RE: Phase I Environmental Site Assessment
Euro Woodworking LLC TBF
458 East 99th Street
Brooklyn, New York 11236

Dear Mr. Kocur:

EFI Global, Inc. (EFI) is pleased to provide the results of our Phase I Environmental Site Assessment (ESA) of the referenced property. This assessment was authorized and performed in general accordance with the scope of services outlined in the RIMS Award Form, dated May 3, 2016, the JPMorgan Chase Bank, N.A. Environmental Due Diligence Guidance Document (revised August 2015) and the Master Service Agreement for Environmental Services between EFI and JPMorgan Chase & Co. dated June 4, 2013.

This assessment was also performed in accordance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and included a site reconnaissance, as well as research and interviews with private individuals, knowledgeable parties, and regulatory agency officials. An assessment was made, conclusions stated, and recommendations outlined.

Consultant has no present or contemplated future ownership or financial interest in the real estate that is the subject of this Environmental Assessment Report; and Consultant has not personal interest with respect to the subject matter of the Environmental Assessment Report of the parties involved and consultant has no relationship with the property or the owners thereof which would prevent an independent analysis of the environmental or other conditions of the property.

Unless expressly authorized in writing by JPMorgan Chase Bank, N.A. (JPMC), no one is permitted or intended to rely upon the findings, conclusions or recommendations found herein. This information is provided as a courtesy only and its accuracy has not been verified. The recipient accepts this information understanding that no representations or warranties are made with respect to this information and that recipient must make an independent determination of the accuracy of any information contained herein. The recipient acknowledges that JPMC has no responsibility for this information and the recipient releases JPMC from liability for any inaccuracy, mistake or other defect in this information.

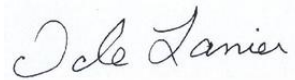

Reliance on the Phase I Environmental Site Assessment Report, dated May 18, 2016 by EFI Global, Inc., by the client and all authorized participants, co-lenders, and assignees of any indebtedness secured by the Site will be subject to the terms, conditions and limitations stated in our Environmental Services Agreement (ESA) between EFI Global, Inc. and JPMorgan Chase Bank, N.A.

We appreciate the opportunity to provide assessment services to JPMorgan Chase Bank, N.A. on this project. If you have any questions concerning this report, or if we can assist you in any other matter, please contact Mandeep S. Sandhu at (732) 629-7930 or Mandeep_Sandhu@efiglobal.com.

Sincerely,
EFI Global, Inc.

EXECUTIVE SUMMARY

EFI Global, Inc. (EFI) has performed a Phase I Environmental Site Assessment (ESA) of Euro Woodworking LLC TBF located at 458 East 99th Street, Brooklyn, New York (the "Property") in accordance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This ESA was authorized by JPMorgan Chase Bank, N.A. on May 3, 2016.

The Property is located within the Borough of Brooklyn, New York in an area consisting of manufacturing, commercial and warehouse facilities. The Property is located at 458 East 99th Street, approximately 180 feet northwest of the intersection of East 99th Street and Foster Avenue, on the southwest side of East 99th Street. The Property is bordered to the northeast by East 99th Street followed by Whisky Shippers & Movers at 461 East 99th Street; and, a manufacturing/warehouse-type building at 439 East 99th Street; to the southeast by Home Deco Design at 464 East 99th Street; to the southwest by Gotham Steel Supply at 1231 Rockaway Avenue (aka 857 East 98th Street) and Saba Live Poultry at 1227 Rockaway Avenue; and to the northwest by Affordable Glass Auto Inc and Untied Trading at 452 East 99th Street. Based upon topographic map interpretation and site observations, the inferred direction of groundwater flow is to the east-southeast.

The Property is approximately 0.14 acre and is improved with a single-story commercial building. The Property is currently occupied by Pinnacle Lift of New York, a fork lift sales, service, parts and rental establishment. EFI was informed that no repairs are conducted on the premises and the facility operates primarily as a warehouse. Furthermore, according to a representative of Pinnacle Lift of NY, the landlord stores a freezer in the alley abutting the building to the northwest.

The Property is improved with a single-story commercial building, totaling approximately 5,000 square feet. The building is constructed to the near lot line and abutted by concrete-paved land to the northeast and northwest. The building is slab-on-grade, steel-frame construction with walls of concrete masonry units and brick. The building is finished on the exterior with painted brick. The building includes a small office area in the northeastern corner and a storage room and restrooms in the southeastern corner. The remainder of the building is used for warehouse purposes.

The building is heated via electric ceiling-mounted heaters in the warehouse and office areas. Cooling is provided to the office and storage areas only and is provided via thru-wall electric units. Domestic hot water is provided via an electric hot water heater.

The Property was unimproved land as early as 1907 through at least 1950 and developed with the existing structure by 1952. The Property was occupied by a dry cleaning chemical warehouse between at least 1966 and 1973. Based on the limited information available, this former usage represents a Recognized Environmental Condition (REC).

EFI reviewed regulatory databases and files from federal, state and local environmental regulatory agencies to identify use, generation, storage, treatment or disposal of hazardous materials or release incidents of such materials that may impact the Property. The records reviewed included, but were not limited to, the following: Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS); National Priorities List (NPL); Resource Conservation Recovery Information System (RCRIS); Treatment, Storage and Disposal Facilities (TSD); Large and Small Quantity Generators; Emergency Response Incidence Logs; state-registered underground storage tanks (UST); state leaking underground storage tank (LUST) incident reports; state solid waste facilities/landfill sites (SWF/LS); state hazardous waste sites (SHWS); and other local records.

The Property was not identified on any environmental databases that track spills or releases or other databases that indicate an environmental condition exists at the Property. Therefore, a regulatory file review with respect to the Property is not warranted.

Based on review of the Property's environmental setting and historical uses and current uses, as well as a review of government records and the regulatory database report, EFI concludes that the Property does not contain a potential vapor encroachment condition (VEC).

Conclusions

EFI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of 458 East 99th Street, Brooklyn, New York (the Property). Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions or Controlled Recognized Environmental Conditions in connection with the Property, except for the following:

- Historical records identified the Property as occupied by a dry cleaning chemicals warehouse from at least 1966 through at least 1973. It is not known if chlorinated solvents were stored (or spilled) at the Property.
- Building records identified an oil burner application for the Property dated 1952. No further details regarding former on-site fuel oil storage was provided and it is possible that an underground storage tank (UST) was previously used at the Property.

EFI's assessment included additional services to evaluate asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, and mold. This assessment has revealed no evidence of related conditions of concern in connection with the Property, except for the following:

- Based on the 1952 date of construction, building materials may contain asbestos. The suspect ACM consists of non-friable floor tile mastic and wallboard assemblies; and friable drop acoustical ceiling tiles. In addition, although not observed, roofing materials are suspected to contain ACM. According to the EPA, while suspect or ACM may be managed in place under an operations and maintenance program, sampling would be required to document the presence or absence of asbestos-containing material.

Recommendations

As a result of this assessment, EFI recommends the following:

- Historical Usage - A Phase II Limited Subsurface Investigation should be performed to determine if the subsurface conditions have been impacted by a release of dry cleaning solvent. Depending on the results, additional action may be warranted.
- Potential Fuel Oil UST - A geophysical survey should be conducted in order to determine the presence or absence of a UST. Depending on the results, additional action may be warranted.
- Asbestos - Suspect ACM in good condition can effectively be managed with the development and implementation of an asbestos Operations and Maintenance (O&M) Program. The objective of an O&M Program is to implement a practical management approach to controlling identified ACM within the Property. The O&M Program is designed to cleanup existing contamination, minimize

future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed.

Environmental Report Summary

	Report Section	No Further Action	REC	CREC	HREC	Issue/Further Investigation (see second table)
2.3	Current Use of Property	✓				
2.5	Current Use of the Adjoining Properties	✓				
4.1	Standard Environmental Records Sources	✓				
4.5.1	Historical Summary		✓			✓
4.5.7	Other Environmental Reports	✓				
5.3.1	Hazardous Substances	✓				
5.3.3	Underground Storage Tanks (USTs)		✓			✓
5.3.4	Aboveground Storage Tanks (ASTs)	✓				
5.3.6	Other Suspect Containers	✓				
5.3.7	Polychlorinated Biphenyl Compounds (PCBs)	✓				
5.3.12	Stained Soil/Stressed Vegetation	✓				
7.1	Asbestos-Containing Materials					✓
7.2	Lead-Based Paint	✓				
7.3	Radon	✓				
7.4	Microbial Contamination (Mold)	✓				
7.5	Lead in Drinking Water	✓				

Recommendation Summary

The recommendations are as follows:

Report Section	Comments	Recommendation and Cost
4.5.1	Historical records identified the Property as occupied by a dry cleaning chemicals warehouse from at least 1966 through at least 1969.	Phase II Investigation - \$7500 - \$8500
5.3.3	Building records identified an oil burner application for the Property dated 1952.	Geophysical Survey - \$2000 - \$2500

Report Section	Comments	Recommendation and Cost
7.1	Based on the age of the building, the presence of ACM is suspected.	O&M Plan - \$500

1.0 INTRODUCTION

EFI Global, Inc. (EFI) was retained by JPMorgan Chase Bank, N.A. to perform a Phase I Environmental Site Assessment (ESA) of Euro Woodworking LLC TBF located at 458 East 99th Street in Brooklyn, New York (the "Property"). This ESA was performed in accordance with the Professional Services Agreement between EFI and JPMorgan Chase Bank, N.A., authorized on May 3, 2016.

1.1 Purpose

The purpose of the ESA was to conduct all appropriate inquiry (AAI) into the previous ownership and uses of the Property consistent with good commercial or customary practice as defined at 42 U.S.C. Section 9601(35)(B). As such, this assessment is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act liability.

1.2 Scope-of-Work

The scope of work for this project included observing Property and adjoining property conditions, reviewing regulatory agency database records, contacting local officials and other persons knowledgeable of the Property, and reviewing pertinent historical documents with regard to past land use, regional setting information, and ownership records, and summarizing our findings. Each task is conducted with the intent to identify recognized environmental conditions, as defined by American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments E 1527-13. This ASTM standard exceeds the requirements set forth in 40 CFR Part 312, Standards and Practices for AAI.

RECs generally include features suggesting the presence or likely presence of hazardous substances or petroleum products on the Property that cause or threaten to cause the incurrence of response actions. RECs include hazardous substances or petroleum products under conditions that are in compliance with laws. RECs may also include historical conditions that have been addressed in the past.

RECs do not include de minimis conditions that generally do not present a threat to human health or the environment, and generally would not be subject to enforcement action if brought to the attention of appropriate governmental agencies.

In addition to the scope of work outlined above, the following non-ASTM scope considerations were included in our scope of services:

- A limited lead-based paint evaluation was performed in accessible areas of the Property during the site reconnaissance. The potential for lead-based paint was based on the date of construction and the condition and location of painted surfaces where noted. If requested by the Client or stipulated in the agreed scope of work, screening for lead-based paint was performed by testing and/or sampling for laboratory analysis. See Section 7.2 for additional details regarding this scope of work.
- An evaluation of radon potential was provided utilizing average radon concentration zones available from the US Environmental Protection Agency (USEPA). If requested by the Client, sampling for site specific radon concentrations was performed. See Section 7.3 for additional details regarding this scope of work.
- A limited visual assessment of accessible areas of the Property were evaluated for the presence of mold growth. The location and quantity of mold growth observed, if any, was documented.

If requested by the client, confirmatory sampling for mold was performed. See Section 7.4 for additional details regarding this scope of work.

- A limited visual assessment for wetlands vegetation was performed as part of the completion of the site reconnaissance. In addition, EFI reviewed readily ascertainable jurisdictional data or maps to confirm if jurisdictional wetlands are located on the Property. See Section 4.4.5 for additional details.
- An evaluation for lead in drinking water was provided utilizing annual drinking water quality reports or interviews with municipal or utility officials. If requested by the Client, sampling for lead in drinking water was performed. See Section 7.5 for additional details regarding this scope of work.

It should be noted that non-ASTM scope considerations provided as part of this ESA are not intended to satisfy a regulatory requirement but are to give a lender or user of this report, an indication of significant (significant due to quantity, accessibility, or condition) conditions which may exist at the Property. Additional investigation may be appropriate to satisfy regulatory requirements, or in the event of future demolition or maintenance work which may impact suspect materials.

1.3 Significant Assumptions

In conducting this Phase I ESA, EFI relied on federal and state regulatory agency database information, published historical and physical setting sources, and interviews with knowledgeable parties, regulatory officials, and other private individuals. EFI has assumed where reasonable to do so that the information provided is true and accurate. If information to the contrary is discovered, our conclusions and recommendations may not be valid.

EFI obtained environmental agency database information from Environmental Data Resources, Inc. (EDR). The databases usually present the location of the entities by their street address. In many cases this is the only reasonable means by which we may locate a database entry. The actual location of an entry may not be accurately indicated by the street address given.

Certain environmental hazards are impossible to visually identify; their presence can be verified only by testing and analysis. EFI can make no direct inferences as to the subsurface conditions at the Property based on the Phase I scope of work, which does not include a physical investigation of the subsurface. No detailed wetlands assessments, endangered species, or fault investigations were performed during this site assessment.

Conditions other than those observed may exist in inaccessible or unobserved areas of the Property. During the site visit, materials identified on the Property were not disturbed and underlying conditions were not observed. Should there be a substantial change in the functional utilization of the Property, or if additional improvements are planned, the conclusions presented here may not be valid. If there are changes in the use of the Property or changes in the adjacent property activities or conditions, EFI should be notified so that we may observe these conditions.

Our conclusions and recommendations relate only to the areas we observed during the site reconnaissance and the findings of the research noted in this report. The scope of this report is limited to matters expressly covered.

1.4 Limitations and Exceptions

Along with all of the limitations set forth in various sections of the ASTM E 1527-13, the accuracy and completeness of this report may be limited by the following:

Access Limitations - Access to the roof of the building and the side (northwest) alley was not provided. According to the tenant representative, the landlord uses the alley for storage.

Physical Obstructions to Observations - EFI was not able to visually assess the entire floor of the warehouse area of the building due to extensive storage.

Outstanding Information Requests - Freedom of Information (FOI) Requests were made to several municipal agencies including the City of New York Fire Department (FDNY), the New York City Department of Health and Mental Hygiene (NYC Health), the New York City Department of Environmental Protection (NYCDEP), and the New York State Department of Environmental Conservation (NYSDEC). As of this writing, EFI has not received a response from the FDNY, NYC Health, NYCDEP nor the NYSDEC. Additionally, a completed environmental site assessment questionnaire was not provided for this investigation.

Historical Data Source Failure - Gaps of greater than five-year intervals in the historical record were noted by EFI. However, because the Property usage was consistent for most of these intervals, this data failure is not a significant concern.

It should be noted that this assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems (EMS) that may exist on the property. Where required, the documents provided in the appendices were used as reference material for the completion of the Phase I ESA. Some of the information presented in this report was provided through existing documents and interviews. Although attempts were made, whenever possible, to obtain a minimum of two confirmatory sources of information, EFI in certain instances has been required to assume that the information provided is accurate.

The information and conclusions contained in this report are based upon work undertaken by trained professional and technical staff in accordance with generally accepted engineering and scientific practices current at the time the work was performed. The conclusions and recommendations presented represent the best judgment of EFI based on the data obtained from the work. Due to the nature of investigation and the limited data available, EFI cannot warrant against undiscovered environmental liabilities. Conclusions and recommendations presented in this report should not be construed as legal advice.

Should additional information become available which differs significantly from our understanding of conditions presented in this report, we request that this information be brought to our attention so that we may reassess the conclusions provided herein.

1.5 Data Gaps

As required by the ASTM Standard E 1527-13, the ESA shall identify and comment on significant data gaps that affect the ability of the Environmental Professional to identify recognized environmental concerns.

No significant data gaps were encountered as a result of this assessment.

1.6 Deviations

No deviations from the recommended scope of ASTM Standard E 1527-13 were performed as part of this Phase I ESA with the exception of any additional services noted in Section 1.2 Scope of Work.

1.7 Special Terms and Conditions

There were no special terms and conditions. Instructions as to the location of the Property, access, and an explanation of the Property and facilities to be assessed were provided by Hillel Galosher, the Prospective Purchaser.

1.8 User Reliance

Reliance on this report by the Client and all authorized parties will be subject to the terms, conditions and limitations stated in accordance with JPMC's Project Task Order and the Environmental Services Agreement, dated June 4, 2013, between EFI and JP Morgan Chase Bank, N.A.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The Property is located on the southwest side of East 99th Street approximately 180 feet northwest of the intersection of East 99th Street and Foster Avenue. Information obtained from the New York City Department of Finance indicated that the tax assessment parcel number for the Property is Block 8131, Lot 56.

The legal description for the Property was obtained at the NYC DOF ACRIS database and it is located in Appendix F.

2.2 Site and Vicinity Description

The Property consists of approximately 0.14 acre and is developed with an approximately 5,000 square-foot commercial building. The ground surface at the Property is relatively flat. Ground cover consists primarily of the Property building is constructed to the near lot line and abutted by concrete-paved land to the northeast and northwest. The Property can be accessed from the northeast via entrances off of East 99th Street.

The Property is zoned manufacturing (M1-1). The area surrounding the Property is primarily warehouses, auto repair and commercial with limited residential properties.

2.3 Current Use of Property

The Property is currently occupied by Pinnacle Lift of New York, a fork lift sales, service, parts and rental establishment. According to Tom Thorsen, no repairs are conducted on the premises and the facility operates primarily as a warehouse. Furthermore, according to a representative of Pinnacle Lift of NY, the landlord stores a freezer in the alley abutting the building to the northwest.

2.4 Description of Structures and Other Improvements

The Property is improved with a single-story commercial building, totaling approximately 5,000 SF. The building is constructed to the near lot line and abutted by concrete-paved land to the northeast and northwest. The building is slab-on-grade, steel-frame construction with walls of concrete masonry units and brick. The building is finished on the exterior with painted brick. The building includes a small office area in the northeastern corner and a storage room and restrooms in the southeastern corner. The remainder of the on-site building is used for warehouse purposes.

The building is heated via electric ceiling-mounted heaters in the warehouse and office areas. Cooling is provided to the office and storage areas only and is provided via thru-wall electric units. Domestic hot water is provided via an electric hot water heater.

The utilities are summarized in the following below:

Property Summary	
Size of Property (approximate):	0.14 acre
General Topography of Property:	General slope to the east-southeast
Adjoining and/or Access/Egress:	East 99th Street
Paved or Concrete Areas (including parking):	No on-site parking is provided. Concrete paved land abuts the building to the northwest and northeast.
Unimproved Areas:	None observed

Landscaped Areas:	None observed
Surface Water:	None observed
Potable Water Source:	New York City Department of Environmental Protection (NYC DEP)
Sanitary Sewer Utility:	NYC DEP
Storm Sewer Utility:	NYC DEP
Electrical Utility:	Consolidated Edison
Natural Gas Utility:	National Grid

Building Summary	
Building Name:	458 East 99th Street
Number of Floors:	One (Slab-on-Grade)
Total Square Feet of Space (approximate):	5,000 SF
Construction Completion Date (year):	1952
Construction Type:	Slab-on-grade, structural steel framing and CMU and brick walls
Interior Finishes Description:	Office/Storage Areas: Walls: Wallboard and Ceramic Tiles; Ceilings: Drop Acoustical Ceiling Tiles; Floors: 12" x 12" Ceramic Tiles Warehouse Areas: Walls: exposed brick and CMU; Ceiling: exposed underside of the roof (wood and steel beams); and Floors: concrete
Exterior Finishes Description:	Painted Brick
Cooling System Type:	Thru-wall electric units
Heating System Type:	Electric ceiling-hung units
Emergency Power:	Not provided

2.5 Current Use of the Adjoining Properties

An area reconnaissance was conducted to assist in evaluating if adjacent land uses have or could have impacted the Property. The area reconnaissance was conducted within a quarter of a mile of the Property by touring the area by automobile and walking, by viewing particular businesses from public right-of-ways, and by physical observations at selected businesses or properties. The following summary describes land use on the adjoining properties, based on our observations.

Directions From Site	Occupant	Use	Comments
Northeast	East 99th Street followed by Whisky Shippers & Movers at 461 East 99th Street; and, a manufacturing/warehouse-type building at 439 East 99th Street	Warehouse / Manufacturing	No environmental concerns identified.
Southeast	Home Deco Design at 464 East 99th Street	Warehouse	Listed as a SPILLS site. See Section 4.2.

Directions From Site	Occupant	Use	Comments
Southwest	Gotham Steel Supply at 1231 Rockaway Avenue (aka 857 East 98th Street) and Saba Live Poultry at 1227 Rockaway Avenue	Commercial / Warehouse	No environmental concerns identified.
Northwest	Affordable Glass Auto Inc and Untied Trading at 452 East 99th Street	Commercial / Warehouse	Listed as a Historical Auto Station site.

Our observations of the adjoining and adjacent properties did not reveal evidence of potential environmental concerns such as suspect storage facilities, visible fueling facilities or significantly stained surfaces.

3.0 USER PROVIDED INFORMATION

3.1 User Responsibilities

ASTM E 1527-13 requires that the Environmental Professional request from the user of the Phase I ESA, the Client, certain information discussed below concerning the Property or request from the user the names of other individuals who can provide this information.

