DEC REMARKS:

8/26/21 - Obligado - I spoke to Aaron Yecies. ayecies@labellapc.com. Labella is working with operator to remove the gas station tanks. PBS 2-325953. They encountered impacted soil below the product piping under dispenser island. Labella will be investigating further. Odors and elevated PIDs were observe. Tanks were removed. No indication of issues with the tank field. Assigned to Ryan Piper.

2-325953

2/16/2022- DEC Piper- received and reviewed tank closure report. Based n history and analytical data collected, this spill is closed. No further action is warranted. PBS info corrected. New tanks to be installed shortly. See report in DEC Docs if warranted.

NYSDEC SPILL REPORT FORM

DEC REGION:	<u>2</u>	SPILL NUMBER:	<u>9711128</u>
SPILL NAME:	<u>GETTY STA #323 - GETTY PROPERTIES</u>	DEC LEAD:	<u>KGHALE</u>

08/31/2005 - Feng - Project transferred from Vought to Feng.

3/10/2006 - Feng - Tyree requested spill closure. File reviewed and summarized site history:

5/29/1998, Tank Closure. Removed 6 (550-gallon) gasoline, 1 (4,000-gallon) gasoline, 1 (550-gallon) waste oil and 1 (550-gallon) fuel oil USTs. Impacted soil were excavated down to 8' bg. 9 soil endpoint samples were taken from former tankfield excavation and 1 from waste oil tank excavation. High BTEX and MTBE found in the wall at 5' bg and bottom at 7' and 8' bg in the former tankfield. 4,000-gallon bottom (8') with 22,725 ppb BTEX and 2,960 ppb MTBE. 550-gallons south bottom (7') with 65,892 ppb BTEX and 22,800 ppb MTBE. 550-gallons east wall (5') with 1,309,400 ppb BTEX and 170,000 ppb MTBE.

10/30/1998, Quarterly Monitoring Report. 5 monitoring wells were installed and started monitoring. 4 of these MWs were located at near the 4 corner of the property and 1 at the center near the former tank field. Groundwater flows to south at the depth of 16.42' to 25.57' bg. Only 3 were monitored this quarter. W-1, ND both. W-3, 16.5 ppb BTEX, 14.3 ppb MTBE. W-4, 12,660 ppb BTEX, 8,040 ppb MTBE.

Total Phase High Vacuum Extraction were conducted monthly on W-4 for monitoirn quarter of 1/2000-3/2000, 7/2000-9/2000, 1/2001-6/2001. And this site has been monitored since 1998.

9/29/2004, Quarterly Monitoirng Report, 7/2004-12/2004. Groundwater flows to south at the depth of 16.28' to 24.34' bg. 5 monitoring wells onsite. W-1, usually not accessible. W-2, BDL. W-3, BDL. W-4, decreased and 20.66 ppb BTEX, decreased and 1.96 ppb MTBE. W-5, decreased and 347.4 ppb BTEX, BDL MTBE.

8/1/2008 - Project reassigned to Feng.

9/4/2008 - Getty Properties portfolio meeting with Tyree and Delta. Resampling the wells and petition for closure. (RJF)

6/5/2009 - Reviewed Investigation Work Plan, dated 3/5/2009, by Tyree. Tyree proposed to install 4 soil borings as confirmatory sampling for closure petition. Comments to Tyree requiring 2 more soil borings location at the east and south of the former tank area due to the previous high endpoint samples. (RJF)

6/10/2009 - Quarterly Monitoring Report, 1/2009 - 3/2009, 3/2009, pdf via email 6/8/2009, by Tyree. Active gasoline retail service station. 5 monitoring wells. Monthly gauging and quarterly sampling. Groundwater was sampled 4/23/2009. DTW 17.18' to 23.83' bg. Flows to south. NO LNAPL. BTEX range 0.52 ppb to 46.2 ppb. MTBE ND. Groundwater was sampled for STARS and bioparameters. (RJF)

8/21/2009 - Reviewed IWP revision, dated June 17, 2009, by Tyree, pdf via email 6/18/2009. Tyree proposes to install 6 soil borings including 2 additional soil borings that DEC required. Work Plan is approved, letter to Getty Properties. SIR due 11/2009. (RJF)

