GENERAL COMMENTS:

As part of the of the NYSDEC-approved Remedial Action Work Plan and modifications, Roux Environmental Engineering and Geology D.P.C. (Roux) performed environmental oversight and operated air monitoring equipment in compliance with the Community Air Monitoring Plan (CAMP) during foundation installation activities.

RAWP Activities Performed:

- Blakeslee began taking apart crawler crane, completing the disassembly of the boom by the end of the work day. Tomorrow they will complete the disassembly of the crawler crane, counterweights, and superstructure.
- Kingdom removed forms around previously poured concrete in grid B3. In the same space, Kingdom continued to add additional vertical rebar and forms on top of previously poured foundation for future concrete wall pour.
- No soil movement occurred today.

CAMP Performed:

- CAMP was performed for the duration that Roux was onsite observing intrusive work. No exceedances of particulates or VOCs were recorded.

Other Relevant Comments or Issues:

- No relevant comments or issues.

Upcoming work activities:

- Blakeslee completed the erection of precast concrete pieces for the superstructure.
- Kingdom will remain onsite through approximately 1Q 2023 to complete SSDS, vapor barrier, and foundation slab installation.
- Roux will continue to perform full-time oversight and CAMP during intrusive construction activities and perform inspections during installation of engineering controls.
