over-excavated areas as part of the Remedial Action and as part of a two-foot clean soil cap (to be placed over all non-covered, landscaped areas, if any) in the event that a Track 2 cleanup cannot be achieved. Further, a highly visible demarcation barrier (orange snow fencing or equivalent) will be installed beneath the two feet of clean fill/topsoil cap (where a Track 2 cleanup cannot be achieved), if its necessary.

All materials proposed for import onto the Site will be approved by the Remedial Engineer and will be in compliance with provisions in this RAWP prior to receipt at the Site. A "Request to Import/Reuse Fill Material" form will be filed with the NYSDEC project manager for review and approval prior to import to the site. A copy of the form is presented in Appendix O. Material proposed for import shall either be from a NYSDEC-registered certified clean fill facility or other permitted facility. Any facility proposed for import shall undergo a facility history review and background check by the Remedial Engineer. Material from industrial sites, spill sites, other environmental remediation sites; or other potentially contaminated sites will not be imported to the Site. Solid waste will not be imported onto the Site.

Prior to import, soil will be segregated and tested at the source facility for analysis of TCL VOCs, TCL SVOCs, 1,4-dioxane, PCBs, pesticides, TAL metals, and PFAS at the frequency outlined in Table 5.4(e)10 on page 161 of the DER-10. Soil exceeding the UUSCO for 1,4-dioxane will not be imported, per DER 10: Appendix 5 - Allowable Constituent Levels for Imported Fill or Soil, Subdivision 5.4(e). If the PFAS compounds PFOA or PFOS are detected in any sample at or above 1 pbb, it will also be tested by the SPLP. If the SPLP results exceed 70 ppt for the combined analysis, the soil will not be imported. Analytical results will be compared to Table 375-6.8(b) of 6 NYCRR Part 375 and submitted to NYSDEC via a *Request to Import/Reuse Soil or Fill* form for review and approval prior to importation and placement on-site.

All imported soils will meet NYSDEC-approved backfill or cover soil quality objectives for the Site. These NYSDEC-approved backfill or cover soil quality objectives are the lower of the PGWSCOs or RRSCOs as set forth in Table 375-6.8(b) of 6 NYCRR Part 375. Non-compliant soils will not be imported to the Site without prior approval by NYSDEC. Nothing in this approved RAWP or its approval by NYSDEC should be construed as an approval for this purpose.

Soils that meet 'exempt' fill requirements under 6 NYCRR Part 360, but do not meet backfill or cover soil objectives for the Site, will not be imported without prior approval by NYSDEC. Nothing in this RAWP should be construed as an approval for this purpose.

The FER will include the following certification by the RE: "I certify that all import of soils from off-site, including source evaluation, approval and sampling, has been performed in a manner that is consistent with the methodology defined in the RAWP."

Solid waste will not be imported to the Site.

Trucks entering the Site with imported soils will be securely covered with tight fitting covers.

7.4.10 Contingency Plan

If underground tanks or other previously unidentified contaminant sources are found during on-Site remedial excavation or development related construction, sampling will be performed on product, sediment and surrounding soils, etc. in accordance with DER-10. Chemical analytical work will be for full scan parameters (TCL VOCs, TCL SVOCs, TAL metals, pesticides, PCBs and PFAS). Analyses will not be otherwise limited without NYSDEC approval.

Identification of unknown or unexpected contaminated media identified by screening during invasive Site work will be promptly communicated by phone to NYSDEC's project manager. These findings will be also included in daily and periodic electronic media reports.

7.4.11.1 Extreme Storm Preparedness and Response Contingency Plan

Damage from flooding or storm surge can include dislocation of soil and stockpiled materials, dislocation of site structures and construction materials and equipment, and dislocation of support of excavation structures. Damage from wind during an extreme storm event can create unsafe or unstable structures, damage safety structures and cause downed power lines creating dangerous site conditions and loss of power. In the event of emergency conditions caused by an extreme storm event, the Volunteer will undertake the following steps for site preparedness prior to the event and response after the event.

Storm Preparedness

Preparations in advance of an extreme storm event will include the following: containerized hazardous materials and fuels will be removed from the property; loose materials will be secured to prevent dislocation and blowing by wind or water; heavy equipment such as excavators and generators will be removed from excavated areas, trenches and depressions on the property to high ground or removed from the property; an inventory of the property with photographs will be performed to establish conditions for the site and equipment prior to the event; stockpile covers for soil and fill will be secured by adding weights such as sandbags for added security and worn or ripped stockpile covers will be replaced with competent covers; stockpiled hazardous wastes will be removed from the property; stormwater management systems will be inspected and fortified, including, as necessary: clean and reposition silt fences, hay bales; clean storm sewer filters and traps; and secure and protect pumps and hosing.

Storm Response

At the conclusion of an extreme storm event, as soon as it is safe to access the property, a complete inspection of the property will be performed. A site inspection report will be submitted to NYSDEC at the completion of site inspection and after the site security is assessed. Site conditions will be compared to the inventory of site conditions and material performed prior to the storm event and significant differences will be noted. Damage from storm conditions that result in acute public safety threats, such as downed power lines or imminent collapse of buildings, structures or equipment will be reported to public safety authorities via appropriate means such as calling 911.

Petroleum spills will be reported to NYSDEC within 2 hours of identification and consistent with State regulations. Public safety structures, such as construction security fences will be repaired promptly to eliminate public safety threats. Debris will be collected and removed.

Dewatering will be performed in compliance with existing laws and regulations and consistent with emergency notifications, if any, from proper authorities. Eroded areas of soil including unsafe slopes will be stabilized and fortified. Dislocated materials will be collected and appropriately managed. Support of excavation structure will be inspected and fortified as necessary. Impacted stockpiles will be contained and damaged stockpile covers will be replaced. Stormwater control systems and structures will be inspected and maintained as necessary.

If soil or fill materials are discharged off site to adjacent properties, property owners and NYSDEC will be notified, and corrective measure plan designed to remove and clean dislocated material will be submitted to NYSDEC and implemented following approval by NYSDEC and granting of site access by the property owner. Impacted offsite areas may require characterization based on site conditions, at the discretion of NYSDEC.

If onsite petroleum spills are identified, a qualified environmental professional will determine the nature and extent of the spill and report to NYSDEC's spill hotline at (800) 457-7362 within statutory defined timelines. If the source of the spill is ongoing and can be identified, it should be stopped if this can be done safely. Potential hazards will be addressed immediately, consistent with guidance issued by NYSDEC.

Storm Response Reporting

A site inspection report will be submitted to NYSDEC at the completion of site inspection. An inspection report will be used for this purpose. Site conditions will be compared to the inventory of site conditions and material performed prior to the storm event and significant differences will be noted. The site inspection report will be sent to the NYSDEC project manager and will include the site name, address, tax block and lot, site primary and alternate contact name and phone number.

Damage and soil release assessment will include: whether the project had stockpiles; whether stockpiles were damaged; photographs of damage and notice of plan for repair; report of whether soil from the site was dislocated and whether any of the soil left the site; estimates of the volume of soil that left the site, nature

of impact, and photographs; description of erosion damage; description of equipment damage; description of damage to the remedial program or the construction program, such as damage to the support of excavation; presence of onsite or offsite exposure pathways caused by the storm; presence of petroleum or other spills and status of spill reporting to NYSDEC; description of corrective actions; schedule for corrective actions.

This report should be completed and submitted to NYSDEC project manager with photographs within 24 hours of the time of safe entry to the property after the storm event.

7.4.11 Community Air Monitoring Plan

Community air monitoring will be performed via two fixed stations at the perimeter of the Site during all ground surface intrusive work (i.e., one downwind and one upwind). In addition to the community air monitoring, air monitoring will be performed on the perimeter of the work zone periodically (at a minimum once per hour) on a roving basis with hand-held equipment based upon wind direction and the location of the intrusive work. The CAMP is provided in Appendix N. A map showing the location of fixed and mobile sampling stations; and exceedances observed during implementation of the CAMP will be reported to NYSDEC and NYSDOH Project Managers and included in the Daily Report.

7.4.12 Odor, Dust and Nuisance Control Plan

The FER will include the following certification by the Remedial Engineer: "I certify that all invasive work during the remediation and all invasive development work were conducted in accordance with dust and odor suppression methodology defined in the RAWP."

In addition to the CAMP described in Section 6.1.3, an odor control plan is described below.

7.4.12.1 Odor Control Plan

This odor control plan is capable of controlling emissions of nuisance odors off-Site. Specific odor control methods to be used on a routine basis will include the use of a PID to screen for VOCs and olfactory observations by a field technician. If nuisance odors are identified, work will be halted and the source of odors will be identified and corrected. Work will not resume until all nuisance odors have been abated. NYSDEC and NYSDOH will be notified of all odor events and of all other complaints about the project. Implementation of all odor controls, including the halt of work, will be the responsibility of the Volunteer's Remedial Engineer, who is responsible for certifying the FER.

All necessary means will be employed to prevent on- and off-Site nuisances. At a minimum, procedures will include: (a) limiting the area of open excavations; (b) shrouding open excavations with tarps and other covers; and (c) using foams to cover exposed odorous soils;. If odors develop and cannot be otherwise controlled, additional means to eliminate odor nuisances will include: (d) direct load-out of soils to trucks for off-Site disposal; (e) use of chemical odorants in spray or misting systems; and, (f) use of staff to monitor odors in surrounding.

Where odor nuisances have developed during remedial work and cannot be corrected, or where the release of nuisance odors cannot otherwise be avoided due

to on-Site conditions or close proximity to sensitive receptors, odor control will be achieved by sheltering excavation and handling areas under tented containment structures equipped with appropriate air venting/filtering systems.

7.4.12.2 Dust Control Plan

A dust suppression plan that addresses dust management during invasive on-Site work will include, at a minimum, the items listed below:

- Water will be available on-site at suitable supply and pressure for use in dust control.
- Clearing and grubbing of larger sites will be done in stages to limit the area of exposed, unvegetated soils vulnerable to dust production.
- Gravel will be used on roadways to provide a clean and dust-free road surface.
- On-Site roads will be limited in total area to minimize the area required for water spraying.

7.4.12.3 Other Nuisances

A plan for rodent control will be developed and utilized by the contractor prior to and during Site clearing and Site grubbing, and during all remedial work.

A plan will be developed and utilized by the contractor for all remedial work and will conform, at a minimum, to NYCDEP noise control standards.

8.0 ENGINEERING CONTROLS: TREATMENT SYSTEMS - GROUNDWATER TREATMENT AND MONITORING

As described previously, it is anticipated that after petroleum contaminant source material is removed residual dissolved petroleum-related contamination in groundwater would remain. To enhance attenuation and/or prevent groundwater contamination from migrating off-site, an *in-situ* groundwater treatment program will be implemented to address the elevated concentrations of petroleum-related contamination in the groundwater.

As described in Section 7.0, petroleum-contaminated soil/fill will be excavated as part of the remedial excavation of the Site. The petroleum hotspots will be excavated into groundwater, which is at approximately 14 to 16 feet bgs. The anticipated depth of these excavations are up to approximately 20 to 25 feet bgs and will be excavated to the lateral extent of petroleum contamination on-site, which will be determined in the field but is expected to be approximately 9,500 square feet.

Following excavation of the petroleum hotspots, these will be backfilled with clean backfill material to construction elevations. The bioremediation program will be implemented by application of Regenesis® ORC directly to the 1 to 2 feet of the backfill material placed at the top portion of the water table in the petroleum hotspots. Approximately 2,160 pounds of ORC will be applied to these excavation areas and then mechanically mixed with the backfill material in these areas using an excavator, such that it will be evenly distributed to maximize contact with and treatment of petroleum-related VOCs dissolved in groundwater. The groundwater treatment area is shown on Figure 9. A Technical Design Memo from the manufacturer, Regenesis®, stating the recommended dosage rates is included as Appendix P. A work schedule will be submitted to NYSDEC for injection before implementation of the work. Any proposed modifications to the groundwater treatment program would be submitted to NYSDEC in a letter request. As-built drawings, diagrams, calculations, and manufacturer documentation for injection, will be included in the FER as appropriate.

Following groundwater treatment, groundwater monitoring will be performed to assess its efficacy until residual groundwater concentrations are found to be below AWQSGVs or have become asymptotic over an extended period.

The proposed monitoring well locations are shown on Figure 12. Monitoring wells RA-MW-02 through MW-04 will be installed prior to remedial excavation to collect baseline groundwater samples. Baseline groundwater samples would be used to understand if "pockets" of petroleum contamination became released during the SOE pile installation and help provide understanding if the post Remedial Action groundwater samples had an immediate spike in petroleum contaminants before dissipating. Monitoring well RA-MW-01 will be located within the ground floor of the new building, within the area of the 10-foot foundation setback. This well's installation will be coordinated with the construction of the new building's foundation.

The groundwater monitoring will continue until permission to discontinue is granted in writing by NYSDEC and NYSDOH. Monitoring activities will be outlined in the Monitoring Plan of the SMP. It is anticipated that, following Remedial Action, quarterly monitoring events will be performed until the RAOs for groundwater have been met. The SMP will provide more details concerning the groundwater monitoring program.

The wells will be constructed with 10 feet of 2-inch-diameter 0.002-inch slotted PVC well screen straddling the groundwater table, which is expected to be encountered between approximately 14 to 16 feet bgs. The wells will be constructed with a 2-inch-diameter solid PVC riser installed to the ground surface. A No. 2 morie sandpack will be installed two feet above the well screen. The annular space around the solid well riser will be sealed with approximately two feet of bentonite and a non-shrinking grout/cement mixture to

approximately 1-foot bgs. Each of the wells will be finished with a locking j-plug and flush-mounted protective locking well cover.

Following installation, each groundwater monitoring well will be developed via pumping and surging to remove any accumulated fines and establish a hydraulic connection with the surrounding aquifer. Development will continue until turbidity within the well is less than 50 NTUs for three successive readings and until water quality indicators have stabilized to within 10% for pH, temperature, and specific conductivity for three successive readings. In the event that 50 NTUs cannot be achieved, at least three well volumes will be purged from the well.

The monitoring wells will be surveyed by a NYS-licensed surveyor to determine their accurate location and elevation. Two elevation measurements will be taken at each well location the at-grade elevation and the elevation of the top of PVC casing (north side at marking). The elevation datum for the sampling points will be based on NAVD88, while the horizontal datum will be based on NYS Plane Coordinates Long Island Zone.

The monitoring wells will be sampled at least one week following development in accordance with the EPA's low-flow groundwater sampling procedure to allow for collection of a representative sample ["Low Stress (Low Flow) Purging and Sampling Procedure for the Collection of Groundwater Samples from Monitoring Wells," dated July 30, 1996]. Prior to sample collection, groundwater will be purged from each well until the physical and chemical groundwater parameters (pH, conductivity, turbidity, dissolved oxygen, temperature, and oxidation reduction potential) stabilize and turbidity measurements are below 50 NTUs for a minimum of three successive readings, or until more than three well volumes are purged or development continues for at least 2 hours.

One groundwater sample will be collected from each well (plus QA/QC samples) in laboratory-supplied glassware. Sample containers will be labeled, placed in laboratory-supplied coolers, and packed on ice to maintain a temperature of about 4 °C. Coolers will be retrieved at the end of each day by a laboratory courier and transported under standard chain-of-custody protocol to an ELAP-certified laboratory. Groundwater samples will be analyzed for TCL VOCs by EPA Method 8260, using Category B deliverables.

9.0 RESIDUAL CONTAMINATION TO REMAIN ON-SITE

Some residual contaminated soil/fill, groundwater, and soil vapor may exist beneath the Site after the Remedial Action is complete. Engineering Controls/Institutional Controls, described in the following sections, will be implemented to protect public health and the environment by appropriately managing residual contamination. Long-term management of Engineering Controls/Institutional Controls and of any residual contamination will be executed under a Site-specific SMP that will be developed and included as an appendix to the FER. The FER will report any residual contamination after implementation of the Remedial Action in tabulated and map form with comparisons to UUSCOs, RRSCOs, and/or PGWSCOs, as applicable.

9.1 Soil

In the event that a Track 2 Cleanup cannot be achieved in any portions of the Site, a composite cover system will be installed as described in Section 10.0 as an Engineering Control in those areas to achieve a Track 4 Cleanup.

9.2 Groundwater

The remedy includes groundwater treatment in conjunction with remedial excavation. Any residual groundwater contamination will be monitored as described in Section 8.

9.3 Soil Vapor

The building's cellar foundation will be constructed at approximately 15 feet bgs with two elevator pits at approximately 20 feet bgs (one on the western boundary and one in the southeast corner), except for a 10-foot setback along the northern boundary. In the portion of the 10-foot foundation setback, the foundation will be slab-on-grade constructed at approximately 1-foot bgs with a third elevator pit in the center at approximately 5 feet bgs. The 10-foot setback is required due to structural concerns with the neighboring building to the north.

Groundwater depths beneath the Site range from approximately 14 to 16 feet bgs (with the exception of 1 of the 10 monitoring wells, RI-MW-03, measured during the RI at approximately 18 feet bgs), and weathered bedrock is as shallow as 5 feet bgs in some portions of the Site. The foundation will be constructed on top of bedrock in some portions and into, or near, the groundwater table, with the exception of the portion of the foundation that has the 10-foot setback. Constructing a sub-slab depressurization system (SSDS) beneath the cellar foundation is not feasible due to the presence of groundwater. The slab-on-grade portion of the building is only a 10-foot setback (approximately 1,000 square feet) along the northern boundary. The soil vapor levels from the SI and RI ordered by their distance from the slab-on-grade portion are shown in Table I below. The nearest soil vapor sampling location with notable concentrations (SV-12) is approximately 120 feet from the slab-on-grade portion of the building, while the soil vapor sampling location within the slab-on-grade portion (RI-SV-20) and the next closest soil vapor sampling locations, within 110 feet from the slab-on-grade portion (RI-SV-9, RI-SV-19, RI-SV-6, RI-SV-7, and RI-SV-4), overall had lower concentrations. In addition, excavation of the petroleum hotspot in the southwestern portion of the Site down to 20 to 25 feet bgs is anticipated to remove the source of the petroleum-related VOC concentrations in soil vapor noted at RI-SV-16 and SV-03. Based on this, installation of an SSDS below the slab-on-grade portion of the building is not warranted. Furthermore, a soil vapor intrusion evaluation including confirmatory indoor air sampling will be conducted in any future on-site buildings prior to occupancy.

Table I
Soil Vapor Concentrations vs. Distance from Slab On-Grade Portion

Notes:
D - Indicates an identified compound in an analysis that has been diluted.
T - Indicates that a quality control parameter has exceeded laboratory limits.

10.0 CONTINGENCY ENGINEERING CONTROL: COMPOSITE COVER SYSTEM

In the event that a Track 2 Cleanup cannot be achieved on all or a portion of the Site, exposure to residual contaminated soil will be prevented by an engineered, composite cover system constructed on the Site. The composite cover system will double as a demarcation barrier.

A Soil Management Plan will be included in the SMP and will outline the procedures to be followed in the event that the composite cover system and underlying residual contamination are disturbed after the Remedial Action is complete. Maintenance of the composite cover system would be described in the SMP in the FER.

11.0 CRITERIA FOR COMPLETION OF REMEDIATION/ TERMINATION OF REMEDIAL SYSTEMS

11.1 Composite Cover System

If a Track 2 restricted residential use cleanup cannot be achieved in certain portions of the Site, a composite cover system will be necessary for a Track 4 cleanup in those portions of the Site. The composite cover system would be a permanent control, and the quality and integrity of this system will be inspected at defined, regular intervals in perpetuity.

11.2 Groundwater Monitoring

Quarterly groundwater monitoring activities to assess performance of the Remedial Action, will continue, as determined by NYSDOH and NYSDEC, until residual groundwater concentrations are found to be below AWQSGVs or have become asymptotic over an extended period. Monitoring will continue until permission to discontinue is granted in writing by NYSDEC and NYSDOH. Monitoring activities will be outlined in the Monitoring Plan of the SMP. Section 8 includes additional details on the groundwater treatment and monitoring program.

12.0 INSTITUTIONAL CONTROLS

After the remedy is complete, the Site will have residual contamination remaining in place. Engineering Controls for the residual contamination have been incorporated into the remedy to render the overall Site remedy protective of public health and the environment. Two elements have been designed to ensure continual and proper management of residual contamination in perpetuity: an Environmental Easement and a SMP.

All as-built drawings, diagrams, calculation and manufacturer documentation for treatment systems will be presented in the FER. A Site-specific Environmental Easement will be recorded with NYC Office of the City Register to provide an enforceable means of ensuring the continual and proper management of residual contamination and protection of public health and the environment in perpetuity or until released in writing by NYSDEC. It requires that the grantor of the Environmental Easement and the grantor's successors and assigns adhere to all Engineering and Institutional Controls placed on this Site by this NYSDEC-approved remedy. Institutional Controls provide restrictions on Site usage and mandate operation, maintenance, monitoring and reporting measures for all Engineering and Institutional Controls. The SMP describes appropriate methods and procedures to ensure compliance with all Engineering and Institutional Controls that are required by the Environmental Easement. Once the SMP has been approved by the NYSDEC, compliance with the SMP is required by the grantor of the Environmental Easement and grantor's successors and assigns.

12.1 Environmental Easement

An Environmental Easement, as defined in Article 71 Title 36 of the ECL, is required when residual contamination is left on-Site after the Remedial Action is complete. As part of this remedy, an Environmental Easement approved by NYSDEC will be filed and recorded with the NYC Office of the City Register. The Environmental Easement will be submitted as part of the FER.

The Environmental Easement renders the Site a Controlled Property. The Environmental Easement must be recorded with the NYC Office of the City Register before the COC can be issued by NYSDEC. A series of Institutional Controls are required under this remedy to implement, maintain and monitor these Engineering Control systems (if necessary), prevent future exposure to residual contamination by controlling disturbances of the subsurface soil and restricting the use of the Site to restricted-residential use(s) only. These Institutional Controls are requirements or restrictions placed on the Site that are listed in, and required by, the Environmental Easement. Institutional Controls can, generally, be subdivided between controls that support Engineering Controls, and those that place general restrictions on Site usage or other requirements. Institutional Controls in both of these groups are closely integrated with the SMP, which provides all of the methods and procedures to be followed to comply with this remedy.

The Institutional Controls that support Engineering Controls are:

- Compliance with the Environmental Easement by the Grantee and the Grantee's successors and adherence of all elements of the SMP is required;
- All Engineering Controls (if necessary) must be operated and maintained as specified in this SMP;
- A composite cover system (if necessary) consisting of a concrete building slabs and/or 2-foot clean soil cap must be inspected, certified and maintained as required in the SMP;
- All Engineering Controls (if necessary) on the Controlled Property must be inspected and certified at a frequency and in a manner defined in the SMP;

- Data and information pertinent to Site Management for the Controlled Property must be reported at the frequency and in a manner defined in the SMP;
- On-Site environmental monitoring devices, including but not limited to, groundwater monitor wells, must be protected and replaced as necessary to ensure proper functioning in the manner specified in the SMP;
- Engineering Controls (if necessary) may not be discontinued without an amendment or extinguishment of the Environmental Easement.

Adherence to these Institutional Controls for the Site is mandated by the Environmental Easement and will be implemented under the SMP (discussed in the next section). The Controlled Property (Site) will also have a series of Institutional Controls in the form of Site restrictions and requirements. The Site restrictions that apply to the Controlled Property are:

- Vegetable gardens and farming on the Controlled Property are prohibited;
- Use of groundwater underlying the Controlled Property is prohibited without treatment rendering it safe for intended purpose;
- All future activities on the Controlled Property that will disturb residual contaminated material are prohibited unless they are conducted in accordance with the soil management provisions in the SMP;
- The Controlled Property may be used for restricted-residential use only, provided the long-term Engineering and Institutional Controls included in the SMP are employed;
- The Controlled Property may not be used for a higher level of use, such as unrestricted use, without an amendment or extinguishment of this Environmental Easement;
- Grantor agrees to submit to NYSDEC a written statement that certifies, under penalty of perjury, that: (1) controls employed at the Controlled Property are unchanged from the previous certification or that any changes to the controls were approved by the NYSDEC; and, (2) nothing has occurred that impairs the ability of the controls to protect public health and environment or that constitute a violation or failure to comply with the SMP. NYSDEC retains the right to access such Controlled Property at any time in order to evaluate the continued maintenance of any and all controls. This certification shall be submitted annually, or an alternate period of time that NYSDEC may allow. This statement must be certified by an expert that the NYSDEC finds acceptable.

12.2 Site Management Plan

Site Management is the last phase of remediation and begins with the approval of the FER and issuance of the COC for the Remedial Action. The SMP is submitted as part of the FER but will be written in a manner that allows its removal and use as a complete and independent document. Site Management continues in perpetuity or until released in writing by NYSDEC. The property owner is responsible to ensure that all Site Management responsibilities defined in the Environmental Easement and the SMP are performed.

The SMP should include methods to incorporate and track green and sustainable remediation. Measures should be taken to maintain a cost-effective, protective remedy that remains conscientious of the Site's environmental footprint. At a minimum, the following should be assessed: waste generation, energy usage, emissions, and water usage.

The SMP is intended to provide a detailed description of the procedures required to manage residual contamination left in place at the Site following completion of the Remedial Action in accordance

with the BCA with the NYSDEC. This includes: (1) development, implementation, and management of all Engineering and Institutional Controls; (2) development and implementation of monitoring systems and a Monitoring Plan; (3) development of a plan to operate and maintain any treatment, collection, containment, or recovery systems (including, where appropriate, preparation of an Operation and Maintenance Manual); (4) submittal of Site Management Reports, performance of inspections and certification of results, and demonstration of proper communication of Site information to NYSDEC; and (5) defining criteria for termination of treatment system operation.

To address these needs, this SMP will include four plans: (1) an Engineering and Institutional Control Plan for implementation and management of Engineering and Institutional Controls; (2) a Monitoring Plan for implementation of Site Monitoring; (3) an Operation and Maintenance Plan for implementation of remedial collection, containment, treatment, and recovery systems; and (4) a Site Management Reporting Plan for submittal of data, information, recommendations, and certifications to NYSDEC. The SMP will be prepared in accordance with the requirements in NYSDEC DER-10 Technical Guidance for Site Investigation and Remediation and the guidelines provided by NYSDEC.

The SMP will also include provisions for conducting the required soil vapor intrusion evaluation and associated confirmatory indoor sampling prior to occupancy of any future on-site buildings.

Site management activities, reporting, and Engineering and Institutional Control certification will be scheduled on a certification period basis. The certification period will be annually. The SMP will be based on the certifying period relative to the date of issuance of the COC. The first submission will be due 16 months after the issuance of the COC, and annually (or at another frequency as approved by NYSDEC) thereafter.

The SMP in the FER will include a monitoring plan for groundwater at the down-gradient Site perimeter to evaluate Site-wide performance of the remedy.

No exclusions for handling of residual contaminated soils will be provided in the SMP. All handling of residual contaminated material will be subject to provisions contained in the SMP.

13.0 FINAL ENGINEERING REPORT

A FER will be submitted to NYSDEC following implementation of the Remedial Action defined in this RAWP. The FER provides the documentation that the remedial work required under this RAWP has been completed and has been performed in compliance with this plan. The FER will provide a comprehensive account of the locations and characteristics of all material removed from the Site including the surveyed map(s) of all sources. The FER will include as-built drawings for all constructed elements, calculation and manufacturer documentation for treatment systems, certifications, manifests, bills of lading as well as the complete SMP. The FER will provide a description of the changes in the Remedial Action from the elements provided in the RAWP and associated design documents. The FER will provide a tabular summary of all performance evaluation sampling results and all material characterization results and other sampling, and chemical analysis performed as part of the Remedial Action. The FER will provide test results demonstrating that all mitigation and remedial systems are functioning properly. The FER will be prepared in conformance with DER-10.

The FER will include written and photographic documentation of all remedial work performed under this remedy.

The FER will include an itemized tabular description of actual costs incurred during all aspects of the Remedial Action.

The FER will provide a thorough summary of all residual contamination left on the Site after the remedy is complete. Residual contamination includes all contamination that exceeds the Track 1 UUSCOs. A table that shows exceedances from Track 1 UUSCOs for all soil/fill remaining at the Site after the Remedial Action and a map that shows the location and summarizes exceedances from Track 1 UUSCOs for all soil/fill remaining at the Site after the Remedial Action will be included in the FER.

The FER will provide a thorough summary of all residual contamination that exceeds the SCOs defined for the Site in the RAWP and must provide an explanation for why the material was not removed as part of the Remedial Action. A table that shows residual contamination in excess of Site SCOs and a map that shows residual contamination in excess of Site SCOs will be included in the FER.

The FER will include an accounting of the destination of all material removed from the Site, including excavated contaminated soil, historic fill, solid waste, hazardous waste, non-regulated material, and fluids. Documentation associated with disposal of all material must also include records and approvals for receipt of the material. It will provide an accounting of the origin and chemical quality of all material imported onto the Site.

The FER must include a discussion of the green remediation practices/technologies employed throughout the remedial program. A final footprint analysis using a DER accepted model, and any tracking methods used through the construction including restoration activities. Before approval of a FER and issuance of a COC, all project reports must be submitted in digital form on electronic media (such as PDF).

13.1 Certifications

The following certification will appear in front of the Executive Summary of the FER. The FER will be prepared, stamped and the following certification signed by an individual licensed or otherwise authorized in accordance with article 145 of the education law to practice the profession of engineering. The certification will include the following statements:

> I, _____, am currently a registered professional engineer licensed by the State of New York, I had primary direct responsibility for implementation of the remedial program activities, and I certify that the Remedial Action Work Plan was

implemented and that all construction activities were completed in substantial conformance with the Department-approved Remedial Action Work Plan.

If the RAWP identifies time frames to be achieved by the remedial program:

I certify that the data submitted to the Department with this Final Engineering Report demonstrates that the remediation requirements set forth in the Remedial Action Work Plan and in all applicable statutes and regulations have been or will be achieved in accordance with the time frames, if any, established for the remedy.

I certify that all use restrictions, Institutional Controls, Engineering Controls, and/or any operation and maintenance requirements applicable to the Site are contained in an environmental easement created and recorded pursuant ECL 71-3605 and that all affected local governments, as defined in ECL 71-3603, have been notified that such easement has been recorded.

I certify that a Site Management Plan has been submitted for the continual and proper operation, maintenance, and monitoring of all Engineering Controls employed at the Site, including the proper maintenance of all remaining monitoring wells, and that such plan has been approved by Department.

If financial assurance is required:

I certify that any financial assurance mechanisms required by the Department pursuant to Environmental Conservation Law have been executed.

I certify that all data generated in support of this report have been submitted in accordance with the Department's electronic data deliverable and have been accepted by the Department.

I certify that all information and statements in this certification are true. I understand that a false statement made herein is punishable as Class "A" misdemeanor, pursuant to Section 210.45 of the Penal Law. I, _____ [name], of _____ [business address], am certifying as Owner's Designated Site Representative (and if the site consists of multiple properties): [and I have been authorized and designated by all site owners to sign this certification] for the site.

It is a violation of Article 145 of New York State Education Law for any person to alter this document in any way without the express written verification of adoption by any New York State licensed engineer in accordance with Section 7209(2), Article 145, New York State Education Law.

14.0 SCHEDULE

Table J
Proposed Project Schedule

Activity	Time To Complete
NYSDEC Approves RAWP, and Issues DD	February 2026
Begin RAWP Implementation	March 2026
Submittal of Draft Environmental Easement	By May 2027
Draft SMP Submitted to NYSDEC	By August 2027
Execution of Environmental Easement	By September 2027
Draft FER Submitted to NYSDEC	By October 2027
COC and Fact Sheet	By December 2027
Completion of New Building	2028

Remedial Action Work Plan
Estimated Costs for Remedial Alternative 1
Track 1

	Quantity	Units	Unit Rate	Cost
Soil Disposal - Non-Hazardous Soil Disposal For Remedial Action [1]	33,600	Tons	$75	**$2,520,000**
Backfill for Remedial Excavation Beyond General Excavation [2]	4,100	Cubic Yards	$35	**$143,500**
Groundwater Treatment Program	1	Lump Sum	$500,000	**$500,000**
Site Preparation				
- Support of Excavation	*1*	*Estimated Total*	*$2,500,000*	*$2,500,000*
- Dewatering	*1*	*Estimated Total*	*$300,000*	*$300,000*
- Excavation Equipment and Labor	*1*	*Estimated Total*	*$750,000*	*$750,000*
- Legal	*1*	*Estimated Total*	*$150,000*	*$150,000*
- Engineering	*1*	*Estimated Total*	*$800,000*	*$800,000*
- General Conditions and Security	*1*	*Estimated Total*	*$400,000*	*$400,000*
Site Preparation Subtotal				**$4,900,000**
Estimated Total				**$8,063,500**

Notes/Assumptions:

[1] ***Soil Removal***

Site Area =	31,100	Square Feet
Site Wide Excavation Area =	31,100	Square Feet
Excavation Depth =	15	ft
Subtotal Soil Removal =	17,300	Cubic Yards
Additional Excavation Area to 25 ft below grade =	10,000	Square Feet
Incremental Excavation Depth =	10	ft
Subtotal Soil Removal =	3,700	Cubic Yards
Estimated Soil Removal Total Volume	**21,000**	**Cubic Yards**
Tons (1.6 multiplier)	**33,600**	**Tons**

[2] ***Backfill***

Backfill for Excavation Area to 25 ft below grade =	10,000	Square Feet
Backfill Vertical (from 15 to 25 feet below grade) =	10	Feet
Subtotal Backfill Volume =	3,700	Cubic Yards
Backfill for Excavation Area to 15 ft below grade along Northern Boundary =	650	Square Feet
Backfill Vertical (from 1 to 15 feet below grade) =	14	Feet
Subtotal Backfill Volume =	300	Cubic Yards
Backfill for Excavation Area to 15 ft below grade along Northern Boundary =	350	Square Feet
Backfill Vertical (from 5 to 15 feet below grade) =	10	Feet
Subtotal Backfill Volume =	100	Cubic Yards
Estimated Backfill Total Volume	**4,100**	**Cubic Yards**

Table 2
350 Grand Concourse
Bronx, NY
Remedial Action Work Plan
Estimated Costs for Remedial Alternative 2
Track 2

	Quantity	Units	Unit Rate	Cost
Soil Disposal - Non-Hazardous Soil Disposal For Remedial Action [1]	18,600	Tons	$75	**$1,395,000**
Backfill for Remedial Excavation Beyond General Excavation [2]	3,700	Cubic Yards	$35	**$129,500**
Groundwater Treatment - Direction Placement of Regenesis ORC®	1	Lump Sum	$100,000	**$100,000**
Site Preparation				
- Support of Excavation	*1*	*Estimated Total*	*$1,600,000*	*$1,600,000*
- Dewatering	*1*	*Estimated Total*	*$300,000*	*$300,000*
- Excavation Equipment and Labor	*1*	*Estimated Total*	*$500,000*	*$500,000*
- Legal	*1*	*Estimated Total*	*$150,000*	*$150,000*
- Engineering	*1*	*Estimated Total*	*$650,000*	*$650,000*
- General Conditions and Security	*1*	*Estimated Total*	*$250,000*	*$250,000*
Site Preparation Subtotal				**$3,450,000**
Estimated Total				**$5,074,500**

Notes/Assumptions:

[1] ***Soil Removal***

Site Area =	31,100	Square Feet
Sitewide Excavation Area to 5 ft below grade =	31,100	Square Feet
Excavation Depth =	5	ft
Subtotal Soil Removal =	5,800	Cubic Yards
Excavation Area to 8.5 ft below grade =	700	Square Feet
Incremental Excavation Depth =	3.5	ft
Subtotal Soil Removal =	90	Cubic Yards
Excavation Area to 10 ft below grade =	225	Square Feet
Incremental Excavation Depth =	5	ft
Subtotal Soil Removal =	40	Cubic Yards
Excavation Area to 11 ft below grade =	225	Square Feet
Incremental Excavation Depth =	6	ft
Subtotal Soil Removal =	50	Cubic Yards
Excavation Area to 25 ft below grade =	10,000	Square Feet
Incremental Excavation Depth =	15	ft
Subtotal Soil Removal =	5,600	Cubic Yards
Total Estimated Soil Removal Volume =	**11,600**	**Cubic Yards**
Total Tons (1.6 multiplier) =	**18,600**	**Tons**

[2] ***Backfill***

Backfill for Excavation Area to 25 ft below grade =	10,000	Square Feet
Backfill Vertical (from 15 to 25 feet below grade) =	10	Feet
Total Backfill Volume =	**3,700**	**Cubic Yards**

DEFINITIONS

NS : No standard.

mg/kg : milligrams per kilogram = parts per million (ppm)

ppb : parts per billion

STANDARDS

Part 375 Unrestricted Use Soil Cleanup Objectives (UUSCOs):

UUSCOs listed in the New York State Department of Environmental Conservation (NYSDEC) Part 375 Regulations (6 NYCRR Part 375), Table 375-6.8(a).

Part 375 Restricted Residential Soil Cleanup Objectives (RRSCOs):

RRSCOs listed in the New York State Department of Environmental Conservation (NYSDEC) Part 375 Regulations (6 NYCRR Part 375), Table 375-6.8(b).

Part 375 Protection of Groundwater Soil Cleanup Objectives (PGWSCOs):

PGWSCOs listed in the New York State Department of Environmental Conservation (NYSDEC) Part 375 Regulations (6 NYCRR Part 375), Table 375-6.8(a).

Part 375 PFAS Unrestricted Use and Restricted Residential Guidance Values (UUGVs and RRGVs)

UUGVs and RRGVs listed in the New York State Department of Environmental Conservation (NYSDEC) Sampling, Analysis and Assessment Of Per- and Polyfluoroalkyl Substances (PFAS) Under NYSDEC's Part 375 Remedial Programs Issued April 2023.

SRI-X-7_3-5_20250522 is a blind duplicate of sample SRI-A1-3B_3-5_20250522.

*Sample removed during IRM hotspot excavation in 2022.

J - The concentration given is an estimated value.

K - Reported concentration value is proportional to dilution factor and may be exaggerated.

L - The concentration given is an estimated value.

N/A - Not applicable.

R - Indicates the reported result is unusable (note: the analyte may or may not be present).

Exceedances of PGWSCOs are highlighted with an underline.

Exceedances of RRSCOs are highlighted in gray with **bold** font.

APPENDIX A
STANDARDS, CRITERIA, AND GUIDANCE

1.0 SCGS FOR SITE CHARACTERIZATION AND REMEDIAL INVESTIGATION

The following standards and criteria typically will apply to Site Characterizations and Remedial Investigations conducted in New York State:

- 6 NYCRR Part 371 - Identification and Listing of Hazardous Wastes
- 6 NYCRR Part 375 - Environmental Remediation Programs
- 6 NYCRR Parts 700-706 - Water Quality Standards
- 6 NYCRR Part 182 - Endangered & Threatened Species of Fish & Wildlife
- 6 NYCRR Part 608 - Use and Protection of Waters
- 6 NYCRR Part 661 - Tidal Wetlands - Land Use Regulations
- 6 NYCRR Part 663 - Freshwater Wetlands Maps and Classification
- 6 NYCRR Part 257 - Air Quality Standards
- 10 NYCRR Part 5 of the State Sanitary Code - Drinking Water Supplies (May 1998)
- 29 CFR Part 1910.120 - Hazardous Waste Operations and Emergency Response
- 6 NYCRR Part 175 - Special Licenses and Permits--Definitions and Uniform Procedures

The following guidance typically applies to Site Characterizations and Remedial Investigations conducted in New York State:

- STARS #1 - Petroleum-Contaminated Soil Guidance Policy
- SPOTS #14 - Site Assessments at Bulk Storage Facilities (August 1994)
- TOGS 1.1.1 - Ambient Water Quality Standards & Guidance Values and Groundwater Effluent Limitations
- Fish and Wildlife Impact Analysis for Inactive Hazardous Waste Sites (October 1994)
- Technical Guidance for Screening Contaminated Sediments (January 1999)
- Niagara River Biota Contamination Project: Fish Flesh Criteria for Piscivorous Wildlife (July 1987)
- Wildlife Toxicity Assessment for Cadmium in Soils (May 1999)
- Air Guide 1 - Guidelines for the Control of Toxic Ambient Air Contaminants
- The 10 ppt Health Advisory Guideline for 2,3,7,8-TCDD in Sportfish Flesh
- The 1 ppm Health Advisory Guideline for Cadmium in Sportfish Flesh
- Criteria for the Development of Health Advisories for Sportfish Consumption
- NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York (October 2006)
- NYSDOH Soil Vapor Intrusion Matrix – NYSDOH Sub-Slab Vapor Concentration which may require monitoring or mitigation ("NYSDOH Vapor Intrusion Guidance Document") (updated February 2024

- NYSDEC DER Interim Strategy for Groundwater Remediation at Contaminated Sites in New York State
- NYSDEC Sampling, Analysis, and Assessment of Per- And Polyfluoroalkyl Substances (PFAS) (April 2023)

2.0 SCGS FOR REMEDY SELECTION

The following standards and criteria typically apply to the remedy selection process conducted in New York State:

- 6 NYCRR Part 375 - Environmental Remediation Programs
- 6 NYCRR Part 376 - Land Disposal Restrictions
- 6 NYCRR Part 608 - Use and Protection of Waters
- 6 NYCRR Part 661 - Tidal Wetlands - Land Use Regulations
- 6 NYCRR Part 663 - Freshwater Wetlands - Permit Requirements
- 6 NYCRR Parts 700-706 - Water Quality Standards
- 19 NYCRR Part 600 - Waterfront Revitalization and Coastal Resources

The following guidance typically applies to the remedy selection process conducted in New York State:

- TAGM 4044 - Accelerated Remedial Actions at Class 2, Non-RCRA Regulated Landfills (March 1992)
- TAGM 4051 - Early Design Strategy (August 1993)
- Citizen Participation in New York's Hazardous Waste Site Remediation Program: A Guidebook (June 1998)
- TAGM 3028 - "Contained In" Criteria for Environmental Media: Soil Action Levels (August 1997)
- Freshwater Wetlands Regulations - Guidelines on Compensatory Mitigation (October 1993)
- Air Guide 1 - Guidelines for the Control of Toxic Ambient Air Contaminants
- Technical Guidance for Screening Contaminated Sediments (January 1999)
- USEPA Office of Solid Waste and Emergency Response Directive 9355.047FS Presumptive Remedies: Policy and Procedures (September 1993)
- USEPA Office of Solid Waste and Emergency Response Directive 9355.048FS Presumptive Remedies:
- Site Characterization and Technology Selection for CERCLA sites with Volatile Organic Compounds in Soils (September 1993)
- USEPA Office of Solid Waste and Emergency Response Directive 9355.049FS Presumptive Remedy for CERCLA Municipal Landfills (September 1993)

3.0 SCGS FOR UNDERGROUND STORAGE TANK CLOSURE

The following standards and criteria typically apply to UST closures conducted in New York State:

- 6 NYCRR Part 612 - Registration of Petroleum Storage Facilities (February 1992)
- 6 NYCRR Part 613 - Handling and Storage of Petroleum (February 1992)
- 6 NYCRR Part 614 - Standards for New and Substantially Modified Petroleum Storage Tanks (February 1992)
- 6 NYCRR Part 371 - Identification and Listing of Hazardous Wastes (November 1998)
- 6 NYCRR Subpart 374-2 - Standards for the Management of Used Oil
- 6 NYCRR Parts 700-706 - Water Quality Standards
- 40 CFR Part 280 - Technical Standards and Corrective Action Requirements for Owners and Operators of Underground Storage Tanks

The following guidance typically applies to UST closures conducted in New York State:

- STARS #1 - Petroleum-Contaminated Soil Guidance Policy
- STARS #2 - Biocell and Biopile Designs for Small-Scale Petroleum-Contaminated Soil Projects
- SPOTS #14 - Site Assessments at Bulk Storage Facilities (August 1994)
- Spill Response Guidance Manual
- Permanent Closure of Petroleum Storage Tanks
- TAGM 3028 - "Contained In" Criteria for Environmental Media: Soil Action Levels (August 1997)
- TOGS 1.1.1 - Ambient Water Quality Standards & Guidance Values and Groundwater Effluent Limitations
- Air Guide 1 - Guidelines for the Control of Toxic Ambient Air Contaminants
- NYSDOH Environmental Health Manual CSFP-530 - “Individual Water Supplies - Activated Carbon Treatment Systems”

4.0 SCGS FOR REMEDIAL ACTION

The following standards and criteria typically apply to Remedial Actions conducted in New York State:

- 29 CFR Part 1910.120 - Hazardous Waste Operations and Emergency Response
- 40 CFR Part 144 - Underground Injection Control Program
- 10 NYCRR Part 67 - Lead
- 12 NYCRR Part 56 - Industrial Code Rule 56 (Asbestos)
- 6 NYCRR Part 175 - Special Licenses and Permits--Definitions and Uniform Procedures
- 6 NYCRR Part 361 - Siting of Industrial Hazardous Waste Facilities
- 6 NYCRR Part 371 - Identification and Listing of Hazardous Wastes (November 1998)
- 6 NYCRR Part 372 - Hazardous Waste Manifest System and Related Standards for Generators, Transporters and Facilities (November 1998)

- 6 NYCRR Subpart 373-4 - Facility Standards for the Collection of Household Hazardous Waste and Hazardous Waste from Conditionally Exempt Small Quantity Generators (November 1998)
- 6 NYCRR Subpart 374-1 - Standards for the Management of Specific Hazardous Wastes and Specific Types of Hazardous Waste Management Facilities (November 1998)
- 6 NYCRR Subpart 374-3 - Standards for Universal Waste (November 1998)
- 6 NYCRR Part 375 - Inactive Hazardous Waste Disposal Sites (as amended January 1998)
- 6 NYCRR Part 376 - Land Disposal Restrictions
- 19 NYCRR Part 600 - Waterfront Revitalization and Coastal Resources
- 6 NYCRR Part 608 - Use and Protection of Waters
- 6 NYCRR Part 661 - Tidal Wetlands - Land Use Regulations
- 6 NYCRR Part 663 - Freshwater Wetlands - Permit Requirements
- 6 NYCRR Parts 700-706 - Water Quality Standards (June 1998)
- 6 NYCRR Part 750 through 758 - Implementation of NPDES Program in NYS ("SPDES Regulations")
- Technical Guidance for Screening Contaminated Sediments (January 1999)

The following guidance typically applies to Remedial Actions conducted in New York State:

- TAGM 4013 - Emergency Hazardous Waste Drum Removal/ Surficial Cleanup Procedures (March 1996)
- TAGM 4046 - Determination of Soil Cleanup Objectives and Cleanup Levels (January 1994)
- TAGM 4059 - Making Changes To Selected Remedies (May 1998)
- STARS #1 - Petroleum-Contaminated Soil Guidance Policy
- STARS #2 - Biocell and Biopile Designs for Small-Scale Petroleum-Contaminated Soil Projects
- TAGM 3028 - "Contained In" Criteria for Environmental Media: Soil Action Levels (August 1997)
- Citizen Participation in New York's Hazardous Waste Site Remediation Program: A Guidebook (June 1998)
- TOGS 1.1.1 - Ambient Water Quality Standards & Guidance Values and Groundwater Effluent Limitations
- TOGS 1.3.8 - New Discharges to Publicly Owned Treatment Works
- TOGS 2.1.2 - Underground Injection/Recirculation (UIR) at Groundwater Remediation Sites
- Air Guide 1 - Guidelines for the Control of Toxic Ambient Air Contaminants
- State Coastal Management Policies
- OSWER Directive 9200.4-17 - Use of Monitored Natural Attenuation at Superfund, RCRA Corrective Action, and Underground Storage Tank Sites (November 1997)

- NYSDOH Environmental Health Manual CSFP-530 - “Individual Water Supplies - Activated Carbon Treatment Systems”

5.0 SCGS FOR SITE MANAGEMENT

The following standards and criteria typically apply to Site Management activities conducted in New York State:

- 6 NYCRR Part 175 - Special Licenses and Permits--Definitions and Uniform Procedures

The following guidance typically applies to Site Management activities conducted in New York State:

- Groundwater Monitoring Well Decommissioning Procedures (May 1995)
- The activity is a component of a program selected by a process complying with the public participation requirements of section 1.10, to the extent applicable.
- NYSDOH Environmental Health Manual CSFP-530 - “Individual Water Supplies - Activated Carbon Treatment Systems”

NOTES:

1. PROPERTY KNOWN AS LOT 42, BLOCK 2341 AS ON THE TAX MAP OF THE BOROUGH OF BRONX, BRONX COUNTY, CITY & STATE OF NEW YORK.
2. TOTAL AREA = 31,045 S.F. OR 0.713 AC.
3. LOCATION OF UNDERGROUND UTILITIES ARE APPROXIMATE. LOCATIONS AND SIZES ARE BASED ON UTILITY MARK-OUTS, ABOVE GROUND STRUCTURES THAT WERE VISIBLE & ACCESSIBLE IN THE FIELD, AND THE MAPS AS LISTED IN THE REFERENCES AVAILABLE AT THE TIME OF THE SURVEY. AVAILABLE ASBUILT PLANS AND UTILITY MARKOUT DOES NOT ENSURE MAPPING OF ALL UNDERGROUND UTILITIES AND STRUCTURES. BEFORE ANY EXCAVATION IS TO BEGIN, ALL UNDERGROUND UTILITIES SHOULD BE VERIFIED AS TO THEIR LOCATION, SIZE AND TYPE BY THE PROPER UTILITY COMPANIES. CONTROL POINT ASSOCIATES, INC. DOES NOT GUARANTEE THE UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA EITHER IN SERVICE OR ABANDONED.

