Name, Description and Location of Proposal:

Webster Avenue Rezoning

The Positive Declaration has been revised for the above-referenced project due to the following changes to the Environmental Assessment Statement and Draft Scope of Work.

The Draft Scope of Work and Environmental Assessment Statement have been revised to incorporate these changes to the proposed action:

- the proposed action was revised to rezone areas along narrow streets in Bedford Park and Norwood to R7B, instead of R7A;
- the proposed action was revised to rezone part of one block on Marion Avenue and 195th Street to R7B instead of R5B; and
- the proposed action was revised to rezone part of one block on Hull Avenue between 204th and 205th streets and part of another block at Bainbridge and 198th Street, to R7B instead of R5A.

Additionally, the Draft Scope of Work and Environmental Assessment Statement have further been revised:

- to include updated analyses per the recently revised CEQR Technical Manual;
- to indicate that a small portion of the proposed rezoning area is located in Community District 12; and
- to indicate that a blockfront along Webster Avenue currently zoned R8/C2-3 would be rezoned to R8/C2-4.

DCP is proposing zoning map and zoning text amendments affecting the Bedford Park and Norwood communities in the Bronx, Community Districts 7 and 12. The areas affected by the

Robert Dobruskin, AICP, *Director*

FAX (212) 720-3495
rdobrus@planning.nyc.gov

proposed action include all or portions of 80 blocks, generally bound by the Metro-North Railroad Harlem Line right-of-way to the southeast, Fordham Road and East Kingsbridge Road to the southwest, the Grand Concourse and Jerome Avenue to the northwest, and East Gun Hill Road to the northeast. Zoning mapping amendments are proposed along Webster Avenue between approximately Fordham Road and East 213th Street to permit contextual residential development and medium density commercial uses where current zoning is oriented to low-scale auto-related commercial uses.

A zoning text amendment is also proposed to establish the Inclusionary Housing program in proposed R7D and C4-5D districts within the proposed rezoning area. Neighborhood downzonings are proposed in the Bedford Park and Norwood neighborhoods to preserve the scale and context of those areas. The actions are as follows:

- Zoning map amendment to change portions of 18 blocks currently zoned C8-2, R7-1, R7-1/C1-3, and R7-1/C2-3 to R7D/C2-4, generally located along Webster Avenue, north of East 193rd Street and South of East 205th Street.
- Zoning map amendment to change a portion of one block currently zoned C8-2 to C4-5D, generally located along Webster Avenue, north of East 195th Street and south of Bedford Park Boulevard.
- Zoning map amendment to change portions of four blocks from C8-2 to C4-4 & R7B generally located along Webster Avenue, north of East 210th Street and south of East 213th Street.
- Zoning map amendment to change portions of 71 blocks from R7-1, R7-1/C1-3, R7-1/C2-3, R8, R8/C2-3, and C4-4 to contextual districts R4A, R5A, R5B, R5D/C1-4, R6B, R7B, R7B/C1-3, R7B/C2-4, R7A, R7A/C1-3, R7A/C1-4,R7A/C2-4, R8/C2-4 generally located northwest of Webster Avenue, north of Fordham Road, southeast of Valentine Avenue, east of Rochambeau Avenue, and south of East Gun Hill Road.
- Zoning text amendment to establish the Inclusionary Housing program in the R7D and C4-5D districts within the proposed rezoning area in Community District 7, the Bronx.

The proposed actions are intended to provide new opportunities for growth in an area well served by mass transit; encourage new housing production, including new affordable housing utilizing the Inclusionary Housing Program; and encourage new office and commercial space.

DCP analyzed 24 projected development sites and 25 potential development sites. It is expected the proposed actions would generate a net increase of 738 dwelling units, including 191 units of affordable housing; a net increase of 60,599 square- feet of commercial; and a net increase of 7,782 square-feet of community facility space. The analysis year is 2020.

In order to avoid any potential impacts related to hazardous materials, (E) designations for hazardous materials (E-249) would be placed on the following properties:

Block	**Lots**
3273	100, 105, 109, 114, 118, 122, 128
3276	1
3277	28, 36, 40, 41, 45

3278	31, 33
3279	50
3280	37, 39, 42, 45, 46, 48, 58, 61, 65, 67
3330	40, 50, 51, 52, 55, 57, 68
3331	57, 75, 80
3355	116
3356	200, 206, 214
3357	7, 12, 16, 18, 21, 23, 25, 28, 32, 33, 37, 52, 53, 54, 55
3360	33, 38, 44, 50, 62

The text of the (E) designation is as follows:

Due to the possible presence of hazardous materials on the aforementioned designated sites there is potential for contamination of the soil and groundwater. To determine if contamination exists and perform and appropriate remediation, the following tasks must be undertaken by the fee owners(s) of the lot restricted by this (E) designation prior to any demolition or disturbance of soil on the lot.

Task 1
The fee owner(s) of the lot(s) restricted by this (E) designation will be required to prepare a scope of work for any soil, gas, or groundwater sampling and testing needed to determine if contamination exists, the extent of the contamination, and to what extent remediation may be required. The scope of work will include all relevant supporting documentation, including site plans and sampling locations. This scope of work will be submitted to DEP for review and approval prior to implementation. It will be reviewed to ensure that an adequate number of samples will be collected and that appropriate parameters are selected for laboratory analysis.

No sampling program may begin until written approval of a work plan and sampling protocol is received from DEP. The number and location of sample sites should be selected to adequately characterize the type and extent of the contamination, and the condition of the remainder of the site. The characterization should be complete enough to determine what remediation strategy (if any) is necessary after review of the sampling data. Guidelines and criteria for choosing sampling sites and performing sampling will be provided by DEP upon request.

Task 2
A written report with findings and a summary of the data must be presented to DEP after completion of the testing phase and laboratory analysis for review and approval. After receiving such test results, a determination will be provided by DEP if the results indicate that remediation is necessary.

If DEP determines that no remediation is necessary, written notice shall be given by DEP.

If remediation is necessary according to test results, a proposed remediation plan must be submitted to DEP for review and approval. The fee owner(s) of the lot(s) restricted by this (E) designation must perform such remediation as determined necessary by DEP. After completing the remediation, the fee owner(s) of the lot restricted by this (E) designation should provide proof that the work has been satisfactorily completed.

A DEP-approved construction-related health and safety plan would be implemented during excavation and construction activities to protect workers and the community from potentially significant adverse impacts associated with contaminated soil and/or groundwater. This Plan would be submitted to DEP for review and approval prior to implementation.

With the implementation of the above (E) designation, no significant adverse impacts related to hazardous materials would occur.

In order to avoid any potential impacts related to air quality, (E) designations for stationary sources (E-249) would be placed on the following properties:

Air Quality (E) Designations for Development Sites – HVAC Restrictions

• Block 3273, Lots 105, 109 (Projected Development Site 2): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 28 feet for oil No.4/2 from the lot line facing Bedford Park Blvd for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3273, Lot 114 (Projected Development Site 3): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 22 feet for oil No.4/2 from the lot line facing Oliver Place and at least 20 feet from the lot line facing Bedford Park Blvd for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3278, Lot 88 (Projected Development Site 4): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 18 feet for oil No.4/2 from the lot line facing E 198 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3278, Lots 84, 85 (Projected Development Site 5): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil No.4/2 from the lot line facing E 197 Street for fuel oil and at least 23 feet from the lot line facing E 198 Street or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3278, Lots 80, 81, 82, 83 (Projected Development Site 6): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 22 feet for oil No.4/2 from the lot line facing E 197 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lots 52, 55 (Projected Development Site 8): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 24 feet for oil No.4/2 from the lot line facing E 201 Street and 24 feet from the lot line facing Bedford Park Blvd for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lots 45, 46, 48, 49 (Projected Development Site 9): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 28 feet for oil No.4/2 from the lot line facing Bedford Park Blvd for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3330, Lots 40, 42, 43 (Projected Development Site 10): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 18 feet for oil No.4/2 from the lot line facing E 203 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3330, Lots 50, 51 (Projected Development Site 11): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 11 feet for oil No.4/2 from the lot line facing E 202 Street and at least 18 feet from the lot line facing Metro-North Railroad for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3330, Lot 52 (Projected Development Site 12): Any new residential and/or commercial development on the above-referenced properties must ensure that the

heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil No.4/2 from the lot line facing E 202 Street for fuel oil and at least 13 feet from the lot line facing Metro-North Railroad or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3331, Lot 80 (Projected Development Site 14): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 22 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 15 feet from lot line facing Decatur Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 7 (Projected Development Site 17): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 26 feet for oil No.4/2 from the lot line facing E 205 Street and Webster Avenue for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 12 (Projected Development Site 18): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 20 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 25 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 16, 18, 21 (Projected Development Site 19): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 24 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 23 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lots 37, 52, 53, 54 (Projected Development Site 20): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 30 feet for oil No.4/2 from the lot line facing E 205 Street for fuel oil and or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 55 (Projected Development Site 21): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil

No.4/2 from the lot line facing E 204 Street for fuel oil and or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3360, Lot 50 (Projected Development Site 22): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 12 feet for oil No.4/2 from the lot line facing E Gun Hill Road for fuel oil and or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3356, Lot 214 (Projected Development Site 23): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 20 feet for oil No.4/2 from the lot line facing Decatur Avenue for fuel oil and or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3277, Lots 41, 45 (Potential Development Site 102): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 25 feet for oil No.4/2 from the lot line facing E 195 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3277, Lots 36, 40 (Potential Development Site 103): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 24 feet for oil No.4/2 from the lot line facing E 194 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3278, Lot 31 (Potential Development Site 106): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 16 feet for oil No.4/2 from the lot line facing Webster Avenue for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lots 65, 67 (Potential Development Site 108): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 20 feet for oil No.4/2 from the lot line facing E 201 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lots 58, 61 (Potential Development Site 109): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 23 feet for oil No.4/2 from the lot line facing E 201 Street for fuel oil and at least 26 feet from the lot line facing Bedford Park Blvd or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lot 42 (Potential Development Site 110): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil No.4/2 from the lot line facing Bedford Park Blvd for fuel oil and at least 12 feet from the lot line facing E 201 Street or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3330, Lots 55, 57 (Potential Development Site 115): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 29 feet for oil No.4/2 from the lot line facing E 202 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 23 (Potential Development Site 116): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 15 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 18 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 25 (Potential Development Site 117): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 19 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 22 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 28 (Potential Development Site 118): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 27 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 26 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lots 32, 33 (Potential Development Site 119): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3356, Lot 206 (Potential Development Site 122): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 16 feet for oil No.4/2 from the lot line facing E Gun Hill Road for fuel oil and at least 16 feet from the lot line facing E 211 Street or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3273 Lot 100 (Potential Development Site 125): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 35 feet for oil No.4/2 from the lot line facing Webster Avenue for fuel oil and at least 16 ft feet from the lot line facing Decatur Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

With the implementation of the above (E) designation, no significant adverse impacts related to air quality from stationary sources would occur.

Noise (E) Designations for Development Sites

The following sites require 37.2 dBA of noise attenuation on façades that front on Bedford Park Boulevard, and 35 dBA on other façades, in order to avoid the potential for significant adverse impacts related to noise. The proposed action includes (E) designations as shown in Table 1, on the following properties:

Table 1:Sites Requiring (E) Designation with 37.2 dBA Noise Attenuation [1]

Potential Development Sites		
Development Site	**Block**	**Lot(s)**
107	3273	122, 128

[1] Window-wall attenuation of 37.2 dBA would be required for the building façade which fronts on Bedford Park Boulevard, where as all other facades would require 35 dBA window-wall attenuation

The text of the (E) designation for noise for the above properties would be as follows:

> **In order to ensure an acceptable interior noise environment, future residential/commercial uses must provide a closed window condition with a minimum of 37.2 dB(A) window-wall attenuation on any building façade which fronts Bedford Park Boulevard as well as a minimum of 35 dB(A) window-wall attenuation on any other building façade, in order to maintain an interior noise level of 45 dB(A). In order to maintain a closed-window**

condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, central air conditioning or air conditioning sleeves containing air conditioners or HUD-approved fans.

The following sites require 35 dBA of noise attenuation in order to avoid the potential for significant adverse impacts related to noise. The proposed action includes (E) designations on properties as shown in Tables 2a and 2b.

The text of the (E) designation for noise for the above properties is as follows:

In order to ensure an acceptable interior noise environment, future residential/commercial uses must provide a closed window condition with a minimum of 35 dB(A) window-wall attenuation in all façades in order to maintain an interior noise level of 45 dB(A). In order to maintain a closed-window condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, central air conditioning or air conditioning sleeves containing air conditioners or HUD-approved fans.

With the attenuation measures specified above, the proposed rezoning would not result in any significant adverse noise impacts, and would meet CEQR guidelines.

Statement of Significant Effect:

On behalf of the City Planning Commission, the Environmental Assessment and Review Division has determined, pursuant to 6 NYCRR Part 617.7, that the proposed actions may have a significant effect on the quality of the environment as detailed in the following environmental impacts, and that an environmental impact statement will be required:

1. The actions, as proposed, may result in significant adverse impacts on neighborhood character in the vicinity of the affected area.

2. The actions, as proposed, may result in significant adverse waterfront revitalization program related impacts.

3. The actions, as proposed, may result in significant adverse impacts on infrastructure in the vicinity of the affected area.

4. The actions, as proposed, may result in significant adverse impacts to traffic conditions in the vicinity of the affected area.

5. The actions, as proposed, may result in significant adverse impacts related to other aspects of the environment.

Supporting Statement:

The above determination is based on an Environmental Assessment Statement prepared for the actions which finds that:

1. Neighborhood Character – The proposed actions would result in new development which could alter existing neighborhood character by affecting traffic.

2. Infrastructure – The proposed action could result in an impact to infrastructure.

3. Waterfront Revitalization Program – The proposed action could result in an impact to the waterfront revitalization program.

4. Traffic – The proposed actions could increase traffic volumes which could generate significant traffic impacts requiring mitigation.

5. The Draft Environmental Impact Statement (DEIS) to be prepared for the proposed actions will identify and describe any other potential effects on the environment.

6. An Environmental Assessment Statement (EAS), dated April 16, 2010, was prepared for the proposed actions. The EAS concluded that, based on standard methodologies using *CEQR* Technical *Manual* guidelines and employing reasonable, worst-case assumptions, the proposed actions would not result in significant adverse impacts with respect to Land Use, Zoning and Public Policy; Socioeconomic Conditions; Community Facilities and Services; Open Spaces; Shadows; Historic Resources; Urban Design and Visual Resources; Natural Resources; Hazardous Materials; Solid Waste and Sanitation Services; Energy; Parking; Transit and Pedestrians; Air Quality; Noise; Construction Impacts; or Public Health.

7. The (E) designation for hazardous materials would ensure that the proposed actions would not result in significant adverse impacts due to hazardous materials.

8. The (E) designation for air quality would ensure that the proposed actions would not result in significant adverse impacts due to air quality.

9. The (E) designation for noise would ensure that the proposed actions would not result in significant adverse impacts due to air quality.

Public Scoping:

The CEQR lead agency hereby requests that the applicant prepare or have prepared, at their option, a Draft Environmental Impact Statement (DEIS) in accordance with 6 NYCRR 617.9(b) and Sections 6-08 and 6-12 of Executive Order No. 91 of 1977 as amended (City Environmental Quality Review).

A Draft Scope of Work for the proposed action was issued on April 16, 2010, and a public scoping hearing on the proposed action was held on May 19th, at The Bedford Park Senior Center 243 E. 204th Street, Bronx, New York. Subsequently, the proposed action was revised to rezone areas along narrow streets in Bedford Park and Norwood to R7B, instead of R7A; rezone part of one block on Marion Avenue and 195th Street to R7B instead of R5B; rezone part of one block on Hull Avenue between 204th and 205th streets and part of another block at Bainbridge and 198th Street, to R7B instead of R5A. The Draft Scope of Work and Environmental Assessment Statement have been revised to incorporate these changes, and to include updated analyses per the May 2010 edition of the CEQR Technical Manual. Furthermore, the Draft Scope of Work and Environmental Assessment Statement have been revised to indicate that a small portion of the proposed rezoning area is located in Community District 12 and that a blockfront along Webster Avenue currently zoned R8/C2-3 would be rezoned to R8/C2-4.

A second public scoping meeting has been scheduled for Wednesday, September 1, 2010 at 10:00am and will be held at the Department of City Planning, Spector Hall, 22 Reade Street, New York, NY 10017. Written comments will be accepted by the lead agency through the tenth day following the scoping meeting. Comments made during both scoping hearings will be considered.

This determination has been prepared in accordance with Article 8 of the Environmental Conservation Law. Should you have any questions pertaining to this Positive Declaration, you may contact Nicole Rodriguez, the project manager, at (212) 720-3247.

1. EXECUTIVE SUMMARY

EAI performed a Phase I Environmental Site Assessment Phase I (ESA) ASTM Standard 1527-13 that included on-site observations of the accessible areas of 2768-2776 Webster Avenue (the Subject Site), on January 12, 2020. The Subject Site is located in the Bronx, Bronx County, State of New York.

According to Sanborn Fire Insurance Maps, the Subject Site was originally developed in 1896 (approx.) as a one (1)-story structure. The present building was constructed in 1920. Prior to development of the Subject Site, and according to available historical sources, the subject property was formerly vacant land. Properties in the general vicinity of the Subject Site appear to be commercial buildings, residential apartment buildings, and a railroad to the rear.

The following summarizes the independent conclusions representing EAI's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representative has been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

1.1 FINDINGS/CONCLUSIONS

- The following table provides a general description of the subject property. (See Section 4)

Address:	*2768 Webster Avenue, Bronx, NY 10458*
Nature of Use:	*Commercial*
Description:	*The Subject Site consists of three (3) commercial buildings and a parking lot.*
Assessor's Parcel Number (APN):	*Block 3273, Lot 100 & 101*
Number of Floors:	2
Approx Lot Size:	*115' x 145.67'*
Approx Building Square Footage:	*7,500*
Approx Date of Construction:	*1920*

Historical Review (Section 5.8)

- **The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:**

  1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment was utilized at the Subject Site and may have discharged to the subsurface.**
  2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**

  EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

Operational Activities (Section 6.1)

- No circumstances of environmental concern associated with the operational activities at the Subject Site.

Hazardous Materials/Petroleum Products (Section 6.2)

- EAI observed a leaking grease trap utilized by the restaurant tenant at the rear of 2768 Webster Avenue, resulting in cooking grease spilling onto the floor. This area should be cleared and the grease trap repaired/replaced.
- The Subject Site is not involved in the use of petroleum products. No further action or investigation is recommended regarding current use of hazardous materials or petroleum products at the Subject Site.

Wastes (Section 6.3)

- The Subject Site does not generate, treat, store or dispose of hazardous, medical, or regulated wastes. The non-hazardous solid and liquid wastes generated at the Subject Site appear to be stored and disposed of properly.

Polychlorinated Biphenyls (PCBs) (Section 6.4)

- EAI identified two (2) areas of concern in relation to prior usage of the Subject Site as a signal substation and as an auto service facility. See Section 5.8 (Historical Review).

Asbestos-Containing Materials (ACM) (Section 6.5)

- Through a visual inspection, the accessible areas did not have any visible and/or friable ACM. All pipes are bare.

Storage Tanks Pipelines (Section 6.6)

- EAI conducted an interview with a representative of the NYC Fire Department, who indicated that permit #02236545 is on file for two (2) 275-gallon aboveground heating oil storage tanks, expiring on 07/30/1987 when the building was converted to gas heating. No further action is recommended regarding heating oil storage tanks at the subject property.

Surface Areas (Section 6.7)

- No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Subject Site.

Lead Paint Hazards (Section 6.8)

- Based on our visual inspection of the building's interiors, the painted surfaces are currently in good condition, there are no peeling paint concerns, and no LBP hazard was noted in the areas inspected.

Mold & Mildew (Section 6.9)

- EAI performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Subject Site. EAI observed water covering the floor at 2768 Webster Avenue. This leak should be repaired and the water/debris at the site cleared.

Regulatory Review

- Based on review of the regulatory database report, the Subject Site is not listed.

- 2779 Webster Avenue, .025 NNW of the Subject Site, is listed on the NY LTanks database dated 02/10/2004 due to a tank overfill. This spill listing was closed following proper remediation on 05/03/2005 and is not expected to pose any environmental concern to the Subject Site.
- Based on review of the regulatory database report, none of the listed off-site facilities are anticipated to adversely impact the Subject Site. No further action or investigation is recommended regarding the off-site regulatory review.

Adjoining & Surrounding Properties (Section 7)

- EAI identified no current adjacent or surrounding property uses that are anticipated to have a negative impact on the environmental integrity of the Subject Site. No further action or investigation is recommended regarding the adjacent properties.

1.2 FINDINGS, CONCLUSIONS, & RECOMMENDATIONS

- A ***Recognized Environmental Condition (REC)*** refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property, due to release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment.
  - This assessment **has revealed** evidence of RECs in conjunction with the subject property:
    - **The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:**
      1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**
      2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**
    - **EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.**
- ***Controlled Recognized Environmental Conditions (CRECs)*** are defined by the ASTM Standard Practice E1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g. property use restrictions, AULs, institutional controls, or engineering controls).
  - This assessment has revealed **no** evidence of CRECs in conjunction with the subject property.
- ***Historical Recognized Environmental Conditions (HRECs)*** are defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).
  - This assessment has revealed **no** evidence of HRECs in connection with the subject property.
- ***De Minimis Conditions***: Findings which would otherwise be characterized as Recognized Environmental Conditions, but which generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought

to the attention of appropriate governmental agencies are classified as *de minimis* in accordance with the agreed scope of work. De Minimis Conditions are not considered RECs.

- This assessment **has revealed** evidence of de minimis environmental conditions in connection with the subject property in the form of usual motor oil staining in the parking areas. EAI also observed debris and trash in the rear area and on the roof. These areas should be cleaned and all waste disposed of properly.

2J's Parking Lot was observed to contain assorted junk cars and trucks. Leaking batteries are a potential environmental concern. This area should be thoroughly investigated and cleaned properly.

2. SURVEY APPROACH/PURPOSE

EAI conducted an on-site Environmental Site Assessment of the Subject Site that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives. On-site activities and/or interviews were conducted by Mr. Alexander Friedman, EP.

Areas accessed included all interior and exterior areas, and the Subject Site boundaries.

Visual observation above the dropped ceiling tiles (if any) was not performed as a part of this assessment.

Visual observation of pipe chases and behind walls was not performed as a part of this assessment. No evidence of pipe chases was identified during this assessment.

Weather conditions at the time of the Subject Site assessment were clear.

EAI reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Subject Site which could have an adverse impact on the Subject Site. In an attempt to determine whether historical uses of the Subject Site and surrounding area have had an environmental impact on the Subject Site, EAI interviewed individuals knowledgeable about the Subject Site and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analysis of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report) as they existed in the Subject Site. The further purpose of this Phase I Environmental Site Assessment is to defend the innocent landowner in accordance with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) for commercial real estate and to attempt to assert landowner liability protections under CERCLA. This is accomplished by all appropriate information, which is available for this property and adjoining properties. The assessment was conducted utilizing generally accepted Phase I industry standards using the American Society for Testing and Materials (ASTM) Standard Practice E 1527-13 Scope of Work. The scope of work included an evaluation of:

- The Subject Site history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Subject Site as identified through review of reasonably ascertainable standard historical sources.
- Physical characteristics of the Subject Site as identified through review of reasonably ascertainable topographic, wetlands, flood plain, soils, geology, and groundwater data.
- Current Subject Site conditions (as applicable), including compliance with appropriate regulations as they pertain to the presence or absence of:
  - Facility storage tanks, drums, containers (above or below ground), etc.
  - Transformers and other electrical equipment which utilize fluid which may potentially contain PCBs.
  - The use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, or disposal of hazardous, regulated, or medical wastes.
- A screening approach for the potential existence of:

- Asbestos, including the identification of all suspect materials in accessible areas (interior and exterior). Materials are considered suspect until tested and proven otherwise. Friable materials are those which can be easily crumbled or pulverized by hand pressure.

  This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition/renovation purposes, but is intended to identify the potential for an asbestos hazard in accessible areas. This screening is not intended to be used for demolition, abatement, renovation, or repair work.

  The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication *Managing Asbestos in Place.*

- Mold, including the identification of visible mold growth, conditions conducive for mold growth, and evidence of moisture in accessible areas of the Subject Site. In addition, EAI interviewed Site personnel regarding any known or suspected mold contamination, water intrusion, or mildew like odor problems. Sampling was not performed as part of this assessment. EAI notes that the conclusions made are based solely on observable conditions in readily accessible interior areas of the Subject Site on the assessment date.

- An evaluation of information contained in programs such as the NPL, SEMS, RCRIS, SWL, LUST, RCRA NLR, RCRA TSD, the Registered Underground and Aboveground Storage Tank Database, FINDS, ERNS, State Sites, Spills, NPDES, and other governmental information systems within specific search distances of the Subject Site. This evaluation was performed to identify any sites that would have the potential to impact the environmental integrity of the Subject Site.

  The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search which focuses on both the Subject Site and neighboring sites that may impact the Subject Site. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of the new ASTM Standard E 1527-13, which is recognized by EPA as being consistent with the AAI Rule. The information provided is assumed to be correct and complete.

- Visual observation of the adjacent properties to identify high risk neighbors and the potential for known or suspected contamination to migrate onto the Subject Site.

3. LIMITATIONS & METHODOLOGY

Criteria for the identification of Recognized Environmental Conditions vary substantially across the industry. Some Environmental Professionals identify Recognized Environmental Conditions whenever there is a possibility of impact to a property, while others recognize Recognized Environmental Conditions only when presented with direct evidence that a release has occurred. The ESA Standard defines a REC in terms of the "presence or likely presence" of any hazardous substances or petroleum products **in, on, or at** a property: (1) due to any **release** to the **environment**; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. By this definition, the mere possibility of a release fails to fulfill the definition of a REC. A requirement for the discovery of direct evidence before identification of a REC is equally unsupportable. EAI considers both the known and likely presence and release of hazardous materials in identifying Recognized Environmental Conditions.

The following table presents a summary of the individuals contacted or to whom requests for documentation were made as part of this assessment:

Name	Affiliation	Telephone No.
Fawzy Abdelsack	NYC State Dept of Env Conservation	718-482-4949
Building Information System (BIS)	NYC Dept of Buildings	212-312-8062
Marie Dooley	NYC Dept of Environmental Protection	718-595-6530
Chari Anhouse, Esq.	New York City Department of Health	212-788-5013
Bureau of Fire Prevention	New York City Fire Department	718-999-2442
Katrin Kraft	EDR-Environmental Data Resources	800-352-0050
Katrin Kraft	Sanborn Fire Insurance Maps	800-352-0050
Frank Bagata	Site Representative	845-598-0895

4. SUBJECT SITE LOCATION/DESCRIPTION

The subject property located at 2768 Webster Avenue, Bronx, New York 10458, in Bronx County, is bound by Webster Avenue t and a railroad line at the rear. The subject property location is: Longitude: 73.885293 and Latitude: 40.865735. The subject property: Block 3273 Lot 100 & 101 is improved with three (3) commercial buildings and a parking lot.

According to the New York City Department of Finance Occupancy Code, the subject property is zoned K4 – Store Building.

4.1. SUBJECT SITE DESCRIPTION & GENERAL SITE CONDITIONS

Any evaluations of the physical site and its respective building components are subjective. Although the Subject Site conditions are not directly hinged to the environmental status of the subject property, one is generally a reflection of the other. The actual Subject Site, building, and its components are outlined below.

The Subject Site consists of three (3) commercial buildings and a parking lot.

#2766: Houses a vacant warehouse with construction equipment observed in the rear, as well as excessive debris and trash. These areas should be cleaned and all waste disposed of properly. Previously utilized for liquor warehousing and meat storage. An additional vacant building was observed with no roof, previously utilized for an MTA substation.

#2768: Houses 2J's Parking Lot, which contains assorted junk cars and trucks. Leaking batteries are a potential environmental concern. EAI observed a leaking grease trap in the rear basement area adjoining #2766, with water, cooking grease, and debris covering the floor. This area should be cleaned, the grease trap repaired/replaced, and all waste disposed of properly. This area previously housed an auto repair facility, and EAI observed inactive hydraulic equipment. A NYS Inspection Station sign is visible. Some areas of this former auto repair were inaccessible due to the excessive waste on the floor. See Section 5.8 (Historical Review).

#2770: Houses La Para Tire Shop.

#2774: Houses Kiss Car Service, containing office space heated via thru-wall heating units. The roof houses a cellular service antenna tower servicing the tenant.

#2776: Houses Pont Sabor Restaurant, which utilizes an exhaust hood, oven, fire suppression system, and walk-in refrigerator. The vacant second floor previously housed a bar. The roof presently contains two (2) AC units and two (2) exhaust vents. Excessive water ponding, debris, and trash were visible on the roof. All waste should be disposed of properly.

The Subject Site is serviced by public water and sanitary sewer systems.

4.1.1 Utilities

The Subject Site is serviced with the following utilities:

Water	New York City Department of Environmental Protection (NYCDEP)
Sanitary Sewer	New York City Department of Environmental Protection (NYCDEP)
Storm Sewer	New York City Department of Environmental Protection (NYCDEP)
Electric	Consolidated Edison of New York (Con Ed)
Natural Gas	National Grid

4.2. ENVIRONMENTAL SETTING

4.2.1 Wetlands

Review of the New York State Freshwater Wetlands Map, published by the New York State Department of Environmental Conservation (NYSDEC) and dated February 23, 1987, indicated no wetland areas near the subject property.

A copy of the wetlands map was not available for reproduction.

4.2.2 Floodplain

Review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency (FEMA) and dated February 15, 1991, indicated the following:

- The Subject Site is located in Zone X, areas outside the 500-year flood plan with less than 0.2% annual probability of flooding. Annual Probability of Flooding of less than one percent. A copy of the Floodplain Map is enclosed in Section G-Documents.

4.2.3 Soils/Geology

Interviews with personnel of the United States Department of Agriculture Soil Conservation Service (USDA SCS) indicated that no soil survey has been published for Bronx County, New

York. However, based upon the long-term and intense development in New York, the soil in the vicinity of the Subject Site would likely be characterized as part of the Urban Land Complex:

- The urban land complex indicates that the predominant soil type has been disturbed and covered with an impervious layer consisting of buildings, sidewalks, streets, and other structures. No capability sub-classifications are assigned to urban land. The soil surface texture is variable and depth to bedrock is > 10".

4.2.4 Groundwater Hydrology

Review of the Water Resources Data Report for New York State, published by the USGS, indicated the following:

Shallow groundwater flow is expected to follow the ground level slope of surface elevations towards the nearest open body of water or intermittent stream.

Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

The United States Geological Survey (USGS) monitors water supply and establishes the parameters for safe water flow. The Department of Environmental Protection safeguards these resources by enforcing the legislation created to protect our water supply. Governmental Database Records Review did not reveal any spills that may have compromised ground water.

Any conclusions drawn in this report regarding groundwater and soil are based upon observation and records review and are therefore limited in scope and usefulness.

The water supply at the site was not tested and is not a component of this Phase I assessment.

5. HISTORICAL REVIEW

Review of information available from the New York City Tax Assessment Office indicated that the Subject Site is shown as Block 3273– Lot 100 & 101.

Within the scope of this assessment, EAI has attempted to establish the past uses of the subject property. The range of this study is from present back to 1940 or when property was first used for residential, agricultural, commercial, industrial, or governmental purposes. This is accomplished by use of Sanborn Fire Insurance Maps and through reasonable ascertainable records, interviews with tenants, past owners, neighbors or any other available standard historical sources.

The Subject Site was originally developed in 1896 (approx.) as a one (1)-story structure. The present building was constructed in 1920. Prior to development of the Subject Site, and according to available historical sources, the subject property was vacant land. (See Page 15.)

Based on the City Directories review, the site was commercial from 1940-2017. See Section 5.6. on Page 16 in this report and Section F Sanborn Maps.

5.1. RECORDS REVIEW

There are several state and federal agencies responsible for collecting environmental information, which is available in the form of databases. The database information searched in this site assessment include priority listings of sites with known or suspected contamination, facilities that generate, treat, store, and/or dispose of hazardous waste, solid waste facilities, underground storage tank sites, leaking underground storage tank sites, and spill incident sites. Each database

has a standard search distance from the subject property within which any listing must be addressed.

The standard search distances are set by ASTM Guideline E1527-13 in each database, required to satisfy a diligent attempt at discovering potential environmental concerns. The database information reviewed, along with the associated search distances, is provided in Section D.

The results of the database searches are summarized in the table below:

Database Searched	Search Distance	Sites Identified for Subject Site	Sites Identified for Surrounding Properties	Surrounding Property Potential to Impact the Subject Site
Federal Databases				
NPL	1.0 miles	0	0	N/A
SEMS Facilities	0.5 miles	0	0	N/A
RCRA Generator	0.25 miles	0	5	Not expected to pose an adverse impact
RCRA COR ACT	1.0 miles	0	0	N/A
RCRA TSD	0.5 miles	0	0	N/A
State & Tribal Databases				
State/Tribal SWL	0.5 miles	0	0	N/A
Registered UST & AST	0.25 miles	0	99	Not expected to pose an adverse impact
Leaking Underground Storage Tank	0.5 miles	0	54	Not expected to pose an adverse impact
ERNS	Subject Site only	0	N/A	N/A
Spills	Subject Site only	0	18	Not expected to pose an adverse impact

Additional database searches are provided in the Search Summary Report of the EDR FirstSearch Report.

5.1.1 Superfund Enterprise Management System (SEMS)

Hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the Unites States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The database is a compilation by the United States EPA of sites that the EPA has investigated, or is currently investigating for a release of hazardous substances pursuant to the Superfund Act.

Based on the search of the SEMS Facilities Database, zero (0) sites were identified within a half (1/2) mile radius of the subject property.

5.1.2 RCRA Generator Site

Resource Conservation and Recovery Information System Large and Small Quantity Generators.

Based on this search, five (5) sites were identified within a quarter (1/4) mile radius of the subject property.

None of these database sites appear to pose an adverse environmental impact to the Subject Site.

5.1.3 RCRA COR ACT

Resource Conservation and Recovery Information System Corrective Action Sites. The EPA's database of RCRIS sites with reported corrective action. This information is also reported in the standard RCRIS detailed data.

Based on this search, zero (0) sites were identified within a one (1) mile radius of the subject property.

5.1.4 RCRA TSD

Resource Conservation and Recovery Information System Treatment, Storage, and Disposal Facilities. The EPA's database of RCRIS sites which treat, store, dispose, or incinerate hazardous waste. This information is also reported in the standard RCRIS detailed data.

Based on this search, zero (0) sites were identified within a half (1/2) mile radius of the subject property.

5.1.5 State/Tribal SWL

The Active Solid Waste Landfill Database (SWL) is maintained by state or local agencies of Solid Waste Landfills, Incinerators, and Transfer Stations.

Based on this search, zero (0) sites were identified within a half (1/2) mile radius of the subject property.

5.1.6 Registered Underground & Aboveground Storage Tank Database

The New York State Department of Environmental Conservation (NYSDEC), maintains a list of all registered underground (USTs) and above ground storage tanks (ASTs) within the state. The NYSDEC regulates the storage and handling of petroleum storage facilities. Aboveground and Underground storage tanks storing petroleum can, if not properly installed and maintained, cause serious environmental problems, including contamination of a water supply. In an effort to prevent leaks and spills, the Petroleum Bulk Storage Law (Article 17, Title 10 of the Environmental Conservation Law) requires the DEC to develop and enforce a State Code for the storage and handling of petroleum. The resulting regulations are Parts 612, 613 and 614. Any facility with a stationary tank combined capacity exceeding 1100 gallons must be registered with the New York State Department of Environmental Conservation.

Based on the search of the Registered Underground Storage Tank Database, ninety-nine (99) sites were identified within a quarter (1/4) mile radius of the subject property.

None of these database sites appear to pose an adverse environmental impact to the Subject Site.

5.1.7 Leaking Underground Storage Tank Database

The New York State Department of Environmental Conservation (NYSDEC) maintains a list of facilities that are known to have had leaking underground storage tanks (LUSTs) within the state.

Based on the search of the Leaking Underground Storage Tank Database, fifty-four (54) sites were identified within a half (1/2) mile radius of the subject property.

Based on the current regulatory oversight/status "Closed", the relative distance and/or the inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

5.1.8 ERNS Database

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported releases of oil and hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the United States Coast Guard, the National Response Center, and the Department of Transportation.

Based on the search of the ERNS Database, the Subject Site is not listed.

5.1.9 Spills – 1990

The New York State Department of Environmental Conservation's database of emergency response actions and spill releases maintained by the Division of Spills Management.

Based on the search of the Spills Database, eighteen (18) sites were identified within a half (1/2) mile radius of the subject property.

Based on the current regulatory oversight/status, the relative distance and/or the inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

5.1.10 Federal & State Priorities Database

The National Priorities List (NPL) is the EPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial action under the Superfund Program. In order for a site to be included on the NPL List, it must either meet or surpass a predetermined hazard ranking system score, be chosen as a state's top priority site, or meet all of the three (3) following criteria:

1. The United States Department of Health and Human Services issues a health advisory recommending that people be removed from the site to avoid exposure.
2. The EPA determines that the site represents a significant threat.
3. The EPA determines that remedial action is more cost-effective than removal action.

Based on the search of the NPL database, zero (0) sites were identified within a one (1) mile radius of the subject property.

5.2. INTERVIEWS

Interview with Owner
An interview with the property owner was not conducted as part of this Phase I Site Assessment.

Interview with Site Manager
An interview with the site manager was not conducted as part of this Phase I Site Assessment.

Interviews with Occupants
During the course of the site inspection, several occupant interviews were conducted. None of the interviewees provided EAI with any indications of existing or potential RECs at the subject property.

Interviews with Others
An interview was conducted with Frank Bagata, site representative, who indicated no knowledge of any recognized environmental conditions or liens existing at the subject property or adjacent properties. (See user questionnaire in Documents Section G)

Title Records
EAI requested title records from the User; however, title records were not provided to EAI for review. A title report was not included in the scope of work for this assessment.

Environmental Liens or Activity and Use Limitation
EAI requested information from the User regarding knowledge of environmental liens, activity, and use limitations for the property. The site contact was not aware of any environmental liens associated with the property. In addition, the site contact had no knowledge of any use or activity limitations.

Specialized Knowledge
EAI inquired with the site contact regarding any specialized knowledge of environmental conditions associated with the property. No special conditions were reported.

Commonly Known or Reasonably Ascertainable Information
EAI inquired with the user regarding any specialized knowledge of environmental conditions associated with the property. EAI inquired with the site contact regarding any specialized knowledge of environmental conditions associated with the property. No conditions were reported.

Valuation Reduction for Environmental Issues
EAI inquired with the site contact regarding any knowledge of reductions in property value due to environmental issues. The site contact was not aware of any valuation reductions associated with the property.

Owner, Property Manager and Occupant Information
According to a review of records, the property owner was identified as Bandry LLC. The property is currently occupied by three (3) commercial buildings and a parking lot.

Reason for Performing Phase I ESA
The purpose of this Phase I Environmental Site Assessment (ESA) was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-13) in connection with the property. This ESA was also performed to permit the User to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs"*). ASTM Standard E-1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C §9601 (35) (B).

EAI understands that the findings of this study will be used by Clinton Olsen to evaluate a pending financial transaction in connection with the property.

Other
According to the user, the purpose of this assessment is to qualify for an LLP to CERCLA liability. In addition to satisfying one of the requirements to qualify for an LLP to CERCLA liability, another reason for performing a *Phase I Environmental Site Assessment* includes the need to understand potential environmental conditions that could materially impact the operation of the business associated with the parcel of commercial real estate.

5.3. LOCAL GOVERNMENT AGENCY RECORD REVIEW

EAI reviewed file information for the Subject Site. This review indicated that the present building was constructed in 1920 (approx.). General building permits for the Subject Site were

on file, but did not reveal any information or condition that could impact the environmental integrity of the Subject Site. No environmentally significant information was identified.

A **F.O.I.L.** request was submitted to the New York City Department of Health, the New York City Department of Environmental Protection, New York City Department of Buildings, the New York City Fire Department, and the New York State Department of Environmental Conservation regarding any violations, etc. at the Subject Site and surrounding areas. To date, we have not received a response. Upon receipt, any relevant information will be forwarded. (See Section G – Documents)

According to the Department of Buildings "Property Profile Overview" dated January 25, 2021, there are a total of zero (0) DOB violations and ten (10) ECB violations "open" at this time. (See Documents-Section G). Through EDR's data search, Sanborn Maps, and interviews, no significant regulatory files or records associated with the property or adjacent properties were found that would warrant additional investigation, and based on the quality of information obtained from those sources, no additional agency file review is warranted.

5.4. TOPOGRAPHIC MAPS

EAI reviewed a historical USGS *Central Park, NY 7.5* Minute Series topographic map of the Subject area provided by EDR dated 2013. The topographic map does not identify individual buildings or development on the Subject due to the concentration of structures in the highly urbanized Brooklyn area, but rather shows the area to be shaded denoting urbanized land use, and identifies only landmarks as distinct structures. Nevertheless, the topographic map does not identify any industrial complexes, landfills, or wetlands on or adjacent to the Subject Site. A copy of the topographic map is enclosed. Target Property Topography: General Topographic Gradient is General ESE and the Target Property Elevation is 58 ft above sea level.

