DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	9/1/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 70-85°F, Overcast/Rain, RH: 94%, Pres: 30.00 in Hg, Wind: SW @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:15

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **GPRS** - GPR equipment **Platinum Scaffolding** - Hand tools	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce GPRS - 2 Technicians Platinum Scaffolding - 6 Laborers

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- A Ground Penetrating Radar (GPR) investigation was conducted onsite to scan for underground utilities and anomalies.
- Construction of perimeter fencing around the Site perimeter continued.

CAMP data evaluation: CAMP was implemented from 08:00-10:15 and 14:00-15:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. CAMP started late and was paused due to inclement weather (i.e. rain). No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: None

Import: None.

Sampling Performed: None

Upcoming work activities anticipated:

- Continue installation of construction fencing around perimeter of Site.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Platinum continued installation of construction fencing around the Site perimeter.
- Platinum began painting the perimeter construction fencing.
- RB Tree Servicing performed tree removal throughout the Site.

CAMP data evaluation: CAMP was implemented from 7:00-16:00 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: None

Import: None.

Sampling Performed: None

Upcoming work activities anticipated:

- Continue installation of construction fencing around perimeter of Site.
- Removal of trees across Site.

PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 73-84°F, Overcast, RH: 88%, Pres: 29.85 in Hg, Wind: W @ 6-15 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-16:00

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Platinum Scaffolding** - Hand tools **RB Tree Servicing** - Bobcat Skid Steer 2x	Roux D.P.C. - Matt Olivieri NRP - Ed Pierce Platinum Scaffolding (Platinum) - 5 Laborers RB Tree Servicing - 6 Laborers

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Platinum continued installation of construction fencing around the Site perimeter.
- RB Tree Servicing performed tree removal throughout the Site.
- A construction trailer was mobilized and placed in the adjoining parking lot.

CAMP data evaluation: CAMP was implemented from 7:30-15:00 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The downwind Dusttrak PM10 sensor failed and did not record data for the day. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: Four trucks were loaded with tree trucks removed from the Site for offsite disposal.

Import: None.

Sampling Performed: None

Upcoming work activities anticipated:

- Continue installation of construction fencing around perimeter of Site.

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Platinum Scaffolding** - Hand tools **Bauer Structures** - John Deere Excavator - Hand tools	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce Bauer Structures (Bauer) - Branden Duley - 8 Laborers Platinum Scaffolding (Platinum) - 6 Laborers Meridian Surveyors (Meridian) - 1 Surveyor

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Platinum continued installation of construction fencing around the Site perimeter.
- Bauer mobilized a trailer containing hand tools and equipment to the adjoining parking lot.
- Bauer mobilized an excavator and began removing pre-existing non-construction fencing across Site perimeter.
- Meridian surveyed elevations across the Site to prepare for excavation.

CAMP data evaluation: CAMP was implemented from 7:15-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The DW CAMP station experienced VOC and/or PM10 sensor failure during parts of the day. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: None.

Import: None.

Sampling Performed: None

Upcoming work activities anticipated:

- Begin excavation work and concrete demolition removal across the Site.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer continued removing pre-existing non-construction fencing across Site perimeter.
- Bauer began breaking up the sidewalk across the Site perimeter.

CAMP data evaluation: CAMP was implemented from 7:00-15:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: One load of garbage and non-construction fencing was removed from the Site.

Import: None.

Sampling Performed: None

Upcoming work activities anticipated:

- Begin excavation work and concrete demolition removal across the Site.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer continued breaking up the sidewalk across the Site perimeter.
- Bauer stockpiled concrete across the site for staging purposes.
- RA Engineering installed vibration sensors and cameras across the Site perimeter.
- Bauer began marking out future excavation grids with spray paint.
- Bauer installed new construction parking signs across St. Paul's Place.
- Bauer received shipment of silt socks to lay around the perimeter of the Site for erosion and sediment control.

CAMP data evaluation: CAMP was implemented from 7:00-15:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: None.

Import: None.

