## EXECUTIVE SUMMARY

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) completed a Phase I Environmental Site Assessment (ESA) of the Bronx Kingsbridge Armory property, located at 1 West Kingsbridge Road in the Bronx, New York (the "subject property") under the written authorization of 8th Regiment Partners LLC (the "Client, the "user").

The Phase I ESA was completed following the guidelines of ASTM International Standard Practice E1527-21 (ASTM E1527-21), the United States Environmental Protection Agency's (US EPA) All Appropriate Inquiries (AAI) Rule, and industry standard practice. The user requested this ESA as part of their environmental due diligence related to a potential transaction involving the subject property.

*Subject Property Layout*

The about 5.6-acre subject property is identified on the Bronx Borough Tax Map as Block 3247, Lot 10. The subject property is developed with an approximately 200,000-square-foot, multi-story former military facility (armory building) on the majority of the property. The remainder of the subject property comprises access roadways, concrete and asphalt-paved areas, and landscaped areas to the north, west and south of the building.

The interior of the armory building consists of a central drill hall at ground level with an arched framing roof that extends about 110 feet above the floor of the drill hall. Beneath the drill hall are two cellar levels which formerly included offices, a garage and vehicle storage area, a gymnasium, rifle and pistol ranges, and other ancillary rooms. In the southern part of the building, a crawl space is present at the sub-cellar level. Above the drill hall there are four, five-story towers in the southern part of the building, which previously contained offices and residential quarters.

*Subject Property Current Use*

The subject property is primarily vacant and is periodically used for the parking of New York City graffiti removal vehicles and for occasional events held within the central drill hall.

*Subject Property History*

The subject property was developed as early as 1896 as part of the Jerome Park Reservoir. Construction of the Bronx Kingsbridge Armory building began in 1912 and was completed in 1917. The subject property has remained in a similar configuration through the present day. The armory building was operated by the New York National Guard 258th Field Artillery Unit from its construction until 1996, when ownership of the subject property was reportedly released back to New York City. A portion of the subject property was occupied by the New York City Community Assistance Unit, Anti-Graffiti Task Force for parking and office space from about 1984 through the early 2000s.

*Adjoining Properties and Surrounding Area*

Adjoining properties and the surrounding area were developed with residential, commercial, and institutional uses as early as 1896. An elevated New York City Transit (NYCT) structure (4 Train) was constructed to the east of the subject property, above Jerome Avenue by 1945. Historical operations at adjoining and surrounding properties include schools, office buildings, banks, parking, auto repair facilities, filling and gasoline stations, and dry cleaners. Presently, the area is developed with residential, commercial, and institutional properties.

*Conclusions*

Langan completed a Phase I ESA of the subject property using the scope guidelines and inherent limitations of ASTM E1527-21. Table ES-1 presents the conclusions of the Phase I ESA.

**Table ES-1 Conclusions, Findings and Opinions**

| **ASTM E1527-21 Scope Items** |
|---|
| **Recognized Environmental Conditions (RECs)** |
| *Historical Operations and Documented Contamination at the Subject Property:* The subject property was historically operated by the New York National Guard 258th Field Artillery Unit from about 1917 through 1996. Operations of the armory building included a drill hall, office rooms, work shops, a theater and lecture hall, former gymnasium, former bowling alley, rifle and pistol ranges, and below-grade parking and vehicle storage areas. Historic operations also included the generation and disposal of hazardous wastes, such as ignitable and corrosive wastes, lead, and spent halogenated and nonhalogenated solvents and petroleum bulk storage and use at the subject property with documented spills and releases of petroleum products for which closure documentation was not available.<br><br>Several investigations were completed at the subject property between 2007 and 2013. These investigations identified impacts at the subject property related to the historical operations, including volatile organic compounds (VOCs), semivolatile organic compounds (SVOCs), and metals in soil and groundwater at concentrations above the applicable regulatory criteria. Soil samples also identified lead at hazardous concentrations within the armory building. Petroleum-related VOCs and chlorinated volatile organic compounds (CVOCs) were also detected in soil vapor samples throughout the subject property, with one VOC, trichloroethene (TCE), detected at a concentration for which mitigation is recommended. The historical operation of the subject property and documented impacts to the subsurface are considered a REC. |
| *Aboveground Storage Tanks at the Subject Property:* During the site reconnaissance, Langan observed two about 275-gallon aboveground storage tanks (ASTs), with petroleum-like staining observed on the construction debris in the vicinity of one of the ASTs. Langan also observed a fill port to the north of the subject property. The presence of petroleum bulk storage with staining observed on construction debris in the vicinity of one of the ASTs is considered a REC. |
| *Historical Use of Adjoining Properties:* The eastern adjoining property at 2704 Jerome Avenue and the western adjoining property at 2717 Reservoir Avenue were identified in the EDR Historical Automotive database for use as an automotive repair shop from at least 1985 through 1997 and from at least 1996 through 2014, respectively. The western adjoining property was also identified as a gasoline station from at least 1969 to 1989 with a reported spill documenting releases to the subsurface.<br><br>In addition, the southern adjoining property at 40 West Kingsbridge Road and the western adjoining property at 2691 Reservoir Avenue were identified in historical records and databases as dry cleaners in 1950 and from at least 1994 through 1998, respectively.<br><br>Based on the proximity and up- to cross-gradient location to the subject property the historical use of these adjoining properties is considered a REC, as inadvertent releases of petroleum products or hazardous substances associated with auto repair, gasoline storage, and dry cleaning operations may have impacted soil or groundwater at the subject property. |
| **Controlled Recognized Environmental Conditions (CRECs)** |
| Langan did not identify CRECs. |

| **ASTM E1527-21 Scope Items** |
|---|
| **Historical Recognized Environmental Conditions (HRECs)** |
| Langan did not identify HRECs. |
| **De Minimis Conditions** |
| *Interior Surface Staining:* During the site reconnaissance, areas of localized staining were observed on the concrete slab throughout the vehicle storage area in the northern part of the armory building. The concrete slab appeared to be in good condition and the staining did not extend across any cracks or floor drains within the building. |
| **Significant Data Gaps** |
| Langan did not identify significant data gaps |
| **Non-ASTM E1527-21 Scope Items** |
| **Business Environmental Risks (BERs)** |
| *E-Designation for the Subject Property:* The subject property (identified under Block 3247, Lot 10) is subject to an E-Designation for Hazardous Materials that was assigned as part of a rezoning action. The Hazardous Materials E-Designation will require that the subject property tax lot is investigated and remediated under jurisdiction of the New York City Office of Environmental Remediation (NYC OER) as part of any future site redevelopment. |
| *Drums at the Subject Property:* During the site reconnaissance, Langan observed several 55-gallon drums containing unknown oil and soil and groundwater presumably derived from previous investigations at the subject property. Removal of the drums from the subject property may result in cost premiums for special handling of the drums and their contents. |
| *Monitoring Wells at the Subject Property:* During the site reconnaissance, Langan observed three permanent groundwater monitoring wells at the subject property, presumably related to the previous investigations conducted at the subject property. Future development of the subject property may require the wells to be abandoned and closed in accordance with the New York State Department of Environmental Conservation (NYSDEC) well abandonment regulations. |
| *Asbestos-Containing, Lead Containing Paint, and Hazardous Building Materials:* Based on previous reports and hazardous building materials surveys conducted at the subject property in 2000, 2008, and 2019, asbestos-containing material (ACM), lead containing paint (LCP), and hazardous building materials have been identified within the subject property building. |

# 1. INTRODUCTION

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) completed a Phase I Environmental Site Assessment (ESA) of the Bronx Kingsbridge Armory property, located at 1 West Kingsbridge Road, Bronx, New York (the "subject property") under the written authorization of 8th Regiment Partners LLC (the "Client"; the "user"). A Subject Property Location Map is provided in Appendix A (Figure 1).

The Phase I ESA was completed following the guidelines of ASTM International Standard Practice E1527-21 (ASTM E1527-21), the United States Environmental Protection Agency's (US EPA) All Appropriate Inquiries (AAI) Rule, and industry standard practice. The user requested this ESA as part of their environmental due diligence associated with a potential transaction involving the subject property.

## 1.1 Purpose

The purpose of this Phase I ESA is to identify recognized environmental conditions (REC) associated with the subject property. This purpose also includes identifying controlled recognized environmental conditions (CREC), historical recognized environmental conditions (HREC), de minimis conditions, and significant data gaps. The definitions of REC, CREC, HREC, de minimis condition and other select ASTM terms used in this report are in Section 8.

## 1.2 Scope of Services

Langan's scope of services consisted of the completion of a Phase I ESA following the guidelines of ASTM E1527-21. Langan's scope of services as it pertains to the elements of a Phase I ESA as specified in ASTM E1527-21 is described below.

On 8 July 2024, the US EPA final rule designating two per- and polyfluoroalkyl substances (PFAS) – perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) including their salts and structural isomers – as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) became effective. Because of the complex and varied historical use of PFAS in various industries; limited prior disclosures of PFAS content on product specification sheets, Material Safety Data Sheets (MSDS), and Safety Data Sheets (SDS); the complex chemistry and chemical transformations associated with some PFAS; and the ever-growing and varied list of state regulations, it is not feasible to evaluate PFOA and PFOS without also considering other PFAS. As such, absent analytical data, Langan incorporated a review of PFAS as a general class into this Phase I ESA.

PFAS and other CERCLA hazardous substances and petroleum products have been detected in background environmental samples across the globe, including in areas removed from specific recognized sources. This Phase I ESA was not intended to evaluate background concentrations of CERCLA hazardous substances or petroleum products, regardless of whether the source is naturally occurring or anthropogenic. The objective of Langan's scope of services was to identify the presence, likely presence, and/or material threat of a release of CERCLA hazardous substances and petroleum products related to specific property uses that are generally recognized as known or potential sources of such substances and products.

### *1.2.1 Records Review and Local Government Interviews*

Langan contracted a third-party provider to search environmental regulatory databases and provide historical records. The database search included select federal, state, local and tribal standard source environmental databases within the approximate search radii specified by ASTM E1527-21.

Langan submitted public records requests to supplement environmental database listing information. The public records requests were submitted to the New York City Department of Environmental Protection (NYCDEP), New York City Department of Health (NYCDOH), New York City Department of Health and Mental Hygiene (NYCDHMH), New York City Fire Department (FDNY), New York State Department of Health (NYSDOH), New York State Department of Environmental Conservation (NYSDEC), and US EPA Region 2. Langan also reviewed online records including the New York City Department of Buildings (NYCDOB), United States Geological Survey (USGS) mapping, and US EPA databases. Agency FOIA-requested information, where received, is discussed in relevant sections of this report and referenced in Section 7. Pertinent documents are provided in Appendix B.

