Tank Info:

Tank Number:	001
Tank Id:	3708
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	G00 - Tank Secondary Containment - None
	J02 - Dispenser - Suction Dispenser
	C03 - Pipe Location - Aboveground/Underground Combination
	D00 - Pipe Type - No Piping
	F00 - Pipe External Protection - None
	B00 - Tank External Protection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	H00 - Tank Leak Detection - None
	A00 - Tank Internal Protection - None
	I04 - Overfill - Product Level Gauge (A/G)
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	12/01/1946
Capacity Gallons:	5000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	MJGRIFFI

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: 7/7/20 - sekhon PBS 2-250325 H & H Equities Inc 1325 CASTLE HILL AVENUE, Bronx, NY - 10462 Dora Genao - management - dgenao@annalmgt.com Paul Collins - Contractor - paul@tanks.nyc -- Riteway Tank Facility has 7500 gallons tank, tank failed the test. No visible product lost, no odors observed. TTf letter emailed to RP and cc'd to contractor. case assigned to DEC Zhune for follow up. 7/9/ - Sekhon Letter DECDOCs. Dora Genao cell 917-732-7834 3/3/21-David Chan from Riteway emailed the report dated March 3, 2021. On July 2, 2020, Riteway was contractor by Annual Management Co LTD to perform a tank tightness test at 185 McClellan Street. The tank tightness test failed (please see enclosed tightness test)and the New York State Department of Environmental Conservation was contacted and spill # 2002596 was generated. The fuel oil tank was immediately evacuated and pumped out. Good fuel was transferred to another location (please see enclosed work tickets and manifest). The fuel oil tank was cleaned by All Boro Tank(please see enclosed invoice for activity details. 200 gallons of liquid was generated from the cleaning and disposed of in a legal manner (please see enclosed liquid manifest). After the cleaning, the fuel oil tank was cut up and removed (please see affidavit of removal) Once the tank was removed, endpoint samples were retrieved from the area beneath the removed tank and along the path of the fill line. Samples were placed into approved jars and sentto a certified laboratory for analysis. Samples returned well within NYS regulatory limits (please see enclosed site map for locations and PID details, an laboratory reports for sample details). The site is free from contamination. Spill Closed.

Remarks: tank test failure

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO send ttf ltr 11/3/04 TJD Petroleum Tank Cleaners submitted a closure report. Stick and vent lines were found to leak upon retest. A visual inspection of tank interior revealed corrosion holes in top of tank. Holes were cut through tank bottom and soil samples extracted. Laboratory anlaysis of samples did not reveal any TAGM exceedances. Tank was abandonned in place with concrete. New AST installed at site. No further action required. Spill closed.
Remarks:	tank test failed.uncover,evaluate,retest

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 1/8/03 6000 GAL TANK ENCASED IN CONCRETE, NO SOIL SAMPLES TAKEN YET. ARAKHAN 1/15/03 TTF LETTER MAILED AND FAXED. 2/20/2003 TIPPLE RECIEVED REQUEST FOR EXTENSION WITH CONTRACTORS INFORMATION. CALLED CONTRACTOR REFERENCED ON EXTENSION REQUEST AND THEY HAD NOT BEEN RETAINED BY PROPERTY OWNER. TANK REGISTRATION EXPIRED, MR. PERSAD STATED THAT HE WOULD CONTACT ME WITHIN THE WEEK TO CONFIRM THAT THE PROPER WORK/ REGISTRATION WOULD BE ADDRESSED PROPERLY. 3/21/03 Tipple spoke with Mr.Persad, he stated that the registration was sent to the Albany office a few weeks ago, Mr. Wolf will be doing the work. 3/25/03 called JM Mechanical again. TTF letter choose one option and proceed with work. 4/30/03TIPPLE SPOKE WITH TOM LEDDE PROTEST, TANK CLEANED, INVESTIGATION/SOIL SAMPLES TO FOLLOW IN ORDER TO DETERMINE NEXT STEP / REMOVAL/ ABANDONMENT. 05/17/06: This spill is transferred from Mr. koon Tang to Q.Abidi. Called Mr. Abraham Wachsler of NYC Tank Testing at(718)731-7011, left message to call me back. -QA 5/24/06: Mr. Wachsler of NYC Tank Testing sent copy of tank test report, showing failure with leak below product level (wet portion). - QA 06/28/07: I visited Spill site to inspect the oil tank. -QA 6/7/06: Called Mr. Persaud, property owner, left message on machine. - QA 06/20/06: Contacted Kasar Persaud at (718)992-6997 he said spill is cleaned up. He said he will find out the report of the spill and he will send it to me. -QA 06/30/06: Contacted Kasar Persaud at (478)719-4324(c) he said that he will fax me clean up report as soon as possible. (406)568-2836 (H). -QA P&R Realty of NYC Inc 4422 Chuluota Road Orlando, FL 32820 07/13/06: Reviewed letter of Neil Tomasetti, Eastmond & sons and sent letter to responsible party Mr. Kaisar Parsaud to submit work plan. Filed letter in e-Doc. -QA 01/24/07: Called Mr. Dave Pelletier (JADE Environmental) at (914)882-6074 and talked about the work plan with the diagram He said that he will fax work plan with the diagram today. -QA 01/25/07: I have reviewed the proposal for limited subsurface investigation for this spill, dated January 18, 2007. Sent e-mail to Mr. Dave Pelletier (Jade Environmental). Install 1 Geoprobe boring/temporary well in the sidewalk on the west down-gradient side of the on site building adjacent to the former tank. Soil and groundwater sample will be collected to evaluate potential impacts to soil and groundwater. provide advance notification of when the field work will be done. -QA 02/21/07: Mr. Pelletier e-mailed me today that Mr. Kaiser Parsaud has never contacted him regarding work. I called to Mr. Kaiser Persaud at (478) 719-4324 (C) and left message to call me back. -QA 04/02/07: Called Mr. Kaiser Persaud at (478)719-4324 he said that new owner will take care of the spill. Called Consultant Mr. Dave Pelletier and left message to call me back. -QA 05/14/07: Received e-mail from Mr.

(Continued) **S109372882**

Dave pelletier regarding spill that this week they are proceeding for work. -QA 06/21/07: Mr. Dave Pelletier (Project Engineer, Jade Environmental) sent a report on 06/12/07. In report he mentioned that on dated 06/21/07 Jade Environmental made a total of four soil borings through the sidewalk, the deepest reaching about 6 ft. below ground level. At all four borings rock was encountered within a few feet of grade which appeared to be Schists, the known bedrock formation in the area. They collected only one sample from the deepest boring at about 6 feet below grade for lab testing for volatiles organic compounds only. All volatiles compounds are not detected. I called Mr. Pelletier and said that I want to visit the site. He said that he will call the new owner Mr. Ari and then he will let me know. -QA 06/28/07: Ivisited Spill site and inspected tank room. The tank was new but theris odor inthe basement. there is staining was also on the floor, wall and roof too. Also inspected fill port, vent line and the new boring location. Boring is about 15 feet away from the basement. This spill need housekeeping. The spill will remain open till they clean the whole basement. After very good housekeeping spill site will be reinspected. Photos of spill site is in e-Doc. -QA 07/03/07: Talked to Mr. Ari at (718)234-3797 regarding housekeeping in the basement, he said that when cleaning will be done in the basement he will inform me for reinspection. -QA 07/05/07: Mr. Issac Mungra from Eastmond Company called me and said that he is going to start cleaning in the tank room and the baement on monday July 9, 2007. -QA 07/16/07: I reinspected the spill site, site is improved better than earlier. There is not any odor or smell of gasoline. But still there are spots of oil on the walls, roof and floor of the tank room and basement. Also received cleaning documents from Mr. Issac Mungra (Eastmond Company). 07/18/07: Called property owner Mr. Ari (Aron Sheiner) and advised to clean more to remove spots of oil from walls , roof and floor of the tank room and the basement to resolve the problem. -QA 10/02/07: Called Mr. Ari to remind regarding additional cleaning of the basement. He was not there left message to call me back regarding cleaning of the basement to resolve the problem. -QA 06/04/08 Spoke with David Pallatier (JADE Environmental) and told him that if site owner wants spill closed, a report must be prepared and submitted to DEC providing rationale for spill closure. I would look for some sampling to get current data. If data is alreay availbale I will review it if submitted. (VB) 06/16/08 Based on the 5/29/2007 report, June 12, 2007 and June 9, 2008 letters from Jade Ennvironmental, investigation revealed no evidence of subsurface contamination downgradient of the boiler room and futher that the building is sitting directly atop bedrock. Boiler room inspection conducted in 2008 revealed that the spill in the boiler room was cleaned as ordered by inspector Abidi and no longer represents a threat to human health and/or the environment. Based on these findings of these invesitgations and Jade Environmental's understanding of the incident, it is Jade Environmental's professional opinion that no further actions are warranted and the spill case shoul be closed. Spill is closed effective June 16, 2008. (VB)

Remarks: TANK TEST FAILURE AT ABOVE LOCATION. RECOMMEND UNCOVER/REPAIR/TETEST.

Material Name:	#6 fuel oil (on-site consumption)

Tank Number:	002
Tank Id:	216641
Material Code:	9999
Common Name of Substance:	Other

Equipment Records:

F00 - Pipe External Protection - None
E00 - Piping Secondary Containment - None
I04 - Overfill - Product Level Gauge (A/G)
C03 - Pipe Location - Aboveground/Underground Combination

1215 REALTY, LLC (Continued) **A100295421**

J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
G02 - Tank Secondary Containment - Vault (w/access)
I05 - Overfill - Vent Whistle
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Tank Converted to Non-Regulated Use
Pipe Model:	Not reported

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

MTA NYCT- JEROME 162ND STREET SUBSTATION (Continued) **1005444255**

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 1/19/2001 Building has 3 tanks (2-10,000 gal and 1-20,000 gal) PBS form shows 3 tanks are in service. According to the super, one of the 10,000 gal tanks developed a leak about 4 months ago. At the time the fill line for this tank was covered with tape and the tank was temporarily taken out of service. According to Joe Ostrowski at A.L. Eastmond, on 1/17/01 the broken tank had 2 inches of oil in it and a stain about 8 inches up the wall to indicate that there was more oil in it recently. The tank room (approx 60 ft x 60 ft) had about 2 inches of oil on the floor. There were no floor drains in the room and no spill outside of the room. Eastmond vacuumed out the basement and used speedie dry. Eastmond was due to steam clean the room on 1/18. A NYSDEC Environmental Control Officer came to the site on 1/17 and issued a summons for failure to properly close out a tank. There is also an investigation of who was at fault for the spill. Did the delivery company fill the wrong fill line? Is there an intermitant leak on one of the other tanks? There appeared to be brand new tape on the broken tank's fill line. When was that put on? Sangesland will re-inspect later next week to confirm the clean is complete. 2/20/2001 Sangesland prepared a Schedule A of Order on Consent/ Stipulation. Schedule A outlined the requirements of 6NYCRR Part 613.9(b) - Closure of tanks permanently out of service. Order gives Executive Towers 30 days to clean out Tank #2, secure all piping/venting/fill lines and to vent the tank with large holes. Also requirement to stencil Out of Service on the tank. ECO officer Smith will submit the order to the owner on 2/21/2001 Joe Ostrowski no longer works at Eastmond. 7/05 - file transferred to co (Jarratt). Isaac Mungra of A.L. Eastmond contacted for more information (718) 378-3000. Bldg. manager no longer at (212) 370-9200. PBS 2-327115 Facility Info Report lists tank # 02 Closed-Removed. If a valid tank closure report exists, then this spill should be able to be closed. Open File sent back to R2 May 06. 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Rahman) for review and closure - end 10/03/08 Letter asking documentation regarding the spill was sent to Executive Towers Owners Corp ** Phone#(718)293-5545 1020-32 Grand Concourse 1020 Grand Concourse Bronx, NY 10451 Attn: Shirley Smoot(sr) 10/27/08 Rec'd spill clean up documentation from Eastmond & Sons,Inc.Eastmond cleaned up the spill in 2001 with drysall and pressured washed the boiler room floor.As per Eastmond, there was no contaminated soil to remove from the floor.Pictured attached in

SPILL NUMBER 9914519 (Continued) **S104620941**

edocs.Aparently, there was
no cracks or holes on the floor.Spill can be closed.(sr)

Remarks: CALLER IS REPORTING A SPILL TANKS ARE IN A TANK ROOM SPILL IS CONFINED IN THE TANK ROOM 3 TANKS IN THE ROOM IT IS EITHER THE 12,000 OR THE 20,000 GALLON TANK CLEAN UP CREW IS ON SCENE NOW

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110012590641

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

DEC Memo:	10/23/15-Zhune spoke to Victoria from Protest Environmental (631) 321-4670. She said the tank failed with a dry leak. No lost of product. Suspected either the man hole or the vent pipe caused the tank failed. 10/27/15 TFT Letter sent to: MMF 1212 Associates LLC c/o Finkelstein Timberger East Real Estate 111 Brook Street, 2nd Floor Scardale, NY 10583 Richard Timberger (owner) 914-472-4900 12/16/15-DEC piper left message with Richard requesting documentation of repairs/ retest. 12/23/2015: Rashad Spill reassigned from Piper to Omar as per DeMeo. 12/28/2015: Rashad 1212 Grand Concourse has alternate addresses of 181-199 East 167 Street, 1210-1212 Grand Concourse, and 1211 Sheridan Avenue. Additional spill found #0301539 was closed in 2003 from 1 qt of product leaked from a broken down bus. PBS#2-295442 found for site there is a 5000 gallon #6 fuel oil AST. Report and TTF letter found in D2. 12/30/2015: Rashad Report found in D2 is not for this site. Emailed protest: Spill#1507531 for 1212 Grand Concourse, Bronx 10456 has been reassigned to me. The previous notes state there was a tank test failure with a dry leak. Do you have any update on this site as to what repairs were done if any and if the tank was retested? I would appreciate any documentation or information that you can provide. Victoria replied: I've attached a copy of the initial failing test report. We performed the test for EBI Consulting. It was my understanding that they would be arranging for the repairs and would call us in for a retest, but we have not been contacted yet. Email had initial failed tank test report for a 5000 gallon tank, it was dry leak it was uploaded to D2. As per DOB job filing Steven Finkelstein is owner of property email is steve@ftre.com. Sent Steve email: I have been reassigned spill#1507531 for a tank test failure at 1212 Grand Concourse, Bronx NY 10456. To date we have not received any documentation or

TTF (Continued) **U003030979**

information about a repair and retest of the 5,000 gallon tank (PBS#2-295442). Would you be able to provide me an update on this situation? 6/24/2016: Rashad Sent email to EBI Consulting: I am following up on a tank test failure from October 2015 at 1212 Grand Concourse. Do you have information with regards to the repairs or retest to the tank at this site? Thanks. 10/27/2016: Rashad Spoke to Harley he wanted to know what steps are needed, I let him know and I gave him Protest Environmentals number at his request (protest called in spill and did initial tank test). 914-472-4900. 1/17/2017 Austin This spill report is being transferred from Rashad Omar to Jennifer Kann end. 6/6/17: J.Kann - As per Austin, spill reassigned to Lakhani. 06/14/17 - Lakhani Spoke to Victoria from Protest. She informed that Protest was not hired to repair and retest the tank. The EBI Consulting contact is Brian (781-418-2349) and the super of the building is Frank (917-416-3842). Left a message with Harley. Harley called back and informed that the tank in question was pumped out and has been out-of-service. He also informed that the tank is intended to be replaced with a new oil tank. 10/27/17 - Lakhani Finklestein Timberger East Real Estate: 914-472-4900 08/06/19 - Lakhani - Spill being transferred to Sekhon. 8/9/19 - Sekhon email sent to Steve Finkelstein (steve@ftre.com) to get updates.

Remarks: 5000gal tank.