ASTM E 1527-13 assigns to the Client or its representative, the responsibility to check or engage a title company or title professional to check reasonably-ascertainable recorded land title records for environmental liens, judicial records, or activity and use limitations currently recorded against the Property and provide that information for inclusion in this report.

If this Client or its representative is aware of specialized knowledge or experience that is material to the identification of recognized environmental conditions, or if they have actual knowledge that the purchase price of the Property is significantly less than the purchase price of comparable properties, ASTM E 1527-13 assigns to the Client the obligation to communicate that information for inclusion in this report.

Requested information was not received prior to the issuance of this report. As a lender, the Client is assumed to have no knowledge of the Property which would significantly impact our ability to satisfy the objectives of this assessment and the lack of this information is not considered to represent a significant data gap.

3.1.1 Title Records

EFI requested that the Client provide information regarding title records, judicial records, and environmental cleanup liens associated with the Property. This information is available through reasonably-ascertainable recorded land title records, judicial records, and lien records that are filed under federal, tribal, state or local law.

No information regarding title records, judicial records, or environmental cleanup liens was provided by the Client. Based on the lack of spills or releases at the Property, the lack of this information is not considered a data gap.

3.1.2 Activity and Use Limitations Applicable to the Property

No information pertaining to AULs or governmental notification was provided by the Client. Based on the lack of spills or releases at the Property, the lack of this information is not considered a data gap.

3.1.3 Specialized Knowledge or Experience of the User

The Client did not provide any specialized knowledge relating to the Property. Property ownership/management who was interviewed as part of this investigation did not report any specialized knowledge of the Property outside of what is contained in this report.

3.1.4 Commonly Known or Reasonably Ascertainable Information

EFI requested the Client to describe any commonly-known or reasonably-ascertainable information about the Property that would be helpful to EFI to identify conditions indicative of releases or threatened releases to the Property.

The Client did not provide any environmentally-relevant, commonly-known or reasonably-ascertainable information pertaining to the Property.

3.1.5 Relationship to the Purchase Price to Fair Market Value

EFI asked the Client if the purchase price being paid for the Property reasonably reflects the fair market value of the Property. If there was a difference in the purchase price and fair market value, whether the lower price was a result of contamination known or believe to be present at the Property.

No information indicating that the purchase price of the Property is significantly less than the purchase price of comparable properties was reported to EFI by the Client or its representative.

3.1.6 Reason For Performing Phase I

We understand that the purpose of this assessment is to complete an evaluation that will help to provide the factual support of the innocent landowner defense to CERCLA liability and to understand potential environmental conditions that could materially impact the operation of the business associated with the Property (business environmental risk).

3.2 Additional Owner, Property Manager, and Occupant Information

No other pertinent information in connection with the Property was provided by the owner, the property manager, or the occupants.

4.0 RECORDS REVIEW

4.1 Standard Environmental Records Sources

EFI contracted Environmental Data Resources, Inc. (EDR) to conduct a search of Federal and State regulatory agency databases containing known and suspected sites of environmental contamination. The databases searched and the number of listed sites identified within the approximate minimum search distance from the Federal and State environmental records database listings specified in ASTM Standard E 1527-13 are summarized in the following table. Detailed information for each Federal and State database is provided below. Copies of the EDR research data and a description of the reviewed databases are included in Appendix C of this report.

ASTM-REQUIRED STANDARD ENVIRONMENTAL RECORD SOURCES				
DATABASE	SEARCH RADIUS	PROPERTY LISTINGS	ADJACENT LISTINGS	TOTAL LISTINGS
Federal National Priorities List (NPL)	1 mile	0	0	0
Federal Delisted NPL Sites	1/2 mile	0	0	0
Federal CERCLIS List	1/2 mile	0	0	0
Federal CERCLIS NFRAP List	1/2 mile	0	0	0
Federal Corrective Action Sites (CORRACTS) Sites	1 mile	0	0	0
Federal RCRA Non-CORRACTS Treatment/Storage/Disposal (TSD) Facilities	1/2 mile	0	0	0
Federal RCRA Generators List	On-site and adjoining property	0	0	0
Federal Institutional Control/Engineering Control Registries	On-site	0	0	0
Federal ERNS List	On-site	0	0	0
State and Tribal Hazardous Waste Sites (SHWS)	1 mile	0	0	1
State and Tribal Landfill and/or Solid Waste Disposal Sites (SWLF)	1/2 mile	0	0	6
State and Tribal Registered Underground Storage Tank (UST) Sites	On-site and adjoining property	0	0	0
State and Tribal Registered Aboveground Storage Tank (AST) Sites	On-site and adjoining property	0	0	0
State and Tribal Leaking Storage Tank Incident Report (LTANKS) Sites	1/2 mile	0	0	26
State and Tribal Institutional Control/Engineering Control Registries	On-site	0	0	0

ASTM-REQUIRED STANDARD ENVIRONMENTAL RECORD SOURCES				
DATABASE	SEARCH RADIUS	PROPERTY LISTINGS	ADJACENT LISTINGS	TOTAL LISTINGS
State and Tribal Voluntary Cleanup Program (VCP) Sites	1/2 mile	0	0	1
State and Tribal Brownfield Sites	1/2 mile	0	0	0
OTHER PERTINENT FEDERAL AND STATE DATABASES THAT HAD LISTINGS FOR THE PROPERTY AND/OR PROPERTIES IN THE VICINITY				
State Spill Incident Reports (SPILLS)	1/8 mile	0	1	11
RCRA Non Generator Facilities	1/4 mile	0	0	21
State Registered Dry Cleaners (NY DRY CLEANERS)	1/4 mile	0	0	
EDR Historical Auto Stations	1/8 mile	0	1	11
EDR Historical Cleaners	1/8 mile	0	0	1

4.1.1 Federal Databases

Federal National Priority List (NPL)

The NPL is the U.S. EPA's list of uncontrolled or abandoned hazardous waste sites that have been identified for priority remedial actions under the Comprehensive Environmental Response, Compensation and Liability Act (Superfund).

The Property is not a Federal NPL facility and no Federal NPL facilities were identified within one mile of the Property.

Federal Delisted NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL when no further response is appropriate.

The Property is not a Federal Delisted NPL facility and no Federal Delisted NPL facilities were identified within one half mile of the Property.

Federal CERCLIS List

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites that are either proposed to be or are on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL.

The Property is not a Federal CERCLIS-listed facility and no Federal CERCLIS-listed facilities were identified within a half mile of the Property.

Federal CERCLIS NFRAP Sites List

The CERCLIS No Further Remedial Action Planned (NFRAP) List indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

The Property is not listed as a CERCLIS-NFRAP facility and no CERCLIS-NFRAP sites are listed within a half mile of the Property.

Federal Resource Conservation and Recovery Act (RCRA) CORRACTS Facilities List

The EPA Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Treatment, Storage and Disposal (TSD) database is a compilation by the EPA of reporting facilities that treat, store or dispose of hazardous waste. The CORRACTS database is the EPA's list of treatment storage or disposal facilities subject to corrective action under RCRA.

The Property is not listed as a RCRA CORRACTS TSD facility and no RCRA CORRACTS TSD facilities are listed within one mile of the Property.

Federal Resource Conservation and Recovery Act (RCRA) Non-CORRACTS TSD Facilities List

The RCRA TSD database is a compilation by the EPA of reporting facilities that treat, store or dispose of hazardous waste.

The Property is not listed as an RCRA TSD facility and no RCRA TSD sites are listed within a half mile of the Property.

Federal RCRA Generator List

The RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Generators database is a compilation by the EPA of reporting facilities that generate hazardous waste.

The Property is not listed as a RCRA Generator and no RCRA Generator sites are listed on the adjoining properties.

Federal Institutional Control/Engineering Control Registries

The EPA maintains a listing of sites with institutional controls currently in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

The Property is not listed as a US IC/EC Controlled property.

Federal Emergency Response Notification System (ERNS)

The Emergency Response Notification System (ERNS) records information on reported releases of oil and hazardous substances. The database contains preliminary information on specific releases, including the spill location, substance released and the responsible party.

The Property is not listed on the ERNS database.

4.1.2 State Databases

State CERCLIS-Equivalent List

The State Hazardous Waste Sites (SHWS) records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Sites identified on the SHWS include both priority sites planned for clean up using state funds (state equivalent of Superfund) and sites where clean up will be paid for by potentially responsible parties.

The Property is not listed as a SHWS facility. One SHWS site is listed within a mile of the Property. This facility is located in excess of 1/2 mile northeast of the Property where groundwater flow across is not anticipated to be in the direction of the Property. Based on relative distance and gradient, this listing is not considered to be a REC.

Solid Waste Landfill Facilities (SWLF)

SWLF records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The SWLF database was searched by EDR and reviewed by EFI for evidence of landfills and solid waste treatment facilities within a half mile of the Property.

The Property is not listed as a SWLF facility. Six SWLF facilities are listed within a 1/2 mile of the Property, but all six facilities are located in excess of 0.2 mile of the Property. Based on relative distance and since none of these facilities are cross listed on environmental databases indicative of an ongoing contaminated condition, these listings are not considered to be RECs.

State Registered Underground Storage Tank List (UST)/HIST UST

The New York State Department of Environmental Conservation (NYSDEC) compiles a list of registered UST locations.

The Property is not listed as an UST or HIST UST facility. No adjacent UST or HIST UST sites were identified in the database.

State Registered Aboveground Storage Tank List (AST)/HIST AST

The NYSDEC compiles a list of registered AST locations.

The Property is not listed as an AST or HIST AST facility. No adjacent AST or HIST AST sites were identified in the database.

State Leaking Storage Tank List (LTANKS)/ HIST LTANKS

The NYSDEC compiles lists of all reported leaks of hazardous substances from USTs and ASTs.

The Property is not listed as a LTANKS or HIST LTANKS facility. Twenty-six LTANKS facilities (with a total of 31 LTANKS incidents) were identified within a half mile of the Property. Twenty-eight

of these LTANKS incidents are noted to be located in excess of 500 feet of the Property and closed by the NYSDEC. Therefore, based on the regulatory status and relative distance, these sites are not considered RECs. All three of the remaining "open" LTANKS incidents were identified in excess of 0.25 mile of the Property at points generally east and northeast, where groundwater flow is not considered to be in the direction of the Property. Based on relative distance and gradient considerations, these three "open" listings are not considered to be RECs.

State Institutional Controls

The NYSDEC compiles lists of No Further Action (NFA) Sites with Land Use Restrictions and Monitoring. A land use restricted site is a property where there are limits or requirements on future use of the property due to varying levels of cleanup possible, practical, or necessary at the property.

The Property is not listed as having Land Use Restrictions or Institutional Controls.

State Voluntary Cleanup Program (VCP) Sites

The NYSDEC compiles a listing of sites that are being voluntarily cleaned up by the Responsible Party(s) under supervision of State officials. The VCP database was searched by EDR and reviewed by EFI for evidence of properties in this program within a half mile of the Property.

The Property is not listed as a VCP facility. One VCP site is located in excess of 1/4 mile northeast of the Property where groundwater flow is not anticipated to be in the direction of the Property. Based on relative distance and gradient considerations, this listing is not considered to be a REC.

State Brownfield Sites

The NYSDEC compiles an inventory of Brownfields Projects. A Brownfields site is an abandoned, idled, or underused property where the threat of environmental contamination has hindered its redevelopment. All of the sites in the inventory are working toward a Brownfields agreement for cleanup and liability control. The state's Brownfields' database was searched by EDR and reviewed by EFI for evidence of properties in this program within a half mile of the Property.

The Property is not listed on the Brownfields database and no Brownfields properties were identified within the search radius.

4.2 Additional Environmental Record Sources

A summary of all additional environmental record sources can be found below.

Federal ASTM Supplemental

- Superfund (CERCLA) Consent Decrees (CONSENT)
- Records of Decision (ROD)
- National Priority List Deletions (Delisted NPL)
- Facility Index System/Facility Identification Initiative Program Summary Report (FINDS)
- Hazardous Materials Information Reporting System (HMIRS)
- Material Licensing Tracking System (MLTS)

- Mines Master Index File (MINES)
- Federal Superfund Liens (NPL Liens)
- PCB Activity Database System (PADS)
- Department of Defense Sites (DOD)
- Indian Reservations (INDIAN RESERV)
- Open Dump Inventory (ODI)
- Uranium Mill Tailings Sites (UMTRA)
- Formerly Used Defense Sites (FUDS)
- RCRA Administrative Action Tracking System (RAATS)
- Toxic Chemical Release Inventory System (TRIS)
- Toxic Substances Control Act (TSCA)
- Section 7 Tracking Systems (SSTS)
- FIFRA/TSCA Tracking System (FTTS INSP)

State or Local ASTM Supplemental

- Spills Incidents (SPILLS)
- Registered Bulk Fertilizer and Pesticide Storage Facilities (BULK)
- Drycleaner Facility Listing (DRYCLEANERS)

EDR Proprietary Historical Databases

- Former Manufactured Gas (Coal Gas) Sites

Brownfields Databases

- Listing of Brownfields Sites (US Brownfields)
- Sites with Restrictions (AUL)

Orphan (Unmappable) Sites

A total of two sites were identified by EDR in this list; however, the Property and immediately adjacent properties were not included.

SPILLS - The Property is not listed as a SPILLS site. Eleven SPILLS sites (with a total of 13 SPILLS incidents) were identified within a 0.125 mile of the Property. All 13 SPILLS incidents are identified as closed by the NYSDEC. Therefore, based on the regulatory status, these sites are not considered RECs. Of note, one of the adjacent properties was identified with a SPILLS incident as described below:

- 470 East 99th Street is located adjacent to the northeast and cross gradient in relation to the Property. This facility was assigned Spill Number 0701988 on May 17, 2007 due to equipment failure. According to the listing, a Consolidated Edison transformer failed resulting in the release of approximately one gallon of dielectric fluid onto the concrete sidewalk. The release was treated as PCB-containing fluid and cleaned up by Consolidated Edison. This case was closed on June 28, 2007. Based on status and *de minimis* nature of the release, this listing is not considered to be a REC.

RCRA Non Generators - The Property is not listed as a RCRA Non Generator. Twenty-one RCRA Non Generators are identified within 0.25 mile radius of the Property. All 21 facilities were identified beyond the adjoining properties. Based on relative distance and since these facilities are not cross listed on regulatory databases indicative of an open spill or release and are noted as verified non generators, these listings are not considered to be RECs.

NY DRY CLEANERS - The Property is not listed as a NY DRY CLEANERS facility. One NY DRY CLEANERS facility was identified within 0.25 mile of the Property. This one facility is located in excess of 1,000 feet south-southeast and cross gradient of the Property. Based on relative distance and gradient considerations and since this facility is not cross listed on regulatory databases indicative of an open spill or release, this listing is not considered to be a REC.

Historical Auto Stations - The Property is not listed as a Historical Auto Station facility. Eleven Historical Auto Station facilities were identified within 0.125 mile of the Property. One of these facilities was identified for an adjacent property as described below:

- 452 East 99th Street is located adjacent to the northwest and cross gradient in relation to the Property. This facility is identified as occupied by Moodies Auto Repair Corp in 2002 and 2003. Currently, this facility was noted to be occupied by a warehouse / commercial establishment. Based on gradient considerations and since this facility is not cross listed on regulatory databases indicative of an open spill or release, this listing is not considered to be a REC.

One of the remaining facilities was identified up gradient of the Property:

- 1221 Rockaway Avenue is located approximately 60 feet west-northwest and up gradient of the Property. This facility is identified as occupied by Skills Automotive & Bus Services in 2000 and 2001; Omar Auto Repair Inc/Center in 2002, 2003 and 2006; M & M Auto Body in 2007 and 2008; and Harry's Complete Auto Repairs in 2009 through 2012. Currently, this facility was noted to be occupied by a Harry's Auto Repair. Since this facility is not cross listed on regulatory databases indicative of an open spill or release, this listing is not considered to be a REC.

None of the remaining facilities adjoin the Property and all are situated at points considered cross or down gradient of the Property. Based on relative distance, gradient considerations and since none of these facilities are cross listed on regulatory databases indicative of an open spill or release, these listings are not considered to be RECs.

Historical Cleaners - The Property is not listed as a Historical Cleaners facility. One Historical Cleaners was identified within 0.125 mile of the Property as described below:

- 9821 Foster Avenue is located approximately 220 feet south (cross gradient) of the Property. This site was identified on the Historical Cleaners database as occupied by Caterer & Laundromat Inc in 2006 and 2008. Based on the nature of the business (laundromat), gradient considerations,

since no additional indications of on premise dry cleaning were identified and since this facility is not cross listed on regulatory databases indicative of an open spill or release, this listing is not considered to be a REC.

No other issues of concern were identified during the review of the additional environmental record sources.

4.3 Regulatory Agency and Records Review

If the Property and/or any of the adjoining properties are identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed as a part of the Phase I ESA investigation. The purpose of the regulatory file review is to obtain sufficient information to assist in determining if a REC, HREC, CREC, or *de minimis* condition exists at the Property in connection with the listing. This applies to information that is attainable within a reasonable time and cost constraint.

The Property was not identified on any environmental databases that track spills or releases or other databases that indicate an environmental condition exists at the Property. Therefore, a regulatory file review with respect to the Property is not warranted.

The northeast adjacent property was identified on the SPILLS database due to a spill/release of less than one gallon of dielectric fluid. The incident was closed by the NYSDEC, therefore this listing is not considered a REC. Based on status and *de minimis* nature of the release, a regulatory file review with respect to this listing is not warranted.

4.4 Physical Setting Source(s)

The elevation of the Property is approximately 15 feet above mean sea level, as depicted on the U.S.G.S. 7.5 Minute Series Topographic Map of the Brooklyn, New York Quadrangle, dated 2013. The Property and surrounding properties slope gently to the east-southeast. Storm water flow is routed toward municipal storm drains located along the adjacent East 99th Street.

4.4.1 Topography

The terrain in the general vicinity of the Property slopes to the east-southeast. The Property has been graded to generally level with engineered slopes for drainage. Land in the general vicinity is relatively flat. The Property did not appear to receive significant surface water runoff from adjoining properties.

4.4.2 Surface Water Bodies

No surface water is located on the Property. The nearest surface water in the vicinity of the Property is Spring Creek located approximately 0.7 mile to the east of the Property.

4.4.3 Soils/Geology

Based on a review of the US Department of Agriculture (USDA) Soil Conservation Service (SCS) National Cooperative Soil Survey (NCSS), soils at the Property are mapped as urban land.

The Property is situated within the Atlantic Coastal Plain of the State of New York. The uppermost geologic formation underlying the soil at the Property is the Upper Cretaceous Raritan Formation. The Raritan formation consists mostly of clay, silty clay, sand and gravel. The thickness of the Raritan formation is estimated to be over 2,000 feet. The estimated depth to bedrock is more than 100 feet below land surface.

4.4.4 Hydrology

Shallow groundwater flow generally follows the local topography, but may be affected by localized conditions. Based on the local topography of the area, shallow groundwater in the vicinity of the Property is expected to flow to the east-southeast.

According to the Long Island Depth to Water Viewer prepared by the USGS, the depth of groundwater in the vicinity of the Property is inferred to be present at approximately 10 feet below ground surface.

4.4.5 Wetlands

No wetlands, settling ponds, lagoons, surface impoundments, or natural catch-basins were observed at the Property during this investigation. According to the US Fish and Wildlife Service Geospatial Wetlands Information online map, there are no wetlands on the Property. A map illustrating the wetlands in the vicinity of the Property is provided in the EDR database.

4.4.6 Flood Zone Information

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency, was performed. According to Panel Number 3604970219F, dated September 5, 2007, the Property is located in Flood X (unshaded). This zone is a minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains. A map illustrating the flood plains in the vicinity of the Property is provided in the EDR database.

4.4.7 Oil and Gas Exploration

No oil or gas wells were identified at the Property.

4.4.8 Mining Activities

No indication of mining activities was identified during completion of this assessment.

4.5 Historical Use

4.5.1 Historical Summary

Historical information identifying the past use of the Property was obtained from a variety of sources as detailed in Appendix B of this report and included city directories, aerial photographs, Sanborn Fire Insurance maps, and building department records. According to the historical information, the Property was unimproved land as early as 1907 through at least 1950 and developed with the existing structure by 1952.

The historical Property and adjoining site operations are discussed in the following sections.

Historical Summary

Period	Property Uses	Surrounding Area Uses
1907	Unimproved	Unimproved
1928 - 1950	Unimproved	Commercial
1952 - Present	Commercial / Warehouse	Commercial, Warehouse, Manufacturing

4.5.2 City Directories

EFI reviewed city directories for the Property and adjoining properties provided by EDR that covered the years 1928 through 2013. The Property address was first listed in 1970 as Newport Chemical & Supply Co. The Property was later listed in the 1973 directory as Newport Chemical Supply Co. and in the 2008 directory as Abes Radio Inc. The Property was not listed in any of the additional directories.

