PHASE I ENVIRONMENTAL SITE ASSESSMENT

1107-1113 Fox Street
Block 2718, Lots 50 and 48
Borough of Bronx, Bronx County, New York

October 28, 2016

1.0 INTRODUCTION

Brinkerhoff Environmental Services, Inc. (Brinkerhoff) was retained by DG Development Partners to perform a Phase I Environmental Site Assessment (ESA) of the property located at 1107-1113 Fox Street in the Borough of Bronx, Bronx County, New York (hereinafter referred to as the site or subject property). (Refer to **Figure 1** - Site Location Map.) The subject property is further defined by the City of New York as Block 2718, Lots 50 and 48. (Refer to **Figure 2** - Tax Map.) The scope of this Phase I ESA is in general conformance with United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries (AAI), 40 Code of Federal Regulations (CFR) Part 312, and the American Society for Testing and Materials (ASTM) E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process Scope of Work.

1.1 PURPOSE

The purpose of this assessment is to review the general environmental condition of the land that comprises the subject property. Specifically, the report seeks to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs), as defined by ASTM E 1527-13, on and near the site and records of those areas that may adversely impact the subject property owner or operator under existing federal, state, and local environmental laws, and to recommend further actions necessary to confirm, quantify, or abate those conditions.

1.2 DETAILED SCOPE OF SERVICES

Brinkerhoff undertook the following actions to accomplish this Phase I ESA:

- ✓ A physical inspection of the subject property on October 5, 2016, by Brinkerhoff to locate and identify: obvious signs of chemical spills; visual and documented evidence of chemical storage tanks; improper use, storage and disposal of hazardous materials; and, polychlorinated biphenyl (PCB)-containing electrical equipment.
- ✓ A review of federal and state standard environmental record sources using minimum search distances from the subject property, as defined by ASTM E 1527-13, to identify nearby sites with known environmental impairments or operations registered to handle hazardous substances and wastes.

- ✓ A review of reasonably ascertainable standard historical sources that might include aerial photographs, fire insurance maps, property tax files, recorded land title records, United States Geological Survey (USGS) 7.5 Minute Topographic Maps, local street directories, building department records, zoning/land use records, or other historical sources.

1.3 LIMITATIONS AND EXCEPTIONS

This Phase I ESA reflects conditions that were visibly evident in those areas where access was available on the date of Brinkerhoff's site visit. The assessment offers both information about the site and operations performed on site; however, visual inspections were limited to those areas of the subject property that were accessible during the site visit. It is possible that hazardous materials might be found in inaccessible areas.

The site reconnaissance involved inspecting readily accessible areas and did not involve subsurface investigations, investigations under asphalt paving, concrete slabs, gravel-covered areas, storage areas, or other areas which could not be reasonably inspected without the use of specialty equipment such as heavy machinery or geophysical probing devices.

At the time of site reconnaissance, overgrown vegetation and trash limited the ability to visually inspect the ground surface across the entire subject property.

Brinkerhoff cannot be held responsible if site conditions change in the future and environmental conditions arise that could not reasonably have been identified during the site reconnaissance initially conducted.

Brinkerhoff submitted Freedom of Information Act (FOIA) and Right-to-Know Law requests for information to appropriate federal, state and local government agencies. If responses and/or files were not provided at the time of report preparation, it is documented as a data gap in Section 6.0. As per ASTM E 1527-13-3.2.69, 3.2.72 and 8.1.4, Brinkerhoff reviewed only those files that were practically reviewable and reasonably ascertainable.

As per ASTM E 1527-13, the following "nonscope considerations" were not included in this evaluation: asbestos-containing materials (ACMs), biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint (LBP), lead in drinking water, mold, radon, regulatory compliance, and wetlands. Since ASTM E 1527-13 does not require that these inspections be conducted, said inspections were not performed as part of this Phase I ESA.

1.4 USER RELIANCE

DG Development Partners may rely upon this report, which has no other purpose and should not be relied upon by any other person or entity.

2.0 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

Street Address:	1107-1113 Fox Street
Municipality/State:	Borough of Bronx, New York
County:	Bronx
Tax Block/Lots:	Block 2718, Lots 50 and 48
Lot Shapes:	Quadrangles

2.2 CURRENT USE OF THE SITE

The subject property is located on the west side of Fox Street, between East 167th Street to the south and East 169th Street to the north. The site consists of vacant and empty land and is approximately 12,994 square feet. No structures are present on the subject property. The center of the property consists of gravel. Overgrown vegetation was observed along the northern, western, and southern boundaries. A depression in the ground surface was observed along the northern boundary of the site.

Photographs of the subject property were taken at the time of the site inspection and are provided in **Appendix I**.

2.3 UTILITIES

Brinkerhoff did not observe evidence of utilities at the subject property during the site reconnaissance.

2.4 HEATING SOURCE

No structures are present on the subject property; however, Brinkerhoff did not observe evidence of a heating source during the site reconnaissance.

2.5 CURRENT USES OF ADJOINING PROPERTIES

Current uses of adjoining properties are as follows:

North: A multi-family residential building is located to the north of the subject property.

East: Fox Street, a parking lot, and one (1) mixed-use multi-family residential and multi-tenant commercial building are located to the east of the subject property.

South: A public garden, known as Paradise Community Garden, is located to the south of the subject property.

West: A public playground and basketball courts are located to the west of the subject property. A multi-family residential building is located to the west/northwest of the subject property.

2.6 PHYSICAL SETTING ANALYSIS

2.6.1 SITE GEOLOGY/SOIL

Bronx County is underlain by geological formations known collectively as the Highlands Province (Hudson Highlands). The rocks of the Hudson Highlands are predominantly of highly metamorphosed igneous and sedimentary rocks of Middle Proterozoic age (1.2 billion to 900 million years old). They rest on basement rocks west of the Cameron fault and were not significantly displaced by the Taconic orogeny during the closing of the Iapetus Ocean 550 million years ago. The thin layers of sediment overlaying these rock formations originated from the most recent glaciation period or from erosion of adjacent uplands. These sediments were compacted over time to form the Shawangunk conglomerates and the Normanskill Group shales.

According to the Soil Survey for Bronx County, the soils at the subject property are classified as Urban land-till substratum (UtA) with zero (0) to three (3) percent slopes with a very low available water capacity. An on-site investigation would be necessary to determine classes of soil present on the subject property.

2.6.2 SITE TOPOGRAPHY

The subject property is located approximately 49 feet above mean sea level and is generally flat. Rainfall is expected to infiltrate on-site soils or run off impervious surfaces into the storm water drain observed along Fox Street.

2.6.3 SITE HYDROLOGY

Based upon site topography and Brinkerhoff's review of the USGS Topographic Map for the area, regional groundwater flow direction is anticipated to be toward the southeast, in the direction of the Bronx River.

Detailed investigations involving the installation of groundwater monitoring wells and performance of groundwater gauging events would be required to ascertain the exact on-site groundwater flow direction.

3.0 RECORDS REVIEW

3.1 FEDERAL AND STATE DATABASE REVIEW

An environmental database search of the subject property and the area within a one-mile radius of the subject property was conducted by Environmental Data Resources, Inc. (EDR). The EDR environmental database search generated information regarding the subject property and surrounding properties that are or have been regulated, tracked, or investigated under specific federal or state environmental programs. The EDR environmental database search report is provided in **Appendix II**.

3.1.1 SUBJECT PROPERTY

According to the EDR environmental database search, the subject property was identified in the NY MANIFEST database under the following listing:

Con Edison
1109 Fox Avenue
Bronx, NY 10459

According to the NY MANIFEST database, EPA ID: NYP004596227 identifies that Con Edison transported 500 pounds of lead waste off site on July 15, 2014. No violations associated with the NY MANIFEST listing were reported. No additional information was provided by EDR.

3.1.2 ADJACENT PROPERTIES

According to the EDR environmental database search, one (1) adjacent property was identified in the databases searched. Information provided in the EDR report is summarized as follows:

3.1.2.1 926 East 169th Street

According to the EDR environmental database search, an east-adjacent property was identified in the NY MANIFEST database under the following listing:

Con Edison
926 East 169th Street
Bronx, NY 10459

According to the NY MANIFEST database, EPA ID: NYP004643342 identifies that Con Edison transported 500 pounds of lead waste off site on August 29, 2014. No violations associated with the NY MANIFEST listing were reported. No additional information was provided by EDR.

3.1.3 SURROUNDING PROPERTIES

According to the EDR environmental database search, surrounding properties were identified in the federal and state databases within a one-mile search radius of the subject property and are identified as follows:

- ✓ Within a zero to one-eighth mile radius of the subject property, the following database listings were identified:

    - One (1) property was identified in the RCRA-LQG database.
    - One (1) property was identified in the NY SWF/LF database.
    - Two (2) properties were identified in the NY UST database.
    - Fourteen (14) properties were identified in the NY AST database.
    - One (1) property was identified in the NY BROWNFIELDS database.
    - One (1) property was identified in the NY HIST UST database.
    - Six (6) properties were identified in the NY SPILLS database.
    - Fourteen (14) properties were identified in the RCRA NonGen/NLR database.
    - Twenty-nine (29) properties were identified in the MANIFEST databases.
    - Five (5) properties were identified in the EDR Hist Cleaner database.

- ✓ Within a one-eighth to one-quarter mile radius of the subject property, the following database listings were identified:

    - Three (3) properties were identified in the RCRA-LQG database.
    - One (1) property was identified in the RCRA-SQG database.
    - Two (2) properties were identified in the RCRA-CESQG database.
    - Eight (8) properties were identified in the NY LTANKS database.
    - Nine (9) properties were identified in the NY UST database.
    - Thirty-one (31) properties were identified in the NY AST database.
    - One (1) property was identified in the NY TANKS database.
    - One (1) property was identified in the NY BROWNFIELDS database.
    - Nine (9) properties were identified in the NY HIST UST database.
    - Twenty-five (25) properties were identified in the RCRA NonGen/NLR database.
    - One (1) property was identified in the NY DRYCLEANERS database.
    - Eighty-eight (88) properties were identified in the MANIFEST databases.

- ✓ Within a one-quarter to one-half mile radius of the subject property, the following database listings were identified:

    - Twenty-one (21) properties were identified in the NY LTANKS database.

- ✓ Within a one-half to one mile radius of the subject property, the following database listings were identified:

    - One (1) property was identified in the CORRACTS database.
    - One (1) property was identified in the SHWS database.
    - One (1) property was identified in the EDR MGP database.

Additional information regarding each of the individual properties identified in the databases listed above is provided in **Appendix II**.

3.1.4 ORPHAN SUMMARY

The EDR Orphan Summary Report lists four (4) properties that were included in certain federal or state environmental databases, but were reported by EDR to be unmapped due to insufficient address information. The listing of orphan sites within the database search was reviewed, cross-referencing available address information with facility names. Upon review, it was determined that no orphan sites appear to be associated with the subject or adjacent properties. (Refer to **Appendix II**.)

3.1.5 FINDINGS

The subject property was identified in the NY MANIFEST database, and no violations associated with the NY MANIFEST listing were reported. No additional Information was provided by EDR.

The east-adjacent property at 926 East 169th Street was identified in the NY MANIFEST database. No violations associated with the NY MANIFEST listing were reported. No additional information was provided by the EDR.

Numerous other surrounding properties were identified as aforementioned; however, the regulatory listed sites are unlikely to impact the subject property for one or more of the following reasons:

- Based upon the distance of the listed property from the subject property, the listed property was judged to be too distant to likely impact the subject property;
- The listed property was topographically downgradient or sidegradient of the subject property;
- The listed property is separated from the subject property by a hydrologic barrier, such as a river; and/or,
- The property was listed as engaging in an activity that requires environmental registration but for which no violation was documented, such as a registered underground storage tank (UST) with no documented leak, or the property was issued a case closure letter.