Langan supplemented the third-party-provided historical records with review of online historical record sources including Google Earth Pro.

### *1.2.2 Site Reconnaissance and Owner/Operator/Occupant Interviews*

Langan completed the site reconnaissance on 19 February 2026. Neha Sahai (Project Manager for DBI, the owner representative; "key site manager") accompanied Lilah Willis of Langan during the site reconnaissance.

Langan walked the periphery of the subject property, observed the subject property from adjoining public thoroughfares, and walked the accessible interiors of structures at the subject property. Langan observed the adjoining properties and the surrounding area from the periphery of the subject property and from public thoroughfares. The weather at the time of the site reconnaissance was approximately 39 °F and cloudy. Photographs from the site reconnaissance are provided in Appendix C.

Langan interviewed Ms. Sahai during the site reconnaissance.

### *1.2.3 Evaluation, Report and Parts Used in Concert*

Langan evaluated the information obtained from the records reviews, site reconnaissance and interviews described above, and from the user as described in Section 1.3 in concert with each other. Langan's findings, opinions, and conclusions are discussed throughout this report. Significant assumptions, or deletions, deviations, or exceptions to ASTM E1527-21 are noted in Section 1.4.

## 1.3 User Responsibilities

Langan requested that the user provide the results of tasks the user is responsible for completing to satisfy the requirements of AAI. The tasks include: searching for known environmental liens and activity and use limitations (AULs) filed or recorded against the subject property, and provision of information related to specialized knowledge or experience of the user or the degree of obviousness relative to conditions indicative of releases or threatened releases; actual knowledge of the user regarding environmental liens or AULs related to the subject property;

specialized knowledge or experience of the user; reasons for significantly lower purchase prices, and commonly known or reasonably ascertainable information within the local community about the subject property. Langan also requested that the user state the reason the Phase I ESA was requested. To date, a completed user questionnaire was not received.

Unless specifically included in the scope of services, Langan did not complete a title search or a search for environmental liens or AULs, as that is the responsibility of the user. If the user requested that Langan complete such searches on the user's behalf, the information was supplied to Langan by a vendor, and to the vendor by government sources; therefore, neither Langan nor the vendor can verify the completeness or accuracy of the title search, or AUL searches.

## 1.4 Limiting Conditions/Deviations

Langan was unable to observe all spaces at the subject property due to building conditions and accessibility issues. In addition, a cabinet containing unknown substances was locked and unable to be accessed. These limiting conditions did not impact Langan's conclusions based on review of historical documents and prior reports.

Langan did not delete or deviate from the ASTM E1527-21 guidelines during this Phase I ESA.

## 1.5 Data Gaps

Data gaps, if encountered, are discussed throughout the report. Significant data gaps, if any, are summarized in Section 5.0.

# 2. SUBJECT PROPERTY DESCRIPTION AND CURRENT USE

The following sections describe the subject property location, ownership, physical setting, and current layout and operations.

## 2.1 Location, Legal Description, and Ownership

The about 5.6-acre subject property is identified on the Bronx Borough Tax Map as Block 3247, Lot 10. Alternative addresses for the subject property include 29 West Kingsbridge Road. The subject property is at the center of the city block bound by West 195th Street to the north, Jerome Avenue and an elevated New York City Transit (NYCT) structure (4 Train) to the east, West Kingsbridge Road to the south and Reservoir Avenue to the west. The subject property is owned by the New York City Economic Development Corporation.

## 2.2 Physical Setting

The physical setting that includes the geologic, hydrogeologic, hydrologic, and topographic characteristics of the subject property and surrounding area is discussed below.

### *2.2.1 Topography*

The 2023 USGS 7.5-minute quadrangle topographic map for Central Park, New York depicts the subject property at an elevation of approximately 135 feet above mean sea level (amsl). The regional topography slopes downward toward the southwest and the Harlem River, which is located about 0.59 miles from the subject property.

### *2.2.2 Geology*

According to previous geotechnical and environmental reports prepared for the subject property, the subject property is underlain by non-native fill, consisting of coarse- to fine-grained sand with silt, gravel, brick, and rock, to depths ranging from about 6 to 25 feet below grade surface (bgs). The non-native fill is underlain by silty sand, which varies in thickness from about 3 to 37 feet. Decomposed rock and bedrock consisting of gray mica gneiss was encountered beneath the silty sand at depths between about 9 to 58 feet bgs.

Based on review of the USGS "Bedrock and engineering geologic maps of Bronx County and parts of New York and Queens Counties, New York (Baskerville, C.A., dated 1992)", the subject property is underlain by quartz, plagioclase, and biotite and is part of the Fordham Gneiss geologic unit.

### *2.2.3 Hydrogeology*

Surface water bodies are not present within the boundary of the subject property. The nearest surface water body is the Harlem River, which is located about 0.59 miles to the southwest. Groundwater flow is typically hydraulically influenced, as shallow groundwater tends to originate in areas of topographic highs and flow toward areas of topographic lows, such as rivers, stream valleys, ponds, and wetlands. A broader, interconnected hydrogeologic network often governs groundwater flow at depth or in the bedrock aquifer. Groundwater depth and flow direction are also subject to hydrogeologic and anthropogenic variables such as precipitation, evaporation, extent of vegetative cover, and extent of impervious cover. Other factors influencing groundwater include depth to bedrock, the presence of artificial fill, and variability in local geology and groundwater sources or sinks.

Based on previous environmental and geotechnical reports for the subject property, groundwater was encountered throughout the subject property at depths ranging from about 9 to 30 feet bgs throughout the subject property and is inferred to flow to the southwest.

## 2.3 Subject Property Description

The about 5.6-acre subject property is identified on the Bronx Borough Tax Map as Block 3247, Lot 10 and is developed with an approximately 200,000-square-foot, multi-story military facility (armory building) on the majority of the property. The remainder of the subject property comprises access roadways, concrete and asphalt-paved areas, and landscaped areas to the north, west and south of the building.

The interior of the armory building consists of a central drill hall at ground level with an arched framing roof that extends about 110 feet above the floor of the drill hall. Beneath the drill hall are two cellar levels which formerly included offices, a garage and vehicle storage area, a gymnasium, rifle and pistol ranges, and other ancillary rooms. In the southern part of the building, a crawl space is present at the sub-cellar level. Above the drill hall there are four, five-story towers in the southern part of the building, which previously contained offices and residential quarters.

A Subject Property Layout Map is provided in Figure 2 of Appendix A. Photographs of the subject property and a checklist documenting Langan's observations relative to the features, activities, uses, and conditions outlined in Section 9.4 of ASTM E1527-21 are provided in Appendix C.

## 2.4 Subject Property Current Use

The subject property is primarily vacant and is periodically used for the parking of New York City graffiti removal vehicles and for occasional events held within the central drill hall.

The following table summarizes subject property utility providers.

**Table 2-1 Utility Providers**

| Utility | Providers |
|---|---|
| Electricity | Consolidated Edison (Con Edison) |
| Natural gas | National Grid |
| Water | New York City |
| Sewer | New York City |

## 2.5 Hazardous Substances and Petroleum Products

Hazardous substances and petroleum products were observed at the subject property. The products appeared to have been stored at the subject property over a long period of time with no current use of the products observed. Staining was observed on the concrete building slab in localized areas throughout the drill hall in the northeastern part of the subject property building and in the former vehicle storage area in the northern part the building. The concrete slab was observed to be in good condition; therefore, the staining is considered de minimis.

### *2.5.1 Underground Storage Tanks (USTs)*

Langan did not observe any USTs at the subject property; however, a fill port was observed to the north of the subject property building.

Historical presence of USTs at the subject property are discussed further in Sections 3.2 and 3.3.

### *2.5.2 Aboveground Storage Tanks (ASTs)*

Langan observed two approximately 275-gallon ASTs in the central part of the drill hall and the southwestern part of the cellar. The ASTs did not appear to be in use or connected to piping, and both were observed to be on their side. Petroleum-like staining, with no odors, was observed on construction debris next to the AST observed in the southwestern part of the subject property building. The ASTs observed, along with staining on concrete debris in the vicinity of the one AST is considered a REC.

Historical ASTs at the subject property are discussed further in Sections 3.2 and 3.3.

### *2.5.3 Drums, Totes, and Intermediate Bulk Containers*

Langan observed seven 55-gallon drums at the subject property, as noted below;

- Two drums containing an unknown oil were observed in the garage in the southeastern part of the building
- One drum containing soil was observed on the drill floor in the central part of the building
- Two drums containing soil were observed in the cellar in the northern part of the building
- One drum containing purged groundwater was observed in the cellar in the northern part of the building
- One drum containing soil was observed in the northern part of the subject property, along the exterior wall of the building

The drums located inside the armory building appeared to be in good condition with no staining or odors observed. The drum observed along the northern exterior of the armory building appeared to be in poor condition and had a hole in the side. No staining or odors were observed in the vicinity of the drum. The drums observed at the subject property are considered a BER, as disposal of the drums off-site may result in cost premiums for special handling of the drums and their contents.

### *2.5.4 Other Chemical Storage, Containers, or Equipment*

Langan observed three 5-gallon buckets and a locked storage cabinet containing unknown substances at the subject property. The buckets and locker appeared to be in good condition with no indication of a release.

## 2.6 Air Emissions

Potential sources of significant air emissions were not observed at the subject property.

## 2.7 Waste Management

The following sections describe current hazardous and non-hazardous waste streams, and observations of fill areas or other solid waste throughout the subject property.

### *2.7.1 Hazardous Waste*

Langan did not observe hazardous waste generation at the subject property.

### *2.7.2 Non-Hazardous Waste*

Langan observed multiple vacant rooms throughout the armory building that were filled with construction debris and miscellaneous trash, including plastic sheeting, cardboard boxes, and a room that contained several opened bags of salt crystals.

### *2.7.3 Fill Areas or Solid Waste*

Langan did not observe areas that were apparently filled or graded by non-natural causes (or filled with material of unknown origin) that suggest the presence of garbage, construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting solid waste disposal. The documented presence of non-native fill at the subject property is discussed further in Sections 2.2.2 and 3.3.

Langan observed soil stockpiled around a previously excavated test pit in the vehicle storage area in the cellar, located in the western part of the subject property building.

During the site reconnaissance, Langan observed suspected asbestos-containing materials (ACM) and hazardous building materials throughout the interior of the armory building. ACM and hazardous building materials surveys were conducted at the subject property in 2000, 2008, and 2019. Based on previous reports for the surveys conducted, ACM, assumed ACM, lead containing paint (LCP), and universal/hazardous waste articles were identified within the subject property building.