5.5. HISTORICAL MAPS

EAI reviewed available Sanborn Maps as provided by EDR/First Search. Historical maps are detailed scale drawings that show the location and use of buildings and structures that occupied a given area. EAI's map search revealed the following:

YEAR	SUBJECT PROPERTY	SURROUNDING PROPERTY
1896	*VACANT, 1-STORY STRUCTURE, RAILROAD TRACKS*	*LUMBER MATERIALS*
1900	*SEWER PIPE YARD, FREIGHT, RAILROAD TRACKS*	*NY CENTRAL & HUDSON RIVER RAILROAD, 2-STORY STRUCTURES, BUILDING MATERIALS*
1914	*FREIGHT SHED, RAILROAD TRACKS*	*VACANT, HOTEL, STORES, RAILROAD, DWELLINGS*
1945	*FREIGHT SHED, RAILROAD TRACKS, ENGINE ROOM*	*HOTEL, STORES, RAILROAD, ICE PLANT, GARAGE, APARTMENTS*
1950	*FREIGHT SHED, RAILROAD TRACKS, VACANT*	*HOTEL, STORES, DWELLINGS, RAILROAD, GARAGE & REPAIR, WOODWORKING*
1977	*VACANT, RAILROAD, SHED*	*PARKING, CABINET CO., BOWLING, RAILROAD, STORES, DWELLINGS*
1978	*SIGNAL STATION, COLD STORAGE, SUBSTATION – NYCRR, 2ND FLOOR CLUB*	*PARKING, CABINET CO., BOWLING, RAILROAD, STORES, DWELLINGS*
1979-1993	*VACANT, SHED, RAILROAD TRACKS*	*PARKING, METAL PRODUCTS, BOWLING, RAILROAD, STORES & DWELLINGS*
1995-1996	*VACANT, SHED, RAILROAD*	*PARKING, WAREHOUSE, COMMERCIAL, AUTO*

	TRACKS	*REPAIR, STORES, DWELLINGS, RAILROAD*
1998-2007	*COMMERCIAL, RAILROAD, SIGNAL STATION, SUB STATION, COLD STORAGE*	*PARKING, WAREHOUSE, COMMERCIAL, AUTO REPAIR, STORES, DWELLINGS, RAILROAD*

The review of the historical data available for the Subject Site and surrounding area identified the subject property as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface. EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

Copies of the above-referenced historical maps are appended (Section F).

5.6. CITY DIRECTORY

City Directories have been produced for most urban and some rural areas since the late 1800s. The directories are generally not comprehensive and may contain gaps in time periods.

EAI reviewed Historical City Directories obtained from EDR on January 20, 2021 for past names and businesses that were listed for the subject property and adjoining properties. This review revealed the following listings associated with the subject property:

- **Prior to 1940** – City Directories were not available.
- **1940-2017 -** The current property address is listed as numerous commercial tenants. Garcia Body & Fender Shop. is listed as a tenant from 2005-2009, and Latin American Auto Repair is listed as a tenant from 1993-1999.

The adjacent properties listed have been utilized as commercial units from 1927-2017. No environmentally significant listings were identified for adjacent properties.

The review of the historical data available for the Subject Site and surrounding area indicates the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris. EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

Copies of reviewed City Directories are included in Section F.

5.7. DATA GAPS

No significant data gaps were encountered during completion of this assessment. Data gaps occur when, despite good faith efforts, the consultant is unable to identify information required to satisfy objectives of the assessment. Data gaps may result from incompleteness in any of the activities required by the ESA Standard, or by limiting conditions encountered during completion of the work. The ESA Standard requires that data gaps be identified in the report when they significantly impact the ability of the consultant to identify Recognized Environmental

Conditions at the property. Limiting conditions identified in this report are not considered to significantly impact our ability to satisfy the objectives of this assessment.

DATA FAILURE

No Data Failure was encountered during the completion of this assessment. The earliest research date was 1940 or earlier and the property was undeveloped at that time. Research intervals of more than five years were encountered during our review of historical sources, however, activities at the property were found to be consistent at the beginning and end of these extended research intervals. In accordance with ASTM criteria, such intervals do not constitute data failure. The following data gaps occurred in connection with this report:

Data Gap	Explanation	Significance of Gap
Site History	Site history not conducted in 5-year intervals	Low: Not likely to alter Report's conclusions due to EAI's search of standard historical sources of information such as historic topographic maps, city directory abstracts, Sanborn Fire Insurance Maps, and interviews with knowledgeable individuals who were familiar with the property.
Former Owner or Operator Interview	Unable to interview former site owner or operator due to inability to locate	Low: Not likely to alter Report's conclusions.
Governmental Records	FOILs not returned (COVID-19 Delays)	EAI is anticipating that the circumstance surrounding the COVID-19 virus will impact the response time of our requests to local and state agencies. In addition, we are unable to provide an accurate time frame as to when files will be made available for review. We have been informed by many of our sources on the local, state, and federal level that they are currently transitioning to remote work, and therefore, their ability to access and distribute electronic and physical archived/warehoused records and conduct onsite inspections has been limited. Under the ASTM definition of data gaps and limiting conditions, some pertinent information may not be reasonably ascertainable at this time. As information from our inquiries is made available, EAI will forward any relevant information in the form of an addendum.

5.8. HISTORICAL SUMMARY

Based upon interviews and a review of local agency records, zoning records, and historical maps, the Subject Site was originally developed in 1896 with a one (1)-story structure; the present buildings were constructed in 1920. Based on the City Directories review, the site was commercial from 1940-2017. NYC DOB Certificates of Occupancy indicate the buildings were used as offices, stores, laboratory/manufacturing establishment, and a political club in 1968, 1972, and 1973, as an auto repair facility from 1973-2016, and as offices, a restaurant, and social club from 1994-2016.

The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:

1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**

2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**

EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

6. SUBJECT SITE RECONNAISANCE

6.1. OPERATIONAL ACTIVITES/NOTEWORTHY TENANTS

The Subject Site consists of three (3) commercial buildings and a parking lot.

No environmentally significant operations are conducted at the Subject Site.

6.2. HAZARDOUS MATERIALS/PETROLEUM PRODUCTS STORAGE AND HANDLING

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. No hazardous materials/petroleum was identified.

The Subject Site is involved in the use of hazardous materials in the form of routine janitorial and maintenance supplies. The materials observed do not appear to pose a hazard to the site, provided they continue to be used as designed, are properly handled, and all regulations regarding their use are followed.

No evidence of spills or staining was observed in the Subject Site. In addition, the floors appeared intact and no cracks were observed.

6.3. WASTE GENERATION, TREATMENT, STORAGE, AND DISPOSAL

Visual observation for the generation, treatment, storage and disposal of wastes was performed. The Subject Site is not involved in the generation, treatment, storage, or disposal of hazardous, medical, or regulated wastes as defined in the Code of Federal Regulations, Title 40 (Protection of Environment); Part 270 (EPA Administered Permit Programs: The Hazardous Waste Permit Program); Subpart A (General Information); Section .2 (Definitions) of hazardous waste as defined in the Code of Federal Regulations Title 40 (Protection of Environment); Part 261 (Identification and listing of Hazardous Waste); Subpart A (General); Section .3 (Definition and Hazardous Waste), thereby, subjecting the property to the requirements of the Code of Federal Regulations, title 40 (Protection of Environment); Part 265 (Interim Status Standards of Owners and Operators of Hazardous Waste Treatment, Storage and Disposal Facilities).

No excessive odors or overflowing/excessive ground trash and no hazardous, regulated, or medical wastes were noted in the vicinity of the disposals.

EAI observed a leaking grease trap utilized by the restaurant tenant at the rear of 2768 Webster Avenue, resulting in cooking grease spilling onto the floor. This area should be cleared and the grease trap repaired/replaced.

6.4. POLYCHLORINATED BIPHENYLS

No equipment with the potential to contain dielectric or hydraulic fluid was identified. A common source for polychlorinated biphenyls (PCBs) is in the cooling fluids of electrical transformers, capacitors and hydraulic equipment. PCB content is regulated under the US EPA regulation 40 CFR, Part 761 with provisions for varying degrees of toxicity.

The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:

1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**
2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**

EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

6.5. ASBESTOS CONTAINING MATERIALS

According to the Environmental Protection Agency and included in the publication #EPA560/5-85-024 "Guidance for Controlling Asbestos Containing Materials (ACM) in Buildings" asbestos containing materials are found in three forms: (1) Sprayed or toweled on ceilings and walls and structural steel; (2) in insulation around hot and cold piping, ducts, boilers, and tanks; and (3) in a non-friable state in products such as ceilings and floor tiles, wallboards and outside materials such as shingles and roofing materials. In general, ACM in the first two categories is of greatest concern, especially if it is friable, causing the materials to release fibers into the air.

Since the subject buildings were built prior to 1979, there exists the possibility that the original construction materials used may contain asbestos. If any demolition or remodeling activities are to occur in the buildings, a detailed asbestos survey should be conducted to determine if any of the materials contain asbestos. If any of the materials do contain asbestos, they should be removed and disposed of in accordance with all applicable Federal, State, and Local Regulations prior to any demolition or remodeling activities.

Ceiling, floor tiles, and roof shingles that may contain asbestos are not required to be removed due to their non-friable state.

Piping above dropped ceilings, which may contain ACM are enclosed in their present state and pose no health hazard.

Suspect ACM in the form of roofing materials, vinyl flooring, wallboard, and sprayed-on textured ceiling material were not sampled as part of the assessment. These materials are in good condition and should be sampled prior to repair, renovation, or demolition activities.

Through a visual inspection, the accessible areas did not have any visible and/or friable ACM. All pipes are bare.

6.6. FACILITY STORAGE TANKS AND PIPELINES (ABOVE OR BELOW GROUND)

No aboveground storage tanks (ASTs) were observed at the Subject Site.

EAI conducted an interview with a representative of the NYC Fire Department, who indicated that permit #02236545 is on file for two (2) 275-gallon aboveground heating oil storage tanks, expiring on 07/30/1987 when the building was converted to gas heating. No further action is recommended regarding heating oil storage tanks at the subject property.

Based on the review of the state list of registered USTs, no USTs are registered for the Subject Site.

6.7. SURFACE AREAS

Observations during EAI's assessment identified that the Subject Site lands are graded to provide slope and swale to direct storm water away from the on-site buildings. The land surface of the Subject Site is relatively flat, with no significant changes in elevation.

Visual observation of the Subject Site did not identify any evidence of distressed vegetation, staining, or surface migration or petroleum releases or hazardous materials onto or off the Subject Site.

Visual observations did not identify any evidence of on-site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Subject Site.

Visual observations did not identify any surface water features including lagoons, ponds, or other bodies of water at the Subject Site.

The storm water generated at the subject site is guided through a system of drains, grates, gutters and drainage pipes leading to the storm drainage system. The storm water systems are not electrical. These systems do not currently pose an environmental hazard to the subject property.

6.7.1 Vapor Encroachment Condition

A Tier I Vapor Encroachment Assessment was performed on the subject property in accordance with ASTM E 2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions,* December 2015. A Tier I Vapor Encroachment Assessment determines whether there actually is or is a potential for volatile vapors to encroach upon the subject property, producing a vapor encroachment condition. A vapor encroachment condition is the presence or likely presence of vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject property.

The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:

1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**
2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor**

was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.

EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

6.8. LEAD PAINT HAZARDS

To protect families from exposure to lead from paint, dust, and soil, Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as Title X. Section 1018 of this law directed HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Based on our visual inspection of the building's interiors, the painted surfaces are currently in good condition, there are no peeling paint concerns, and no LBP hazard was noted in the areas inspected.

6.8.1 LEAD IN DRINKING WATER

According to the 2015 Annual Water Quality Report, a public water system operated by the New York City Department of Environmental Protection (NYCDEP) serves the subject property vicinity. Shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of New York are surface water from a network of 19 reservoirs and three controlled lakes in a nearly 2,000 square mile watershed that extends 125 miles north and west of New York City. Sources include the Catskill/Delaware supply located in Delaware, Greene, Schoharie, Sullivan and Ulster counties, the Croton supply which is composed of 12 reservoir basins in Putnam, Westchester and Dutchess counties, and a groundwater supply in southeastern Queens. According to the City of New York and the 2015 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.9. MOLD & MILDEW

EAI performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Subject Site. EAI observed water covering the floor area at 2776 Webster Avenue. This leak should be repaired and the area cleaned.

6.10. RADON HAZARDS

Radon is a colorless, odorless gas produced by the radioactive decay of certain elements. The most common sources of radon are igneous and metamorphic rocks containing uranium (such as pitchblende), granite, shale, or phosphate, as well as soils or sediments derived from these parent materials. Radon may also be found in soils contaminated with certain industrial wastes (such as uranium or phosphate mine tailings) or in earth-derived building products, which include industrial wastes that contain phosphate slag. In areas where the potential for radon accumulation is high, special ventilation systems may offset potential health hazards.

A radon test was not conducted on the subject property. Review of the EPA Map of Radon Zones places the subject property in Zone 3, where average predicted radon levels is less than 2.0 pCi/L. The USEPA recommended action level is 4.0 pCi/L. Based on low predicted radon level, adverse environmental impacts related to radon gas mitigation at the subject property are not anticipated.

7. ADJOINING PROPERTIES & SURROUNDING PROPERTIES

A walk-through and a visual reconnaissance of the surrounding area were made for potential environmental concerns or problems. Properties in the general vicinity of the Subject Site appear to be commercial buildings, storefronts, apartment buildings, and railroad tracks to the rear.

Based on observations and available regulatory information, the adjacent property uses are not anticipated to adversely impact the environmental integrity of the Subject Site.

8. FINDINGS, CONCLUSIONS, & RECOMMENDATIONS

- A ***Recognized Environmental Condition (REC)*** refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property, due to release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment.
  - This assessment has revealed **no** evidence of RECs in conjunction with the subject property.
    - **The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:**
      1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**
      2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**
    - **EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.**
- ***Controlled Recognized Environmental Conditions (CRECs)*** are defined by the ASTM Standard Practice E1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g. property use restrictions, AULs, institutional controls, or engineering controls).
  - This assessment has revealed **no** evidence of CRECs in conjunction with the subject property.
- ***Historical Recognized Environmental Conditions (HRECs)*** are defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).
  - This assessment has revealed **no** evidence of HRECs in connection with the subject property.

- ***De Minimis Conditions***: Findings which would otherwise be characterized as Recognized Environmental Conditions, but which generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies are classified as *de minimis* in accordance with the agreed scope of work. De Minimis Conditions are not considered RECs.
    - This assessment **has revealed** evidence of de minimis environmental conditions in connection with the subject property in the form of usual motor oil staining in the parking areas. EAI also observed debris and trash in the rear area and on the roof. These areas should be cleaned and all waste disposed of properly.

2J's Parking Lot was observed to contain assorted junk cars and trucks. Leaking batteries are a potential environmental concern. This area should be thoroughly investigated and cleaned properly.

9. CERTIFICATION

EAI, Inc personnel have been retained to perform this assessment to achieve compliance with the AAI protocol pursuant to 40 CFR Part 312, FR, November 1, 2005, *Standards and Practices for All Appropriate Inquiries.*

The assessment was performed at the Client's request using the methods and procedures consistent with good commercial and customary practice designed to conform to acceptable industry standards and the Guidelines E1527-13, as established by the American Society for Testing and Materials (ASTM).

This report is exclusively for the use and benefit of the Client identified on the first page of this report. The purpose for which the report shall be used shall be limited to the use as stated in the contract between the client and EAI.

This report is not for the use or benefit of, nor may it be relied upon by any other person or entity for any purpose without the advance written consent of EAI. In expressing the opinions stated in this report, EAI has exercised the degree or skill and care ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts or circumstances. Documentation and data provided by the Client, designated representatives of the Client or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, have been used and referenced with the understanding that EAI assumes no responsibility or liability for their accuracy.

The independent conclusions represent our professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client or their representative has been assumed to be correct and complete. The conclusions presented are based on the data provided, observations, and conditions that existed on the date of the on-site visit.

9.1. SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40CFR 312; and

I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

AGENCY FILE SEARCH

Database Descriptions

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-VSQG - RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators).

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROLS - Institutional Controls Sites List.

State/Tribal IC / EC: RES DECL ENV RES DECL - Environmental Restrictive Declarations. A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps. ENV RES DECL - Restrictive Declarations Listing ENG CONTROLS - Registry of Engineering Controls. INST CONTROL - Registry of Institutional Controls.

State/Tribal VCP: VCP NYC VCP - Voluntary Cleanup Agreements. New York City voluntary cleanup program sites. VCP - Voluntary Cleanup Program Listing NYC

ST/Tribal Brownfields: BROWNFIELDS A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant. BROWNFIELDS - Brownfields Site List ERP - Environmental Restoration Program Listing.

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

Database Descriptions

Other Haz Sites: US CDL A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. US CDL - Clandestine Drug Labs PFAS - PFAS Contamination Site Location Listing.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Environmental Affiliates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

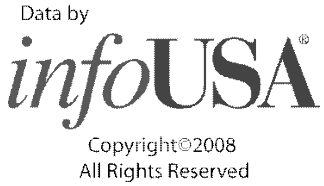
EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.



Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1927 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Description:

A FOIL request is a request for any "record" under NY's Freedom of Information Law (Article 6 of the Public Officers Law). Section 86 defines a "record" as: "any information kept, held, filed, produced or reproduced by, with or for an agency or the state legislature, in any physical form whatsoever including, but not limited to, reports, statements, examinations, memoranda, opinions, folders, files, books, manuals, pamphlets, forms, papers, designs, drawings, maps, photos, letters, microfilms, computer tapes or discs, rules, regulations or codes. NYSDEC maintains records in a variety of forms, or media, such as in hard copy (on paper), as recordings, as photographs, in electronic form, etc.

Contact E-Mail:

foils@enafco.com

Type of Record(s) Requested:*

Other

Description of Record(s) Requested:*

2768-2776 Webster Ave, Bronx, NY 10458
Block 3273 Lot 100 & 101
Please provide documentation concerning above ground/underground heating oil storage tanks (ASTs/USTs) spills, leaks and site remediation at the property listed above.

NYSDEC Office processing the Request:*

- Central Office (Albany) Covers the entire state
- Region 1 (Long Island) Covers the counties of Nassau and Suffolk
- ● Region 2 (New York City) Covers the counties of Brooklyn Bronx Manhattan Queens and Staten Island
- Region 3 (Lower Hudson Valley) Covers the counties of Dutchess Orange Putnam Rockland Sullivan Ulster and Westchester
- Region 4 (Capital Region Northern Catskills) Covers the counties of Albany Columbia Delaware Greene

Powered by GovQA

Montgomery Otsego Rensselaer Schenectady and Schoharie

Region 5 (Eastern Adirondacks Lake Champlain) Covers the counties of Clinton Essex Franklin Fulton Hamilton Saratoga Warren and Washington

Region 6 (Western Adirondacks Eastern Lake Ontario) Covers the counties of Herkimer Jefferson Lewis Oneida and St. Lawrence

Region 7 (Central New York) Covers the counties of Broome Cayuga Chenango Cortland Madison Onondaga Oswego Tioga and Tompkins

Region 8 (Western Finger Lakes) Covers the counties of Chemung Genesee Livingston Monroe Ontario Orleans Schuyler Seneca Steuben Wayne and Yates

Region 9 (Western New York) Covers the counties of Allegany Chautauqua Cattaraugus Erie Niagara and Wyoming counties

If your request pertains to just one Region, select that Region. If your request pertains to more than one Region, select Central Office. If you're unsure which Region your request pertains to, select Central Office. The Department will route your request to the appropriate Region(s)

Preferred Method to Receive Records:*

- (●) Electronic copies
- ( ) Pick-up Copies
- ( ) Inspect in Office
- ( ) Copies by Fax
- ( ) Express Mail (UPS)
- ( ) Regular Surface Mail (USPS)

NYSDEC will use its best efforts to provide records via the method you select. However, in some cases a particular delivery method is not feasible. In such cases NYSDEC will deliver the records via an alternative method

Please note not all public documents are available in electronic format. If the document(s) requested are not available electronically, we will make them available for inspection or by paper copy in accordance with the Public Records Law.

Note: The maximum total file size per attachment is 80MB.

Contact E-Mail: foils@enafco.com

Dear Miriam:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 1/27/2021 and given the reference number FOIL #**W077961-012721** for tracking purposes. You may expect the Department's response to your request no later than **2/26/2021.**

Record Requested: **2768-2776 Webster Ave, Bronx, NY 10458 Block 3273 Lot 100 & 101 Please provide documentation concerning above ground/underground heating oil storage tanks (ASTs/USTs) spills, leaks and site remediation at the property listed above.**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Please note that due to the COVID-19 outbreak, DEC may be experiencing staffing shortages and some records custodians may be working remotely. This may result in a delayed response time to your FOIL request. We appreciate your understanding and cooperation.

Request a Record

Please make your request specific so you receive the fastest service. After you submit a FOIL request you will receive a confirmation number so you can track the status of the response. The agency will notify you about how much time is required to respond to your request.

Category (optional)

Selecting a category helps clarify which agency will receive the request by listing agencies grouped by categories.

Environment

Agency (required)

Select the agency that will handle your request.

Department of Environmental Protection (DEP)

Request Title (required)

2768 Webster Ave Bronx NY - Spill/Tank Records

44 characters remaining

Note: The agency, category, and title of your request will be visible to the public. Do not enter personal information here.

Ex: Queens Blvd Roadwork Permit.

Request Description (required)

2768-2776 Webster Ave, Bronx, NY 10458
Block 3273 Lot 100 & 101
Please provide documentation concerning above ground/underground heating oil storage tanks (ASTs/USTs) spills, leaks and site remediation at the property listed above.

4768 characters remaining

Note: The request details you write here will not be visible to the public. However, the agency may post a description of the records provided.

Ex: Roadwork permits for work done in on Queens Blvd. between 40th and 45th streets, Borough of Queens, in September and October 2017.

Qualifier

Common Law

A public record under common law is one required to be kept, or necessary to be kept in discharge of a duty imposed by law, or directed by law to serve as a memorial and evidence of something written, said, or done, or a writing filed in a public office. The elements essential to constitute a public record are that it be a written memorial, that it be made by a public officer, and that the officer be authorized by law to make it.

If the information requested is a "public record" under common law and the requester has a legally recognized interest in the subject matter contained in the material, then the material must be disclosed if the individual's right of access outweighs the State's interest in preventing disclosure.

Note that any challenge to a denial of a request for records under common law cannot be made to the Government Records Council, as the Government Records Council only has jurisdiction to adjudicate challenges to denials of OPRA requests. A challenge to the denial of access under common law can be made by filing an action in Superior Court.

Does this request fall under common law? *
No

If "Yes", set forth your interest in the requested records

Delivery Preference

Please note that your preferred method of delivery will only be accommodated if the custodian has the technological means and the integrity of the records will not be jeopardized by such method of delivery.

Preferred Delivery *

Email

Regulations

Note that any challenge to a denial of a request for records under the common law cannot be made to the Government Records Council, as the Government Records Council only has jurisdiction to adjudicate challenges to denials of OPRA requests.

Requesting Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq)

1. All government records are subject to public access under the Open Public Records Act ("OPRA"), unless specifically exempt.
2. A request for access to a government record under OPRA must be in writing, hand-delivered, mailed, transmitted electronically, or otherwise conveyed to the appropriate custodian. N.J.S.A. 47:1A-5.g. The seven (7) business day response time does not commence until the records custodian receives the request form. If you submit the request form to any other officer or employee, that officer or employee must either forward the request to the appropriate custodian, or direct you to the appropriate custodian. N.J.S.A. 47:1A-5.h.
3. Requestors may submit requests anonymously. If you elect not to provide a name, address, or telephone number, or other means of contact, the custodian is not required to respond until you reappear before the custodian seeking a response to the original request.
4. The fees for duplication of a government record are located below. We will notify you of any special service charges or other additional charges authorized by the State law or regulation before processing your request. Payment shall be made by cash, check or money order.
5. You may be charged a 50% or other deposit when a request for copies exceeds $50.00. The custodian will contact you and advise you of any deposit requirements. Anonymous requests, when permitted, require a deposit of 100% of estimated fees. You agree to pay the balance due upon delivery of the records.
6. Under OPRA, a custodian must deny access to a person who has been convicted of an indictable offense in New Jersey, any other state, or the United States, and who is seeking governmental records containing personal information pertaining to the person's victim or the victim's family. This includes anonymous requests for said information.
7. By law, the city or town must notify you that it grants or denies a report for access to government records within seven (7) business days after the agency custodian of records receives the request. If the record requested is not currently available or is in storage, the custodian will advise you within seven (7) business days after receipt of the request when the record can be made available and the estimated cost for reproduction.
8. You may be denied access to a government record if you request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

Deposits/Fees

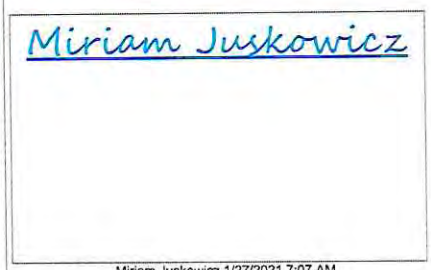
The custodian may require a deposit against costs for reproducing documents sought through an anonymous request whenever the custodian anticipates that the documents requested will cost in excess of $5.00 to reproduce.

Where a special service charge is warranted under OPRA, that amount will be communicated to you as required under the statute. You have the opportunity to review and object to the charge prior to it being incurred. If, however, you approve of the fact and amount of the special service charge, you may be required to pay a deposit or pay in full prior to the reproduction of the documents.

If any additional charges authorized by the State law or regulation are required, that amount will be communicated to you as required under the statute. Payment must be made by cash, check, or money order.

Type	Rate
Letter Size Pages (8.5" x 11")	$0.05 per page
Legal Size Pages (8.5" x 14")	$0.07 per page
Delivery	Delivery/Postage additional depending on delivery type
Other materials (CD, DVD, etc.)	$3.00/CD or DVD
Extras	Special service charge dependent upon request.

Certification



If you are requesting records containing personal information, please certify the following:

Under penalty of N.J.S.A.2C:28-3, I certify that I Have Not been convicted of any indictable offense under the laws of New Jersey, any other state, or the United States.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

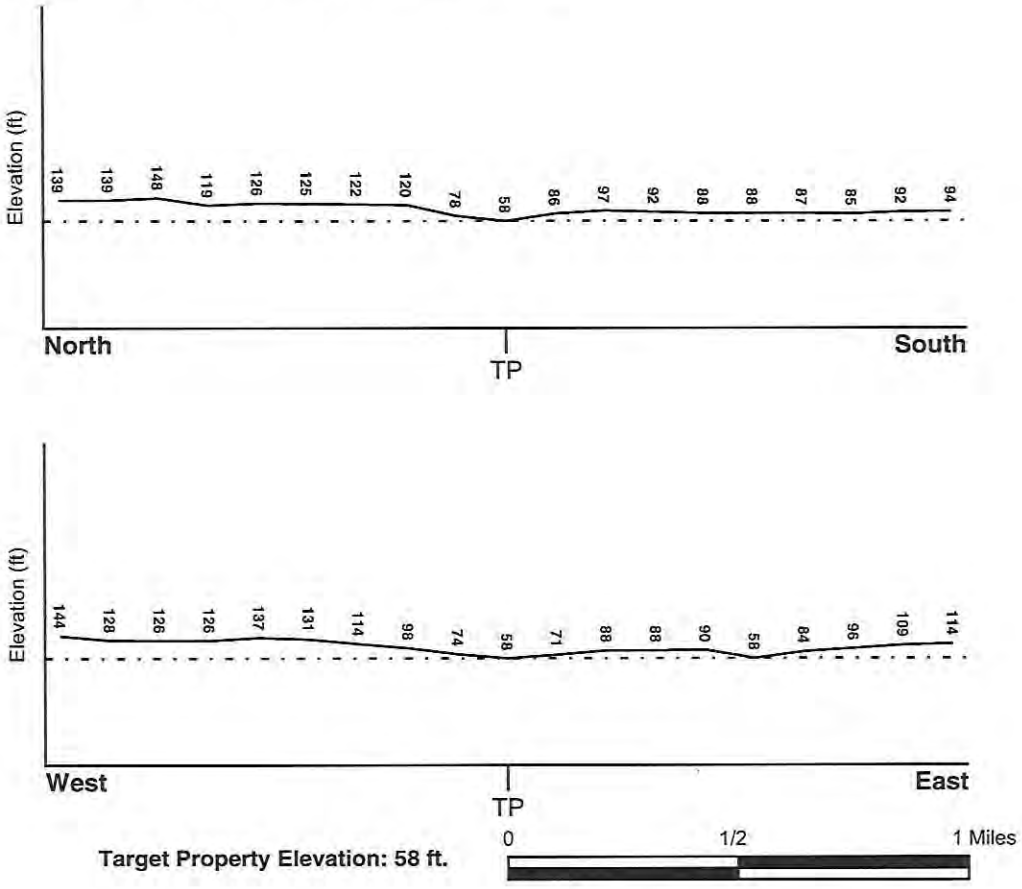
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 58 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970082F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
34003C0220G	FEMA FIRM Flood data
36119C0338F	FEMA FIRM Flood data

3604970101F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

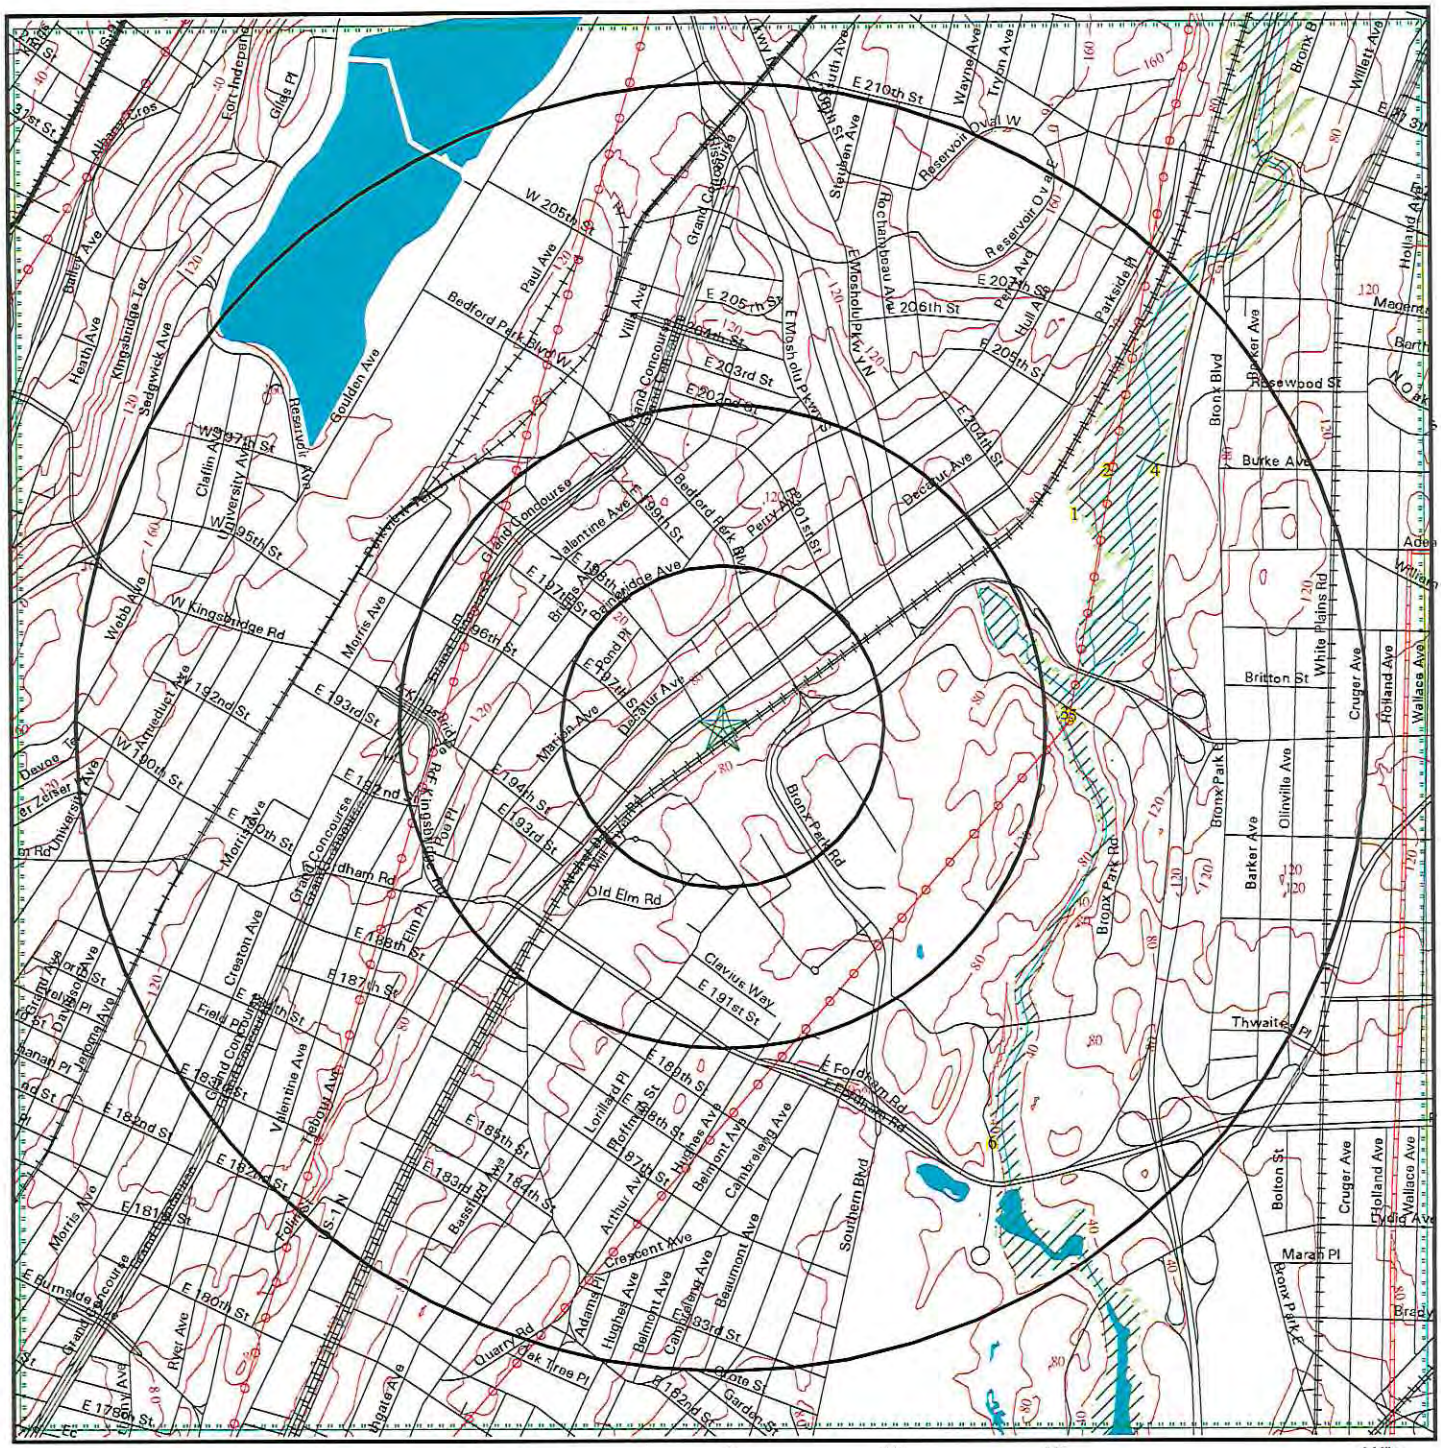
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY



The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported

USER QUESTIONAIRE

Property Address: 2768 Webster Av

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).
Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

☐ yes ☒ no

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

☐ yes ☒ no

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
As the *user* of this *ESA* do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ yes ☒ no

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
Does the purchased price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

☐ yes ☒ no

(5.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).
Are you aware of commonly known or *reasonably ascertainable* information about the property that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user,*

a. Do you know the past uses of the *property*?
   ☐ yes ☒ no
b. Do you know of specific chemicals that are present or once were present at the *property*?
   ☐ yes ☒ no
c. Do you know of spills or other chemical releases that have taken place at the *property*?
   ☐ yes ☒ no
d. Do you know of any environmental cleanups that have taken place at the *property*?
   ☐ yes ☒ no

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

☐ yes ☒ no

Name and Title of Person Interviewed: ☐ owner ☐ partner ☒ manager ☐ superintendent

ENVIRONMENTAL AFFILIATES INC.

Alexander Friedman, EP

Environmental Professional

2003:

Alex Friedman, Director of Operations, established Environmental Affiliates Inc for the purpose of providing commercial and residential environmental assessments and consulting for banks, mortgage companies, attorneys, as well as the private sector.

2003-Present:

Over 3,500 Phase I Site Assessments and 500 Asbestos Surveys inspected and successfully completed by Alex Friedman in New York, New Jersey, Pennsylvania, and Connecticut. Current clients represent the development, insurance, banking, mortgage banking, real estate advisory, and realty communities. These environmental assessments include on site property evaluations and comprehensive reviews of regulatory data and public records to identify environmental concerns. Alex Friedman's extensive formal training combined with his seasoned background, professional certifications, and his years of industry experience provide for diversified environmental services. The success of EAI can be attributed to the consistency, dedication, and quality of service provided.

Areas of Expertise:

- Phase I Site Property Environmental Assessments as per ASTM E 1527-13 ASTM E 1528-06 (Transaction Screen Process)

- Visual assessments for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the subject site.
- Visual assessments for the presence of Asbestos Containing Material (ACM):
    - Asbestos Surveys, Bulk Sampling, and Laboratory analysis New York State
    - Guidance for controlling ACM in buildings
    - Operations and Maintenance Plans (O&Ms)
- Visual assessments regarding Lead Based Paint (LBP) hazards:
    - Operations and Maintenance Plans (O&Ms)

Education:

Bachelor of Science – Interdisciplinary Studies - Environmental Science

Re: Report of Geotechnical Exploration
2740 Webster Avenue
Borough of The Bronx, New York

Dear Mr. Olsen:

In accordance with our agreement dated June 29, 2021, GTA Engineering Services of New York, P.C. (GTA) has performed a geotechnical engineering exploration for the proposed construction of a new 11-story building to be located at 2740 Webster Avenue in the Borough of The Bronx, New York. The exploration consisted of performing 12 Standard Penetration Test borings throughout the project site, visually classifying the encountered soils, and performing limited laboratory testing. This report presents the results of our findings and conclusions regarding subsurface conditions with respect to foundation support and other geotechnical considerations.

Should you have any questions or require additional information, please do not hesitate to contact our office.

Very truly yours,
GTA Engineering Services of New York, P.C.

Douglas Fernandez

REPORT OF GEOTECHNICAL EXPLORATION
2740 WEBSTER AVENUE
BOROUGH OF THE BRONX, NEW YORK
FEBRAURY 2022

INTRODUCTION

GTA Engineering Services of New York, P.C. (GTA) has performed a geotechnical engineering exploration for the proposed construction of a new 11-story building to be located at 2740 Webster Avenue in the Borough of The Bronx, New York. The site location is shown on the Site Location Map, Figure 1 in Appendix A, and identified as Block 3273, Lot 85 on New York City tax maps.

The scope of this study included a field exploration, laboratory testing, and engineering analyses. The field exploration consisted of 12 Standard Penetration Test (SPT) borings. Samples were obtained from the borings and were visually examined and subjected to limited laboratory testing to further characterize general subsurface conditions. Conclusions and recommendations were derived from engineering analyses of field and laboratory data.

SITE AND PROJECT DESCRIPTION

The project site is located on the south side of Webster Avenue between East 195th and 197th Streets. The site is currently occupied by an active parking lot. The site is neighbored to the east by an Metro North easement, and to the south by an Metro North railway running parallel with the site.

We understand that the proposed building will be an 11-story mixed-use structure with a partial cellar level established approximately 11 feet below the existing sidewalk level. The building will occupy a base footprint of approximately 22,669 square feet. The tower portion of the structure will occupy a base footprint of 19,486 square feet. After discussions with the client, we understand the building may be redesigned to have a full cellar level.

SUBSURFACE EXPLORATION

The subsurface exploration program performed for this study consisted of drilling 12 Standard Penetration Test (SPT) borings. The test borings were performed by DK Drilling of New York, Inc. between December 7th and 16th, 2022. The borings were advanced to completion depths ranging from approximately 27 to 100 feet below the existing ground surface using truck-mounted drilling equipment. A combination of Hollow Stem Auger (HSA) and mud-rotary drilling techniques were used to advance the borings.

GTA located the explorations in the field, documented drilling procedures, maintained continuous logs of the explorations, and obtained soil and rock samples. The approximate locations of the explorations are shown on the Boring Location Plan, which is included as Figure 2 in Appendix A. Detailed descriptions of the encountered subsurface conditions are indicated on the Logs of Borings which are presented in Appendix B.