3.2 HISTORICAL USE DOCUMENTATION

3.2.1 SANBORN® FIRE INSURANCE MAPS (SANBORNS)

Brinkerhoff requested a historical map search from EDR. EDR provided historical Sanborns for the years 1896, 1901, 1903, 1915, 1950, 1978, 1985, 1995 and 2007. Copies of the Sanborn maps are provided in **Appendix III**. The Sanborn maps are described as follows:

1896

No structures are present on the subject property. No structures are present on the northern adjacent and eastern adjacent properties. Two (2) structures are present on the southern adjacent properties, and two (2) structures are present on the western adjacent properties.

1901
The subject property, the southern adjacent property, and the western adjacent property appear similar to the 1896 Sanborn. However, one (1) structure is present on the northern adjacent property, and two (2) structures are present on the eastern adjacent property.

1903
No structures are depicted on the subject property or adjacent properties.

1915
One (1) garage and the Fox St. Station Post Office are present on the subject property. Additionally, a 275-gallon buried gasoline tank is present in the southwest corner of the subject property. The eastern adjacent and western adjacent properties appear similar to the 1901 Sanborn. Two (2) additional structures are present on the northern and southern adjacent properties.

1950
The structures on the subject property are now identified as a Plating Works Facility and a Whole Drugs Warehouse. The 275-gallon buried gasoline tank is no longer indicated on the Sanborn. Adjacent properties to the south, east, and north appear similar to the 1915 Sanborn; the structures on the western adjacent property are no longer present.

1978
The subject property appears similar to the 1950 Sanborn but the uses of the structures are no longer identified. The northern and western adjacent properties appear similar to the 1950 Sanborn; however, structures are no longer present on the southern and eastern properties.

1985
The subject property is now identified as a Warehouse and a Club. The surrounding properties appear similar to the 1978 Sanborn.

1995 and 2007
The subject property and the southern, eastern, and northern adjacent properties appear similar to the 1985 Sanborn; however, a playground is present to the west of the subject property.

3.2.2 AERIAL PHOTOGRAPHS

Brinkerhoff reviewed historical aerial photographs from EDR for the years 1951, 1966, 1975, 1984, 1991, 2006, 2009, and 2011. Copies of the aerial photographs are provided in **Appendix IV**. The aerial photographs are described as follows:

1951 and 1966 (1" = 500')
The subject property appears to be developed with a building occupying approximately the entire footprint. The surrounding area appears to be highly developed. The northern adjacent property is developed, and two (2) structures appear to be present. Three (3) structures appear to be present on the eastern adjacent properties. Two (2) structures appear to be present on the southern adjacent properties. A parking lot and one (1) building appear to be present to the west

of the subject property. Additional details cannot be interpreted due to the quality of the aerial photograph.

1975 (1" = 500')
The subject property appears similar to the 1966 aerial photograph. One (1) of the structures in the northern portion of the eastern adjacent property appears to have been demolished. Additionally, one (1) structure on the southern adjacent property appears to have been demolished.

1984 (1" = 500')
The subject property appears similar to the 1975 aerial photograph. The southern and eastern adjacent properties appear to be vacant. Additional details cannot be interpreted due to the quality of the photograph.

1991 (1" = 500')
The subject property and all surrounding properties appear similar to the 1984 aerial photograph.

2006 (1" = 500')
The subject property and the northern and western adjacent properties appear similar to the 1991 aerial photograph. A parking lot has been installed on the eastern adjacent property. The southern adjacent property appears to be heavily vegetated. Additional details cannot be interpreted due to the quality of the aerial photograph.

2009 and 2011 (1" = 500')
The subject property and the eastern and southern adjacent properties appear similar to the 2006 aerial photograph. One (1) multi-level structure has been built on the northern portion of the western adjacent property. Two (2) multi-level structures have been constructed on the northern adjacent property.

3.2.3 CITY DIRECTORY ABSTRACT

Brinkerhoff requested a City Directory Abstract search from EDR. The subject property was listed under four (4) property addresses (1107 Fox, 1111 Fox, 1107 Fox Avenue and 1111 Fox Street) as summarized in the table below.

Year(s)	Use(s)	Source
1107 Fox Street		
1956	Fox Plating Co	New York Telephone
1949	Eastern Plating Corp Fend-Guard Co	
1940	Acme Garage	
1927	Simpson Garage	
1111 Fox Street		
2005	NCL	Hill-Donley Information Services
2000	Fort Appch Yth Ctr	Cole Information Services

Year(s)	Use(s)	Source
1983	Fort Apache Youth Center Fort Apache Youth Center Inc	New York Telephone
1971	Mendez Alvira & Co	
1965	San Juan Food Wholesale Corp	New York Telephone Company
1961 and 1956	Lederman Paul Inc Whol Drugs	New York Telephone
1949	Lederman Paul Inc Drugs	
1927	Kahl M Mrs r	

Surrounding properties were identified as utilized for residential uses; however, western and northern adjacent properties were not researched by EDR. A copy of the EDR-City Directory Abstract is provided in **Appendix V**.

3.2.4 SUMMARY OF HISTORICAL USE INFORMATION

According to the historical data review, the subject property was developed as early as 1915 for use as a garage and a post office. The uses of the on-site structures changed between 1915 and 1983. Uses included industrial metal plating, wholesale distribution warehouse for drugs (pharmaceuticals), and a youth center club. In the 1980s and 1990s, the subject property went through foreclosure and became vacant. According to the New York City Department of Buildings' Building Information System (*http://a810-bisweb.nyc.gov/bisweb/bispi00.jsp*), the structure on the site was demolished in 2013 after concerns of structural integrity. The eastern adjacent properties appear to have been developed as residential since at least 1901 and redeveloped as a parking lot since at least 2006. The northern adjacent property appears to have been mixed-use commercial and residential since at least 1901. The western adjacent property appears to have been developed as residential on the northern portion since at least 1896 and partially as a parking area since at least 1950. The southern portion appears to have been used as a playground since at least 1994. The southern adjacent property was developed as residential since at least 1896, redeveloped for mixed-use residential and commercial since at least 1915, and then had been cleared of structures, allowing vegetation to grow since at least 1977.

3.3 REGULATORY AGENCY REVIEW

In addition to the review of state and federal government databases, as discussed in Section 3.1 above, Brinkerhoff accessed the USEPA MyPropertyInfo database online for information concerning environmental issues at the subject property or in the immediate area of the subject property. Brinkerhoff also provided communications to the New York State Department of Environmental Conservation (NYSDEC) via their online portal and to the New York City Department of Environmental Protection (NYCDEP) via facsimile to request information concerning environmental issues at the subject property. (Refer to **Appendix VI** - Government Communications.)

3.3.1 SUBJECT PROPERTY

USEPA
On September 22, 2016, a review of available information on the USEPA's MyPropertyInfo online database did not identify environmental records regarding the subject property.

NYSDEC and NYCDEP
At the time of report preparation, the NYSDEC and the NYCDEP had not responded to Brinkerhoff's request for information regarding the subject property.

3.3.2 ADJACENT PROPERTIES

926 East 169th Street (Alternate Address: 933 East 167th Street)

USEPA
On October 4, 2016, a review of available information on the USEPA's MyPropertyInfo online database did not identify environmental records regarding the eastern adjacent properties.

NYSDEC and NYCDEP
At the time of report preparation, the NYSDEC and the NYCDEP had not responded to Brinkerhoff's request for information regarding this eastern adjacent property.

3.4 CITY ENVIRONMENTAL QUALITY REVIEW DECLARATION ("E" DESIGNATION)

The City Planning Commission approved amendments to the New York City Zoning Maps which may include environmental designations of certain tax lots that have physical or historical evidence of uses related to hazardous materials. The "E" designations shown on the zoning maps function as indicators of the environmental review that must be conducted when the lots are developed in accordance with the regulations of the rezoned district. The City Planning Commission's rezoning actions, including environmental designations, were made effective upon the City Council's approval of the Zoning Map Amendment.

Based upon a review of the NYCDEP's "E" Designation database on October 11, 2016, the subject property was not identified as E-designated.

3.5 VAPOR MIGRATION

Brinkerhoff utilized the information listed for the properties identified in the federal and state database search, Sanborn maps, aerial photographs, and the NYSDEC's online Environmental Site Database Search to evaluate the migration potential of hazardous substances or petroleum products in subsurface vapor. These resources assisted in the evaluation of potential vapor migration on the subject property or to the subject property from surrounding properties that are or may be engaged in storage, handling, or usage of petroleum products and hazardous materials. Please note that an investigation per ASTM E 2600-10 was not conducted as part of this Phase I ESA.

Based upon the available data acquired, Brinkerhoff finds that the subject property is unlikely to be impacted by vapor migration from on-site or off-site sources as no significant release of hazardous substances or petroleum products has been documented to date. However, the potential for vapor migration may exist from unknown or unclassified sources on site and/or upgradient or sidegradient of the subject property.

4.0 INTERVIEW AND USER-PROVIDED INFORMATION

4.1 INTERVIEW

Brinkerhoff was accompanied during the site inspection by Daniel Gabay, owner of DG Development Partners.

4.1.1 ENVIRONMENTAL CLEANUP LIENS

Brinkerhoff has not been made aware of environmental cleanup liens filed against the subject property under federal, tribal, state, or local law.

4.1.2 ACTIVITY AND USE LIMITATIONS (AULs)

Brinkerhoff has not been made aware of AULs, such as engineering controls, land use restrictions, or institutional controls such as deed notices, in place at the site presently or historically.

4.1.3 PREVIOUS USE OF THE PROPERTY

Brinkerhoff has not been made aware of any previous use of the property.

4.2 TITLE RECORDS AND ENVIRONMENTAL LIEN SEARCH

Title and deed information was not provided by the Client. Brinkerhoff accessed the New York City Department of Finance's Automated City Register Information System (ACRIS), available at *http://a836-acris.nyc.gov/CP/*, to locate deed information for the subject property. The table below summarizes the available deed information for the subject property. The ACRIS search results and the most recent deed are provided in **Appendix VII**.

Grantor	Grantee	Deed Date
1107 Fox Street (Block 2718, Lot 50)		
Fox Plating Corporation	Pelham Foods Inc	December 15, 1967
Pelham Foods Inc	For Apache Youth Center	September 29, 1982
Commissioner/Finance/NYC	City of New York	November 25, 1992
1111 Fox Street (Block 2718, Lot 48)		
Paul Lederman Inc	GCG Athletics Corp	July 22, 1975
GCG Athletics Corp	Fort Apache Youth Center Inc	October 1, 1980
Commissioner of Finance of the City of New York	The City of New York	October 5, 1981
Commissioner/Finance/NYC	The City of New York	October 28, 1991

5.0 SITE RECONNAISSANCE

5.1 METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance involved inspecting reasonably accessible areas and did not involve subsurface investigations, investigations under debris piles, asphalt paving, concrete slabs, sidewalks, or other areas that could not be reasonably inspected without the use of specialty equipment such as heavy machinery or geophysical probing devices.

At the time of site reconnaissance, overgrown vegetation and trash limited the ability to visually inspect the ground surface across the entire subject property.

5.2 GENERAL SITE SETTING

5.2.1 MATERIAL STORAGE

Brinkerhoff observed trash across the subject property, particularly along the eastern boundary. The trash consisted of tires, cardboard boxes, plastic bags, garbage bags, and household items.

5.2.2 ABOVEGROUND STORAGE TANKS (ASTs) AND UNDERGROUND STORAGE TANKS (USTs)

Brinkerhoff did not observe evidence of USTs and ASTs on the subject property at the time of site reconnaissance.