ACM, assumed ACM, and LCP were identified throughout the majority of the interior of the armory building. Universal and hazardous waste articles identified during the surveys included fluorescent light ballasts, fluorescent light bulbs, MEC thermostat, high intensity discharge (HID), mercury containing equipment, batteries, and miscellaneous chemicals. Previous reports summarizing the ACM and hazardous building materials surveys are discussed further in Section 3.3. The presence of ACM, LCP, and hazardous building materials is considered a BER.

## 2.8 Wastewater

Langan did not observe wastewater processes at the subject property. Langan did not observe or identify evidence of septic systems or cesspools at the subject property.

Langan observed two monitoring wells in the vehicle storage area in the northern and northwestern parts of the building and one groundwater monitoring well installed to the north of the subject property building.

## 2.9 Storm Water

Storm water at the subject property percolates through pervious areas or sheet flows to the adjoining roadways into the city sewer system. Langan did not observe evidence of impact (e.g., sheens, staining) to storm water pathways.

# 3. SUBJECT PROPERTY HISTORY AND RECORDS REVIEW

The following sections provide summaries of the historical uses of the subject property, and available information regarding documented environmental conditions associated with the historical uses.

## 3.1 Historical Summary

Langan compiled the following summary of the subject property history based on a review of readily available and reasonably ascertainable sources and interviews. Historical resources are provided in Appendix E.

**Table 3-1 Subject Property History**

| Time Period | Historical Discussion |
|---|---|
| Late 1800s – Present | As early as 1896, Sanborn maps depict the subject property developed as part of the Jerome Park Reservoir. By 1912, construction of the present-day Bronx Kingsbridge Armory building began with construction evident on the 1914 Sanborn map. Construction was completed in 1917 and the subject property has remained in a similar configuration through present day. The armory building was operated by the New York National Guard 258th Field Artillery Unit from construction until 1996, when ownership of the subject property was reportedly released back to New York City. The New York National Guard operations at the subject property included a drill hall, office rooms, work shops, a theater and lecture hall, a gymnasium, a bowling alley, rifle and pistol ranges, and below-grade parking and vehicle storage areas.<br><br>A portion of the subject property was occupied by the New York City Community Assistance Unit, Anti-Graffiti Task Force for parking and office space from about 1984 through the early 2000s. Since the 2010s, the armory building and subject property have been primarily vacant with the exception of periodic use of the subject property for the parking of New York City graffiti removal vehicles and occasional events held in the central drill hall.<br><br>Based on NYCDOB records, the subject property building has a landmark status. |

The historical use of the subject property as an armory, including operation of a drill hall, bowling alley, rifle and pistol ranges, and below-grade parking and vehicle storage areas, from at least 1917 through 1996, is considered a REC.

Environmental concerns related to historical operations at the subject property are discussed further in Sections 3.2 and 3.3.

## 3.2 Regulatory Database Review

The subject property is identified in the New York City Land Use, E-Designation, Manifest, Resource Conservation and Recovery Act (RCRA), UST Finder Release, NY SPILLS, Leaking Underground Storage Tanks (LTANKS), Facility Index System (FINDS), and Enforcement and Compliance History Online (ECHO) databases. These listings relate to the historical use and operation of the subject property. The environmental database report is attached as Appendix F.

The subject property is listed at 1 West Kingsbridge Road in the New York City Land Use database in relation to a lot apportionment in 2014. Based on this database listing and previous

reports, the subject property was initially part of Tax Block 3247, Lot 2 (29 West Kingsbridge Road) along with the northern adjoining property, prior to the lots being subdivided into the present-day Block 3247, Lots 2 and 10.

The subject property is also identified under Tax Block 3247, Lot 10 in the E-Designation database for hazmat environmental restrictions. The E-Designation for the subject property is considered a BER, as it requires investigation and remediation of the subject property in coordination with the New York City Office of Environmental Remediation (NYC OER) before the property can be redeveloped.

The subject property is identified in the RCRA Non-Generator/No Longer Registered (NonGen/NLR) database at 29 West Kingsbridge Road under USEPA IDs NYR000183046 (Kingsbridge Armory), NYD981482979 (NYS DMNA OMS # 31) and NYD981141294 (NYS DMNA OMS #30). The property is listed as a large quantity generator (LQG) in 1985 and 1986 and a NonGen in 1995, 1999, 2006, and 2007. Waste types include ignitable waste (D001) and not defined waste (X001). The subject property is listed in the NY Manifest database for the off-site disposal of ignitable waste, corrosive waste, spent halogenated and nonhalogenated solvents, and lead in 1991, 1992, 1993, 1994, and 1995. No violations were identified in relation to the generator and disposal activities at the subject property.

FINDS and ECHO database listings are related to the RCRA listings and generation and disposal of hazardous waste.

The subject property is identified in the UST Finder Release, NY SPILLS, and LTANKS databases in relation to the following spill numbers.

- NYSDEC Spill No. 8802461 was reported in 1988 in relation to a failed tightness test for a No. 2 fuel oil UST. Based on the database listing, the remaining seven USTs at the subject property were scheduled to be removed in August 2004. No contamination was identified as a result of the tank tightness test failure; therefore, the spill was closed on 10 August 2004. Additional documentation and details were not available for review.
- NYSDEC Spill No. 9211568 was reported at the subject property in January 1993 related to contaminated soil observed following the removal of a diesel UST and associated piping. Based on the database listing, nine drums were filled with residual product and wastewater from the UST. The nine drums were reportedly disposed of off-site, along with a total of 7 cubic yards of petroleum-contaminated soil. The spill case was closed by NYSDEC on 28 March 2005 with a note to refer to Spill No. 9308016 for tracking. Additional documentation and details were not available for review; Spill No. 9308016 is detailed further below.
- NYSDEC Spill No. 9308016 was reported in October 1993 in relation to contaminated soil observed during the removal of a diesel UST. Based on the database listings, the spill appears to be associated with the previous Spill No. 9211568 reported at the subject property in January 1993. The database listing notes that the two spills were consolidated in 2005 and that limited information is known about the spills and related remediation activities. A total of 100 cubic yards of stockpiled, petroleum-contaminated soil is noted to have been disposed of off-site in relation to the spill. The spill was closed on 3 June 2008 with a note in the database that the NYSDEC closed the spill based on the assumption that natural attenuation would have modified the original spill since reported in 1993. Additional documentation and details were not available for review.

The following database listings are mapped within the subject property boundary and identified at 2727 Jerome Avenue which is an alternative address for the northern adjoining property; RCRA Very Small Quantity Generator (VSQG), Manifest, FINDS, and ECHO databases. Based on the dates reported in the database listings and the subdivision of the subject property and northern adjoining tax lots in 2014, there is potential for these listings to have been associated with the subject property.

The subject property is identified in the RCRA VSQG database under USEPA ID NYR000096883 (NYC EDC Kingsbridge Armory) and is listed as a small quantity generator (SQG) in 2001, a LQG in 2002, a VSQG in 2006 and 2007. Waste types include lead (D008) with NAICS descriptions identified as 'Remediation Services'. The subject property was listed at 2727 Jerome Avenue for the off-site disposal of lead in 2001 and 2003. No violations were identified in association with the generation and disposal activities. FINDS and ECHO database listings are related to the RCRA listing and generation and disposal of hazardous waste.

The historical operation of the subject property as an armory, including the generation and disposal of hazardous wastes and petroleum bulk storage and use at the subject property which have been associated with several documented spills and/or releases of petroleum products, is considered a REC.

## 3.3 Prior Report Review

Previous reports for the subject property include a 2000 Environmental Survey Report (prepared by ATC), a 2006 Phase I ESA (prepared by M&E), a 2007 Phase II Environmental Site Assessment (prepared by TRC Environmental Corporation), and a 2008 Phase II Environmental Site Investigation (ESI), 2008 Geotechnical Investigation, 2008 Asbestos Investigation Report, 2009 Supplemental Groundwater Investigation, 2013 Phase II ESI, and 2019 Limited Hazardous Building Materials Survey Report prepared by Langan. The reports are referenced in Section 7 and copies of the reports are included in Appendix B. Information relevant to the subject property is summarized below.

*September 2006 Phase I ESA*

A Phase I ESA was prepared by M&E for the subject property and the northern adjoining property in September 2006. At the time of site reconnaissance, the armory building at the subject property was vacant. The September 2006 Phase I ESA identified two potential RECs and one BER. The RECs were associated with: 1) historical subject property operations; and 2) deteriorating 55-gallon drums in a vehicle storage area. The BER was related to the documented presence of asbestos-containing materials and lead-based paint at the subject property, identified in a previous Environmental Survey Report prepared by ET Environmental in September 2000.

*ACM and Hazardous Building Materials Surveys*

ACM and hazardous building materials surveys were conducted at the subject property in 2000, 2008, and 2019. Based on previous reports for the surveys conducted, ACM, assumed ACM, LCP, and universal/hazardous waste articles identified within the subject property building.

ACM, assumed ACM and LCP were identified throughout the majority of the interior of the armory building. Universal and hazardous waste articles identified during the surveys included fluorescent light ballasts, fluorescent light bulbs, MEC thermostat, high intensity discharge (HID), mercury containing equipment, batteries, and miscellaneous chemicals. The presence of ACM, LCP, and hazardous building materials is considered a BER.

The 2000 environmental survey of the building also identified four USTs based on the observations of fill ports and vent pipes throughout the subject property; one in the western parking area, two USTs associated with the maintenance garage, and one UST associated with the heating plant of the National Guard office and garage. The survey also identified seven additional 275-gallon ASTs in the basement southeast hallway opposite the shooting ranges. The contents of these ASTs were unknown, with the tanks reportedly not included in the Petroleum Bulk Storage (PBS) listing for the property.

*Previous Site Investigations*

Previous investigations were conducted at the subject property between 2007 and 2013 and included geophysical surveys, advancement of soil borings and test pits, the installation of groundwater monitoring wells and soil vapor points, and collection of soil, groundwater, and soil vapor samples throughout the subject property and the northern adjoining property. Results observed within the subject property boundaries are summarized below.

Geophysical surveys at the subject property identified an abandoned fill port and vent pipe along the western exterior of the armory building and a 30-foot-long by 30-foot-wide anomaly indicative of a potential UST along the western exterior of the armory building in 2000.

Non-native fill, primarily consisting of coarse- to fine-grained sand with silt, gravel, brick, concrete and weathered rock, was observed in soil borings and test pits to depths ranging from about 6 to 20 feet bgs. The fill layer was underlain by silty sands, followed by weathered rock and bedrock. Groundwater was encountered at depths between about 9 and 30 feet bgs.

