PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/01/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 64-76°F, Overcast, RH: 92%, Pres: 30.06 in Hg, Wind: S @ 0-5 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors **Meridian** - Survey Equipment	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers, 1 Welder Meridian - 1 Surveyor SiteWatch - 2 Technicians

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported 6 loads of soil to Bayshore Soils Management in Woodbridge, NJ.
- Bauer broke up boulders into smaller pieces across the Site.
- Bauer welded equipment to use for driving H-piles.
- SiteWatch set up cameras across the Site.

CAMP data evaluation: CAMP was implemented from 7:00-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The upwind CAMP station did not record PM10 data for the day due to technical issues. No exceedances of particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 6 loads of soil from D3 (0'-6'), D5 (0'-6') and B15 (0'-3') were trucked to Bayshore Soils Management in Woodbridge, NJ.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA	0	109
Bayshore Soils Management, Woodbridge, NJ	6	76

Import: None.

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/02/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 66-83°F, Partly Cloudy, RH: 88%, Pres: 29.93 in Hg, Wind: SW @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers NAESA - 2 Electricians

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported 13 loads of soil to Pocono Sand and Stone in South Sterling, PA.
- Bauer broke up boulders into smaller pieces across the Site.
- Bauer welded equipment to use for driving H-piles.
- Bauer continued to drive H piles.
- NAESA continued to connect trailers to power.
- NAESA received an onsite job trailer delivery.

CAMP data evaluation: CAMP was implemented from 7:00-15:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The upwind CAMP station did not record PM10 data for the day due to technical issues. The rental company was contacted, and a replacement will be delivered to the Site tomorrow. No exceedances of particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 13 loads of soil from D4 (0'-6'), D6 (0'-6'), A2 (2'-4') and A5 (2'-4') were trucked to Pocono Sand and Stone in South Sterling, PA.

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/05/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 52-69°F, Clear, RH: 95%, Pres: 29.98 in Hg, Wind: W @ 5-15 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers RA Engineering - 1 Engineer

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported 8 loads of rock to Pocono Sand and Stone in South Sterling, PA.
- Bauer broke up boulders into smaller pieces across the Site.
- NRP conducted general Site maintenance and housekeeping across the Site boundary perimeter.
- RA Engineering was onsite to oversee potential installation of SOE.

CAMP data evaluation: CAMP was implemented from 7:15-15:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The upwind CAMP station did not record PM10 data for the day due to technical issues. A replacement was delivered to the Site. No exceedances of particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 8 loads of exclusively rock from across the Site were trucked to Pocono Sand and Stone in South Sterling, PA.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA	0	122
Bayshore Soils Management, Woodbridge, NJ	0	76
Pocono Sand and Stone of South Sterling, PA (Rock only)	8	8

Import: None.

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/06/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 47-64°F, Clear, RH: 73%, Pres: 30.14 in Hg, Wind: NW @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers RA Engineering - 1 Engineer AKRF - 1 Inspector

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported 5 loads of soil to Pocono Sand and Stone in South Sterling, PA.
- Bauer broke up boulders into smaller pieces across the Site.
- Bauer attempted to drive H piles across the Site.
- Bauer got concrete blocks delivered to barricade the fuel cube.
- RA Engineering was onsite to oversee potential installation of SOE.
- AKRF was onsite to conduct SWPPP inspection.

CAMP data evaluation: CAMP was implemented from 7:15-15:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The upwind CAMP station did not record PM10 data for the day due to technical issues. A replacement was delivered to the Site. No exceedances of particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 5 loads of soil from A2 (2'-4'), A5 (2'-4') and B3 (3'-5') were trucked to Pocono Sand and Stone in South Sterling, PA.

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/07/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 45-67°F, Clear, RH: 83%, Pres: 30.07 in Hg, Wind: S @ 0-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers RA Engineering - 1 Engineer Meridian - 1 Surveyor

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported 2 loads of soil to Bayshore Soils Management in Woodbridge, NJ.
- Bauer exported 1 load of soil to Pocono Sand and Stone in South Sterling, PA.
- Bauer broke up boulders into smaller pieces across the Site.
- Bauer attempted to drive H piles across the Site.
- Cardella exported one load of garbage offsite.
- RA Engineering was onsite to oversee potential installation of SOE.

