

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Draft Investigation Work Plan for Brownfield Site Available for Public Comment

The public is invited to comment on a draft work plan being reviewed by the New York State Department of Environmental Conservation (NYSDEC) to investigate the 608-610 East Fordham Road site ("site") located at 608-610 East Fordham Road, Bronx, NY. Please see the map for the site location.

Draft Investigation Work Plan: The draft investigation work plan, called a "Remedial Investigation Work Plan," (RIWP) was submitted to NYSDOH under New York's Brownfield Cleanup Program. The investigation will be performed by GC Fordham Road Development LLC ("applicant") with oversight by NYSDOH and the New York State Department of Health (NYSDOH).

How to Comment: NYSDOH is accepting written comments about the Draft RIWP for 30 days, from **June 21, 2023 through July 21, 2023**.

- Access the RIWP and other project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C203164/>.
- Documents also are available at the locations identified at left under "Where to Find Information."
- Please submit comments to the NYSDOH project manager listed under Project-Related Questions in the "Who to Contact" area at left.

Highlights of the Proposed Site Investigation: The investigation will define the nature and extent of contamination in soil, surface water, groundwater and any other parts of the environment that may be affected.

Previous investigations have detected semi-volatile organic compounds (SVOCs) and metals in soil, volatile organic compounds (VOCs) in soil vapor on site.

Key components of the investigation work include:

- Drilling and sampling soil borings to identify possible on-site sources of contamination;
- Collecting soil vapor samples; and
- Installing and sampling ground water wells to monitor impacts from areas of concern.

Next Steps: NYSDOH will consider public comments, revise the plan as necessary, and approve the work plan. NYSDOH must concur with the plan. After the work plan is approved, the activities detailed in the work plan will be implemented. When the investigation is completed, a report will be prepared and submitted to NYSDOH that summarizes the results. NYSDOH will review the report, make any necessary revisions and, if appropriate, approve the report.

BROWNFIELD CLEANUP PROGRAM

After the investigation, a proposed cleanup plan, called a "Draft Remedial Action Work Plan" will be developed. The cleanup plan will include an evaluation of the proposed site remedy or recommend a no action or no further action alternative. The goal of the cleanup plan is to ensure the protection of public health and the environment. NYSDEC will present the proposed cleanup plan to the public for its review and comment during a 45-day comment period.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The site is 0.27-acres and is bounded by East Fordham Road to the north, Hughes Avenue to the east, a residential building to the south, and a commercial building to the west. It is currently developed with a building that features a vacant two-story portion and a one-story portion occupied by Fordham Car Spa. Fordham Car Spa operates as a car wash, detailer, and oil change/quick lube servicer. Previously, the site was used for various residential and commercial purposes since 1901, including an automotive fueling and service between 1945 and 1977. The planned redevelopment will include demolition of existing structures and construction of an eight-story residential building with a full cellar.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C203164) at:

<https://www.dec.ny.gov/cfm/external/index.cfm?pageid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of

contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business, or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