Standard Penetration Testing (SPT) was performed using an automatic hammer in general accordance with procedures of ASTM D1586. Soil samples were obtained in two- to five foot increments within the boreholes. The SPT involves driving a 2-inch O.D., 1⅜-inch I.D. split-spoon sampler with a 140-pound hammer free-falling from a height of 30-inches. The number of blows required to drive the sampler was recorded in six-inch intervals. The SPT N-value, given as blows per foot, is defined as the total number of blows required to drive the sampler from the 6- to 18-inch interval.

Soil and rock samples obtained from the explorations were brought to GTA's laboratory for visual classification by a geotechnical engineer and limited laboratory testing. The soils were classified in accordance with the Unified Classification System (USCS) and New York City Building Code (NYCBC). The descriptions provided on the logs are therefore based on visual observations of the samples as summarized in the Notes for Exploration Logs and Notes for Rock Descriptions included in Appendix B, and supplemented by the laboratory test results.

SITE GEOLOGY

According to the Bedrock Geology Map of New York (1995), the site is at a contact point between the Fordham gneiss and Inwood marble geological units. The contact point between these two units is typically associated with both fractured and brecciated bedrock faults that act as conduits for ground water to chemically weather the bedrock. This process creates a thick layer of Saprolite (chemically weathered bedrock) near the contact that overlies the bedrock, resulting in large drop offs in the elevation of competent bedrock.

SUBSURFACE CONDITIONS

The subsurface conditions encountered in the borings generally consisted of a layer of fill material overlying natural soils of glacial origin, which were underlain by residual soils or soft rock derived from the in-place weathering of the parent bedrock and generally reflects the geological mapping. Generalized descriptions of these strata are presented below in order of increasing depth. Individual boring logs are presented in Appendix B.

Surface Materials: An approximately 3-inch-thick layer of asphalt or gravel was present at the ground surface in the borings.

Fill: A layer of fill material, approximately 6 to 13 feet thick was encountered below the surface materials in the borings. The fill material consisted of silty sand with gravel and construction debris. Boulders and obstructions were also encountered within the fill, and remnant foundation elements may also be present. The fill was loose to very dense in relative density based on the SPT N-values and was classified as “uncontrolled fill,” Class 7 material in accordance with the NYCBC.

Glacial Soils: Natural glacial soils were encountered beneath the fill and surface materials in the borings and extended to depths ranging from approximately 25 to 55 feet below the existing site grade. The natural soils typically consisted of poorly-graded sands and silty sands with varying amounts of gravel, with occasional clay layers encountered in several borings. The soils were medium dense to very dense in relative density, and classified as SM or SP-SM, Classes 3a and 3b in accordance with the USCS and NYCBC, respectively. The clay layers were medium stiff to

hard in terms of relative density, and classified as CL. Classes 4c, 4b, and 4a in accordance with the USCS and NYCBC, respectively.

Residual Soil and Soft Rock: Residual soil and soft rock was encountered beneath the glacial material in the deep borings at depths ranging from approximately 25 to 55 feet and extended to the completion depths of the borings. The residual soil maintained the fabric of the parent bedrock but was completely weathered to a stiff to hard sandy clay (CL), Class 4a and 4b. Below the residual soil, the material encountered was very hard, with SPT "N" values above 50, and was classified as Soft Rock, Class 1d. The weathered bedrock was not competent enough to perform any rock coring.

Groundwater: Based on the moisture conditions of the recovered soil samples, groundwater was encountered about 20 to 24 feet below existing site grades. Note that groundwater levels can fluctuate due to seasonal variations in precipitation, and additional shallow perched groundwater may be encountered following periods of inclement weather.

LABORATORY TESTING

Laboratory testing performed for this study included gradation analyses for classification of the soils in accordance with the Unified Soil Classification System (USCS), and natural moisture content determinations. Classification of soils in accordance with the USCS provides information regarding the engineering properties of the on-site materials that will likely support foundations, slabs, and pavements, or be used as controlled compacted fill, and backfill. The results of the gradation testing performed for this study are summarized in the table below. Detailed results of the gradation testing performed for this study are included in Appendix C.

SUMMARY OF GRADATION TESTING

BORING LOCATION	DEPTH (FT)	NATURAL MOISTURE CONTENT (%)	USCS CLASSIFICATION
B-1	65	26.8	Silty SAND (SM)
B-2	35	10.2	Clayey SAND with Gravel (SC)
B-5	25	10.5	Silty SAND with Gravel (SM)

BORING LOCATION	DEPTH (FT)	NATURAL MOISTURE CONTENT (%)	USCS CLASSIFICATION
B-9	55	18.3	Silty SAND (SM)
B-11	15	4.7	Poorly-graded SAND with Silt (SP-SM)
B-12	35	23.9	Silty SAND (SM)

CONCLUSIONS AND RECOMMENDATIONS

It is GTA's opinion that the proposed development of the site is feasible provided that the geotechnical recommendations are followed, and that the standard level of care is maintained during construction. Geotechnical issues that may impact site development include the presence of deep fill, the possible need for Support of Excavation (SOE) Walls, variable subsurface conditions, and the presence of the Metro North railway to the southeast. The following sections of the report provide the relevant geotechnical design parameters for the design and construction of the proposed building.

Metro North Railroad

A Metro North rail line is present to the southeast of the project site, with an easement located to the north of the proposed building. Proposed foundations located along the property line may be considered to have an impact on the Metro North structures. It may be necessary to submit a Support of Excavation (SOE) design and the design for subsurface structural elements to the Metro North for review prior to the start of work. Survey and vibration monitoring of its structures may be required during construction.

Shallow Foundations – Mat Slab and Spread Footings

The proposed structure may be supported by conventional shallow spread foundations bearing in the natural glacial soils, Class 3b or 3a, at a depth of at least 13 feet below the existing site grade. Spread footings bearing in the glacial soils at this depth can be designed using an allowable bearing pressure of 5,000 pounds per square foot (psf). Settlement of footings bearing in the natural soils is anticipated to be less than 1-inch. The at grade portion of the building will have to supported at this depth due to deep fill and soft soils encountered in the upper 13 feet. It

may be cost effective to redesign the building to have a full cellar to make use of the deep excavations required.

If the structure is redesigned to have a full basement level, and the allowable bearing pressures result in spread footings that are becoming too large, we believe the structure can be supported by a mat foundation bearing in the natural soil about 15 feet below the existing site grade. Settlements on the order of ¾-inch to 1-inch are estimated for a mat foundation bearing at this depth assuming an allowable bearing pressure of 3,500 pounds per square foot (psf). A modulus of subgrade reaction of 150 pounds per cubic inch may be used for the design of the mat. If a mat design is used, GTA should be allowed the opportunity to review the bearing pressure diagram to confirm if has been designed with the recommendations of this report.

Where soft/loose natural soils, clay, or existing fill materials are encountered at the footing subgrade or within the zone of foundation stress influence, the foundation excavations should extend to stable natural materials. Footing subgrades requiring over-excavation may be backfilled to the design bearing grade with lean concrete or crushed stone meeting the gradational requirements of AASHTO Size No. 57. The decision to undercut footings or perform other foundation remedial measures should be made in the field by the geotechnical engineer during footing construction. If a mat foundation is used, we recommend excavating the soil subgrade and placing a 6-inch layer of crushed aggregate over the exposed support to help maintain the stability of the subgrade and facilitate dewatering during periods of inclement weather.

Footing subgrades should be thoroughly cleaned of all mud, debris, and loose material prior to the placement of concrete. The subgrade must be evaluated to verify the bearing capacity of the soil and documented by an engineering technician working under the supervision of a professional engineer licensed in the State of New York. Detailed foundation subgrade evaluations should be performed as sections are prepared prior to the placement of reinforcing steel or concrete to confirm that the design allowable soil bearing capacity is available. The subgrade evaluations should be performed using a combination of visual observation, hand-rod probing, Dynamic Cone Penetrometer testing, and comparisons with the test borings.

Seismic Information

The proposed structure must be designed in accordance with all applicable New York City Building Code seismic design criteria. The site classes are based on the average soil properties in the upper 100 feet. It is GTA's opinion that the soils encountered in the borings most closely resemble a "Stiff Soil Profile," Site Class D. The soil profile is based on Table 1613.5.2 of the NYCBC, and the peak accelerations may be estimated using Tables 1613.5.3(1) and 1613.5.3(2). It is our assessment that liquefaction is unlikely based on the subsurface conditions encountered in the borings.

Excavation and Support of Excavation Walls

All construction excavations should be sloped and shored per OSHA excavation regulations or stricter local governing safety codes. It is GTA's opinion that the existing fill, undisturbed natural soils, or controlled compacted fill composed of similarly-graded materials would generally be classified as "Type C" soils under the OSHA excavation regulations. Flatter excavation sideslopes will be required where water seepage occurs. Positive drainage should be maintained during construction to prevent inundation of subgrade soils by surface water runoff.

We anticipate that Support of excavation (SOE) walls may be required along portions of the property line where proper sideslopes cannot be maintained in order to prevent ground loss and undermining of adjacent structures, sidewalks, utilities and roadways. The SOE walls will need to be designed for the appropriate surcharge loads, hydrostatic and lateral earth pressures. We believe drilled soldier piles and timber lagging would be an appropriate SOE system for this project. Depending on the depth of the excavation and type of soldier piles used, one or more levels of bracing may be required to resist lateral earth pressures. The SOE maybe designed using the parameters presented in the *Lateral Earth Pressure and Damp/Waterproofing* section of this report. Survey monitoring should be performed on the SOE walls to measure structural deflections and potential ground movements.

Lateral Earth Pressure and Damp/Waterproofing

Below-grade foundation walls, and temporary SOE walls (if required) will have to be designed to resist the lateral earth pressure. These elements should also be designed for appropriate hydrostatic and surcharge pressures. The foundation walls for this project are expected to be braced by the cellar and first floor slabs and thus restrained from movement at the top, creating an "at-rest" earth pressure condition. Surcharge loads from adjacent floor slabs, roadways, elevated rail structures etc. must also be considered. The following soil properties can be used for design of below grade structural elements, assuming horizontal backfill:

- Soil Unit Weight (γ) = 125 pcf
- Internal Friction Angle (φ) = 30°
- Active Earth Pressure Coefficient (K_A) = 0.3
- Passive Earth Pressure Coefficient (K_P) = 3.0
- At-Rest Earth Pressure Coefficient (K_0) = 0.5

To reduce dampness within below grade areas, GTA recommends that the foundation walls be damp proofed or waterproofed in accordance with requirements of Section 1807 of the NYCBC. Damp proofing/waterproofing can be accomplished through the use of mastics, bituthene membranes, or pre-applied membranes. A drainage composite should be placed over the damp proofing/waterproofing material for protection during backfilling. Seepage water may become trapped against foundation walls, elevator pits and utility pits at locations where the foundation elements extend into the bedrock stratum. A perimeter drain or underslab should be considered to protect against stormwater infiltration and may discharge into an approved drainage system that complies with the *New York City Plumbing Code*. The perimeter drain should consist of a minimum 4-inch diameter perforated pipe encased by No. 57 crushed aggregate and wrapped in a non-woven filter fabric.

Utilities

GTA has not been provided with information regarding proposed underground utilities; however, it is our opinion that the natural soils or controlled compacted fill are considered suitable for support of subsurface utilities, which will likely include water, storm, and sanitary sewer lines. GTA recommends that a six-inch thick granular bedding consisting of AASHTO No. 57 stone

aggregate be placed where loose or soft soil is encountered to provide uniform support as dictated by site conditions. Utilities installed below pavements, sidewalks, and other structural areas should be backfilled using controlled fill, compacted in accordance with the *Backfill and Compaction* section of this report.

Contractors should provide adequate earth support and dewatering systems in utility trench excavations as required. Problems associated with water seepage include partial loss of stability, sloughing of soils, and running sands. These problems can be reduced at the time of construction through the use of "sump and pump" dewatering techniques.

Backfill and Compaction

All fill placed beneath sidewalks, slabs-on-grade, pavements, and used for backfilling foundation walls should consist of controlled compacted fill. Backfill should be spread in layers on the order of 8 to 12 inches in loose thickness and each layer should be compacted to at least 95 percent of the maximum dry density at moisture contents required to achieve the required densities per the ASTM D-1557 (modified Proctor) test procedure. All compactive effort should be verified by in-place density testing by an engineering technician working under the supervision of a professional engineer licensed in the State of New York. The New York City Building Code requires that fill subgrades and each lift of fill be observed and tested on a full-time basis.

The natural site soils are considered suitable for use as controlled fill with some limitations. Moisture conditioning of the on-site soils may be necessary to attain the recommended degree of compaction, depending on the prevailing weather conditions at the time the earthwork is performed. Off-site borrow, if required, should meet USCS designation SM, SP, SW, GP, GM, or GW and be approved by the geotechnical engineer before use.

Pre-construction Survey and Monitoring

A pre-construction survey should be conducted for each of the neighboring buildings, structures, and properties to document existing conditions. Each building and/or structure should be inspected and photographed, inside and out, to record existing conditions. The pre-condition

survey will provide the owner and foundation contractor with a baseline to assess potential future damage claims. The survey should be prepared prior to the start of construction.

A survey-monitoring program should be implemented for the neighboring buildings, particularly in areas adjacent to foundation work. A minimum of three benchmark locations should be established on the exterior of each of the adjacent buildings prior to the start of new construction. The benchmarks should be read a minimum of two times per week throughout the duration of the foundation construction. Any observable movement, horizontal or vertical displacement, should be immediately brought to the attention of the construction manager and excavation should be suspended until the issue is addressed by the Owner and his appropriate professionals. Vibration monitoring should also be performed during pile driving or drilling operations, if required for SOE walls. Monitoring of the MTA structures will need to be performed as required in accordance with MTA standards.

LIMITATIONS

This report, including all supporting exploration logs, field data, field notes, laboratory testing, calculations, estimates and other documents prepared by GTA in connection with this Project have been prepared for the exclusive use of Longhouse Properties (Client) pursuant to the June 29, 2021 agreement between GTA and the Client, and in accordance with generally accepted engineering practice. All terms and conditions set forth in the Agreement and the General Provisions attached thereto are incorporated herein by reference. No warranty, express or implied, is made herein. Use and reproduction of this report by any other person without the expressed written permission of GTA and Longhouse Properties is unauthorized and such use is at the sole risk of the user.

The analysis and recommendations contained in this report are based on the data obtained from limited observation of the encountered materials. The test borings indicate soil conditions only at the test boring locations and times and only at the depth penetrated. It does not necessarily reflect strata or variations that may exist between or beyond the exploration locations. Consequently, the analysis and recommendations must be considered preliminary

until the subsurface conditions can be further evaluated by additional explorations and verified by direct observation at the time of construction. If variations of subsurface conditions from those described in this preliminary report are noted during construction, recommendations in this report may need to be re-evaluated.

In the event that any changes in the nature, design, or location of the improvements are planned, the conclusions and recommendations contained in this report should not be considered valid unless the changes are reviewed and conclusions of this report are verified in writing. GTA is not responsible for any claims, damages, or liability associated with interpretation of subsurface data or reuse of the subsurface data or engineering analysis without the expressed written authorization of GTA.

The scope of our services for this geotechnical exploration did not include any environmental assessment or investigation for the presence or absence of wetlands, or hazardous or toxic materials in the soil, surface water, groundwater or air, on or below or around this site. Any statements in this report or on the logs regarding odors or unusual or suspicious items or conditions observed are strictly for the information of our Client.

This report and the attached log are instruments of service. The subject matter of this report is limited to the facts and matters stated herein. Absence of a reference to any other conditions or subject matter shall not be construed by the reader to imply approval by the writer. We appreciate the opportunity to provide assistance to you for this project. Please contact us at (201) 641-1850 if you have questions regarding this report.

34211441 **GTA Engineering Services of New York, P.C.**

Important Information about Your

Geotechnical-Engineering Report

Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.

While you cannot eliminate all such risks, you can manage them. The following information is provided to help.

Geotechnical Services Are Performed for Specific Purposes, Persons, and Projects

Geotechnical engineers structure their services to meet the specific needs of their clients. A geotechnical-engineering study conducted for a civil engineer may not fulfill the needs of a construction contractor or even another civil engineer. Because each geotechnical-engineering study is unique, each geotechnical-engineering report is unique, prepared *solely* for the client. No one except you should rely on your geotechnical engineering report without first conferring with the geotechnical engineer who prepared it. *And no one — not even you —* should apply the report for any purpose or project except the one originally contemplated.

Read the Full Report

Serious problems have occurred because those relying on a geotechnical-engineering report did not read it all. Do not rely on an executive summary. Do not read selected elements only.

A Geotechnical-Engineering Report Is Based on a Unique Set of Project-Specific Factors

Geotechnical engineers consider many unique, project-specific factors when establishing the scope of a study. Typical factors include: the client's goals, objectives, and risk-management preferences; the general nature of the structure involved, its size, and configuration; the location of the structure on the site; and other planned or existing site improvements, such as access roads, parking lots, and underground utilities. Unless the geotechnical engineer who conducted the study specifically indicates otherwise, do not rely on a geotechnical engineering report that was:

- not prepared for you,
- not prepared for your project,
- not prepared for the specific site explored, or
- completed before important project changes were made.

Typical changes that can erode the reliability of an existing geotechnical-engineering report include those that affect:

- the function of the proposed structure, as when it's changed from a parking garage to an office building, or from a light-industrial plant to a refrigerated warehouse,
- elevation, configuration, location, orientation, or weight of the proposed structure,
- composition of the design team, or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project changes—even minor ones—and request an assessment of their impact. *Geotechnical engineers cannot accept responsibility or liability for problems that occur because their reports do not consider developments of which they were not informed.*

Subsurface Conditions Can Change

A geotechnical-engineering report is based on conditions that existed at the time the study was performed. *Do not rely on a geotechnical-engineering report* whose adequacy may have been affected by: the passage of time; by man-made events, such as construction on or adjacent to the site; or by natural events, such as floods, droughts, earthquakes, or groundwater fluctuations. *Always* contact the geotechnical engineer before applying the report to determine if it is still reliable. A minor amount of additional testing or analysis could prevent major problems.

Most Geotechnical Findings Are Professional Opinions

Site exploration identifies subsurface conditions only at those points where subsurface tests are conducted or samples are taken. Geotechnical engineers review field and laboratory data and then apply their professional judgment to render an opinion about subsurface conditions throughout the site. Actual subsurface conditions may differ—sometimes significantly—from those indicated in your report. Retaining the geotechnical engineer who developed your report to provide construction observation is the most effective method of managing the risks associated with unanticipated conditions.

A Report's Recommendations Are *Not* Final

Do not overrely on the construction recommendations included in your report. *Those recommendations are not final,* because geotechnical engineers develop them principally from judgment and opinion. Geotechnical engineers can finalize their recommendations *only* by observing actual

subsurface conditions revealed during construction. *The geotechnical engineer who developed your report cannot assume responsibility or liability for the report's recommendations if that engineer does not perform construction observation.*

A Geotechnical Engineering Report Is Subject to Misinterpretation

Other design team members' misinterpretation of geotechnical-engineering reports has resulted in costly problems. Lower that risk by having your geotechnical engineer confer with appropriate members of the design team after submitting the report. Also retain your geotechnical engineer to review pertinent elements of the design team's plans and specifications. Contractors can also misinterpret a geotechnical-engineering report. Reduce that risk by having your geotechnical engineer participate in prebid and preconstruction conferences, and by providing construction observation.

Do Not Redraw the Engineer's Logs

Geotechnical engineers prepare final boring and testing logs based upon their interpretation of field logs and laboratory data. To prevent errors or omissions, the logs included in a geotechnical engineering report should *never* be redrawn for inclusion in architectural or other design drawings. Only photographic or electronic reproduction is acceptable, *but recognize that separating logs from the report can elevate risk.*

Give Contractors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can make contractors liable for unanticipated subsurface conditions by limiting what they provide for bid preparation. To help prevent costly problems, give contractors the complete geotechnical-engineering report, *but* preface it with a clearly written letter of transmittal. In that letter, advise contractors that the report was not prepared for purposes of bid development and that the report's accuracy is limited; encourage them to confer with the geotechnical engineer who prepared the report (a modest fee may be required) and/or to conduct additional study to obtain the specific types of information they need or prefer. A prebid conference can also be valuable. *Be sure contractors have sufficient time* to perform additional study. Only then might you be in a position to give contractors the best information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions.

Read Responsibility Provisions Closely

Some clients, design professionals, and contractors do not recognize that geotechnical engineering is far less exact than other engineering disciplines. This lack of understanding has created unrealistic expectations that have led to disappointments, claims, and disputes. To help reduce the risk of such outcomes, geotechnical engineers commonly include a variety of explanatory provisions in their reports. Sometimes labeled "limitations," many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

Geoenvironmental Concerns Are Not Covered

The equipment, techniques, and personnel used to perform a *geoenvironmental* study differ significantly from those used to perform a *geotechnical* study. For that reason, a geotechnical-engineering report does not usually relate any geoenvironmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated environmental problems have led to numerous project failures.* If you have not yet obtained your own geoenvironmental information, ask your geotechnical consultant for risk management guidance. *Do not rely on an environmental report prepared for someone else.*

Obtain Professional Assistance To Deal with Mold

Diverse strategies can be applied during building design, construction, operation, and maintenance to prevent significant amounts of mold from growing on indoor surfaces. To be effective, all such strategies should be devised for the *express purpose* of mold prevention, integrated into a comprehensive plan, and executed with diligent oversight by a professional mold-prevention consultant. Because just a small amount of water or moisture can lead to the development of severe mold infestations, many mold-prevention strategies focus on keeping building surfaces dry. While groundwater, water infiltration, and similar issues may have been addressed as part of the geotechnical-engineering study whose findings are conveyed in this report, the geotechnical engineer in charge of this project is not a mold-prevention consultant; ***none of the services performed in connection with the geotechnical engineer's study were designed or conducted for the purpose of mold prevention. Proper implementation of the recommendations conveyed in this report will not of itself be sufficient to prevent mold from growing in or on the structure involved.***

Rely, on Your GBA-Member Geotechncial Engineer for Additional Assistance

Membership in the GEOPROFESSIONAL BUSINESS ASSOCIATION exposes geotechnical engineers to a wide array of risk confrontaton techniques that can be of genuine benefit for everyone involved with a construction project. Confer with your GBA-member geotechnical engineer for more information.

NOTES FOR ROCK DESCRIPTION

WEATHERING TERM	DESCRIPTION
FRESH	ROCK CRYSTALS BRIGHT. COLOR OF CORE IS CONSISTENT. JOINTS SHOW LITTLE STAINING.
SLIGHTLY WEATHERED	ROCK GENERALLY FRESH. JOINTS STAINED AND DISCOLORATION AROUND JOINTS MAY EXTEND UP TO 0.5 INCHES INTO ROCK. SOME CRYSTALS MAY APPEAR DULL OR DISCOLORED.
MODERATELY WEATHERED	SIGNIFICANT PORTIONS OF ROCK SHOW DISCOLORATION. MANY VISIBLE MINERALS ARE DULL AND DISCOLORED. ROCK HAS DULL SOUND WHEN HIT BY HAMMER AND HAS SIGNIFICANT STRENGTH LOSS.
HIGHLY WEATHERED	ALL ROCK IS DISCOLORED AND STAINED. ROCK FABRIC IS EVIDENT BUT ZONES OF ROCK HAVE BEEN REDUCED TO SOFT STRENGTH. SOME HARD PIECES OF ROCK ARE USUALLY PRESENT BETWEEN SOFT ZONES.

HARDNESS DESCRIPTION	STRENGTH RANGE (PSI)	FIELD HARDNESS TEST
VERY HARD	>10,000	CANNOT BE SCRATCHED WITH KNIFE. CORE RINGS UNDER HARD BLOWS OF A HAMMER.
HARD	3,500 to 10,000	DIFFICULT TO SCRATCH WITH KNIFE. HARD BLOW OF HAMMER REQUIRED TO BREAK.
MODERATELY HARD	1,500 to 3,500	CAN BE SCRATCHED WITH KNIFE. MODERATE BLOW OF HAMMER BREAKS CORE.
SOFT	500 to 1,500	CAN BE GOUGED OR GROOVED WITH KNIFE. SMALL PIECES CAN BE BROKEN BY HAND.

FRACTURING CLASSIFICATION	DESCRIPTION
HIGHLY FRACTURED	LESS THAN 2 INCHES
MODERATELY FRACTURED	2 INCHES TO 12 INCHES
SLIGHTLY FRACTURED	12 INCHES TO 36 INCHES
MASSIVE	GREATER THAN 36 INCHES

BEDDING DESCRIPTION	SEPARATION
VERY THIN	LESS THAN 2 INCHES
THIN	2 INCHES TO 1 FOOT
MEDIUM	1 FOOT TO 3 FEET
THICK	3 FEET TO 10 FEET
VERY THICK	MORE THAN 10 FEET

GRAPHIC SYMBOL	ROCK DESCRIPTION
	LIMESTONE/DOLOMITE/MARBLE (CARBONATE ROCK)
	SHALE/MUDSTONE/SILTSTONE (FINE-GRAINED SEDIMENTARY ROCKS)
	SANDSTONE
	SLATE/PHYLLITE (FINE-GRAINED METAMORPHIC ROCKS)
	GNEISS/SCHIST (COARSE-GRAINED METAMORPHIC ROCKS)
	BASALT/DIABASE/GABBRO (IGNEOUS ROCKS)
	CONGLOMERATE
	GYPSUM

DESCRIPTION SYNTAX: COLOR, WEATHERING, HARDNESS, FRACTURING, ROCK TYPE, "WITH" BEDDING (IF SEDIMENTARY).

$$\text{ROCK QUALITY DESIGNATION (RQD)} = \left[\frac{\text{TOTAL LENGTH OF CORE PIECES THAT ARE 4-INCHES OR LONGER (IN.)}}{\text{TOTAL LENGTH OF CORE RUN (IN.)}} \right] \text{X } 100\%$$

USCO	Unrestricted Use Soil Cleanup Objective
VOC	Volatile Organic Compound

1.0 INTRODUCTION

SESI Consulting Engineers (SESI), on behalf of South Bronx Development I LLC, has completed our Phase II Investigation for the referenced Site located at 2752-2768 Webster Avenue in the Bronx, Bronx County, New York. It should be noted that this Phase II Environmental Site Assessment (ESA) Report has been developed to support your due diligence and a future brownfield cleanup application for entry into the New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP). The results of our investigation are provided herein.

1.1 SITE SETTING

The Site consists of two (2) lots located at 2752-2768 Webster Avenue in Bronx, Bronx County, New York. 2752-2768 Webster Avenue is an approximately 1.4-acre parcel identified on New York City tax mapping as Block 3273, Lots 91 and 100. A Site Location Map is provided as **Figure 1.1**. A Site Plan is included as **Figure 1.2**.

The Subject Property is improved with one (1) approximately 9.350-square feet (sf) one-to-two-story warehouse and one (1) approximately 2,330-sf two-story former automotive repair garage building. The buildings were constructed in 1906. The subject property is currently vacant and is owned by Bandry, LLC.

The Subject Property was initially developed prior to 1896. Railroad tracks have been present at the Subject Property since at least 1896. Historical Subject Property operations included a sewer pipe yard in 1900, freight house from 1900 to 1950, engine room in 1945, cold storage and substation from at least 1978 to 2007, and automotive repair from at least 1992 to 2010. SESI identified that the most recent operations at the Subject Property included a substation, cold storage facility, alcohol/liquor distributor, restaurants, and automotive repair garages.

According to the New York City Searchable Property Environmental E-Database (SPEED), the Site has an E-designation. The E-designation process ensures that sampling and remediation take place at the Site to avoid any significant impacts related to hazardous materials. The E-designation process requires that the fee owner of the Site conducts testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Department of Environmental Protection (NYCDEP) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements).

The E-designation process also includes a mandatory construction-related health and safety plan which must be approved by NYCDEP.

Additionally, according to the NYC SPEED, the Site is located within a Potential Environmental Justice Area (PEJA). Redevelopment sites within PEJAs are subject to increased regulatory oversight and community outreach requirements during redevelopment.

The Site is bordered by a laydown yard followed by Metro-North railroad and Fordham University and Preparatory School to the southeast, an access road to the laydown yard followed by a parking lot to the southwest, and mixed-use commercial and residential buildings to the northeast and northwest beyond Webster Avenue.

1.2 PROPOSED DEVELOPMENT

The proposed Site development is anticipated to consist of the redevelopment of the Site with 100% affordable mixed-use commercial and residential apartment buildings. Formal Site Plans are anticipated to be developed during the design phase of the project.

1.3 SITE GEOLOGY

Geologically, the Site soils are mapped as urban land outwash substratum overlying bedrock, consisting of asphalt over human-transported material overlying native gravelly sand. This Phase II ESA encountered historic fill materials generally consisting of coarse to fine sand, variable amounts of gravel, silt, and clay, beneath the asphalt pavement in each boring. Debris within the historic fill layer include concrete, metal, wood and/or brick. The historic fill materials were encountered between 2.0 feet below ground surface (fbgs) to 6.0 fbgs. Groundwater was encountered as shallow as 11 fbgs during SESI's due diligence investigations.

1.4 PREVIOUS INVESTIGATIONS

The following environmental report was prepared for the Subject Property and is summarized in the following sections:

- "Phase I Environmental Site Assessment 2768 Webster Avenue," prepared by Environmental Affiliates, Inc., dated January 2021.

The Phase I ESA prepared by EAI identified the following two (2) Recognized Environmental Conditions (RECs) at the Site:

1. The Subject Property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that polychlorinated biphenyl (PCB)-containing equipment was utilized at the Site and may have discharged to the subsurface.
2. The Site housed an auto repair facility from 1993 to 2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Site), and debris.

EAI recommended performing a Phase II ESA to determine if the above RECs have impacted subsurface conditions at the Site.

In addition to the report discussed above, SESI performed a due diligence geotechnical investigation in June 2024 which will be provided under separate cover.

2.0 SUBSURFACE INVESTIGATION

SESI completed a Phase II ESA at the Site from June 10th to June 14th, 2024. In total, twenty-eight (28) soil borings were completed to a maximum depth of 27.0 feet below ground surface (fbgs). Two (2) of the soil borings were converted to temporary wellpoints and three (3) of the soil borings were converted to soil vapor probes. The sampling locations are depicted on **Figure 2.1** attached**.** The subsurface investigation is further discussed in the following sections of this report.

The soil borings were advanced with the dual purpose of completing a preliminary geotechnical investigation of the Site. The Geotechnical Investigation Report has been provided under separate cover.

2.1.1 UTILITY CLEARANCE AND GEOPHYSICAL SURVEY

Prior to conducting subsurface drilling for the investigation, SESI's drilling contractor, Coastal Environmental Solutions, Inc., contacted the New York One Call utility mark-out system. In addition, SESI retained a private utility locator to perform a geophysical survey using ground penetrating radar (GPR) and electromagnetic detection equipment to clear proposed sample locations.

2.1.2 SOIL INVESTIGATION

Twenty-eight (28) soil borings were advanced throughout the Site using direct push drilling techniques to a maximum depth of 27.0 fbgs. The recovered soil cores from the borings were field screened with a photoionization detector (PID) and observed for visual and olfactory indications of contamination. Elevated PID readings up to 9.7 parts per million (ppm) were observed within borings B-1 and B-2 advanced in the vicinity of the former engine room, and elevated PID readings up to 68 ppm accompanied by petroleum odors were observed within an oily tar-like substance within borings B-12, B-15, and B-25 advanced in the vicinity of the former substation. Additionally, an unknown odor accompanied by an elevated PID reading (6.3 ppm) was observed within boring B-14 advanced in the vicinity of the former substation. It should be noted that none of the borings were advanced below the former substation; however, it is anticipated that this will occur during formal remedial investigation at the Site.

Historic fill was observed in borings B-1 through B-3, B-6 through B-10, B-12, B-14 through B-16, B-27, and B-30 to a maximum depth of 6.0 fbgs. The historic fill material generally consisted of coarse to fine sand with variable amounts of gravel, silt, and clay. Select borings encountered debris

including asphalt, brick, and/or millings within the historic fill layer. **Table 2.1** below presents a list of the borings, boring depth, maximum PID reading, samples collected, sampling date, sample media, and analysis completed. The soil boring logs are presented in **Appendix A**. A total of twelve (12) soil samples were collected from the borings and submitted under proper chain of custody (COC) to Alpha Analytical (Alpha), a NYSDOH Environmental Laboratory Approval Program (ELAP)-certified laboratory. All soil samples were collected as discrete grab samples and were not composited.

Table 2.1 – Sample Summary Table

Boring ID	Boring Depth (fbgs)	Maximum PID Reading (ppm)	Sample ID	Sample Date	Sample Media	Analysis
B-1	15.0	9.7	B-1(11-11.5)	6/10/2024	Soil	TCL+30/TAL, 1,4-dioxane & PFAS

2.1.3 SOIL ANALYTICAL RESULTS

A total of twelve (12) subsurface soil samples were collected during the investigation to evaluate the potential impacts from former Site uses and to partially satisfy the requirements of potentially entering the BCP. The soil samples were submitted to Alpha for analysis of the Target Compound List (TCL) plus thirty (30) tentatively identified compounds (TICs)/Target Analyte List (TAL) suite, which includes VOCs, SVOCs, PCBs, TAL metals, pesticides, and cyanide, in addition to 1,4-dioxane and PFAS.

A summary table of the analytical results compared to NYSDEC USCOs, RSCOs, RRSCOs, CSCOs, and ISCOs is presented in the attached **Table 2.2**. The laboratory analytical reports are provided in **Appendix B** and include additional results from investigations performed on off-Site properties. The following **Table 2.3** presents a summary of NYSDEC SCO exceedances. The soil sampling locations are shown on **Figure 2.2.**

Notes:
Mg/kg – Milligrams per kilogram
Q – Sample Qualifier
ND – Analyte was not detected
J – Estimated value
I – The lower value for the two columns has been reported due to obvious interference
P – The RPD between the results for the two columns exceeds the method-specific criteria
E - Concentration of analyte exceeds range of calibration curve and/or linear range of instrument

Key:

Value Exceeds USCO.
Value Exceeds RSCO.
Value Exceeds RRSCO.
Value Exceeds CSCO.
Value Exceeds ISCO.

Exceedances of VOCs were identified and include the following: naphthalene (1 USCO / RSCO / RRSCO / CUSCO / ISCO exceedance), methylene chloride (1 USCO exceedance), 1,3,5-trimethylbenzene (1 USCO exceedance), 1,2,4-trimethylbenzene (1 USCO exceedance), and total xylenes (1 USCO exceedance).

Exceedances of SVOCs were identified and include the following: 3-methylphenol/4-methylphenol (1 USCO exceedance), benzo(a)anthracene (2 USCO / RSCO / RRSCO / CUSCO / ISCO exceedances, 1 USCO / RSCO / RRSCO / CUSCO exceedance, and 2 USCO / RSCO / RRSCO exceedances), benzo(a)pyrene (6 USCO / RSCO / RRSCO / CUSCO / ISCO exceedances), benzo(b)fluoranthene (2 USCO / RSCO / RRSCO / CUSCO / ISCO exceedances, 2 USCO / RSCO / RRSCO / CUSCO exceedances, and 2 USCO / RSCO / RRSCO exceedances),

benzo(k)fluoranthene (1 USCO / RSCO / RRSCO exceedance, 2 USCO / RSCO exceedances, and 2 USCO exceedances), chrysene (4 USCO / RSCO / RRSCO exceedances and 1 USCO / RSCO exceedance), dibenzo(a,h)anthracene (2 USCO / RSCO / RRSCO / CUSCO / ISCO exceedances and 2 USCO / RSCO / RRSCO / CUSCO exceedances), indeno(1,2,3-cd)pyrene (2 USCO / RSCO / RRSCO / CUSCO exceedances and 4 USCO / RSCO / RRSCO exceedances), dibenzofuran (1 USCO exceedance), and naphthalene (2 USCO exceedances).

Exceedances of metals were identified and include the following: arsenic (2 USCO / RSCO / RRSCO / CUSCO / ISCO exceedances and 1 USCO exceedance), barium (1 USCO / RSCO exceedance), copper (7 USCO exceedances), lead (2 USCO / RSCO / RRSCO / CUSCO exceedances, 1 USCO / RSCO / RRSCO exceedances, and 4 USCOS exceedances), mercury (1 USCO / RSCO / RRSCO exceedance and 6 USCO exceedances and), and zinc (5 USCO exceedances).

Exceedances of pesticides were identified and include the following: 4,4'-DDE (1 USCO exceedance) and 4,4'-DDT (3 USCO exceedances).

Exceedances of PFAS were identified and include the following: perfluorooctanoic acid (PFOA) (2 USCO exceedances) and perfluorooctanesulfonic acid (PFOS) (2 USCO exceedances).

PCBs and 1,4-dioxane were not detected at concentrations exceeding NYSDEC SCOs in the soil samples collected.

2.1.4 GROUNDWATER INVESTIGATION

To evaluate groundwater quality at the Site, SESI collected four (4) groundwater samples from temporary wellpoints installed within soil borings B2-TWP-1 and B16-TWP-2. The groundwater samples were collected by installing a one-inch inside diameter (ID) poly-vinyl chloride (PVC) well screen and riser pipe in the annular space of the borings. The groundwater samples were collected using low-flow sampling techniques with a peristaltic pump and disposable tubing. Two rounds of groundwater sampling were completed with each round consisting of the collection of one (1) groundwater sample from each temporary wellpoint on June 12, 2024, and June 14, 2024. A total of four (4) groundwater samples were collected from the temporary wellpoints and submitted under proper COC to Alpha, a NYSDOH ELAP-certified laboratory.

2.1.5 GROUNDWATER ANALYTICAL RESULTS

A total of four (4) groundwater samples were collected during the investigation and submitted to Alpha for analysis. The samples collected on June 12, 2024, were analyzed for TCL+30/TAL and the samples collected on June 12, 2024, were analyzed for PFAS.

A summary table of the analytical results compared to NYSDEC TOGS AWQS is presented in the attached **Table 2.4**. The laboratory analytical reports are provided in **Appendix B** and include additional results from investigations performed on off-Site properties. The following **Table 2.5** presents a summary of NYSDEC AWQS exceedances. The groundwater sampling locations are shown on **Figure 2.3.**

Table 2.5 – Summary of Groundwater Exceedances

J – Estimated value

Key:
Result Exceeds NY-AWQS.

PFOS and PFOA were detected at concentrations exceeding NYSDEC AWQS in two (2) groundwater samples.

The SVOC phenol was detected at a concentration exceeding its NYSDEC AWQS in one (1) groundwater sample.

Exceedances of metals were identified and include the following: iron (1 exceedance), magnesium (2 exceedances), manganese (1 exceedance), and sodium (2 exceedances).

VOCs, PCBs, and pesticides were not detected at concentrations exceeding NYSDEC AWQS in the groundwater samples collected.

2.1.6 SOIL VAPOR INVESTIGATION

A total of three (3) soil vapor samples were collected during the investigation to characterize and delineate the extent of the soil vapor contamination. Helium tracer gas was used to serve as a quality assurance/quality control (QA/QC) device to verify the integrity of the soil vapor probe seal. A total of three (3) soil vapor samples were collected from the soil vapor probes and submitted under proper COC to Alpha, a NYSDOH ELAP-certified laboratory.

2.1.7 SOIL VAPOR ANALYTICAL RESULTS

A total of three (3) soil vapor samples were collected during the investigation and sent to Alpha for analysis of VOCs in accordance with United States Environmental Protection Agency (USEPA) Method TO-15.

A summary table of the analytical results is presented in the attached **Table 2.6**. The laboratory analytical reports are provided in **Appendix B** and include additional results from investigations performed on off-Site properties. The following **Table 2.7** presents a summary of soil vapor detections. The soil vapor sampling locations are shown on **Figure 2.4.**

NY-IAC-B: New York DOH Matrix B Indoor Air Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, October 2006, and updated May 2017.
NY-IAC-D: New York DOH Matrix D Indoor Air Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, February, 2024.
NY-IAC-E: New York DOH Matrix E Indoor Air Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, February, 2024.
NY-IAC-F: New York DOH Matrix F Indoor Air Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, February, 2024.
NY-SSC-A: New York DOH Matrix A Sub-slab Vapor Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, October 2006, and updated May 20
NY-SSC-B: New York DOH Matrix B Sub-slab Vapor Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, October 2006, and updated May 20
NY-SSC-D: New York DOH Matrix D Sub-slab Vapor Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, February, 2024.
NY-SSC-E: New York DOH Matrix E Sub-slab Vapor Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, February, 2024.
NY-SSC-F: New York DOH Matrix F Sub-slab Vapor Concentrations Criteria per Guidance for Evaluating Soil Vapor Intrusion, February, 2024.

A total of twenty-eight (28) VOCs were detected in the three (3) soil vapor samples. Based on a comparison of the soil vapor results to the NYSDOH Soil Vapor/Indoor Air Matrices, the elevated

VOC concentrations in soil vapor at the Site will require mitigation. Specifically, 1,2,4-trimethylbenzene was detected in each of the soil vapor samples at concentrations warranting mitigation when compared to NYSDOH Soil Vapor/Indoor Air Matrix D in the soil vapor sample collected. Additionally, naphthalene in soil vapor sample SV-3 and 1,3,5-trimethylbenzene in each of the soil vapor samples may require further action. Lastly, it should be noted that several other VOCs were determined to be present at levels in the soil vapor that would also require mitigation if they were collocated with indoor air levels with fairly low levels of the same compound. This further reinforces the likely need for vapor mitigation in the future redevelopment.