5.2.3 ODORS

Brinkerhoff did not observe noxious odors at the subject property during the site reconnaissance.

5.2.4 DRUMS

Brinkerhoff did not observe evidence of drums at the subject property during the site reconnaissance.

5.2.5 POLYCHLORINATED BIPHENYLS (PCBs)

Brinkerhoff did not observe evidence of PCB-containing equipment at the subject property during the site reconnaissance.

5.2.6 WELLS

Brinkerhoff did not observe evidence of wells at the subject property during the site reconnaissance.

5.3 EXTERIOR OBSERVATIONS

5.3.1 PITS, PONDS OR LAGOONS

Brinkerhoff did not observe ponds or lagoons during the site reconnaissance; however, a depression in the ground surface was observed along the northern boundary of the site

5.3.2 STAINED SOIL OR PAVEMENT

Brinkerhoff did not observe evidence of stained soil or pavement at the time of the site reconnaissance.

5.3.3 STRESSED VEGETATION

Brinkerhoff did not observe stressed vegetation on the subject property at the time of the site reconnaissance.

5.3.4 SOLID WASTE

Brinkerhoff observed trash across the subject property, particularly along the eastern boundary. The trash consisted of tires, cardboard boxes, plastic bags, garbage bags, and household items.

5.3.5 WASTEWATER DISPOSAL

Brinkerhoff did not observe evidence of wastewater disposal during the site reconnaissance.

5.3.6 STORM WATER DRAINS

Brinkerhoff did not observe storm water drains on the subject property at the time of the site reconnaissance.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Brinkerhoff performed a Phase I ESA of the property located at 1107-1113 Fox Street, in the Borough of Bronx, Bronx County, New York. The assessment was performed in general conformance with the scope and limitations of AAI and the ASTM E 1527-13 Standard Practice for ESAs: Phase I ESA Process Scope of Work. The Phase I ESA revealed the following:

DATA GAPS

- Brinkerhoff provided DG Development Partners with the ASTM E 1527-13 User Questionnaire to be completed; however, it was not completed or returned to Brinkerhoff by the time of report preparation.
- Brinkerhoff requested title and deed information; however, title/deed information had not been provided at the time of report preparation.
- At the time of report preparation, information regarding the subject property and adjacent properties had not been received from the NYSDEC or the NYCDEP.
- At the time of site reconnaissance, overgrown vegetation and trash limited the ability to visually inspect the ground surface across the entire subject property.

RECOGNIZED ENVIRONMENTAL CONDITIONS (RECs)

Based upon the findings of this Phase I ESA, three (3) RECs were identified:

1. Based upon a review of historical data, the subject property was developed with structures since at least 1915 and the prior heating sources of the former structures are unknown. No supporting documentation regarding prior heating sources of the former structures were identified or provided to Brinkerhoff; therefore, the potential exists for USTs to be present at the site.
2. Based upon a review of historical data, a 275-gallon buried gasoline tank was identified on the subject property in the 1915 Sanborn. The removal or presence of the UST is unknown. No further documentation was provided or reviewed by Brinkerhoff regarding the installation, removal, or presence of the UST; therefore, the potential exists for the UST to be present at the site.
3. Based upon a review of historical data the subject property was utilized for industrial and commercial uses including a garage, metal plating manufacturer, and wholesale drug warehouse. The handling, storage, and/or disposal of materials and substances used during the former site operations are unknown. Although no known or reported discharges associated with the former site operations were identified, the potential exists for hazardous compounds to be present in the subsurface soil and groundwater.

A Phase II Environmental Site Investigation (ESI) is recommended to investigate the aforementioned REC.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)

Based upon the findings of this Phase I ESA, CRECs were not identified.

HISTORIC RECOGNIZED ENVIRONMENTAL CONDITIONS (HRECs)

Based upon the findings of this Phase I ESA, HRECs were not identified.

OTHER ENVIRONMENTAL CONCERNS

Although not required by ASTM E 1527-13 as part of a Phase I ESA, the following non-scope consideration is included:

Potential Urban Historic Fill - The potential exists for urban historic fill to be present beneath the subject property. Urban historic fill is commonly found throughout the New York City metropolitan area and can contain contaminants such as heavy metals and semi-volatile organic compounds. If identified, appropriate transportation and disposal/recycling procedures should be followed.

7.0 QUALIFICATIONS AND SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

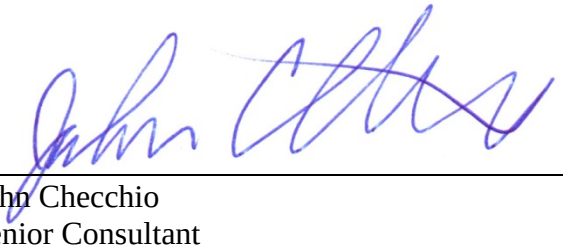

Jon Kraus, Environmental Scientist, conducted the site inspection and Luke Fetten, Environmental Scientist, conducted the research for the completion of this Phase I ESA. John Checchio, Senior Consultant, oversaw the completion of this Phase I ESA; his resume is provided in **Appendix VIII.**

To the best of Brinkerhoff's professional knowledge and belief, Brinkerhoff meets the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and also meets the specific qualifications based upon education, training, and experience to assess a property as to its nature, history, and setting. Brinkerhoff developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This report has been prepared using information available through government agencies and private contacts at the time of the investigation. Should Brinkerhoff receive additional information which may alter the characteristics enumerated within this report, Brinkerhoff reserves the right to revise this report or issue an addendum statement.

This report has been prepared and is respectfully submitted by

BRINKERHOFF ENVIRONMENTAL SERVICES, INC.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/27/2016 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

AMERICAN BANK NOTE C	***TIFFANY ST & GARRISO***	***S 1/2 - 1 (0.682 mi.)***	***243***	***585***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 05/17/2016 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Site Code: 434792

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 07/06/2016 has revealed that there is 1 NY SWF/LF site within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/16/2016 has revealed that there are 29 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 11 NY UST sites within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/16/2016 has revealed that there are 6 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/21/2016 has revealed that there are 39 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CON EDISON - EAST 17	WEST FARMS RD. AND B	NE 1/2 - 1 (0.742 mi.)	244	607

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Tank Info:

Tank Number:	1
Tank Id:	44813
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

B01 - Tank External Protection - Painted/Asphalt Coating
H00 - Tank Leak Detection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron

1149 TIFFANY STREET (Continued) **A100175258**

G03 - Tank Secondary Containment - Vault (w/o access)
J02 - Dispenser - Suction Dispenser
F00 - Pipe External Protection - None
I05 - Overfill - Vent Whistle
A00 - Tank Internal Protection - None
C03 - Pipe Location - Aboveground/Underground Combination
L09 - Piping Leak Detection - Exempt Suction Piping

Tank Location:	1
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	3000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

DEC Memo:	"04/17/06 - See e-docs for Con Ed report detailing cleanup and closure. 04/17/06 - See e-docs for Con Ed report detailing cleanup and closure. 163519. 25-March-2006 18:48 Hours. Flush Mechanic Orlando Negron 18400 reports while on location to flush a service box burnout on the southside of East 167th Street 160 feet east of Simpson Street in the Bronx, the water pump hydraulic system on Flush Truck 60765 leaked and spilled 10 gallons of hydraulic fluid to asphalt where it was contained using speedy dry and absorbent pads. The leak stopped when the PTO was disengaged. No fire or smoke is was involved. No sewers, waterways, or private property affected. No injuries involved. Crews is actively performing the cleanup. The flush truck is being removed from service for necessary evaluation and repairs by CFS Garage. CIG notified. J. Siesfeld 84253 "
Remarks:	"Fluid leaked from vehicle. Con-Ed # 163519"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"3/12/03 Tipple updating/visited 3/11 the impacted party is 1136 Simpson Street, owned by Rev. Victoria Otumfour Neeguaye (718-842-4947) There is what appears to be waste oil seeping out of a fractured concrete retaining wall(6' FENCING,6' CONCRETE) seperating the properties. The wall is approximately 12 foot high and the fractured portion is along the lower 3 to 4 feet along the rear of the 1136 property. Approximately 1/3 of the courtyard was covered with a caoting of waste oil. The parking facility according to Mr. Garcia does not do oil changes, only an occasional repair to his own car. This is difficult to believe due to the numerous empty antifreeze containers,a few car parts on the ground, as well as an engine lift located in the rear corner of the lot adjacent to the 1136 property. When asked, Mr. Garcia stated that there were never any waste oil tanks on the property. Tipple sent out a do work/soil contamination letter, and hand delivered a copy of the letter to the site. At that time, ECO Dewey was on site for a seperate complaint regarding the same spill. Together, ECO Dewey and I observed the probable location the oil was flowing from and to. It appears to most likely be unintentional. Mr. Garcia agreed to clean the impacted courtyard and continue to observe/clean the courtyard. If the problem is the result of a single automotive leak from a car since removed from the lot, and diminishes quickly, and Mr. Garcia works with the homeowner maintaining the courtyard, future work may be minimized. If the problem persists, agressive remedial actions will be warrented. 8/14/03 sPOKE WITH MR. GARCIA, HE STATED THAT THE SPILL HAD BEEN CLEANED, CALLED THE REV. NEEGUAYE, THERE HAS BEEN NO ADDITIONAL SEEPAGE WITH ALL THE TORRENTIAL RAINS, NFA"
Remarks:	"caller reported waste oil spilling onto adjacent property at 1138 Simpson Street"

Program:	BCP
Site Code:	442053
Acres:	0.23
HW Code:	C203055
SWIS:	0301
Town:	New York City
Record Added Date:	11/16/2010
Record Updated Date:	06/04/2015
Update By:	JHOCONNE
Site Description:	Location:The site is located at 1095 Southern Boulevard in the Bronx. It is bordered by Southern Boulevard to the east, residential buildings immediately adjacent to the north and west, and a commercial building immediately adjacent to the south. Further east across Southern Boulevard are commercial properties.Site Features:The site is approximately 0.23 acres and is currently vacant and unused. The previous on-site building was destroyed in a fire in 2008. Current Zoning and Land Use:The site is currently vacant and undeveloped, following a fire in 2008 which destroyed the on-site building. The site is zoned R7-1 (residential district), with a C2-4 commercial overlay meaning that it can be used for residential, commercial, or mixed (residential plus commercial) use. Past Use of the Site:The site has historically been used for several commercial uses including, most recently, as a dry cleaning facility. It appears that chlorinated solvents detected on-site are related to the historical dry cleaning use.Site Geology and Hydrogeology:The elevation of the site is approximately 59 feet above mean sea level. Bedrock has been identified at a depth of approximately 24 feet below surface grade. The depth to groundwater beneath the site is approximately 9 feet to 11 feet below ground surface. The groundwater flow direction beneath the site is east.
Env Problem:	Nature and extent of contamination:The contaminants of concern are chlorinated solvents, consistent with the previous use of the site for dry cleaning. Tetrachloroethylene (PCE) and its breakdown products have been detected in soil, groundwater, and soil vapor.Soil:Chlorinated volatile organic compounds (cVOCs) are present in soil predominantly near the eastern border of the site, in the depth range of 14 feet to 20 feet below surface grade. Concentrations of chlorinated VOCs exceed the Unrestricted Use Soil Cleanup Objectives (UUSCOs) in 4 of 14 on-site soil borings, all on the east side of the site. In these borings, PCE was detected as high as 1,200