   THE SOURCE OF UNDERGROUND UTILITIES ARE SHOWN UTILIZING A QUALITY LEVEL SYSTEM:

   QUALITY LEVEL D - UTILITIES SHOWN BASED UPON REFERENCE MAPPING OR ORAL HISTORY. NOT FIELD VERIFIED.

   QUALITY LEVEL C - LOCATION OF UTILITY SURFACE FEATURES SUPPLEMENTS REFERENCE MAPPING. INCLUDES MARKOUT BY OTHERS.

   QUALITY LEVEL B - UTILITY LOCATION DATA IS COLLECTED THROUGH GEOPHYSICAL SENSING TECHNOLOGY TO SUPPLEMENT SURFACE FEATURES AND OR REFERENCE MAPPING. INCLUDES MARKOUT BY CONTROL POINT ASSOCIATES, INC.

   QUALITY LEVEL A - HORIZONTAL AND VERTICAL LOCATION OF UTILITIES ARE OBTAINED USING VACUUM EQUIPMENT EXCAVATION OR OTHER METHODS TO EXPOSE THE UTILITY. LOCATION SHOWN AT SINGLE POINT WHERE EXCAVATION OCCURRED UNLESS UTILITY WAS LOCATED PRIOR TO FILLING.
4. THIS PLAN IS BASED ON INFORMATION PROVIDED BY A SURVEY PREPARED IN THE FIELD BY CONTROL POINT ASSOCIATES, INC. AND OTHER REFERENCE MATERIAL AS LISTED HEREON.
5. THIS SURVEY IS PREPARED WITH REFERENCE TO A TITLE REPORT PREPARED BY METROPOLITAN ABSTRACT CORPORATION AS AGENT FOR FIDELITY NATIONAL TITLE INSURANCE COMPANY, TITLE NUMBER B354765, WITH AN EFFECTIVE DATE OF 9/2/2024. WHERE THE FOLLOWING SURVEY RELATED EXCEPTIONS APPEAR IN SCHEDULE B:

   (5) COVENANTS, CONDITIONS, EASEMENTS, LEASES, AGREEMENTS OF RECORD, IF ANY.

   (a) RAILROAD AGREEMENT RECORDED IN LIBER 1819, CP. 391. - BLANKET RIGHTS TO THE RAILROAD FOR GRADING & CONSTRUCTIONS

   (b) CERTIFICATION PURSUANT TO ZONING LOT SUBDIVISION ('EXHIBIT I') RECORDED IN CRFN 2022000023111. - DOCUMENT NOT PROVIDED

   (c) ZONING LOT DESCRIPTION AND OWNERSHIP STATEMENT ('EXHIBIT III') RECORDED IN CRFN 2022000023112. - DOCUMENT NOT PROVIDED
6. UNDERGROUND TANK SIZES WERE OBTAINED FROM INFORMATION RECEIVED FROM STATION MANAGER OR EMPLOYEE. ALL SIZES AND LOCATIONS ARE APPROXIMATE & ARE SUBJECT TO FIELD VERIFICATION.
7. ELEVATIONS REFER TO THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88), BASED ON REF. #3, CONVERTED TO NAVD 88 (TO CONVERT TO BRONX HIGHWAY DATUM SUBTRACT 1.51' FROM THE ELEVATIONS SHOWN. TO CONVERT TO NGVD 1929 ADD 1.10' TO ELEVATIONS SHOWN.)

   TEMPORARY BENCH MARK SET:
   TBM-A: X-CUT SET IN CONCRETE SIDEWALK ELEVATION= 31.79'
   TBM-A: DOCK SPIKE SET IN CONCRETE SIDEWALK ELEVATION= 35.29'

   PRIOR TO CONSTRUCTION IT IS THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THAT THE BENCHMARKS ILLUSTRATED ON THIS SKETCH HAVE NOT BEEN DISTURBED AND THEIR ELEVATIONS HAVE BEEN CONFIRMED.
   ANY CONFLICTS MUST BE REPORTED PRIOR TO CONSTRUCTION.
8. EXISTING FIRM: BY GRAPHIC PLOTTING ONLY PROPERTY IS LOCATED IN FLOOD HAZARD ZONE X (AREAS DETERMINED TO BE OUTSIDE THE 0.2% CHANCE FLOODPLAIN.) PER MAP REF #10.
9. THIS PROPERTY HAS DIRECT ACCESS TO GRAND CONCOURSE (110' WIDE PUBLIC RIGHT OF WAY).
10. SITE WAS FENCED OFF AND LOCKED DURING FIELD VISIT ON 11-21-2024.

SCHEDULE A DESCRIPTION

ALL THAT CERTAIN PLOT, PIECE OR PARCEL OF LAND, SITUATE, LYING AND BEING IN THE BOROUGH AND COUNTY OF BRONX, CITY AND STATE OF NEW YORK, BEING BOUNDED AND DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE EASTERLY SIDE OF GRAND CONCOURSE (FORMERLY MOTT AVENUE), DISTANT 119.90 FEET SOUTHERLY FROM THE CORNER FORMED BY THE INTERSECTION OF THE EASTERLY SIDE OF GRAND CONCOURSE WITH THE SOUTHERLY SIDE OF EAST 144TH STREET;

RUNNING THENCE NORTH 77 DEGREES 22 MINUTES 10 SECONDS EAST, A DISTANCE OF 100.00 FEET TO A POINT;

THENCE SOUTH 12 DEGREES 37 MINUTES 50 SECONDS EAST, A DISTANCE OF 111.95 FEET TO A POINT;

THENCE NORTH 72 DEGREES 15 MINUTES 19 SECONDS EAST, A DISTANCE OF 5.00 FEET TO A POINT;

THENCE SOUTH 05 DEGREES 06 MINUTES 51 SECONDS WEST, A DISTANCE OF 52.50 FEET TO A POINT;

THENCE NORTH 72 DEGREES 15 MINUTES 19 SECONDS EAST, A DISTANCE OF 11.00 FEET TO A POINT;

THENCE SOUTH 12 DEGREES 37 MINUTES 50 SECONDS EAST, A DISTANCE OF 150.00 FEET TO A POINT;

THENCE SOUTH 77 DEGREES 22 MINUTES 10 SECONDS WEST, A DISTANCE OF 100.00 FEET TO A POINT ON THE EASTERLY SIDE OF GRAND CONCOURSE;

THENCE NORTH 12 DEGREES 37 MINUTES 50 SECONDS WEST ALONG THE EASTERLY SIDE OF GRAND CONCOURSE, A DISTANCE OF 311.95 FEET TO THE POINT OR PLACE OF BEGINNING.

THE LAND SHOWN ON THIS SURVEY IS THE SAME AS THAT DESCRIBED IN A TITLE REPORT PREPARED BY METROPOLITAN ABSTRACT CORPORATION AS AGENT FOR FIDELITY NATIONAL TITLE INSURANCE COMPANY, TITLE NUMBER B354765, WITH AN EFFECTIVE DATE OF 9/2/2024.

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT WAS BASED WERE MADE IN ACCORDANCE WITH THE "2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS", JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 7(A), 7(B)(1), 7(C), 8, 9, 13 AND 14OF TABLE A THEREOF. THE FIELD WORK WAS COMPLETED ON 11-07-2024.

THIS SURVEY HAS BEEN PERFORMED IN THE FIELD UNDER MY SUPERVISION, AND TO THE BEST OF MY KNOWLEDGE, BELIEF, AND INFORMATION, THIS SURVEY HAS BEEN PERFORMED IN ACCORDANCE WITH CURRENTLY ACCEPTED ACCURACY STANDARDS.

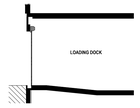
6 GROUND FLOOR USES
SCALE: 1/16" = 1'-0"



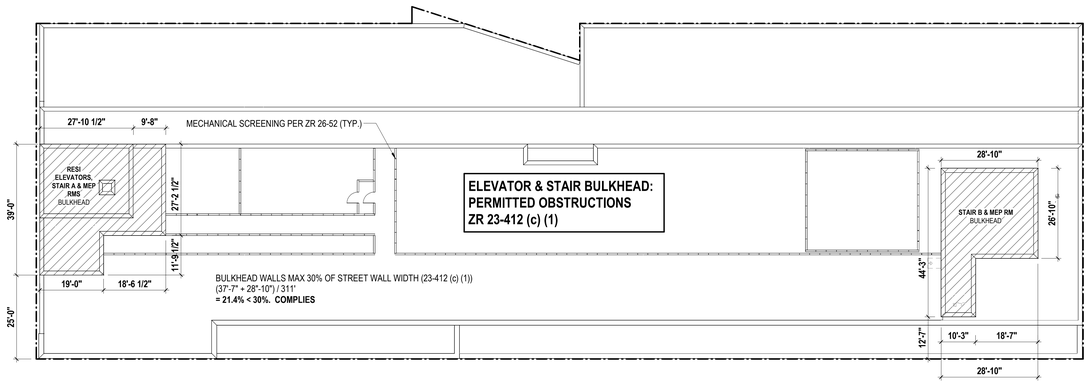
ZR 36-62
ALLOWED ON WIDE STREET IN CONFORMITY WITH THE REQUIREMENTS SET FORTH IN THE TABLE (LRC - B) WHEN TIER B FRONTAGE IS THE ONLY FRONTAGE
COMPLIES

ZR. 36-661
MINIMUM DIMENSIONS FOR REQUIRED ACCESSORY OFF-STREET LOADING BERTHS (LRC - B)

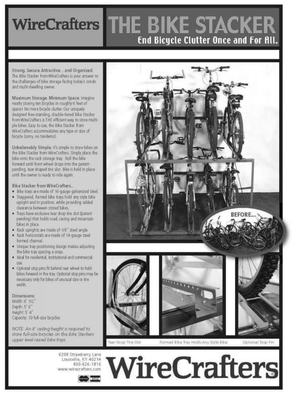
LENGTH:	REQUIRED: 37'	PROPOSED: 67' 6 3/8"
WIDTH:	REQUIRED: 12'	PROPOSED: 30' 10 1/4"
VERTICAL CLEARANCE:	REQUIRED: 14'	PROPOSED: 16' 2"

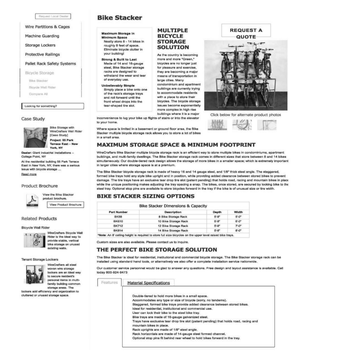
COMPLIES

ZR. 25-75
NO INTERSECTION WITHIN 50'
COMPLIES



5 ELEVATOR & BULKHEAD PERMITTED OBSTRUCTIONS
SCALE: 1/16" = 1'-0"





ZR 25-80 / 36-711

REQUIRED BICYCLE PARKING RESIDENTIAL
1 PER 2 DWELLING UNITS
304 UNITS/2= 152 BICYCLE SPACES
ADA BICYCLE SPACE REQUIRED: 152 * 0.10 = 16 BIKES

REQUIRED BICYCLE PARKING COMMERCIAL
1 PER 10,000 SF
39,985 SF COMMERCIAL/ 10,000 SF = 4 BICYCLE SPACES
ADA BICYCLE SPACE REQUIRED: 2 * 0.10 = 1 BIKES

ZR 25-85

ALL ACCESSORY BICYCLE SPACES ARE ON THE SAME ZONING LOT AS THE BUILDING

ZR 25-83

SPACE PROVIDED FOR ENCLOSED ACCESSORY BICYCLE PARKING IS WITHIN THE CELLAR AND THEREFORE NOT INCLUDED IN THE ZONING FLOOR AREA CALCULATION.

PROVIDED BICYCLE SPACES RESIDENTIAL
136 SPACES + 16 ADA = 152 BICYCLE SPACES PROVIDED. COMPLIES
16 ADA SPACES. COMPLIES

PROVIDES BICYCLE SPACES COMMERCIAL
4 SPACES + 1 ADA = 5 BICYCLE SPACES PROVIDED. COMPLIES
1 ADA SPACE. COMPLIES

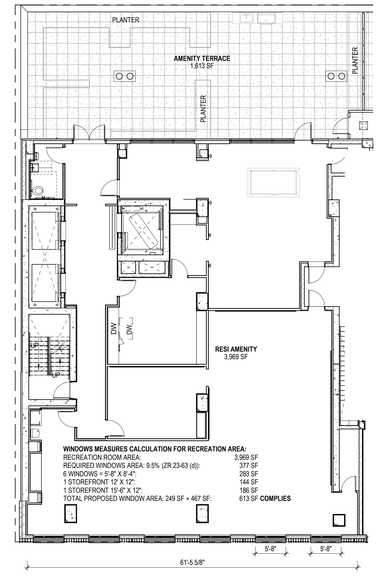
ZR 36-73

ALL REQUIRED BICYCLE PARKING SPACES THAT ARE ACCESSORY TO RESIDENCE SHALL BE MADE AVAILABLE FOR THE STORAGE AND INDEPENDENT ACCESS OF THE BICYCLES USED BY THE OCCUPANTS OF SUCH RESIDENCES.

BIKE STORAGE ROOM (1,680 SF)

8 WIRECRAFTERS "BIKE STACKER" 8' RACK X 14 BIKES EACH = 112 BICYCLE SPACES
3 WIRECRAFTERS "BIKE STACKER" 5' RACK X 8 BIKES EACH = 24 BICYCLE SPACES
16 INDIVIDUAL ADA BICYCLE SPACES
TOTAL = 152

1,620 SF / 152 BIKES = 10.7 SF/BIKE (>9SF, NO DETERMINATION REQUIRED)



4 2ND FLOOR RECREATION SPACE
SCALE: 1" = 10'-0"

(a) Budget U-factors are used for software baseline calculations ONLY, and are not code requirements.
(b) "Other" components require supporting documentation for proposed U-factors.
(c) Fenestration product performance must be certified in accordance with NFRC and requires supporting documentation.

Envelope PASSES: Design 1% better than code

Envelope Compliance Statement

Compliance Statement: The proposed envelope design represented in this document is consistent with the building plans, specifications, and other calculations submitted with this permit application. The proposed envelope systems have been designed to meet the 2020 New York City Energy Conservation Code, Appendix CA (modified 90.1-2016) requirements in COMcheck Version 4.1.5.5 and to comply with any applicable mandatory requirements listed in the Inspection Checklist.

PROFESSIONAL STATEMENT:

TO THE BEST OF MY KNOWLEDGE, THE DSIGN CONTAINED HEREIN COMPLIES WITH 2020 NYCECC BY APPLICATION OF ASHRAE 90.1-2016 AS MODIFIED BY APPENDIX CA.

COMMISIONING PLAN STATEMENT:

AS PER NYCECC APPENDIX CA (MODIFIED ASHRAE 90.1 2016), SECTION 6.7.2.3 "SYSTEM COMMISSIONING," OWNER SHALL HIRE COMMISSIONING AGENCY TO DEVELOP A COMMISSIONING PLAN. PLAN SHALL EXPLAIN ALL ACTIVITIES TO BE COMPLETED DURING EACH PHASE OF COMMISIONING. THE PLAN SHALL ALSO LIST SPECIFIC EQUIPMENT AND FUNCTIONS TO BE TESTED, THE CONDITIONS FOR TESTING, AND THE MEASURABLE CRITERIA FOR PERFORMANCE. COOLING SYSTEM IS IN EXCESS OF 480 MBH AND/OR HEATING IS IN EXCESS OF 600 MBH (SPACE HEATING & HOT WATER COMBINED)
TOTAL COOLING CAPACITY: 3651.4 MBH
SPACE HEATING CAPACITY: 2866 MBH
SVC WTR HTG CAPACITY: 501.08 MBH
(SEE MH EN DWGS)

COMcheck Software Version 4.1.5.5

Inspection Checklist

Energy Code: 2020 New York City Energy Conservation Code, Appendix CA

Requirements: 0.0% were addressed directly in the COMcheck software

Text in the "Comments/Assumptions" column is provided by the user in the COMcheck Requirements screen. For each requirement, the user certifies that a code requirement will be met and how that is documented, or that an exception is being claimed. Where compliance is itemized in a separate table, a reference to that table is provided.

Section # & Req.ID	Plan Review	Complies?	Comments/Assumptions
4.2.2, 5.4.3.1.1, 5-7 [PR1][1]	Plans and/or specifications provide all information with which compliance can be determined for the building envelope and document where exceptions to the standard are claimed.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
4.2.2, 8.4.1.1, 8.4.1.2, 8.7 [PR6][2]	Plans, specifications, and/or calculations provide all information with which compliance can be determined for the electrical systems and equipment and document where exceptions are claimed. Feeder connectors sized in accordance with approved plans and branch circuits sized for maximum drop of 3%.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.5.4.2.3 [PR7][2]	In buildings > 2,500 ft2, any enclosed spaces directly under a roof with ceiling heights > 15 ft. and used as an office, lobby, atrium, concourse, corridor, storage (including nonrefrigerated warehouse), gymnasium, fitness/exercise area, playing area, gymnasium seating area, convention exhibit/event space, courtroom, automotive service, fire station engine room, manufacturing corridor/transition and bay areas, retail, library reading and stack areas, distribution/sorting area, transportation baggage and seating areas, or workshop, the following requirements apply: The daylight zone under skylights is >= half the floor area and (a) the skylight area to daylight zone is >= 3 percent with a skylight VT >= 0.40 or (b) the minimum skylight effective aperture >= 1 percent. The skylights have a measured haze value > 90 percent.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
8.4.5 [PR11][1]	Electrical meters for tenant spaces in covered buildings. Each covered tenant space in a new building shall be equipped with a separate meter or sub-meter to measure the electrical consumption of such space when let or sublet. See section details and Section 28-311.2 of the Administrative Code. As new covered tenant spaces are created, they shall be equipped with meters or sub-meters as provided in this section.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	

Additional Comments/Assumptions:

1 High Impact (Tier 1) 2 Medium Impact (Tier 2) 3 Low Impact (Tier 3)

Section # & Req.ID	Footing / Foundation Inspection	Plans Verified Value	Field Verified Value	Complies?	Comments/Assumptions
4.2.4 [FO1][1]	Installed below-grade wall insulation type and R-value consistent with insulation specifications reported in plans and COMcheck reports.	R-____	R-____	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.8.1.2 [FO2][1]	Below-grade wall insulation installed per manufacturer's instructions.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
4.2.4 [FO3][1]	Installed slab-on-grade insulation type and R-value consistent with insulation specifications reported in plans and COMcheck reports.	R-____ ☐ Unheated ☐ Heated	R-____ ☐ Unheated ☐ Heated	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.5.3.5 [FO5][1]	Slab edge insulation depth/length.	____ft	____ft	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.8.1.7 [FO6][1]	Exterior insulation protected against damage, sunlight, moisture, wind, landscaping and equipment maintenance activities.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.1.7.3 [FO7][1]	Insulation in contact with the ground has <=0.3% water absorption rate per ASTM C272.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
6.4.4.1.5 [FO11][1]	Bottom surface of floor structures incorporating radiant heating insulated to >=R-3.5.	R-____	R-____	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*

Additional Comments/Assumptions:

1 High Impact (Tier 1) 2 Medium Impact (Tier 2) 3 Low Impact (Tier 3)

Section # & Req.ID	Framing / Rough-In Inspection	Plans Verified Value	Field Verified Value	Complies?	Comments/Assumptions
5.4.3.1.3 [FR16][1]	Whole-building pressurization conducted by an independent third party. Measured air leakage rate of the building envelope <= 0.40 cfm/ft2, with this air leakage rate normalized by the sum of the above and below-grade building envelope areas of the conditioned and semiheated space. R-2 buildings may alternatively show compliance through testing in accordance with Section R402.4.1.3 of the New York City Energy Conservation Code. See department rules and code section for conditional exceptions.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.4.4 [PR10][1]	Applications for construction document approval includes thermal bridge documentation inlcuding: 1) Clear field thermal bridges, 2) Point thermal bridges, 3) Linear thermal bridges. See section language for details.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	

Additional Comments/Assumptions:

1 High Impact (Tier 1) 2 Medium Impact (Tier 2) 3 Low Impact (Tier 3)

Section # & Req.ID	Framing / Rough-In Inspection	Plans Verified Value	Field Verified Value	Complies?	Comments/Assumptions
5.4.3.2 [FR1][1]	Factory-built and site-assembled fenestration and doors are labeled or certified as meeting air leakage requirements.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.4.3.4 [FR4][1]	Vestibules are installed where building entrances separate conditioned space from the exterior, and meet exterior envelope requirements. Doors have self-closing devices, and are >=7 ft apart (>= 16 ft apart for adjoining floor area >= 40000 sq.ft.). Vestibule floor area <=7 SQ.ft. or 2 percent of the adjoining conditioned floor area.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.5.4.3a [FR8][1]	Vertical fenestration U-Factor.	U-____	U-____	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.5.4.3b [FR9][1]	Skylight fenestration U-Factor.	U-____	U-____	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.5.4.4.1 [FR10][1]	Vertical fenestration SHGC value.	SHGC:____	SHGC:____	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.5.4.4.2 [FR11][1]	Skylight SHGC value.	SHGC:____	SHGC:____	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.8.2.1, 5.8.2.3, 5.8.2.4, 5.8.2.5 [FR12][1]	Fenestration products rated (U-factor, SHGC, and VT) in accordance with NFRC or energy code defaults are used.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.2.2 [FR13][1]	Fenestration and door products are labeled, or a signed and dated certificate listing the U-factor, SHGC, VT, and air leakage rate has been provided by the manufacturer.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.5.3.6 [FR14][1]	U-factor of opaque doors associated with the building thermal envelope meets requirements.	U-____ ☐ Swinging ☐ Nonswinging	U-____ ☐ Swinging ☐ Nonswinging	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.4.3.1 [FR15][1]	Continuous air barrier is wrapped, sealed, caulked, gasketed, and/or taped in an approved manner, except in semiheated spaces.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	

1 High Impact (Tier 1) 2 Medium Impact (Tier 2) 3 Low Impact (Tier 3)

Section # & Req.ID	Rough-In Electrical Inspection	Complies?	Comments/Assumptions
8.4.2 [EL10][2]	At least 50% of all 125 volt 15- and 20-Amp receptacles are controlled by an automatic control device.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
8.4.3 [EL11][2]	New buildings have electrical energy use measurement devices installed. Where tenant spaces exist, each tenant is monitored separately. In buildings with a digital control system the energy use is transmitted to to control system and displayed graphically.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	

Additional Comments/Assumptions:

1 High Impact (Tier 1) 2 Medium Impact (Tier 2) 3 Low Impact (Tier 3)

Section # & Req.ID	Insulation Inspection	Plans Verified Value	Field Verified Value	Complies?	Comments/Assumptions
4.2.4 [IN2][1]	Installed roof insulation type and R-value consistent with insulation specifications reported in plans and COMcheck reports. For some ceiling systems, verification may need to occur during Framing Inspection.	R-____ ☐ Above deck ☐ Metal ☐ Attic	R-____ ☐ Above deck ☐ Metal ☐ Attic	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.8.1.2, 5.8.1.3 [IN3][1]	Roof insulation installed per manufacturer's instructions. Blown or poured loose-fill insulation is installed only where the ceiling slope is <= 3:12.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
4.2.4 [IN6][1]	Installed above-grade wall insulation type and R-value consistent with insulation specifications reported in plans and COMcheck reports.	R-____ ☐ Mass ☐ Metal ☐ Steel ☐ Wood	R-____ ☐ Mass ☐ Metal ☐ Steel ☐ Wood	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.8.1.2 [IN7][1]	Above-grade wall insulation installed per manufacturer's instructions.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
4.2.4 [IN8][1]	Installed floor insulation type and R-value consistent with insulation specifications reported in plans and COMcheck reports.	R-____ ☐ Mass ☐ Steel ☐ Wood	R-____ ☐ Mass ☐ Steel ☐ Wood	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	*See the Envelope Assemblies table for values.*
5.8.1.2 [IN9][1]	Floor insulation installed per manufacturer's instructions.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.1.1 [IN10][1]	Building envelope insulation is labeled with R-value or insulation certificate has been provided listing R-value and other relevant data.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.1.9 [IN18][1]	Building envelope insulation extends over the full area of the component at the proposed rated R or U value.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.1.4 [IN11][1]	Eaves are baffled to deflect air to above the insulation.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.1.5 [IN12][1]	Insulation is installed in substantial contact with the inside surface separating conditioned space from unconditional space.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.1.6 [IN13][1]	Recessed equipment installed in building envelope assemblies does not compress the adjacent insulation.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	

1 High Impact (Tier 1) 2 Medium Impact (Tier 2) 3 Low Impact (Tier 3)

Section # & Req.ID	Insulation Inspection	Plans Verified Value	Field Verified Value	Complies?	Comments/Assumptions
5.8.1.7.1 [IN15][1]	Attics and mechanical rooms have insulation protected where adjacent to attic or equipment access.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.1.7.2 [IN16][1]	Foundation vents do not interfere with insulation.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.8.1.8 [IN17][1]	Insulation intended to meet the roof insulation requirements cannot be installed on top of a suspended ceiling. Mark this requirement compliant if insulation is installed accordingly.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.5.3.7 [IN19][1]	Balconies and parapets that interrupt the building thermal envelope comply with one of the following: 1. Insulated with continuous insulation R-value >= thermal resistance equivalent to the continuous insulation component required in the adjacent wall assembly. Where more than one wall assembly is interrupted by an adjacent balcony, the higher thermal resistance shall be followed. 2. Incorporate >= R-3 thermal break where the structural element penetrates the building thermal envelope.			☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	

Additional Comments/Assumptions:

1 High Impact (Tier 1) 2 Medium Impact (Tier 2) 3 Low Impact (Tier 3)

Section # & Req.ID	Final Inspection	Complies?	Comments/Assumptions
5.4.3.3 [FI1][1]	Weatherseals installed on all loading dock cargo doors in Climate Zones 4-8.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
I5 [FI52][2]	Dedicated outdoor air system efficiency package: Buildings with hydronic and/or multiple-zone HVAC systems are equipped with an independent ventilation system designed to provide >= 100-percent outdoor air to each individual occupied space, as specified by the NYC Mechanical Code. The ventilation system is capable of total energy recovery and includes HVAC system controls that manage temperature resets >= 25 percent of delta design supply-air / room-air temp. Reference section details for qualifying systems/equipment.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	
5.7.5 [FI58][1]	Air barrier commissioning. Registered or approved agent provides evidence of air barrier commissioning including: 1) Construction documents that include documentation of the continuous air barrier components included in the design and a field inspection checklist that includes all requirements necessary for maintaining air barrier continuity and durability in accordance with Section 5.4.3.1; 2) Reports from field inspections during project construction showing compliance with continuous air barrier requirements. Air barrier continuity shall be determined by testing or inspecting each type of unique air barrier joint or seam in the building envelope for continuity and defects; 3) A final commissioning report indicating compliance with the continuous air barrier requirements shall be provided to the building owner and, upon request, to the code official.	☐Complies ☐Does Not ☐Not Observable ☐Not Applicable	

Additional Comments/Assumptions:

1 High Impact (Tier 1) 2 Medium Impact (Tier 2) 3 Low Impact (Tier 3)

PROFESSIONAL STATEMENT:

TO THE BEST OF MY KNOWLEDGE, THE DSIGN CONTAINED HEREIN COMPLIES WITH 2020 NYCECC BY APPLICATION OF ASHRAE 90.1-2016 AS MODIFIED BY APPENDIX CA.

COMMISSIONING PLAN STATEMENT:

AS PER NYCECC APPENDIX CA (MODIFIED ASHRAE 90.1 2016); SECTION 6.7.2.3 "SYSTEM COMMISSIONING." OWNER SHALL HIRE COMMISSIONING AGENCY TO DEVELOP A COMMISSIONING PLAN. PLAN SHALL EXPLAIN ALL ACTIVITIES TO BE COMPLETED DURING EACH PHASE OF COMMISSIONING. THE PLAN SHALL ALSO LIST SPECIFIC EQUIPMENT AND FUNCTIONS TO BE TESTED, THE CONDITIONS FOR TESTING, AND THE MEASURABLE CRITERIA FOR PERFORMANCE.
COOLING SYSTEM IS IN EXCESS OF 480 MBH AND/OR HEATING IS IN EXCESS OF 600 MBH (SPACE HEATING & HOT WATER COMBINED).
TOTAL COOLING CAPACITY: 3651.4 MBH
SPACE HEATING CAPACITY: 2866 MBH
SVC WTR HTG CAPACITY: 501.08 MBH
(SEE MH EN DWGS)

NYC ENERGY CONSEVATION CODE - 2020 EDITION

TABLE II - PROGRESS INSPECTIONS FOR ENERGY CODE COMPLIANCE - COMMERCIAL
THE PROGRESS INSPECTIONS AND TESTS DESCRIBED IN TABLE II SHALL BE PERFORMED FOR BUILDINGS REGULATED BY EITHER ECC CHAPTERS C2 THROUGH C6

	INSPECTION/TEST	*FREQUENCY (MINIMUM)*	*REFERENCE STANDARD (SEE ECC CHAPTER C6) OR OTHER CRITERIA*	*ECC OR OTHER CITATION*
IIA	ENVELOPE INSPECTIONS			
IIA1	PROTECTION OF EXPOSED FOUNDATION INSULATION: INSULATION MUST BE VISUALLY INSPECTED TO VERIFY PROPER PROTECTION WHERE APPLIED TO THE EXTERIOR OF BASEMENT OR CELLAR WALLS, CRAWL-SPACE WALLS AND/OR THE PERIMETER OF SLAB-ON-GRADE FLOORS.	AS REQUIRED DURING FOUNDATION WORK AND PRIOR TO BACKFILL	APPROVED CONSTRUCTION DOCUMENTS, ASTM C272	C303.2.1; ASHRAE 90.1 – 5.8.1, 5.9
IIA2	INSULATION PLACEMENT AND R_X0002_VALUES: INSTALLED INSULATION FOR EACH COMPONENT OF THE CONDITIONED SPACE ENVELOPE AND AT JUNCTIONS BETWEEN COMPONENTS, INCLUDING THERMAL BRIDGES AND HEATED SLAB INSULATION, MUST BE VISUALLY INSPECTED TO ENSURE THAT THE R_X0002_VALUES ARE MARKED, THAT SUCH R_X0002_VALUES CONFORM TO THE R-VALUES IDENTIFIED IN THE CONSTRUCTION DOCUMENTS AND THAT THE INSULATION IS PROPERLY INSTALLED. CERTIFICATIONS FOR UNMARKED INSULATION ALSO BE VISUALLY INSPECTED.	AS REQUIRED TO VERIFY CONTINUOUS ENCLOSURE WHILE WALLS, CEILINGS AND FLOORS ARE OPEN	APPROVED CONSTRUCTION DOCUMENTS	C303.1, C303.2, C402.1, C402.2, C402.6, C406; ASHRAE 90.1 –5.5, 5.6, 5.8, 5.9, 11 OR APPENDIX G, APPENDIX I
IIA3	FENESTRATION AND DOOR U_X0002_FACTOR AND PRODUCT RATINGS: U-FACTORS, SHGC AND VT VALUES OF INSTALLED FENESTRATION MUST BE VISUALLY INSPECTED FOR CONFORMANCE WITH THE U_X0002_FACTORS, SHGC AND VT VALUES IDENTIFIED IN THE CONSTRUCTION DRAWINGS BY VERIFYING THE MANUFACTURER'S NFRC LABELS OR, WHERE NOT LABELED, USING THE RATINGS IN ECC TABLES C303.1.3(1), (2) AND (3).	AS REQUIRED DURING INSTALLATION	APPROVED CONSTRUCTION DOCUMENTS; NFRC 100, NFRC 200, NFRC 300, ANSI/DASMA 105, ASTM E972	C303.1, C303.1.3, C402.1.4, C402.4, C406; ASHRAE 90.1 –5.4.2, 5.5, 5.6, 5.8.2, 5.9, 11 OR APPENDIX G, APPENDIX I
IIA4	FENESTRATION AIR LEAKAGE: WINDOWS AND DOOR ASSEMBLIES, EXCEPT SITE-BUILT WINDOWS AND/OR DOORS, MUST BE VISUALLY INSPECTED TO VERIFY THAT INSTALLED ASSEMBLIES ARE LISTED AND LABELED BY THE MANUFACTURER TO THE REFERENCED STANDARD. FOR CURTAIN WALL, STOREFRONT GLAZING, COMMERCIAL ENTRANCE DOORS AND REVOLVING DOORS, THE TESTING REPORTS MUST BE REVIEWED TO VERIFY THAT THE INSTALLED ASSEMBLY COMPLIES WITH THE STANDARD CITED IN THE APPROVED PLANS. WEATHERSEALS AT LOADING DOCKS MUST BE VISUALLY VERIFIED.	AS REQUIRED DURING INSTALLATION; PRIOR TO FINAL CONSTRUCTION INSPECTION	NFRC 400, AAMA/WDMA/CSA 101/I.S.2/A440; ASTM E283; ANSI/DASMA 105	C402.5.2, C402.5.6; ASHRAE 90.1 – 5.4.3.2, 5.4.3.3, 5.8.2, 5.9
IIA5	FENESTRATION AREAS: DIMENSIONS OF WINDOWS, DOORS AND SKYLIGHTS MUST BE VERIFIED BY VISUAL INSPECTION.	PRIOR TO FINAL CONSTRUCTION INSPECTION	APPROVED CONSTRUCTION DOCUMENTS	C402.4; ASHRAE 90.1 – 5.4, 5.5.4, 5.6, 5.9, 11 OR APPENDIX G
IIA6	AIR BARRIER VISUAL INSPECTION: OPENINGS AND PENETRATIONS IN THE BUILDING ENVELOPE, INCLUDING SITE-BUILT FENESTRATION AND DOORS, MUST BE VISUALLY INSPECTED TO VERIFY THAT A CONTINUOUS AIR BARRIER AROUND THE ENVELOPE FORMS AN AIR-TIGHT ENCLOSURE. THE PROGRESS INSPECTOR MUST VISUALLY INSPECT TO VERIFY THAT MATERIALS AND/OR ASSEMBLIES HAVE BEEN TESTED AND MEET THE REQUIREMENTS OF THE RESPECTIVE STANDARDS, OR MUST OBSERVE THE TESTING OF THE BUILDING AND/OR ASSEMBLIES AND VERIFY THAT THE BUILDING AND/OR ASSEMBLIES MEET THE REQUIREMENTS OF THE STANDARD, IN ACCORDANCE WITH THE STANDARD(S) CITED IN THE APPROVED PLANS.	AS REQUIRED DURING CONSTRUCTION	APPROVED CONSTRUCTION DOCUMENTS; ASTM E2178, ASTM E2357, ASTM E1677, ASTM E779, ASTM E283.	C402.5; ASHRAE 90.1 – 5.4.3.1, 5.4.3.5, 5.9
IIA7	AIR BARRIER TESTING: TESTING MUST BE PERFORMED IN ACCORDANCE WITH SECTION ECC C402.5.1.3.1 OR ASHRAE 90.1 SECTION 5.4.3.1.3, AND SHALL BE ACCEPTED IF THE BUILDING MEETS THE REQUIREMENTS DETAILED IN SUCH SECTION. TEST RESULTS SHALL BE RETAINED IN ACCORDANCE WITH THE PROVISIONS OF TITLE 28 OF THE ADMINISTRATIVE CODE. TESTING MUST BE PERFORMED BY A THIRD_X0002_PARTY INDEPENDENT OF THE CONTRACTOR AND ACCEPTABLE TO THE DEPARTMENT.	AS REQUIRED DURING CONSTRUCTION, OR PRIOR TO FINAL CONSTRUCTION INSPECTION	APPROVED CONSTRUCTION DOCUMENTS; ASTM E 779, ANSI/BOMA 265.1, ASTM E3158, RESNET/ICC 380	~ 5.4.3.1.3, 5.9, APPENDIX I
IIA8	AIR BARRIER CONTINUITY PLAN TESTING: EACH UNIQUE AIR BARRIER JOINT OR SEAM MUST BE TESTED OR INSPECTED FOR COMPLIANCE. DOCUMENTATION INCLUDES THE METHOD OF TEST PERFORMED ON EACH UNIQUE AIR BARRIER JOINT OR SEAM AND THE RESULTS OF THE TEST. IF AN AIR BARRIER JOINT OR SEAM HAS A DEFICIENCY, THE DEFICIENCY MUST BE NOTED, AND RETESTED UNTIL IT COMPLIES WITH THE TESTING REQUIREMENTS. TEST RESULTS MUST BE RETAINED IN ACCORDANCE WITH THE PROVISIONS OF TITLE 28 OF THE ADMINISTRATIVE CODE. TESTING MUST BE PERFORMED BY A THIRD-PARTY INDEPENDENT OF THE CONTRACTOR AND ACCEPTABLE TO THE DEPARTMENT.	AS REQUIRED DURING CONSTRUCTION	APPROVED CONSTRUCTION DOCUMENTS; ASTM E779, ASTM E1186, ASTM E2813, ASTM E3158	C402.5.1.3; ASHRAE 90.1 – 5.4.3.1.3, 5.9

11/7/2025 2:31:03 PM
Autodesk Docs://350 Grand Concourse/Arch_2024_66520_350 Grand Concourse_Building.rvt

GENERAL REQUIREMENTS:

THE BUILDING THERMAL ENVELOPE SHALL BE DURABLY SEALED TO LIMIT INFILTRATION. THE AIR BARRIER SHALL BE CONTINUOUS FOR ALL ASSEMBLIES THAT ARE THE THERMAL ENVELOPE OF THE BUILDING AND ACROSS THE JOINTS AND ASSEMBLIES. AIR BARRIER JOINTS AND SEAMS SHALL BE SEALED, INCLUDING SEALING TRANSITIONS IN PLACES AND CHANGES IN MATERIALS. THE JOINTS AND SEALS SHALL BE SECURELY INSTALLED IN OR ON THE JOINT FOR ITS ENTIRE LENGTH SO AS NOT TO DISLODGE, LOOSEN OR OTHERWISE IMPAIR ITS ABILITY TO RESIST POSITIVE AND NEGATIVE PRESSURE FROM WIND, STACK EFFECT AND MECHANICAL VENTILATION. PENETRATIONS OF THE AIR BARRIER SHALL BE CAULKED, GASKETED OR OTHERWISE SEALED IN A MANNER COMPATIBLE WITH THE CONSTRUCTION MATERIALS AND LOCATION. JOINTS AND SEALS ASSOCIATED WITH PENETRATIONS SHALL BE SEALED IN THE SAME MANNER OR TAPED OR COVERED WITH MOISTURE VAPOR-PERMEABLE WRAPPING MATERIAL. SEALING MATERIALS SHALL BE APPROPRIATE TO THE CONSTRUCTION MATERIALS BEING SEALED AND SHALL BE SECURELY INSTALLED AROUND THE PENETRATION SO AS NOT TO DISLODGE, LOOSEN OR OTHERWISE IMPAIR THE PENETRATIONS' ABILITY TO RESIST POSITIVE AND NEGATIVE PRESSURE FROM WIND, STACK EFFECT AND MECHANICAL VENTILATION. SEALING OF CONCEALED FIRE SPRINKLERS, WHERE REQUIRED, SHALL BE IN A MANNER THAT IS RECOMMENDED BY THE MANUFACTURER. CAULKING OR OTHER ADHESIVE SEALANTS SHALL NOT BE USED TO FILL VOIDS BETWEEN FIRE SPRINKLER COVER PLATES AND WALLS OR CEILINGS. THE SEALING METHODS BETWEEN DISSIMILAR MATERIALS SHALL ALLOW FOR DIFFERENTIAL EXPANSION AND CONTRACTION.

THE FOLLOWING SHALL BE CAULKED, GASKETED, WEATHER STRIPPED OR OTHERWISE SEALED WITH AN AIR BARRIER MATERIAL, SUITABLE FILM OR SOLID MATERIAL:

- ALL JOINTS, SEAMS, AND PENETRATIONS
- SITE-BUILT WINDOWS, CURTAIN WALLS, DOORS, AND SKYLIGHTS
- OPENINGS BETWEEN WINDOW AND DOOR ASSEMBLIES AND THEIR RESPECTIVE JAMBS AND FRAMING
- UTILITY PENETRATIONS
- DROPPED CEILINGS OR CHASES ADJACENT TO THE THERMAL ENVELOPE
- WALLS AND CEILINGS SEPARATING THE GARAGE FROM OTHER SPACES
- BEHIND TUBS AND SHOWERS ON EXTERIOR WALLS
- COMMON WALLS BETWEEN DWELLING UNITS

AIR BARRIER MEMBRANE:

GENERAL:
- REFER TO EXTERIOR WALL SECTION DETAIL SHEETS, ROOF DETAILS AND HVAC, FP AND PLUMBING DRAWINGS FOR DETAILS
- PENETRATIONS, SUBSTRATE TRANSITIONS, AND CONNECTIONS AROUND WINDOW AND DOOR FLASHINGS ARE AN ESSENTIAL AND CRITICAL ELEMENT TO MANAGE WATER, AIR, VAPOR, AND DRAINAGE TO THE EXTERIOR. THE AIR BARRIER MEMBRANE SHALL BE COMPLETED TO SEAL AIR LEAKAGE PATHWAYS AND GAPS.
- TYPICAL AIR LEAKAGE PATHWAYS INCLUDE, BUT ARE NOT LIMITED TO, THE FOLLOWING:
  - CONNECTIONS OF THE WALL TO ROOF
  - CONNECTIONS OF THE WALL TO FOUNDATION
  - SEISMIC AND EXPANSION JOINTS
  - WINDOW AND DOOR ROUGH OPENINGS
  - PIPE PENETRATIONS
  - FASTENER AND BOLT PENETRATIONS

PREPARATION:
- APPROPRIATE SUBSTRATE CONDITIONS ARE CRITICAL TO OBTAIN PROPER ADHESION; BE SURE SURFACES ARE READY FOR PRODUCT INSTALLATION AND ARE IN ACCORDANCE WITH MANUFACTURER'S INSTALLATION GUIDELINES. DO NOT INSTALL UNTIL SUBSTRATE CONDITIONS ARE IN ACCORDANCE WITH THIS INSTALLATION GUIDELINE. SUBSTRATE MUST BE CONTINUOUS AND SECURE.
- MECHANICAL FASTENERS USED TO SECURE SUBSTRATE SHALL BE SET FLUSH WITH SUBSTRATE AND SECURED INTO SOLID BACKING.
- CONCRETE AND CMU SUBSTRATES:
  - FILL VOIDS, GAPS, AND SPALLED AREAS IN SUBSTRATE TO PROVIDE AN EVEN PLANE.
  - STRIKE MASONRY JOINTS FULL-FLUSH.
  - CURING COMPOUNDS OR RELEASE AGENTS USED IN CONCRETE CONSTRUCTION MUST BE RESIN BASED WITHOUT OIL, WAX, OR PIGMENTS.
  - NEW CONCRETE SHOULD BE CURED FOR A MINIMUM OF FOURTEEN (14) DAYS AND MUST BE DRY PRIOR TO PRIMER APPLICATION. REFER TO PRIMER SECTION OF THIS INSTALLATION GUIDELINE FOR APPLICATION REQUIREMENTS.
- ADJACENT OR MULTIPLE PIPE PENETRATIONS THROUGH SHEATHING SHOULD BE SUFFICIENTLY SPACED APART, TYPICALLY 4-6 INCHES, TO ALLOW PROPER DETAILING OF INDIVIDUAL PIPES.
- PROVIDE PRIMER WHERE ENHANCED ADHESION IS NEEDED PER MANUFACTURER GUIDELINES. REFER TO INDIVIDUAL PRODUCT TDS FOR RECOMMENDED PRIMER INSTALLATION RATES AND CURE TIMES PRIOR TO INSTALLATION. ALLOW PRIMER TO PROPERLY CURE PRIOR TO COVERING.