3.0 CONCLUSIONS

In June 2024, SESI performed TCL+30/TAL sampling of soil and groundwater, and VOC sampling of soil vapor at the Site to partially satisfy the requirements of potentially entering the Brownfield Cleanup Program (BCP). The June 2024 investigation activities completed by SESI at the Site confirmed the presence of VOC, SVOC, Metal, Pesticide, and PFAS contamination in soil/historic fill, and Phenol, Metals, and PFAS contamination in groundwater at the Site. Additionally, elevated VOC concentrations in soil vapor will likely require mitigation following redevelopment.

Contaminant concentrations exceeding USCOs are present Site-wide. RSCO, RRSCO, CSCO, and ISCO exceedances are concentrated in the central portion of the Site, specifically within the location of the former substation. The depth of contamination exceeding RSCOs is generally in the top 4.5 feet of on-Site soils. Soil samples B-1(11-11.5) and B-2(11.5-12) collected approximately eleven (11) fbgs from the eastern portion of the Site identified that contaminants concentrations in soil in this area do not exceed RSCOs.

Groundwater samples were collected from two (2) temporary wellpoints located in the central and eastern portions of the Site. The SVOC Phenol was detected at a concentration exceeding its NYSDEC AWQS in one groundwater sample and select metals and PFAS were detected at concentrations exceeding NYSDEC AWQS in samples collected from both temporary wellpoints.

Based on the results of the investigations completed to date, it has been determined that the Site will need to be remediated as part of the mixed-use commercial and residential redevelopment of the Site. This will be accomplished through entry into the Brownfield Cleanup Program (BCP). Recommendations are provided in the following section for a proposed path forward.

4.0 RECOMMENDATIONS

Based on the results and discussions with the development team, due to the future residential use on the Site, it has been determined remediation will be required at the Site. The Site will require further delineation to quantify the volume of soil, groundwater, and soil vapor that will require remediation to address the exceedances in soil, groundwater and soil vapor. However the majority of the Site would require remediation to remove contamination above the USCO's.

Based on the proposed end uses for the property, it is our understanding that a BCP application will be completed and submitted to the NYSDEC for consideration. Acceptance into the BCP would involve a submittal of a BCP application. Under this program, soils would be remediated and exported off-Site under NYSDEC oversight. This option provides liability protection and tax credits associated with remediation costs, which are not available if the Site is remediated outside of the program. This option would require the preparation of a Remedial Investigation Work Plan (RIWP), which will also be submitted with the BCP application package to save time, and in order to implement the more extensive remedial investigation (RI) required for this program. Following acceptance into the BCP, the RI will need to be completed, followed by preparation of a Remedial Investigation Report (RIR), preparation of a Remedial Action Work Plan (RAWP), implementation of the remediation, development of Final Engineering Report, and completion of a Site Management Plan (SMP) and environmental easements, if required. All of the work would need to be reviewed and approved by a NYSDEC case manager.

Once the Site is approved into the BCP, remedial investigation would likely consist of horizontal and vertical delineation of the VOC, SVOC, metal, pesticide, and PFAS contamination in soil, and the phenol and PFAS contamination in groundwater. Additionally, indoor air sampling and/or installation of a vapor intrusion mitigation system will likely be required based on the elevated concentration of VOCs identified in soil vapor.

Following receipt and evaluation of the analytical data, a preferred remedy would be chosen. It is likely that a Track 2 Remedy, which would allow for soil exceeding the USCOs and at or below RSCOs to remain on-Site, would be selected based on current results with the goal that soils from 0-15 fbgs meet the RSCOs. However, further consideration would be made to the feasibility of achieving a Track 1 cleanup following the receipt of the remedial investigation data.

NOTES:
ND - Analyte was not detected.
J - Estimated value.
I - The lower value for the two columns has been reported due to obvious interference.
P - The RPD between the results for the two columns exceeds the method-specific criteria.
E - Concentration of analyte exceeds range of calibration curve and/or linear range of instrument.
Q - Sample qualifier.
mg/kg - Milligrams per kilogram.

KEY:

	Value Exceeds USCO.
	Value Exceeds RSCO.
	Value Exceeds RRSCO.
	Value Exceeds CSCO.
	Value Exceeds ISCO.

NOTES:
ND - Analyte was not detected.
J - Estimated value.
I - The lower value for the two columns has been reported due to obvious interference.
P - The RPD between the results for the two columns exceeds the method-specific criteria.
E - Concentration of analyte exceeds range of calibration curve and/or linear range of instrument.
Q - Sample qualifier.
mg/kg - Milligrams per kilogram.

KEY:

	Value Exceeds USCO.
	Value Exceeds RSCO.
	Value Exceeds RRSCO.

NOTES:
ND - Analyte was not detected.
J - Estimated value.
I - The lower value for the two columns has been reported due to obvious interference.
P - The RPD between the results for the two columns exceeds the method-specific criteria.
E - Concentration of analyte exceeds range of calibration curve and/or linear range of instrument.
Q - Sample qualifier.
mg/kg - Milligrams per kilogram.

KEY:

Value Exceeds USCO.
Value Exceeds RSCO.
Value Exceeds RRSCO.
Value Exceeds CSCO.
Value Exceeds ISCO.

USCO: New York NYCRR Part 375 New York Unrestricted use Criteria Criteria per 6 NYCRR Part 375 Environmental Remediation Programs, effective December 14, 2006.

NOTES:
ND - Analyte was not detected.
J - Estimated value.
I - The lower value for the two columns has been reported due to obvious interference.
P - The RPD between the results for the two columns exceeds the method-specific criteria.
E - Concentration of analyte exceeds range of calibration curve and/or linear range of instrument.
Q - Sample qualifier.
mg/kg - Milligrams per kilogram.

KEY:

	Value Exceeds USCO.
	Value Exceeds RSCO.
	Value Exceeds RRSCO.
	Value Exceeds CSCO.
	Value Exceeds ISCO.

USCO: New York NYCRR Part 375 New York Unrestricted use Criteria Criteria per 6 NYCRR Part 375 Environmental Remediation Programs, effective December 14, 2006.
RSCO: New York NYCRR Part 375 Residential Criteria, New York Restricted use Criteria per 6 NYCRR Part 375 Environmental Remediation Programs, effective December 14, 2006.
RRSCO: New York NYCRR Part 375 Restricted-Residential Criteria, New York Restricted use Criteria per 6 NYCRR Part 375 Environmental Remediation Programs, effective December 14, 2006.
CSCO: New York NYCRR Part 375 Commercial Criteria, New York Restricted use Criteria per 6 NYCRR Part 375 Environmental Remediation Programs, effective December 14, 2006.
ISCO: New York NYCRR Part 375 Industrial Criteria, New York Restricted use Criteria per 6 NYCRR Part 375 Environmental Remediation Programs, effective December 14, 2006.

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2433831
Project Number:	13581	**Report Date:**	06/28/24

Case Narrative (continued)

Report Submission

June 28, 2024: This is a preliminary report.

June 24, 2024: This is a preliminary report.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt

L2433831-01: The sample identified as "B-22 (2.5-3)" on the chain of custody was identified as "B-22 (2-2.5)" on the container label. At the client's request, the sample is reported as "B-22 (2.5-3)".

L2433831-03: At the client's request, the sample was activated for the analyses listed on the chain of custody.

Perfluorinated Alkyl Acids by 1633

WG1937998-1, WG1937998-2, and WG1937998-3: Extracted Internal Standard recoveries were outside the acceptance criteria for individual analytes. Please refer to the surrogate section of the report for details.

Pesticides

L2433831-03: The internal standard (IS) response for 1-bromo-2-nitrobenzene (253%) was above the acceptance criteria on column A; however, the sample was not re-analyzed due to obvious interferences. Since the IS response was above method criteria, all associated compounds reported from this column are considered to have a potentially low bias. The surrogate recovery is outside the method acceptance criteria for decachlorobiphenyl (27%) due to interference with the Internal Standard.

Total Metals

L2433831-03, -09 and -10: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by the sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

PFAS PARAMETER SUMMARY

Parameter	Acronym	CAS Number
PERFLUOROALKYL CARBOXYLIC ACIDS (PFCAs)		
Perfluorooctadecanoic Acid	PFODA	16517-11-6
Perfluorohexadecanoic Acid	PFHxDA	67905-19-5
Perfluorotetradecanoic Acid	PFTA/PFTeDA	376-06-7
Perfluorotridecanoic Acid	PFTrDA	72629-94-8
Perfluorododecanoic Acid	PFDoA	307-55-1
Perfluoroundecanoic Acid	PFUnA	2058-94-8
Perfluorodecanoic Acid	PFDA	335-76-2
Perfluorononanoic Acid	PFNA	375-95-1
Perfluorooctanoic Acid	PFOA	335-67-1
Perfluoroheptanoic Acid	PFHpA	375-85-9
Perfluorohexanoic Acid	PFHxA	307-24-4
Perfluoropentanoic Acid	PFPeA	2706-90-3
Perfluorobutanoic Acid	PFBA	375-22-4
PERFLUOROALKYL SULFONIC ACIDS (PFSAs)		
Perfluorododecanesulfonic Acid	PFDoDS/PFDoS	79780-39-5
Perfluorodecanesulfonic Acid	PFDS	335-77-3
Perfluorononanesulfonic Acid	PFNS	68259-12-1
Perfluorooctanesulfonic Acid	PFOS	1763-23-1
Perfluoroheptanesulfonic Acid	PFHpS	375-92-8
Perfluorohexanesulfonic Acid	PFHxS	355-46-4
Perfluoropentanesulfonic Acid	PFPeS	2706-91-4
Perfluorobutanesulfonic Acid	PFBS	375-73-5
Perfluoropropanesulfonic Acid	PFPrS	423-41-6
FLUOROTELOMERS		
1H,1H,2H,2H-Perfluorododecanesulfonic Acid	10:2FTS	120226-60-0
1H,1H,2H,2H-Perfluorodecanesulfonic Acid	8:2FTS	39108-34-4
1H,1H,2H,2H-Perfluorooctanesulfonic Acid	6:2FTS	27619-97-2
1H,1H,2H,2H-Perfluorohexanesulfonic Acid	4:2FTS	757124-72-4
PERFLUOROALKANE SULFONAMIDES (FASAs)		
Perfluorooctanesulfonamide	FOSA/PFOSA	754-91-6
N-Ethyl Perfluorooctane Sulfonamide	NEtFOSA	4151-50-2
N-Methyl Perfluorooctane Sulfonamide	NMeFOSA	31506-32-8
PERFLUOROALKANE SULFONYL SUBSTANCES		
N-Ethyl Perfluorooctanesulfonamido Ethanol	NEtFOSE	1691-99-2
N-Methyl Perfluorooctanesulfonamido Ethanol	NMeFOSE	24448-09-7
N-Ethyl Perfluorooctanesulfonamidoacetic Acid	NEtFOSAA	2991-50-6
N-Methyl Perfluorooctanesulfonamidoacetic Acid	NMeFOSAA	2355-31-9
PER- and POLYFLUOROALKYL ETHER CARBOXYLIC ACIDS		
2,3,3,3-Tetrafluoro-2-[1,1,2,2,3,3,3-Heptafluoropropoxy]-Propanoic Acid	HFPO-DA	13252-13-6
4,8-Dioxa-3h-Perfluorononanoic Acid	ADONA	919005-14-4
CHLORO-PERFLUOROALKYL SULFONIC ACIDS		
11-Chloroeicosafluoro-3-Oxaundecane-1-Sulfonic Acid	11Cl-PF3OUdS	763051-92-9
9-Chlorohexadecafluoro-3-Oxanone-1-Sulfonic Acid	9Cl-PF3ONS	756426-58-1
PERFLUOROETHER SULFONIC ACIDS (PFESAs)		
Perfluoro(2-Ethoxyethane)Sulfonic Acid	PFEESA	113507-82-7
PERFLUOROETHER/POLYETHER CARBOXYLIC ACIDS (PFPCAs)		
Perfluoro-3-Methoxypropanoic Acid	PFMPA	377-73-1
Perfluoro-4-Methoxybutanoic Acid	PFMBA	863090-89-5
Nonafluoro-3,6-Dioxaheptanoic Acid	NFDHA	151772-58-6

Project Name: WEBSTER AVE, BRONX

Project Number:	13581	**Report Date:**	06/28/24

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2433831
Project Number:	13581	**Report Date:**	06/28/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2433831
Project Number:	13581	**Report Date:**	06/28/24

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Case Narrative (continued)

Volatile Organics in Air

Canisters were released from the laboratory on June 10, 2024. The canister certification data is provided as an addendum.

L2433175-01D: The sample has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

L2433175-02D: The sample has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

L2433175-03D: The sample has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

L2433175-04D: The sample has elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the sample.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Christopher J. Anderson

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: Data Usability Report

Project Name:	WEBSTER AVE BRONX	**Lab Number:**	L2433175
Project Number:	13581	**Report Date:**	06/25/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

Report Format: Data Usability Report

Project Name:	WEBSTER AVE BRONX	**Lab Number:**	L2433175
Project Number:	13581	**Report Date:**	06/25/24

Data Qualifiers

ND - Not detected at the reporting limit (RL) for the sample.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Report Format: Data Usability Report

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water
EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B, SM4500NO2-B**

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Name: WEBSTER AVE, BRONX **Lab Number:** L2433160
Project Number: 13581 **Report Date:** 06/26/24

Case Narrative (continued)

Report Submission

June 26, 2024: This preliminary report includes the results of the following analyses:

L2433160-04 through -07: Perfluorinated Alkyl Acids by 1633

June 24, 2024: This preliminary report includes the results of the following analyses:

L2433160-06: Semivolatile Organics, Pesticides, Herbicides, Total Cyanide and Total Metals

June 20, 2024: This is a preliminary report.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt

L2433160-01 and -02: The analysis of Perfluorinated Alkyl Acids by 1633 was requested on the Chain of Custody; however, sample containers were not received. This was verified by the client.

Volatile Organics

The WG1935894-5 Method Blank, associated with L2433160-04, -06, and -07, has a concentration above the reporting limit for bromomethane. Since the associated sample concentrations are non-detect to the RL this target analyte, no corrective action is required.

The WG1936463-5 Method Blank, associated with L2433160-05, has a concentration above the reporting limit for bromomethane. Since the associated sample concentrations are non-detect to the RL this target analyte, no corrective action is required.

Semivolatile Organics

L2433160-04D: The sample has elevated detection limits due to the dilution required by the sample matrix.

Perfluorinated Alkyl Acids by 1633

L2433160-04, WG1937801-1/-2, WG1937998-1/-2/-3: Extracted Internal Standard recoveries were outside

Project Name: WEBSTER AVE, BRONX **Lab Number:** L2433160
Project Number: 13581 **Report Date:** 06/26/24

Case Narrative (continued)

the acceptance criteria for individual analytes. Please refer to the surrogate section of the report for details.
The WG1937801-2 LCS recovery, associated with L2433160-04, -05, and -07, is above the acceptance criteria for n-ethyl perfluorooctanesulfonamidoacetic acid (netfosaa) (151%); however, the associated samples are non-detect to the RL for this target analyte. The results of the original analysis are reported.
The WG1937998-3 LCS recovery, associated with L2433160-06, is above the acceptance criteria for 3-perfluoroheptyl propanoic acid (7:3ftca) (160%); however, the associated samples are non-detect to the RL for this target analyte. The results of the original analysis are reported.

Total Metals
L2433160-04 through -07: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by the sample matrix.
The WG1934994-1 Method Blank, associated with L2433160-01 and -02, has a concentration above the reporting limit for manganese. Since the associated sample concentrations are greater than 10x the blank concentration for this target analyte, no corrective action is required.
The WG1935625-1 Method Blank, associated with L2433160-04, -05, and -07, has a concentration above the reporting limit for iron. Since the associated sample concentrations are greater than 10x the blank concentration for this target analyte, no corrective action is required.

Cyanide, Total
The WG1935800-5 MS recovery, performed on L2433160-01, is outside the acceptance criteria for cyanide, total (78%); however, the associated LCS recovery is within criteria. No further action was taken.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2433160
Project Number:	13581	**Report Date:**	06/26/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2433160
Project Number:	13581	**Report Date:**	06/26/24

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Report Format: DU Report with 'J' Qualifiers

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Name: WEBSTER AVE, BRONX **Lab Number:** L2432804
Project Number: 13581 **Report Date:** 07/02/24

Case Narrative (continued)

Report Submission
July 02, 2024: This final report includes the results of all requested analyses.
June 27, 2024: This is a preliminary report.
June 19, 2024: This is a preliminary report.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt
L2432804-02 through -07: The sample collection date was specified by the client.

Perfluorinated Alkyl Acids by 1633
L2432804-01, -03RE, -07, WG1937729-1, WG1937729-2, and WG1937729-3: Extracted Internal Standard recoveries were outside the acceptance criteria for individual analytes. Please refer to the surrogate section of the report for details.
L2432804-03RE: The sample was re-extracted within holding time due to QC failures in the original extraction. The results of the re-extraction are reported.
L2432804-03RE: The sample has elevated detection limits due to the limited sample volume utilized during extraction, as required by the sample matrix.

PCBs
L2432804-07D: The sample has elevated detection limits due to the dilution required by the sample matrix.

Pesticides
L2432804-07: The internal standard (IS) response for 1-bromo-2-nitrobenzene (200%) was above the acceptance criteria on column A; however, the sample was not re-analyzed due to obvious interferences. Since the IS response was above method criteria, all associated compounds reported from this column are

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2432804
Project Number:	13581	**Report Date:**	07/02/24

Case Narrative (continued)

considered to have a potentially low bias. The surrogate recovery is outside the method acceptance criteria for decachlorobiphenyl (22%) due to interference with the Internal Standard.

Total Metals

L2432804-01: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by the sample matrix.

The WG1935294-1 Method Blank, associated with L2432804-01, -03, and -07, has a concentration above the reporting limit for iron. Since the associated sample concentrations are greater than 10x the blank concentration for this target analyte, no corrective action is required.

The WG1935294-3 MS recoveries, performed on L2432804-01, are outside the acceptance criteria for calcium (220%), chromium (0%) and magnesium (246%). A post digestion spike was performed and was within acceptance criteria.

The WG1935294-3 MS recoveries for aluminum (598%), arsenic (0%), copper (0%), iron (0%), lead (0%), manganese (0%) and zinc (0%), performed on L2432804-01, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG1935294-4 Laboratory Duplicate RPDs for chromium (58%) and lead (45%), performed on L2432804-01, are outside the acceptance criteria. The elevated RPD has been attributed to the non-homogeneous nature of the native sample.

The WG1935297-4 Laboratory Duplicate RPD for mercury (61%), performed on L2432804-01, is outside the acceptance criteria. The elevated RPD has been attributed to the non-homogeneous nature of the native sample.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

PFAS PARAMETER SUMMARY

Parameter	Acronym	CAS Number
PERFLUOROALKYL CARBOXYLIC ACIDS (PFCAs)		
Perfluorooctadecanoic Acid	PFODA	16517-11-6
Perfluorohexadecanoic Acid	PFHxDA	67905-19-5
Perfluorotetradecanoic Acid	PFTA/PFTeDA	376-06-7
Perfluorotridecanoic Acid	PFTrDA	72629-94-8
Perfluorododecanoic Acid	PFDoA	307-55-1
Perfluoroundecanoic Acid	PFUnA	2058-94-8
Perfluorodecanoic Acid	PFDA	335-76-2
Perfluorononanoic Acid	PFNA	375-95-1
Perfluorooctanoic Acid	PFOA	335-67-1
Perfluoroheptanoic Acid	PFHpA	375-85-9
Perfluorohexanoic Acid	PFHxA	307-24-4
Perfluoropentanoic Acid	PFPeA	2706-90-3
Perfluorobutanoic Acid	PFBA	375-22-4
PERFLUOROALKYL SULFONIC ACIDS (PFSAs)		
Perfluorododecanesulfonic Acid	PFDoDS/PFDoS	79780-39-5
Perfluorodecanesulfonic Acid	PFDS	335-77-3
Perfluorononanesulfonic Acid	PFNS	68259-12-1
Perfluorooctanesulfonic Acid	PFOS	1763-23-1
Perfluoroheptanesulfonic Acid	PFHpS	375-92-8
Perfluorohexanesulfonic Acid	PFHxS	355-46-4
Perfluoropentanesulfonic Acid	PFPeS	2706-91-4
Perfluorobutanesulfonic Acid	PFBS	375-73-5
Perfluoropropanesulfonic Acid	PFPrS	423-41-6
FLUOROTELOMERS		
1H,1H,2H,2H-Perfluorododecanesulfonic Acid	10:2FTS	120226-60-0
1H,1H,2H,2H-Perfluorodecanesulfonic Acid	8:2FTS	39108-34-4
1H,1H,2H,2H-Perfluorooctanesulfonic Acid	6:2FTS	27619-97-2
1H,1H,2H,2H-Perfluorohexanesulfonic Acid	4:2FTS	757124-72-4
PERFLUOROALKANE SULFONAMIDES (FASAs)		
Perfluorooctanesulfonamide	FOSA/PFOSA	754-91-6
N-Ethyl Perfluorooctane Sulfonamide	NEtFOSA	4151-50-2
N-Methyl Perfluorooctane Sulfonamide	NMeFOSA	31506-32-8
PERFLUOROALKANE SULFONYL SUBSTANCES		
N-Ethyl Perfluorooctanesulfonamido Ethanol	NEtFOSE	1691-99-2
N-Methyl Perfluorooctanesulfonamido Ethanol	NMeFOSE	24448-09-7
N-Ethyl Perfluorooctanesulfonamidoacetic Acid	NEtFOSAA	2991-50-6
N-Methyl Perfluorooctanesulfonamidoacetic Acid	NMeFOSAA	2355-31-9
PER- and POLYFLUOROALKYL ETHER CARBOXYLIC ACIDS		
2,3,3,3-Tetrafluoro-2-[1,1,2,2,3,3,3-Heptafluoropropoxy]-Propanoic Acid	HFPO-DA	13252-13-6
4,8-Dioxa-3h-Perfluorononanoic Acid	ADONA	919005-14-4
CHLORO-PERFLUOROALKYL SULFONIC ACIDS		
11-Chloroeicosafluoro-3-Oxaundecane-1-Sulfonic Acid	11Cl-PF3OUdS	763051-92-9
9-Chlorohexadecafluoro-3-Oxanone-1-Sulfonic Acid	9Cl-PF3ONS	756426-58-1
PERFLUOROETHER SULFONIC ACIDS (PFESAs)		
Perfluoro(2-Ethoxyethane)Sulfonic Acid	PFEESA	113507-82-7
PERFLUOROETHER/POLYETHER CARBOXYLIC ACIDS (PFPCAs)		
Perfluoro-3-Methoxypropanoic Acid	PFMPA	377-73-1
Perfluoro-4-Methoxybutanoic Acid	PFMBA	863090-89-5
Nonafluoro-3,6-Dioxaheptanoic Acid	NFDHA	151772-58-6

Project Name: WEBSTER AVE, BRONX

Project Number:	13581	**Report Date:**	07/02/24

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2432804
Project Number:	13581	**Report Date:**	07/02/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2432804
Project Number:	13581	**Report Date:**	07/02/24

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

Drinking Water
EPA 300.0: Chloride, Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B, SM4500NO2-B**
EPA 524.2: THMs and VOCs; **EPA 504.1:** EDB, DBCP.
Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT,SM9222D**.

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet NELAP requirements for all NELAP accredited parameters unless otherwise noted in the following narrative. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. Tentatively Identified Compounds (TICs), if requested, are reported for compounds identified to be present and are not part of the method/program Target Compound List, even if only a subset of the TCL are being reported. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively.

When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances, the specific failure is not narrated but noted in the associated QC Outlier Summary Report, located directly after the Case Narrative. QC information is also incorporated in the Data Usability Assessment table (Format 11) of our Data Merger tool, where it can be reviewed in conjunction with the sample result, associated regulatory criteria and any associated data usability implications.

Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

HOLD POLICY - For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Alpha Project Manager and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Project Management at 800-624-9220 with any questions.

Project Number:	13581	**Report Date:**	06/27/24

Case Narrative (continued)

Report Submission

June 27, 2024: This final report includes the results of all requested analyses.

June 24, 2024: This is a preliminary report.

June 17, 2024: This is a preliminary report.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Sample Receipt

The analyses performed were specified by the client.

Volatile Organics

The WG1935169-5 Method Blank, associated with L2432305-07, has a concentration above the reporting limit for bromomethane. Since the associated sample concentrations are either greater than 10x the blank concentration or non-detect to the RL for this target analyte, no corrective action is required. Any results detected below the reporting limit are qualified with a "B".

Perfluorinated Alkyl Acids by 1633

L2432305-01, -03, -05, -09, -10, WG1937729-1, WG1937729-2 and WG1937729-4/-5: Extracted Internal Standard recoveries were outside the acceptance criteria for individual analytes. Please refer to the surrogate section of the report for details.

Total Metals

L2432305-01, -03, -05, -07, -09 and -10: The sample has elevated detection limits for all elements, with the exception of mercury, due to the dilution required by the sample matrix.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

PFAS PARAMETER SUMMARY

Parameter	Acronym	CAS Number
PERFLUOROALKYL CARBOXYLIC ACIDS (PFCAs)		
Perfluorooctadecanoic Acid	PFODA	16517-11-6
Perfluorohexadecanoic Acid	PFHxDA	67905-19-5
Perfluorotetradecanoic Acid	PFTA/PFTeDA	376-06-7
Perfluorotridecanoic Acid	PFTrDA	72629-94-8
Perfluorododecanoic Acid	PFDoA	307-55-1
Perfluoroundecanoic Acid	PFUnA	2058-94-8
Perfluorodecanoic Acid	PFDA	335-76-2
Perfluorononanoic Acid	PFNA	375-95-1
Perfluorooctanoic Acid	PFOA	335-67-1
Perfluoroheptanoic Acid	PFHpA	375-85-9
Perfluorohexanoic Acid	PFHxA	307-24-4
Perfluoropentanoic Acid	PFPeA	2706-90-3
Perfluorobutanoic Acid	PFBA	375-22-4
PERFLUOROALKYL SULFONIC ACIDS (PFSAs)		
Perfluorododecanesulfonic Acid	PFDoDS/PFDoS	79780-39-5
Perfluorodecanesulfonic Acid	PFDS	335-77-3
Perfluorononanesulfonic Acid	PFNS	68259-12-1
Perfluorooctanesulfonic Acid	PFOS	1763-23-1
Perfluoroheptanesulfonic Acid	PFHpS	375-92-8
Perfluorohexanesulfonic Acid	PFHxS	355-46-4
Perfluoropentanesulfonic Acid	PFPeS	2706-91-4
Perfluorobutanesulfonic Acid	PFBS	375-73-5
Perfluoropropanesulfonic Acid	PFPrS	423-41-6
FLUOROTELOMERS		
1H,1H,2H,2H-Perfluorododecanesulfonic Acid	10:2FTS	120226-60-0
1H,1H,2H,2H-Perfluorodecanesulfonic Acid	8:2FTS	39108-34-4
1H,1H,2H,2H-Perfluorooctanesulfonic Acid	6:2FTS	27619-97-2
1H,1H,2H,2H-Perfluorohexanesulfonic Acid	4:2FTS	757124-72-4
PERFLUOROALKANE SULFONAMIDES (FASAs)		
Perfluorooctanesulfonamide	FOSA/PFOSA	754-91-6
N-Ethyl Perfluorooctane Sulfonamide	NEtFOSA	4151-50-2
N-Methyl Perfluorooctane Sulfonamide	NMeFOSA	31506-32-8
PERFLUOROALKANE SULFONYL SUBSTANCES		
N-Ethyl Perfluorooctanesulfonamido Ethanol	NEtFOSE	1691-99-2
N-Methyl Perfluorooctanesulfonamido Ethanol	NMeFOSE	24448-09-7
N-Ethyl Perfluorooctanesulfonamidoacetic Acid	NEtFOSAA	2991-50-6
N-Methyl Perfluorooctanesulfonamidoacetic Acid	NMeFOSAA	2355-31-9
PER- and POLYFLUOROALKYL ETHER CARBOXYLIC ACIDS		
2,3,3,3-Tetrafluoro-2-[1,1,2,2,3,3,3-Heptafluoropropoxy]-Propanoic Acid	HFPO-DA	13252-13-6
4,8-Dioxa-3h-Perfluorononanoic Acid	ADONA	919005-14-4
CHLORO-PERFLUOROALKYL SULFONIC ACIDS		
11-Chloroeicosafluoro-3-Oxaundecane-1-Sulfonic Acid	11Cl-PF3OUdS	763051-92-9
9-Chlorohexadecafluoro-3-Oxanone-1-Sulfonic Acid	9Cl-PF3ONS	756426-58-1
PERFLUOROETHER SULFONIC ACIDS (PFESAs)		
Perfluoro(2-Ethoxyethane)Sulfonic Acid	PFEESA	113507-82-7
PERFLUOROETHER/POLYETHER CARBOXYLIC ACIDS (PFPCAs)		
Perfluoro-3-Methoxypropanoic Acid	PFMPA	377-73-1
Perfluoro-4-Methoxybutanoic Acid	PFMBA	863090-89-5
Nonafluoro-3,6-Dioxaheptanoic Acid	NFDHA	151772-58-6

Project Name: WEBSTER AVE, BRONX
Project Number: 13581

Lab Number: L2432305
Report Date: 06/27/24

PFAS PARAMETER SUMMARY

Parameter	Acronym	CAS Number
FLUOROTELOMER CARBOXYLIC ACIDS (FTCAs)		
3-Perfluoroheptyl Propanoic Acid	7:3FTCA	812-70-4
2H,2H,3H,3H-Perfluorooctanoic Acid	5:3FTCA	914637-49-3
3-Perfluoropropyl Propanoic Acid	3:3FTCA	356-02-5

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2432305
Project Number:	13581	**Report Date:**	06/27/24

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2432305
Project Number:	13581	**Report Date:**	06/27/24

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Chlordane: The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Gasoline Range Organics (GRO): Gasoline Range Organics (GRO) results include all chromatographic peaks eluting from Methyl tert butyl ether through Naphthalene, with the exception of GRO analysis in support of State of Ohio programs, which includes all chromatographic peaks eluting from Hexane through Dodecane.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively

Report Format: DU Report with 'J' Qualifiers

Project Name:	WEBSTER AVE, BRONX	**Lab Number:**	L2432305
Project Number:	13581	**Report Date:**	06/27/24

Data Qualifiers

Identified Compounds (TICs). For calculated parameters, this represents that one or more values used in the calculation were estimated.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625.1: alpha-Terpineol
EPA 8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol, Azobenzene; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Nonpotable Water: EPA RSK-175 Dissolved Gases
Biological Tissue Matrix: EPA 3050B

1.0 PROJECT SUMMARY

SESI Consulting Engineers (SESI), at the request of South Bronx Development I LLC (User) has conducted a Phase I Environmental Site Assessment (ESA) for the Subject Property located at 2752 Webster Avenue in the Bronx, Bronx County, New York (herein referred to as the "subject property"). The Subject Property is identified on local tax maps as Block 3273, Lots 91 and 100. **Figure 1.1** provides a tax map.

The Subject Property is composed of an approximately 1.4-acre parcel developed with one (1) approximately 9.350-square feet (sf) one-to-two-story warehouse and one (1) approximately 2,330-sf two-story former automotive repair garage building. The buildings were constructed in 1906. The subject property is currently vacant and owned by Bandry, LLC since 2008.

The Subject Property was initially developed prior to 1896. Railroad tracks have been present at the Subject Property since at least 1896. Historical Subject Property operations included a sewer pipe yard in 1900, freight house from 1900 to 1950, engine room in 1945, cold storage and substation from at least 1978 to 2007, and automotive repair from at least 1992 to 2010. SESI identified that the most recent operations at the Subject Property included a substation, cold storage facility, alcohol/liquor distributor, restaurants, and automotive repair garages.

SESI performed due diligence subsurface investigations at the Subject Property for the User, which is a prospective owner of the Subject Property consisting of geophysical surveys and the advancement of twenty-eight (28) soil borings, two (2) temporary wellpoints, and three (3) soil vapor samples in June 2024. Geophysical anomalies indicative of USTs were not detected during the geophysical surveys. SESI identified historic fill materials within the soil borings to depths of up to 6.0 feet below ground surface (fbgs). Elevated PID readings and petroleum odors were detected at several areas throughout the Site, and an oily tar substance was identified in several of the borings. Select volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metal, pesticide, and per and polyfluoroalkyl substances (PFAS) were identified at concentrations above New York State Department of Environmental Conservation (NYSDEC) Unrestricted Use Soil Cleanup Objectives (USCOs), Residential Use SCOs (RSCOs), Restricted Residential SCOs (RRSCOs), Commercial Use SCOs (CSCOs), and/or Industrial Use SCOs (ISCOs) in soil samples collected within the fill stratum. The SVOC phenol, metals, and PFAS were identified at concentrations above NYSDEC Division of Water Technical and Operational

Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations (AWQS) in the groundwater samples collected. The VOC 1,2,4-trimethylbenzene was identified at a concentration requiring mitigation when compared to New York State Department of Health (NYSDOH) Soil Vapor/Indoor Air Matrix D in the soil vapor samples collected.

The objective of this ESA was to satisfy the User's due diligence requirements, and further identify the presence or likely presence, use or releases on the Subject Property of hazardous substances or petroleum products as defined in the American Standard of Testing and Materials (ASTM) E1527-21 as a Recognized Environmental Condition (REC). In addition, Business Environmental Risks (BERs), Controlled Recognized Environmental Conditions (CRECs), and Historical Recognized Environmental Conditions (HRECs) were identified, if present.

The following RECs have been identified:

- **REC 1 – Historic Fill:** Historic fill material was encountered at the Subject Property during due diligence subsurface investigations at the Subject Property in June 2024. SESI identified historic fill materials within the soil borings to depths of up to 6.0 fbgs. Select VOC, SVOC, metal, pesticide, and PFAS were identified at concentrations above NYSDEC USCOs, RSCOs, RRSCOs, CSCOs, and/or ISCOs in soil samples collected within the fill stratum. **Further investigation and remediation is warranted to address this REC. Additionally, the presence of contaminated historic fill will likely result in a premium disposal cost during redevelopment.**

- **REC 2 – Groundwater Impacts:** SESI collected two (2) groundwater samples during a due diligence investigation at the Subject Property in June 2024. Phenol, metals, and PFAS were identified at concentrations above NYSDEC TOGS AWQS in the groundwater samples collected. **Further action is warranted to address this REC. Additionally, regulated dewatering will be required during redevelopment if groundwater is encountered.**

- **REC 3 – Soil Vapor Impacts:** SESI collected three (3) soil vapor samples during a due diligence investigation at the Subject Property in June 2024. Specifically, 1,2,4-trimethylbenzene was detected in each of the soil vapor samples at concentrations

warranting mitigation when compared to NYSDOH Soil Vapor/Indoor Air Matrix D in the soil vapor sample collected. **Further action is warranted to address this REC. A sub-slab depressurization system or equivalent vapor intrusion mitigation system will be required for any proposed development.**

- **REC 4 – Current and Former Subject Property Operations:** The Subject Property is identified as a substation on the Sanborn maps dated 1978 through 2007. Prior usage as a substation poses the material risk that PCB-containing equipment was utilized at the Subject Property and may have discharged to the subsurface. Furthermore, the Subject Property supported automotive repair operations from at least 1992 to 2010, according to the City Directory Abstract. Additionally, SESI observed one (1) empty plastic 55-gallon drum and one (1) steel 55-gallon drum containing oily fluids within the former automotive repair garage building and several areas of refuse containing petroleum product containers on gravel or cracked concrete surfaces throughout the Subject Property. Staining was observed at the base of the drums. An investigation of these areas was performed during due diligence subsurface investigations at the Subject Property in June 2024. Soil, groundwater, and soil vapor impacts were identified at concentrations above NYSDEC Standards, Criteria, and Guidance (SCGs) in these areas. **Further investigation and remediation is warranted to address this REC. Additionally, the drums and petroleum product containers should be characterized and removed in accordance with local, state, and federal guidelines and regulations.**

- **REC 5 – Former Railroad Operations:** A historic railroad spur (circa 1896-2007), freight shed, and engine room (circa 1900-1950) were identified at the south and southeast of the Subject Property through historical aerial imagery and Sanborn maps. An investigation of these areas was performed during due diligence subsurface investigations at the Subject Property in June 2024. Soil, groundwater, and soil vapor impacts were identified at concentrations above NYSDEC Standards, Criteria, and Guidance (SCGs) in these areas. **Further investigation and remedial action, is warranted to address this REC.**

The following BERs have been identified:

- **BER 1 – E-Designation:** According to the New York City Searchable Property Environmental E-Database (SPEED), the Subject Property has an E-designation. The E-

designation ensures that sampling and remediation take place at the Subject Property to avoid any significant impacts related to hazardous materials. The E-designation requires that the fee owner of the Subject Property conducts testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Department of Environmental Protection (NYCDEP) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The E-designation also includes a mandatory construction-related health and safety plan which must be approved by NYCDEP. **Further action is required to address this BER.**

- **BER 2 – Potential Environmental Justice Area Designation:** According to the NYC SPEED, the Subject Property is located within a Potential Environmental Justice Area (PEJA). Redevelopment sites within PEJAs are subject to increased regulatory oversight and community outreach requirements during redevelopment. **No further action is required to address this BER. However, increased planning costs and construction delays may result from the increased regulatory oversight and community outreach requirements as a result of the PEJA designation.**

- **BER 3 – Hazardous Building Materials:** Based on the age of the structures, hazardous building materials including PCB caulking, asbestos containing materials (ACM), and lead-based paint (LBP) may be present at the Subject Property. **SESI recommends performing a comprehensive hazardous building materials survey prior to demolition of the existing buildings.**

The RECs and BERs are discussed further in **Section 10.0 CONCLUSIONS AND RECOMMENDATIONS** of this Report. CRECs and HRECs were not identified for the Subject Property.

2.0 INTRODUCTION

2.1 PURPOSE

The purpose of this study is to determine the RECs at the Subject Property for due diligence purposes related to the potential acquisition of the Subject Property.

SESI has developed this Phase I ESA Report on behalf of the User. It has been developed in substantial conformance with the ASTM's International Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-21. According to ASTM E1527-21, the following conditions were identified during this assessment:

REC – "(1) the presence of hazardous substances or petroleum products in, on, or at the property due to release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the property due to a release or likely to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition."

CREC – "A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority."

HREC – "A past release that has been remediated to below residential standards and given regulatory closure with no use restrictions."

BER – "A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate and is not an issue required to be investigated under this practice."

2.2 SCOPE OF SERVICES

The scope of this assessment consisted of the following general tasks: a records review; a Subject Property visit; interviews with present and past owners, operators, and occupants to the extent possible; and preparation of this ESA report. Specific tasks that were conducted included the following:

- A review of environmental databases maintained by the United States Environmental Protection Agency (USEPA) and state and local agencies within the minimum search

distance. Environmental Data Resources, Inc. (EDR) prepares environmental databases used in these assessments.

- A Subject Property reconnaissance to observe conditions and to assess the subject property location with respect to adjoining and surrounding property uses, types of development, topography, natural surface features, roadways, railroad lines and right-of-ways to identify obvious potential environmental conditions on neighboring properties.
- Per ASTM E1527-21, A User Questionnaire was provided to the User (Client) to obtain information related to the Subject Property.

2.3 SIGNIFICANT ASSUMPTIONS

Information obtained by SESI and by third parties is assumed to be accurate and/or true. SESI makes no warranty, either implied or expressed, regarding the accuracy or validity of information supplied by others.

2.4 LIMITATIONS/METHODOLOGY/RELIANCE

This ESA was prepared for the exclusive use of South Bronx Development I LLC, its affiliates and lenders. During the assessment, methodologies were used that conform to generally accepted practices for this type of work. The scope and character of the environmental assessment were, in professional judgment, sufficient to justify the stated conclusions, after giving due consideration to the purpose of the investigation, the data reviewed, the background history of the subject property as found in historical records, and visual observation of the subject property. No other investigation was performed other than that which is expressly noted in this Report.

This ESA was performed in accordance with ASTM E1527-21 and is subject to reasonable limits of time and cost and is intended to reduce but not eliminate uncertainty regarding the potential for RECs in connection with a property. Sampling and laboratory analysis are required to determine if soil, surface water, groundwater, air, and construction materials have been impacted by a contaminant.

The information presented in this ESA was obtained during the Subject Property reconnaissance and from the User, representatives of the User, current/former property owner(s) or tenants, Federal, State, County and Local Officials, and available mapped information obtained by SESI. SESI does not certify the accuracy of the information received from outside sources.

This ESA should be used in its entirety. Use of portions of this ESA may nullify the information and/or conclusions of this ESA. Subject property observations discussed herein apply to subject property conditions as observed during Subject Property reconnaissance only. The conclusions of this ESA do not apply to conditions that were unavailable for inspection and could not be evaluated.

SESI does not certify that the Subject Property is contaminant free and this ESA does not serve as a warranty. SESI's investigation was performed within the time frame requested by the client.

The activities to conduct this ESA did not include sampling and analyses of soil, surface water, groundwater, air, or construction materials unless expressed otherwise and requested by the User. However, since the User did commission SESI to perform a Phase II in June 2024, the result of which were incorporated into a September 2024 Phase II Report, which are incorporated herein. Formal wetland, asbestos, mold, and/or radon evaluations were not performed and are not within the scope of work for an ESA. If additional services including underground storage tank (UST) testing, construction materials testing, or environmental sampling (soil, surface water, groundwater, air) is recommended, the results and conclusions for these tests will be provided under separate cover. A geophysical survey was performed in June 2024, and no tanks were identified.