CAMP data evaluation: CAMP was implemented from 6:45-15:00 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The new upwind CAMP station recorded data in the morning then began experiencing technical issues at 10:15 and did not record PM10 data for the remainder of the day. No exceedances of particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 2 loads of soil from C2 (0'-4') were trucked to Bayshore Soils Management in Woodbridge, NJ.
- 1 load of soil from B3 (3'-5') was trucked to Pocono Sand and Stone in South Sterling, PA.
- 1 load of garbage was exported offsite by Cardella.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA	1	128
Bayshore Soils Management, Woodbridge, NJ	2	78
Pocono Sand and Stone of South Sterling, PA (Rock only)	0	8

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/07/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 45-67°F, Clear, RH: 83%, Pres: 30.07 in Hg, Wind: S @ 0-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

Import: None.

Import Facility	Loads Imported Today	Cumulative Loads Imported
Tilcon Mt Hope Quarry (3/4" stone)	0	4

Sampling Performed: Samples NSW-F1(0-8), WSW-F1(0-8), WSW-D1_UST, and WSW-C1_UST were collected. NSW-F1(0-8) and WSW-F1(0-8) were analyzed for the full suite of contaminants, and WSW-D1_UST and WSW-C1_UST were tested for total metals.

Upcoming work activities anticipated:

- Continue soil excavation and offsite disposal.
- Survey to confirm remedial excavation depths.
- End point soil sampling from completed remedial excavation grids.

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/08/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 55-75°F, Clear, RH: 88%, Pres: 29.81 in Hg, Wind: W @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported 8 loads of soil to Pocono Sand and Stone in South Sterling, PA.
- Bauer broke up boulders into smaller pieces across the Site.
- Bauer attempted to drive H piles across the Site.
- Bauer constructed fencing around the nearby trees adjacent to the Site.

CAMP data evaluation: CAMP was implemented from 7:15-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The upwind CAMP station did not record PM10 data for the day due to technical issues. Roux is working with the manufacturer to troubleshoot the upwind station dust meter. No exceedances of particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 8 loads of soil from B3 (3'-5') and A5 (2'-4') were trucked to Pocono Sand and Stone in South Sterling, PA.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA	8	136
Bayshore Soils Management, Woodbridge, NJ	0	78
Pocono Sand and Stone of South Sterling, PA (Rock only)	0	8

Import: None.

Import Facility	Loads Imported Today	Cumulative Loads Imported
Tilcon Mt Hope Quarry (3/4" stone)	0	4

PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 55-75°F, Clear, RH: 88%, Pres: 29.81 in Hg, Wind: W @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

Sampling Performed: Samples EP-D3(0-6), EP-D4(0-6), EP-D5(0-6), EP-D6(0-6), WSW-D5(0-6), EP-C2(0-4), WSW-D3(0-6), ESW-D4(0-6), ESW-F1(0-8), EP-F1(0-8), and SSW-F1(0-8), were collected and analyzed for the full suite of contaminants. Sample EP-A2(2-4) was collected and analyzed for mercury, the only contaminant that did not meet the SCOs in the previous sample EP-A2(0-2).

Upcoming work activities anticipated:

- Continue soil excavation and offsite disposal.
- Survey to confirm remedial excavation depths.
- End point soil sampling from completed remedial excavation grids.

PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 50-72°F, Clear, RH: 79%, Pres: 30.10 in Hg, Wind: W @ 0-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	06:45-15:45

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors **Meridian Surveyors** - Survey equipment	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers Meridian Surveyors - 1 Surveyor

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported 25 loads of soil to Pocono Sand and Stone in South Sterling, PA.
- Bauer broke up boulders into smaller pieces across the Site.
- Bauer attempted to drive H piles across the Site.
- Bauer received a delivery of construction materials from Celtic Building.
- Meridian was onsite to survey elevations across the Site.

CAMP data evaluation: CAMP was implemented from 6:45-15:45 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. The upwind CAMP station did not record PM10 data for the day due to technical issues. Roux is working with the manufacturer to troubleshoot the issue. No exceedances of particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 12 loads of overburden soil from WC-15 and WC-16 were trucked to Pocono Sand and Stone in South Sterling, PA.
- 13 loads of soil from D4 (0'-6') and D6 (0'-6') were trucked to Pocono Sand and Stone in South Sterling, PA.