Soil samples were collected from surface grade to depths up to 34 feet bgs. Analytical results from the previous soil samples are summarized below.

- Two volatile organic compounds (VOCs), acetone and methylene chloride, were detected in soil samples at concentrations above the NYSDEC Part 375 Protection of Groundwater (PGW) Soil Cleanup Objectives (SCOs) in soil samples.
- Eight semivolatile organic compounds (SVOCs), including benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, dibenzo(a,h)anthracene, indeno(1,2,3-cd)pyrene, and phenanthene, were detected in soil samples at concentrations above the PGW and/or Restricted Use Commercial (RUC) SCOs.
- Two metals, barium and total chromium were detected in soil samples at concentrations above the PGW and RUC SCOs.
- Total lead was detected in soil samples at concentrations above the PGW and RUC SCOs in samples collected within the former rifle and pistol ranges in the armory building.
- Soil samples from within the rifle and pistol ranges in the armory building were also analyzed for the Toxicity Characteristic Leaching Procedure (TCLP) for lead. These samples identified lead at hazardous concentrations in soil at a maximum of 1,900 milligrams per liter (mg/L).

Analytical results from the previous groundwater samples are summarized below.

- Six VOCs, including 1,2,4-trimethylbenzene, benzene, ethylbenzene, isopropylbenzene, methylene chloride, and n-propylbenzene, were detected in groundwater samples at concentrations exceeding the NYSDEC Technical and Operational Guidance Series

(TOGS) 1.1.1. Ambient Water Quality Standards (AWQS) and Guidance Values (collectively referred to as the NYSDEC SGVs).

- Three SVOCs, hexachlorobutadiene, naphthalene, and phenol, were detected in groundwater samples at concentrations above the NYSDEC SGVs.
- Three dissolved metals, including magnesium, manganese, and sodium, were detected at concentrations above the NYSDEC SGVs in groundwater samples.

Analytical results from the previous soil vapor samples are summarized below.

- Petroleum-related VOCs and chlorinated VOCs (CVOCs), including acetone, methylene chloride, n-heptane, n-hexane, tetrachloroethene (PCE), toluene, and trichloroethene (TCE), were detected in soil vapor samples.
- One VOC, TCE, was detected in one soil vapor sample at a concentration of 400 micrograms per cubic meter ($\mu g/m^3$), above the concentration for which mitigation is recommended when compared to the NYSDOH Decision Matrices.

The documented presence of contamination in soil, groundwater, and soil vapor at the subject property is considered a REC.

# 4. ADJOINING PROPERTIES AND SURROUNDING AREA

The following sections describe current and historical uses of and database listings for adjoining properties and the surrounding area.

## 4.1 Current Use of Adjoining Properties and Surrounding Area

The current use of adjoining and surrounding properties is summarized in Table 4-1.

**Table 4-1 Current Use of Adjoining Properties and Surrounding Area**

| Direction | Adjoining Properties | Surrounding Area |
|---|---|---|
| **North** | New York Army National Guard buildings (10 West 195th Street) | West 195th Street followed by schools and public institutions |
| **East** | Jerome Avenue and the Metropolitan Transportation Authority (MTA) 4 Train followed by mixed-use commercial and residential building (2700 Jerome Avenue) and a commercial and office building (1 East Kingsbridge Road) | Mixed-use commercial and residential buildings |
| **South** | West Kingsbridge Road followed by commercial and office buildings (2, 26, 40, and 50 West Kingsbridge Road, and 2650 Davidson Avenue) and open space (1690 Reservoir Avenue) | Residential, commercial, and institutional buildings |
| **West** | Reservoir Avenue followed by multi-family and one-family residential buildings (2745 and 2727 Reservoir Avenue), mixed-use commercial and residential buildings (2691 Reservoir Avenue and 2724 University Avenue), Fordham Manor Church (2703 Reservoir Avenue), and an auto repair shop, Armory Auto Parts & Repair, Inc. (2717 Reservoir Avenue) | Mixed-use commercial and residential, and institutional buildings |

Langan did not observe obvious conditions likely to represent environmental concerns for the subject property from current uses of adjoining or surrounding properties.

## 4.2 Adjoining Properties and Surrounding Area History

Langan compiled the following summaries of the adjoining properties and surrounding area history based on a review of historical resources and interviews. Historical resources are provided in Appendix E.

**Table 4-2 Historical Use of Adjoining Properties**

| Direction | Adjoining Properties |
|---|---|
| **North** | The northern-adjoining property was developed as part of the Jerome Park Reservoir as early as 1896 through 1900. By 1978, an armory garage building and a building containing lockers and classrooms are identified at the adjoining property. The buildings and northern adjoining property appear in a similar configuration to the present day.<br><br>Environmental concerns related to the historical use of the northern-adjoining property are further discussed in Section 4.3.1. |

| Direction | Adjoining Properties |
|---|---|
| **East** | The southernmost eastern-adjoining property was developed with a residential structure as early as 1896 through at least 1914. The northernmost eastern-adjoining property appears vacant until 1945. By 1945, a movie theater appears on the southernmost eastern-adjoining property and a two-story building containing storefronts and upholstery was developed, spanning both of the eastern-adjoining properties. A subway line (presently the MTA 4 Train) has operated parallel to Jerome Avenue from at least 1945 through present-day.<br><br>By 1977, the southernmost eastern-adjoining property was depicted with a parking lot and a commercial retail store. A parking lot was developed in the northern portion of the northernmost eastern-adjoining property by 1981.<br><br>The eastern-adjoining properties appear in a similar configuration through 2007. From 2007 to present-day, the southernmost eastern-adjoining property was occupied by a grocery store and a parking lot on aerial imagery. From 2007 to 2014, a vacant one-story building appeared at the northernmost eastern-adjoining property. The building was razed by 2016, under construction in 2017, and redeveloped with a multi-use residential building through present-day.<br><br>Environmental concerns related to the historical use of the eastern-adjoining properties are further discussed in Section 4.3.1. |
| **South** | The southern-adjoining properties across West Kingsbridge Road appeared primarily undeveloped through 1914, with the exception of one small office building. By 1945 through present-day, these properties were redeveloped with several commercial buildings. A filling station and auto repair shop was developed at 2650 Davidson Avenue from at least 1945 through 2007. An auto repair shop and dry cleaner were identified at 40 West Kingsbridge Road between 1945 and 1950. Additional occupants at 40 West Kingsbridge Road included a glass works facility from 1977 to 1992.<br><br>Environmental concerns related to the historical use of the southern-adjoining properties are further discussed in Section 4.3.1. |
| **West** | The southernmost western-adjoining properties across Reservoir Avenue were developed as a cemetery, church, and a two-story dwelling as early as 1896. The cemetery is no longer identified by 1900. The additional western-adjoining properties appear undeveloped through 1945. By 1950, the western-adjoining properties appear in a similar configuration to the present day and are occupied by multi-family residential and commercial buildings, a church, and an auto garage with underground storage tanks. By 1984, the garage at 2717 Reservoir Avenue is also identified as a filling station with three 550-gallon USTs through present-day.<br><br>Environmental concerns related to the historical use of the western adjoining properties are further discussed in Section 4.3.1. |

The surrounding area was developed with residential, commercial, and institutional uses from the 1890s to present day. Historical operations at surrounding area properties have included schools, offices, parking, and residential properties.

Potential environmental concerns associated with historical operations at adjoining and nearby properties are further discussed in Section 4.3 below.

## 4.3 Regulatory Database Review

Langan reviewed the environmental database report to evaluate if adjoining or surrounding area properties identified in the database report are suspected to represent an environmental concern for the subject property (see Section 8.2). Langan did not consider request and review of the associated regulatory agency files necessary to evaluate potential RECs for the subject property unless discussed in Section 4.3.1 or 4.3.2 below.

### *4.3.1 Adjoining Properties*

Database listings for adjoining properties are summarized as follows.

NYS Armory – 10 West 195th Street (northern adjoining, up-gradient)

This facility was identified on UST, UST Finder, AST databases as 'NYS Armory' under PBS Site No. 2-392014. The facility is identified as unregulated/closed and historically operated five USTs and two ASTs, all of which have been reported as closed and removed, as detailed below.

- One 3,000-gallon diesel UST (closed and removed in September 1993);
- One 2,000 gallon gasoline UST (closed and removed in September 1993);
- One 2,000-gallon No. 2 fuel oil UST (closed and removed at an unknown date);
- One 8,000-gallon No. 2 fuel oil UST (closed and removed in January 1999);
- One 225-gallon gasoline UST (closed and removed in May 1995);
- One 225-gallon diesel AST (closed and removed with no date reported); and
- One 275-gallon AST with a product identified as 'other' (closed and removed with no date reported).

Based on a review of previous reports and historical association of the northern adjoining property with the subject property and its operation as an armory, there is potential for the USTs and ASTs identified within these database listings to have been present and operated within the subject property boundaries. Based on the association with the subject property and lack of closure documentation, these PBS database listings at the northern adjoining property are considered a REC.

Mullahoran Auto Diagnostic – 2704 Jerome Avenue (eastern adjoining, up- to cross-gradient)

This facility was identified on the EDR Historical Automotive database for use as a general automotive repair shop from at least 1985 through 1997.

Based on the proximity and up- to cross-gradient location from the subject property, inadvertent releases of petroleum products or hazardous substances associated with continued operations as an auto repair and gasoline storage facility may have impacted soil or groundwater at the subject property; therefore, this listing is considered a REC.

Parkash 2691 LLC/Sidan Carpet Service – 2691 Reservoir Avenue (western adjoining, down-gradient)

This facility was identified on the EDR Historical Cleaner and AST databases. The EDR Historical Database states that the facility was used as a drycleaners from at least 1994 through 1998. No releases or violations were reported for this facility.

The AST database states that a 5,000-gallon #2 fuel oil AST operates at this property with an active permit that expires 16 March 2026. Based on the down-gradient location and lack of

reported releases or violations, these listings are not considered an environmental concern for the subject property.

Reservoir Service Station Inc. – 2717 Reservoir Avenue (western adjoining, cross- to down-gradient)

This facility was identified on the EDR Historical Automotive, UST Finder, UST, NY SPILLS, and NYC Land Use databases.

The facility was identified in the EDR Historical Automotive database as a gasoline station from at least 1969 through 1989 and as a general automative repair shop from at least 1996 through 2014. The facility is identified in the UST and UST Finder databases in association with nine 550-gallon gasoline USTs that are identified as having been converted to non-regulated use.