(917) 532-7624 1:56 PM:- left message for Volanco, building super. 2:01 PM:- received call from Volanco. he confirmed no leak from tank or supply/return lines. he stated that a leak is found in remote fill line, under the sidewalk. asked him to seal the fill port. 2:09 PM:- sent TTF letter to Ms. Martinez. asked her to submit report by the end of 02/14/14. letter emailed to Ms. Martinez. 02/25/14-Hiralkumar Patel. 11:22 AM:- left message for Ms. Martinez. 02/28/14-Hiralkumar Patel. 1:39 PM:- received email from Neil Tomasetti of Eastmond. he mentioned that after replacing fill line, during retesting they found bad manhole flange and neck on tank. for repair, they had to the take

TANK TEST FAIL (Continued) **S116156769**

tank out of service, but due to unpaid ECB violation, they could not get permit for temp tank. finally building management paid pending fines and temp tank should be installed by next week. 03/10/14-Hiralkumar Patel. 1:35 PM:- left message for David Vega at Eastmond. 1:38 PM:- sent email to Neil inquiring updates. email copied to Ms. Martinez. 3:23 PM:- received email from Neil. he stated that they are waiting for NYC DOB permit. he also mentioned that tank is being monitored daily and it is not leaking any oil. 05/13/14-Hiralkumar Patel. 9:27 AM:- spoke with Ms. Martinez and asked her to submit report. 11/13/14-Hiralkumar Patel. 12:17 PM:- sent email to Ms. Martinez (including copy of letter dated 12/13/13) and asked her to submit report by the end of 11/28/14. 11/25/14-Hiralkumar Patel. 2:57 PM:- received call from Israel from Millenium Tank. he inquired about documents needed for case closure. informed him that the department requires submission of report including cause of initial failure, actions taken to correct the problem, any petroleum release from the leak point, any cleanup needed and tank system test result after repairs are made. informed him that the report is due on 11/28/14. Israel Millenium Tank PH. (718) 685-2545 millenniumtankmaintenance@gmail.com 3:10 PM:- sent email to Millenium Tank including copy of letter dated 12/13/13. 11/26/14-Hiralkumar Patel. 10:41 AM:- received call from Israel. he mentioned that the tank system was tested last night and it failed again. Riteway is responding to pump out the tank today. asked Israel to report tank test failure. Israel mentioned that the tank is sitting on floor and all lines are aboveground except part of fill line that is under the sidewalk. he also mentioned that property owner is planning to remove the tank system. he will call back with further details. 11/28/14-Hiralkumar Patel. 12:53 PM:- received call from Israel. he mentioned that during isolation test, leak was found in vent line. tank and other lines passed the test. as owner decided to remove the tank, Israel will install temp tank to transfer remaining oil. asked him to call for inspection, once tank system is removed. a new spill report (# 1408816) received due to tank system test failure on 11/26/14. 12/18/14-Hiralkumar Patel. received tank test results, tank removal affidavit and some photographs from Millennium Tank Maintenance. tightness test result shows the empty tank system failed in dry portion on 11/26/14. on 11/28/14, the tank passed the test. as per the tank removal affidavit dated 12/15/14, the 5,000 gal tank and associated piping were removed. pictures show new concrete floor in former tank area. this document does not include following: - cause of tank system failure - condition of area around and underneath the tank, including condition of floor underneath the tank - report for spill cleanup along leaking fill line 3:27 PM:- spoke with Emily Holmstock at Millennium Tank Maintenance. asked her to submit document confirming cause of tank system failure, condition of area underneath the tank and report on cleanup of contaminated material from the leaking fill line. 12/19/14-Hiralkumar Patel. received email from Emily (at 4:11 PM on 12/18/14) including two pictures. she mentioned that a small leak was noted in the pipe. picture shows cement floor was underneath the tank prior to tank's removal. 10:26 AM:- spoke with Emily. asked her about any portion of fill line under the sidewalk and any spill from that portion. she will ask Israel to call back. 01/29/15-Hiralkumar Patel. 3:12 PM:- received call from Israel inquiring about case closure. informed him that fill line test/investigation report is still pending. he will have fill line tested tomorrow. 01/30/15-Hiralkumar

TANK TEST FAIL (Continued) **S116156769**

Patel. 3:30 PM:- received email from Isarel including letter and fill line test result. fill line was tested tight. 02/05/15-Hiralkumar Patel. based on available information, case closed. 12:02 PM:- sent spill closure letter to Ms. Martinez. letter emailed to Ms. Martinez and Israel.

DEC Memo:	11/28/2014 - Feng - Duty Desk. Talked to Emily Holmstock of Millennium Tank (718-685-2545, MillenniumTankMaintanance@gmail.com). They performed a tant test and the tank failed the test. The tank is located in the basement. It is an 5,000-gallon AST for #6 oil. They are on gas now. They are emptying the tank now and plan to remove the tank. No evidence, i.e. stain, of spill. The owner is: CO Total Realty Associate Incorporation Superb of the building: Polanco (917-532-7624) There is a spill 13-09105 for the same location and same tank test failure. Discussed with K. Patel. The tank failed the test a year ago and they had kept using the tank system for another year. DEC required the tank to be tested again and the tank failed again. The spill will be closed and consolidated/referred to the spill 13-09105.
Remarks:	failed tank repair and retest

DEC Memo:	2/4/19 - Obligado - Desk Duty - I spoke with Pete at Millenium. The tank is in a tight space inbetween 2 walls in the front of the building. Theres stain on wall where the fill enters the basement. There is contaminated soil around the tank. Spill is assigned to Harmondeep Sekhon. 2/8/19 - Sekhon Lucilo Peralta - Super 315 -420-3184 2-612644 - pbs - 5000 gallons Site visited by DEC Sekhon on 2/7/19. spoke with Pete (7183168962) and met Keith Jones from Millennium Tank. Currently, Millennium authorized to remove contaminated soil and debris, remediation is in the process, once the clean soil is met contractor will take soil samples or if they found rock, they will provide pics to DEC. 3/1/19 - Sekhon Site visited by DEC Sekhon on 2/28/19 @ 4:45pm, tank was removed by contractor and disposed off. Now next week they plan to dig soil and take end point sample. Pics DECDOCs. 3/6/7 - Sekhon 3/5 - 22 drums of contaminated soil were removed from site. Contractor still removing soil from the site (PID 2.5 ppm). Pics DECDOCS. 4/1/19 - Sekhon Soil sample results submitted. DECDOCs. Report discussed with DEC Piper, Sample results in acceptable range except following hits - 1,2,4 - Trimethylbenzene - 5.6 (sample 1) , 4.3 (sample 2) and 4.2 (sample 3) and Chrysene 45 (sample 2). 5/7/19 - Sekhon Soil sample results, report summary, manifest, pictures uploaded to DECDOCs. Report reviewed, spill closed. Not reported

DER Facility ID:	419698
DEC Memo:	TTF Letter (see eDocs) sent to Property Manager: Property Manager Townhouse Management 70 East 55th St Heron Tower New York, NY 1022 212-755-6556 07/16/13 - Spill Case is transferred from Moses Ajoku (PBS Unit) to Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 12/29/2015 - V. Brevdo Reviewed the records/file for both spill case and PBS. No documentation or credible information is available that Tank Test Failure ever occurred. TTF letter on file is for the wrong address at 2350 Creston Avenue, Bronx, Spill Case No. 1202561, not Spill Case No. 1202559. Tank at 1225 Sheridan is properly registered, certification issued on 02/19/2014, which is 1.5 years after the spill date in June 2012. Therefore, decision is made to close this spill case administratively. Spill Case Closed on 12/29/2015. No Spill Case Closure Letter is issued. VB
Remarks:	Dry leak above liquid. Repair & retest is being scheduled.

DER Facility ID:	270865
DEC Memo:	12/27/04 - DDO Sawyer - Talked to Barry Panicola at Sprague Energy 516 622 7091 and he was not aware of any spill. Since Model Transport is their sub-contractor, he is going to give them a call to see what happened. He also put me in contact with Al Cirino from Model Transport 718 384 0995. With both Barry and Al on a three way call, Al told us that his guy origally cleaned up the spill with two bags of speedi-dry. The FDNY was not satisfied with the cleanup and put down more speedi-dry, reported the spill and asked Model Transport to sweep it up. Al assured me that his guys when back out that day and picked up the speedi-dry. I required him to forward a disposal manifest to Department for closure. The original spill happened because the fitting was not tight in the fill box during the transfer. 08/03/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. Contacted to Mr. John Flynn at (718)476-6288 he said he will find out the information and he will call me back. -QA 08/15/06: Called to John Flynn he was not available. Called to Model Transport Corporation at (718)384-0995 and talked to Mr. Joe Latolcetta regarding information of spill. He said he will find out and he will call me back. -QA 08/16/06: Called to John Flynn (FDNY Hazmat HM-1)he said Model Transport company did clean up work. After cleaning of 30 gallons of diesel FDNY put down five bags of speedy dry on street for public safety. John Flynn said he will send me the documents. Also called Joe Latolcetta, Model Transport company at (718)384-0995 he said he will find out the disposal manifest and he will call me back. -QA 11/29/06: Mr. Al (Model Petroleum Transportation) faxed me a waste information regarding the spill i.e. 15 bags oil spill solid debris. -QA 12/05/06: Recieved closing confirmation letter from Mr. Albert Cirino (Model Employees and Petroleum Services) They preceded to clean up the spill. No soil and no groundwater were contaminated by the spill. The spill was on concrete. The spill was completely cleaned by Model Employees and Petroleum Services. It is checked by Hazmat that they are satisfied by this clean up. On the basis of these information DEC staff closed this spill. -QA
Remarks:	APPLIED SPEEDY DRY AND ITS STILL ON THE GROUND BUT CLEAN UP IS IN PROCESS.

DEC Memo:	1/20/2009 Sangesland spoke to Joe Ostrowski at PTC. Tank was taken out of service. Setting up temp tanks. Will do more investigation. 1/27/2009 Sangesland spoke to Joe at PTC. Tank was drained & cleaned. They have a tank only test scheduled for tomorrow (1/28/2009) 8/5/2009 ttf letter sent to: Mr. Michael Goldberg 940 Inc 5600A Broadway Bronx, NY 10463 07/16/13 - Spill Case is transferred from Leszek Zielinski (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 1/4/16 - Obligado - I am investigating an oil spill to the subway tunnel in the vicinity of Grand Concourse and 161st street. This open spill came across my attention. AS per discussion with Vought, than Brevdo, I transferred this spill to my name. I spoke with Mr. Goldberg who is the property manager. He said they have a #2 Fuel as a back up to the Natural Gas. he did not have any details as to the current status of the tank. I informed him that the DEC was investigation an oil spill in the vicinity, and he said he would provide any information we needed, just to send him an email request. 1/10/17 - Obligado - Full system tightness test was performed on 1/14/16 and the tank system

Spiller Company: 999
Contact Name: MIKE GOLDBERG
DEC Memo: Caller states oil is dripping through foundation and into sump from adjacent building at 940. I
spoke with Mgr Mr Goldberg. He has notified castle and will call when

(Continued) **S109416325**

more info is known. open
spill already exists at site pertaining to the fuel system. See spill 0811472.

Remarks: Caller states a recent construction project of switching oil sysytems might be the cause of oil spilling into the soil and into the adjacent property. Builing owner was just notified of the problem.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN This site had previously abandoned gasoline tanks that were discovered during renovation work. Thae tanks contained water and were removed by Tyree. There were residual levels of Toluene & PAH's at or slightly above STARS criteria. The site is now a commericial property with no odor complaints. Soils were tight clays, indicating that there was minimal leaching potential. No further action is required, aside from the removal and disposal of stockpile. 7/16/98 mmm:FILE TRANSFERED TO NYS RECORDS CENTER BOX # 306858.
Remarks:	TANKS WERE REMOVED AND CONTAMINATED SOIL WAS DETECTED

DEC Memo:	Dou12/19/06-Vought-Off hours duty officer. Responded to spill and FDNY left site however DEP Celeste Okobe on site. Spill was due to seepage from hill wall in rear of 967 Sherman Avenue (6 story residential apt building). Source of spill is most likely 5000-gallon #6 fuel oil tank located at 974 Sheridan Ave (6 story residential apartment building). Tank is approx 20 lateral feet and 25 feet vertically up hill from seepage location. No odor complaints received from any residences. Fuel oil company for 974 Sheridan also onscene. NYDEP

(Continued) **S102148716**

Okobe left scene once site
inspections were performed to both residences and confirmation was made that there were no impact
to sumps or sewers. Also onsite were following: 967 Sherman Avenue (impacted site): Walter Puryear
Grand Realty 900 Grand Concourse East HDFC Bronx, NY 10451
718-588-8200x109 646-316-3382
fax:718-681-3824 974 Sheridan Avenue (Source location): Doug Peterson City Skyline Real Estate
Brokerage 917-359-2266 Approved Oil: Steve DeAngelis Contact for Approved is Vinny T. or Vinny S.
(718-238-1050). Peterson unsure of history of tank as property was purchased in very poor condition
from previous owner. Approved Oil hired Eastmond. Tank manway was opened and filled with water and
product (no measureable thickness). Water was pumped and bolts were sawed off as tank had not been
accessed in long time. Tank was emptied including appproximnately 9 of sludge. Eastmond also began
cleanup of spill in rear yard of 967 Sherman Avenue (spill on asphalt with no seepage into
building). Peterson will be installing temporary gas system to provide heat to building. As per
Super of 974 Sheridan onsite (Antonio 917-991-9608) tank was overfilled approximately ten days ago
by Approved Oil. Fresh product noted at vent pipe and splattered on walls around vent. As per super
he requested 3500 gallons however driver insisted on delivering 4000 gallons so that his truck
would be empty . As per super fuel came out of vent pipe and spilled approximately 100 gallons
which flowed in drain adjacent to UST location. Large oil stains still noted originating from vent
and leading to drain. Unknown outfall location of drain. Vought reviewed database and spill was
never reported to DEC. Spill may have been cause of seepage at 967 Sherman Avenue. Vought called
Approved Oil and spoke with Joe and Eastmond onsite now. Vought informed Approved of site visit at
2pm. Vought called and spoke to Patterson and pressure test being performed by Eastmond and Oil
company also has insurance adjustor onsite. Vought called Puryear to arrange site inspection for
2pm and informed him of progress. 12/19/06-Vought-Received call from Kevin Taylor (H2M
ph631-756-8000; fax 631-694-4122) who stated that UST was pressure tested by AL Eastmond and failed
three different attempts at pressure test. Vought required monitoring of yard during holiday break
and immediate cleanup of 967 Sherman. Taylor was hired by AIG Insurance (Paul
Enriquez(714-436-3200). Vought received callback from Taylor that cleanup was going to performed by
Northeast Environmental if available and if not available then Milro would perform the cleanup.
Vought met onsite with owner and associate of Walter PurYear: Sue Gonzalez(cell 914-715-4471; work

(Continued) **S102148716**

646-316-3382 suekgonzalez@aol.com) Vought received call from Dwayne Monaco (Northeast Environmental
ph:914-777-1930 fax:914-777-1928) that he was hired by H2M for cleanup and was performing site
visit that night. 12/20/06-Vought-DEC requires: 967 Sherman Avenue-1)monitoring of wall
2)confirmation of cleanup of yard. 974 Sheridan-1)determination of out flow of drain 6)relocation
of vent pipe so that is next to fill port 2)tightness testing results and internal inspection of
UST 3)submission of PBS registration 4)collection of endpoint samples if UST is removed 5)cc to
Gonzalez, Taylor, Enriquez, Approved. Vought to sent out letter with above requirements upon return
from holiday vacation. Vought called and left message for H2M Taylor to call DEC Patel with
confirmation of cleanup of rear yard of 967 Sherman and observations from site visit during week of
12/27. 12/22/06-Hiralkumar Patel. received call from Kevin from H2M. they will going on-site for
inspection on Thursday 12/28/06. 1/9/07-Vought-Called Kevin Taylor for update prior to sending out
letter and no activities performed to date and awaiting tank removal. Vought called Peterson for
update and left message to return call to DEC. Vought spoke with Walter and who confirmed that
speedy dry was cleaned and not sure if oil had returned. Vought called Approved Oil for mailing
address to include on letter. 1/11/07-Vought-Sent letter with above requirements and one month due
date to: NYC Capital Value Fund II, LLC 15 Maiden Lane Suite 1101 New York, NY 10038 Approved Oil
6741 5th Avenue Brooklyn, NY 11220 c/o Vinny S.
1/30/07-Vought-Received email from Peterson
requesting letter in Word format and Vought sent letter. Reviewed letter from Northeast(Monaco.
This release stemmed from a UST overfill located at 974 Sheridan Avenue. Northeast removed oil
debris and soil from the rear of 967 Sherman Ave and de-conned the retaining wall and sidewalk.
Absorbents were placed at the base of the retaining wall in order to collect any remaining #6 oil
that may continue to seep from the wall. As per your letter dated January 10th, 2007 Northeast will
continue to monitor 967 Sherman Ave on a biweekly basis, beginning January 19th, 2007 until no
further signs of petroleum are present . In addition, Northeast will dye test the court yard train
immediately adjacent to the UST at 974 Sheridan Avenue. Received email from Peterson that new oil
tank is almost installed. Spoke to Peterson and new AST is being installed in basement of building.
Received message from Walter Puryear that wall is still being impacted and nothing is being done.
Vought called Puryear and left message to return call to DEC with current status of wall at 967
Sherman Avenue. Peterson: 1)TTF results of AST or internal inspection