INSTALLATION. GENERAL:
- FULLY ADHERE THE COMMERCIAL SELF-ADHERED VAPOR PERMEABLE, WATER RESISTIVE AIR BARRIER TO THE WALL SUBSTRATE IN A 'SHINGLE' FASHION.

SELF-ADHERED FLASHING INSTALLATION:
- PREPARE AND PRIME SURFACES PER MANUFACTURER INSTALLATION GUIDELINES AND RECOMMENDATIONS.
- INSTALL IN A MANNER TO ELIMINATE WRINKLES AND AIR BUBBLES.
- INSTALL FLASHINGS IN SHINGLE FASHION TO ELIMINATE REVERSE LAPS.
- WHERE ENHANCED ADHESION IS NEEDED, PRIME LAPS ENSURING COMPLETE COVERAGE OF ANTICIPATED LAP INSTALLATION. REFER TO RELEVANT PRIMER TDS FOR RECOMMENDED APPLICATION RATES.
- LAP ADJOINING EDGES A MINIMUM OF TWO (2) INCHES.

AIR BARRIER MEMBRANE INSTALLATION:
- PREPARE AND PRIME SURFACES PER MANUFACTURER INSTALLATION GUIDELINES AND RECOMMENDATIONS.
- INSTALL IN A MANNER TO ELIMINATE WRINKLES AND AIR BUBBLES.
- INSTALL AIR BARRIER MEMBRANE IN SHINGLE FASHION TO ELIMINATE REVERSE LAPS.
- WHERE ENHANCED ADHESION IS NEEDED, PRIME LAPS ENSURING COMPLETE COVERAGE OF ANTICIPATED LAP INSTALLATION. REFER TO RELEVANT PRIMER TDS FOR RECOMMENDED APPLICATION RATES.
- LAP ADJOINING HORIZONTAL EDGES A MINIMUM OF TWO (2) INCHES AND VERTICAL EDGES A MINIMUM OF THREE (3) INCHES.
- ROLL AIR BARRIER MEMBRANE AND LAPS WITH COUNTERTOP ROLLER TO OBTAIN THOROUGH ADHESION.
- SEAL PERMANENTLY EXPOSED REVERSE LAPS OF AIR BARRIER MEMBRANE WITH MANUFACTURER APPROVED SEALANT.

ADJACENT MATERIAL ATTACHMENT AND FASTENER PENETRATIONS:
- INSTALL FASTENERS AND COMPONENTS TO PRODUCE A SEAL AROUND THE POINT OF PENETRATION BY CREATING A CONTINUOUS COMPRESSION THEREBY MAINTAINING CONTINUITY IN THE WRB.
- FASTENERS AND COMPONENTS UNABLE TO CREATE A SEAL AS DESCRIBED IN THIS INSTALLATION GUIDELINE REQUIRE SUPPLEMENTAL SEALANT TO FULLY ENCAPSULATE THE HOLE CREATED AT THE POINT OF WRB PENETRATION.

FASTENER PENETRATIONS THROUGH AIR BARRIER MEMBRANE:
- SELF-TAPPING FASTENERS
  - FASTENER HEAD MUST BE LARGER IN DIAMETER THAN THE SHANK.
  - INSTALL FASTENERS PERPENDICULAR TO THE SUBSTRATE UNTIL FLUSH WITH THE WRB.
  - INSTALL FASTENERS TO PROVIDE A CONTINUOUS COMPRESSION FIRMLY AGAINST THE WRB, CREATING A GASKETING SEAL WITHOUT DAMAGING THEMEMBRANE.
  - DO NOT INSTALL FASTENERS OVER UNSUPPORTED AREAS OF THE SUBSTRATE SUCH AS SHEATHING JOINTS.
  - OVERDRIVEN FASTENERS, IMPROPERLY INSTALLED FASTENERS, DEFECTIVE/BROKEN FASTENERS, OR FASTENERS NOT PROPERLY FASTENED INTO THE BUILDING STRUCTURE SHOULD BE REMOVED AND THE VACATED HOLE SEALED WITH SEALANT PRIOR TO THE INSTALLATION OF THE CLADDING OR VENEER SYSTEM.
- PRE-DRILLED FASTENING ASSEMBLIES
  - FASTENING HEAD OR ASSEMBLY COMPONENT MUST BE LARGER IN DIAMETER THAN PREDRILLED HOLE.
  - FASTENING HEAD OR ASSEMBLY COMPONENT MUST BE MOUNTED FLUSH WITH THE WRB.
  - FASTENING HEAD OR ASSEMBLY COMPONENT MUST PROVIDE A CONTINUOUS COMPRESSION FIRMLY AGAINST WRB CREATING A GASKETING SEAL WITHOUT DAMAGING THE MEMBRANE.
  - DO NOT INSTALL FASTENING COMPONENTS OVER UNSUPPORTED AREAS OF THE SUBSTRATE SUCH AS SHEATHING JOINTS.
  - SEAL IMPROPERLY DRILLED AND/OR VACATED HOLES WITH SEALANT PRIOR TO THE INSTALLATION OF THE CLADDING OR VENEER SYSTEM.
  - PENETRATIONS THAT DO NOT MEET INSTALLATION REQUIREMENTS REQUIRE THE ADDITION OF SEALANT AT POINT OF INSERTION THROUGH THE AIR BARRIER TO MAINTAIN CONTINUITY IN THE AIR BARRIER ASSEMBLY.

ROUGH OPENINGS:
- INSTALL ROUGH OPENING DETAILS PER WINDOW MANUFACTURER'S PUBLISHED LITERATURE AND IN ACCORDANCE WITH ASTM E2112.
- WALL ASSEMBLIES CONTAINING A VAPOR RETARDER ON THE INTERIOR WALL ASSEMBLY.
- EXTEND FLASHING INTO ROUGH OPENING TO ENSURE SUFFICIENT MEMBRANE FOR CONNECTION WITH VAPOR RETARDER AND PROVIDE A CONTINUOUS AIR BARRIER ASSEMBLY.
- APPLY FLEXIBLE FLASHING WHERE INDICATED TO COMPLY WITH MANUFACTURER'S WRITTEN INSTRUCTIONS.
- PRIME SUBSTRATES AS RECOMMENDED BY FLASHING MANUFACTURER.
- LAP SEAMS AND JUNCTURES WITH OTHER MATERIALS AT LEAST 4 INCHES (100 MM) EXCEPT THAT AT FLASHING FLANGES OF OTHER CONSTRUCTION, LAPS NEED NOT EXCEED FLANGE WIDTH.
- LAP FLASHING OVER WATER-RESISTIVE BARRIER AT BOTTOM AND SIDES OF OPENINGS.
- LAP WATER-RESISTIVE BARRIER OVER FLASHING AT HEADS OF OPENINGS.
- AFTER FLASHING HAS BEEN APPLIED, ROLL SURFACES WITH A HARD RUBBER OR METAL ROLLER TO ENSURE THAT FLASHING IS COMPLETELY ADHERED TO SUBSTRATES.
- PROVIDE EXPANDABLE SPRAY-APPLIED POLYURETHANE FOAM SEALANT AT VOIDS.
- SEAL WINDOWS FRAME PERIMETER.

INTENT AND BACKGROUND:

THESE AIR BARRIER CONTINUITY PLANS (ABCP) ARE PROVIDED AS A GUIDE FOR THE AIR SEALING FOR THE NEW BUILDINGS TO BE LOCATED AT 350 GRAND CONCOURSE, THE BRONX, NY 10451.
ABCPs FOR ALL NEW COMMERCIAL BUILDINGS IN EXCESS OF 50,000 SQUARE FEET ARE REQUIRED PER THE 2020 NYCECC. AS THE PROPOSED BUILDINGS ARE APPROXIMATELY 236.642 (CELLAR + 13 STORIES MULTI-FAMILY RESIDENTIAL) SQUARE FEET IN TOTAL CONDITIONED AREA, THESE ABCPs ARE PROVIDED AS A PART OF THE APPROVED CONSTRUCTION DOCUMENTS. ANY CHANGE TO THIS ABCP IS THEREFORE SUBJECT TO RE-APPROVAL BY THE NEW YORK CITY DEPARTMENT OF BUILDINGS (DOB).

THE BUILDINGS ARE TO BE XX STORIES MULTI-FAMILY RESIDENTIAL BUILDINGS OF ALL NEW CONSTRUCTION LOCATED IN CLIMATE ZONE 4. A RESIDENTIAL AMENITY FLOOR IS ALSO PROVIDED IN ADDITION TO APARTMENT AND MECHANICAL FLOORS. ALL WORK DONE IN CONJUNCTION WITH THE ERECTION OF THE BUILDING IS TO COMPLY WITH THE 2020 NEW YORK CITY ENERGY CONSERVATION CODE.

AIR SEALING TESTING PROVISIONS FOR PASSIVE HOUSE, LEED, OR ANY OTHER CERTIFICATION ARE NOT INCLUDED IN THE DESIGN SCOPE AT THIS TIME. WITHIN THESE ABCPs IS A GUIDE FOR AIR SEALING OF EXTERIOR WALLS. INTERIOR TENANT DEMISING WALLS ARE NOT IN SCOPE AT THIS TIME. THE INTENT IS TO PROVIDE CONTINUOUS AIR BARRIERS THAT MEET OR ARE LESS THAN THE MAXIMUM ALLOWED AIR LEAKAGE PERMITTED PER THE ENERGY CODE.

THE MAIN AIR BARRIERS FOR THIS PROJECT ARE SUMMARIZED AS FOLLOWS:

I. EXTERIOR AIR BARRIERS
A. PRECAST CONCRETE PANEL
B. PUNCHED WINDOWS THAT SHALL BE TESTED IN ACCORDANCE WITH NFRC 400 OR ASTM E283
C. EIFS/RAINSCREEN SYSTEM WITH FLUID-APPLIED AIR BARRIER MEMBRANE IN ACCORDANCE WITH ASTM E283

II. INTERIOR AIR BARRIERS
A. GYPSUM WALL BOARD OF MINIMUM 1/2" THICKNESS
B. FULLY GROUTED CMU BLOCK

REQUIREMENTS

1. FENESTRATION, INCLUSIVE OF GLAZED DOORS, SHALL BE SEPARATELY TESTED AND INSTALLED PRIOR TO AIR BARRIER TESTING. FENESTRATION MUST BE TESTED IN ACCORDANCE WITH NFRC 400 OR ASTM E283, AND RELEVANT PRODUCT LABELS, CERTIFICATES, OR SUPPORTING DOCUMENTATION SHALL BE PROVIDED ON SITE PRIOR TO INSPECTION. INSPECTOR TO VERIFY ALL FENESTRATION COMPLIES WITH MAXIMUM AIR LEAKAGE AT 1.57 PSF PRESSURE PER 5.4.3.2 AS FOLLOWS PRIOR TO AIR BARRIER TESTING:
   A. GLAZED ENTRY DOORS: 1.0 CFM/FT²
   B. WINDOWS AND STOREFRONT: 0.06 CFM/FT²
   C. GARAGE DOORS: 0.4 CFM/FT²
   D. OTHER PRODUCTS & OPAQUE DOORS: 0.2 CFM/FT²
2. MECHANICAL DAMPERS IN EXTERIOR ENVELOPE, MOTORIZED OR OTHERWISE, SHALL BE PROVIDED WITH SUPPORTING DOCUMENTS ON SITE PRIOR TO AIR BARRIER TESTING DEMONSTRATING AIR LEAKAGE IN ACCORDANCE WITH AMCA STANDARD 550/500, AND AIR LEAKAGE AT DAMPERS SHALL NOT EXCEED 10 CFM/FT² AT 1 INCH WATER GAUGE IN ACCORDANCE WITH TABLE 6.4.3.4.3.
3. CONTRACTOR(S) ARE ENTIRELY RESPONSIBLE FOR ENSURING BUILDING ENVELOPE AIR SEALING IS ADEQUATELY PROVIDED FOR. WHERE TESTING INDICATES LEAKAGE IN EXCESS OF THAT PERMITTED IN NOTE (2) ABOVE, CONTRACTOR SHALL BE RESPONSIBLE FOR REPLACEMENT OF WORK UNTIL AIR BARRIER TESTING PASSES.
4. WHERE INDIVIDUAL DETAILS ARE NOT PROVIDED FOR HEREIN, THEY SHALL BE ADEQUATELY SEALED AND TESTED AS IF PROVIDED FOR. CONTRACTOR(S) MAY SUBMIT A REQUEST FOR INFORMATION FOR CLARIFICATION ON ANY PROPOSED EXTERIOR DETAIL THAT REQUIRES FURTHER ELABORATION.
5. A SCHEDULE OF SUGGESTED SEALANTS FOR USE IS PROVIDED AS FOLLOWS BY MANUFACTURER AND MODEL:
   A. EXTERIOR SEALANT: DOW CORNING NO. 790 OR 795 (OR APPROVED EQUAL)
   B. INTERIOR CAULK: PECORA AC-20 + SILICONE (OR APPROVED EQUAL)
6. RECESSED LIGHTING:
   A. RECESSED LUMINAIRE'S INSTALLED IN THE BUILDING THERMAL ENVELOPE SHALL BE SEALED TO LIMIT AIR LEAKAGE BETWEEN CONDITIONED AND UNCONDITIONED SPACE.
   B. ALL RECESSED LUMINAIRES SHALL BE IC-RATED AND LABELED AS MEETING ASTM E283 WHEN TESTED AT 1.57 PSF PRESSURE DIFFERENTIAL WITH NO MORE THAN 2.0 CF OF AIR MOVEMENT FROM THE CONDITIONED SPACE TO THE CEILING CAVITY.
   C. ALL RECESSED LUMINAIRES SHALL BE SEALED WITH A GASKET OR CAULK BETWEEN THE HOUSING AND INTERIOR WALL OR CEILING COVERING.
7. IN GENERAL, CONTRACTOR WORK SHALL PROVIDE FOR BUT NOT BE LIMITED TO:
   A. USE SHRINKCRAK-PROOF CAULK TO SEAL GAPS SMALLER THAN 1/4".
   B. USE EXPANDING FOAM WHERE PERMITTED AT NON-FIRE-RATED CONDITIONS TO SEAL GAPS LARGER THAN 1/4".
   C. USE LOW-EXPANDING FOAM AT WINDOW/DOOR OPENINGS FOR CONDITIONS WHERE ITEMS SUCH AS SEALANT AND BACKER ROD ALONE WOULD NOT SUFFICE. USE OF FOAM IS PERMITTED ONLY AT NON-FIRE-RATED CONDITIONS.
   D. USE TEMPERATURE-APPROPRIATE SEALANT OR CAULK (SUCH AS HIGH-TEMP CAULK OR SEALANT AT BOILER FLUES).
   E. CLEAN OUT CRACKS AND SEAMS BEFORE APPLYING SEALANT OR CAULK (SUCH AS WITH COMPRESSED AIR, VACUUM, DAMP CLOTH, ETC.)
   F. PROVIDE CONTINUOUS EXTERIOR AIR AND WATER BARRIER MEMBRANES AT CMU BLOCK WALLS AND CONCRETE WALLS AND SLAB EDGES. IT IS SUGGESTED CMU BLOCK WALLS BE PAINTED ON INTERIOR SIDE, BUT NOT REQUIRED.

ASSIGN RESPONSIBILITY TO ONE TRADE/PERSON FOR CONFIRMING COMPLETION OF AIR SEALING TASKS.

ROOF:

GENERAL:
- FOLLOW MANUFACTURER'S INSTRUCTIONS, FM APPROVALS' ROOFNAV ASSEMBLY, AND FM GLOBAL DATA SHEET 1-29.
- ENSURE AIR BARRIER CONTINUITY BETWEEN ROOFING COMPONENTS AND ADJACENT SYSTEMS.

BASE FLASHING INSTALLATION:
- INSTALL SHEET FLASHINGS AND PREFORMED ACCESSORIES PER MANUFACTURER SPECS.
- APPLY BONDING ADHESIVE TO SUBSTRATE AND FLASHING (EXCLUDING SEAM AREAS); ALLOW PARTIAL DRYING.
- FLASH PENETRATIONS AND CORNERS USING CURED/UNCURED SHEET FLASHING.
- CLEAN SEAMS, OVERLAP, AND ROLL FIRMLY INTO ADHESIVE.
- HOT-AIR WELD SIDE AND END LAPS FOR WATERTIGHT SEAMS.
- TERMINATE AND SEAL TOPS OF FLASHINGS, ANCHOR WITH TERMINATION BARS.

ROOF SPECIALTIES:
- INSTALL PER MANUFACTURER'S INSTRUCTIONS WITH SECURE ANCHORING AND ALLOWANCE FOR THERMAL/STRUCTURAL MOVEMENT.
- USE APPROPRIATE FASTENERS, SOLDER, COATINGS, SEPARATORS, UNDERLAYMENT, AND SEALANTS.
- SEAL CONCEALED JOINTS WITH BUTYL SEALANT.
- ENSURE WEATHERTIGHT JOINTS WITH CONCEALED SEALANT PLACEMENT.

COPING INSTALLATION:
- INSTALL CLEATS, ANCHOR PLATES, AND OTHER ACCESSORIES USING CONCEALED FASTENERS.

PROFESSIONAL STATEMENT

TO THE BEST OF MY KNOWLEDGE, THE DSIGN CONTAINED HEREIN COMPLIES WITH 2020 NYCECC BY APPLICATION OF ASHRAE 90.1-2016 AS MODIFIED BY APPENDIX CA.

COMMISSIONING PLAN STATEMENT:

AS PER NYCECC APPENDIX CA (MODIFIED ASHRAE 90.1 2016). SECTION 6.7.2.3 "SYSTEM COMMISSIONING," OWNER SHALL HIRE COMMISSIONING AGENCY TO DEVELOP A COMMISSIONING PLAN. PLAN SHALL EXPLAIN ALL ACTIVITIES TO BE COMPLETED DURING EACH PHASE OF COMMISSIONING. THE PLAN SHALL ALSO LIST SPECIFIC EQUIPMENT AND FUNCTIONS TO BE TESTED, THE CONDITIONS FOR TESTING, AND THE MEASURABLE CRITERIA FOR PERFORMANCE.
COOLING SYSTEM IS IN EXCESS OF 480 MBH AND/OR HEATING IS IN EXCESS OF 600 MBH (SPACE HEATING & HOT WATER COMBINED).
TOTAL COOLING CAPACITY: 3651.4 MBH
SPACE HEATING CAPACITY: 2866 MBH
SVC WTR HTG CAPACITY: 501.08 MBH

THIS PROJECT COMPLIES WITH THE FOLLOWING SAFE HARBORS:

GRAPHICS BELOW BASED ON **ANSI A117.1 - 2009**

PM OR PA TO IDENTIFY ALL SAFE HARBORS

THE GENERAL CONTRACTOR SHALL ENSURE THAT ALL CONSTRUCTION MEETS OR EXCEEDS THE MINIMUM REQUIREMENTS OF ICC ANSI A117.1

ACCESIBLE UNITS:

1. ALL DWELLING UNITS ON THIS PROJECT ARE REQUIRED TO MEET BOTH ANSI A117.1 - 2009, TYPE B, AND FEDERALFAIR HOUSING GUIDELINES, UNLESS NOTED OTHERWISE.
2. DWELLING UNITS, AS NOTED, ARE REQUIRED TO MEET ANSI TYPE A, ADDITIONAL INFORMATION FOR THESE UNITS CAN BE FOUND ON SHEETS **A-XXX & A-XXX**

ACCESSIBILITY NOTES

1. ALL WORK SHALL COMPLY WITH THE APPLICABLE REQUIREMENTS OF **NEW YORK CITY** BUILDING CODE **2022** - INCLUDING APPENDIX E, & N AND ICC A117.1 - 2009 (ACCESSIBLE AND USABLE BUILDINGS AND FACILITIES).

2. ALL WORK SHALL COMPLY WITH THE APPLICABLE REQUIREMENTS OF 2010 ADA STANDARDS FOR ACCESSIBLE DESIGN.

3. THE MINIMUM CLEAR WIDTH FOR SINGLE WHEELCHAIR PASSAGE SHALL BE 32 IN AT A POINT AND 36 IN CONTINUOUSLY.

4. THE MINIMUM WIDTH FOR TWO WHEELCHAIRS TO PASS IS 60 IN.

5. THE SPACE REQUIRED FOR A WHEELCHAIR TO MAKE A 180-DEGREE TURN IS A CLEAR SPACE OF 60 IN. DIAMETER.

6. THE MINIMUM CLEAR FLOOR OR GROUND SPACE REQUIRED TO ACCOMMODATE A SINGLE, STATIONARY WHEELCHAIR OCCUPANT IS 30 IN BY 48 IN. THE MINIMUM CLEAR FLOOR OR GROUND SPACE FOR WHEELCHAIRS MAY BE POSITIONED FOR FORWARD OR PARALLEL APPROACH TO AN OBJECT. CLEAR FLOOR OR GROUND SPACE FOR WHEELCHAIRS MAY BE PART OF THE KNEE SPACE REQUIRED UNDER SOME OBJECTS.

7. ONE FULL UNOBSTRUCTED SIDE OF THE CLEAR FLOOR OR GROUND SPACE FOR A WHEELCHAIR SHALL ADJOIN OR OVERLAP AN ACCESSIBLE ROUTE OR ADJOIN ANOTHER WHEELCHAIR CLEAR FLOOR SPACE. IF A CLEAR FLOOR SPACE IS LOCATED IN AN ALCOVE OR OTHERWISE CONFINED ON ALL OR PART OF THREE SIDES, ADDITIONAL MANEUVERING CLEARANCES SHALL BE PROVIDED.

8. IF THE CLEAR FLOOR SPACE ONLY ALLOWS FORWARD APPROACH TO AN OBJECT, THE MAXIMUM HIGH FORWARD REACH ALLOWED SHALL BE 48 IN. THE MINIMUM LOW FORWARD REACH IS 15 IN.

9. IF THE CLEAR FLOOR SPACE ALLOWS PARALLEL APPROACH BY A PERSON IN A WHEELCHAIR, THE MAXIMUM HIGH SIDE REACH ALLOWED SHALL BE 48 IN. AND THE LOW SIDE REACH SHALL BE NO LESS THAN 15 IN. ABOVE THE FLOOR.

10. AT LEAST ONE ACCESSIBLE ROUTE WITHIN THE BOUNDARY OF THE SITE SHALL BE PROVIDED FROM PUBLIC TRANSPORTATION STOPS, ACCESSIBLE PARKING, AND ACCESSIBLE PASSENGER LOADING ZONES, AND PUBLIC STREETS OR SIDEWALKS TO THE ACCESSIBLE BUILDING ENTRANCE THEY SERVE.

11. AT LEAST ONE ACCESSIBLE ROUTE SHALL CONNECT ACCESSIBLE BUILDINGS, FACILITIES, ELEMENTS, AND SPACES THAT ARE ON THE SAME SITE.

12. AT LEAST ONE ACCESSIBLE ROUTE SHALL CONNECT ACCESSIBLE BUILDING OR FACILITY ENTRANCES WITH ALL ACCESSIBLE SPACES AND ELEMENTS AND WITH ALL ACCESSIBLE DWELLING UNITS WITHIN THE BUILDING OR FACILITY.

13. AN ACCESSIBLE ROUTE SHALL CONNECT AT LEAST ONE ACCESSIBLE ENTRANCE OF EACH ACCESSIBLE DWELLING UNIT WITH THOSE EXTERIOR AND INTERIOR SPACES AND FACILITIES THAT SERVE THE ACCESSIBLE DWELLING UNIT.

14. THE MINIMUM CLEAR WIDTH OF AN ACCESSIBLE ROUTE SHALL BE 36 IN. EXCEPT AT DOORS.

15. IF AN ACCESSIBLE ROUTE HAS LESS THAN 60 IN. CLEAR WIDTH, THEN PASSING SPACES AT LEAST 60 IN. BY 60 IN. SHALL BE LOCATED AT REASONABLE INTERVALS NOT TO EXCEED 200 FT. A T-INTERSECTION OF TWO CORRIDORS OR WALKS IS AN ACCEPTABLE PASSING PLACE.

16. ACCESSIBLE ROUTES SERVING ANY ACCESSIBLE SPACE OR ELEMENT SHALL ALSO SERVE AS A MEANS OF EGRESS FOR EMERGENCIES OR CONNECT TO AN ACCESSIBLE PLACE OF REFUGE. SUCH ACCESSIBLE ROUTES AND PLACES OF REFUGE SHALL COMPLY WITH THE REQUIREMENTS OF THE ADMINISTRATIVE AUTHORITY HAVING JURISDICTION. WHERE FIRE CODE PROVISIONS REQUIRE MORE THAN ONE MEANS OF EGRESS FROM ANY SPACE OR ROOM, THEN MORE THAN ONE ACCESSIBLE MEANS OF EGRESS SHALL ALSO BE PROVIDED FOR HANDICAPPED PEOPLE. ARRANGE EGRESS SO AS TO BE READILY ACCESSIBLE FROM ALL ACCESSIBLE ROOMS AND SPACES.

17. OBJECTS PROJECTING FROM WALLS (FOR EXAMPLE, TELEPHONES) WITH THEIR LEADING EDGES BETWEEN 27 IN. AND 80 IN. ABOVE THE FINISHED FLOOR SHALL PROTRUDE NO MORE THAN 4 IN. INTO WALKS, HALLS, CORRIDORS, PASSAGEWAYS, OR AISLES. OBJECTS MOUNTED WITH THEIR LEADING EDGES AT OR BELOW 27 IN. ABOVE THE FINISHED FLOOR MAY PROTRUDE ANY AMOUNT. FREE-STANDING OBJECTS MOUNTED ON POSTS OR PYLONS MAY OVERHANG 12 IN. MAXIMUM FROM 27 IN. TO 80 IN. ABOVE THE GROUND OR FINISHED FLOOR. PROTRUDING OBJECTS SHALL NOT REDUCE THE CLEAR WIDTH OF AN ACCESSIBLE ROUTE OR MANEUVERING SPACE.

18. WALKS, HALLS, CORRIDORS, PASSAGEWAYS, AISLES, OR OTHER CIRCULATION SPACES SHALL HAVE 80 IN. MINIMUM CLEAR HEAD ROOM. IF VERTICAL CLEARANCE OF AN AREA ADJOINING AN ACCESSIBLE ROUTE IS REDUCED TO LESS THAN 80 IN. (NOMINAL DIMENSION), A BARRIER TO WARN BLIND OR VISUALLY-IMPAIRED PERSONS SHALL BE PROVIDED.

19. LIGHTING AND FLOOR SURFACES ALONG ACCESSIBLE ROUTES AND IN ACCESSIBLE ROOMS AND SPACES INCLUDING FLOORS, WALKS, RAMPS, STAIRS, AND CURB RAMPS SHALL BE STABLE, FIRM, AND SLIP-RESISTANT.

20. CHANGES IN LEVEL UP TO 1/4 IN MAY BE VERTICAL AND WITHOUT EDGE TREATMENT. CHANGES IN LEVEL BETWEEN 1/4 IN AND 1/2 IN SHALL BE BEVELED WITH A SLOPE NO GREATER THAN 1:2. CHANGES IN LEVEL GREATER THAN 1/2 IN SHALL BE ACCOMPLISHED BY MEANS OF A RAMP.

21. IF CARPET OR CARPET TILE IS USED ON A GROUND OR FLOOR SURFACE, THEN IT SHALL BE SECURELY ATTACHED; HAVE A FIRM CUSHION, PAD, OR BACKING OR NO CUSHION OR PAD; AND HAVE A LEVEL LOOP, TEXTURED LOOP, LEVEL CUT PILE, OR LEVEL CUT/UNCUT PILE TEXTURE. THE MAXIMUM PILE HEIGHT SHALL BE 1/2 IN. EXPOSED EDGES OF CARPET SHALL BE FASTENED TO FLOOR SURFACES AND HAVE TRIM ALONG THE ENTIRE LENGTH OF THE EXPOSED EDGE. IF CARPET TILE IS USED ON AN ACCESSIBLE GROUND OR FLOOR SURFACE, IT SHALL HAVE A MAXIMUM COMBINED THICKNESS OF PILE, CUSHION, AND BACKING HEIGHT OF 1/2 IN.

22. ANY PART OF AN ACCESSIBLE ROUTE WITH A SLOPE GREATER THAN 1:20 SHALL BE CONSIDERED A RAMP.

23. THE LEAST POSSIBLE SLOPE SHALL BE USED FOR ANY RAMP. THE MAXIMUM SLOPE OF A RAMP IN NEW CONSTRUCTION SHALL BE 1:12. THE MAXIMUM RISE FOR ANY RUN SHALL BE 30 IN.

24. THE MINIMUM CLEAR WIDTH OF A RAMP SHALL BE 44 IN. HANDRAILS SHALL NOT REDUCE THE REQUIRED WIDTH CLEARANCES OF A RAMP RUN OR LANDING.

25. RAMPS SHALL HAVE LEVEL LANDINGS AT THE BOTTOM AND TOP OF EACH RUN. LANDINGS SHALL HAVE THE FOLLOWING FEATURES:
(A) THE LANDING SHALL BE AT LEAST AS WIDE AS THE RAMP RUN LEADING TO IT.
(B) THE LANDING LENGTH SHALL BE A MINIMUM OF 60 IN. CLEAR.
(C) IF RAMPS CHANGE DIRECTION AT LANDINGS, THE MINIMUM LANDING SIZE SHALL BE 60 IN. BY 60 IN.

26. IF A RAMP RUN HAS A RISE GREATER THAN 6 IN. OR A HORIZONTAL PROJECTION GREATER THAN 72 IN., OR A SLOPE STEEPER THAN 1:20, THEN IT SHALL HAVE HANDRAILS ON BOTH SIDES. HANDRAILS ARE NOT REQUIRED ON CURB RAMPS. HANDRAILS SHALL HAVE THE FOLLOWING FEATURES:
(A) HANDRAILS SHALL BE PROVIDED ALONG BOTH SIDES OF RAMP SEGMENTS. THE HANDRAILS ON SWITCHBACK OR DOGLEG RAMPS SHALL ALWAYS BE CONTINUOUS.
(B) IF HANDRAILS ARE NOT CONTINUOUS, THEY SHALL EXTEND AT LEAST 12 IN. BEYOND THE TOP AND BOTTOM OF THE RAMP SEGMENT AND SHALL BE PARALLEL WITH THE FLOOR OR GROUND SURFACE.
(C) THE CLEAR SPACE BETWEEN THE HANDRAIL AND THE WALL SHALL BE 1-1/2 IN.
(D) GRIPPING SURFACES SHALL BE CONTINUOUS.
(E) TOP OF HANDRAIL GRIPPING SURFACES SHALL BE MOUNTED BETWEEN 30 IN AND 34 IN ABOVE RAMP SURFACES.
(F) ENDS OF HANDRAILS SHALL BE EITHER ROUNDED OR RETURNED SMOOTHLY TO FLOOR, WALL OR POST.
(G) HANDRAILS SHALL NOT ROTATE WITHIN THEIR FITTINGS.
(H) HANDRAILS SHALL NOT REDUCE THE REQUIRED WIDTH CLEARANCES OF A RAMP RUN OR LANDING.

27. RAMPS AND LANDINGS WITH DROP-OFFS SHALL HAVE CURBS, WALLS, RAILINGS, OR PROJECTING SURFACES THAT PREVENT PEOPLE FROM SLIPPING OFF THE RAMP. CURBS SHALL BE A MINIMUM OF 4 IN HIGH.

28. ON ANY GIVEN FLIGHT OF STAIRS, ALL STEPS SHALL HAVE UNIFORM RISER HEIGHTS AND UNIFORM TREAD WIDTHS. STAIR TREADS SHALL BE NO LESS THAN 11 IN WIDE, MEASURED FROM RISER TO RISER. OPEN RISERS ARE NOT PERMITTED ON ACCESSIBLE ROUTES.

29. THE UNDERSIDES OF NOSINGS SHALL NOT BE ABRUPT. THE RADIUS OF CURVATURE AT THE LEADING EDGE OF THE TREAD SHALL BE NO GREATER THAN 1/2 IN. RISERS SHALL BE SLOPED OR THE UNDERSIDE OF THE NOSING SHALL HAVE AN ANGLE NOT LESS THAN 60 DEGREES FROM THE HORIZONTAL. NOSINGS SHALL PROJECT NO MORE THAN 1-1/2 IN.

30. STAIRWAYS SHALL HAVE HANDRAILS AT BOTH SIDES OF ALL STAIRS. HANDRAILS SHALL HAVE THE FOLLOWING FEATURES:
(A) HANDRAILS SHALL BE CONTINUOUS ALONG BOTH SIDES OF STAIRS. THE INSIDE HANDRAIL ON SWITCHBACK OR DOGLEG STAIRS SHALL ALWAYS BE CONTINUOUS.
(B) IF HANDRAILS ARE NOT CONTINUOUS, THEY SHALL EXTEND AT LEAST 12 IN BEYOND THE TOP RISER AND AT LEAST 12 IN PLUS THE WIDTH OF ONE TREAD BEYOND THE BOTTOM RISER. AT THE TOP, THE EXTENSION SHALL BE PARALLEL WITH THE FLOOR OR GROUND SURFACE. AT THE BOTTOM, THE HANDRAIL SHALL CONTINUE TO SLOPE FOR A DISTANCE OF THE WIDTH OF ONE TREAD FROM THE BOTTOM RISER; THE REMAINDER OF THE EXTENSION SHALL BE HORIZONTAL.
(C) THE CLEAR SPACE BETWEEN HANDRAILS AND WALL SHALL BE 1-1/2 IN.
(D) GRIPPING SURFACES SHALL BE UNINTERRUPTED BY NEWEL POSTS, OTHER CONSTRUCTION ELEMENTS, OR OBSTRUCTIONS.
(E) TOP OF HANDRAIL GRIPPING SURFACE SHALL BE MOUNTED BETWEEN 34 IN AND 38 IN ABOVE STAIR NOSINGS.
(F) ENDS OF HANDRAILS SHALL BE EITHER ROUNDED OR RETURNED SMOOTHLY TO FLOOR, WALL OR POST.
(G) HANDRAILS SHALL NOT ROTATE WITHIN THEIR FITTINGS.

31. ELEVATOR OPERATION SHALL BE AUTOMATIC. EACH CAR SHALL BE EQUIPPED WITH A SELF-LEVELING FEATURE THAT WILL AUTOMATICALLY BRING THE CAR TO FLOOR LANDINGS WITHIN A TOLERANCE OF 1/2 IN UNDER RATED LOADING TO ZERO LOADING CONDITIONS. THIS SELF-LEVELING FEATURE SHALL BE AUTOMATIC AND INDEPENDENT OF THE OPERATING DEVICE AND SHALL CORRECT THE OVER-TRAVEL OR UNDER-TRAVEL.

32. CALL BUTTONS IN ELEVATOR LOBBIES AND HALLS SHALL BE CENTERED AT 42 IN ABOVE THE FLOOR. SUCH CALL BUTTONS SHALL HAVE VISUAL SIGNALS TO INDICATE WHEN EACH CALL IS REGISTERED AND WHEN EACH CALL IS ANSWERED. CALL BUTTONS SHALL BE A MINIMUM OF 3/4 IN IN THE SMALLEST DIMENSION. THE BUTTON DESIGNATING THE UP DIRECTION SHALL BE ON TOP. BUTTONS SHALL BE RAISED OR FLUSH. OBJECTS MOUNTED BENEATH HALL CALL BUTTONS SHALL NOT PROJECT INTO THE ELEVATOR LOBBY MORE THAN 4 IN.

33. A VISIBLE AND AUDIBLE SIGNAL SHALL BE PROVIDED AT EACH HOIST WAY ENTRANCE TO INDICATE WHICH CAR IS ANSWERING A CALL. AUDIBLE SIGNALS SHALL SOUND ONCE FOR THE UP DIRECTION AND TWICE FOR THE DOWN DIRECTION OR SHALL HAVE VERBAL ANNUNCIATORS THAT SAY "UP" OR "DOWN." VISIBLE SIGNALS SHALL HAVE THE FOLLOWING FEATURES:
(A) HALL LANTERN FIXTURES SHALL BE MOUNTED SO THAT THEIR CENTERLINE IS AT LEAST 72 IN ABOVE THE LOBBY FLOOR.
(B) VISUAL ELEMENTS SHALL BE AT LEAST 2-1/2 IN. IN THE SMALLEST DIM.
(C) SIGNALS SHALL BE VISIBLE FROM THE VICINITY OF THE HALL CALL BUTTON. IN-CAR LANTERNS LOCATED IN CARS. VISIBLE FROM THE VICINITY OF HALL CALL BUTTONS, AND CONFORMING TO THE ABOVE REQUIREMENTS, SHALL BE ACCEPTABLE.

34. ALL ELEVATOR HOIST WAY ENTRANCES SHALL HAVE RAISED FLOOR DESIGNATIONS PROVIDED ON BOTH JAMBS. THE CENTERLINE OF THE CHARACTERS SHALL BE 60 IN FROM THE FLOOR. SUCH CHARACTERS SHALL BE 2 IN HIGH. PERMANENTLY APPLIED PLATES ARE ACCEPTABLE IF THEY ARE PERMANENTLY FIXED TO THE JAMBS.

35. ELEVATOR DOORS SHALL OPEN AND CLOSE AUTOMATICALLY. THEY SHALL BE PROVIDED WITH A REOPENING DEVICE THAT WILL STOP AND REOPEN A CAR DOOR AND HOIST WAY DOOR AUTOMATICALLY IF THE DOOR BECOMES OBSTRUCTED BY AN OBJECT OR PERSON. THE DEVICE SHALL BE CAPABLE OF COMPLETING THESE OPERATIONS WITHOUT REQUIRING CONTACT FOR AN OBSTRUCTION PASSING THROUGH THE OPENING AT HEIGHTS OF 5 IN AND 29 IN FROM THE FLOOR. DOOR REOPENING DEVICES SHALL REMAIN EFFECTIVE FOR AT LEAST 20 SECONDS. AFTER SUCH AN INTERVAL, DOORS MAY CLOSE IN ACCORDANCE WITH THE REQUIREMENTS OF ANSI A17.1-1978 AND A17.1A-1979.

36. THE MINIMUM ACCEPTABLE TIME FROM NOTIFICATION THAT A CAR IS ANSWERING A CALL UNTIL THE DOORS OF THAT CAR START TO CLOSE SHALL BE CALCULATED FROM THE FOLLOWING EQUATION:
T = D OR T = D 1.5 FT/S 445 MM/S
WHERE T = TOTAL TIME IN SECONDS AND D = DISTANCE IN FEET FROM A POINT IN THE LOBBY OR CORRIDOR 60 IN DIRECTLY IN FRONT OF THE FARTHEST CALL BUTTON CONTROLLING THAT CAR TO THE CENTERLINE OF ITS HOIST WAY DOOR. FOR CARS WITH IN-CAR LANTERNS, T BEGINS WHEN THE LANTERN IS VISIBLE FROM THE VICINITY OF HALL CALL BUTTONS AND AN AUDIBLE SIGNAL IS SOUNDED. THE MINIMUM ACCEPTABLE NOTIFICATION TIME SHALL BE 5 SECONDS.

37. THE MINIMUM TIME FOR ELEVATOR DOORS TO REMAIN FULLY OPEN IN RESPONSE TO A CAR CALL SHALL BE 3 SECONDS.

38. THE FLOOR AREA OF ELEVATOR CARS SHALL PROVIDE SPACE FOR WHEELCHAIR USERS TO ENTER THE CAR, MANEUVER WITHIN REACH OF CONTROLS, AND EXIT FROM THE CAR. THE CLEARANCE BETWEEN THE CAR PLATFORM SILL AND THE EDGE OF ANY HOIST WAY LANDING SILL BE NO GREATER THAN 1-1/4 IN.

39. THE LEVEL OF ILLUMINATION AT THE CAR CONTROLS, PLATFORM, AND CAR THRESHOLD AND LANDING SILL SHALL BE AT LEAST 5 FOOT CANDLES.

40. ELEVATOR CONTROL PANELS SHALL HAVE THE FOLLOWING FEATURES:
(A) BUTTONS. ALL CONTROL BUTTONS SHALL BE AT LEAST 3/4 IN (19 MM) IN THEIR SMALLEST DIMENSION. THEY MAY BE RAISED OR FLUSH.
(B) TACTILE AND VISUAL CONTROL INDICATORS. ALL CONTROL BUTTONS SHALL BE DESIGNATED BY RAISED STANDARD ALPHABET CHARACTERS FOR LETTERS, ARABIC CHARACTERS FOR NUMERALS, OR STANDARD SYMBOLS, AND AS REQUIRED IN ANSI A17.1-1978 AND A17.1A-1979. THE CALL BUTTON FOR THE MAIN ENTRY FLOOR SHALL BE DESIGNATED BY A RAISED STAR AT THE LEFT OF THE FLOOR DESIGNATION. ALL RAISED DESIGNATIONS FOR CONTROL BUTTONS SHALL BE PLACED IMMEDIATELY TO THE LEFT OF THE BUTTON TO WHICH THEY APPLY. APPLIED PLATES, PERMANENTLY ATTACHED, ARE AN ACCEPTABLE MEANS TO PROVIDE RAISED CONTROL DESIGNATIONS. FLOOR BUTTONS SHALL BE PROVIDED WITH VISUAL INDICATORS TO SHOW WHEN EACH CALL IS REGISTERED. THE VISUAL INDICATORS SHALL BE EXTINGUISHED WHEN EACH CALL IS ANSWERED.
(C) HEIGHT. ALL FLOOR BUTTONS SHALL BE NO HIGHER THAN 48 IN. UNLESS THERE IS A SUBSTANTIAL INCREASE IN COST, IN WHICH CASE THE MAXIMUM MOUNTING HEIGHT MAY BE INCREASED TO

NYC SMOKE CARBON MONOXIDE DETECTOR NOTES

1. SMOKE/CARBON MONOXIDE DETECTORS OR DEVICES SHALL BE INSTALLED IN ORDINANCE WITH THE HOUSING MAINTENANCE CODE, MULTIPLE DWELLING LAW THE NEW YORK CITY BUILDING CODE THE NEW YORK CITY ELECTRICAL CODE AND NFPA 72.
2. SMOKE DETECTORS AND CARBON MONOXIDE DETECTORS MAY BE COMBINED PROVIDING THE DEVICES COMPLY WITH THE PROVISIONS OF TITLE 28 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK AND APPLICABLE RULES PROMULGATED THERELINDER.
3. EACH SMOKE/CARBON MONOXIDE DETECTOR SHALL BE INSTALLED IN ACCORDANCE WITH REFERENCE STANDARD UL 2034 AND UL 2075
4. EACH SMOKE/ CARBON MONOXIDE DETECTOR SHALL BE OF A TYPE THAT ALLOWS FOR READILY TESTING OF SUCH DEVICES.
5. DUPLEX UNITES SHALL HAVE A DEVICES LOCATED ON EACH LEVEL IF ONLY ONE MEANS OF EGRESS IS PROVIDED FROM EACH LEVEL.
6. EACH SMOKE/CARBON MONOXIDE DETECTORS SHALL BE INSTALLED OUTSIDE OF EACH SLEEPING ROOM WITHIN 15'-0" OF THE ENTRANCE TO A SLEEPING ROOM AND INSIDE EACH SLEEPING ROOM, AND ANY STORY WITHIN A DWELLING UNIT, PER BC 915.1.1.1

RODENT PROOFING

CONTRACTOR TO PROVIDE RODENT PROOFING AS PER BC APPENDIX F, F-101 AND F-102 AS REQUIRED BY THE **2020 NEW YORK CITY BUILDING CODE.**

HOUSING MAINTENANCE CODE

1. OWNER SHALL FILE REGISTRATION STATEMENT AS PER §27–2097 HMC.
2. OWNER SHALL PROVIDE A SIGN IDENTIFYING OWNER, MANAGEMENT AND SUPERINTENDENT AS PER §27–2104 HMC.
3. FLOOR SIGNS SHALL BE PLACED AND MAINTAINED ON EACH FLOOR LEVEL AS PER §27–2048 HMC.
4. ALL APARTMENT ENTRANCE DOORS SHALL BE A MINIMUM 3/4 HOUR RATED, SELF CLOSING WITH PEEPHOLES AS PER §27–2041 HMC AND LOCKS AS PER §27–2043 HMC.
5. MIRRORS IN ELEVATORS SHALL BE AS PER §27–2042 HMC.
6. THE BUILDING'S HEATING AND HOT WATER SUPPLY SHALL COMPLY WITH §27–2026 THROUGH §27–2033 HMC.
7. LIGHTING SHALL BE PROVIDED AS PER §27–2037 THROUGH §27–2040 AND §28-505AC, C26-1203AC AND SECTION 26-35 MDL.
8. RECEPTACLES AND COLLECTION FOR WASTE MATTER SHALL BE PROVIDED AS PER §27–2021 AND §27–2022 HMC.
9. U.S. MAIL SERVICE SHALL BE PROVIDED AS PER §27–2047 HMC.
10. THE BUILDING STREET NUMBER SHALL BE DISPLAYED AS §27–2049 HMC.
11. JANITORIAL SERVICES SHALL BE PROVIDED AS PER §27–2053 AND §27–2054 HMC.
12. OWNER SHALL PAINT ALL PUBLIC PARTS OF A MULTIPLE DWELLING AS PER §27–2013 HMC.
13. INTERIOR OF DWELLING UNITS SHALL BE CLEANED §27–2012 HMC
14. DUTIES OF OWNER SHALL BE AS PER §27–2005 HMC.
15. DUTIES OF TENANTS SHALL BE AS PER §27–2006 AND §27–2007 HMC.
16. OWNER'S RIGHT OF ACCESS SHALL BE AS PER §27–2008 HMC.
17. EXTERMINATION AND RODENT ERADICATION SHALL BE AS PER §27– 2018
18. WATER SHALL BE SUPPLIED AS PER §27–2024 AND §27–2025 HMC.
19. THE PLUMBING AND DRAINAGE SYSTEM SHALL BE MAINTAINED AS PER §27–2026 HMC.
20. DRAINAGE OF ROOFS AND COURT YARDS SHALL BE AS PER §27–2027 HMC.
21. NATURAL LIGHT AND VENTILATION SHALL BE PROVIDED AS PER §27–2057 HMC FOR MULTIPLE DWELLINGS.
22. SANITARY FACILITIES IN MULTIPLE DWELLINGS AND LIGHT AND VENTILATION FOR TOILET COMPARTMENTS SHALL BE AS PER §27–2064, §27–2065, §27–2066 AND §27–2067 HMC.
23. KITCHENS AND KITCHENETTES SHALL BE PROVIDED WITH PROPER FACILITIES, EQUIPMENT, LIGHTING, VENTILATION AND FIRE PROTECTION AS PER §27–2070, §27– 2071, AND §27–2072 HMC.
24. MINIMUM ROOM SIZES SHALL BE AS PER §27–2074 AND MAXIMUM OCCUPANCY SHALL BE AS PER §27–2075 HMC.