A copy of the city directories is provided in Appendix B. A summary of the city directories is provided below:

Summary

Date	Site Comments	Surrounding Area Comments
1928, 1934, 1940, 1945	Addresses not listed	Addresses not listed
1949	Addresses not listed	Philip Leventhal (459 East 99th Street)
1960	Addresses not listed	Ansel Supply Co, Alumo Products Co Office, Factory (461 East 99th Street) Parnes W Stair Corp, Corona Stair Co, Parnes W Stair Corp (464 East 99th Street)
1970	Newport Chemical & Supply Co.	Richies Auto Collision, Richies Towing Service (464 East 99th Street)
1965	Addresses not listed	Peek Philip Equipment Co (464 East 99th Street)
1973	Newport Chemical & Supply Co.	Richies Auto Collision, Richies Towing Service (464 East 99th Street)
1976	Addresses not listed	J & E Automotive Inc, J & E Service Center (461 East 99th Street) Raskin & Cox Contracting Corp, Richies Towing Service, BR Welding Inc (464 East 99th Street)
1980	Addresses not listed	Palge V (441 East 99th Street)
1985	Addresses not listed	Hershey Industries Inc. (445 East 99th Street) A & R Iron Works (452 East 99th Street) Jet Hardware Manufacturing Co (461 East 99th Street) Halsey Construction Corp, Raskin & Cox Contracting Corp (464 East 99th Street)

Date	Site Comments	Surrounding Area Comments
1992	Addresses not listed	Manuel & Sons Iron Works (452 East 99th Street) Circular Express Advertisers & Distributors Inc. (461 East 99th Street) Halsey Construction Corp, Raskin & Cox Contracting Corp (464 East 99th Street)
1997	Addresses not listed	Adventure Printing & Advertising (464 East 99th Street) Hill Gates Inc (452 East 99th Street) Circular Express Advertising & Distributors Inc (461 East 99th Street) AAA Circular Express Advertising & Distributors Inc (464 East 99th Street) Radiant Industries Corp (857 East 98th Street)
2000	Addresses not listed	Circular Express Inc (461 East 99th Street)
2005	Addresses not listed	Whisky Shippers & Movers Inc., A 1 Spice World (461 East 99th Street) AAA Circular Express Advertising (464 East 99th Street)
2008	Abes Radio Inc.	Fort Hamilton St Johns Nutrition (461 East 99th Street) United Distributors Corp (452 East 99th Street) Antonios Lighting (464 East 99th Street) Antonio Stairs and Doors (470 East 99th Street) Oscars Seasoning & Sauce Inc (465 East 99th Street)

Date	Site Comments	Surrounding Area Comments
2013	Addresses not listed	Gotham Steel Supply (857 East 98th Street) United Distributors (452 East 99th Street) Whisky Shippers & Movers Inc., A One Van Lines Inc. (461 East 99th Street) Circular Express Advertising & Distributors Inc (464 East 99th Street) Antonio Stairs and Doors (470 East 99th Street) Big Apple Chimney Inc (465 East 99th Street)

4.5.3 Aerial Photos

Available aerial photographs dated 1924, 1951, 1954, 1961, 1966, 1975, 1984, 1994, 2006, 2009, and 2011 from EDR were reviewed for this Environmental Site Assessment. Copies of selected photographs are included in Appendix B of this report. A summary of aerial photographs is provided below:

Summary

Date	Site Comments	Surrounding Area Comments
1924	Vegetated undeveloped land	No structures are visible on the adjoining properties. East 99th Street is adjacent to the northeast of the Property.
1951	Vegetated undeveloped land	Developed with what appears to be the existing buildings to the northwest, northeast (461 East 99th Street), and southwest (1227 Rockaway Avenue). The remaining adjacent properties appear to be cleared land used for vehicle / material storage.
1954	Developed with what appears to be the existing building.	No significant changes visible.
1961	No significant changes visible.	Developed with what appears to be the existing southwest adjacent building at 857 East 98th Street. No additional significant changes are visible.
1966, 1975, 1984, 1994, 2006, 2009, and 2011	No significant changes visible.	All of the existing adjacent buildings appear to have been developed.

4.5.4 Sanborn/Historical Maps

Historical Sanborn Fire Insurance maps dated 1907, 1928, 1950, 1967, 1969, 1977, 1979, 1980, 1981, 1986, 1991, 1996, 2001, 2004 and 2007 for the Property were provided by EDR. EFI's review of the maps indicates that the Property was unimproved land as early as 1907 through at least 1950 and developed with the existing structure by 1967. Copies of the maps are included in Appendix B of this report. A summary of the Sanborn maps is provided below.

Summary

Date	Site Comments	Surrounding Area Comments
1907	Unimproved land	Unimproved. East 99th Street is depicted adjacent to the northeast.
1928	No significant changes depicted	The existing building at 1227 Rockaway Avenue is depicted and noted as vacant. No additional significant changes are depicted at the remaining adjacent properties. Commercial warehouse and manufacturing developments are noted further to the north and residential developments are noted further to the south.
1950	No significant changes depicted	The existing northwest adjacent building appears to have been developed and noted as a Traveling Crane & Cutting Shed. The southwest adjacent property at 857 East 98th Street is noted as used truck storage. The previously identified building at 1227 Rockaway Avenue has been repurposed for use as an Iron Works facility. No additional significant changes are depicted at the remaining adjacent properties.
1967 and 1969	Developed with what appears to be the existing building, noted as occupied by a Dry Cleaning Chemicals Warehouse.	All of the existing adjacent buildings are depicted. The northeast adjacent buildings are noted as occupied by a Nursery Product Manufacturer (439 East 99th Street and 461 East 99th Street). The southeast adjacent property is noted as occupied by an auto painting establishment. The southwest adjacent properties are noted as occupied by a Mirror and Frame Warehouse and a manufacturing facility. The northwest adjacent property is noted as occupied by a not operational Traveling Crane.

Date	Site Comments	Surrounding Area Comments
1977, 1979, 1980, 1981, 1986, 1991, and 1996	No significant changes to the Property building are noted; however usage is now noted as warehouse.	No significant changes to the adjacent properties are noted; however, usage is noted as general manufacturing and warehouse occupants.
2001, 2004 and 2007	No significant changes noted.	No significant changes to the adjacent properties are noted; however, the southwest adjacent properties are now noted as commercial.

4.5.5 Historical Topographic Maps

Historical topographic maps were not reviewed as part of this assessment. Historical use of the Property was researched using other standard historical sources.

4.5.6 Title Records

Review of a 50-year chain of title was not included in the scope of the assessment. A title report was requested from the Client, but was not received prior to issuance of this report. As a result, the information required for review of recorded land title records is considered not to be readily ascertainable.

4.5.7 Other Environmental Reports

No prior assessments were provided for EFI's review.

4.5.8 Building Department Records

Records from New York City Department of Buildings were reviewed for evidence indicating the developmental history of the Property, and for the presence of documentation relative to USTs utilizing the department's internet website and the Property Profile Overview (PPO) records. The records for the Property indicate that the existing building was constructed in 1952. The records included one Certificate of Occupancy (CO) document. Based on a review of the CO, the building was altered in 1966 for use as a "storage warehouse for dry cleaning supplies and equipment (no fire hazardous materials stored)". It was also noted that "no inflammable materials in building, or used". Limited filing information was available for 22 actions at the Property, including four new building applications dating 1951 and 1952; and, one oil burner application dated 1955. In 2010, the building was issued a partial vacate order due to structural issues with the rear wall. A job filing was identified dated 2010 and signed off in 2012 for reconstruction of the rear wall.

No other records of historical or environmental significance were identified. Please see Appendix F for a copy of the pertinent records.

4.5.9 Other Land Use Records

New York City Fire Department (FDNY)-

EFI submitted a Fuel Tank Special Report Request Form for the Property to the FDNY on May 12, 2016 for evidence indicating the presence of fuel oil tanks. A response has not been received from the FDNY as of the release date of this report. Any pertinent information will be forwarded to the upon receipt. Please see Appendix F for a copy of the Tank Request Form.

New York City Department of Finance-

EFI reviewed assessment records on the New York City Department of Finance website. The

Property is known as 458 East 99th Street (Block 8131, Lot 56). The lot size was noted to be 60 feet by 100 feet, and one single-story building was noted to be situated on the Property with a footprint of 50.00 feet by 100.00 feet. The Property owner is listed as 458 East 99th Street, LLC. No additional information of interest was listed.

New York City Department of Health-

A review of pertinent information was conducted at the New York City Environmental Health Department's website. No open environmental control board (ECB) violations were identified for the Property.

In addition, EFI submitted a Freedom of Information Letter (FOIL) for the Property to the New York City Department of Health and Mental Hygiene-Bureau of Environmental Health Services on May 12, 2016 for information pertaining to hazardous substances, USTs, releases, inspection records, asbestos, mold and LBP violations, etc. A response has not been received from this agency as of the release date of this report. Any pertinent information will be forwarded to the Client upon receipt. Please see Appendix F for a copy of the FOIL request.

4.6 Data Failure

Based on the definition presented in ASTM E 1527-13, data failure occurs when all of the standard historical sources that are reasonably-ascertainable and likely to be useful have been reviewed and the historical use of the Property has not been documented back to the Property's first developed use, or 1940 whichever is earlier. When data failure occurs, ASTM E 1527-13 requires the Environmental Professional to document the data failure and assess the potential impact on the ability of the Environmental Professional to identify recognized environmental conditions.

The following data failure has been identified:

- Gaps of greater than five-year intervals in the historical record were noted by EFI. However, because the Property usage was consistent for most of these intervals, this data failure is not a significant concern.

4.7 Vapor Encroachment Conditions

As summarized in Sections 4.1 and 4.2 of this report, the Property was not identified in the regulatory database report for releases or spills. Based on these current conditions, a vapor encroachment condition (VEC) is not considered a concern with regards to the Property.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance was conducted on May 13, 2016 by Eileen Whitsett, Field Professional with EFI. Prior to and subsequent to the walk through EFI interviewed Tom Thorsen of Pinnacle Lift of NY. The weather was overcast with an approximate temperature of 65 degrees Fahrenheit. The visual reconnaissance consisted of observing the boundaries of the Property and systematically traversing the Property to provide an overlapping field of view, wherever possible. The periphery of the on-site structure was observed along with interior accessible office areas, storage areas and warehouse areas. Access to the roof and the alley abutting the building to the northwest was not provided. Photographs of pertinent site features identified during the site reconnaissance are included in Appendix A.

5.2 General Site Setting

5.2.1 Site Description

The Property consists of approximately 0.14 acre and is developed with an approximately 5,000 SF commercial building. The ground surface at the Property is relatively flat. Ground cover consists primarily of the Property building with the exception of a concrete paved walkway abutting the building to the northeast. The Property can be accessed from the northeast via entrances off of East 99th Street.

The Property is currently occupied by Pinnacle Lift of New York, a fork lift sales, service, parts and rental establishment.

5.2.2 Exterior Observations

The building is single-story, slab-on-grade construction. The building is finished on the exterior with brick masonry. The building is constructed to the near lot line and abutted by concrete-paved land to the northeast and northwest.

5.2.3 Interior Observations

The building finishing materials included walls of wallboard, ceramic tiles, and exposed CMU and brick; ceilings of drop acoustical ceiling tiles and the exposed underside of the roof (wood and steel beams); and floors of 12" x 12" ceramic tiles and concrete. No evidence of trench drains, pits, significant staining, bulk chemical storage, etc. was observed inside the building(s).

5.2.4 Potable Water

The Property is connected to the municipal water supply provided by the NYC DEP. The sources of public water for the City of New York is surface water from the Croton, Catskill and Delaware watersheds.

5.3 Site Visit Findings

5.3.1 Hazardous Substances

Hazardous substances were identified on the Property during the site reconnaissance. A summary of the materials, quantities, and use is provided below. Of importance, due to the limited quantities observed and lack of pathways to the subsurface in the storage room, no environmental concerns were noted.

Summary

Material	Quantity	Use	Comments
Farm Tractor Lubricant	2 x 5-gallon buckets	Retail Sale	No environmental concerns noted
Paints	7 x 1-gallon cans	Building maintenance / Retail Sale	No environmental concerns noted
Spray Paints and Lubricants	10 to 20 Canisters	Retail Sale	No environmental concerns noted
Antifreeze	> 12 x 1-quart containers	Retail Sale	No environmental concerns noted
Batteries	4	Retail Sale	No environmental concerns noted

5.3.2 Petroleum Products

Petroleum products were identified on the Property during the site reconnaissance. A summary of the materials, quantities, and use is provided below.

Summary

Material	Quantity	Use	Comments
Motor Oil	24 x 1 quart bottles, and 2 x 3-gallon containers	Retail Sale	No environmental concerns noted

5.3.3 Underground Storage Tanks (USTs)

No evidence of USTs was observed at the Property during the site reconnaissance, however EFI identified a building department record of an oil burner application from 1955. The possible presence of a UST at the Property is considered a REC to the Property.

5.3.4 Aboveground Storage Tanks (ASTs)

No evidence of ASTs was observed at the Property during the site reconnaissance.

5.3.5 Subsurface Equipment

The presence of subsurface equipment, such as sump pumps, septic systems and elevators, was not observed at the time of the reconnaissance.

5.3.6 Other Suspect Containers

No evidence of other suspect containers was observed on the Property during the site reconnaissance.

5.3.7 Polychlorinated Biphenyl Compounds (PCBs)

Electrical transformers and certain equipment that contains hydraulic fluids are a potential source of environmental concern due to the potential presence of polychlorinated biphenyl (PCB) containing cooling oils used in some units.

No suspect PCB-containing equipment was observed on the Property.

5.3.8 Interior Staining/Corrosion

No interior staining or corrosion was observed in the building during the site reconnaissance.

5.3.9 Discharge Features

Discharge features (floor drains, catch basins, oil/water separators, etc.) were not observed on the Property during the site reconnaissance. Also, no waste water discharge, with the exception of sanitary waste, occurs at the Property.

5.3.10 Pits, Ponds, and Lagoons

Pits, ponds, lagoons and pools of liquids were not observed on the Property during the site reconnaissance.

5.3.11 Solid Waste Dumping/Landfills

Readily apparent evidence of solid waste dumping, suspect fill material, or landfills was not identified on the Property during the site reconnaissance.

5.3.12 Stained Soil/Stressed Vegetation

Stained soil or stressed vegetation was not observed on the Property during the site reconnaissance.

5.3.13 Wells

Evidence of water supply or groundwater monitoring wells was not observed on the Property during the site reconnaissance.

5.3.14 Additional Hazardous Observations

During the site reconnaissance, EFI did not observe evidence of additional hazards at the Property. No additional hazards were reported by those interviewed during the site visit. Additionally, EFI did not note any unusual odors indicative of hazardous substances.

6.0 INTERVIEWS

6.1 Interview with Owner

A representative from property ownership was not available for interview for this assessment.

6.2 Interview with Site Manager

A representative from property management was not available for interview for this assessment.

6.3 Interviews with Site Occupants

According to Tom Thorsen, President of Pinnacle Lift of NY, the Property occupant, no repairs are conducted on the premises and the facility operates primarily as a warehouse. Mr. Thorsen stated that to the best of his knowledge there are no fuel oil storage tanks currently at the Property. Mr. Thorsen noted that Pinnacle Lift of NY has occupied the Property for approximately 1.5 years (since late 2014).

Furthermore, according to an additional representative of Pinnacle Lift of NY, the landlord stores a freezer in the alley abutting the building to the northwest.

6.4 Interviews with Local Government Officials

Please see Section 4.5.8 and 4.5.9 for information obtained from interviews with local government officials/agencies.

6.5 Interviews with Others

No additional individuals, agencies, and/or sources were interviewed during the course of this assessment.

7.0 OTHER ENVIRONMENTAL CONDITIONS

7.1 Asbestos-Containing Materials

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Common asbestos-containing materials include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide on Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). The Green Book was used as a guide in identifying suspect materials while the definition of suspect ACM and presumed asbestos-containing material is taken from 29 CFR Parts 1910, et al. Occupational Exposure to Asbestos; Final Rule. OSHA considers building materials (and specifically friable surfacing material and thermal system insulation) installed prior to 1981, presumed to be asbestos containing until tested by laboratory analysis to prove otherwise.

Based on the 1952 construction, building materials may contain asbestos. According to the EPA, while suspect or ACM may be managed in place under an operations and maintenance program, sampling would be required to document the presence or absence of asbestos-containing material. A summary of suspect or presumed ACM is provided below.

Summary

Material	Location	Estimated Quantity	Friable	Physical Condition	Action
Wallboard Assemblies	Office / Storage Area / Restroom	Not Quantified	No	Good	O & M Plan
Floor Tile Mastic	Office / Storage Area / Restroom	Not Quantified	No	Good	O & M Plan
Drop Acoustical Ceiling Tiles	Office Area	Not Quantified	Yes	Good	O & M Plan
Roofing Materials	Roof	5, 000 SF	No	Good	O & M Plan

7.2 Lead-Based Paint

Many buildings constructed before 1978 have paint that contains lead. Due to the 1952 construction date (pre-1978), lead-based paint may be present. All painted surfaces were observed to be in good condition with no chalking, peeling, or flaking. Because the Property is not used for residential purposes, lead-based paint is not considered to be a significant concern.

7.3 Radon

Radon gas is a product of the decay series that begins with uranium. Radon is produced directly from radium, which can be commonly found in bedrock that contains black shale and/or granite. Radon gas can migrate through the ground and enter buildings through porous concrete or fractures. Radon tends to accumulate in poorly ventilated basements. Long-term exposure to radon has been associated with lung cancer.

To satisfy the requirements of the Client, an evaluation of radon potential was performed utilizing the research results available from the USEPA. The USEPA has designated three zones depending on radon potential. Zone 1 is an area with the average predicted indoor radon concentration in residential dwellings exceeding the EPA action limit of 4.0 picoCuries per Liter (pCi/L). Zone 2 are areas with average predicted indoor radon concentration of 2.0 - 4.0 pCi/L and Zone 3 are those areas with an average predicted indoor radon concentration in residential dwellings below 2.0 pCi/L.

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location.

Review of the USEPA Map of Radon Zones places the Property in Zone 3. Based on the zone classification and the non-residential use of the Property, radon is not considered to be a concern.

7.4 Microbial Contamination (Mold)

In accordance with the scope of work, the site reconnaissance is to include a visual inspection for indications of water intrusions or the presence of active mold growth on readily accessible interior and exterior surfaces. Confirmation sampling was not included in the scope of work for the ESA. Readily accessible areas of the building were observed for visual or olfactory indications of mold and for areas of water damage.

No evidence of mold growth or suspect moisture intrusion was identified.

7.5 Lead in Drinking Water

The Property receives its drinking water from the NYC DEP. According to the 2015 Annual Water Quality Report, the water is tested before it enters the distribution system. The water supplied to the Property meets federal and state drinking water standards, including those for lead and copper.

8.0 CONCLUSIONS AND RECOMMENDATIONS

8.1 Findings and Opinions

8.1.1 Recognized Environmental Conditions

Recognized Environmental Conditions are associated with the presence or likely presence of any hazardous substances or petroleum products in, on, or at a Property due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment.

The following Recognized Environmental Conditions were identified during the course of this assessment:

- Historical records identified the Property as occupied by a dry cleaning chemicals warehouse from at least 1966 through at least 1973. It is not known if chlorinated solvents were stored (or spilled) at the Property.
- Building records identified an oil burner application for the Property dated 1952. No further details regarding former on-site fuel oil storage was provided and it is possible that an underground storage tank (UST) was previously used at the Property.

8.1.2 Controlled Recognized Environmental Conditions

Controlled Recognized Environmental Conditions (CRECs) are past releases of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (such as property use restrictions, activity and use limitations, institutional controls, or engineering controls).

No Controlled Recognized Environmental Conditions were identified on the Property or on adjacent properties.

8.1.3 Historical Recognized Environmental Conditions

Historical Recognized Environmental Conditions are a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls.

No Historical Recognized Environmental Conditions were identified during the course of this assessment.

8.1.4 De Minimis Environmental Conditions

De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized environmental conditions.

No de minimis environmental conditions were identified in connection with the Property during completion of this assessment.

8.1.5 Other Environmental Considerations (Non-ASTM Scope Considerations)

This assessment also included other environmental considerations. The following related Issue of Concern was identified:

- Based on the 1952 date of construction, building materials may contain asbestos. The suspect ACM consists of non-friable floor tile mastic and wallboard assemblies; and friable drop acoustical ceiling tiles. In addition, although not observed, roofing materials are suspected to contain ACM. According to the EPA, while suspect or ACM may be managed in place under an operations and maintenance program, sampling would be required to document the presence or absence of asbestos-containing material.

8.2 Conclusions

EFI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of 458 East 99th Street, Brooklyn, New York. This assessment has revealed no evidence of Recognized Environmental Conditions or Controlled Recognized Environmental Conditions in connection with the Property, except for the following:

- Historical records identified the Property as occupied by a dry cleaning chemicals warehouse from at least 1966 through at least 1973. It is not known if chlorinated solvents were stored (or spilled) at the Property.
- Building records identified an oil burner application for the Property dated 1952. No further details regarding former on-site fuel oil storage was provided and it is possible that an underground storage tank (UST) was previously used at the Property.

EFI's assessment included additional services to evaluate asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, and mold. This assessment has revealed no evidence of related conditions of concern in connection with the Property, except for the following:

- Based on the 1952 date of construction, building materials may contain asbestos. The suspect ACM consists of non-friable floor tile mastic and wallboard assemblies; and friable drop acoustical ceiling tiles. In addition, although not observed, roofing materials are suspected to contain ACM. According to the EPA, while suspect or ACM may be managed in place under an operations and maintenance program, sampling would be required to document the presence or absence of asbestos-containing material.