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/12/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 54-71°F, Partly Cloudy, RH: 80%, Pres: 29.8 in Hg, Wind: N @ 0-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-13:15

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- NRP began the setup of their turnstile to access the site.

CAMP data evaluation: Due to lack of soil excavating work, CAMP was not implemented during the work day.

Offsite Disposal:

- None.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA *(BCP Remedial Soil)*	0	149
Bayshore Soils Management, Woodbridge, NJ *(BCP Remedial Soil)*	0	78
Pocono Sand and Stone of South Sterling, PA *(Rock only)*	0	8
Pocono Sand and Stone of South Sterling, PA *(Non-Remedial Soil)*	0	12
Bayshore Soils Management, Woodbridge, NJ *(Non-Remedial Soil)*	0	0

Import: None.

Import Facility	Loads Imported Today	Cumulative Loads Imported
Tilcon Mt Hope Quarry (3/4" stone)	0	4

Sampling Performed: Roux collected EP-B3(3-5) for analysis of Manganese and EP-A5(2-4) for analysis of Barium.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer trucked 16 loads of soil to Bayshore.
- Representatives from NYCDOB were onsite to observe the general Site conditions.
- Bauer sloped material across D1 and D2 to prevent safety issues.
- AKRF was onsite to conduct a SWPPP inspection.
- Site Watch was onsite to continue setting up security cameras.

CAMP data evaluation: CAMP was implemented from 7:00-15:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 8 loads of soil from B12(0-3) and B15(0-3) were trucked to Bayshore Soils Management in Woodbridge, NJ.
- 8 loads of soil from D1 (0-6) were trucked to Bayshore Soils Management in Woodbridge, NJ.

PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 63-79°F, Partly Cloudy, RH: 90%, Pres: 29.83 in Hg, Wind: W @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors **Meridian Surveyors** - Survey equipment	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley Meridian Surveyors - 1 Surveyor

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- No construction activity from Bauer took place today.
- Meridian Surveyors were onsite to assist with shooting elevation points and verifying remedial excavation depth so Roux could conduct endpoint sampling.
- NYC HPD was onsite for a spot inspection of the Site.

CAMP data evaluation: CAMP was implemented from 7:00-14:10 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- None.

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/15/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 54-66°F, Clear, RH: 82%, Pres: 30.14 in Hg, Wind: N @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 1 Laborer NAESA - 2 Electricians

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer trucked 20 loads of soil to Bayshore.
- Bauer removed concrete underneath truck tracking pad for future export.
- NAESA continued to connect trailers to power.
- Representatives from NYCDOB were onsite to observe the general Site conditions.

CAMP data evaluation: CAMP was implemented from 7:00-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 9 loads of soil from B12(0-3) and B15(0-3) were trucked to Bayshore Soils Management in Woodbridge, NJ.
- 1 load of soil from B14(0-3) and B15(0-3) was trucked to Bayshore Soils Management in Woodbridge, NJ.
- 1 load of soil from B14(0-3) was trucked to Bayshore Soils Management in Woodbridge, NJ.
- 1 load of soil from D1 (0-6) and D2(0-6) was trucked to Bayshore Soils Management in Woodbridge, NJ.
- 3 loads of soil from D1 (0-6) and C1 (0-6) were trucked to Bayshore Soils Management in Woodbridge, NJ.
- 2 loads of soil from B13(0-3) and B14(0-3) were trucked to Bayshore Soils Management in Woodbridge, NJ.
- 3 loads of soil from C1 (0-6) were trucked to Bayshore Soils Management in Woodbridge, NJ.

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/16/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 50-74ºF, Cloudy, RH: 83%, Pres: 29.87" in Hg, Wind: S @ 9-19 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-14:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors	Roux D.P.C. - Maya Allaire NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 1 Laborer NAESA - 2 Electricians

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer trucked 8 loads of soil to Bayshore.
- Bauer performed Site maintenance including grading.