MULTIPLE DWELLING LAW

GENERAL PROVISIONS

1. LIGHTING AND VENTILATION OF ROOMS SHALL BE AS PER SECTION 30, MDL.
2. SIZE OF ROOMS SHALL BE AS PER SECTION 31, MDL.
3. ALCOVES SHALL BE AS PER SECTION 32, MDL.
4. COOKING SPACES (KITCHENS & KITCHENETTES) SHALL BE AS PER SECTION 33, MDL.
5. BUILDING ENTRANCE DOORS AND LIGHTS SHALL BE AS PER SECTION 35, MDL
6. ENTRANCE BOLTS AND MAIL RECEPTACLES SHALL BE AS PER SECTION 57, MDL.
7. ALL INCOMBUSTIBLE MATERIALS SHALL BE AS PER SECTION 78, MDL.
8. PARAPETS AND GUARD RAILINGS SHALL BE AS PER SECTION 62, MDL.
9. SUB-CURB USES SHALL BE AS PER SECTION 63, MDL
10. LIGHTING, GAS METERS, GAS AND OIL APPLIANCES SHALL BE AS PER SECTION 64, MDL.
11. BOILER ROOMS SHALL BE AS PER SECTION 65, MDL.
12. WATER-CLOSET AND BATH ACCOMMODATIONS SHALL BE AS PER SECTION 76, MDL.
13. PLUMBING AND DRAINAGE SHALL BE AS PER SECTION 77, MDL.
14. REPAIRS SHALL BE MADE AS PER SECTION 78, MDL.
15. HEAT SHALL BE PROVIDED AS PER SECTION 79, MDL.
16. CLEANLINESS SHALL BE AS PER SECTION 80, MDL.
17. RECEPTACLES FOR MASTE MATTER SHALL BE AS PER SECTION 81, MDL.
18. PRIVACY SHALL BE AS PER SECTION 82, MDL.
19. JANITORIAL SERVICES SHALL BE AS PER SECTION 83, MDL.
20. CONSTRUCTION STANDARDS FOR THE CONTROL OF NOISE SHALL BE AS ER SECTION 84, MDL.

SPECIAL & PROGRESS INSPECTIONS

TR-1 – Architectural Special Inspections

BC 1705.4	Masonry
BC 1705.20	Wall Panels Curtain Walls & Veneers

BC 110.3.5	Energy Code Compliance Inspections (TR8)
BC 110.3.4	Fire-Resistance Rated Construction

INTERIOR CONSTRUCTION NOTES

1. G.C. TO PROVIDE FIRE RATED PLYWOOD BLOCKING AT WALLS SCHEDULED TO RECEIVE TV'S, ARTWORK, MILLWORK, GRAB BARS, ETC.
2. IN THE EVENT OF A DISCREPANCY BETWEEN INTERIOR DESIGN DRAWINGS AND SPECIFICATIONS, CONTACT ARCHITECT PRIOR TO PURCHASING.
3. ALL QUANTITIES TO BE VERIFIED BY THE PURCHASER PRIOR TO PURCHASING BY REVIEWING INTERIOR DESIGN DRAWINGS AND SPECIFICATIONS. IN THE EVENT OF A DISCREPANCY, CONTACT ARCHITECT.
4. ANY REVISIONS TO OR SUBSTITUTIONS FOR THE ENCLOSED SPECIFICATIONS MUST BE REQUESTED IN WRITING AND APPROVED BY ARCHITECT. ALL PRODUCT INTERPRETATIONS MUST BE PRECEDED BY EXACT SAMPLES TO BE SUBMITTED FOR APPROVAL BY ARCHITECT PRIOR TO EXECUTION. (INCLUDING SHOP DRAWINGS AND PHOTOGRAPHS (IF APPROPRIATE)). IF SUBSTITUTION IS EXECUTED WITHOUT WRITTEN APPROVAL, NO RESPONSIBILITY OR LIABILITY FOR THE NEW SELECTION WILL BE ASSUMED BY ARCHITECT. SUBSTITUTIONS MUST MATCH CLOSELY AS POSSIBLE TO ARCHITECT'S ORIGINAL SPECIFICATION AND SUBMITTED SAMPLES.
5. ARCHITECT SHALL NOT BE RESPONSIBLE FOR ANY DISCONTINUATIONS, CHANGES IN MANUFACTURER'S SPECIFICATIONS, PRICE INCREASES, OR ANY OTHER ALTERATIONS, WHICH OCCUR AFTER THE DATE OF THIS SUBMITTED SPECIFICATION. SHOULD THIS OCCUR, IT WILL BE THE RESPONSIBILITY OF THE PURCHASING AGENT TO NOTIFY ARCHITECT OF ANY CHANGES AND TO RESUBMIT FOR APPROVAL OR PROVIDE SUBSTITUTIONS IF REQUIRED.
6. ALL PIECES TO BE CUSTOMIZED OR THOSE NOT PRODUCED AS STANDARD ITEMS BY SPECIFIED MANUFACTURER/VENDOR TO ANY EXTENT SHALL BE PRECEDED BY THE SUBMISSION OF SHOP DRAWINGS FROM THE SELECTED VENDOR. GENERAL CONTRACTOR MUST SUBMIT SHOP DRAWINGS TO ARCHITECT AND THE OWNER OR APPROVED REPRESENTATIVE FOR REVIEW AND APPROVAL PRIOR TO EXECUTION. THE SHOP DRAWINGS TO SHOW ALL POINTS OF DESIGN, CONSTRUCTION, AND REINFORCEMENT. SAMPLES OF ALL FINISHES, HARDWARE, FILL, BLOCK FRAMING, ETC... SHALL BE SUBMITTED FOR REVIEW AT THAT TIME.
7. ALL WORK SHALL COMPLY WITH APPLICABLE FEDERAL, STATE, AND MUNICIPAL BUILDING CODES, AS WELL AS REGULATORY AGENCIES. INCLUDING, BUT NOT LIMITED TO OSHA (OCCUPATIONAL SAFETY & HEALTH ADMINISTRATION), ETC.
8. ALL FINISHES AND MATERIALS MUST MEET OR EXCEED ALL APPLICABLE FEDERAL, STATE, AND LOCAL FIRE SAFETY CODES. UNLESS OTHERWISE NOTED, ALL WALLS AND CEILINGS MUST MEET THE FIRE RATING ASTM E-84 CLASS A.
9. ALL BUILT-IN ITEMS (I.E.: KITCHEN CABINETS, MILLWORK) SHALL BE FIELD DIMENSIONED, AND ALL SITE CONDITIONS ARE TO BE REVIEWED PRIOR TO FABRICATION. ALL SECTIONS SHALL BE THE MAXIMUM WALL-TO-WALL LENGTH POSSIBLE OR EVEN,Y SECTIONED AS REQUIRED OR NOTED. ALL PIECES SHALL BE TIGHTLY FIT AND VISUALLY LEVELED DURING INSTALLATION TO COORDINATE WITH ALL EXISTING CONDITIONS.
10. ITEMS ARE NOT TO BE INSTALLED WHICH HAVE MEMBERS THAT ARE WARPED, BOWED, DEFORMED OR OTHERWISE DAMAGED OR DEFACED. SUCH MEMBERS ARE TO BE REMOVED AND REPLACED AS DIRECTED, PENDING APPROPRIATENESS, OR THE ITEM IS TO BE COMPLETELY REPLACED IN A TIMELY MANNER AT THE SOLE COST OF THE GENERAL CONTRACTOR.
11. SHOP DRAWINGS ARE APPROVED BY ARCHITECT FOR DESIGN INTENT AND SCALE ONLY; MANUFACTURER IS RESPONSIBLE FOR ALL STRUCTURAL DURABILITY AND QUALITY OF MATERIALS.
12. ALL IMAGES, PHOTOGRAPHS & RENDERINGS OF SPECIFIED ITEMS CONTAINED IN THIS SPECIFICATION PACKAGE ARE FOR GENERAL DESIGN INTENT AND REFERENCE ONLY.
13. ALL EXPOSED CUT EDGE CEILING TILE TO BE PAINTED WHITE PRIOR TO INSTALLATION.
14. CONTRACTOR SHALL PROVIDE A COMPOSITE CEILING PLAN AND NECESSARY SHOP DRAWINGS COORDINATING ALL TRADES, SHOWING THE LOCATION OF CEILING TILES, LIGHT FIXTURES, EMERGENCY AND EXIT LIGHTING HVAC FIXTURES, SHADE POCKETS, FIRE DAMPERS ACCESS DOORS, FASCIAS, SOFFITS AND ALL OTHER ITEMS PENETRATING OR ATTACHED TO THE CEILING.
15. ACCESS DOORS LOCATIONS TO BE REVIEWED IN THE FIELD PRIOR TO INSTALLATIONS, AND THEIR LOCATIONS TO BE APPROVED BY ARCHITECT.
16. CONTRACTOR IS TO INSURE THAT ALL DIFFUSERS, RETURNS, LIGHT FIXTURES (NEW AND EXISTING) AND ALL ASSOCIATED DEVICES ARE FULLY COMPATIBLE WITH CEILING SYSTEM (TYP).
17. CABINETMAKER SHALL FURNISH AND COORDINATE THE SETTING OF ALL NECESSARY WOOD GROUND, CORNER CASINGS AND WOOD BLOCKING AT PROJECT, WHICH WILL BE IN CONJUNCTION WITH HIS WORK.
18. CONTRACTOR SHALL ATTEST IN WRITING THAT ALL WOODWORKING ATTACHED TO THE PREMISES SHALL BE FIRE RETARDANT IN ACCORDANCE WITH LOCAL BUILDING CODE. FINAL PAYMENT WILL NOT BE MADE UNTIL PROPER RECEIPT OF THIS LETTER.
19. ALL WOOD DOORS, WHERE CALLED FOR SHALL BE OF INCOMBUSTIBLE MATERIAL WITH APPROPRIATE LABELS, UNLESS OTHERWISE NOTED.
20. ALL OUTSIDE EDGES OF LAMINATED MILLWORK TO BE SELF EDGED. HORIZONTAL SURFACE OF COUNTERTOP TO BE LAMINATED LAST. ALL EDGES TO BE ROUTED AT 15° AFTER TRIMMING EXCESS.
21. WHERE FINISHED CABINETRY IS CALLED FOR TO RECEIVED FINISH OF PLASTIC LAMINATE, BACKING LAMINATE SHALL BE PROVIDED ON ALL SURFACES THAT ARE NOT EXPOSED.

TABLE 601 - FIRE-RESISTANCE RATING REQUIREMENTS FOR BUILDING ELEMENTS

ROOF CONSTRUCTION & ASSOCIATED SECONDARY MEMBERS	1 HR	

GENERAL NOTES

1. CODE COMPLIANCE: BUILDING, PLUMBING, MECHANICAL, PROPERTY MAINTENANCE, ENERGY, AND FIRE CODES PER **NEW YORK CITY BUILDING CODE 2022**. SEE CODE DATA SUMMARY FOR ADDITIONAL INFORMATION.
2. TO THE FULLEST EXTENT PERMITTED BY LAW, THE CONTRACTOR SHALL INDEMNIFY AND HOLD HARMLESS THE OWNER, ARCHITECT, ENGINEERS, AND AGENTS AND EMPLOYEES OF ANY OF THEM FROM AND AGAINST CLAIMS, DAMAGES, LOSSES AND EXPENSES, INCLUDING BUT NOT LIMITED TO ATTORNEYS' FEES, ARISING OUT OF OR RESULTING FROM PERFORMANCE OF THE WORK, PROVIDED THAT SUCH CLAIM, DAMAGE, LOSS OR EXPENSE IS ATTRIBUTABLE TO BODILY INJURY, SICKNESS, DISEASE OR DEATH, OR TO INJURY TO OR DESTRUCTION OF TANGIBLE PROPERTY (OTHER THAN THE WORK ITSELF) INCLUDING LOSS OF USE RESULTING THEREFROM, BUT ONLY TO THE EXTENT CAUSED IN WHOLE OR IN PART BY NEGLIGENT ACTS OR OMISSIONS OF THE CONTRACTOR, A SUBCONTRACTOR, ANYONE DIRECTLY OR INDIRECTLY EMPLOYED BY THEM OR ANYONE FOR WHOSE ACTS THEY MAY BE LIABLE, REGARDLESS OF WHETHER OR NOT SUCH CLAIM, DAMAGE, LOSS, OR EXPENSE IS CAUSED IN PART BY A PARTY INDEMNIFIED HEREUNDER. SUCH OBLIGATION SHALL NOT BE CONSTRUED TO NEGATE, ABRIDGE, OR REDUCE OTHER RIGHTS OR OBLIGATIONS OF INDEMNITY WHICH WOULD OTHERWISE EXIST AS TO A PARTY OR PERSON DESCRIBED IN THIS PARAGRAPH.
3. **DRAWINGS ARE NOT TO BE SCALED, USE DIMENSIONS ONLY.**
4. ALL CONTRACTORS SHALL VISIT THE JOB SITE TO BECOME FAMILIAR WITH ALL CONDITIONS. THE CONTRACTOR SHALL CHECK ALL DIMENSIONS AND CONDITIONS AT JOB SITE PRIOR TO COMMENCEMENT OF WORK AND IMMEDIATELY REPORT ANY DISCREPANCIES BETWEEN DESIGN AND EXISTING CONDITIONS TO THE ARCHITECT.
5. GENERAL CONTRACTOR AND ALL SUB CONTRACTORS MUST REVIEW ENTIRE SET OF DRAWINGS AND SPECIFICATIONS.
6. THE GENERAL CONTRACTOR SHALL MAINTAIN A COMPLETE SET OF "APPROVED FOR CONSTRUCTION" ARCHITECTURAL AND ENGINEERING DRAWINGS ON SITE FOR ALL TRADES TO REFER TO.
7. GENERAL CONTRACTOR SHALL SUBMIT TO EACH BIDDING SUBCONTRACTOR A COMPLETE SET OF ARCHITECTURAL AND ENGINEERING DRAWINGS. GENERAL CONTRACTOR SHALL CONTACT ARCHITECT IMMEDIATELY IF THERE ARE DISCREPANCIES IN THE DRAWINGS WHICH WILL AFFECT THE INDIVIDUAL BIDS.
8. THE CONTRACTOR SHALL VERIFY SIZE AND LOCATION OF ALL WALL AND ROOF OPENINGS FOR DUCTS, PIPES, ETC. WITH HVAC, ELECTRICAL, PLUMBING AND/OR ANY AFFECTED CONTRACTOR.
9. THE CONTRACTOR SHALL PROVIDE ALL SHORING, FALSEWORK, BRACING, CONSTRUCTION MATERIAL OR EQUIPMENT REQUIRED TO PROTECT PERSONS, PROPERTY AND ALL STRUCTURES NEW OR EXISTING DURING ALL PHASES OF THE WORK.
10. THE CONTRACTOR IS RESPONSIBLE FOR KEEPING THE JOB SITE CLEAN OF ALL DEBRIS DURING CONSTRUCTION AND PROVIDE A FINAL CLEAN UP BEFORE AND AFTER ARCHITECTS AND OWNER'S FINAL REVIEW OF CONSTRUCTION.
11. ALL CONTRACTORS AND SUBCONTRACTORS SHALL BE RESPONSIBLE TO ACCEPT THE SURFACE, ETC. PREPARED BY OTHERS (AS APPLICABLE) PRIOR TO THE INSTALLATION AND START OF THEIR RESPECTIVE WORK. ALL "UNACCEPTABLE" WORK SHALL BE REPORTED TO THE GENERAL CONTRACTOR FOR CORRECTION BY THE APPROPRIATE SUBCONTRACTOR AT NO ADDITIONAL COST TO THE OWNER.
12. THE CONTRACTOR IS RESPONSIBLE FOR ALL DEMOLITION, REMOVALS, CUTTING AND PATCHING TO ACCOMMODATE THE NEW WORK UNLESS SPECIFICALLY NOTED OTHERWISE.
13. ALL MATERIALS ARE TO BE PURCHASED AND INSTALLED BY THE CONTRACTOR UNLESS SPECIFICALLY NOTED OTHERWISE.
14. ALL WORK IS TO BE DONE IN STRICT ACCORDANCE WITH LOCAL LAWS, CODES AND FEDERAL SAFETY REGULATIONS.
15. CONTRACTOR WILL CONSTRUCT TEMPORARY FENCING IN EACH AREA OF WORK AS REQUIRED BY DEVELOPER OR THE LOCAL AUTHORITIES.
16. THE CONTRACTOR SHALL SECURE THE APPLICABLE PERMITS AND PAY ALL FEES, PRIOR TO THE START OF CONSTRUCTION AND RENEW THOSE PERMITS AS APPLICABLE FOR THE DURATION OF CONSTRUCTION; AND SHALL OBTAIN ALL CERTIFICATES OF OCCUPANCY.
17. ALL PLYWOOD TO BE FIRE-RETARDANT TREATED.
18. ALL WOOD BLOCKING TO BE FIRE-RETARDANT TREATED. ALL WOOD IN CONTACT W/ CONCRETE OR MASONRY TO BE PRESSURE TREATED.
19. CONTRACTOR SHALL FURNISH AND INSTALL CORNER BEADS AT ALL EXPOSED ENDS IN DRYWALL CONSTRUCTION. TAPE, POLISH AND SPACKLE ALL WORK.
20. PROVIDE DOUBLE METAL STUDS, FULL HEIGHT ON BOTH SIDES OF NEW DOOR BUCK LOCATIONS.
21. ALL METAL STUDS MUST EXTEND FROM FLOOR TO UNDERSIDE OF BASE BUILDING CONSTRUCTION OR FLOOR SYSTEM ABOVE UNLESS SPECIFICALLY NOTED OTHERWISE ON ARCHITECT'S DRAWINGS.
22. WHEN ALL FLOOR PARTITIONS HAVE BEEN SECURED; CONTRACTOR SHALL NOTIFY THE ARCHITECT FOR INSPECTION AND APPROVAL OF ENTIRE NEW PARTITION LAYOUT PRIOR TO PROCEEDING WITH THE WORK.
23. ALL DIMENSIONS ARE TO FINISHED SURFACE UNLESS NOTED OTHERWISE.
24. NO PIPING, CONDUIT, LIGHT FIXTURES, CEILING SUSPENSION SYSTEMS, WALLS, ETC. SHALL BE HUNG AND/OR SECURED TO ANY MECHANICAL DUCT.
25. NO PIPING, EQUIPMENT, DUCTS, HANGERS, ETC. SHALL BE HUNG FROM METAL ROOF DECK.
26. THE FUTURE CEILING SUSPENSION SYSTEM SHALL BE SUSPENDED AND/OR SUPPORTED IN A MANNER WHICH MEETS THE REQUIREMENTS FOR SEISMIC RESTRAINT PER CURRENT APPLICABLE CODE.
27. THE GENERAL CONTRACTOR SHALL PROVIDE AND ARRANGE FOR ALL NECESSARY POWER, LIGHTING AND WATER AS MAY BE REQUIRED DURING CONSTRUCTION.
28. AT THE COMPLETION OF THE WORK, THE CONTRACTOR SHALL ARRANGE FOR A FINAL CLEANING OF THE ALL SPACES AND SURFACES INCLUDING GLASS AND METALS, FLOORS, HARDWARE, WALLS, CEILINGS, ETC.
29. EXITS, EXIT DISCHARGE, AND PUBLIC CORRIDORS SHALL BE KEPT AT ALL TIMES AS PER **BC 1008.2**
30. A SIGN SHALL BE PROVIDED AT EACH FLOOR LANDING IN INTERIOR VERTICAL EXIT ENCLOSURES CONNECTING MORE THAN THREE STORIES DESIGNATING THE FLOOR LEVEL AS PER **BC 1023.9.2**
31. EXIT SIGNS SHALL BE INSTALLED IN COMPLIANCE WITH **BC1013.1**
32. STAIRWAY DOOR OPERATION SHALL BE IN COMPLIANCE WITH **BC403.5.3**
33. ELEVATOR SHALL BE IN COMPLIANCE WITH **BC 3003.3.2** AND BE KEPT AVAILABLE FOR IMMEDIATE USE FIRE DEPARTMENT ALL HOURS OF THE NIGHT AND DAY, INCLUDING HOLIDAYS, SATURDAYS AND SUNDAYS
34. WHERE ELEVATOR IS SERVICED BY THREE OR FEWER ELEVATOR CAR SHALL BE KEPT AVAILABLE FOR SOLE USE BY THE FIRE DEPARTMENT AS PER **BC 3003.3.2.1**
35. ENERGY CODE PROFESSIONAL STATEMENT: "TO THE BEST OF MY KNOWLEDGE, BELIEF AND PROFESSIONAL JUDGMENT, THESE PLANS AND SPECIFICATIONS ARE IN COMPLIANCE WITH THE **2020 NYC ECC**".
36. THIS PROJECT DOES NOT INCLUDE MODULAR CONSTRUCTION
37. A TACTILE SIGN INDICATING "EXIT" SHALL BE PROVIDED ADJACENT TO EACH DOOR TO AN EGRESS STAIR, AN EXIT PASSAGEWAY, AND EXIT DISCHARGE AREA AS PER **BC 1009.9**
38. AS PER TPPN 10/88 PROTECTION SHALL BE PROVIDED TO AVOID DAMAGE TO HISTORIC LANDMARK STRUCTURES ADJACENT TO PROPERTY OR WITHIN 90 FEET - PROVIDE DIAGRAM INDICATING 90 FOOT RADIUS
39. THIS BUILDING SHALL BE DESIGNED IN COMPLIANCE WITH **BC 1601 STRUCTURAL DESIGN**
40. DWELLING UNITS SHALL COMPLY WITH THE **2022 NEW YORK CITY BUILDING CODE** AND CHAPTER 1 THROUGH 10 OF THE ICC A117.1
41. **BC 403.2.1 (2)** FOR HIGH RISE BUILDINGS NOT GREATER THAN 420 FEET (128 000 MM) IN BUILDING HEIGHT, AND CONSTRUCTED TO MEET THE FIRE-RESISTANCE RATING REQUIREMENTS OF TYPE IB OR IIA CONSTRUCTION, THE REQUIRED FIRE-RESISTANCE RATING OF COLUMNS SUPPORTING FLOORS SHALL BE CONSTRUCTED TO MEET TYPE IA CONSTRUCTION, PROVIDE FIRE RATINGS & DETAILS AS APPLICABLE
42. **BC 403.2.3** FOR ALL HIGH-RISE BUILDINGS, EXIT ENCLOSURES AND ELEVATOR HOISTWAY ENCLOSURES SHALL COMPLY WITH SECTIONS **403.2.3.1** THROUGH **403.2.3.4**
43. **BC 403.4.4** AN EMERGENCY VOICE/ALARM COMMUNICATION SYSTEM SHALL BE PROVIDED IN ACCORDANCE WITH SECTION **BC 907.5.2.2**.
44. **BC 403.4.6** FIRE COMMAND. A FIRE COMMAND CENTER COMPLYING WITH SECTION 911 SHALL BE PROVIDED IN A LOCATION APPROVED BY THE FIRE DEPARTMENT
45. **BC 403.5.3** STAIRWAY DOOR OPERATION. & **BC 403.5.3.1** STAIRWAY
46. EMERGENCY POWER SYSTEM SHALL BE DESIGNED TO SUPPORT EXIT SIGN AND MEANS OF EGRESS ILLUMINATION, EMERGENCY VOICE COMMUNICATION, ELECTRICALLY POWERED FIRE PUMPS UNLESS ELECTRICAL POWER TO THE MOTOR IS TAKEN AHEAD OF THE MAIN FORM THE STREET SIDE OF HOUSE SERVICE SWITCH AS PER **BC 403.4.8.4**
47. DOORS OPENING INTO INTERIOR STAIR ENCLOSURES SHALL NOT BE LOCKED FROM EITHER SIDE AS PER **BC 403.5.3**
48. ELEVATOR MACHINE EQUIPMENT TO COMPLY WITH **BC 3003.3.2** PROVIDED FOR GEAR-DRIVEN MACHINERY, GEARLESS MACHINERY AND MOTOR GENERATORS
49. ADJACENT ROOMS TO BE PROTECTED AS PER **BC 3309.1** PROTECTION SHALL EXTEND MINIMUM 20 FEET FROM THE EDGE OF THE BUILDING BEING CONSTRUCTED AND MATERIAL SHALL BE 2" OF FLAME RETARDANT FOAM UNDER 2" FLIME RETARDANT PLYWOOD"
50. PROVIDE THE FOLLOWING NOTES ON THE STAIR DETAIL PAGE:
51. STAIRWAYS SHALL BE IDENTIFIED AS PER **BC 1023.9** ". THE SIGNAGE SHALL ALSO STATE THE STORY OF. AND THE DIRECTION TO THE EXIT DISCHARGE AND THE AVAILABILITY OF ROOF ACCESS FROM THE STAIRWAY FOR THE FIRE DEPARTMENT. EACH STAIR SHALL BE IDENTIFIED BY AN ALPHABETIC LETTER. STAIRWAY IDENTIFICATION SIGNS SHALL BE PROVIDED ON BOTH SIDES OF EACH STAIR DOOR. "
52. SECTION **BC 504.3** - STAIRWAY ACCESS TO THE ROOF SHALL BE IN ACCORDANCE WITH CHAPTER 10 OF 2008 B.C.. SUCH STAIR SHALL BE MARKED AT THE STREET AND FLOOR LEVELS WITH A SIGN INDICATING THAT THE STAIRWAY CONTINUES TO THE ROOF
53. APPLICANT SHALL NOTIFY DOB 24 TO 48 HOURS PRIOR TO COMMENCEMENT OF EARTHWORK AS PER **BC: 3304.3.1**

DATUM NOTE

UNLESS OTHERWISE NOTED, ELEVATIONS INDICATED IN THESE DRAWINGS REFER TO NAVD 88 DATUM

INTERIOR CONSTRUCTION NOTES CONTINUED

56. ONLY CABINET GRADE (FURNITURE GRADE) CORE PLYWOOD SHALL BE USED. PARTICLE BOARD OR MDF AS A SUBSTITUTE IS NOT ACCEPTABLE. (U.O.N). REFER TO FINISH SCHEDULE FOR PLASTIC LAMINATE CABINET INTERIOR SPECIFICATION.
57. ALL ITEMS OF WOODWORK INDICATED ON THE DRAWINGS AND/OR SPECIFICATIONS SHALL BE PERFORMED BY SKILLED MECHANIC USING THE BEST TECHNIQUES KNOWN TO BE THE TRADE AND IN CONFORMANCE WITH ALL TRADE STANDARDS, SPECIFICALLY THE "PREMIUM GRADE" QUALITY STANDARDS AND THE GUIDELINES FOR "HIGH PRESSURE LAMINATE" OF THE ARCHITECTURAL WOODWORK INSTITUTE.
58. WOODWORK CONTRACTOR SHOULD INSPECT THE ALIGNMENT OF ALL GWB CONSTRUCTION AND SHOULD NOTIFY THE ARCHITECT OF ANY CONDITION THAT WOULD PREVENT HIM FROM COMPLETING HIS WORK.
59. ALL WOODWORK SHALL HAVE A FINE, SMOOTH FINISH, FREE FROM MACHINE OR TOOL MARKS, ABRASIONS OR RAISED GRAIN ON EXPOSED SURFACES JOINTS SHALL BE TIGHT AND SO FORMED AS TO CONCEAL SHRINKAGE. MITERS 4° ON CROSS GRAIN. ALL BEVEL TO POINT SHALL BE GLUED AND FEATHERED. LOCKED, SPLICED, AND DOVE-TED. TENSION AND DOWELS SHALL BE OF HARDWOOD AND SPACED NOT LESS THAT 3" ON CENTER.JOINTS SHALL BE MADE WITH WATER-RESISTANT BLUE OR WHITE GLUED UNDER PRESSURE. ALL EXPOSED WORK SHALL BE FULLY ASSEMBLED IN THE SHOP IN AS LARGE A UNIT AS PRACTICAL
60. SCREW AND GLUE ALL JOINTS AND CONNECTIONS NO NAILING PERMITTED.
61. WHERE ELECTRICAL WORK IS SPECIFIED IN CABINETS, LAMP AND FIXTURES ARE TO BE PROVIDED BY THE GENERAL CONTRACTOR. CUT-OUTS FOR SWITCHES, OUTLETS AND WIRING DEVICES TO BE INSTALLED IN CABINETRY IN THE FIELD ARE BY THE WOODWORK CONTRACTOR AND ARE TO BE COORDINATED BY THE GENERAL CONTRACTOR.
62. WOODWORK SUBCONTRACTOR SHALL SHIM AND LEVEL ALL COUNTERS TO BE LOCATED OVER FILES, AND PROVIDE A STABLE TEMPORARY SUPPORT UNTIL FILES ARE DELIVERED FOR INSTALLATION. CONTRACTOR TO PROVIDE FILLER STRIPS AS REQUIRED BETWEEN FILE CABINETS AND COUNTERTOPS, AND BETWEEN CABINETS AND SURROUNDING WALLS AND CEILINGS.
63. WOODWORK CONTRACTOR IS RESPONSIBLE TO CLEAN AND POLISH AND TOUCH-UP AS REQUIRED AFTER ALL WOODWORK AFTER THE INSTALLATION IN COMPLETED.

64. ALL WALLS AND PARTITIONS, AND CEILINGS WHERE CALLED FOR TO BE PAINTED OR WALL COVERED, SHALL BE PROPERLY PREPARED, SPACKLED, TAPED, SANDED, SIZED, ETC., TO PROVIDE A PERFECTLY SMOOTH LEVEL 5 FINISH AND SURFACE AT ANDWITY SPACES.
65. ALL PAINTED WALLS, AND CEILINGS ARE TO RECEIVE ONE PIGMENTED PRIME COAT AND TWO FINISH COATS. A THIRD AND FINAL COAT OF PAINT SHALL BE COMPLETED AFTER PUNCH LIST COMPLETION.
66. THE CONTRACTOR SHALL UPON COMPLETION, REMOVE ALL PAINT FROM WHERE IT HAS BEEN SPILLED, SPLASHED, OR SPLATTERED ON ALL SURFACES INCLUDING HARDWARE, LIGHT FIXTURES, DIFFUSERS AND REGISTERS, FITTINGS, ETC.
67. WALL COVERING SHALL BE INSTALLED WHERE INDICATED. WRINKLES, BUBBLES, LOOSE EDGES, PASTE, BRUSH MARKS, WILL NOT BE ACCEPTED. WALLS SHALL BE PROPERLY PREPARED, PRIMED AND SEAMED AS PER MFG. RECOMMENDATIONS. PAINTING CONTRACTOR SHALL EXAMINE ALL SURFACES PRIOR TO AND AFTER MOVE-IN AFTER COMPLETION OF WORK BY ALL TRADES AND PROVIDE NECESSARY TOUCH-UP PAINTING OR PATCHING. COST FOR SAME SHALL BE INCLUDED IN PRICE.

68. GC/MANUFACTURER TO PROVIDE ARCHITECT WITH THREE (3) SAMPLES OF ALL FINISHES FOR APPROVAL PRIOR TO PROCUREMENT UNLESS OTHERWISE NOTED. PAINT - GC/MANUFACTURER SHALL SUBMIT THREE (3) SAMPLES PLUS ONE (1) 24"X24" SAMPLE ON SITE FOR EACH FINISH, FOR APPROVAL. SPECIALTY CONSTRUCTION & FINISH - PROVIDE TO-SCALE SHOP DRAWINGS SHOWING ALL DETAILS AND FINISH SAMPLES TO INTERIOR DESIGNER FOR APPROVAL PRIOR TO MOCK-UP FABRICATION. STONE - GC TO SUBMIT SIX (6) SAMPLES OF EACH FINISH SHOWING COLOR & VENING VARIATION RANGE, ALONG WITH WOOD - GC SHALL SUBMIT SIX (6) SAMPLES , SHOWING COLOR & GRAINING VARIATION RANGE, ONE (1) 24"X24" SAMPLE, ACTUAL FLITCH SAMPLE OR PHOTOS AND TO-SCALE SHOP DRAWINGS SHOWING ALL DETAILS TO ARCHITECT FOR APPROVAL, PRIOR TO FABRICATION. FIRE SERVICE ELEVATOR NOTES AND COMPLIANCE

FIRE SERVICE ACCESS ELEVATOR (FSAE) NOTES

1. SPRINKLER SYSTEM SHALL HAVE A SPRINKLER CONTROL VALVE SUPERVISORY SWITCH AND WATERFLOW-INITIATING DEVICE PROVIDED FOR EACH FLOOR THAT IS MONITORED BY THE BUILDING'S FIRE ALARM SYSTEM

2. SPRINKLERS SHALL NOT BE INSTALLED IN ELEVATOR MACHINE ROOMS, MACHINERY SPACES, CONTROL ROOMS, CONTROL SPACES, AND ELEVATOR HOISTWAYS OF FSAE.

3. WHEN FIREFIGHTERS' EMERGENCY OPERATION IS ACTIVE, THE ENTIRE HEIGHT OF THE HOISTWAY SHALL BE ILLUMINATED AT NOT LESS THAN 1 FOOT-CANDLE (11 LUX) AS MEASURED FROM THE TOP OF THE CAR OF EACH FSAE.

4. A PICTORIAL SYMBOL OF A STANDARDIZED DESIGN DESIGNATING FSAE SHALL BE INSTALLED ON EACH SIDE OF THE HOISTWAY DOOR FRAME ON THE PORTION OF THE FRAME AT RIGHT ANGLES TO THE FIRE SERVICE ACCESS ELEVATOR LOBBY. THE FSAE SYMBOL SHALL BE DESIGNED AS SHOWN:

FIRE SERVICE ELEVATOR NOTES AND COMPLIANCE

FIRE SERVICE ACCESS ELEVATOR (FSAE) NOTES

1. SPRINKLER SYSTEM SHALL HAVE A SPRINKLER CONTROL VALVE SUPERVISORY SWITCH AND WATERFLOW-INITIATING DEVICE PROVIDED FOR EACH FLOOR THAT IS MONITORED BY THE BUILDING'S FIRE ALARM SYSTEM

2. SPRINKLERS SHALL NOT BE INSTALLED IN ELEVATOR MACHINE ROOMS, MACHINERY SPACES, CONTROL ROOMS, CONTROL SPACES, AND ELEVATOR HOISTWAYS OF FSAE.

3. WHEN FIREFIGHTERS' EMERGENCY OPERATION IS ACTIVE, THE ENTIRE HEIGHT OF THE HOISTWAY SHALL BE ILLUMINATED AT NOT LESS THAN 1 FOOT-CANDLE (11 LUX) AS MEASURED FROM THE TOP OF THE CAR OF EACH FSAE.

4. A PICTORIAL SYMBOL OF A STANDARDIZED DESIGN DESIGNATING FSAE SHALL BE INSTALLED ON EACH SIDE OF THE HOISTWAY DOOR FRAME ON THE PORTION OF THE FRAME AT RIGHT ANGLES TO THE FIRE SERVICE ACCESS ELEVATOR LOBBY. THE FSAE SYMBOL SHALL BE DESIGNED AS SHOWN:

OCCUPANT LOAD AND EGRESS CALCULATION (GSF) - 3RD TO 9TH FLOOR - RESIDENTIAL (AS PER NYC BC SECTIONS 1004 & 1005)

FIRE SERVICE ELEVATOR NOTES AND COMPLIANCE

FIRE SERVICE ACCESS ELEVATOR (FSAE) NOTES

1. SPRINKLER SYSTEM SHALL HAVE A SPRINKLER CONTROL VALVE SUPERVISORY SWITCH AND WATERFLOW-INITIATING DEVICE PROVIDED FOR EACH FLOOR THAT IS MONITORED BY THE BUILDING'S FIRE ALARM SYSTEM

2. SPRINKLERS SHALL NOT BE INSTALLED IN ELEVATOR MACHINE ROOMS, MACHINERY SPACES, CONTROL ROOMS, CONTROL SPACES, AND ELEVATOR HOISTWAYS OF FSAE.

3. WHEN FIREFIGHTERS' EMERGENCY OPERATION IS ACTIVE, THE ENTIRE HEIGHT OF THE HOISTWAY SHALL BE ILLUMINATED AT NOT LESS THAN 1 FOOT-CANDLE (11 LUX) AS MEASURED FROM THE TOP OF THE CAR OF EACH FSAE.

4. A PICTORIAL SYMBOL OF A STANDARDIZED DESIGN DESIGNATING FSAE SHALL BE INSTALLED ON EACH SIDE OF THE HOISTWAY DOOR FRAME ON THE PORTION OF THE FRAME AT RIGHT ANGLES TO THE FIRE SERVICE ACCESS ELEVATOR LOBBY. THE FSAE SYMBOL SHALL BE DESIGNED AS SHOWN:

OCCUPANT LOAD AND EGRESS CALCULATION (GSF) - 12TH FLOOR - RESIDENTIAL (AS PER NYC BC SECTIONS 1004 & 1005)

FIRE SERVICE ELEVATOR NOTES AND COMPLIANCE

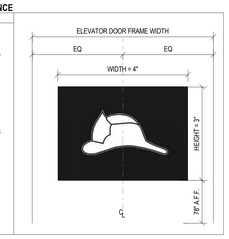
FIRE SERVICE ACCESS ELEVATOR (FSAE) NOTES

1. SPRINKLER SYSTEM SHALL HAVE A SPRINKLER CONTROL VALVE SUPERVISORY SWITCH AND WATERFLOW-INITIATING DEVICE PROVIDED FOR EACH FLOOR THAT IS MONITORED BY THE BUILDING'S FIRE ALARM SYSTEM

2. SPRINKLERS SHALL NOT BE INSTALLED IN ELEVATOR MACHINE ROOMS, MACHINERY SPACES, CONTROL ROOMS, CONTROL SPACES, AND ELEVATOR HOISTWAYS OF FSAE.

3. WHEN FIREFIGHTERS' EMERGENCY OPERATION IS ACTIVE, THE ENTIRE HEIGHT OF THE HOISTWAY SHALL BE ILLUMINATED AT NOT LESS THAN 1 FOOT-CANDLE (11 LUX) AS MEASURED FROM THE TOP OF THE CAR OF EACH FSAE.

4. A PICTORIAL SYMBOL OF A STANDARDIZED DESIGN DESIGNATING FSAE SHALL BE INSTALLED ON EACH SIDE OF THE HOISTWAY DOOR FRAME ON THE PORTION OF THE FRAME AT RIGHT ANGLES TO THE FIRE SERVICE ACCESS ELEVATOR LOBBY. THE FSAE SYMBOL SHALL BE DESIGNED AS SHOWN:



OCCUPANT LOAD AND EGRESS CALCULATION (GSF) - PENTHOUSE FLOOR - RESIDENTIAL (AS PER NYC BC SECTIONS 1004 & 1005)

OCCUPANCY TYPE DESCRIPTION	GROSS UNIT	AREA PER OCCUPANT	TOTAL OCC. LOAD	OCC. LOAD PER DOOR	EGRESS DOOR WIDTH REQ'D	EGRESS STAIR WIDTH REQ'D	EGRESS DOOR WIDTH PROVIDED	EGRESS STAIR WIDTH PROVIDED

GENERAL NOTES:

1. FOR DOOR TYPES AND DETAILS, SEE DWG A601 SERIES
2. FOR INTERIOR PARTITION TYPES SEE DWG. A600 SERIES
3. ALL ELEVATIONS ON PLANS REFER TO NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88)
4. U.O.N., INTERIOR DIMENSIONS ARE MEASURED TO CENTERLINE OF PARTITIONS & FACE OF OUTERMOST GWB AT FURRING & SHAFT WALLS.
5. FOR STAIR DETAILS SEE DWG A350 - A358
6. EXIT STAIR ENCLOSURES SHALL BE CONSTRUCTED OF IMPACT RESISTANT WALLS
7. TYPICAL INTERIOR PARTITION NOTES:
   a. DRYWALL PARTITIONS WITHIN APTS. TO BE OF 'TYPE A01' U.O.N.
   b. CHASE WALL PARTITIONS WITHIN APTS. TO BE OF 'TYPE K01' U.O.N.
   c. DRYWALL PARTITIONS BETWEEN TWO APTS. TO BE MIN. 1-HR RATED 'TYPE B01' U.O.N.
   d. FURRING AROUND COLUMNS TO BE 'TYPE F01' U.O.N.
   e. CHASE WALL PARTITIONS BETWEEN TWO APTS TO BE MIN. 1 HR. RATED TYPE L01' U.O.N.
   f. DRYWALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED TYPE B02' U.O.N.
   g. CHASE WALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE L02' U.O.N.
   h. EXHAUST & SUPPLY DUCT RISERS TO BE ENCLOSED IN CONTINUOUS 2-HR RATED SHAFT WALL 'TYPE S01' U.O.N.
   i. PARTITIONS BETWEEN SHAFTS AND CORRIDOR OR ELEVATOR HOISTWAY TO BE 2-HR RATED 'TYPE M02'
   j. TRASH CHUTE TO BE ENCLOSED IN CONTINUOUS 2-HR RATED WALL 'TYPE M01'
8. PROVIDE 3/4" THICK FIRE RETARDANT PLYWOOD FASTENED TO FINISHED PARTITION FOR ATTACHMENT OF TELECOM PANELS AND EQUIPMENT
9. SEE MEP DRAWINGS FOR LOCATIONS OF ELECTRICAL, TELECOM RISERS AND EQUIPMENT.

TRASH CHUTE NOTES:

1. THE **2014 NYC** CODE REQUIRES METAL CHUTES TO BE PLUM AND RESILIENTLY SUPPORTED BY ISOLATORS WITH A MINIMUM STATIC DEFLECTION OF 0.3 INCHES AT EACH STRUCTURAL SUPPORT LOCATION. ADDITIONALLY THE MANUFACTURER'S DAMPING COMPOUND SHOULD BE APPLIED TO THE CHUTE.
2. HOPPER DOOR 15"W x 18" H STAINLESS STEEL SELF-CLOSING UL 1 1/2 HR 'B' LABEL.
3. TRASH CHUTE OPERABLE PARTS TO BE 48" A.F.F. MAXIMUM.
4. 5 POUNDS MAXIMUM OPERATING FORCE. HANDLE DOES NOT REQUIRE PINCHING, TWISTING OF THE WRIST OR TIGHT GRIP TO OPERATE.

   g. CHASE WALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE L02' U.O.N.
   h. EXHAUST & SUPPLY DUCT RISERS TO BE ENCLOSED IN CONTINUOUS 2-HR RATED SHAFT WALL 'TYPE S01' U.O.N.
   i. PARTITIONS BETWEEN SHAFTS AND CORRIDOR OR ELEVATOR HOISTWAY TO BE 2-HR RATED 'TYPE M02'
   j. TRASH CHUTE TO BE ENCLOSED IN CONTINUOUS 2-HR RATED WALL 'TYPE M01'
8. PROVIDE 3/4" THICK FIRE RETARDANT PLYWOOD FASTENED TO FINISHED PARTITION FOR ATTACHMENT OF TELECOM PANELS AND EQUIPMENT
9. SEE MEP DRAWINGS FOR LOCATIONS OF ELECTRICAL, TELECOM RISERS AND EQUIPMENT.

TRASH CHUTE NOTES:

1. THE **2014 NYC** CODE REQUIRES METAL CHUTES TO BE PLUM AND RESILIENTLY SUPPORTED BY ISOLATORS WITH A MINIMUM STATIC DEFLECTION OF 0.3 INCHES AT EACH STRUCTURAL SUPPORT LOCATION. ADDITIONALLY THE MANUFACTURER'S DAMPING COMPOUND SHOULD BE APPLIED TO THE CHUTE.
2. HOPPER DOOR 15"W x 18" H STAINLESS STEEL SELF-CLOSING UL 1 1/2 HR 'B' LABEL.
3. TRASH CHUTE OPERABLE PARTS TO BE 48" A.F.F. MAXIMUM.
4. 5 POUNDS MAXIMUM OPERATING FORCE; HANDLE DOES NOT REQUIRE PINCHING, TWISTING OF THE WRIST OR TIGHT GRIP TO OPERATE.

Autodesk Docs://350 Grand Concourse/Arch_2024_66520_350 Grand Concourse_Building.rvt

GENERAL NOTES:

1. FOR DOOR TYPES AND DETAILS, SEE DWG A601 SERIES
2. FOR INTERIOR PARTITION TYPES SEE DWG. A600 SERIES
3. ALL ELEVATIONS ON PLANS REFER TO NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88)
4. U.O.N., INTERIOR DIMENSIONS ARE MEASURED TO CENTERLINE OF PARTITIONS & FACE OF OUTERMOST GWB AT FURRING & SHAFT WALLS.
5. FOR STAIR DETAILS SEE DWG A350 - A358
6. EXIT STAIR ENCLOSURES SHALL BE CONSTRUCTED OF IMPACT RESISTANT WALLS
7. TYPICAL INTERIOR PARTITION NOTES:
   a. DRYWALL PARTITIONS WITHIN APTS. TO BE OF 'TYPE A01' U.O.N.
   b. CHASE WALL PARTITIONS WITHIN APTS. TO BE OF 'TYPE K01' U.O.N.
   c. DRYWALL PARTITIONS BETWEEN TWO APTS. TO BE MIN. 1-HR RATED 'TYPE B01' U.O.N.
   d. FURRING AROUND COLUMNS TO BE 'TYPE F01' U.O.N.
   e. CHASE WALL PARTITIONS BETWEEN TWO APTS TO BE MIN. 1 HR. RATED 'TYPE L01' U.O.N.
   f. DRYWALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE B02' U.O.N.
   g. CHASE WALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE L02' U.O.N.
   h. EXHAUST & SUPPLY DUCT RISERS TO BE ENCLOSED IN CONTINUOUS 2-HR RATED SHAFT WALL 'TYPE S01' U.O.N.
   i. PARTITIONS BETWEEN SHAFTS AND CORRIDOR OR ELEVATOR HOISTWAY TO BE 2-HR RATED 'TYPE M03'
   j. TRASH CHUTE TO BE ENCLOSED IN CONTINUOUS 2-HR RATED WALL 'TYPE M01'
8. PROVIDE 3/4" THICK FIRE RETARDANT PLYWOOD FASTENED TO FINISHED PARTITION FOR ATTACHMENT OF TELECOM PANELS AND EQUIPMENT
9. SEE MEP DRAWINGS FOR LOCATIONS OF ELECTRICAL, TELECOM RISERS AND EQUIPMENT.