1095 SOUTHERN BLVD.- OFF-SITE (Continued) **S110748432**

parts per million (ppm); trichloroethylene (TCE) as high as 120 ppm; and cis-1,2-dichloroethene (DCE) as high as 40 ppm. In comparison, the UUSCOs for these contaminants, respectively, are: 1.3 ppm, 0.47 ppm, and 0.25 ppm. Low concentrations of petroleum-related VOCs and semi-volatile organic compounds (SVOCs) were detected on site, at concentrations below the UUSCOs. Metals detected in soil at concentrations exceeding the UUSCO include: trivalent chromium at 33.8 ppm (UUSCO is 30 ppm); copper at 122 ppm (UUSCO is 50 ppm); lead at 357 ppm (UUSCO is 63 ppm); and zinc at 618 ppm (UUSCO is 109 ppm). Groundwater:The contaminants of concern in groundwater are cVOCs. Similar to soil, concentrations are highest in monitoring wells installed in the eastern portion of the site. PCE and its breakdown products were detected at levels exceeding NYSDEC Ambient Ground Water Quality Standards (AGWQS) in 9 of 11 on-site overburden groundwater monitoring wells, in addition to one monitoring well installed in the sidewalk to the east of the site. Contaminants include: PCE as high as 66,000 parts per billion (ppb) compared to the AGWQS of 5 ppb; TCE as high as 17,000 ppb on-site and 52,000 ppb in an off-site well, compared to AGWQS of 5 ppb; DCE as high as 63,000 ppb compared to AGWQS of 5 ppb; and vinyl chloride detected as high as 7,920 ppb on-site and 13,000 ppb in an off-site well, compared to AGWQS of 2 ppb. These contaminants were also detected in a bedrock monitoring well, at lesser concentrations (the maximum concentration detected in bedrock groundwater was TCE at 410 ppb).Soil vapor:The contaminants of concern are present in on-site soil vapor. PCE was detected as high as 2,800 micrograms per cubic meter (ug/m3) and TCE as high as 280 ug/m3. Significant threat:The site presents a significant threat to public health and the environment due to the high concentrations of chlorinated volatile organic compounds (VOCs) in on-site soil, groundwater, and soil vapor; and due to the potential off-site migration of contaminants via groundwater. An off-site investigation is underway (see site no. C203055A).

Health Problem: Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Access to the site is restricted and contact with contaminated soil is unlikely unless persons dig below the ground surface. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into the overlying buildings and affect indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant, the inhalation of site-related contaminants due to soil vapor intrusion does not represent current concern. The potential exists for the inhalation of site contaminants due to soil vapor intrusion for any future on-site redevelopment and occupancy. Off-site soil vapor intrusion sampling has not identified any exposures to date. However, additional sampling is recommended as part of the off-site portion of this project.

Program: BCP
Site Code: 461295
Acres: 0.23
HW Code: C203055A
SWIS: 0301
Town: New York City

1095 SOUTHERN BLVD.- OFF-SITE (Continued) **S110748432**

Record Added Date: 02/23/2012
Record Updated Date: 02/05/2016
Update By: JHOCONNE
Site Description: Location:The site C203055A is the area considered off-site from BCP site C203055, which is located at 1095 Southern Boulevard in the Bronx. The off-site area was defined to reflect the potential migration of contaminants from the BCP site, and includes the eastern sidewalk of Southern Boulevard across from the BCP site; and the buildings adjacent to the BCP site on the north, south, and west. Site Features:The off-site area consists of the residential buildings immediately adjacent to the north and west of 1095 Southern Blvd, a commercial building immediately adjacent to the south, and Southern Blvd to the east followed by a parking lot further east across Southern Blvd. To the northeast and southeast across Southern Blvd are mixed commercial/residential buildings. The BCP site at 1095 Southern Boulevard is vacant. Current Zoning/Uses:The off-site area consists of residential and commercial buildings. The BCP site at 1095 Southern Boulevard is currently vacant and undeveloped and is zoned R7-1 (residential district), with a C2-4 commercial overlay meaning that the property can be used for residential, commercial, or mixed (residential plus commercial) use. The proposed on-site development is for an office building, with below-grade parking. Historical Use:The BCP site C203055 has historically been used for several commercial uses including, most recently, a dry cleaning facility. Site Geology and Hydrogeology:The elevation at the BCP site is approximately 59 feet above mean sea level. Bedrock has been identified at depths ranging from 12 to 24 feet below surface grade. The depth to groundwater beneath the site is approximately 9 feet to 12 feet below ground surface. The groundwater flow direction beneath the site is east.
Env Problem: This site represents an off-site project to investigate the area surrounding, and downgradient of, BCP Site C203055 (1095 Southern Blvd). The investigation determined that no further action is required.Nature and extent of contamination:The contaminants of concern at BCP site C203055 are chlorinated solvents, consistent with the previous use of the site as a dry cleaner. Chlorinated solvents including tetrachloroethylene (PCE) and its breakdown products have been detected in soil, groundwater, and soil vapor in the subsurface of site C203055. Chlorinated solvents were therefore the focus of the investigation for the off-site project.Soil:The off-site investigation did not include soil analysis since there was no reason to believe that contaminants were disposed off-site.Groundwater:During the remedial investigation for the BCP site, elevated concentrations of chlorinated solvents were detected in groundwater in one off-site monitoring well located on the sidewalk just outside the property boundary. At this location, PCE was detected at 51,000 parts per billion (ppb); trichloroethylene (TCE) was detected at 52,000 ppb; and cis-1,2-dichloroethylene was detected at 12,000 ppb. The applicable groundwater quality standard for these contaminants is 5 ppb. Vinyl chloride was also detected at 13,000 ppb compared to the standard of 2 ppb. An off-site investigation was performed to determine if these contaminants were migrating further off-site. Groundwater samples were collected from both permanent monitoring wells and grab samples across Southern Boulevard, in the downgradient direction of groundwater flow. No contaminants of concern were detected in these samples. The extent of off-site contamination appears to be limited to the area just outside

1095 SOUTHERN BLVD.- OFF-SITE (Continued) **S110748432**

the property boundary from the highest area of on-site contamination. Soil vapor and indoor air:Soil vapor intrusion evaluations were performed in the two buildings immediately adjacent to the north and south of the site, and two buildings to the west of the site. In the sub-slab soil vapor samples, PCE was detected at a maximum of 52 micrograms per cubic meter (mcg/m3) in one building; however, it was not detected in the indoor air samples collected from that building. In the indoor air samples from other buildings, PCE was detected at a maximum of 8.7 mcg/m3. Based on the sampling that was conducted actions were not needed to address exposures related to soil vapor intrusion. To the east of the site, two soil vapor samples were collected from beneath the sidewalk across Southern Boulevard. PCE was detected at concentrations of 45 mcg/m3 and 6.2 mcg/m3. Trichloroethene (TCE) was also detected at concentrations of 5.4 mcg/m3 and 0.37 mcg/m3. Based on these sampling results and other site-related information no additional actions were recommended.

Health Problem: People are not drinking contaminated groundwater because the area is served by a public water supply not affected by the site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling indicates that soil vapor intrusion is not a concern for buildings adjacent to the 1095 Southern Boulevard site.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY DURING EXCAVATION OF 275-GALLON GASOLINE TANK, A RELATIVELY SMALL AREA OF CONTAMINATED SOIL WAS DISCOVERED, EXCAVATED AND DISPOSED OF OFF-SITE. SUBSEQUENT SITE INVESTIGATION BY URS AND KIRKYLA & REMEZA, INVOLVING INSTALLATION OF MONITORING WELLS, FOUND LOW-LEVEL GROUNDWATER CONTAMINATION. URS RECOMMENDED SEMI-ANNUAL GROUNDWATER MONITORING; KOLLEENY OF DEC APPROVED. AFTER 1+ YRS OF GW MONITORING, ALL ON-SITE WELLS HAVE HAD AT LEAST TWO ROUNDS OF SAMPLING WITH RESULTS MEETING STANDARDS. KOLLEENY APPROVED NO FURTHER ACTION ON 4/24/02."
Remarks:	"UPON EXCAVATION OF ABANDONED TANK SOIL CONTAMINATION WAS DISCOVERED POLY PLACED AND SOIL STOCK PILED FOR CLEAN UP."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

CYNTHIA DRY CLEANERS (Continued) **1000409475**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

D01 - Pipe Type - Steel/Carbon Steel/Iron
G03 - Tank Secondary Containment - Vault (w/o access)
J02 - Dispenser - Suction Dispenser
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
H00 - Tank Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
C02 - Pipe Location - Underground/On-ground

Tank Number: 003
Tank ID: 163166
Tank Status: In Service
Material Name: In Service
Capacity Gallons: 5000
Install Date: 04/01/2003
Date Tank Closed: Not reported
Registered: True
Tank Location: Underground
Tank Type: Fiberglass coated steel
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Tightness Test Method: NN
Date Test: Not reported
Next Test Date: 04/01/2013
Pipe Model: Not reported

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 01/26/04 Transferred from rommel to Austin 02/17/04: Reassigned from AUSTIN to KRIMGOLD. 10/17/05. J.Krimgold reviewed a report submitted by TDX Construction Corp. for NYC DDC. Based on the report's data no petrol release was found due to a TTF. The thank failed a TT due to an air leak around a mainway cut into the top of the tank. Tank was repaired and upgraded. NFA letter."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Code:	392270
Acres:	0.367
HW Code:	C203045
SWIS:	0301
Town:	New York City
Record Added Date:	01/15/2008
Record Updated Date:	01/27/2014
Update By:	JHOCONNE
Site Description:	LOCATION:The Prospect Court Site (the Site) is located at 1198 Prospect Avenue (aka 1224 Prospect Avenue) in the Bronx, New York, in the middle of the block between East 167th Street and Home Street. The Site is identified on the Bronx County Tax Map as Block No. 2693, Lot No. 1101 and 1102. SITE FEATURES:The Site is approximately 0.367 acres in size. Following remediation, the Site was developed with an 8-story residential building with affordable rental housing, with first-floor commercial and community space and a full basement-level parking garage.CURRENT ZONING AND USES:The Site is located within a predominantly residential area. The current zoning is for residential

PROSPECT COURT SITE (Continued) **S116041490**

(R7-1) with a commercial overlay (C2-4). Land use surrounding the Site includes: a park and commercial lots immediately across Reverend James A. Polite Ave to the east; a vacant lot directly to the south; and residential buildings directly to the north and across Prospect Ave to the west. Properties within the vicinity of the Site include: a Morrisania Multi Service Center (which hosts learning disability, jobs, and housing programs), a church, an automotive repair shop, and some retail stores. SITE HISTORY:The Site has historically been used as an automotive repair facility and filling station between 1950 and 1983, and is registered as an unregulated Petroleum Bulk Storage (PBS) facility (NYSDEC ID#2-349488). Thirteen (13) steel underground storage tanks (USTs) and one fuel oil UST were closed in place and have since been removed from the site. The Site is also listed as a formerly registered hazardous waste generator, under the name Service Station (USEPA ID: NYD0006856B), which handled ignitable waste. A NYSDEC spill event (Spill #0705797) was reported in 2007 based on the presence of petroleum impacted soils in the vicinity of the on-site closed tanks, discovered during environmental investigation fieldwork. The 1995 Sanborn map also identified an auto repair structure located within the site. The operations of both the automotive repair shop and the filling station likely contributed to the contamination observed on this site. A BCP agreement was executed in November 2008. The Site was investigated 2008-2011 and underwent remediation 2011-2012.SITE GEOLOGY AND HYDROGEOLOGY:The surrounding area has varied relief with somewhat gentle downward slopes to the southeast towards the Bronx River and the Site is relatively level with surface elevations between approximately 50 feet to 60 feet above mean sea level. Groundwater flow is generally to the north however, some local groundwater at the central and southern portions of the Site may flow in a southeasterly direction. Groundwater has been encountered between 7 and 11 feet below surface grade, below the bedrock interface which was encountered at depths between 5 and 9.5 feet below surface grade.