CAMP data evaluation: CAMP was implemented from 7:00-14:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 4 loads of soil from A5 (4-6) were trucked to Bayshore Soils Management in Woodbridge, NJ.
- 2 loads of soil from B5 (3-5) were trucked to Bayshore Soils Management in Woodbridge, NJ.
- 1 load of soil from B4 (3-7) and B2 (3-7) was trucked to Bayshore Soils Management in Woodbridge, NJ.
- 1 load of soil from B2N (3-7) was trucked to Bayshore Soils Management in Woodbridge, NJ.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA *(BCP Remedial Soil)*	0	149
Bayshore Soils Management, Woodbridge, NJ *(BCP Remedial Soil)*	4	118
Pocono Sand and Stone of South Sterling, PA *(Rock only)*	0	8

PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 42-64°F, Clear, RH: 87%, Pres: 30.49" in Hg, Wind: NE @ 4-7 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:30

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors **Meridian Surveyors** - Surveying equipment	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 3 Laborers NAESA - 2 Electricians

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer trucked 8 loads of soil to Bayshore, and 13 loads of soil to Pocono.
- Bauer performed Site maintenance including grading.
- Meridian Surveyors were onsite to record elevations across the Site.
- Bauer installed lagging across perimeter of the Site along St. Paul's Place.

CAMP data evaluation: CAMP was implemented from 7:00-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 8 loads of overburden soil from WC-15 and WC-16 were trucked to Bayshore Soils Management in Woodbridge, NJ.
- 13 loads of overburden soil from WC-15 and WC-16 were trucked to Pocono Sand and Stone in South Sterling, PA.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA *(BCP Remedial Soil)*	0	149
Bayshore Soils Management, Woodbridge, NJ *(BCP Remedial Soil)*	0	118
Pocono Sand and Stone of South Sterling, PA *(Rock only)*	0	8
Pocono Sand and Stone of South Sterling, PA *(Non-Remedial Soil)*	13	25

Import: None.

Import Facility	Loads Imported Today	Cumulative Loads Imported
Tilcon Mt Hope Quarry (3/4" stone)	0	4

Sampling Performed: Roux collected EP-A5(4-6) for analysis of Barium, the only contaminant that did not meet the SCOs in the previous sample EP-A5(2-4). Sample SSW-D4 was collected and analyzed for the full suite of contaminants.

Upcoming work activities anticipated:

- Continue soil excavation and offsite disposal.
- Survey to confirm remedial excavation depths.
- End point soil sampling from completed remedial excavation grids.

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/21/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 45-64°F, Clear, RH: 79%, Pres: 30.25" in Hg, Wind: N @ 7-12 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-16:00

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors **Meridian Surveyors** - Surveying equipment	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 2 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 4 Laborers Meridian Surveyors - Surveyors

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer installed lagging across perimeter of the Site along St. Paul's Place.
- Bauer trucked out 11 loads of soil from WC-15 and WC-16 to Pocono.
- Meridian was onsite to survey various locations around the Site.
- Bauer chipped concrete and stone into smaller pieces for export.
- Bauer conducted general maintenance and housekeeping.

CAMP data evaluation: CAMP was implemented from 7:00-15:30 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 11 loads of non-remedial soil from WC-15 and WC-16 were trucked to Pocono Sand and Stone in South Sterling, PA.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA *(BCP Remedial Soil)*	0	149
Bayshore Soils Management, Woodbridge, NJ *(BCP Remedial Soil)*	0	118
Pocono Sand and Stone of South Sterling, PA *(Rock only)*	0	8
Pocono Sand and Stone of South Sterling, PA *(Non-Remedial Soil)*	11	36
Bayshore Soils Management, Woodbridge, NJ *(Non-Remedial Soil)*	0	12

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer installed lagging across perimeter of the Site along St. Paul's Place.
- Bauer trucked out 16 loads of soil from WC-15 and WC-16 to Pocono.
- Mega Surveyors (Bauer subcontractor) was onsite to survey various locations around the Site.
- Bauer drove piles across the St. Paul's Place perimeter of the Site.
- Bauer chipped concrete and stone into smaller pieces for export.
- Bauer conducted general maintenance and housekeeping.

