DEC Region: 2
DER Facility ID: 455932
Latitude: 40.8637420
Longitude: -73.8951430
DEC Memo: 10/16/14 : Mahat A TTF letter is sent out to the management team and it will uploaded on D2 shortly. PBS : 2-094072 DEC is waiting for a report as required by the letter. Case is assigned to DEC Patel for follow up. 10/27/14-Hiralkumar Patel. 10:38 AM:- spoke with Phil at A-1 Crown to confirm the site address (as 2525 Valentine Ave does not exist). he could not find record. he mentioned that tank test was conducted for ABC Tank. 10:40 AM:- spoke with ABC Tank and confirmed site address as 2545 Valentine Avenue. changed site address from 2525 Valintine Ave to 2545 Valentine Ave . alternate address: 2541-2549 Valentine Avenue no other spills found. PBS #: 2-094072, 2-602817 as per PBS #: 2-094072, the site has one 5,000 gal #6 oil AST in contact with soil, in-service, installed in Jan. 1942. PBS #: 2-602817 is closed. no tank info in PBS record. Ivanaj 2545 Realty Corp. **property owner** 2545 Valentine Avenue Bronx, NY 10458 Attn.: Tony Gjokaj Ph. (718) 365-6850 (914) 490-1619 email: ivanaj2545@aol.com 11:21 AM:- sent revised TTF to Mr. Gjokaj, as the previous one had wrong site address. letter emailed to Mr. Gjokaj. 12/05/14-Hiralkumar Patel. received message from Donna (at 4:47 PM on 12/04/14) from ABC Tank. 9:32 AM:- left message for Donna. 11:56 AM:- received call from Donna. after initial tank system test failure, they lifted the tank and found a pin hole in bottom of the tank. there was no sign of any petroleum release from this hole. ABC tank repaired the entire bottom of the tank and tested the tank only, which passed. to confirm no petroleum release, ABC tank also collected a soil sample from the area of tank location. the repaired tank will be installed on concrete saddles now. Donna will submit work summary and sample results for review prior to lowering the tank on saddles. after lowering the tank on saddles and connected to the piping, a system test will be done. 2:23 PM:- received email from Donna including letter with work summary and soil sample results. three soil samples were analyzed. no contamination noted in samples. 2:39 PM:- sent email to Donna. informed her that based on submitted information, no further investigation/remediation required underneath the tank, but investigation/remediation needed along associated piping. email copied to Mr. Gjokaj. 12/08/14-Hiralkumar Patel. 12:15 PM:- received email from Donna stating that ABC tank will test the lines. 12/16/14-Hiralkumar Patel. 1:25 PM:- sent email to Donna inquiring update. email copied to Mr. Gjokaj. 1:53 PM:- received email from Donna. during isolation test of the piping, fill, suction and return lines were found tight. the vent line did not hold the pressure. ABC Tank has sent proposal for replacement of the vent pipe. 12/30/14-Hiralkumar Patel. 10:32 AM:- left message for Donna. 01/06/15-Hiralkumar Patel. 2:55 PM:- spoke with Donna. they put a new plate on tank’s bottom and a new cement pad underneath the tank. once the tank installed on new pad, they will do vent line work. 08/31/15-Hiralkumar Patel. 3:25 PM:- spoke with Donna and asked her to submit report. 10/30/15-Hiralkumar Patel. 11:11 AM:- sent email to Mr. Gjokaj and asked him to submit final report immediately. email copied to Donna. 12/23/15-Hiralkuma Patel. reviewed available information. the subject spill case was reported on 10/16/14 due to failure of 5,000 gal #6 oil tank system. the tank was lifted from the floor and holes were found on the bottom. soil samples were collected from area where tank was located. no contamination noted in soil

Spill reassigned to Perez in June 2005 as part of the Spills Closure Initiative. 01/06/2006 - Spoke with Howard Apsan, Director of Environmental Health and Safety (CUNY), (212)794-5571. They will be sending me a closure report. Perez. 03/13/2006 - Received closure request letter. Perez. 05/15/2006 - Received a letter from Tectonic Engineering (consultants) on behalf of the Dormitory Authority of the |

**HERBERT LEHMAN COLLEGE (Continued)** **S102663274**

State of New York(DASNY, the facility managers), the representatives of DASNY believed that this spill number was associated with a tank closure performed by Tyree Brothers (Tyree) at Davis Hall. This tank closure was performed at the same time as the tank removal in Complex Bldg #1 tank that was also performed by Tyree. Perez. 07/06/2006 - Received a Site Investigation Report of the Complex Bldg #1 UST. Perez. 08/02/2006 - Spill Closed. Post-excavation soil samples revealed residual contamination slightly above the standards. The affected area is paved, directs contact with residual contaminated soils is unlikely. Also, the groundwater sample results revealed no groundwater contamination. Therefore, further investigation or response is not required at this time. Perez.

Remarks: DUE TO LAB RESULTS SOIL CONTAMINATION WAS VERIFIED-STILL UNDER INVESTIGATION

| DEC Memo: | 03/11/11-Hiralkumar Patel. 2:19 PM:- spoke with Christie at ATS. she mentioned that property manager is looking for contractor to fix tank system and then ATS will go back for retesting. 2:22 PM:- left message for Evan Robert, property manager. alternate address: none no other spills. PBS #: 2-509485. as per PBS record, site has one 2,000 gal #2 oil AST in contact with soil. PBS registration has expired on 11/02/10. A & R Davidson Mgt. LLC. **property owner** 36 East 37th Street New York, NY 10018 Attn.: Evan Robert **property owner** Ph. (212) 695-3510 Fax (212) 643-2061 email: evanrobertap@aol.com 03/14/11-Hiralkumar Patel. 12:59 PM:- left message for Evan Robert. 1:07 PM:- received call from Mr. Robert. asked him to conduct an |

**(Continued)** **S110769617**

isolation test or pump out tank by end of tomorrow to avoid any further release. 2:04 PM:- sent TTF letter to Mr. Robert requiring isolation test and PBS renewal. letter emailed to Mr. Robert with PBS application. asked Mr. Robert to submit isolation test result by 9 AM on 03/16/11. 03/16/11-Hiralkumar Patel. 11:23 AM:- received call from Mr. Robert. he is still waiting for cost proposal for isolation test. during conversation, he mentioned that tank is aboveground. informed him that if tank is completely visible (including bottom) and there is no leak from tank bottom and lines to/from boiler are running aboveground with no leak, then no need for isolation test. but there should be no more oil deliveries until the tank system is fixed and tested tight again. informed him that if there is leak found in fill line and if portion of fill line is underground, then further investigation is needed. Mr. Robert will call back after talking to his super to confirm that tank is completely aboveground and not wrap with concrete. 03/17/11-Hiralkumar Patel. 10:53 AM:- received call from Daniel from DD Contracting, company hired to do tank repairs. Daniel is on site right now. he mentioned that site has 1,500 gal tank completely wrapped in concrete. he was told to fix the fill line. fill line runs aboveground and fill port is located on building foundation wall. Daniels did not see any sign of leak from fill line but he was asked to change fill line. no oil found from weep holes on bottom of concrete wrap. supply/return lines run underground. Daniel DD Contracting Ph. (646) 321-2646 03/21/11-Hiralkumar Patel. letter sent to Mr. Robert came back undelivered. 4:15 PM:- spoke with Daniel. he has finished repair and waiting for re-testing. he will call once retesting is scheduled. 03/24/11-Hiralkumar Patel. 3:41 PM:- sent email to Mr. Robert requiring to submit result of retesting of tank system. 03/29/11-Hiralkumar Patel. 11:54 AM:- spoke with operator at Mr. Robert's office. she mentioned that ATS went for retesting but required more repair. technician is on-site today for repair. she will ask technician to call. 12:25 PM:- received message from Daniel. 2:42 PM:- left message for Daniel. 4:22 PM:- spoke with Mr. Robert and Daniel. asked Mr. Robert to either prove that tank/supply/return lines are not leaking (by having isolation test of these parts) or pump out tank until the system is tested tight. also asked Mr. Robert to seal the fill port to prevent any more oil deliveries. told Mr. Robert that if required document is not submitted by end of tomorrow, case will be referred to legal. 03/30/11-Hiralkumar Patel. 10:30 AM:- visited site. met Daniel. site occupies by a five story building with a basement. a 1,500 gal AST is completely wrapped in cinder blocks. weep holes at the bottom of tnak wrap. no oil observed coming out from two visible weep holes. tank is about 6 ft away from the boiler in next room. all the lines running aboveground except about 6-7 ft of supply/return lines running under the boiler room floor and fill line running under the sidewalk. found valve connection (old connection from other pipes) in middle of fill line. gauge is not working. Daniel mentioned that they changed a piece of fill line in area where it enters into tank and now waiting for retest (which hasn't done yet) which will ocuur on 04/04/11. as no sign of any release observed inside the basement and as tank will be re-tested on 04/04/11, approved Daniel's request not to empty out the tank. 1:45 PM:- left message for Mr. Robert. 2:06 PM:- received message from Daniel. 04/15/11-Hiralkumar Patel. 3:26 PM:- left message for Daniel inquiring updates. 05/26/11-Hiralkumar Patel. 1:30 PM:- left message for Mr. Robert. 1:36 PM:- received message from Mr. Robert's office. 06/06/11-Hiralkumar Patel. 4:33 PM:- spoke with Mr.

**(Continued)** **S110769617**

Robert and he mentioned that all work has been completed. spoke with Shin, Mr. Robert's assistance. she mentioned that tank passed the test. asked her to submit a statement (or invoice) from contractor including reason for tank test failure, repair done, any contamination during repair or not and passing tank test result. asked her to submit documents by end of 06/08/11. 4:40 PM:- sent email to Mr. Robert and asked him to submit spill closure report by the end of 06/08/11. 06/07/11-Hiralkumar Patel. 2:12 PM:- received email from Mr. Robert including copy of invoice. as per invoice from DD Contracting, they replace epoxy patch on oil tank with fiberglass resin patch, replace tank whistle and pipe which were leaking air and installed new petrometer. 06/09/11-Hiralkumar Patel. 11:44 AM:- sent email to Mr. Robert and asked him to send letter report from contractor including following: - cause of tank system failure - type of repair done - any contamination found during repair or not - results of tank system test performed after repair done asked him to submit documents by 06/13/11 - final notice. 08/05/11-Hiralkumar Patel. 11:24 AM:- spoke with Shin. she has access to Mr. Robert's email account and she mentioned that they did not received email dated 06/09/11. informed her that email will be resent. asked her to submit report as per the email, by the end of 08/09/11. 11:28 AM:- sent email to Shin (at Mr. Robert's email address) requiring to submit report by 08/09/11. 11:30 AM:- spoke with Shin. she confirmed that she received the email and will send document by 08/09/11. 08/11/11-Hiralkumar Patel. 4:29 PM:- received email from Shin including letter from DD Contractring. as per Daniel from DD Contracting, tank system failed a test due to leaking 1/4 inch copper line compression fitting located at the top of the tank. the fitting was replaced. no contamination found during repair. as per Daniel, tank system was pressure tested and passed. 08/15/11-Hiralkumar Patel. 2:33 PM:- spoke with Shin and asked her to submit tank system test result. 4:09 PM:- received email from Shin including tank pressure test result. result is not acceptable as includes tight tank and no information about system test. 08/19/11-Hiralkumar Patel. 11:50 AM:- spoke with Shin and informed her that tightness test must be performed for entire system. she will call ATS, who performed test, for corrected result. 12:35 PM:- received email from Shin. she mentioned that Kristi Clune from ATS environmental will send tank test result. Kristi Clune ATS Environmental Ph. (800) 440-8265 Ext. 107 Email: kristi@atsenvironmental.com 12:36 PM:- spoke with Kirsti. she mentioned that they tested entire tank system. asked her to submit test result that shows tank system is tight. 1:16 PM:- received tank test result from Kristi. based on available information, case closed. **also see spill #: 1012136 as same managmenet and tank test failure.**

Remarks: vent pipe is loose from the top of the tank, after repaired they will retest.

| DEC Memo: | 5/26/15: Mahat DEC Mahat left a phone message to Mr. Isuf Celaj ( 718.882.8116 ) inquring to follow up with the repair and retest. 6/11/15: Mahat DEC Mahat received an email from Renae Lewis ( Retained Contractor ) who performed the TT. Report has been uploaded on D2 for reference. Tank- Passed Fill- Passed Suction- Passed Return - Passed Vent - Passed with comporessin vent alarm removed. Renae will perfrom further repair and a completed report will be provided to the Department for a closure. 6/19/15: Mahat DEC Mahat received a call from Renae and he mentioned that tank has passed the pressure test once he removed the vent alarm. A complete closure reprot will |

**(Continued)** **S107784059**

be submitted to the Department for a closure. DEC Mahat received an email with the passing TT result. Tank will be removed from the site. and new tank will be instlled on site with smaller capacity. Based on the phone conversation and reprot, Department does not warrant any further investigation on the site. Hence, the spill case is closed in NYSDEC Spill Database.

Remarks: 5000 gal tank.

| DEC Memo: | Spoke with Rob Hill at RiteWay tank.They are doing conversion of heating system from #6 to #2. AST 7500 gallon. Tank failed the test at the suction line.No product released. Tank was empty. RiteWay will prepare a closure report for DEC.(sr) 5/29/14 - Austin - Reassigned from Rahman to Mahat - end 8/26/14: Mahat DEC Mahat received a closure report from David Chan including passing TT. He mentioned the reason for the failing TT was due to loose guauge on the manhole. The issue was resolved resulting a passing test. A narraive clossure appeal, failing TT and Passing TT is uploaded on D2. This leak was a dry one and no further action is required by the Department. Hence the spill will be closed in the database. |

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

| DEC Memo: | DEC Piper- spoke with caller Tim from MES. Tank failed outer wall test. Believed to be coming from stem. DEC instructed MES that if repairs and retest cannot be completed by COB, then tank needs to be emptied. TTF sent to VA MEd Center. PBS- 2-602985 03/04/22-Hiralkumar Patel. alternate addresses: 110 West Kingsbridge Road, 2480 Sedgwick Ave other spills #: 9100744, 9314587, 9400330, 0411453, 1204960, 1811788 PBS #: 2-602985. as per PBS record, the site has/had following tanks: - five (5) 30,000 gal diesel USTs, removed in Apr. 1998 - two (2) 1,000 gal diesel UST, removed in Apr. 1998 - one (1) 250 gal diesel UST, removed in Apr. 1998 - four (4) 150 gal and one (1) 200 gal hydraulic oil ASTs were converted to non-regulated use - four (4) 30,000 gal #2 oil USTs, in-service, installed in Feb. 1999 - one (1) 30,000 gal #2 oil UST, in-service, installed in Jun. 1999 - five (5) 1,425 gal diesel ASTs, in-service, installed in Jun. 2014 - one (1) 100 gal diesel AST, in-service, installed in Jan. 2010 - one (1) 100 gal gasoline AST, in-service, installed in Jan. 2010 - one (1) 275 gal waste oil AST, in-service, installed in Jan. 2007 - two (2) 275 gal #2 oil ASTs, in-service, installed in Nov. 2007 - one (1) 1,000 gal #2 oil UST, in-service, installed in May 1999 - one (1) 1,000 gal #2 oil UST, in-service, installed in Jan. 1999 - one (1) 100 gal #2 oil AST, in-service, installed in Nov. 2007 - one (1) 50 gal #2 oil AST, in-service, installed in Nov. 2007 - one (1) 100 gal gasoline AST, in-service, installed in Jn. 2007 11:57 AM:- spoke with Tim. he stated that a 1,000 gal tank (Tank #07 on PBS record) was tested as it was due for tightness test. during test, the primary wall of the double wall fiberglass tank was found tight, but the secondary (outer) wall failed the test. Tim confirmed that there was no alarm on interstitial monitoring system. asked Tim to submit copy of test result. Timothy Perkins Metro Environmental Services PH. (413) 455-7540 email: tperkins@mesllc.org 12:13 PM:- received email from Tim including test result. as per the result, a 1,000 gal diesel tank (tank # 7) was tested on 02/23/22. tank and line were tested together and it passed. the interstitial test was performed and it failed. as per PBS record, the tank #07 is a 1,000 gal #2 fuel oil and not diesel as listed on test result dated 02/23/22. 12:18 PM;- sent email to Tim and asked him to confirm product type and submit a revised test result accordingly. 12:45 PM:- sent email to Ms. Padin including copy of TTF letter. asked her to immediately remove product |

**JAMES J PETERS VA MEDICAL CENTER (Continued)** **S121488487**

from the faulty tank system. email copied to Tim. Cynthia Padin Ph. (718) 584-9000 Ext. 5659 email: Cynthia.Padin@va.gov 1:52 PM:- left message for Richard Joao at VA medical center. Richard Joao Ph. (718) 584-9000 Ext. 6605 (914) 552-2005 email: richard.joao@va.gov 2:17 PM:- received call from Tim. he mentioned that the tank pump out has been scheduled for tomorrow morning. asked Tim to send message once tank is empty. 2:25 PM:- received call from Mr. Joao from VA center. he mentioned that an alarm in an interstitial space went off due to water accumulation and that triggered tank system tightness test. Mr. Joao confirmed that the tank will be pumped out tomorrow. he was not sure if the tank will be repaired/reused or closed/removed. 3:16 PM:- received email from Tim including a revised tank test result. 03/07/22-Hiralkumar Patel. 7:39 AM:- received email from Mr. Joao including a copy of disposal manifest. Mr. Joao mentioned that fuel from the tank # 7 has been removed. as per disposal manifest, total of 683 gal of oil/water mixture was removed. 1:35 PM:- received message from Mr. Joao. 03/08/22-Hiralkumar Patel. 11:57 AM:- spoke with Mr. Joao. he mentioned that the tank is empty and the remote fill port is secured to prevent oil deliveries. informed Mr. Joao that the tank system must be repaired and tested tight prior to any oil delivery. asked him to send pics confirming that the fill port has been secured. Mr. Joao stated that tank repair may take sometime or tank may not be used again. informed him that in any case, PBS registration must be updated to reflect current tank status. 03/10/22-Hiralkumar Patel. 9:28 AM:- sent email to Mr. Joao and asked him to submit pics to confirm that the remote fill port for tank #7 has been secured to prevent further oil deliveries. informed him that the tank system must be repaired and tested tight prior to the next oil delivery and the subject spill case will remain open until the Department receives either a tank system tightness test result (confirming its integrity) or tank closure report (either tank removal or closed in-place). asked him to submit a PBS application to reflect tank s current status. email copied to DEC Leszek, Ms. Padin and David Ng (David.Ng2@va.gov). 10:54 AM:- received email from Mr. Joao including pic of locked-out fill port. 06/07/22-Hiralkumar Patel. 2:09 PM:- spoke with Mr. Joao. he will call back with update. 2:32 PM:- received call from Mr. Joao stating that the tank work is in bidding process which may conclude by end of Sept. 2022. 08/17/22-Hiralkumar Patel. 9:05 AM:- received email from Ms. Padin including a letter report from Nordstrom Contracting & Consulting Corp. summary: - removed water from annular monitoring well and reset water intrusion alarm - performed additional vacuum test on the annular space and detected no leak confirming no leak in either inner or outer walls of Tank #7 08/18/22-Hiralkumar Patel. 1:52 PM:- spoke with Ms. Padin and inquired her about reason for water within the interstitial space. also informed her that required paperwork needs to be submitted to PBS unit for approval to return tank to service. 2:07 PM:- sent email to Ms. Padin and asked her to provide details about reason for water within the interstitial space. also asked her to submit required paperwork to PBS Unit (cc d) for approval to return tank to service. email copied to DEC PBS, Mr. Joao, Michael Fenton (Michael.Fenton3@va.gov), David Ng (David.Ng2@va.gov) and John Morris (John.Morris11@va.gov). 08/25/22-Hiralkumar Patel. 10:22 AM:- sent email to Ms. Padin inquiring updates. email copied to Mr. Joao, Mr. Fenton, Mr. Ng and Mr. Morris. 09/09/22-Hiralkumar Patel. 10:42 AM:- received email from John Morris including document stating improper seal of monitoring well cap was noted during initial

**JAMES J PETERS VA MEDICAL CENTER (Continued)** **S121488487**

observation. the monitoring well cap was cleaned and no water intrusion in monitoring well or interstitial has noted even during heavy rains. the tank system was tested and no leaks were found in either the inner or outer walls. 09/16/22-Hiralkumar Patel. case closed based on review of available information. 2:40 PM:- sent email to Mr. Morris and informed him about spill closure. asked him to contact PBS unit regarding approval to return Tank #7 to service. email copied to DEC Leszek, Ms. Padin, Mr. Ng and Mr. Fenton.

Remarks: interstitial failure - repair/retest pending

DEC Memo: 06/06/23-Hiralkumar Patel. 2:50 PM:- spoke with Ms. Padin. she mentioned that fuel alarm went off for a 1,000-gal emergency generator tank (tank #7), but no leak was noted. she confirmed that tank #7 is a double-wall tank. tank company will inspect tank/alarm system tomorrow. asked Ms. Padin to manually gauge the tank to confirm product level within the tank. 4:54 PM:- received message from Kyle. he mentioned that the tank #7 was gauged at 3:15 PM and 4:15 PM and product level was measured at 39.5 inches both times confirming no active leak from the tank. PBS #: 2-602985. 06/13/23-Hiralkumar Patel. 9:08 AM:- spoke with Edwin at VA medical center. he mentioned that contractor bidding has been submitted and waiting for approval. Edwin confirmed that tank #7 is 11.5 ft long and 3 ft 11 inch in diameter. as the leak detection sensor is out of service and will not be fixed soon, asked Edwin to pump out remaining oil from the tank and place the tank temporarily out-of-service until system fixed and tested. Cynthia Padin VA Medical Center PH. (718) 584-9000 Ext. 5659 email: cynthia.padin@va.gov 9:33 AM:- sent email to Ms. Padin. informed her that as the leak detection system for tank #7 is out-of-service, the Department requires to remove product from the tank and place the tank temporarily out-of-service until the system is fixed and tested. email copied to PBS unit. 10:06 AM:- received email from Ms. Padin stating that they are in process of securing the services to remove the product from the tank and will place it out of order. 06/16/23-Hiralkumar Patel. 12:27 PM:- sent email to Ms. Padin inquiring updates. 12:51 PM:- received email from David Ng (David.Ng2@va.gov) from medical center. he mentioned that Eastern Env is on site emptying the tank right now. for the repair, they have put in an emergency package to their contracting department and expect a contract for the repairs to be awarded sometime next week. 1:09 PM:- received email from Edwin Morales Magriz (Edwin.MoralesMagriz@va.gov) from the medical center including copy of disposal manifest. total of 900 gal of petroleum impacted water was disposed of. 07/19/23-Hiralkumat Patel. 8:20 AM:- received email from Ms. Padin including update. she mentioned that they have secured a vendor to perform the repairs and the contract will be awarded to this vendor as soon as the vendor is placed in their system. 10/17/23-Hiralkumar Patel. received email from Ms. Padin (at 9:52 AM on 10/04/23) including an update. Metro Environmental conducted confirmatory testing on tank #7 due to inconclusive results on the first testing. The result on this test indicates that the outer wall of the tank failed testing while the primary tank, holding the fuel, passed testing. Ms. Padin mentioned that they are leaning towards closing this tank permanently and leaving it in place. a new spill # 2305729 was reported by Metro Env. due to tightness test failure of the tank's outer wall. reviewed copy of tank test result from Metro Env. test was conducted on 10/03/23 confirming leak in the outer wall of the double wall tank. case closed based on available information. 10:23 AM:- sent email to Ms. Padin and informed her about spill closure. also asked her to contact PBS unit about tank's future use/closure.
Remarks: fuel alarm no spill