2.5 DISCLAIMER

This ESA was prepared by SESI for the sole and exclusive use of South Bronx Development I LLC. Nothing under the Agreement between SESI and the User shall be construed to give any rights or benefits to anyone other than the User and SESI, and all duties and responsibilities undertaken pursuant to the Agreement will be for the sole and exclusive benefit of the User and SESI and not for the benefit of any other party. SESI does not intend, without its written consent, for this ESA to be disseminated to anyone other than the User, or to be used or relied upon by anyone other than the User. Use of the ESA by any other person is unauthorized and such use is at their sole risk.

3.0 SUBJECT PROPERTY DESCRIPTION

3.1 LOCATION/STRUCTURES/LEGAL DESCRIPTION

The Subject Property consists of an approximately 1.4-acre parcel located at 2752-2768 Webster Avenue in the Bronx, Bronx County, New York. The Subject Property is identified on local tax map records as Block 3273; Lots 91 and 100. The Subject Property is improved with one (1) approximately 9.350-square feet (sf) one-to-two-story warehouse and one (1) approximately 2,330-sf two-story former automotive repair garage building. The buildings were constructed in 1906. The Subject Property is currently vacant and owned by the MTA. **Figure 3.1** provides a Subject Property Location Map. A Subject Property Plan is shown on **Figure 3.2**.

The Subject Property was initially developed prior to 1896. Railroad tracks have been present at the Subject Property since at least 1896. Historical Subject Property operations included a sewer pipe yard in 1900, freight house from 1900 to 1950, engine room in 1945, cold storage and substation from at least 1978 to 2007, and automotive repair from at least 1992 to 2010. SESI identified that the most recent operations at the Subject Property included a substation, cold storage facility, alcohol/liquor distributor, restaurants, and automotive repair garages.

According to the NYC SPEED, the Subject Property has an E-designation. The E-designation ensures that sampling and remediation take place at the Subject Property to avoid any significant impacts related to hazardous materials. The E-designation requires that the owner of the Subject Property conducts testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The E-designation also includes a mandatory construction-related health and safety plan which must be approved by NYCDEP. The E-designation for the Subject Property is included as **BER-1**.

Additionally, according to the NYC SPEED, the Subject Property is located within a PEJA. Redevelopment sites within PEJAs are subject to increased regulatory oversight and community outreach requirements during redevelopment. The PEJA designation for the Subject Property is included as **BER-2**.

The Subject Property is bound to the north by Webster Avenue followed by mid-rise mixed-use commercial and residential buildings, to the west by a laydown yard and parking lot, to the south by the Metro-North railroad and Fordham University and Preparatory School, and to the east by a warehouse. A summary of the uses of the adjacent properties is shown on **Table 3.1** below.

Table 3.1—Adjacent Property Uses

Direction	Adjacent Property Use
North	Mixed-use commercial/residential Buildings
South	Metro-North railroad and Fordham University and Preparatory School
East	Warehouse
West	Laydown yard and parking lot

3.2 SUBJECT PROPERTY AND VICINITY CHARACTERISTICS

The Subject Property is located in a mixed-use commercial and residential neighborhood with Bronx Park to the east. The closest notable surface water body is the Bronx River located approximately 0.5 miles east of the Subject Property.

3.3 CURRENT USE OF THE PROPERTY

The Subject Property is currently vacant commercial land owned by the MTA.

3.4 DESCRIPTION OF STRUCTURES, ROADS, AND SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is composed of an approximately 1.4-acre parcel developed with one (1) approximately 9.350-square feet (sf) one-to-two-story warehouse and one (1) approximately 2,330-sf two-story former automotive repair garage building. The buildings were constructed in 1906.

3.5 CURRENT USES OF ADJOINING PROPERTIES

The Subject Property is bound to the north by Webster Avenue followed by mid-rise mixed-use commercial and residential buildings, to the west by a laydown yard and parking lot, to the south by the Metro-North railroad and Fordham University and Preparatory School, and to the east by a warehouse.

4.0 USER PROVIDED INFORMATION

4.1 TITLE INFORMATION

SESI was not provided with any title information or title search.

4.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

SESI did not find any information regarding environmental liens or activity and use limitations.

4.3 SPECIALIZED KNOWLEDGE/OTHER USER PROVIDED INFORMATION

SESI was provided with the following previous environmental reports regarding the Subject Property:

- Phase I Environmental Site Assessment, 2768 Webster Ave, Bronx, NY 10458, prepared by Environmental Affiliates, Inc. (EAI), dated January 20, 2021

The Phase I ESA prepared by EAI identified the following RECs:

- The Subject Property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Property and may have discharged to the subsurface.
- According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Property), and debris.

EAI recommended performing a Phase II subsurface investigation at the Subject Property, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs, PCBs, and/or petroleum have impacted the subsurface of the Subject Property. EAI's Phase I ESA is provided in **Appendix A**.

In addition to the report discussed above, SESI performed due diligence environmental and geotechnical investigations in June 2024 which are provided under separate cover in a September 2024 Phase II ESA Report.

SESI performed due diligence subsurface investigations at the Subject Property consisting of geophysical surveys and the advancement of twenty-eight (28) soil borings, two (2) temporary wellpoints, and three (3) soil vapor samples in June 2024. Geophysical anomalies indicative of USTs were not detected during the geophysical surveys. SESI identified historic fill materials within the soil borings to depths of up to 6.0 fbgs. Elevated PID readings and petroleum odors were detected at several areas throughout the Site, and an oily tar substance was identified in several of the borings. SESI identified historic fill materials within the soil borings to depths of up to 6.0 fbgs. Select VOCs, SVOCs, metal, pesticide, and PFAS were identified at concentrations above NYSDEC USCOs, RSCOs, RRSCOs, CSCOs, and/or ISCOs in soil samples collected within the fill stratum. The SVOC phenol, metals, and PFAS were identified at concentrations above NYSDEC TOGS AWQS in the groundwater samples collected. The VOC 1,2,4-trimethylbenzene was identified at a concentration requiring mitigation when compared to NYSDOH Soil Vapor/Indoor Air Matrix D in the soil vapor samples collected.

4.3.1 INTERVIEWS

An environmental professional from SESI, Ronnie Reynoso Gomez, conducted interviews with operators of the Subject Property in an effort to acquire pertinent information relating to current and historic Subject Property conditions and these interviews are summarized below.

On February 2, 2025, SESI met with a representative of the Subject Property owner who refused to provide his name for the Phase I ESA Subject Property inspection and SESI's Environmental Questionnaire was provided to them. The Subject Property owner representative directed a tour of the facility. Information obtained from this interview, questionnaire and Subject Property inspection is integrated in this Phase I ESA. A completed User Questionnaire is presented as **Appendix B**.

4.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE RECORDS

SESI completed a review of publicly available NYSDEC mapping and database systems and the United States Environmental Protection Agency (USEPA) database system as part of this Report to determine the environmental conditions at the Subject Property and adjacent properties. According to the NYSDEC database, no environmental facilities of concern were identified. However aboveground storage tanks are noted at the properties across from Webster Avenue. No active cases are present in the nearby facilities.

According to the NYC SPEED, the Subject Property has an E-designation. The E-designation ensures that sampling and remediation take place at the Subject Property to avoid any significant impacts related to hazardous materials. The E-designation requires that the owner of the Subject Property conducts testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The E-designation also includes a mandatory construction-related health and safety plan which must be approved by NYCDEP. The E-designation for the Subject Property is included as **BER-1**.

Additionally, according to the NYC SPEED, the Subject Property is located within a PEJA. Redevelopment sites within PEJAs are subject to increased regulatory oversight and community outreach requirements during redevelopment. The PEJA designation for the Subject Property is included as **BER-2**.

4.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The Report User indicated no knowledge of any valuation reduction related to environmental concerns.

4.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The Subject Property parcels are currently owned by the MTA and are vacant commercial/utility spaces.

5.0 RECORDS REVIEW

5.1 STANDARD ENVIRONMENTAL RECORD SOURCES: FEDERAL, CITY, STATE

5.1.1 EDR SEARCH

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR) and reported in the EDR Radius Map Report with GeoCheck. The Report meets the government records search requirements of ASTM Standard of Practice for Environmental Site Assessments, E-1527-21. Search distances are per ASTM standards. A Radius Map Check was performed by EDR and are provided in **Appendix C**. All properties in the search area with environmental records are listed below:

Table 5.1—Property Listings

Environmental Listing	Subject Property	0-1/8 Miles	1/8 – 1/4 Miles	1/4 -1/2 Miles	1/2-1 Mile
RCRA-SQG	0	1	2	NR	NR
RCRA-VSQG	0	2	0	NR	NR

NR—not requested at this search distance

The EDR Radius Map Report identified operations at the Subject Property in the following listing:

E DESIGNATION: E Designation Site Listing and NYC LAND USE: New York City Land Use Information

The E-designation ensures that sampling and remediation take place on subject properties to avoid any significant impacts related to hazardous materials at these locations. The E-designations require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The E-designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP. A review of the database as provided by EDR identified the Subject Property as having an E-designation. The E-designation for the Subject Property is included as **BER 1**.

The EDR Radius Map Report identified operations at nearby facilities in the following listings. A discussion of these listings is provided below:

RCRA Small Quantity Generator (RCRA-SQG)

The RCRA-SQG includes a list of facilities that generate more than 100 but less than 1,000 kilograms of hazardous waste per month and accumulate less than 6,000 kilograms of hazardous waste at any time. According to the RCRA-SQG list provided by EDR, there are three (3) RCRA-SQG facilities (NYC Dept of Education PS 54X, NYC Dept of Education PS 46X, and Kevins Cleaners) within approximately 0.25 miles of the Subject Property. PS 54 is across Webster Avenue from the Subject Property and PS 46 is within 0.25 miles of the Subject Property. However, a review of the facilities did not identify any environmental release(s) of hazardous materials except for releases from ConEd transformers which have been remediated and closed. Furthermore, Kevins Cleaners did not have any identified release of hazardous materials. Therefore, these facilities are not anticipated to adversely impact the Subject Property.

RCRA Very Small Quantity Generator (RCRA-VSQG)

The RCRA-VSQG includes a list of facilities that generate less than 100 kilograms of hazardous waste, or less than one (1) kilogram of acutely hazardous waste per month. According to the RCRA-VSQG list provided by EDR, there are two (2) RCRA-VSQG facilities (Family Dollar Store 7270 and Allen Cleaners) within approximately 0.125 miles of the Subject Property. The Family

Dollar Store has no reported leaks. A release of #2 fuel oil to the surrounding soil was assigned NYSDEC Spill Number 9613235 for Allen Cleaners Site; however, the spill was closed on February 7, 1997. In addition, the facilities are both 750 feet from the Subject Property; based on these findings, these facilities are not anticipated to adversely impact the Subject Property.

NY State Hazardous Waste Sites (NY SHWS)

NY SHWS is a list of known contaminated facilities in New York. Four (4) SHWS facilities (The Rinzler Family LTD Partner, 2628 University Ave [Block 3215], 2614 Kingsbridge Corp, and 650 Waring Avenue) were located within one (1) mile of the Subject Property. The University Ave and Kingsbridge facilities have been remediated or are undergoing remediation. The Rinzler Family LTD Partner facility is undergoing remediation for indoor air and sub-slab concentrations of trichloroethylene. The Waring Avenue Site is a closed Brownfield Cleanup Program (BCP) Site located across the Bronx River. Based on the above findings and the distance of all the facilities from the Subject Property (greater than 0.75 miles), these facilities are not anticipated to adversely impact the Subject Property.

NY Leaking Storage Tanks (NY LTANKS)

The NY LTANKS database contains an inventory of reported leaking underground and aboveground storage tanks. According to the NY LTANKS list provided by the EDR, there are 55 tanks located within one-half mile of the Subject Property. Of the nine (9) tanks located within 0.25 miles of the Subject Property, all are closed except for NYSDEC Spill Number 1304243 assigned for a failed tightness test of a 4,000-gallon No. 6 fuel oil UST at the Apt Building TFF located at 400 East 199th Street in 2013. The Apt Building spill file has limited information available pertaining to the spill case. Although a NYSDEC Spill Number was generated, a release was not documented from the UST. Therefore, this facility is not anticipated to adversely impact the Subject Property.

NY Underground Storage Tanks Sites (NY UST)

The NY UST database contains registered USTs maintained by the associated facilities. USTs are regulated under Subtitle I of the RCRA. Ten (10) NY UST facilities are located within approximately 0.25 miles of the subject property. However, a review of the facilities did not identify any environmental release(s). Additionally, no USTs were identified on the Subject Property or on adjacent properties. Therefore, these facilities are not anticipated to adversely impact the Subject Property.

NY Above Ground Storage Tank Sites (NY AST/NY Tanks)

The NY AST/NY Tanks database contains registered ASTs and/or USTs maintained by the associated facilities. Eighty-eight (88) facilities were identified within approximately 0.25 miles of the Subject Property. Ten (10) of these have associated spill numbers, nine (9) of which are closed. The remaining open spill from the Apt Building TTF facility was previously discussed. Based on these findings, these facilities are not anticipated to adversely impact the Subject Property.

NY Voluntary Clean Up Program (NY VCP)

The NY VCP is a list of responsible parties, developers, local officials, or individuals working with the department to remediate non-priority contaminated sites that pose no immediate threat to human health or the environment. A review of NY VCP list provided by EDR has identified seven (7) NY VCP facilities within approximately 0.5 miles of the Subject Property. One (1) of the facilities is active under the name On the Property – Phase II – Office of Environmental Remediation located at 2997 Webster Avenue. Groundwater contamination has been delineated within the boundaries of that facility. One (1) remaining active facility, 4729 Park Avenue, has an approved remedial plan in place and contamination in soil/fill, soil vapor, and groundwater has been delineated. This facility is located 0.41 miles to the southwest of the Subject Property and groundwater flow is to the northwest. Remediation is complete at five (5) of the remaining VCP facilities. Based on our review, these facilities are not anticipated to adversely impact the Subject Property.

NY BROWNFIELDS

NY BROWNFIELDS are facilities that are identified as former or current commercial or industrial use facilities that are presently vacant or underutilized, on which there is suspected to have been a discharge of contamination to the soil or groundwater at concentrations greater than applicable cleanup criteria. A review of NY BROWNFIELD list provided by EDR has revealed that there is one (1) NY BROWNFIELD facility (former Sears Auto Center Site) within approximately 0.5 miles of the Subject Property. The former Sears Site has been closed. Based on our review, this facility is not anticipated to adversely impact the Subject Property.

NY SPILLS

NY SPILLS are facilities that have documented releases/spills associated with either petroleum bulk storage or chemical bulk storage at their facilities. According to the NY SPILLS list provided by EDR, there are 20 NY SPILLS facilities within 0.125 miles of the Subject Property. Every spill facility listed in the NY Spills database has been closed; therefore, these facilities are not anticipated to adversely impact the Subject Property.

RCRA Non-Generators/No Longer Regulated (RCRA NonGen/NLR)

Resource Conservation and Recovery Act Non-Generators (RCRA NonGen) database searches USEPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information about facilities that generate, transport, store, treat and/ or dispose of hazardous waste as described by RCRA. Non-Generators do not presently generate hazardous waste. A review of RCRA NonGen/NLR list provided by EDR has revealed that there are 34 facilities within 0.25 miles of the Subject Property. Since none of these facilities currently generate hazardous waste, they are not expected to adversely impact the Subject Property.

Formerly Used Defense Site (FUDS)

The FUDS list provides an inventory of historically operated defense facilities where the US Army Corps of Engineers is working or will take necessary cleanup actions. A review of the FUDS list, as provided by EDR, has revealed that there is one (1) FUDS facility (Navy Training School) within approximately one (1) mile of the subject property. A review of available NYSDEC databases was conducted. A review of the Management Action Plan for the facility indicates there are no remaining environmental issues at the facility. Based on this, the facility is not anticipated to adversely impact the Subject Property.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials. A review of the database as provided by EDR identified nine (9) facilities within 0.5 miles of the Subject Property. All the facilities have been closed; therefore, these facilities are not anticipated to adversely impact the Subject Property.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of UST and LUST data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires. A review of the database as provided by EDR identified nine (9) facilities within 0.25 miles of the Subject Property. These entries were all previously discussed as part of the NY Tanks listing and are not anticipated to adversely impact the Subject Property

E MANIFEST: Hazardous Waste Electronic Manifest System

EPA established a national system for tracking hazardous waste shipments electronically. This system, known as e-Manifest, will modernize the nation's cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. A review of the database as provided by EDR identified one (1) facility (NYC Dept of Education -PS 46X) within 0.25 miles of the subject property. There are no spills associated with the facility; therefore, this facility is not anticipated to adversely impact the Subject Property.

NY DRYCLEANERS Sites

NY DRYCLEANERS database provides a listing of active dry cleaner facilities. A review of the database as provided by EDR identified three (3) facilities (Allen Cleaners, Mary's Cleaners, and Kevins Cleaners) within 0.25 miles of the Subject Property. According to available database information, J.R. Cleaners has no associated spills. The Allen Cleaners facility was previously discussed. These facilities are not anticipated to adversely impact the Subject Property.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation process ensures that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designation process requires that the fee owner of the site conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the

provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designation process also includes a mandatory construction-related health and safety plan which must be approved by NYCDEP. A review of the database as provided by EDR identified 17 facilities within 0.125 miles of the subject property. All these facilities are listed under the E-249 code for the possible rezoning of the area. Based on a review of previous discussed spills, these facilities are not anticipated to adversely impact the Subject Property.

MANIFEST Sites

MANIFEST Sites include a list of facilities that have generated hazardous waste or contaminants. A review of the NY, NJ, and RI MANIFEST lists, as provided by EDR, has revealed that there are 41 NY MANIFEST, four (4) NJ MANIFEST facilities and one (1) RI MANIFEST facility within approximately 0.25 miles of the subject property. Based on a review of the available database information, documented release events have occurred only at the Allen Cleaners facility previously discussed above. Therefore, these facilities are not anticipated to adversely impact the Subject Property

NYC OER: OER Cleanup Sites Listing

Properties remediated under OER's oversight, both in the E-Designation program and the NYC Voluntary Cleanup Program are on the NYC OER Cleanup Sites List, which includes sites completed and in progress. A review of the database as provided by EDR identified 23 facilities within one (1) mile of the subject property. Of the active facilities, there is no indication that groundwater contamination exceeds the boundaries of the facilities. Therefore, these facilities are not anticipated to adversely impact the Subject Property.

NYC LAND USE : NEW YORK CITY LAND USE INFORMATION

A review of this database as provided by EDR identified one (1) facility (Lot 100, Tax Block 3273) within 0.125 miles of the Subject Property. Based on a review of the available database information, documented release events have not occurred at this facility; therefore, this facility is not anticipated to adversely impact the Subject Property.

EDR Hist Cleaner Sites

The EDR Hist Cleaner list provides an inventory of facilities that formerly/historically operated a dry-cleaning business. A review of the EDR Hist Cleaner database, as provided by EDR, has revealed that there are three (3) Hist Cleaner facilities (JJ Sport Bar and Billard and Allen Cleaners

[two listings, two addresses]) within approximately 0.125 miles of the Subject Property. As previously discussed, these facilities are not expected to have adversely impacted the subject property.

EDR City Directory

The EDR City Directory for properties in the area surrounding the Subject Property included mainly commercial listings including offices, stores, service businesses, and residences.

5.1.2 PREVIOUS ENVIRONMENTAL REPORTS

Previous environmental reports were provided by the User and reviewed as part of this assessment. These reports are discussed in **Section 4.3** of this Report.

5.1.3 LOCAL, COUNTY, AND STATE INFORMATION REQUESTS

On January 27, 2025, SESI filed information requests with the NYSDEC and New York City Departments of Buildings (NYCDOB), Health and Mental Hygiene (NYCDOHMH), Department of Environmental Protection (NYCDEP) and the Mayor's Office of Environmental Remediation (OER) for information regarding potential incidents, spills, hazardous material storage/use and UST decommissioning records. NYCDOB provided a Property Profile Overview which identified the Subject Property's E-designation and Department of Finance Building Classification (K4-Store Building). Information request responses submitted to the NYCDEP, OER and NYSDEC did not identify responsive records. The NYCDOHMH has not responded to SESI's inquiry to date. Should the response contain information that alters the opinions and conclusions of this Report, SESI reserves the right to revise this Report based on this information. Information requests are presented in **Appendix D**.

5.2 PHYSICAL SETTING SOURCES

Sources used to evaluate the physical setting of the Subject Property include:

- USGS Topographic Maps
- Aerial Photographs
- Subject Property Reconnaissance

5.2.1 TOPOGRAPHY

The Subject Property is relatively level with local topography sloping upwards to the southeast and northwest. According to the United States Geological Survey (USGS) 2019 Central

Park/Flushing/Yonkers/Mount Vernon 7.5-minute Series topographic map, the subject property's topographic elevation is approximately 58 feet above mean sea level (msl). The EDR Topographic Map Report is attached to this Report as **Appendix C**.

5.2.2 SURFACE WATERS AND WETLANDS

The closest open surface water to the Subject Property is the Bronx River located approximately 0.5 miles east of the Subject Property.

5.2.3 GEOLOGY AND GROUNDWATER

As per the USDA National Cooperative Soil Survey (NCSS) map for the area, the soils at the Subject Property are characterized as UGB (Urban land-Greenbelt complex, 3 to 8 percent slopes) and UoA (Urban land, outwash substratum, 0 to 3 percent slopes). Groundwater was encountered as shallow as 11 fbgs during SESI's due diligence investigations.

5.3 HISTORICAL USE INFORMATION FOR THE PROPERTY

Sources used to determine the historical use of the Subject Property include:

- Aerial Photographs,
- EDR City Directory Abstract,
- USGS Topographic Maps, and
- Sanborn Fire Insurance Maps

EDR Reports are attached to this Report as **Appendix C**.

5.3.1 AERIAL PHOTOGRAPHS

Following is a summary of the EDR review of 16 aerial photographs dated 1924, 1951, 1954, 1962, 1966, 1974, 1976, 1984, 1991, 1995, 2002, 2006, 2009, 2011, 2015, and 2019:

Table 5.2—Aerial Photographic Review

Year	Quality of Photograph	Observations
1924	Good	**Subject Property:** Structures are present on the western portion of the Subject Property. A north-south-oriented road bisects the Subject Property. A rectangular structure is present along the southern border of the Subject Property. Railcars are also present along the southern boundary (**REC 5**). **Adjacent Parcels:** An east-west-oriented road forms the northern boundary of the Subject Property. The properties

Year	Quality of Photograph	Observations
		to the west and northeast are paved. With railroad lines present to the south.
1951	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** Structures are present to the west of the Subject Property. A parking lot and large structures are present to the northeast of the Subject Property. The railroad track to the south is evident.
1954	Fair	**Subject Property:** No discernible changes. **Adjacent Parcels:** No discernible changes.
1962, 1966	Good	**Site:** Additional structures are present in the center of the Subject Property. A railcar storage or loading area is present on the east of Subject Property (**REC 5**). **Adjacent Parcels:** Development is present on the property to the west.
1974	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** The property to the west appears wooded and no longer contains a railcar housing/loading area.
1976	Poor	**Subject Property:** The poor image quality makes details difficult to discern. **Adjacent Parcels:** The poor image quality makes details difficult to discern.
1984, 1991	Fair-Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** The property to the west has been cleared.
1995, 2002	Good	**Subject Property:** A parking lot is present surrounding the building on the Subject Property. **Adjacent Parcels:** A structure and associate parking lot are present to the west of the Subject Property.
2006, 2009, 2011, 2015, 2019	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** A parking lot is present to the west of the Subject Property.

One (1) REC, Former Railroad Operations (**REC 5**) was identified based on the review of the historical aerial photographs.

5.3.2 EDR CITY DIRECTORY ABSTRACT

SESI obtained historical city directory data from EDR for the Subject Property. SESI reviewed the City Directory listings for the years 1940 through 2020. The Subject Property address was not listed in the City Directory listings. However, a former Subject Property address (2768 Webster Avenue) was listed for commercial and industrial uses. Based on the city directory data, historic

operations at the Subject Property have included commercial and industrial uses including automotive repair from at least 1992 to 2010. Current and former Subject Property operations are included as **REC 4**.

Facilities of concern that operated in the vicinity of the Subject Property include BWAY Plumbing and Heating Corp., which operated from at least 1992 at 390 197th Street, and Comfort Control Metro Heating and Plumbing, which operated from at least 1993 at 2755 Webster Ave. However, active releases from these facilities have not been identified.

5.3.3 HISTORICAL AND CURRENT SUBJECT PROPERTY OPERATIONS

SESI obtained historical city directory data from EDR for the Subject Property. SESI reviewed the City Directory listings for the years 1940 through 2020. The Subject Property address was not listed in the City Directory listings. However, a former Subject Property address (2768 Webster Avenue) was listed for commercial and industrial uses. A summary of previous operators at the Subject Property is presented in **Table 5.3** below. A copy of the City Directory Abstract is included in **Appendix C**.

Table 5.3—Historical Subject Property Operations

Year	Operations
1940	Automatic Batry Filler Corp
1949	T & S DRESS
1961	LUISI JOS
1965	AMER EAGLE REPUBLICAN CLUB
1971	AMER EAGLE REPUBLICAN CLUB EXCELSIOR BRASS PLUMBING CORP

2020	LA SIRENITA

5.3.4 USGS TOPOGRAPHIC MAPS

Following is a summary of the EDR review of Topographic Map Reports:

Table 5.4—Topographic Map Review

Source	Year	Minute	Scale
Harlem	1897, 1898, 1900	15	62500
Central Park/Mt. Vernon/Flushing/Yonkers	1947, 1955/1956, 1966, 1979, 1995/1997/1998, 2013, 2016, 2019	7.5	24000

The topographic maps depict the Subject Property as level with an approximate elevation of 58-feet above msl. Regional topography indicates the Subject Property is at a lower elevation with sloped increasing to the northwest and southeast. No wetlands were noted on the maps within or adjacent to the Subject Property. A review of these maps suggests the Subject Property was developed prior to 1947.

5.3.5 SANBORN FIRE INSURANCE MAPS

The Subject Property was covered on 27 of the Sanborn maps from 1896, 1900, 1901, 1914, 1945, 1950, 1977, 1978, 1979, 1980, 1981, 1984, 1986, 1989, 1991, 1992, 1993, 1995, 1996, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 described below:

Table 5.5—Sanborn Map Review

Year	Quality of Map	Observations
1896	Good	**Subject Property:** An automobile garage is identified on eastern portion of the Subject Property **(REC 4)**. A railroad spur enters the Subject Property (**REC 5**). **Adjacent Parcels:** The New Haven Railroad tracks form the southeastern boundary of the Subject Property. Webster Avenue forms the northern boundary of the Subject Property. The properties to the east and west are vacant. Structures are present on the eastern adjacent property, identified as a lumber and building materials facility.
1900	Good	**Subject Property:** The Subject Property is identified as a sewer pipe yard with a freight house and an unlabeled building. **Adjacent Parcels:** The property to the east is also identified as a sewer pipe yard and building materials yard. The tracks to the southeast are labelled N.Y. Central and Hudson River Railroad.
1901	Fair	**Subject Property:** No structures are indicated on the Subject Property. **Adjacent Parcels:** One (1) building is present on the property to the west. The property to the east that is depicted on the map is vacant.
1914	Good	**Subject Property:** A freight yard is identified in the eastern portion of the Subject Property (**REC 5**). **Adjacent Parcels:** Stores and a hotel are identified to the north of the property. Bronx Hay and Grain is identified to the northeast of the Subject Property.
1945	Good	**Subject Property:** An engine room is noted to the east adjacent the freight shed (**REC 5**). **Adjacent Parcels:** An icehouse/ice storage are identified to the north of the Subject Property, on a previously vacant property. Two (2) garages are identified to the northeast of the Subject Property.
1950	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** A woodworking operation is identified in the location of the icehouse. One (1) garage remains; the operations at the adjoining property are illegible.
1977	Fair	**Subject Property:** One (1) structure is present on the Subject Property, which is no longer identified as a freight yard. **Adjacent Parcels:** Parking, bowling, and a cabinet company are identified to north of the Subject Property.

Year	Quality of Map	Observations
1978	Good	**Subject Property:** A building identified as cold storage and sub-station **(REC 4)** is apparent. **Adjacent Parcels:** A signal station is present to the west of the Subject Property.
1979-1981, 1984	Good	**Subject Property:** One (1) building is present in the center of the Subject Property. **Adjacent Parcels:** The signal station is no longer present to the west of the Subject Property.
1986. 1989, 1991	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** The cabinet company to the northeast is no longer present; the property is identified as Alman Metal Prod.
1992, 1993	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** The property to the west of the bowling property is identified as auto auction.
1995, 1996	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** The building previously identified as bowling is now identified as auto repair.
1998	Fair	**Subject Property:** The cold storage and sub-station buildings are visible again. **Adjacent Parcels:** A signal station is identified to the west of the Subject Property.
2001-2003	Good	**Subject Property:** The building is identified as cold storage and NYCRR substation. **Adjacent Parcels:** No discernible changes.
2004-2007	Good	**Subject Property:** No discernible changes. **Adjacent Parcels:** The auto repair property to the northeast is now identified as parking.

Based on the review of Sanborn Maps, two (2) RECs were identified:

- Current and Former Subject Property Operations (**REC 4**).
- Former Railroad Operations (**REC 5**).

5.3.6 ENVIRONMENTAL LIEN AND AUL SEARCH REPORT

Based on data provided by EDR, no environmental liens or any other activity or use limitations were found.

5.4 ENVIRONMENTAL PERMITS

Review of the EDR Radius Map Report for the Subject Property indicates no environmental permits attributed to the Subject Property. EDR Reports are provided in **Appendix C**.

6.0 SUBJECT PROPERTY RECONNAISSANCE

6.1 METHODOLOGY AND LIMITING CONDITIONS

An environmental professional from SESI, Ronnie Reynoso Gomez, visited the Subject Property on February 4, 2025 to identify potential RECs. The Subject Property was observed to the extent that it was accessible and not obstructed. An inspection photolog is attached to this Report as **Appendix E.**

6.2 SUBJECT PROPERTY OBSERVATIONS

The Subject Property is composed of an approximately 1.4-acre parcel developed with one (1) approximately 9.350-square feet (sf) one-to-two-story warehouse and one (1) approximately 2,330-sf two-story former automotive repair garage building. The buildings were constructed in 1906. The Subject Property is currently vacant and owned by Bandry, LLC. SESI identified that the most recent operations at the Subject Property included a substation, cold storage facility, alcohol/liquor distributor, restaurants, and automotive repair garages.

6.3 CHEMICAL STORAGE AND USAGE

SESI observed one (1) empty plastic 55-gallon drum and one (1) steel 55-gallon drum containing oily fluids within the former automotive repair garage building and several areas of refuse containing petroleum product containers on gravel or cracked concrete surfaces throughout the Subject Property. Staining was observed at the base of the drums. Current and former Subject Property Operations are included as **REC 4**.

6.4 BULK STORAGE TANKS

SESI personnel did not observe any bulk storage tanks during the time of inspection.

6.5 SUBJECT PROPERTY WASTE AND WASTEWATER

SESI observed several areas of refuse containing petroleum product containers on gravel or cracked concrete surfaces throughout the Subject Property. No evidence of staining or release was observed in the vicinity of the refuse. Current and former Subject Property Operations are included as **REC 4**.

6.6 STAINED SOIL, STAINED PAVEMENT, OR STRESSED VEGETATION

SESI did not observe any indications of stained soil, stained pavement, or stressed vegetation other than was previously described in Section 6.3.

6.7 PITS, PONDS, OR LAGOONS

No pits, ponds or lagoons were identified at the subject property.

6.8 WELLS

SESI did not observe any on-site dry wells, irrigation wells, injection wells, observation wells, monitoring wells, potable water wells, recovery wells, or abandoned wells.

6.9 FLOOR DRAINS AND SUMPS

SESI did not observe any floor drains. Several historic vaults were present at the Subject Property; however, the vaults do not contain drains.

6.10 PCB

No pad or pole-mounted transformers were present at the Subject Property. However, due to the age of the structures, an inspection of PCB caulking is recommended. Hazardous building materials are included as **BER 3**.

6.11 ASBESTOS-CONTAINING MATERIAL (ACM)

ACM surveying was not included in SESI's scope of work; however, based on the age of the structures, an ACM survey is recommended. Hazardous building materials are included as **BER 3.**

6.12 RADON

Radon surveying was not included in SESI's scope of work. The Subject Property is located in USEPA Zone 3, categorized as having a low risk of radon exposure, therefore an evaluation or system implementation to address radon is not recommended at this time.

6.13 LEAD-BASED PAINT (LBP)

LBP surveying was not included in SESI's scope of work; however, based on the age of the buildings, an LBP survey is recommended. Hazardous building materials are included as **BER 3**.

6.14 VAPOR INTRUSION

SESI collected three (3) soil vapor samples during a due diligence investigation at the Subject Property in June 2024. The VOC 1,2,4-trimethylbenzene was identified at concentrations requiring mitigation when compared to NYSDOH Soil Vapor/Indoor Air Matrix D in all the soil vapor samples collected. Additionally, naphthalene in soil vapor sample SV-3 and 1,3,5-trimethylbenzene in each of the soil vapor samples may require further action. A sub-slab depressurization system or equivalent vapor intrusion mitigation system is required for any proposed development involving human occupancy at the Subject Property. Soil vapor impacts are included as **REC 3**.

7.0 DATA GAPS

Based on a review of the available documentation, the following data gaps have been identified:

- A chain of title search was not provided to SESI for review.
- Access to the main level of the historic auto garage spaces was not provided; however, inspections of the basements were completed.
- A response to SESI's FOIL request has not been received by NYCDOHMH to date.

These data gaps are not expected to significantly affect the overall conclusions of the assessment.

8.0 FINDINGS

Based on our investigation, we conclude that there is evidence to indicate areas of potential environmental concern on the Subject Property due to the historical usage as an automotive repair business, sub-station and the presence of oil-containing drums and equipment. See ***Section 10.0 CONCLUSIONS*** of this Report.

9.0 OPINION

In our professional judgment, the scope and character of our environmental assessment were sufficient to justify the stated conclusions, after giving due consideration to the purpose of the investigation, the data reviewed, the background history of the subject property as found in historical records, and visual observation of the subject property.

10.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the investigation, SESI concludes that there is evidence to indicate areas of recognized environmental concern on the Subject Property and that additional investigation of these areas is warranted. The conclusions and recommendations in this regard are as follows:

The following RECs have been identified:

- **REC 1 – Historic Fill:** Historic fill material was encountered at the Subject Property during due diligence subsurface investigations at the Subject Property in June 2024. SESI identified historic fill materials within the soil borings to depths of up to 6.0 fbgs. Select VOC, SVOC, metal, pesticide, and PFAS were identified at concentrations above NYSDEC USCOs, RSCOs, RRSCOs, CSCOs, and/or ISCOs in soil samples collected within the fill stratum. **Further investigation and remediation is warranted to address this REC. Additionally, the presence of contaminated historic fill will likely result in a premium disposal cost during redevelopment.**

- **REC 2 – Groundwater Impacts:** SESI collected two (2) groundwater samples during a due diligence investigation at the Subject Property in June 2024. Phenol, metals, and PFAS were identified at concentrations above NYSDEC TOGS AWQS in the groundwater samples collected. **Further action is warranted to address this REC. Additionally, regulated dewatering will be required during redevelopment if groundwater is encountered.**

- **REC 3 – Soil Vapor Impacts:** SESI collected three (3) soil vapor samples during a due diligence investigation at the Subject Property in June 2024. Specifically, 1,2,4-trimethylbenzene was detected in each of the soil vapor samples at concentrations warranting mitigation when compared to NYSDOH Soil Vapor/Indoor Air Matrix D in the soil vapor sample collected. **Further action is warranted to address this REC. A sub-slab depressurization system or equivalent vapor intrusion mitigation system will be required for any proposed development.**

- **REC 4 – Current and Former Subject Property Operations:** The Subject Property is identified as a substation on the Sanborn maps dated 1978 through 2007. Prior usage as a substation poses the material risk that PCB-containing equipment was utilized at the

Subject Property and may have discharged to the subsurface. Furthermore, the Subject Property supported automotive repair operations from at least 1992 to 2010, according to the City Directory Abstract. Additionally, SESI observed one (1) empty plastic 55-gallon drum and one (1) steel 55-gallon drum containing oily fluids within the former automotive repair garage building and several areas of refuse containing petroleum product containers on gravel or cracked concrete surfaces throughout the Subject Property. Staining was observed at the base of the drums. An investigation of these areas was performed during due diligence subsurface investigations at the Subject Property in June 2024. Soil, groundwater, and soil vapor impacts were identified at concentrations above NYSDEC Standards, Criteria, and Guidance (SCGs) in these areas. **Further investigation and remediation is warranted to address this REC. Additionally, the drums and petroleum product containers should be characterized and removed in accordance with local, state, and federal guidelines and regulations.**

- **REC 5 – Former Railroad Operations:** A historic railroad spur (circa 1896-2007), freight shed, and engine room (circa 1900-1950) were identified at the south and southeast of the Subject Property through historical aerial imagery and Sanborn maps. An investigation of these areas was performed during due diligence subsurface investigations at the Subject Property in June 2024. Soil, groundwater, and soil vapor impacts were identified at concentrations above NYSDEC Standards, Criteria, and Guidance (SCGs) in these areas. **Further investigation and remedial action, is warranted to address this REC.**

The following BERs have been identified:

- **BER 1 – E-Designation:** According to the New York City Searchable Property Environmental E-Database (SPEED), the Subject Property has an E-designation. The E-designation ensures that sampling and remediation take place at the Subject Property to avoid any significant impacts related to hazardous materials. The E-designation requires that the fee owner of the Subject Property conducts testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Department of Environmental Protection (NYCDEP) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The E-designation also includes a mandatory construction-related health and safety plan which must be approved by NYCDEP. **Further action is required to address this BER.**

- **BER 2 – Potential Environmental Justice Area Designation:** According to the NYC SPEED, the Subject Property is located within a Potential Environmental Justice Area (PEJA). Redevelopment sites within PEJAs are subject to increased regulatory oversight and community outreach requirements during redevelopment. **No further action is required to address this BER. However, increased planning costs and construction delays may result from the increased regulatory oversight and community outreach requirements as a result of the PEJA designation.**

- **BER 3 – Hazardous Building Materials:** Based on the age of the structures, hazardous building materials including PCB caulking, asbestos containing materials (ACM), and lead-based paint (LBP) may be present at the Subject Property. **SESI recommends performing a comprehensive hazardous building materials survey prior to demolition of the existing buildings.**

CRECs and HRECs were not identified at the Subject Property.

A figure showing the locations of the RECs identified at this subject property is included as **Figure 10.1.**

11.0 DEVIATIONS

This Report was prepared with no significant deviation from ASTM Standard Practice E1527-21.