Env Problem: NATURE AND EXTENT OF CONTAMINATION:Remediation of soil at the Site is complete. Prior to remediation, the primary contaminants of concern were petroleum-related Volatile Organic Compounds (VOCs) and metals, including ethylbenzene, 1,2,4-trimethylbenzene, naphthalene, xylenes, lead, and chromium. In groundwater beneath the Site, petroleum-related contaminants of concern have been mitigated due to the removal of contaminated soil. Additional groundwater treatment (via in-situ chemical oxidation) and groundwater monitoring is ongoing to address remaining groundwater contaminants. The primary contaminants of concern which remain in groundwater are tetrachloroethylene (PCE), trichloroethylene (TCE), and cis-1,2-dichloroethylene (detected as high as 200 parts per billion (ppb))SIGNIFICANT THREAT:NYSDEC and NYSDOH have determined that the site does not present a significant threat to public health or the environment.

Health Problem: Measures are in place to prevent people from coming in contact with groundwater contamination remaining at the site. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

CON EDISON TRANSFORMER MANHOLE: 923 (Continued) **1017774212**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	001
Tank Id:	59100
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

H99 - Tank Leak Detection - Other
J01 - Dispenser - Pressurized Dispenser
D02 - Pipe Type - Galvanized Steel
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
F01 - Pipe External Protection - Painted/Asphalt Coating
L09 - Piping Leak Detection - Exempt Suction Piping
G99 - Tank Secondary Containment - Other
I02 - Overfill - High Level Alarm
C03 - Pipe Location - Aboveground/Underground Combination
B00 - Tank External Protection - None
G04 - Tank Secondary Containment - Double-Walled (Underground)
A03 - Tank Internal Protection - Fiberglass Liner (FRP)

Tank Location:	3
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1986
Capacity Gallons:	3000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Sangesland left a voice message with Mr. Hooker to request more information on what testing and remediation work may have been done on this site. Also, why was the spill reported 4 months after the contamination was identified? 8/21/2007 Mr. Hooker said the delay was due to a mixup on who would call. He says they were not trying to be evasive. The site was a gas station and there are several UST's that were closed in place with cement. The site is now going to be redeveloped into a residential unit and will be going through the city e designation program. Soil borings were taken around the outside of the tank field and came up with some contamination hits. Based on these hits, Mr. Hooker and Eco Systems is preparing a work plan to fully delineate the area and then remediate the problems. This plan should be completed and submitted to the DEC by Oct 1st. 2007. 02/06/08-Vought-Inquiry from DEC Leung on existence of file was first notification Vought received of spill existence. Vought received NO CSL or notification of spill being assigned to Vought since time of call received date or spill date from Sangesland and hence inquired via email to NYCDEP Callista Nazair if property was developed to date as site is E designated. 2/12/08-Vought-Received email from NYCDEP Nazaire that site is not listed as E designated and DEP has no information on site. DEC requires: 1)delineation of soil and groundwater contamination 2)installation of vapor barrier and possibly SSDS 3)collection of endpoint samples. PBS registration shows site has having twelve closed-in-place 550-gallon gasoline USTs and one 4000-gallon closed in place gasoline UST. Vought called Hooker EcoSystems Strategies(845 452-1658) for update on site and address for requirement letter and left message to return call to DEC

PROSPECT TRANSMISSION CNTR,INC (Continued) **U003128170**

with current site status and confirmation of sending delineation plan as per 8/21/07 notes above. Received call from Hooker and he submitted application to BCP Program and will send in cover letter for application. 01/28/10-Vought-Received email from DEC Yau that site has entered an agreement with the BCP. and the site is currently being investigated and spill project manager will remain Vought since not sure if there are any off-site issues that may need to be addressed. 9/2/10 - Raphael Ketani. The spill took place on 4/10/07, but wasn't reported until 8/21/07. The spill involved a leaking gasoline UST. There was no cleanup. The site location is block and lot 2693 and 8. The address is 1196-98 Prospect Avenue. The property was bought on 2/5/03 by Catherine Elio, 2516 Barnes Avenue, Bronx, 10467. The PBS case is #2-349488. There were 13 gasoline USTs. Twelve were 550 gals. and one was 4,000 gal. All were closed in place on 12/1/98. There is no paper file, nor any E-docs. I spoke to Mr. Vought. He didn't remember which tank had failed.
========== The site is part of the BCP program. The case number is C203045. The case manager is Mandy Yau, EE I in Unit A, Brownfields and Superfund. She told me that the site is a former gas station and is now operating as a car repair shop. It has a one story building with a service garage. The site will be developed as an apartment building. There is gasoline and chlorinated solvent contamination on site. It is unknown if there is off site contamination. The gas is in the soil and groundwater. The chlorinated solvents have been found in one well location in the northeast corner of the property. The volunteer is actively pursuing resolving the on site contamination. There is no responsible party.
========== A meeting was held between myself, Randall Austin, Chief of the Spills Unit, Jane O'Connell, Head of Unit A, and a person from Albany DER about the case. It was decided that the case should be transfered to Ms. Yau. I changed the case manager name today. 05/26/11- This spill is reassigned to Dana Kaplan due to a change of PM for the BCP project (C203045). (Yau) 5/27/11 - A Remedial Action Work Plan was approved for the site and the decision document signed on 4/29/11. Remedial work is scheduled to start late June or early July 2011. It has been determined that this site does not present a significant threat. 1/23/13 - Implementation of the approved RAWP began July 2011. The FER was approved and the BCP Certificate Of Completion was issued in December 2012. The COC was for Track 1 Unrestricted Use; provided however, that remedial objectives for groundwater are achieved within 5 years of the COC date. Therefore, an environmental easement was recorded and a Site Management Plan was approved and will be in effect until it is determined by NYSDEC that groundwater remediation is complete. SPILL CLOSED. SEE BCP SITE C203045 FOR REMEDIATION DETAILS."

Remarks: "LEAKING UNDER GROUND STORAGE TANK; NO CLEAN UP HAS BEEN CONDUCTED; THE RESULTS OF SOIL BORING SAMPLES CAME IN ON THE DATE NOTED;"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 1/31/02 MR. SINGS FROM FABCO STATED THAT THE SPILL

FABCO (Continued) **S105995061**

CONSISTED OF A FEW GALLONS OF FUEL OIL ON THE SIDEWALK, DIRT WAS SPREAD ON THE OIL DURING A RAINSTORM CREATING A MUDDY OILY WATER MIX. MR.SINGS ALSO INDICATED THE SPILL CAME FROM THE VENT LINE ON BANCO POPULAR, AND THE TRUCK THAT MADE THE DELIVERY SAID ENTERPRISE TRANSPORTATION ON IT. TIPPLE THEN CALLED BANCO POPULAR (718-589-6668) AND WAS INFORMED THAT THE BANK HAD RETAINED WEXLER BOILER COMPANY TO CLEAN THE SPILL. A REPRESENTATIVE FROM THE 1046 SOUTHERN BLVD. BRANCH OF BANCO POPULAR ASSURED TIPPLE AT 5PM THAT SHE HAD INSPECTED THE SPILL SITE AND THE CLEANUP WAS COMPLETE. "

Remarks: "citizen noticed oil company overfill tank - spill to ground and they put dirt down to cover spill area - spill is being washed away today due to rain "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"01/26/06: This spill transferred from J.Kolleeny to S.Kraszewski. One 15K tank installed in 1973 was removed and replaced by an 8K tank in 2000. An ISRP for spill 9006283, a TTF, was done in 1996 but that spill has been closed. Three soil borings and 3 MWs were installed down gradient of the UST; the groundwater flow direct was presumed to be East. No borings or wells taken from the other sides of the UST. Only one boring exhibited contamination: B-1 next tot he tank detected 8 SVOCs above STARS and 4 SVOCs above guidance values. The GW samples detected no SVOCs or VOCs expect a trace of MTBE. The GW was measured at roughly 10 fbg. The contamination may not be linked to a fuel oil release but possibly some historical activity at this site. During the tank pull any contaminated soil was removed from the site, eliminating a possible source of residual petroleum. - SK 03/22/06: This spill transferred to K.Tang - SK 7/20/10: J.Kann - spill transferred to J.Kann. WP received on 7/15/10. 7/23/12: J.kann - iwp approved with minor comments on 7/23 via email (edoced). 10/9/13: J.Kann - Remedial Investigation report prepared by JC Broderick was submitted by NYCHA on 10/4/13. 4 borings and one new well were installed in 2013. Two existing wells were also sampled on site. Soil and groundwater were analyzed for VOCs and SVOCs. No exceedences above CP-51 or TOGS 1.1.1 were noted. NFA. Spill closed. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND SPILL IN TANK ROOM. NO DRAINS. VAC OUT, DRYS-ALL, WASH CONCRETE. 2/22/2000 Sangesland received a letter from Frank Cardello-Board of Ed Office of the Chancellor (718-391-6832) Transfered from Tibbe to Sangesland. Spill was causedby a defective plug on one of the tanks. During the transfer of product from one 15,000 gallon tank to another, oil spilled out of the defective plug. The spill of approx. 3500 gal of #2 oil and 5 drums of debris was contained in the concrete block tank room. Petroleum Tank Cleaners was called and vacuumed the spill, spread absorbent, drum packed soaked absorbent and steam cleaned the tanks and tank room. Spill closed"
Remarks:	"PLUG WAS TAKEN OFF TOP OF TANK WHICH WHEN FILLED CAUSED SPILL OF APPROX 200 GALS ONTO THE FLOOR IN BASEMENT-OIL COMPANY ENROUTE FOR CLEANUP."

DEC Region:	2
DER Facility ID:	111634
DEC Memo:	"7/27/05 - Transferred for closure review to M Johnson. 6/15/06 - Transferred for closure review to T Knizek. 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Ketani) for review and closure - end 11/1/06 - Raphael Ketani. Site is an apartment building. There was a tank failure. Tanks-A-Lot was pumping out a mix of asbestos and oil from a pit. The site is block/lot 02758/0036. The site is owned by the Human Resources Administration, 250 Church Street, New York, 10013-3429. The agency involved was DPM/HPD, 100 Gold Street, #6Z1, New York, 10038. Assistant Commissioner of DPM was at (212) 863-7087. I called up the 7087 number, but the person answering the phone said that the building was not in the HPD database. I called up Tanks A Lot from the Bronx (718) 387-8300/927-0350. I spoke to a woman who answered the phone and explained that I needed information on this old spill. She said she wasn't sure there were any records, but she will take a look. I called up Mr. Edwin Lugo of DPM at Gold Street (212) 863-7312. I could only leave a voice mail. 11/2/06 - Raphael Ketani. I made an unannounced site visit. I went to the entrance to 1275 Westchester Avenue and was met by heavy security. I was told that the building is an HRA building and to wait outside. Women, some with babies and young children, were coming and going from the building. I was directed to a side entrance at 1138 Longfellow Avenue. Heavy security met me there. I met the super of HRA Adult Institutions, Mr. Hollis. He showed me the boiler room, the first electrical room, and the second electrical room. Each room was absolutely dry and clean with a solid concrete floor that did not have cracks and was painted. No vapors were detected with the PID in the boiler room and the first electrical room. However, the second electrical room had about 70 ppb of vapors. What these vapors were I could not tell as there were no odors. Also, this room had a side room or large niche where an oil tank might have once been kept. Mr. Hollis told me the building was converted to gas a long time ago. I brought this spill case to the attention of Randall Austin, Chief Spills Engineer Region 2. He told me that I can close this case. Based upon the lack of impirical or incidental evidence of a spill, the lack of direct evidence that a spill event took place, the lack of any personnel who were present at the time of the spill from the apartment building or the cleanup company, the lack of any papers documenting the spill, I am closing