Spoke to him on phone. He said he will make sure he takes care of it. bf 9/28/06 received response letter from Mr. Walton. bf 11/10/06 called A.L. Eastmond (718)378-7000 who did tank removals on 12/1/99. Left message to get back to me with more info. bf 8/17/12 Spill re-assigned to T. Demeo as per RSE. bf 12/4/12 TTF sent. AF 1/2/13 AFrischeisen intern Conversation with Elaina Jones from VA: Given the age of the case (April 7, 1994) this documentation will be provided as quickly as possible and I will continue to update you by phone and/or by e-mail. 1/18/2013 Sangesland reviewed a package of information from Elaina Jones from the VA Medical Center. Documents (see eDocs) show Eastmond dug out and removed 8 USTs from the property (all buried tanks) and reinstalled several new fiberglass tanks during 1998 & 1999. The tank/s associated with this TTF has been removed. Spill case closed out. |
| Remarks: | HYDROSTATIC TANK TEST AND FAILED CRITERIA - CLIENT NOTIFIED WANT A CALL BACK. |

| DEC Memo: | 10/3/23 - Ye - DDO - Called and left a message. 10/4/23 - Ye - Emailed the caller asking for more information as to why the tank test was being performed, which tank failed, and planned work. 10/10/23 - Ye - Called and emailed again, and received the following: There was tank testing being performed on a 1,000 gal diesel tank. The primary wall and lines passed as one system during the test. The interstitial space of the tank failed its test. We went to perform helium pinpoint to find exactly where the compromised wall is. We have to return to the site on 10/12 because it started to rain that day. Attached are the testing results from the tank showing the primary wall passed and the interstitial failed. Photos of the test results show a one-hour interstitial tank test performed on 10/3 at 11am for Tank 07 that failed and a passing system test for Tank 07 performed 3pm that day. Tank 07 contained 967 gallons of diesel. PBS records for Tank 07 show an underground, including vaulted with no access for inspection, 1,000-gallon capacity tank installed in 1999 holding #2 fuel oil. Requested that they confirm the tank product when they're back on site and make any necessary changes. Sent a TTF letter to Cynthia Padin (cynthia.padin@va.gov) and assigned to DEC Piper. 10/11/23 - Ye - Received an email from Padin saying the tests were conducted as a response to an alarm condition for which they already have a spill for - 2301889, under DEC Patel. The tank had been emptied and taken out of service, and they are in the process of making a determination as to how they want to proceed with the tank. Looked at the test results again and realized the tank was empty - product volume was 33 gallons, ullage was 967 gallons. The other open spill, Spill #2301889, was called in on 6/6. The tank's fuel alarm went off, but there was no leak. The leak detection sensor was out of service, so the tank was emptied on 6/16. Said that they could just work with DEC Patel and requested that they provide any updates that they hadn't already to DEC Patel, and that this spill (#2305729) will likely be closed and merged with Spill #2301889. Spill assigned to DEC Patel. 10/17/23-Hiralkumar Patel. case closed and merged with spill #: 2301889. |
| Remarks: | No spill. Outer wall of tank failed. |

| DEC Memo: | 10/27/23 - Ye - DDO - PBS 2-473405 shows a 10,000-gallon #2 fuel oil underground/no access fiberglass tank installed in 2000. The application was processed 1/25/19 and expires 3/28/24. There's a 25,000-gallon #2 fuel oil underground tank that was installed in 1973 and closed and removed 1999. Left a message to the caller. Spoke with Dominic, from Hillmann Consulting (HK Engineering & Geology D.P.C. in NY). They were subcontracted to do some renovation work and subcontracted another company to perform a tank test on a tank that was identified through a Phase I ESA completed on the property. The tank tester performed an acoustic test and heard air; they believe there may be some corrosion holes on top of the product level. There is around 5,000-gallons of oil in a 10,000-gallon tank. The tank is not in use, because all the valves were off in the boiler. A NYSCHA worker also said that the tank hasn't been used the whole time they were there, since 2019. They do not know the plans for the building. Requested the tank test results, building representative contact, and |

**BAILEY HOUSES (Continued)** **S102240480**

plans for the building/why the Phase I was completed. Heard from the caller, from TJO Tank Testing. They said there was an old electronic monitoring system that showed that there was 5,300 gallons left in the tank. Called NYCHA McPherson, listed in the PBS records. They were unaware of the tank test failure but believe it may be one of the facilities going through a lease development, and said it's possible the building is on firm gas. They will try to find the PM for that site. NYCHA McPherson provided the following: paula.frye@nycha.nyc.gov but later said to send to james.scott@nycha.nyc.gov, since Paula is off until 11/9, and CC them. Sent a TTF letter with DEC Patel as PM. Later heard from James, who said they're the Superintendent for NYCHA Ft Independence Houses and not the owner, and that the oil tank is a part of the heating system, alternating from gas to oil. They added 7 other heating supervisors to follow up with the matter. Provided a background of the tank test failure and said they believe the tank was not being actively used. Wanted confirmation of the tank status and more information regarding plans for the tank and additional investigation. 10/30/23 - Ye - On 10/27, Dominic said that they will forward the building contact and look into what the plan is with the building on Monday. Reached out for an update. 11/1/23 - Ye - Heard from NYCHA McPherson, who said the tank was emptied on Monday, but they do not know who the PM is. Called Dominic and left a message. 11/14/23 - Ye - On 11/3, asked for a NYCHA contact from McPherson, since I had not heard back from Hillmann. Sent the following to liza.damm@nycha.nyc.gov, as well as McPherson: We were notified of a tank test failure at 2663 Heath Avenue last week. Hillmann Consulting, whose tank test contractor had called in the spill, had said they would provide me with the NYCHA contact they were working with as well as the tank test report, but hasn t responded to my follow-up reminders. I hope you will be able to assist us with closing out the spill. In addition to submitting within a month the investigation of the cause of the system tightness failure and further actions, detailed in the attached letter, we d like the following ASAP: If the tank had been emptied, o Written confirmation or documentation o How the building is being heated A photo of the sealed/painted fill port to stop further deliveries Tank test report Plans for the tank/schedule of work, if known On 11/14, heard from Chris from Hillmann Consulting, who provided more information. They're working on a NYCHA renovations project with Omni and have submitted an RIR to the DEP for review. They were not sure whether the tank was emptied, but will look into that as well as get the contact information for NYCHA/Omni and see if they have a schedule for tank work/removal. Sent them the letter of requirements. Spill assigned to DEC Patel. Chris provided a ticket showing around 5,000 gallons of oil removed from the Bailey Houses on 10/30 and wrote: The tank was emptied on October 30, 2023 (ticket attached); the building is currently heated via natural gas. The tank is scheduled to be removed during rehabilitation activities as part of the RAD process in June 2025. The contact people for the tank information on the ownership side are: Tanner Melendez Tanner.Melendez@nycha.nyc.gov and Ryan McPherson Ryan.McPherson@nycha.nyc.gov 11/16/23-Hiralkumar Patel. 9:11 AM:- spoke with Chris at Hillmann. Chris mentioned that Hillmann Consulting is contracted by OMNI NY to handle environmental work at the site as part of building renovation. Chris Hirschmann Hillmann Consulting, LLC & HK Engineering & Geology, D.P.C. PH. (908) 688-7800 (908) 377-8909 email: chirschmann@hillmannconsulting.com

**BAILEY HOUSES (Continued)** **S102240480**

9:16 AM:- spoke with Ryan at NYCHA. he mentioned that NYCHA currently owns the site, but by Feb/Mar. of 2024, site will be leased to a private entity for 99 years. site will be renovated by the new lease holder. informed Ryan that the current tank owner is required to perform necessary investigation to identify/remediate any petroleum release that might have occurred from the leaking tank system. 9:30 AM:- left message for Ms. Moronta at SBV. SBV RE Investments LLC **possible leasee** NW Bronx Housing Preservation LP, NW Bronx OZ Housing Preservation LP, c/o: OMNI New York LLC 909 Third Avenue, 21st Floor New York, NY 10022 Attn.: Elizabeth Moronta PH. (786) 766-5996 **no. for SBV** (646) 502-7200 **no. for OMNI** (646) 385-0185 email: emoronta@sbvre.com 10:12 AM:- sent email to Ryan. informed him that the Department requires tank owner to investigate for the tank system integrity failure. asked him to refer to the Department s letter dated Oct. 27, 2023 that lists requirements for investigation/remediation. asked him to submit work plan/schedule for required investigation/remediation. email copied to liza.damm@nycha.nyc.gov, Tanner.Melendez@nycha.nyc.gov, Ms. Moronta and Chris. 03/12/24-Hiralkumar Patel. 8:57 AM:- sent email to Ryan inquiring updates. email copied to liza.damm@nycha.nyc.gov, Tanner.Melendez@nycha.nyc.gov, Ms. Moronta and Chris. 04/22/24-Hiralkumar Patel. received email from Ryan (at 9:19 AM on 03/19/24) including text portion of a remedial investigation report dated Nov. 2023. the report stats that the 10,000-gal UST failed in a dry portion and recommends decommissioning the tank, but it does not include any details about which section of the tank system failed and any petroleum release from the failed section. 04/26/24-Hiralkumar Patel. 8:49 AM:- spoke with Chris at Hillman Consulting. he mentioned that the lease agreement has not been finalized yet and NYCHA is still managing the site. 8:51 AM:- spoke with Ryan and inquired him about report as per letter dated 10/27/23. he asked for email clarifying what actions are needed. 9:24 AM:- sent email to Ryan including copy of letter dated 10/27/23. informed him that the department requires isolation test of the system to identify failed section(s) of the system and further investigation of the failed section for any petroleum release to the environment. asked him to submit report by COB 05/31/24. email copied to Jenelle Gomes (Jenelle.Gomes@nycha.nyc.gov), Chris and Ms. Moronta. 05/29/24-Hiralkumar Patel. 8:46 AM:- received email from Ryan including a spill closure letter. the 10,000-gal UST system failed in dry portion due to broken manway gasket. the damaged gasket was replaced and the tank system was tested tight on 05/20/24. case closed. 10:56 AM:- sent email to Ryan and informed him about spill closure. also asked him to submit required documents to PBS to update tank status. email copied to DEC PBS.

Remarks: repair/retest pending

| DEC Memo: | E2MIS 152383 05 MARCH 2004 17:57 Hrs I&A Operating Supervisor Roy Eaton, 39281, reported that crews spilled 3 gallons of dielectric fluid onto the concrete floor of the vault where the spill was contained. This is private property. No fire or smoke is/was involved. No sewers or waterway was affected. Cleanup is in progress. Bx/West OS. J. Hardman # 00753 reports the crew cleaned the affected area with absorbant pads,Oil degreasor and speedy dry. Generated 2-55 gallon drums of non-hazardous debris (As per R. Eaton # 39281 from history) which will be left on site for a later removal. Cleanup complete. |
| Remarks: | spill came from transformer vault 4194. Clean up is in progress. |

| DEC Memo: | PBS 2-612770 3/12/2020 - Feng - Desk Duty. Spoke to Nick Russo of Metro Environmental Services. It is the 12,000-gallon UST. They did the tank system test. The tank passed the test, but the interstitial space failed the test. They provided the owner two options. One they can dig down the 4-5 feet the top of the tank and search where caused |

**PLAZA (Continued)** **S126222170**

the problem and fix it. Another one is a new tank system. They are currently waiting for the owner's decision. 4/8/20-Lin-Spoke to Nick and was informed that they did a further investigation and could not locate where the interstitial space failed. They send the owner a quote for tank abandonment and is awaiting owner decision. Ken Ross is now handling this case. 6/25/21-Lin-Recieved spill closure report. Two UST were abandoned in place using concrete slurry. One (1) 550 and one (1) 12,000 gallon UST. Three soil samples were taken from the 550 gallon UST and four soil samples were taken from underneath the 12,000 gallon UST. All the soil samples were take 1' below the bottom of the tanks. All the soil samples came back clean. Case closed. Assigned the spill to Rick Lin for follow up. will send TTF. Metro Environmental Services Nick Russo 631-393-6655 Ken Ross KRoss@mesllc.org

Remarks: tank passed the interstitial space failed

| DEC Memo: | 1/13/23 - Ye - DDO - Responded on 1/10 with DEC Piper. PBS: 2-098647 - 1 3,000-gallon #2 fuel oil on site. Number for the Super at the building was the same as number for the site and owner listed on the PBS registration. Unable to reach the Super. Opened a door that was an alleyway holding garbage and leading to an opening in the back of the building. Water was dripping from the ceiling of the hallway to the floor, but no oil or odor was observed from the entrance. Walked along the street behind the building, an elevated old aqueduct walkway, and was unable to see any oil spill. On 1/11, DEC Piper was notified by ABC Tank who was on-site and said that the pump was leaking, not the tank. Sent a requirement letter on 1/12. 1/27/23 - Ye - DDO - DEC Piper sent the following to the owner: Good afternoon. I am writing you today regarding the oil spill in the basement of the facility located at the property referenced above. ABC tank has been in contact with me and my Department regarding the remediation of the oil spill case. Now that the spill has been cleaned, the contaminated material that was placed in 55-gallon drums, needs to be disposed of properly. |

**(Continued)** **S100143531**

Please work with the contractor in resolving the issue and submitting the necessary paperwork to close the case out. Additionally, there is a water and sewer leak in the building that should be addressed. Thank you. The owner called me later (same number as in PBS Registration) inquiring about the paperwork needed to close the spill. He said that Michael, who fixed the boiler, referred ABC Tank to do a secondary cleaning. A secondary cleaning was not done, but when he called ABC Tank, Steve said that they had completed the secondary cleaning on 1/24, though noone was out there that day. I said that I do not know the details of the secondary cleaning, but drum disposal was mentioned in DEC Piper's email. He said that everything was cleaned, the pump that was on top of the tank was leaking and was replaced, but there is still an issue with the piping at the sump pump used for water drainage. He said that he does not smell any odors, but his sense of smell is also not good. He is fine with paying for drum disposal, but was concerned that a secondary cleaning was required when it was not done. I said to clarify that with the contractor, and I will see if we have additional information as well. If the contractor and the owner believes the cleanup is completed, then they can submit the closure documents to the Department for review. I said that he could also send photos if he wants, and that electronic submissions are fine. Spoke with DEC Piper, who called Rob from ABC Tank. They were out there yesterday and the cleanup is complete. There does not need to be a secondary cleaning, but there is still a sewer issue. Relayed the information to the owner, who was still confused, because he thought that a secondary cleaning was required and said that Steve had said it was done, but he's hearing that it's not required now. I said that he should review the breakdown of costs and resolve any issues with the contractor, since we are only concerned with the cleanup of the spill and proper disposal of contaminated material, and the contractor had said that the cleanup was completed. DEC Piper spoke with ABC tank. Cleanup complete. Boiler room is coated with a tar like waterproofing. Oil burner repaired. Spill closed.

Remarks: noticed a large black oil sheen in backyard

| DEC Memo: | 8/15/2012 TTF Spill Case transferred to DEC Tim DeMeo. 03-31-2015 - V. Brevdo As per discussion with Chief of Spill Response Section, this Tank Test Failure Spill Case is transferred to Remediation Section B for management of the project. Spill Case is further assigned to Ainura Doronova. VB 04/26/2015: Looked in PBS database for the information on a contact person. According to the files it is Michael Torres of Fordham Terrace Apartments Corp. Phone number is: (212)634-8900. Will send a letter. AD 05/01/2015: Issued and sent a certified TTF Letter (# 7010 0290 0000 9758 3407) to Mr. Michael Torres. Response is due June 1, 2015. AD 06/07/2016: Received a message from Cris of Marlboro Tank (718)975-3963. called and left a message for him with the receptionist. AD 06/10/2016: Received a call from Cris. He did some work at the site and collected soil samples. He said that the soil samples are very contaminated. He will submit the report next week. Tank is not removable. Suggested after reviewing the report to have a meeting where all remedial approaches could be discussed. Cris agreed to this plan. AD 02/08/2017; Called and spoke with the receptionist from AllBoroTank and left a message to Chis. She passed me back message rom him to contact the managing company. Tried to contact Mr. Torres with no success. Left a message on his company voice mail box. AD 02/14/2018: Received a call from Sidney Lane (718)-365-3062, e-mail: sidalone6@gmail.com). He is a president of COOP for the property. He wanted to know how to proceed with the case closure. Explained what type of documents need to be |

**UNDERGROUND TANK - TTF (Continued)** **S111063878**

submitted and where to get them. AD 05/10/2018: Received a phone call from Mr. Lane. He informed me that they acquired an environmental consulting firm called Brookside Environmental, the contact person is Richard Taylor, his phone: (631)-608-8810. Mr. Lane asked how long will it take to get a permit for the spill cleanup. Asked what type of work their consultant proposed to do. According to the contract it is UST removal and soil excavation. Informed Mr. Lane that getting a permit from DOB will take some time. AD Called and spoke with Mr. Taylor of Brookside Env. regarding the site. Gave him my contact info and requested submission of the work plan for review and approval. AD 05/15/2018: Received the following e-mail from Mr. Galdun of A.R.T. Inc.: Ainura, As requested, see the attached work plan for the UST removal and post-removal site assessment work at the 2661 Marion Avenue property. Brookside Environmental (UST removal contractor) should soon be receiving the NYCDOB permit to conduct the work. We will notify you of the start date well in advance. Regards, Frank Galdun ART, Inc. 646.542.3465 Will review. Uploaded the work plan and previous reports to DDocs. AD 05/23/2018: Reviewed the report. It states that ART has reviewed a document titled Tank Spill Soil Investigation Report , for this spill, prepared by Associated Environmental Services, Ltd. in November 2017.(the AES Report ). The AES Report states that a contractor was retained to clean the interior of the UST in May 2016; the extent of the interior cleaning/product removal is unknown. The AES Report further states that the UST cleaning contractor collected 4 soil samples through the bottom of the UST for laboratory analysis in 2016. ART s review of the laboratory analytical data pertaining to these 4 samples, shows that elevated concentrations of VOCs and SVOCs associated with petroleum fuel exists in soil beneath the UST. The AES Report states that a drill rig was used to install 7 soil borings near UST on November 26, 2017. The AES Report indicates that a total of 12 soil samples were collected from these borings for lab analysis. Bedrock was encountered at all borings at roughly 12' bgs, and that no water-bearing deposits were encountered. Laboratory analysis of the soil samples (collected at depths ranging from eight feet to 12 feet bgs), show a substantial decrease in the number of detected VOCs and SVOCs at levels exceeding regulatory limits, as well as the magnitude of contaminant concentrations in comparison with those reportedly detected in the samples collected from directly beneath the UST in samples collected in 2016. The soil quality data from the AES Report suggests that localized soil impact exists as a result of the petroleum release. The AES Report includes a site plan with location of the UST; it also includes all soil sample laboratory analytical data gathered by both the investigation described in the AES Report and by the contractor retained to clean the interior of the UST in 2016. SCOPE OF WORK: According to the ART, the best and most efficient means of addressing the contamination caused by the UST is to excavate and properly remove the UST from the site. Contaminated soil will be excavated and removed for proper off-site disposal as necessary and as feasible. Based on a review of the AES Report, it appears that the UST is resting on bedrock and no water-bearing deposits above bedrock exist. This work includes the tasks necessary to properly remove the UST, monitor the UST removal, excavate petroleum-impacted soil as necessary, conduct post excavation soil sampling and laboratory analysis, and to submit the necessary reports to NYSDEC to gain closure of the active spill case. ART shall notify NYSDEC of the UST removal schedule at a minimum of one week prior to

**UNDERGROUND TANK - TTF (Continued)** **S111063878**

commencement of the work described herein. All necessary permits for the removal work are currently being obtained from the New York City Department of Buildings. A qualified contractor shall be retained to employ mechanical equipment to first expose the top of the UST. The contractor shall then use a vacuum truck to remove any residual fluids that may be present. The UST will be rendered vapor free, opened and manually cleaned. UST removal will then occur. Contractor will provide all manifests for disposal/recycling of the UST and any waste fluids generated during product removal and interior cleaning. All piping associated with the UST shall also be removed. Upon removal of the UST, contractor will be directed by ART to excavate soil that is visibly impacted by petroleum. The extent of this activity shall be based on physical evaluation of soil condition and on the information contained in the AES report pertaining to soil quality. ART shall also utilize a photoionization detector (PID) as an aid in soil quality field screening. Soil samples will be continuously evaluated with the PID to establish volatile organic vapor concentrations. Any soil exhibiting PID readings above 10 ppm shall be removed. All excavated and petroleum impacted soil will be stockpiled on-site by first laying down 6-mil; polyethylene sheeting (soil will be placed on this sheeting. The soil stockpile will be covered with 6-mil sheeting at the end of each work shift. Upon completion of contaminated soil removal, waste characterization sampling and laboratory analysis will be performed to meet soil disposal facility permit requirements. Impacted soil will then be transported from the Site for proper disposal at the licensed facility. ART will perform the following: - Perform post excavation soil sampling and analyses in accordance with NYSDEC regulations and guidelines1. Following excavation of the UST, removal of piping and removal of contaminated soil, soil samples will be collected from each side-wall and from the excavation bottom (total of up to eight samples) for laboratory analysis. All soil samples will be analyzed under EPA Method 8260-VOCs and EPA Method 8270: SVOCs. No composite samples will be collected as part of the post-UST removal assessment activities. The specific sample collection locations are to be determined and will be dependent upon the size and configuration of the open excavation. If, deemed necessary, more than eight soil samples may be collected for laboratory analysis. - Perform continuous observation and documentation of contaminated soil removal activities. - Provide all necessary documentation after the completion of all tasks (i.e.: waste manifests, trips tickets for the disposal/recycling of regulated wastes). - Prepare and submit a UST Closure Report to NYSDEC that includes all pertinent documentation AD Called and asked Mr. Galdun regarding correct contact information for his client. He promised to submit it by e-mail. AD 05/31/2018: Received the following e-mail from Mr. Galdun: Ainura, below is the attached owner name and point of contact as requested. Regards, Frank Galdun 646.542.3465 Fordham Terrace Cooperative Apartments Corp. c/o Domenick J. Tammaro Spolzino, Smith, Buss & Jacobs, LLP 733 Yonkers Avenue Yonkers, New York 10704 914.476.0600 x 4121 914.476.0614 AD 06/05/2018: Called and spoke with Mr. Tammaro. He is an attorney for the First Service Residential Corp. (FSR) and was involved in contract preparation. He gave the contact in for FSR. Steve Hyatt FSR 622 3rd Avenue New York NY 10017 718-943-9272 e-mail: steve.hyatt@fsresidential.com Called Mr. Hyatt. he is away on the seminar till 06/08/2018. AD 06/06/2018: Called and spoke with Mr. Lane. He advised to send an approval letter to Mr. Hyatt and copy to

**UNDERGROUND TANK - TTF (Continued)** **S111063878**

him. Issued and sent the WP approval letter. AD 08/28/2018: Received the following e-mail from Mr. Galdun: Ainura, the contractor has exposed the UST and is in the process of cutting it apart for removal. The tank can't be removed whole since the only access to the rear of the building is a narrow tunnel/alley. The tank was drained and cleaned before cutting operations began. I will be on-site this Thursday at 1pm to evaluate soil condition and discuss the next steps with Brookside Environmental (UST removal contractor). I will keep you apprised of progress as we move forward. Regards, Frank Galdun 646.542.3465 Sent Mr. Galdun the following e-mail: Dear Mr. Galdun, Please make sure that the UST removal process will be photo documented at every stage of its removal. Detailed pictures should be attached to the UST closure report. Please remember that end-point soil samples should be collected according to the state requirements. If groundwater is encountered in the excavation pit during the tank removal, a groundwater grab samples should be collected for laboratory analysis. Thank you. Regards, Ainura Doronova - Environmental Engineer AD 09/05/2018: Called and spoke with Mr. Galdun regarding site progress. He said that the tank is sitting on the bedrock. They had excavated contaminated soil around the tank and collected the soil samples. No GW was encountered. They are still cutting and removing the tank. Requested to update me on the progress. AD 10/21/2018: Received an e-mail from Mr. Galdun with a link to Dropbox for the report. AD 11/14/2018: Was not able to open the file. To inform Mr. Galdun. AD 11/20/2018: Spoke with Mr. Galdun. Asked to re-submit the report. later in the day received the PDF copy via e-mail. Will review. AD 11/21/2018: Reviewed the UST Closure Report. The report states that UST removal work occurred at the site between August 16, 2018 and September 7, 2018. A total of 2,945 gallons of petroleum and water mixture was removed from the UST by a vacuum truck and transported off-site for disposal. The UST and associated piping were removed and transported to a scrap metal yard for recycling. After the UST was removed, a total of 87 tons of petroleum-impacted soil were excavated and transported for disposal to the Clean Earth facility. in New Jersey. A total of ten post-excavation end-point soil samples were collected on August 31, 2018. Of the ten post-excavation soil samples collected, only one single sample was reported by the laboratory to contain VOCs and SVOCs at concentrations slightly exceeding NYS SCLs. No water-bearing deposits were encountered during excavation activities and competent bedrock was encountered at the bottom of the UST excavation in its entirety. The post-excavation soil analytical data indicate that only a residual level of petroleum-impacted soil remains at an isolated and localized area within the site, which could not be removed due to the structure integrity concerns. Based on the results of soil data, the consultant requested closure of the spill case. AD 11/27/2018: Case closed. AD

| DEC Memo: | Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 4/29/2004 Sangesland spoke with Neil Tomasetti at Eastmond. He was hired by the building owner to look at an old tank in the basement. Tank stands on the ground (slightly enbeded into the cement floor). Some oil staining is found right around the tank. Eastmond will install temp tanks on 4/30. Eastmond will pull the existing tank on 5/3. Cleanup from under tank will depend upon what they find on 5/3. 5/5/04 - Sawyer - Talked to Neil at A.L. Eastmond and he is going to get documentation that the spill and cause have been remedied. 6/1/04 - Sawyer - Recieved documentation from Neil that this spill was cleaned in its entirety by A. L. Eastmond. No further |