NYSDEC Spill No. 9504140 was reported at the facility in relation to a report that the facility was not storing waste on site and was instead disposing of the waste down drains at the property. The spill was closed on 6 July 1995; additional information and details were not available for review.

Based on the proximity to the subject property and historical operation of the facility as a filling station and automotive repair shop with documented releases to the subsurface, this facility is considered a REC.

Numerous Con Edison and New York City Transit spills, RCRA, and manifest listings are identified within the adjoining roadways to the subject property. Based on the nature and extent of the spills and activities reported, these listings are not considered a REC.

An additional LTANKS database listing is mapped within Reservoir Avenue; however, based on database details, this listing is associated with 2521 Grand Avenue and is mapped incorrectly.

### *4.3.2 Surrounding Area*

Langan evaluated each of the database listings for surrounding area properties (see Section 8.2). The surrounding properties identified in the regulatory databases searched by EDR did not warrant further discussion based on the distance and direction from subject property and the nature of the listings.

# 5. CONCLUSIONS, FINDINGS AND OPINIONS

Langan completed a Phase I ESA consistent with the scope and limitations of ASTM E1527-21 for the subject property at 1 West Kingsbridge Road, Bronx, New York. Exceptions to, or deletions from ASTM E1527-21 are described in Section 8 of this report.

This assessment has revealed the following RECs, CRECs, HRECs, de minimis conditions, and significant data gaps in connection with the subject property as presented in Table 5-1.

**Table 5-1 Conclusions, Findings and Opinions**

| **ASTM E1527-21 Scope Items** |
|---|
| **Recognized Environmental Conditions (RECs)** |
| *Historical Operations and Documented Contamination at the Subject Property:* The subject property was historically operated by the New York National Guard 258th Field Artillery Unit from about 1917 through 1996. Operations of the armory building included a drill hall, office rooms, work shops, a theater and lecture hall, former gymnasium, former bowling alley, rifle and pistol ranges, and below-grade parking and vehicle storage areas. Historic operations also included the generation and disposal of hazardous wastes, such as ignitable and corrosive wastes, lead, and spent halogenated and nonhalogenated solvents and petroleum bulk storage and use at the subject property with documented spills and releases of petroleum products for which closure documentation was not available.<br><br>Several investigations were completed at the subject property between 2007 and 2013. These investigations identified impacts at the subject property related to the historical operations, including VOCs, SVOCs, and metals in soil and groundwater at concentrations above the applicable regulatory criteria. Soil samples also identified lead at hazardous concentrations within the armory building. Petroleum-related VOCs and CVOCs were also detected in soil vapor samples throughout the subject property, with one VOC, TCE, detected at a concentration for which mitigation is recommended. The historical operation of the subject property and documented impacts to the subsurface are considered a REC. |
| *Aboveground Storage Tanks at the Subject Property:* During the site reconnaissance, Langan observed two about 275-gallon ASTs, with petroleum-like staining observed on the construction debris in the vicinity of one of the ASTs. Langan also observed a fill port to the north of the subject property. The presence of petroleum bulk storage with staining observed on construction debris in the vicinity of one of the ASTs is considered a REC. |
| *Historical Use of Adjoining Properties:* The eastern adjoining property at 2704 Jerome Avenue and the western adjoining property at 2717 Reservoir Avenue were identified in the EDR Historical Automotive database for use as an automotive repair shop from at least 1985 through 1997 and from at least 1996 through 2014, respectively. The western adjoining property was also identified as a gasoline station from at least 1969 to 1989 with a reported spill documenting releases to the subsurface.<br><br>In addition, the southern adjoining property at 40 West Kingsbridge Road and the western adjoining property at 2691 Reservoir Avenue were identified in historical records and databases as dry cleaners in 1950 and from at least 1994 through 1998, respectively.<br><br>Based on the proximity and up- to cross-gradient location to the subject property the historical use of these adjoining properties is considered a REC, as inadvertent releases of petroleum products or hazardous substances associated with auto repair, gasoline storage, and dry cleaning operations may have impacted soil or groundwater at the subject property. |

| **ASTM E1527-21 Scope Items** |
|---|
| **Controlled Recognized Environmental Conditions (CRECs)** |
| Langan did not identify CRECs. |
| **Historical Recognized Environmental Conditions (HRECs)** |
| Langan did not identify HRECs. |
| **De Minimis Conditions** |
| *Interior Surface Staining:* During the site reconnaissance, areas of localized staining were observed on the concrete slab throughout the vehicle storage area in the northern part of the armory building. The concrete slab appeared to be in good condition and the staining did not extend across any cracks or floor drains within the building. |
| **Significant Data Gaps** |
| Langan did not identify significant data gaps |
| **Non-ASTM E1527-21 Scope Items** |
| **Business Environmental Risks (BERs)** |
| *E-Designation for the Subject Property:* The subject property (identified under Block 3247, Lot 10) is subject to an E-Designation for Hazardous Materials that was assigned as part of a rezoning action. The Hazardous Materials E-Designation will require that the subject property tax lot is investigated and remediated under jurisdiction of the NYC OER as part of any future site redevelopment. |
| *Drums at the Subject Property:* During the site reconnaissance, Langan observed several 55-gallon drums containing unknown oil and soil and groundwater presumably derived from previous investigations at the subject property. Removal of the drums from the subject property may result in cost premiums for special handling of the drums and their contents. |
| *Monitoring Wells at the Subject Property:* During the site reconnaissance, Langan observed three permanent groundwater monitoring wells at the subject property, presumably related to the previous investigations conducted at the subject property. Future development of the subject property may require the wells to be abandoned and closed in accordance with the NYSDEC well abandonment regulations. |
| *Asbestos-Containing, Lead Containing Paint, and Hazardous Building Materials:* Based on previous reports and hazardous building materials surveys conducted at the subject property in 2000, 2008, and 2019, ACM, LCP, and hazardous building materials have been identified within the subject property building. |

## 6. ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and I have the specific qualifications based on my education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Paul McMahon, PE
Associate Principal (Environmental Professional)

Resumes outlining the qualifications of the project team and the Environmental Professional are included in Appendix G.

# 8. LIMITATIONS AND DEFINITIONS

This Phase I ESA report was prepared for Client and is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. The Client is the sole intended beneficiary of the report. The user requested no special terms or conditions regarding this Phase I ESA.

Langan's scope of services, which is described in Section 1.2 and in the contract executed between Langan and the Client, was limited to that agreed to with the Client/user and no other services beyond those explicitly stated are implied. To the extent possible, the services performed and agreed upon for this Phase I ESA are consistent with the guidelines of ASTM E1527-21.

This report is not intended to be an exhaustive assessment of the subject property. The purpose of the Phase I ESA is to reduce uncertainty about unknown conditions at the subject property. No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a subject property. Therefore, Langan cannot "verify," "insure," "certify", or "guarantee" that the subject property is free of environmental concerns.

No expressed or implied representation or warranty is included or intended in this report, except that our services were completed using the care and skill ordinarily followed by professionals providing similar services under similar circumstances in similar locations at the same point in time.

The conclusions provided in this report are based solely on information obtained through completing the standard activities required by ASTM E1527-21 and are intended exclusively for the purpose stated herein, at the specified subject property, as it existed at the point in time the assessment was completed. The conclusions provided in this report do not apply to conditions and features of which Langan was not made aware of through good faith efforts to complete the activities required by ASTM E1527-21 and did not have the opportunity to evaluate.

## 8.1 ASTM Definitions

The following definitions are provided in ASTM E1527-21 and presented below for reference. This section is not a comprehensive list of definitions provided in ASTM E1527-21 and is intended to summarize those pertinent to this Phase I ESA report.

Activity and use limitations (AULs): legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effective-ness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

Adjoining properties: any real property or properties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

All Appropriate Inquiries: that inquiry constituting all appropriate inquiries into the previous ownership and uses of the subject property consistent with good commercial and customary practice as defined in CERCLA, 42 U.S.C.§ 9601(35)(B) and 40 C.F.R. Part 312, that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C. §§ 9601(35)(A) & (B), § 9607(b)(3), § 9607(q), and§ 9607(r)), assuming compliance with other elements of the defense.

Approximate minimum search distance: the area for which records must be obtained and reviewed pursuant to ASTM E1527-21 Section 8 subject to the limitations provided in that section. This may include areas outside the subject property and shall be measured from the nearest subject property boundary. This term is used in lieu of radius to include irregularly shaped properties.

Business environmental risk (BER): a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations.

Controlled recognized environmental condition (CREC): recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

Data gap: a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

De minimis condition: a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.

Engineering controls: physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on a property. Engineering controls are a type of activity and use limitation (AUL).

Environment: environment shall have the same meaning as the definition of environment in CERCLA 42 U.S.C. § 9601(8).

Historical recognized environmental condition (HREC): previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

Institutional controls (IC): a legal or administrative mechanism (for example, "deed restrictions," restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of activity and use limitation (AUL).

Key site manager: the person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the subject property.

Material threat: obvious threat which is likely to lead to a release and that, in the opinion of the environmental professional, would likely result in impact to public health or the environment.

Obvious: that which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer.

Property use limitation: limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous sub-stances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria.