(Continued) **S102148716**

2)PBS registration submitted
2/1/07-Vought-Called Sue Gonzalez and spoke to Walter and oil is cleaned up. Vought faxed him copy
of Northeast letter dated 1/16/07 and told him to call Northeast first if oil reoccurred and DEC if
Northeast does not respond. Vought called Monaco and left message to return call.
2/2/07-Vought-Received message from Monaco(914-777-1930) and returned call. Site visits were
performed on 1/19 and 1/30. Drain was dye tested on 1/19 and liquid did not drain out of drywell in
four hours. On 1/30 pads were changed at base of impacted wall and dye did not show in wall to
date. Monaco will send in submitted report and will continue monitoring on a biweekly basis until
DEC determines responsible party. Vought emailed Peterson for status of TTF, internal inspection,
PBS registration and relocation of vent pipe. 03/01/07-Vought-Called Peterson and he had a child
and was unable to respond. Vought resent him email from 2/2/07.
4/4/07-Vought-Received email from
Peterson and he is submitting TTF results, will be submitting PBS registration and vent pipe has
been relocated. Spoke to Monaco and biweekly monitoring occurring product is present every time
site visit is performed. Dugout built by base of wall that is used to collect oil. Monaco will
continue monitoring base of wall. Vought received email from Peterson that Tank failed tightness
testing. Also noting that dye test liquid previously did not drain well through adjacent drain
(former overfill may not be source). As result tank must be excavated or soil borings performed.
Vought called Peterson and he has not seen oil. Peterson said that Eastmond performed soil borings.
Vought to perform site visit to confirm presence of oil. Received report from Eastmond (Neil
Tomasetti-718-378-3000) dated 3/12/07. Three soil samples collected from below UST. An extensive
interior visual inspection was performed while gas free cleaning the tank interior. The condition
of the tank from the inside appeared not to have any peforations . Each sample appeared to be dry
with no evidence of a recent leak. An inspection and test of the existing drain was
inconclusive.Water was run into the drain and we were unable to locate its deposit area .
Recommendation made for abandonement of tank in place. Due to its location the tank would have to
be removed manually. In no way could the necessary shoring be installed. The excavation would
expose both the 974 building and the next door property support wall foundations for which shoring
would be necessary . New AST has been installed in the basement. Soil analyticals show: 4200ppb
1,3,5-trimethylbenzene(S1), 2400ppb xylene(S1), 2200ppb napthalene(S1), 59000ppb phenanthrene(S1),

(Continued) **S102148716**

6900ppb 1,3,5-trimethylbenzene(S3), 5200ppb xylene(S3), 4100ppb napthalene(S3), 20000ppb 1,2,4-trimethylbenzene(S2), 5800ppb xylene(S2), 21000ppb napthalene(S2) and 63000ppb phenanthrene(S2). Vought called Neil Tomasetti(AL Eastmond) and left message to return call and with additional work. DEC requires: Peterson (building owner):1)tank removal)submission of PBS registration Monaco (consultant for oil co): 1)submission of wall monitoring data and dye test results. Vought sent letter with above requirements to Capital Value Fund LLC and two month due date. Vought also spoke to Peterson who will remove the tank for soil examination and possible excavation. Vought spoke to Monaco and requested that he submit monitoring data including site photos ASAP and required continued monitoring and recovery. 04/19/07-Vought-Received call from Peterson and Eastmond will not file PBS registration until decison is made on tank. Peterson awaiting on bid from Eastmond to remove tank and he is awaiting engineering report. Doug feels that removal not feasible and requested meeting with all parties. Vought suggested that he send in requirement letter. 8/3/07 - Austin - Transferred from Vought to Ketani for further review and action - end 8/17/07 - Raphael Ketani. I looked at the analytical results in the package of documents dated 3/12/07 that was submitted by Neil Tomasetti of A.L. Eastmond. The 3 soil borings show exceedences for the VOCs 1,2,4 and 1,3,5 trimethylbenzene, and total xylenes. The SVOCs had some hits, but they did not have any exceedences. From this set of analyses, the oil looks old. I tried to reach Dwayne Monaco of Northeast Environmental (914) 777-1930 to inquire as to the seepage of oil through the retaining wall at 967 Sherman Ave. However, Mr. Monaco was out of the office. So I left a voice mail. I tried to reach Walter Puryear of Grand Realty (718) 588-8200, ext 109 (cell (646) 316-3382. He is the property manager for 967 Sherman. However, he was on vacation and his voice mail wasn’t working. I made contact with Doug Peterson of City Skyline Real Estate Brokerage (917) 359-2266. He said that nothing has happened as he has been waiting for DEC to let him know what he can do with the old tank. Mr. Peterson said that he had an engineer look at the tank and the engineer said that it can’t be removed. Otherwise, the retaining wall might be jeoperdized. I asked him what type of oil had leaked out. He said it was #4. I told Mr. Peterson that leaving the tank in place was fine. I told him to contact A.L. Eastmond and find out what they recommend for filling the tank and abandoning it in place. He said he will. I told him that the PBS registration still shows the old tank as active. I told him that DEC needs the

(Continued) **S102148716**

following from City Skyline: 1)
revised PBS registration showing the old tank as out of service and the new tank as in service 2)
the failed tank test report 3) a report regarding the tank abandonment in place Mr. Monaco called
me back. He said that, right now, they go over there the sixth of every month. He said they spend
about 2 bags of pads to clean up the oil that is still draining out the bottom of the wall. I asked
him how much oil is being recovered per month. He said that it's about one quart. He said that the
insurance company is still paying him. I told him to continue the regular cleanups. 8/20/07 -
Raphael Ketani. I left a message for Neal Tomasetti of A.L. Eastmond (718) 378-3000, ext 106. Mr.
Tomasetti called me back. He said that they did a liquid test and a smoke test to the drain nearby,
but didn't see a result. He said that access to the backyard where the tank is under is through a 4
1/2' wide passageway that is 50' long. He said you can't get equipment back there. He suggested
installing 2 wells through the tank that are screened below it so that conditions or future leaks
can be monitored. I told him that sounded like a good idea. I also told him that I had spoken with
Mr. Peterson and I had given him approval to abandon the tank in place. 9/10/07 - Raphael Ketani. I
received a package of documents from Mr. Peterson. The package contained a Certificate of Approval
for Oil Burning Installation, a short cover letter from A.L. Eastmond describing what they did with
the old tank and what documents they are forewarding, a copy of the first page of the PBS
application, 3 receipts for the concrete that was ordered, a diagram showing the old and new tanks
and the locations of the 3 soil borings, the soil analytical report, a copy of a 3/12/07 cover
letter from Eastmond regarding the tank abandonment and new tank installation, and the failed tank
test report. I looked up the PBS registration. It is #2-602653 and still shows only the old tank as
in service. 9/18/07 - Raphael Ketani. I spoke to Mr. Monaco. He said that oil is still seeping
through the retaining wall and his company is putting down pads as needed. I told him that DEC
would like this to continue for the foreseeable future. He asked that DEC send an official letter
to this effect. I sent the letter today. I talked to Mr. Tomasetti. He said that there is no
product in the wells that were installed. I spoke to Mr. Peterson. I asked him why the PBS
registration hadn't been updated. He said that he wasn't aware that he was supposed to do it. He
thought that Eastmond would do this. I told him to send in the form immediately. He said he will
overnight it. 10/1/07 - Raphael Ketani. I received a copy of the PBS Certificate for the tank from

(Continued) **S102148716**

Mr. Peterson. I looked up the PBS registration (#2-602653). It now shows the 4,000 gal. UST as closed in place 8/28/07 and the new 3,000 gal. AST as installed on 2/1/07. Based upon the package of documents that was received from Mr. Peterson on 9/10/07, the PBS registration that is now correct, the relocation of the vent pipe to the position of the fill port, the installation of the wells through the old tank, the abandonment of the old tank in place, and the active monthly collection of the oil that is seeping through the bottom of the retaining wall - the costs of which are being paid through the responsible party's insurance (8/17/07 casenote), I am closing the spill case.

Remarks: CAN'T TELL EXACT AMOUNT, SOURCE, OR RESOURCES EFFECTED; TANK IS UNDERGROUND; FUEL OIL COMPANY ON SCEEN NAME IS APPROVED OIL COMPANY # 718-238-1050; TANK IS BELIEVED TO BE LEAKING BUT IT IS UNDTERMINED; TANK ALSO LEAKING INTO BUILDING AT 967 SHERMAN AVE;

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

Contact Name: RUDY MARCIANO
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 12/31/02, MILLER FILLED IN BLANK INFORMATION FROM ORIGINAL SPILL REPORT AND TRANSFERRED SPILL TO J. ROMMEL. FEB. 1994 SITE ASSESSMENT PREPARED BY EMS: 12-550GAL GASOLINE UST'S, 550GAL HEATING OIL UST & 550GAL WASTE OIL UST; GW DEPTH>15FT BG; BTEX DETECTED UP TO 108,950 PPB. 4/27/05-Vought-Spill transferred from Rommel to Vought. File review by Vought. Environmental Site Assessment (EMS)-2/94. Performance of soil gas sampling and a sensitive receptor survey. Fourteen USTs onsite (twelve 550-gallon gasoline USTs, one 550-gallon heating oil UST and one 550-gallon waste oil UST). Performance of six soil borings. Soil analyticals show 270ppb benzene(B2), 6140ppb xylene(B2), 731ppb benzene(B3), 5120ppb toluene(B3), 19900ppb xylene(B3), 730ppb benzene(B4), 17950ppb xylene(B4), 4950ppb benzene(B5), 28000ppb toluene(B5), 76000ppb xylene(B5). Report recommends: 1)reporting to DEC 2)tightness testing of USTs 3)installation of three monitoring wells 4)implementation of remedial measures. Subsurface Investigation Report (Tyree Brothers)-October 2003. One pump island located along Ogden avenue. Investigation requested during 4/03 meeting. Apartment building to the north, garage to the south, apartment buildings to the east and west. Installation of four monitoring wells. Groundwater approximately 10-15 feet below grade. Soil analyticals show 18900ppb xylene(PW1 15-17'bg), 11600ppb 1,2,4-trimethylbenzene(PW1 15-17'bg), 422ppb MTBE(PW1 15-17'bg), 743ppb benzene(PW2 10-12'bg), 2070ppb xylene(PW2 10-12'bg), 36200ppb MTBE(PW2 10-12'bg), 359ppb MTBE(PW3 10-12'bg). Groundwater analyticals show 3100ppb benzene(W2), 17500ppb toluene(W2), 3580ppb ethylbenzene(W2), 18000ppb xylene(W2), 29500ppb MTBE(W2), 1250ppb benzene(W3), 6490ppb toluene(W3), 2800ppb ethylbenzene(W3), 13600ppb xylene(W3), 22500ppb xylene(W3), 22ppb MTBE(W4). Quarterly Monitoring Reports (Tyree) August 2003 thru March 2005. Four monitoring wells onsite. Groundwater at 12-14' below grade and flow to the west. EFR on W2 from August 2003 thru March 2004. Groundwater analyticals show 2.99' free product(W1), 3.62' free product(W2) and .82' free product(W3) and 65ppb MTBE(W4). 4/27/05-Vought-Sent Stipulation with deadline of 6/6/05 to Getty Properties and Current Owner on PBS requiring: 1)delineation of groundwater contamination 2)interim product recovery 3)surrounding area site plan 4)tightness testing of all USTs. Vought called Tamir Gayr(from {PBS registration 718-538-4282) to inform him of tank tightness testing requirements and requested fax #. Vought spoke to station attendant who would not provide phone number for Gayr and then hung up on Vought.

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

Vought also called Owner contact number on PBS registration and told that no Gayr resided there.
Vought called emergency contact number on PBS registration and no answer. Vought referred case to
ECO's to hand deliver stipulation and write any summons of petroleum discharge or lack of secondary
containment for waste oil storage. 5/5/05-Vought-New file review by Vought: Note from ECO
Higgins-Higgins delivered STIP and spoke to Gayr on phone who referred him to consultant (Jim
Demartinis of JR Holzmacher 631-234-2220x102). Two summonses were issued by Higgins during site
visit. Email from Vought to DEC Krimgold-5/3/05. Vought requested that PBS inspection be performed.
Fax from Weinberg & Kert (attorney for Gayr-516-222-1860)-5/3/05. Getty's real estate arm, Leemilts
Petroleum and 1165 Gas Corp are currently pursuing arbitration to determine the responsibility to
complete the cleanup in this matter. The arbitration has been filed, the arbitrator is about to be
selected and a date for arbitration determined. It is my belief that this matter will be resolved
within the next several months and the party or parties will cooperate to their fullest so that the
matter can be completed and your files closed as expeditously as possible . Letter from DEC Urda to
Kert-5/4/05. This delay is unacceptable with respect to your clients immediate resposibilities to
address conditions at the Site. Specifically your client must proceed with the tightness testing of
the USTs as set forth in paragraph 4 of Mr Voughts April 27, 2005 letter to your client... . Fax
from Weinberg & Kert-5/4/05. Enclosed are the tank and line testing data/report which has already
been performed . Tank tightness test results from A-1 Crown Leak Corp. Two 4000-gallon super
unleaded gasoline and one 4000-gallon gasoline USTs passed system tightness tests.
5/6/05-Vought-Received message from Jim Demartinez (JR Holzmacher 631-234-2220x102) on 5/3/05.
Vought returned call and spoke to Jim and informed him of DEC requirements and willingness to wait
a few months (due to preexisitng longetivity of spill) for arbitration to be completed. 8/31/2005 -
Feng - Project transferred to Feng. 10/4/2005 - Feng - According to the PBS database, there are
three two (2) 550-gallons #2 fuel oil tanks one (1) waste/used oil tank and (3) 4000-gallons
gasoline tanks which resided on the south side of the twelve (12) closed 550-gallon USTs have
registered on this site. 10/4/2005 - Feng - Quarterly Monitoring Report from Tyree (4/2005 -
6/2005). 4 monitoring wells are on site. Groundwater flow westerly at the depth of 12.40' to 13.76'
below grade. LNAPL presents in W-1 (2.30'), W-2 (1.36') and W-3 (0.61'). No groundwater samples for
these 3 wells due to the free product. The BTEX in W-4 is below

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

detection limit, and MTBE (32ppb).
10/4/2005 - Feng - Emailed to Paul Lindell to request the status of arbitration and the STIP. It
has been almost 5 month since the time Jeff Vought agreed to wait a few months for the arbitration
to be completed. We are still waiting for the STIP to be signed . So STIP is pending. 10/5/2005 -
Feng - Emailed from Lindell (Delta) stating that the arbitration is progressing well and be wrapped
up soon. 10/18/2005 - Feng - Email from Lindell (Delta) stating the arbitration is processing well
and will be wrapped up soon. 11/2/2005 - Feng - Quarterly Monitoring Report from Tyree (7/2005 -
9/2005). 4 monitoring wells are on site. Groundwater flow westerly at the depth of 13.45' to 16.08'
below grade. LNAPL presents in W-1 (3.76'), W-2 (1.73') and W-3 (0.69'). No groundwater samples for
these 3 wells due to the free product. The BTEX in W-4 is below detection limit, and MTBE (32ppb).
12/23/2005 - Feng - Letter to Getty Property and 1165 Gas Corp warning for failing to sign the
stip. Request them to 1)remove the free product, 2) sign the stip by 2/16/2006. If no signed stip
return or no free product recovery activity has performed, will refer the case to Legal Affair. CC
to Tyree and Delta. (RJF) 1/5/2006 - Feng - Fax from Arnold Kert (attorney at law, represent Tamir
Gayr), attached with arbitrator's decision that Getty has the responsibilities in taking care the
spill clean up. (RJF) 1/17/2006 - Feng - Quarterly Monitoring Report, 10/2005 - 12/2005. The site
is an acitve gasoline retail/service station with auto repair facility. Groundwater flows to west
at the depth of 12.14' to 13.46' bg. 4 monitoring wells onsite. W-1, free product (1.99'). W-2,
free product (1.48'). W-3, free product (0.35'). W-4, 14 ppb MTBE. (RJF) 2/14/2006 - Feng - Email
from Paul Lindell (Delta) stated that they are in the final stage of executing the STIP and will be
here by the end of this week. Feng replied approved. (RJF) 2/17/2006 - Feng - Received signed STIP
from Getty with modified CAP. Some conditions to propose RAP were added Should the results of the
Investigation Summary Report warrant remediation and indicate a threat to sensitive receptor(s)
exists then propose RAP. Modified CAP was not acceptable to the Department.(RJF) 3/3/2006 - Feng -
DEC John Urda sent STIP with CAP for Getty signature. (RJF) 3/29/2006 - Feng - Received STIP Signed
by Getty. And sent for Regional Director to sign on it. (RJF) 4/6/2006 - Feng - Stip implemented on
3/31/2006. HardCopy sent to Getty Properties. Emailed to Delta and Tyree and reminded them to
perform investigation and remediation and submit the reports by the deadline according to the CAP,
and remind them to take the deadline seriously. (RJF) 5/3/2006 - Feng - Quarterly Monitoring