8.3 Recommendations

As a result of this assessment, EFI recommends the following:

- Historical Usage - A Phase II Limited Subsurface Investigation should be performed to determine if the subsurface conditions have been impacted by a release of dry cleaning solvent. Depending on the results, additional action may be warranted.
- Potential Fuel Oil UST - A geophysical survey should be conducted in order to determine the presence or absence of a UST. Depending on the results, additional action may be warranted.
- Asbestos - Suspect ACM in good condition can effectively be managed with the development and implementation of an asbestos Operations and Maintenance (O&M) Program. The objective of

an O&M Program is to implement a practical management approach to controlling identified ACM within the Property. The O&M Program is designed to cleanup existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed.

10.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

As required by 40 CFR 312.21(d), the report shall include the following statements of the environmental professional(s) responsible for conducting the Phase I Environmental Site Assessment and preparation of the report.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312; and, we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Eileen Whitsett
Field Professional

Dale Lanier
Senior Project Manager

Mandeep S. Sandhu
Director, National Assessment Services

11.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

11.1 Definition of an Environmental Professional

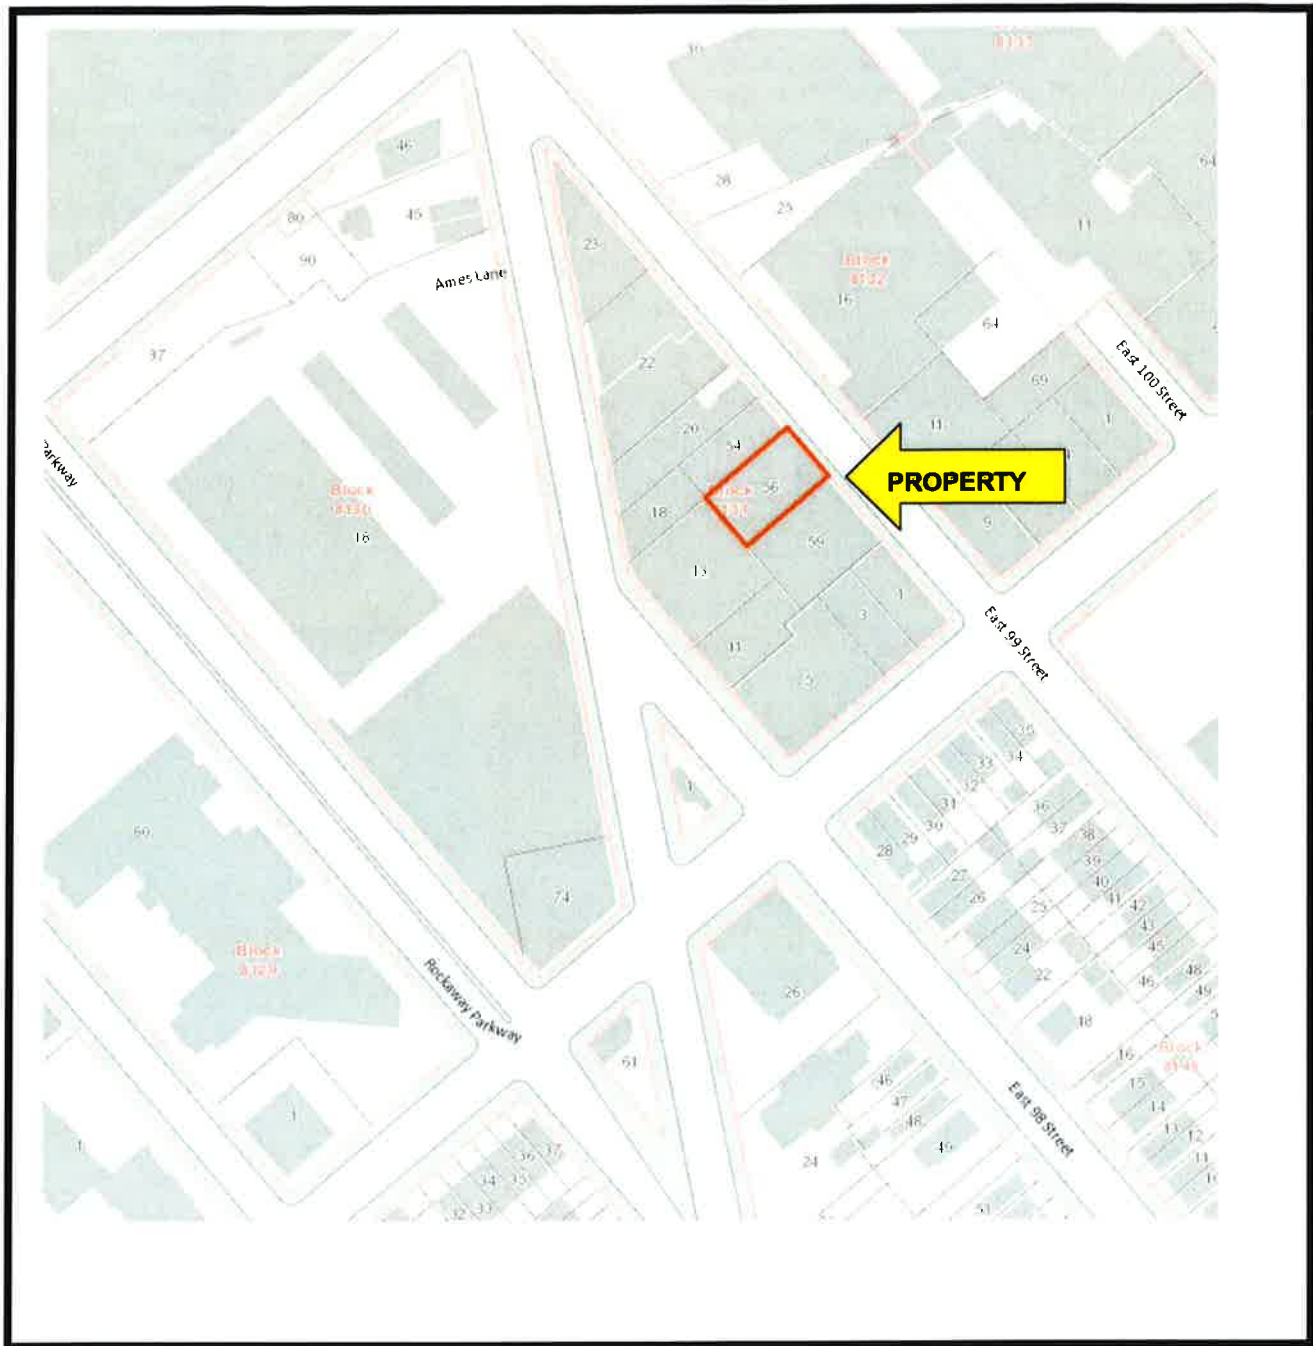

An *Environmental Professional* means: (1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f). (2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience. (3) An environmental professional should remain current in his or her field through Participation in continuing education or other activities. (4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as Part of the inquiry identified in §312.21(b). (5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this Part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

11.2 Relevant Experience

Relevant experience, as used in the definition of environmental professional in this Section, means: Participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the Property.

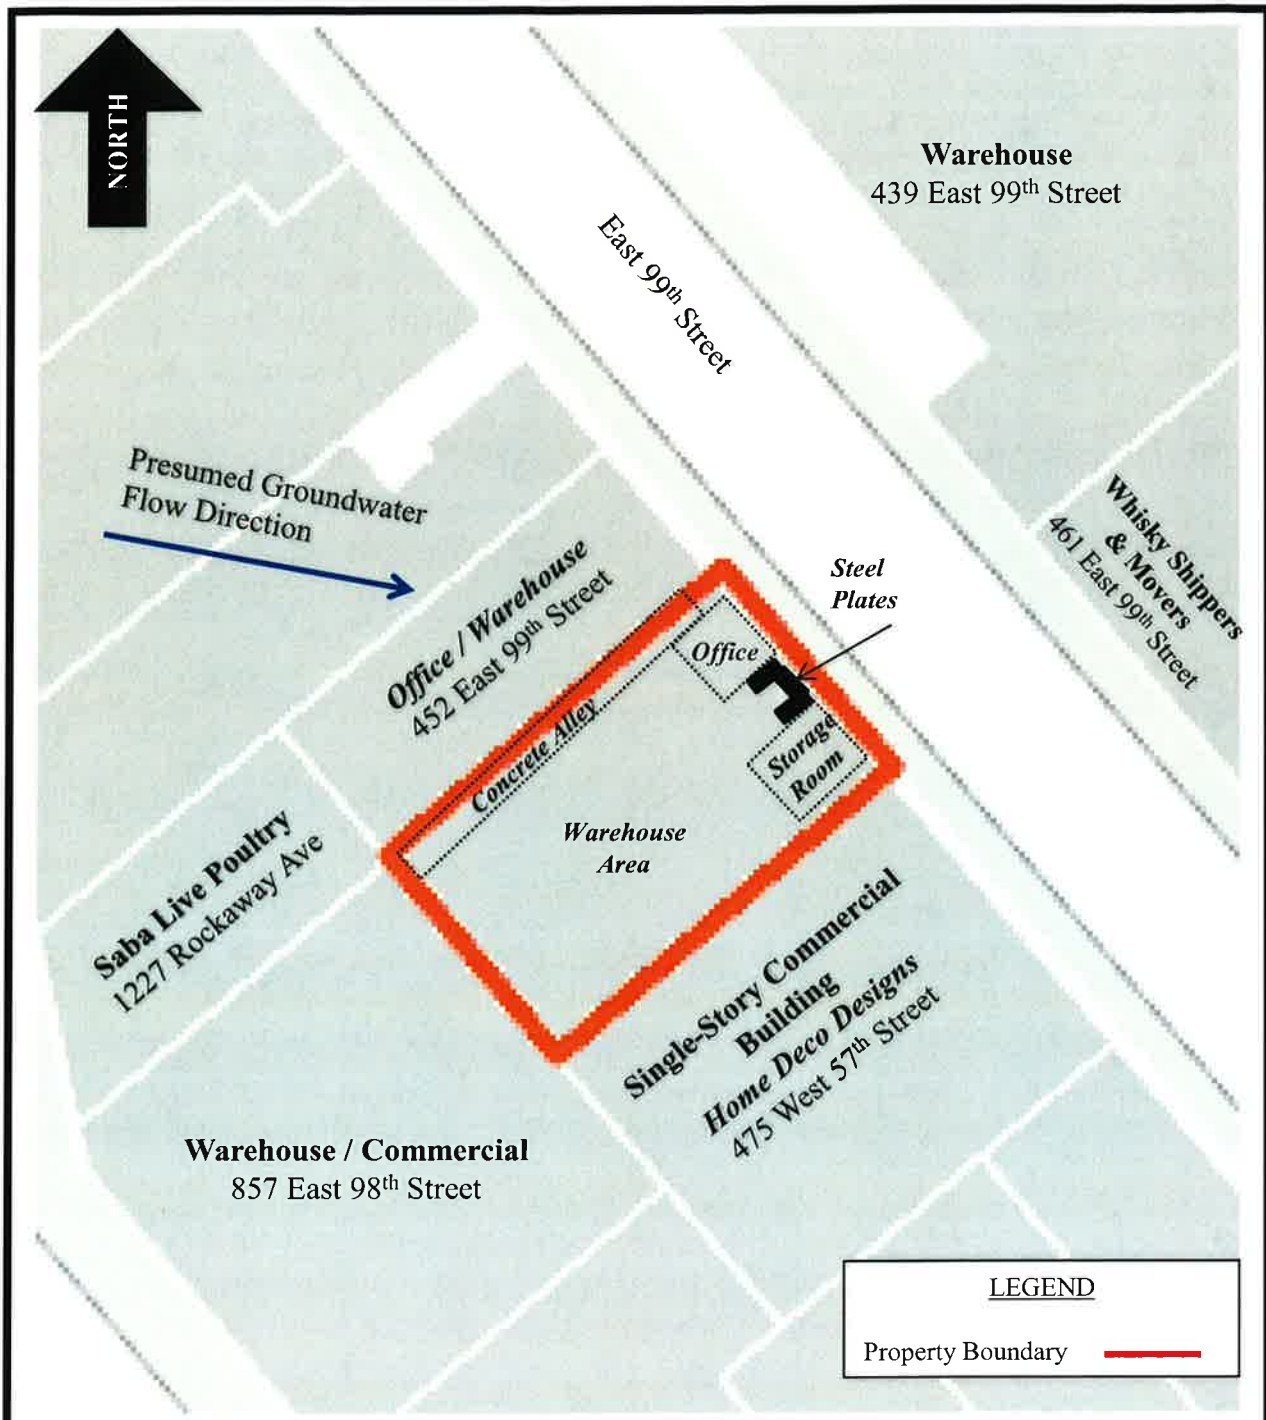

Resumes for the Environmental Professionals involved in this project are included in Appendix G.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>CON EDISON - MANHOLE</i>	<i>CHESTER STREET & DIT</i>	<i>NNW 1/8 - 1/4 (0.245 mi.)</i>	<i>Q80</i>	<i>320</i>

<i>ARROW LOCK CORPORATI</i>	<i>10300 FOSTER AVE</i>	<i>ENE 1/8 - 1/4 (0.188 mi.)</i>	<i>L58</i>	<i>219</i>

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are

EXECUTIVE SUMMARY

5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/17/2016 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 01/05/2016 has revealed that there are 6 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking

EXECUTIVE SUMMARY

underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/17/2016 has revealed that there are 26 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, and dated 02/17/2016 has revealed that there is 1 NY VCP site within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/17/2016 has revealed that there are 11 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 11 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT Engelhardt responded. Arrived at 20:00. Barely detectable hydrocarbon odor in basement. Mrs. Gravesande had windows open for a couple of hours, claims smell dissipated. Also ran water as per FD instructions to flush lines. Checked around outside - no odors from DWS manholes or from catch basins. Checked GIS - did not find any past spills in immediate area. Closed due to lack of confirmed spill."
Not reported

Remarks: "CALLER STATES THAT HE HAS AN ODOR IN HIS RESIDENCE - THIS HAS HAPPENED SEVERAL TIMES BEFORE - IN THE PAST HE HAS HAD THE FIRE DEPT - CON EDISON -AND THE EPA TRYING TO FIND OUT WHAT THE ODOR IS AND WHERE IT'S COMING FROM - SO FAR NO LUCK -- HE WAS ADVISED THE NEXT TIME HE SMELLS IT TO CALL THE SPILL HOT LINE (??) DEC Memo: "05/30/2007: This spill case was assigned to A. Doronova. - AD
06/01/2007: Sent an email to A. Samani (cc: J. Kolleeny; A. Ledins;
F. Ashkan; T. Ahmad; B. Morrissey; J. Staten and H. Roberts)asking
for the site status update information. Received a response email
from A. Samani on the same day. She promised to get back to us with
updated data. AD 04/17/2008: Received an email from DDC saying: Dear
Sir or Madam: I am working on some spills for the NYCDDC. I was going
through some spill numbers in the DEC database and saw that you were
the lead DEC person for some of the ones on which I am currently
working. Can you send to me the NYSDEC Spill Report Form for the
following spills? Spill # - Site 0109758 - 69th Precinct 0108983 -
Brooklyn West 12 0012041 - 63rd Precinct 0102559 - EC 233 / Ladder
176 I would appreciate it if you can email to me pdf files (or some
other format would be fine) of the forms. Please let me know if you
have any questions. Thanks again for your time and consideration.
Renee Wong Renee L. Wong Project Geologist Certified Professional
Geologist Sent the requested spill reports the same day. AD
05/30/2008: Received a letter from NYCDDC with a spill closure
request. The letter is attached to a Tank Closure Report dated March
1, 2002. The report describes the field activities which included:
Removal of 7,500-gallon UST (tank # 1) and cleaning and closing in
place 1000 kerosene UST (tank #2). A concrete pad over the tanks was
broken and removed. The soil under the pad consisted of fill
material. The fill material did exhibit visual and olfactory evidence
of contamination. Petroleum contamination was found on top of the
tanks. 38.8 tons of contaminated soil were excavated and removed off
site. No evidence of corrosion or or holes was found in any of the
tanks uncovered and cleaned. Only 3 bottom soil samples were
collected for tank-1 (removed) and 3 side soil samples were collected
for tank-2 (closed in place). No VOCs were detected above standards
in any of the six samples. Only slightly elevated concentrations of
SVOCs above the NYCDEC STARS were detected in South and Center soil
samples for tank-1 excavation area and in all three soil samples for
tank-2. AD 06/12/2008: Send an email to Ms. Wong of DDC: Hi Renee,
Thank you for keeping me informed. I am now in a process of reviewing
the spill closure reports Roux had submitted to us. I would like to
ask you to submit also PDF version of Tank Closure Report for NYPD -
69th Precinct, spill No. 0109758 and a hard copy and PDF version of
Tank Closure report for Engine Company 233, spill No. 0102559.
Regarding the 63rd Precinct site: I need Tank Closure Report for
closed-in-place UST (hard copy and PDF). As for the workplan, I think
the requirements will be standard. Borings at each side of the tank;
PID screening; soil sampling (including sampling right above the
water table,(if applicable); groundwater grab sampling (if
applicable). If you would like me to take a look at the investigation
work plan for this site, before you will submit it officially, you
can send its finalized copy on my email. Sincerely, Ainura Doronova

S102238531

Remarks: Environmental Engineer Division of Environmental Remediation NYSDEC Region 2 06/13/2008: Received an email from R. Wong of DDC saying: Hi Ainura, How's it going? Here are the pdf files of Tank Closure Reports for 0109758 and 0012041. I'm going to see if I can get the report for 0102559. I'll send it as soon as I get it. I'll put a hardcopy of the Tank Closure Report of 0012041 in the mail later today. About the 63rd Pct site: I'm not sure how deep groundwater is at the site. So it's not necessary to collect a groundwater sample if gw is not encountered by (let's say) 15 or 20 ft bls, right? In other words, do we need to advance the borings to gw for a gw sample if the soil seems clean and we don't need to go any more than 15 or 20 ft? Thanks, Renee Renee L. Wong Project Geologist Certified Professional Geologist DL the PDF copy to eDocs. AD 06/04/2009: Discussed the site with J. Kolleeny of DER. Since only very low concentrations of SVOCs were detected in few end-point soil samples, and no VOC contamination in any of the end-point soil samples, the decision was made to close the case and issue NFA letter. AD 06/05/2009: Sent NFA letter to A. Samani of DDC. (cc: J. Kolleeny-DEC, F. Ashkan-DDC, B. Morrissey-Roux, A. Ledins-Greyhawk). PDF copy in eDocs. AD "CONTAMINATED SOIL HAS BEEN CLEANED UP - TANK HAS BEEN REMOVED AND A NEW TANK WILL BE PUT IN PLACE. PBS # 2-343129 FOR TANK THAT IS BEING REMOVED."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

REMOVE TANKS/ EXPLAINED TO THE DR. THAT THE TANKS MUST BE REGISTERED
FOR REMOVAL 1 MONTH PRIOR TO THE REMOVAL AND DEC NEEDS TO BE ON SITE
DURING KEY POINTS OF THIS WORK. 12/9/03 MT//TRANSFERRED FROM TIPPLE
TO ROMMEL 1/8/04 Reassigned from Rommel to Foley. 1/13/04 Spoke with
Mr. Khanna. Tank removal to be scheduled dependent upon contracts.
Mr. Khanna indicated he would try to finalize contracts. Corrective
Action Plan from 2000 indicates soil contamination with total BTEX
from ND(BH-1,2,3, all 16-18'bgs) to 91083ppb(BH-6,12-16'bgs)No MTBE
detected in soil.Total BTEX in GW ranges from ND(MW-3,5) to 16600ppb.
MTBE ranged from ND(MW-3,5) to 62000ppb. DTW 15-16'bgs. Source not
yet removed. Free product detected in 2000.(KMF) 3/31/06 Spoke to
Charles Nalbone (917-346-8976). He stated Citygas will be upgrading
tanks. He was inquiring whether a Remedial Plan has been submitted.
6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM
7/5/06: Spoke to Charles Nalbone, private consultant with CJN
Consulting. He stated that The old tanks will be removed and new
tanks installed for a new fueling station and convenience store.
Citygas may lease the propoerty to Sunoco. He will contact the
property owners for an update and if I don't hear from him I will
call Citygas directly - JAM 11/17/06 Spoke to Charles Nalbone. He
said that the tanks have been removed by Tyree. He is no longer
working on the site. - JAM 9/11/07 Called Mr. Charles Nalbone. I have
not heard anything about this site in some time. He told me a new gas
station is operating at this site. Mr. Suman Khanna is still the
owner of the property. Contacted Mr. Khanna (Cell # 347-249-7767). He
said the site is leased to Wheatley? Petroleum. PBS registration
states the contact is Joseph Machia (phone # 516-933-0700). Mr.