Reasonably ascertainable: information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

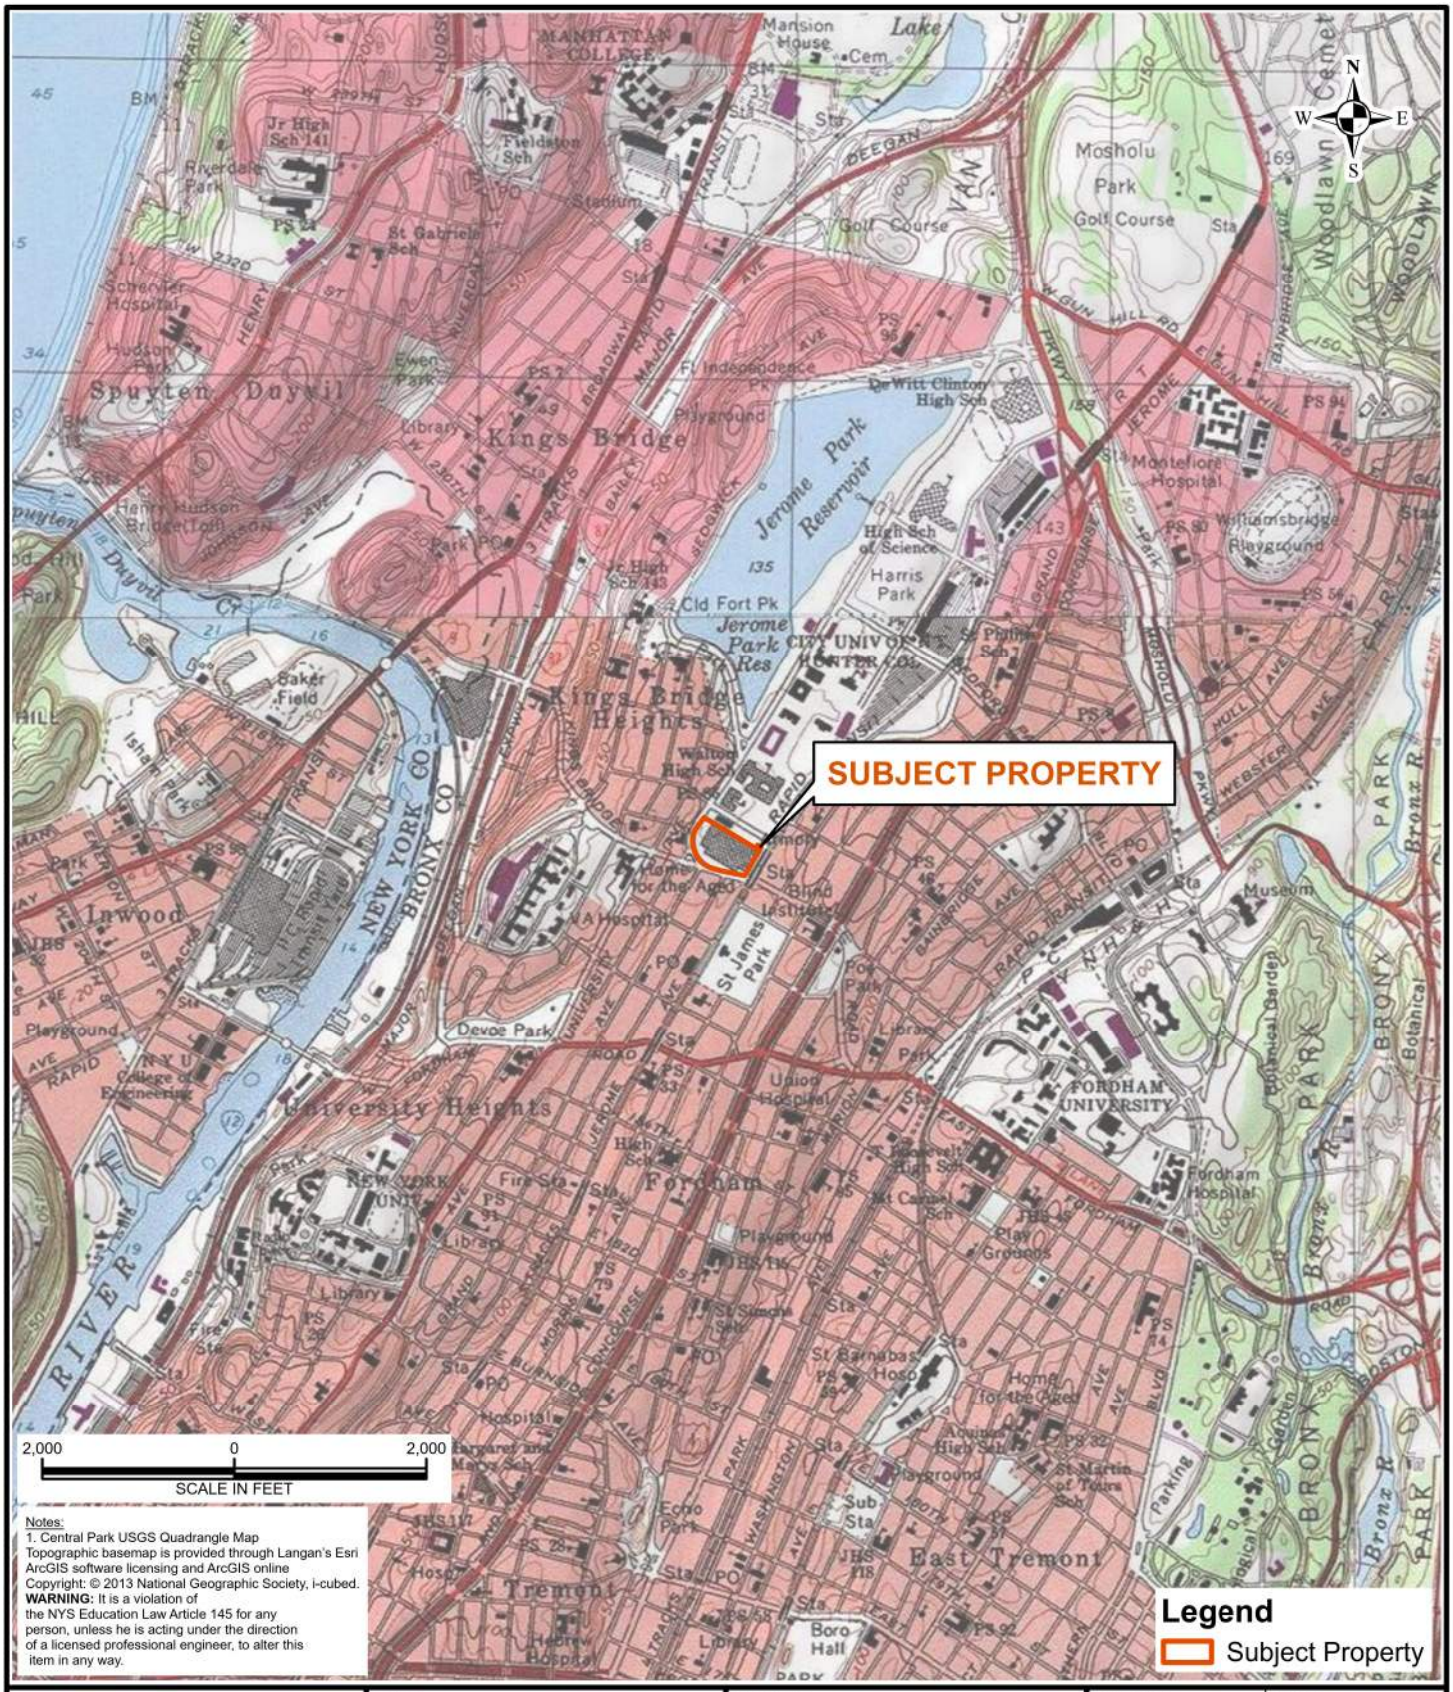
Recognized environmental conditions: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. For the purposes of this definition, "likely" is that which is neither certain nor proved, but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given therein.

Release: a release of any hazardous substance or petroleum product shall have the same meaning as the definition of "release" in CERCLA 42 U.S.C. § 9601(22). There are a number of statutory exclusions from the definition of release that may impact the environmental professional's opinions and conclusions, such as the normal application of fertilizer.

Significant data gap: a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

Site reconnaissance: that part that is contained in Section 9 of ASTM E1527-21 and addresses what should be done in connection with the site visit. The site reconnaissance includes, but is not limited to, the site visit done in connection with such a Phase I Environmental Site Assessment.

Site visit: the visit of the subject property during which observations are made constituting the site reconnaissance section of this practice.



Subject property: the property that is the subject of the environmental site assessment described in this practice.

User: the party seeking to use ASTM E1527-21 to complete an environmental site assessment of the subject property.

## 8.2 Standard Environmental Record Sources

Langan reviewed an environmental database search report prepared by an environmental database search provider for the subject property and surrounding area. The database search report includes a listing of properties identified on select federal, state, local and tribal standard source environmental databases within the approximate minimum search radii outlined in ASTM E1527-21. This information was supplied to Langan by the environmental database search provider, and to the environmental database search provider by government sources; therefore, neither Langan nor the environmental database search provider can verify the completeness and accuracy of the database information. Appendix F contains a copy of the report, with specific source and property descriptions, and the dates of the last update for each database searched. Langan reviewed the database search report on a record-by-record basis to evaluate if certain properties identified in the database report are likely to represent an environmental concern for the subject property. The evaluation criteria included factors such as distance, groundwater gradient, nature of the listing, and regulatory status. Unless specifically discussed in the body of this report, the facilities listed on the database do not appear to represent an environmental concern to the subject property.

**Bronx, New York 10468**

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above property, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The Subject Property spans about 8.85 acres and is improved with a New York State Militia armory building. The property is bound by a 2-story military building to the north, a 1-story retail and vacant building to the east, commercial retail properties to the south, and a church, commercial retail properties, and a multi-family residential building to the west. The subject property is identified by New York as Bronx Block 3247, Lot 10.

Please contact me at 518.755.6895 with any questions or send your response to my attention at msharp@langan.com or at the below address:

Langan Engineering and Environmental Services, D.P.C.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

# EXECUTIVE SUMMARY

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1927 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

## RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

## RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## TARGET PROPERTY INFORMATION

### ADDRESS

1 WEST KINGSBRIDGE ROAD
BRONX, NY 10468

### COORDINATES

| | |
|---|---|
| Latitude (North): | 40.8683820 - 40° 52' 6.17'' |
| Longitude (West): | 73.8983160 - 73° 53' 53.93'' |
| Universal Tranverse Mercator: | Zone 18 |
| UTM X (Meters): | 592840.7 |
| UTM Y (Meters): | 4524519.0 |
| Elevation: | 135 ft. above sea level |

***Exclusive Recovered Govt. Archives***

NY RGA HWS ---- Recovered Government Archive State Hazardous Waste Facilities List
NY RGA LF ---- Recovered Government Archive Solid Waste Facilities List

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/26/2025 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/30/2025 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

***Lists of state- and tribal hazardous waste facilities***

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 10/30/2025 has revealed that there are 5 NY SHWS sites within approximately 1 mile of the target property.

***Lists of state and tribal leaking storage tanks***

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 10/30/2025 has revealed that there are 70 NY LTANKS sites within approximately 0.5 miles of the target property.

***Lists of state and tribal registered storage tanks***

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 17 NY UST sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Records of Emergency Release Reports***

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 10/30/2025 has revealed that there are 24 NY Spills sites within approximately 0.125 miles of the target property.

***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that there are 91 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are

# EXECUTIVE SUMMARY

18 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 8 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 11/30/2025 has revealed that there are

# EXECUTIVE SUMMARY

58 E MANIFEST sites within approximately 0.25 miles of the target property.

NY PFAS: DEC surveyed select businesses, fire departments, fire training centers, bulk storage facilities, airports, and Department of Defense (DoD) facilities. The responses to the survey have helped to determine if these entities used or stored materials containing PFOA/PFOS including AFFF and dispersants used in Teflon coating operations. The results of this survey will be updated periodically as additional responses are received..