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

Report, 1/2006 - 3/2006. The site is an active gasoline retail/service station with auto repair
facility. Groundwater flows to northwest at depth of 12.50' to 13.97' below grade. 4 monitoring
wells onsite. Groundwater monitoring and sampling as of 2/28/2006. W-1, 2.70' FP. W-2, 1.86' FP.
W-3, 0.79' FP. W-4, BTEX MDL, 10 ppb MTBE. (RJF) 5/26/2006 - Feng - During the meeting with Delta
and Tyree on 5/18/2006, DEC approved the workplan submitted by Tyree on 5/12/2006. Tyree will
install 3 monitoring wells in the sidewalk of West 167th Street. EVR will be conducted to remove FP
starting the week of 5/22/2006. (RJF) 10/13/2006 - Feng - Email Rob Szczepanski (Tyree) for the 2nd
quarter, 3rd quarter, 4th quarter monitoring reports. And also asked for the status of biweekly
product removal events and new wells drilling. (RJF) 11/15/2006 - Feng - Quarterly Monitoring
Report, 7/2006 - 9/2006, 10/19/2006, by Tyree. Active gasoline retail/service station with auto
repair facility. Groundwater sampled and gauged on 9/18/2006. 4 monitoring wells. DTW 12.16' to
12.53' bg. Flow direction northwest. LNAPL present in MW-1 (0.64'), MW-2 (0.11'), and MW-3 (0.60').
MW-4, BTEX and MTBE ND. (RJF) 11/21/2006 - Feng - Subsurface Investigation Report, 11/13/2006, by
Tyree. On 9/26 and 9/27/2006, Tyree installed 4 soil borings at the northeast sidewalk of West
167th Street. 4 soil samples collected. Some VOCs and SVOCs exceedance observed. 3 of 4 soil boring
convert into 2 PVC monitoring wells. Well construction consisted of 20' of 0.02 slotted screen and
5 feet riser for a total well depth of 25'. DTW 12'-13'. 3 groundwater samples were collected. VOC
exceedance, MW-7, 138 ppb MTBE, 510 ppb Benzene, 2,800 ppb Toulene, 2,090 ppb Ethylbenzene, 8,120
ppb Xylenes. Called Tyree for further downgradient delineation, crossgradient delineation is also
necessary. (RJF) 11/22/2006 - Feng - Letter to Kevin Shea (Getty Properties) for further
delineation. DEC requested 5 monitoring wells to be installed to delineate the downgradient and the
crossgradient of the plume. SIR due 1/22/2007. (RJF) 1/18/2007 - Feng - Getty Properties portfolio
meeting with Tyree and Delta. DEC required soil vapor samples and install monitoring well near the
apartment building adjacent to the station. Plus the offsite delineation required previously, the
SIR will be submitted 2/28/2007. Biweekly product removal will be continued. (RJF) 2/20/2007 - Feng
- Quarterly Monitoring Report, 10/2006 - 12/2006, 1/16/2006, by Tyree. Active gasoline
retail/service station with atuo repair facility. Groundwater sampled and gauged 12/27/2006. 4
monitoring wells. DTW 11.80' to 12.77' bg. Flows northwesterly. LNAPL in W-1 (0.51'), W-2 (0.29')
and W-3 (0.08'). W-4, ND. EFR conducted 11/27/2006 on W-1, W-2 and

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

W-3. Total 105 gallons of fluid removed this quarter. (RJF) 6/22/2007 - Feng - Subsurface Investigation Report, 4/2007. Tyree, on behalf of Getty Properties, installed 5 soil borings and soil samples were collected. Soil sample collected from B-9 at the depth of 10'-14' show minor SVOCs exceedance. 4 monitoring wells were installed (except B-9 got refusal). Well construction consisted of 20 feet of 0.02 inch slotted screen and 5 feet riser for a total well depth of 25 feet. Groundwater samples collected and analytical result show no exceedance. Quarterly Monitoring Report, 1/2007 - 3/2007, 4/2007. Groundwater sampled 3/15/2007. 8 monitoring wells. DTW 9.97' to 12.66' bg. flows northwesterly. LNAPL in W-1 (0.72'), W-2 (0.54'), W-3 (0.16') and W-7 (1.19'). W-4, ND. W-6, 5 ppb BTEX, 6 ppb MTBE. W-8, 54 ppb BTEX, 61 ppb MTBe. W-10, BTEX ND, 1 ppb MTBE. Email Tyree for status of soil vapor sampling near the apartment building. (RJF) Reply form Rob S. (Tyree) indicated the impossibility to collect soil gas sample from between the station building and the apartment building. A photo was taken and in eDocs. 6/25/2007 - Feng - Emailed Rob S. (Tyree) for air samples in the basement and the 1st floor of the Pizzeria, and also take air samples in the basement and the first of the apartment building. And do the product inventory while collecting the air samples. (RJF) 8/16/2007 - Feng - Quarterly Monitoring Report, 4/2007 - 6/2007, 6/2007. Groundwater sampled 6/7/2007. 10 monitoring wells were sampled. DTW 8.96' to 10.77' bg. Flows to northwest. LNAPL in W-1 (0.22'), W-3 (0.09') and W-7 (1.32'). W-2, 36,910 ppb BTEX, 853 ppb MTBE. W-4, BTEX ND, 3 ppb MTBE. W-6, 1,576 ppb BTEX, 84 ppb MTBE. W-8, 3,241 ppb BTEX, MTBE ND. W-10, W-11, W-12 and W-13, ND. Called Tyree for the status of product removal activity and the indoor air sampling. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. DEC required to have biweekly LNAPL recovery and document the recovery activities in the quarterly reports. Tyree will take subslab and indoor air samples, and conduct products inventory when sampling. Tyree had prepared the RAP and will be submitted by the end of next week (week of 11/11 - 11/17). (RJF) 11/14/2007 - Feng - Spoke with Danny from Don Carlo Environmental (718-857-3100). Don Carlo will be doing some site assessment and will come up with a work plan. The gas station is closing and tanks will be reomved (tanks, pipes, impacted soil). DEC requires a work plan to be submitted prior to all the tanks removal field work. Emailed to Jim DeMartinis (J.R. Holzmacher) to clarify DEC's requirement for this site. For this site, the product is needed to be recovered, and remediation of all the

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

contaminated media are also required. Reply from J. DeMartinis. He has made a comment to both
parties (that there needed to be a more aggressive plan to remediate the product, after all this is
an old spill. And apparently, there is some miscommunication between parties. (RJF) 12/4/2007 -
Feng - Meet with Rami Sagel (Station owner) and Jim DeMartinis. There are lawsuits going on between
the station owner and the Getty Properties. The station owner is signing an agreement with Getty
Properties and taking over the cleanup liability. DEC will send out a Stipulation Agreement to
station owner and attached a CAP. J. DeMartinis proposed to have weekly product removal until all
the product is removed. Meanwhile, an Investigation Summary Report summarize all the previous work
will be submitted. And RAP will be submitted for soil and dissolved gw contamination upon removal
of all product in a year or sooner. (RJF) 12/18/2007 - Feng - Letter with Stipulation Agreement to
Rami Segal. Due back 1/28/2008. (RJF) 12/20/2007 - Feng - Letter from Arnold Kert PLLC (attorney
for Rami Segal) requesting the previously signed agreement by Getty Properties will be released so
that they will have no further liability. 1/4/2007 - Feng - J. Urda called A. Kert. DEC can not
release Getty Properties from the liability by law. (RJF) 2/15/2008 - Feng - Email J. DeMartinis
for the status of the Stipulation agreement. (RJF) 2/29/2008 - Feng - Received signed Stipulation
Agreement from Rami Segal. Sent for RD's signature. (RJF) 3/13/2008 - Feng - Stipulation Agreement
executed 2/29/2008. A copy to 1165 Gas Corp. 3/19/2008 - Feng - eDoc Quarterly Monitoring Report
4Q2007. (RJF) 3/24/2008 - Feng - Quarterly Monitoring Report, 10/2007 - 12/2007, 1/2008. Active
gasoline retail service station with auto repair facility. Groundwater was gauged and sampled
12/21/2007. 10 monitoring wells. DTW 9.97' to 12.07' bg. Flows to northwest. LNAPL in W-1 (0.36'),
W-2 (0.6'), W-3 (0.27'), W-5 (0.55') and W-7 (0.94'). BTEX range ND to 99 ppb. MTBE range ND to 7
ppb. (RJF) 4/9/2008 - Feng - Email from J. DeMartinis. A total of 260 and 175 gallon (total fluid)
were removed from W-1, W-2, W-3, W-6 and W-7 on 3/28/2008 and 4/3/2008. Will summarize all data in
a spreadsheet to DEC. (RJF) 10/20/2008 - Quarterly Status Report, 10/20/2008, by J.R. Holzmacher
P.E., LLC. Mostly EFR events were conducted twice a month, and some monthly. Total recovery as to
date 1,945 gallon water product mixture. MW-4, 8, 10, 11, 12, and 13 were sampled STARS list on
10/9/2008, ND. DTW 9'-12'. (RJF) 7/8/2009 - Reviewed the RAP, dated March 31, 2009, by
J.R.Holzmacher. The RAP reports the vacuum events conducted on MW-1, 2, 3, 6 and 7 to remove the
product and show declined product thickness in these wells MW-3 and

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

MW-6. The RAP is proposed to
continue weekly vacuum event on MW-7, and twice a month on the other wells with product, MW-3 and
MW-6 might be taken out from conducting the vacuum events depend on the monitoring data of next few
months. Reevaluation will be made in July 2009. email to Jim DeMartinis asking about the current
status of the site. DEC requires the report to show product recovery data and the questions about
vacuum time duration. (RJF) 7/8/2009 - email from Jim DeMartinis (JR Holzmacher). They've been
continuing the program and waiting on the latest set (last two weeks) of readings/recovery data
from the contractor and will provide with a status report once received and reviewed the data.
(RJF) 12/31/2009 - Reviewed Quarterly Monitoring Report, dated 9/22/2009, by JR Holzmacher.
Pumping/vacuum events on W-1, W-2, W-3, W-6 and W-7 using a vacuum truck and/or trailer mounted
vacuum unit. The wells were monitored before and after the vacuum events. The wells were vacuumed
twice a month starting March 28, 2008 unitl early October 2008, and resumed on twice a week to
weekly basis in Jan 2009. Through 9/1/2009, a total of 6,846 gallons of contaminated water and
floating product have been removed from the 5 wells. Groundwater was gauged on 8/31/2009. W-1,
trace. W-2, trace. W-3, no LNAPL. W-7, trace. Sampled 9/3/2009. W-1, 12,490 ug/L BTEX, 990 MTBE.
W-2, 8,840 ug/L BTEX, 830 MTBE. W-3, 12,200 ug/L BTEX, 1,800 MTBE. W-4, 1.5 ug/L BTEX. W-6, 19.8
ug/L BTEX, 2.7 MTBE. W-7, BTEX ND, 1.7 MTBE. W-8, 0.59 BTEX, 2.2 MTBE. W-10, 2.24 BTEX, MTBE ND.
W-11, ND. W-12, ND. W-13, ND. The pump of W-1, W-2, W-3 and W-7 will be continued every other week.
(RJF) 5/12/2010 - Quarterly Monitoring Report, dated 1/4/2010, by JR Holzmacher. Floating product
and contaminated groundwater have been removed in monitoring wells W-1, W-2, W-3, W-6 and W-7 using
a vacuum truck and/or trailer mounted vacuum unit. Through 12/28/2009, a total of 10,065 gallons of
contaminated water and floating product have been removed from the 5 wells. W-1, no product since
9/2009. W-2, no product since 7/2009. W-3, no product since 4/2009. W-6, no product since 6/2008
and in quarterly sampling. W-7, no product since 8/2009. The other wells that never indicted
product have been sampled quarterly. Groundwater sampled on 12/17/2009. W-1, 271 BTEX. W-2, 6,270
BTEX, 65 MTBE. W-3, 2,930 BTEX, 190 MTBE. W-4, 2.06 BTEX. W-6, 12.1 BTEX. W-7, 9.57 BTEX. W-8, 1.98
BTEX. W-10, 5.53 BTEX. W-11, 2.48 BTEX. W-12, 1.39 BTEX. W-13, 1.13 BTEX. JRH recommends continue
the pumping on W-1, W-2 and W-3 every other week focus on removing dissolved contamination. All
wells will be purged and sampled in 3/2010. email to Jim DeMartinis (JRH) with comments. 1) if they

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

want to continue EFR, then do so, but may need to have another alternative to address the dissolved later on; 2) gauging data of all wells, hydrograph, contours and a rose diagram to show the flows variation. 8/3/2010 - Quarterly Monitoring Report, dated 5/12/2010, by JR Holzmacher. Weekly gauged and pumped on W-1, W-2 and W-3 from January 2010 to April 2010. No product. As of 4/20/2010, MW-1, 3.43 ug/L BTEX, 18 MTBE. MW-2, ND BTEX, 2.3 MTBE. MW-3, 248.9 BTEX, 1.6 MTBE. MW-4, 2.4 BTEX, MTBE ND. MW-6, 1.4 BTEX, 3.8 MTBE. MW-7, 2.48 BTEX, 3.8 MTBE. MW-8, ND. MW-10, 1.99 BTEX, MTBE ND. MW-11, ND. MW-12, ND. MW-13, ND. Approximately 12,500 gallons of floating product and contaminated groundwater have been removed. The high rainfall in the spring 2010 caused the water table to rise, however, water levels have started to decline and floating product has not been measured in any of the wells. JRH recommends discontinue the pumping of W-1, W-2 and W-3. Only W-1, W-2, W-3, W-6 and W-7 will be purged and sampled in 7/2010. If the results are favorable, will sample again in 10/2010, then request for closure. JRH also recommends to abandon W-4, W-8, W-10, W-11, W-12 and W-13. 8/4/2010 - email to Jim DeMartinis (JRH) with comments. 1) OK to discontinue vacuuming W-1, W-2 and W-3. 2) Keep monitoring all the wells onsite and offsite. 3) Need to monitor for at least 4 quarters after stop vacuuming before request for spill closure. 4) DEC does not approve the abandonment of W-4, W-8, W-10, W-11, W-12 and W-13; must continue to monitor all wells quarterly. 11/5/2010 - Quarterly Monitoring Report, dated 8/12/2010, by JR Holzmacher. 1/18/2011 - Letter received with supporting report to request spill closure. Consultant states that floating product has been eliminated and dissolved has been significantly reduced. In January 2011 ten of the eleven wells were below the thresholds for dissolved. Only W-1 exceeded the threshold for benzene by a bit. Request is premature by one quarter. This is the third quarter of monitoring after vacuuming ended. 2/14/11. Via e-mail Jim inquired about closure. I replied that another quarter of sampling would be required to guard against rebound. He replied he will schedule the next round for April. 4/12/11. G/W sampling report received today with a request for spill closure. 5/6/2011 - Quarterly Monitoring Report, dated 4/12/2011, by JR Holzmacher. W-1 (no product since 10/2009), W-2 (no product since late 2009) and W-3 (no product since 4/2009) were kept in the pumping events until April 2010. W-6 (no product since 6/2008) was kept in the pumping events until 5/2009. W-7 (no product since 8/2009) was kept in the pumping events until 12/2009. There were no exceedances from 5 wells W-2, W-4, W-8, W-10 and W-13 in 4/2011. W-1 with some 2.9 ug/L

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

benzene, 28.7 ug/L xylenes.
W-3, 33 ug/L benzene, 5.2 toluene, 6.0 ethylbenzene, 116 xylenes, 24 MTBE. W-6, 12.8 xylenes. W-7,
11 xylenes. W-11, 10.2 xylenes. W-12, 8.4 xylenes. Request spill closure. JF 5/18/2011 - email
reply to Jim DeMartine of JR Holzmacher. I looked at this and discussed with Joe. Please note that
we have some changes here. Mark Tibbe is transferred to another region and Joe O'Connell is my
supervisor now . Basically, Joe wants to look closer on this one to see what else is necessary to
justify for closure. Please be patient and we will get back to you when we are ready. JF 8/1/2011 -
email to Jim DeMartine of JR Holzmacher We have talked about what else is necessary to justify for
closure for this spill site. Here are what we require: 1) A letter work plan for confirmatory soil
sampling in between the area where have been had product. Please be consistent with the depth cross
to the smear zone where contamination/product have been present. Please compare the contaminants
concentration to CP-51 full list. 2) Conduct another round of groundwater sampling for CP-51 full
list. Please notify DEC in advance of 5-day prior to the sampling work. 8/30/2011 - Reviewed
Investigation Work Plan dated 8/16/2011 which propose to install 3 soil borings to collect
confirmatory soil samples. Comments to Holzmacher: We reviewed the work plan proposing for the
installation of three soil borings and we have some comments. 1) MW-6 and MW-7 have been had
product too. Please add one more soil boring in between MW-6 and MW-7 to show whether there is any
remaining soil contamination over there also. 2) We checked the PBS records of this site. There is
a 550-gallon #2 fuel oil UST which was installed in April 1, 1952 and closed-in-place. And there is
also a 550-gallon #6 fuel oil UST which converted to non-regulated use, the tank was also installed
in April, 1952. We think there is a need to include SVOCs in the sampling. 3) Please confirm that
your drilling depth is 10 feet into water, and the water depth is about 12 feet below grade
surface, so your drilling depth will be around 22 feet bgs. please revise the work plan and send it
back to me. any questions, please let me know. 9/2/2011 changed Lead DEC to rjfeng from gdbreen
(JOC) 11/4/2011 - Approve Investigation Work Plan dated 9/6/2011. The plan propose to install 4
soil to identify residual contamination. Approve with conditons due to the clay layer: 1) drilling
shall not be go on if a clay layer is encountered; 2) instead of collecting groundwater from the
existing groundwater monitoring wells, groundwater samples to be collected from the soil boring
that will be set wells above the clay; 3) monitor the depth of water during purging/sampling,

FORMER GETTY S/S #259 - GETTY PROPERTIES (Continued) **S103941125**

adjust the flow rate to minimize the drawdown and make sure the flow rate is low enough to be
gentle fill in the sampling container; 4) the consultant shall closely supervise the soil boring
and sampling to make sure that the clay layer is not penetrated. Investigation report due 1/2012.
12/22/11 - Raphael Ketani. Today I received the 12/12/11 Site Investigation Report which was
produced by J.R. Holzmacher. I reviewed the report. The soil results for the 4 borings that were
installed had hits that were largely non-detect or below CP-51 standards. The few exceedences that
were indicated had hits just above the standards. The groundwater samples that were taken were also
largely below the standards or non-detect with a small number of low exceedences. I spoke to Mr.
DeMartinis about the report and what he had seen while at the site. He said that an auger rig was
used and no clay layer was found. I asked him about any signs of product. He said that none was
seen. I asked him whether there was a high water table that was preventing product form entering
the temporary wells. He said that this wasn't the case. Given the information in the case file and
in the 12/12/11 SIR, I have determined that the spill has been remediated and that there is no
threat to the public or the environment. Therefore, I closed the spill case and sent Mr. Rami Segal
a spill closure letter.

