

**(Fact Sheet Begins Next)**

## **Act Now to Continue Receiving Information About This Site!**

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

**You must sign up for the DER email listserv:**

<https://dec.ny.gov/environmental-protection/site-cleanup/regional-remediation-project-information/environmental-cleanup-email-newsletters>

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

### **Why You Should Go “Paperless”:**

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

**If “paperless” is not an option for you**, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

# Red Hook 4 Properties

## Brownfield Cleanup Program

Site No. C224214

Brooklyn, Kings County

Department of  
Environmental  
Conservation

August 2025

## Environmental Cleanup to Begin at Brownfield Site

Action is about to begin that will address contamination related to the Red Hook 4 Properties site ("site") located at 44-62 Ferris St. Brooklyn, Kings County, NY. Please see the map for the site location. The cleanup activities will be performed by BT Red Hook LLC, BT Foster LLC and Kenmare E4 LLC ("applicants") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). NYSDEC has determined that the Remedial Work Plan (RWP) protects public health and the environment and has approved the plan.

- Access the approved RWP and other project documents online through the DECinfo Locator: <https://extapps.dec.ny.gov/data/DecDocs/C224214>
- Documents also are available at the location(s) identified under "Where to Find Information."

Cleanup activities are expected to begin in autumn of 2025 and last about 3 months.

### Highlights of the Upcoming Cleanup Activities

The goal of the cleanup action for the site is to achieve cleanup levels that protect public health and the environment. The key components of the cleanup are:

- Installation and operation of automatic mechanical petroleum tar recovery wells to remove nonaqueous phase liquid (NAPL) from the subsurface which is then transported offsite for treatment.
- Restoring the site cover system (e.g. gravel, asphalt or concrete) where it is compromised, or placement of a 1-foot clean soil cover.

A site-specific health and safety plan (HASP) and a Community Air Monitoring Plan (CAMP) will be implemented during cleanup activities. The HASP and CAMP establish procedures to protect on-site workers and residents and includes required air monitoring as well as dust and odor suppression measures.

### Next Steps

After the applicants complete the cleanup activities, they will prepare a Final Engineering Report (FER) and submit it to NYSDEC. The FER will describe the cleanup activities completed and certify that cleanup requirements have been achieved or will be achieved.

When NYSDEC is satisfied that cleanup requirements have been achieved or will be achieved for the site, it will approve the Final Engineering Report. NYSDEC will then issue a Certificate of Completion to the applicants. The applicants would be able to redevelop the site in conjunction with receiving a Certificate of Completion. In addition, the applicants would be eligible for tax credits to offset the costs of performing cleanup activities and for redevelopment of the site.

NYSDEC will issue a fact sheet that describes the content of the Final Engineering Report. The fact sheet will identify any institutional controls (for example, environmental easements) or engineering controls (for example, a site cover) necessary at the site in relation to the issuance of the Certificate of Completion.

## Site Description

The Red Hook 4 Properties site is a 2.29-acre site located in the Red Hook neighborhood of Brooklyn. The site is bounded by Sullivan Street to the north, Ferris Street to the east, Wolcott Street to the south, and an industrial building followed by Buttermilk Channel to the west. The site is a rectangular-shaped site and is a gravel lot with no buildings and was most recently used as a parking lot. Past uses include an oil refinery, a lubricating oil storage facility, a lumber yard, and a ship repair facility.

The Remedial Work Plan details cleaning the site to Commercial use standards. A commercial use is envisioned for site redevelopment subject to local zoning.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C224214) at:

<https://appfactory.dec.ny.gov/DERExternalSearch/ERDSearch>

## Brownfield Cleanup Program

New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://dec.ny.gov/environmental-protection/site-cleanup/brownfield-and-state-superfund-programs/brownfield>

## Stay Informed with DEC Delivers

**We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.**