A review of the NY PFAS list, as provided by EDR, has revealed that there is 1 NY PFAS site within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

NY NYC OER: Properties remediated under OER's oversight, both in the E-Designation program and the NYC Voluntary Cleanup Program. Includes sites completed and in progress.

A review of the NY NYC OER list, as provided by EDR, and dated 11/20/2025 has revealed that there are 29 NY NYC OER sites within approximately 1 mile of the target property.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within

approximately 1 mile of the target property.

|---|---|---|---|---|
| CON EDISON - KINGSBR | BLOCK 3236, LOT 25 A | WSW 1/2 - 1 (0.692 mi.) | BZ593 | 1825 |

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 8 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

| DEC Memo: | Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 8/4/2004 Transferred from Sigona to Sangesland Heidi Gable of US Army Facilities received a mass mailing TTF letter about the open spill number. She says the last of 7 tanks on the site is being removed this month. There was no indication on the spill report about which tank failed. Sangesland asked her to gather all the info she has about tank closures on her site and a statement that says no contamination was found. 8/10/2004 Sangesland received a packet of info from Michael Friess, Director of Facilities Management at NYS Division of Military and Naval Affairs. Packet shows a series of tank tests over the years showing the tank in question has been passing. It also confirms that this is the last buried tank on site and that it is being removed this month by Tyree. No contamination has been found therefore the spill is being closed out. If contamination is found when the tank is pulled, Tyree will need to open another spill number. |

**29 WEST KINGSBRIDGE RD. (Continued)** **S102834179**

Remarks: TRIED TO PERFORM TANK TEST. TANK WAS FILL UP STUCK TANK - FOUND 4 OF WATER. 1 1/2 GALLON & LEVEL DROPPED 40.

| DEC Memo: | Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 10/10/95: This Is Additional Information About Material Spilled From The Translation Of The Old Spill File: Tank Removal.3/05/2003 - Closed Due To The Nature / Extent Of The Spill Report02/20/04 - Transfered From Sullivan To Tibbe. Spill Reopened Because A File Exists. 3/28/05 - also see spill 9211568. - KST Spill reassigned to Perez in June 2005 as part of the Spills Closure Initiative. 08/05/2005 - Called Mr. Mike Bullock (Petro Envir), the phone number is not longer in service. 10/05/2005 - According with Mr. William Knox(US ARMY) the armory was released to the City of New York in 1996 and the NYCDEP (718) 595-4784, handled the environmental issues at the site. As of today, 01/06/2006, no contact have been found for the site. Perez. 01/06/2006 - Next steps, Regional staff should contact the NYC Economic Development Corporation (site managers) at (888) NYC-0100, (212) 312-3600 or (212) 619-500 (operator). Scheduled a site visit/inspection. Perez. Spill transferred back to R-2 3/7/08 - Austin - Assigned to Ketani for further investigation - end 5/28/08 - Raphael Ketani. The spill happened on 10/1/93. Stockpiled diesel contaminated soil was removed. There's no PBS for the tank and no E-docs. There is no paper file. I tried to check the ownership of the site. According to Property Shark, the main address is 2671 Jerome Avenue. The alternate addresses are: 1 to 29 West Kingsbridge Road, 2 to 50 West 195 Street, 2671 to 2727 Jerome Avenue. The block and lot are 3247/0002. Notes in this database indicate that they switched to gas. ACRIS showed ownership as the Landmarks Preservation Commission. I called up William Nealy, Asst. Director of the Division of Preservation (212) 669-7824, but could only leave a message. I called up Gina Santucci, Dir. of Environmental Review at the LPC and she told me that they didn't own the site, but merely registered it. I tried calling up the DEP phone number above, their |

**29 WEST KINGSBRIDGE RD. (Continued)** **S102834179**

(212) 689-1520 number, and
their (718) 595-4646 number, but no one could locate the spill, nor
the existence of any documents
relating to the spill. They said they will call me back if they find
anything. 5/29/08 - Raphael
Ketani. I made an unannounced site visit. The Kingsbridge Armory takes
up an entire city block. The
south, west, and north sides are closed by a chainlink fence. There is
a school aross the street to
the north. I entered through the recruiting office entrance and met
Mary Gather who was in charge
of maintenance at the site, but who is not the super. I asked her
whether she knew where the spill
took place. She said she has been here for only 2 years and never
heard of or dealt with a spill at
the armory. She gave me the name of Orlando Pinnock (cell (518)
275-8757). He is the super. for the
Harlem and Kingsbridge armories. I called up Mr. Pinnock and asked him
whether he had heard about
the spill or whether he knew of any documentation regarding the spill
and cleanup. He said he has
been the super. for only 1 year. He said that if I call him back on
monday, 6/2/08, then he will be
able to give me the name of someone who might know. 6/2/08 - Raphael
Ketani. I talked to Mr.
Pinnock. He said he didn't know whether any information was available
regarding the spill. He said
he didn't know about the spill either. He will contact his people in
Albany and get back to me.
Heidi Unwin of the Division of Military and Naval Affairs (518)
786-4347 called and left a message
that she needed the spill number in order to located the records in
her office. I tried to contact
her, but could only leave a message with the spill number. 6/3/08 -
Raphael Ketani. I spoke to Ms.
Unwin, Environmental Specialist with the DMNA. She said that she
looked for the records, but can't
find anything. She said that her bureau owns the armories and
maintains them for the National
Guard. However, there are only records for a 1999 and 2004 spill. As
the NYC DEP and the Division
of Military and Naval Affairs do not have any records of the spill, as
no one at the site knows
where the spill took place, as the few notes indicated that soil was
removed, as 16 years have gone
by since the spill with natural attenuation modifying the original
spill, and as the site is in use
with no known adverse affects to the public, I am closing the spill
case.

Remarks: STOCK PILED 100 YDS OF SOIL PUT PDY OVER IT. WILL REMOVE OFF SITE WHEN LAB RESULTS COME BACK.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

| DEC Memo: | Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 9/17/02 TJD Overfill caused spill. Petro satates toatal of 3 gallons spilled from vent pipe. All impacts are outside residence. Left message for property owner to call back. Property owner: Hop & Hung Lam (718)562 3679 9/20/02 TJD Site inspected by Demeo. 10 x 15 foot area in front yard was impacted by spill. Contaminated soils were removed by Milro. Demeo spoke with Paul Basso 9/18 and required endpoint samples as spill volume is estimated at approximately 20 gallons. At time of inspection soils had been removed and area was backfilled and reseeded. Awaiting analytical results. 12/27/02 TJD Closure report from Milro reviewed. Endpoint samples below TAGM. Spill closed. |
| Remarks: | appears to be an overfill from the vent pipe. cleanup in progress by petro. |

DEC Memo: EMIS 269226 1/4/19 - Sekhon Construction Mgmt Electric Inspector J. Gregory 00755 reported while on location to excavate for an electric service he discovered 1 gallon of unknown oil found in the soil. Pcb, oil id, and flashpoint samples will be taken and the location will be secured until cleanup and removal of the soil is performed. Spill was cleaned up by Coned. See document files for further information. Spill closed.

Remarks: Excavation revealed unknown petroleum in soil. Clean up pending. Samples taken.

Tank Info:

Tank Number: 001
Tank Id: 11148

**PE-GI GJO REALTY LLC (Continued)** **U003387033**

Material Code: 0002
Common Name of Substance: #4 Fuel Oil (On-Site Consumption)

Equipment Records:

B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
E02 - Piping Secondary Containment - Vault (with Access)
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
H00 - Tank Leak Detection - None
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 05/01/1931
Capacity Gallons: 4000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported

| DEC Memo: | 3/21/16-Zhune spoke to Paul Scorzelli from Accura Environmental Inspections. Paul said Accura inspected the tank and performed a tightness test to the tank. The tank failed the test. Accura is working for the byer. The seller will hire an environmental company to remove and replace the tank. This spill is referred to Kumar Patel (Secondary-off hour). 03/30/16-Hiralkumar Patel. DEC Zhune forwarded email from Paul including copy of tank system test result. the tank system was tested on 03/18/16 and failed in dry portion. Paul Scorzelli Accurate Environmental Inspections PH. (914) 557-3491 email: Paulsaccurate@aol.com 04/15/16-Hiralkumar Patel. alternate address: none no PBS or other spills found. 3:29 PM:- spoke with Paul at Accurate Env. they have not done any further work at the site as initial tank system test was conducted for a potential buyer (Selvin , 917-497-1111). 3:37 PM:- left message for Ms. Gardner Colette Gardner **property owner** 2629 Grand Avenue Bronx, NY 10468 Ph. (646) 286-0254 email: cyg58@aol.com coletteygardner@gmail.com 3:50 PM:- sent TTF letter to Ms. Gardner and asked to submit report by the end of 05/20/16. 04/21/16-Hiralkumar Patel. 7:31 AM:- received message from Ms. Gardner. 8:47 AM:- left message for Ms. Gardner. 12:47 PM:- received message from Ms. Gardner. 04/25/16-Hiralkumar Patel. 9:04 AM:- spoke with Ms. Gardner and informed her that the department requires further investigation (and cleanup, if needed) of tank system test failure as per letter dated 04/15/16. she will retain a |

**RESIDENCE (Continued)** **S118636942**

contractor for required work. 05/06/16-Hiralkumar Patel. 11:16 AM:- received message from Ms.
Gardner. 11:23 AM:- spoke with Ms. Gardner. she has received quote from ABC tank and another
company is inspecting the site today to provide cost estimate. she mentioned that as per initial
tank testing company, the tank is 550 gal in size, but as per ABC Tank the tank is 1,000 gal in
size. ABC Tank also mentioned that there is approx. 300 gal oil in the tank at this time. Ms.
Gardner doesn't know the size and age of the tank system. the on-site building is a two-story house
and there is a family living in the building. they are currently using the tank system and Ms.
Gardner believes that the tank system was filled at least once after the tank test failure on
03/19/16. asked Ms. Gardner to contact their oil company (Skaggs-Walsh) for tank size information
and delivery record for last two years. due to system failure, informed Ms. Gardner that the tank
system can't be used anymore and tank has to be pumped unless confirmed tight. she will talk to
contractor/oil company and will call back. 05/10/16-Hiralkumar Patel. 8:25 AM:- received message
from Ms. Gardner. she mentioned that oil company will install a tank inside the building and will
pump out the underground tank on 05/12/16. isolation test of the underground tank system will occur
after that. she has also requested copy of two years of delivery record and waiting for response
from oil company. 05/16/16-Hiralkumar Patel. 11:16 AM:- received message from Ms. Gardner. 3:29
PM:- spoke with Ms. Gardner. she mentioned that a new tank has been installed within the building
and remaining oil from the underground tank has been transferred to new aboveground tank. she is in
contact with few companies for cost estimates for an isolation test. 05/19/16-Hiralkumar Patel.
1:47 PM:- received email from Ms. Gardner including copy of last two year's delivery record. based
on delivery record (705 gal on 02/13/15 and 877 gal on 04/11/16), on-site UST is more than 550 gal
in size. 06/07/16-Hiralkumar Patel. 9:55 AM:- received call from Ms. Gardner. she is planning to
conduct field work on 06/10/16. she will call back with final schedule. 07/22/16-Hiralkumar Patel.
10:34 AM:- received email from Ms. Gardner including copy of tank only test result. she mentioned
that the tank was dug up, capped and properly tested. as per the test results, A-1 Crown tested the
1,000 gal tank on 07/12/16 and noted that the tank had 477 gal of product. but as per Ms. Gardner,
the UST was pumped out. 07/27/16-Hiralkumar Patel. 9:34 AM:- left message for Phil Fazin
(516-375-5890) at A-1 Crown. 9:58 AM:- left message for Ms. Gardner. 10:11 AM:- received call from
Phil. A-1 Crown was retained by Metropolitan Heat. he tested the