Spiller Phone: (646) 316-3382
Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 581093
DEC Memo: 3/4/22 - Kim - See also Spill 2109837. 3/8/22 - Kim - On 2/19/22 a spill was reported by the homeowner at 999 Grant Ave for black oil on puddles in the backyard and coming up in the basement sump. The apartment building next door at 1003 Grant Ave has a 2,500gal steel tank encased in concrete, PBS 2-601137. On 2/20/22, I received photos from the homeowners of 999 Grant Ave showing more black oil coming up in their backyard. I called Walter Puryear at 646-316-3382 who works at 1003 Grant Ave and he stated that the building's last tank test was done a few years ago. I scheduled to follow up on this spill with Puryear 2/22/22. On 2/22/22, I visited 1003 Grant Ave and met with Shaquasia Green the porter of 1003 Grant Ave PBS 2-601137 and 1007 Grant Ave PBS 2-601185. The 1003 Grant Ave tank system was located on the left side of the building closer to the front, by Grant Ave. There was no visible oil spill or odor in these buildings. The petrometer for 1003 Grant Ave PBS 2-601137 contained a clear liquid. The petrometer for 1007 Grant Ave PBS 2-601185 contained red liquid consistent with No. 2 fuel oil. Shaquasia was not familiar with the tank systems or who schedules fuel deliveries. On 2/25/22 I called the listed owner for the AST at 1003 Grant Ave at 718-588-8200, my call was forwarded and I left a voicemail with my name and number. On 2/28/22, I called the Mid Bronx office at 718-588-8200 in the morning but was not able to reach someone to discuss the required tank test. I called Walter Puryear and sent him a copy of the tank test requirement letter. On 3/4/22, I contacted Walter Puryear and received notice of a tank test failure at 1003 Grant Ave and a copy of the ABC Tank proposal to investigate. Spill 2110145 was opened on 3/4/22 for the tank test failure. On 3/7/22, I called ABC Tank at (718) 272-2800 and confirmed that they were on site today to isolate the AST and lines at 1003 Grant Ave, Bronx. I also received a call from Charles, owner of 999 Grant, that 1003 Grant Ave had a temporary tank and they were performing work on 1003 Grant Ave. I received a follow up call from Rob with ABC Tank from (718) 927-0350. The tank is currently holding steady at 8lbs of pressure. They are going to return tomorrow morning to see if there is any change indicating a leak. 3/9/22 - Kim - Call scheduled with DEC Obligado and Rob with ABC Tank. The tank lost some vacuum pressure and the lines for the tank system are aboveground, so Rob thinks there may be a small pinhole leak. ABC is going to remove the concrete encasement around the tank tomorrow and will lift the tank and inspect the bottom of the tank Friday. 3/11/22 - Kim - Called ABC Tank, crew has been at 1003 Grant Ave starting at approximately 9:45am. They are rolling the tank today and will send photos at 3pm. After the tank was removed from its concrete encasement, ABC Tank found that their AST system was not leaking, and the floor was solid concrete, so the tank was not in contact with soil. 3/28/22 - Kim - DEC Ajoku forwarded me an email sent from ABC Tank detailing the work done. ABC Tank performed the following work at this site: 3/2/2022 - ABC Tank performed a tank test on (1) 2,500 gallon vaulted tank & system. Tank was deemed a fail (top leak). (see attachment) 3/8/2022 - ABC Tank pumped out, cleaned and washed the interior of the tank, cut and plugged all lines to isolate the tank from the system. - ABC Tank installed a gasket set on the existing manhole cover and retested the tank

CON EDISON (Continued) **U003396012**

without the lines. The tank was deemed a PASS. (see attachment) 3/10/2022 - ABC Tank broke and removed the vault from around the tank, lifted the tank off the ground and rolled tank to expose bottom of tank. - There was no visible evidence of oil found under or around the tank area. 3/18/2022 - ABC Tank welded plates to tank bottom to make repairs to tank as a precautionary measure to insure the tank would not leak in the near future. 3/25/2022 - ABC Tank painted the exterior of the tank and applied 10 lbs of pressure in order to confirm the integrity of the tank.

Remarks: 1003 Grant Ave was notified of Spill 2109837 at 999 Grant Ave and required to perform a tank tightness test that failed on 3/3/22.

DEC Memo:	Sangesland spoke to David Chan of Riteway. He said there was a problem with the fill line. Line was dug out and contamination pulled. New Line was installed. Attached is lab data on 3 soil samples taken along the length of the fill pipe. Below is text from Riteway report: 1201 Ogden requested a tank test back on Dec. 1, 2011. It was performed and the test failed. We troubleshooted and determined the source of the failure was a fitting on the fill near the foundation wall. We changed the fitting and entire fill line (in secondary). There was very little contamination (1 drum) by the foundation wall. The drum was picked up this month, (I have not received the drum manifest yet). We took samples along the fill (enclosed sitemap), all seems clean, just some small hits on SVOA (below regulatory limit I believe, enclosed analyticals). After work was completed another tank test was performed and passed (enclosed

(Continued) **S107783778**

manifest).
Remarks: Test failure. Repair & retest is being scheduled.

Spiller Name:	PATRICK DIGGINGS
Spiller Company:	UNKNOWN
Spiller Address:	1325 JEROME AVE
Spiller Company:	999
Contact Name:	PATRICK DIGGINGS
DEC Memo:	10/31/18-Zhune spoke to Patrick Diggings from AKRF Inc.(646-388-9784). Patrick said they received today 10/31/18 the soil analytical results and the results indicated soil contamination (Naphthalene and total xylene). The site is remediated under the OER remediation program. Patrick will send the work plan to the DEC. 11/1/18-CSL letter sent to: Mr. Dan Cobleigh 183 Madison Avenue, 16th Floor New York NY 10452, 3/5/21- DEC Piper- A total of 12,519 tons (approximately 8,340 cubic yards) of soil/fill were removed from the Site and properly disposed of at appropriately licensed or permitted facilities. Removed three underground storage tanks (USTs), which were encountered during soil/fill removal actions. Tanks were closed in compliance with the RAP and with city, state, and federal laws and regulations, and affidavits were provided by a Fire Department of New York (FDNY)-licensed tank removal contactor. Discovered tanks were registered and administratively closed with New York State Department of Environmental Conservation (NYSDEC), in accordance with state regulations. Imported materials used for backfill and cover in compliance with the RAP and in accordance with applicable laws and regulations. Approximately 620 cubic yards of New York City Mayor s Office of Environmental Remediation (OER)-approved certified clean recycled concrete aggregate (RCA) were imported from Allocco Recycling Ltd. (a.k.a. Zevel Transfer LLC). Approximately 26 cubic yards of OER-approved virgin trap rock

CONSTRUCTION SITE - OER (Continued) **S123160091**

were imported from Stone
Industries, Inc. Approximately 1,019 cubic yards of OER-approved
virgin trap rock were imported
Rocktech of New Jersey, LLC and/or Liberty Stone and Aggregates LLC
for use as gas permeable
aggregate (GPA). Installed an engineered composite cover system across
the Site, which consisted of
a minimum five-inch-thick concrete slab within the building and a
minimum three-inch-thick concrete
slab in the exterior yard. Installed a vapor barrier system beneath
the building slab and outside
of sub-grade foundation sidewalls to mitigate the potential for soil
vapor migration into the
building. The vapor barrier system consisted of a combination of
20-mil (0.02-inch-thick)
VaporBlock Plus beneath the building slabs and E.Pro e.base 205,
60-mil (0.06-inch-thick) e.spray,
and e.shield 205 outside all sub-grade foundation sidewalls. All
welds, seams and penetrations were
properly sealed to prevent preferential pathways for vapor migration.
Installed a passive venting
system below the slab-on-grade portions of the building. The passive
venting system includes a
network of schedule 40 4-inch-diameter slotted polyvinyl chloride
(PVC) horizontal pipes set within
a minimum 12-inch-thick gas permeable layer installed immediately
beneath the at-grade concrete
building slabs and vapor barrier. The slotted horizontal piping
transitions to solid PVC piping,
which then transitions to 4-inch-diameter galvanized steel piping at
the slab penetration points.
The galvanized steel pipes are manifolded together on the first floor,
and continue as one riser to
the roof. The riser terminated above the roofline with a wind-driven
turbine at the top of the
exhaust stack. Based on work to date , this spill is closed. See
report in DEC Docs if warranted.

Remarks: clean up pending further investigation

DEC Region:	2
DER Facility ID:	70056
DEC Memo:	12/08/05: This spill transferred from J.Kolleeny to S.Kraszewski. 07/26/06: NYCHA update summary states that two 25K USTs installed in 1954 that stored #4 and #6 oil were replaced by two 15K USTs in 2004. They currently store #2 oil. The summary mentions a TTF but does not say which tank failed. Seven MWs were installed in 1995 and are currently bailing an oil/water mixture. NYCHA recommends that DEC review the available site assessment. - SK 09/26/06: Transferred from S. Kraszewski to J. Kann. Due to the presence of oil/water, this site was reclassified as a P1. - J.Kann 10/09/08: Met with NYCHA and their consultant (Prefferred Environmental) on October 3 to discuss requirements of the site.Proposed and agreed to the installation of 5 borings and 2 additional wells (one remains on site). Shallow rock at this site will require borings to be installed in rock. 12/4/08: Investigation Work Plan received. J.Kann 10/13/09: J.Kann - Bedrock Investigative work plan submitted. 10/15/09: J.Kann - SIR prepared by Langan submitted on 10/14. Report reviewed. 5 borings were installed into rock and 3 wells installed. 2 of the three new wells contain product, likely no. 4 or 6. One former well also contained product. The one well without product was sampled and contained PCE at 8 ppb. The work plan submitted on 10/13 included the installation of 5 additional wells to delineate the plume and track down information on the PCE. DEC comment was provided on 10/15, which requested that an upgradient well be installed to confirm groundwater flow direction and to aid in the determination of the PCE source. 10/19/09: J.Kann - revised plan emailed on 10/16/09. Work Plan approved on 10/19/09. 5/11/12: J.Kann - updated UIS to indicate that the SIR was recieved

HIGHBRIDGE GARDENS (Continued) **S102959960**

in may 2011 (edoced). 06/05/2017: J.Kann - Spill reassigned to Andre Obligado. 7/26/17 - Obligado - I reviewed the 2Q16 update report. The site has 2 16k #2 fuel oil USTS. The site has 13 monitoring wells. According to the report, in May 2016, up to 8 feet of product was detected in MW7 and MW11. The report recommends product recovery using absorbents and continued monitoring. Based on historical reports, groundwater and free product is present in schist bedrock. 10/31/22 - Obligado - I reviewed the 1st half 2022 monitoring report. During the 1st Half of 2022 LNAPL was found in 2 wells in Jan 22 (MW7 0.33 ft) and (MW8 0.33 ft) and in 1 well in June 22 (MW7 0.33 ft). VEFR was utilized on those wells to remove free product as well as absorbent socks. 12/12/2022-M. Hoque: Due to Andre Obligado's transfer from Spill Response Program to BCP/SSF Section, spill case manager reassigned from Andre Obligado to MD Hoque/ Spill Remediation Section B effective on 12/12/2022. (MDH) 1/30/2022-M. Hoque: Received a semi-annual (January- June) 2022 report and being reviewed. (MDH) 2/13/2023-M. Hoque: DEC reviewed a bi-annual (January- June) 2022 site status update report. There is no remediation system installed or operated at the Site. Monitoring wells MW-2, MW-6, MW-7, MW-8, MW-101, MW-102, MW-103, MW-104, MW-106, MW-107, MW-108, MW-109, MW-110, MW-111, and MW-112 were gauged. Product thickness was observed up to 0.33 foot in well MW-7. VEFR events were performed wells MW-7 and MW-8, but the total amount of oil/water mixture recovered was not recorded during the second half of 2022. NYCHA will continue well gauging and product recovery monthly, with bi-annually reporting to DEC. (MDH)

DEC Memo:	PBS 2-609588 4/24/2009 TTF letter sent to: Ms. Maureen Duggan, Comptroller Foodtown 444 South Fulton Ave Mt Vernon, NY 10553 5/21/2009 Foodtown asked for a 30 day extension to respond to the spill case. New deadline is Wednesday June 24, 2009. - SS 7/17/09. J.Krimgold reviewed the letter report submitted by A.L.Eastmond & Sons, Inc. dated July 16, 2009. According to the info provided the cause of the tank failure was two broken couplings on the top of the tank. After repair, tank was retested and passed. No evidence of release were observed during excavation of the tank top. NFA letter.
Remarks:	TANK TEST FAILURE ON A 2000 GALLON UST, UNK IF ANY PRODUCT WAS SPILLED. CALLER STATES THAT IT LOOKS LIKE THE SIDE WALK WAS REPLACED AND THE VENT PIPE WAS DAMAGED.

DEC Memo:	5/23/16 TJD Teleconference with Tom Perez at NYC DOE (Fuel Division) - He states (2) 8500 gallon UST's tanks failed tightness test performed by AARCO. Triumvirate Environmental is lead contractor and will be installing temporary tank until repairs and retesting are performed. TTF letter sent (US mail & Email) and DECDOC'd. Awaiting response from NYC Department of Education. Reported failure is a wet leak as per Tom Perez. PBS #2-352411. 10/26/18 - Austin - Spill

TTF - PUBLIC SCHOOL X022 (Continued) **S118707699**

transferred from Tim DeMeo to Rick Lin - end 7/12/23-Lin-Email was send to DOE for more information on the status of tank 001 and 002 that failed the tightness test. 9/13/23-lin-Riteway is going to take samples from the bottom of the tank and abandon the tanks in place. They are currently waiting for the paper work to process with this work. 3/27/24-Lin-Riteway punched hole thru bottom of tank and discovered oil. They plan to recover via seepage into tank. DEC notified DOE that they can go ahead and recovery free product via pump out from the USTs. In addition, they need to hire a qualified consultant to do a groundwater investigation and submit a work plan to DEC by 04/06/2024.

Remarks: failed tanks repair and retest

Site Description: The site once housed a dry cleaning facility 20 x 40 feet in dimensions. The underlying soil was contaminated with the solvent perchloroethylene (PCE). Soil sampling indicated that most of this contamination existed in the shallow soils (two to six feet below ground surface)where concentrations of PCE were detected at a maximum of 21,000 ug/kg (ppb). TAGM 4046 exceedances were detected to as deep as 15' bgs and nine out of sixteen samples taken revealed such exceedances. A Soil Vapor Extraction System was installed and put in operation in June 1998 and operated until June 2000. Confirmatory effluent samples from the SVE system indicated a decrease in the

1296 SHERIDAN AVENUE (Continued) **S109321186**

concentration of PCE from a high of 250,000 ug/m3 at the time of start up to an asymptotic level of 306 ug/m3 two years later. Soil end sampling done in June 2000 revealed mostly non-detects and a maximum concentration of PCE of 94 ug/kg. There were no TAGM exceedances. The SVE system was shutdown in June 2000. The property was subsequently redeveloped as a Chinese takeout restaurant. Four rounds of indoor air sampling were conducted at the site. NYSDOH has requested sub-slab vapor testing but the owner was resistant to this because of the recent construction. The site was placed on the list of legacy sites because of the concern for potential soil vapor intrusion from the residual contamination. A Soil Vapor Intrusion (SVI) Evaluation Work Plan was submitted on October 8, 2007 and finally approved on November 28, 2007. The proposed sampling as described in the SVI Evaluation Work Plan was conducted on March 6, 2008. The report detailing the results was submitted on April 16, 2008. Based on these results and prior results from indoor air sampling and soil end point sampling, NYSDOH issued a letter dated June 10, 2008 stating that no further action was necessary. NYSDEC then issued a No Futher Action Letter to the ownwer/RP on July 24, 2008. An IRM Report approval letter was issued by the department on September 3, 2008.