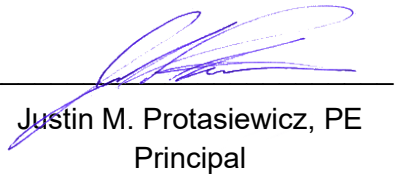
13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

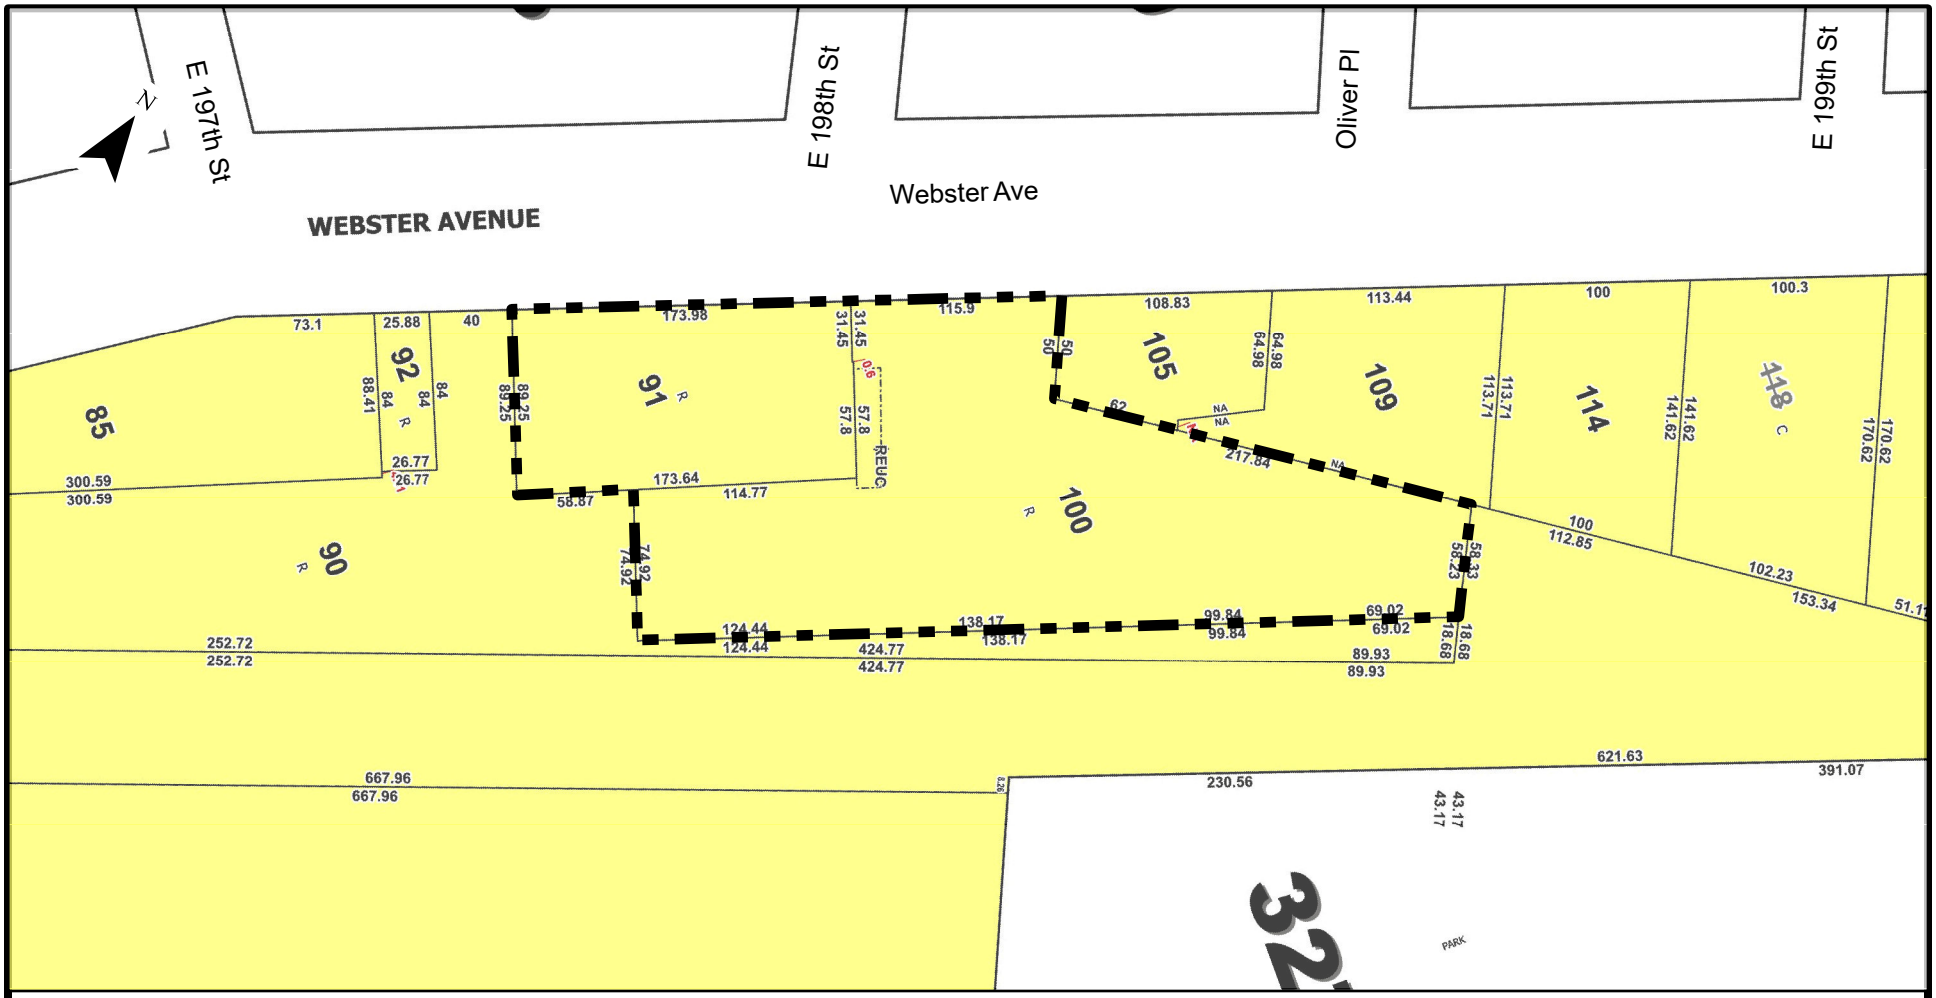
As required in 40 CFR 312.21(d), this section includes statements made by the environmental professional conducting this assessment.



“I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.”

“I declare that I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.”

“I have developed and performed the ‘all appropriate inquiry’ in conformance with the standards, limitations, and practices set forth in 40 CFR Part 312.”



This Report incorporates the consultant's best professional judgment in conductance of this Phase One Environmental Site Assessment.

2740-2768 Webster Avenue

Large Scale Development Opportunity

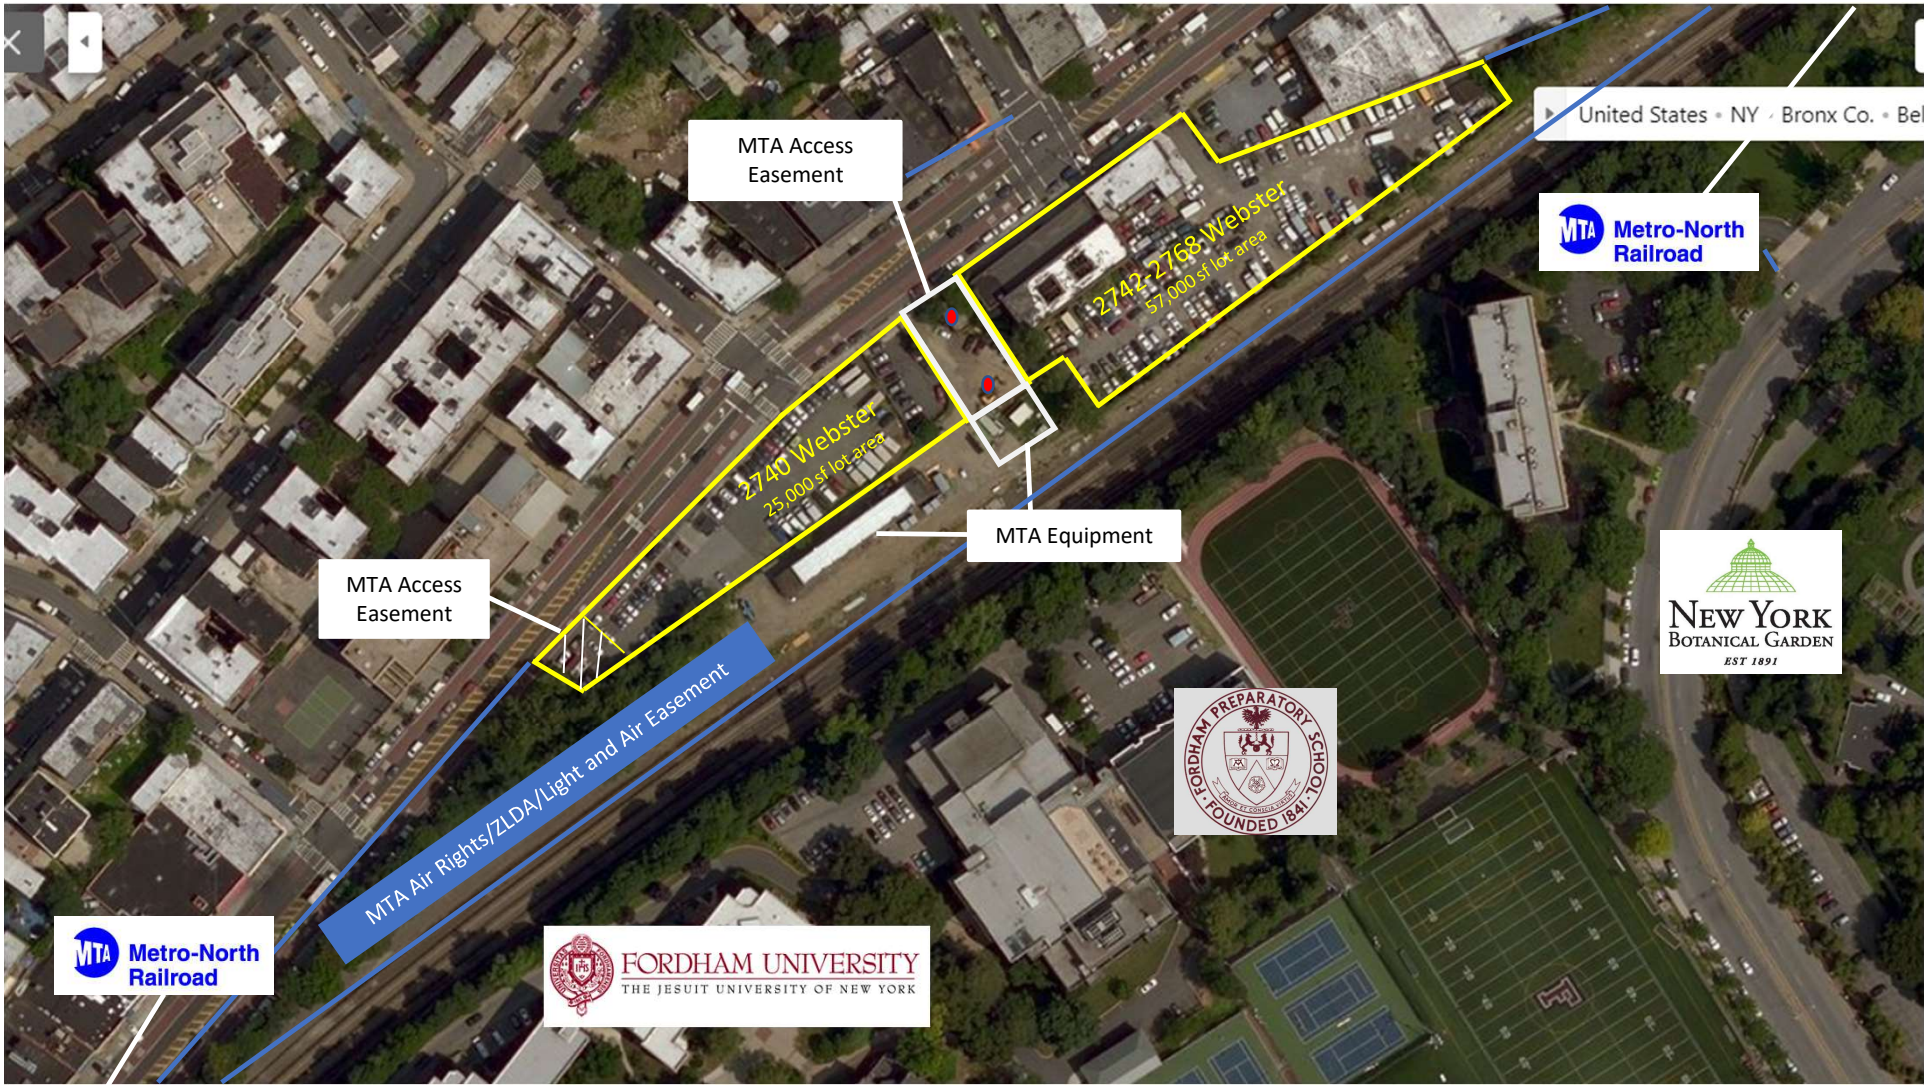
(over 650,000 gross buildable sf)

2740-2768 Webster Avenue

Project and Site Summary

2740-2768 Webster Avenue Key Statistics

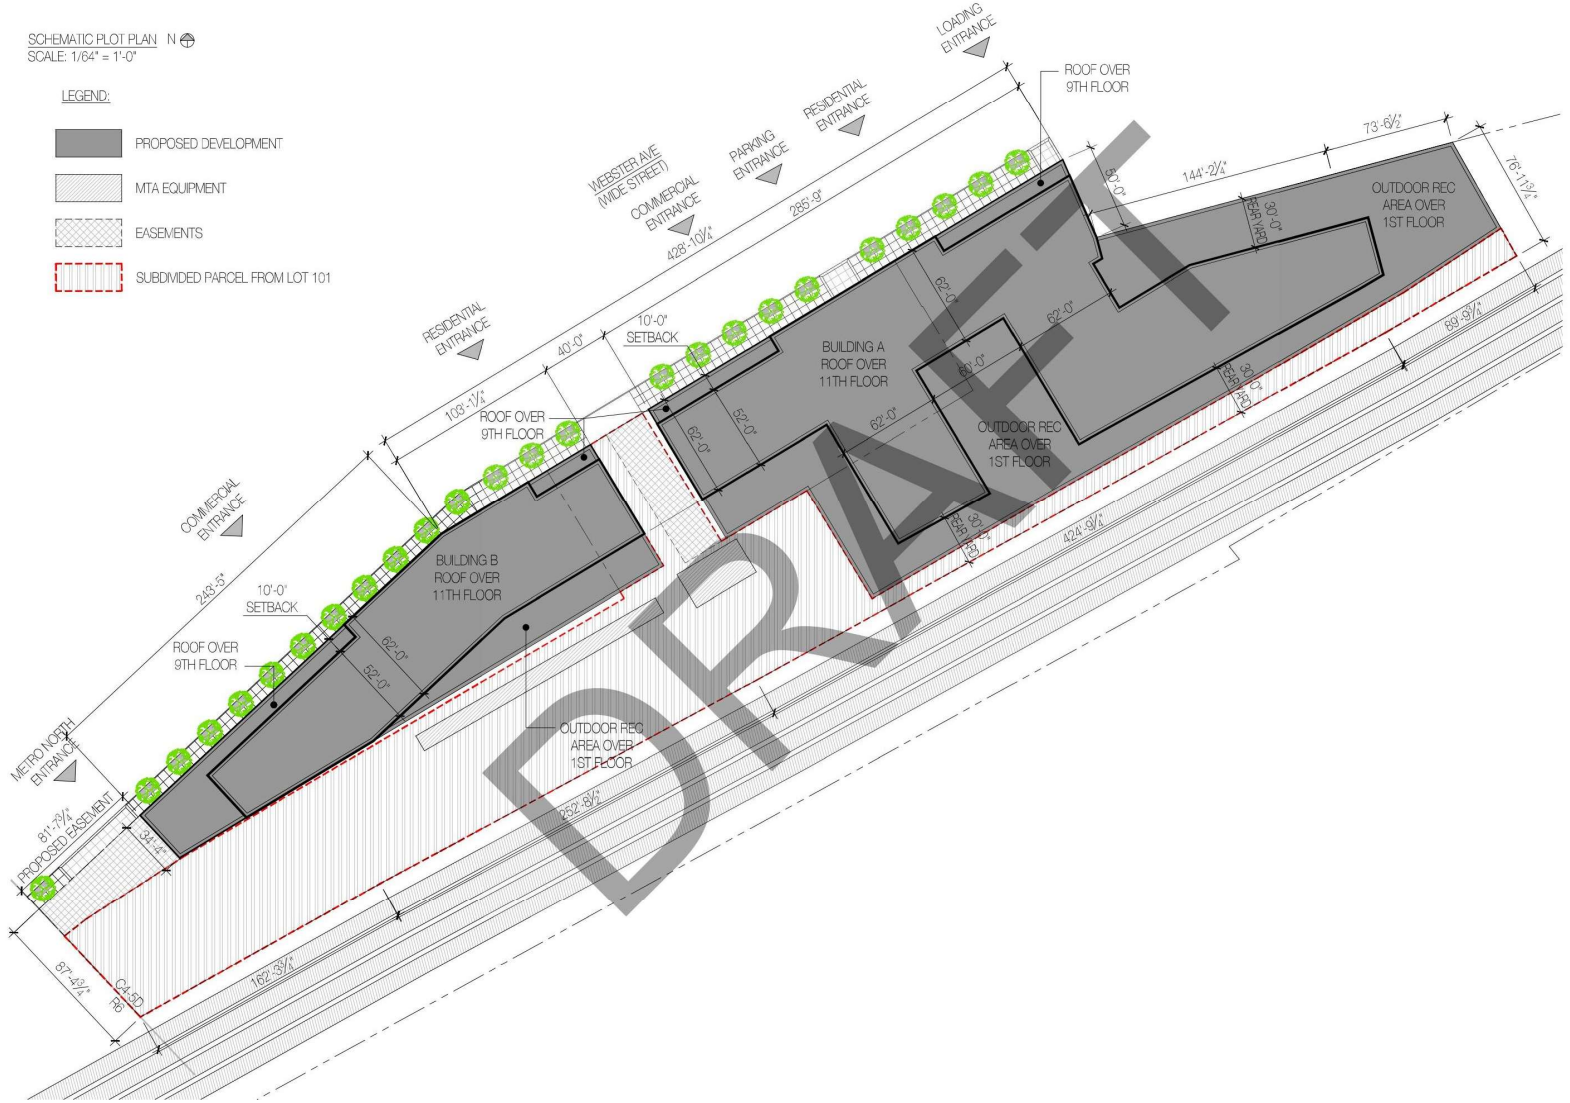
Address	2740 Webster Avenue	2768 Webster Avenue	Air Rights
Block	3273	3273	3273
Lot	85	100 & 101	100 & 101
Lot Area	25,000	57,000	51,978
Zoning	R7D	R7D	R7D
Residential FAR (IH)	5.6	5.6	5.6
Community Facility FAR	4.2	4.2	4.2
Commercial FAR	4.2	4.2	4.2
Gross Buildable SF	**2740 Webster Avenue**	**2768 Webster Avenue ***	**Total ***
Gross Residential SF	187,746	386,185	573,931
Gross Comm/Retail/CF SF	20,742	57,048	77,790
Gross Buildable SF	208,488	443,233	651,721
*FRESH Bonus**			
Gross SF w/ FRESH	**208,488**	**443,233**	**651,721**
Comm/CF (REBNY rentable)*	242,192	529,794	655,208
Parking		28,792	28,792



**The Community Facility REBNY square footage assumes maximizing the massing of each parcel, independent of the other. The "Total "number is the maximum that can be massed overall based on available development rights.*

The Opportunity

2740-2768 Webster Avenue is a rare opportunity to development a large scale, transit orientated, mixed-use development. Highlights include:



- Walking distance to two Metro North stops (Fordham (*busiest reverse commute station in entire USA*) and Botanical Garden)
- Walking distance to the Kingsbridge 4 train subway stop
- Walking distance to Fordham Road retail corridor
- Adjacent to Fordham University and the Botanical Gardens.
- 625 feet of contiguous frontage on Webster Avenue

1. EXECUTIVE SUMMARY

EAI performed a Phase I Environmental Site Assessment Phase I (ESA) ASTM Standard 1527-13 that included on-site observations of the accessible areas of 2768-2776 Webster Avenue (the Subject Site), on January 12, 2020. The Subject Site is located in the Bronx, Bronx County, State of New York.

According to Sanborn Fire Insurance Maps, the Subject Site was originally developed in 1896 (approx.) as a one (1)-story structure. The present building was constructed in 1920. Prior to development of the Subject Site, and according to available historical sources, the subject property was formerly vacant land. Properties in the general vicinity of the Subject Site appear to be commercial buildings, residential apartment buildings, and a railroad to the rear.

The following summarizes the independent conclusions representing EAI's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representative has been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

1.1 FINDINGS/CONCLUSIONS

- The following table provides a general description of the subject property. (See Section 4)

Address:	*2768 Webster Avenue, Bronx, NY 10458*
Nature of Use:	*Commercial*
Description:	*The Subject Site consists of three (3) commercial buildings and a parking lot.*
Assessor's Parcel Number (APN):	*Block 3273, Lot 100 & 101*
Number of Floors:	2
Approx Lot Size:	*115' x 145.67'*
Approx Building Square Footage:	*7,500*
Approx Date of Construction:	*1920*

Historical Review (Section 5.8)

- **The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:**

  1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment was utilized at the Subject Site and may have discharged to the subsurface.**
  2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**

  EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

Operational Activities (Section 6.1)

- No circumstances of environmental concern associated with the operational activities at the Subject Site.

Hazardous Materials/Petroleum Products (Section 6.2)

- EAI observed a leaking grease trap utilized by the restaurant tenant at the rear of 2768 Webster Avenue, resulting in cooking grease spilling onto the floor. This area should be cleared and the grease trap repaired/replaced.
- The Subject Site is not involved in the use of petroleum products. No further action or investigation is recommended regarding current use of hazardous materials or petroleum products at the Subject Site.

Wastes (Section 6.3)

- The Subject Site does not generate, treat, store or dispose of hazardous, medical, or regulated wastes. The non-hazardous solid and liquid wastes generated at the Subject Site appear to be stored and disposed of properly.

Polychlorinated Biphenyls (PCBs) (Section 6.4)

- EAI identified two (2) areas of concern in relation to prior usage of the Subject Site as a signal substation and as an auto service facility. See Section 5.8 (Historical Review).

Asbestos-Containing Materials (ACM) (Section 6.5)

- Through a visual inspection, the accessible areas did not have any visible and/or friable ACM. All pipes are bare.

Storage Tanks Pipelines (Section 6.6)

- EAI conducted an interview with a representative of the NYC Fire Department, who indicated that permit #02236545 is on file for two (2) 275-gallon aboveground heating oil storage tanks, expiring on 07/30/1987 when the building was converted to gas heating. No further action is recommended regarding heating oil storage tanks at the subject property.

Surface Areas (Section 6.7)

- No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Subject Site.

Lead Paint Hazards (Section 6.8)

- Based on our visual inspection of the building's interiors, the painted surfaces are currently in good condition, there are no peeling paint concerns, and no LBP hazard was noted in the areas inspected.

Mold & Mildew (Section 6.9)

- EAI performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Subject Site. EAI observed water covering the floor at 2768 Webster Avenue. This leak should be repaired and the water/debris at the site cleared.

Regulatory Review

- Based on review of the regulatory database report, the Subject Site is not listed.

- 2779 Webster Avenue, .025 NNW of the Subject Site, is listed on the NY LTanks database dated 02/10/2004 due to a tank overfill. This spill listing was closed following proper remediation on 05/03/2005 and is not expected to pose any environmental concern to the Subject Site.
- Based on review of the regulatory database report, none of the listed off-site facilities are anticipated to adversely impact the Subject Site. No further action or investigation is recommended regarding the off-site regulatory review.

Adjoining & Surrounding Properties (Section 7)

- EAI identified no current adjacent or surrounding property uses that are anticipated to have a negative impact on the environmental integrity of the Subject Site. No further action or investigation is recommended regarding the adjacent properties.

1.2 FINDINGS, CONCLUSIONS, & RECOMMENDATIONS

- A ***Recognized Environmental Condition (REC)*** refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property, due to release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment.
  - This assessment **has revealed** evidence of RECs in conjunction with the subject property:
    - **The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:**
      1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**
      2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**
    - **EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.**
- ***Controlled Recognized Environmental Conditions (CRECs)*** are defined by the ASTM Standard Practice E1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g. property use restrictions, AULs, institutional controls, or engineering controls).
  - This assessment has revealed **no** evidence of CRECs in conjunction with the subject property.
- ***Historical Recognized Environmental Conditions (HRECs)*** are defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).
  - This assessment has revealed **no** evidence of HRECs in connection with the subject property.
- ***De Minimis Conditions***: Findings which would otherwise be characterized as Recognized Environmental Conditions, but which generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought

to the attention of appropriate governmental agencies are classified as *de minimis* in accordance with the agreed scope of work. De Minimis Conditions are not considered RECs.

- This assessment **has revealed** evidence of de minimis environmental conditions in connection with the subject property in the form of usual motor oil staining in the parking areas. EAI also observed debris and trash in the rear area and on the roof. These areas should be cleaned and all waste disposed of properly.

2J's Parking Lot was observed to contain assorted junk cars and trucks. Leaking batteries are a potential environmental concern. This area should be thoroughly investigated and cleaned properly.

2. SURVEY APPROACH/PURPOSE

EAI conducted an on-site Environmental Site Assessment of the Subject Site that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives. On-site activities and/or interviews were conducted by Mr. Alexander Friedman, EP.

Areas accessed included all interior and exterior areas, and the Subject Site boundaries.

Visual observation above the dropped ceiling tiles (if any) was not performed as a part of this assessment.

Visual observation of pipe chases and behind walls was not performed as a part of this assessment. No evidence of pipe chases was identified during this assessment.

Weather conditions at the time of the Subject Site assessment were clear.

EAI reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Subject Site which could have an adverse impact on the Subject Site. In an attempt to determine whether historical uses of the Subject Site and surrounding area have had an environmental impact on the Subject Site, EAI interviewed individuals knowledgeable about the Subject Site and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analysis of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report) as they existed in the Subject Site. The further purpose of this Phase I Environmental Site Assessment is to defend the innocent landowner in accordance with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) for commercial real estate and to attempt to assert landowner liability protections under CERCLA. This is accomplished by all appropriate information, which is available for this property and adjoining properties. The assessment was conducted utilizing generally accepted Phase I industry standards using the American Society for Testing and Materials (ASTM) Standard Practice E 1527-13 Scope of Work. The scope of work included an evaluation of:

- The Subject Site history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Subject Site as identified through review of reasonably ascertainable standard historical sources.
- Physical characteristics of the Subject Site as identified through review of reasonably ascertainable topographic, wetlands, flood plain, soils, geology, and groundwater data.
- Current Subject Site conditions (as applicable), including compliance with appropriate regulations as they pertain to the presence or absence of:
  - Facility storage tanks, drums, containers (above or below ground), etc.
  - Transformers and other electrical equipment which utilize fluid which may potentially contain PCBs.
  - The use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, or disposal of hazardous, regulated, or medical wastes.
- A screening approach for the potential existence of:

- Asbestos, including the identification of all suspect materials in accessible areas (interior and exterior). Materials are considered suspect until tested and proven otherwise. Friable materials are those which can be easily crumbled or pulverized by hand pressure.

  This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition/renovation purposes, but is intended to identify the potential for an asbestos hazard in accessible areas. This screening is not intended to be used for demolition, abatement, renovation, or repair work.

  The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication *Managing Asbestos in Place.*

- Mold, including the identification of visible mold growth, conditions conducive for mold growth, and evidence of moisture in accessible areas of the Subject Site. In addition, EAI interviewed Site personnel regarding any known or suspected mold contamination, water intrusion, or mildew like odor problems. Sampling was not performed as part of this assessment. EAI notes that the conclusions made are based solely on observable conditions in readily accessible interior areas of the Subject Site on the assessment date.

- An evaluation of information contained in programs such as the NPL, SEMS, RCRIS, SWL, LUST, RCRA NLR, RCRA TSD, the Registered Underground and Aboveground Storage Tank Database, FINDS, ERNS, State Sites, Spills, NPDES, and other governmental information systems within specific search distances of the Subject Site. This evaluation was performed to identify any sites that would have the potential to impact the environmental integrity of the Subject Site.

  The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search which focuses on both the Subject Site and neighboring sites that may impact the Subject Site. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of the new ASTM Standard E 1527-13, which is recognized by EPA as being consistent with the AAI Rule. The information provided is assumed to be correct and complete.

- Visual observation of the adjacent properties to identify high risk neighbors and the potential for known or suspected contamination to migrate onto the Subject Site.

3. LIMITATIONS & METHODOLOGY

Criteria for the identification of Recognized Environmental Conditions vary substantially across the industry. Some Environmental Professionals identify Recognized Environmental Conditions whenever there is a possibility of impact to a property, while others recognize Recognized Environmental Conditions only when presented with direct evidence that a release has occurred. The ESA Standard defines a REC in terms of the "presence or likely presence" of any hazardous substances or petroleum products **in, on, or at** a property: (1) due to any **release** to the **environment**; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. By this definition, the mere possibility of a release fails to fulfill the definition of a REC. A requirement for the discovery of direct evidence before identification of a REC is equally unsupportable. EAI considers both the known and likely presence and release of hazardous materials in identifying Recognized Environmental Conditions.

The following table presents a summary of the individuals contacted or to whom requests for documentation were made as part of this assessment:

Name	Affiliation	Telephone No.
Fawzy Abdelsack	NYC State Dept of Env Conservation	718-482-4949
Building Information System (BIS)	NYC Dept of Buildings	212-312-8062
Marie Dooley	NYC Dept of Environmental Protection	718-595-6530
Chari Anhouse, Esq.	New York City Department of Health	212-788-5013
Bureau of Fire Prevention	New York City Fire Department	718-999-2442
Katrin Kraft	EDR-Environmental Data Resources	800-352-0050
Katrin Kraft	Sanborn Fire Insurance Maps	800-352-0050
Frank Bagata	Site Representative	845-598-0895

4. SUBJECT SITE LOCATION/DESCRIPTION

The subject property located at 2768 Webster Avenue, Bronx, New York 10458, in Bronx County, is bound by Webster Avenue t and a railroad line at the rear. The subject property location is: Longitude: 73.885293 and Latitude: 40.865735. The subject property: Block 3273 Lot 100 & 101 is improved with three (3) commercial buildings and a parking lot.

According to the New York City Department of Finance Occupancy Code, the subject property is zoned K4 – Store Building.

4.1. SUBJECT SITE DESCRIPTION & GENERAL SITE CONDITIONS

Any evaluations of the physical site and its respective building components are subjective. Although the Subject Site conditions are not directly hinged to the environmental status of the subject property, one is generally a reflection of the other. The actual Subject Site, building, and its components are outlined below.

The Subject Site consists of three (3) commercial buildings and a parking lot.

#2766: Houses a vacant warehouse with construction equipment observed in the rear, as well as excessive debris and trash. These areas should be cleaned and all waste disposed of properly. Previously utilized for liquor warehousing and meat storage. An additional vacant building was observed with no roof, previously utilized for an MTA substation.

#2768: Houses 2J's Parking Lot, which contains assorted junk cars and trucks. Leaking batteries are a potential environmental concern. EAI observed a leaking grease trap in the rear basement area adjoining #2766, with water, cooking grease, and debris covering the floor. This area should be cleaned, the grease trap repaired/replaced, and all waste disposed of properly. This area previously housed an auto repair facility, and EAI observed inactive hydraulic equipment. A NYS Inspection Station sign is visible. Some areas of this former auto repair were inaccessible due to the excessive waste on the floor. See Section 5.8 (Historical Review).

#2770: Houses La Para Tire Shop.

#2774: Houses Kiss Car Service, containing office space heated via thru-wall heating units. The roof houses a cellular service antenna tower servicing the tenant.

#2776: Houses Pont Sabor Restaurant, which utilizes an exhaust hood, oven, fire suppression system, and walk-in refrigerator. The vacant second floor previously housed a bar. The roof presently contains two (2) AC units and two (2) exhaust vents. Excessive water ponding, debris, and trash were visible on the roof. All waste should be disposed of properly.

The Subject Site is serviced by public water and sanitary sewer systems.

4.1.1 Utilities

The Subject Site is serviced with the following utilities:

Water	New York City Department of Environmental Protection (NYCDEP)
Sanitary Sewer	New York City Department of Environmental Protection (NYCDEP)
Storm Sewer	New York City Department of Environmental Protection (NYCDEP)
Electric	Consolidated Edison of New York (Con Ed)
Natural Gas	National Grid

4.2. ENVIRONMENTAL SETTING

4.2.1 Wetlands

Review of the New York State Freshwater Wetlands Map, published by the New York State Department of Environmental Conservation (NYSDEC) and dated February 23, 1987, indicated no wetland areas near the subject property.

A copy of the wetlands map was not available for reproduction.

4.2.2 Floodplain

Review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency (FEMA) and dated February 15, 1991, indicated the following:

- The Subject Site is located in Zone X, areas outside the 500-year flood plan with less than 0.2% annual probability of flooding. Annual Probability of Flooding of less than one percent. A copy of the Floodplain Map is enclosed in Section G-Documents.

4.2.3 Soils/Geology

Interviews with personnel of the United States Department of Agriculture Soil Conservation Service (USDA SCS) indicated that no soil survey has been published for Bronx County, New

York. However, based upon the long-term and intense development in New York, the soil in the vicinity of the Subject Site would likely be characterized as part of the Urban Land Complex:

- The urban land complex indicates that the predominant soil type has been disturbed and covered with an impervious layer consisting of buildings, sidewalks, streets, and other structures. No capability sub-classifications are assigned to urban land. The soil surface texture is variable and depth to bedrock is > 10".

4.2.4 Groundwater Hydrology

Review of the Water Resources Data Report for New York State, published by the USGS, indicated the following:

Shallow groundwater flow is expected to follow the ground level slope of surface elevations towards the nearest open body of water or intermittent stream.

Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

The United States Geological Survey (USGS) monitors water supply and establishes the parameters for safe water flow. The Department of Environmental Protection safeguards these resources by enforcing the legislation created to protect our water supply. Governmental Database Records Review did not reveal any spills that may have compromised ground water.

Any conclusions drawn in this report regarding groundwater and soil are based upon observation and records review and are therefore limited in scope and usefulness.

The water supply at the site was not tested and is not a component of this Phase I assessment.

5. HISTORICAL REVIEW

Review of information available from the New York City Tax Assessment Office indicated that the Subject Site is shown as Block 3273– Lot 100 & 101.

Within the scope of this assessment, EAI has attempted to establish the past uses of the subject property. The range of this study is from present back to 1940 or when property was first used for residential, agricultural, commercial, industrial, or governmental purposes. This is accomplished by use of Sanborn Fire Insurance Maps and through reasonable ascertainable records, interviews with tenants, past owners, neighbors or any other available standard historical sources.

The Subject Site was originally developed in 1896 (approx.) as a one (1)-story structure. The present building was constructed in 1920. Prior to development of the Subject Site, and according to available historical sources, the subject property was vacant land. (See Page 15.)

Based on the City Directories review, the site was commercial from 1940-2017. See Section 5.6. on Page 16 in this report and Section F Sanborn Maps.

5.1. RECORDS REVIEW

There are several state and federal agencies responsible for collecting environmental information, which is available in the form of databases. The database information searched in this site assessment include priority listings of sites with known or suspected contamination, facilities that generate, treat, store, and/or dispose of hazardous waste, solid waste facilities, underground storage tank sites, leaking underground storage tank sites, and spill incident sites. Each database

has a standard search distance from the subject property within which any listing must be addressed.

The standard search distances are set by ASTM Guideline E1527-13 in each database, required to satisfy a diligent attempt at discovering potential environmental concerns. The database information reviewed, along with the associated search distances, is provided in Section D.

The results of the database searches are summarized in the table below:

Database Searched	Search Distance	Sites Identified for Subject Site	Sites Identified for Surrounding Properties	Surrounding Property Potential to Impact the Subject Site
Federal Databases				
NPL	1.0 miles	0	0	N/A
SEMS Facilities	0.5 miles	0	0	N/A
RCRA Generator	0.25 miles	0	5	Not expected to pose an adverse impact
RCRA COR ACT	1.0 miles	0	0	N/A
RCRA TSD	0.5 miles	0	0	N/A
State & Tribal Databases				
State/Tribal SWL	0.5 miles	0	0	N/A
Registered UST & AST	0.25 miles	0	99	Not expected to pose an adverse impact
Leaking Underground Storage Tank	0.5 miles	0	54	Not expected to pose an adverse impact
ERNS	Subject Site only	0	N/A	N/A
Spills	Subject Site only	0	18	Not expected to pose an adverse impact

Additional database searches are provided in the Search Summary Report of the EDR FirstSearch Report.

5.1.1 Superfund Enterprise Management System (SEMS)

Hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the Unites States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The database is a compilation by the United States EPA of sites that the EPA has investigated, or is currently investigating for a release of hazardous substances pursuant to the Superfund Act.

Based on the search of the SEMS Facilities Database, zero (0) sites were identified within a half (1/2) mile radius of the subject property.

5.1.2 RCRA Generator Site

Resource Conservation and Recovery Information System Large and Small Quantity Generators.

Based on this search, five (5) sites were identified within a quarter (1/4) mile radius of the subject property.

None of these database sites appear to pose an adverse environmental impact to the Subject Site.

5.1.3 RCRA COR ACT

Resource Conservation and Recovery Information System Corrective Action Sites. The EPA's database of RCRIS sites with reported corrective action. This information is also reported in the standard RCRIS detailed data.

Based on this search, zero (0) sites were identified within a one (1) mile radius of the subject property.

5.1.4 RCRA TSD

Resource Conservation and Recovery Information System Treatment, Storage, and Disposal Facilities. The EPA's database of RCRIS sites which treat, store, dispose, or incinerate hazardous waste. This information is also reported in the standard RCRIS detailed data.

Based on this search, zero (0) sites were identified within a half (1/2) mile radius of the subject property.

5.1.5 State/Tribal SWL

The Active Solid Waste Landfill Database (SWL) is maintained by state or local agencies of Solid Waste Landfills, Incinerators, and Transfer Stations.

Based on this search, zero (0) sites were identified within a half (1/2) mile radius of the subject property.

5.1.6 Registered Underground & Aboveground Storage Tank Database

The New York State Department of Environmental Conservation (NYSDEC), maintains a list of all registered underground (USTs) and above ground storage tanks (ASTs) within the state. The NYSDEC regulates the storage and handling of petroleum storage facilities. Aboveground and Underground storage tanks storing petroleum can, if not properly installed and maintained, cause serious environmental problems, including contamination of a water supply. In an effort to prevent leaks and spills, the Petroleum Bulk Storage Law (Article 17, Title 10 of the Environmental Conservation Law) requires the DEC to develop and enforce a State Code for the storage and handling of petroleum. The resulting regulations are Parts 612, 613 and 614. Any facility with a stationary tank combined capacity exceeding 1100 gallons must be registered with the New York State Department of Environmental Conservation.

Based on the search of the Registered Underground Storage Tank Database, ninety-nine (99) sites were identified within a quarter (1/4) mile radius of the subject property.

None of these database sites appear to pose an adverse environmental impact to the Subject Site.

5.1.7 Leaking Underground Storage Tank Database

The New York State Department of Environmental Conservation (NYSDEC) maintains a list of facilities that are known to have had leaking underground storage tanks (LUSTs) within the state.

Based on the search of the Leaking Underground Storage Tank Database, fifty-four (54) sites were identified within a half (1/2) mile radius of the subject property.

Based on the current regulatory oversight/status "Closed", the relative distance and/or the inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

5.1.8 ERNS Database

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported releases of oil and hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the United States Coast Guard, the National Response Center, and the Department of Transportation.

Based on the search of the ERNS Database, the Subject Site is not listed.

5.1.9 Spills – 1990

The New York State Department of Environmental Conservation's database of emergency response actions and spill releases maintained by the Division of Spills Management.

Based on the search of the Spills Database, eighteen (18) sites were identified within a half (1/2) mile radius of the subject property.

Based on the current regulatory oversight/status, the relative distance and/or the inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

5.1.10 Federal & State Priorities Database

The National Priorities List (NPL) is the EPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial action under the Superfund Program. In order for a site to be included on the NPL List, it must either meet or surpass a predetermined hazard ranking system score, be chosen as a state's top priority site, or meet all of the three (3) following criteria:

1. The United States Department of Health and Human Services issues a health advisory recommending that people be removed from the site to avoid exposure.
2. The EPA determines that the site represents a significant threat.
3. The EPA determines that remedial action is more cost-effective than removal action.

Based on the search of the NPL database, zero (0) sites were identified within a one (1) mile radius of the subject property.

5.2. INTERVIEWS

Interview with Owner
An interview with the property owner was not conducted as part of this Phase I Site Assessment.

Interview with Site Manager
An interview with the site manager was not conducted as part of this Phase I Site Assessment.

Interviews with Occupants
During the course of the site inspection, several occupant interviews were conducted. None of the interviewees provided EAI with any indications of existing or potential RECs at the subject property.

Interviews with Others
An interview was conducted with Frank Bagata, site representative, who indicated no knowledge of any recognized environmental conditions or liens existing at the subject property or adjacent properties. (See user questionnaire in Documents Section G)

Title Records
EAI requested title records from the User; however, title records were not provided to EAI for review. A title report was not included in the scope of work for this assessment.

Environmental Liens or Activity and Use Limitation
EAI requested information from the User regarding knowledge of environmental liens, activity, and use limitations for the property. The site contact was not aware of any environmental liens associated with the property. In addition, the site contact had no knowledge of any use or activity limitations.

Specialized Knowledge
EAI inquired with the site contact regarding any specialized knowledge of environmental conditions associated with the property. No special conditions were reported.

Commonly Known or Reasonably Ascertainable Information
EAI inquired with the user regarding any specialized knowledge of environmental conditions associated with the property. EAI inquired with the site contact regarding any specialized knowledge of environmental conditions associated with the property. No conditions were reported.

Valuation Reduction for Environmental Issues
EAI inquired with the site contact regarding any knowledge of reductions in property value due to environmental issues. The site contact was not aware of any valuation reductions associated with the property.

Owner, Property Manager and Occupant Information
According to a review of records, the property owner was identified as Bandry LLC. The property is currently occupied by three (3) commercial buildings and a parking lot.

Reason for Performing Phase I ESA
The purpose of this Phase I Environmental Site Assessment (ESA) was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-13) in connection with the property. This ESA was also performed to permit the User to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs"*). ASTM Standard E-1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C §9601 (35) (B).

EAI understands that the findings of this study will be used by Clinton Olsen to evaluate a pending financial transaction in connection with the property.

Other
According to the user, the purpose of this assessment is to qualify for an LLP to CERCLA liability. In addition to satisfying one of the requirements to qualify for an LLP to CERCLA liability, another reason for performing a *Phase I Environmental Site Assessment* includes the need to understand potential environmental conditions that could materially impact the operation of the business associated with the parcel of commercial real estate.