**SPILL NUMBER 0401015 (Continued)** **S106471532**

action. Closed.
Remarks: about 1 gallon of #2 oil was spilled that they can see. they dont know if seeped into the ground. they are going to be removing the tank tomorrow.

| DEC Memo: | 9/4/2018 - Feng - Duty Desk. Spoke to Abraham Wachsler of NYC Tank Testing. He could not get any pressure during a tank test. It is a 5,000-gallon UST for #4 oil. He suspected maybe open line somewhere. They are exposing and isolating the tank and the line to do the retest. DEC has sent them a letter requiring the test, the deadline is tomorrow. Staff required updates to be sent upon the retest. Talked to DEC Leszek Zielinski of PBS unit. PBS is doing routine requirement of tank testing. No need for site/tank inspection. PBS 2-403962 Abraham Wachsler NYC Tank Testing 646-321-2876 ABE@NYCTankTestingInc.com 09/12/18-Hiralkumar Patel. 2:48 PM:- received message from Abraham from NYC Tank Testing. 09/13/18-Hiralkumar Patel. 12:30 PM:- spoke with Abraham. he mentioned that the tank is underground inside the building. today they exposed the tank top and noted holes in tank top. based on this findings, owner has decided to close UST in-place. temporary tanks are being installed and the UST will be cleaned tomorrow. informed Abraham that the department requires subsurface investigation along/under underground portion of entire tank system (including piping). he is planning to collect samples through tank's bottom. asked him to investigate along underground section of piping also. asked him to provide schedule for subsurface sampling so site inspection can be scheduled. alternate address: none PBS #: 2-403962. as per PBS record, the site has one (1) 5,000 gal #4 oil UST, in-service, installed in Dec. 1929. other spill #: 9911378 was reported on 12/29/1999 as 2 gal unknown petroleum was found in manhole. case closed. DEC Feng sent a letter on 09/11/18 requiring submission of tank system test and spill cleanup report within a month. 12:53 PM:- spoke with Mr. O'Connell and informed him about discussion with Abraham. Mr. O'Connell confirmed receipt of letter dated 09/11/18. Olin Bark Realty Co., Inc. **property owner** c/o Patrick O'Connell Vice President PO Box 817 Yonkers, NY 10704 Ph. (718) 324-0886 email: pocjja@aol.com 10/05/18-Hiralkumar Patel. 10:47 AM:- received call from NYC Tank Testing and scheduled a site inspection at 1 PM on 10/15/18 for subsurface investigation. 11/20/18-Hiralkumar Patel. DEC Piper requested to transfer case to him as part of ongoing investigation/remediation under spill #: 1804303. case transferred to DEC Piper. 1/16/19 - Obligado - This spill is transferred from Piper to Obligado as per Austin I received the following forwarded area: Dear Inspector Kumar Patel, New York City Tank Testing Inc was retained by Olin Bark Realty Co. Inc. regarding the tank test failure at 2888 Grand Concourse. NYCTT in turn, hired ABC Tank Repair & Lining Inc to pump out and clean the 5,000 gallon oil tank. Following the tank cleaning, we attempted to take a soil sample from the tank bottom. However, water started entering into the tank, making it unfeasible for us to collect a proper sample from below the tank bottom. Therefore, NYCTT collected a soil sample from the side of the tank. After several boring attempts encountered refusal, one soil sample was collected from the side of the oil tank, to a depth of nine feet (9 ) below surface grade, which is 12 below the bottom of the tank. The soil sample was placed on ice, picked up, and analyzed by York Analytical Laboratories, Inc. located at 120 Research drive, Stratford, CT |

**RESIDENTIAL (Continued)** **S122878531**

06615. Attached is a copy of the analytical report and the chain of custody. Should you require any further information, please do not hesitate to call our office or Abraham Wachsler at 646-321-2876. The results in ug/Kg were from the soil sample were: xylene: 3.3 ppb flourene: 61 phenanthrene: 290 pyrene: 110 1/18/19 - Obligado - I sent an email to Goldie at NYCtanktestinginc.com I requested a scaled Site Map showing the location of the UST, the location of the soil borings, and the location of the remote fill lines, and a copy of the tightness test report. 1/23/19 - Obligado - I resent the above email request. 9/30/20 - Obligado - I reviewed a Spill Closure Report dated May 21, 2019 and supplemental documentation provided by NYCTT. Spill summary - On September 4, 2018, a leak was detected in the ullage portion of the tank and the fill line. On 9/14/18, the tank was pumped and cleaned. Several borings were advanced around the tank but bedrock was encountered. Only one soil boring location was able to collect a soil sample from below the tank which was below standards, results tabulated above by Kumar. Manifests were provided for that work. On 4/2/19, NYCT excavated contaminated soil in the area of the old fill line until structural excavation limits were reached. The excavation was 8 ft x 4 ft x 52 in deep. 30 55 gallon drums of contaminated soil were removed and properly disposed of. The oil tank was abandoned in place with slurry. I inspected the excavation on 5/3/19 and determined further excavation was not feasible, and requested a well installation in the center of the excavation to recover product if present. I also required soil borings in the sidewalk down gradient. Soil boring logs and analytical data were submitted in the Spill Closure Report. 3 soil borings were advanced, from north to south along the sidewalk SB1, SB2, and SB3. The two southern most borings (sb2 and sb3) did show field evidence of petroleum contamination (droplets of free product and staining). VOCs were slightly above standards in SB2 (15-17ft) (.3 ppm benzene and .99 ppm xylene) and SB3 (15-18 ft)(.260 ppm benzene and 0.780 xylene), SB2 (15-17 ft)also had 4 SVOC compounds slightly above standards The northern most boring SB1 was clean with no evidence of contamination from 0 to 16 feet where refusal was encountered. Based on the absence of petroleum contamination in the northern most boring SB1 which is between the tank system and the subway tunnel seep point, it does not appear that this tank system was the source of the tunnel intrusion. The well installed in the center of the excavation was dry with no free product based on photodocumentation of the well from NYCTT. Based on the documentation submitted to date, this spill appears to have been remediated to the extent practicable and this is closed.

Remarks: Underground portion going under the sidewalk has been isolated. Tank will be uncovered for inspection tomorrow.

A & R Unity Mgt. LLC. **property owner** 36 East 37th Street New York, NY 10018 Attn.: Evan Robert **property owner** Ph. (212) 695-3510 Fax (212) 643-2061 email: evanrobertap@aol.com 03/14/11-Hiralkumar Patel. 12:59 PM:- left message for Evan Robert. 1:07 PM:- received call from Mr. Robert. asked him to conduct an isolation test or pump out tank by end of tomorrow to avoid any further release. 1:50 PM:- spoke with John at ATS. he mentioned that site has 1,000 gal tank. 2:04 PM:- sent TTF letter to Mr. Robert requiring isolation test. letter emailed to Mr. Robert. asked Mr. Robert to submit isolation test result by 9 AM on 03/16/11. 03/16/11-Hiralkumar Patel. 11:23 AM:- received call from Mr. Robert. he is still waiting for cost proposal for isolation test.

**IN THE BASEMENT (Continued)** **S110769618**

during conversation, he mentioned that tank is aboveground. informed him that if tank is completely visible (including bottom) and there is no leak from tank bottom and lines to/from boiler are running aboveground with no leak, then no need for isolation test. but there should be no more oil deliveries until the tank system is fixed and tested tight again. informed him that if there is leak found in fill line and if portion of fill line is underground, then further investigation is needed. Mr. Robert will call back after talking to his super to confirm that tank is completely aboveground and not wrap with concrete. 03/17/11-Hiralkumar Patel. 10:28 AM:- received call from Daniel from DD Contracting, company hired to do tank repairs. Daniel is on site right now. he mentioned that site has 1,000 gal tank completely wrapped in concrete. he was told to fix the epoxy patch on top of tank. as per Daniel, during tank cleaning, contractor broke part of concrete wrap on top and cut hole in tank. after cleaning, tank cut was patched (approx. 15 inches by 13 inches). Daniel was told that during pressure test, air was coming out of this patch on top. Daniel observed five weep holes on concrete wrap and no sign of oil release from these weep holes. he did not see any sign of any oil release from the patch also. fill line runs aboveground and fill port is located on the building foundation wall. no sign of oil release found on foundation wall where fill line enters into building. supply/return lines runs aboveground, wrapped in concrete, along the basement floor. Daniel DD Contracting Ph. (646) 321-2646 03/21/11-Hiralkumar Patel. letter sent to Mr. Robert came back undelivered. 4:15 PM:- spoke with Daniel. he has finished repair and waiting for re-testing. he will call once retesting is scheduled. 03/24/11-Hiralkumar Patel. 3:41 PM:- sent email to Mr. Robert requiring to submit result of retesting of tank system. 03/29/11-Hiralkumar Patel. 11:54 AM:- spoke with operator at Mr. Robert's office. she mentioned that ATS went for retesting but required more repair. technician is on-site today for repair. she will ask technician to call. 12:25 PM:- received message from Daniel. 2:42 PM:- left message for Daniel. 4:18 PM:- received call from Daniel. he mentioned that tank system failed again after some repair. 4:22 PM:- spoke with Mr. Robert and Daniel. asked Mr. Robert to either prove that tank/supply/return lines are not leaking (by having isolation test of these parts) or pump out tank until the system is tested tight. also asked Mr. Robert to seal the fill port to prevent any more oil deliveries. told Mr. Robert that if required document is not submitted by end of tomorrow, case will be referred to legal. 03/30/11-Hiralkumar Patel. 10:30 AM:- visited site. met Daniel. site occupies by a five story building with a basement. a 1,000 gal AST is completely wrapped in concrete. tank is about 4.5 ft away from the boiler. all the lines running aboveground except about 4 ft of supply/return lines covered with concrete on top of boiler room floor (area between the tank and boiler). fill and vent line cross the foundation wall and then fill line runs aboveground to building line (about 4 ft from foundation wall). found old supply (or return) line connected to the tank. found open end of old fill line in building foundation wall where the current fill line enters into the building. five weep holes at the bottom of concrete wrap. no oil found seeping out of these weep holes. gauge was not working. Daniel mentioned that after they repair the patch on tank top, tank system failed again. so now they have to remove the old patch and fix it. super mentioned that about 600 gal oil delivered yesterday. 1:45 PM:- left message for Mr. Robert. 04/15/11-Hiralkumar Patel. 3:26 PM:- left message for

**IN THE BASEMENT (Continued)** **S110769618**

Daniel inquiring updates. 05/26/11-Hiralkumar Patel. 1:30 PM:- left message for Mr. Robert. 1:36 PM:- received message from Shin, from Mr. Robert's office. 06/06/11-Hiralkumar Patel. 4:33 PM:- spoke with Mr. Robert and he mentioned that all work has been completed. spoke with Shin, Mr. Robert's assistance. she mentioned that tank passed the test. asked her to submit a statement (or invoice) from contractor including reason for tank test failure, repair done, any contamination during repair or not and passing tank test result. asked her to submit documents by end of 06/08/11. 4:40 PM:- sent email to Mr. Robert and asked him to submit spill closure report by the end of 06/08/11. 06/07/11-Hiralkumar Patel. 2:12 PM:- received email from Mr. Robert including copy of invoice. as per invoice from DD Contracting, they replace leaking epoxy patch on oil tank with fiberglass resin patch. 06/09/11-Hiralkumar Patel. 11:44 AM:- sent email to Mr. Robert and asked him to send letter report from contractor including following: - cause of tank system failure - type of repair done - any contamination found during repair or not - results of tank system test performed after repair done asked him to submit documents by 06/13/11 - final notice. 08/05/11-Hiralkumar Patel. 11:24 AM:- spoke with Shin. she has access to Mr. Robert's email account and she mentioned that they did not received email dated 06/09/11. informed her that email will be resent. asked her to submit report as per the email, by the end of 08/09/11. 11:28 AM:- sent email to Shin (at Mr. Robert's email address) requiring to submit report by 08/09/11. 11:30 AM:- spoke with Shin. she confirmed that she received the email and will send document by 08/09/11. 08/11/11-Hiralkumar Patel. 4:29 PM:- received email from Shin including letter from DD Contractring. as per Daniel from DD Contracting, tank system failed a test due to a faulty epoxy patch located towards teh top of the tank. the epoxy was completely removed and a new resin patch was applied. no contamination found during repair. as per Daniel, tank was pressure tested and passed. 08/15/11-Hiralkumar Patel. 2:33 PM:- spoke with Shin and asked her to submit tank system test result. 4:09 PM:- received email from Shin including tank pressure test result. result is not acceptable as includes tight tank and no information about system test. 08/19/11-Hiralkumar Patel. 11:50 AM:- spoke with Shin and informed her that tightness test must be performed for entire system. she will call ATS, who performed test, for corrected result. 12:35 PM:- received email from Shin. she mentioned that Kristi Clune from ATS environmental will send tank test result. Kristi Clune ATS Environmental Ph. (800) 440-8265 Ext. 107 Email: kristi@atsenvironmental.com 12:36 PM:- spoke with Kirsti. she mentioned that they tested entire tank system. asked her to submit test result that shows tank system is tight. 1:16 PM:- received tank test result from Kristi. based on available information, case closed. **also see spill #: 1012134 as same managmenet and tank test failure.**

Remarks: Tank top issue, not leaking product.

| DEC Memo: | 02/28/07-Vought-Called Ray Sojka and not in office. Vought called and spoke to HESS Steve King (732-750-6707) who indicated that Eastmond was responding to site and no sewers or drains affected. Spill onto concrete outside of vent and is less than five gallons. Hess will not perform additional delivery until gauge is repaired/replaced. As per King, building rep (Arthur-718-690-2005) ordered 3500 gallons and had 900 in tank at time of overfill and tank is 5000-gallon #6 fuel oil. Vought later spoke to Sojka and super not onsite at time of spill. King will return call to DEC with supers contact info to update PBS address. Vought called Arthure and contact info on PBS and Arthurs number was not valid and PBS contact info was outdated. 03/01/07-Vought-Received message from Ray Sojka that building manager is Arthur Pepaj (718-690-2005). Vought called Pepaj and answer is disconnected. Vought sent letter requiring petrometer repair and submission of PBS registration to building owner listed on Property Tax info and NYSDOH Corporations database: Mr. Arthur Pepaj Gore Creek, LLC. 590 56th Street West New York, NJ 07093 Spill closed by Vought due to no impact to soil and groundwater and cleanup of spill however lack of PBS registration submitted to DEC Falvey for enforcement. |
| Remarks: | SPILL WAS ON CONCRETE ON OUTSIDE OF ABOVE APARTMENT BUILDING DUE TO |

| DEC Memo: | 02/27/09-Vought-Called John Misini (MMI Mechanical 718) 449-4166) and left message with secretary to return call to Vought. Vought called building manager (Arthur Pepaj (718-690-2005) and line was busy. ABC tank cleaners to clean out secondary containment and repair or replace the tank. Will |

**(Continued)** **S104650574**

install temporary tank. No sewers or drains affected and spill on concrete. Tank will be emptied as well and cleaned. 03/02/09-Vought-Called ABC Tank (718-272-2800) and left message with Frank to have someone return call to confirm cleanup of site. 05/04/09-Vought-DEC Austin received phone message from undeterminable caller from MMI. Vought called and spoke to MMI secretary and left message for Misini to return call to DEC with cleanup confirmation. Vought received call from and spoke to Lester Starr (MMI) and report will be submitted to DEC. ABC cleaned and pumped tank. 13 barrels of oil absorbent and impacted debris. Tank was taken offline and fill port was sealed and proposals submitted for tank replacement and building is short of funds and stopped job. MMI not performing further work as they have not been paid to date. Tank is AST on saddles with debris around tank and tank is butted up against rear wall of building so not sure if partially buried. Tank leg broke that fractured seam and caused spill. Work to date summary will be faxed to DEC. Contaminated soil letter to be sent out upon receiving faxed letter. 05/05/09-Vought-Received letter from MMI Mechanical (Lester Starr Ph:718-449-4166 Fax:718-449-4173) dated 5/4/09. One page summary of work performed to date including to pumping and cleaning of AST, disabling of fill terminal and all noticeable contaminants were drumed and awaiting removal. Presently due to financial complications we have halted work at this job site . Awaiting approval for the demolition of the existing tank any additional cleanup can be completed and including performance of subsurface investigation. Vought sent CSL with one month due date with: 1)PBS requirements 2)delineation of soil and groundwater contamination (if applicable) to owner as per ACRIS with cc to MMI: Gore Creek, LLC. 590 56th Street West New York, NJ 07093 07/13/09-Vought-Received call from and spoke to Doichman and he hired Advanced Cleanup Technologies (Paul Stewart 516-933-0655x12) and soil borings were performed and contamination found from 6.5' -4' below secondary containment floor. Metropolitan Heating and Oil will remove and replace tank. Slab is 700 square foot and contaminated soil will be excavated including proper disposal. Excavation will be shored and ACT will collect endpoint samples. No groundwater encountered in borings (approximately 4 borings). Bedrock at 7' and no product found on bedrock due small crack width. DEC will require excavation of contaminated soil only provided that DEC site inspection provided before backfill. Metropolitan submitted PBS registration. 10/16/09-Vought-Received call from Doichman (347-739-1997) and Vought returned call and spoke to Doichman. Customer obtained funds and site

**(Continued)** **S104650574**

was excavated down to bedrock
(approximate depth was 5'bg). Three boring samples were performed. Excavation was shored and Paul
Stewart on site today and he will do PID screening and collecting soil samples from sidewalls for
analysis and will also document intergrity of bedrock and no fractures with photos in lieu of
bedrock groundwater samples. 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per
DEC Austin and Vought transfer to Section A. 10/13/10 - Raphael Ketani. The spill took place on
2/27/09 and consisted of a tank that was leaking from a seam. The seam leaked because one of the
footings had cracked. The PBS registration (#2-237523) lists an active 5,000 gal. AST with #6 oil.
The paper file and the E-docs have a CSL, and a May 2009 letter from MMI Mechanical. I tried to
contact Jay Doichman (doych-man; contractor) at (347) 739-1997 and at (347) 294-0110, but I could
only leave messages that the DEC had not received the investigation and remediation report. I
contacted Paul Stewart 516-933-0655, ext 12 of ACT and asked him whether he could send the
remediation report. He said that ACT did the soil borings, but that I should contact Mr. Doichman
for the report. 12/3/10 - Raphael Ketani. I spoke to Mr. Doichman. I asked him for the cleanup
report. He said to give him two weeks and he will send it to me. I said that would be fine.
12/20/10 - Raphael Ketani. I spoke to Mr. Doichman. He said that he and another person are putting
together the documentation regarding the remediation. He said that they have the end point sample
results and other documentation. I will get everything soon, but he didn't know how soon. I asked
him how much time he needed, but he couldn't say. I told him that I will wait to receive the
documentation. 3/14/11 - Raphael Ketani. As the cleanup and remediation documentation have not been
received, and as calls to the contractor have been fruitless, I sent a followup letter to the Gore
Creek LLC with an April 8 deadline for receipt of the documentation. 4/13/11 - Raphael Ketani. The
deadline past with no response from Mr. Doichman or Gore Creek LLC. Therefore, I sent a STIP
package to Gore Creek with a deadline of May 6, 2011. 5/6/11 - Raphael Ketani. I tried to contact
Mr. Doichman at (347) 739-1997, but I could only leave a message. The message stated that since the
DEC never received the signed STIP, the spill case will be referred to our legal division for
action. Mr. Doichman called me back. He said that he had been waiting for money in order to resume
the remediation work. He had just received a partial payment. So the work will start next week.
However, a remediation report can not be issued at this time as all of the work has not been

**(Continued)** **S104650574**

completed. I told Mr. Doichman that the case will be referred to our legal division as Gore Creek
has not submitted the report. He said that he understood. 5/9/11 - Raphael Ketani. I submitted a
Case Initiation form to Randall Austin, Chief of the Spills Unit, for his signature. The form was
submitted due to Gore Creek, LLC's failure to submit the investigation and remediation report and
their failure to submit the signed STIP. Mr. Austin signed the Case Initiation Form and it was
walked up to our legal division. 9/15/11 - Raphael Ketani. I contacted Mr. Doichman at (347)
739-1997 and asked him whether progress had been made at the site. He said that he will have to get
back to me. 10/4/11 - Raphael Ketani. An internet search for Jay Doichman turned up a person by the
name of Jay Deutchman with the same cell phone number - (347) 739-1997. The company listed with his
name was East Coast Cleaning and Restoration, LLC, 598 Grand Concourse, Bronx, 10451. From the
internet page that I found, East Coast Cleaning appears to be a home or business cleaning service.
As the cell phone numbers are the same and as the name sounds the same, I will now refer to Mr.
Doichman in the case notes as Mr. Deutchman. 12/12/11 - Raphael Ketani. Today I received the
12/9/11 MJ Engineering and Land Surveying (MJ) Summary of Remedial Activities. I began my review.
12/13/11 - Raphael Ketani. I finished my review of the MJ SRA. Initially, ACT (the investigation
consultant) performed 3 soil borings with the tank (AST) still in place near the boring locations.
Oil contamination was found at SB-1 at 5 feet down and at SB-3 at 6.5 feet down (top of bedrock).
Later, ACT removed the tank and excavated the area under and next to the tank. The contaminated
soil was hauled away. They took 5 end point samples. The samples were composited and submitted to
the lab for analysis. The composite sample results were entirely non-detect for all analytes,
except for some very low hits below CP-51 for 7 SVOCs. From the information in the report, it
appears that the remediation was completed. 1/9/12 - Raphael Ketani. The owner signed the Order on
Consent. From the information in the Summary of Remedial Activities report, it appears that the
site has been remediated. There should be no threat to the public or the environment from the
residual contamination. Therefore, I am closing the spill case effective today. A SCL was sent to
Gore Creek LLC.

Remarks: Caller states a building super noticed the seam on the tank leaking. Repairs are ongoing. Spill is contained in the tank room. Unknown quantity of oil at this time.

| DEC Memo: | Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO . This spill case was reassigned from TJDemeo to Perez on 06/13/2005. Spill closed on 09/13/2005. There is no supporting documentation available at this time. However, the facility is registered in the Petroleum Bulk Storage Program and there were no leaks associated with the spill, therefore the potential impact to soil is unlikely. By Perez. |

| DEC Memo: | 5/8/14: Mahat A TTF letter was sent to the following address: Dora Genao Pond Place Properties LLC 1325 Castle Hill Ave Bronx NY 10458 May 8, 2014 Also, a voice message was left to Ms. Raphel ( 7187926200 ) to call back with more information about the leak. 8/19/14: Mahat A phone message was left to Rafel Ravera to call back with more information. 8/19/14: Mahat Receivesd a call from Dora Genao and mentioned that the tank was empty during the test. They are on |

**APT BUILDING (Continued)** **U003393590**

process of removing the tank and moving to the gas. The tank removal process will take place in 9/4/14. DEC Mahat's email add was provided to Genao so she can send a narrative about the progres on the spill. 8/20/14: Mahat An email was recieved from Dora Genao confirming that the tank removal process is going to take place on 9/4/14. Here is her email: Dear Mr. Mahat, The following is to confirm our conversation of yesterday, that Riteway Tank Maintenance will be removing tank at 2805 Pond Place on September 4th, 2014. If you have any questions, please do not hesitate to contact me. Sincerely, 12/09/14: Mahat e/c : An email was sent out to Ms. Genoa requesting for a tank closure request. DEC is waiting for a clsoure report. 12/15/14: Mahat A tank removal letter was sent to the Department and it is uploaded on D2. An email was sent out to Ms. Genoa: Ms. Genao, Thank you for the paper work. I have updated my database with your attachments. In order to close the spill case I need a report. A letter report must be submitted to the Department including: site plan, cause of the release, summary of cleanup activities, site observations, post-excavation sampling results and contaminated material disposal manifests. The report must be submitted to this office as soon as possible, referencing the spill case number (see above) and the site address. DEC is waiting for a closure report. 12/15/15: Mahat DEC Mahat received an email with report from the retained contractor. Email: Hi Tosh, There was a failed tank test (ullage dry portion fail). We installed temps, pumped and clean out tank but no contamination was present. We scrape and washed tank, then removed it. The concrete floor was sound and solid, there was no contamination present (I apologize, I only have pre-removal pictures, but you can see the excellent condition of the floor). We had submitted a proposal for a new tank installed, but was not awarded any subsequent work. They may have gone to gas, we do not know. The clients contacted us in March of 2015 to remove the temp tanks. The clients did not pay for a closure report. If you need any additional information, let me know. I d hate to charge them for nothing Thank you in advance, David Chan Riteway Tank Maintenance Corp. 700 Hicks Street. Brookllyn, NY 11231 tel - 718-855-7272 fax - 718-855-7244 All report has been uploaded on D2 for reference. Tank is removed and no visible contamination on the concrete below. Building is running on natural gas. Based on the report, the Department does not warrant any further investigation on the spill case. Case is closed on NYSDEC Spill Database.