TRASH CHUTE NOTES:

1. THE **2014 NYC** CODE REQUIRES METAL CHUTES TO BE PLUM AND RESILIENTLY SUPPORTED BY ISOLATORS WITH A MINIMUM STATIC DEFLECTION OF 0.3 INCHES AT EACH STRUCTURAL SUPPORT LOCATION. ADDITIONALLY THE MANUFACTURER'S DAMPING COMPOUND SHOULD BE APPLIED TO THE CHUTE.
2. HOPPER DOOR 15"W x 18" H STAINLESS STEEL SELF-CLOSING UL 1 1/2 HR 'B' LABEL.
3. TRASH CHUTE OPERABLE PARTS TO BE 48" A.F.F. MAXIMUM.
4. 5 POUNDS MAXIMUM OPERATING FORCE; HANDLE DOES NOT REQUIRE PINCHING, TWISTING OF THE WRIST OR TIGHT GRIP TO OPERATE.

DRAIN LEGEND		
AREA DRAIN	AD-1	
TRENCH DRAIN	TD-1	
FLOOR DRAIN	FD-1	

GENERAL NOTES:

1. FOR DOOR TYPES AND DETAILS, SEE DWG A601 SERIES
2. FOR INTERIOR PARTITION TYPES SEE DWG. A600 SERIES
3. ALL ELEVATIONS ON PLANS REFER TO NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88)
4. U.O.N., INTERIOR DIMENSIONS ARE MEASURED TO CENTERLINE OF PARTITIONS & FACE OF OUTERMOST GWB AT FURRING & SHAFT WALLS.
5. FOR STAIR DETAILS SEE DWG A350 - A358
6. EXIT STAIR ENCLOSURES SHALL BE CONSTRUCTED OF IMPACT RESISTANT WALLS
7. TYPICAL INTERIOR PARTITION NOTES:
   a. DRYWALL PARTITIONS WITHIN APTS. TO BE OF 'TYPE A01' U.O.N.
   b. CHASE WALL PARTITIONS WITHIN APTS. TO BE OF 'TYPE K01' U.O.N.
   c. DRYWALL PARTITIONS BETWEEN TWO APTS. TO BE MIN. 1-HR RATED 'TYPE B01' U.O.N.
   d. FURRING AROUND COLUMNS TO BE 'TYPE F01' U.O.N.
   e. CHASE WALL PARTITIONS BETWEEN TWO APTS TO BE MIN. 1 HR. RATED 'TYPE L01' U.O.N.
   f. DRYWALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE B02' U.O.N.
   g. CHASE WALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE L02' U.O.N.
   h. EXHAUST & SUPPLY DUCT RISERS TO BE ENCLOSED IN CONTINUOUS 2-HR RATED SHAFT WALL 'TYPE S01' U.O.N.
   i. PARTITIONS BETWEEN SHAFTS AND CORRIDOR OR ELEVATOR HOISTWAY TO BE 2-HR RATED 'TYPE M02'
   j. TRASH CHUTE TO BE ENCLOSED IN CONTINUOUS 2-HR RATED WALL 'TYPE M01'
8. PROVIDE 3/4" THICK FIRE RETARDANT PLYWOOD FASTENED TO FINISHED PARTITION FOR ATTACHMENT OF TELECOM PANELS AND EQUIPMENT
9. SEE MEP DRAWINGS FOR LOCATIONS OF ELECTRICAL, TELECOM RISERS AND EQUIPMENT.

TRASH CHUTE NOTES:

1. THE **2014 NYC** CODE REQUIRES METAL CHUTES TO BE PLUM AND RESILIENTLY SUPPORTED BY ISOLATORS WITH A MINIMUM STATIC DEFLECTION OF 0.3 INCHES AT EACH STRUCTURAL SUPPORT LOCATION. ADDITIONALLY THE MANUFACTURER'S DAMPING COMPOUND SHOULD BE APPLIED TO THE CHUTE.
2. HOPPER DOOR 15"W x 18" H STAINLESS STEEL SELF-CLOSING UL 1 1/2 HR 'B' LABEL.
3. TRASH CHUTE OPERABLE PARTS TO BE 48" A.F.F. MAXIMUM.
4. 5 POUNDS MAXIMUM OPERATING FORCE; HANDLE DOES NOT REQUIRE PINCHING, TWISTING OF THE WRIST OR TIGHT GRIP TO OPERATE.

DRAIN LEGEND

AREA DRAIN	AD-1	⊙ ⊙
TRENCH DRAIN	TD-1	▭
FLOOR DRAIN	FD-1	○

GENERAL NOTES:

1. FOR DOOR TYPES AND DETAILS, SEE DWG A601 SERIES
2. FOR INTERIOR PARTITION TYPES SEE DWG. A600 SERIES
3. ALL ELEVATIONS ON PLANS REFER TO NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88)
4. U.O.N., INTERIOR DIMENSIONS ARE MEASURED TO CENTERLINE OF PARTITIONS & FACE OF OUTERMOST GWB AT FURRING & SHAFT WALLS.
5. FOR STAIR DETAILS SEE DWG A350 - A358
6. EXIT STAIR ENCLOSURES SHALL BE CONSTRUCTED OF IMPACT RESISTANT WALLS
7. TYPICAL INTERIOR PARTITION NOTES:
   a. DRYWALL PARTITIONS WITHIN APTS. TO BE OF 'TYPE A01' U.O.N.
   b. CHASE WALL PARTITIONS WITHIN APTS. TO BE OF 'TYPE K01' U.O.N.
   c. DRYWALL PARTITIONS BETWEEN TWO APTS. TO BE MIN. 1-HR RATED 'TYPE B01' U.O.N.
   d. FURRING AROUND COLUMNS TO BE 'TYPE F01' U.O.N.
   e. CHASE WALL PARTITIONS BETWEEN TWO APTS TO BE MIN. 1 HR. RATED 'TYPE L01' U.O.N.
   f. DRYWALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE B02' U.O.N.
   g. CHASE WALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE L02' U.O.N.
   h. EXHAUST & SUPPLY DUCT RISERS TO BE ENCLOSED IN CONTINUOUS 2-HR RATED SHAFT WALL 'TYPE S01' U.O.N.
   i. PARTITIONS BETWEEN SHAFTS AND CORRIDOR OR ELEVATOR HOISTWAY TO BE 2-HR RATED 'TYPE M02'
   j. TRASH CHUTE TO BE ENCLOSED IN CONTINUOUS 2-HR RATED WALL 'TYPE M01'
8. PROVIDE 3/4" THICK FIRE RETARDANT PLYWOOD FASTENED TO FINISHED PARTITION FOR ATTACHMENT OF TELECOM PANELS AND EQUIPMENT
9. SEE MEP DRAWINGS FOR LOCATIONS OF ELECTRICAL, TELECOM RISERS AND EQUIPMENT.

TRASH CHUTE NOTES:

1. THE **2014 NYC** CODE REQUIRES METAL CHUTES TO BE PLUM AND RESILIENTLY SUPPORTED BY ISOLATORS WITH A MINIMUM STATIC DEFLECTION OF 0.3 INCHES AT EACH STRUCTURAL SUPPORT LOCATION. ADDITIONALLY THE MANUFACTURER'S DAMPING COMPOUND SHOULD BE APPLIED TO THE CHUTE.
2. HOPPER DOOR 15"W x 18" H STAINLESS STEEL SELF-CLOSING UL 1 1/2 HR 'B' LABEL.
3. TRASH CHUTE OPERABLE PARTS TO BE 48" A.F.F. MAXIMUM.
4. 5 POUNDS MAXIMUM OPERATING FORCE, HANDLE DOES NOT REQUIRE PINCHING, TWISTING OF THE WRIST OR TIGHT GRIP TO OPERATE.

   f. DRYWALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE B02' U.O.N.
   g. CHASE WALL PARTITIONS BETWEEN APTS. AND STAIRS, ELECTRICAL CLOSETS, ETC. OR BETWEEN APTS. AND CORRIDOR TO BE 2-HR RATED 'TYPE L02' U.O.N.
   h. EXHAUST & SUPPLY DUCT RISERS TO BE ENCLOSED IN CONTINUOUS 2-HR RATED SHAFT WALL 'TYPE S01' U.O.N.
   i. PARTITIONS BETWEEN SHAFTS AND CORRIDOR OR ELEVATOR HOISTWAY TO BE 2-HR RATED 'TYPE M02'
   j. TRASH CHUTE TO BE ENCLOSED IN CONTINUOUS 2-HR RATED WALL 'TYPE M01'
8. PROVIDE 3/4" THICK FIRE RETARDANT PLYWOOD FASTENED TO FINISHED PARTITION FOR ATTACHMENT OF TELECOM PANELS AND EQUIPMENT
9. SEE MEP DRAWINGS FOR LOCATIONS OF ELECTRICAL, TELECOM RISERS AND EQUIPMENT.

TRASH CHUTE NOTES:

1. THE **2014 NYC** CODE REQUIRES METAL CHUTES TO BE PLUM AND RESILIENTLY SUPPORTED BY ISOLATORS WITH A MINIMUM STATIC DEFLECTION OF 0.3 INCHES AT EACH STRUCTURAL SUPPORT LOCATION. ADDITIONALLY THE MANUFACTURER'S DAMPING COMPOUND SHOULD BE APPLIED TO THE CHUTE.
2. HOPPER DOOR 15"W x 18" H STAINLESS STEEL SELF-CLOSING UL 1 1/2 HR 'B' LABEL.
3. TRASH CHUTE OPERABLE PARTS TO BE 48" A.F.F. MAXIMUM.
4. 5 POUNDS MAXIMUM OPERATING FORCE; HANDLE DOES NOT REQUIRE PINCHING, TWISTING OF THE WRIST OR TIGHT GRIP TO OPERATE.

RCP NOTES

NOTES:
1. ALL LIGHT FIXTURES ARE DIMENSIONED TO CENTER LINE, UON
2. DIMENSIONS SHOWN IN INDIVIDUAL BATHROOM AND KITCHEN TYPES ARE TYPICAL
3. LIGHT FIXTURE L03 (BATHROOM VANITY SCONCE) TO BE COORDINATED WITH MIDDLE OF SINK, UON. PLEASE SEE BATHROOM ELEVATIONS A610 FOR MORE INFORMATION
4. LIGHT FIXTURE L-11 (SHOWER / TUB) TO BE ALWAYS IN THE MIDDLE OF SHOWER AND TUB ALCOVE
5. LIGHT FIXTURE L-05 (WALK-IN CLOSET) TO BE MIDDLE TO DOOR UON
6. LIGHT FIXTURE L08A (UNIT ENTRANCE) TO BE 6" OFF OF DOOR, UON. PLEASE SEE CORRIDOR ELEVATIONS A-644 FOR MORE INFORMATION
7. FOR LIGHTING SYMBOL LEGEND, SEE LIGHTING SCHEDULES
8. HARDWIRED SMOKE/CARBON MONOXIDE DETECTORS SHALL COMPLY WITH RS17-13 AND INSTALLED IN ACCORDANCE WITH RS17-14. IT SHALL BE LOCATED IN EVERY DWELLING UNIT WITHIN FIFTEEN FEET OF THE PRIMARY ENTRANCE OF EACH ROOM.

SYMBOL LEGEND

- SD CO — SMOKE/CO2 DETECTOR (HARD-WIRED)
- CEILING TOILET EXHAUST VENT FOR LOCATION COORDINATION ONLY- REFER TO MECHANICAL DRAWINGS
- CEILING DIFFUSER FOR LOCATION COORDINATION ONLY- REFER TO MECHANICAL DRAWINGS
- LINEAR CEILING DIFFUSER FOR LOCATION COORDINATION ONLY- REFER TO MECHANICAL DRAWINGS
- VERTICAL COVE DIFFUSER FOR LOCATION COORDINATION ONLY- REFER TO MECHANICAL DRAWINGS
- WALL MOUNTED SPRINKLER HEAD FOR LOCATION COORDINATION ONLY - REFER TO FP PLANS
- PENDANT & UPRIGHT SPRINKLER HEADS FOR LOCATION COORDINATION ONLY - REFER TO FP PLANS
- ACCESS DOOR TO BE COORDINATED WITH MEP & TELECOM ACCORDINGLY AS NEEDED.

V/H UNIT SPECIFIC SYMBOL LEGEND

- SD CO/ST/B — SMOKE/CO2 DETECTOR WITH STROBE (HARD-WIRED WITH BATTERY BACK UP)
- S — STROBE ONLY
- DOORBELL STROBE
- FIRE ALARM SPEAKER
- SPK — CEILING MOUNTED SPEAKER
- EXIT SIGNS

RCP NOTES

NOTES:
1. ALL LIGHT FIXTURES ARE DIMENSIONED TO CENTER LINE, UON
2. DIMENSIONS SHOWN IN INDIVIDUAL BATHROOM AND KITCHEN TYPES ARE TYPICAL
3. LIGHT FIXTURE L03 (BATHROOM VANITY SCONCE) TO BE COORDINATED WITH MIDDLE OF SINK, UON. PLEASE SEE BATHROOM ELEVATIONS A610 FOR MORE INFORMATION
4. LIGHT FIXTURE L-11 (SHOWER / TUB) TO BE ALWAYS IN THE MIDDLE OF SHOWER AND TUB ALCOVE
5. LIGHT FIXTURE L-05 (WALK-IN CLOSET) TO BE MIDDLE TO DOOR UON
6. LIGHT FIXTURE L08A (UNIT ENTRANCE) TO BE 6" OFF OF DOOR, UON. PLEASE SEE CORRIDOR ELEVATIONS A-644 FOR MORE INFORMATION
7. FOR LIGHTING SYMBOL LEGEND, SEE LIGHTING SCHEDULES
8. HARDWIRED SMOKE/CARBON MONOXIDE DETECTORS SHALL COMPLY WITH RS17-13 AND INSTALLED IN ACCORDANCE WITH RS17-14. IT SHALL BE LOCATED IN EVERY DWELLING UNIT WITHIN FIFTEEN FEET OF THE PRIMARY ENTRANCE OF EACH ROOM.

SYMBOL LEGEND

- SMOKE/CO2 DETECTOR (HARD-WIRED)
- CEILING TOILET EXHAUST VENT FOR LOCATION COORDINATION ONLY- REFER TO MECHANICAL DRAWINGS
- CEILING DIFFUSER FOR LOCATION COORDINATION ONLY- REFER TO MECHANICAL DRAWINGS
- LINEAR CEILING DIFFUSER FOR LOCATION COORDINATION ONLY- REFER TO MECHANICAL DRAWINGS
- VERTICAL COVE DIFFUSER FOR LOCATION COORDINATION ONLY- REFER TO MECHANICAL DRAWINGS
- WALL MOUNTED SPRINKLER HEAD FOR LOCATION COORDINATION ONLY - REFER TO FP PLANS
- PENDANT & UPRIGHT SPRINKLER HEADS FOR LOCATION COORDINATION ONLY - REFER TO FP PLANS
- ACCESS DOOR TO BE COORDINATED WITH MEP & TELECOM ACCORDINGLY AS NEEDED.

V/H UNIT SPECIFIC SYMBOL LEGEND

- SMOKE/CO2 DETECTOR WITH STROBE (HARD-WIRED WITH BATTERY BACK UP)
- STROBE ONLY
- DOORBELL STROBE
- FIRE ALARM SPEAKER
- CEILING MOUNTED SPEAKER
- EXIT SIGNS

FINISH CEILING LEGEND

- PAINTED GWB AT 7'-0" ABOVE FINISHED FLOOR
- PAINTED GWB AT 7'-11" ABOVE FINISHED FLOOR
- PAINTED GWB AT 8'-0" ABOVE FINISHED FLOOR
- PAINTED GWB AT 8'-6" ABOVE FINISHED FLOOR
- PAINTED GWB AT 8'-11" ABOVE FINISHED FLOOR
- PAINTED GWB AT 9'-0" ABOVE FINISHED FLOOR
- PAINTED GWB AT 10'-0" ABOVE FINISHED FLOOR
- PAINTED GWB AT 10'-6" ABOVE FINISHED FLOOR
- PAINTED GWB AT 11'-0" ABOVE FINISHED FLOOR
- PAINTED GWB AT 11'-6" ABOVE FINISHED FLOOR
- PAINTED GWB AT 12'-0" ABOVE FINISHED FLOOR
- PAINTED GWB AT 13'-0" ABOVE FINISHED FLOOR
- PAINTED GWB AT 14'-0" ABOVE FINISHED FLOOR
- PAINTED CONCRETE WITH VYNIL-BASED SKIM COAT PRIMER
- ACOUSTICAL CEILING TILES AT 9'-0" **(UON)** ABOVE FINISHED FLOOR
- 4" GLASS FIBER SPRAY INSULATION AT SLAB UNDERSIDE

RESIDENTIAL LIGHTING LEGEND

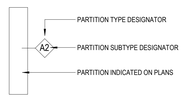
A3	4 7/8"	3 5/8"	0 hr	N/A	Yes	47	20EQ	1' - 4"	WITHIN APARTMENTS, BETWEEN ROOM
A4	5 1/4"	4"	0 hr	N/A	Yes	47	20EQ	1' - 4"	WITHIN APTS., FOR TELCOM/ ELEC PANELS

PARTITION TYPE SYMBOL:



GENERAL NOTES:

1. SEE SPECIFICATIONS FOR MORE INFORMATION, REGARDLESS OF PARTITION TYPE
2. REFER TO FLOOR PLANS FOR PARTITION TYPE LOCATIONS
3. REFER TO WALL SECTIONS FOR EXTERIOR WALL CONSTRUCTION
4. REFER TO MASTER FINISH SCHEDULE FOR FLOOR, WALL BASE, WALL, AND CEILING FINISHES
5. REFER TO REFLECTED CEILING PLANS FOR THE CEILING TYPE AND HEIGHT
6. ALL PARTITIONS ARE DIMENSIONED TO THE FINISHED FACES OF WALLS. ALL PARTITION THICKNESSES SHOWN ARE ACTUAL DIMENSIONS
7. ALL DOOR OPENINGS ARE TO BE 2" FROM THE ADJACENT WALL U.O.N. COORDINATE WITH DOOR SCHEDULE ACCORDINGLY
8. COLUMN COVERS (OR OTHER ENCLOSURES) SHOULD INCLUDE METAL STUDS AND TWO LAYERS OF 5/8" GYPSUM BOARD SEALED TO EXTERIOR WITH NON-HARDENING ACOUSTICAL CAULK
9. WHERE APPLICABLE, SLOTTED STEEL DEFLECTION TRACKS SHALL BE 3", 20 GAUGE, AND SECURED TO UNDERSIDE OF METAL DECK, U.O.N.
10. WHERE APPLICABLE, DO NOT FASTEN GYPSUM BOARD TO DEFLECTION TRACK
11. WHERE APPLICABLE, STUDS SHALL BE HOLD AT 1" BELOW DEFLECTION TRACK, AND SECURED TO IT WITH VERTICALLY SLOTTED CONNECTION AT MID POINT OF SLOTTED OPENING

ABOUT ALL GYPSUM WALLBOARD PARTITIONS:

1. ALL GYPSUM WALLBOARD IS 5/8" U.O.N.
2. PROVIDE MOLD RESISTANT BOARDS FOR ALL GYPSUM WALL BOARDS
3. STEEL TRACKS SHALL BE 20 GAUGE, FASTENED AT 24" OC MAX, U.O.N.
4. STEEL STUDS SHALL BE 20 GAUGE, 16" OC, U.O.N. (12" O.C. AT KITCHENS/BATHROOMS, AND WHEN THE STUD SPANS MORE THAN 11' U.O.N.) REFER TO SPECIFICATIONS FOR ADDITIONAL VERTICAL PARTITION SPAN CRITERIA AND METAL STUD GAUGES
5. STEEL C-H STUDS SHALL BE FASTEN AT 24" OC MAX, U.O.N., AND/OR AS SPECIFIED PER UL DESIGN NO.
6. PROVIDE 3/4" PTD. FIRE RETARDANT PLYWOOD AT ALL ELECTRICAL PANELS & DATA/ TELECOM CLOSET LOCATIONS AND AT LOCATIONS REQUIRING SUCH RELATED TO INTERIOR FINISH FLAME SPREAD AND SMOKE DEVELOPMENT CLASS A, B, C
7. PROVIDE ADEQUATE BACKUP AND BLOCKING FOR ALL WALL OR CEILING MOUNTED EQUIPMENT (ARCHITECTURAL WOODWORK, HANDRAILS, GUARDRAILS, GRAB BARS, LIGHTING OR OTHER MISCELLANEOUS ITEMS.) REFER TO FURNITURE PLANS, INTERIOR ELEVATIONS, AND ARCHITECTURAL CASEWORK DETAILS AS SHOWN ON DRAWINGS TO ASSURE A SECURE INSTALLATION
8. SEE SPECIFICATION SECTION 09 21 16 " GYPSUM BOARD ASSEMBLIES" FOR ADDITIONAL REQUIREMENTS REGARDING GYPSUM PARTITION AND SHAFT WALL CONSTRUCTION

ABOUT PARTITIONS AT HIGH IMPACT AREAS:

1. PROVIDE 5/8" HIGH IMPACT GYPSUM WALL BOARD WITH A TESTED RATING OF ASTM C 1629-06 AND IMPACT CLASSIFICATION LEVEL 2 IN PLACE OF STANDARD GRADE GYPSUM WALL BOARD
- ON THE FACE LAYER OF ALL PARTITIONS AND SOFFITS WITHIN EGRESS STAIRS
- ON THE FIRST LAYER ATTACHED TO STUD AT CORRIDOR/APARTMENT SIDE OF STAIR
2. ALL STUDS SHALL BE A MINIMUM OF 3-1/2" DEEP WITH A 20 GAUGE THICKNESS AND VERTICAL STUDS SHALL BE SPACED AT A MAXIMUM 24" ON CENTER
3. JOINTS BETWEEN ADJOINING SHEETS OF WALL BOARD SHALL BE STAGGERED FROM BASE LAYER WITH FACE PANEL LAYER

ABOUT PARTITIONS AT WET AREAS:

1. PROVIDE 5/8" MOISTURE RESISTANT GYPSUM WALL BOARD IN PLACE OF STANDARD GRADE GYPSUM WALL BOARD ON THE FACE LAYER OF ALL PARTITIONS AND SOFFITS WITHIN BATHROOMS
2. PROVIDE CEMENTITIOUS WALL BOARD IN PLACE OF MOISTURE RESISTANT GYPSUM WALL BOARD
- ON THE FACE LAYER OF PARTITIONS AND SOFFITS SURROUNDING BATHTUBS AND SHOWERS
- AT ALL THE AREAS SURROUNDING POOLS
3. IN ALL OTHER ROOMS OR SPACES CONTAINING SINKS OR OTHER PLUMBING FIXTURES, INSTALL MOISTURE RESISTANT GYPSUM WALLBOARD ON THE WET WALL AND RETURN ON THE SIDEWALLS 4'-0"

ABOUT FIRE RATED PARTITIONS:

1. REFER TO LIFE SAFETY DRAWINGS FOR LOCATIONS AND EXTENTS OF FIRE RATED PARTITIONS AND SMOKE PARTITIONS
2. PROVIDE FIRE CODE "X" GYPSUM WALL BOARDS WHERE A FIRE RATED ASSEMBLY IS REQUIRED
3. METAL STUDS MAY BE HEAVIER GAUGE OR LARGER DIMENSION THAN LISTED AND MAY BE SPACED MORE CLOSELY FOR INDICATED RATING, CM TO PROVIDE INFO FOR PROPOSED MODIFICATIONS ACCORDINGLY
4. THICKNESS OF GYPSUM WALLBOARD MAY BE INCREASED FOR THE INDICATED RATING, CM TO PROVIDE INFO FOR PROPOSED MODIFICATIONS ACCORDINGLY
5. OBTAIN AND FULLY CONFORM TO DESIGN REQUIREMENTS FOR EACH PARTITION ASSEMBLY OF UNDERWRITERS LABORATORIES, INC.
6. WHERE REQUIRED, MATERIALS SHALL BEAR THE CLASSIFICATION MAKINGS AND APPROVALS OF THE UNDERWRITERS LABORATORIES, INC.
7. METALLIC OUTLET OR SWITCH BOXES LOCATED ON OPPOSITE SIDES OF WALLS OR PARTITIONS SHALL BE SEPARATED BY A MINIMUM HORIZONTAL DISTANCE OF 24 INCHES, (U.L. INC).
8. AT INTERSECTIONS OF RATED WALL AND NON-RATED PARTITIONS, THE RATED PARTITION MUST BE CONTINUOUS TO MAINTAIN THE RATING
9. AT METAL DECKS, PARTITION HEAD MUST CONFORM TO UL#WW-D-0107
10. FIRE SAFE OPENINGS FORMED AT UNDERSIDE OF FLUTED DECK AS REQUIRED AT ALL FIRE RATED PARTITIONS
11. FIRESTOP SHALL BE USED AT FIRE RATED PARTITIONS. RECESSED BOXES SHALL BE SEALED AND RUNNERS SHALL BE SET IN 2 BEADS OF SEALANT OR AS REQUIRED BY MANUFACTURER

ABOUT SOUND ATTENUATED PARTITIONS:

1. THE 2014 NYC DOB CODE REQUIRES A MINIMUM STC 50 AND IIC 50 RATING FOR WALLS, PARTITIONS, AND FLOOR/CEILING ASSEMBLIES WHICH SEPARATE:
- ADJACENT DWELLING UNITS
- DWELLING UNITS AND PUBLIC OR SERVICE AREAS (CORRIDORS, LAUNDRY ROOMS, REFUSE ROOMS, STAIRS, ELEVATORS, AMONG OTHERS)
- DWELLING UNITS AND STAIRS
- DWELLING UNITS AND MECHANICAL EQUIPMENT SPACES
2. STC-RATED PARTITION CONSTRUCTION SHALL HAVE ALL PENETRATIONS AND INTERSECTIONS SEALED AIRTIGHT WITH ACOUSTICAL SEALANT
3. WALL TYPE D: AT PIPE CHASES, BRACE PIPING TO STUD SIDE WHICH PIPING SERVES, TYP.
4. WALL TYPE D: MINIMIZE CROSS-BRACING BETWEEN STUD ROWS

ABOUT CMU PARTITIONS:

1. SEE SPECIFICATION SECTION 04 20 00 " UNIT MASONRY ASSEMBLIES" FOR ADDITIONAL UNIT MASONRY REQUIREMENTS, INCLUDING REQUIRED JOINT REINFORCEMENT.
2. WALLS AND PARTITIONS INDICATED ON THE STRUCTURAL DWGS ARE LOAD BEARING AND STRUCTURAL U.O.N. FOLLOW ADDITIONAL DETAILS AND NOTES AS MAY BE INDICATED ON STRUCTURAL DWGS FOR SUCH LOAD BEARING WALLS AND PARTITIONS
3. 6" CMU FILL 100% SOLID AT REFUSE CHUTE ENCLOSURE

E TYPE KP-1 - KITCHEN PLAN
SCALE: 1/2" = 1'-0"

1. CARRY FLOOR, CABINET & WALL FINISHES UNDER, BEHIND AND BOTTOM OF REMOVABLE CABINETS.
2. OUTLET LOCATIONS AND HEIGHTS AFF TO BE COORDINATED WITH INTERIOR DESIGNER.
3. KITCHEN CABINET LAYOUTS TO BE COORDINATED WITH INTERIOR DESIGNER.
4. PROVIDE REINFORCING AT WALL MOUNTED SHELVES, INCLUDING FOR FUTURE INSTALLATION OF SHELF
5. SIDES OF CABINETS EXPOSED DUE TO REMOVABLE BASE CABINETS ARE TO BE FINISHED, TYP.
6. AT ISLANDS - KNEE WALL SIDE RETURN TO BE GYPSUM BOARD FINISH, PAINTED TO MATCH FRONT OF THE ISLAND. TYP FOR ALL ISLANDS WITH KNEE WALL RETURNING TO THE SHORT SIDE. SEE A-611 FOR DETAILS.
7. PROVIDE ONE USB OUTLET IN KITCHEN/BACKSPLASH WALL - TO BE ON THE SIDE CLOSEST TO LIVING AREAS, TYP. WHEN THE KITCHEN HAS AN ISLAND, USB OUTLET PREFERRED LOCATION IS ON SIDE CLOSEST TO LIVING ROOM (NOT UNDER OVERHANG). IF OVERHANG IS ON THAT SIDE, USB TO BE ON OPPOSITE SIDE, OR KITCHEN WALL
8. ALL AFFORDABLE UNIT KITCHENS TO HAVE 4" BACKSPLASH WITH SAME MATERIAL AS COUNTERTOP, TYP.
9. SEE SCHEDULE FOR FINISHES
10. ALL KITCHENETTES TO PROVIDE MECHANICAL VENTILATION AS PER 2014 NYC BC, SECTION 1203.4.1.4 AND MECHANICAL CODE SECTION 403. SEE MECHANICAL DRAWINGS
11. ALL KITCHEN TO TO PROVIDE MECHANICAL VENTILATION AS PER SECTION 7.1 OF ENTERPRISE GREEN COMMUNITIES AND MECHANICAL CODE SECTION 403. SEE MECHANICAL DRAWINGS

GENERAL BATHROOM NOTES:

1. ALL BATHROOMS TO PROVIDE MECHANICAL VENTILATION AS PER 2022 NYC BC, SECTION 1203.4.1.4 AND MECHANICAL CODE SECTION 403. SEE MECHANICAL DRAWINGS NOTES.
2. 20 G.A. MTL. FOR FUTURE GRAB BARS, GROUND SECURED TO MULTIPLE STUDS.
3. TOILET FLUSH CONTROLS SHALL COMPLY WITH SECTION 309. HAND OPERATED FLUSH CONTROLS SHALL BE LOCATED ON THE OPEN SIDE OF THE WATER CLOSET.
4. 28.2-P102.8.3.1 FIXED SIDE WALL GRAB BARS. FIXED SIDE WALL GRAB BARS SHALL BE 42 INCHES (1067 MM) MINIMUM IN LENGTH, LOCATED 12 INCHES (305 MM) MAXIMUM FROM THE REAR WALL AND EXTENDING 54 INCHES (1372 MM) MINIMUM FROM THE REAR WALL. IN ADDITION, A VERTICAL GRAB BAR 18 INCHES (457 MM) MINIMUM IN LENGTH SHALL BE MOUNTED WITH THE BOTTOM OF THE BAR LOCATED BETWEEN 39 INCHES (991 MM) AND 41 INCHES (1041 MM) ABOVE THE FLOOR, AND WITH THE CENTER OF THE BAR LOCATED AT 30 INCHES (762 MM) FROM THE REAR WALL.

   EXCEPTION: WHERE A SIDE WALL IS NOT AVAILABLE FOR A 42-INCH (1067 MM) GRAB BAR, THE SIDEWALL GRAB BAR SHALL BE PERMITTED TO BE 24 INCHES (610 MM) MINIMUM IN LENGTH, LOCATED 12 INCHES (305 MM) MAXIMUM FROM THE REAR WALL.
5. 28.2-P102.3 DOORS. DOORS SHALL COMPLY WITH SECTION 28.2-1107.2.1. DOORS SHALL NOT SWING INTO THE CLEAR FLOOR OR GROUND SPACE OR CLEARANCE FOR ANY FIXTURE.

   EXCEPTION: DOORS MAY SWING INTO THE CLEAR FLOOR OR GROUND SPACE OR CLEARANCES FOR FIXTURES WHERE A CLEAR FLOOR OR GROUND SPACE COMPLYING WITH SECTION 305.3 OF ICC A117.1 IS PROVIDED WITHIN THE ROOM, BEYOND THE ARC OF THE DOOR SWING.
6. 28.2-P102.4 KNEE AND TOE CLEARANCE. CLEAR FLOOR SPACE AT FIXTURES SHALL BE PERMITTED TO INCLUDE KNEE AND TOE CLEARANCES COMPLYING WITH SECTION 306 OF ICC A117.1.
7. 28.2-P102.5 OVERLAP. CLEAR FLOOR OR GROUND SPACES AND CLEARANCES ARE PERMITTED TO OVERLAP.

THESE NOTES APPLY TO ALL BATHROOMS IN RESIDENTIAL UNITS AND AMENITIES:

- REFER TO MEP CONSULTANT FOR ALL MECHANICAL / ELECTRICAL LOCATIONS, EQUIPMENT, WIRING DIAGRAMS & ZONING INFORMATION, ETC.
- REFER TO LIGHTING CONSULTANT SCHEDULE FOR LIGHTING SPECS. GC TO PROVIDE SUPPORT FOR SUSPENDED LIGHT FIXTURES AS REQUIRED. LIGHTING CONSULTANT TO PROVIDE ALL LIGHT FIXTURE WEIGHTS WHERE CEILING SUPPORT IS REQUIRED.
- REFER TO MASTER FFE SCHEDULE FOR SPECIFICATIONS

NEW YORK CITY CODE NOTES

BUILDING AND SCOPE OF WORK SUMMARY:

ADDRESS:	350 GRAND CONCOURSE BRONX, NY 10451
BOROUGH:	BRONX
BLOCK:	2530
LOT:	28
ZONING MAP NO.:	6A
ZONING DISTRICT:	C6-2A (R9A EQUIVALENT)
COMMUNITY DISTRICT:	BRONX CB1
NUMBER OF STORIES:	13 STORIES + ROOF AND ROOF BULKHEAD
BUILDING HEIGHT:	180'-0"
BC302 USE AND OCCUPANCY CLASSIFICATION:	RESIDENTIAL, MERCHANTILE
BC602 CONSTRUCTION CLASS:	TYPE 1B NON COMBUSTIBLE

SCOPE OF WORK:
STRUCTURAL WORK PROPOSED FOR NEW BUILDING AS SHOWN ON PLANS HEREIN.

STRUCTURAL DRAWINGS ARE IN COMPLIANCE BC CHAPTERS 16, 19, 21, AND 22.

REFER TO ARCHITECTURAL DRAWINGS FOR EXTERIOR WALLS, DESIGN OF NON-LOAD BEARING WALLS AND ANCHORAGES TO COMPLY WITH LOADS GIVEN ON S-002, AND WITH BC104.7.8, BC1015, AND BC CHAPTER 14.

RELATED JOB APPLICATION NUMBERS:

NEW BUILDING (NB):	X01219259-I1
FOUNDATION (FO):	X01219259-S2
STRUCTURAL (ST):	X01219259-S3
SUPPORT OF EXCAVATION (SE):	X01219259-S1
MECHANICAL SYSTEMS (MS):	X01219259-S4
PLUMBING (PL):	X01219259-S5
STANDPIPE, SPRINKLER (SPSD):	X01219259-S6
TEMPORARY STANDPIPE (TSD):	X01219259-S7
UNDERGROUND PLUMBING (UDS PL):	X01219259-S8

GENERAL NOTES:

1. THE STRUCTURAL DRAWINGS SHALL BE USED IN CONJUNCTION WITH THE ARCHITECTURAL AND MECHANICAL DRAWINGS AND SPECIFICATIONS.

2. THE 2022 EDITION OF THE NEW YORK CITY BUILDING CODE, AND APPLICABLE EDITIONS OF THE FOLLOWING CODES AND STANDARDS SHALL APPLY:

   A. CODE OF STANDARD PRACTICE FOR STEEL BUILDINGS AND BRIDGES - AISC.
   B. ANSI/AISC 360-16 SPECIFICATION FOR STRUCTURAL STEEL BUILDINGS.
   C. BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE - ACI 318.

   IN CASE OF CONFLICT, THE MOST STRINGENT REQUIREMENTS SHALL APPLY.

3. FIELD MEASUREMENTS SHALL BE TAKEN AT THE SITE BY THE CONTRACTOR TO VERIFY AND SUPPLEMENT ALL DIMENSIONS AND ADDITIONS AFFECTED BY EXISTING WORK OR NEW WORK THAT HAS ALREADY BEEN INSTALLED. ANY DISCREPANCIES FROM THE INFORMATION SHOWN ON PLANS SHALL BE REPORTED TO AND COORDINATED WITH THE ARCHITECT.

4. BEFORE COMMENCEMENT OF ANY WORK AND/OR FABRICATION, THE CONTRACTOR SHALL SUBMIT TO THE ARCHITECT FOR HIS APPROVAL CONCRETE MIX DESIGNS FOR EACH TYPE OF CONCRETE TO BE USED, MILL REPORTS FOR STEEL, STRUCTURAL PENETRATIONS AND SHOP DRAWINGS FOR ALL STRUCTURAL TRADES AND OTHER DOCUMENTS AS REQUIRED PER PROJECT SPECIFICATIONS.

5. MEMBERS WITH SIZES INDICATED ON THE DRAWINGS ARE NEW UNLESS OTHERWISE NOTED (U.O.N).

6. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING ALL ROOF, FLOOR AND WALL PENETRATIONS, PATCHING, REPAIRING AND FLASHING AS REQUIRED.

7. ITEMS INDICATED AS "BY OTHERS" DENOTES DELEGATED DESIGN ITEMS TO BE PROVIDED BY THE CONTRACTOR (DESIGNED BY MANUFACTURER'S ENGINEER FOR PREFABRICATED ITEMS OR BY CONTRACTOR'S ENGINEER FOR CUSTOM ITEMS).

8. THE NOTES OF EACH FOLLOWING SECTION SHALL APPLY, EXCEPT AS SPECIFICALLY NOTED OR SHOWN OTHERWISE ON THE BALANCE OF THESE STRUCTURAL DRAWINGS.

CAST-IN-PLACE CONCRETE NOTES:

1. CONCRETE TYPES

   A. NON-STRUCTURAL FILL – 3,000 PSI LIGHTWEIGHT CONCRETE (115 PCF MAX.).
   B. ALL OTHER CONCRETE – 5,000 PSI STONE CONCRETE.
   C. SLABS AT PARKING LEVELS – 5,000 PSI HIGH PERFORMANCE CONCRETE.

2. BAR REINFORCEMENT SHALL CONFORM TO ASTM A615, GRADE 60 UNLESS HIGHER GRADE IS INDICATED ON DRAWINGS.

3. WELDED WIRE FABRIC SHALL CONFORM TO ASTM A1064 WITH A MINIMUM ULTIMATE TENSILE STRENGTH OF 70,000 PSI.

4. CONCRETE SHALL BE CAST MONOLITHICALLY BETWEEN JOINTS SHOWN ON THE STRUCTURAL DRAWINGS. REQUESTS FOR ADDITIONAL CONSTRUCTION JOINTS SHALL BE SUBMITTED TO THE ENGINEER OF RECORD FOR REVIEW AND APPROVAL PRIOR TO CONSTRUCTION. ADDITIONAL CONSTRUCTION JOINTS NOT SHOWN ON DRAWINGS MAY REQUIRE ADDITIONAL REINFORCING AT THE DIRECTION OF THE ENGINEER OF RECORD.

5. REINFORCEMENT MARKED "CONT." (CONTINUOUS) SHALL BE LAPPED A PROPER DISTANCE AT SPLICES AND CORNERS AND SHALL BE HOOKED OR EXTENDED A PROPER DISTANCE AT NON-CONTINUOUS ENDS AS PER SPLICE AND DEVELOPMENT LENGTH REQUIREMENTS SHOWN ON THE DRAWINGS. ALL HORIZONTAL WALL REINFORCING SHALL BE CONTINUOS.

6. REINFORCEMENT SHALL BE CONTINUOS THROUGH ALL CONSTRUCTION JOINTS. THE CONTRACTOR SHALL LOCATE CONSTRUCTION JOINTS AT POINTS OF MINIMUM SHEAR.

7. SPLICES FOR ALL REINFORCEMENT IN SHEAR WALLS SHALL BE TENSION SPLICES.

8. REINFORCING BARS SHALL HAVE THE FOLLOWING CONCRETE PROTECTION:

CONCRETE CAST AGAINST EARTH	- 3"
EXPOSED TO EARTH OR WEATHER	- 2"
SLABS NOT EXPOSED	- 3/4", OR 1 BAR DIAMETER FOR #1 BARS OR LARGER
TRANSFER SLABS	- 1-1/2"
WALLS NOT EXPOSED	- 3/4", OR 1" FOR SHEAR WALLS WITH #11 JAMB
SLABS IN PARKING AREAS	- 2" TOP BARS ONLY
BEAMS AND GIRDERS NOT EXPOSED	- 1-1/2" TO STIRRUPS
COLUMNS NOT EXPOSED	- 1-1/2" TO TIES

9. MAXIMUM LENGTH OF CONCRETE POUR (DISTANCE BETWEEN CONSTRUCTION JOINTS) SHALL BE 50 FEET DURING JUNE, JULY, AUGUST AND SEPTEMBER AND 75 FEET DURING THE REST OF THE YEAR. LOCATION OF CONSTRUCTION JOINTS, IF REQUIRED, SHALL BE SUBJECT TO THE APPROVAL OF THE ARCHITECT.

10. THE CONTRACTOR SHALL VERIFY DIMENSIONS AND LOCATIONS OF ALL OPENINGS, PIPE SLEEVES, ANCHOR BOLTS, ETC. AS REQUIRED BY TRADES BEFORE CONCRETE IS POURED.

11. THE CONTRACTOR SHALL PROVIDE SLAB BOLSTERS, HIGH CHAIRS AND ALL ACCESSORIES REQUIRED FOR PROPER PLACEMENT OF REINFORCING BARS AND WIRE MESH AS PER A.C.I. & C.R.S.I. STANDARDS.

12. CONCRETE MAY BE CONVEYED BY PUMPING. PUMPING METHODS SHALL COMPLY WITH REQUIREMENTS ESTABLISHED BY A.C.I. COMMITTEE 304, PLACING CONCRETE PUMPING METHODS.

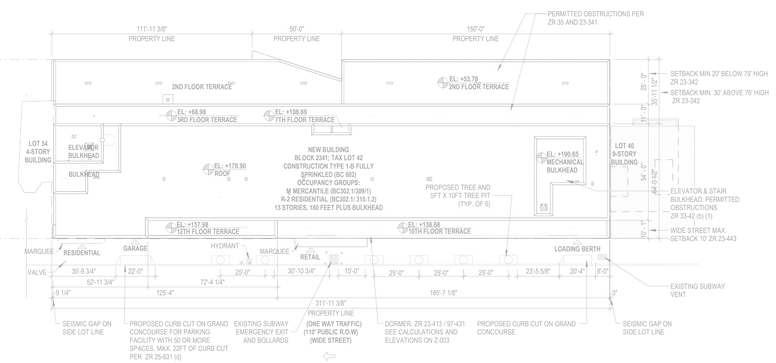
13. PRIOR TO PLACING CONCRETE, ALL REINFORCEMENT SHALL BE FREE OF LOOSE FLAKY RUST, MUD, OIL OR OTHER COATING THAT WILL DESTROY, REDUCE OR HAMPER FULL BOND CAPACITY.

14. THE PLACEMENT OF DOWELS, ANCHOR RODS, OR ANY OTHER EMBEDMENTS INTO WET CONCRETE "WET STICKING", SHALL NOT BE PERMITTED.

15. CONTROL AND EXPANSION JOINTS SHALL BE PROVIDED TO MINIMIZE CRACKING AS PER ARCHITECTURAL AS WELL AS STRUCTURAL REQUIREMENTS AND IN ACCORDANCE WITH STANDARD PRACTICES ACCEPTED IN THE INDUSTRY.

16. THE FOLLOWING CRITERIA SHALL BE MET WITH REGARDS TO PLACEMENT OF CONDUITS, PIPES, ETC. IN CONCRETE SLABS.

   A. ALL CONDUITS SHALL BE CENTERED AT MID-DEPTH OF SLAB. CONDUIT DIAMETER SHALL NOT EXCEED 1/3 OF SLAB THICKNESS. CLEAR DISTANCE BETWEEN TWO ADJACENT CONDUITS SHALL BE A MINIMUM OF 3 DIAMETERS OF LARGER OF THE TWO CONDUITS.
   B. VERTICAL SLEEVES, PIPES, ETC. THROUGH SLAB EITHER CLUSTERED OR INDIVIDUAL, SHALL NOT INTERRUPT MORE THAN 1/8 OF THE WIDTH OF COLUMN STRIP.
   C. NO REINFORCEMENT BARS SHALL BE CUT, BENT, SHIFTED OR OTHERWISE ALTERED AS CONDUITS, PIPES, ETC. AS COMPARED TO WHAT IS SHOWN ON THESE DRAWINGS.
   D. ANY DEVIATIONS FROM ABOVE REQUIREMENTS SHALL BE SHOWN ON THE SHOP DRAWINGS AND SUBMITTED FOR APPROVAL BY THIS OFFICE.



PLOT PLAN
1" = 30'-0"

STRUCTURAL STEEL NOTES:

1. STRUCTURAL STEEL SHALL CONFORM TO THE FOLLOWING:

   A. WIDE FLANGE AND TEE SHAPES - ASTM A992 GRADE 50
   B. CHANNELS, S SHAPES, ANGLES, PLATES AND BARS - ASTM A36
   C. ROUND, SQUARE & RECTANGULAR HSS SHAPES - ASTM A500 GRADE B

2. SHOP CONNECTIONS SHALL BE WELDED OR BOLTED. FIELD CONNECTIONS SHALL BE BOLTED UNLESS SPECIFICALLY SHOWN OTHERWISE ON STRUCTURAL DRAWINGS.