Env Problem: The consultant for the owner had requested a No Further Action determination from the Department in October 2000. However, the NYSDOH did not concur and requested that four rounds of indoor air sampling be done before any determination was made. The fourth round was completed and the report submitted on April 5, 2007. The results for tetrachloroethylene (PCE)were below NYSDOH air guideline of 100 ug/cubic meter and NYSDOH/EPA databases for indoor air. The site was then placed on the list of legacy sites. The consultant FPM submitted a proposal to do Sub-slab soil vapor sampling using an alternate location to that stated in NYSDOH guidance for soil vapor intrusion. This was reviewed by NYSDOH. Following discussion between the consultant, FPM, NYSDOH and NYSDEC, a revised Soil Vapor Intrusion Evaluation Work Plan was submitted on October 8, 2007 and finally approved on November 28, 2007 with the stipulation that if any tetrachloroethene (PCE)was detected in any of the soil vapor samples planned, NYSDEC and NYSDOH would request that sub-slab soil vapor along with concurrent indoor and outdoor air sampling be performed at the site proper. The proposed sampling as described in the SVI Evaluation Work Plan was conducted on March 6, 2008. The report detailing the results was submitted on April 16, 2008. Based on these results and prior results from indoor air sampling and soil end point sampling, NYSDOH issued a letter dated June 10, 2008 stating that no further action was necessary. NYSDEC then issued a No Futher Action Letter to the ownwer/RP on July 24, 2008. An IRM Report approval letter was issued by the department on September 3, 2008.

Health Problem: Soil and soil vapor are contaminated with tetrachloroethene and its breakdown products. A soil vapor extraction system operated on-site from June 1998 to June 2000. Following shutdown of the system, soil samples showed levels of contaminants were below the recommended soil cleanup objectives. Also, indoor air sampling results indicate that contaminant levels are below concentrations that would represent a health concern. At this time, no further action is warranted.

DEC Memo:	1/23/07 bf: sent ttf letter to: Michael Goldberg 1993 Kesef Realty Corp. 5600A Broadway Bronx, NY 10463 3/1/12 bf: Sent ttf letter to: Mayer Brecher 155 W 162nd St Owner LLC 1465A Flatbush Avenue Brooklyn, NY 11210 8/7/12 Received phone message from ABC Tank (Donna Vieni) (718)272-2800. She wanted to know what was needed to close the spill case. I returned her call and told her that they need top provide a response to the ttf letter(s). She said that she will get letter to me soon. bf 8/13/12 On 8/10/12, received letter by fax from Donna Vieni of ABC Tank. Tank failed the test because of an open suction line. Line was capped and then then tank passed the test. letter includes statement that there was no evidence of soil contamination. nfa. bf

DEC Region: 2
DER Facility ID: 489616
DEC Memo: 11/16/2016: Rashad Called Chris, he said that tank failed due to dry leak most likely in manway gasket, they will be isolating and retesting tank probably Friday. No additional spills found for site, PBS#2-198455 found for site there is a 4000 gallon #2 AST. 11/18/2016: Rashad TTF Letter being prepared and will be sent to property owner: City Skyline Realty 507 West 139th Street Suite A New York, NY 10031 Copy will also be emailed to Chris Tomasello. Spill assigned to DEC Zhune as she was off hour runner when spill came in. Letter uploaded to D2. 1/12/18-Zhune spoke to Deny Guo (manager). Deny said he is going to find out about the work performed either to the tank or the lines. 1/12/17-Danny Guo email-It was nice talking to you over the phone. Thank you for bringing the tank testing to my attention. We will have a tank company next week to check and repair the oil tank. I will provide you with a report then. Also, this building operates on dual-fuel. Right now, it is operating on gas and there hasn t been any oil in the tank 718-228-0020 Ext. 3500 6/7/18 - Obligado - I received the tank testing results and repair documentation. According to Millennium Tank Mainenance, the leak was due to a leak in the vent line manhole cover. The piping was repaired and second test was performed on March 24, 2018 and the test past. Spill closed.
Remarks: tank test failure - retest pending

DER Facility ID: 165238
DEC Memo: 12/30/05. Mr Feroze talked with James Mcgoldwick (718-206-2000 347-452-3866), he informed that the system is fine and he will send DEC the tank test result soon. TTF also sent: Samaritan Village Inc, 138-02 queens Blvd, Briarwood, NY 11435. 01/18/06 . Feroze received a fax from Lee Selinger (631-360-8901, 516-330-8170) of WINDMILL Oil Tank service. He mentioned that he will change the fill & vent pipe. He is requested to submit manifest and tank test result to DEC. PBS of this Spill 2-349542. 02/22/06 . Feroze received a letter from Lee Selinger (631-360-8901, 516-330-8170) of WINDMILL Oil Tank service. He mentioned that they excavated the top of the tank and replaced the vent and fill line. They will change gaskets of undisclosed manhole cover and will test the tank. 02/06/06, Feroze talked Lee Selinger (631-360-8901).They wiil submit DEC the manifest to change the fill and vent lines. 03/13/06 Feroze , Mr. James Mcgoldrick e-mailed me that they will submit tank tightness test result within a week. 03/14/06 Feroze. Received the passed tank tightness test result and manifest regarding change of fill and vent lines. The spill is closed. Not reported

DEC Memo:	12/20/05: This spill transferred from J.Kolleeny to S.Kraszewski. 03/23/06: This spill transferred to K.Tang - SK 07/22/10: J.kann - spill transferred to J.Kann. Investigative Work Plan submitted 7/15/10. 5/29/12: J.kann - since little is known about this site, a P0 priority was assigned. 5/14/14: J.Kann - The investigative work plan was approved in a May 8, 2014 email. The SAR is due to the Department by November 8, 2014. 12/30/14: J.Kann - site part of multi site stip executed on 10/14/14. SIR due 2/14/15. 3/3/15: J.Kann - received the SIR on 2/4/15. Reviewed it today. 5 borings were advanced and two temporary wells sampled. Minor exceedences of SVOCs detected in one of the five borings at the fill port Benzo(a)anthracene 1300ppb (RSCO 1000ppb) Benzo(a)pyrene 1200 ppb (RSCO (1000ppb) Benzobfouranthene 1600ppb (RSCO 1000ppb) Benzokfluoranthene 1300ppb (RSCO 1000ppb) Indeno(1,2,3-cd)pyrene 540ppb (RSCO 500ppb) The temp groundwater samples contained concentrations slightly above TOGS, but below 0.3 ppb of any constituent. Given these minor exceedences in one location, and that boring logs do not indicate any field evidence of contamination, the spill was closed. NFA.

DEC Memo:	12/28/2020 - Feng - Desk Duty in office. Spoke to Erik Draijer of PVE LLC. They did a due diligent investigation on behalf of the potential buyer. Now the potential buyer has already bought the property. This is a e-designated site. The future plan for the property is to build a school. They are in the program with NYC OER. This a a former garage/services station and right now it is a vacant parking lot. According to the Sanborn map, there is a tank at the site and maybe 21-24 feet bgs. They have installed monitoring wells and vapor points. The soil and groundwater show contamination. Vapor samples did not show contamination, but OER still required them to have vapor mitigation measure. He is not sure whether NYSDOH/NYCDOH is involved in this project. The building plan is due to the NYCDOH by 2/2021. They have the final draft of RAWP to OER. OER required them to report the spill. Informed him that the spill to be assigned to Ryan Piper. Erik Draijer PVE LLC 973-975-7135 An existing concrete slab below the anticipated depth of excavation was discovered at approximately 8 feet below grade. The slab was found below the depth of test pits installed during PVE's tank search. During over excavation of the slab, two sets of tanks were identified as described below. Five (5) 750-gallon USTs were identified in the southwest corner of the site near the RI SB4 area of concern at about 12 feet below grade. The tank grave was over excavated per your request. The maximum PID readings in the area were 3.3 ppm and endpoint samples taken at 2 feet below the bottom of enclosure slab showed little to no exceedances of

(Continued) **S122254383**

CP-51 SCOs. Tanks have been
cleaned and removed from the site. An additional three (3) 550-gallon USTs were identified in the
northeast corner of the site at about 8 feet below grade, which have been cleaned and removed as
well. There were several VOCs and SVOCs exceedances in the endpoint samples taken directly outside
of the concrete enclosure. The area was excavated to remove the concrete enclosure, however, over
excavation was limited by already installed foundation elements.
9/8/22- DEC sent info req to DEP
OER.

Remarks: 21-24ft below grade

Program:	HW
Site Code:	382480
Classification:	N
Region:	2
Acres:	Not reported
HW Code:	203042
Record Add:	06/05/2007
Record Upd:	10/06/2009
Updated By:	MOBARRIE
Site Description:	The site location is currently described as the inersection of Concourse Village West and East 156th Street, Bronx because no source area has yet been identified. According to historic information and Sanborn maps, the MGP had been had been a small facility located on a former rail yard, the Former Metro North Property BCP# C203030 that served the rail yard. Groundwater data show elevated concentrations of MGP related contaminates such as naphthalene migrating from off-site toward the Former Metro North Site. It appears that there is an MGP waste disposal area contributing to the groundwater contamination. The objective of the preliminary site assessment (PSA) is to locate the source of the groundwater contamination determine if a remedy is necessary and feasible, if so, is a remedial investigation necessary. The site did not qualify for addition to the Registry of Inactive Hazardous Waste Sites.

DEC Memo:	DEC Mahat made several call to contact Elie Saintsaean and I was not able to establish any contact. The lot is empty as per recent google map. No lead on this matter as notifier is out of reach. Spill case will be closed in Spill Database since it was certain the type of orange material on the site. Further investigation will be carried out if more information on the site is available. Spill case will be closed in NYSDEC Spill database.
Remarks:	caller reports orange material/powder mixed in soil/stong odor

DEC Memo:	03/29/21-Hiralkumar Patel. alternate address: 975-985 Washington Ave, 460-478 E 164th Street PBS #: 2-611222. as per PBS record, the site had six (6) 550 gal gasoline USTs, removed in Nov. 2009. other spill # 0908996 was reported on 11/10/2009 when gasoline contamination was noted. case closed. E-designated site. 8:32 AM:- spoke with Kevin. he mentioned that Phase I/II investigations were conducted at the former gas station site as part of E-designation requirement. soil boring, monitoring wells and soil-vapor probes were installed. gasoline related contamination was noted in soil samples at the groundwater table and in groundwater samples. asked Kevin to submit investigation reports and property owner’s contact info. 8:42 AM:- received email from Kevin including investigation report (via DEC FTS) and property owner’s contact info. AMG Hospitality LLC. **property owner** 731 Main Street New Rochelle, NY 10801 Attn.:

Paras Chadha Ph. (347)
328-7944 email: parasnyc@yahoo.com Kevin Brussee 631-338-1749 report uploaded to DECDocs. case
assigned to DEC Zhune (off-hour secondary). 9:07 AM:- sent email to Kevin and informed him about
case assignment to DEC Zhune. email copied to DEC Zhune, Mr. Chadha, OER Shaminder and OER Shirley
Chen. 4/7/21 - Obligado - I had a conference call with Shaminder Chawla OER and Nathan Walz DOH. We
discussed the contents of the RAWP. A summary provided by Shaminder describes the remedy as Remedy
components include: 1. Track 4 remedy 2. Excavation from 6' to 17' below new building and 2' in
ramp areas 3. Test pits in ramp areas to determine if any USTs are there. Removal of all USTs 4.
over excavation in petroleum area 5. injection program with chemical oxidants (sodium persulfate)
6. groundwater sampling from all existing and 4 new wells to monitor performance of chemical
injection 7. groundwater dewatering 8. vapor barrier 9. composite cover 10. passive ssds with vapor
sampling ports (per Nathan's suggestion) 11. SVI study 12. SMP; and 13. Continues E Designation The
RAWP proposed only 1 sampling event 3 months after injection. DEC commented that 1 sampling is
insufficient to document efficacy and DEC provided recommendation for quarterly sampling for 1 year
post groundwater injection. According to Shaminder, injections to proceed upon OER approval of the
RAWP prior to excavation. Shaminder will provide schedule updates regarding start of remedial
activities. 3/8/22- Zhune spoke to Kevin. He said work will start in May. 2/28/23- Zhune spoke to
Paras. He said they did not star the remediation that they are going to start it in summer.
12/26/23 - Ye - DDO - Spill 2307856 for the same site was called in regarding an unregistered tank
found in the old footprint of the building. 2/22/24- Chawinie Relly sent the following email- All
end point samples for oer have been collected and we are uploading them once they come in to oers
epic website. Since 90% of the site has been excavated new wells need to be installed; we are
waiting for backfill to be completed in these areas and then will have the wells installed. Once
they are installed we will collect the round of groundwater sampling that was planned after the
October injections. Backfill in those areas should be completed in the next few weeks. Results,
once received will be provided to you in a report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	7/27/15 TJD Left message on notifiers voicemail requesting callback with update and additional information. Dispatched secondary (Piper) for inspection. 8/21/15 TJD Spill reassigned Piper to DeMeo. Teleconference with DEC project manager, Mike Maccabe, who is handling the Brownfields cleanup of site (C203073). Advised him of (2)new spills (1504450 & 1505472) reported at this property. Two recent spills will be managed as part of the Brownfield cleanup by Albany project manager and are closed and cross-referenced.
Remarks:	While closing a tank, an unknown tank was discovered and it leaked 10-20 gallons to soil after being tipped. Clean up is in progress.

Site Description: Location: The Former Melrose Avenue Dry Cleaner site is located in an urban area at 753 Melrose Avenue in the Melrose section of the Bronx and consists of a 0.066-acre parcel denoted as Block 2403, Lot 31 on the New York City tax map. The site is located on the west side of Melrose Avenue between East 156th and East 157th Streets. Site Features: The site is a vacant lot covered with crushed stone and is surrounded with a chain-link fence. The site is bordered to the north by a community garden, to the east by Melrose Avenue, to the south by a six-story apartment building, and to the west by the Public School (P.S.) 29 Ballfield. Current Zoning and Land Use: The site is zoned R6 for residential use. There are no buildings on the site, and the property is not currently in use. Past Use of the Site: Records show the site was utilized as a store and dwelling as early as 1909. Circa 1946, the site was developed with a single structure. The site was occupied by a dry cleaner during the 1950s, with storage tanks at the rear of the building. The site structure was demolished in 1968 and the site has been vacant/abandoned ever since. Use of the site as a dry cleaner has resulted in contaminated groundwater and soil vapor at the site and down gradient of the site to the south. Site Geology and Hydrogeology: The site is underlain by a fill unit extending 5 to 7 feet below ground surface (bgs), a native fine-medium sand unit with some silt present at depths of 5 to 28 feet bgs, and bedrock (Inwood marble) present at depths 11 to 28 feet below grade. Groundwater is approximately 16 to 19 feet bgs in the vicinity of the site. In some areas, the groundwater is below the surface of bedrock. Groundwater on-site flows southeast towards Melrose Avenue, and then to the south towards the East River (approximately 7,000 feet south of the site) along a former stream bed.
Env Problem: Soil and groundwater samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), pesticides, and metals. Groundwater samples were also analyzed for emerging contaminants. Soil vapor samples were analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for the site include VOCs in groundwater and soil vapor. Soil: Soil samples were collected from various depths throughout the site. Soil sampling analytical results did not indicate detection of any contaminants above residential soil cleanup objectives in any of the soil samples. There were no detections of SVOCs and PCBs above unrestricted use soil cleanup objectives (UUSCOs). One metal and one pesticide were detected above their respective UUSCOs in site soils. Copper was detected at a maximum concentration of 60 parts per million (ppm), exceeding the UUSCO of 50 ppm. 4-4'-DDT, was detected at a maximum concentration of 0.0088 ppm, exceeding the UUSCO of 0.0033 ppm. The VOC tetrachloroethene (PCE) was detected at a maximum concentration of 0.16 ppm, below the UUSCO of 1.3 ppm. No other VOCs were detected in the soil samples collected from on-site soil borings. Data does not indicate any off-site impacts in soil related to this site.
Groundwater: There were no detections of SVOCs, PCBs or pesticides above Technical Operation and Guidance Series Ambient Water Quality Standards (AWQS) in on-site or off-site groundwater. VOCs were detected in on-site groundwater at concentrations below AWQS and off-site groundwater at concentration above AWQS. VOCs detected at concentrations exceeding the AWQS in off-site groundwater include acetone at a maximum concentration of 390 parts per billion, or ppb