Khanna will send me the report from when the tanks were replaced in Mar 2007. -JAM 9/28/07 Received a call from Walter Berninger from Berninger Environmental (phone # 631-589-6521) He is working for Northland Marketing who is the parent company of Foster Petroleum, LLC. Foster Petroleum is leasing the site. Mr. Berninger has a tank closure report dated October 16, 2006, when tanks were upgraded. He will forward that to me along with some groundwater data collected from existing wells. - JAM 4/20/09 Reviewed a Tank Closure Report submitted by Berninger Environmental, Inc. dated October 16, 2006. The closure report states that a total of thirteen USTs were removed from the site; One 4,000-gallon diesel tank, Ten 550-gallon gasoline tanks, One 550-gallon fuel oil tank, and One 550-gallon waste oil tank. The tanks were removed between July 19 and 21, 2006. On September 5, 2006, Berninger visited the site to inspect the former tank grave and collect end-point soil samples. At the time, all the tank graves, except for the fuel oil tank, were backfilled. The tank graves were then re-excavated and on September 14, 2009, a total of 13 end-point soil samples were collected. Since the tank graves were backfilled, Berninger states that, the samples may not be representative of actual sidewall and bottom samples. Samples were also not collected from the waste oil tank grave. Several soil samples showed VOC and SVOC contamination. Two monitoring wells were located and Berninger recommends accessing these wells to collect groundwater samples. A monitoring report was submitted by Berninger dated July 2007. On July 23, 2007, wells MW-1 and MW-2 were sampled and analyzed for BTEX plus MTBE. No floating product was observed and MW-2 showed minor detections of BTEX. A second monitoring report was submitted by Berninger dated October 2007. On October 22, 2007, wells MW-1, MW-2 and MW-3 were sampled and analyzed for BTEX plus MTBE. No floating product was observed and results from MW-2 showed total BTEX concentration of 3,080ug/L. This was the last report submitted by Berninger. - JAM On 4/10/09 I spoke with Walter Berninger from Berninger Env. He said he was not aware of an open spill case. Joe Macchia is listed as the owner of the PBS registration. I spoke to Joe Macchia on April 20, 2009. He said he signed the lease agreement with 9702-9706 Foster Ave., LLC on April 23, 2004. He said he did not operate the previous tanks. I informed him that there are discrepancies in the PBS registration that need to be fixed. The number of tanks, the closure status and product information from the PBS registration do not match Berninger's closure report. Mr. Macchia said he will correct the registration. - JAM 4/24/09 Spoke to Suman Khanna (347) 269-7767. I will send a Stipulation Agreement to 9702-9706 Foster Ave., LLC. - JAM 4/28/09 Stipulation Agreement with Corrective Action Plan sent via Certified mail to 9702-9706 Foster Avenue, LLC, attn. Suman Khanna. I also faxed a copy to Mr. Khanna. The signed Stip is due back at the DEC by May 12, 2009. - JAM 4/30/09 Spoke to Miriam Azadalli (Office: (718) 349-0555) who is the property owner and will be signing the Stip. She will be requesting an extension to the first deliverable in the CAP. - JAM 5/11/09 Received an email from Howard Stave (email: Renhow@aol.com) notifying the DEC that Foster Petroleum, LLC will be signing the Stipulation Agreement. I sent an amended copy of the Stipulation Agreement to: Mr. Joseph Macchia Foster Petroleum, LLC 556 Central Avenue Bethpage, NY 11714 The signed Stipulation Agreement must be returned to the DEC by May 26, 2009. Stip and cover letter uploaded to eDOcs. - JAM 5/28/09 Stip signed by Joseph Macchia on 5/20/09. Received back at DEC office and sent to Lou Oliva for signature on 5/28/09. - JAM 6/1/09 Stipulation

Agreement signed by Suzanne Mattei, Regional Director, Region 2 on May 29, 2009, which marks the effective date of this agreement (Legal Case No. R2-20090529-328). According to the CAP, an Investigation Work Plan is due within 15 days of the effective date, June 15, 2009. The executed Stip is uploaded to eDocs. - JAM 6/25/09 On June 4, 2009, DEC received a letter from Berninger Environmental. The letter states that several groundwater monitoring events were performed on 3 existing monitoring wells; however, the data was not submitted. Berninger requests that they submit the available monitoring data to the DEC for review and propose further work, if necessary. I sent an email to Walter Berninger today and copied Joseph Macchia, Jr. The email states: It has been three weeks since you submitted the letter dated June 4, 2009. You have not yet provided me with any groundwater data for the above referenced site. The DEC requests that a report be submitted within two weeks from today, which includes a summary of all past groundwater monitoring data as well as a proposed investigation work plan to fully characterize current soil and groundwater conditions. - JAM 8/6/09 Reviewed an Investigation Work Plan submitted by Berninger Env. Inc. dated July 27, 2009. Berninger proposes drilling 5 soil borings and installing 2 monitoring wells at the site. They proposed collecting one soil and one GW sample from each boring location and to install the wells without collecting soil samples from those 2 locations. I sent a letter approving the work plan, with the following recommendations: 1. Soil should be continuously screened to the water table using a PID. Two soil samples should be collected from each boring for laboratory analysis; one sample from the interval with the highest PID reading and the other sample from the interval directly above the water table. 2. All soil and groundwater samples should be analyzed for the TAGM 4046 list of petroleum related VOCs and SVOCs. Justin Halpin will notify me when the work is scheduled. This work plan and my approval letter are uploaded to eDocs. - JAM 12/14/11: This spill case transferred from J. Maisonave to J. Kolleeny. - JK 06/05/13: Reviewed April 2013 Mon Rpt by Berninger Env't'l, dated 4/30/13 (in eDocs). Results of 4/1/13 gauging/sampling of three on-site mon wells showed no LNAPL detected; well MW-2 had 43 ug/L total VOCs (down from 363 ug/L in Jan. 2013; had 47 ug/L in Oct. 2012); well MW-1 was ND; well MW-3 had 1 ug/L tVOCs (was ND in Jan. 2013, had 2 ug/L in Oct. 2012). Well MW-2 has an iSOC vessel installed to increase dissolved O₂; this well had 22.39 mg/L DO in Jan. 2013 (compared to 2.26 mg/L in MW-1 and 1.95 mg/L in MW-3. Based on April GW data, Berninger recommends continued bi-quarterly maintenance of iSOC vessel in MW-2 and continued quarterly GW sampling to evaluate VOC levels. Next quarterly event scheduled for July 2013. - JK 12/05/13: Reviewed Oct. 2013 Mon Rpt by Berninger Env't'l, dated 10/31/13 (in eDocs). Results of gauging/sampling of three on-site mon wells on 10/3/13 showed no LNAPL detected; well MW-2 had 217 ug/L total VOCs (up from 194 ug/L in July 2013), wells MW-1 and MW-3 were ND. Well MW-2 contains iSOC oxygen emitter to increase D.O. Based on data, Berninger recommends continued bi-quarterly maintenance of iSOC vessel and quarterly GW sampling, with next event scheduled for Jan. 2014. Site will be discussed at meeting w/ Berninger and RP on 12/6/13. - JK 12/06/13: At meeting with Berninger Env't'l (Walter B.) and Joseph Macchia (RP), this site was discussed; Berninger provided site plan and GW data table (from Oct. 2013 Mon Rpt) for reference during meeting (in eDocs as brief). Berninger presented this site as candidate for spill closure. I noted that Oct. 2013 Mon Rpt did not petition for spill

closure. I asked that Berninger prepare formal closure request with more site history (e.g., tank removals, soil removal, end-pt results, remedial actions, etc.) and with discussion of potential off-site migration and sensitive receptors. He said he'll put this info together. - J. Kolleeny 01/21/14: On 1/16/14, received email from Walter Berninger: Jonathan, Good morning. I have finally got all historic files together for Foster Ave. site spill 0004682 that we have since 2006. I also include disposal receipts for removal of source of contamination and information from another site that confirms GW flow and problems at 69th Police Precinct's & spill numbers. I scanned them in put on a disc and they are in mail to you for your review. Happy New Year and talk to you later. On 1/21/14, received CD; will review. - J. Kolleeny 03/19/14: On 3/13/14, reviewed spill closure consideration rpt by Berninger Env't'l, dated 1/16/14 (in eDocs). Called Walter Berninger to discuss rpt deficiencies. On 3/14/14, received email from Walter: Jonathan, I am reviewing my notes this morning from our phone conversation yesterday and would like to list them to confirm I heard all your requests. 1. Update site map with October's well gauging to confirm GW flow direction 2. Explain why 2006 Tank Closure Rpt mentioned two wells on site, and since that time all our monitoring rpts have had three wells sampled and tested. Are two wells we mention in 2006 two of wells we have been monitoring and when did third well arrive. 3. Explain current site operation and over past years since our involvement. 4. Review my comments on other property and site map and clarify better so not confusing. I believe that covers all we discussed and we are already working on map and review of what was sent. Regards, Walter. On 3/17/14, I sent email reply: Walter, Sorry for not responding sooner. Yes, your summary below accurately describes issues I raised during our phone conversation last Thursday. On 3/19/14, received email from Walter: Jonathan, I have located all my older project files and have found answers to comments we discussed. I am starting to put everything together. However, I am leaving early tomorrow for upstate off Friday and Monday so I should have everything to you by Wednesday next week. - J. Kolleeny 04/15/14: On 3/27/14, received email from Walter Berninger: Jonathan, attached is a revised letter with today's date. In letter I explain questions about wells, a revised map showing Police bldg but not other site. I also included a revised gradient map and include two earlier monitoring events that helps to explain wells. Lastly I provide some add'l information regarding what site has been all these years. I am not including all disposal receipts or 2006 Tank Remove summary letter with attachment as you have all that information. Please review and advise if I should put all on a disc to be sent to you. Reviewed rpt dated 3/27/14 (in eDocs as Revised Summary For Closure Consideration). Rpt states that site has been and is still operating as a Sunoco svc station. Updated GW flow map shows very flat water table with slight gradient to ESE (towards 69th Police Pct, which has had a number of spills). Rpt notes that impacts in worst on-site well, MW-2 have been addressed, so that well shows consistent decreasing trend in VOCs to low levels (217 ug/L total VOCs as of Oct. 2013 sampling event), so this would mitigate against off-site migration, which if it has occurred may be difficult to differentiate from impacts related to spills at 69th precinct. Rpt resolves issue of 2 vs. 3 wells found when Berninger first got involved with site, stating that 3rd well was under stock piles related to site upgrade and construction, and that all 3 wells were

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

O'CONNELL 1/16/97, GHK notes: Mr. Kushner - inspection of transformer found 20 gallons in vault (flush truck to remove). 110 gallons in unit. 90 gallons into sewer to 42 combined line to 26th Ward STP. Long term release? During last visit (7/13/96) unit was O.K. Sump pumps were active, now dismantled. To open unit , currently off-line, end cap (9 ppm PCB in unit). To remove, draine, complete cleanup. DEP, NRC, NYCDOS, OEM and FDNY notified. E2MIS 103101 O.S HEARNS #50839 REPORTS IN V4763 FDR3B88 N/S AVE D 698' E/O ROCKAWAY AVE, BELOW MIN TRANSFORMER MISSING APPROXIMATLY 110 GALLONS OF 9 PPM OIL. HE FOUND SUMP PIT & PUMP IN V4763 FILLED WITH OIL & WATER. PUMP WAS NOT WORKING AT THAT TIME BUT IT LOOKS OPERATIONAL. ALSO ADJACENT STRUCTURE V4671 HAS SUMP PIT & PUMP FILLED WITH OIL & WATER WHICH GETS FEED FROM A DRAIN IN V4763. BOTH SUMP PUMPS WERE UNPLUGGED & DRAIN TRAPS TAKEN APART & OIL FOUND IN BOTH TRAPS. V4763 HAS A MIXTURE OF MUD & WATER & 20 GALLONS OF OIL ON FLOOR OF STRUCTURE. APPROX 90 GALLONS OF OIL RELEASED INTO SEWER. SEWER LINE FROM THAT LOCATION IS A COMBINATION SEWER WHICH GOES TO 26 WARD POLLUTION PLANT. CIG NOTIFIED DEVOTI, ZALLOUGHY NOTIFIED & ENVIROMENTAL STOP TAG PLACED #03649. MATRIX NOTIFICATIONS MADE UNIT WAS CHECKED OK ON 7/13/96 & OIL SAMPLE TAKEN. D.E.C GLEN KATZ CALLED ABOUT INCIDENT. 1630 HRS R.LOCHAN PRE TREATMENT ENG, FROM DEP VISITED LOCATION AND LEFT LOCATION 1630HRS. UPDATE SECONDARY CABLE SCHEDULED TO BE CUT BY FULLER NETWORKS 1/18/97. TRANSFORMER TO BE SCHEDULED FOR REPLACEMENT 1/22/97. CLEAN UP PENDING TRANSFORMER REMOVAL. ASTRIA CRANE NOT AVAILBLE UNTIL 1/22/97. AS PER J. CAMPANILE. FERNANDEZ REPORTS N.SAVOCA COMPLETED 9PPM CLEAN UP & REMOVED TAG #3649. #38707. UPDATE 1/24/97 COMPLETION PAPERWORK RECEIVED BY THE CONTROL CENTER FROM A. HOWELL FLUSH. UNIT WAS REMOVED, CLEANUP COMPLETE. ENV. STOP TAG REMOVED. THIS INCIDENT IS CLOSED."

Environmental Interest/Information System

SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110055280743

Environmental Interest/Information System

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110001571246

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "6/5/2013 Sangesland spoke to Al Mignone 718-334-9121 cell 646-235-3183. He's the head? of Sanitation Dept Facilities???? He says the hydraulic piston is into the ground about 7-8ft and the line from the hydraulic oil tank is buried about 4ft deep and runs a length of about 20ft. He does not know where the leak happened. Once the leak was noted, the tank attached to lift was drained and some excavation work was done. Sangesland asked for 3 soil samples. One adjacent to the piston and about 2-3 ft blow the bottom of the piston, the other 2 soil samples spaced out along the length of the buried hydraulic oil line, also about 2-3 ft below the depth of the line. Al said he does not know if Sanitation will hire an outside

environmental contractor to do this work, or if he will try to get someone in-house at Sanitation to take the soil samples (either via geo-probe or via a backhoe trench). Sangesland said the only requirement was a P.E. needs to supervise the work and sign off on the samples. Submittal needs photos and a scale site plan along with lab VOC & SVOC results. 12/24/2013 - This spill case has been re-assigned to V. Brevdo as Steve Sangesland no longer works in DER. Informed Jeff Vought of Spill Prevention and Response of this re-assignment. There was earlier concurrence that DDC spills which were assigned to Steve S. will be re-assigned to Section B as it manages DDC spills. VB. 02/12/2014 - Received Site Specific Investigation Plan from DDC/Liro, dated February 2014. V.B. 02/14/2014 - Issued Approval Letter for Site Specific Investigation Plan. VB 07/16/2014 - V. Brevdo DSNY-DDC Cioffe Repair Shop, 106-01 Avenue D, Brooklyn (Spill No. 1206870) Spill Case Closure Rationale July 16, 2014 The Site is located approximately 3,400-feet north of the confluence of Fresh Creek and Jamaica Bay. The facility located at the site is owned and operated by DSNY. On October 12, 2012, a leak was found during tank tightness testing. Subsequently, the UST system failed test and a spill case was opened by the Department. No previous investigations of this spill case have been conducted. On February 12, 2014 NYCDDC and its engineering consultant, Liro Engineers, Inc. (Liro), submitted Site Specific Investigation Plan to investigate potential petroleum impacted soil and ground water due to UST tightness test failure. The purpose of this investigation was to identify the presence or absence of petroleum contamination, evaluate the need for corrective action, and recommend a remedial approach if correction action was required. The Site Specific Investigation Plan entailed the advancement and installation of four (4) ground water monitoring wells. Soil and ground water samples were be collected and analyzed for VOCs and SVOCs. The depth to ground water and product thickness (if present) would be measured. The Department approved Site Specific Investigation Work Plan on February 14, 2014. Site Investigation Report was submitted to the Department on July 14, 2014. Site Investigation was conducted from March through June 2014. There were minor field observations (i.e. elevated Photo Ionization Detector PID Readings) of impacts to soil observed during the completion of monitoring well soil borings. One VOC compound (Total Xylenes) was detected above soil cleanup objective in one soil sample but did not impact groundwater concentrations above drinking standards. There were no field observations of impacts to soil during the excavation and removal of 46-gallon UST. All VOCs were below cleanup objectives. Free phase product was not observed during drilling, well installation, soil excavation and UST removal or during groundwater sampling events. All groundwater CP-51 list VOCs were reported below groundwater standards. Low concentrations of CP-51 list SVOCs were reported in site soil and groundwater samples consistent with urban fill, as observed in site boring logs. Based on the minimal levels of reported petroleum-related contamination in soil and groundwater samples, Liro recommended closure of this spill case. The Department closed spill case effective July 16, 2016. V. Brevdo "

Remarks: "Hoist tank failed. Lift will be removed and remediate if necessary."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 01/01/2006
Site name: SICANIA ELECTROPLATING
Classification: Not a generator, verified

Date form received by agency: 07/08/1999
Site name: SICANIA ELECTROPLATING
Classification: Not a generator, verified

Date form received by agency: 03/01/1990
Site name: SICANIA ELECTROPLATING CORP
Classification: Large Quantity Generator

Date form received by agency: 09/19/1989
Site name: SICANIA ELECTROPLATING
Classification: Small Quantity Generator

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 02/01/1993
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: EPA Contractor/Grantee

Environmental Interest/Information System

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Registry ID: 110004358837

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "04/21/08 - Spill # 92-10655 (PIN 92452) consolidated under this spill #. ExxonMobil settled the case and has taken over the project in coordination with the ongoing remediation at this station. 4/27/10 - A down-gradient, off-site monitoring well was constructed and sampled. 1/25/11 - Periodic O&M was conducted. Bolla EM Realty has taken responsibility for site remediation. Arcadis is the new consultant. 8/29/11 - Semi-annual sampling showed some decreases in groundwater contaminant concentrations. However, the well (MW-1) that usually has the highest BTEX concentrations appeared to have a obstruction in the well and was not sampled. 2/24/12 - Semi-annual sampling conducted in November. Generally, the data don't show decreases in contaminant concentrations relative to the previous sampling round. The consultant is proposing calcium peroxide injections. with construction of permanent injection well, to facilitate the reduction of groundwater contamination. 07/26/12 - Groundwater sampling was conducted in May. The data don't show significant changes in contaminant concentration in the wells where contaminants were detected. 09/26/12 - A remedial action work plan for chemox injection was approved. 02/01/13 - M. MacCabe - The site status update report (SSUR) was received. Groundwater sampling was conducted in November 2012. The data don't show overall change in contaminant concentrations. The report included documentation of chemical oxidant injections performed in December. 2,346 gallons of 5% calcium peroxide slurry was injected into the subsurface via 19 temporary direct push injection points. A scheduled sampling round will determine the effectiveness of the chemox injections. 8/22/13 - The semi-annual groundwater sampling was conducted in May. The data show a general decrease in BTEX concentrations from the previous sampling round. But, because the BTEX concentrations have historically shown significant fluctuations, the concentrations observed in May are similar to those found in some previous sampling rounds. 01/31/14 - The semi-annual site status update report was received. Except for the most contaminated well, BTEX and MTBE concentrations in groundwater show a general decline. 8/21/14 - The spill number has been closed. "

S103570734

investigated. AZ 2-13-2006 Reviewed a monitoring report submitted on Dec.22, 2005 (January through June 2005). Total VOC concentrations are up to 1400 ppb, SVOC are up to 459 ppb. An increase in SVOCs was observed in MW-3. AZ 4-14-2006 Contacted Andy Ledins of Greyhawk. He proposed to temporary shut down the system due to difficult transition efforts and administrative requirements (transfer of contractors and subcontractors). ROUX is currently preparing a report with recommendations for the site. I suggested to run the system until the report is issued. Andy could not provide the date when the report will be issued. AZ. 6-8-2006 At the meeting with DDC/Greyhawk/Roux on 5/23/2006 DEC concurred that the system could be shut down. They could remove the system and leave underground structures intact. As per Greyhawk, there are two hot areas on two different sides of the site. AZ 8/21/2006 Left a message for Andy Leddins (Greyhawk). AZ 8/16/2006 Conversation with Andy Leddins (Greyhawk). I approved recommendations made in June 22, 2006, report received by DEC on August 7, 2006. ORC will be implemented, The system will remain shut down but it will not be dismantled. E-mail confirming DEC approval was sent to Andy Leddins. AZ 5-10-2007 Reviewed a monitoring report submitted on January 31, 2007 (July through December 2006). The only monitoring well with VOCs detected above NYSDEC AWQSGV was MW-03 - total VOCs detected was 729 ppb on November 3, 2006. ORC sock has not been installed (DEC concurred with ORC installation in August 2006). Roux recommended reducing groundwater monitoring frequency from quarterly to semi-annual. DEC concurred. Roux recommended removing MW-02 from the sampling program. DEC concurred. E-mail was sent to DDC/Roux/Greyhawk:5-10-2007. An e-mail was sent to DDC/Roux/Greyhawk: Roux recommended reducing groundwater monitoring frequency from quarterly to semi-annual at this site. Also, Roux recommended removing MW-02 from the sampling program. DEC concurs with these proposals. ORC sock should be installed in MW-03 (DEC requested this installation in August 2006). No proposals for investigation of spill#0500514 were submitted. At the meeting with DDC Greyhawk stated that they will submit proposals to DEC soon. Chlorinated vapors were previously recorded at the site. Were chlorinated vapors monitored for? What are the results of the monitoring? AZ 8-27-2007 Reviewed semi-annual monitoring report submitted on June 27, 2007 (January through March 2007). ORC sock is installed in MW-03. MW-03 exhibited total VOCs of 664 ppb and total SVOCs of 820 ppb. No downgradient groundwater well is monitored at the site. The downgradient well should be installed. I called B. Morrissey (Roux) and requested installation and monitoring of a downgradient well. An e-mail was sent to Roux/DDC No downgradient groundwater well is monitored at the site. The downgradient well should be installed. Also, Spill #0500514 should be investigated, as it was previously requested by DEC. AZ 8-14-2008 I contacted B. Morrissey over the phone. Brian asked if they can permanently remove the AS/SVE system as per February 2008 report. I replied that the report did not contain this request. According to the report, the anomalous VOC concentrations were reported in September 2007 for monitoring wells MW-02 and MW-03. This appeared to be the result of inadvertent switch in the respective identities of these two wells. We will need to keep the system at the site for some time due to the gw sampling results. Also, the downgradient well should be installed as per previous DEC's request. AZ 2-25-2009 Reviewed semi-annual monitoring report submitted on December 1, 2008 (January through September 2008). On May 2, 2008 Roux installed a a monitoring well