**RESIDENCE (Continued)** **S118636942**

underground tank. during test, the
tank had oil in it. he also observed damaged vent pipe, which could be reason for dry leak reported
initially. he observed no contamination in damaged vent pipe location. 10:13 AM:- left message for
Henry (718-941-7600) at Metropolitan Heat. 07/28/16-Hiralkumar Patel. received message from Ms.
Gardner (at 6:58 PM on 07/27/16). 08/01/16-Hiralkumar Patel. 3:31 PM:- spoke with Ms. Gardner
regarding product volume in tank. Ms. Gardner mentioned that the UST was pumped out when they
installed new tank inside the building. she will contact Metro Heat and will call back.
08/10/16-Hiralkumar Patel. received message from Henry (at 12:48 PM on 08/09/16). 1:04 PM:- spoke
with Henry. he mentioned that when he went to the site for tank test work, he found some oil in the
UST. he stated that the UST is 1,000 gal in size and the new AST inside the building is 275 gal in
size. so owner pumped out only some oil from UST to fill up the AST. prior to tank test, Henry
noted that there was no cap on the vent pipe. as he tried to put cap on the vent pipe, piece of
vent pipe got separated as it was corroded. later on, owner has exposed the tank top which also
exposed the entire length of underground supply/return/vent lines. Henry mentioned that he did not
observed any petroleum contamination in the excavation, along the supply/return lines or under vent
pipe location. he also tested piece of remote fill line that was not exposed and found it tight.
asked Henry to submit letter/email including these information. Henry Traktman Metropolitan Heat
Ph. (718) 941-7600 email: henry@metropolitanheat.com 1:29 PM:- sent email to Henry and asked him to
submit details about tank test work. email copied to Ms. Gardner. 1:32 PM:- received email from
Suki Yen (Suki@metropolitanheat.com) from Metropolitan Heat including site pics.
08/31/16-Hiralkumar Patel. received email from Ms. Yen (at 9:33 AM on 08/17/16) including letter
with summary of work performed at the site. Henry mentioned that the tank was legally abandoned in
place. case closed based on available information. 10:16 AM:- sent spill closure letter to Ms.
Gardner. letter emailed to Ms. Gardner.

Remarks: tank removal - replace w/ above ground clean up pending removal

| DEC Memo: | 3/15/2017 - Feng - Duty Desk. Spoke to FDNY HAZMAT 1 Officer Augustyn (347-203-6886). The address is 80 West Kings Bridge Road, Bronx. It is about 40 gallons of fuel oil/water mixture leaked onto the basement floor. All has been pumped out by the FDNY HAZMAT. He said that the cause of the leak might be mechanical failure of the tank. The tank is not leaking now. |

**BASEMENT (Continued)** **S120701271**

There is heavy odor in the basement. The building is a business (Aguila), no one live in the basement. He is not sure whether any drain/sewer being impacted. The floor is in concrete, but he is not sure whether there is any cracks. Everything inside the basement has been covered in black. Use the side entrance. brief to runner Ryan Piper. He may stop by for an inspection. spill is assigned to R. Piper. 4/7/17- DEC
Piper received update from AL Eastman. We removed the entire front of the tank jacket. The tank is resting on a concrete floor and is in good shape. The spill surely came from an over fill that spilled out of an existing cut-out that was used to clean the tank. We removed some dirt debris but wasn t excessive. Ran water behind the tank to move some oil to the front so we can clean behind with out moving the tank and vacuumed everything up. Manny took some pictures before reinstalling the concrete block but nothing came out very clear. The Cut-out was welded closed and tested. Based on work performed to date, this spill is closed.

Remarks: Clean up is started unknown equipment failure

Tank Info:

Tank Number: 001
Tank Id: 6415

**2690 UNIVERSITY AVENUE (Continued)** **U003385429**

Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

B05 - Tank External Protection - Jacketed
I05 - Overfill - Vent Whistle
C03 - Pipe Location - Aboveground/Underground Combination
J02 - Dispenser - Suction Dispenser
L00 - Piping Leak Detection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
H08 - Tank Leak Detection - Weep holes in Vaults with no access for inspection
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
K00 - Spill Prevention - None
F01 - Pipe External Protection - Painted/Asphalt Coating
G10 - Tank Secondary Containment - Impervious Underlayment
I04 - Overfill - Product Level Gauge (A/G)

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 10/27/1986
Capacity Gallons: 5000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported

Date Last Modified: 2012-11-13

Tank Info:

Tank Number: 001
Tank Id: 14367
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

J03 - Dispenser - Gravity
K99 - Spill Prevention - Other
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
E02 - Piping Secondary Containment - Vault (with Access)
F00 - Pipe External Protection - None
H04 - Tank Leak Detection - Groundwater Well
I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G03 - Tank Secondary Containment - Vault (w/o access)
L99 - Piping Leak Detection - Other

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 09/18/1989
Capacity Gallons: 3000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MJGRIFFI
Last Modified: 05/09/2022

Tank Info:

Tank Number: 001
Tank Id: 13256
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
H00 - Tank Leak Detection - None
K00 - Spill Prevention - None
L09 - Piping Leak Detection - Exempt Suction Piping
I04 - Overfill - Product Level Gauge (A/G)
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 01/01/1922
Capacity Gallons: 3000
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MJGRIFFI
Last Modified: 05/09/2022

| DEC Memo: | Prior to Sept, 2004 data translation this spill Lead_DEC Field was GRATHWOL Joe Ksturski - 1540. Ordered 3000 gallons - could not find super - found woman - this woman signed for delivery. 4/11/88 @ 1530. Talked to owner of building - Topk Realty. New line, 3 feet above old line. call office. broke old fill without checking first. Said they will document their side of the story. Sent out Grathwol to investigate. Petroleum Tank Cleaners - Anthony on scene. Belcher oil delivery was put in the wrong fill pipie. Invoice quoted 3000 gallons was delivered. Spill approximately 350 gallons. Fill pipe had been sealed with concrete and covered with epoxy. Driver hurried and left site. Two hours later, spill was discovered in basement. 5k tank. Brick vault. 200 gallons vacced out. Speedi dri dropped, cleaned, dropped and cleaned again. Recommended no electricity for thhe basement and to keep boiler out of operation until 4/12/88. PTC concreted bad fill pipe at both ends. |
| Remarks: | DRIVER USED OLD FILL LINE WITH LEAK IN IT, PRESENT SPILLAGE IS CONTAINED IN BOILER ROOM. |

| DEC Memo: | 12/10/07-Hiralkumar Patel. DEC Vought spoke with Mr. Fries. he complained about speedy dry on sidewalk, outside of building. as per Mr. Fries, oil spilled from oil delivery truck about week ago. driver put speedy dry and left. as per Mr. Fries, no odors inside building. DEC Vought asked for contact for property manager or super. Mr. Fries doesn't have anybody's contact info or oil company's info. no soil/drain affected. case closed. |
| Remarks: | unknown amount spilled; has not yet been cleaned up; there is no clean up scheduled at this time; would like a rep to call asap; says it has been there for a week; it is on the side of the entrance of the building, on the cement sidewalk |

| DEC Memo: | e2mis no. 129583: Jan. 13, 2000 Supervisor J. Kofoed reports that he discovers approximately 1 ounce of unknown oil on the wall in manhole 16973, while locating a fault on 1x27. The manhole has no water present. The oil appears to be solidify on the wall. There is an earthen sump in manhole 16973, which has a sewer connection according to conduit plate 30-J-1. The spill is nowhere in the area of the sump. The clean up is in progress and being handed as 50-499 PPM. Jan. 13, 2000 The clean up was completed by J. Kofoed at 01:45. The area was scrub with a cleaning solution and washed down. 1 bag of hazardous waste was generated and properly disposed of. |
| Remarks: | 1 oz unk in manhole no water - clean up in progress - clean up as to 50-499 ppm con ed #129583 |

Site Description: The site is located in a commercial/residential area of the Kingsbridge Heights section of the Bronx. The property is currently occupied by a two-story brick building which contains a laundromat.

**2628 UNIVERSITY AVE (BLOCK 3215) (Continued)** **S113916991**

The site is bordered by a convenience store and apartment building on the north, by a formerly vacant lot (now under construction for Home/Hospital for the Aged), by a parking garage to the east, and by Universtity Avenue (a.k.a Martin Luther King, Jr. Boulevard) to the west. Before its use as a laundromat the property was previously utilized by a dry cleaner for an unknown length of time.
Investigations conducted immediately south of the site (at 2614-2620 University Avenue) in 1997 identified tetracholoethylene (PCE) at high levels in the soil (200 ppm) and groundwater (110,000 ppb).
Based on subsequent investigations, a PCE hot spot was identified. In 2000, excavation of the hot spot area was completed. Confirmatory samples collected from the excavation showed non-detectable levels of PCE and associated breakdown products. Levels of contamination in the groundwater dropped by several orders of magnitude since 1997. The remaining groundwater contamination will be addressed under the Operations, Maintenance and Monitoring Plan. See also site no. 203008, which determined there was no source of contamination on 2628 University Ave. The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites.

| | |
|---|---|
| Env Problem: | The operations contaminated the soil and groundwater on the adjacent property with tetracholoroethylene (PCE) and its associated breakdown products. Excavations addressed soil contamination, and most of the groundwater contamiation. The remaining groundwater contamination is being addressed under the Operations, Maintenance and Monitoring Plan. |