1275 WESTCHESTER AVE (Continued) **S107782552**

the case. 1/8/07 - Raphael Ketani. I received a call from Naim (na-eem) Brown of the CPC (Community Preservation Corporation). He asked whether the spill had been closed. I told him it had. He asked that I send him an NFA letter. I told him I would. The letter went out today to Mr. Brown at the CPC, 31-54 Albany Crescent, Bronx, 10463. "

DER Facility ID:	327769
DEC Memo:	"3/9/07 bf: called Juan Roman, owner of the property. He said tank failure was due to tank drawing in air possibly from the vent. The tank is not being used and has not been used in a few years. the site is operated as a body shop not a service station. Tank was tested because property is being sold. Tank may be unregistered. No tank registration at street number 922. Mr. Roman plans on removing tank and will notify me next week when he secures a contractor. I told him DEC needs proper notification and application for closure. I also told him he will receive a letter from me (ttf) that he should forward to the contractor. TTF letter sent to: Juan Roman 922 Westchester Avenue Bronx, NY 10459 3/27/07 Spoke with Bob Hayman of RND Services (845)348-6355. No closure application filed yet. I told him to get a copy of the ttf letter from Mr. Roman so that a report regarding the ttf can be prepared. bf 4/5/07 spoke with Marty Wodka of Team Environmental. (845)692-8124. He told me on same property, 10

COMMERCIAL PROP-ERTY (Continued) **S108467863**

abandoned 550 gallon tanks discovered. The property is up for sale. Mr. Wodka is working for the purchaser of the property. He will be calling in another spill for the 10 tanks. Mr. Wodka called me back later and said spill # is 0700175. bf 11/3/08 Reviewed PBS file and tanks were closed. R. Piper was contacted by Don Carlo Environemntal Services regarding the requirements for closure of the spills. bf 4/15/10 Received the following e-mail from Vanessa Clarke, DEC Intern: Hi Brian, Attached is a forwarded email from one of the owners of a site located on Westchester Avenue in the Bronx. The spill number is 0613228 and the contact person is Jason Friedland. When I spoke to him last month in march, he said that any information regarding the tanks were handled by the Hydrotech Environmental whose email he added in the above subject line. I included a TTF letter for this case. I imagine that the owner has to get the information from hydrotech himself and forward it to us. Let me know if there is anything else. Vanessa C. 4/19/10 bf: Sent ttf letter to: Jason Friedland Westrock Development 920-922 Westchester Avenue Bronx, NY 10459 4/26/10 Received letter returned from USPS and marked: RETURN TO SENDER, NO SUCH NUMBER, UNABLE TO FORWARD. bf 8/13/10 Spill closed based on closure of Spill Number 0803439 which included the tank failure found here. bf "

Once permits are in place, the tanks will be yanked. He will notify me when this work is to be done. 10/30/2008 Sangesland spoke to Danny at Don Carlo Environmental. He said they pulled the tank and got clean end points. They will forward a report to Ryan Piper for review. 12/17/10-Hiralkumar Patel. reviewed tank closure report submitted by Don Carlo for spill #: 0803439. after reviewing the report, case closed. refer to spill #: 0803439 for report. 03/01/11-Hiralkumar Patel. DEC Piper informed me that he found an old remedial action plan submitted by Hydrotech due to findings of contaminated groundwater. after Piper's review, hydrotech installed some monitoring wells on the site and where monitoring it. as these facts were unknown and no indication about these in the spill notes or e-docs at the time of case closure, Piper will re-open and manager this case for further remediation."

DEC Memo:	"04/26/05 - Sawyer - Called Frank Onoa and he informed me that UTB Environmental Corp.(516)326-1160 was doing the tank removal. They will aslo remove the contamination and forward end-point samples to the Department. 10.18.05 Sharif- I called Frank again. He is on vacation. Instead of him I spoke with another gentleman at the same no,(718)707-5718 and let him know that we have n't received the tank closure report. 01/30/06 Sharif// Frank Onoa will bring a copy of the site assesment report to DEC tomorrow. 02/02/06 Sharif// Rec'd site assesment report prepared by KEC. The report has not included some vital informations about the site.I called Frank Inoa and told him to send DEC: 1. Waste disposal manifest with description of the removed contaminants. 2. Sample analytical result for monitoring well 3. Delineation of contamination around fill and vent line. 03/13/06 Sharif Rahman- Rec'd waste disposal manifest,a statement from the consultant UTB that the contaminated soil was removed and disposed from the tank area including the fill line.Spill closed."

DEC Memo:	"12/02/05: This spill transferred from J.Kolleeny to S.Kraszewski. 07/26/06: NYCHA update summary states that one 12K tank installed in 1985 was replaced by one 8K UST in 2005. A temporary tank installed in 2004 was removed in 2005 as well. The 12K tank suffered a TTF. NYCHA recommends that DEC review the available site assessment. - SK 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 07/18/12 - J.Kann - IWP received on 7/16/12. 9/28/15: J.Kann - This spill precedes the tank removal/replacement that occurred in 2005. A spill was called in during the tank replacement activities (Spill 0501057). Soils were excavated and soil samples collected as a part of the tank removal and was reviewed by another PM and spill 0501057 was closed based on that information. Therefore, additional investigation is not necessary around this tank. NFA. Spill closed. An email was sent to NYCHA."

DER Facility ID:	321222
DEC Memo:	"Sangesland spoke to Joe Ostrowski at PTC (718)624-4842. He said PTC only vacced out the tank. PTC did NOT clean up the floor under the tank or did they look for oil under the cement floor. This needs to be addressed. Boiler Contractor on site was Reggie Anderson at Kinetick Energy (917-742-0226) PTC gave an estimate to building owner (Charles Plumber 914-441-1212) to remove/replace the tank, clean the basement and install temp tanks until a new tank can be installed. 10/13- Sangesland spoke to Joe at PTC again for an update - Owner has NOT called back to PTC to discuss their proposal to do work. Probably no work has been done at the site. Sangesland left a voice mail message with Mr. Plumber (owner) to call Raphael Ketani with an update on what his plans are to clean up under the tank. 10/16/06 - Raphael Ketani. I tried to call Mr. Plumber of Plumber Realty and Plumber Services, but could only leave a voice mail. Later, Mr. Plumber returned my message and said that PTC was removing the tank and the contaminated soil. I left a return message that I needed end point sample results so that DEC is sure that all of the contamination has been removed, or at least the contamination doesn't exceed TAGM. 11/6/06 - Raphael Ketani. I hadn't received any end point sample results. So I tried calling Mr. Plumber, but could only

830 EAST 163RD ST CORP (Continued) **U003387516**

leave a voice mail. 12/19/06 - Raphael Ketani. I tried to reach Mr. Plumber, but could only leave a voice mail. 1/5/07 - Raphael Ketani. I tried to reach Mr. Plumber, but could only leave a voice mail. I spoke to Mark Salamack of PTC. He said that PTC just cleaned out the tank and nothing else. He said to talk to Mr. Anderson of Kinetick Energy. I called Mr. Anderson and he said that he thought I had already received all of the paperwork. I said I had nothing. He said that 3 soil samples were taken and only a little soil needed to be removed in front of the tank. He said that I should get the paperwork next week. 1/17/07 - Raphael Ketani. I received the analytical results for the 3 soil samples that were taken. The results had only a few low level hits well below the TAGM RSCO limits. However, I never received the manifests for the soil that was removed. I called up Cardinal Tank, who did the digging, and asked the secretary to have someone send me the manifests. 3/7/07 - Raphael Ketani. I spoke to Mr. Plumber regarding the manifests. I told him that DEC still hadn't received them and so the case can't be closed. He said he thought the case had been closed. I told him that the manifests are the only thing I need. He said he will call up the company that did the digging and have them sent to me. Reggie called me back and said that he can get ahold of the manifests. I told him to send them via FAX, if possible. 7/25/07 - Raphael Ketani. I contacted Reggie again and asked him for the manifest. He FAXed it to me. Based upon the soil analytical results and the manifest, I am closing the spill case."

Updated By:	KALEWAND
Site Description:	Location:The site is located at 1610 Bathgate Avenue in the borough of the Bronx, City of New York, and is identified on the local Tax Maps as block 2919, Lot 5. Site Features:The site is about 0.75 acres in size and is bounded to the north by East 172nd Street, to the east by Third Avenue, to the south by a day care facility and to the west by Bathgate Avenue. The site is located within the Port Authority?s Bathgate Industrial Park which encompasses 21.5 acres of light manufacturing zoned property. The Kleener King facility was constructed in 2000 and operated as a dry cleaning facility until September 2005. The property comprises 17,802 square feet ground floor level area and a 5,260 square foot mezzanine level. The building is constructed over a foundation slab of reinforced concrete. The property is almost entirely covered by an asphalt parking area, concrete sidewalks or the building itself. Current Zone/Use:The site is owned by New York City. It is zoned for (M1-4, R6). The site is currently occupied by Terrafina LLC, since January 2012. Terrafina packs, warehouses, and distributes nuts, dried fruit and other confectionaries at this location. Historical Use:The former

KLEENER KING OF BATHGATE (Continued) **S110247062**

Kleener King dry cleaner and laundromat facility was constructed in 2000 and operated as a dry cleaning facility until September 2005. Following closure of the dry cleaning business and abandonment of the facility by the owner/operator, hazardous waste was found consisting of chlorinated solvents in groundwater and soil vapor.Site Geology and Hydrogeology:The subsurface beneath the site consist of fill material with construction and demolition debris to depths ranging from 4 feet to 14 feet below ground surface (bgs). The fill material is underlain by coarse to fine sand with gravel and trace of silt to depth ranging from 7 feet to 69 feet bgs. Groundwater is encountered at depths ranging from 6.8 feet bgs to 12.9 feet bgs. Groundwater has been determined to flow in a northwesterly direction across the site.The site does not qualify for addition to the Registry of Inactive Hazardous Waste Sites.