Sampling Performed: None

Upcoming work activities anticipated:

- Begin excavation work and continue concrete demolition removal across the Site to prepare for soil exports.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer set up hydrant splitter and hoses to prepare for truck wheel washing.
- Bauer began excavating soil from B-2 and stockpiling it in B-5 to prepare for export.
- Bauer continued to install parking signs across the Site perimeter.
- Bauer's surveyor was onsite to record elevations across the Site for SOE.
- NAESA Electricians connected trailers to power.

CAMP data evaluation: CAMP was implemented from 7:00-13:00 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: One load of garbage was exported by Cardella for disposal.

Import: None.

Sampling Performed: None

Upcoming work activities anticipated:

- Continue soil excavation.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer offloaded H-piles that were delivered to Site.
- Platinum Scaffolding reinstalled some perimeter fencing across the Site area.
- TurnIQ onsite to prepare solar panel installation for turnstile entrance to Site.
- NAESA Electricians continued connecting trailers to power.
- Cardella dropped off an empty 30 CY roll off container for garbage.

CAMP data evaluation: CAMP was implemented from 7:00-12:45 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: None.

Import: None.

Sampling Performed: None

Upcoming work activities anticipated:

- Continue soil excavation.

- Bauer offloaded more H-piles that were delivered to Site.
- Bauer loaded 28 trucks of remedial soil previously excavated from the Southern perimeter of the Site.
- NAESA Electricians continued connecting trailers to power.

CAMP data evaluation: CAMP was implemented from 7:00-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: 28 loads of soil excavated from grids B1 (0'-3'), B2 (0'-3'), B4 (0'-3') and B5 (0'-3') were disposed offsite to Pocono Sand and Stone.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer offloaded lumber that was delivered to Site.
- Bauer loaded 27 trucks of remedial soil previously excavated from the Southern perimeter of the Site.
- Bauer received 4 loads of ¾" stone from Tilcon Mt Hope Quarry (approved import facility)
- NAESA Electricians continued connecting trailers to power.

CAMP data evaluation: CAMP was implemented from 7:00-15:00 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The downwind meter did not store data from 7:00-10:15, but recorded all data after 10:15. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: 27 loads of soil excavated from grids A3 (0-2'), A2 (0-2'), A5 (0-2'), A6 (0-2'), B7 (0-3'), B8 (0-3'), D4 (0-6') and D6 (0-6') were disposed offsite to Pocono Sand and Stone.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer chipped apart concrete and stone across the Site to prep for export.
- Bauer loaded 27 trucks of remedial soil previously excavated from the Southern perimeter of the Site.
- NAESA Electricians continued connecting trailers to power.
- RA Engineering secured targets to the adjacent buildings.

CAMP data evaluation: CAMP was implemented from 6:45-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 31 loads of soil excavated from grids A1 (0-2'), A4 (0-2'), B7 (0-3'), F1 (0-8'), and B6 (0-3') were disposed offsite to Bayshore Soils Management, Woodbridge, NJ.
- Cardella took off a load of garbage from the Site.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer broke concrete across the Site to prep for export.
- Bauer loaded 41 trucks of remedial soil previously excavated from the Eastern and Western perimeter of the Site.
- Meridian surveyed points across the Site for remedial excavation elevations.

CAMP data evaluation: CAMP was implemented from 6:45-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 30 loads of soil excavated from grids B9 (0-3'), C2 (0-4'), F1 (0-8'), D3 (0-6'), D4 (0-6') and D6 (0-6') were disposed offsite to Bayshore Soils Management, Woodbridge, NJ.
- 11 loads of soil excavated from grids B10 (0-3'), C2 (0-4'), B9 (0-3'), and B11 (0-3') were disposed offsite to Pocono Sand and Stone, Sterling, PA.

Sampling Performed: Endpoint samples EP-A4 (0-2), EP-A5 (0-2), EP-B7 (0-3), EP-B8 (0-3), and EP-B10 (0-3) were collected and sent to Eurofins Laboratory for analysis (VOCs, SVOCs, metals, PCBs, pest/herb, and PFAS).