Remarks: tank test failure

| Record Added Date: | 09/27/2016 |
| Record Updated Date: | 04/14/2025 |
| Update By: | LAGORTON |
| Site Description: | Location: The 0.578 acre site is located in an urban area at 2409 Jerome Avenue in the Fordham Heights neighborhood of the Bronx. The site is identified on the New York City Tax Map as Block 3199, Lots 106 and 113. The site is bound by a 2-story commercial building (2415 Jerome Ave) followed by West Fordham Road to the north, Jerome Avenue to the east, a 2-story academic facility (2375 Jerome Avenue) followed by West 184th Street to the south, and a 5-story multifamily residential buildings (2390-2410 Davidson Avenue) followed by Davidson Avenue to the west. Site Features: The site is rectangular shaped and encompasses an approximate area of 25,200 square feet. The proposed site is comprised of an asphalt-paved parking lot and two 1-story structures used for auto repair. The topography of the site generally slopes to the east. An NYCTA elevated structure (the "4 "-line) is east of the site, above Jerome Avenue. The |

**CON EDISON (Continued)** **S116551319**

transit structure is offset approximately 28 feet from the east property line. Current Zoning and Land Use: The proposed site is located within residential zoning district R7-1 with a C2-4 commercial overlay. R7 districts are classified as medium-density apartment house districts. The district has a maximum floor area ratio (FAR) of 3.44. The surrounding parcels are located in residential and commercial zoning districts. Past Use of the Site: The site was used as a fuel dispensing station and auto repair facility from 1927 to 1989, a greasing and auto laundry facility (circa 1945 to 1989), and auto repair facility from 1927 to the present. Thirteen closed 550-gallon gasoline underground storage tanks (UST) and one closed 4,000-gallon gasoline UST were associated with the former fuel dispensing station. The thirteen closed 550-gallon USTs and closed 4,000-gallon USTs were installed in December 1968 and December 1978, respectively. Based on the NYSDEC petroleum bulk storage (PBS) records (PBS # 2-188492) and an interview with site personnel, these USTs were decommissioned and removed from the site between 1988 and 1991. A petroleum spill (Spill No.: 88-05383) was reported to the NYSDEC during the removal of a UST in September 1988 when an unknown amount of gasoline was released into surface soil and groundwater. The spill was subsequently closed by the NYSDEC in February 1989. Site Geology and Hydroqeoloqy: The subsurface strata consists of a layer of historic fill material that extends to depths of up to 9 feet bgs followed by native soil and bedrock. The historic fill consists of brown-black, medium to fine sand with varying amounts of silt, clay, gravel, and debris. Native soil consisting of a layer of gray-brown clay with varying amounts of sand and silt, followed by a layer of brown-black, medium to fine sand with varying amounts of gravel, silt, and clay was encountered beneath the historic fill layer. Bedrock, consisting of fine-grained biotite-quartz gneiss, is present at about 15 to 18 feet bgs across the site; bedrock is weathered near the contact with overlying soil in isolated locations. Depth to groundwater ranges from about 9.63 to 10.00 feet bgs. The poor recharge experienced during groundwater sampling likely indicates groundwater is perched on bedrock. Groundwater is expected to flow to the west towards the Harlem River, which is located about 3,000 feet west of the proposed brownfield property.

Env Problem:

Nature and Extent of Contamination: Prior to Remediation Based on the investigations conducted to date, known contaminants including chlorinated solvents, semi-volatile organic compounds (SVOCs), metals, and other volatile organic compounds (VOCs) were present in the subsurface. These contaminants are impacting soil, groundwater, and soil vapor. Previous investigations included a Phase I Environmental Site Assessment (ESA) and a Phase II ESA. Soil - The concentrations of 1,2,4-Trimethylbenzene (VOC), 1,3,5-Trimethylbenzene (VOC), Ethylbenzene (VOC, and Toluene (VOC)exceeded the Commercial Use SCOs in the samples collected from 10-11 ft bgs in two (2) borings installed across the Site (SB01, and SB03). Benzo(a)pyrene (SVOC) and Copper (Metal) Commercial Use SCOs in the 0-2 foot interval in two (2) borings (SB07 and SB08). Groundwater - VOCs detected in groundwater samples collected were 1,2,4-Trimethylbenzene (VOC), 1,3,5-Trimethylbenzene (VOC), Benzene (VOC), Ethylbenzene (VOC), n-Propylbenzene (VOC), Naphthalene (VOC), o-Xylene (VOC), p/m-Xylene (VOC), Toluene (VOC), 2,4-Dimetgylphenol (SVOC), Naphthalene (SVOC), Barium (Metal), Iron (Metal), Magnesium (Metal), Manganese (Metal), Sodium (Metal), and Lead (Metal). Soil

**CON EDISON (Continued)** **S116551319**

| | |
|---|---|
| | Vapor - PCE was detected in one out of the three soil vapor samples at the concentration 63.7 ug/m3. |
| Health Problem: | Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. People are not coming into contact with the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil), may move into nearby buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion (SVI). The potential exists for people on-site to inhale site contaminants in indoor air due to soil vapor intrusion. Annual SVI sampling is monitoring the on-site building and SVI does not represent a current concern for the indoor air. Furthermore, environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings. |

| DEC Memo: | 01/29/18 - Lakhani Tank tightness testing was performed for the 1500 gallon #2 fuel oil AST encased in concrete. The tank failed with a dry leak due to a crack on top of the tank. East Coast Environmental (845-348-6355) will be on-site tomorrow to retest and make repairs. The buyer is represented by Teconic Investment Partners. PBS #2-153389 Current Owner: NYSANDY12 CBP3 LLC 1075 Gerard Ave Bronx, NY 10452 TTF sent to: SimplyBetter Apartment Homes 1075 Gerard Ave Bronx, NY 10452 Assigned to DEC Zhune. 3/9/18-James Wilson from East Coast emailed the report dated March 9, 2018. As per the letter On January 29, 2018, one (1)aboveground storage tank (AST)failed to pass a precision tightness test. On February 27, 2018, East Coast Environmental services of New York (ECES)was on site to performed an inspection of the AST andiscovered the fail tank test was due an improperly sealed manway located on the tank top. (ECES)repaired an sealed the mamway; the tank system was retested and passed on March 1, 2018. The result of the failing and passing tank test are |

| DEC Memo: | 7/25/2006 Sangesland spoke to Eddy Feliciano of Stuyvesant Oil. He said the house has two-275 gal tanks tied together in the basement. One of these tanks appears to have been dented and the tank is leaking from this point. Approx. 4 gallons of #2 oil formed a puddle on the cement floor. Stuyvesant laid down absorbant pads and booms to keep the spill contained. USA Tanks (718-981-5710) was hired to pump the tank out later today. 7/27/2006 Sangesland confirmed with USA Tanks that they did drain the leaking tank and closed off the valves so it's isolated from the second working 275 gal tank. The property owner is trying to decide if they'll repair/remove/replace the leaking tank. Sangesland told USA Tanks that they need to send in the following: 1) Color photos of the floor area showing the spill was cleaned. 2) A written statement saying the area was cleaned and no cracks were seen in the floor which may have caused underground contamination. 3) Documentation of what work was done on the tanks (repair/replace/remove). 9/20/06- DEC Piper spoke w/ Virginia Sardiis. As per conversation, work was completed. DECP iper pnoned USAP ENV. 718.981.5710.- As per conversation, leak was from tank. They removed one of the tanks and connected the single tank to the burner. Closed. E-doc report upon reciept. |

| DEC Memo: | Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 8/30/2004 Owner says there were no soil borings done around the tank. Owner says Eastmond cleaned the tank and then did the abandonment. Sangesland asked for copies of Eastmond work notes, specifically looking for statements about the condition of the tank after it was cleaned out. (Did the tank have holes?) 9/13/2004 Sangesland reviewed a package of information submitted by Steve Sibrizzi of Sibrizzi Fuel Oil Inc. (1528 Hawthorne St, Bronx, NY 10469). 10,000 gal #6 tank was abandoned in place after it was drained, cleaned and inspected by Mr. Sibrizzi and Eastmond. Letter from Eastmond says cleaning was done on Oct 27, 1997. Tank was inspected several days later and found to be in the same condition (no oil/water leaked back into the tank) Spill Closed |

**COMMERCIAL (Continued)** **S102399503**

a copy of tank registr.
During Phase 1 foure tanks were found. Soil boring around one of them showe soil contamination.
9/23/2005 CSL sent to: William Schur Doc Garage LLC 2432 Grand Concourse Bronx, NY 10458 10/28/2005
I received the spill report from J. Kolleeny. Left a message for William Schur (718-733-6300). AZ
12/14/2005 I called William Schur (representative of Schur management company). I requested that
Schur management delineate and if needed remediate dicovered soil contamination. A report should be
submitted to DEC. AZ 12/16/2005 Conversation with Ray Kahn (ESPL Environmental 212-330-7501). They
will send a copy of a tank closure report. AZ 1/4/2005 A report was received. Soil samples compared
to STARS not TAGM. Proposed 3 new borings around damaged tank No.5 (contaminated sample S5). Soil
sampling proposed to 6' only below tank bottom and then at 10' interval. This controvenes DEC'
practice. Called R. Kahn and left a message. AZ 1/10/2005 I contacted R. Kahn (212-330-7501)
regarding their WP. I made a several modifications to the plan including gw sampling, number and
depth of soil samples and purging. He will send us a modified version. AZ 1/11/2006 I issued an
approval for UST Abandonment Revision 1 Report. Upon completion of the proposed work a report will
be submitted to DEC.AZ 1/30/2006 I contacted Ray Kahn (ESPL Env.). They are drilling at the site
today - geoprobe drilling. Soil is heavily contaminated. I gave him instructions for the site
investigation and drilling procedures. PID readings on soil are about 300 ppm. AZ 4/3/2006
Contacted ESPL. They mailed report to us. AZ 4/27/2006 Received a report from Ray Kahn. The VOCs
numbers in soil are very high around 223,000 ppb but excavation is impossible due to the structural
conditions and tank is still in place filled with concrete. AZ 5/18/2006 Discussed the site with
Ray Kahn. Three borings were advanced by a geoprobe but all hit refusal at 10' depth. Soils samples
exhibit heavy petroleum contamination. Sample S-2 has total VOC concentration about 222,900 ppb.
Suggested to use a skid rig to obtain more samples utilities and structures permitting. The former
steel 2,000 gal #2 oil UST was filled with concrete and closed in place. It's located in a basement
of a commercial office. It's buried in soil and located adjacent to the foundation of the building.
Tank removal is not feasible. Ray Kahn will get back to me on the possibility of using skid rig for
delineation and remediation of this site. The tank had about two feet above it. They will look into
apossibility of installing a few wells on the sidewalk near the building. The subway is very close
to the building. It's a sensitive location due to the proximity of subway and possible free phase

**COMMERCIAL (Continued)** **S102399503**

migration. AZ 6-2-2006 Conversation with Ray Kahn. They will install 3 wells with a skid rig in the
basement before the end of June.I asked to check for underground utilities and structures. AZ
8/4/2006 Contacted Ray Kahn (917-939-7366). They were drilling at the site all week using the skid
mounted auger. At about 7' depth they encountered petro odor in soil. After 9' odor disappeared.
They hit groundwater at 12'. They broke through the rock at 10' to 12' depth. The groundwater
appears to be clean. They sealed wells with bentonite. They will finish today three wells. Ray did
not know what were PID readings at this time. I instructed him to completely seal off the wells in
unsaturated zone to prevent cross contamination. AZ 1/31/2007 Contacted Ray Kahn (917-939-7366).
Three wells were installed. One well encountered free phase. Two wells encountered dissolved phase
contamination. They drilled through rock. The have been collecting free product in one well with a
bailer. The collected 110 gallons of water and product. He will send me a report ASAP. AZ 3/26/2007
Received and reviewed report dated February 7, 2007. Three wells were installed. MW-2 encountered
12 of free phase. MW-1 has total dissolved VOC concentration of 1972 ppb in groundwater. MW-3 has
8,738 total VOC concentration dissolved in gw. Contamination is due to the leaking tank #5 which
was closed in place in the cellar. Petroleum product maybe trapped around MW-2 in the bedrock.
According to the report, pumping out of the material through monitoring well MW-2 is considered the
most desirable option. Upon completion of the product recovery, gw sampling will be performed. No
total VOC/SVOC concentrations were calculated. No spill# is listed on the report. I left a message
for Ray Kahn @212-330-7501. AZ 3/27/2007 A letter was sent to Ray Kahn and W. Shur: I have reviewed
the above mentioned report for this site. The report stated that 12 of free product were detected
in MW-2. Also, significant concentrations of dissolved VOCs and SVOCs were detected in MW-1 and
MW-2. ESPL recommended pumping out the material from monitoring well MW-2. In order to expedite
site remediation, the Department recommends pumping all three wells existing at the site. Pumping
should be initially performed twice a month. Based on the results of initial pumping frequency
could be adjusted. Amount of pumped water and oil should be recorded. Amount of pumped oil should
be recorded separately. A monitoring progress report should be submitted to the Department
quarterly. AZ 8-6-2008 Left a message for Ray Kahn (917-939-7366) inquiring about the status of the
spill. AZ 8-8-2008 I contacted Mr.Kahn. He stated that they are performing pump outs. The performed
two pump outs. He does not remember when the pump outs took place. He

**COMMERCIAL (Continued)** **S102399503**

will send me a hard copy and
an electronic version of the report. They installed a passive bailing system around the end of
2007. They recovered about 250 gallons of mostly product. I requested submittal of quarterly
reports. AZ 11-13-2008 Reviewed Groundwater Remediation Progress Report submitted by ESPL in August
2008. The report stated that petroleum product is trapped around the MW-2 area due to the fractures
in the bedrock. The report stated that ESPL installed a product recovery system in MW-2 in January
2008. The system is comprised of a skimmer and an air driven bladder pump. 157 gallon of free
product was recovered between June 2007 and June 2008. Last two measurement of the product
thickness in MW-2 showed thickness of 0.01' (June and July 2008). Table 1 stated that 13 gallons of
product mixed water was recovered by passive-bailing. I contacted Mr. Kahn @212-330 7501 and
requested that the report should provide breakdown for the amount of recovered product and water.
The report should clearly state how much product was recovered, the date of the reading and the
method how this number was obtained. Modified report should be submitted to DEC. Quarterly
Monitoring Reports should be submitted to DEC. The site owner is Shur Mnagement (Bob Gethard
718-733-6300). AZ 3-16-2009 ESPL submited revised Aug. 2008 Report in December 2008. Also,
Monitoring report was submitted in December 2008. Slight sheen was observed in MW-2. About 11.5
gallons of product was removed between August and December 2008. Groundwater sampling was perfromed
on October 15, 2009. Samples from monitoring wells MW-1, MW-2 and MW-3 indicated high levels
dissolved VOC contamination (7,686 - 39,153 ppb of total VOC). ESPL submitted remedial proposals
dated February 2009. The proposals suggested implementing application of RegenOx. I contacted Ray
Kahn and requested additional information regurding current status of the plume (free phase
thickness, dissolved concentrations and the plume map). AZ 3-18-2009 Contacted Ray Kahn
(917-939-7366). It was agreed that the existing active bailing system in the basement will be
reactivated. Contaminated water and product, if any, (currently it's only sheen) will be pumped for
a quarter or two. Maintenance visits will be performed weekly. Monitoring, sampling and reporting
will be performed quarterly. Proposals will be sent to DEC. AZ 6-5-09 Ray Kahn contacted me. They
perfromed two vac truck visits. Pumping continued for approx. 6 min each time in two 3 min
intervals. Pumped water had petroleum odor but no free phase was present. Sheen was present. They
will switch to direct pumping from the wells. He will research submersible pumps. AZ 2-16-2012 Left

**COMMERCIAL (Continued)** **S102399503**

a message for Ray Kahn. He left a message for me (917-939-7366). I left another message for Ray
Kahn. I contacted Ray Kanh. He will forward to me the latest progress report. As per DEC's request,
they will re sample the site and gauge free phase product in wells. They will send me email
describing site progress no later than Monday. AZ 2-21-2012 Received a progress report dated Feb.
21, 2012. Sampling was performed Feb. 18-2012. Results of the sampling will be submitted to DEC
under a separate cover. AZ 3-9-2012 Received an e-mail from R. Kahn: Dear Alex: Per our
conversation, we have revised the latest progress report to reflect our conversation regarding
pump-out, resampling and evaluation for the need to inject oxidant for residual treatment. Please
disregard the previous report. Regards Ray Kahn March -8-2012 report was uploaded into e-docs. AZ
1-14-2020 I left a message for Ray Kahn at 917-939-7366 1-15-2020 I left a message for Ray Kahn at
212-330-7501. His email is mtavares@espo.com 1-16-2020 The following email was sent to R. Kahn at
RKAHN@ESPL.COM: Dear Ray, Could you please forward me the owner s information? Also, we need an
updated progress report for the site. Please let me know when this report will be issued.
Sincerely, Alex Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of
Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax:
718.482.6390 Email: alexander.zhitomirsky@dec.ny.gov 1-22-2020 Mr. R. Kahn has contacted me. They
will conduct a round of sampling at the site and submit the results to NYSDEC within two months. AZ
3-3-2020 Reviewed a report dated 3/3/20. I have contacted Mr. R. Kahn and requested to indicate in
the report why the most contaminated well wasn't sampled. Also, I asked to calculate total VOC
concentrations. AZ 3-22-2020 In communication with R. Kanh he notified me that the well which was
previously contaminated was dry at the time of the sampling.The following information was included
in the updated report dated 3/9/2020: Groundwater sampling was performed on February 7, 2020.
Monitoring wells 1 and 3 were purged on February 6, 2020 and a total of 5 well volumes was pumped.
Monitoring well 2 was dry during purging and sampling, therefore, the monitoring well MW-2 was not
sampled. The samples were submitted to New York State Accredited Laboratory and analyzed for
Volatile Organic Compounds (VOCs) and Semi Volatile Organic Compounds (SVOCs) STARS using EPA
methods 8021/8260 and 8270, respectively. The analytical results were compared with NYSDEC-TOGS,
Groundwater Standard Criteria and presented as Tables 1 through 6. Since Monitoring Well No. 2 was
dry the data will reflect only MW-1 and MW-3 for this sampling round.

**COMMERCIAL (Continued)** **S102399503**

Results and Conclusion: An
evaluation of the data from the last sampling event indicates that the levels of the constituents
are at a non-detect or slightly elevated in comparison the regulatory standards. The consultant
recommended that this Spill # 0505825 be closed. Based on this recommendation this spill is closed.
AZ 4-13-2020 Reviewed a Well Closure Report by ESPL dated March 31, 2020. According to the report,
ESPL Environmental Consultants Corporation was retained by Schur Management Corp. to perform the
abandonment of three monitoring wells. The abandonment of the wells was performed on March 26, 2020
in accordance with the Department s Groundwater Monitoring Well Decommissioning Procedures . The
monitoring wells construction consisted of 2 PVC casing. In order to restore the controlling
geologic conditions which existed prior to construction, the wells were filled with washed, 1/2
crushed stone to a level just above the static water level. The remainder of the well column was
filled with concrete affectively and permanently sealing the well. AZ

Remarks: Lab reseults show contamination

| DEC Memo: | 7/28/16 - Obligado - Desk Duty - I called Rich Levato. His client did a subsurface investigation at a property which he purchased. ASR found BTEX contamination. I requested Rich email the report to Kumar Patel for review. Spill assigned to Patel. 09/16/16-Hiralkumar Patel. alternate address: 4732 Park Ave no PBS or other spills found. as per NYC DOB record, a permit application was filed on 12/16/15 for construction of a new 9-story hotel. site has 'e' designation for hazmat/noise. ---------- 12:17 PM:- spoke with Rich and asked him about reports. he mentioned that reports were submitted to OER and was told that OER will contact DEC. informed Rich that all future correspondences related to the subject spill case must be submitted to DEC for review and approval (if needed). 12:29 PM:- received email from Rich including Phase I and Phase II reports. 12:44 PM:- received email from OER Amanda including RIR summary with RAWP scoping details. abstract of Phase I dated May 2016: - historically, the site was utilized as a filling station from 1945 to 1986 and an auto repair from 1989 to 2007 - active gulf gas station located on south of the site - active auto center located to the east of the site - it is expected that the subject property was initially developed around 1901 and contained one (1) story structure abstract of Phase II dated Aug. 2016: - proposed new 9-story hotel with basement - basement will be 10 ft in height - basement use: a breakfast area, a business center, pantry, an employee break room, a |

**4729 THIRD AVENUE (Continued)** **S118707084**

meeting room, a fitness
center, a laundry room and rooms for trash compactor, gas meter, electrical meter, water meter,
fire sprinkler, cable and a fuel tank ---------- - depth to groundwater varied across the site
from 12 to 22 ft bg - proposed depth of basement is only 10 ft and should not intercept the
groundwater table - elevation of property is approx. 61 ft above mean sea level - a GPR survey was
performed - GPR survey identified the four gasoline USTs in central portion of the site and one
additional UST located on the southeast area of the site which most likely used for the storage of
fuel oil - installed ten (10) soil borings (SB-1 through SB-10) to a depth of 15 ft bg -
stratigraphy of the site, from the surface down, consists of approx. 4 ft of fill material
consisting of asphalt, concrete, bricks and incinerator ash. the stratigraphy from 4 ft to 15 ft bg
consists interlayered poorly sorted sands, clayey sands, silty sands, clays and silty clays
---------- - two soil samples were
collected from each soil boring:
shallow soil sample was collected at depths less than 5 ft bg. deeper soil sample was collected
between 12 and 14 ft bg - highest PID reading was 1 ppm - only one soil sample where there was
observed contamination by visual and olfactory means - petroleum odor was observed in soil sample
from 13.45-13.55 ft bg at SB-6 - boring SB-6 was located on north side of existing gasoline USTs
---------- - incinerator ash was obaserved at a depth of 8-8.5 ft bg in SB-9 - no VOC contamination
noted in soil samples, but lab reporting limits for VOCs were above 660 ppb for soil sample from
13-14 ft bg at boring SB-6 ---------- - found some SVOCs in shallow soil samples, but not
detected in deeper soil samples - at the completion of soil sampling activities at soil boring
locations SB-5, SB-7 and SB-9, the boreholes were deepened to approx. 25 ft bg and installed 1-inch
temporary well points with 10 ft of screen (TW-1 at SB-, TW-2 at SB- and TW-3 at SB-) - depth to
groundwater from the top of well casing ranged from 11.54 ft at TW-1 to 22.88 ft at TW-2 -
groundwater samples were not analyzed for metals, pesticides or PCBs - groundwater flow is from
southwest to northeast ---------- - found contamination in groundwater samples from TW-1 and
TW-2 groundwater analyticals:
----------TW-1--------TW-2
Benzene----------190
Toluene----------2,200
Ethylbenzene----------20-------1,800
Xylene----------95------10,700
1,2,4-Trimethylbenzene---------150-------1,800
1,3,5-Trimethylbenzene----------26---------870