3. ALL BOLTING SHALL CONFORM TO THE RESEARCH COUNCIL ON STRUCTURAL CONNECTIONS "SPECIFICATION FOR STRUCTURAL JOINTS USING ASTM A325 OR A490 BOLTS", LATEST EDITION.

4. BOLTED CONNECTIONS SHALL UTILIZE ASTM A325 OR A490 BOLTS. ALL BOLTS SHALL BE 3/4 INCH DIAMETER MINIMUM. BOLTED SIMPLE SHEAR CONNECTIONS SHALL UTILIZE HIGH STRENGTH BOLTS IN BEARING TYPE CONNECTIONS AND SHALL BE INSTALLED "SNUG TIGHT". BOLTED MOMENT CONNECTIONS, SPLICE CONNECTIONS AND BRACING CONNECTIONS SHALL BE PRETENSIONED JOINTS WITH FULLY PRETENSIONED HIGH-STRENGTH BOLTS IN BEARING. CONNECTIONS WITH OVERSIZE HOLES OR SLOTTED HOLES IN WHICH THE LOAD IS NOT APPLIED NORMAL TO THE LONG DIMENSION OF THE SLOT REQUIRE SLIP CRITICAL BOLTS.

5. ALL WELDING ELECTRODES SHALL BE LOW HYDROGEN, AS REQUIRED BY AWS "STRUCTURAL WELDING CODE" AND "CODE FOR ARC AND GAS WELDING IN BUILDING CONSTRUCTION" TO SATISFY BASE-TO-FILLER METAL COMBINATION CRITERIA. ALL FILLER METAL SHALL HAVE A MINIMUM CVN TOUGHNESS OF 20 FT. LBS. AT MINUS 20 DEGREES F.

6. ALL WELDING SHALL BE DONE BY QUALIFIED WELDERS AND SHALL CONFORM TO THE AWS "CODE FOR ARC AND GAS WELDING IN BUILDING CONSTRUCTION", LATEST EDITION. WELDER CERTIFICATES SHALL BE SUBMITTED TO GACE BEFORE COMMENCEMENT OF WORK.

7. MINIMUM SIZE OF FILLET WELDS SHALL BE 1/4" MIN. FOR FIELD WELDS AND AS REQUIRED PER AISC SPECIFICATION RELATIVE TO BASE METAL THICKNESS FOR SHOP WELDS.

8. ALL DETAILING, FABRICATION AND ERECTION SHALL CONFORM TO AISC "LOAD AND RESISTANCE FACTOR DESIGN SPECIFICATION FOR STRUCTURAL STEEL BUILDINGS" AND AISC "CODE OF STANDARD PRACTICE", LATEST EDITIONS.

9. CONNECTIONS OF ALL BEAMS AND GIRDERS SHALL BE DESIGNED FOR REACTIONS INDICATED ON STRUCTURAL DRAWINGS. ALL OTHER CONNECTIONS SHALL BE DESIGNED FOR THE FULL CAPACITY OF THE MEMBERS.

10. KNIFE CONNECTIONS SHALL NOT BE PERMITTED UNLESS SPECIFICALLY REQUESTED BY A CONTRACTOR AND APPROVED BY STRUCTURAL ENGINEER PRIOR TO SHOP DRAWING APPROVAL. CONTRACTOR'S BIDS SHALL BE SUBMITTED BASED ON THE KNIFE CONNECTIONS NOT ALLOWED. SPECIFIC KNIFE CONNECTION DETAILS SHALL BE SUBMITTED FOR APPROVAL AT THE TIME WHEN TYPICAL DETAILS AND ERECTION PLANS ARE SUBMITTED. THE DETAILS SHALL BE ACCOMPANIED BY CALCULATIONS SIGNED AND SEALED BY PROFESSIONAL ENGINEER LICENSED IN THE STATE WHERE PROJECT IS TO BE BUILT. CALCULATIONS SHALL DEMONSTRATE THAT THE WELDS ARE NOT OVERSTRESSED DUE TO SECONDARY STRESSES DUE TO BOLT TIGHTENING, PRYING ACTION, ETC.

11. INSPECTION AND TESTING OF WELDS AND BOLTS SHALL BE AS FOLLOWS:

   A. A TESTING AGENCY ACCEPTABLE TO THE ENGINEER OF RECORD SHALL BE EMPLOYED BY THE OWNER TO PERFORM ALL SHOP AND FIELD INSPECTIONS AND TESTING OUTLINED BELOW.
   B. ALL WORK SHALL BE SCHEDULED BY THE CONTRACTOR TO ALLOW THE BELOW SHOP AND FIELD TESTING TO BE COMPLETED:
   C. ALL WELDS SHALL BE VISUALLY INSPECTED. FIFTEEN (15) PERCENT OF RANDOMLY SELECTED FILLET, PLUG AND SLOT WELDS SHALL BE MEASURED.
   D. FIFTEEN (15) PERCENT OF RANDOMLY SELECTED FILLET WELDS IN BEAM AND GIRDER SHEAR CONNECTION PLATES, ANGLES, ETC. SHALL BE CHECKED BY MAGNETIC PARTICLE METHOD. ONLY THE FINAL PASS SHALL BE CHECKED.
   E. ULTRASONICALLY TEST 100 PERCENT OF ALL FULL AND PARTIAL PENETRATION WELDS. WELD PREPARATION OF 100 PERCENT OF WELDS SHALL BE INSPECTED.
   F. ALL BOLTS SHALL BE VISUALLY INSPECTED.
   G. ALL SLIP CRITICAL BOLTS SHALL BE CHECKED FOR PROPER TENSIONING USING THE "DIRECT TENSION INDICATOR" METHOD. MEASURE WITH FEELER GAGES AT LEAST 15% OF BOLTS IN EACH CONNECTION, BUT NOT LESS THAN TWO BOLTS PER CONNECTION.
   H. A MINIMUM OF 15 PERCENT OF BOLTS, BUT NOT LESS THAN TWO BOLTS IN EACH BEARING TYPE CONNECTION SHALL BE CHECKED FOR PROPER TENSIONING USING THE CALIBRATED TORQUE WRENCH METHOD.
   I. IN CASE MULTIPLE DEFECTS HAVE BEEN DETECTED, THE ABOVE EXTENT OF INSPECTION SHALL BE INCREASED AT DISCRETION OF STRUCTURAL ENGINEER OF RECORD.

12. SUBMITTALS

   A. SEE "SUBMITTAL NOTES" FOR GENERAL REQUIREMENTS.
   B. THE CONTRACTOR SHALL SUBMIT TO THE ARCHITECT, FOR REVIEW, ENGINEERED SHOP AND ERECTION DRAWINGS SHOWING SHOP FABRICATION DETAILS FOR EACH PIECE OF STEEL, FIELD ASSEMBLY DETAILS AND ERECTION PLANS FOR ALL STEEL.
   C. SHOP DRAWINGS SHOWING PIECE DETAILS SHALL NOT BE SUBMITTED PRIOR TO APPROVAL OF ERECTION DRAWINGS AND RELATED CONNECTION DETAILS, DIAGRAMS, SCHEDULES, ETC.

13. ALL CONNECTIONS SHALL BE DESIGNED AND DETAILED BY A PROFESSIONAL ENGINEER, REGISTERED IN THE STATE OF NEW YORK, HIRED BY THE CONTRACTOR. IF REQUESTED BY THE ENGINEER OF RECORD, CALCULATIONS SHALL BE SUBMITTED FOR THE ENGINEER OF RECORD'S REFERENCE. ALL REFERENCE CALCULATIONS SHALL BE SIGNED AND SEALED BY THE CONTRACTOR'S ENGINEER.

14. DETAILING SHALL BE PERFORMED USING APPROPRIATE ENGINEERING DESIGN PRINCIPLES AND ACCEPTED INDUSTRY STANDARDS, IN ACCORDANCE WITH THE CONTRACT DOCUMENTS. DETAILER SHALL BE AWARE THAT THE DETAILS AND SECTIONS SHOWN ON THE STRUCTURAL DRAWINGS ARE CONCEPTUAL ONLY AND DO NOT INDICATE THE NUMBER OF BOLTS, WELD SIZES, AND OTHER INFORMATION REQUIRED TO BE SHOWN ON THE SHOP DRAWINGS, UNLESS SPECIFICALLY NOTED.

15. ALL STAIR AND OTHER MISCELLANEOUS STEEL STRUCTURES SHALL BE DESIGNED AND DETAILED BY AN ENGINEER EMPLOYED BY THE CONTRACTOR. DRAWINGS SHALL BEAR THE SEAL AND SIGNATURE OF A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF NEW YORK AND SHALL BE SUBMITTED FOR REVIEW BY STRUCTURAL ENGINEER OF RECORD. CALCULATIONS SHALL BE SUBMITTED FOR REFERENCE.

16. EXISTING STRUCTURAL STEEL SHALL BE REMOVED ONLY WITH ARCHITECTS (OR HIS REPRESENTATIVE) APPROVAL. NO FIELD CUTTING OF STRUCTURAL STEEL MEMBERS FOR THE WORK OF OTHER TRADES OR FOR ANY OTHER REASON SHALL BE PERMITTED UNLESS APPROVED BY THE ARCHITECT OR BY THE ARCHITECT'S REPRESENTATIVE.

17. NO STRUCTURAL STEEL TO RECEIVE FIREPROOFING SHALL BE PAINTED. ALL STEEL SHALL BE CLEANED IN THE FIELD OF ALL RUST, LOOSE MILL SCALE AND OTHER FOREIGN MATERIALS PRIOR TO THE APPLICATION OF FIREPROOFING.

18. ALL STEEL EXPOSED TO WEATHER SHALL BE HOT-DIPPED GALVANIZED. THIS INCLUDES ALL STEEL LINTELS, RELIEVING ANGLES, HANGERS, ETC. DAMAGED / CUT / WELDED GALVANIZATION SHALL BE TOUCHED UP / REPAIRED IN ACCORDANCE WITH ASTM A780 "STANDARD PRACTICE FOR REPAIR OF DAMAGED AND UNCOATED AREAS OF HOT-DIP GALVANIZED COATINGS".

19. ALL BEAMS SHALL BE FABRICATED AND ERECTED WITH NATURAL CAMBER UP.

20. SHEAR STUDS SHALL BE HEADED SHEAR CONNECTORS AS MANUFACTURED AND INSTALLED BY NELSON STUD WELDING. SHEAR STUD INSTALLATION SHALL BE INSPECTED BY AN APPROVED TESTING AGENCY IN OWNER'S DIRECT EMPLOY. THREE (3) BEND TESTS SHALL BE PERFORMED AT THE BEGINNING OF CONSTRUCTION. AFTERWARDS, 20 PERCENT (MINIMUM) OF SHEAR STUDS SHALL BE INSPECTED BY "RING TEST" AND MEASURED. ALL STUD WELDING SHALL BE INSPECTED VISUALLY.

POST INSTALLED ANCHORS

1. ANCHOR CAPACITY SHALL BE BASED ON THE TECHNICAL DATA PUBLISHED BY THE ANCHOR MANUFACTURER OR OTHER METHOD AS APPROVED BY THE STRUCTURAL ENGINEER OF RECORD ("ENGINEER").

2. SUBSTITUTION REQUESTS FOR ALTERNATE PRODUCTS SHALL BE APPROVED IN WRITING BY THE ENGINEER PRIOR TO USE. CONTRACTOR SHALL PROVIDE CALCULATIONS DEMONSTRATING THAT THE SUBSTITUTED PRODUCT IS CAPABLE OF ACHIEVING THE PERFORMANCE VALUES OF THE SPECIFIED PRODUCT. SUBSTITUTIONS SHALL BE EVALUATED BY THEIR HAVING AN INTERNATIONAL CODE COUNCIL EVALUATION SERVICE REPORT (ICC ESR) SHOWING COMPLIANCE WITH THE RELEVANT BUILDING CODE FOR SEISMIC USES, LOAD RESISTANCE, INSTALLATION CATEGORY, AND AVAILABILITY OF COMPREHENSIVE INSTALLATION INSTRUCTIONS. ADHESIVE ANCHOR EVALUATION SHALL CONSIDER EFFECTS OF CREEP, IN-SERVICE TEMPERATURE AND INSTALLATION TEMPERATURE.

3. ANCHORS SHALL BE INSTALLED PER THE MANUFACTURER INSTRUCTIONS INCLUDED IN THE ANCHOR PACKAGING.

4. OVERHEAD ADHESIVE ANCHORS MUST BE INSTALLED USING THE HILTI PROFI SYSTEM OR OTHER MANUFACTURER'S EQUAL OR BETTER SYSTEM, IF APPROVED BY THE ENGINEER IN ADVANCE.

5. ALL POST INSTALLED ANCHORS SHALL BE INSTALLED BY PERSONNEL TRAINED AND CERTIFIED IN THE INSTALLATION OF THE SPECIFIED PRODUCTS AND ACCESSORIES. INSTALLERS SHALL BE CERTIFIED THROUGH THE ACI/CRSI ADHESIVE ANCHOR INSTALLER CERTIFICATION PROGRAM OR EQUIVALENT. INSTALLERS SHALL HAVE PROOF OF CERTIFICATION WITH THEM ON SITE AT THE TIME OF INSTALLATION AND SHALL PRESENT SAID CERTIFICATION TO THE SPECIAL INSPECTOR.

6. ANCHOR CAPACITY IS DEPENDENT UPON SPACING BETWEEN ADJACENT ANCHORS AND PROXIMITY OF ANCHORS TO THE EDGE OF CONCRETE. ANCHORS SHALL BE INSTALLED IN ACCORDANCE WITH SPACING AND EDGE DISTANCES INDICATED ON THE STRUCTURAL DRAWINGS.

7. REINFORCING BARS OR OTHER ELEMENTS EMBEDDED IN THE EXISTING CONCRETE STRUCTURE MAY CONFLICT WITH SPECIFIC ANCHOR LOCATIONS. UNLESS NOTED ON THE DRAWINGS THAT THE BARS, ETC. CAN BE CUT, THE CONTRACTOR SHALL REVIEW THE EXISTING STRUCTURAL DRAWINGS AND SHALL UNDERTAKE TO LOCATE THE POSITION OF THE EMBEDDED BARS, ETC. BY GROUND PENETRATING RADAR (GPR), X-RAY, CHIPPING OR OTHER MEANS.

8. CONTINUOUS SPECIAL INSPECTIONS FOR POST INSTALLED ANCHORS SHALL BE PERFORMED IN ACCORDANCE WITH SECTION 4.4 OF THE INDIVIDUAL INTERNATIONAL CODE COUNCIL- EVALUATION SERVICE (ICC- ES) REPORT FOR THE INDIVIDUAL ANCHOR. THE CONTRACTOR SHALL GIVE THE SPECIAL INSPECTOR SUFFICIENT ADVANCE NOTICE TO ALLOW ENOUGH TIME FOR PROPER INSPECTION OF HOLE PREPARATION, ANCHOR INSTALLATION, TIGHTENING, ETC. ANCHORS INSTALLED WITHOUT INSPECTION AT ALL THESE PHASES SHALL BE REJECTED AND WILL HAVE TO BE REPLACED AT CONTRACTOR'S EXPENSE.

STEEL PAINTING NOTES - EXPOSED STEEL:

1. CLEAN STEEL IN ACCORDANCE WITH SSPC-SP6 COMMERCIAL BLAST CLEANING AND COAT WITH TNEMEC OMNITHANE 530 PRIME TO 2 - 3 MILS DRY FILM THICKNESS (DFT), OR APPROVED EQUAL, WITHIN 4 HOURS OF CLEANING. AFTER ERECTION AND TOUCH UP APPLY A FULL COAT OF TNEMEC N69F HI-BUILD EPOXOLINE II TO 3 - 5 MILS DFT FOR TEMPERATURES DURING APPLICATION / CURING BELOW 50 DEG. F DOWN TO 35 DEG. F, AND TNEMEC SERIES 135 CHEMBUILD TO 5 - 6 MILS DFT FOR TEMPERATURES DURING APPLICATION / CURING ABOVE 50 DEGREE F.

ALLOWANCES:

1. BIDDERS SHALL PROVIDE A SEPARATE PRICE FOR 5 TONS OF ADDITIONAL REINFORCING STEEL (ASTM A615) & 9 CUBIC YARDS OF CONCRETE (F'C = 5000 PSI) TO BE USED ON THE PROJECT AS PER THE DIRECTION OF THE ARCHITECT. THE VALUE OF THE UNEXPENDED BALANCE OF THESE MATERIALS SHALL BE REFUNDED TO THE OWNER.

2. BIDDERS SHALL PROVIDE A SEPARATE PRICE FOR 10 TONS OF ADDITIONAL STRUCTURAL STEEL (ASTM A992-50) TO BE USED ON THE PROJECT AS PER THE DIRECTION OF THE ARCHITECT. THIS STEEL WILL BE ADDED AS NEEDED PRIOR TO OR DURING THE SHOP DRAWING REVIEW PHASE. THE VALUE OF THE UNEXPENDED BALANCE OF THIS STEEL SHALL BE REFUNDED TO THE OWNER.

SPECIAL INSPECTION NOTES:

1. SPECIAL INSPECTION ITEMS REQUIRED BY NYC BUILDING CODE RELATED TO STRUCTURAL WORK SHOWN ON GACE DRAWINGS.

   A. STRUCTURAL STEEL – WELDING
   B. STRUCTURAL STEEL – DETAILS
   C. STRUCTURAL STEEL – HIGH STRENGTH BOLTING
   D. CONCRETE – CAST-IN-PLACE
   E. CONCRETE SAMPLING AND TESTING
   F. CONCRETE DESIGN MIX
   G. POST-INSTALLED ANCHORS (BB# 2014-018, 2014-019, 2015-027, 2016-005)
   H. FINAL (PROGRESS INSPECTION)

THE CONTRACTOR IS OBLIGATED TO NOTIFY THE INSPECTOR AT LEAST 72 HOURS BEFORE INSTALLATION OF SUCH ITEMS SO THAT PROPER INSPECTION CAN BE MADE. IN NO CASE SHALL SUCH ITEMS BE INSTALLED OR CONSTRUCTED WITHOUT COMPLETE APPROVAL OF THE INSPECTOR. UNAPPROVED INSTALLATION IS SUBJECT TO REMOVAL AND REPLACEMENT AT THE CONTRACTOR'S SOLE EXPENSE.

ALL SPECIAL INSPECTIONS SHALL BE PERFORMED BASED ON APPROVED SHOP DRAWINGS. INSPECTIONS PERFORMED BASED ON UNAPPROVED DRAWINGS SHALL BE CONSIDERED INVALID AND SHALL BE REJECTED.

BIDDER'S WARRANTY:

BY THE ACT OF SUBMITTING A BID FOR THE PROPOSED CONTRACT, THE BIDDER WARRANTS THAT:

1. THE BIDDER AND ALL SUBCONTRACTORS HE INTENDS TO USE HAVE CAREFULLY AND THOROUGHLY REVIEWED THE DRAWINGS, SPECIFICATIONS AND OTHER CONSTRUCTION CONTRACT DOCUMENTS AND HAVE FOUND THEM COMPLETE AND FREE FROM AMBIGUITIES AND SUFFICIENT FOR THE CONTRACTOR TO BID, FABRICATE, AND INSTALL THE WORK ON TIME, FURTHER THAT,

2. THE BIDDER AND ALL WORKMEN, EMPLOYEES AND SUBCONTRACTORS HE INTENDS TO USE ARE SKILLED AND EXPERIENCED IN THE TYPE OF CONSTRUCTION REPRESENTED BY THE CONSTRUCTION CONTRACT DOCUMENTS BID UPON; FURTHER THAT,

3. NEITHER THE BIDDER NOR ANY OF HIS EMPLOYEES, AGENTS INTENDED SUPPLIERS OR SUBCONTRACTORS HAVE RELIED UPON ANY VERBAL REPRESENTATIONS, ALLEGEDLY AUTHORIZED OR UNAUTHORIZED FROM THE OWNER, HIS EMPLOYEES OR AGENTS INCLUDING ARCHITECTS, ENGINEERS OR CONSULTANTS, IN ASSEMBLING THE BID FIGURE; AND FURTHER THAT, THE BID FIG

	80	37	26

NOTES:

1. THESE DEVELOPMENT AND SPLICE LENGTHS ARE COMPUTED FOR UNCOATED BARS IN ELEMENTS OF NORMAL WEIGHT CONCRETE WITH A MINIMUM CLEAR COVER OF 1 BAR DIAMETER AND A MINIMUM CLEAR SPACING OF 1 BAR DIAMETER IN BEAMS AND COLUMNS, AND 2X THE BAR DIAMETER IN OTHER ELEMENTS.
2. THESE DEVELOPMENT AND SPLICE LENGTHS SHALL BE MULTIPLIED BY ALL OF THE APPLICABLE FACTORS THAT FOLLOW:

EPOXY-COATED REINFORCING (FOR TYP. REINF.) x1.50
EPOXY-COATED REINFORCING (FOR TOP REINF.) x1.31
REINFORCING PLACED IN LIGHTWEIGHT CONCRETE x1.34
#7 BARS AND LARGER WITH CLEAR COVER LESS THAN 1 BAR DIAMETER.....x1.50

3. 'Ls' CAN BE USED AS ACI CLASS A SPLICE. 'Ls' CAN BE USED AS ACI CLASS B SPLICE.
4. USE TOP CONDITION FOR ANY HORIZONTAL BARS WITH MORE THAN 12 INCHES OF FRESH CONCRETE BELOW.
5. WHEN BARS OF DIFFERENT SIZE ARE SPLICED, SPLICE LENGTH SHALL BE THE LARGER OF THE DEVELOPMENT LENGTH OF LARGER BAR AND LAP SPLICE LENGTH OF SMALLER BAR.

STRAIGHT BAR DEVELOPMENT LENGTHS FOR CONCRETE 'Ld' (in.)

F70	7' - 0"	7' - 0"	2' - 0"	6#8
F105/80	10' - 6"	8' - 0"	2' - 4"	7#9
F135	13' - 6"	13' - 6"	3' - 4"	15#10
F150	15' - 0"	15' - 0"	3' - 6"	21#10

NOTES:

1. FOOTINGS SHALL BEAR ON DECOMPOSED ROCK WITH 6TSF BEARING CAPACITY UNLESS OTHERWISE NOTED.
2. * DENOTES FOOTING ON WEATHERED ROCK WITH 8TSF BEARING CAPACITY.

FOUNDATION NOTES:

1. REFER TO S-001 FILING #X01219254-S3 FOR BALANCE OF INFORMATION, INCLUDING BUT NOT LIMITED TO, BUILDING CODE INFORMATION AND MATERIALS.
2. FOUNDATION DESIGN HAS BEEN BASED ON GEOTECHNICAL REPORT PREPARED BY MUESER RUTLEDGE CONSULTING ENGINEERS DATED AUGUST 2025. A COPY OF THIS REPORT SHALL BE AVAILABLE AT THE PROJECT SITE AT ALL TIMES.
3. ALL EARTHWORK, SUBGRADE PREPARATION AND FOUNDATION WORK SHALL BE DONE ACCORDING TO THE GEOTECHNICAL REPORT AND UNDER SUPERVISION OF LICENSED GEOTECHNICAL ENGINEER IN OWNER'S DIRECT EMPLOY.
4. SPREAD FOOTINGS SHALL BEAR ON DECOMPOSED ROCK WITH A MINIMUM BEARING CAPACITY OF 6 TONS PER SQUARE FOOT OR WEATHERED ROCK WITH MINIMUM BEARING CAPACITY OF 8 TONS PER SQUARE FOOT. IF MATERIAL OF THIS CAPACITY IS NOT FOUND AT THE ELEVATIONS INDICATED THE FOOTINGS SHALL BE LOWERED AT THE DIRECTION OF THE LICENSED GEOTECHNICAL ENGINEER IN OWNER'S DIRECT EMPLOY.
5. CAISSON CAPS AS SHOWN ON THE FOUNDATION PLAN SHALL BE SUPPORTED ON 13 3/8" DIAMETER DRILLED CAISSONS (250 TON COMPRESSION CAPACITY, 100 TON TENSION CAPACITY, AND 5 TON LATERAL CAPACITY) AND 4 5/8" DIAMETER DRILLED CAISSONS (200 TON COMPRESSION CAPACITY, 75 TON TENSION CAPACITY, 3 TON LATERAL CAPACITY).
6. A SURVEY OF EACH INSTALLED CAISSON SHALL BE PERFORMED BY A LICENSED SURVEYOR EMPLOYED BY THE CONTRACTOR. THE RESULTS SHALL BE SUBMITTED TO THE ENGINEER BOTH IN TABULATED FORMAT AND ON A DRAWING, AND SHALL BEAR THE SEAL OF A NEW YORK STATE LICENSED SURVEYOR. THE SURVEY SHALL SHOW CAISSON NUMBER, CUT-OFF ELEVATION AS INSTALLED, PLUMBNESS (%), AND DEVIATION FROM PLAN LOCATION IN THE NORTH-SOUTH AND EAST-WEST DIRECTIONS. SURVEYS MAY BE SUBMITTED FOR PARTIAL AREAS AS THE WORK PROGRESSES IN ORDER TO EXPEDITE THE PROGRESS OF CONSTRUCTION. NO FOUNDATION ELEMENTS MAY BE POURED UNTIL THE CAISSON AS-BUILTS ARE APPROVED BY THE ENGINEER.
7. MAKE NO EXCAVATION TO THE FULL DEPTH INDICATED WHEN FREEZING TEMPERATURES MAY BE EXPECTED UNLESS THE FOOTINGS OR SLABS CAN BE PLACED IMMEDIATELY AFTER THE EXCAVATION HAS BEEN COMPLETED. PROTECT THE BOTTOM OF EXCAVATION FROM FROST IF PLACING OF CONCRETE IS DELAYED. SHOULD PROTECTION FAIL, REMOVE FROZEN MATERIALS AND REPLACE WITH CONCRETE OR GRAVEL FILL.
8. WALLS SHALL BE TEMPORARILY BRACED AGAINST EARTH PRESSURE AND OTHER FORCES UNTIL SLABS, BEAMS AND OTHER MEMBERS DESIGNED TO BRACE THE FINISHED STRUCTURE HAVE BEEN IN PLACE AND HAVE ATTAINED REQUIRED CONCRETE ULTIMATE STRENGTH.
9. UNLESS OTHERWISE RECOMMENDED BY THE GEOTECHNICAL ENGINEER'S REPORT, SLABS ON GRADE SHALL BE SUPPORTED BY A COMPACTED POROUS FILL AT LEAST 6 INCHES THICK. AT INTERIOR SLABS A VAPOR BARRIER AT LEAST 15 MILS THICK SHALL BE PLACED BETWEEN THE SLAB AND THE POROUS FILL. THE POROUS FILL SHALL, IN TURN, BE SUPPORTED BY EITHER CLEAN, INORGANIC ORIGINAL SOIL OR A COMPACTED FILL WITH A MODIFIED PROCTOR DENSITY OF 90.

SUPPORT OF EXCAVATION:

1. SUPPORT OF EXCAVATION (SHEETING, SHORING, BRACING ETC.)SHALL BE DESIGNED BY A QUALIFIED PROFESSIONAL ENGINEER EXPERIENCED IN THIS TYPE OF WORK, EMPLOYED BY THE OWNER. THIS ENGINEER, FURTHER REFERRED TO AS THE SUPPORT OF EXCAVATION (SOE) ENGINEER SHALL BE RESPONSIBLE FOR INSPECTION OF THIS WORK AS REQUIRED BY THE PERTINENT BUILDING CODE.
2. THE SOE ENGINEER SHALL SUBMIT SHEETING, SHORING AND BRACING DRAWINGS TO THE ARCHITECT FOR COORDINATION WITH DESIGN DRAWINGS. SUCH DRAWINGS SHALL BE SUBMITTED PRIOR TO FILING OF THE STRUCTURAL DRAWINGS BY THE OFFICE FOR APPROVAL BY DOB.
3. THE SOE ENGINEER SHALL CARRY PROPER PROFESSIONAL AND GENERAL LIABILITY INSURANCE. GACE SHALL BE NAMED AS AN "ADDITIONAL INSURED" ON AND UNDER SOE ENGINEER'S INSURANCE POLICIES FOR GACE'S BENEFIT.
4. SHEETING, SHORING AND BRACING, AS WELL AS OTHER ELEMENTS OF SUPPORT OF EXCAVATION (SOE) SHALL BE SHOWN ON PLANS AND DETAILED BY THE SOE ENGINEER. THE SOE ENGINEER SHALL FILE SUCH PLANS AND OBTAIN APPROVAL FROM THE DEPARTMENT OF BUILDINGS AS PART OF THE FILING FOR THE FOUNDATION PERMIT.

CAST-IN-PLACE CONCRETE NOTES:

1. CONCRETE TYPES
   A. NON-STRUCTURAL FILL - 3000 PSI LIGHTWEIGHT CONCRETE (115 PCF MAX.).
   B. SLABS AT PARKING LEVELS - 8,000PSI HIGH PERFORMANCE CONCRETE
   C. ALL OTHER CONCRETE - 8,000 PSI STONE CONCRETE.
2. BAR REINFORCEMENT SHALL CONFORM TO ASTM A615, GRADE 60 UNLESS HIGHER GRADE IS INDICATED ON DRAWINGS.
3. WELDED WIRE FABRIC SHALL CONFORM TO ASTM A1064 WITH A MINIMUM ULTIMATE TENSILE STRENGTH OF 70,000 PSI.
4. CONCRETE SHALL BE CAST MONOLITHICALLY BETWEEN JOINTS SHOWN ON THE STRUCTURAL DRAWINGS. REQUESTS FOR ADDITIONAL CONSTRUCTION JOINTS SHALL BE SUBMITTED TO THE ENGINEER OF RECORD FOR REVIEW AND APPROVAL PRIOR TO CONSTRUCTION. ADDITIONAL CONSTRUCTION JOINTS NOT SHOWN ON DRAWINGS MAY REQUIRE ADDITIONAL REINFORCING AT THE DIRECTION OF THE ENGINEER OF RECORD.
5. REINFORCEMENT MARKED "CONT." (CONTINUOUS) SHALL BE LAPPED A PROPER DISTANCE AT SPLICES AND CORNERS AND SHALL BE HOOKED OR EXTENDED A PROPER DISTANCE AT NON-CONTINUOUS ENDS AS PER SPLICE AND DEVELOPMENT LENGTH REQUIREMENTS SHOWN ON THE DRAWINGS. ALL HORIZONTAL WALL REINFORING SHALL BE CONTINUOUS.
6. REINFORCEMENT SHALL BE CONTINUOUS THROUGH ALL CONSTRUCTION JOINTS. THE CONTRACTOR SHALL LOCATE CONSTRUCTION JOINTS AT POINTS OF MINIMUM SHEAR.
7. SPLICES FOR ALL REINFORCEMENT IN SHEAR WALLS SHALL BE TENSION SPLICES.
8. REINFORCING BARS SHALL HAVE THE FOLLOWING CONCRETE PROTECTION:
   CONCRETE CAST AGAINST EARTH - 3"
   EXPOSED TO EARTH OR WEATHER - 2"
   SLABS NOT EXPOSED - 3/4", OR 1 BAR DIA. FOR #7 BARS OR LARGER
   WALLS NOT EXPOSED - 3/4", OR 1" FOR SHEAR WALLS WITH #11 JAMB
   BEAMS AND GIRDERS NOT EXPOSED - 1-1/2" TO STIRRUPS
   COLUMNS NOT EXPOSED - 1-1/2" TO TIES
9. MAXIMUM LENGTH OF CONCRETE POUR (DISTANCE BETWEEN CONSTRUCTION JOINTS) SHALL BE 50 FEET DURING JUNE, JULY, AUGUST AND SEPTEMBER AND 75 FEET DURING THE REST OF THE YEAR. LOCATION OF CONSTRUCTION JOINTS, IF REQUIRED, SHALL BE SUBJECT TO THE APPROVAL OF THE ARCHITECT.
10. THE CONTRACTOR SHALL VERIFY DIMENSIONS AND LOCATIONS OF ALL OPENINGS, PIPE SLEEVES, ANCHOR BOLTS, ETC. AS REQUIRED BY TRADES BEFORE CONCRETE IS POURED.
11. THE CONTRACTOR SHALL PROVIDE SLAB BOLSTERS, HIGH CHAIRS AND ALL ACCESSORIES REQUIRED FOR PROPER PLACEMENT OF REINFORCING BARS AND WIRE MESH AS PER A.C.I. & C.R.S.I. STANDARDS.
12. CONCRETE MAY BE CONVEYED BY PUMPING. PUMPING METHODS SHALL COMPLY WITH REQUIREMENTS ESTABLISHED BY A.C.I. COMMITTEE 304, PLACING CONCRETE PUMPING METHODS.
13. PRIOR TO PLACING CONCRETE, ALL REINFORCEMENT SHALL BE FREE OF LOOSE FLAKY RUST, MUD, OIL OR OTHER COATING THAT WILL DESTROY, REDUCE OR HAMPER FULL BOND CAPACITY.
14. THE PLACEMENT OF DOWELS, ANCHOR RODS, OR ANY OTHER EMBEDMENTS INTO WET CONCRETE "WET STICKING", SHALL NOT BE PERMITTED.
15. CONTROL AND EXPANSION JOINTS SHALL BE PROVIDED TO MINIMIZE CRACKING AS PER ARCHITECTURAL AS WELL AS STRUCTURAL REQUIREMENTS AND IN ACCORDANCE WITH STANDARD PRACTICES ACCEPTED IN THE INDUSTRY.
16. THE FOLLOWING CRITERIA SHALL BE MET WITH REGARDS TO PLACEMENT OF CONDUITS, PIPES, ETC. IN CONCRETE SLABS.
   A. ALL CONDUITS SHALL BE CENTERED AT MID-DEPTH OF SLAB. CONDUIT DIAMETER SHALL NOT EXCEED 1/3 OF SLAB THICKNESS. CLEAR DISTANCE BETWEEN TWO ADJACENT CONDUITS SHALL BE A MINIMUM OF 3 DIAMETERS OF LARGER OF THE TWO CONDUITS.
   B. VERTICAL SLEEVES, PIPES, ETC. THROUGH SLAB EITHER CLUSTERED OR INDIVIDUAL, SHALL NOT INTERRUPT MORE THAN 1/3 OF THE WIDTH OF COLUMN STRIP.
   C. NO REINFORCEMENT BARS SHALL BE CUT, BENT, SHIFTED OR OTHERWISE ALTERED AS CONDUITS, PIPES, ETC. AS COMPARED TO WHAT IS SHOWN ON THESE DRAWINGS.
   D. ANY DEVIATIONS FROM ABOVE REQUIREMENTS SHALL BE SHOWN ON THE SHOP DRAWINGS AND SUBMITTED FOR APPROVAL BY THIS OFFICE.

SPECIAL INSPECTION NOTES:

1. SPECIAL INSPECTION ITEMS REQUIRED BY NYC BUILDING CODE RELATED TO FOUNDATION WORK SHOWN ON GACE DRAWINGS. GACE SHALL BE THE DESIGN APPLICANT FOR THESE ITEMS.

A. CONCRETE - CAST-IN-PLACE
B. CONCRETE SAMPLING AND TESTING
C. CONCRETE DESIGN MIX
D. DEEP FOUNDATION ELEMENTS - TR5
E. FOOTING AND FOUNDATION PROGRESS INSPECTION
F. FINAL

THE CONTRACTOR IS OBLIGATED TO NOTIFY THE INSPECTOR AT LEAST 72 HOURS BEFORE INSTALLATION OF SUCH ITEMS SO THAT PROPER INSPECTION CAN BE MADE. IN NO CASE SHALL SUCH ITEMS BE INSTALLED OR CONSTRUCTED WITHOUT COMPLETE APPROVAL OF THE INSPECTOR. UNAPPROVED INSTALLATION IS SUBJECT TO REMOVAL AND REPLACEMENT AT THE CONTRACTOR'S SOLE EXPENSE.

ALL SPECIAL INSPECTIONS SHALL BE PERFORMED BASED ON APPROVED SHOP DRAWINGS. INSPECTIONS PERFORMED BASED ON UNAPPROVED DRAWINGS SHALL BE CONSIDERED INVALID AND SHALL BE REJECTED.

NEW YORK CITY CODE NOTES

SCOPE OF WORK:
FOUNDATION WORK PROPOSED FOR NEW BUILDING AS SHOWN ON PLANS HEREIN.

- FOUNDATION DRAWINGS ARE IN COMPLIANCE WITH BC107.7.1, AND BC CHAPTERS 16, 18, AND 19, INCLUDING BC 1808-1812 FOR DEEP FOUNDATIONS.
- FOUNDATIONS EXTEND BELOW FROST LINE.
- REFER TO S-002 (RELATED FILING #X01219254-S3) FOR LOAD CRITERIA AND SCHEDULES.

RELATED JOB APPLICATION NUMBERS:

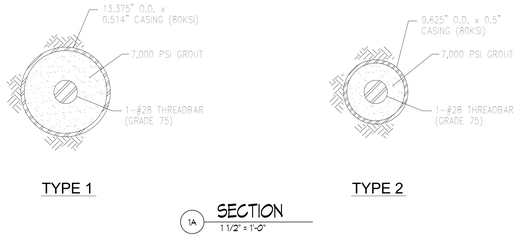
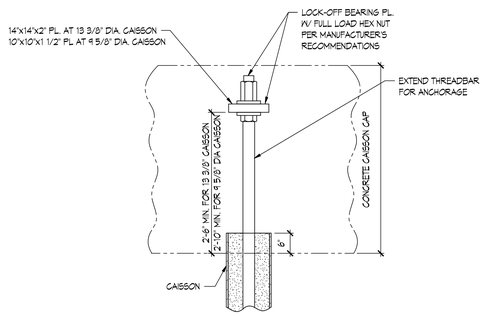
1 TYPICAL CAISSON DETAIL - ELEVATION

N.T.S.





2 TYPICAL CAISSON ANCHORAGE DETAIL

3/4" = 1'-0"

CAISSON GENERAL NOTES:

1. SEE FOUNDATION DRAWINGS FOR CAISSON LAYOUT.
2. PRIOR TO INSTALLATION OF CAISSONS, THE ENGINEER OF RECORD SHALL APPROVE CAISSON SHOP DRAWINGS, NOTES AND PROCEDURES TO CONFIRM DESIGN AND INSTALLATION IMPACTS.
3. ESTIMATED TOP OF ROCK SHOWN IS BASED ON GEOTECHNICAL INFORMATION PREPARED BY MUESER RUTLEDGE CONSULTING ENGINEERS AND IS SHOWN FOR REFERENCE ONLY. ACTUAL TOP OF ROCK TO BE CONFIRMED DURING CAISSON INSTALLATION.
4. CAISSON ALLOWABLE DESIGN LOADS ARE:
   TYPE 1 - 250T COMPRESSION, 100T TENSION AND 5T LATERAL
   TYPE 2 - 200T COMPRESSION, 75T TENSION AND 3T LATERAL
5. STEEL PIPE CASING SHALL BE OF THE MINIMUM SIZE AND YIELD STRENGTH INDICATED ON THE SECTIONS.
6. THREADBARS SHALL BE OF THE SIZE AND GRADE INDICATED ON THE SECTIONS. COUPLINGS SHALL BE STOP-TYPE CAPABLE OF DEVELOPING THE FULL TENSILE CAPACITY OF THE BAR. CENTRALIZERS SHALL BE PROVIDED AT 10'-0" O.C., MAXIMUM.
7. GROUT SHALL HAVE A MINIMUM COMPRESSIVE STRENGTH INDICATED ON THE SECTIONS AT 28 DAYS.
8. CAISSON ROCK SOCKETS SHALL BE OF THE MINIMUM DIAMETER AND LENGTH INDICATED ON THE SECTIONS AND SHALL BE IN NYCBC CLASS 1B ROCK OR BETTER.
9. PRIOR TO CONSTRUCTION OF THE PILE CAP, THE AS-BUILT LOCATION OF THE CAISSONS AT CUT-OFF LEVEL SHALL BE SURVEYED AND SUBMITTED TO THE ENGINEER FOR APPROVAL.
10. GROUT TESTING SHALL BE PERFORMED IN ACCORDANCE WITH SPECIFICATION SECTION 316326.
11. MINIMUM OF (2) LATERAL LOAD TESTS PER CAISSON TYPE IS REQUIRED. SEE SPECIFICATION SECTION 316329 "DRILLED CAISSONS" FOR BALANCE OF INFORMATION.

CAISSON INSTALLATION NOTES:

1. ADVANCE CASING THROUGH THE SOIL OVERBURDEN TO TOP OF SOUND ROCK. REMOVE SOIL FROM WITHIN THE CASING USING INTERNAL FLUSH TECHNIQUES. EXTERNAL FLUSH WILL NOT BE PERMITTED. USE OF FORCED AIR WILL NOT BE PERMITTED EXCEPT IF REQUIRED TO PENETRATE AN OBSTRUCTION. NYCT DOES NOT ALLOW USE OF DOWN-THE-HOLE HAMMERS IN SOIL.
2. FIRMLY SEAT CASING INTO NYCBC CLASS 1B ROCK OR BETTER AS REQUIRED TO PROVIDE A SEAL THAT PREVENTS MIGRATION OF SOIL INTO THE CASING OR ROCK SOCKET.
3. DRILL ROCK SOCKET USING A DOWN-THE-HOLE HAMMER OR A ROTARY CORE DRILL. FORCED AIR MAY BE USED TO REMOVE ROCK CUTTINGS FROM THE SOCKET PROVIDED THE CASING IS PROPERLY SEATED INTO SOUND ROCK SUCH THAT INFILTRATION OF THE SOIL INTO THE CASING DUE TO THE SUCTION CAUSED BY THE FORCED AIR IS PREVENTED. ROCK SOCKET DEPTH SHOWN ON THE CONTRACT DRAWINGS IS ESTIMATED. FINAL SOCKET DEPTH WILL BE MADE IN THE FIELD BY THE OWNER'S ENGINEER ON THE BASIS OF THE VISUAL EXAMINATION OF THE ROCK SOCKET DRILLING AND CUTTINGS.
4. CLEANING - PLACE A TREMIE PIPE TO THE BOTTOM OF THE PILE. INJECT WATER THROUGH THE TREMIE PIPE, FLUSHING OUT SEDIMENTS TRAPPED IN THE ROCK SOCKET AND CASING. CONTINUE PUMPING WATER UNTIL CLEAN WATER IS NOTED RETURNING TO THE TOP OF THE CASING. WITHDRAW THE TREMIE PIPE.
5. PROVIDE VIDEO INSPECTION OF THE SEATING OF CASING ON ROCK AND THE ENTIRE ROCK SOCKET, IN THE PRESENCE OF THE SPECIAL INSPECTOR. THE CONTRACTOR SHALL TREAT THE WATER IN THE SOCKET OR FLUSH THE SOCKET, AS NECESSARY, TO CLARIFY THE WATER SUFFICIENTLY TO ALLOW FOR THE PERFORMANCE OF THE VIDEO INSPECTION. THE SPECIAL INSPECTOR MAY DIRECT RESEATING OF THE CASING OR AN INCREASE IN ROCK SOCKET LENGTH IF UNSUITABLE ROCK IS OBSERVED DURING THE VIDEO INSPECTION.
6. INSTALL THE REBAR IN THE CAISSON WITH COUPLERS AND CENTRALIZERS TO THE FULL DEPTH OF THE HOLE.
7. INSTALL A TREMIE PIPE TO THE BOTTOM OF THE ROCK SOCKET AND FILL THE INSIDE OF THE CASING WITH TREMIE GROUT. CONTINUE PUMPING GROUT UNTIL GOOD GROUT RETURN IS NOTED FROM THE TOP OF THE CASING. MAINTAIN TIP OF TREMIE PIPE MINIMUM 5 FEET BELOW TOP OF GROUT AT ALL TIMES.
8. PERFORM FINAL AS-BUILT SURVEY OF TOP OF CAISSON LOCATION AND VERTICALITY.

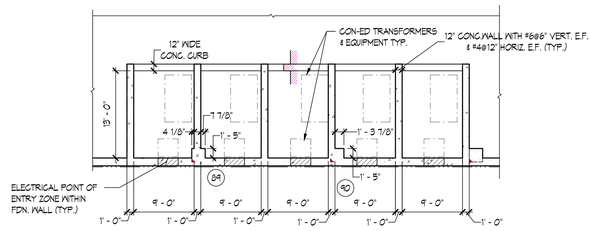
FOUNDATION & CELLAR FRAMING PLAN

1/8" = 1'-0"

NOTES:

1. ALL ELEVATIONS INDICATED WITH RESPECT TO NAVD88 DATUM.
2. [X" CONCRETE SLAB] DENOTES CONCRETE SLAB OF THICKNESS 'X.
3. ALL REINFORCING SHOWN ON PLAN IS TO BE PLACED IN ADDITION TO THE FOLLOWING:
   12" SLAB : TYPICAL #7@12" TOP AND #6@12" BOTTOM REINFORCEMENT EACH WAY CONTINUOUS.
   PLACE EAST-WEST REINFORCEMENT IN THE OUTERMOST LAYER.
4. [EL. XX'-XX"] DENOTES TOP OF SLAB ELEVATION.
5. FXX DENOTES SPREAD FOOTING ON DECOMPOSED ROCK WITH MINIMUM 8 TSF BEARING CAPACITY. FOR FOOTING SIZE & REINFORCEMENT, SEE SCHEDULE ON DRAWING FO-001.
6. *FXX DENOTES SPREAD FOOTING ON WEATHERED ROCK WITH MINIMUM 8 TSF BEARING CAPACITY. FOR FOOTING SIZE & REINFORCEMENT, SEE SCHEDULE ON DRAWING FO-001.
7. [EL. +XX] DENOTES BOTTOM OF FOOTING ELEVATION RELATIVE TO TOP OF NAVD88 DATUM, IF PROPER BEARING MATERIAL IS NOT FOUND AT THE ELEVATION INDICATED, LOWER THE BOTTOM OF FOOTING AS NECESSARY. A [1.5H:1V] INFLUENCE LINE SHALL BE MAINTAINED BETWEEN BOTTOM OF ADJACENT FOOTINGS.
8. M-X DENOTES CONCRETE MAT FOUNDATION BEARING ON DECOMPOSED ROCK WITH MINIMUM 8 TSF BEARING CAPACITY. SEE DETAILS ON DRAWING FO-004 FOR SIZE AND REINFORCEMENT.
9. *M-X DENOTES CONCRETE MAT FOUNDATION BEARING ON WEATHERED ROCK WITH MINIMUM 8 TSF BEARING CAPACITY. SEE DETAILS ON DRAWING FO-004 FOR SIZE AND REINFORCEMENT.
10. FOOTINGS TO BE CENTERED ON COLUMNS ABOVE, UNLESS OTHERWISE NOTED.
11. CC-XX DENOTES CAISSON CAP. FOR CAP SIZE & REINFORCEMENT, SEE DETAILS ON DRAWING FO-003 AND FO-004.
12. [EL. +XX'] DENOTES BOTTOM OF CAP ELEVATION RELATIVE TO NAVD88 DATUM.
13. CAISSON CAPS TO BE CENTERED ON COLUMNS ABOVE, UNLESS OTHERWISE NOTED.
14. FOR GRADE BEAM REINFORCEMENT, SEE SCHEDULE ON FO-001.
15. TOP OF GRADE BEAM TO BE 1'-0" BELOW TOP OF SLAB ELEVATION, UNLESS OTHERWISE NOTED THUS (X'-X').
16. CENTERLINE OF GRADE BEAMS TO ALIGN WITH CENTROID OF FOOTING OR CAISSON CAP & COLUMN, UNLESS OTHERWISE NOTED.
17. FOR COLUMN DIMENSIONS & REINFORCEMENT, SEE COLUMN SCHEDULE ON DRAWING S-301 AND S-302.
18. SW-XX DENOTES CONCRETE SHEAR WALL. SEE DRAWING S-401 AND S-402 FOR BALANCE OF INFORMATION.
19. DENOTES UNDERGROUND PLUMBING. PLUMBING SHALL RUN BELOW CELLAR SLAB AND ABOVE FOUNDATION ELEMENTS. WHERE IT RUNS WITHIN FOUNDATION ELEMENTS, IT SHALL BE LOCATED WITHIN THE MIDDLE THIRD OF THE THICKNESS. COORDINATE WITH PLUMBING DRAWINGS.
20. DENOTES TRENCH DRAIN AT FSA ELEVATOR. SEE DETAIL 6 ON DRAWING S-004.
21. DENOTES STEEL FRAMING. TOP OF BEAM AT TOP OF SLAB UNLESS OTHERWISE NOTED. (H) DENOTES INTERMEDIATE ELEVATOR DIVIDER BEAM ABOVE TOP OF SLAB. SEE ELEVATOR DRAWINGS FOR BRACING REQUIREMENTS.