Upcoming work activities anticipated:

- Continue soil excavation and offsite disposal.
- Survey to confirm remedial excavation depths.
- End point soil sampling from completed remedial excavation grids.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer broke down concrete and stone across the Site to prep for export.
- Bauer loaded 19 trucks of remedial soil previously excavated from the Eastern and Western perimeter of the Site.
- Meridian surveyed points across the Site for remedial excavation elevations.
- Bauer began driving H-piles across the Site to prep for SOE.
- Bauer discovered a previously unknown buried UST within excavation grid D1.
- NAESA continued to connect electrical together to provide onsite power to the trailer and Site.

CAMP data evaluation: CAMP was implemented from 6:45-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 19 loads of soil excavated from grids D4 (0-6') and D1 (0-6') were disposed offsite to Pocono Sand and Stone, Sterling, PA.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer broke down concrete and stone across the Site to prep for export.
- Bauer began driving H-piles across the Site to prep for SOE.
- Bauer discovered a second previously unknown buried UST within excavation grid C1.
- RA Engineering was onsite to supervise H-pile driving.

CAMP data evaluation: CAMP was implemented from 7:00-17:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- Cardella trucked one load of garbage offsite.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer continued driving H-piles across the Site to prep for SOE.
- RA Engineering was onsite to supervise H-pile driving.
- Meridian was onsite to record elevations on-Site.

CAMP data evaluation: CAMP was implemented from 7:00-17:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal: None

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA	0	85
Bayshore Soils Management, Woodbridge, NJ	0	61

Import: None.

Import Facility	Loads Imported Today	Cumulative Loads Imported
Tilcon Mt Hope Quarry (3/4" stone)	0	4

Sampling Performed: Endpoint sample EP-B3 (0-3) was collected today and will be sent to Eurofins Laboratory for analysis (VOCs, SVOCs, metals, PCBs, pest/herb, and PFAS) tomorrow (stored overnight at 32C).

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer continued driving H-piles across the Site to prepare for SOE.
- Bauer chipped boulders into smaller pieces across the Site.
- RA Engineering was onsite to supervise H-pile driving.
- Meridian recorded elevations on-Site.
- NAESA continued to connect power to the trailers and worked with Bauer to construct a shanty around the electrical boxes to protect them during construction.

CAMP data evaluation: CAMP was implemented from 7:00-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 14 loads of soil from D2 (0'-6'), D4 (0'-6'), D6 (0'-6'), B3 (0'-3'), and B2 (0'-3') were exported to Pocono Sand and Stone in South Sterling, PA.
- 9 loads of soil from D2 (0'-6'), B6 (0'-3'), and B11 (0'-3') were exported to Bayshore Soils Management in Woodbridge, NJ.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer assisted PAL Environmental, a licensed tank removal contractor, with the removal / excavation of two previously unidentified 550-gallon underground storage tanks (USTs) encountered in grid C1 and D1. No elevated PID readings, staining, or odors were observed in the soil surrounding the USTs during removal activities.
- PAL Environmental performed cutting, cleaning and removal of the two USTs for off-site disposal.
- PAL Environmental disposed of 1,124 gallons of non-hazardous oily water to Clean Waters of New York.
- PAL Environmental disposed of 300 pounds of non-hazardous tank bottom sludge, and oily rags to Republic Environmental Systems.
- Bauer performed general Site maintenance
- Meridian recorded elevations on-Site.

CAMP data evaluation: CAMP was implemented from 7:00-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- None.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- NRP assisted with setting up a tent for the Mayor's groundbreaking ceremony tomorrow.

CAMP data evaluation: CAMP was implemented from 7:15-11:00 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. Heavy rain caused the stations to be turned off at 11:00, and rain continued for the rest of the day. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- None.

- Bauer broke up boulders into smaller pieces across the Site.
- Bauer welded equipment to use for driving H-piles.

CAMP data evaluation: CAMP was implemented from 7:00-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The upwind CAMP station did not record data for the day due to technical issues. No exceedances of particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 10 loads of soil from D1 (0'-6'), D2 (0'-6') and B13 (0'-3') were trucked to Pocono Sand and Stone of South Sterling, PA.