CAMP data evaluation: CAMP was implemented from 7:00-16:00 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 16 loads of non-remedial soil from WC-15 and WC-16 were trucked to Pocono Sand and Stone in South Sterling, PA.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA *(BCP Remedial Soil)*	0	149
Bayshore Soils Management, Woodbridge, NJ *(BCP Remedial Soil)*	0	118
Pocono Sand and Stone of South Sterling, PA *(Rock only)*	0	8

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/23/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 44-61°F, Clear, RH: 80%, Pres: 30.28" in Hg, Wind: NE @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-16:00

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **RA Engineering** - Cameras and vibration monitors **Mega Surveyors** - Surveying equipment	Roux D.P.C. - Christopher Farrington NRP - Ed Pierce - 4 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 4 Laborers Mega Surveyors - 1 Surveyor RA Engineering - 1 Engineer

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer trucked out 4 loads of soil from WC-15 and WC-16 to Pocono.
- Bauer drove piles across the St. Paul's Place perimeter of the Site.
- Bauer laid down mesh across the eastern wall of the Site and poured concrete on top of it for erosion control.
- Bauer conducted general maintenance and housekeeping.

CAMP data evaluation: CAMP was implemented from 7:00-16:00 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- 4 loads of non-remedial soil from WC-15 and WC-16 were trucked to Pocono Sand and Stone in South Sterling, PA.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA *(BCP Remedial Soil)*	0	149

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/26/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 42-70ºF, Sunny, RH: 91%, Pres: 30.29" in Hg, Wind: W @ 5 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:45

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **Layout Inc Surveyors** - Surveying equipment	Roux D.P.C. - Michael Bermejo NRP - Ed Pierce - 4 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers Layout Inc - 1 Surveyor ADG - 2 Laborers

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported a total of 10 loads of remedial and non-remedial BCP soil to Bayshore/Pocono and two loads of rock to Pocono.
- Bauer mobilized timber lagging to the western portion of the site for future SOE installation.
- Layout Inc. surveyed grids B3 and D6 to confirm endpoint sampling elevations.
- ADG staged dewatering tank on-site for future installation.
- Bauer conducted general maintenance and housekeeping.

CAMP data evaluation: CAMP was implemented from 7:00-15:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- Bauer trucked out 3 loads of remedial soil from B3; 1 load to Pocono and 2 loads to Bayshore.
- Bauer trucked out 2 loads of remedial soil from D6 to Pocono.
- Bauer trucked out 2 loads of rock to Pocono.
- Bauer trucked out 3 loads of non-remedial soil from WC-5, WC-15 and WC-16 to Pocono.
- Bauer trucked out 3 loads of non-remedial soil from WC-5 to Bayshore.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported

Bayshore Soils Management, Woodbridge, NJ *(Non-Remedial Soil)*	3	15

Import: None.

Import Facility	Loads Imported Today	Cumulative Loads Imported
Tilcon Mt Hope Quarry (3/4" stone)	0	4

Sampling Performed:

- Roux collected an endpoint sample at the center of B3 for manganese analysis after the surveyor confirmed the sampling elevation.

Upcoming work activities anticipated:

- Continue soil excavation and offsite disposal.
- Survey to confirm remedial excavation depths.
- Dewatering tank installation.
- End point soil sampling from completed remedial excavation grids.

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer mobilized H piles and timber lagging to the western boundary of the site for SOE installation.
- PAL Environmental Dewatered a pit in D1 and D2. 1,065 gallons of water was transported offsite to Clean Water of New York, Staten Island, NY.
- Baur removed sidewalk along western entrance then established a new truck entrance and ramp along the removed sidewalk.
- Bauer installed H piles along western boundary using sonic hammer excavator attachment (refusal experienced).
- Bauer chipped rock and concrete debris in southern portion of site.
- Bauer conducted general maintenance and housekeeping.

CAMP data evaluation: CAMP was implemented from 7:00-14:45 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- None.