S103570734

downgradient of MW-03 and collected soil samples. VOCs were detected in the soil sample collected but four SVOCs were detected above NYSDEC RSCOs. Roux will replace ORC socks in MW-02 and MW-03. MW-03 on 9/3/08 had total VOC concentrations of 1012 ppb and total SVOC concentrations of 525 ppb (increase from 531 ppb and 144 ppb respectively). AZ 2-9-2011 This spill was transferred to LiRo in February 2010. Reviewed site turn-over status report and semi-annual monitoring report dated Sept. 21, 2010. Total VOCs in MW-03 837 ppb. Limited VOC soil contamination was detected in the smear zone (7'-9') at AS-01 and SVE-2. AS/SVE system appears to have reduced the MTBE contamination. On March 11, 2010, a trace amount of free product was noted in well RXMW-01. An e-mail was sent to LiRo/F. Ashkan/V. Brevdo: I have reviewed site turn-over report and semi-annual monitoring report. LiRo recommended that confirmation soil sampling adjacent to wells AS-01 and SVE-2 should be performed. This recommendation is approved. Also LiRo recommended replacement of monitoring wells MW-02 and RXMW-01, investigation of other spills at this property, semi-annual monitoring and fingerprint analysis of the free product. These recommendations are approved. All active tanks should be field located as per LiRo recommendation. ORC socks should be installed following the well sampling and depending on sampling results. AZ 12-20-2011 Reviewed USTs closure report submitted in September 2011. Two 2,000 gallon gasoline double wall fiberglass coated steel tanks and underground piping were closed in place. PID readings of up to 97 ppm were observed in soil samples. VOC were detected in 3 samples. Petroleum odors and petroleum product was observed in soil sample LSB-10 (10-15 bgs). AZ 4-26-2013 LiRo will complete four soil borings and install one monitoring well to delineate contamination observed in the vicinity of boring LCSB-10 and monitoring well MW-03 and to provide data to evaluate the feasibility of Soil Excavation. AZ 10-23-2013 Reviewed report dated March 15, 2013. September 2012 soil sample results reported no VOCs or SVOCs at concentrations above SCL. The July 2012 VOC and SVOC groundwater concentration for all monitoring wells were within the lower range of previously reported concentrations. Therefore, the remaining residual soil contamination is limited to a small area in the immediate vicinity of LCSB-10, north of the closed in place USTs, and may be the source of the dissolved-phase concentrations reported in well MW-03. The dissolved phase VOC groundwater plume does not extend off-site. AZ 10-24-2013 An e-mail was sent to S. Frank/V. Brevdo/F. Ashkan: Dear Steve, I have reviewed a monitoring report for the above site dated March 15, 2013. I concur with your proposal to decommission the AS/SVE system. All wells must properly abandoned. If these wells are set in groundwater, they should be checked for the presence of free phase product. Groundwater monitoring should be performed semi-annually. Sincerely, Alex Zhitomirsky 3-19-2014 Reviewed report dated 8/22/2013 The report stated that September 2012 investigation results demonstrated that the remaining soil contamination is limited to a small area in the immediate vicinity of LCSB-10 north of the closed in place USTs. The residual contamination may be the source of the dissolved -phase concentrations reported in well MW-03. The plume does not extend off-site. AZ 12-17-2014 Reviewed semi-annual report dated 5/19/2014 The report stated that EFR events were completed at three well locations in January, February and April 2014. No free phase product was observed. The plume does not extend off-site. AZ 06-19-2015 Reviewed semi-annual report dated 01/14/2015 LiRo will conduct a one-time In-Situ Chemical

DER Facility ID: 243526
DEC Memo: "11-04-2005 Last report was submitted in April 2005 (3 months later). GW contamination is ranging from total VOCs 524 ppb to 830 ppb. Downgradient well SVE-7 (MW-7) has 830 ppb total VOCs and increasing trend. There is no well downgradient of SVE-7. Also gw in MW-3 contains 775 ppb total TVOCs. Total VOCs in soil is 3,900 ppb, total SVOCs in soil is up to 168,800 ppb. SVOCs are leaching into the soil. Plume migrates downgradient and is unstable. No clean sentinel well. AZ 12-05-2005 This is a new spill. Site was discussed in a meeting with NYCDDC and Shaw on November 9, 2005. DDC stated that this tank failure should be investigated. Shaw responded that the tank has been removed. AZ 4/10/2006 A request for spill investigation was e-mailed to Greyhawk (Andris H. Ledins). AZ 8/4/2006 A follow up request for a new spill investigation was sent via e-mail to Andris Leddins (Greyhawk). AZ 8/8/2006 E-mail received from Andy Leddins (Greyhawk): During the transition, Greyhawk did not receive any information regarding the heating oil tanks at this site. After speaking with Ms. Fatemeh Ashkan of DDC, we were able to obtain information on a previous heating oil tank circa 2003 and have obtained these documents although they are not relevant to your question. DDC presently has no information regarding this spill number you reference in their files. DDC has placed a call to DOS representatives regarding this spill number. The individual responsible for this area is out of the office for a few days but should return by the end of the week. We are collectively hoping that we can get some information regarding this particular spill number at that time. We will keep you apprised as best we can. AZ 12/22/2006 At the meeting with DDC/Greyhawk on 12/12/2006 the remedial progress was discussed. Greyhawk does not have a proposal yet and they will submit them to DEC soon. Chlorinated vapors were recorded at the site. AZ 5-10-2007 An e-mail was sent to DDC/Roux/Greyhawk: Roux recommended reducing groundwater monitoring frequency from quarterly to semi-annual at this site. Also, Roux recommended removing MW-02 from the sampling program. DEC concurs with these proposals. ORC sock should be installed in MW-03 (DEC requested this installation in August 2006). No proposals for investigation of spill#0500514 were submitted. At the meeting with DDC Greyhawk stated that they will submit proposals to DEC soon. Chlorinated vapors were previously recorded at the site. Were chlorinated vapors monitored for? What are the results of the monitoring? AZ 8-27-2007 Received and reviewed report from Roux dated June 15, 2007. The report listed as an upcoming task obtaining additional information about Spill#0500514 which was reported as a result of a 2,000 gallon tank test failure. On May 23, 2007, Roux requested a copy of the tank test report from the NYCDDC Building Maintenance Director via e-mail. Another e-mail was sent to the Maintenance Director on June 4th. If it is discovered that a release occurred from the tank that failed the test, then

appropriate action will be taken. An e-mail was sent to Roux/DDC: Spill #0500514 should be investigated, as it was previously requested by DEC. AZ 4-21-2008 Received and reviewed report from Roux dated February 11, 2008. The report listed as an upcoming task obtaining additional information about Spill#0500514 which was reported as a result of a 2,000 gallon tank test failure. An e-mail was sent to the NYC DOS Director on June 4, 2007. If it is discovered that a release occurred from the tank that failed the test, then action will be taken after obtaining DEC approval. AZ 12-11-2008 Contacted Alexander Mignone (NYC DOS assistant chief bureau OF Building management 718-334-9121). His boss asked him to provide info on this tank but he does not have any. He contacted Michael Seppe 9 Fenley & Nicol asking for the info regarding 2,000 gal tank failure. He is waiting for the report. NYCDOS should provide Roux with a copy of the tank test report and the actual location at the site of 2,000 gal. AZ 2-25-2009 According to Roux's report dated November 24, 2008, a follow up e-mail was sent by Roux to several NYCDOS personnel on November 19, 2008, requesting any information regarding any tank work. Roux will continue to follow up with this contact. If it's discovered that a release occurred from the tank that failed the test, then appropriate action will be taken. AZ 2-9-2011 The spill was transferred to LiRo. In a report dated Sept. 2010, LiRo stated that they will investigate spill #0500514 to determine if additional petroleum releases have been made that require remediation. AZ 10-19-2011 In a report dated June 2011, LiRo stated that this spill is related to a tank test failure of unknown material reported on April 12, 2005. Based upon this spill report date and other UST installation dates and construction, LiRo believes this spill is related to the gasoline USTs and spill 9513357. Based on the LiRo's report this spill is closed and consolidated with spill #9513357. The following e-mail was sent to S. Frank/F. Ashkan/V. Brevdo: Dear Steve, I have reviewed semi-annual monitoring report for the above site dated June 6, 2011. The report stated that based on the spill#0500514 report date and the other UST installation dates and construction, LiRo believes that this spill is related to the gasoline USTs and that contamination has been adequately addressed under spill#9513357. LiRo proposed consolidation of spills # 9513357 and #0500514. Based on the documentation provided to date, spill case 0500514 has been closed and consolidated with spill #9513357. All further investigation/remediation should be tracked under spill #9513357. The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was not addressed by this evaluation. II. Environmental conditions related to the Site which were unknown to the Department at the time of this approval. III. Information received, in whole or in part, after the Department's spill case closure, which indicates that the corrective action was not sufficiently protective of human health for the reasonably anticipated use(s) of the site; or IV. Fraud in obtaining this approval for inactivation. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use. The Department's files regarding this release may not be maintained indefinitely. Sincerely, AZ "

downgradient and is unstable. No clean sentinel well. I am not recommending this site for closure. AZ 2-13-2006 Reviewed a monitoring report submitted on Dec.22, 2005 (January through June 2005). Total VOC concentrations are up to 1400 ppb, SVOC are up to 459 ppb. An increase in SVOCs was observed in MW-3. AZ 6-12-2006 At the meeting with DDC/Greyhawk/Roux on 5/23/2006 DEC concurred that the system could be shut down and removed. CM will implement soil vapor survey. A 8/9/2006 Left a message for Andy Leddins (Greyhawk). Quarterly report submitted by Greyhawk on July 13, 2006, referred to incorrect spill numbers for this site. AZ 8/16/2006 Conversation with Andy Leddins (Greyhawk). I approved recommendations made in June 22, 2006 report received by DEC on August 7, 2006. ORC will be implemented, The system will remain shut down but it will not be dismantled. AZ 5-10-2007 Reviewed a monitoring report submitted on January 31, 2007 (July through December 2006). The only monitoring well with VOCs detected above NYSDEC AWQSGV was MW-03 - total VOCs detected was 729 ppb on November 3, 2006. ORC sock has not been installed (DEC concurred with ORC installation in August 2006). Roux recommended reducing groundwater monitoring frequency from quarterly to semi-annual. DEC concurred. Roux recommended removing MW-02 from the sampling program. DEC concurred. E-mail was sent to DDC/Roux/Greyhawk:5-10-2007. An e-mail was sent to DDC/Roux/Greyhawk: Roux recommended reducing groundwater monitoring frequency from quarterly to semi-annual at this site. Also, Roux recommended removing MW-02 from the sampling program. DEC concurs with these proposals. ORC sock should be installed in MW-03 (DEC requested this installation in August 2006). No proposals for investigation of spill#0500514 were submitted. At the meeting with DDC Greyhawk stated that they will submit proposals to DEC soon. Chlorinated vapors were previously recorded at the site. Were chlorinated vapors monitored for? What are the results of the monitoring? AZ 4-22-2008 Received and reviewed report from Roux dated February 11, 2008. I sent e-mail to DDC/Roux/Greyhawk/VB requesting identification of the waste oil tank and addressing the spill. Contaminated soil was discovered during the tank pull. AZ 4-23-2008 Received an e-mail from Wendy Monterosso (Roux). They are trying to obtain information from the DOS maintenance department regarding this particular spill. Recently, DOS requested to be provided with the party that reported the spill. I contacted Wendy Monterosso and provided her with necessary information. AZ 2-25-2009 According to Roux report dated November 24, 2008, a site visit was performed on November 20, 2008 to interview site personnel regarding this spill. Further information will be provided in the next monitoring report by Roux. An e-mail was sent to Roux: I have reviewed Roux's report addressing this spill and dated November 24, 2008. The report stated that Roux will obtain additional information about Spill#0200942 by submitting FOIA request to NYSDEC. It should be noticed that I have provided Wendy Monterosso (Roux) with the information contained in NYSDEC files on 4-23-2008. Investigation of this spill should be performed to confirm that no soil/groundwater contamination has resulted from the spill #0200942. AZ 2-9-2011 The spill was transferred to LiRo. In a report dated Sept. 2010, LiRo stated that they will investigate spill #0200942 to determine if additional petroleum releases have been made that require remediation. AZ 10-21-2011 LiRo submitted an additional work investigation plan to complete investigation near the waste oil tank. 3 wells will be installed. After the investigation is completed, it will be decided if the site requires remediation. The following

e-mail was sent to S. Frank and F. Ashkan: Dear Steve, I have reviewed additional site investigation plan submitted in June 2011. This work plan is approved. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. AZ 2-24-2012 The following email was sent to S. Frank/F. Ashkan/V. Brevdo: Dear Steve, I have received semi-annual monitoring report and additional investigation work plan dated December 28, 2012. LiRo proposed to advance one additional boring and one additional monitoring well to delineate contamination in the vicinity of boring LSB-10. This work plan is approved. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan. Sincerely, AZ 4-24-2013 Reviewed semi-annual monitoring report for the monitoring period of October 201 through March 2012. LiRo will install three monitoring wells (LMW-04-LMW-06) AS PROPOSED IN THE JUNE 6, 2011, SAMR to invstigate spill No.0300942. This investigation was approved by DEC on October 21, 2011. AZ 10-23-2013 Reviewed semi-annual monitoring report dated March 2013. LMW-04 through LMW-06 September 2012 soil sample results report no VOC or SVOC concentrations above the NYSDEC SCLs. The September/October soil and groundwater results indicated no petroleum release from the waste oil UST. However, during the February 2013 monitoring event, 0.03' of free phase product was present in monitoring well LMW-06. Laboratory analysis identified the product as hydraulic fluid. A petroleum absorbent sock was installed in the well. AZ 3-18-2014 Reviewed a monitoring report dated August 22, 2013. During 2013 monitoring event a small amount of free phase product was present in LMW-06.The product was identified as hydraulic fluid. The source of the oil is likely from a surface release within the service bay where the well is located. AZ 4-29-2014 The following e-mail was sent to S. Frank and V. Brevdo: Dear Steve, I have reviewed a Semi- Annual Monitoring Report for this site dated December 23, 2013. The report stated that September/October 2013 soil and groundwater investigation results indicated no petroleum release from the waste oil UST. The small amount of free phase product was observed in monitoring well LMW-06 during the February 2013 sampling event has not been observed in monitoring well since that event. Laboratory analysis identified the product as hydraulic fluid likely a result of subsurface release within the service bay. Based on the above information this spill is closed. The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates that corrective action was not sufficiently protective of human health and/or the environment. IV.

Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts must be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely.
Sincerely, Alexander Zhitomirsky"

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 8/10/99 smm: reassigned - originally assigned to Mulqueen. 08/27/97 mmm: CALLED CABLEVISION AND SPOKE TO HOMREA FERRONATA WILL NOT BEING USING THE TANK AND WILL SWITCHED TO GAS. TOLD HIM THAT HE NEEDED TO PUT SOME BORINGS AROUND THE TANK AND GAVE HIM THE NAMES OF SOME CONTRACTORS. 1/27/04 - AUSTIN - REASSIGNED FROM TIBBE TO SAWYER, AFTER RECEIPT OF 1/21/04 REQUEST FROM DINA TAMMARO FOR CLOSURE - END 3/2/04 - Sawyer - Talked to Dean Pierce of Testwell Labs, who was contracted by Cablevision to find out closure requirements. He is to find out actual areas of contamination and to figure out remediation plan to remove the contamination. 12/27/05- DEC Piper: In May 1998 tank failed a tightness test and was abandoned. No soil samples at the time were collect nor documentation of failure was received. Therefore, subsurface investigation warranted. DEC Piper spoke w/ Barbara at Testwell Labs regarding site. AS per conversation, 827 E. 92nd St. LLC (new Owner/manager)430 Maspeth Ave, Brooklyn NY 11211. 827 LLC was looking for a closure request letter from Testwell. Testwell had provided a quote on remediation though was never contracted and would not write letter. DEC Piper spoke w/ Dina Tammaro of 827 LLC and sent on 12/27/ 05. 1/5/06- DEC Piper sent out another TTF letter to 827 LLC due to missing info. 1/10/06- DEC Piper left message w/ Dina Tammarro requesting call back. 1/11/06- DEC Piper sent CSL letter to Mr. Homero Ferronato Troy Realty Co. 1590 Troy Avenue Brooklyn, NY 11234 Mrs. Dina Tammaro 827 East 92 Street, LLC 430 Maspeth Avenue Brooklyn, NY 11211 718.384.3000 fax: 3113 DEC requires soil sample. 3/15/06- DEC Piper spoke w/ Mrs. Tamarro. She is still attempting to get a quote. DEC Piper faxed list of contractors to her. 5/11/06- DEC Piper spoke w/ Dina T. Sceduled for Apr. 22. Never showed up and is rescheuled for May 19. 9/7/06- DEC Piper received limited subsurface investigation performed around abandoned 5000 gal UST. Four borings via a geoprobe was completed. No visual or olfactory evidence of contamination was found in the borings 1-4. No Pid readings. No elevated VOC's thpugh some SVOCs related to historic urban fill material. Benzene in GW was detected above TAGM at .77 ppb, .07ppb above TAGM. Some SVOCs slightly (less than 1 magnititude) above concentrations. No further action granted. closed. See E-Docs."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TIBBE 08/08/95: CAPITAL ENVIRONMENTAL INSTALLED BORINGS AND ANALYZED
SOIL SAMPLES. NO CONTAMINATION WAS FOUND.CASE WAS INITIALLY HANDLED
BY ALEX ZHITOMIRSKY. Albany assignment: rddecand unable to contact
owner. SemiVOCs low in soil (under water, collect water samples if
possible. UST closed in 1996 per PBS records, unknow if addition
sampling exists which is related to tank closure. 9/7/06 - Austin -
Assigned from Albany to Region 2 staff (Ketani) for review and
closure - end 10/27/06 - Raphael Ketani. The site consists of 3
buildings. The address is: Earl W. Jimerson Housing Co., Inc., 1407
Linden Blvd., Brklyn, 11212. Block and lot are: 03634/0001. The phone
number is: (718) 498-1055/1056/4476. The office manager is presently
Ms. Sheena McNeal. From the spill report, the contact person at S&S
Boiler (516) 225-7800 was Katherine. While cleaning out the tank,
water was observed to be coming in. From Property Shark: notices=Earl
W. Jimerson Housing Co., Inc., c/o Marion Scott Real Estate I, 107 E.
126 Street, #129, NY, 10035-1606. billing=American Property Financing
Inc., 6 E. 43 Street, 26 Floor, NY, 10017-4648. PBS case #2-406554:
25000 gal. closed & removed on 1/1/96, had #6 oil. 10,000 gal. in
service, #2 oil I spoke to Ms. McNeal. She said that she has been the
office manager for only the last 2 years and knows nothing about the
oil leak. She said she will investigate the past situation, look for
the records, and get back to me on 10/31. 11/1/06 - Raphael Ketani. I
tried to get ahold of Ms. McNeal, but could only leave a message. I
sent a CSL. 11/21/06 - Raphael Ketani. I received a call today from
Sally Jackson (212) 876-6800 ext 224 of Marian Scott Real Estate, the
management company for the co-op. She asked what the 11/1/06 letter
was about. I told her that DEC didn't have any record of the oil leak
having been cleaned up. So we needed copies of whatever papers
documenting the cleanup she had. She said she didn't think she had
any. I told her that if there are no documents available, then a new
investigation will be needed. She said the co-op is poor and doesn't
have the money. I told her to either find someone who has the
documents or have the co-op or insurance company hire an
environmental investigation company. She said she will get back to
me. 6/25/07 - Raphael Ketani. I called up Ms. Jackson at the Jimerson
Housing project office (718) 498-1055. I could only leave a message.
Ms. Jackson called me back. She had me talk to the super., Anthony
Mitchell. Mr. Mitchell said that he had been the super. back when the
spill was called in. He said that the 25,000 gal. UST had been
loosing #6 oil, but no one knew how much. I asked him was it 1000
gals? He said it was definitely not that much. I asked him were 500

gals. lost? He said he didn't even think that much oil was lost. Mr. Mitchell said that the tank was cleaned out and filled with sand (the tank is listed as closed). He said that it's buried under the floor of the garage for the building and there is about 4 feet of concrete on top of it. I asked him whether the garage is under the building or adjacent to it. He said that it's adjacent to it. I asked him whether there ever was any vapors in the garage or the basement of the building from the oil. He said there were never any vapors. He said there had never been any oil in the basement, either. I asked him how far down the water table was. He said 15 feet (the site DOES NOT fall within the pumping region for the Jamaica Water Supply). After talking to Mr. Mitchell, I spoke again with Ms. Jackson and told her to write a letter to DEC describing the status of the 25,000 gal. tank, the nature of the leak, any impacts to the building and the residents and the present conditions. She said she will do this. 8/2/07 - Raphael Ketani. I called up Ms. Jackson and asked her where the letter was. She said it was taped to her desk and she simply forgot to send it. I gave her my FAX number and told her to send it ASAP. She said she will. 8/3/07 - Raphael Ketani. I received a package of documents from Ms. Jackson. It contained the letter I had been asking for which said that they had abandoned the 25,000 gal. tank and had installed a 10,000 gal. tank. The letter also indicated that they converted from #6 oil to #2 oil which alternates with gas in a dual fuel system. The package also contained a letter from the engineer in charge, Mr. Germain, a 10/30/97 letter from Karen Westerlind of the DEC PBS Unit regarding the registration of the two tanks, a PBS registration form for the tanks, a second PBS registration form, and a certificate of approval for oil burning installation from the NYC Dept. of Buildings with a Schedule C and Notice of Proposed Installation. Based upon my conversation with Mr. Mitchell on 6/25/07, the 8/2/07 letter from Ms. Jackson, and the fact that it was #6 oil which was spilled, I am closing the spill case. "

Remarks:

"WHILE CLEANING TANK NOTICED WATER LEAKING INTO SAME. NOW TEMPORARY TANK INSTALLED. CALL BACK REQUESTED."