**4729 THIRD AVENUE (Continued)** **S118707084**

Naphthalene----------47---------960 - at four soil boring locations, SB-4, SB-6, SB-8 and SB-9, a vapor implant was installed at a depth of 12 ft bg - minor CVOCs noted in soil-vapor samples (max. 32.6 ug/m3 of PCE in SV-1) 09/19/16-Hiralkumar Patel. 12:20 PM:- spoke with Rich about depth of tank bottom. he mentioned that current property owner purchased an abandoned gas station and never used oil tanks. current property owner was unaware of any tanks on property. currently, they don't know the tank size. 2918 Arnow Real Estate Corp. **property owner** c/o Neelam Chadha **from DOB site. confirm it** 55 Wildwood Drive Syosset, NY 11791 Ph. (516) 265-2910 email: allborough76@yahoo.com 12:27 PM:- left message for Manny Kumar (917-939-9667). 12:29 PM:- left message for Neelam Chadha. the Phase II report was prepared for Chand Springfield Corp. as per NYS business entity database, Chand Springfield Corp. has following addresses: Chand Springfield Corp. 2525 3rd Avenue Bronx, NY 10481 Vinod Chandha CEO Chand Springfield Corp. 731 Main Street New Rochelle, NY 10801 the subject property is owned by 2918 Arnow Real Estate Corp. and as per NYS business entity database, it has following addresses: Rajni Bala CEO 2918 Arnow Real Estate Corp. 731 Main Street New Rochelle, NY 10801 12:56 PM:- spoke with Binny (914-654-8900) at Shell gas station at 2525 3rd Ave and left message for Manny Kumar. after discussing with DEC Vought, case assigned to DEC Kann. 2:32 PM:- sent letter to Manny Kumar/Rajni Bala requiring delineation of groundwater contamination and submission of redevelopment plans. asked them to submit investigation report by the end of 11/30/16. letter emailed to Manny Kumar, OER Chawla and Rich. 10/24/16: J.Kann - received RIWP from ASR on 10/18/16. Reviewed RIWP and provided the following email to ASR and OER today: The RIWP prepared for the referenced site dated October 11, 2016 has been reviewed and is acceptable. As a reminder, development plans for the referenced site were requested in the September 19, 2016 letter from the Department. The development plans and the results of the investigation must be submitted to the Department by November 30, 2016. 11/21/16: J.Kann - spoke with Amanda at OER. She just wanted to follow-up with me on the site. I indicated that I am just waiting on the additional investigative work that ASR plans to do which includes the installation of 3 permanent wells on site. I also asked her whether the site is an e designated site or a VCP. She indicated that it currently is still an e designated site but it is possible the owner will opt in to OER's VCP program. 12/5/16: J.Kann - Remedial Investigation Report submitted on Dec 2 and under review. 12/23/16: J.Kann - Impacts to groundwater. Additional

**4729 THIRD AVENUE (Continued)** **S118707084**

downgradient wells needed. Will
prepare and sent out email after I return from break. Draft Remedial Action Work Plan was received
on 12/21 and will also be reviewed upon my return. 1/6/17: J.kann - called Amanda Duchesne to ask
about whether the site was an e designated or VCP. She said she did not hear back from the
consultant/owner yet. The RAWP was received on 12/21 and we both agreed to discuss it later in the
week of 1/9. 1/13/17: J.Kann - spoke to Amanda. OER and DEC are still completing their internal
reviews. Will place comments in the RAWP and will discuss with OER week of 1/23. Groundwater
delineation is necessary as well as groundwater remediation. Vapor mitigation will also need to be
addressed. OER is still waiting on feedback from the RP to determine if they are joining the OER
VCP. 5/12/17: J.Kann - spoke with Amanda and Shaminder and sent the following email after our
conversation: Amanda The Department has received the RIR and the RAWP for the referenced site.
Petroleum impacts exist at the site and the contamination has not been delineated. The Department
therefore requires the following: Delineation of Groundwater Contamination: The Department requires
that groundwater contamination be completely delineated via the collection of groundwater samples.
The groundwater contamination must be delineated on-site and off-site. Additional wells must be
installed downgradient and north of the ASR-1 and ASR-4 locations. During installation of the
monitoring wells, soil must be screened continuously with a PID. The deepest dry soil sample and
the sample with the highest PID reading must be sent to a NYSDOH certified laboratory for analysis
by EPA Method 8260/8270 and the results must be sent to the Department. Groundwater samples must be
analyzed for EPA Method 8260/8270. Prior to installation, all utilities must be located and marked
out. A report summarizing the findings of the subsurface investigation including boring logs, well
installation logs, sample results, site plan, conclusions and recommendations are to be submitted
to the Department. Additional borings/monitoring wells may be necessary based upon review of the
investigation report. Please re-gauge the wells and reconfirm the groundwater flow direction.
Submission of additional information on groundwater remediation and vapor mitigation for the Site:
The Department requires the submission of plans for groundwater remediation and discussion of vapor
mitigation techniques planned for use in the development of the site such as sub-slab
depressurization systems. On-site groundwater contamination exists. Note that plans for vapor
mitigation will be forwarded to the New York State Department of Health for review and approval. In

**4729 THIRD AVENUE (Continued)** **S118707084**

addition, as discussed earlier today, the Department does not object to the tank removals being performed as per your May 10, 2017 email. Please have the consultant revise the RAWP to address these changes. If you have any questions, please let me know. 6/6/17: J.Kann - As per Austin, spill reassigned to Lakhani. 07/25/17 - Lakhani The work performed under the RIR included ten (10) soil borings that were advanced to 15'bgs. Three (3) soil borings were drilled to a terminal depth of 25'bgs and converted into temporary groundwater monitoring wells. Four (4) soil borings were set with soil vapor implants to an appropriate depth of 12'bgs and were used to collect subsurface soil gas samples. Three (3) soil borings were installed around the existing gasoline USTs to a terminal depth of 15'bgs. Two (2) soil samples were collected at each soil at each soil boring locations.
Additional soil samples were collected based on visual or olfactory observations. A representative groundwater sample was collected from each of the temporary monitoring wells. RAWP (ASR, 07/19/17)
- The proposed remedial action will consist of: 1) Excavation and removal of soil/fill exceeding SCOs, 2) Completion of a waste characterization study prior to excavation activities, 3) Excavation and removal of soil/fill exceeding Track 1 SCOs. The entire footprint of the property will be excavated to a depth of approx. 10'bg for development purposes, 4) Removal of four (4) gasoline USTs and one (1) 1500 gallon UST located on the east side of the former building on site, 5) Removal of LNAPL, treatment of groundwater plume, and the implementation of a groundwater monitoring program, 6) Additional wells will be installed downgradient and north of ASR-1 and ASR-4 locations. Groundwater flow direction will be confirmed, 7) Passive SSDS installation and vapor barrier system, and 8) Collection and analysis of endpoint samples. DEC Lakhani approved the revised RAWP pending the submission of a site map with additional well locations and NYSDOH review.
DEC Lakhani emailed NYSDOH Nathan Walz regarding the site and the passive SSDS that is intended to be installed. 07/27/17 - Lakhani NYSDOH Nathan Walz reviewed the RIR and RAWP. OER Anna Brooks will be sending the SSDS plans for NYSDOH review. NYSDOH Nathan Walz responded: I reviewed the RIR and RAWP for the above referenced site and offer the following comments: All instance where the statement The NYS DOH Guidance on Soil Vapor Intrusion only requires the reporting of three compounds of concern, methylene chloride (dichloromethane), Tetrachloroethene, and Trichloroethene. Needs to be removed as it is in accurate. All compounds detected on the TO-15 scan need to be reported, and will be taken into consideration when making decisions

**4729 THIRD AVENUE (Continued)** **S118707084**

on the potential for soil
vapor intrusion to occur. This being said, the NYSDOH SVI Matrices account for the following VOCs:
Matrix A TCE, c1,2-DCE, 1,1,-DCE and Carbon Tetrachloride; Matrix B PCE, 1,1,1-TCA, Methylene
Chloride; Matrix C Vinyl Chloride, please revise your document(s) accordingly. Based on
concentrations of contaminants of concern that are present in on-site groundwater and with the
knowledge that the basement level of the building will be occupied, I recommend that the proposed
SSDS be designed as an active system or a heating season soil vapor intrusion (SVI) investigation
be conducted once the building has been constructed and can be operated under occupied conditions.
A SVI work plan will need to be submit for department review and approval. If you have any
questions regarding my comments or recommendations please feel free to contact me. 07/28/17 -
Lakhani NYSDOH requirements were sent to OER Anna Brooks who will notify the consultant and will
build them in to the RAWP. 08/22/17 - Lakhani Advanced Site Restoration Christine Camardella
(office: 212-809-1110, cell: 516-946-1121, ccamardella@askASR.com) emailed to inform that the
removal of the USTs has commenced today. So far, they have removed five (5) USTs, it is believed
that there are several more however that they will not know until tomorrow. The USTs have been
emptied of all contents and have been staged on-site if you would like to come and see them prior
to disposal. ASR has been on-site to screen soils during the activities and to collect sidewall and
endpoint samples. PBS records will be updated to reflect the amount and size of the tanks removed.
08/25/17 - Lakhani ASR Christine emailed to inform the ASR will not be the consultant on record for
the site anymore. 09/01/17 - Lakhani OER Anna Brooks sent the information for the new consultant on
the project: Patricia Badding, Environmental Management Solutions, Inc. pbadding@aol.com (908)
604-2291 Sent email to Environmental Management Solutions Patricia to inform her of the DEC
requirements and the NYSDOH's recommendations, which the DEC concurs with. 09/12/17 - Lakhani OER
Brooks emailed to inform that the project team is proposing that the contamination from the spill
did not on-site. The project team will put together a proposal for review. Research reveals that
there are two (2) closed spills in the surrounding area: Spill #8906198 and Spill #0002358.
However, these spills are not upgradient of the site. There are no known upgradient spills. The
open-air underground Metro-North railroad track is located upgradient of the site. 10/10/17 -
Lakhani Spoke to Patricia Badding (cell: 908-500-7160) and Environmental Management Solutions will

**4729 THIRD AVENUE (Continued)** **S118707084**

be removing the tanks and completing boring and additional well installation. DEC Lakhani is
awaiting a work plan. Recommended that only final excavation samples be collected since the tanks
were located only 5'bg and the final depth of excavation is 12'bg.
11/27/17 - Lakhani Spoke to
Patricia and she informed that a new 550 gallon UST was discovered on the site. The soils presented
gasoline-like odors. OER Brooks emailed confirming that as EMS was working on test pits for waste
characterization onsite and when they dug down to approx. 10' in the area in which the tanks were
removed, they came across an odor. 11/28/17 - Lakhani Patricia sent a map with the locations of the
USTs and a table of analyticals and the tank information from the PBS application. Another 550
gallon presumed gasoline UST was found between the building and the fuel oil tank. Thirteen (13)
tanks have been found on the property thus far. Sample results indicate no VOC exceedances.
12/06/17 - Lakhani Patricia Badding emailed the UST Closure report.
UST Closure Report
(Environmental Management Solutions, 11/16/17) - During Phase II investigation, conducted by ASR,
contaminated groundwater was encountered. Various items were identified and implemented during the
scope of this investigation including: 1) field screening of the tank pit excavation, 2) sampling
of the tank pit excavation, and 3) analytical testing of the soil samples obtained. Historically
the site was utilized as a filling station from 1945 to 1986, for auto repair from 1989 to 2007 and
for vehicle parking until recently. A single-story masonry building, demolished approximately a
year ago, was located on the southern portion of the site. Subsequent to excavation, a total of
twelve unregistered USTs were identified on the property. UST information is as follows: four (4)
1000 gallon tanks filled with sand and gasoline, four (4) 550 gallon tanks filled with sand, three
(3) empty 250 gallons tank, and one (1) 550 gallon tank containing heating oil. All USTs were
located centrally on the property except a 550 gallon heating oil UST which was found on the
southeast corner of the property. Removed tanks were inspected. During closure activities, piping
was observed on the northern portion of the site, alongside 3rd Ave. Tank tops were exposed and any
product remaining in the lines was drained and flushed into the tanks. The tanks were pumped free
of residual fuel via vacuum truck. The fill, product and vent lines were disconnected, and the open
ends capped. All piping, contents removal and tank cleaning was completed by Dover Environmental
Sciences. The cleaned-out tanks were removed. The contents, including sludge and absorbent pads
associated with tank clean-out were containerized in 55 gallon drums.

**4729 THIRD AVENUE (Continued)** **S118707084**

After the tanks were exhumed,
they were carefully examined for signs of structural damage. Upon visual inspection of the tanks,
they all appeared to the by tight. Any piping associated with the tank was cut, cleaned and
removed. There were no petroleum impacted soils identified with any tank. Sample collection
followed excavation activities. Twelve (12) endpoint samples were obtained from the area od the
previously located tanks. Samples were collected at a depth of approx. 5'bgs. The excavation
dimensions were approx. 30' long x 29' wide. Samples S-1 through S-11 were only analyzed for VOCs
and S-12 was only analyzed for SVOCS. S-1 through S-11 were either non-detect for VOCs or below
unrestricted standards. SVOCs in S-12 were below unrestricted standards. 01/29/18 - Lakhani Dave
Clark (516-680-5706, dcmerco@yahoo.com), the contractor, and his consultants from Cody Ehlers
Group, Michael J Cody and Andy Ledins (O: 203-930-3145, M: 203-216-6931,
Michael.Cody@codyehlers.com) contacted DEC Lakhani to address the Stip Agreement for the proposed
SSDS at the site. 03/27/18 - Lakhani Dave Clark called and informed that five (5) wells on the
property were installed. Two (2) wells were found to have free-product within them. Product
thicknesses were not determined. Well socks were introduced in the wells with free product to
recover the oil. 05/14/18 - Lakhani Cody Ehlers Michael emailed to inform that he has completed a
groundwater and soil sampling program at the site. The client is interested in having them meet
with DEC and OER. 05/15/18 - Lakhani Spoke to Micahel Cody and he informed that five (5) 2 wells
were installed (CEG1 - CEG5). 1.75 of product, most likely to be weathered gasoline, was found in
CEG4 on 03/24/18. Well socks were placed in the well. On 05/04/18, the socks were removed and 6
ounces of oil were recovered. Approx. 7/8 of product remained in the well. No product was observed
in the remaining wells. The groundwater was sampled and analyzed. Samples were turbid. Results were
as follow: 1,2,4-trimethylbenzene 290 ug/L(CEG2), 1,3,5-trimethylbenzene 66 ug/L(CEG2),
ethylbenzene 29 ug/L(CEG2), naphthalene 86 ug/L(CEG2), m/p-xylene 49 ug/L(CEG2), o-xylene 46
ug/L(CEG2), 1,2,4-trimethylbenzene 580 ug/L(CEG3), 1,3,5-trimethylbenzene 190 ug/L(CEG3), benzene
11 ug/L(CEG3), ethylbenzene 170 ug/L(CEG3), m/p-xylene 620 ug/L(CEG3), naphthalene 200 ug/L(CEG3),
o-xylene 250 ug/L(CEG3), toluene 45 ug/L(CEG3), 1,2,4-trimethylbenzene 18 ug/L(CEG5),
1,3,5-trimethylbenzene 18 ug/L(CEG5). Groundwater is flowing to the southwest. Soils were sampled
between 15'-20'bgs. Soils in CEG3 had 3870 Total BTEX and 65940 Total VOCs. 06/19/18 - Lakhani Dave

**4729 THIRD AVENUE (Continued)** **S118707084**

Clark visited the site to check for product in the three (3) wells with socks. Previously, only one (1) well CEG-4 had any gasoline in it during the previous visit. Two (2) wells CEG-2 and CEG-5 had socks in them. As before, there is no product in either well. This is consistent with previous findings. There still is a gas odor from these two (2) wells. CEG-4 previously had 1.75 of gasoline and Cody Ehlers Group 6 ounces of gasoline using a absorbent sock. During the last inspection, it was found that vandals had broken through the fence and taken the sock out of CEG-4. A sock was replaced in CEG-4. When the sock was placed in the well, it was checked within a few minutes and there was no gas. Cody Ehlers believes that the gasoline in CEG-4 is limited as to its footprint. No product has been observed in well CEG-5 or in the ASR well to the north. 08/05/19 - Lakhani - Spill being transferred to Lin. 2/28/20-lin-recieved call from Elizabeth from JP Morgan Chase regarding a financial transcation shes doing for a property adjacent property (Elizabeth# 2108415850). 9/16/22-Lin-Elevated groundwater contamination found in monitoring well 21MW2. 2/29/24-Lin-Contractor conducted additional groundwater sampling and installed downgradient off-site wells. Overall SVOC and VOC concentration on-site decreased from the first round of sampling to the second, however the concentrations remained higher than those from the off-site wells. The SVOC and VOC concentrations in the downgradient off-site wells remained low during both rounds of sampling with all concentrations ranging from 1.1 g/L to 13.4 g/L. Based on the results from the sampling events the source and limit of contamination remains within the Sites boundaries. Redevelopment plans for the Site include the construction of a full cellar requiring excavation to a depth of approximately 10-12 feet below sidewalk grade (bsg). Excavation of the Site for the cellar and the removal of contaminated soil will overall improve onsite groundwater quality. 4/1/2024-Lin-Excavation is currently ongoing at the site. Endpoint soil samples will be collected once excavation is complete. DEC Requirements: 1)Complete delineation of the groundwater contamination at the site which include additional monitoring wells on-site and downgradient from 21MW2. You can have the consultant send me the work plan for the new wells installation for review and approval. 2) Two rounds of groundwater sampling with at least one round of sampling from the existing wells and the new wells that are to be installed.

Remarks: abandoned gas station and investigation found groundwater contamination. spill is contained and clean up is progress.

| DEC Memo: | Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 10/10/95: This is additional information about material spilled from the translation of the old spill file: SUBSURFACE INVESTIGA. 03/15/01 Reassigned from Miller to Rommel 9/22/2003-Vought-See spill #9311138. This spill: Borings performed as part of possible lease by Taco Bell. In May 1993 seven soil borings performed by Giles Engineering Associates. Contamination found in one water samples. Taco Bell hired Unico to install three monitoring wells in Dec 1993. Elevated BTEX and MTBE found in well UW-1. 9/22/2003-Vought-See spill #9311138 at 5510 Broadway (Getty Marketing) which is source of spill. This spill closed by Vought as per Rommel. 9/07/05-Vought-Spoke to Ben Rajotte (Cad Waldader 212-504-5633) who is representing owner of 402 Avenue U. Ben inquired about the current status of Getty Marketing's remedial efforts. Vought referred Ben to DEC Feng. Rajotte requested a copy of consent order upon DEC determination that it is FOILable. |

| DEC Memo: | 3/5/2021 - Feng - Desk Duty in office. Spoke to Patrick Diggins of AKRF. Historical industrial bus depot and repair shop. The site is under a VCP program with NYCOER. The site is an E-Designated and changing industrial/commercial use to a school. They submitted a work plan to NYCOER and got approved. They then did the investigation and found VOCs and SVOCs in soil and groundwater, and 1 area with soil vapor issue. NYCOER presented the site to NYSDEC and required to report to DEC once their client owns the site. They are right now finalizing the Remedial Action Work Plan with |

**INDUSTRIAL- OER (Continued)** **S127480337**

NYCOER. The RAWP calls for excavation of 2-6 feet, source/hotspot removal and SSDS and vapor
barrier installation. I required the investigation report to be sent to NYSDEC and informed him
that the spill will be assigned to Ryan Piper. PBs 2-604235 (4) 1,500-gallon gasoline USTs were
removed OER VCP #21tmp0592m E-Designated. Site use from industrial/commercial to a school Patrick
Diggins AKRF 603-494-7090 JDiggins@AKRF.com 8/21/23- DEC Piper received and reviewed closure
report. Based on work completed to date, no further action is warranted. Onsite monitoring wells
have been abandoned as per CP-43. This spill is closed. Report is in DEC Docs.

Remarks: Historic digging site found petroleum and clean-up is pending. Site is being remediated under vcp program #21tmp0592m

| DEC Memo: | 6/12/25 - Sekhon Got following information by email from notifier - Property Owner: DD Bedford Low LLC c/o Douglaston Development 7 Penn Plaza, New York, NY 10001 Contact: Reia Tong rtong@ddny.com Spill Description: The site is being redeveloped under the prevue of the New York City Office of Environmental Remediation NYCOER) and a Remedial Action Work Plan (RAWP) (Project Nos. 21TMP1185X and 21EHAN262X). On May 15, 2025, five inactive 550-gallon gasoline underground storage tanks (USTs) encased in concrete were encountered during excavation at the southeastern corner of the site, approximately 3 to 4 feet below ground surface. Construction activities were ceased within the area of the USTs and NYCOER and NYSDEC PBS were notified. Between June 10 and June 12, 2025, an FDNY-certified tank contractor (ABC Tank Repair and Lining) pumped out |

**LOT 122,TAXBLOCK 3273 (Continued)** **S111072592**

the UST contents, flushed
the USTs with water (which was containerized), cut and cleaned the USTs, and removed the tank
carcasses from the subsurface. On June 12, 2025, gasoline-like impacts were observed in soil
beneath one of the USTs. A maximum PID reading of 300 parts per million (ppm) was recorded at the
southern part of the UST excavation. The quantity of gasoline released is unknown. Soil remediation
and endpoint sampling in accordance with the NYCOER RAWP and DER-10 will occur on June 13, 2025.
Sincerely, Nick 6/27/25 - Sekhon Case discussed with DEC Lin and transferred to him for follow up
(off hr runner on 6/12/25). Email communications from notifier forwarded to Rick Lin. 2025-07-01 -
Added five 550-gallon gasoline USTs to tanks module for EPA LUST4 reporting. No DEC PBS number for
this site. KCKemp

Remarks: inactive underground storage tank, clean up pending ND75

| Longitude: | -73.9045869 |
| DEC Memo: | DEC Piper spoke with caller, N. Reccia. Site is a former repair shop. Will be a school. Site is entering NYC OER program, to be a school. SCA is the client. Information will be sent shortly. Title holder of property - 2218 Jerome LLC 6132 Riverdale Avenue Bronx, NY 10471 718-549-9000 development@sophergroup.com Authorized person - Barbara Sopher Vice President - Riverdale Equities (sole member of 2218 Jerome LLC) 917-796-1999 barbara.sopher@sophergroup.com 2/4/22- DEC Piper sent CSL to site owner. Spill transferred to DEC Sekhon as daytime runner. Sub surface report is in DEC Docs. 9/27/23 - Sekhon wfitchett@geiconsultants.com - William (Bill) j. Fitcher (cell 6319057636) nrecchia@geiconsultants.com - Recchia Nicholas Most of the contaminated soil has been excavated from the cellar area and stockpiled on site. The contaminated area in the cellar is planned to be excavated to the top of bedrock, and because of the bedrock depth no endpoint samples will be collected. Contractor completing the excavation to the top of bedrock by the 9/29/23. 10/16/23 - Sekhon Site inspected on 10/12 (PM). Met Nicholas Recchia, Bill Fitchett and Mr. Clay on site. The Site building was originally constructed in 1928 and utilized for auto sales and service. Beginning in the 1990 s, the site was utilized as a furniture warehouse, and in 2013 began to be utilized as a parking garage. Two 550-galon buried gasoline tanks are shown on the 1950 through 1989 Sanborn Fire Insurance Maps. The building contains a partial basement which is believed to have been utilized as a utility room since construction. All the contaminated soil has been excavated from cellar area to the bedrock. The Site is currently undergoing construction/renovation for its future use as a public-school building. The fully renovated basement will continue to be used as a utility room. An active sub-slab depressurization system (SSDS) is being incorporated into the new construction. The SSDS will service the entire building. Contractor will take water samples from excavation and send the same to be analyzed for EPA method 8260 & 8270 as per DER - 10 and send report to DEC for review. 11/17/23 - Sekhon Closure report submitted |

**(Continued)** **S122254463**

to DEC for review. DECDOCS
11/29/23 - Sekhon Test Pit Excavation On March 14, 2023, and March 29, 2023, a total of ten test
pits were excavated at the Site by NY Engineers, a subcontractor to the Site owner. The purpose of
the test pits was to provide waste characterization services for soil removal and to delineate the
extent of the petroleum impacted area. Test pit locations were selected based on information
obtained from the Phase II ESA and field observations. Five test pits were conducted in the cellar
and five test pits were conducted in the ground-floor area adjacent to the south of the cellar. The
five test pits in the cellar were completed to the surface of bedrock, which was encountered at a
depth of 1 ft. below cellar grade. The five test pits conducted on the ground floor were also
completed to the surface of bedrock, which was encountered between 2 and 4 ft. below street grade.
Soil samples were logged by a GEI geologist who recorded geologic data, observations regarding
moisture content, the results of PID soil headspace readings, and visual and olfactory observations
regarding the presence of a sheen, discoloration (staining) or odors that may be indicative of the
presence of hydrocarbons or other contaminant residuals. No visual or olfactory evidence of
petroleum odors were identified in any of the ground floor test pits. However, strong petroleum
odors were encountered in the test pits in the cellar. One composite soil sample from the test pits
conducted at the ground floor (WC-1) and one composite soil sample from the test pits conducted in
the cellar (WC-2). The sample collected from the ground floor was composited from the surface to a
depth of between 2 and 4 ft. below surface grade, depending on the bedrock elevation. The sample
collected from the cellar was composite from the surface of the cellar floor to a depth of
approximately 1 ft. below cellar grade. Excavation Water Sampling- Because the excavation extended
to the bedrock surface, confirmation endpoint soil sampling was not completed since no soil was
present to sample. However, perched water was observed on the bedrock surface. As such, a water
sample was collected and analyzed for VOCs via EPA method 8260C and SVOCs via EPA method 8270D.
York prepared the results of the samples. Table 3 presents the results of the excavation water
sampling and provides a comparison to the NYSDEC Technical and Operation Guidelines (TOGs)
Standards and Guidance Values. There were two slight exceedances of NYSDEC TOGs Standards or
Guidance Values. The VOC 1,2-dichlorobenzene was detected at 6.8?g/L, above its NYSDEC TOGs
Standard of 3?g/L. The VOC chlorobenzene was detected at 17?g/L, above its NYSDEC TOGs Standard of

**(Continued)** **S122254463**

5?g/L. No other exceedances of NYSDED TOGs Standards or Guidance Values were detected. Remedial Excavation Soil analytical results as well as visual and olfactory observations from samples collected within the cellar indicated that petroleum-impacted soil was present beneath the cellar floor area. However, soil analytical results from soil samples collected from the ground floor adjacent to the cellar indicated that petroleum-impacted soil is not present beneath the ground floor of the building. Therefore, it is concluded that impacts to soil from the former USTs was present only in the cellar area. The remedial excavation was conducted from September 14, 2023, to October 2, 2023. Foreview Inc., the general contractor, excavated contaminated soil from the cellar of the Site. The remedial excavation was performed utilizing hand shovels and buckets. Buckets were lifted out of the cellar via a pulley system, and a wheelbarrow was used to stockpile the contaminated soil on 6-mil plastic sheeting. The stockpile area was located along the west wall of the building. The cellar excavation was conducted from the surface of the basement grade to bedrock, which was encountered at about 1 ft. below basement grade. All soil from the cellar floor was excavated and removed from the Site. VOCs, PAHs, Paint Filter VOCs and PAHs were detected at concentrations below the UUSCOs, in all soil samples, with the exception of methylene chloride in soil from the cellar composite sample WC-2. No free liquids were identified during the paint filter analysis. Metals Metals were detected at concentrations below the UUSCOs, with the exception of lead and nickel. Lead was detected at 178 mg/Kg, above its UUSCO of 63 mg/kg, in soil from the cellar composite sample WC-2. The RRSCO for lead is 400 mg/Kg. Nickel was detected at 39.7 mg/Kg in the ground floor composite sample WC-1, slightly above its UUSCO of 30 mg/Kg and well below its RRSCO of 310 mg/KG. TCLP analysis determined that no metals were present at hazardous concentrations. PCBs Total PCBs were detected at 0.217 mg/Kg, slightly above the UUSCO of 0.1 mg/Kg, and well below the RRSCO of 1 mg/Kg. Based upon GEI s field observations and test pit soil sample results, no petroleum-impacted soils are remaining in connection with reported spill. based upon to submitted report, case closed.