DAILY SITE FIELD ACTIVITY REPORT

PROJECT NO.:	2908.0011Y	**CLIENT:**	**DATE:**	10/28/2026
PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 41-62°F, Cloudy, RH: 65%, Pres: 30.45" in Hg, Wind: W @ 5-10 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-15:00

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **Layout Inc Surveyors** - Surveying equipment	Roux D.P.C. - Shane McKenna NYSDEC - Javier Perez-Maldonado NRP - Ed Pierce - 4 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers Layout Inc - 1 Surveyor ADG - 2 Laborers

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer mobilized H piles along the site boundary for SOE installation.
- Baur continued to establish truck ramp with gravel along western boundary.
- Bauer installed H piles along western boundary using sonic hammer excavator attachment.
- Bauer chipped rock debris in southern portion of site.
- Bauer conducted general maintenance and housekeeping.
- NYSDEC was onsite for a general inspection. No issues were reported.

CAMP data evaluation: CAMP was implemented from 7:00-14:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- None.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA *(BCP Remedial Soil)*	0	152
Bayshore Soils Management, Woodbridge, NJ *(BCP Remedial Soil)*	0	120

PROJECT:	Sol on Park Site (C203169)	Sol on Park LLC	**WEATHER:**	Temp: 47-69ºF, Partly Cloudy, RH: 94%, Pres: 30.29" in Hg, Wind: W @ 0-16 mph
LOCATION:	3728 Park Avenue, Bronx, New York		**TIME:**	07:00-16:15

CONTRACTOR AND EQUIPMENT	PERSONNEL PRESENT AT SITE AND AFFILIATION:
NRP (Construction Manager) **Bauer Structures** - John Deere 245P Excavator - Volvo ECR355EL Excavator - Skid Steer - Hand tools **Layout Inc Surveyors** - Surveying equipment	Roux D.P.C. - Shane McKenna NRP - Ed Pierce - 4 Project Managers Bauer Structures (Bauer) - Brendan Dooley - 2 Laborers Layout Inc - 1 Surveyor ADG - 2 Laborers

SCOPE OF WORK:

Roux D.P.C. (Roux) was onsite to complete environmental monitoring during remedial activities in accordance with the New York State Department of Environmental Conservation (NYSDEC)-approved Remedial Action Work Plan (RAWP), dated August 6, 2026. Roux implemented the Community Air Monitoring Plan (CAMP) during all outdoor intrusive activities.

Description of work activities performed and general observations/comments:

- Bauer exported 8 trucks of BCP remedial soil from D1 and D2 to both Bayshore and Pocono.
- Bauer exposed endpoint sample locations in D1 and D2.
- Bauer removed a section of sidewalk and sloped off sidewalls along the southeast site boundary.
- Surveyor staked out and recorded endpoint sample locations in D1, D2, D4, D5, and D6.
- Roux collected 9 soil samples from 5 locations in D1, D2, D4, D5, and D6.
- Bauer conducted general maintenance and housekeeping.

CAMP data evaluation: CAMP was implemented from 7:00-16:15 which consisted of one upwind and one downwind station, each containing a photoionization detector (PID) and particulate meter. No exceedances of downwind particulates greater than 150 µg/m3 were recorded. No exceedances of volatile organic compounds (VOCs) were recorded.

Offsite Disposal:

- None.

Soil Disposal Facility	Loads Exported Today	Cumulative Loads Exported
Pocono Sand and Stone of South Sterling, PA *(BCP Remedial Soil)*	6	158
Bayshore Soils Management, Woodbridge, NJ *(BCP Remedial Soil)*	2	122
Pocono Sand and Stone of South Sterling, PA *(Rock only)*	0	10

Import: None.

Import Facility	Loads Imported Today	Cumulative Loads Imported
Tilcon Mt Hope Quarry (3/4" stone)	0	4

Sampling Performed:

- EP-D6(6-8) was collected for hexavalent chromium
- SSW-D4(6) was collected for SVOCs
- WSW-D5(6) was collected for SVOCs
- EP-D1(0-7) was collected for full suite (VOCs, SVOCs, metals, PCBs, herb/pest)
- NSW-D1(4-7) and Duplicate were collected for full suite (VOCs, SVOCs, metals, PCBs, herb/pest)
- EP-D1(0-7)_P was collected for PFAS
- NSW-D1(4-7)_P and Duplicate were collected for PFAS

Upcoming work activities anticipated:

- Continue soil excavation and offsite disposal.
- Continue SOE Installation
- Survey to confirm remedial excavation depths.
- Dewatering tank installation.
- End point soil sampling from completed remedial excavation grids.