Env Problem: Nature and Extent of Contamination:Based on the investigations conducted to date, the primary contaminants of concern at the site are tetrchloroethylene (PCE) and its decomposition products. Chlorinated solvent were detected in groundwater and soil vapor above applicable standards and guidance values. Soil:Low levels of PCE and its degradation compounds were detected in subsurface soil with a maximum concentration of 0.18 ppm, which is below the unrestricted soil cleanup objective. Groundwater:Contaminants detected in groundwater include PCE at a maximum concentration of 9.1 ppb; cis-1,2-dichloroethene at a maximum concentration of 17 ppb; and trichloroethene at a maximum concentration of 38 ppb. The groundwater standard for each of these compounds is 5 ppb. Soil Vapor:Vapor intrusion investigation completed at the site identified elevated concentrations of chlorinated solvents in soil vapor below the building. The maximum concentration for PCE was detected at 120,000 ug/m3, which is above the NYSDOH guidance value. The indoor air sample result indicated that contaminant concentrations were below the NYSDOH guidance. As a result of the soil vapor intrusion investigation, the Port Authority installed a sub-slab depressurization system (SSDS) at the site to mitigate the elevated soil vapor concentrations beneath the building slab.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

East Map:	5940605 FLUSHING, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

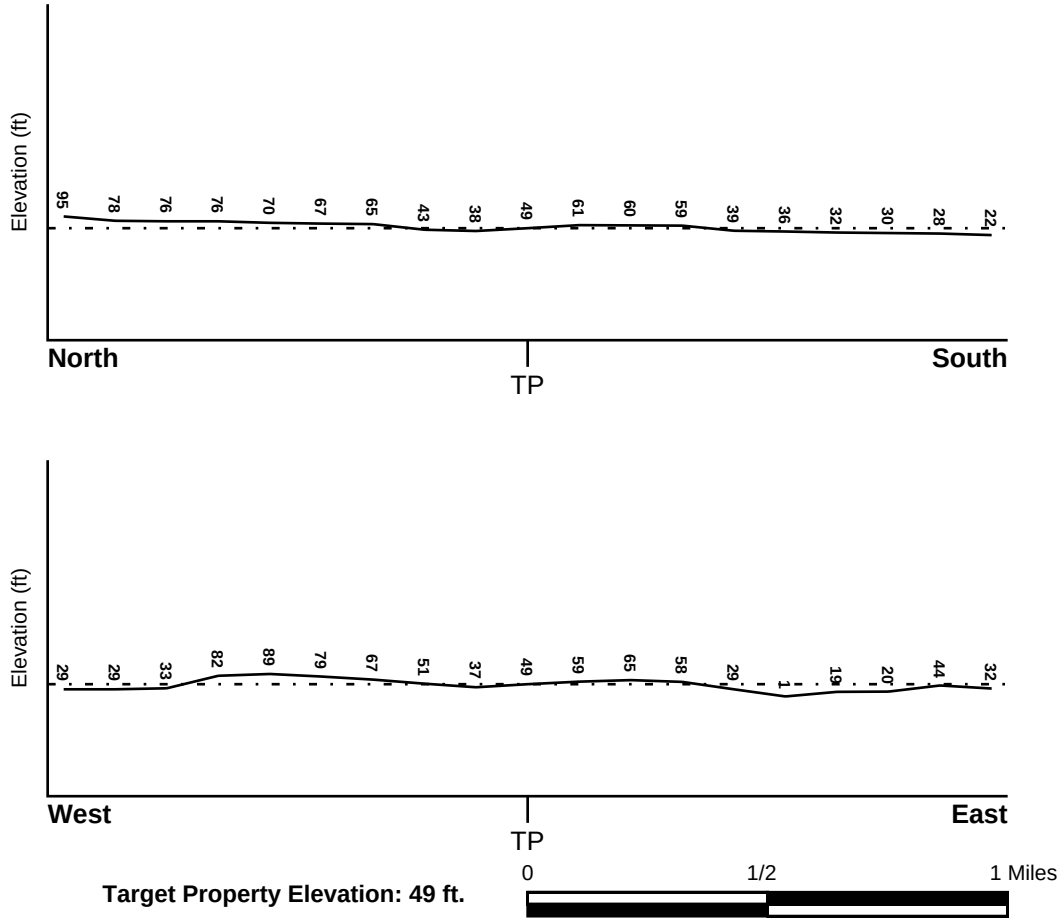

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 49 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970084F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970083F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovician		
Series:	Middle Ordovician (Mohawkian)		
Code:	O2 *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1931 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Subject: FOIL Request :: W012938-100416

Dear Robert:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 10/4/2016 and given the reference number FOIL #W012938-100416 for tracking purposes. You may expect the Department's response to your request no later than **11/2/2016**.

Record Requested: **Freedom of Information Request – Environmental Search Site: 1107-1113 Fox Street, Block 2718, Lots 48 and 50 Bronx, NY 10459, Brinkerhoff Project No. 16-0406 To Whom It May Concern: Brinkerhoff Environmental Services, Inc. is conducting an environmental site assessment of the above-referenced site. This letter is a request to review files relative to environmental issues that your office may have regarding the above-referenced property. Kindly advise us of your findings in writing. We are looking for site inspection reports, violations for the handling, storage or disposal of hazardous substances, hazardous material releases or spills, underground storage tank information, land use restrictions, and other information regarding potential areas of environmental concern. Thank you for your time and attention to this matter and please do not hesitate to contact me at 732-223-2225 or rhazard@brinkenv.com if you have questions or would like additional information. Sincerely, BRINKERHOFF ENVIRONMENTAL SERVICES, INC. Robert Hazard Environmental Scientist**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Subject: FOIL Request :: W012945-100416

Dear Robert:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 10/4/2016 and given the reference number FOIL #W012945-100416 for tracking purposes. You may expect the Department's response to your request no later than **11/2/2016**.

Record Requested: **Freedom of Information Request – Environmental Search Site: 926 East 169th Street, Block 2718, Lot 63, Bronx, NY 10459, Brinkerhoff Project No. 16-0406 To Whom It May Concern: Brinkerhoff Environmental Services, Inc. is conducting an environmental site assessment of the above-referenced site. This letter is a request to review files relative to environmental issues that your office may have regarding the above-referenced property. Kindly advise us of your findings in writing. We are looking for site inspection reports, violations for the handling, storage or disposal of hazardous substances, hazardous material releases or spills, underground storage tank information, land use restrictions, and other information regarding potential areas of environmental concern. Thank you for your time and attention to this matter and please do not hesitate to contact me at 732-223-2225 or rhazard@brinkenv.com if you have questions or would like additional information. Sincerely, BRINKERHOFF ENVIRONMENTAL SERVICES, INC. Robert Hazard Environmental Scientist**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Standard N.Y.B.T.U. Form 8002—2M-11-66—Bargain and Sale Deed, with Covenants against Grantor's Acts—Individual or Corporation. (Single sheet)

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT—THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY

THIS INDENTURE, made the 15th day of December, nineteen hundred and sixty-seven

BETWEEN FOX PLATING CORPORATION, a New York corporation, having its principal office at 1107 Fox Street, Borough of the Bronx, City and State of New York,

REC. 290 PAGE 219

party of the first part, and PELHAM FOODS, INC., a New York corporation, having its principal office at 918-924 East 169th Street, Borough of the Bronx, City and State of New York,

party of the second part,

WITNESSETH, that the party of the first part, in consideration of ten dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of the Bronx, City, County and Stateof New York known as Lots 26 and 27 on Block 471 on a certain map entitled, "Map of sub-division of property of Isabel Tiffany Perry in the 23rd Ward of the City of New York, being part of the Fox Estate," filed in the Office of the Register of the County of New York on Sept. 25, 1882 by the No. 890 which said lots taken together: are more particularly bounded and described as follows:

BEGINNING at a point on the westerly side of Fox Street, distant 113.60 feet northerly from the northwesterly corner of Fox and 167th Streets; and running thence NORTHERLY along said westerly side of Fox Street, 50 feet;
thence WESTERLY at right angles to said Fox Street, 127.66 feet;
thence SOUTHERLY parallel with Tiffany Street as laid out on said Map, 50.70 feet;
thence EASTERLY again at right angles to said Fox Street, 119.24 feet to the westerly side of Fox Street, at the point or place of BEGINNING.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

THIS INDENTURE, made the 29th day of September, nineteen hundred and eighty-two

BETWEEN PELHAM FOODS INC., a domestic corporation, having its principal office at 1107-1109 Fox Street, in the County of Bronx, City and State of New York

party of the first part, and FORT APACHE YOUTH CENTER, INC., having its principal office at 1111 Fox Street, in the County of Bronx, City and State of New York

party of the second part,

WITNESSETH, that the party of the first part, in consideration of Ten Dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough and County of Bronx, City and State of New York, known as Lots 26 and 27 in Block 471 on a certain map entitled "Map of Subdivision of property of Isabel Tiffany Perry, in the 23rd Ward, City of New York, being part of the Fox Estates," filed in the Office of the Register, County of New York 9/25/1882 by the Map #890, which said lots when taken together are more particularly bounded and described as follows:

BEGINNING at a point on the westerly side of Fox Street, distant 113.60 feet northerly from the northwesterly corner of Fox Street and 167th Street; running thence NORTHERLY along the westerly side of Fox Street, 50 feet; thence WESTERLY at right angles to Fox Street, 127.66 feet; thence SOUTHERLY parallel with Tiffany Street as laid out on said map, 50.70 feet; and thence EASTERLY again at right angles to said Fox Street, 119.24 feet to the westerly side of Fox Street, the point or place of BEGINNING.

Said premises being commercial property and known as and by the street numbers 1107 and 1109 Fox Street.

This conveyance is made in the regular course of business with the unanimous consent of the holders of all the outstanding shares of stock of the party of the first part.

THIS DEED made the 25th day of November, Nineteen Hundred and Ninety Two between CAROL O'CLEIREACAIN, Commissioner of Finance of The City of New York, having her principal office in Room 500, Municipal Building, Borough of Manhattan, County, City and State of New York, GRANTOR, and THE CITY OF NEW YORK, a municipal corporation having its principal office at City Hall, Borough of Manhattan, County, City, and State of New York, GRANTEE.

W I T N E S S E T H :

That the GRANTOR, duly empowered by a Judgment of Foreclosure entered at the Ex Parte and Urgent Motion Part of New York State Supreme Court, County of Bronx, on November 13, 1992, in an action to foreclose certain tax liens owned and held by the City of New York entitled: IN REM TAX FORECLOSURE ACTION NO. 39, BOROUGH OF BRONX, SUPREME COURT, BRONX COUNTY, INDEX NO. 4000/1991, and pursuant to the provisions of Sections 11-409 and 11-412 of the Administrative Code of The City of New York, does hereby grant and convey unto the GRANTEE, its successors and assigns:

ALL THOSE CERTAIN LOTS, PIECES OR PARCELS OF LAND, WITH THE BUILDINGS AND IMPROVEMENT THEREON ERECTED, SITUATE, LYING AND BEING IN THE BOROUGH OF BRONX, COUNTY OF BRONX, CITY AND STATE OF NEW YORK, MORE PARTICULARLY DESIGNATED ON THE TAX MAP OF THE CITY OF NEW YORK, FOR THE BOROUGH OF BRONX, AS SECTIONS SECTION TEXT
AS SAID TAX MAP WAS ON THE 21ST DAY OF JUNE, 1991.

TO HAVE AND TO HOLD the premises herein granted unto the GRANTEE, its successors and assigns forever,

SUBJECT to any state of facts an accurate survey would show,

SUBJECT to unpaid taxes, assessments and water charges affecting said premises which have accrued and become liens subsequent to those contained in the List of Delinquent Taxes filed in the above-mentioned action.

IN WITNESS WHEREOF, the GRANTOR has hereunto set her hand and seal.

REEL 1134 PG 0017

Upon reading and filing the annexed affirmation of GARY MARTON, Assistant Corporation Counsel dated November 13, 1992, from which it appears that pursuant to the provisions of Section 11-424 of the Administrative Code of the City of New York it is necessary to vacate the judgment of foreclosure entered herein on October 7, 1991 and to set aside the deed provided for therein and hereinbefore executed and delivered insofar as said judgment and deed affect the premises set forth in the above caption; and to discontinue the above action as to said premises and to cancel the lis pendens pertaining thereto; and it appearing that no one is entitled to notice of this application.

NOW, on motion of O. PETER SHERWOOD, Corporation Counsel, attorney for the City of New York, plaintiff herein, it is

ORDERED, that this motion be and the same hereby is in all respects granted; and it is further

ORDERED, that the provisions of the judgment of foreclosure entered herein on October 7, 1991 insofar as they affect the above-captioned premises be vacated and set aside and the action discontinued as to said premises; and it is further

ORDERED, that the deed executed pursuant to said judgment of foreclosure by CAROL O'CLEIREACAIN, Commissioner of Finance of the City of New York, as grantor, to the City of New York as grantee, dated October 28, 1991, and recorded in the office of the City Register of Bronx County on October 31, 1991, in reel 1067, Page 464, insofar as it affects the above-captioned premises, be vacated and set aside and the City Register of Bronx County is hereby directed to affect such vacating of said deed by making a

marginal note thereof upon said deed and upon each of the books, records and indices in said Register's office, wherever a notation of the recording of said deed may appear; and it is further

ORDERED, that said judgment of foreclosure and said deed in all other respects be continued in full force and effect; and it is further

ORDERED, that the notation of the filing of the List of Delinquent Taxes, as filed on June 29, 1990, contained in the docket of the notices of pendency of action affecting the above-captioned premises, be cancelled and the same hereby is cancelled, and the Clerk of Bronx County is hereby directed to effect such cancellation of said notation of filing by making a note thereof upon each of the books, records and indices in said County Clerk's office, wherever a notation of the filing of same may appear.