Remarks: Historic spill. Many unknowns at this time concerning material spilled, amount spilled. Clean-up pending.

| Updated By: | SRHEIGEL |
| Site Description: | Location: The site is located at 3200 Jerome Ave. in an urban section of the Bronx. It is located at the northeast corner of the intersection of Jerome Avenue and Van Cortlandt Avenue East. The site is identified as Block 3323, Lot 36 on the Bronx County Tax Map. Site Features: The site consists of a triangular-shaped, approximately 11,500-square foot property that is fully occupied by an approximately 18,200 sf, 2-story building. Current Zoning/Use(s): Until recently, the building had been occupied by PS 51X (The Bronx New School), an elementary school serving Kindergarten through 5th grade. The site has been leased by the New York City School Construction Authority for this use since 1993. Historical Use(s): The on-site building was constructed in 1928. The building was occupied by an auto garage from 1928 until approximately 1950, when it was converted for manufacturing use. The building was occupied by Nessen Lamps, Inc. from circa 1950s until approximately 1993, when it was converted for academic use. Waste manifest data indicate that Nessen Lamps Inc. used trichloroethylene (TCE) in its manufacturing process, and generated waste TCE from 1982 through 1987. Site Geology and Hydrogeology: No site specific geological or hydrogeological data has been collected. Regional geology (based on USGS data) consists of glacial deposits and fill overlying bedrock (typically Manhattan Schist). Bedrock in the vicinity of the site has been reported at a depth of 15 to 20 feet below grade. Groundwater has been reported at 12 to 16 feet below grade in the vicinity of the site. This site is being investigated and remediated under the Brownfield Cleanup Program as site no. C203061. |
| Env Problem: | Nature and Extent of Contamination: Currently, data has only been collected for indoor air and sub-slab soil vapor. In January 2011, indoor air samples collected at 2 locations inside the building detected TCE at concentrations up to 53 ug/m3. Subsequent indoor air samples collected in April 2011 at 3 locations in the building detected TCE at concentrations up to 310 ug/m3. (This maximum |

**NESSEN LAMPS SITE FORMERLY (Continued)** **1000379735**

concentration was collected from an unoccupied partial basement, however these samples were also collected after ventilating the building for 3 hours then sealing the building for 24 hours.) Indoor air samples were also collected in May 2011 as part of a pilot study of enhanced building ventilation, which consisted of (1) opening windows in all first and second floor classrooms, (2) operating the HVAC system in ?summer mode?, and (3) activating a roof-mounted 8,000 CFM ventilation fan for approximately 9 hours prior to the sampling event. The indoor air results indicated maximum TCE concentration of 607 ug/m3 in the partial basement. Sub-slab samples collected in March (no concurrent indoor air samples collected) detected TCE at a maximum concentration of 53,300 ug/m3. Subsequent sampling in April, which coincided with concurrent indoor air samples, detected maximum sub-slab concentrations of 31,000 ug/m3. A Site Characterization is planned to determine if an on-site source of TCE is present.
Significant Threat: Evaluation of significant threat will be made when the Site Characterization is completed. This site is being investigated and remediated under the Brownfield Cleanup Program as site no. C203061.

Updated By: JKGONZAL
Site Description: Location: The Former Nessen Lamps Site is located at 3200 Jerome Avenue in the Bronx. It is located at the northeast corner of Jerome Avenue and Van Cortlandt Avenue East. The site is identified as Block 3323, Lot 36 on the Bronx County Tax Map. The site is surrounded by a garage and other commercial uses to the north/northeast; residential buildings to the east along Van Cortlandt Ave.; commercial and residential buildings to the south across Van Cortlandt Ave.; and a New York City Department of Environmental Protection (NYCDEP) facility and NYC Transit Authority train yard to the west. Site Features: The site consists of a triangular-shaped, approximately 11,500-square foot property that is fully occupied by an approximately 18,200 sf, 2-story building. The building is currently used as a school. Current Zoning: The site is currently zoned C8-2 (commercial district). Past Use of the Site: The site was historically used as a garage (approximately 1928 to 1956); a drug company (1956 to 1965); Nessen Lamps, Inc. for lamp manufacturing (1971 through 1988).Four 550-gallon underground gasoline tanks existed at the site between 1945 and 1992. Nessen Lamps, Inc. is known to have generated hazardous waste (trichloroethene) at the site between 1982 and 1987. NYC Departement of Education's Bronx New School (PS51X) used the building from 1993 through June 2011 and vacated during the investigation and remediation. Site Geology and Hydrogeology: Overburden soil beneath the Site is characterized by fill material, consisting of sand, with silt, gravel, brick, glass, coal, and ash present to depths of approximately 4 to 9 feet below surface grade. The overburden beneath the fill material was documented as a generally brown glacial till consisting of fine to medium sand with varying amounts of silt, clay, gravel, cobbles, and weathered rock. The till material is underlain by bedrock that slopes downward in elevation from a high point in the southwestern portion of the Site at approximately 16 feet below sidewalk grade to a low point in the northeastern portion of the Site at approximately 32 feet below sidewalk grade. The topography of the Site slopes gently from the east to the west. The overburden groundwater aquifer is present at a depth of approximately 22 feet below the exterior sidewalk grade. Groundwater flow direction in the overburden groundwater aquifer is generally to the west and west-southwest.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were trichloroethene (TCE) and associated breakdown products of TCE. Remedial actions have successfully achieved a cleanup for restricted residential use. Residual contamination in the soil, groundwater, and soil vapor will be managed under a Site Management Plan.
Health Problem: Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. Soil vapor intrusion sampling had identified impacts in indoor air quality in the on-site building. A sub-slab depressurization system has been

Control Type: INST
Dt record added: 11/20/2014
Dt rec updated: 07/25/2023
Updated By: JKGONZAL
Site Code: 458527
Site Description: Location: The Former Nessen Lamps Site is located at 3200 Jerome Avenue in the Bronx. It is located at the northeast corner of Jerome Avenue and Van Cortlandt Avenue East. The site is identified as Block 3323, Lot 36 on the Bronx County Tax Map. The site is surrounded by a garage and other commercial uses to the north/northeast; residential buildings to the east along Van Cortlandt Ave.; commercial and residential buildings to the south across Van Cortlandt Ave.; and a New York City Department of Environmental Protection (NYCDEP) facility and NYC Transit Authority train yard to the west. Site Features: The site consists of a triangular-shaped, approximately 11,500-square foot property that is fully occupied by an approximately 18,200 sf, 2-story building. The building is currently used as a school. Current Zoning: The site is currently zoned C8-2 (commercial district). Past Use of the Site: The site was historically used as a garage (approximately 1928 to 1956); a drug company (1956 to 1965); Nessen Lamps, Inc. for lamp manufacturing (1971 through 1988).Four 550-gallon underground gasoline tanks existed at the site between 1945 and 1992. Nessen Lamps, Inc. is known to have generated hazardous waste (trichloroethene) at the site between 1982 and 1987. NYC Departement of Education's Bronx New School (PS51X) used the building from 1993 through June 2011 and vacated during the investigation and remediation. Site Geology and Hydrogeology: Overburden soil beneath the Site is characterized by fill material, consisting of sand, with silt, gravel, brick, glass, coal, and ash present to depths of approximately 4 to 9 feet below surface grade. The overburden beneath the fill material was documented as a generally brown glacial till consisting of fine to medium sand with varying amounts of silt, clay, gravel, cobbles, and weathered rock. The till material is underlain by bedrock that slopes downward in elevation from a high point in the southwestern portion of the Site at approximately 16 feet below sidewalk grade to a low point in the northeastern portion of the Site at approximately 32 feet below sidewalk grade. The topography of the Site slopes gently from the east to the west. The overburden groundwater aquifer is present at a depth of approximately 22 feet below the exterior sidewalk grade. Groundwater flow direction in the overburden groundwater aquifer is generally to the west and west-southwest.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were trichloroethene (TCE) and associated breakdown products of TCE. Remedial actions have successfully achieved a cleanup for restricted residential use. Residual contamination in the soil, groundwater, and soil vapor will be managed under a Site Management Plan.
Health Problem: Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater or soil may move into the soil vapor (air spaces within the soil), which in turn may move into

**NESSEN LAMPS SITE FORMERLY (Continued)** **1000379735**

overlying buildings and affect the indoor air quality. Soil vapor intrusion sampling had identified impacts in indoor air quality in the on-site building. A sub-slab depressurization system has been installed to prevent soil vapor intrusion in the future. Sampling of the neighboring apartment building indicates soil vapor intrusion is not a concern.

Updated By: DPKAPLAN

Name: FORMER NESSEN LAMPS SITE (AKA PS 51X)
Address: 3200 JEROME AVENUE
City,State,Zip: BRONX, NY 10468
Site Code: 458527
Control Name: Landuse Restriction
HW Code: C203061
Control Code: 25
Control Type: INST
Dt record added: 11/20/2014
Dt rec updated: 07/25/2023
Updated By: JKGONZAL
Site Code: 458527
Site Description: Location: The Former Nessen Lamps Site is located at 3200 Jerome Avenue in the Bronx. It is located at the northeast corner of Jerome Avenue and Van Cortlandt Avenue East. The site is identified as Block 3323, Lot 36 on the Bronx County Tax Map. The site is surrounded by a garage and other commercial uses to the north/northeast; residential buildings to the east along Van Cortlandt Ave.; commercial and residential buildings to the south across Van Cortlandt Ave.; and a New York City Department of Environmental Protection (NYCDEP) facility and NYC Transit Authority train yard to the west. Site Features: The site consists of a triangular-shaped, approximately 11,500-square foot property that is fully occupied by an approximately 18,200 sf, 2-story building. The building is currently used as a school. Current Zoning: The site is currently zoned C8-2 (commercial district). Past Use of the Site: The site was historically used as a garage (approximately 1928 to 1956); a drug company (1956 to 1965); Nessen Lamps, Inc. for lamp manufacturing (1971 through 1988).Four 550-gallon underground gasoline tanks existed at the site between 1945 and 1992. Nessen Lamps, Inc. is known to have generated hazardous waste (trichloroethene) at the site between 1982 and 1987. NYC Departement of Education's Bronx New School (PS51X) used the building from 1993 through June 2011 and vacated during the investigation and remediation. Site Geology and Hydrogeology: Overburden soil beneath the Site is characterized by fill material, consisting of sand, with silt, gravel, brick, glass, coal, and ash present to depths of approximately 4 to 9 feet below surface grade. The overburden beneath the fill material was documented as a generally brown glacial till consisting of fine to medium sand with varying amounts of silt, clay, gravel, cobbles, and weathered rock. The till material is underlain by bedrock that slopes downward in elevation from a high point in the southwestern portion of the Site at approximately 16 feet below sidewalk grade to a low point in the northeastern portion of the Site at approximately 32 feet below sidewalk grade. The topography of the Site slopes gently from the east to the west. The overburden groundwater aquifer is present at a depth of approximately 22 feet below the exterior sidewalk grade. Groundwater flow direction in the overburden groundwater aquifer is generally to the west and west-southwest.
Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were trichloroethene (TCE) and associated breakdown products of TCE. Remedial actions have successfully achieved a cleanup for restricted residential use. Residual contamination in the soil, groundwater, and soil vapor will be managed under a Site Management Plan.

**NESSEN LAMPS SITE FORMERLY (Continued)** **1000379735**

Health Problem: Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. Soil vapor intrusion sampling had identified impacts in indoor air quality in the on-site building. A sub-slab depressurization system has been installed to prevent soil vapor intrusion in the future. Sampling of the neighboring apartment building indicates soil vapor intrusion is not a concern.

| Env Problem: | Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were trichloroethene (TCE) and associated breakdown products of TCE. Remedial actions have successfully achieved a cleanup for restricted residential use. Residual contamination in the soil, groundwater, and soil vapor will be managed under a Site Management Plan. |
| Health Problem: | Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. Soil vapor intrusion sampling had identified impacts in indoor air quality in the on-site building. A sub-slab depressurization system has been installed to prevent soil vapor intrusion in the future. Sampling of the neighboring apartment building indicates soil vapor intrusion is not a concern. |

Name: FORMER NESSEN LAMPS SITE (AKA PS 51X)
Address: 3200 JEROME AVENUE
City,State,Zip: BRONX, NY 10468
Site Code: 458527
Control Name: Site Management Plan
HW Code: C203061
Control Code: 32
Control Type: INST
Dt record added: 11/20/2014
Dt rec updated: 07/25/2023
Updated By: JKGONZAL
Site Code: 458527
Site Description: Location: The Former Nessen Lamps Site is located at 3200 Jerome Avenue in the Bronx. It is located at the northeast corner of Jerome Avenue and Van Cortlandt Avenue East. The site is identified as Block 3323, Lot 36 on the Bronx County Tax Map. The site is surrounded by a garage and other commercial uses to the north/northeast; residential buildings to the east along Van Cortlandt Ave.; commercial and residential buildings to the south across Van Cortlandt Ave.; and a New York City Department of Environmental Protection (NYCDEP) facility and NYC Transit Authority train yard to the west. Site Features: The site consists of a triangular-shaped, approximately 11,500-square foot property that is fully occupied by an approximately 18,200 sf, 2-story building. The building is currently used as a school. Current Zoning: The site is currently zoned C8-2 (commercial district). Past Use of the Site: The site was historically used as a garage (approximately 1928 to 1956); a drug company (1956 to 1965); Nessen Lamps, Inc. for lamp manufacturing

**NESSEN LAMPS SITE FORMERLY (Continued)** **1000379735**

(1971 through 1988).Four 550-gallon underground gasoline tanks existed at the site between 1945 and 1992. Nessen Lamps, Inc. is known to have generated hazardous waste (trichloroethene) at the site between 1982 and 1987. NYC Departement of Education's Bronx New School (PS51X) used the building from 1993 through June 2011 and vacated during the investigation and remediation. Site Geology and Hydrogeology: Overburden soil beneath the Site is characterized by fill material, consisting of sand, with silt, gravel, brick, glass, coal, and ash present to depths of approximately 4 to 9 feet below surface grade. The overburden beneath the fill material was documented as a generally brown glacial till consisting of fine to medium sand with varying amounts of silt, clay, gravel, cobbles, and weathered rock. The till material is underlain by bedrock that slopes downward in elevation from a high point in the southwestern portion of the Site at approximately 16 feet below sidewalk grade to a low point in the northeastern portion of the Site at approximately 32 feet below sidewalk grade. The topography of the Site slopes gently from the east to the west. The overburden groundwater aquifer is present at a depth of approximately 22 feet below the exterior sidewalk grade. Groundwater flow direction in the overburden groundwater aquifer is generally to the west and west-southwest.

Env Problem: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were trichloroethene (TCE) and associated breakdown products of TCE. Remedial actions have successfully achieved a cleanup for restricted residential use. Residual contamination in the soil, groundwater, and soil vapor will be managed under a Site Management Plan.

Health Problem: Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. Soil vapor intrusion sampling had identified impacts in indoor air quality in the on-site building. A sub-slab depressurization system has been installed to prevent soil vapor intrusion in the future. Sampling of the neighboring apartment building indicates soil vapor intrusion is not a concern.

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

| Updated By: | SXDEYETT |
| Site Description: | The proposed site is located just east of the northeast corner of West 231st St and Corlear Avenue at 275 West 231st St., Bronx, NY 10463 (Figure 1). The proposed site is in Bronx County. The Site is a one-story commercial building, and its current use is unknown. The building on site was built in 1949. Past uses include computer repair. Not reported |
| Env Problem: | The property was first identified as a spill due to free-phase product noted at an adjacent property excavation. From 2007 to 2013, several soil and groundwater samples were taken in and around the property. Eight (8) soil borings with three (3) soil samples were taken in the northwest corner of the basement in the location of an oil tank. These samples were only analyzed for Volatile Organic Compounds (VOCs). Four (4) groundwater samples were taken from wells in the sidewalk and the adjacent property s rear yard. Soil samples show VOCs as non-detect (ND) to 20 parts per million of naphthalene; slightly over the unrestricted soil cleanup objective (SCO) of 12 ppm. Four (4) groundwater samples were collected from monitoring wells adjacent to the site. Groundwater samples returned maximum PCE concentrations of 380 ug/L in the downgradient well; above the guidance value of 5 ppb. The upgradient well returned a maximum value of PCE of 10 ppb. |
| Health Problem: | As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns. |

| DEC Memo: | 07/12/07-Hiralkumar Patel. visited site based on oil contaminated soil at site 3120 Corlear avenue, which is under construction and is located behind subject site. during first visit on 04/23/07 at 3120 Corlear ave site, found that developer of construction site, Mr. Chen, is the same person who runs business at sujbect site. during visit, found oil on water in construction area, so visited subject site and found site has 2000 gal underground tank, sitting on floor, in tank vault with access. during visit in April, asked Mr. Chen to run tank test to check any leak from tank system. in June 2007 found that PTC did tank only test. spoke with Joe at PTC. he mentioned that when he reached for system test, he found all lines were disconnected and owner asked him to test tank only. tank only passed the test (see test result in file). Joe mentioned that tank is 2000 gal capacity. spoke with Mr. Chen in June. he mentioned that lines running |

**275 WEST 231ST STREET (Continued)** **S108764992**

aboveground, so hasn't been
tested. revisited site on 07/11/07. visited both, construction site as well as subject site. found
free product on water in construction site in corner close to suject site. spoke with Mr. Chen.
went into tank vault at subject site. found oil on tank vault floor. asked Mr. Chen to test lines
which are running underground (not aboveground). also during site visit, found pipe inside boiler
room, where water was being dumped and this water is from construction area at 3120 Corlear ave,
which is contaminated. asked Mr. Chen to stop pumping water into this pipe, as Mr. Chen doesn't
know where it goes (in ground or city sewer system). see photographs and video, from construction
site and tank vault at subject site, on E-Docs. Eric Chen Chairman Pan East Realty Inc. 275 W 231st
Street Bronx, NY 10463 PH. (718) 543-3364 (O) (917) 560-9022 (C) FAX (718) 548-0343 email:
ericpchen@yahoo.com Lai-Ho Chen President Pan East Realty Inc. 275 W 231st Street Bronx, NY 10463
received call from Paul from ECO system. he went to site and punched couple of holes in ground at
construction site, from building corner where oil found to sump location. he found oil in each
hole. he went to tank vault at 275 w 231st street and found oil into tank vault also. Paul proposed
to install recovery well inside tank vault. he mentioned that construction area is about 5 ft below
tank vault bottom (means lowest point is construction site then tank vault). asked Paul to do
complete groundwater delineation before deciding recovery well location. he also proposed to
install oil/water separator before discharging water into city sewer. he mentioned that he found
two unknown pipes in boiler room that he will check where these lines go. asked him to test all
underground lines associated with tank, register tank and complete groundwater delineation with
site specific groundwater flow direction. Paul Ciminello Ecosystems Strategies Inc. Ph. (845)
452-1658 (O) (914) 475-4208 (C) email: paul@ecosystemsstrategies.com 07/16/07-Hiralkumar Patel.
sent STIP to Mr. Chen requiring tank registration, tightness test for underground lines,
delineation of soil & groundwater contamination, endpoint samples, and implementation of interim
remedial measures. letter emailed to Mr. Chen and Mr. Ciminello with tank registration form and
instruction. 07/23/07-Hiralkumar Patel. spoke with Mr. Chen. asked him to send signed stip to
Jefferey Vought, as i will not be in office from July 30 to Aug. 10. sent email to Mr. Chen with
Vought's contact number and asked him to contact Vought if have any questions. 08/14/07-Hiralkumar
Patel. received letter from NYC DOB (on 07/27/07). as this site doesn't have E designation, DOB has

**275 WEST 231ST STREET (Continued)** **S108764992**

no authority to revoke or withhold issuance of construction permits. 09/06/07-Hiralkumar Patel. left message for Mr. Chen to submit signed STIP by 09/11/07. spoke with Paul and asked him to submit delineation report. 09/10/07-Hiralkumar Patel. received message from Mr. Chen. he will submit signed STIP by end of this week (Sep. 14, 2007). 09/11/07-Hiralkumar Patel. received email from Adam from eco systems. they will submit signed STIP with report documenting cleanup in northwest portion of construction site. 09/17/07-Hiralkumar Patel. spoke with Paul. they haven't done any investigation inside building along old supply line and pipe inside boiler room, where water/oil from construction site was being dumped. they are working on it. asked Paul to register current tank. received signed STIP. 09/28/07-Hiralkumar Patel. received email from Adam with updates. Ecosystems met contractor for line testing for UST system. they are waiting for proposal and availability. also working to find out discharge of drain inside boiler room. 10/29/07-Hiralkumar Patel. spoke with Paul at Ecosystems. asked to submit work plan for investigation inside building at 275 W 231st st. including well on sidewalk along W 231st street. 11/01/07-Hiralkumar Patel. received Status Report from Ecosystems. abstract: - site A: 3120 Corlear Avenue. site B: 275 W 231st Street - 1780 tons of petroleum contaminated soil were excavated from sourthern protion of site A(this is close to site B) - proximity to the adjoining building at site B and the presence of shallow groundwater along the southern site A border, limited the excavation of all contaminated soil and a small amount of soil exhibiting field indications of contamination was left in situ. - tank at site B was tested for tightness and found tight (tank only test result included in report) - following tightness test, all pertinent lines were severed and the tank was cut and removed from site B - during removal of tank at site B, the feed and return lines were presure tested. integrity of both lines was documented, indicating that the lines were not likely to be the source of the release (no test results in report) ---------- - no pressure testing possible for fill and vent line for tank at site B - after excavation and free product removal from southern portion of site A, no evidence of remaining free product in pooled water was observed at site, however, a very slight sheen and faint petroleum odor was noted - four temporary wells were installed at site A - groundwater was encountered from one to three ft bsg during well installation -------- - at least one purge volume of water (three times the static well volume) was removed before groundwater samples were collected - general direction of