5.3. LOCAL GOVERNMENT AGENCY RECORD REVIEW

EAI reviewed file information for the Subject Site. This review indicated that the present building was constructed in 1920 (approx.). General building permits for the Subject Site were

on file, but did not reveal any information or condition that could impact the environmental integrity of the Subject Site. No environmentally significant information was identified.

A **F.O.I.L.** request was submitted to the New York City Department of Health, the New York City Department of Environmental Protection, New York City Department of Buildings, the New York City Fire Department, and the New York State Department of Environmental Conservation regarding any violations, etc. at the Subject Site and surrounding areas. To date, we have not received a response. Upon receipt, any relevant information will be forwarded. (See Section G – Documents)

According to the Department of Buildings "Property Profile Overview" dated January 25, 2021, there are a total of zero (0) DOB violations and ten (10) ECB violations "open" at this time. (See Documents-Section G). Through EDR's data search, Sanborn Maps, and interviews, no significant regulatory files or records associated with the property or adjacent properties were found that would warrant additional investigation, and based on the quality of information obtained from those sources, no additional agency file review is warranted.

5.4. TOPOGRAPHIC MAPS

EAI reviewed a historical USGS *Central Park, NY 7.5* Minute Series topographic map of the Subject area provided by EDR dated 2013. The topographic map does not identify individual buildings or development on the Subject due to the concentration of structures in the highly urbanized Brooklyn area, but rather shows the area to be shaded denoting urbanized land use, and identifies only landmarks as distinct structures. Nevertheless, the topographic map does not identify any industrial complexes, landfills, or wetlands on or adjacent to the Subject Site. A copy of the topographic map is enclosed. Target Property Topography: General Topographic Gradient is General ESE and the Target Property Elevation is 58 ft above sea level.

5.5. HISTORICAL MAPS

EAI reviewed available Sanborn Maps as provided by EDR/First Search. Historical maps are detailed scale drawings that show the location and use of buildings and structures that occupied a given area. EAI's map search revealed the following:

YEAR	SUBJECT PROPERTY	SURROUNDING PROPERTY
1896	*VACANT, 1-STORY STRUCTURE, RAILROAD TRACKS*	*LUMBER MATERIALS*
1900	*SEWER PIPE YARD, FREIGHT, RAILROAD TRACKS*	*NY CENTRAL & HUDSON RIVER RAILROAD, 2-STORY STRUCTURES, BUILDING MATERIALS*
1914	*FREIGHT SHED, RAILROAD TRACKS*	*VACANT, HOTEL, STORES, RAILROAD, DWELLINGS*
1945	*FREIGHT SHED, RAILROAD TRACKS, ENGINE ROOM*	*HOTEL, STORES, RAILROAD, ICE PLANT, GARAGE, APARTMENTS*
1950	*FREIGHT SHED, RAILROAD TRACKS, VACANT*	*HOTEL, STORES, DWELLINGS, RAILROAD, GARAGE & REPAIR, WOODWORKING*
1977	*VACANT, RAILROAD, SHED*	*PARKING, CABINET CO., BOWLING, RAILROAD, STORES, DWELLINGS*
1978	*SIGNAL STATION, COLD STORAGE, SUBSTATION – NYCRR, 2ND FLOOR CLUB*	*PARKING, CABINET CO., BOWLING, RAILROAD, STORES, DWELLINGS*
1979-1993	*VACANT, SHED, RAILROAD TRACKS*	*PARKING, METAL PRODUCTS, BOWLING, RAILROAD, STORES & DWELLINGS*
1995-1996	*VACANT, SHED, RAILROAD*	*PARKING, WAREHOUSE, COMMERCIAL, AUTO*

	TRACKS	*REPAIR, STORES, DWELLINGS, RAILROAD*
1998-2007	*COMMERCIAL, RAILROAD, SIGNAL STATION, SUB STATION, COLD STORAGE*	*PARKING, WAREHOUSE, COMMERCIAL, AUTO REPAIR, STORES, DWELLINGS, RAILROAD*

The review of the historical data available for the Subject Site and surrounding area identified the subject property as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface. EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

Copies of the above-referenced historical maps are appended (Section F).

5.6. CITY DIRECTORY

City Directories have been produced for most urban and some rural areas since the late 1800s. The directories are generally not comprehensive and may contain gaps in time periods.

EAI reviewed Historical City Directories obtained from EDR on January 20, 2021 for past names and businesses that were listed for the subject property and adjoining properties. This review revealed the following listings associated with the subject property:

- **Prior to 1940** – City Directories were not available.
- **1940-2017 -** The current property address is listed as numerous commercial tenants. Garcia Body & Fender Shop. is listed as a tenant from 2005-2009, and Latin American Auto Repair is listed as a tenant from 1993-1999.

The adjacent properties listed have been utilized as commercial units from 1927-2017. No environmentally significant listings were identified for adjacent properties.

The review of the historical data available for the Subject Site and surrounding area indicates the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris. EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

Copies of reviewed City Directories are included in Section F.

5.7. DATA GAPS

No significant data gaps were encountered during completion of this assessment. Data gaps occur when, despite good faith efforts, the consultant is unable to identify information required to satisfy objectives of the assessment. Data gaps may result from incompleteness in any of the activities required by the ESA Standard, or by limiting conditions encountered during completion of the work. The ESA Standard requires that data gaps be identified in the report when they significantly impact the ability of the consultant to identify Recognized Environmental

Conditions at the property. Limiting conditions identified in this report are not considered to significantly impact our ability to satisfy the objectives of this assessment.

DATA FAILURE

No Data Failure was encountered during the completion of this assessment. The earliest research date was 1940 or earlier and the property was undeveloped at that time. Research intervals of more than five years were encountered during our review of historical sources, however, activities at the property were found to be consistent at the beginning and end of these extended research intervals. In accordance with ASTM criteria, such intervals do not constitute data failure. The following data gaps occurred in connection with this report:

Data Gap	Explanation	Significance of Gap
Site History	Site history not conducted in 5-year intervals	Low: Not likely to alter Report's conclusions due to EAI's search of standard historical sources of information such as historic topographic maps, city directory abstracts, Sanborn Fire Insurance Maps, and interviews with knowledgeable individuals who were familiar with the property.
Former Owner or Operator Interview	Unable to interview former site owner or operator due to inability to locate	Low: Not likely to alter Report's conclusions.
Governmental Records	FOILs not returned (COVID-19 Delays)	EAI is anticipating that the circumstance surrounding the COVID-19 virus will impact the response time of our requests to local and state agencies. In addition, we are unable to provide an accurate time frame as to when files will be made available for review. We have been informed by many of our sources on the local, state, and federal level that they are currently transitioning to remote work, and therefore, their ability to access and distribute electronic and physical archived/warehoused records and conduct onsite inspections has been limited. Under the ASTM definition of data gaps and limiting conditions, some pertinent information may not be reasonably ascertainable at this time. As information from our inquiries is made available, EAI will forward any relevant information in the form of an addendum.

5.8. HISTORICAL SUMMARY

Based upon interviews and a review of local agency records, zoning records, and historical maps, the Subject Site was originally developed in 1896 with a one (1)-story structure; the present buildings were constructed in 1920. Based on the City Directories review, the site was commercial from 1940-2017. NYC DOB Certificates of Occupancy indicate the buildings were used as offices, stores, laboratory/manufacturing establishment, and a political club in 1968, 1972, and 1973, as an auto repair facility from 1973-2016, and as offices, a restaurant, and social club from 1994-2016.

The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:

1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**

2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**

EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

6. SUBJECT SITE RECONNAISANCE

6.1. OPERATIONAL ACTIVITES/NOTEWORTHY TENANTS

The Subject Site consists of three (3) commercial buildings and a parking lot.

No environmentally significant operations are conducted at the Subject Site.

6.2. HAZARDOUS MATERIALS/PETROLEUM PRODUCTS STORAGE AND HANDLING

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. No hazardous materials/petroleum was identified.

The Subject Site is involved in the use of hazardous materials in the form of routine janitorial and maintenance supplies. The materials observed do not appear to pose a hazard to the site, provided they continue to be used as designed, are properly handled, and all regulations regarding their use are followed.

No evidence of spills or staining was observed in the Subject Site. In addition, the floors appeared intact and no cracks were observed.

6.3. WASTE GENERATION, TREATMENT, STORAGE, AND DISPOSAL

Visual observation for the generation, treatment, storage and disposal of wastes was performed. The Subject Site is not involved in the generation, treatment, storage, or disposal of hazardous, medical, or regulated wastes as defined in the Code of Federal Regulations, Title 40 (Protection of Environment); Part 270 (EPA Administered Permit Programs: The Hazardous Waste Permit Program); Subpart A (General Information); Section .2 (Definitions) of hazardous waste as defined in the Code of Federal Regulations Title 40 (Protection of Environment); Part 261 (Identification and listing of Hazardous Waste); Subpart A (General); Section .3 (Definition and Hazardous Waste), thereby, subjecting the property to the requirements of the Code of Federal Regulations, title 40 (Protection of Environment); Part 265 (Interim Status Standards of Owners and Operators of Hazardous Waste Treatment, Storage and Disposal Facilities).

No excessive odors or overflowing/excessive ground trash and no hazardous, regulated, or medical wastes were noted in the vicinity of the disposals.

EAI observed a leaking grease trap utilized by the restaurant tenant at the rear of 2768 Webster Avenue, resulting in cooking grease spilling onto the floor. This area should be cleared and the grease trap repaired/replaced.

6.4. POLYCHLORINATED BIPHENYLS

No equipment with the potential to contain dielectric or hydraulic fluid was identified. A common source for polychlorinated biphenyls (PCBs) is in the cooling fluids of electrical transformers, capacitors and hydraulic equipment. PCB content is regulated under the US EPA regulation 40 CFR, Part 761 with provisions for varying degrees of toxicity.

The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:

1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**
2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**

EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

6.5. ASBESTOS CONTAINING MATERIALS

According to the Environmental Protection Agency and included in the publication #EPA560/5-85-024 "Guidance for Controlling Asbestos Containing Materials (ACM) in Buildings" asbestos containing materials are found in three forms: (1) Sprayed or toweled on ceilings and walls and structural steel; (2) in insulation around hot and cold piping, ducts, boilers, and tanks; and (3) in a non-friable state in products such as ceilings and floor tiles, wallboards and outside materials such as shingles and roofing materials. In general, ACM in the first two categories is of greatest concern, especially if it is friable, causing the materials to release fibers into the air.

Since the subject buildings were built prior to 1979, there exists the possibility that the original construction materials used may contain asbestos. If any demolition or remodeling activities are to occur in the buildings, a detailed asbestos survey should be conducted to determine if any of the materials contain asbestos. If any of the materials do contain asbestos, they should be removed and disposed of in accordance with all applicable Federal, State, and Local Regulations prior to any demolition or remodeling activities.

Ceiling, floor tiles, and roof shingles that may contain asbestos are not required to be removed due to their non-friable state.

Piping above dropped ceilings, which may contain ACM are enclosed in their present state and pose no health hazard.

Suspect ACM in the form of roofing materials, vinyl flooring, wallboard, and sprayed-on textured ceiling material were not sampled as part of the assessment. These materials are in good condition and should be sampled prior to repair, renovation, or demolition activities.

Through a visual inspection, the accessible areas did not have any visible and/or friable ACM. All pipes are bare.

6.6. FACILITY STORAGE TANKS AND PIPELINES (ABOVE OR BELOW GROUND)

No aboveground storage tanks (ASTs) were observed at the Subject Site.

EAI conducted an interview with a representative of the NYC Fire Department, who indicated that permit #02236545 is on file for two (2) 275-gallon aboveground heating oil storage tanks, expiring on 07/30/1987 when the building was converted to gas heating. No further action is recommended regarding heating oil storage tanks at the subject property.

Based on the review of the state list of registered USTs, no USTs are registered for the Subject Site.

6.7. SURFACE AREAS

Observations during EAI's assessment identified that the Subject Site lands are graded to provide slope and swale to direct storm water away from the on-site buildings. The land surface of the Subject Site is relatively flat, with no significant changes in elevation.

Visual observation of the Subject Site did not identify any evidence of distressed vegetation, staining, or surface migration or petroleum releases or hazardous materials onto or off the Subject Site.

Visual observations did not identify any evidence of on-site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Subject Site.

Visual observations did not identify any surface water features including lagoons, ponds, or other bodies of water at the Subject Site.

The storm water generated at the subject site is guided through a system of drains, grates, gutters and drainage pipes leading to the storm drainage system. The storm water systems are not electrical. These systems do not currently pose an environmental hazard to the subject property.

6.7.1 Vapor Encroachment Condition

A Tier I Vapor Encroachment Assessment was performed on the subject property in accordance with ASTM E 2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions,* December 2015. A Tier I Vapor Encroachment Assessment determines whether there actually is or is a potential for volatile vapors to encroach upon the subject property, producing a vapor encroachment condition. A vapor encroachment condition is the presence or likely presence of vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject property.

The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:

1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**
2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor**

was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.

EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.

6.8. LEAD PAINT HAZARDS

To protect families from exposure to lead from paint, dust, and soil, Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as Title X. Section 1018 of this law directed HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Based on our visual inspection of the building's interiors, the painted surfaces are currently in good condition, there are no peeling paint concerns, and no LBP hazard was noted in the areas inspected.

6.8.1 LEAD IN DRINKING WATER

According to the 2015 Annual Water Quality Report, a public water system operated by the New York City Department of Environmental Protection (NYCDEP) serves the subject property vicinity. Shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of New York are surface water from a network of 19 reservoirs and three controlled lakes in a nearly 2,000 square mile watershed that extends 125 miles north and west of New York City. Sources include the Catskill/Delaware supply located in Delaware, Greene, Schoharie, Sullivan and Ulster counties, the Croton supply which is composed of 12 reservoir basins in Putnam, Westchester and Dutchess counties, and a groundwater supply in southeastern Queens. According to the City of New York and the 2015 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.9. MOLD & MILDEW

EAI performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Subject Site. EAI observed water covering the floor area at 2776 Webster Avenue. This leak should be repaired and the area cleaned.

6.10. RADON HAZARDS

Radon is a colorless, odorless gas produced by the radioactive decay of certain elements. The most common sources of radon are igneous and metamorphic rocks containing uranium (such as pitchblende), granite, shale, or phosphate, as well as soils or sediments derived from these parent materials. Radon may also be found in soils contaminated with certain industrial wastes (such as uranium or phosphate mine tailings) or in earth-derived building products, which include industrial wastes that contain phosphate slag. In areas where the potential for radon accumulation is high, special ventilation systems may offset potential health hazards.

A radon test was not conducted on the subject property. Review of the EPA Map of Radon Zones places the subject property in Zone 3, where average predicted radon levels is less than 2.0 pCi/L. The USEPA recommended action level is 4.0 pCi/L. Based on low predicted radon level, adverse environmental impacts related to radon gas mitigation at the subject property are not anticipated.

7. ADJOINING PROPERTIES & SURROUNDING PROPERTIES

A walk-through and a visual reconnaissance of the surrounding area were made for potential environmental concerns or problems. Properties in the general vicinity of the Subject Site appear to be commercial buildings, storefronts, apartment buildings, and railroad tracks to the rear.

Based on observations and available regulatory information, the adjacent property uses are not anticipated to adversely impact the environmental integrity of the Subject Site.

8. FINDINGS, CONCLUSIONS, & RECOMMENDATIONS

- A ***Recognized Environmental Condition (REC)*** refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property, due to release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment.
  - This assessment has revealed **no** evidence of RECs in conjunction with the subject property.
    - **The review of the historical data available for the Subject Site and surrounding area identified two (2) areas of environmental concern associated with the subject property:**
      1. **The subject property is identified as a substation on the 1978, 1998, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 Sanborn maps. Prior usage as a substation poses the material risk that PCB-containing equipment were utilized at the Subject Site and may have discharged to the subsurface.**
      2. **According to EAI's review of the city directories available for the subject property, the subject building housed an auto repair facility during 1993-2009. EAI inspected the former auto repair area and observed inactive hydraulic equipment; however, the floor was mostly obstructed with water, cooking grease (leaking from a grease trap utilized by a restaurant tenant of the Subject Site), and debris.**
    - **EAI recommends performing a Phase II subsurface investigation at the Subject Site, including soil and groundwater sampling, to determine whether any hazardous substances such as VOCs (Volatile Organic Compounds), PCBs, and/or petroleum have impacted the subsurface of the Subject Site.**
- ***Controlled Recognized Environmental Conditions (CRECs)*** are defined by the ASTM Standard Practice E1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g. property use restrictions, AULs, institutional controls, or engineering controls).
  - This assessment has revealed **no** evidence of CRECs in conjunction with the subject property.
- ***Historical Recognized Environmental Conditions (HRECs)*** are defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).
  - This assessment has revealed **no** evidence of HRECs in connection with the subject property.

- ***De Minimis Conditions***: Findings which would otherwise be characterized as Recognized Environmental Conditions, but which generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies are classified as *de minimis* in accordance with the agreed scope of work. De Minimis Conditions are not considered RECs.
    - This assessment **has revealed** evidence of de minimis environmental conditions in connection with the subject property in the form of usual motor oil staining in the parking areas. EAI also observed debris and trash in the rear area and on the roof. These areas should be cleaned and all waste disposed of properly.

2J's Parking Lot was observed to contain assorted junk cars and trucks. Leaking batteries are a potential environmental concern. This area should be thoroughly investigated and cleaned properly.

9. CERTIFICATION

EAI, Inc personnel have been retained to perform this assessment to achieve compliance with the AAI protocol pursuant to 40 CFR Part 312, FR, November 1, 2005, *Standards and Practices for All Appropriate Inquiries.*

The assessment was performed at the Client's request using the methods and procedures consistent with good commercial and customary practice designed to conform to acceptable industry standards and the Guidelines E1527-13, as established by the American Society for Testing and Materials (ASTM).

This report is exclusively for the use and benefit of the Client identified on the first page of this report. The purpose for which the report shall be used shall be limited to the use as stated in the contract between the client and EAI.

This report is not for the use or benefit of, nor may it be relied upon by any other person or entity for any purpose without the advance written consent of EAI. In expressing the opinions stated in this report, EAI has exercised the degree or skill and care ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts or circumstances. Documentation and data provided by the Client, designated representatives of the Client or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, have been used and referenced with the understanding that EAI assumes no responsibility or liability for their accuracy.

The independent conclusions represent our professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client or their representative has been assumed to be correct and complete. The conclusions presented are based on the data provided, observations, and conditions that existed on the date of the on-site visit.

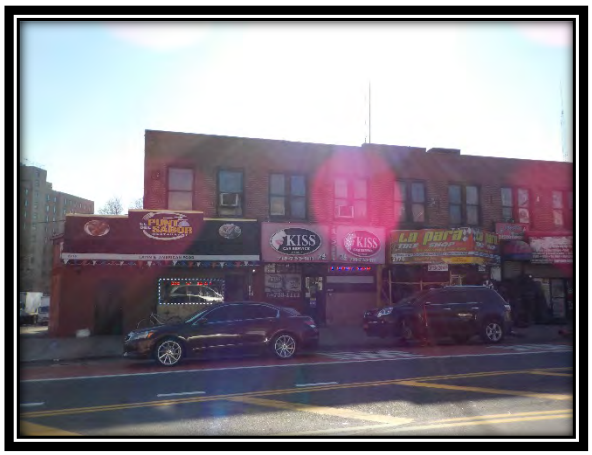
9.1. SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40CFR 312; and

I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

_____

Alexander Friedman, EP



10. DISCLAIMER

This report contains information obtained from a variety of public and other sources. No warranty expressed or implied, is made whatsoever in connection with this report. Environmental Affiliates Inc. specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular use or purpose. All risk is assumed by the user. In no event shall EAI be liable to anyone, whether arising out of errors or omissions, negligence, accident or any other cause, for any loss or damage, including, without limitation, special incidental, consequential, or exemplary damages.

spill is all cleaned up. Sangesland faxed a memo to Dean Realty requesting the following: 1) Documents from tank repair company showing what work was done. 2) Documents from Petro shwoing that they came back and saw the repair and they now deliver again. 3) Photo of the basement floor near the tank showing a clean floor. 4) Letter from Dean Realty saying the the spill was cleaned and requesting that the spill case be closed out. 5/3/2005 *** one year later*** no paperwork has been submitted. Dormant cases closed."
Remarks: "Driver was filling the tank. He did not hear the vent alarm and overfilled the tank. Spill occurred in the basement of the business which has a cement floor. Spill is contained and will be cleaned up tomorrow morning by PETRO. "

AGENCY FILE SEARCH

Database Descriptions

NPL: NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

NPL Delisted: Delisted NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Delisted NPL - National Priority List Deletions

CERCLIS: SEMS SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL. SEMS - Superfund Enterprise Management System

NFRAP: SEMS-ARCHIVE SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site. SEMS-ARCHIVE - Superfund Enterprise Management System Archive

RCRA COR ACT: CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

RCRA TSD: RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

RCRA GEN: RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-VSQG - RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators).

Federal IC / EC: US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROLS - Institutional Controls Sites List.

Database Descriptions

ERNS: ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

State/Tribal CERCLIS: SHWS Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites SHWS - Inactive Hazardous Waste Disposal Sites in New York State

State/Tribal SWL: SWF/LF Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF - Facility Register

State/Tribal LTANKS: INDIAN LUST R9 INDIAN LUST R8 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R7 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R5 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R6 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R4 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R10 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R1 - Leaking Underground Storage Tanks on Indian Land. LUSTs on Indian land in Florida, Mississippi and North Carolina. INDIAN LUST R1 - Leaking Underground Storage Tanks on Indian Land LTANKS - Spills Information Database. HIST LTANKS - Listing of Leaking Storage Tanks.

State/Tribal Tanks: UST Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons. UST - Petroleum Bulk Storage (PBS) Database CBS UST - Chemical Bulk Storage Database. MOSF UST - Major Oil Storage Facilities Database. CBS - Chemical Bulk Storage Site Listing. MOSF - Major Oil Storage Facility Site Listing. AST - Petroleum Bulk Storage. CBS AST - Chemical Bulk Storage Database. MOSF AST - Major Oil Storage Facilities Database. INDIAN UST R9 - Underground Storage Tanks on Indian Land. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R1 - Underground Storage Tanks on Indian Land. INDIAN UST R5 - Underground Storage Tanks on Indian Land. INDIAN UST R6 - Underground Storage Tanks on Indian Land. INDIAN UST R4 - Underground Storage Tanks on Indian Land. INDIAN UST R10 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land. TANKS - Storage Tank Faciliy Listing. TANKS NASSAU - Registered Tank Database in Nassau County.

State/Tribal IC / EC: RES DECL ENV RES DECL - Environmental Restrictive Declarations. A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps. ENV RES DECL - Restrictive Declarations Listing ENG CONTROLS - Registry of Engineering Controls. INST CONTROL - Registry of Institutional Controls.

State/Tribal VCP: VCP NYC VCP - Voluntary Cleanup Agreements. New York City voluntary cleanup program sites. VCP - Voluntary Cleanup Program Listing NYC

ST/Tribal Brownfields: BROWNFIELDS A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant. BROWNFIELDS - Brownfields Site List ERP - Environmental Restoration Program Listing.

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

Database Descriptions

Other Haz Sites: US CDL A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. US CDL - Clandestine Drug Labs PFAS - PFAS Contamination Site Location Listing.

Other Tanks: TANKS SUFFOLK This county is not included in the state?s database. These are facilities that have no tank information in the storage tank database. TANKS SUFFOLK - Storage Tank Database CORTLAND CO. UST - Cortland County Storage Tank Listing. WESTCHESTER CO. UST - Listing of Storage Tanks. NASSAU CO. UST - Registered Tank Database. ROCKLAND CO. UST - Petroleum Bulk Storage Database. SUFFOLK CO. UST - Storage Tank Database. NCFM UST - Storage Tank Database. HIST UST - Historical Petroleum Bulk Storage Database. CORTLAND CO. AST - Cortland County Storage Tank Listing. WESTCHESTER CO. AST - Listing of Storage Tanks. NASSAU CO. AST - Registered Tank Database. ROCKLAND CO. AST - Petroleum Bulk Storage Database. SUFFOLK CO. AST - Storage Tank Database. NCFM AST - Storage Tank Database. HIST AST - Historical Petroleum Bulk Storage Database.

Spills: HMIRS Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT. HMIRS - Hazardous Materials Information Reporting System SPILLS - Spills Information Database. HIST SPILLS - SPILLS Database. SPILLS 90 - SPILLS90 data from FirstSearch. SPILLS 80 - SPILLS80 data from FirstSearch.

Other: RCRA NonGen / NLR RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. RCRA NonGen / NLR - RCRA - Non Generators / No Longer Regulated FEDLAND - Federal and Indian Lands. TSCA - Toxic Substances Control Act. TRIS - Toxic Chemical Release Inventory System. SSTS - Section 7 Tracking Systems. RAATS - RCRA Administrative Action Tracking System. PRP - Potentially Responsible Parties. PADS - PCB Activity Database System. ICIS - Integrated Compliance Information System. FTTS - FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act). FTTS INSP - FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act). MLTS - Material Licensing Tracking System. RADINFO - Radiation Information Database. BRS - Biennial Reporting System. INDIAN RESERV - Indian Reservations. US AIRS (AFS) - Aerometric Information Retrieval System Facility Subsystem (AFS). US AIRS MINOR - Air Facility System Data. FINDS - Facility Index System/Facility Registry System. DRYCLEANERS - Registered Drycleaners. HSWDS - Hazardous Substance Waste Disposal Site Inventory. NY MANIFEST - Facility and Manifest Data. SPDES - State Pollutant Discharge Elimination System. COOLING TOWERS - Registered Cooling Towers. PCS ENF - Enforcement data. PCS - Permit Compliance System. PCS INACTIVE - Listing of Inactive PCS Permits. MINES MRDS - Mineral Resources Data System.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Environmental Affiliates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

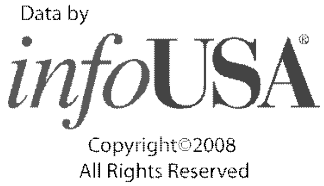
EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.



Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1927 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Description:

A FOIL request is a request for any "record" under NY's Freedom of Information Law (Article 6 of the Public Officers Law). Section 86 defines a "record" as: "any information kept, held, filed, produced or reproduced by, with or for an agency or the state legislature, in any physical form whatsoever including, but not limited to, reports, statements, examinations, memoranda, opinions, folders, files, books, manuals, pamphlets, forms, papers, designs, drawings, maps, photos, letters, microfilms, computer tapes or discs, rules, regulations or codes. NYSDEC maintains records in a variety of forms, or media, such as in hard copy (on paper), as recordings, as photographs, in electronic form, etc.

Contact E-Mail:

foils@enafco.com

Type of Record(s) Requested:*

Other

Description of Record(s) Requested:*

2768-2776 Webster Ave, Bronx, NY 10458
Block 3273 Lot 100 & 101
Please provide documentation concerning above ground/underground heating oil storage tanks (ASTs/USTs) spills, leaks and site remediation at the property listed above.

NYSDEC Office processing the Request:*

- Central Office (Albany) Covers the entire state
- Region 1 (Long Island) Covers the counties of Nassau and Suffolk
- ● Region 2 (New York City) Covers the counties of Brooklyn Bronx Manhattan Queens and Staten Island
- Region 3 (Lower Hudson Valley) Covers the counties of Dutchess Orange Putnam Rockland Sullivan Ulster and Westchester
- Region 4 (Capital Region Northern Catskills) Covers the counties of Albany Columbia Delaware Greene

Powered by GovQA

Montgomery Otsego Rensselaer Schenectady and Schoharie

Region 5 (Eastern Adirondacks Lake Champlain) Covers the counties of Clinton Essex Franklin Fulton Hamilton Saratoga Warren and Washington

Region 6 (Western Adirondacks Eastern Lake Ontario) Covers the counties of Herkimer Jefferson Lewis Oneida and St. Lawrence

Region 7 (Central New York) Covers the counties of Broome Cayuga Chenango Cortland Madison Onondaga Oswego Tioga and Tompkins

Region 8 (Western Finger Lakes) Covers the counties of Chemung Genesee Livingston Monroe Ontario Orleans Schuyler Seneca Steuben Wayne and Yates

Region 9 (Western New York) Covers the counties of Allegany Chautauqua Cattaraugus Erie Niagara and Wyoming counties

If your request pertains to just one Region, select that Region. If your request pertains to more than one Region, select Central Office. If you're unsure which Region your request pertains to, select Central Office. The Department will route your request to the appropriate Region(s)

Preferred Method to Receive Records:*

- (●) Electronic copies
- ( ) Pick-up Copies
- ( ) Inspect in Office
- ( ) Copies by Fax
- ( ) Express Mail (UPS)
- ( ) Regular Surface Mail (USPS)

NYSDEC will use its best efforts to provide records via the method you select. However, in some cases a particular delivery method is not feasible. In such cases NYSDEC will deliver the records via an alternative method

Please note not all public documents are available in electronic format. If the document(s) requested are not available electronically, we will make them available for inspection or by paper copy in accordance with the Public Records Law.

Note: The maximum total file size per attachment is 80MB.

Contact E-Mail: foils@enafco.com

Dear Miriam:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 1/27/2021 and given the reference number FOIL #**W077961-012721** for tracking purposes. You may expect the Department's response to your request no later than **2/26/2021.**

Record Requested: **2768-2776 Webster Ave, Bronx, NY 10458 Block 3273 Lot 100 & 101 Please provide documentation concerning above ground/underground heating oil storage tanks (ASTs/USTs) spills, leaks and site remediation at the property listed above.**

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Please note that due to the COVID-19 outbreak, DEC may be experiencing staffing shortages and some records custodians may be working remotely. This may result in a delayed response time to your FOIL request. We appreciate your understanding and cooperation.

Request a Record

Please make your request specific so you receive the fastest service. After you submit a FOIL request you will receive a confirmation number so you can track the status of the response. The agency will notify you about how much time is required to respond to your request.

Category (optional)

Selecting a category helps clarify which agency will receive the request by listing agencies grouped by categories.

Environment

Agency (required)

Select the agency that will handle your request.

Department of Environmental Protection (DEP)

Request Title (required)

2768 Webster Ave Bronx NY - Spill/Tank Records

44 characters remaining

Note: The agency, category, and title of your request will be visible to the public. Do not enter personal information here.

Ex: Queens Blvd Roadwork Permit.

Request Description (required)

2768-2776 Webster Ave, Bronx, NY 10458
Block 3273 Lot 100 & 101
Please provide documentation concerning above ground/underground heating oil storage tanks (ASTs/USTs) spills, leaks and site remediation at the property listed above.

4768 characters remaining

Note: The request details you write here will not be visible to the public. However, the agency may post a description of the records provided.

Ex: Roadwork permits for work done in on Queens Blvd. between 40th and 45th streets, Borough of Queens, in September and October 2017.

Open RECORDS

Qualifier

Common Law

A public record under common law is one required to be kept, or necessary to be kept in discharge of a duty imposed by law, or directed by law to serve as a memorial and evidence of something written, said, or done, or a writing filed in a public office. The elements essential to constitute a public record are that it be a written memorial, that it be made by a public officer, and that the officer be authorized by law to make it.

If the information requested is a "public record" under common law and the requester has a legally recognized interest in the subject matter contained in the material, then the material must be disclosed if the individual's right of access outweighs the State's interest in preventing disclosure.

Note that any challenge to a denial of a request for records under common law cannot be made to the Government Records Council, as the Government Records Council only has jurisdiction to adjudicate challenges to denials of OPRA requests. A challenge to the denial of access under common law can be made by filing an action in Superior Court.

Does this request fall under common law? *
No

If "Yes", set forth your interest in the requested records

Delivery Preference

Please note that your preferred method of delivery will only be accommodated if the custodian has the technological means and the integrity of the records will not be jeopardized by such method of delivery.

Preferred Delivery *

Email

Regulations

Note that any challenge to a denial of a request for records under the common law cannot be made to the Government Records Council, as the Government Records Council only has jurisdiction to adjudicate challenges to denials of OPRA requests.

Requesting Access to Government Records Under the New Jersey Open Public Records Act (N.J.S.A. 47:1A-1 et seq)

1. All government records are subject to public access under the Open Public Records Act ("OPRA"), unless specifically exempt.
2. A request for access to a government record under OPRA must be in writing, hand-delivered, mailed, transmitted electronically, or otherwise conveyed to the appropriate custodian. N.J.S.A. 47:1A-5.g. The seven (7) business day response time does not commence until the records custodian receives the request form. If you submit the request form to any other officer or employee, that officer or employee must either forward the request to the appropriate custodian, or direct you to the appropriate custodian. N.J.S.A. 47:1A-5.h.
3. Requestors may submit requests anonymously. If you elect not to provide a name, address, or telephone number, or other means of contact, the custodian is not required to respond until you reappear before the custodian seeking a response to the original request.
4. The fees for duplication of a government record are located below. We will notify you of any special service charges or other additional charges authorized by the State law or regulation before processing your request. Payment shall be made by cash, check or money order.
5. You may be charged a 50% or other deposit when a request for copies exceeds $50.00. The custodian will contact you and advise you of any deposit requirements. Anonymous requests, when permitted, require a deposit of 100% of estimated fees. You agree to pay the balance due upon delivery of the records.
6. Under OPRA, a custodian must deny access to a person who has been convicted of an indictable offense in New Jersey, any other state, or the United States, and who is seeking governmental records containing personal information pertaining to the person's victim or the victim's family. This includes anonymous requests for said information.
7. By law, the city or town must notify you that it grants or denies a report for access to government records within seven (7) business days after the agency custodian of records receives the request. If the record requested is not currently available or is in storage, the custodian will advise you within seven (7) business days after receipt of the request when the record can be made available and the estimated cost for reproduction.
8. You may be denied access to a government record if you request would substantially disrupt agency operations and the custodian is unable to reach a reasonable solution with you.

Deposits/Fees

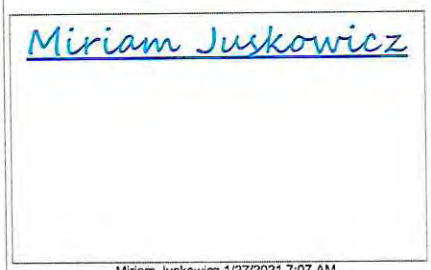
The custodian may require a deposit against costs for reproducing documents sought through an anonymous request whenever the custodian anticipates that the documents requested will cost in excess of $5.00 to reproduce.

Where a special service charge is warranted under OPRA, that amount will be communicated to you as required under the statute. You have the opportunity to review and object to the charge prior to it being incurred. If, however, you approve of the fact and amount of the special service charge, you may be required to pay a deposit or pay in full prior to the reproduction of the documents.

If any additional charges authorized by the State law or regulation are required, that amount will be communicated to you as required under the statute. Payment must be made by cash, check, or money order.

Type	Rate
Letter Size Pages (8.5" x 11")	$0.05 per page
Legal Size Pages (8.5" x 14")	$0.07 per page
Delivery	Delivery/Postage additional depending on delivery type
Other materials (CD, DVD, etc.)	$3.00/CD or DVD
Extras	Special service charge dependent upon request.

Certification



If you are requesting records containing personal information, please certify the following:

Under penalty of N.J.S.A.2C:28-3, I certify that I Have Not been convicted of any indictable offense under the laws of New Jersey, any other state, or the United States.

DEPARTMENT OF BUILDINGS

BOROUGH OF THE BRONX, THE CITY OF NEW YORK

Date JAN 9 1968 No. 43248

CERTIFICATE OF OCCUPANCY

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

This certificate supersedes C. O. No. N.B.1519-28

THIS CERTIFIES that the ~~new~~ altered ~~existing~~ building—premises located at Block 3273 Lot 100

2768-76 Webster Avenue

That the zoning lot and premises above referred to are situated, bounded and described as follows:

BEGINNING at a point on the east side of Webster Avenue distant 1050.87 feet south from the corner formed by the intersection of Webster Avenue and Bedford Park Boulevard

running thence ~~east 50~~ feet; thence ~~north 217.84~~ feet;

thence ~~east 58.33', south 430.47~~ feet; thence ~~west 74.92', north 144.77~~ feet;

running thence ~~west 57.00', south 0.60~~ feet; thence ~~west 31.45', north 115.90~~ feet;

to the point or place of beginning, conforms substantially to the approved plans and specifications, and to the requirements of the Building Code, the Zoning Resolution and all other laws and ordinances, and of the rules of the Board of Standards and Appeals applicable to a building of its class and kind at the time the permit was issued: and

CERTIFIES FURTHER that, any provisions of Section 646e of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

N.B. or Alt. No.— ~~XXXX~~ 799-66 Construction classification— Fireproof

Occupancy classification— Commercial & Public. Height Cellar & 2 stories, 27 feet.

Date of completion— 1-3-68 Located in C8-2 Zoning District.

at time of issuance of permit.