McCulagh Co., Inc., certified all work was performed in accordance with contract terms & conditions. Documents sent for e-filing. Ms. Gray suggested Al Simoncini, supervisor of shops for CNY Parks & Rec (718-965-7757) as a contact if more info is needed. 6/19/08 On 6/2/08 received closure report requesting closure of spill from Renee Wong of Roux Associates. Soil boring results show exceedances in a number of parameters. bf 6/2/09 received e-mail from Renee Wong requesting status of spill case. 4/18/11 bf: Prepared the e-mail below with the status of the spill at the request of R. Austin. This case will probably be transferred to another case manager. Recently, a consent order was signed with NYC regarding PBS and remediation issues involving the mayoral agencies' facilities that have heating oil tanks on their properties. A list of 39 spills was attached to this CO, and those projects will have to follow the proscribed investigation/remediation process in this order.

----- e-mail

below: Spill 0012906 Status Report This spill case was opened as a result of a tank test failure on 3/7/01. According to documentation found in the closure report received by the Department on 6/2/08, prior to closing, the tank's interior was inspected and no corrosion or holes were found. No discussion of a cause for the tank system failure was provided. However, visual signs of petroleum contamination and petroleum odors were found when the tank top was excavated. There is still contamination present according to the analytical summary from the closure report, which is attached. The sampling analytical report was prepared on 6/25/02, shortly after the tank was closed (5/1/02). In order to close the spill case, the contaminated soil will need to be removed or treated. Since the tank was closed in place, the removal or treatment of the contaminated soil will probably be difficult. The closure report is in e-docs, but I still have the hard copy at my desk. 11/30/11 Case referred to V. Brevdo as per R. Austin. bf 12/23/11 Saved 5/22/08 closure request in e-docs. Assigned spill to V. Brevdo in database. When I was putting report in e-docs, I noticed that I did not reassign the case as stated above. bf 12-27-2011 This spill is reassigned from V. Brevdo to Alex Zhitomirsky, as per V. Brevdo instructions. Emailed LiRo and received the following response by S. Frank: We will pull together whatever information we have and forward it to you. AZ 2-6-2012 A 10,000 gal #2 tank was closed in-place in May 2002 and replaced with a 6,000 gal #2 fuel UST. A tank closure report issued June 10, 2003. Soil concentrations in (3) of (6) soil samples exceeds CP-51 SCL. LiRo proposed soil excavation. AZ 4-4-2012 An email was sent to S. Frank/F. Ashkan/V. Brevdo: Dear Steve, I have reviewed a Site Excavation Plan dated December 28, 2011. The plan proposed an excavation oan area in the vicinity of the former fill poet and installation of one boring/well. The Work Plan is approved. If contamination is found beyond the proposed area of excavation, it should be removed, if feasible. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the

S104951044

implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alex Zhitomirsky AZ 1-2-2014 Received an excavation summary report dated 7-12-2013. The report stated that the spill was report when on March 8, 2001, a 10,000 gal #2 oil fuel tank failed a tightness test. The tank was closed in place and could not be excavated since it is located below the interior of the recreation center. On December 28, 2011, LiRo submitted a Soil Excavation Work Plan which was approved by DEC. On February 25, 2012, LiRo excavated and removed approximately 11.63 tons of soil from the former fill port area. On June 13, 2013, LiRo completed a soil boring to 25-feet below ground surface and collected a soil sample and a groundwater grab sample. LIRO COLLECTED five end-point samples from the excavation. There were no CP-51 list VOCs or SVOCs reported at concentrations above the NYSDEC SCLs in any sample. A soil sample and a groundwater sample from the boring LSB-01 exhibited no exceedances. I called S. Frank and left a message for him. AZ 1-6-2014 Based on the report report dated July 12, 2013, soil contamination still exists where the former 10,000 gal #2 oil tank was closed in place. I contacted S. Frank. He will get back to me with more information. AZ 2-10-2014 E-mail from S. Frank: Alex, Based on your phone call, we looked at alternatives for Brownsville. The attached letter explains the conditions. It is not feasible to excavate any further. We could however conduct some soil vapor/indoor air sampling if that will help. Let me know if you would like us to proceed with soil vapor sampling. Thanks Steve 3-11-2014 Contacted S. Frank. Currently we don't know if soil/groundwater contamination exist in the source area. I inquired if soil/groundwater samples could be collected withing the source area. S. Frank will get back to me with this info. AZ 7-10-2014 Reviewed excavation Summary Addendum Letter dated 2-10-2014. Soil excavation was conducted at the exterior wall adjacent to the former fill port. The piping run inside of the building is less than 10' in length. THE fill pipes and the tank are buried beneath the finished recreational facility floor. Due to the size of the tank further excavation work is not feasible inside of the building. LiRo suggested to conduct a vapor intrusion evaluation with sub-slab and indoor air sampling. This approach was approved during DEC/DDC meeting on May 29, 2014. AZ 10-20-2014 The following e-mail was sent to S. Frank/V. Brevdo: Dear Steve, I have reviewed a Sub-Slab Soil Sampling Report and Vapor/Air Sampling Plan. The Plan recommended collection of indoor ambient air and sub-slab soil vapor samples. Unfortunately, the plan did not indicate the location of the sub-slab sample. As per our telephone conversation on 10-20-2014, two sub-slab soil vapor samples should be taken as close as possible to the location of the former UST. Also, a plan indicating locations of the sub-slab samples should be included in the Vapor/Air Sampling Plan. Please resubmit the Plan with the required changes. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 2-9-2015 An e-mail was sent to S. Frank and V. Brevdo: Dear Steve, I have reviewed a revised vapor/air sampling plan for this site. This plan is approved. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site. Sincerely, Alex Zhitomirsky 1-28-2016 Reviewed a Soil Vapor/Air Sampling Report and Spill Closure Request dated 10/23/2015. In 2001 10,000-gallon #2 Oil Fuel tank failed the tightness test.. UST was closed in place in 2003. The tank was not removed due to its location below the interior of the recreation center's weight room. In November 2002 soil samples were collected from holes drilled through the interior wall of the

BROOKLYN RECREATION CTR (Continued)

S104951044

UST.. Prior to the soil samples collection, the UST was cleaned and accessed via the manway. The UST was inspected and found to be in very good condition. Total VOC concentrations ranged between non-detect and 40,137 ppb. Additional, one or more SVOCs ranged between 21,570 ppb and 491,948 ppb. In 20013 the fill port was excavated. Endpoint samples were collected. All VOCs were reported at concentrations below detection limit. In June 2013, a single soil boring was completed immediately east of the excavation. The boring was terminated at 25-feet bgs. No contaminants above limits were recorded. An unfiltered groundwater grab sample was collected. The total VOC concentration in groundwater sample was 118 ppb. In April 2014, two soil grab samples were collected beneath the floor slab. All petroleum-related VOC were reported below detection limits. In May 2015 two sub soil vapor probes were installed. Analytical results for the ambient indoor-air samples reported no VOC above standards. 1-29-2016 Discussed the site with S. Frank. He will collect more information on air sampling and groundwater sampling. Left a message for S. Frank asking him to forward me an electronic copy of the report and a short narrative for submittal to DOH. AZ 2-3-2016 The following e-mail was received from S. Frank, LiRo: Dear Alex, I have attached an electronic copy of the report and spill closure request that we prepared for the Brownsville Recreation Center (spill #0012906). The site is an indoor recreational facility operated by the New York City Department of Parks and Recreation. The spill number was opened as a result of a tank tightness test failure of a former heating oil tank that is located beneath a weight/ping pong room area at the recreational facility. The tank was cleaned and closed in place in 2003. The weight/ping pong room has a concrete floor slab covered with a rubber mat and will continue to be used for recreation in the future. Because of the building constraints and operations, the room is not accessible to drilling equipment and therefore, soil borings or monitoring wells cannot be installed. LiRo, however, was able to collect soil samples near the tank by drilling through an adjacent boiler room wall to support closure of the spill. At NYDEC's request for air data, LiRo conducted sub-slab vapor and indoor air sampling in the weight/ping pong room. The sub-slab vapor and indoor air samples were collected simultaneously. The results of the soil sampling and vapor/air sampling are detailed in the attached report. Sincerely, Stephen Frank, Senior Geologist Associate 2-3-2016 The following e-mail was sent to Michael Hughes (NYSDOH) and V. Brevdo: Hi Michael, Please take a look at the attached report. I would like to close this spill. As you can see, the consultant performed air sampling. I would appreciate if your team can evaluate the results of the air sampling and let me know if I can close this spill. Thank you, Alex Zhitomirsky "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 3/11/2003 - Sangesland spoke with John Leddy of Protest. 5,000 gal tank is being removed from under the parking lot of this church. Mr. Leddy had a concern that the water level in this area is high and clean endpoint samples may be difficult to obtain. Sangesland directed Protest to excavate out as much contaminated soil as possible, and then obtain sidewall end point samples. Vac out the liquid from the excavation (a couple of times) in an effort to draw back into the excavation any liquid contamination which may have moved away. Based on endpoint sample results and groundwater sample results, additional work may be required at the site. 6/15/05 - Haggerty - I spoke with Pro-Test Enterprises, they sent me all the documentation from the case. 6/21/05 - Haggerty - Based on the Spill Closure Report sent by ProTest, the decision was made to close out the spill. The contamination from the site was satisfactorily contained and disposed of."

S108956345

within TAGM 4046. High VOCs exceedances in ground water. 1,000 gallon waste oil UST, 1000 gallon fuel oil UST and two other hydraulic lifts were removed. End point sample from the UST excavations indicate contamination level within TAGM limit. No sample was taken from the hydraulic lifts excavation due to absence of staining or olfactory evidence. I spoke with Erin Quell of Envirotrac today, she indicated that additional investigation proposal including installation of monitoring wells will be sent to DEC. (sr) 10/28/08 Rec'd report from Envirotrac dated October 15, 2008. Six monitoring wells were installed in June 2008. Spill#8705799 was assigned to the site due to a UST test failure in October, 1987 which released approx. 120 gallons of gasoline, as per the spill report. Ground water was encountered at 17' below grade, flow direction northwest. There are no VOCs in soil samples above TAGM limit. VOCs are in ground water above TAGM 4046. Benzene 66 ppb, Toluene 860 ppb, Ethylbenzene 1,500 ppb, m&p Xylene 4,800 ppb, total Xylenes 6,700 ppb, Total BTEX 8,716 ppb, MTBE 260 ppb. (sr) **As per Report dated December 16, 2008. On November 6, 2008 liquid phase hydrocarbons (LPH) were not detected (ND) in any of the wells. Six (6) MWs were sampled for ground water and analyzed for VOCs. BTEX ranged from ND to 18,780 ug/L (MW-2). MTBE concentrations ranged from ND (MW-4 and MW-6) to 54 ug/L (MW-3). ** 08/10/09 Reviewing quarterly report (July). LPH not detected in any of the six wells. BTEX concentrations ranged from ND to 15,900 ug/L, MTBE concentrations 63 ug/L. Next round of sampling scheduled in August '09. (sr) Case transferred to remediation section for further management. 9/3/09 - Carlson: Case reassigned to Carlson. Issued letter requiring the submission of a delineation work plan. 10/8/09 - Carlson: Received update report and delineation work plan. Wells sampled on 8/22/09. Maximum BTEX concentration 18,100 ppb (MW1). Three additional monitoring wells proposed. 10/22/09 - Carlson: Reviewed June 2009 - August 2009 Update report and IP. Three additional monitoring wells proposed. Issued email requesting two of the locations be moved farther from the site. Revised work plan due in 30 days. 12/2/09 - Carlson: Approved revised work plan for installation of three additional monitoring wells. Wells will be located to the downgradient and cross gradient, to the east, south, and west of the site. 12/8/2009: Meeting held with Sunoco. 1/7/2010 - Carlson: Reviewed September - December 2009 Quarterly Monitoring and Sampling Report. Wells sampled on 11/19/2009. Maximum BTEX concentration 7,690 ppb (MW1). Three additional wells will be installed. 3/11/2010 - Carlson: Received email from Erin Quell - access delay, RIR extension to 4/16/2010. 4/6/2010 - Carlson: Meeting held with Sunoco. Access delay. DEC requested copies of access requests be submitted. 4/13/2010 - Carlson: Reviewed March update report. Received email with cc of access requests. 4/14/2010 - Carlson: Off-site owner, Mr. Liu, speaks Cantonese. DEC Feng contacted Liu family (owners mother). She will speak to Mr. Liu when he is available. 7/15/2010 - Carlson: Reviewed update report. Sent Erin Quell an email - what is the status of the access agreement for off-site delineation; 9/22/2010: Reviewed update report. Need to contact off-site owner for access for delineation. 10/27/10 - Obligado - This site has been temporarily assigned to Obligado as per Tibbe. 10/20/11 - Obligado - This spill is assigned from Obligado to Carlson as per Brevdo 1/11/2013 - 3Q2012, 11/2012, by CGE. Groundwater was sampled on 8/1/2012. DTW 14.88 (MW-5) to 16.01 (MW-1). MW-3, 279 BTEX, MTBE ND. MW-5, 966 BTEX, MTBE ND. MW-2, 3,840 BTEX, MTBE ND. MW-6, 758 BTEX, MTBE ND. MW-1, 815 BTEX, MTBE ND. 6/3/2013 - 4Q2012, 3/2013, by EAR. The

monitoring was conducted on 11/9/2012. DTW 14.88 to 16.24 feet. MW-1, 762 BTEX, MW-2, 1,971 BTEX. MW-3, 1,842 BTEX. MW-5, 109 BTEX. MW-6, 473 BTEX. 8/1/2013 - 1Q2013, 7/23/2013, by EAR. The monitoring was done on 2/7/2013. DTW 14.88 to 16.24 feet. Flows to southeast towards Jamaica Bay. MW-3, 1,590 BTEX. MW-5, 24 BTEX. MW-2, 6,528 BTEX. MW-1, 2,756 BTEX. MW-6, 581 BTEX. 06/27/2014: This spill case was transferred to A. Doronova. - AD 08/05/2014: Sent the following e-mail to Sunoco contact - Russell Hammond (e-mail: rhammond@sunocoinc.com) and copied to Anthony Fiorentine (afiorentine@cg-env.com): Dear Mr. Hammond: My name is Ainura Doronova. I am a NYSDEC project manager for the following spill cases, which were recently transferred to me: 1. Spill No. 1011266, 550 Humbolt Street, Brooklyn; 2. Spill No. 0913725, 1626 Steelwell Avenue, Brooklyn; 3. Spill No. 0809869, 42-02 21st Street, Queens; 4. Spill No. 0708451, 972 Remsen Avenue, Brooklyn; 5. Spill No. 0502868, 1781 Bay Ridge Parkway, Brooklyn; 6. Spill No. 0407558, 5 Flatbush Avenue, Brooklyn; 7. Spill No. 0304033, 805 65th Street, Brooklyn; 8. Spill No. 9909665, 175-33, Horace Harding Expressway, Queens; 9. Spill No. 9900619, 1650 Forest Avenue, Staten Island; 10. Spill No. 9808686, 188-06 Hillside Avenue, Queens; 11. Spill No. 9711173, 2310 Tillotson Avenue, Bronx; 12. Spill No. 9609282, 1781 Arthur Kill Rd., Staten Island; 13. Spill No. 9501327, 2701 Knapp Street, Brooklyn; 14. Spill No. 8905358, 32-32 Queens Boulevard, New York; 15. Spill No. 8904831, 38-15 Queens Boulevard, Queens; 16. Spill No. 8904151, 161-15 46th Avenue, New York; 17. Spill No. 8808987, 135-45 Cross Bay Boulevard, Queens; 18. Spill No. 8706272. 2052 Victory Boulevard, Staten Island. From now on, please submit all your future documentation (letters, reports, work plans, RAPs) related to these spill cases to my attention. Please note, that you should submit one hard copy of the document (report/work plan) and e-copy on a CD by regular mail. Please, do not submit large size documents via e-mail, since we have limited storage capacity, so it should be used only for correspondence. Feel free to contact me if you have any questions. Thank you. Sincerely, Ainura Doronova Environmental Engineer 1 Division of Environmental Remediation NYS Department of Environmental Conservation Region 2 (718) 482-6453 AD 08/20/2014 Received the following e-mail from Karen Waryas of EA&R: Ms. Doronova, This message is to inform you that the 2nd Quarter 2014 Project Status Reports for four Region 2 Sunoco sites have been mailed to your office. The sites included are: Spill No. 07-08451, 972 Remsen Avenue, Brooklyn; Spill No. 95-01327, 2701 Knapp Street, Brooklyn; Spill No. 98-08686, 188-06 Hillside Avenue, Hollis, Queens; Spill No. 99-09665, 175-33, Horace Harding Expressway, Flushing, Queens. As requested, both hard copies and a CD copy of the reports are included. Please do not hesitate to contact me with any questions and/or comments at (631) 447-6400, extension 134. Sincerely, Karen Waryas Project Manager Environmental Assessment and Remediations 631-447-6400 X 134' Will review. AD 09/25/2014: Reviewed the report. The report summarizes and processes all of the monitoring and sampling data collected during the April 2014 to June 2014 period. The depth to ground water under static conditions at this location ranges between 14.09 to 16.27 feet below grade. Groundwater flow direction, based on the United States Geological Services (USGS) water altitude map, is towards the southeast, towards Jamaica Bay. The bay is located approximately 1.5 miles from the site. During this monitoring period, no liquid phase hydrocarbons (LPH) were detected. Groundwater samples were collected from all accessible monitoring

wells on May 23, 2014. Samples were submitted to Eurofins Lancaster Laboratories Environmental, LLC for analysis of BTEX compounds and MTBE according to EPA Method 602. Prior to sampling, each of the wells was gauged for the depth to groundwater. GW data from May 2014 (in ppb) Wells: MW-1 MW-2 MW-3 MW-4 MW-5 MW-6 Total BTEX: 221 911 172 nd 1080 333 Four out of six wells indicated decrease in TBTEX concentratins. Well MW-4 was unchanged. The only well with showed increase in BTEX levels was MW-3. (from 60 ppb to 170 ppb). According to EA&R, the next report will be issued in October 2014, and will cover the reporting period of July 2014 to September 2014. AD 04/18/2014: Received monitoring reports for the 3rd and 4th quarters of 2014. Will review. AD 04/23/2015: DEC met with a Sunoco representative and Sunoco s consultants to discuss the current status of each Sunoco site, go over historical monitoring and recovery data, and discuss further actions to help expedite closure of the spills. DEC received updated remedial progress and monitoring reports. High-priority sites and potential spill closure candidates were discussed. Sunoco s consultants reported overall progress in reducing BTEX levels in soil and groundwater at the sites. It was agreed that reports recommending spill closure will be prepared for several sites. Also, on this meeting, 1st QMR for this site was submitted to DEC. AD 05/15/2015: Reviewed the 3rd QMR 2014 for the site. It states that groundwater samples were collected from all accessible monitoring wells on August 14, 2014. The depth to ground water under static conditions at this location ranges between 14.44 to 16.27 feet below grade. Groundwater flow direction, based on the United States Geological Services (USGS) water altitude map, is towards the southeast, towards Jamaica Bay. The bay is located approximately 1.5 miles from the site. During this monitoring period, no liquid phase hydrocarbons (LPH) were detected. GW data from August 2014 (in ppb) Wells: MW-1 MW-2 MW-3 MW-4 MW-5 MW-6 Total BTEX: 432 322 38 ND 2149 391 Three out of six sampled wells indicated decrease in TBTEX concentratins. The wells which showed increase in BTEX levels were MW-1 (from 221ppb to 432ppb), MW-5 (from 1080ppb to 2149ppb) and MW-6 (from 333ppb to 391ppb) ppb. Quarterly GW will continue at the site. AD 05/20/2015: Reviewed the 4th QMR 2014 for the site. It states that groundwater samples were collected from all accessible monitoring wells on November 19, 2014. The depth to ground water under static conditions at this location ranges between 14.44 to 16.27 feet below grade. Groundwater flow direction, based on the United States Geological Services (USGS) water altitude map, is towards the southeast, towards Jamaica Bay. The bay is located approximately 1.5 miles from the site. During this monitoring period, no liquid phase hydrocarbons (LPH) were detected. GW data from November 2014 (in ppb) Wells: MW-1 MW-2 MW-3 MW-4 MW-5 MW-6 Total BTEX: 544 3336 17 2 5570 NS Three out of five sampled wells indicated increase in TBTEX concentratins. Well MW-6 was not sampled. The wells which showed increase in BTEX levels were MW-1 (from 432ppb to 544 ppb), MW-2 (from 322ppb to 3336ppb) and MW-5 (from 2149 to 5570ppb) ppb. Quarterly GW will continue at the site. AD 06/02/2015: Reviewed the 1st QMR for the site. It states that groundwater samples were collected from all accessible monitoring wells on March 11, 2015. The depth to ground water under static conditions at this location ranges between 14.38 to 16.27 feet below grade. Groundwater flow direction, based on the United States Geological Services (USGS) water altitude map, is towards the southeast, towards Jamaica Bay. The bay is located approximately 1.5 miles from the site. During this monitoring