**275 WEST 231ST STREET (Continued)** **S108764992**

groundwater flow at the site A was
determined to be ina southerly direction ---------- - PCE
contamination found in groundwater
samples from three wells during two sampling events ---------- -
laboratory data indicated that
the PCE in groundwater is not affecting soils at site A **-proposed
actions: - pooled water that
exhibits a petroleum sheen and odor, located at the southern portion
of site A, will be vacuumed
and removed for proper disposal as NON-HAZARDOUS petroleum
contaminated waste (assumptions:
concentrations of PCE in groundwater at site A are not significant
enough to classify the water as
hazardous waste and that pooled water is not truely representative of
groundwater at site A)
---------- - in conjuction with removal of pooled water, a
temporary sump will be installed in
the area of formerly observed free product - temporary sump should
then be removed prior to
installation of the proposed building slab at site A - vapor barrier
will be installed under the
proposed foundation for the building at site A - proposing soil and
groundwater investigation at
site B - five soil borings will be extended through the former tank
vault area at site B - one
groundwater monitoring well will be installed at the southern side of
site B (along W 231st Street)
PCE values in groundwater: --------Aug. 2007-------Sep. 2007
MW-1--------760----------1,000
MW-2--------540----------880 MW-3--------320----------410 based
on groundwater flow
direction, MW-4 is upgradient well where no PCE contamination found
and MW-1 is downgradient well
where heaviest PCE contamination noted and it increased ----------
this report is missing
following information: - tightness test data for supply and return
line for tank at site B -
investigation of drain inside boiler room at site B where contaminated
water was being dumped -
tank registration left message for Adam at Ecosystems asking above
missing informations. informed
him that if test results of supply and return lines are not available
then soil investigation must
be done along these lines. also the department requires soil
investigation in building corner close
to construction site where free product was found. 11/23/07-Hiralkumar
Patel. received memo from
Paul. they are proposing following work: - soil borings will be done
in tank room as well as inside
basement (if possible) at site B - three permanent monitoring wells
will be installed; one in the
sidewalk at the southern side of site B, one in the sidewalk at the
corner of W 231st St and
Corlear Ave, and one in sidewalk in front of future building at site A
- sub-slab vapor barrier
will be installed during construction of site A Paul mentioned that
third well in front of site A

**275 WEST 231ST STREET (Continued)** **S108764992**

will be installed when it will be safe. 12/06/07-Hiralkumar Patel. received email from Adam. they did borings inside tank room as well as in basement in vicinity of the former access-way (?). total 7 samples were collected. field observation shows contamination under tank room floor as well as under basement floor near access-way. 01/16/08-Hiralkumar Patel. sent email to Adam requiring submission of investigation report. 01/29/08-Hiralkumar Patel. received email from Adam. they will submit investigation report within next two weeks. 02/20/08-Hiralkumar Patel. spoke with Paul. he will sen sample analyticals and site map with sampling locations. Paul mentioned that during investigation they found two more pipes in tank room and found that pipes ends near current boiler room. Paul believes that these pipes were old supply and return lines and as they were cut open underground, oil might have leaked out from these pipes under boiler room floor and as pipes are old, they might be broken somewhere underground near back of building where construction site is and where free product was found during earlier site visits. asked Paul to send site map with approx. location of these old pipes. Paul will do borings inside boiler room to check any contamination. he mentioned that no contamination found under the tank room floor.
02/22/08-Hiralkumar Patel. received email from Paul with status report. abstract: - inspected drain in boiler room (where Mr. Chen was dumping contaminated water from construction site) - water was introduced to the drain in the boiler room and was observed, at the access ports, to be flowing in southerly direction through a pipe which continued south, exiting the building toward W 231st St - performed inspection of three pipes located in the western wall of the former tank vault - pipes were connected to former 2,000 gal fuel oil tank and were severed during tank removal in Oct. 2007; however, those pipes were not associated with known fill, vent or boiler feed lines, which were also severed during tank removal ---------- - no terminus was observed for any of the pipes; however, it was noted that the pipes continued in a straight line in a southwesterly direction toward the boiler room (???) --------- - strong petroleum odors and fuel oil was observed on the plumbing snake upon removal from each of the pipes ---------- - observation suggest that the pipes may have been used as fill, vent and boiler feed lines for former tank, prior to being updated by those pipes which are known to have been used most recently - presence of fuel oil in old lines suggests that overfilling of the tank likely resulted in spillage product into the unused pipes, which may have discharged direcly into the subsurface

**275 WEST 231ST STREET (Continued)** **S108764992**

---------- - advanced seven
borings into tank vault area in the northeast corner of the basement, and one boring near the
former doorway to parking lot in the back of the building (which is currently under construction),
in northwest portion of the basement - sampling was conducted at each boring location at two-feet
intervals to maximum depth of 6 ft bg or until refusal was reached - subsurface soils encountered
during the extension of soil borings generally consisted of brown or gray, moist, fine to medium
texture sand ---------- - groundwater was encountered at approx. 4 ft below surface grade
within former tank vault area (surface grade of tank vault base is approx. 8 ft below the surface
grade of basement floor) - strong to moderate petroleum odors were observed at each boring location
------- - seven soil samples were collected from three boring and found refusal at other five
borings - contamination found only in sample from boring H-8 at depth 0-2 ft, but found clean oil
at 2-4 ft in same boring - boring H-8 was advanced in area of former doorway **-recommendations: -
additiona subsurface investigation be conducted to delineat the extent of contamination beneath the
western and northwestern portion of the building - groundwater investigation to determine potential
impacts to groundwater ------ groundwater found at approx. 4 ft below tank vault floor, so
groundwater might be about 20-23 ft below street (8-10 ft basement floor + 8 ft tank vault base + 4
ft depth to groundwater) ---------- 02/29/08-Hiralkumar Patel. spoke with Mr. Chen. he
mentioned that most recent active supply line was running aboveground (still present), not
underground. spoke with Mark at PTC. asked him to find whether they removed any lines while they
removed tank from site. left message for Paul. 03/03/08-Hiralkumar Patel. received email from Adam.
he mentioned that old lines are located about 12 inches below vault ceiling (means lines were
coming out from top of tank) and visible portions of pipes are oriented at an angle extending in
the general direction of the boiler room. he also mentioned that A correction to the Status Report
should be noted: The pipes were not actually snaked with a plumbing snake, but with a steel tape
reel (used for fishing electrical wire). The steel tape is significantly more rigid than a plumbing
snake. Any changes in pipe direction would have been registered by some degree of resistance when
advancing the tape. No resistance was encountered and it was therefore concluded that were no
changes in pipe direction. 03/11/08-Hiralkumar Patel. left message for Paul to confirm presence of
most recent supply line alongwith old lines. also asked to submit schedule for additional soil

**275 WEST 231ST STREET (Continued)** **S108764992**

investigation inside building. 03/25/08-Hiralkumar Patel. sent email to Paul requiring work
schedule for addditional soil investigation and to confirm presence of most recent supply/return
lines. 03/26/08-Hiralkumar Patel. received email from Adam. they have scheduled soil investigation
on 03/28/08. will submit photographic record of pipes in the former tank vault area.
03/27/08-Hiralkumar Patel. received email from Adam. they re-scheduled sampling on 04/01/08.
04/11/08-Hiralkumar Patel. received email from Adam. they conducted soil sampling on 04/01/08. will
submit report by end of April 2008 with photos and descriptions of the pipes present in the former
tank vault wall. they got permit for sidewalk well installation. will schedule well installation.
04/15/08-Hiraklumar Patel. sent email to Adam inquiring status of sample analyticals.
04/25/08-Hiralkumar Patel. spoke with Paul. they received sample analyticals and preparing report.
05/20/08-Hiralkumar Patel. received email from Adam. will submit report by 06/02/08.
06/16/08-Hiralkumar Patel. received email from Adam. they will install monitoring wells on
06/26/08. 06/17/08-Hiralkumar Patel. sent email to Adam. asked him to submit report for soil
investigation inside building. 06/18/08-Hiralkumar Patel. received status report from Adam.
abstract: - inspected four pipes located within the western wall of the former tank vault,
Ecosystems suggested that the pipes may have formerly been the fill, vent and/or boiler feed lines,
which were not disconnected from the tank following installation of newer, most recent used lines -
petroleum release is likely to be associated with overfilling of the former tank and spillage of
product into these lines - total of five borings were advanced below the northwestern portion of
the building - field evidence of petroleum contamination (petroleum odors and PID readings) were
observed at each boring location - due to poor recovery, total of three soil samples (2HB-1 [6-8'],
2HB-2 [6-8'] and 2HB-4 [0-2']) were collected for analysis - high PID values found in 2HB-1 (285
ppm at 6-8 ft) - found VOC contamination in samples 2HB-1 and 2HB-2, mostly below TAGM except
Naphthalene in sample 2HB-2 (20,000 ppb at 6-8 ft) - will do groundwater delineation via
installation of wells - will submit RAP once get groundwater delineation data found PBS
registration. PBS #: 2-610703. spoke with Paul at Ecosystems. they have installed wells and
finished work yesterday. will sample wells next week and sumbit report once lab data available.
08/04/08-Hiralkumar Patel. spoke with Paul at Ecosystem. they sampled wells last week and waiting
for results. 10/14/08-Hiralkumar Patel. received letter report from

**275 WEST 231ST STREET (Continued)** **S108764992**

Ecosystems. abstract: -
installed three monitoring wells - no contamination found in groundwater samples from all three
wells - wells were installed to depth of 26 to 30 ft bg and water table was found between 15 and 21
ft bg - no evidence of contamination observed during well installation (but no PID readings
available in well logs) ---------- - found high PID reading (157 ppm) at well casing
in well MW-1 which is installed in front of 275 W 231st street site (source site as had leaking
tank in basement) spoke with Adam. he mentioned that Richard Greenemeier is new project manager. he
will ask rick to submit PID readings in well logs. 12/19/08-Hiralkumar Patel. received message from
Laura Liddy, consultant working for next door property at 277-279 w 231st street, doing
environmental assessment. Laura asked about groundwater contamination. Laura Liddy JJ Blake Ph.
(631) 987-2852 spoke with Laura and informed her that there is no contamination found in
groundwater samples. Laura asked about PERC contamination in groundwater as found earlier in water
samples from excavation site. Laura mentioned that there was a former dry cleaner at 271 W 231st
street. 03/02/09-Hiralkumar Patel. spoke with Richard at ecosystems. will submit some documents
today. received remedial work plan from Richard. abstract: -
subsurface in the northwest corner of
the on-site structure will be treated by injection of regenox - area selected for treatment is 12'
by 4' area across a minimum vertical thickness of 10' - two weeks after the injection event, two
soil samples will be collected from the treated area for VOC and SVOC analysis - off-site
groundwater monitoring wells will also be sampled - if concentrations remains above limit, soils
will be re-sampled after an interval of three months and again after six months 03/05/09-Hiralkumar
Patel. spoke with Richard. informed him that this RAP is not approved and it may require pilot
study before implementation. 08/26/09-Hiralkumar Patel. 3:22 PM:- spoke with Richard. no work done
yet. he will talk to Paul. 09/01/09-Hiralkumar Patel. discussed with DEC Austin. he asked to check
basement in building at the corner of W 231st street and Corlear ave (possible downgradient site).
he also asked for possible further delineation including water sample near former door way. 2:05
PM:- left message for Paul. 2:45 PM:- spoke with Paul and asked him about groundwater sampling from
existing wells. he hasn't done yet. he will send email with schedule. also asked him to submit
site-specific groundwater flow direction (using permanent wells), all boring depths in reference to
street level and possiblity of groundwater sampling in area near previous door way at the back of

**275 WEST 231ST STREET (Continued)** **S108764992**

the basement. Paul will talk to Mr. Chen. 2:53 PM:- spoke with Mr. Chen. he will discuss with Paul.
09/24/09-Hiralkumar Patel. 1:27 PM:- left message for Paul.
09/28/09-Hiralkumar Patel. 2:54 PM:-
left message for Paul about site visit. 11/09/09-Hiralkumar Patel.
3:28 PM:- received email from
Richard from Ecosystem with possible dates for site visit.
11/10/09-Hiralkumar Patel. 1:17 PM:-
sent email to Richard to schedule site visit at 11 AM on 11/16/09.
asked him to confirm with Eric.
11/13/09-Hiarlkumar Patel. spoke with Rich to confirm site visit on 11/16/09. Rich asked to
re-schedule a site visit. he will talk to Eric and will send timing.
11/17/09-Hiralkumar Patel.
11:07 AM:- received message from Rich. he will meet at site at 11 AM on 11/19/09.
11/19/09-Hiralkumar Patel. 11:00 AM:- visited site. met Rich and Mr. Chen. inspected basement at
the subject site and at adjacent property 277-279 W 231st street for possible boring locations for
further delineation. as per Rich, no more area available in basement at the subject site for
additional borings. boring/well installation is possible in alleyway behind adjacent building,
between the adjacent building and building at 3120 Corlear ave. asked Rich to install borings in
alleyway for soil delineation. if contaminated soil extends to groundwater, then at a minimum one
monitoring well in alleyway. also asked Rich to submit summary table of each boring depths in
reference to one point. Scott Robert Realty **owner of 277-279 W 231st Street** contact: Gary Moore
Ph. (718) 884-2200 Fax (718) 601-8664 01/21/10-Hiralkumar Patel. 9:48 AM:- spoke with Rich about
off-site investigation. no work done yet. asked Rich to submit work schedule by end of 01/29/10.
02/01/10-Hiralkumar Patel. received email from Rich (at 5:01 PM on 01/29/10). Rich mentioned that
due to space restrictions, they only can install 3/4 inch well in backyard of 277 W 231st street.
Rich mentioned that boring will be installed to depth of minimum of 20 ft bg and will collect soil
samples with PID readings. if no PID reading, then collect soil sample at groundwater interface.
will collect groundwater. Rich mentioned that soil and groundwater samples will be analyzed for
VOCs (STARS list) and PAH. 02/02/10-Hiralkumar Patel. 3:47 PM:- sent email to Rich and informed
that soil and groundwater samples must be analyzed for full list of VOCs (not STARS only).
03/31/10-Hiralkumar Patel. 3:43 PM:- spoke with Rich. they have scheduled well installation, in
backyard of 277 W 231st Street, on 04/09/10. 05/05/10-Hiralkumar Patel. 8:26 PM:- received message
from Rich. 3:40 PM:- spoke with Rich. he mentioned that sub-contractor refused to lower his
geoprobe into backyard of 277 W 231st street and asked for ramp. Mr.

**275 WEST 231ST STREET (Continued)** **S108764992**

Chen will build a ramp and
then they will do required investigation. asked Rich to call back by end of 05/14/10 with work
schedule. 09/10/10-Hiralkumar Patel. 11:24 AM:- left message for Rich. 11:27 AM:- spoke with Mr.
Chen. he mentioned that Rich was looking for another contractor. asked Mr. Chen to submit
contractor's info and well installation schedule by end of 09/17/10 or else case will be referred
to legal. 09/30/10-Hiralkumar Patel. 12:47 PM:- received call from Rich. he mentioned that they
contacted few companies regarding boring/well installation in backyard of 277 W 231st street and
they all refused. Rich is still looking for option to install required boring/well.
11/30/10-Hiralkumar Patel. 9:32 AM:- spoke with Rich. as no-one wants to install well with machine
in area, he is thinking to install well by hand. he will discuss with Paul and will call back.
01/04/11-Hiralkumar Patel. 3:21 PM:- spoke with Rich. they have ordered a pre-pack well and will
hand drill the area. Rich will send work schedule soon.
03/23/11-Hiralkumar Patel. 11:01 AM:- sent
email to Rich requesting update. email copied to Paul and Eric.
08/08/13-Hiralkumar Patel. 9:20
AM:- visited site. met Mr. Chen. informed him that the case is still open and further
investigation/remediation is required. he will discuss with Paul and will schedule a meeting.
inspected property 3120 Corlear Ave (site A) with Mr. Chen. there is 10 story building with
basement at 3120 Corlear Ave. Mr. Chen mentioned that floor 1 to 4 are occupied by Tech
International Charter School. floor # 5 to 10 includes condo units. inspected basement at 3120
Corlear Ave. no odors noted in basement. Mr. Chen mentioned that after installing a vapor barrier,
they poured three (3) ft thick concrete foundation. found a dry cleaning business (Joan's Cleaner)
at 263 W 231st Street. met Kyoung Lin (718-548-0055), owner of dry cleaning business. he mentioned
that there are no dry cleaning machines at the site. it is just drop-off facility. community office
of assemblyman Jeffrey Dinowitz, and satellite office of councilman G. Oliver Koppell are located
at 3107 Kingsbridge Ave (718-549-7300), which is right behind the building at 3120 Corlear Ave.
Corlaton Realty Inc. **owner of 3120 Corlear Ave** c/o Lai-Ho Chen President 275 W 231st Street
Bronx, NY 10463 discussed with DEC Austin and DEC Vought regarding findings of high PCE
contamination noted in groundwater samples from temporary wells during construction of building at
3120 Corlear Ave. based on available information, Austin asked for site-specific groundwater flow
direction and Phase I for building 3120 Corlear Ave. 2:47 PM:- spoke with Mr. Chen. asked him

**275 WEST 231ST STREET (Continued)** **S108764992**

regarding Phase I for property 3120 Corlear Ave. he mentioned that Phase I was conducted prior to
construction. he will submit copy for review. asked him to schedule a site meeting for groundwater
sampling and survey. 2:51 PM:- sent email to Mr. Chen. asked to submit Phase I and schedule a site
meeting for groundwater survey and sampling. email copied to Paul.
08/19/13-Hiralkumar Patel.
received email from Mr. Chen (at 10:20 PM on 08/17/13) including Phase I report. abstract of Phase
I: - dated 02/09/2007 - site 3120 Corlear Ave was a large parking lot serving its customer access
to the one story community bank facing on the 231st Street - search revealed that the parking lot
has never been built of any structure building on the property over the course of time - according
to the survey map and other pertinent documents review suggested that the parking lot was strictly
utilized for banking customers since the community bank was erected in the early nineteenth
hundred, also known as the Great Eastern Bank the Phase I report is missing historical use of the
subject site and surrounding properties. 2:05 PM:- sent email to Mr. Chen. asked him to provide
historical use of the property (3120 Corlear and 275 W 231st st). reminded him to schedule site
meeting. 2:14 PM:- left message for Mr. Chen. 2:34 PM:- received call from Mr. Chen. informed him
about missing historical use of the area. he will contact company who prepared Phase I report. he
has contacted Ecosystem about required groundwater investigation and waiting for response.
08/26/13-Hiralkumar Patel. 7:54 AM:- received email from Rich. Rich submitted copy of historical
sanborn map review report dated 10/20/09, which was submitted during investigation at the site 3120
Corlear Ave. residential building and bank were located at the site. according to sanborn map from
1981-1996, site is labeled garage and storage in basement . but according to property owner, auto
repair activities never took place on the site and site was used for vehicle storage only. vapor
barrier has been installed beneath the basement slab and the basement is used as parking garage
with an active venting system. ---------- Rich also submitted groundwater sample report
dated 01/21/10, which was submitted earlier during investigation at 3120 Corlear Ave. no dissolved
VOCs found in groundwater samples from three wells. groundwater flow found from north to south.
11:08 AM:- spoke with Rich. informed him that based on observations during initial site visit, the
department do require groundwater investigation in backyard of property 277 W 231st Street. Rich
suggested to install a temporary well point and collect groundwater samples for analysis. informed
him that the department will require larger diameter permanent well,

**275 WEST 231ST STREET (Continued)** **S108764992**

if free product found on
water. also, asked him to analyze groundwater sample from the temporary well for full list VOCs and
STARs list SVOCs. Rich will talk to Mr. Chen and will submit schedule. 08/27/13-Hiralkumar Patel.
discussed chlorinated solvent findings with DEC Jane. after reviewing data, she asked for
following: - review of RCRA database for history of 263 W 231st street, where dry cleaning drop-off
is located - detailed building construction drawings for 3120 Corlear Ave - collection and analysis
(full list VOCs and SVOCs) of soil samples during installation of temporary well point, in rear
yard of building 277 W 231st St - collection and analysis of groundwater sample or product sample
from the well that will be installed in rear yard of building 277 W 231st St Jane will send
available sampling data to NYS DOH and DEC Cozzy for review. 11:44 AM:- spoke with Mr. Chen. asked
him to submit detailed building drawings for 3120 Corlear Ave. 08/29/13-Hiralkumar Patel. DEC
Gandhi reviewed available records and total 20 sites in zipcode 10463 with dry cleaner listing.
3:54 PM:- sent email to DEC Jane and DEC Cozzy with copy of dry cleaner listing in zipcode 10463.
09/18/13-Hiralkumar Patel. 10:08 AM:- spoke with Rich. he received signed proposal from Mr. Chen
and well will be installed by next week. informed Rich that continous soil sampling must be done
during well installation. 09/20/13-Hiralkumar Patel. 2:30 PM:- received email from Rich. Rich
mentioned that owner of property 277 W 231st st, where monitoring well is needed, wants assurance
that the well from property 277 can be removed anytime the owner wants. 09/24/13-Hiralkumar Patel.
11:50 AM:- spoke with Rich. he mentinoed that they are ready to install well, once neighbour get
assurance from the department that he can remove well whenever he wants. 11:53 AM:- left message
for Mr. Hackett, owner’s representative for property 277. 2:37 PM:- received call from Mr. Hackett.
explained him spill case and informed him that monitoring well is needed on property 277 to
expedite spill cleanup. he agreed to it and has no objection. Stuart Hackett **owner’s
representative for 277 W 231st St** PH. (917) 440-1997 (C) (718) 884-2200 (O) email:
shackett@robertehill.com 2:43 PM:- sent email to Rich. asked him to contact Mr. Hackett and submit
schedule for well installation. email copied to Paul and Mr. Chen. 10/01/13-Hiralkumar Patel.
received email from Rich (at 4:55 PM on 09/30/13). he mentioned that well was installed today and
groundwater sample will be collected next week. 10/11/13-Hiralkumar Patel. 12:47 PM:- received
email from Rich. he collected groundwater sample today. 11/15/13-Hiralkumar Patel. 8:41 AM:-

**275 WEST 231ST STREET (Continued)** **S108764992**

received email from Christine Arnone
(christine@ecosystemsstrategies.com) from Ecosystem including
report. abstract: - installed a well in the far southeast corner of
the adjoining lot to the north
- boring was advanced with a hand held direct push geoprobe - sampling
was conducted at 2 ft
intervals to a maximum depth of 14 ft bg - no field evidence of
contamination was noted in soils
until the groundwater interface was encountered at 9 ft bg
---------- - at 9 ft bg,
a fine yellowish grey sand with a petroleum odor and staining was
observed and a PID reading of 207
ppm recorded ---------- - soil sample was collected at 9 ft bg
- boring was extened an
additional 5 ft and field evidence of petroleum contamination was
observed to diminish with depth -
after completion of the boring at 14 ft, the 1-inch well was set at 13
ft - groundwater sample was
collected on 10/10/13 - 10 ppm recorded upon removing well cap -
slight petroleum odor was observed
during groundwater sampling - chlorinated solvent contamination was
not noted in soil or
groundwater samples - found VOCs in soil sample with maximum of 480
ppb of 1,2,4-Trimethylbenzene -
minor VOCs found in groundwater sample (max: 31 ppb of
1,2,4-Trimethylbenzene) the report is
missing boring/well installation log. 11/27/13-Hiralkumar Patel. 11:37
AM:- sent email to Christine
and askd to submit detailed boring/well installation log. email copied
to Mr. Chen, Paul and Rich.
02/25/14-Hiralkumar Patel. 11:36 AM:- spoke with Rich and reminded him
to submit missing
boring/well log. 04/03/14-Hiralkumar Patel. 10:47 AM:- received email
from Rich including a well
log. fill, comprised of medium brown sandy soil mixed with brick
fragments, was found from 0-9 ft.
no evidence of contamination noted in 0-9 ft depth. found fine gay
sand, with sheen and petroleum
odors, from 9-13 ft bg. 05/01/14-Hiralkumar Patel. 3:55 PM:- sent
letter to Mr. Chen requiring
quarterly groundwater monitoring, sampling and report submission.
asked him to submit first
quarterly report by the end of 06/16/14. letter emailed to Mr. Chen
and Rich. 06/03/14-Hiralkumar
Patel. 11:40 AM:- received email from EcoSystems including groundwater
sampling report. four
monitoring wells (MW-1A, MW-1, MW-2 and MW-3) were sampled on
05/21/14. no petroleum contamination
noted in groundwater samples. only chlorinated solvent contamination
noted in wells MW-1 and MW-2.
these two wells are located on north sidewalk of W 231st Street, and
are located downgradient of
the site. ----------MW-1------MW-2
PCE----------380-------170
cis-1,2-Dichloroethylene----------4.7 10/06/14-Hiralkumar Patel.
received email from
EcoSystems (at 4:22 PM on 10/02/14) including groundwater sampling

