

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

<https://dec.ny.gov/environmental-protection/site-cleanup/regional-remediation-project-information/environmental-cleanup-email-newsletters>

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

101 East 150th Street

Brownfield Cleanup Program

Site No. C203154

Bronx County, New York

Department of
Environmental
Conservation

November 2025

Cleanup Action Completed at Brownfield Site

Action has been completed to address the contamination related to the 101 East 150th Street site ("site") located at 101 East 150th Street, Bronx, New York under New York State's Brownfield Cleanup Program (BCP). Please see the map for the site location.

Cleanup activities were performed by 586 River Ave., LLC ("Applicant") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). The applicant(s) has submitted a proposed Final Engineering Report (FER) for NYSDEC review which states that cleanup requirements have been or will be achieved to fully protect public health and the environment for the proposed site use.

- Access the project documents online through the DECinfo Locator: <https://extapps.dec.ny.gov/data/DecDocs/C203154/>
- Documents also are available at the location(s) identified under "Where to Find Information."

Highlights of the Site Cleanup

The following activities have been or will shortly be completed to achieve the remedial action objectives:

- Excavation - Remedial excavations included soil/fill to 2 feet below ground surface (ft bgs), soil exceeding Restricted Residential Soil Cleanup Objectives (RRSCOs); and excavation of supplemental areas to 5 and 10 ft bgs to remove soil with petroleum-related volatile organic compounds (VOCs) and chlorinated VOCs in excess of Protection of Groundwater Soil Clean-up Objectives (PGSCOs). Approximately 13,875 tons of soil was removed.
- In-Situ (in-place) Chemical Oxidation (ISCO) - ISCO is a technology used to treat residual VOCs in groundwater. A total of 7,200 pounds of chemical oxidant was directly applied into VOC source area excavations.
- Sub-slab Depressurization System (SSDS) - Installation of an active Sub-slab Depressurization System (SSDS) underneath the building to protect against soil vapor intrusion.
- Soil Vapor Extraction (SVE) System - Installation of a Soil Vapor Extraction (SVE) System that will evacuate residual soil vapor VOCs from the subsurface and treating them before discharging to the atmosphere.
- Site Cover System - The new development will maintain a site cover, which consists of a 12-inch clean granular sub-base beneath the building footprint, 4-inch placed concrete on a 6-inch sub-base in sidewalk areas, and two feet of clean soil in open space and landscaped areas. The site cover was placed over a demarcation layer, with the upper 6 inches of the soil of sufficient quality to maintain a vegetation layer.
- Development of a Site Management Plan (SMP) for long-term management of residual contamination as required by the Environmental Easement, including plans for: (1) Institutional and Engineering Controls (IC/ECs); (2) monitoring; (3) operation and maintenance; and (4) reporting.
- An Environmental Easement was recorded to prevent future exposure to any contamination remaining at the site and to ensure implementation of the SMP.

Next Steps

When NYSDEC approves the FER, it will be made available to the public (see "Where to Find Information"). NYSDEC then will issue a Certificate of Completion (COC) that will be announced in a fact sheet. The applicant(s) would be able to redevelop the site after receiving a COC. In addition, the applicant(s) will be eligible for tax credits to offset a portion of the costs of performing cleanup activities and for redevelopment of the site.

Site Description

The Site is located at 101 East 150th Street, in the Lower Concourse neighborhood of Bronx County, New York and is identified Block 2354, Lot 1 on the New York City (NYC) Tax Map. The Site is situated on an approximately 2.27-acre area and is bound to the north by a commercial parking lot, to the east by Gerard Avenue, to the south by East 150th Street, and to the west by River Avenue. The Site is located in the Bronx Community District (CD) 4 in an area zoned for light manufacturing (M1-2) and commercial (C2-4 and C4-4) use. A school is a permitted use in this zoning district by special permit granted by the NYC Board of Standards and Appeals (BSA) under a special permit dated, March 13, 2023.

Past operations include the use of the Site as athletic fields, as a lumber storage yard, as a shoe factory (National Shoes), as an office and warehouse, as an electronic parts manufacturer (Welbilt Electronic Die Corp/Wedtech), then as a commercial self-storage facility (American Storage/Treasure Island Storage) and a school (New York City Children's Center) with parking spaces.

The Applicant demolished the previous building and constructed a new, 304,711 gross square-foot, six-story school building with a cellar. The school is scheduled to receive its temporary certificate of occupancy in March 2026, open for staff in May 2026, begin instruction of students in August 2026.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C203154) at:

<https://appfactory.dec.ny.gov/DERExternalSearch/ERDSearch>

Brownfield Cleanup Program

New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://dec.ny.gov/environmental-protection/site-cleanup/brownfield-and-state-superfund-programs/brownfield>