ELECTRICAL TRANSFORMER VAULT PART PLAN

1/8" = 1'-0"

NOTE:
TRANSFORMER WALLS AND SLABS DESIGNED FOR 600 PSF BLAST LOAD.

TOP BAR PLACEMENT

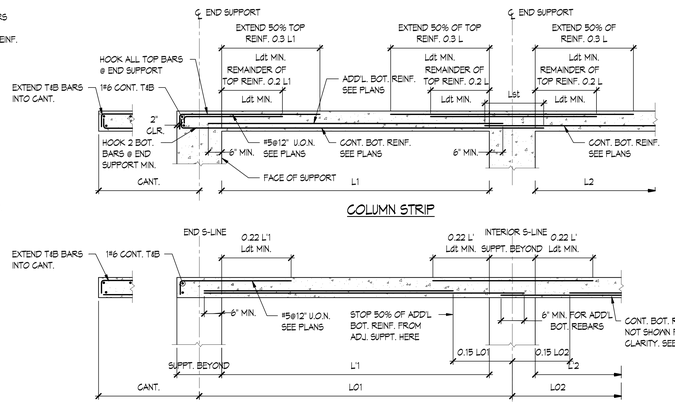
NOTES:
1. REINFORCEMENT SHOWN IS TYPICAL FOR BOTH DIRECTIONS.
2. COLUMN STRIP WIDTH GREATER THAN OR EQUAL TO COLUMN, WALL, OR PILE CAP DIMENSION PERPENDICULAR TO COLUMN STRIP SPAN.
3. 'A' = THE LESSER OF: L1A/4, L1B/4, OR L2A/4
   'B' = THE LESSER OF: L1A/4, L1B/4, OR L2A/4
   'C' = THE LESSER OF: L1A/4, L1B/4, OR L2B/4
   'D' = THE LESSER OF: L1A/4 OR L2A/4
   'E' = THE LESSER OF: L1A/4 OR L2A/4
   'F' = THE LESSER OF: L1A/4 OR L2B/4
4. ——— DENOTES STRESS LINE.

BOTTOM BAR PLACEMENT

NOTES:
1. REINFORCEMENT SHOWN IS TYPICAL FOR BOTH DIRECTIONS.
2. FOR COLUMN STRIP AND MIDDLE STRIP MEASUREMENTS SEE "TYPICAL TOP BAR PLACEMENT FOR FLAT SLAB CONSTRUCTION" DETAIL.
3. COLUMN STRIP WIDTH GREATER THAN OR EQUAL TO COLUMN, WALL, OR PILE CAP DIMENSION PERPENDICULAR TO COLUMN STRIP SPAN.

TYPICAL BAR PLACEMENT FOR FLAT PLATE CONSTRUCTION

1 — 12" = 1'-0"



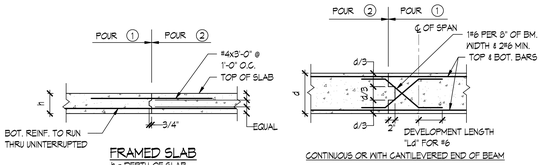
COLUMN STRIP

MIDDLE STRIP

TYPICAL FLAT PLATE REINFORCING PLACEMENT

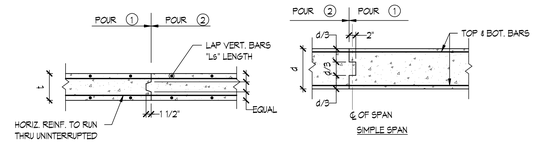
2 — 1/2" = 1'-0"

NOTES:
1. L'1 = THE GREATER OF L1 FOR EITHER OF TWO ADJACENT COLUMN STRIPS.
2. L'2 = THE GREATER OF L2 FOR EITHER OF TWO ADJACENT COLUMN STRIPS.
3. L = THE GREATER OF L1 OR L2.
4. L' = THE GREATER OF L'1 OR L'2.



FRAMED SLAB

h = DEPTH OF SLAB



WALL PLAN VIEW

t = THICKNESS OF WALL

BEAM

d = DEPTH OF BEAM

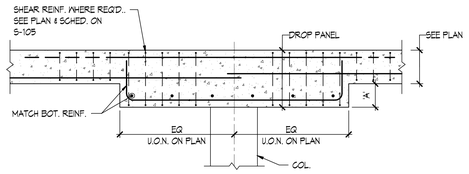
TYPICAL CONSTRUCTION JOINT

3 — 3/4" = 1'-0"

NOTES:
1. CONSTRUCTION JOINTS SHALL NOT BE PERMITTED FOR BEAMS WITH CONCENTRATED LOADS. CONSULT WITH ENGINEER FOR SPECIAL CASES.
2. CONTRACTOR SHALL SUBMIT ALL PROPOSED CONSTRUCTION JOINTS FOR APPROVAL.
3. PROVIDE CONTINUOUS WATERSTOPS IN ALL JOINTS AS REQUIRED BY ARCHITECT.

DROP PANEL SCHEDULE

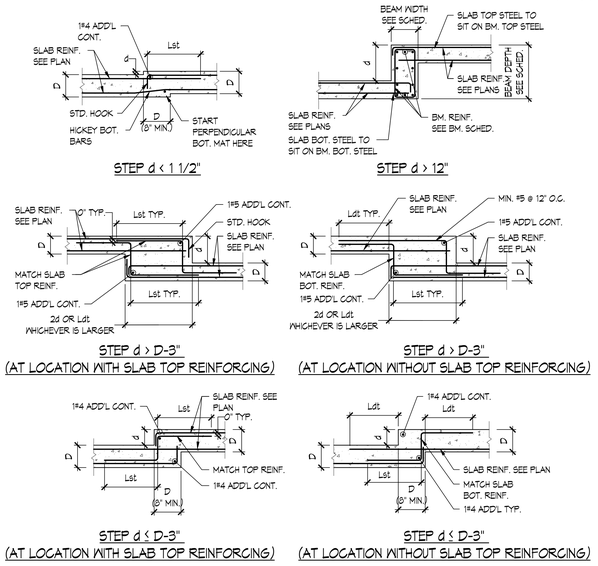
DROP PANEL NO.	DEPTH 'A'	DIMENSIONS
DP-01	12"	10'-4" LONG x 6'-9" WIDE
DP-02	12"	10'-4" SQUARE
DP-03	12"	8'-4" SQUARE
DP-03A	12"	8'-4" SQUARE EXTENDED TO SLAB EDGE
DP-04	12"	7'-0" SQUARE EXTENDED TO SLAB EDGE
DP-05	12"	10'-4" LONG x 6'-2" WIDE



TYPICAL DROP PANEL

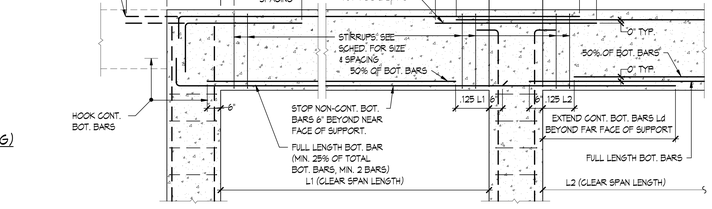
4 — 3/4" = 1'-0"

NOTE:
SEE TYPICAL FLAT PLATE REINFORCING PLACEMENT DETAIL ON S-003 FOR BALANCE OF INFORMATION.



TYPICAL STEPS IN SLAB

5 — 1/2" = 1'-0"



ELEVATION

TYPICAL CONCRETE BEAM

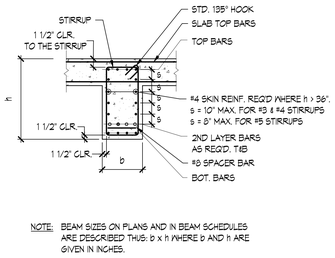
6 — 1/2" = 1'-0"

NOTES:
1. THIS DETAIL REPRESENTS TYPICAL CONDITION ONLY. SEE PLANS AND BEAM SCHEDULE FOR NON-TYPICAL REINFORCING DETAILS.
2. ALL BOTTOM BARS TO BE NON-CONTINUOUS UNLESS SPECIFICALLY DESCRIBED AS CONT. ON PLANS OR IN SCHEDULE.

ABBREVIATIONS:

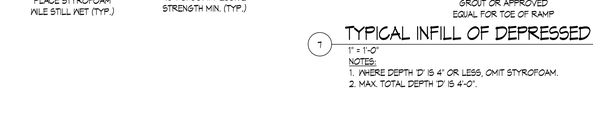
A = .33 L1 OR L2 WHICHEVER IS GREATER BUT MIN. ld

B = .2 L1 OR L2 WHICHEVER IS GREATER BUT MIN. ld



NOTE: BEAM SIZES ON PLANS AND IN BEAM SCHEDULES ARE DESCRIBED THUS: b x h WHERE b AND h ARE GIVEN IN INCHES.

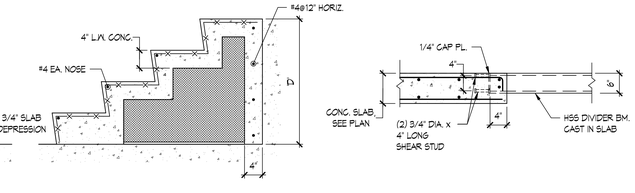
SECTION



TYPICAL INFILL OF DEPRESSED SLAB

7 — 1" = 1'-0"

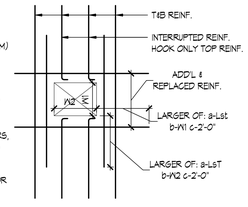
NOTES:
1. WHERE DEPTH 'D' IS 4" OR LESS, OMIT STYROFOAM.
2. MAX. TOTAL DEPTH 'D' IS 4'-0".



ELEVATOR DIVIDER BEAM TO CONCRETE SLAB CONNECTION

8 — 3/4" = 1'-0"

NOTES:
1. IF REINFORCEMENT IS INTERRUPTED (TOP OR BOTTOM) 1/2 THE EQUIVALENT AREA SHALL BE REPLACED ON EACH SIDE OF OPENING. 1#4 MIN. EACH SIDE.
2. IF OPENING IS LOCATED IN AREA OF NO TOP REINFORCEMENT & OPENING IS LARGER THAN 16"x16" PROVIDE 1#4 TOP SIDE OF OPENING.
3. IF OPENING IS SMALLER THAN SPACING OF SLAB BARS, NO ADDITIONAL REINFORCEMENT IS REQUIRED. SLAB BARS TO BE PLACED AT EDGES OF OPENING.
4. IF OPENING IS NEAR OR AGAINST EXTERIOR BEAMS OR COLUMNS & REINFORCEMENT CANNOT BE EXTENED, HOOK ADDITIONAL BARS.



TYPICAL ADDED REINFORCING AT OPENINGS IN CONCRETE SLAB

9 — 1/4" = 1'-0"

NOTE: MINIMUM REQUIREMENTS ARE SHOWN IN THESE DETAILS. SEE PLAN FOR ADDITIONAL REQUIREMENTS.

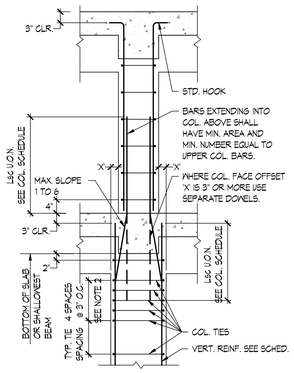
1 TYPICAL TIED COLUMNS

1/2" = 1'-0"

NOTES:

1. TOTAL NUMBER OF BARS SHOULD BE SPACED AROUND PERIMETER IN SUCH A WAY AS TO ACHIEVE APPROXIMATELY EQUAL SPACING.
2. USE THESE DETAILS AT PIERS AND BUTTRESSES.



MAX. SPACING OF COLUMN TIES		
VERTICAL BAR SIZE	SIZE & SPACING OF TIES (INCHES)	
	#3	#4
#5	10"	10"
#6	12"	12"
#7	14"	14"
#8	16"	16"
#9	18"	18"
#10	18"	20"
#11	*	22"

SCHEDULE NOTES:

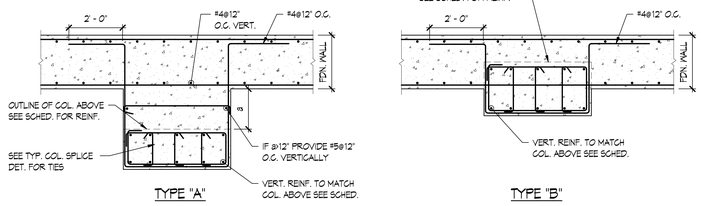
1. MAX. SPACING NOT TO EXCEED LEAST COLUMN DIMENSION.
2. APPLIES ALSO TO PIERS AND BUTTRESSES.
3. * INDICATES "NOT ALLOWED"

2 TYPICAL COLUMN SPLICE

3/4" = 1'-0"

NOTES:

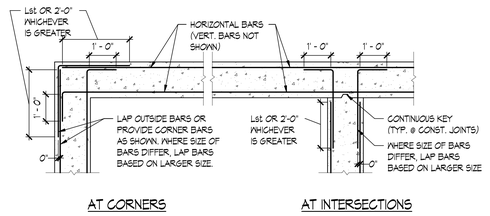
1. TIES SHALL START 4" FROM TOP OF FOOTING OR FLOOR SLAB AND SHALL EXTEND TO WITHIN 2" OF THE BOTTOM OF THE SHALLOWEST BEAM OR TO WITHIN 2" OF THE BOTTOM OF THE SLAB WHEN BEAMS DO NOT FRAME INTO ALL FOUR FACES OR THE COLUMN.
2. WHEN COLUMN BARS ARE OFFSET THE TIES SHALL BE SPACED NOT OVER 3" O.C. FOR A DISTANCE OF 1'-0" BELOW THE POINT OF OFFSET.



3 TYPICAL COLUMN BUTTRESS PLAN

1/2" = 1'-0"

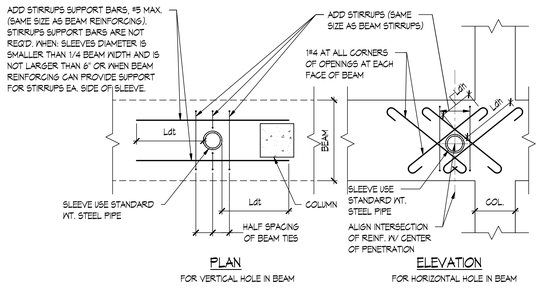
NOTE: FOR BALANCE OF WALL REINFORCEMENT & OTHER INFORMATION SEE TYPICAL WALL SECTIONS / PIER-BUTTRESS DETAIL.



4 TYPICAL HORIZONTAL REINFORCING FOR CONCRETE WALLS (PLAN)

1/2" = 1'-0"

NOTE: PROVIDE CONTINUOUSE WATERSTOPS IN ALL JOINTS AS REQUIRED BY ARCHITECT.

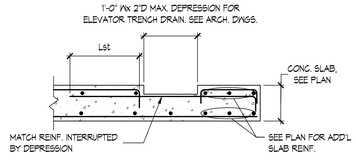


5 TYPICAL OPENINGS IN CONCRETE BEAMS

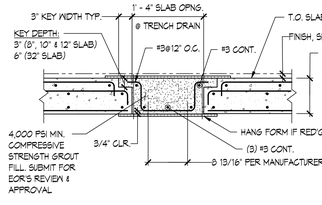
3/4" = 1'-0"

NOTES:

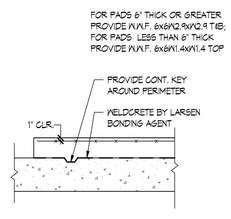
1. ALL OPENINGS REGARDLESS OF SIZE ARE SUBJECT TO APPROVAL OF STRUCTURAL ENGINEER. ALL PROPOSED OPENING SIZES, LOCATION & ELEVATIONS TO BE SUBMITTED FOR REVIEW. OPENINGS THAT REQUIRE SPECIFIED LONGITUDINAL REINFORCEMENT BE PLACED IN ADDITIONAL LAYERS WILL NOT BE PERMITTED.
2. NO OPENINGS ARE PERMITTED IN CONCRETE BEAMS LARGER THAN 2' DIA. UNLESS SPECIFICALLY INDICATED ON STRUCTURAL PLANS. ALL BEAM REINFORCMENT TO RUN THROUGH.



BACK-OF-HOUSE TRENCH DRAIN

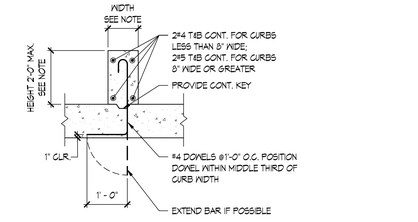


TYPICAL FLOOR SLOT TRENCH DRAIN



7 TYPICAL CONCRETE PAD

3/4" = 1'-0"



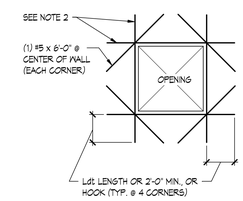
8 TYPICAL CONCRETE CURB

3/4" = 1'-0"

NOTE: FOR CURB HEIGHT & WIDTH SEE ARCHITECTURAL DRAWINGS.

6 TYPICAL TRENCH DRAIN AT FSA ELEVATOR

1" = 1'-0"

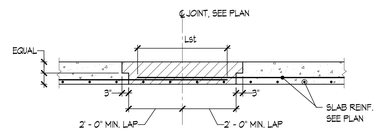


9 TYPICAL OPENING IN CONCRETE WALL

1/2" = 1'-0"

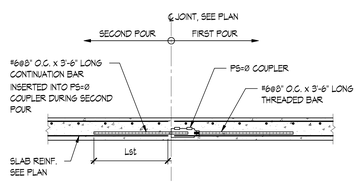
NOTES:

1. HOOK ALL INTERRUPTED CONTINUOUS BARS.
2. PLACE ONE-HALF OF REINFORCING BAR AREA INTERRUPTED BY OPENING IN THE SAME FACE AT BOTH SIDES OF OPENING. TWO #5 EACH SIDE MIN.



POUR STRIP GAP OPTION

NOTE: HATCHED AREAS INDICATE CONCRETE TO BE CAST 28 DAYS AFTER LAST ADJACENT SECTION HAS BEEN CAST. ADEQUATE SUPPORTS SHALL BE PROVIDED FOR SLABS AND BEAMS ADJACENT TO THE SHRINKAGE JOINT UNTIL THE WHOLE BAY IS CAST AND ATTAINS 75% OF ITS DESIGN STRENGTH.



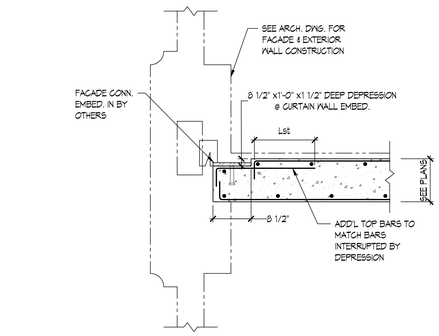
GAPLESS POUR STRIP OPTION - PS=Ø SYSTEM

NOTES:

1. APPLY NOX-CRETE SILOSEAL CLASSIC BOND-BREAKER BETWEEN FIRST AND SECOND POUR.
2. THE PS=Ø RELIEF JOINT TO REMAIN OPEN FOR 28 DAYS.
3. AFTER THE TIME PERIOD SPECIFIED ABOVE, THE PS=Ø COUPLERS AND JOINT TO BE GROUTED WITH BASF MASTERFLOW 885 HIGH-PRECISION, NONSHRINK METALLIC-AGGREGATE GROUT.
4. SEE PS=Ø MANUFACTURER DATA FOR MORE INFORMATION.
5. ADEQUATE SUPPORT SHALL BE PROVIDED FOR SLABS ADJACENT TO THE SHRINKAGE JOINT UNTIL THE WHOLE BAY IS CAST AND ATTAINS 75% OF ITS DESIGN STRENGTH.

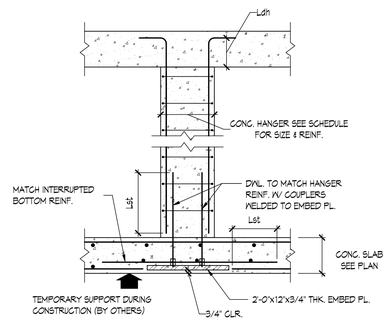
10 TYPICAL SHRINKAGE JOINT IN SLAB

1/2" = 1'-0"



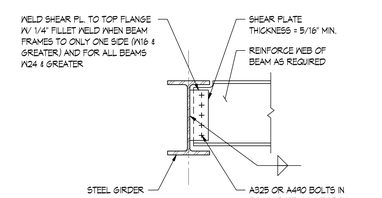
11 TYPICAL SLAB EDGE AT PRECAST FACADE CONNECTION

1" = 1'-0"



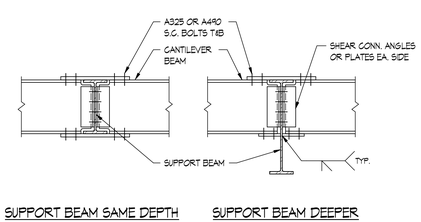
12 TYPICAL CONCRETE HANGER

1" = 1'-0"



13 TYPICAL BEAM TO GIRDER CONNECTION

3/4" = 1'-0"

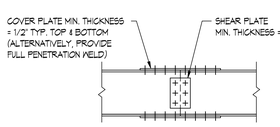


SUPPORT BEAM SAME DEPTH SUPPORT BEAM DEEPER

14 TYPICAL CANTILEVER BEAM CONNECTION

3/4" = 1'-0"

NOTE:
DESIGN BOLTS & PLATES TO DEVELOP FULL MOMENT CAPACITY OF CANTILEVER BEAM UNLESS OTHERWISE NOTED.

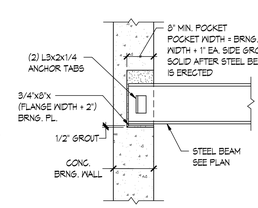


15 TYPICAL BEAM SPLICE

3/4" = 1'-0"

NOTES:

1. SPLICE CONNECTION SHALL DEVELOP FULL PLASTIC MOMENT CAPACITY OF BEAM UNLESS OTHERWISE NOTED.
2. ALL BOLTS TO BE SLIP CRITICAL.

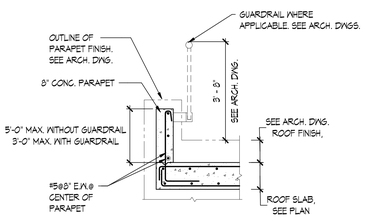


NOTES:

1. BEARING PLATES SHALL BE CENTERED ABOUT THE BEAM SUPPORTED, AND ORIENTED SUCH THAT THE THIRD DIMENSION IS PERPENDICULAR TO THE WEB OF THE BEAM.
2. BEAMS SHALL BE EXTENDED OVER THE BEARING PLATE SO THAT THE PLATE DOES NOT EXTEND MORE THAN 2" BEYOND THE END OF THE BEAM.
3. BEAMS BEARING ON PLATES SHALL BE REINFORCED WITH 1/4" STIFFENER PLATES @ 8" O.C. OVER BEARING PLATES.

TYPICAL STEEL BEAM BEARING ON CONCRETE WALL

16 3/4" = 1'-0"



17 TYPICAL PARAPET DETAIL

1/2" = 1'-0"

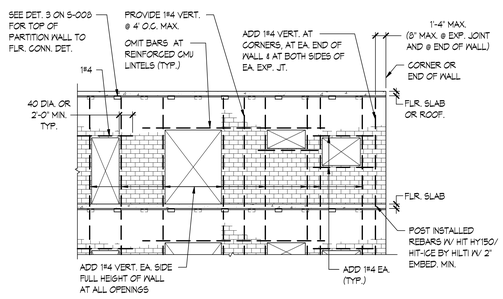
1 TYPICAL ELEVATOR HOIST BEAM HUNG FROM SLAB

3/4" = 1'-0"

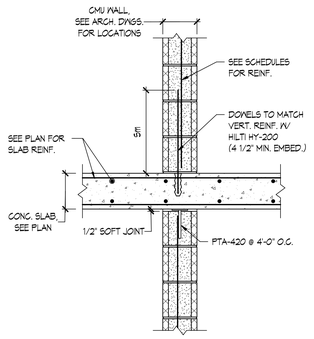


2 TYPICAL MINIMUM REINFORCING IN CMU PARTITION WALLS

1/8" = 1'-0"

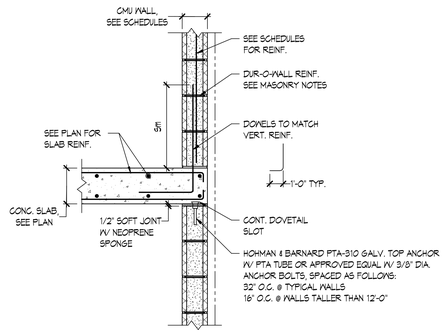
NOTES:

1. FOR TYPICAL JOINT REINFORCING SEE GENERAL NOTES AND SPECIFICATIONS.
2. VERTICAL REBARS SHALL BE TERMINATED 1 INCH BELOW TOP OF CMU PARTITION WALL.



3 TYPICAL NON-LOAD BEARING MASONRY PARTITION

1" = 1'-0"



4 TYPICAL EXTERIOR CMU WALL

1" = 1'-0"

CMU EXTERIOR BACKUP WALL SCHEDULE

MAX. WALL SPAN/HEIGHT	MINIMUM f'm	WALL THICKNESS	GROUT & REBAR SPACING
UP TO 9'-0"	1,500 PSI	8"	#4@32" O.C.
UP TO 12'-0"	1,500 PSI	8"	#4@16" O.C.
UP TO 18'-0"	1,500 PSI	8"	#5@8" O.C.

CMU INTERIOR PARTITION SCHEDULE

MAX. WALL SPAN/HEIGHT	MINIMUM f'm	WALL THICKNESS	GROUT & REBAR SPACING
UP TO 9'-0"	1,500 PSI	8"	#4@48" O.C.
UP TO 12'-0"	1,500 PSI	8"	#4@32" O.C.
UP TO 18'-0"	1,500 PSI	8"	#4@24" O.C.

MASONRY EMBEDMENT AND SPLICE LENGTH

BAR/ WIRE SIZE	DIAMETER	f'm = 1,500 PSI	
		DEVELOPMENT LENGTH (Em) IN.	TENSION SPLICE LENGTH (Sm) IN.
W1.7	0.148	9	14
W2.1	0.162	10	15
W2.8	0.188	12	18
#3	0.375	16	27
#4	0.5	21	36
#5	0.625	26	45

NOTE:
**MECHANICAL SPLICES SHALL HAVE THE BARS CONNECTED TO DEVELOP IN TENSION OR COMPRESSION, AS REQUIRED, AT LEAST 125% OF THE SPECIFIED YIELD STRENGTH OF THE BAR. EPOXY-COATED BAR LENGTHS SHALL BE INCREASE BY 50 PERCENT.
STEEL YIELD STRENGTH F_y = 60,000 PSI.

MASONRY NOTES:

1. MASONRY WALL CONSTRUCTION SHOWN ON STRUCTURAL DRAWINGS SHALL CONFORM TO THE FOLLOWING:

   A. UNITS SHALL BE MEDIUM WEIGHT AGGREGATE CONCRETE HOLLOW UNITS WITH A MAXIMUM OVEN DRY DENSITY OF 125 PCF. UNITS SHALL CONFORM TO THE REQUIREMENTS OF ASTM C90. NET SOLID UNIT AREA SHALL NOT EXCEED THE FOLLOWING PERCENTAGES OF THE GROSS UNIT AREA:

      8" CMU- 55%
      10" CMU- 50%
      12" CMU- 45%

      SEE TYPICAL DETAILS AND SCHEDULES FOR MINIMUM UNIT COMPRESSIVE STRENGTHS (f'm).

   B. MORTAR SHALL BE TYPE S OR TYPE M, IN CONFORMANCE WITH ASTM C270.
   C. GROUT SHALL CONFORM TO ASTM 476 AND SHALL HAVE A MINIMUM 28-DAY COMPRESSIVE STRENGTH EQUAL TO THE MASONRY ASSEMBLY STRENGTHS (f'm) INDICATED IN NOTE 1A.
   D. USE SPECIAL UNITS AS REQUIRED TO ALLOW PROPER INSTALLATION OF BOTH VERTICAL AND HORIZONTAL REINFORCEMENT, AND ACCESSORIES TO ACCOMMODATE ARCHITECTURAL AND STRUCTURAL DESIGN. THESE MAY INCLUDE BUT NOT BE LIMITED TO BOND BEAM, LINTEL, TROUGH, CORNER AND OTHER SPECIAL UNITS.

3. GROUT SOLID ALL CELLS CONTAINING VERTICAL REINFORCEMENT BARS.
4. ALL VERTICAL REINFORCEMENT BARS SHALL BE CENTERED IN THE CELL IN BOTH DIRECTIONS.
5. THE MINIMUM HORIZONTAL REINFORCING FOR ALL MASONRY WALLS SHALL CONSIST OF TWO WIRE-9 GAGE RODS @ 16"O.C.
6. THE FOLLOWING SHALL BE PROVIDED IN PARAPET WALLS:

   A. ALL CELLS AND ALL JOINTS IN SOLID, CAVITY OR MASONRY BONDED HOLLOW WALL CONSTRUCTION SHALL BE FILLED SOLID WITH GROUT AND MORTAR.
   B. HORIZONTAL WIRE REINFORCEMENT SHALL BE PROVIDED AT VERTICAL INTERVALS NOT GREATER THAN 12".
   C. HORIZONTAL REINFORCEMENT SHALL EXTEND AROUND THE CORNER FOR AT LEAST 4 FT. IN BOTH DIRECTIONS AND SPLICES SHALL BE LAPPED AT LEAST 6".
   D. NONREINFORCED PARAPET WALLS SHALL BE NOT LESS THAN 8" IN THICKNESS AND THEIR HEIGHT SHALL NOT EXCEED THREE TIMES THEIR THICKNESS.

7. HORIZONTAL REINFORCEMENT SHALL BE CONTINUOUS THROUGH CORNERS, INTERSECTION, AND PILASTERS IN BRICK AND C.M.U.
8. BONDING OF MASONRY UNITS SHALL BE CONTINUED THROUGH CORNERS, INTERSECTIONS, AND PILASTERS IN BRICK AND C.M.U.
9. VERTICAL REINFORCEMENT CONSISTING OF 1#4 SHALL BE PROVIDED AT BOTH SIDES OF ALL OPENINGS FULL HEIGHT OF WALL.
10. IN ADDITION TO REINFORCEMENT SHOWN ON PLAN, PROVIDE ADDITIONAL 1#4 VERTICAL REINFORCEMENT FROM FLOOR TO FLOOR AT:

    A. EACH CORNER OF WALL.
    B. ALL ENDS OF WALLS.
    C. NEXT TO EXPANSION JOINTS

11. 1#4 CONTINUOUS REINFORCEMENT SHALL BE PLACED AT TOP AND BOTTOM OF ALL WALL OPENINGS AND SHALL EXTEND 24" MINIMUM OR 40 BAR DIAMETERS PAST EACH SIDE OF THE OPENINGS.
12. 1#4 HORIZONTAL REINFORCEMENT SHALL BE PLACED CONTINUOUSLY AT THE TOP OF ALL C.M.U. WALLS AT EACH FLOOR, ROOF AND PARAPET WALL.
13. ALL GROUTING SHALL FOLLOW THE REQUIREMENTS OF ACI-530.1 ARTICLE 3.5, FOR "LOW LIFT" GROUTING, WALLS SHALL BE LAID UP AND GROUTED AT MAXIMUM INTERVAL HEIGHTS OF 5'-0". PLACE REINFORCEMENT BARS AND EXTEND THEM A SPLICE LENGTH ABOVE LIFT. LEVEL OF GROUT TO BE KEPT 1 1/2" FROM TOP OF MASONRY FORMING A GROUT KEY. "HIGH LIFT" GROUTING SHALL FOLLOW ALL REQUIREMENTS STATED IN ACI-530.1 ARTICLE 3.5D. CLEANOUT HOLES FOR INSPECTION ARE REQUIRED AT THE BASE OF THE WALL FOR ALL POURS OVER 5'-0". ALL GROUT SHALL BE CONSOLIDATED IN ACCORDANCE WITH ARTICLE 3.5E.
14. OPENINGS FOR ROUND DUCTS, PIPING AND ELECTRICAL CONDUIT BETWEEN 4 AND 12 INCHES IN DIAMETER SHALL BE SLEEVED WITH SCHEDULE 40 STEEL PIPE. NO OPENING SHALL BE IN PLACED REINFORCED GROUTED CELLS.
15. GROUT SOLID TOP TWO COURSES OF C.M.U DIRECTLY UNDER BEARING POINTS.
16. HORIZONTAL AND VERTICAL CONTROL AND EXPANSION JOINTS IN FACE BRICK SHALL BE LOCATED AS PER ARCHITECTURAL DRAWINGS.
17. EXPOSED STEEL, STEEL LINTELS OR STEEL WITHIN 4" OF WEATHERING FACE OF MASONRY SHALL BE GALVANIZED.
18. ALL LINTELS SHALL BEAR 8" AT EACH JAMB. FULL CONTACT BETWEEN LINTEL AND SUPPORTING MASONRY SHALL BE PROVIDED.

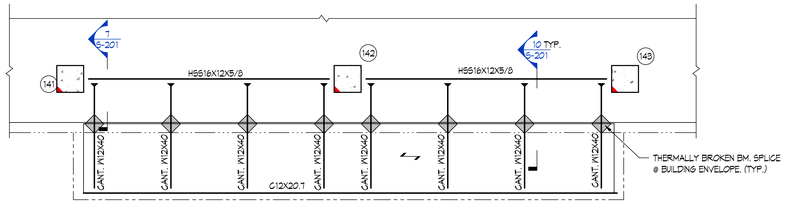
2ND FLOOR FRAMING PLAN

1/8" = 1'-0"

NOTES:

1. X" CONCRETE SLAB — DENOTES CONCRETE SLAB OF THICKNESS 'X'. SEE CONCRETE NOTES ON DRAWING S-001 FOR BALANCE OF INFORMATION.
2. EL. XX'-XX" — DENOTES TOP OF SLAB ELEVATION WITH RESPECT TO NAVD88 DATUM.
3. REINFORCING BARS SHOWN ON PLAN TO BE PLACED IN ACCORDANCE WITH TYPICAL FLAT PLATE DETAILS ON DRAWING S-003 AND IN ADDITION TO ANY STANDARD REINFORCEMENT CALLED FOR IN THOSE DETAILS.
4. ALL REINFORCING SHOWN ON PLAN IS TO BE PLACED IN ADDITION TO TYPICAL REINFORCEMENT AS FOLLOWS:
   12" SLAB: #5@12" BOTTOM EACH WAY CONTINUOUS
   18" SLAB: #7@12" BOTTOM EACH WAY CONTINUOUS
5. (B) — DENOTES ADDITIONAL BOTTOM REINFORCEMENT.
6. ——— — DENOTES ADDITIONAL TOP REINFORCEMENT.
7. PLACE EAST-WEST REINFORCEMENT IN THE OUTERMOST LAYER.
8. ALL REINFORCEMENT IN AREAS OF EXPOSED CONCRETE ARE TO BE EPOXY COATED. INCREASE BAR LENGTHS AS REQUIRED PER SCHEDULE ON S-002.
9. SLAB OPENINGS AND PENETRATIONS SHOWN SHALL BE COORDINATED WITH ARCHITECTURAL, MECHANICAL, ELECTRICAL, PLUMBING & SPRINKLER DRAWINGS.
10. FOR BEAM REINFORCEMENT, SEE BEAM SCHEDULES ON DRAWING S-303. TOP OF BEAMS TO BE EVEN WITH TOP OF SLAB, UNLESS OTHERWISE NOTED THUS (X'-X").
11. FOR COLUMN DIMENSIONS & REINFORCEMENT, SEE COLUMN SCHEDULE ON DRAWING S-301 AND S-302.
12. SW-XX — DENOTES CONCRETE SHEAR WALL. SEE DRAWING S-401 AND S-402 FOR BALANCE OF INFORMATION.
13. XSRX — DENOTES STUDRAIL SHEAR REINFORCEMENT. SEE SCHEDULE ON DRAWING S-303.
14. S-x-- — DENOTES STEEL FRAMING TOP OF BEAM AT TOP OF SLAB UNLESS OTHERWISE NOTED. (H) DENOTES INTERMEDIATE ELEVATOR DIVIDER BEAM ABOVE TOP OF SLAB. SEE ELEVATOR DRAWINGS FOR BRACING REQUIREMENTS.
15. DENOTES RAISED LIGHTWEIGHT CONCRETE SLAB. SEE DETAIL 7 ON DRAWING S-003.
16. DENOTES SHRINKAGE JOINT IN SLAB, SEE DETAIL 10 ON S-004.
17. DENOTES TRENCH DRAIN AT FSA ELEVATOR TRENCH DRAIN. SEE DETAIL 8 ON DRAWING S-004.
18. * — DENOTES REINFORCEMENT TO BE PLACED IN LIEU OF TYPICAL #5@12" TOP EDGE REINFORCEMENT CALLED FOR IN DETAIL 2 ON S-003.
19. DENOTES 1" TOPPING SLAB POURED MONOLITHICALLY. COORDINATE WITH ARCHITECTURAL DRAWINGS.

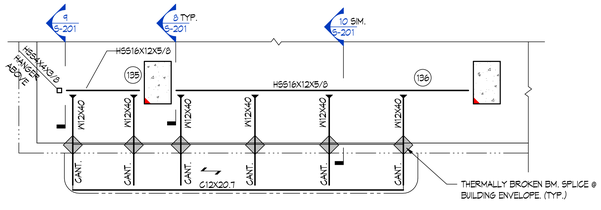


RETAIL CANOPY FRAMING PLAN

1/4" = 1'-0"

NOTES:

1. COORDINATE TOP OF STEEL ELEVATION WITH ARCHITECTURAL DRAWINGS.
2. DENOTES SPAN DIRECTION OF 20 GA. 3" NON-COMPOSITE METAL DECK (VULCRAFT 3NL-32 OR APPROVED EQUIVALENT)



RESIDENTIAL CANOPY FRAMING PLAN

1/4" = 1'-0"

4TH - 9TH FLOOR FLOOR FRAMING PLAN

1/8" = 1'-0"

NOTES:

1. X" CONCRETE SLAB — DENOTES CONCRETE SLAB OF THICKNESS 'X'. SEE CONCRETE NOTES ON DRAWING S-001 FOR BALANCE OF INFORMATION.
2. EL. XX'-XX" — DENOTES TOP OF SLAB ELEVATION WITH RESPECT TO NAVD88 DATUM.
3. REINFORCING BARS SHOWN ON PLAN TO BE PLACED IN ACCORDANCE WITH TYPICAL FLAT PLATE DETAILS ON DRAWING S-003 AND IN ADDITION TO ANY STANDARD REINFORCEMENT CALLED FOR IN THOSE DETAILS.
4. ALL REINFORCING SHOWN ON PLAN IS TO BE PLACED IN ADDITION TO TYPICAL REINFORCEMENT OF AS FOLLOWS:
   12" SLAB: #5@12" BOTTOM EACH WAY CONTINUOUS
   14" SLAB: #5@10" BOTTOM EACH WAY CONTINUOUS
   8" SLAB: #4@12" BOTTOM EACH WAY CONTINUOUS
5. ___ (B) ___ — DENOTES ADDITIONAL BOTTOM REINFORCEMENT.
6. _____ — DENOTES ADDITIONAL TOP REINFORCEMENT.
7. PLACE EAST-WEST REINFORCEMENT IN THE OUTERMOST LAYER.
8. ALL REINFORCEMENT IN AREAS OF EXPOSED CONCRETE ARE TO BE EPOXY COATED. INCREASE BAR LENGTHS AS REQUIRED PER SCHEDULE ON S-002.
9. SLAB OPENINGS AND PENETRATIONS SHOWN SHALL BE COORDINATED WITH ARCHITECTURAL, MECHANICAL, ELECTRICAL, PLUMBING & SPRINKLER DRAWINGS.
10. FOR BEAM REINFORCEMENT, SEE BEAM SCHEDULES ON DRAWING S-303. TOP OF BEAMS TO BE EVEN WITH TOP OF SLAB, UNLESS OTHERWISE NOTED THUS (X'-X").
11. FOR COLUMN DIMENSIONS & REINFORCEMENT, SEE COLUMN SCHEDULE ON DRAWING S-301 AND S-302.
12. SW-XX — DENOTES CONCRETE SHEAR WALL. SEE DRAWING S-401 AMD S-402 FOR BALANCE OF INFORMATION.
13. XSRX — DENOTES STUDRAIL SHEAR REINFORCEMENT. SEE SCHEDULE ON DRAWING S-303.
14. S-X-- — DENOTES STEEL FRAMING.
15. DENOTES RAISED LIGHTWEIGHT CONCRETE SLAB. SEE DETAIL 7 ON DRAWING S-003.
16. DENOTES SHRINKAGE JOINT IN SLAB, SEE DETAIL 10 ON S-004.
17. DENOTES TRENCH DRAIN AT FSA ELEVATOR. SEE DETAIL 6 ON DRAWING S-004.
18. * — DENOTES REINFORCEMENT TO BE PLACED IN LIEU OF TYPICAL #5@12" TOP EDGE REINFORCEMENT CALLED FOR IN DETAIL 2 ON S-003.
19. DENOTES 1/2" TOPPING SLAB POURED MONOLITHICALLY. COORDINATE WITH ARCHITECTURAL DRAWINGS.

1. X" CONCRETE SLAB — DENOTES CONCRETE SLAB OF THICKNESS 'X'. SEE CONCRETE NOTES ON DRAWING S-001 FOR BALANCE OF INFORMATION.
2. EL. XX'-XX" — DENOTES TOP OF SLAB ELEVATION WITH RESPECT TO NAVD88 DATUM.
3. REINFORCING BARS SHOWN ON PLAN TO BE PLACED IN ACCORDANCE WITH TYPICAL FLAT PLATE DETAILS ON DRAWING S-003 AND IN ADDITION TO ANY STANDARD REINFORCEMENT CALLED FOR IN THOSE DETAILS.
4. ALL REINFORCING SHOWN ON PLAN IS TO BE PLACED IN ADDITION TO TYPICAL BOTTOM REINFORCEMENT OF #4@12" BOTTOM EACH WAY CONTINUOUS.
5. __ (B) __ — DENOTES ADDITIONAL BOTTOM REINFORCEMENT.
6. _____ — DENOTES ADDITIONAL TOP REINFORCEMENT.
7. PLACE EAST-WEST REINFORCEMENT IN THE OUTERMOST LAYER.
8. ALL REINFORCEMENT IN AREAS OF EXPOSED CONCRETE ARE TO BE EPOXY COATED. INCREASE BAR LENGTHS AS REQUIRED PER SCHEDULE ON S-002.
9. SLAB OPENINGS AND PENETRATIONS SHOWN SHALL BE COORDINATED WITH ARCHITECTURAL, MECHANICAL, ELECTRICAL, PLUMBING & SPRINKLER DRAWINGS.
10. FOR BEAM REINFORCEMENT, SEE BEAM SCHEDULES ON DRAWING S-303. TOP OF BEAMS TO BE EVEN WITH TOP OF SLAB, UNLESS OTHERWISE NOTED THUS (X'-X").
11. FOR COLUMN DIMENSIONS & REINFORCEMENT, SEE COLUMN SCHEDULE ON DRAWING S-301 AND S-302.
12. SW-XX — DENOTES CONCRETE SHEAR WALL. SEE DRAWING S-401 AMD S-402 FOR BALANCE OF INFORMATION.
13. X5RX — DENOTES STUDRAIL SHEAR REINFORCEMENT. SEE SCHEDULE ON DRAWING S-303.
14. S-X-- — DENOTES STEEL FRAMING.
15. DENOTES RAISED LIGHTWEIGHT CONCRETE SLAB. SEE DETAIL 7 ON DRAWING S-003.
16. DENOTES SHRINKAGE JOINT IN SLAB, SEE DETAIL 10 ON S-004.
17. DENOTES TRENCH DRAIN AT FSA ELEVATOR. SEE DETAIL 6 ON DRAWING S-004.
18. * — DENOTES REINFORCEMENT TO BE PLACED IN LIEU OF TYPICAL #5@12" TOP EDGE REINFORCEMENT CALLED FOR IN DETAIL 2 ON S-003.
19. DENOTES 1/2" TOPPING SLAB POURED MONOLITHICALLY. COORDINATE WITH ARCHITECTURAL DRAWINGS.