FORMER MELROSE AVENUE DRY CLEANER (Continued) **S113916992**

(AWQS is 50 ppb), chloroform at a maximum concentration of 8.4 ppb (AWQS is 7 ppb), cis-1,2-dichloroethylene at a maximum concentration of 45 ppb (AWQS 5 ppb), tetrachloroethylene (PCE) at a maximum concentration of 660 ppb (AWQS 5 ppb), and trichloroethylene (TCE) at a maximum concentration of 6.4 ppb (AWQS 5 ppb). VOC exceedances of AWQS extend off-site approximately 700 feet to the south of the site. Metals were detected in on-site groundwater at concentrations below AWQS and off-site groundwater at concentration above AWQS. Metals that were detected in off-site groundwater samples at concentrations exceeding AWQS included iron at a maximum concentration of 7.1 ppb (AWQS 0.3 ppb), magnesium at a maximum concentration of 120 ppb (AWQS 35 ppb), manganese at a maximum concentration of 5.6 ppb (AWQS 0.3 ppb), and sodium at a maximum concentration of 240 ppb (AWQS 20 ppb). The metals observed above AWQS in groundwater are commonly associated with naturally occurring phenomenon. PFAS compounds were detected in on-site groundwater at concentrations below their maximum contaminant level, or MCL (water quality standard), and in off-site groundwater at concentration above their maximum contaminant level. The PFAS perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were detected in off-site groundwater samples at concentrations exceeding their MCL of 10 ppt each at maximum concentrations of 23 and 24 ppt, respectively. Data does indicate off-site impacts in groundwater related to this site. Soil Vapor, Sub-Slab Soil Vapor and Indoor Air: Soil vapor samples were collected at off-site locations near properties underlain by PCE contamination in groundwater. 1,1,1-TCA was detected at a maximum concentration of 10 micrograms per cubic meter (ug/m3), PCE was detected at a maximum concentration of 840 ug/m3, TCE was detected at a maximum concentration of 14 ug/m3, and carbon tetrachloride was detected at a maximum concentration of 1.6 ug/m3. PCE detections in soil vapor extend approximately 700 feet to the south and southeast of the site. An off-site soil vapor intrusion investigation was performed in March of 2017. Sub-slab soil vapor and indoor air samples were taken in off-site structures where access was granted to determine if soil vapor intrusion exposures were present. Sub-slab soil vapor and indoor air concentrations for PCE at the NYPD Police Service Area (PSA) 7 to the south of the site indicated soil vapor intrusion mitigation was necessary. A sub-slab depressurization system (SSDS) was installed at the NYPD PSA 7 building in 2019 to mitigate soil vapor intrusion. No actions were needed to address soil vapor intrusion at the other structures sampled. Significant Threat: The site was determined to pose a significant environmental threat on November 19, 2013. This determination was based on the property's past use as a dry cleaner, which contaminated groundwater beneath the site and down gradient of the site with PCE. The site was also determined to be a significant threat to public health due to the concentrations of PCE detected in on-site and off-site groundwater and soil vapor, in conjunction with the proximity of these concentrations to occupied structures.

Health Problem: People will not come in contact with site contamination in soil because on-site soil is not contaminated. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of

FORMER MELROSE AVENUE DRY CLEANER (Continued) **S113916992**

buildings, is referred to as soil vapor intrusion. Because there is no on-site building, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a concern for the site in its current condition. However, the potential exists for the inhalation of site contaminants due to soil vapor intrusion for any future on-site development. A subslab depressurization system has been installed at an off-site building to prevent the indoor air quality from being affected by the contamination in soil vapor beneath the building. Soil vapor intrusion evaluations with actions taken as needed to address exposures are recommended for other off-site buildings, including those buildings where testing has previously been declined by owners or whose owners did not respond to sampling requests.

HW Code: C203142
SWIS: 0301
Town: New York City
Record Added Date: 09/02/2020
Record Updated Date: 05/29/2021
Update By: JHOCONNE
Site Description: Site Location: The site is located at 580 Gerard Avenue, Bronx, New York 10451. The site is located in a mixed industrial, commercial and residential neighborhood. There are several BCP sites Gerard Avenue in close proximity to this Site. Site Features: The site is currently occupied by a vacant single-story approximately 31,000 sq. ft which served as a U.S. Postal Service vehicle maintenance garage building. The site is not located in a flood zone. The closest waterbody is the Harlem River, which is located about 0.21 miles away (about 1,120 feet). Current Zoning and Land Use: The site is currently located in an R7A District with a C2-4 Commercial Overlay District. The surrounding properties include, to the north, a single-story warehouse/garage building; to the west (across Gerard Avenue), a two-story mixed-use building used as a storage facility and its associated parking lot; to the south (across 150th Street), a single-story warehouse/garage building; and to the east, a small garage and residential buildings. Past Use of the Site: From 1908 until on or about 1950 the site was vacant until the current on-site building was constructed circa 1950 for use as a vehicle maintenance and storage facility for the U.S. Post Office. The Post Office was the tenant from 1950 until circa 2000. From circa 2001 through 2007, the building was utilized for automotive service, vehicle repair and parking. After 2007, the project site was occupied by a construction company for general office use and storage, but as of 2011, the building was vacant. The Site was listed in the New York State Department of Environmental Conservation Petroleum Bulk Storage (PBS) database under Facility Identification Numbers 2-333212 and 2-476021 and the Spills database under Spill Incident Numbers 9213223 and 9007668. In addition, the Post Office was a listed RCRA facility at this Site under RCRA Facility ID NY5180010451 large quantity generator. The Post Office, was listed as a small quantity generator under RCRA Facility ID NYD982727885 at this Site from 1992 until 2009, even though the Post Office vacated in about 2000-2001. Finally, a tenant named Autorama Enterprises of Bronx, using the 610 Gerard Avenue address, was listed as a RCRA Facility at the Site under ID NYR000100255. There following spill numbers are associated with this Site: Closed Spill Incident Number 9007668 This spill pertains to a tank test failure of a 3,000-gallon fuel oil tank that occurred on October 13, 1990. There is a note in the spill file that groundwater was impacted. See Exhibit M including spill file record. Closed Spill Incident Number 9213223 This spill incident is related to gasoline found during the excavation of gasoline tanks that occurred on February 27, 1993. This spill incident indicates that nine 550-gallon gasoline USTs were removed in 1993. Concurrently, 22 tons of contaminated soil had also been reportedly excavated and removed. Allegedly, the subsurface investigation showed no visual or olfactory evidence of contamination. Soil analysis showed non-detect for VOCs and PAH levels were consistent with obvious fill material. However, groundwater analysis showed non-detect/trace PAHs and VOCs. This spill incident was closed on May 11, 2001. Closed Spill Incident Number 1205845 This spill occurred when it was reported that approximately two gallons of heating oil residual/staining was noted

US POSTAL SERVICE - VMF (Continued) **1000349040**

	next to the fill port area on the east side of the building. Site Geology and Hydrogeology: The general elevation for the area where the site is located is between approximately 20-30 feet above mean sea-level. The groundwater flow direction was presumed to be the southerly direction toward the Harlem River. The soil composition in the eight (8) subsurface soil borings was similar in nature, with predominantly fine to medium-grained sand and fill material along with some silt found to exist from the surface to terminus of the borings. Groundwater was encountered in two (2) borings at approximately 23 feet below land surface (bls).
Env Problem:	Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
Health Problem:	Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/22/2024

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/25/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/05/2024

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.
Daycare Centers: Day Care Providers

UTM Y (Meters):	4520646.5
Elevation:	39 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14115942 CENTRAL PARK, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

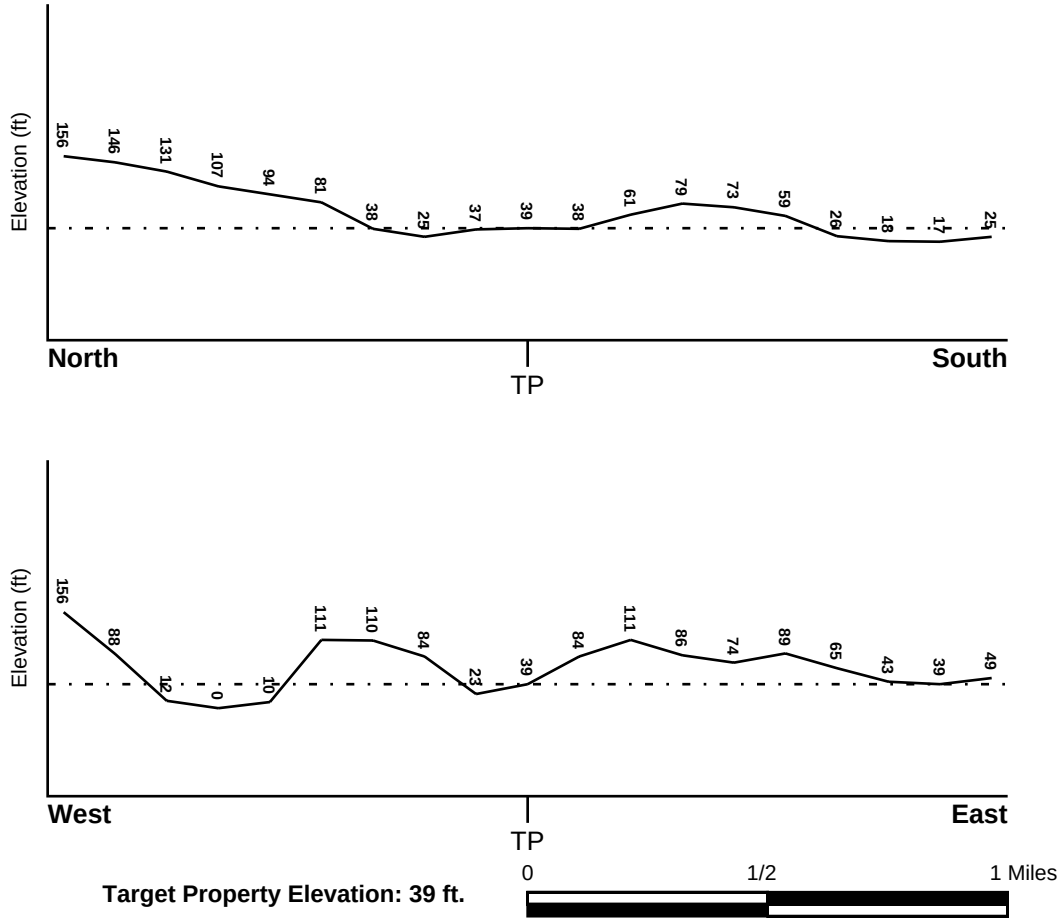
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 39 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970083F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
3604970081F	FEMA FIRM Flood data
3604970084F	FEMA FIRM Flood data
3604970079F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS
RADON

AREA RADON INFORMATION

Federal EPA Radon Zone for BRONX County: 3

Note: Zone 1 indoor average level > 4 pCi/L.
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.
: Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for BRONX COUNTY, NY

Number of sites tested: 31

Area	Average Activity	% <4 pCi/L	% 4-20 pCi/L	% >20 pCi/L
Living Area	0.670 pCi/L	96%	4%	0%
Basement	1.110 pCi/L	42%	58%	0%

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SESI Consulting Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by SESI Consulting Engineers were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# NA
Project: 13740

Coordinates:

Latitude:	40.833722 40° 50' 1" North
Longitude:	-73.922135 -73° 55' 20" West
UTM Zone:	Zone 18 North
UTM X Meters:	590878.31
UTM Y Meters:	4520857.86
Elevation:	38.74' above sea level

Maps Provided:

2019	1900
2016	1898
2013	1897
1997	
1979

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

As required in 40 CFR 312.21(d), this section includes statements made by the environmental professional conducting this assessment.

“I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.”

“I declare that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.”

“I have developed and performed the ‘all appropriate inquiry’ in conformance with the standards, limitations, and practices set forth in 40 CFR Part 312.”

This Report incorporates the consultant's best professional judgment in conductance of this Phase I Environmental Site Assessment.

VOC	Volatile Organic Compound

1.0 INTRODUCTION

SESI Consulting Engineers (SESI) conducted this limited Phase II Environmental Site Assessment (Phase II ESA) on behalf of River Avenue BC LLC for the property located at 1140 River Avenue, Bronx, New York (herein referred to as the "Subject Property" or "Site"). The Subject Property is identified on local tax maps as Block 2487, Lot 38. A Site Location Map is presented as **Figure 1.1**. A Tax Map is presented as **Figure 1.2**.

The Subject Property is composed of an approximately 0.39-acre lot that has been developed with a paved parking lot. A Subject Property Plan is presented as **Figure 1.3**.

This Phase II Site investigation report complies with the 2019 American Society for Testing and Materials Standard (ASTM E1903-19) and the New York State Department of Environmental Conservation ("NYSDEC") Guidance Document for Site Investigations DER-10.

1.1. SITE SETTING

The Subject Property is currently developed with an at-grade parking lot and courtyard associated with the adjacent residential building to the east. The Site is bound by McClellan Street to the north and River Avenue to the west. The Subject Property historically contained auto repair garages (circa 1954-1984).

Topographically, the project area generally slopes downward to the south/southeast with an approximate elevation of 38.74 feet above msl. The street grade along River Avenue slopes from 34 to 39 feet above msl (from south to north) and from 39 to 43 feet above msl (from west to east). The at-grade parking lot surface grades vary from 34 to 41 feet above msl (west to east).

The Site is situated within a mixed-use residential and commercial area. Adjacent properties are summarized in **Table 1.1** below.

Table 1.1: Summary of Surrounding Properties

Direction	**Adjacent Property**
North	Apartments and Parking
South	Apartments

Direction	Adjacent Property
East	Apartments
West	Parks and Recreation

Based on drawings provided by the project team, the proposed development consists of constructing a 20-story building with one below-grade level.

1.2. SITE HISTORY

A summary of Site history is provided in **Table 1.2** below:

Table 1.2: Summary of Site History

Year developed	Operation
Appx. 1954	~1924 to ~1954: Cleared/vacant ~1954 to ~1991: Auto Repair garages ~1991 to present: Paved/vacant

Based on the information above, various operations at the Site have likely involved the use of hazardous materials and petroleum products, which could include but are not limited to fuel storage and dispensing, vehicle maintenance and repair, and solvent use for cleaning.

1.3. CONTAMINANTS OF CONCERN

Based on the historical operations at the Site, a list of contaminants of concern is summarized below:

Table 1.3: Summary of Contaminants of Concern

Contaminants	Associated Activities
PAHs	Used motor oil and lubricants, fuel handling and storage, historic fill
Metals	Used motor oil, coolants, paints and primers, historic fill
Chlorinated Solvents	Parts cleaning and degreasing
Petroleum Products	Engine oil, lubricants, transmission fluids

1.4. PREVIOUS ENVIRONMENTAL INVESTIGATIONS AND REMEDIATIONS

In November 2024, SESI performed a Phase I ESA which identified three Recognized Environmental Concerns (RECs) in connection with the Subject Property:

- **REC 1 – Known Subject Property Contamination:** An environmental Phase II investigation was completed by SESI in 2024. Pesticides, metals and SVOCs were found above NYSDEC soil cleanup objectives in soil. Additionally, VOC, SVOC, pesticides, PAHs, metals and PFAS were found above NYSDEC groundwater quality standards in groundwater. Finally, elevated benzene was detected in soil vapor. **Therefore, further investigation/remediation is warranted.**
- **REC 2 – Subject Property Historic Fill:** SESI identified historic fill throughout the subject property up to 10 feet during the 2024 Phase II investigation. Furthermore, the 1947 and 1956 topographic maps indicate historic fill due to the changes in contour lines. **Therefore, further investigation/remediation is warranted.**
- **REC 3 – Historic Subject Property Operations:** The Sanborn fire insurance maps indicated auto repair garages (circa 1969-1981) at the west on the subject property. Additionally, the aerial photographs indicated car garages (1954-1984). **Therefore, further investigation/remediation is warranted.**

Based on the operation history of the site, various operations at the Site have likely involved the use of hazardous materials and petroleum products, which could include but are not limited to fuel storage and dispensing, vehicle maintenance and repair, and solvent use for cleaning. Therefore, further investigation of the Site was warranted.

A copy of the Phase I ESA report prepared by SESI is included in Appendix C.

2.0 SUBSURFACE INVESTIGATION

SESI conducted a Phase II ESA to investigate potential environmental impacts at the Site. The project included the installation of soil borings and soil sampling, installation of temporary groundwater monitoring wells and collection of groundwater samples, and installation and sampling of soil vapor points. The fieldwork was conducted on August 12 and 13, 2024 and September 16, 2024.

In addition, a geotechnical investigation was conducted by Bilow Engineering LLC. A total of nine (9) geotechnical borings were installed between September 30 and October 4, 2024, which provided supplemental information regarding the lithology of the Site.

A copy of the Geotechnical Engineering report prepared by Bilow Engineering, LLC is included in **Appendix C.**

2.1. UTILITY CLEARANCE AND GEOPHYSICAL SURVEY

Prior to subsurface drilling, SESI's drilling contractor, PG Environmental Services, Inc., contacted New York's utility mark-out system. Additionally, SESI retained PG Environmental Services, Inc. to locate underground utilities not covered by the one-call system and to conduct a geophysical survey at the Site using ground-penetrating radar (GPR) and electromagnetic (EM) detection. The GPR/EM survey was performed to clear soil boring locations.