11/6/2009 - 3Q2009, 7/2009-9/2009, 9/1/2009, pdf, by Tyree. Active gasoline retail service station. 5 monitoring wells. Groundwater was gauged on 8/20/2009. NO LNAPL. DTW 16.35' to 24.31' bg. Flows to south. Groundwater was sampled 8/20/2009. BTEX ND. MTBE ND. (RJF)

2/18/2010 - Reviewed Subsurface Investigation Report, dated 11/2009, by Tyree. On October 8-9, 2009, E Phase 2 LLC installed 6 soil borings using Geoprobe 6610DT direct push drilling machine. Refusal was hit before groundwater at 13 feet in SB-1 (south of dispensers), at 13 feet in SB-4 (north of tank pad), at 20 feet in SB-5 (south of tank pad) and at 15 feet in SB-6 (fuel oil tank area). Groundwater was encountered at 16.5 feet in SB-2 (near W-3), and 26 feet in SB-3 (east of tank pad). No PID reading. 6 soil samples were collected. SB-1 (10-13'), BDL. SB-2 (15-17'), BDL. SB-3 (25-27'), BDL. SB-4 (11-13'), BDL. SB-5 (18-20'), BDL. SB-6 (12-15'), BDL. Groundwater taken from SB-2 and

SB-3 on 10/8/

2009. SB-2, BDL, no exceedances. SB-3, low, no exceedances. Tyree requested spill closure. (RJF)

1/19/12 - Raphael Ketani. I reviewed the case history for the site. From the case notes, all of the USTs were removed on 5/29/98 (6-550 gal. gasoline, 1-4,000 gal. gasoline, 1-550 gal. fuel oil, 1-550 gal. waste oil). Excavation in the tank field went down to 8' bgs. Ten end point samples were taken - 9 in the gas tank graves and 1 in the waste oil grave. There were high to very high soil results for 4 of the sidewall and 3 of the bottom samples. The results were up to 1,309,400 ppb total BTEX and 170,000 ppb MTBE.

10/30/98 Quarterly Report: Five wells were installed - 4 at the corners and 1 in the center of the site. Three wells were sampled. MW-4 had 12,660 ppb total BTEX and 8040 ppb MTBE. Total phase high vacuuming took place at MW-4 on a monthly basis from 1/2000 to 6/2001. Groundwater flow is to the south.

3/5/09 Investigation Work Plan: Tyree intended to do 4 more soil borings. The DEC asked for 2 additional borings.

3/2009 Quarterly Monitoring Report 1/09 to 3/09: Five wells were gauged and sampled. There was no product. Total BTEX was up to 46.2 ppb and MTBE was non-detect.

9/2009 Quarterly Monitoring Report 7/09 to 9/09: Five wells were gauged and sampled. There was no product nor any contamination.

11/09 SIR: 10/8 to 9/09 Tyree installed 6 borings. There were no PID hits for the soil samples. SB-1 is downgradient to the pump islands. SB-2 is on the downgradient side of the former waste oil UST. SB-3 is about 8' from the 5/29/98 East boring. SB-4 is about 8' from the 5/29/98 North boring. SB-5 is about 6' west of the 5/29/98 South boring. SB-6 is at the side of the former fuel oil UST location.

MW-4 is more sidegradient than directly downgradient to the tank field. None of the wells are directly downgradient, except MW-1 to the fuel oil UST. However, it is some distance away.

In conclusion, Tyree failed to fully delineate and remove the soil contamination and didn't submit manifests for the tanks and soil that were removed.

2/8/12 KGH reviews file for closure petition determination. There appear to be valid concerns about well placement. Need to visit site to ground-truth data

4/25/12 KGH on-ste with BF (Antea) and PH (Tyree) to evaluate remedial efforts. Small site with steep gradient. Topography runs most steeply from tank area to MW-4. Wall/foundation of adjacent building runs from MW1 to MW4 and would tend to intercept and direct interflow toward MW4. KGH comfortable that MW-4 serves as off-site sentinel. No discernible odor from MW-4 upon opening. Consider closure.

6/5/12 KGH - Reviewed EDOCs file as per PM notes. There has been significant remedial efforts on this site which have apparently paid off. Over 500 tons of contaminated soil were excavated and removed from moderate/small service station. Several years of EFR have further reduced soil contamination on this operating service station. Groundwater standards are met before reaching off-site. There is some indication of shallow residual soil contamination associated with service station infrastructure but deeper soil and groundwater samples demonstrate it has no discernible effect or impact. The Department accepts the petition for closure for Spill #97-11128. No Further Action is required. KGH.