1.0 PURPOSE

This specification covers the furnishing of all labor, materials, equipment, tools, services and all other items necessary for the complete and approved installation of all precast, cast-in-place plain and reinforced concrete work, which includes ready mixed, job-site mixed, and plant-mixed concrete, as indicated on the contract drawings and/or specified herein.

2.0 APPLICATION

This specification applies to the Con Edison electrical distribution system.

3.0 GENERAL REQUIRMENT

3.1 General Work Requirement

Concrete shall consist of portland cement, fine and coarse aggregates, admixtures and clean water thoroughly mixed in quantities as specified by the latest edition and latest addenda of ACI, ASTM standards, Engineering Documents, NYC or local building codes, and the rules concerning safety & health from OSHA and EPA. Completed mix must obtain the required concrete strength as outlined in this specification.

3.2 Items of Work

The specific items of work are outlined in the "Project Specifications and Contract Drawings".

3.3 Work by Others

3.3.1 Controlled Inspection.

3.3.2 Inspection and Testing of Concrete.

3.4 Reference Specifications

The work covered by this specification shall conform to the latest edition and latest addenda thereto of the following standards and specifications:

3.4.1 ACI — American Concrete Institute

117 Standard Specifications for Tolerances for Concrete Construction and Materials

237R Self-Consolidating Concrete

304R Guide for Measuring, Mixing, Transporting and Placing Concrete

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

305R Hot Weather Concreting

306.1 Standard Specification for Cold Weather Concreting

306R Cold Weather Concreting

308R Guide to Curing Concrete

309R Guide for Consolidation of Concrete

318 Building Code Requirements for Reinforced Concrete

3.4.2 ASTM — American Society for Testing and Materials

A185 Standard Specification for Steel Welded Wire Reinforcement, Plain, for Concrete

A615 Standard Specification for Deformed and Plain Carbon Steel Bars for Concrete Reinforcement

A775 Standard Specification for Epoxy-Coated Steel Reinforcing Bars

C31 Standard Practice for Making and Curing Concrete Test Specimens in the Field

C33 Standard Specification for Concrete Aggregates

C39 Standard Test Method for Compressive Strength of Cylindrical Concrete Specimens

C94 Standard Specification for Ready-Mixed Concrete

C143 Standard Test Method for Slump of Hydraulic Cement Concrete

C150 Standard Specification for Portland Cement

C172 Standard Practice for Sampling Freshly Mixed Concrete

C260 Standard Specification for Air-Entraining Admixtures for Concrete

C309 Standard Specification for Liquid Membrane-Forming Compounds for Curing Concrete

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

C494 Standard Specification for Chemical Admixtures for Concrete

C618 Standard Specification for Coal Fly Ash and Raw or Calcined Natural Pozzolan for Use in Concrete

C989 Standard Specification for Granulated Blast-Furnace Slag for Use in Concrete and Mortars

C1602 Standard Specification for Mixing Water Used in the Production of Hydraulic Cement Concrete

3.4.3 EO — Engineering Documents / Specifications

a EO-1125 — Specification for Field-Mixed Concrete in Small Batches.

b EO-5228 — Specification for Fabrication of Precast Concrete Distribution Structures.

c EO-100167 — Purchase Recommendation for Packaged, Dry, Combined Materials for Mortar and Concrete.

d EO-1007 — Specification for Membrane Method of Waterproofing for Electrical Distribution Structures.

e EO-100285 — Purchase Recommendation for Plain and Reinforced Concrete.

f EO-100642 — Purchase Recommendation for Membrane Waterproofing Systems for Electrical Distribution Structures.

g EO-100271 — Purchase Recommendation for Rapid Setting Concrete Dry Gravel Mix.

3.4.4 Approved Product List by EH&S

EH&S approved product list for use of admixtures in concrete.
See CRS-Chemical Reporting System at
https://intapps7.coned.com/crsv/webform1.aspx and EO-100285.

3.4.5 Building Codes

Building Codes of the City and State of New York including Westchester County and other Municipalities as applicable.

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

3.4.6 Occupational Safety and Health Administration (OSHA)

a 29 CFR 1910 — Occupational Safety and Health Standards.

b 29 CFR 1926 — Safety and Health Regulations for Construction

3.4.7 New York City, DOT Requirements

Standard Highway Specifications, New York City Department of Transportation.

3.5 Quality Control

3.5.1 Concrete Strength Tests

a Minimum Strength
All concrete shall have minimum 28 days strength as specified in the project specification and contract drawings, unless noted otherwise.

b Investigation of Low Strength Test Results,
If any strength test (see ACI 318-08, section 5.6.2.4 and 5.6.3) of laboratory-cured cylinders falls below fc' by more than the value given in ACI 318-08, section 5.6.3.3. then tests and structural analysis shall be taken as per ACI 318-08, section 5.6.5 at the contractor's expense.

3.5.2 Special Inspection and Concrete Testing

Concrete shall be controlled in accordance with the requirements of Building Codes of the City and State of New York including Westchester County and other local Municipalities, as well as NYC Buildings Bulletin 2009-026. Special inspection and concrete testing shall be performed by the special inspection agency and concrete testing laboratory accepted by New York City Building Department.

3.5.3 Frequency of Testing

Samples for strength tests of concrete placed for manholes or any other load bearing structures shall be taken once a day or one for each structural element. i.e. floor slab, wall and roof slab, respectively. At the time fresh concrete is sampled to fabricate specimens for strength tests, the slump and air content tests and temperature of concrete shall be performed.

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

3.5.4 Concrete Testing Laboratory

All compressive strength tests of concrete, tests on cement, aggregates, slump and air content shall be done for Con Edison by an independent licensed concrete testing laboratory, see section 3.5.2.

3.5.5 Report Requirement

Special inspection agency, see section 3.5.2, shall keep records of inspections for a period of 6 years to conform to the provisions of sections BC 1704, BC 1903 and BC 1905 of the Building Codes of the State and City of New York and NYC Buildings Bulletin 2009-026. The agency shall submit to Con Edison Construction Management one hard copy and one electronic copy for them to keep in the project folder.

3.6 Rejection of Concrete

Final acceptance by Con Edison of all concrete work done by the contractor shall be predicated on meeting the job specific requirements, contract document and accepted ACI industry standards. The acceptance parameters include but are not limited to: compressive strength, mix design, slump, air entrainments, rebar placement and size. Additionally, the acceptance is contingent upon the finished condition of the concrete including general condition and no unacceptable evidence of honey combing, cracking, air bubbles or spalling. Con Edison reserves the right to assign an independent agency to conduct further investigation which may include nondestructive tests and strength tests of cores for those concrete strength tests that failed to meet specifications and any suspected defective concrete. If the results of subsequent physical testing or analytical modeling, stated in 3.5.1 to 3.5.4, reveals that the contactor placed concrete is defective and unacceptable, all costs for this investigative work shall be at the contractor's expense and the concrete in dispute shall be removed, replaced and tested until the strength and quality meet the requirements in this specification, at the contractor's expense.

4.0 MATERIAL AND PRODUCT SPECIFICATONS

4.1 General

4.1.1 Products and manufacturers listed in section 3.4.3 and 3.4.4 are all subject to compliance with the applicable codes and standard requirements.

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

4.2 **Cement**

4.2.1 Cement used in the concrete mix shall be Portland cement and shall conform to ASTM C150.

4.2.2 Cements of a special nature for specific purposes shall conform to the specifications of latest edition of ASTM and ACI 318, and shall be submitted to Con Edison Construction Management (CM) for approval prior to the finalization of contract/construction drawings.

4.2.3 Neither fly ash nor slag is allowed to be used in concrete.

4.3 Aggregates

4.3.1 Fine aggregate shall be natural sand conforming to ASTM C33, Section 6.1

4.3.2 Coarse aggregate shall be crushed stone conforming to size number 67 in accordance with ASTM C33, Table 2, unless otherwise indicated.

4.3.3 Coarse aggregates for sidewalk slabs shall be grits which shall pass a sieve having 3/8 inch square openings and not less than 90% shall be retained on a No. 4 sieve.

4.4 Water

Water used in mixing concrete shall conform to ASTM C1602.

4.5 Admixtures

4.5.1 Admixtures listed in EO-100285 shall be added to the concrete as specified in contract drawings and/or the detailed project specification and strictly follow the manufacturer's recommendations. Admixtures shall be added only through calibrated dispensing devices. Dispensers shall be inspected and certified as to accuracy by the manufacturer of the admixture. Descriptions of admixtures, and data indicating quantities intended for use, shall be submitted to Construction Management and Distribution Engineering Tools and Structures Engineer for approval.

4.5.2 An air-entraining admixture shall be added to the mix for all concrete. Air-entraining admixtures shall conform to ASTM C260. Air-entraining admixtures shall be added to the concrete mixtures immediately before or during mixing.

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

4.6 Steel Reinforcement

4.6.1 All reinforcement and accessories shall be free of loose rust, loose scale, grease, oil, and other coatings or foreign substances that would reduce the bonding qualities.

4.6.2 **Bars**

a Bar reinforcement, sizes No. 3 through No. 8 inclusive, shall be deformed, new billet steel bars conforming to ASTM A615, Grade 60, as indicated on the applicable drawings. Reinforcing bars shall be epoxy coated for all underground and wet structures in accordance with ASTM A775. Epoxy coating damaged as a result of handling or cutting of reinforcing bars shall be field coated with epoxy patching material conforming to ASTM A775.

b Each bar shall be branded in the deforming process to identify the manufacturer, size, type and grade of steel.

4.6.3 **Welded Wire Fabric**
Welded wire fabric shall be epoxy-coated in accordance with ASTM A884. The size or sizes indicated on the drawings, shall conform to ASTM A185. Epoxy coating damaged as a result of handling or cutting of fabric members shall be field coated with epoxy patching material conforming to ASTM A775.

4.6.4 **Tie Wire**
Tie wire for securing reinforcement in place shall be 16 gauge or heavier, black annealed plastic-coated wire.

4.6.5 **Bar Supports**

a Bar supports shall be standardized and non-corrosive wire bar supports conforming to the material specifications of the Manual of Standard Practice of the CRSI and contract drawings. Bar supports shall be sufficient in number and strength to properly carry the reinforcing bars and normal construction loads supported thereon.

b Precast concrete blocks, plain or provided with embedded coated tie wires, and dowel blocks, conforming to the Manual of Standard Practice of the CRSI shall be used to support bars in footings and slabs on ground.

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

4.7 Classification of Concrete

4.7.1 Concrete shall be furnished in accordance with the following Consolidated Edison (Con Edison) classifications:

Con Edison Company Classification	Type of Structures	Min. 28-Day Compression Strength, Psi
Class I	Watertight Structures: Cast-in-Place, Precast and Self Consolidated Concrete (SCC) or Special Structures	5,000
Class II	Non- Watertight Structures	4,500
Others	Duct Banks, Sidewalks and General Use	3,500

4.8 Curing Materials

4.8.1 Waterproof paper for curing concrete shall conform to ASTM C171.

4.8.2 Membrane forming compounds for curing concrete shall conform to ASTM C309.

4.8.3 Polyethylene sheet used for curing concrete shall conform to the moisture retention requirements of ASTM C171. Polyethylene sheet shall be free of visible defects, uniform in appearance, and not less than 0.004 inches thick.

4.8.4 Polyethylene-coated waterproof paper for curing concrete shall conform to the moisture retention requirements of ASTM C171. The polyethylene coating shall have a minimum thickness of 0.002 inches, and shall be permanently bonded to the waterproof paper.

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

4.9 Forms and Form-Ties

4.9.1 For underground construction that requires Class I or II concrete structure with watertight treatment, fiberglass form tie system made by RJD Industrial, INC. or approved equal shall be used. No timber or wood forms shall be constructed. No other form tie or snap tie is allowed for watertight concrete construction.

4.9.2 For above ground construction that requires Class I or II non-watertight concrete structure, steel, timber or wood forms may be constructed. Metal forms shall conform to ACI 347 and Section BC 1906 of the Building Code of the City of New York or other local municipal building codes. The materials used shall produce or facilitate obtaining the specified surface finish of the concrete.

4.9.3 All form ties shall have removable or snap-off ends and shall be fixed or adjustable in length. The portion of the tie remaining in the concrete after the removal of the exterior parts shall not project beyond the surface of the concrete and shall be at least one inch back from any surface that will be exposed to view. Plug both ends of the form tie opening with non-shrink cement grout with minimum thickness of one inch.

4.9.4 **Unexposed Concrete Surfaces**
No. 2 common or better lumber, or any material specified for exposed surfaces shall be used.

4.9.5 **Exposed Concrete Surfaces**
Plywood or metal forms in accordance with the following requirements shall be used:

a Plywood shall be APA Structural I Plyform, mill-oiled not less than 5-ply and at least 1/2 inch thick.

b Metal used for forms shall comply with the American Iron and Steel Institute requirements for light gauge, cold-formed steel. Metal forms shall produce surfaces equal to those provided by wood forms.

4.10 Form Oil (Parting Agent)

4.10.1 A colorless mineral oil, free of kerosene shall be used. Flash point shall be not less than 300°F, determined in accordance with ASTM D 92. Freezing point shall be less than -20°F.

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

4.10.2 The Contractor shall verify with the admixture manufacturer that the form oil used is compatible with the admixtures included in the concrete mix. The Contractor shall notify the Construction Management in writing that such verification has been made.

4.10.3 Avoid dropping oil on the reinforcement bars or any exposed concrete surface.

4.11 Concrete Proportions and Consistency

4.11.1 Concrete material shall be mixed in such proportions as to achieve the specified compressive strength at the age of twenty-eight days. The contractor shall be responsible for the proper concrete design mix in accordance with sections 4.1 to 4.5.

4.11.2 Concrete mix proportioning shall produce concrete with slump and air content designed to minimize bleeding and segregation.

4.11.3 Slump for all concrete that does not contain a super-plasticizer admixture shall be a minimum of 4 inches and a maximum of 6 inches unless noted otherwise.

4.11.4 Unless noted otherwise, normal weight concrete structure for vaults and manholes subject to freezing- and-thawing exposures shall be assigned to Exposure Class F2 (severe exposure) of ACI 318-08 and air-entrained with air content of (6 +/- 1.5) %.

4.11.5 The water / cement ratio for concrete subject to special exposure conditions shall meet the requirements of section BC 1904 of the New York City Building Code or other applicable municipal local codes.

4.11.6 If the contractor intends to use self-consolidating concrete, (SCC), polyarboxylate based high-range water-reducer (HRWA) shall be used and meet the requirements of ASTM C-494/C, Type F or G and ACI 237. The contractor shall submit the design concrete mix with the admixture to Construction Management and Distribution Engineering Tools and Structures Engineer for review and comments prior to placing the order of SCC.

Paper copies of procedures and instructions are uncontrolled and therefore may be outdated. Please consult Distribution Engineering Intranet Site Distribution Engineering or http://distribution, for the current version prior to use.

4.11.7 The slump of the concrete shall remain the same throughout the period required to unload the truck or mixer. Discharge of the contents shall be completed within 1-1/2 hours, after the introduction of mixing water to the cement and aggregates or the introduction of cement to the aggregates. During hot weather, when the temperature is above 80°F., the time limit shall be reduced to 45 minutes.

4.11.8 For all concrete, air-entrainment shall be accomplished by adding an air-entraining agent to the mix, in accordance with paragraph 4.5.

4.11.9 The source of supply for the fine or coarse aggregate shall not be changed during the course of the job. If the contractor wishes to change the source of supply for aggregates, the contractor must submit redesign concrete mix using the new source supply to Construction Management and Distribution Engineering Tools and Structures Engineer for review and approval.

4.11.10 The Contractor shall submit design mix to Construction Management and Distribution Engineering Tools and Structures Engineer for review and acceptance, a minimum of three weeks prior to the concrete mix being used for this project. The mixes as specified and filed with Construction Management shall not be adjusted except as specified herein, without the approval of the Construction Management and Distribution Engineering Tools and Structures Engineer. The Contractor shall submit to the Con Edison Construction Representative 2 copies of the concrete mix as accepted by Construction Management.

5.0 CONCRETE MIXING, PLACING, CURING, TESTING

5.1 Mixing Concrete

5.1.1 All concrete shall be mixed thoroughly and uniformly in accordance with ACI 318 section 5.8.

5.1.2 After mixing of materials has been completed, the use of additional water to make the mixture more workable will not be allowed. Concrete that has attained initial set shall not be placed, nor shall it be retempered or re-mixed in any way for use.

5.2 Preparation of Equipment and Convey, Place of Deposit

5.2.1 Preparation of equipment and place of deposit of concrete shall be done in accordance with ACI 304R and ACI 318 section 5.9 and 5.10.

5.2.2 Concrete shall not be placed until all reinforcement and embedded items, including pipes, conduits, frames, cut-outs, recess and shelf angles, anchor bolts, inserts, sleeves and other items that are called for on the drawings to be placed in the concrete, have been set in position.

5.2.3 The Construction Management Inspector shall timely arrange for the special inspection agency to inspect formwork for rigidity of supports, and reinforcing for correct placement and alignment. The special inspection agency will file with the Construction Management attestation that this inspection has been made.

5.2.4 Concrete shall not be allowed to drop freely more than 5 feet and shall be deposited in forms in a manner to avoid inclined construction joints.

5.2.5 When a continuous pour of concrete is being made, deliveries of mixed concrete shall be made at the place of deposit at intervals not exceeding one-half hour. Concrete shall be deposited continuously, or in layers of such thickness that no concrete will be deposited on concrete which has hardened sufficiently to cause the formation of seams or planes of weakness within the section.

5.2.6 Tops of rough slabs shall be brought to the level indicated on the drawings within a tolerance of plus or minus 1/4 inch.

5.2.7 All concrete shall be thoroughly compacted in accordance with section 5.6, immediately after placing, and shall be thoroughly worked around the reinforcement, embedded fixtures, and into the corners of the forms.

5.2.8 Chute Placement

a Concrete may be conveyed by approved chutes. The chute shall be metal or metal-lined wood with sections set at approximately the same slope to assure a continuous uniform flow throughout the length of the chute without segregation or loss of the materials.

b Aluminum shall not be used for construction of metal chutes or for lining of wooden chutes.

c The chute shall be thoroughly cleaned before and after each run. Waste material and flushing water shall be discharged outside the forms.

5.2.9 Pump Placement

a Pump placement of concrete shall be in accordance with ACI 304.2R, Placing Concrete by Pumping Methods.

b Where it is proposed by the Contractor to convey or place concrete by pumping, a description of the proposed pumping system, equipment, and procedures to be used shall be submitted by the Contractor, for information only, to the Con Edison Construction Management include output of system in cubic yards per hour, and pump range in feet, horizontally and vertically.

c In addition, the concrete mix shall contain a super-plasticizer admixture with air-entraining agent providing air content stated in section 4.11.4. Mix shall have adequate lubricating characteristics, including low mix-to-line-surface friction and low internal friction within the mix. Adjustments in mix design necessary to ensure efficiency of operation, including satisfactory pumping rates with smooth even flow shall be made by the Contractor at his expense and at no additional cost to Con Edison.

d Aluminum pipelines shall not be used when placing concrete by pumping.

5.3 Concrete Tests

5.3.1 Construction Management shall coordinate and arrange for the Concrete Testing Laboratory described in section 3.5, to perform all required tests including slump and compression tests to determine the strength classifications of the adjusted design mixes.

5.3.2 During construction, test samples of the concrete mix shall be taken at the hose discharge point by the Testing Laboratory Representative. Test samples used to determine slump and strength requirements shall be taken at the receiving hopper of the pump.

5.4 Cold Weather Requirements

5.4.1 Adequate equipment shall be provided for heating the concrete materials and protecting the concrete during freezing or near freezing weather. The contractor shall conform to the cold weather requirements of ACI 318-08, section 5.12, ACI 306R and ACI 306.1 unless otherwise designated.

5.4.2 If at any time during the progress of the work the surrounding air temperature is 40°F or less, or within 24 hours is expected to drop that low, the water, the aggregate or both should be heated so that the temperature of the concrete when placed is not less than 50°F nor more than 70°F.

5.4.3 Concrete shall not be placed when the outside temperature is below 32° F, unless the work is protected and heat is supplied to raise the ambient temperature to 50° F. During cold weather, the surface of freshly poured concrete shall be suitably protected to prevent the surface from dropping below 50°F for a period of seven days for normal Portland cement concrete, and for a period of three days for high-early strength cement concrete.

5.4.4 In no event shall concrete be deposited on a frozen subgrade, nor shall frozen materials be used in the concrete. Salt, chemicals, or other foreign materials shall not be mixed with the concrete to prevent freezing or to accelerate its setting. Any concrete damaged by freezing shall be removed and replaced at the expense of the Contractor.

5.5 Hot Weather Requirements

5.5.1 Whenever the temperature of the surrounding air exceeds 85°F, freshly poured concrete shall be protected to prevent rapid drying and to avoid high temperatures. The Contractor shall conform to the requirements of ACI 305R and ACI 318-08 section 5.13.

5.5.2 Newly placed concrete shall be maintained at a surface temperature not exceeding 75°F during the curing period.

5.5.3 Any concrete damaged by accelerated evaporation shall be removed and replaced at the expense of the Contractor.

5.5.4 When the ambient temperature exceeds 65°F, a retarding admixture, as specified in section 4.5 Admixtures, shall be added to the 5000-psi concrete mix.

5.6 Consolidation

Procedures for consolidation of concrete shall comply with the requirements of ACI 309R. Concrete shall be placed in layers not over 18 inches deep. Each layer shall be consolidated by mechanical internal-vibrating equipment supplemented by hand spading, rodding and tamping as required. Vibrators shall not be used to transport concrete inside forms. Duration of vibration shall be limited to time necessary to produce satisfactory consolidation without causing objectionable segregation. The vibrator shall not be inserted into lower courses that have begun to set.

5.7 Concrete Finishes

Immediately after removal of the forms all fines and loose material shall be removed; honeycombs, voids and holes over 1/2 inch in diameter shall be cut out to solid concrete, thoroughly wetted, brush-coated with neat cement grout, and filled with cement mortar composed of 1 part Portland cement to 2 parts fine aggregate. Mortar shall be finished flush and in the same plane as adjacent surfaces. Undersides of floor slabs and other exposed surfaces of concrete need not be rubbed free of form marks, unless otherwise designated on the drawings.

6.0 RIGHT TO INSPECT AND IDENTIFY ALL CONCRETE WORK

Con Edison reserve the right to inspect and identify all concrete work at the mixing plant and job site, whether field-poured or precast concrete.

7.0 DESIGN CHANGES MUST OBTAIN APPROVAL

If there are proposed changes to the design, such changes shall be submitted to Construction Management and Distribution Engineering Tools and Structures Engineer for approval prior to fabrication / construction.

Jason Liu, P.E.

REVISON No. 14	FILE:
1) Section 1.0 adds precast. Section 3.4.4, removes fly ash / slag and add admixture. 2) Section 3.4.7, deletes ERA requirements and add NYC-DOT codes. Modify section 3.5.2 and 3.5.5. 3) Add 3.4.3 and 3.4.4 in section 4.1.1 and omit section 4.1.2. 4) Add section 4.2.3, No fly ash / slag is allowed. 5) Section 4.5 and 4.11, add Distribution Engineering Tools and Structures Engineer. Revise section 4.5.1, 4.6.2, 4.6.3, 4.6.5. 4.11.1, 4.11.4 and omit section 4.5.3 6) Renumber 4.9.4 and 4.9.5 7) Revise section 4.7.1. Add type of structures for all concrete and revise the concrete strength for Class II and others to meet requirements of ACI 318-08 and NYC-Building Code. 8) Section 4.11.6 adds ACI 237. 9) Add sections 5.0, 6.0 and 7.0	Purchase and Test Manual No. 6, Section 7
Due for review / revision: 5/2016

Remedial Investigation
Notes

DEFINITIONS

D : Indicates an identified compound in an analysis that has been diluted. This flag alerts the data user to any differences between the concentrations reported in the two analyses.

J : The concentration given is an estimated value.

K : Reported concentration value is proportional to dilution factor and may be exaggerated

L : Sample result is estimated and biased low.

ND : The standard is a non-detectable concentration by the approved analytical method.

NR : Not reported.

NS : No standard.

R : Indicates the reported result is unusable (note: the analyte may or may not be present).

U : The analyte was not detected at the indicated concentration.

UJ : The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be innaccurate or imprecise.

mg/kg : milligrams per kilogram

ppb : parts per billion

ppt : parts per trillion

µg/L : micrograms per liter

µg/m^3 : micrograms per cubic meter of air

STANDARDS

Part 375 Soil Cleanup Objectives : Soil Cleanup Objectives listed in New York State Department of Environmental Conservation (NYSDEC) "Part 375" Regulations [6 New York Codes, Rules and Regulations (NYCRR) Part 375].

Note: Endosulfans ABS represents the detected sum of Endosulfan I, Endosulfan II, and Endosulfan Sulfate.

Exceedances of Part 375 Unrestricted Use Soil Cleanup Objectives (UUSCOs) are highlighted in bold font
Exceedances of Part 375 Restricted Residential Soil Cleanup Objectives (RRSCOs) are highlighted in gray shading
Exceedances of Part 375 Prote4ction of Groundwater Soil Cleanup Objectives (PGWSCOs) are highlighted with an underline

NYSDEC Part 375 PFAS Guidance Values : New York State Department of Environmental Conservation (NYSDEC) Sampling, Analysis and Assessment Of Per- and Polyfluoroalkyl Substances (PFAS) Under NYSDEC's Part 375 Remedial Programs Issued January 2021.

Exceedances of NYSDEC PFAS Unrestricted Use Guidance Values (UUGVs) are highlighted in bold font
Exceedances of NYSDEC PFAS Restricted Residential Guidance Values (RRGVs) are highlighted in gray shading
Exceedances of NYSDEC PFAS Protection of Groundwater Guidance Values (PGWGVs) are highlighted with an underline.

NYSDEC Class GA AWQSGVs : New York State Department of Environmental Conservation (NYSDEC) Technical and Operational Guidance Series (1.1.1): Class GA Ambient Water Quality Standards and Guidance Values (AWQSGVs).

Exceedances of NYSDEC Class GA AWQSGVs are highlighted in bold font.

APPENDIX E
SIGNIFICANT THREAT DETERMINATION DOCUMENTATION

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

https://dec.ny.gov/environmental-protection/site-cleanup/regional-remediation-project-information/environmental-cleanup-email-newsletters

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go "Paperless":

- ☑ Get site information faster and share it easily;
- ☑ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☑ It helps the environment and stretches your tax dollars.

If "paperless" is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

350 Rising

Brownfield Cleanup Program
Site No. C203153
New York City, Bronx County

Department of Environmental Conservation

December 2025

Cleanup Proposed for Brownfield Site Contamination; Public Comment Period Announced

The public is invited to comment on a proposed remedy being reviewed by the New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), to address contamination related to 350 Rising site ("site") located at 350 Grand Concourse, New York City, Bronx County. Please see the map for the site location.

Remedial Investigation Report: The Remedial Investigation Report (RIR) describes the results of the site investigation and recommends development of a cleanup plan to address the contamination that was found. The RIR was submitted by 350 GC Property Owner LLC ("applicant").

Based on the findings of the investigation, NYSDEC in consultation with the New York State Department of Health (NYSDOH) has determined that the site does not pose a significant threat to public health or the environment. This decision is based on the nature of the existing contaminants identified at the site; the potential for off-site migration of contaminants in the groundwater; and the potential for human exposure to site-related contaminants via soil vapors.

How to Comment

NYSDEC is accepting written comments about the proposed plan, called a "Draft Remedial Action Work Plan (RAWP)" for 45 days, from **December 10, 2025 through January 24, 2026.**

- Access the RIR, RAWP, and other project documents online through the DECinfo Locator: https://extapps.dec.ny.gov/data/DecDocs/C203153/.
- Documents also are available at the location(s) identified under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Contact Information" area.

Draft Remedial Action Work Plan

The proposed Restricted Residential Use remedy plan consists of:

- Excavation and off-site disposal of contaminated soil to approximately 5 feet below ground surface across the majority of the site, and to depth ranging from 8 to 25 feet below ground surface in petroleum-contaminated hot spots areas across the site;
- Removing Underground Storage Tanks encountered during excavations;
- Groundwater treatment by application of a chemical treatment additive to treat volatile organic compounds (VOCs) in site groundwater;
- Collecting and analyzing post-cleanup soil, groundwater, and soil vapor samples to evaluate the effectiveness of the cleanup;
- Importing clean material that meets the established Soil Cleanup Objectives for use as backfill;

- Implementation of a Health and Safety Plan and Community Air Monitoring Plan during all ground intrusive activities;
- Implementation of a Site Management Plan (SMP) would also be required for long term maintenance of the remedial systems; and
- Recording of an Environmental Easement to ensure proper use of the site.

The proposed cleanup plan was developed by the applicant after performing a detailed investigation of the site under New York's Brownfield Cleanup Program (BCP).

Next Steps

NYSDEC will consider public comments, revise the remedy plan as necessary, and issue a final Decision Document. NYSDOH must concur with the proposed cleanup. After approval, the proposed cleanup becomes the selected cleanup. The applicant may then design and perform the cleanup action to address the site contamination, with oversight by NYSDEC and NYSDOH.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description

The site is 0.71-acres and is bordered on the west by Grand Concourse, on the south by a nine-story hotel, on the east by a vacant vegetated area, followed by Metro North Railroads tracks, and on the north by residential buildings. Prior to 1935, the site had been used for residential purposes. From 1935 through 2021 the site was occupied by gasoline service stations, auto sales, auto body repair shops. The on-site structures were demolished in summer 2022 and the site is currently vacant.

Planned redevelopment at the site consists of a 14-story mixed commercial and residential use building with a planned affordable housing component. The anticipated cleanup standard is for restricted residential use.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C203153) at:
https://appfactory.dec.ny.gov/DERExternalSearch/ERDSearch

Summary of the Investigation

The primary contaminants of concern at the site are volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals in soil, VOCs, SVOCs, and metals in groundwater and VOCs in soil vapor. This contamination is the result of the presence of historic fill or past site uses.

Brownfield Cleanup Program

New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.
For more information about the BCP, visit:
https://dec.ny.gov/environmental-protection/site-cleanup/brownfield-and-state-superfund-programs/brownfield

Stay Informed with DEC Delivers

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AKRF, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Re: Soil Waste Characterization Results
350 Grand Concourse, Bronx, NY

Dear Mr. Jager:

AKRF, Inc. (AKRF) is pleased to provide 350 GC Property Owner LLC with the laboratory results, sampling methodology, and quality assurance procedures that were employed during the recent waste characterization soil sampling at 350 Grand Concourse in the Mott Haven section of the Bronx, New York ("the Site"). The Site is legally identified as Tax Block 2341, Lot 42. The Site location is provided on Figure 1. This report is intended to be used as a supplement to applications for soil disposal approval(s) at facilities considering accepting excavated materials originating from the Site. The sampling methods performed were to satisfy disposal facilities located in New York, New Jersey, and Pennsylvania, with the exception of seven grid/intervals that did not satisfy Pennsylvania due to the composite sample not being collected across a minimum of four soil borings. This was due to shallow refusal at particular borings or the recovered material being predominately gravel or rock from a boring interval. Specifically, the following grids/intervals did not comply with Pennsylvania requirements: A1(5-10'), A1(10-15'), B1(5-10'), B1(10-15'), B1(15-20'), B1/B2(20-25'), and B2(15-20').

PROJECT DESCRIPTION

Historically, the Site was referred to as Lots 42 and 47; Lot 47 was associated with the historical address 370 Grand Concourse before it was merged with Lot 42 into a single lot (identified as Lot 42). Currently, the Site is a vacant partially concrete-paved lot with no structures.

Historic records indicate that as early as 1891, the Site was developed with several two- to four-story dwellings and from 1908 to 1935, and the southern portion of the Site was depicted as the NYC and HR Railroad Co. with multiple two- to four-story structures. By 1935, the Site was occupied by automotive related businesses/facilities and uses that included various gasoline filling stations, auto sales, and auto body repair with associated gasoline underground storage tanks (USTs) between 1944 and 2021. Between at least 1979 and 2001, the Site was occupied by two gasoline filling stations along the northern and southern portions. Between 2003 and 2021, the Site was occupied by a single gasoline filling station in the central portion. Site operations ceased in November 2021, and all on-site buildings were demolished in July and August 2022. The Site is currently listed on the NYSDEC Petroleum Bulk Storage database with three closed-removed 12,000-gallon gasoline USTs, and five closed-removed 4,000-gallon gasoline USTs. Past owners of the Site include: Mobile Oil Corporation in 1979; Amoco Oil Company in 1990; BP Products North America Inc. in 2008; and 350 Rising LLC from 2021 to 2024. The current Site owner is 350 GC Property Owner LLC (from 2024 to present).

The Site was entered into the New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program on May 4, 2022. The 350 GC Property Owner LLC (Volunteer) recently acquired the Site from 350 Rising LLC (Former Volunteer), and a Brownfield Cleanup Amendment (BCA) Amendment was approved by NYSDEC on February 12, 2025 to reflect the change in the BCP Volunteer entity. It is noted that the Site also has E-Designations with the NYC Office of Environmental Remediation for Hazardous Materials, Air Quality, and Noise.

The proposed development, which will be implemented under a forthcoming Remedial Action Work Plan and submitted to NYSDEC for approval, is still being finalized and is subject to change, but will likely include a 14-story mixed-use commercial (grocery store) and residential building with Site-wide excavation to

approximately 15 feet below ground surface (bgs) with two additional deeper excavations to remove the petroleum contamination beyond the excavation depths for the building (one in grids B1/2 and another in grids B3/B4); however, bedrock may limit the excavation depth in some areas of the Site.

SITE ENVIRONMENTAL HISTORY

PREVIOUS INVESTIGATIONS

The following environmental reports were completed for the Site and are included in Attachment 1:

1. Phase I Environmental Site Assessment – 350 and 370 Grand Concourse, Bronx, NY, AKRF, October 2021
2. Subsurface (Phase II) Investigation Report – 350 and 370 Grand Concourse, Bronx, NY, AKRF, October 2021
3. Phase I Environmental Site Assessment – 350 Grand Concourse, Bronx, NY, AKRF, November 2024
4. Interim Remedial Measure Construction Completion Report (DRAFT) – 350 Grand Concourse, Bronx, NY, AKRF, April 2025
5. Remedial Investigation Report (DRAFT) – 350 Grand Concourse, Bronx, NY, AKRF, July 2025

SITE GEOLOGY

The following geologic and hydrogeological conditions at the Site based on the draft July 2025 Remedial Investigation Report are noted below:

- The stratigraphy of the Site consisted of fill up to approximately 4 to 20 feet bgs, characterized by silt with sand, brick, gravel, asphalt, and glass across the Site. The fill was generally underlain by either apparent native soil (silt, sand, and clay with gravel) to the terminus of the borings (5 to 25 feet bgs) or apparent weathered bedrock encountered between 5 to 24 feet bgs.
- Based on site-specific measurements at the monitoring well locations on February 11, 2022, the groundwater elevation across the Site ranges from approximately 14.5 to 21.5 feet (North American Vertical Datum of 1988), or from approximately 13.9 to 18.1 feet bgs. The inferred groundwater flow direction is southwesterly. Groundwater flow direction beneath the Site can be affected by many factors including subsurface openings or obstructions such as basements, underground utilities, bedrock geology, and other factors. Groundwater in the Bronx is not used as a source of drinking water.

Additional details regarding the Site geology can be found in the draft July 2025 Remedial Investigation Report listed above, and the boring logs from this sampling event, which are included as Attachment 2.

DESCRIPTION OF WASTE CHARACTERIZATION SOIL SAMPLING PROCEDURES

On May 19 through 22, 2025, AKRF oversaw the advancement of borings within grids designated as A1 through A4 and B1 through B4 to depths up to 24 feet bgs to profile material in approximately 75-foot by 50-foot grids, using Geoprobe® direct push probe technologies. A Site plan depicting the boring locations and the Site divided into the aforementioned grids is provided on Figure 2. Taking into consideration the proposed excavation plan and the Site's topography, sample depths were chosen to separately characterize each grid vertically in three intervals to 15 feet bgs (0 - 5 feet bgs, 5 - 10 feet bgs, and 10 - 15 feet bgs), with the exception of grid A4 at 10 - 15 feet bgs, due to all four borings in this grid encountering bedrock before 10.5 feet bgs. Furthermore, soil was characterized beyond the proposed construction excavation depth of 15 feet bgs to characterize two petroleum "hotspots" where the remedial excavation is likely to extend deeper than the construction excavation in grids B1/2 up to 25 feet bgs and B3/4 up to 20 feet bgs.

This waste characterization sampling was performed concurrently with the Supplemental Remedial Investigation (SRI) performed under the BCP. Many of the borings were utilized to collect both SRI and waste characterization samples

Soil samples were collected to provide analytical data per typical disposal facility guidelines at a frequency of one composite and grab sample at an approximate frequency of 700 cubic yards. The composite samples were collected across each sampling interval and analyzed for: semi-volatile organic compounds (SVOCs) plus 20 tentatively identified compounds (TICs) by United States Environmental Protection Agency (EPA) Method 8270; total analyte list metals plus boron and tin by EPA Method 6000/7000 series; toxicity characteristic leaching procedure eight Resource Conservation and Recovery Act (RCRA) metals plus copper, nickel and zinc by EPA Methods 6010 and 7470; polychlorinated biphenyl (PCBs) by EPA Method 8082; pesticides by EPA Method 8081; herbicides by EPA Method 8151; cyanide by EPA Method 9012B; New Jersey extractable petroleum hydrocarbon by EPA Method NJDEP EPH; hexavalent chromium by EPA Method 7196A; RCRA characteristics (ignitability, corrosivity, and reactivity); and total organic halogens by EPA Method 9023. The composite sample from 0 to 5-foot bgs interval for grid B4 (B4_0-5_20250522) was additionally analyzed for paint filter. Minimum five-point composite samples were composited across their respective vertical interval from four borings (per grid and per interval) except as noted in Table 1 below.

Table 1
Borings Utilized for Composite Sample

Soil sample analyses for the grab samples were a minimum of one sample per grid/interval for: volatile organic compounds (VOCs) plus 15 TICs by EPA Method 8260 collected using Encore® sampling devices and total petroleum hydrocarbons [gasoline range organics (GRO) and diesel range organics DRO)] by

EPA method 8015. VOC samples were collected concurrently with the BCP SRI; therefore, included more than one sample per grid/interval. Furthermore, at five locations where per- and polyfluoroalkyl substances (PFAS) were detected during the previous investigation, grab samples were collected and analyzed for synthetic precipitation leaching procedure (SPLP) PFAS.

Gloves worn for sample handling were discarded between sample collections. All borings were backfilled with the soil cuttings. Samples slated for laboratory analysis were placed in laboratory-supplied containers in accordance with EPA protocols. The soil samples were analyzed by Eurofins Laboratories, Inc. of Edison, New Jersey, which is certified by the New York State Department of Health Environmental Laboratory Accreditation Program, the New Jersey Department of Environmental Protection, and the Pennsylvania Department of Environmental Protection. Samples were preserved to maintain a temperature of 4 ºC.

The borings were continuously field screened using a photoionization detector (PID) for evidence of VOCs. The PID was calibrated at the start of each day with 100 parts per million (ppm) isobutylene standard gas. At each boring, AKRF field personnel recorded and documented subsurface conditions. Boring logs are included in Attachment 2. Petroleum-like odors, staining, and/or elevated PID readings up to 2,665 ppm. Non-aqueous phase liquid (NAPL) was observed in one boring, SRI-SB-A1-1B, at 5 feet bgs. PID readings and observations (i.e., odors and the presence of NAPL) is summarized in Table 2 below. No odors or elevated PID readings were observed in the remaining borings.

Table 2
Notable PID Readings and Observations

Boring ID	Boring Depth (feet bgs)	Notable PID Readings		Observations (feet bgs)
		Parts Per Million	Depth (feet bgs)	
SRI-SB-A1-1B	15	6.1 - 148.6	2 - 15	Petroleum-like odors and NAPL at 5
SRI-SB-A1-4B	5^	3.5 - 13.8	1 - 5*	Petroleum-like odors at 2
SRI-SB-A2-3	15	3.4	10 - 15	None
SRI-SB-A3-3	15	0.1 - 19.0	1 - 15	None
SRI-SB-B1-4	24^	3.3 - 762.4	12 - 24*	Petroleum-like odors at 14 - 24*

SRI-SB-B2-3	24^	0.4 - 1,588	3 - 24*	Petroleum-like odors at 10 - 24*
SRI-SB-B2-3B	24^	175.2 - 182.4	20 - 24*[1]	None
SRI-SB-B3-2C	20^	0.7 - 2,665	12 - 20*	Petroleum-like odors at 13 - 15
SRI-SB-B3-4	18^	0.3 - 1,750	1 - 18*	Petroleum-like odors at 10 - 18*
SRI-SB-B4-1B	17^	0.7 - 12.7	1 - 15	Petroleum-like odors at 5 - 10
SRI-SB-B4-2B	20^	2.7 - 1,068	13 - 20*	Petroleum-like odors at 13 - 20*
SRI-SB-B4-3	19^	0.3 - 1,192	0 - 19*	Petroleum-like odors at 12 - 19*
SRI-SB-B4-4	20^	8.2 - 1,274	10 - 20*	Petroleum-like odors at 10 - 16

Notes:
^ - Boring encountered refusal at suspect weathered bedrock.
* - PID reading and/or observations was at the boring terminus.
[1] – Boring advanced directly to 20 feet bgs to collect an additional VOC sample based on the corresponding 'A' boring at the same location with no soil sleeves before 20 feet bgs; therefore, there was no soil to log shallower than 20 feet bgs.

WASTE CHARACTERIZATION SOIL RESULTS

AKRF reviewed the laboratory analytical results to assess the general environmental quality of the soils and determine whether any of the materials mandated handling and disposal as regulated hazardous waste. A summary of the results by chemical group is provided below. A copy of the complete laboratory reports are provided in Attachment 3. A description of quality assurance procedures employed during sample collection is included as Attachment 4.

Volatile Organic Compounds

VOCs were detected in several soil samples, with methylcyclohexane having the highest detection of 30 milligrams per kilogram (mg/kg) in sample SRI-B4-4_13-15_20250522.

Semivolatile Organic Compounds

Polycyclic aromatic hydrocarbons, a subset of SVOCs, were detected in several soil samples, with phenanthrene having the highest detection of 1.8 mg/kg in sample A2_0-5_20250520.

Metals

Metals were detected in all the soil samples, including copper (maximum 121 mg/kg in sample B4_10-15_20250522), lead (maximum 434 mg/kg in sample A4_0-5_20250521), mercury (maximum 0.96 mg/kg in sample B1_5-10_20250519), nickel (maximum 41 mg/kg in sample B1_5-10_20250519), and zinc (maximum 260 mg/kg in sample A4_0-5_20250521).

The concentrations of TCLP metals did not exceed the EPA thresholds which would require management as regulated hazardous waste.

Polychlorinated Biphenyls, Pesticides, and Herbicides

No PCBs or herbicides were detected in any of the soil samples.

Pesticides were detected in three samples (A2_0-5_20250520, A2_5-10_20250520, and A2_10-15_20250520), with dieldrin having the highest detection of 0.011 mg/kg in sample A2_5-10_20250520.

Extractable Petroleum Hydrocarbons and Total Petroleum Hydrocarbons

Total EPH was detected in several soil samples with a maximum detection of 470 mg/kg in sample B2_5-10_20250520.

TPH GRO was detected in several soil samples with a maximum detection of 1,000 mg/kg in sample B2_17-19_20250519.

TPH DRO was detected in several soil samples with a maximum detection of 670 mg/kg in sample B2-2_3-5_20250520.

Total Organic Halogens

No total organic halogens were detected in any of the soil samples.

Synthetic Precipitation Leaching Procedure Per- and Polyfluoroalkyl Substances

SPLP PFAS was detected in all five samples collected with perfluorooctanesulfonic acid (PFOS) having the highest detection of 66.7 nanograms per liter in sample SB-01_0-2_20250520.

The full laboratory reports for samples collected as part of waste characterization sampling are included in Attachment C. A description of the quality assurance procedures is included in Attachment D. These results of the waste characterization/delineation soil sampling should be presented to disposal facilities for classification and acceptance in accordance with the individual facility permit requirements and State and Federal regulations.

LIMITATIONS

The findings set forth in this report are strictly limited in scope and time to the date of the evaluation described herein. The findings and recommendations presented in the report are based solely on the services and any limitations described in this report.

This report contains conclusions that are based on the analysis of data collected at the time and locations noted in the report through intrusive sampling. However, further investigation might reveal additional data or variations of the current data, which may differ from our understanding of the conditions presented in this report and require the enclosed recommendations to be reevaluated or modified.

Chemical analyses have been performed for specific parameters during this investigation, as summarized in the text and data. It should be noted that additional chemical constituents, not searched for during this investigation, may be present at the site. Due to the nature of the investigation and the limited data available, no warranty, expressed or implied, shall be construed with respect to undiscovered liabilities. The presence of biological hazards, radioactive materials, lead-based paint and asbestos-containing materials was not investigated.

This report may be based solely on data collected, conducted, and provided by AKRF. No warranty is expressed or implied by usage of such data. Such data may be included in other investigation reports or documentation. In addition, these reports may have been based upon available previous reports, historical records, and documentation from federal, state and local government agencies, personal interviews, and geological mapping. This report is subject, at a minimum, to the limitations of the previous reports, historical documents, availability and accuracy of collected documentation, and personal recollection of those persons interviewed. In certain instances, AKRF has been required to assume that the information provided is accurate with limited or no corroboratory evidence.

This report is intended for the use solely by 350 GC Property Owner LLC and its Construction Management Team. AKRF accepts no responsibility for damages incurred by third parties for any decisions or actions taken based on this report. This report must be used, interpreted, and presented in its entirety.

If you have any questions or require further information, please contact Kenneth Wiles at (646) 388-9528 or kwiles@akrf.com.

Sincerely,

AKRF, Inc.

Marc Godick, QEP