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals:
and The City Planning Commission: (Calendar numbers to be inserted here)

East Map:	40073-G7 FLUSHING, NY
Version Date:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

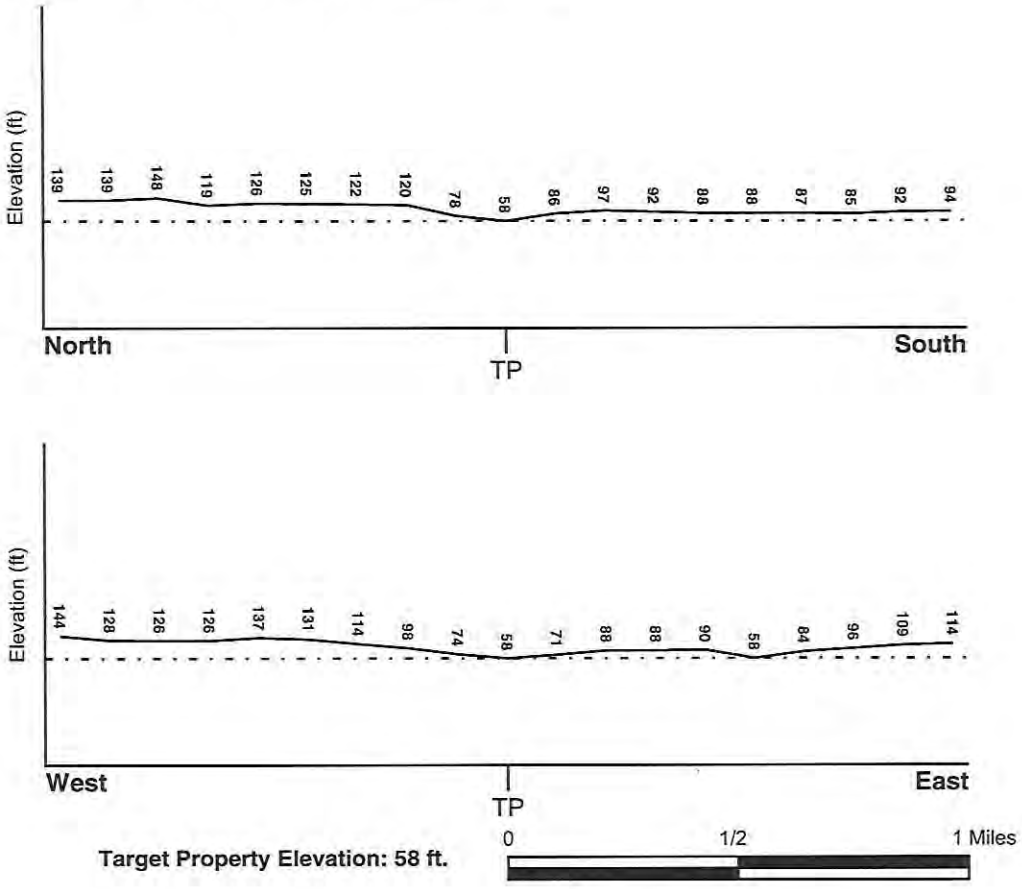
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 58 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970082F	FEMA FIRM Flood data

3604970101F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

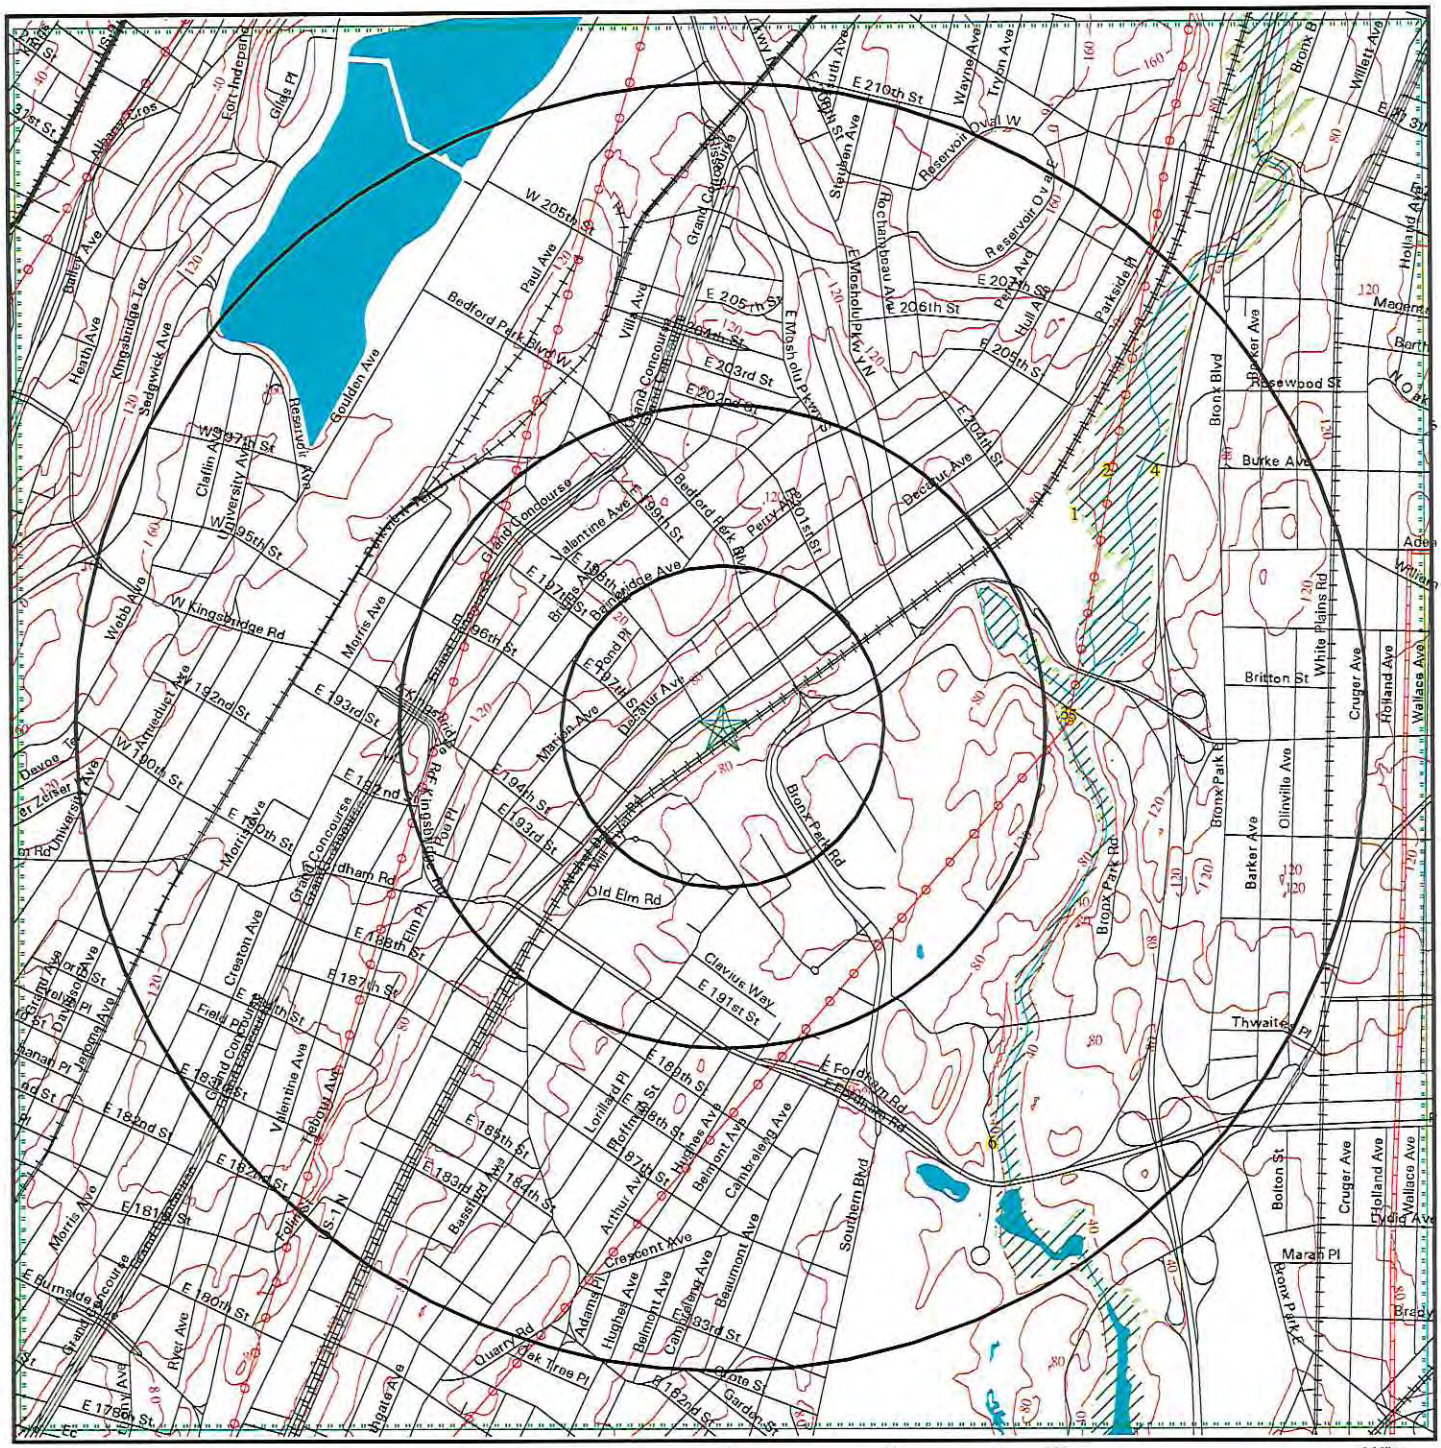
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY



The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

USER QUESTIONAIRE

Property Address: 2768 Webster Av

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).
Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

☐ yes ☒ no

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

☐ yes ☒ no

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
As the *user* of this *ESA* do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ yes ☒ no

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
Does the purchased price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

☐ yes ☒ no

(5.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).
Are you aware of commonly known or *reasonably ascertainable* information about the property that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user,*

a. Do you know the past uses of the *property*?
   ☐ yes ☒ no
b. Do you know of specific chemicals that are present or once were present at the *property*?
   ☐ yes ☒ no
c. Do you know of spills or other chemical releases that have taken place at the *property*?
   ☐ yes ☒ no
d. Do you know of any environmental cleanups that have taken place at the *property*?
   ☐ yes ☒ no

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

☐ yes ☒ no

Name and Title of Person Interviewed: ☐ owner ☐ partner ☒ manager ☐ superintendent

ENVIRONMENTAL AFFILIATES INC.

Alexander Friedman, EP

Environmental Professional

2003:

Alex Friedman, Director of Operations, established Environmental Affiliates Inc for the purpose of providing commercial and residential environmental assessments and consulting for banks, mortgage companies, attorneys, as well as the private sector.

2003-Present:

Over 3,500 Phase I Site Assessments and 500 Asbestos Surveys inspected and successfully completed by Alex Friedman in New York, New Jersey, Pennsylvania, and Connecticut. Current clients represent the development, insurance, banking, mortgage banking, real estate advisory, and realty communities. These environmental assessments include on site property evaluations and comprehensive reviews of regulatory data and public records to identify environmental concerns. Alex Friedman's extensive formal training combined with his seasoned background, professional certifications, and his years of industry experience provide for diversified environmental services. The success of EAI can be attributed to the consistency, dedication, and quality of service provided.

Areas of Expertise:

- Phase I Site Property Environmental Assessments as per ASTM E 1527-13 ASTM E 1528-06 (Transaction Screen Process)

- Visual assessments for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the subject site.
- Visual assessments for the presence of Asbestos Containing Material (ACM):
    - Asbestos Surveys, Bulk Sampling, and Laboratory analysis New York State
    - Guidance for controlling ACM in buildings
    - Operations and Maintenance Plans (O&Ms)
- Visual assessments regarding Lead Based Paint (LBP) hazards:
    - Operations and Maintenance Plans (O&Ms)

Education:

Bachelor of Science – Interdisciplinary Studies - Environmental Science

Empire College – State University of New York

Licenses:

Inspector, New York State Asbestos Certificate #04-08983

EPA-AHERA/ASHARA – 40 CFR 763 – Certificate of Completion Asbestos Safety Training

Asbestos Handling License – NYS Department of Labor #29455

Asbestos Management Planner- EPA-AHERA/ASHARA -40 CFR 763

Certifications & Affiliations:

   - U. ORPA 2008000018844, RECORDED/FILED 01/22/2009 16:00 (DEED LOT 100 BLOCK 3273–PLOTTED)
   - V. ORPA 2008000457140, RECORDED/FILED 11/26/2008 15:51 (DEED PART OF LOT 101 BLOCK 3273– PLOTTED).
   - W. ACQUISITION IN FEE SURVEY, TITLED "FORDHAM STATION PLATFORM EXPANSION PROJECT", PREPARED BY WELSH ENGINEERING & LAND SURVEYING, P.C., PREPARED FOR METRO–NORTH COMMUTER RAILROAD, METROPOLITAN TRANSPORTATION AUTHORITY, PROJECT NO. 5218.00, DATED JANUARY 06, 2010 [TEE ACQUISITION–BLOCK 3273 PART OF LOT 1 AND PART OF LOT 102–PLOTTED].
   - X. ADDRESSES ISSUED BY THE BOROUGH OF THE BRONX, APPLICATION DATED 5/8/2024, CERTIFIED 7/9/2024.
2. THE SURVEYED PROPERTY IS SUBJECT BUT NOT LIMITED TO THE FOLLOWING FACTS AS REVEALED BY THE HEREON REFERENCED INFORMATION. THE INFORMATION SHOWN HEREON DOES NOT CONSTITUTE A TITLE SEARCH BY THE SURVEYOR. ALL INFORMATION THAT MAY AFFECT THE QUALITY OF TITLE TO BOTH THE SUBJECT AND ADJOINING PARCELS SHOULD BE VERIFIED BY AN ACCURATE AND CURRENT TITLE REPORT.
3. THE MERIDIAN OF THIS SURVEY IS REFERENCED TO NEW YORK STATE PLANE COORDINATE SYSTEM, NEW YORK LONG ISLAND NAD83 AS ESTABLISH BY GPS METHODS.
4. STREET NAMES AND R.O.W. WIDTHS AS PER MAP REFERENCED IN NOTE 1B. TENTATIVE LOT NUMBERS AS PER MAPS REFERENCED IN NOTES 1A, 1E & 1F.
5. THIS PLAN IS PROVIDED AS BASIS FOR THE FILING OF A NYC DEPARTMENT OF FINANCE RP–602 APPLICATION FOR MERGERS OR APPORTIONMENTS, AND SHOULD NOT BE RELIED UPON AS A COMPLETE BOUNDARY SURVEY FOR THE PARCELS SHOWN HEREON.
6. EASEMENTS, LIMITING PLANES, AND OTHER ENCUMBRANCES, IF ANY, NOT SHOWN.
7. THE SURVEYOR HAS NOT COMPLETED A SUBSURFACE INVESTIGATION AND DOES NOT CERTIFY TO THE EXISTENCE OR ABSENCE OF SUBSURFACE FEATURES.
8. UNAUTHORIZED ALTERATION OR ADDITION TO A SURVEY MAP BEARING A LICENSED LAND SURVEYOR'S SEAL IS A VIOLATION OF SECTION 7209, SUB–DIVISION 2, OF THE NEW YORK STATE EDUCATION LAW.
9. THIS PLAN NOT VALID UNLESS EMBOSSED OR BLUE INK STAMPED WITH THE SEAL OF THE PROFESSIONAL.

WRITTEN DESCRIPTION
BLOCK 3273 TENTATIVE LOT 101

ALL THAT CERTAIN PLOT, PIECE, OR PARCEL OF LAND, SITUATE, LYING, AND BEING IN THE BOROUGH OF BRONX, BRONX COUNTY, CITY AND STATE OF NEW YORK, BOUNDED AND DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE SOUTHWESTERLY SIDE OF BEDFORD PARK BOULEVARD (A.K.A. SOUTHERN BOULEVARD) (100 FEET WIDE), DISTANT 199.15 FEET SOUTHEASTERLY FROM THE CORNER FORMED BY THE INTERSECTION OF SAID SOUTHWESTERLY SIDE OF BEDFORD PARK BOULEVARD WITH THE SOUTHEASTERLY SIDE OF WEBSTER AVENUE (100 FEET WIDE), AND RUNNING THENCE

SOUTHEASTERLY, ALONG SAID SOUTHWESTERLY SIDE OF BEDFORD PARK BOULEVARD, A DISTANCE OF 57.99 FEET TO A POINT; THENCE

SOUTHWESTERLY, FORMING AN INTERIOR ANGLE OF 85°41'41" WITH THE PREVIOUS COURSE, A DISTANCE OF 621.63 FEET TO A POINT; THENCE

SOUTHEASTERLY, FORMING AN INTERIOR ANGLE OF 265°41'18" WITH THE PREVIOUS COURSE, A DISTANCE OF 8.26 FEET TO A POINT; THENCE

SOUTHWESTERLY, FORMING AN INTERIOR ANGLE OF 94°20'03" WITH THE PREVIOUS COURSE, A DISTANCE OF 695.98 FEET TO A POINT; THENCE

SOUTHWESTERLY, ALONG A CURVE TO THE LEFT HAVING AN ARC LENGTH OF 311.55 FEET, A RADIUS OF 5697.02 FEET, AND A CENTRAL ANGLE OF 03°08'00" AND BEING SUBTENDED BY A CHORD WHICH FORMS AN ANGLE OF 179°50'33" ON ITS SOUTHERLY SIDE WITH THE PREVIOUS COURSE, A DISTANCE OF 311.51 FEET TO A POINT; THENCE

SOUTHWESTERLY, ALONG A CURVE TO THE LEFT HAVING AN ARC LENGTH OF 677.35 FEET, A RADIUS OF 2259.00 FEET, AND A CENTRAL ANGLE OF 17°10'48" AND BEING SUBTENDED BY A CHORD WHICH FORMS AN ANGLE OF 167°48'50" ON ITS SOUTHERLY SIDE WITH THE PREVIOUS COURSE, A DISTANCE OF 674.82 FEET TO A POINT; THENCE

SOUTHWESTERLY, ALONG A CURVE TO THE LEFT HAVING AN ARC LENGTH OF 212.63 FEET, A RADIUS OF 5694.63 FEET, AND A CENTRAL ANGLE OF 02°08'19" AND BEING SUBTENDED BY A CHORD WHICH FORMS AN ANGLE OF 158°27'16" ON ITS NORTHERLY SIDE WITH THE PREVIOUS COURSE, A DISTANCE OF 212.62 FEET TO A POINT; THENCE

SOUTHWESTERLY, FORMING AN INTERIOR ANGLE OF 271°37'25" WITH THE PREVIOUS COURSE, A DISTANCE OF 6.00 FEET TO A POINT; THENCE

SOUTHWESTERLY, ALONG A CURVE TO THE LEFT HAVING AN ARC LENGTH OF 216.30 FEET, A RADIUS OF 5690.63 FEET, AND A CENTRAL ANGLE OF 02°10'47" AND BEING SUBTENDED BY A CHORD WHICH FORMS AN INTERIOR ANGLE OF 91°21'58" WITH THE PREVIOUS COURSE, A DISTANCE OF 216.28 FEET TO A POINT; THENCE

SOUTHWESTERLY, FORMING AN INTERIOR ANGLE OF 183°01'11" WITH THE PREVIOUS COURSE, A DISTANCE OF 32.25 FEET TO A POINT ON THE NORTHEASTERLY SIDE OF EAST FORDHAM ROAD (100 FEET WIDE); THENCE

NORTHWESTERLY, ALONG SAID NORTHEASTERLY SIDE OF EAST FORDHAM ROAD, FORMING AN INTERIOR ANGLE OF 82°55'01" WITH THE PREVIOUS COURSE, A DISTANCE OF 83.13 FEET TO A POINT; THENCE

NORTHEASTERLY, ALONG A CURVE TO THE RIGHT HAVING AN ARC LENGTH OF 112.64 FEET, A RADIUS OF 5772.50 FEET, AND A CENTRAL ANGLE OF 01°07'05" AND BEING SUBTENDED BY A CHORD WHICH FORMS AN ANGLE OF 94°27'02" ON ITS SOUTHERLY SIDE WITH THE PREVIOUS COURSE, A DISTANCE OF 112.64 FEET TO A POINT; THENCE

NORTHEASTERLY, FORMING AN INTERIOR ANGLE OF 175°33'24" WITH THE PREVIOUS COURSE, A DISTANCE OF 459.17 FEET TO A POINT; THENCE

NORTHEASTERLY, FORMING AN INTERIOR ANGLE OF 173°43'31" WITH THE PREVIOUS COURSE, A DISTANCE OF 94.51 FEET TO A POINT ON SAID SOUTHEASTERLY SIDE OF WEBSTER AVENUE; THENCE

SOUTHEASTERLY, ALONG SAID SOUTHEASTERLY SIDE OF WEBSTER AVENUE, ALONG THE PROLONGATION OF THE PREVIOUS COURSE, A DISTANCE OF 788.14 FEET TO A POINT; THENCE

SOUTHEASTERLY, FORMING AN INTERIOR ANGLE OF 90°00'00" WITH THE PREVIOUS COURSE, A DISTANCE OF 88.68 FEET TO A POINT; THENCE

NORTHEASTERLY, FORMING AN INTERIOR ANGLE OF 256°00'50" WITH THE PREVIOUS COURSE, A DISTANCE OF 162.67 FEET TO A POINT; THENCE

NORTHEASTERLY, FORMING AN INTERIOR ANGLE OF 179°13'33" WITH THE PREVIOUS COURSE, A DISTANCE OF 252.72 FEET TO A POINT; THENCE

NORTHEASTERLY, FORMING AN INTERIOR ANGLE OF 180°35'37" WITH THE PREVIOUS COURSE, A DISTANCE OF 424.77 FEET TO A POINT; THENCE

NORTHEASTERLY, FORMING AN INTERIOR ANGLE OF 181°20'36" WITH THE PREVIOUS COURSE, A DISTANCE OF 89.93 FEET TO A POINT; THENCE

NORTHWESTERLY, FORMING AN INTERIOR ANGLE OF 269°12'15" WITH THE PREVIOUS COURSE, A DISTANCE OF 17.01 FEET TO A POINT; THENCE

EASTERLY, FORMING AN INTERIOR ANGLE OF 75°28'58" WITH THE PREVIOUS COURSE, A DISTANCE OF 112.85 FEET TO A POINT; THENCE

EASTERLY, FORMING AN INTERIOR ANGLE OF 179°38'35" WITH THE PREVIOUS COURSE, A DISTANCE OF 153.34 FEET TO A POINT; THENCE

EASTERLY, FORMING AN INTERIOR ANGLE OF 174°01'39" WITH THE PREVIOUS COURSE, A DISTANCE OF 27.40 FEET TO A POINT; THENCE

NORTHEASTERLY, FORMING AN INTERIOR ANGLE OF 200°31'12" WITH THE PREVIOUS COURSE, A DISTANCE OF 119.73 FEET TO THE POINT OR PLACE OF BEGINNING.

Name, Description and Location of Proposal:

Webster Avenue Rezoning

The Positive Declaration has been revised for the above-referenced project due to the following changes to the Environmental Assessment Statement and Draft Scope of Work.

The Draft Scope of Work and Environmental Assessment Statement have been revised to incorporate these changes to the proposed action:

- the proposed action was revised to rezone areas along narrow streets in Bedford Park and Norwood to R7B, instead of R7A;
- the proposed action was revised to rezone part of one block on Marion Avenue and 195th Street to R7B instead of R5B; and
- the proposed action was revised to rezone part of one block on Hull Avenue between 204th and 205th streets and part of another block at Bainbridge and 198th Street, to R7B instead of R5A.

Additionally, the Draft Scope of Work and Environmental Assessment Statement have further been revised:

- to include updated analyses per the recently revised CEQR Technical Manual;
- to indicate that a small portion of the proposed rezoning area is located in Community District 12; and
- to indicate that a blockfront along Webster Avenue currently zoned R8/C2-3 would be rezoned to R8/C2-4.

DCP is proposing zoning map and zoning text amendments affecting the Bedford Park and Norwood communities in the Bronx, Community Districts 7 and 12. The areas affected by the

Robert Dobruskin, AICP, *Director*
Celeste Evans, *Deputy Director*
22 Reade Street, New York, N.Y. 10007-1216 Room 4E (212) 720-3420
FAX (212) 720-3495
rdobrus@planning.nyc.gov

proposed action include all or portions of 80 blocks, generally bound by the Metro-North Railroad Harlem Line right-of-way to the southeast, Fordham Road and East Kingsbridge Road to the southwest, the Grand Concourse and Jerome Avenue to the northwest, and East Gun Hill Road to the northeast. Zoning mapping amendments are proposed along Webster Avenue between approximately Fordham Road and East 213th Street to permit contextual residential development and medium density commercial uses where current zoning is oriented to low-scale auto-related commercial uses.

A zoning text amendment is also proposed to establish the Inclusionary Housing program in proposed R7D and C4-5D districts within the proposed rezoning area. Neighborhood downzonings are proposed in the Bedford Park and Norwood neighborhoods to preserve the scale and context of those areas. The actions are as follows:

- Zoning map amendment to change portions of 18 blocks currently zoned C8-2, R7-1, R7-1/C1-3, and R7-1/C2-3 to R7D/C2-4, generally located along Webster Avenue, north of East 193rd Street and South of East 205th Street.
- Zoning map amendment to change a portion of one block currently zoned C8-2 to C4-5D, generally located along Webster Avenue, north of East 195th Street and south of Bedford Park Boulevard.
- Zoning map amendment to change portions of four blocks from C8-2 to C4-4 & R7B generally located along Webster Avenue, north of East 210th Street and south of East 213th Street.
- Zoning map amendment to change portions of 71 blocks from R7-1, R7-1/C1-3, R7-1/C2-3, R8, R8/C2-3, and C4-4 to contextual districts R4A, R5A, R5B, R5D/C1-4, R6B, R7B, R7B/C1-3, R7B/C2-4, R7A, R7A/C1-3, R7A/C1-4,R7A/C2-4, R8/C2-4 generally located northwest of Webster Avenue, north of Fordham Road, southeast of Valentine Avenue, east of Rochambeau Avenue, and south of East Gun Hill Road.
- Zoning text amendment to establish the Inclusionary Housing program in the R7D and C4-5D districts within the proposed rezoning area in Community District 7, the Bronx.

The proposed actions are intended to provide new opportunities for growth in an area well served by mass transit; encourage new housing production, including new affordable housing utilizing the Inclusionary Housing Program; and encourage new office and commercial space.

DCP analyzed 24 projected development sites and 25 potential development sites. It is expected the proposed actions would generate a net increase of 738 dwelling units, including 191 units of affordable housing; a net increase of 60,599 square- feet of commercial; and a net increase of 7,782 square-feet of community facility space. The analysis year is 2020.

In order to avoid any potential impacts related to hazardous materials, (E) designations for hazardous materials (E-249) would be placed on the following properties:

Block	**Lots**
3273	100, 105, 109, 114, 118, 122, 128
3276	1
3277	28, 36, 40, 41, 45

3278	31, 33
3279	50
3280	37, 39, 42, 45, 46, 48, 58, 61, 65, 67
3330	40, 50, 51, 52, 55, 57, 68
3331	57, 75, 80
3355	116
3356	200, 206, 214
3357	7, 12, 16, 18, 21, 23, 25, 28, 32, 33, 37, 52, 53, 54, 55
3360	33, 38, 44, 50, 62

The text of the (E) designation is as follows:

Due to the possible presence of hazardous materials on the aforementioned designated sites there is potential for contamination of the soil and groundwater. To determine if contamination exists and perform and appropriate remediation, the following tasks must be undertaken by the fee owners(s) of the lot restricted by this (E) designation prior to any demolition or disturbance of soil on the lot.

Task 1
The fee owner(s) of the lot(s) restricted by this (E) designation will be required to prepare a scope of work for any soil, gas, or groundwater sampling and testing needed to determine if contamination exists, the extent of the contamination, and to what extent remediation may be required. The scope of work will include all relevant supporting documentation, including site plans and sampling locations. This scope of work will be submitted to DEP for review and approval prior to implementation. It will be reviewed to ensure that an adequate number of samples will be collected and that appropriate parameters are selected for laboratory analysis.

No sampling program may begin until written approval of a work plan and sampling protocol is received from DEP. The number and location of sample sites should be selected to adequately characterize the type and extent of the contamination, and the condition of the remainder of the site. The characterization should be complete enough to determine what remediation strategy (if any) is necessary after review of the sampling data. Guidelines and criteria for choosing sampling sites and performing sampling will be provided by DEP upon request.

Task 2
A written report with findings and a summary of the data must be presented to DEP after completion of the testing phase and laboratory analysis for review and approval. After receiving such test results, a determination will be provided by DEP if the results indicate that remediation is necessary.

If DEP determines that no remediation is necessary, written notice shall be given by DEP.

If remediation is necessary according to test results, a proposed remediation plan must be submitted to DEP for review and approval. The fee owner(s) of the lot(s) restricted by this (E) designation must perform such remediation as determined necessary by DEP. After completing the remediation, the fee owner(s) of the lot restricted by this (E) designation should provide proof that the work has been satisfactorily completed.

A DEP-approved construction-related health and safety plan would be implemented during excavation and construction activities to protect workers and the community from potentially significant adverse impacts associated with contaminated soil and/or groundwater. This Plan would be submitted to DEP for review and approval prior to implementation.

With the implementation of the above (E) designation, no significant adverse impacts related to hazardous materials would occur.

In order to avoid any potential impacts related to air quality, (E) designations for stationary sources (E-249) would be placed on the following properties:

Air Quality (E) Designations for Development Sites – HVAC Restrictions

• Block 3273, Lots 105, 109 (Projected Development Site 2): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 28 feet for oil No.4/2 from the lot line facing Bedford Park Blvd for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3273, Lot 114 (Projected Development Site 3): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 22 feet for oil No.4/2 from the lot line facing Oliver Place and at least 20 feet from the lot line facing Bedford Park Blvd for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3278, Lot 88 (Projected Development Site 4): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 18 feet for oil No.4/2 from the lot line facing E 198 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3278, Lots 84, 85 (Projected Development Site 5): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil No.4/2 from the lot line facing E 197 Street for fuel oil and at least 23 feet from the lot line facing E 198 Street or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3278, Lots 80, 81, 82, 83 (Projected Development Site 6): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 22 feet for oil No.4/2 from the lot line facing E 197 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lots 52, 55 (Projected Development Site 8): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 24 feet for oil No.4/2 from the lot line facing E 201 Street and 24 feet from the lot line facing Bedford Park Blvd for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lots 45, 46, 48, 49 (Projected Development Site 9): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 28 feet for oil No.4/2 from the lot line facing Bedford Park Blvd for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3330, Lots 40, 42, 43 (Projected Development Site 10): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 18 feet for oil No.4/2 from the lot line facing E 203 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3330, Lots 50, 51 (Projected Development Site 11): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 11 feet for oil No.4/2 from the lot line facing E 202 Street and at least 18 feet from the lot line facing Metro-North Railroad for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3330, Lot 52 (Projected Development Site 12): Any new residential and/or commercial development on the above-referenced properties must ensure that the

heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil No.4/2 from the lot line facing E 202 Street for fuel oil and at least 13 feet from the lot line facing Metro-North Railroad or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3331, Lot 80 (Projected Development Site 14): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 22 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 15 feet from lot line facing Decatur Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 7 (Projected Development Site 17): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 26 feet for oil No.4/2 from the lot line facing E 205 Street and Webster Avenue for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 12 (Projected Development Site 18): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 20 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 25 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 16, 18, 21 (Projected Development Site 19): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 24 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 23 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lots 37, 52, 53, 54 (Projected Development Site 20): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 30 feet for oil No.4/2 from the lot line facing E 205 Street for fuel oil and or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 55 (Projected Development Site 21): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil

No.4/2 from the lot line facing E 204 Street for fuel oil and or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3360, Lot 50 (Projected Development Site 22): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 12 feet for oil No.4/2 from the lot line facing E Gun Hill Road for fuel oil and or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3356, Lot 214 (Projected Development Site 23): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 20 feet for oil No.4/2 from the lot line facing Decatur Avenue for fuel oil and or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3277, Lots 41, 45 (Potential Development Site 102): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 25 feet for oil No.4/2 from the lot line facing E 195 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3277, Lots 36, 40 (Potential Development Site 103): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 24 feet for oil No.4/2 from the lot line facing E 194 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3278, Lot 31 (Potential Development Site 106): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 16 feet for oil No.4/2 from the lot line facing Webster Avenue for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lots 65, 67 (Potential Development Site 108): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 20 feet for oil No.4/2 from the lot line facing E 201 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lots 58, 61 (Potential Development Site 109): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 23 feet for oil No.4/2 from the lot line facing E 201 Street for fuel oil and at least 26 feet from the lot line facing Bedford Park Blvd or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3280, Lot 42 (Potential Development Site 110): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil No.4/2 from the lot line facing Bedford Park Blvd for fuel oil and at least 12 feet from the lot line facing E 201 Street or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3330, Lots 55, 57 (Potential Development Site 115): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 29 feet for oil No.4/2 from the lot line facing E 202 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 23 (Potential Development Site 116): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 15 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 18 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 25 (Potential Development Site 117): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 19 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 22 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lot 28 (Potential Development Site 118): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 27 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil and at least 26 feet from the lot line facing E 205 Street and Webster Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3357, Lots 32, 33 (Potential Development Site 119): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 17 feet for oil No.4/2 from the lot line facing E 204 Street for fuel oil or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3356, Lot 206 (Potential Development Site 122): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 16 feet for oil No.4/2 from the lot line facing E Gun Hill Road for fuel oil and at least 16 feet from the lot line facing E 211 Street or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

• Block 3273 Lot 100 (Potential Development Site 125): Any new residential and/or commercial development on the above-referenced properties must ensure that the heating, ventilating and air conditioning stack(s) are located at least 35 feet for oil No.4/2 from the lot line facing Webster Avenue for fuel oil and at least 16 ft feet from the lot line facing Decatur Avenue or use natural gas as the type of fuel for space heating and hot water (HVAC) systems, to avoid any potential significant adverse air quality impacts.

With the implementation of the above (E) designation, no significant adverse impacts related to air quality from stationary sources would occur.

Noise (E) Designations for Development Sites

The following sites require 37.2 dBA of noise attenuation on façades that front on Bedford Park Boulevard, and 35 dBA on other façades, in order to avoid the potential for significant adverse impacts related to noise. The proposed action includes (E) designations as shown in Table 1, on the following properties:

Table 1:Sites Requiring (E) Designation with 37.2 dBA Noise Attenuation [1]

Potential Development Sites		
Development Site	**Block**	**Lot(s)**
107	3273	122, 128

[1] Window-wall attenuation of 37.2 dBA would be required for the building façade which fronts on Bedford Park Boulevard, where as all other facades would require 35 dBA window-wall attenuation

The text of the (E) designation for noise for the above properties would be as follows:

> **In order to ensure an acceptable interior noise environment, future residential/commercial uses must provide a closed window condition with a minimum of 37.2 dB(A) window-wall attenuation on any building façade which fronts Bedford Park Boulevard as well as a minimum of 35 dB(A) window-wall attenuation on any other building façade, in order to maintain an interior noise level of 45 dB(A). In order to maintain a closed-window**

condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, central air conditioning or air conditioning sleeves containing air conditioners or HUD-approved fans.

The following sites require 35 dBA of noise attenuation in order to avoid the potential for significant adverse impacts related to noise. The proposed action includes (E) designations on properties as shown in Tables 2a and 2b.

The text of the (E) designation for noise for the above properties is as follows:

In order to ensure an acceptable interior noise environment, future residential/commercial uses must provide a closed window condition with a minimum of 35 dB(A) window-wall attenuation in all façades in order to maintain an interior noise level of 45 dB(A). In order to maintain a closed-window condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, central air conditioning or air conditioning sleeves containing air conditioners or HUD-approved fans.

With the attenuation measures specified above, the proposed rezoning would not result in any significant adverse noise impacts, and would meet CEQR guidelines.

Statement of Significant Effect:

On behalf of the City Planning Commission, the Environmental Assessment and Review Division has determined, pursuant to 6 NYCRR Part 617.7, that the proposed actions may have a significant effect on the quality of the environment as detailed in the following environmental impacts, and that an environmental impact statement will be required:

1. The actions, as proposed, may result in significant adverse impacts on neighborhood character in the vicinity of the affected area.

2. The actions, as proposed, may result in significant adverse waterfront revitalization program related impacts.

3. The actions, as proposed, may result in significant adverse impacts on infrastructure in the vicinity of the affected area.

4. The actions, as proposed, may result in significant adverse impacts to traffic conditions in the vicinity of the affected area.

5. The actions, as proposed, may result in significant adverse impacts related to other aspects of the environment.

Supporting Statement:

The above determination is based on an Environmental Assessment Statement prepared for the actions which finds that:

1. Neighborhood Character – The proposed actions would result in new development which could alter existing neighborhood character by affecting traffic.

2. Infrastructure – The proposed action could result in an impact to infrastructure.

3. Waterfront Revitalization Program – The proposed action could result in an impact to the waterfront revitalization program.

4. Traffic – The proposed actions could increase traffic volumes which could generate significant traffic impacts requiring mitigation.

5. The Draft Environmental Impact Statement (DEIS) to be prepared for the proposed actions will identify and describe any other potential effects on the environment.

6. An Environmental Assessment Statement (EAS), dated April 16, 2010, was prepared for the proposed actions. The EAS concluded that, based on standard methodologies using *CEQR* Technical *Manual* guidelines and employing reasonable, worst-case assumptions, the proposed actions would not result in significant adverse impacts with respect to Land Use, Zoning and Public Policy; Socioeconomic Conditions; Community Facilities and Services; Open Spaces; Shadows; Historic Resources; Urban Design and Visual Resources; Natural Resources; Hazardous Materials; Solid Waste and Sanitation Services; Energy; Parking; Transit and Pedestrians; Air Quality; Noise; Construction Impacts; or Public Health.

7. The (E) designation for hazardous materials would ensure that the proposed actions would not result in significant adverse impacts due to hazardous materials.

8. The (E) designation for air quality would ensure that the proposed actions would not result in significant adverse impacts due to air quality.

9. The (E) designation for noise would ensure that the proposed actions would not result in significant adverse impacts due to air quality.

Public Scoping:

The CEQR lead agency hereby requests that the applicant prepare or have prepared, at their option, a Draft Environmental Impact Statement (DEIS) in accordance with 6 NYCRR 617.9(b) and Sections 6-08 and 6-12 of Executive Order No. 91 of 1977 as amended (City Environmental Quality Review).

A Draft Scope of Work for the proposed action was issued on April 16, 2010, and a public scoping hearing on the proposed action was held on May 19th, at The Bedford Park Senior Center 243 E. 204th Street, Bronx, New York. Subsequently, the proposed action was revised to rezone areas along narrow streets in Bedford Park and Norwood to R7B, instead of R7A; rezone part of one block on Marion Avenue and 195th Street to R7B instead of R5B; rezone part of one block on Hull Avenue between 204th and 205th streets and part of another block at Bainbridge and 198th Street, to R7B instead of R5A. The Draft Scope of Work and Environmental Assessment Statement have been revised to incorporate these changes, and to include updated analyses per the May 2010 edition of the CEQR Technical Manual. Furthermore, the Draft Scope of Work and Environmental Assessment Statement have been revised to indicate that a small portion of the proposed rezoning area is located in Community District 12 and that a blockfront along Webster Avenue currently zoned R8/C2-3 would be rezoned to R8/C2-4.

A second public scoping meeting has been scheduled for Wednesday, September 1, 2010 at 10:00am and will be held at the Department of City Planning, Spector Hall, 22 Reade Street, New York, NY 10017. Written comments will be accepted by the lead agency through the tenth day following the scoping meeting. Comments made during both scoping hearings will be considered.

This determination has been prepared in accordance with Article 8 of the Environmental Conservation Law. Should you have any questions pertaining to this Positive Declaration, you may contact Nicole Rodriguez, the project manager, at (212) 720-3247.

Phase I Environmental Site Assessment Questionnaire
For ASTM E 1527-21

According to the American Society for Testing and Materials (ASTM) standard practice for environmental site assessments (Designation: E 1527-21) "All Appropriate Inquiry" (AAI) (40 CRF 312.20) standard, the client must provide the following information (if available) to the environmental consultant during a Phase I Environmental Site Assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

SESI Project Name: 2752 Webster Avenue, Bronx NY
SESI Project Number: 13581A

Client/Responsible Party Information (person completing this questionnaire) :
Name: JORGE MADRUGA
Title: CEO / FOUNDER
Interest to Property: BUYER
Street Address: 15 VERBENA AVENUE
City: FLORAL PARK
State: NY
Phone: 516-821-2003

Property Owner/Tenant Site Information:
Company Name:
Description of Operations:

DATE

Identification of the site contact and how the contact can be reached (person who will conduct or conducted the site walk and/or will provide or provided access):

1. ENVIRONMENTAL CLEANUP LIENS/OTHER LIENS

a. Are there any environmental cleanup liens/and or other liens that are filed or recorded against the site in any applicable jurisdiction?

No.

2. ACTIVITY OR USE LIMITATIONS AND WETLANDS

A) Are you aware of any environmental restrictions/limitations to the use of the property? (i.e. Engineering or Institutional Controls)

No.

i) If yes, please explain.

ii) Can you provide any lien or deed restriction paperwork (ie. deed notice or environmental lien)?

B) Is any of the site to your knowledge used as a child-care facility or are plans in place to have a child-care facility on-site?

No.

C) Are there any wetlands or marshlands at the site to your knowledge?

No.

3. COMMONLY KNOW OR REASONABLE ASCERTAINABLE INFORMATION ABOUT THE PROPERTY

A) Do you have any knowledge of the past uses of the property?

yes.

i) If so, please explain (dates or tenant contracts should be collected if available for any commercial or industrial uses).

owned by MTA for railroad operations.

ii) Has the property ever been used for industrial purposes?

unknown

a. If yes can you provide the NAICS code for the industrial use?

B) Do you know of any Environmental Spills Incident Numbers or Notices of Violation? (i.e., tank removals/Unregulated Heating Oil Tank removals)?

No.

i) If yes, please provide information or available paperwork (ie. former reports or incident numbers)

C) Do you know if the site has been subject to an environmental cleanup or received a NYSDEC Certificate of Completion in the past?

No.

D) Do you know of any underground storage tanks (USTs), aboveground storage tanks (ASTs) and/or septic tanks?

No.

E) Do any buildings on the site have a basement or crawlspace?

No.

F) Does the site use/have an incinerator, compactor, or dumpster? (This should include any cooking oil containers or other media.)

No.

G) How is heating and cooling supplied to the site? N/A

a. If by oil, name of usual supplier:

b. If by gas, name of utility company:

c. If by electric, name of utility company:

H) How is water supplied to the site? N/A

a. Local municipal hookup?
   i. If so, name of provider:

b. Potable Well?
   i. If so, well number/designation and location:

l) Is any portion of the site prone to flooding or has had a significant flood?
UNKNOWN.

4. ADJOINING PROPERTIES

A) Have any of the adjoining properties been used for Industrial purposes currently or in the past?
UNKNOWN.

i) If yes, please provide compass direction and name (if known) of the property.

B) Have any of the adjoining properties been used as a gas station, dry cleaner or auto shop currently or in the past?
UNKNOWN.

i) If yes, please provide compass direction and name (if known) of the property.

C) Have any of the adjoining properties been used for commercial purposes currently or in the past?
YES.

i) If yes, please provide compass direction and name/ industry (if known) of the property.
PARKING LOT (2740 WEBSTER AVENUE)

D) Have any adjoining properties been used as a high school in currently or in the past?
NO.

i) If yes, please provide compass direction and name (if known) of the property.

E) Are any of the adjoining properties currently or in the future (to your knowledge) a child-care facility?

No.

i) If yes, please provide compass direction and name (if known) of the property.

5. ENVIRONMENTAL SITE CONDITIONS

A) Are there any present environmental conditions at the site that may prove an obvious threat to the environment or human health?

No.

B) Do you have any chemical storage areas?

No.

C) Do you have any drum storage areas?

No.

D) Do you have any USTs or ASTs not related to heating?

No.

E) Do you have any of the following at or on the site:

a. On-site dry cleaning or washing machine facilities?

No.

b. Landfills or known fill areas?

No.

c. Machinery or equipment that uses hazardous or petroleum compounds?

No.

d. Dust collectors?

No.

e. Spray booths?

No.

f. Floor drains or sumps?

No.

g. Other machinery or equipment?

No.

7. ADDITIONAL PERTINENT INFORMATION

A) Please provide the reason why the Phase I is required (i.e., sale, purchase, transfer, due diligence, cessation of operation, off-site source of groundwater contamination).

PURCHASE / DUE DILIGENCE.

B) Please provide the complete and correct address for the property (any previous surveys maps or any change in tax lot and blocks that are proposed or not yet recorded at the local/county municipality or re- zoning plans):

2752 WEBSTER AVENUE
BRONX, NY 10458

C) Any additional services or out-of-scope services you wish to be provided in addition to the standard set of services (mold assessment/asbestos assessment/geotechnical/ lead-based paint/indoor or sub-slab air sampling):

NO.

D) Please identify all parties to your knowledge who will rely on this ESA? (excluding regulatory agencies)

Madda Equities, and its affiliates.

E) Please provide any former Phase I or Phase II reports, incident reports, NYSDEC Reports, current or former permits for the operation of machinery, tank registration documents, AIRS permits, or other environmental permits.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1927 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 369 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.