2.2. PHASE II ESA FIELD ACTIVITIES

Forty-one (41) direct push borings were advanced using a Geoprobe on the Site. Boring locations were distributed throughout the footprint of the Site and targeted to areas of suspected impacts.

A total of 41 soil samples, two (2) groundwater samples, and three (3) soil vapor samples were collected and analyzed at Pace Analytical, a laboratory certified under the New York State Department of Health (NYSDOH) Environmental Laboratory Accreditation Program (ELAP). The boring and sampling locations are shown in **Figure 2.1**, and a sample summary table is provided as **Table 2.1**.

The soil cores were screened using a photoionization detector (PID), and visual and olfactory evidence of contamination. The soil samples were collected from each boring from the interval that exhibited the greatest evidence of impacts based on field screening or based upon professional judgment if no impacts were observed. All soil samples were named based on their respective soil boring number and specified depth. PID readings and detailed soil descriptions are provided in the boring logs presented in **Appendix A**.

Groundwater samples TW-1 and TW-2 were cored into the underlying bedrock and were distributed throughout the footprint of the Site and targeted to areas of suspected impacts. Each temporary well was constructed with a 1-inch casing and a screen up to 10 feet installed to the bottom of the borings. All temporary wells were sampled using the volume-averaged purging and sampling (VAPS) method.

Three (3) soil vapor samples were installed to 5 feet below ground surface and were distributed throughout the footprint of the Site and targeted to areas of suspected impacts. Helium tests were conducted prior to sampling to confirm the integrity of the enclosure and ensure there were no leaks. Soil vapor samples were collected using 6-liter Summa canisters with a 2-hour collection period. All sampling was performed in accordance with the *NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York* (October 2006).

Soil samples SB-01 through SB-15 and groundwater samples were analyzed for Target Compound List (TCL)/Target Analyte List (TAL) +30 list including volatile organic compounds (VOCs) by EPA Method 8260, semi-VOCs (SVOCs) by EPA Method 8270, TAL metals, PCBs by EPA Method 8082A, pesticides by EPA Method 8081, in addition to cyanide. Additionally, soil samples SB-01 and SB-07 were analyzed for per and polyfluoroalkyl substances (PFAS) by EPA Method 1633. Soil samples SB-101 through SB-125 were analyzed for select TCL+30/TAL parameters as shown in **Table 2.1** below. Groundwater samples collected at TW-1 and TW-2 were analyzed for TCL/TAL+30 parameters with 1,4-Dioxane and PFAS. Soil vapor samples were analyzed for VOCs in accordance with EPA Method TO-15.

Table 2.1: Summary of Sample Collection

Soil Samples					
Soil Samples	Type	Terminal Depth (ft)	Sample Depth (ft)	Date	Analysis
SB-01	Soil Boring	8	1-1.5	8/12/2024	TCL+30/TAL and PFAS

3.0 PHASE II ESA FINDINGS

3.1. GEOLOGY AND HYDROGEOLOGY

The Geotechnical Engineering report prepared by Bilow Engineering, LLC, dated December 2, 2024, provided supplemental information regarding the lithology of the Site. A total of nine (9) geotechnical borings were installed between September 30 and October 4, 2024. The investigation data indicates the subsurface conditions at the site generally consist of surficial materials, underlain by uncontrolled fill, underlain by sand, underlain by decomposed rock, and underlain further by competent bedrock.

The report states surface materials consisted of asphalt, concrete and sub-base granular materials measured up to six (6) inches.

The report indicates the uncontrolled fill was encountered directly under the surface materials layer and extended to up to +-8 feet below existing grades. The uncontrolled fill generally consisted of sand with varying amounts of silt, gravel, brick, and asphalt. The fill is considered loose to dense.

The report indicates the sand layer was encountered directly below the fill layer and ranged between 5 to 15 feet in thickness. The sand was generally brown, medium-to-fine-grained, with varying amounts of silt. The sand is considered loose, medium-dense, and dense.

The report states weathered/decomposed rock material was encountered in all boring locations directly below the sand layer and continued to the top of the competent bedrock layer. The decomposed rock layer ranged between 5 to 15 feet in thickness and was generally gray and brown mica schist with varying amounts of sand and silt.

According to the report, bedrock was encountered in all boring locations directly below the decomposed rock layer and generally consisted of moderately to slightly weathered, gray mica schist. The top of the bedrock varied from 3 to 30 feet below the site slab. Lenses of decomposed rock were observed within the bedrock layer. Rock core recovery ranged from approximately 55 to 100 percent, with a Rock Quality Designation (RQD) ranging from approximately 35 to 67

percent. The upper portions of the bedrock are generally more weathered and RQD generally increases with depth.

The report states groundwater was not encountered until the boring drilling depths in bedrock and assumes that based on the experience in similar geological conditions, groundwater is expected to be perched on top of the bedrock during rainfall events. SESI's groundwater investigation conducted on August 13, 2024, set two (2) temporary monitoring wells to approximately 28 feet and 33 feet below ground surface, respectively. Bedrock was generally encountered at 10-15 feet, and groundwater was encountered in both borings at 23-26 feet. Each temporary well was constructed with a screen up to 10 feet installed to the bottom of the borings.

A copy of the Geotechnical Engineering report prepared by Bilow Engineering, LLC is included in **Appendix C.**

3.2. SOIL INVESTIGATION RESULTS

A table of the soil analytical results exceeding the NYSDEC Protection of Groundwater Soil Cleanup Objectives (POTGW SCO), Unrestricted Use Soil Cleanup Objectives (USCOs), Residential Soil Cleanup Objectives (RSCOs), Restricted Residential Soil Cleanup Objectives (RRSCOs), and the NYSDEC Soil Screening Levels for emerging contaminants (NYSDEC Guidelines for Sampling and Analysis of PFAS Under NYSDEC's Part 375 Remedial Programs) is presented on **Table 3.1** and on **Figure 3.1**. The laboratory analytical data is provided in **Appendix B.**

As presented on **Table 3.1** below, pesticides, PAHs, and metals were detected at the Site at concentrations exceeding POTGW SCOs, USCOs, RSCOs, and/or RRSCOs.

4,4'-DDE, 4,4'-DDD, arsenic, copper, lead, mercury, nickel, and zinc were detected at concentrations exceeding the USCOs.

Benzo(k)fluoranthene and chrysene were detected at concentrations exceeding their respective RSCOs.

Benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, chrysene, dibenzo(a,h)anthracene, indeno(1,2,3-cd)pyrene, arsenic, copper, and lead were detected at concentrations exceeding the RRSCOs.

Additionally, benzo(a)anthracene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, arsenic, and lead were detected at concentrations exceeding the POTGW SCOs.

In summary, while soil contamination from historic fill is widespread, elevated PAH and metal concentrations were observed at levels exceeding the RRSCOs, likely attributable to past Site operations. Additionally, pesticide-impacted soil was identified at SB-03 where 4,4'-DDE and 4,4'-DDD were detected at concentrations exceeding USCOs.

Interpretation of the data and recommendations are discussed in **Section 4.0**.

3.3. GROUNDWATER INVESTIGATION RESULTS

A table of the analytical results exceeding the NYSDEC Technical and Operational Guidance Series 1.1.1 (TOGS) Class GA Ambient Water Quality Standards and Guidance Values (AWQS) is presented on **Table 3.2** and on **Figure 3.2**. The laboratory analytical report is provided in **Appendix B**.

As presented on **Table 3.2** below, pesticides, Perfluorinated Compounds (PFOA & PFOS), phenol, PAHs, select metals, and chloroform, a VOC, at concentrations exceeding AWQSs.

Please note that these samples were unfiltered and collected from temporary wells, and, additionally, samples were collected using VAPS, which may have resulted in metal concentrations being skewed higher due to the presence of sediment.

Interpretations of the data and recommendations are discussed in **Section 4.0**.

ug/l = Micrograms per liter.

3.4. SUB-SLAB/SOIL VAPOR INVESTIGATION RESULTS

Three (3) soil vapor samples were collected and analyzed for VOCs in accordance with EPA Method TO-15. A summary of the soil vapor exceedances is presented on **Table 3.3** and on **Figure 3.3**. The laboratory analytical report is provided in **Appendix B**.

The concentrations were compared against the NYSDEC Matrices A-F Sub-slab Vapor Concentrations Criteria (NY-SSC). No VOC exceedances were identified in SV-1 and SV-2. However, in SV-3, benzene was detected at concentrations exceeding the NY-SSC but below 10x of NYSSC, . which indicates the past use and release of petroleum products at the Site.

Interpretations of the data and recommendations are discussed in **Section 4.0**.

Benzene	60	ug/m3	10.9	9.01	**495**

ug/m3 = Micrograms per cubic meter.
Concentration Exceeds SSC-A-F

4.0 CONCLUSIONS AND RECOMMENDATIONS

The exceedances in soil, groundwater, and soil vapor identified during the investigation are likely attributable to historic fill as well as historic on-site operations.

4.1. SOIL

Analytical results from the soil investigation identified pesticides, PAHs, and metals at concentrations exceeding POTGW SCOs, USCOs, RSCOs, and/or RRSCOs.

Pesticides

Pesticides 4,4'-DDE and 4,4'-DDD were identified in soil sample SB-03 at levels exceeding the USCO. The elevated pesticide exceedances suggest contamination resulted from historic fill.

PAHs

PAH-contaminated soil was identified throughout the Subject Property (SB-01, SB-03, SB-111, SB-114, SB-115, SB-116, SB-120, and SB-122) at levels exceeding the POTGW SCOs, USCOs, RSCOs, and/or RRSCOs.

While PAHs are commonly associated with historic fill, the elevated levels in these areas are likely due to releases occurring during transportation, staging, and handling of PAH-containing materials such as petroleum products during past Site operations.

Metals

Metal exceedances to USCO were widespread throughout the Subject Property. Exceedances to RRSCO were identified in soil samples SB-111, SB-113, SB-114, SB-116, SB-119, and SB-121. Arsenic, copper, and lead were detected at levels exceeding RRSCOs. Arsenic and lead were detected at levels exceeding POTGW SCOs.

The elevated metal exceedances suggest contamination resulted from historic site operations.

In conclusion, further investigation and remediation is recommended for soil prior to Site development.

4.2. GROUNDWATER

Analytical results from the groundwater investigation identified pesticides, Perfluorinated Compounds (PFOA & PFOS), phenol, PAHs, select metals, and chloroform, a VOC, at concentrations exceeding AWQSs.

Pesticides

The pesticide dieldrin was identified in groundwater sample TW-1 at a concentration exceeding the AWQS. The elevated pesticide exceedance suggests contamination resulting from historic fill.

PFAS

PFOA and PFOS exceedances were identified in both groundwater samples. The PFAS levels at the Site are typical of urban areas and are not indicative of an on-site source.

SVOCs

The SVOC phenol was identified in groundwater sample TW-1 at a concentration exceeding the AWQS.

PAH-contaminated groundwater was identified in groundwater sample TW-2 at concentrations exceeding the AWQS. The SVOC contamination is likely attributable to releases from historic Site operations.

Metals

Select metals—including iron, magnesium, and sodium—were detected in both groundwater samples at concentrations exceeding the AWQS. The samples are unfiltered and collected from temporary wells using VAPS, which may have resulted in metal concentrations being skewed higher due to the presence of sediment. The concentrations in groundwater may also be indicative of historic releases during historic Site operations.

VOCs

Chloroform was detected in both groundwater samples at concentrations exceeding the AWQS. Chloroform is a typical disinfection byproduct. It could also attributable to releases from historic site operations.

In conclusion, further investigation and remediation is recommended for groundwater.

4.3. SOIL VAPOR

No VOC exceedances were identified in SV-1 and SV-2. However, in SV-3, benzene was detected at a concentration exceeding the NY-SSC.

The presence of elevated levels of benzene indicates past use and release of petroleum products at the Site, which requires further investigation.

In conclusion, the vapor intrusion pathway should be further evaluated for the new development to determine whether a vapor mitigation system is necessary.

4.4. SUMMARY

Impacts to soil, groundwater, and soil vapor have been identified on the Site, with exceedances most likely resulting from a combination of historic site operations.

Further investigation and remediation are warranted.

NOTES:
1. Results are measured in mg/kg.
2. Results are compared to NYSDEC USCOs, NYSDEC RSCO and NYSDEC RRSCOs.

= concentration exceeds USCO
= concentration exceeds RSCO
= concentration exceeds RRSCO
= concentration exceeds RES3GW

ABBREVIATIONS
NYSDEC = New York State Department of Environmental Conservation.
USCO = NYSDEC Unrestricted Use Soil Cleanup Objectives (6 NYCRR 375-6.12(16).
RSCO = NYSDEC Residential Soil Cleanup Objectives
RRSCO = NYSDEC Restricted Use Soil Cleanup Objectives w/ CP-51 (1/ 10) (6 NYCRR 375-6.12(16).
mg/kg = Milligrams per kilogram.
Sample Depth is reported in feet below ground surface.
E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
I - The lower value for the two columns has been reported due to obvious interference.
P - The RPD between the results for the two columns exceeds the method-specified criteria.

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments and solids are reported on a dry weight basis unless otherwise noted. Tissues are reported "as received" or on a wet weight basis, unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Name:	RIVER AVE BRONX, NY	**Lab Number:**	L2445515
Project Number:	13740:2	**Report Date:**	08/26/24

Case Narrative (continued)

Report Submission

August 26, 2024: This final report includes the results of all requested analyses.

August 19, 2024: This is a preliminary report.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Semivolatile Organics

The WG1959908-2 LCS recovery, associated with L2445515-01 through -12, is below the acceptance criteria for 4,6-dinitro-o-cresol (5%); however, it has been identified as a "difficult" analyte. The results of the associated samples are reported.

Total Metals

L2445515-01 through -12: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by the sample matrix.

The WG1958663-3 MS recoveries for aluminum (0%), calcium (715%), iron (0%), magnesium (274%), and manganese (0%), performed on L2445515-01, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG1958663-3 MS recoveries, performed on L2445515-01, are outside the acceptance criteria for antimony (69%), chromium (60%), potassium (62%), and zinc (56%). A post digestion spike was performed and yielded unacceptable recoveries for antimony (128%), chromium (138%), potassium (155%), and zinc (136%). The serial dilution recovery was not applicable; therefore, these elements fail the matrix test and the result reported in the native sample should be considered estimated.

The WG1958663-4 Laboratory Duplicate RPDs for aluminum (35%), arsenic (22%), barium (34%), calcium (109%), chromium (43%), cobalt (45%), copper (47%), iron (34%), magnesium (95%), nickel (48%), potassium (32%), vanadium (39%), and zinc (46%), performed on L2445515-01, are outside the acceptance criteria. The elevated RPDs have been attributed to the non-homogeneous nature of the native sample.

Project Name:	RIVER AVE BRONX, NY	**Lab Number:**	L2445515
Project Number:	13740:2	**Report Date:**	08/26/24

Case Narrative (continued)

Cyanide, Total

The WG1959165-2 LCS recovery for cyanide, total (78%), associated with L2445515-01 through -12, is outside our in-house acceptance criteria, but within the vendor-certified acceptance limits. The results of the original analyses are reported.

The WG1959165-4 MS recovery, performed on L2445515-01, is outside the acceptance criteria for cyanide, total (60%); however, the associated LCS recovery is within criteria. No further action was taken.

The WG1959165-4/-5 MS/MSD RPD for cyanide, total (59%), performed on L2445515-01, is above the acceptance criteria.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	RIVER AVE BRONX, NY	**Lab Number:**	L2445515
Project Number:	13740:2	**Report Date:**	08/26/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	RIVER AVE BRONX, NY	**Lab Number:**	L2445515
Project Number:	13740:2	**Report Date:**	08/26/24

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water
EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B, SM4500NO2-B**
EPA 524.2: THMs and VOCs; **EPA 504.1:** EDB, DBCP.

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments and solids are reported on a dry weight basis unless otherwise noted. Tissues are reported "as received" or on a wet weight basis, unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Name:	RIVER AVE BRONX, NY	**Lab Number:**	L2445869
Project Number:	13740:2	**Report Date:**	08/27/24

Case Narrative (continued)

Report Submission

August 27, 2024: This final report includes the results of all requested analyses.

August 20, 2024: This is a preliminary report.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt

L2445869-02: Sample containers for PFAAs via EPA 1633 were received, but not listed on the chain of custody. At the client's request, the analysis was performed.

Semivolatile Organics

The WG1960416-3 LCSD recovery, associated with L2445869-05 and -06, is below the acceptance criteria for benzoic acid (0%); however, it has been identified as a "difficult" analyte. The results of the associated samples are reported.

The WG1960612-2/-3 LCS/LCSD recoveries, associated with L2445869-01 through -03, are below the acceptance criteria for 2,4-dinitrophenol (LCSD 1%), 4,6-dinitro-o-cresol (7%/3%), and benzoic acid (LCSD 8%); however, they have been identified as "difficult" analytes. The results of the associated samples are reported.

Total Metals

L2445869-01 through -03: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by the sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Melissa Sturgis Melissa Sturgis