**275 WEST 231ST STREET (Continued)** **S108764992**

report. four monitoring wells
(MW-1A, MW-1, MW-2 and MW-3) were sampled on 09/05/14. reading of 7 ppm at MW-2 and 20 ppm at MW-1
was recorded during well screening. minor petroleum VOCs (maximum 12 ppb of Naphthalene) were noted
in MW-1A. chlorinated solvent contamination noted in wells MW-1 and MW-2. these two wells are
located on north sidewalk of W 231st Street, and are located downgradient of the site.
----------MW-1------MW-2
PCE----------190-------110
10/30/14-Hiralkumar Patel. 2:22 PM:- received email from EcoSystems including supplemental
groundwater sampling letter as an addendum to the groundwater sampling letter dated 10/02/14. due
to high turbidity in groundwater sample from well MW-1A during sampling on 09/05/14, well MW-1A was
resampled on 10/13/14 and sample was analyzed for 8260/8270. no contamination noted in MW-1A.
11/05/14-Hiralkumar Patel. discussed with DEC Austin. due to presence of chlorinated solvents in
groundwater, Austin asked to send request for case transfer to section A. 11/06/14-Hiralkumar
Patel. 11:26 AM:- sent email request to DEC Austin for case transfer, with site summary. email
copied to DEC DeMeo. 11/19/14-Hiralkumar Patel. discussed case with DEC Jane. she will discuss
current data with DEC Cozzy. 12/02/14-Hiralkumar Patel. as no further investigation/remediation
needed for petroleum compounds, case assigned to DEC Jane, with her approval, for followup on
findings of chlorinated solvent contamination in groundwater. **3rd quarterly report due in Jan.
2015.** **refer to spill #: 0606526 also.** **check e-docs under Spill #: 0606526 for documents.**
DEC requires: 1) quarterly GW monitoring, sampling and report submission Due to chlorinated solvent
findings, HPIN with Envirotrac opened to resample up to three existing monitoring wells in vicinity
of the site, install up to three soil gas sampling locations between contaminated well(s) and
potential receptors (possible residential properties) and depending on results perform SVI sampling
in nearby residences. (3/31/16) Call Out with Envirotrac was cancelled on December 13, 2016 with no
work performed and no costs. (3/31/2017)

Remarks: during site visit found oil on tank vault floor. tank is out-of-service

| Record Upd: | 06/14/2024 |
| Updated By: | WBBENNET |
| Site Description: | LOCATION: The site is located at 7 Terrace View Avenue in the Marble Hill neighborhood of New York County, New York. The site is bounded by Terrace View Ave to the south, and by adjacent parcels on all other sides. SITE FEATURES: Currently, the site is vacant and undeveloped. CURRENT ZONING AND LAND USE: The site is currently vacant and undeveloped. It is located within an urban area zoned M1-1 (manufacturing). The M1 zones typically include light industrial uses. The surrounding parcels are currently utilized for one to two family residential use, commercial use and office buildings, and industrial and manufacturing uses. PAST USE OF THE SITE: Unknown no Phase I investigation has been conducted to determine former uses of the site. SITE GEOLOGY AND HYDROGEOLOGY: Subsurface soils consist of approximately 6 feet of poorly graded brown to light brown sand with trace amounts of slit and gravel. Groundwater was not encountered during the Remedial Investigation, as shallow refusal at approximately 6 feet below the ground surface prevented the installation of monitoring wells. |
| Env Problem: | Soil: Twelve soil samples were collected from six soil borings completed in March 2023. There were no detections of VOCs, SVOCs, PCBs, or PFAS in soils that exceeded their respective UUSCOs or guidance values. The following metals were detected at concentrations exceeding their respective UUSCOs: arsenic (max. 13.6 ppm in SB-4 0-2 ), barium (max. 434 ppm in SB-4 0- 2 ), copper (max. 93 ppm in SB-1 4-6 ), lead (max. 524 ppm in SB-4 0-2 ), nickel (max. 42.3 ppm in SB-4 0-2 ), selenium (max. 4.04 ppm in SB-9 0-2 ), zinc (max. 573 ppm in SB-4 0-2 ), and mercury (max. 0.524 ppm in SB-4 0-2 ). The following pesticides were detected at concentrations exceeding their respective UUSCOs: 4,4 -DDE (max. 0.00355 ppm in SB-4 0-2 ) and 4,4 -DDT (max. 0.00602 ppm in SB-4 0-2 ). Soil Vapor: Seven soil vapor samples were collected in March 2023 from seven vapor probes (installed approximately 6 ft bgs). The following constituents were detected: carbon tetrachloride (max. 0.49 ug/m3 in SV-3), PCE (max. 96 ug/m3 in SV-4), and TCE (max. 0.52 ug/m3 in SV-2). |
| Health Problem: | As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns. |

| DEC Memo: | Liro Construction is installing a sewer line for NYC-DDC project - While digging a trench in front of an existing gas station (401 West 207th st) they found weathered petroleum contaminated soil. Sangesland asked Mr. Frank to confirm that the contaminated soil was NOT dumped back into the trench after the new line was installed. Mr. Frank will confirm and call back. Apparently there is already an open spill for the gas station at this location. 4/23/07 - Carlson - Received email from Steve Frank at Liro Engineering : The trench was excavated to install a new water line. Trench length is more than 100 ' but the affected area is only about 10' wide. The trench is about 10' deep there. The contractor reported that nothing unusual was noticed in the soil when the trench was dug and that no liquid was in the trench when excavated. The substance in the trench was not noticed until after the big rainstorm. We inspected the fluid Weds. AM, collected a sample and called the hotline as it smelled and looked like a petroleum product to us. The trench is still open and the Contractor does not intend to backfill with the soil that was removed from the trench. Received laboratory results of sample. DEC Carlson performed site inspection. The sewer line is being installed at approximately 8 ft below grade. One portion about 10ft long is contains water and floating product. This portion is directly downgradient of the Hess station. The portion with water and product is greater than 8 ft deep, and will have a concrete box and manhole around it. The construction operator reported seeing soil staining when groundwater was encountered at approximately 8 ft below grade. Met with the engineer on site Attef Farag (phone 973-623-2999, email afarag@kseng.com). Met with Hess's consultant, Jonathan Curran from Delta. Tim Fisher from Delta will be managing this incident. I indicated to Attef Farag that the water in the excavation will need to pumped out and properly disposed of. 05/14/07-Vought-Called Farag for update on trench installation and to notify him that spill will be closed and referred to Hess open spill at adjacent site. Vought left message for Farag to return call to DEC. |

**MERIT SERVICE STATION (Continued)** **S108636298**

05/16/07-Vought-Called Farag
for update as no call received and told to call 718-424-4157. Vought called Steve Frank (Liro) and
left message to return call to DEC and will provide him with contact info for DEC Carlson and Hess
(who will be managing remediation of source site).
06/21/07-Vought-Called Frank (718)321-3136x236
for update and left message that case will be closed and referred to open spill for source Hess
Station located at 401W207th Street (spill #0201597). Spill closed by Vought.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal NPL (Superfund) sites***

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/26/2025

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/26/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

***State and tribal institutional control / engineering control registries***

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Local Brownfield lists***

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

**OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

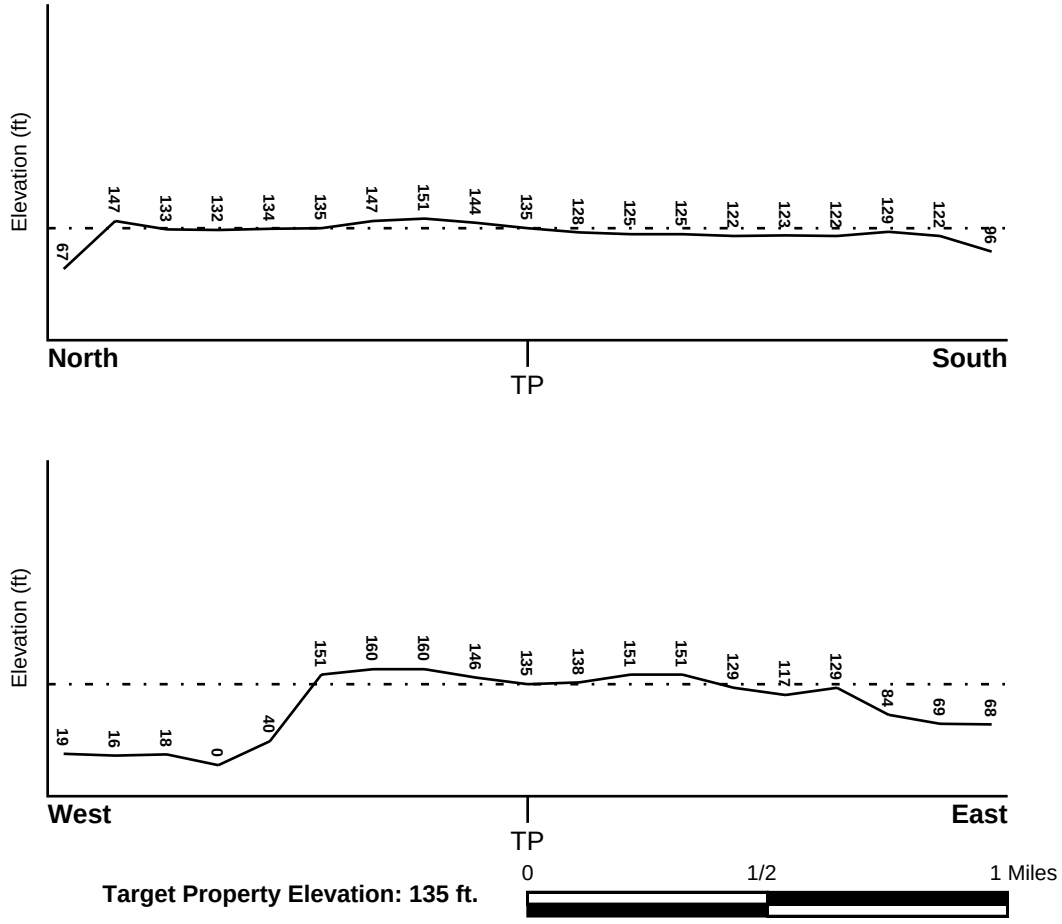
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



**TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

**TARGET PROPERTY TOPOGRAPHY**

General Topographic Gradient: General SSE

**SURROUNDING TOPOGRAPHY: ELEVATION PROFILES**

**Target Property Elevation: 135 ft.**

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

| Flood Plain Panel at Target Property | FEMA Source Type |
|---|---|
| 3604970082F | FEMA FIRM Flood data |

| Additional Panels in search area: | FEMA Source Type |
|---|---|
| 3604970018F | FEMA FIRM Flood data |
| 34003C0220G | FEMA FIRM Flood data |
| 3604970006B | FEMA Q3 Flood data |
| 3604970081F | FEMA FIRM Flood data |

### NATIONAL WETLAND INVENTORY

| NWI Quad at Target Property | NWI Electronic Data Coverage |
|---|---|
| CENTRAL PARK | YES - refer to the Overview Map and Detail Map |

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

***Site-Specific Hydrogeological Data*:***

| | |
|---|---|
| Search Radius: | 1.25 miles |
| Status: | Not found |

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| MAP ID | LOCATION FROM TP | GENERAL DIRECTION GROUNDWATER FLOW |
|---|---|---|
| Not Reported | | |

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

**GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

**ROCK STRATIGRAPHIC UNIT** **GEOLOGIC AGE IDENTIFICATION**

| | | | |
|---|---|---|---|
| Era: | Paleozoic | Category: | Stratified Sequence |
| System: | Ordovicias | | |
| Series: | Lower Ordovician and Cambrian carbonate rocks | | |
| Code: | OC *(decoded above as Era, System & Series)* | | |

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

**DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

| | |
|---|---|
| Soil Component Name: | URBAN LAND |
| Soil Surface Texture: | variable |
| Hydrologic Group: | Not reported |
| Soil Drainage Class: | Not reported |

Hydric Status: Soil does not meet the requirements for a hydric soil.

| | |
|---|---|
| Corrosion Potential - Uncoated Steel: | Not Reported |
| Depth to Bedrock Min: | > 10 inches |
| Depth to Bedrock Max: | > 10 inches |

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|---|---|---|---|---|---|---|---|
| | Boundary | | | Classification | | | |
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | Permeability Rate (in/hr) | Soil Reaction (pH) |
| 1 | 0 inches | 6 inches | variable | Not reported | Not reported | Max: 0.00<br>Min: 0.00 | Max: 0.00<br>Min: 0.00 |

**OTHER SOIL TYPES IN AREA**

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

AQUIFLOW$^{R}$ Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

## ASSOCIATE PRINCIPAL

## ENVIRONMENTAL ENGINEERING

Mr. McMahon is an environmental engineer working in the NY Metro area. He has experience with projects in the New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP), Voluntary Cleanup Program (VCP) and Spill Programs, and New York City Office of Environmental Remediation (NYCOER) "E" Designated and VCP sites. His field experience includes conducting Phase II Environmental Site Investigations (ESI), remedial investigations, and indoor air quality analysis Investigations, and performing remediation oversight. Mr. McMahon's most recent experience includes the preparation of investigation reports and investigation work plans, management of NYSDEC BCP remediation projects and NYSDEC spill remediation projects, design of submembrane depressurization systems, and development of remediation work plans.

### EDUCATION

M.E., Environmental Engineering
Manhattan College

B.S., Civil Engineering
Washington University in St. Louis

### PROFESSIONAL REGISTRATION

Professional Engineer (PE) in NY

10-Hour OSHA

40-Hour OSHA HAZWOPER

### SELECTED PROJECTS

- 55 Bank Street, NYSDEC BCP Site Remediation Project Management, White Plains, NY
- 23-01 42nd Road, NYSDEC BCP Site Remediation Oversight and Project Management, Long Island City, NY
- 23-10 Queens Plaza South, NYSDEC BCP Remedial Investigation Report, Interim Remedial Measures Work Plan, and Remediation Project Management, Long Island City, NY
- Brooklyn Navy Yard Dock 72, Management of Environmental Oversight in Accordance with NYSDEC VCP Site Management Plan, Brooklyn, NY
- Purves Street Development, Tall Residential Building, Phase II ESI/NYSDEC BCP Remedial Investigation, Remedial Action Work Plan, and Site Remediation Project Management, Long Island City, NY
- 27-21 44th Drive, NYSDEC BCP Site Remediation Project Management, Long Island City, NY
- NYU Tandon School of Engineering, NYSDEC Spill Investigation and Remediation Project Management, Brooklyn, NY
- Parcel B West, East Harlem, Affordable Housing Development, NYSDEC BCP Remedial Investigation, Remedial Action Work Plan, and Site Remediation Project Management, New York, NY
- 267-273 West 87th Street, NYSDEC BCP Remedial Investigation and Remedial Action Work Plan, and Site Remediation Project Management, New York, NY
- DuPont-Stauffer Landfill, NYSDEC Superfund Site, Site Management Plan Compliance, Newburgh, NY
- 190 Riverside Drive, Fuel Oil Spill Emergency Response, Site Investigation, and Remediation, New York, NY
- 473 President Street, NYSDEC BCP Remedial Investigation, Interim Remedial Measures, Project Management, Brooklyn, NY

- 175-225 3rd Street, NYSDEC BCP Remedial Investigation, Project Management, Brooklyn, NY
- 322 West 57th Street, Sheffield Building Oversight of Emergency Spill Response, New York, NY
- Hudson Yards Terra Firma and Hudson Yards Platform, Construction Oversight and Community Air Monitoring Program, New York, NY
- Columbia University Manhattanville Redevelopment, Remediation Oversight and Community Air Monitoring Program, New York, NY
- 343 Madison Avenue, Construction Oversight and Waste Characterization, New York, NY

# KRISTEN WEXLER, CHMM

## PROJECT SCIENTIST

## ENVIRONMENTAL ENGINEERING

Ms. Wexler is an environmental scientist with seven years of experience working within the environmental consulting industry throughout New York and Connecticut. She is experienced in due diligence, real estate development, brownfield redevelopment, site characterizations, remedial investigations, remedial strategies and designs, and remedial action implementation and management. She holds experience working at commercial, industrial, municipal, and undeveloped sites within the state of New York and Connecticut.

### SELECTED PROJECTS

- Alafia/Brooklyn Development Center, Brooklyn, NY
- 362 West 125th Street, Construction Oversight and CAMP, New York, NY
- 320 West Fordham Road, New York, NY
- NYU 181 Mercer Street, Construction Oversight and CAMP, New York, NY
- Bronx Point, Drilling/Sampling, Reporting, Construction Oversight, and CAMP, Bronx, NY
- 540 West 21st Street, Construction Oversight and CAMP, New York, NY
- 261 Walton Avenue, Brownfield Cleanup Program Investigation, Bronx, NY
- Confidential Projects, Phase I Environmental Site Assessments, Various Locations, NY
- 461 River Road, Underground Storage Tank Removal and Tank Closure, Glenmont, NY
- Warehouse Lane, Underground Tank Removal, Elmsford, NY
- 111 Washington Street, Remedial Investigation, Brownfield Cleanup Program, Spill Delineation, Remedial Reporting, New York, NY
- Confidential Project, GIS Data Mapping, Long Island, NY
- Jamaica Bay Landing, Remedial Action Plan, Construction Oversight, Brooklyn, NY

### SELECTED PUBLICATIONS, REPORTS, AND PRESENTATIONS

Wexler, K., "The invasive tunicate, Styela clava, as an ecosystem engineering Long Island Sound", Coastal and Estuarine Research Federation 24th Biennial Conference, 2017, Providence, RI

### EDUCATION

M.S., Environmental Science
(Environmental Ecology Concentration)
University of New Haven

B.S., Marine Biology
B.S., Environmental Science
(Chemistry Minor)
University of New Haven

### PROFESSIONAL REGISTRATION

Certified Hazardous Materials Manager (CHMM)

40-Hour OSHA HAZWOPER

10-Hour OSHA

NYSDEC Erosion and Sediment Control (SWPPP Inspector)

# MAXWELL G. SHARP, CABI, EIT

## SENIOR STAFF ENGINEER

## ENVIRONMENTAL ENGINEERING

Maxwell is an experienced environmental engineer with a bachelor's degree from Syracuse University and a master's degree from the Colorado School of Mines. He has a strong background in data analysis and validation and gained invaluable experience overseeing daily effluent sampling at a wastewater treatment plant in Butte, Montana. In his current role, Maxwell is responsible for conducting Phase I and Phase II Environmental Site Assessments (ESAs), soil, groundwater, and soil vapor sampling, performing asbestos-related building inspections, as well as managing stormwater permitting and compliance. Additionally, he excels in data analysis and report writing.

Maxwell's diverse background includes providing compliance services for the Berkely Pit Mine in Butte, Montana, conducting stormwater and groundwater sampling across polluted sites in Colorado, Nebraska, and Kansas. He has also contributed to the development of compliance reports for wastewater treatment and played a key role in the operations and maintenance of sump pump stations for the Regional Transportation District (RTD). Moreover, he has worked on abandoned monitoring wells in Wyoming, showcasing his versatility and expertise in the field.

### SELECTED PROJECTS

- Distribution Center (DALz1), Phase I Environmental Site Assessment (ESA), Cleburne, TX
- Distribution Center (DGC3), Phase I Environmental Site Assessment (ESA), Oklahoma City, OK
- Distribution Center (LAS2), Phase II Environmental Site Investigation (ESI), Las Vegas, NV
- Distribution Center (Project Falcon), Environmental Construction Oversight and Air Monitoring, Kansas City, MO
- Distribution Center (WCO5), Phase I and Phase II Environmental Site Assessment (ESA), Montrose, CO
- Distribution Center (WMT4), Phase I and Phase II Environmental Site Assessment (ESA), Kalispell, MT
- Distribution Center (WUT9), Phase I and Phase II Environmental Site Assessment (ESA), Price, UT
- East Houston Oil and Gas Properties, Environmental Engineering Services, Baytown, TX
- Equipment Rental and Maintenance Facility (Wagner), Phase I Environmental Site Assessment (ESA), Colorado Springs, CO
- Equipment Rental and Maintenance Facility (Wagner), Phase I Environmental Site Assessment (ESA) and Phase II Environmental Site Investigation (ESI), Denver, CO
- Equipment Rental and Maintenance Facility (Wagner), Phase I Environmental Site Assessment (ESA), Silverthorne, CO
- Former Lumen Communications Campus (Stacklot), Regulated Building Materials (RBM) Services, Denver, CO
- Gardner Cryogenics- Manufacturing Facility, Phase II Environmental Site Investigation (ESI), Liberal, KS

### EDUCATION

M.S., Environmental Engineering, Colorado School of Mines

B.S., Environmental Engineering, Syracuse University

### PROFESSIONAL REGISTRATION

Colorado Department of Public Health & Environment (CDPHE), Certified Asbestos Building Inspector (29350)

Asbestos Hazard Emergency Response Act of 1986 (AHERA), Certified Asbestos Building Inspector

Engineer-in-Training (EIT), CO

40-Hour OSHA HAZWOPER

8-Hour OSHA HAZWOPER Refresher

Utah Certified Asbestos Building Inspector

- Victory Crossing, Mixed-Use Development (Rocky Mountain Arsenal Wildlife Refuge), Environmental and Geotechnical Engineering Services, Commerce City, CO
- Wasatch Peaks Ranch, Private Ski Resort, Geotechnical Observation, Peterson, UT
- 5595 Federal Boulevard, Phase I and Phase II Environmental Site Assessment (ESA), Denver, CO
- 16270 E. Arapahoe Road, Mechanically Stabilized Earth (MSE) Wall Repair, Geotechnical Observation, Foxfield, CO
- Distribution Center (Confidential Client), Phase I Environmental Site Assessment (ESA), Boise, ID
- Solar Farm (Cumberland), Phase I Environmental Site Assessment (ESA), Saltsburg, PA

# LILAH WILLIS

## STAFF SCIENCTIST

## ENVIRONMENTAL ENGINEERING

Ms. Willis is a staff scientist with one year of experience, supporting Langan's New York City office. She is responsible for supporting environmental due diligence, investigations, and remedial design implementation. This includes general oversight tasks, subsurface media sampling (soil, groundwater, soil vapor), and report preparation.

### SELECTED PROJECTS

- Willets Point Redevelopment, Flushing, NY
- New York City FC Etihad Park, Willets Point, NY
- President Street Properties, Brooklyn, NY
- 459 Smith Street Redevelopment, Brooklyn, NY
- 2868 Webster Avenue, Bronx, NY
- 145 Wolcott Street, Brooklyn, NY
- Prologis 1120 Bronx River Avenue, Bronx, NY
- 1298 Inwood Avenue, Bronx, NY
- NYCDDC Design Build Borough Based Jail, Brooklyn, NY
- 615 Broadway, Kingston, NY
- 67 Meserole Street & 172 Montrose Street, Brooklyn, NY
- 360 West Broadway, New York, NY

### EDUCATION

BS, Environmental Science, McGill University, Montreal, Quebec

### PROFESSIONAL DEVELOPMENT

Online Micro Certificate: Climate Vulnerability & Adaptation, UBC, Issued Apri 2024

Remote First Aid & CPR/AED Level C, Canadian Red Cross, Expires Nov 2023
