## OBSERVATIONS, DISCUSSIONS, TEST RESULTS, ETC.:

Langen was on-site to document implementation of the New York State Department of Environmental Conservation (NYSDEC)-approved March 24, 2022 Remedial Action Work Plan (RAWP) for Brownfield Cleanup Program (BCP) Site No. C224080. Site Map 1 presents the Society Brooklyn and Sackett Place developments, which together comprise the BCP site.

### Site Activities

- Kingdom excavated 7 test pits to a maximum depth of about 2 feet below ground surface (bgs) in the southwestern part of Sackett Place. Impact Environmental collected 8 delineation samples from the test pits to facilitate future off-site disposal of historic fill.
  - Excavated historic fill was screened for odor, staining, and organic vapors using a photoionization detector (PID). Petroleum-like odors, black staining, petroleum-like sheen, and a maximum PID reading of 15,000 parts per million (ppm) were observed. Odors were not apparent at the site perimeters during excavation and stockpiling.
  - Kingdom applied an odor suppressant (Biosolve Pinkwater) to the excavated soil/fill during excavation and stockpiling.
  - Kingdom temporarily stockpiled the excavated historic fill adjacent to the excavation. Following sample collection, the excavated historic fill was returned to the excavations of origin pending future re-excavation and off-site disposal.

### Soil/Fill Import and Export Tracking

- No material was imported to or exported from the site.

### Sampling

- Impact collected delineation samples from 0 to 2 feet bgs in the southwestern part of Sackett Place. Samples will be analyzed for benzo(a)pyrene by Phoenix Laboratories in Manchester, Connecticut.

### Community Air Monitoring

- Langen conducted real-time air monitoring for VOCs and particulate matter smaller than 10 microns in diameter (PM10) at the upwind and downwind perimeters of the work area during ground-intrusive work. VOC and PM10 action levels were not exceeded during the monitoring period. Air monitoring data is attached to this report.

### Anticipated Activities

- Kingdom will perform load tests.