STATE OF NEW YORK)
: SS.:
COUNTY OF NEW YORK)

GARY MARTON, an attorney admitted to practice before the Courts of the State of New York, affirms the truth of the following statements under the penalties of perjury pursuant to CPLR 2106:

1. I am an Assistant Corporation Counsel of the City of New York and fully familiar with all of the matters hereinafter set forth.

2. That on June 29, 1990, a List of Delinquent Taxes affecting premises located on the Tax Map of the City of New York for the Borough of the Bronx in Sections 9-12, 14-19 was filed in the office of the Clerk of Bronx County, in accordance with the provisions of Chapter 4, Title 11, of the Administrative Code of the City of New York. Included in said List of Delinquent Taxes were the premises set forth in the above caption.

3. Thereafter such proceedings were had as to result in a judgment of foreclosure entered herein on October 7, 1991. Said judgment of foreclosure directed the Finance Administrator of the City of New York to prepare and execute a deed conveying to the City of New York full and complete title to the parcels of property therein described, which included the above-captioned premises.

4. In accordance with said judgment, CAROL O'CLEIREACAIN, Commissioner of Finance of the City of New York, on October 28, 1991 executed and delivered to the City of New York a deed, vesting the City with title in fee simple absolute to the above-captioned premises among others. Said deed was recorded in

the office of the City Register of Bronx County on October 31, 1991, in reel 1067, page 464.

5. Applications for release of the City's interest in the above-captioned premises were thereafter filed with the Department of General Services pursuant to Section 11-424 of the Administrative Code of the City of New York. Said applications were approved as to form, timeliness and eligibility by the Corporation Counsel. For each application filed pursuant to Section 11-424 subsection(g), the In Rem Foreclosure Release Board authorized the release of the City's interest.

6. The applicants having paid all of the amounts required to be paid by the aforesaid Section 11-424, it is now necessary to release the City's interest in the above-captioned premises by vacating and setting aside the judgment of foreclosure and deed referred to above as to said premises.

7. No previous application has been made for the relief sought herein.

8. No one is entitled to notice of this application.

WHEREFORE, it is respectfully requested that the annexed order of this Court discontinuing this In Rem Action as to the above-captioned premises; vacating and setting aside the provisions of the judgment of foreclosure of this Court, entered herein on October 7, 1991 insofar as they affect the above-captioned premises but leaving in full force and effect the provisions of said judgment with regard to all other premises therein mentioned; vacating and setting aside the deed executed and delivered by CAROL O'CLEIREACAIN, Commissioner of Finance of the City of New York, to

the City of New York on October 28, 1991, and recorded in the office of the City Register of Bronx County on October 31, 1991 in reel 1067, page 464, insofar as it affects the above-captioned premises but leaving in full force and effect the said deed with regard to all other premises therein mentioned; and directing that the notation of the filing of the List of Delinquent Taxes contained in the docket of notices of pendency of action as to the above-captioned premises in the office of the Clerk of Bronx County be cancelled and that said County Clerk affect such cancellation of said notation of filing by making a note thereof upon each of the books, records and indices in said County Clerk's office, wherever a note of the filing of the same may appear, be granted and such other, further and different relief as to the Court may seem equitable and proper.

Standard N.Y.B.T.U. Form 8002 • 3-74-70M—Bargain and Sale Deed, with Covenant against Grantor's Acts—Individual or Corporation (Single sheet)

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT—THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY.

REEL 282 PAGE 1495

THIS INDENTURE, made the 1st day of July, , nineteen hundred and seventy-five

BETWEEN PAUL LEDERMAN, INC., a New Jersey corporation, with its principal offices at 125 Louis Street, South Hackensack, New Jersey,

party of the first part, and G.C.G. ATHLETICS CORP., a New York corporation with its principal offices at 1111 Fox Street, Bronx, New York,

party of the second part,

WITNESSETH, that the party of the first part, in consideration of Ten Dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Bronx, City and State of New York, which on a map of sub-division of Map of Isabel Tiffay Perry in the 23rd Ward, of the City of New York, being part of the Fox Estate, shown on Map filed by Hugh N. Camp, G.S. Greene, Jr., and Tom R. Brown, Comm. of Partition on 6/2/1879 filed 9/26/1882 in Registers Office of City of New York as Map No. 890 are bounded and described as lots 24 and 25 in Block 471 and which when taken together are bounded and described on said map as follows:

BEGINNING at a point on the westerly side of Barretto Street, now known as Fox Street, distant 29.61 feet southerly from the intersection of the westerly side of Barretto Street, with the southwesterly side of 169th Street; running thence westerly at right angles to the westerly side of Barretto Street, 136.08 feet; thence southerly parallel with the easterly side of Tiffay Street, 50.71 feet; thence easterly at right angles to the westerly side of Barretto Street 127.88 feet to the westerly side of Barretto Street; and thence northerly along the westerly side of Barretto Street, 50 feet to the point or place of beginning.

SUBJECT to and together with benefit of rights and easement contained in Agreement in Liber 58 cp. 73.

SUBJECT to a Purchase Money Mortgage in the amount of $12,000.00.

This conveyance is made in the regular course of business actually conducted by the party of the first part.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.
AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.
The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

THIS DEED, made the 25th day of September, Nineteen hundred and eighty-one

BETWEEN PHILIP R. MICHAEL, Commissioner of Finance of The City of New York, having his principal office in Room 500, Municipal Building, Borough of Manhattan, County, City and State of New York, GRANTOR,

and THE CITY OF NEW YORK, a municipal corporation having its principal office at City Hall, Borough of Manhattan, County, City and State of New York, GRANTEE.

WITNESSETH:

That the Grantor, duly empowered by a judgment of foreclosure entered at a Special Term, Part I of the New York Supreme Court, County of Bronx, on September 24, 1981

in an action to foreclose certain tax liens owned and held by The City of New York entitled:

IN REM TAX FORECLOSURE ACTION NO. 32, BOROUGH OF BRONX,

and in pursuance of the provisions of Section D17-12.0 of the Administrative Code of The City of New York, does hereby grant and convey unto the Grantee, its successors and assigns:

THIS DEED made the 28th day of October, Nineteen Hundred and Ninety between CAROL O'CLEIREACAIN, Commissioner of Finance of The City of New York, having her principal office in Room 500, Municipal Building, Borough of Manhattan, County, City and State of New York, GRANTOR, and THE CITY OF NEW YORK, a municipal corporation having its principal office at City Hall, Borough of Manhattan, County, City, and State of New York, GRANTEE.

W I T N E S S E T H :

That the GRANTOR, duly empowered by a Judgment of Foreclosure entered at the Ex Parte and Urgent Motion Part of New York State Supreme Court, County of Bronx, on October 7, 1991 in an action to foreclose certain tax liens owned and held by the City of New York entitled: IN REM TAX FORECLOSURE ACTION NO. 38, BOROUGH OF BRONX, SUPREME COURT, BRONX COUNTY, INDEX NO. 4000/1990, and pursuant to the provisions of Sections 11-409 and 11-412 of the Administrative Code of The City of New York, does hereby grant and convey unto the GRANTEE, its successors and assigns:

ALL THOSE CERTAIN LOTS, PIECES OR PARCELS OF LAND, WITH THE BUILDINGS AND IMPROVEMENT THEREON ERECTED, SITUATE, LYING AND BEING IN THE BOROUGH OF BRONX, COUNTY OF BRONX, CITY AND STATE OF NEW YORK, MORE PARTICULARLY DESIGNATED ON THE TAX MAP OF THE CITY OF NEW YORK, FOR THE BOROUGH OF BRONX, AS SECTIONS SECTION TEXT
AS SAID TAX MAP WAS ON THE 29TH DAY OF JUNE, 1990.

TO HAVE AND TO HOLD the premises herein granted unto the GRANTEE, its successors and assigns forever,

SUBJECT to any state of facts an accurate survey would show,

SUBJECT to unpaid taxes, assessments and water charges affecting said premises which have accrued and become liens subsequent to those contained in the List of Delinquent Taxes filed in the above-mentioned action.

IN WITNESS WHEREOF, the GRANTOR has hereunto set her hand and seal.

Carol O'Cleireacain

CAROL O'CLEIREACAIN
Commissioner of Finance
of The City of New York

In the presence of:

STATE OF NEW YORK)
: SS.:
COUNTY OF NEW YORK)

On the 28th **day of October, 1991 before me came CAROL O'CLEIREACAIN, Commissioner of Finance of The City of New York, to me known to be the individual described in and who executed the foregoing instrument and acknowledged that she executed the same.**

JOHN J. CHECCHIO
Senior Consultant

QUALIFICATIONS AND EXPERIENCE

Mr. Checchio is a Civil Engineer and Environmental Scientist with over 25 years of experience managing Civil and environmental engineering projects, which include Phase I/II investigations, groundwater investigations and remediation, environmental assessments, feasibility studies, preparation of bid specifications, and underground storage tank management for industrial and residential projects.

Soil and Groundwater Investigation and Remediation

Mr. Checchio directs groundwater monitoring and hydrogeologic evaluations. Areas of specialization include the collection and evaluation of geologic/hydrogeologic data for the purpose of evaluating ground water contaminant transport computer models and in evaluating the effectiveness of remedial applications.

Phase I/II Environmental Site Assessments

Mr. Checchio directs Phase I and II Environmental Site Assessments, Site Investigations and Remedial Investigations for commercial/industrial property owners, banks and public sector clients. He also manages Phase II Environmental Investigations at impacted sites in cooperation with state and federal agencies.

Underground Storage Tank Management

Mr. Checchio manages all aspects of UST closures and environmental impacts resulting from leaking USTs. His experience includes evaluation of subsurface geology and hydrogeology, contaminant identification, plume extent and migration. He has supervised residential and commercial UST closures and cleanups in New Jersey, Maryland, California, Ohio, and Hawaii, and has generated regulatory reports, including closure reports and Site Investigation Reports (SIRs).

Remedial Investigations

Mr. Checchio manages RIs to address and remediate environmental impact by petroleum products, gasoline, heating oils, industrial solvents, priority pollutant metals and industrial by-products in soil and groundwater. His expertise includes the delineation of groundwater contaminants at sites with multiple sources, evaluation of natural attenuation in remediation of groundwater and soil, and the development of cost-effective solutions to vertical and lateral delineation problems. Mr. Checchio supervises the preparation of Remedial Investigation Reports (RIRs), Remedial Action Workplans (RAWs) and Remedial Action Reports (RARs).

Industrial Site Recovery Act (ISRA) [formerly Environmental Cleanup Responsibility Act (ECRA) Investigations]

Mr. Checchio manages compliance projects for environmental investigations and remediation, to ensure that industrial establishments have been remediated to an acceptable condition at the time of a property transfer. Mr. Checchio is well-versed in The New Jersey Technical Requirements for Site Remediation (N.J.A.C. 7:26 E), which form the basis for the investigation and cleanup of properties that fall under Standard Industrial Codes (SICs) applicable to ISRA.