period, no liquid phase hydrocarbons (LPH) were detected. GW data from March 2015 (in ppb) Wells: MW-1 MW-2 MW-3 MW-4 MW-5 MW-6 Total BTEX: 1478 NS 29 NS 2661 834 Four out of six wells indicated increase in TBTEX concentrations. Wells MW-2 and MW-4 were not sampled. The wells which showed increase in BTEX levels were MW-1 (from 544 ppb to 1473 ppb) and MW-6 with 834 ppb. Quarterly GW will continue at the site. AD 08/20/2015: Received a second quarter 2015 monitoring report. Will review. AD 09/30/2015: Reviewed the 2nd quarter 2015 report. It states that groundwater samples were collected from all accessible monitoring wells on May 21, 2015. The depth to ground water under static conditions at this location ranges between 15.15 in MW-4 to 15.84 feet below grade in well MW-1. Groundwater flow direction, based on the United States Geological Services (USGS) water altitude map, is towards the southeast, towards Jamaica Bay. The bay is located approximately 1.5 miles from the site. During this monitoring period, no liquid phase hydrocarbons (LPH) were detected. GW data from May 2015 (in ppb) Wells: MW-1 MW-2 MW-3 MW-4 MW-5 MW-6 Total BTEX: 5,637 3,822 55 ND 1,563 412 Two out of six wells indicated sharp increase in TBTEX concentrations. The wells which showed increase in BTEX levels were MW-1 (from 544 ppb to 1473 ppb to 5637ppb) and MW-2 (from 3336 ppb to NS to 3822 ppb). Well MW-4 was ND, and wells MW-5 and MW-6 showed decrease in BTEX concentrations. Quarterly GW will continue at the site. Two of the site wells indicate high levels of BTEX. IRM are needed to expedite the spill cleanup. AD 11/17/2015: Received a project status report for the period of third quarter 2015. Will review. AD 12/15/2015: Reviewed the third quarter 2015 report. It states that groundwater samples were collected from all accessible monitoring wells on August 18, 2015. Samples were submitted to Eurofins Lancaster Laboratories Environmental, LLC for analysis of BTEX compounds and MTBE according to EPA Method 602. Prior to sampling, each of the wells was gauged for the depth to groundwater. The depth to ground water under static conditions at this location ranges between 15.15 in MW-4 to 15.84 feet below grade in well MW-1. Groundwater flow direction, based on the United States Geological Services (USGS) water altitude map, is towards the southeast, towards Jamaica Bay. The bay is located approximately 1.5 miles from the site. During this monitoring period, no liquid phase hydrocarbons (LPH) were detected. GW data from August 2015 (in ppb): Wells: MW-1 MW-2 MW-3 MW-4 MW-5 MW-6 Total BTEX: 5016 1026 466 0.2 302 143 GW data from May 2015 (in ppb): Total BTEX: 5637 3822 55 ND 1563 412 Four out of six wells indicated decrease in TBTEX concentrations (wells MW-1 from 5,637ppb to 5,016ppb, MW-2 from 3,822ppb to 1,026ppb, MW-5 from 1,536ppb to 302 ppb and MW-6 from 412ppb to 143ppb). The well which showed increase in BTEX levels was well MW-3 from 55ppb to 466ppb. Well MW-4 was ND. The most contaminated site well with high levels of BTEX is MW-1 at 5,016ppb. Quarterly GW will continue at the site. AD"

Site Description: Location: The 50,000 square foot (1.38 acre) site is located at 350 DeWitt Avenue, Brooklyn, NY in an urban area. The site is bordered by DeWitt Avenue and single-family residential units to the north, by Hinsdale Street to the east, by a one story industrial/manufacturing building to the south, and by Snediker Avenue and single- and multi-family residential units to the west. Site Features: The site is occupied by a 1 story manufacturing facility. There is asphalt-oaved parking along the east side of the site building. Current Zoning/Use(s): The site is zoned as M1-1, and is surrounded by industrial, commercial and residential uses. Historical Use(s): The Site is an industrial building that houses manufacturing of plumbing and lighting fixtures, bathroom accessories and hardware for commercial and residential markets. A former employee at Watermark reported that the company was illegally dumping industrial waste into the New York City sewer system. During the metal-plating process, waste water containing metals such as Copper, Zinc, Chromium, and Silver is generated. Proper disposal of the waste water requires a costly, multi-step process that ensures any solid toxic materials be removed by a regulated waste-hauler. Watermark instead disposed of the industrial waste water, which included the hazardous metals, through a hose inserted in a floor drain. NYCDEP obtained water samples from within the floor drain and the results showed high levels of metals including but not limited to Copper, Zinc, Chromium,

U000406087

and Silver. NYCDEP personnel noted that when they went to sample the floor drain, they encountered soil in the drain, suggesting that the drain is physically compromised and partially open to the underlying soil. Site Topography, Geology and Hydrogeology: Fill material is encountered to five feet bgs, underlain by layers of fine to medium silty sand and silt. Groundwater is encountered at about 10-12 feet bgs. In general, groundwater flow direction is southerly of the site. Not reported

Env Problem: Nature and Extent of Contamination: Information is based on the results of water samples collected by NYCDEP during the preliminary investigation of the site. TCLP lead was found at concentrations of up to 53.8 ppm and TCLP nickel was found at concentrations of up to 5.5 ppm. Analysis for total metals found cyanide at up to 107 ppm, lead at up to 500 ppm, chromium at up to 327 ppm, selenium at up to 372 ppm, nickel at up to 53.6 ppm, arsenic at up to 4.4 ppm, and barium at up to 124 ppm. The floor drains discharge line was traced in July 2012 and found to enter the main house trap and discharges to the municipal sewer on the northern side of the site. In September 2013, a preliminary site characterization was completed in accordance with the NYSDEC required scope of work. Work was completed within the time frame specified in the scope of work. Seven borings were completed along the drain line, and soil and groundwater samples were collected to determine subsurface conditions in this portion of the site. All samples were analyzed for VOCs and metals (total and dissolved). In general, fill material was encountered to five feet bgs, underlain by layers of fine to medium silty sand and silt. Groundwater was encountered at 10-12 feet bgs. No VOCs were detected in the soil samples above the 6 NYCRR Part 375 industrial SCOs. Only TCE exceeded the groundwater standard at one location (9.8 ug/l). No metals were detected in the soil samples above the industrial SCOs. Total metals in groundwater were generally above the standards, but dissolved metals were well below the standards. The exception to the groundwater results was iron, manganese and sodium, where results for dissolved metals were above the groundwater standards. This is typical for groundwater in this area. Based on these data results, the site classification was changed from P to N. Significant Threat: Based on the data results discussed above, it was determined that no significant threat exists at the site and no further action is warranted at this time.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013
Date Made Active in Reports: 10/03/2013
Number of Days to Update: 45

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

UTM Y (Meters):	4500236.0
Elevation:	15 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940597 BROOKLYN, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
KINGS, NY

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 360497 - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
BROOKLYN

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Pleistocene
Code: Qp (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

RECORD OF COMMUNICATION
Communication with: Tom Thorsen
On: 5/13/2016
Recorded By: Eileen Whitsett
<p>Summary of Communication:</p> <p>According to Tom Thorsen, President of Pinnacle Lift of NY, the Property occupant, no repairs are conducted on the premises and the facility operates primarily as a warehouse. Mr. Thorsen stated that to the best of his knowledge there are no fuel oil storage tanks currently at the Property. Mr. Thorsen noted that Pinnacle Lift of NY has occupied the Property for approximately 1.5 years (since late 2014).</p>

Customer Registration Form for Water and Sewer Billing

Property and Owner Information:

- (1) Property receiving service: BOROUGH: BROOKLYN BLOCK: 8131 LOT: 56
- (2) Property Address: 458 EAST 99TH STREET, BROOKLYN, NY 11212
- (3) Owner's Name: 458 EAST 99TH STREET, LLC
- Additional Name: _____

Affirmation:

Your water & sewer bills will be sent to the property address shown above.

Customer Billing Information:

Please Note:

- A. Water and sewer charges are the legal responsibility of the owner of a property receiving water and/or sewer service. The owner's responsibility to pay such charges is not affected by any lease, license or other arrangement, or any assignment of responsibility for payment of such charges. Water and sewer charges constitute a lien on the property until paid. In addition to legal action against the owner, a failure to pay such charges when due may result in foreclosure of the lien by the City of New York, the property being placed in a lien sale by the City or Service Termination.
- B. Original bills for water and/or sewer service will be mailed to the owner, at the property address or to an alternate mailing address. DEP will provide a duplicate copy of bills to one other party (such as a managing agent), however, any failure or delay by DEP in providing duplicate copies of bills shall in no way relieve the owner from his/her liability to pay all outstanding water and sewer charges. Contact DEP at (718) 595-7000 during business hours or visit www.nyc.gov/dep to provide us with the other party's information.

Owner's Approval:

The undersigned certifies that he/she/it is the owner of the property receiving service referenced above; that he/she/it has read and understands Paragraphs A & B under the section captioned "Customer Billing Information"; and that the information supplied by the undersigned on this form is true and complete to the best of his/her/its knowledge.

Record Close

Date Spill Closed: 06/28/2007

"Date Spill Closed" means the date the spill case was closed by the case manager in the Department of Environmental Conservation (the Department). The spill case was closed because either; a) the records and data submitted indicate that the necessary cleanup and removal actions have been completed and no further remedial activities are necessary, or b) the case was closed for administrative reasons (e.g., multiple reports of a single spill consolidated into a single spill number). The Department however reserves the right to require additional remedial work in relation to the spill, if in the future it determines that further action is necessary.

If you have questions about this reported incident, please contact the [Regional Office](#) where the incident occurred.

Instructions for Application for Records under FOIL

Descriptions of the bureaus and records they retain are as follows:

Agency Chief Contracting Office (ACCO): Contracts, Bid and Procurement Records
Bureau of Customer Services (BCS): Water Bills, Water Metering
Bureau of Environmental Compliance (BEC): Asbestos Control Program, Air Permits/Complaints, Noise Complaints/Inspections
Bureau of Environmental Design and Construction (BEDC): Design and Construction of Wastewater Treatment Plants, Water-Supply Related Projects and Infrastructure Projects
Bureau of Environmental Planning and Assessment (BEPA): SEQRA/CEQR and other Environmental Review-Related Records
Bureau of Police & Safety (BPS): Reports for Watershed Area, Law Enforcement Incidents, Right to Know, Hazardous Materials
Bureau of Water Supply (BWS): Watershed/Aqueduct/Reservoir Operations, Water Quality
Bureau of Water and Sewer Operations (BWSO): Water and Sewer Main Repair, Hydrants, Manhole Covers, Sewer Backup
Bureau of Wastewater Treatment (BWT): Industrial Pretreatment Program, Sewer Discharge Violations, Operation of Wastewater Treatment Plants
Human Resource Management (HRM): Personnel Records

- Please indicate whether you want to receive copies or want to inspect the records prior to copies being made.
- Please describe, with the greatest amount of detail possible, the type of records you are requesting.
- Include, if available and when applicable, complaint number(s), claim number(s), case caption and court index number for any litigation to which your request relates, contract numbers, addresses, specific time frames or date of incident/occurrence, name of document/form and account numbers.
- **Please DO NOT request information regarding more than one account, property, etc. Use a separate form for each request.**
- Please fill out and print the form.
- Please, either mail or fax the form to the DEP Records Access Officer at the address and number listed on the form. **DO NOT FAX AND MAIL THE FORM.**
- You will receive an acknowledgment of your request.
- When your request has been processed, you will be informed in writing, of the processing cost and payment instructions for the information supplied to you. The fee for copies is \$.25 per page for paper copies not exceeding 9 by 14 inches and the actual cost of reproduction for all other copies.

NEW YORK CITY ENVIRONMENTAL PROTECTION

Application for Records, Article 6 – New York State Public Officers Law, Freedom of Information Law (FOIL)

Complete Part I of this form. Please refer to instruction sheet when completing this form. If responsive records are located, you will be notified and informed of the required payment. Advance payment is required in check or money order payable to the City of New York before documents will be released. **Mail the completed application to:** Records Access Officer at NYC DEP, 59-17 Junction Blvd., 19th Fl., Flushing, NY 11373, **or fax to:** (718) 595-6543. **DO NOT FAX AND MAIL.**

PART I. APPLICATION – Check type of record(s) requested:

Appendix G: Qualifications of Environmental Professionals

Eileen Whitsett, Environmental Inspector

Years Experience: 12 years

Professional Summary:

Ms. Whitsett has more than 12 years of Environmental Industry experience, specifically in conducting and reviewing Phase I and Phase II environmental site assessments of multi-family residential, commercial and industrial properties within the New York Tri-State area for a wide range of financial clients, attorneys and real estate companies. In addition, Ms. Whitsett has worked in a supervisor role as an environmental professional overseeing Phase I Environmental site assessments on such properties throughout the United States. Assessments included limited and comprehensive surveys for asbestos, lead-based paint, lead-in-drinking water and radon gas emissions. She was responsible for review of final reports and QA/QC. Ms. Whitsett has also performed peer reviews on Phase I Environmental site assessments completed by other environmental firms.

In addition, Ms. Whitsett has five years of experience conducting and managing National Environmental Policy Act (NEPA) Land Use Screenings for various telecommunications companies within New Jersey and New York. Such projects included wetland permitting, endangered species mitigations and continuous interaction with the New York and New Jersey State Historic Preservation Offices, the New York Department of Environmental Conservation and New Jersey Department of Environmental Protection.

She also has worked on the management of, including obtaining proper permitting, underground storage tank installations, monitoring and removals. She has also managed subsurface investigations to determine the presence of contamination in soil and groundwater, prepared and reviewed written reports in formats preferred by respective state regulatory agencies.

Licenses and Certifications:

Asbestos Inspector, New York State, Certificate No. 07-17335

Specialized Education:

Asbestos Inspector, Big Apple Occupational School (BAOS), 2013

Education:

Eckerd College, St. Petersburg, FL
Bachelor of Science, Marine Sciences and Environmental Studies, 2000

Dale Lanier, PG, Senior Project Manager

*EFI Global of North Carolina, P.C.
9307 Monroe Road, Suite M, Charlotte, NC 28270*

*(704) 246-2420
Dale_Lanier@efiglobal.com*

Years Experience: 24

Professional Summary:

Mr. Lanier has more than 23 years of extensive environmental experience. He has managed and provided senior review for more than 1,000 Phase I ESAs and 500 Phase II subsurface investigations that were conducted on a nation-wide basis. He has prepared thousands of reports for regulatory agencies concerning subsurface investigations and corrective actions associated with contaminated properties. Additionally, he has supervised the closure of several hundred underground storage tanks, and has designed, constructed, and operated soil and ground water remediation systems. In his current position, Mr. Lanier manages Phase I Environmental Site Assessments and performs senior review for Phase I and Phase II investigations.

Licenses and Certifications:

Licensed Geologist, North Carolina, □1281
Professional Geologist, South Carolina, □1095
Professional Geologist, Georgia, □1102
Professional Geologist, Florida, □PG2516
Professional Geologist, Virginia, □2801 001013
Professional Geologist, Illinois, □196.001239

Project Experience:

National Banks □ New York, NY
Due diligence activities
Managed large due diligence portfolios of apartments, convenience stores, hotels, grocery stores, and oil-changing facilities throughout the United States. Provided senior review for Phase I Environmental Site Assessment Reports prepared during the portfolios.

Furniture Manufacturer - Hickory, NC
Assessment and Remediation Activities
Provided professional oversight for comprehensive investigations conducted as part of a real estate transaction involving four furniture manufacturing facilities. Designed, installed, and operated a remediation system to remove toluene from soil and ground water. Performed long-term monitoring and reporting to state regulatory agency.

National Bank □ Charlotte, NC
Assessment Activities
Managed and performed numerous Phase II investigations at bank properties throughout the southeastern USA as a part of due diligence activities. Also, provided senior review for these investigations.

Furniture Manufacturer □ Sumter, SC

Assessment and Remediation Activities

Performed extensive assessment and corrective actions at a furniture manufacturing facility related to releases of gasoline, diesel fuel, and #6 fuel oil. The assessment included the installation of 20 monitoring wells. The corrective actions consisted of soil excavation, the injection of oxygen-releasing compounds, and the construction of a free product recovery system. Performed long-term ground water monitoring and reporting to state regulatory agency.

Manufacturing Facility □ Conover, NC

Assessment and Remediation Activities

Supervised UST removals, completed comprehensive assessment activities, and performed corrective actions related to multiple releases of toluene at a manufacturing facility. Supervised the installation of soil vapor extraction, air sparging points, and recovery wells. Designed and installed product and vapor recovery systems. Performed long-term ground water monitoring and reporting to state regulatory agency.

Mandeep S. Sandhu, Sr. District Manager
Director of National Assessment Services

242 Old New Brunswick Road, Suite 414, Piscataway, NJ 08854

Office Ph: 732-629-7930

Mobile Ph: 646-372-9889

Email: Mandeep_Sandhu@efiglobal.com

Years Experience: 18

Professional Summary:

Mr. Sandhu has over 17 years of experience conducting and supervising the execution of environmental, industrial hygiene, engineering and other forensic services to a wide variety of industries including insurance companies, finance institutions, government entities and commercial property managers. Mr. Sandhu combines his strengths in business development and client service with his strong management skills focusing on quality, schedule and budget to satisfy the needs of a many stakeholders. He has experience conducting field investigations, reporting, and design as well as managing field staff in completing a wide range of work. Mr. Sandhu also has considerable experience managing large projects encompassing multiple facilities, including coordination of engineering catastrophe response during Hurricane Sandy.

With many years of experience in the due diligence consulting industry, Mr. Sandhu has conducted and managed Property Condition; Physical Needs; Seismic and Phase I and II Environmental Site Assessments and Construction Progress Monitoring and Cost Analysis of commercial, industrial and residential properties throughout the United States and Caribbean for a wide range of clients. As part of environmental investigations, he has performed and aided in indoor air quality (IAQ) assessments, geotechnical sub-surface explorations, groundwater well development, and remedial activity design and implementation. His current responsibilities include managing and developing client relationships from a defined list of key accounts, business development, and leadership for the successful execution of assignments. Mr. Sandhu has extensive knowledge of Fannie Mae DUS requirements, Freddie Mac environmental and engineering guidelines, Small Business Administration (SBA) protocol, conduit lending protocols, and ASTM International E-1527-13 and ASTM E 2018-08 standards.

Mr. Sandhu meets the definition of an Environmental Professional as defined in 312.10 of 40 CFR 312.

Licenses and Certifications:

Occupational Safety and Health Administration (OSHA) 40-Hour Basic Safety and Hazardous Materials Handler

ASTM Property Condition Assessment Training

AHERA Asbestos Inspector

AHERA Asbestos Management Planner

Project Experience:

National CMBS Lender – Retail Strip Centers – 25 retail strip centers in U.S.

Managed Phase I Environmental Site Assessments (ESAs) and Property Condition Assessments for 25 retail strip centers throughout the US as part of a \$175 million portfolio for financing purposes in 2015

Hurricane Sandy, Forensic Investigations

Managed numerous expedited catastrophe response engineering (structural, electrical, mechanical) and environmental (IAQ, microbial and subsurface contamination) investigations for numerous insurance claims between 2012 and 2013

National Portfolio Lender – Petroleum Wholesale – 26 gasoline service station in Southwest U.S.

Managed ESAs for 26 gasoline service stations throughout the southwest as part of a portfolio for financing purposes in 2011

International Hotel Management/Owner & Operator – WHG

Manage and oversee Phase I ESAs, acquisition level Property Condition Assessment (PCAs) and Seismic Evaluations for an international hotel management, owner/operator throughout the US whether it's for financing or acquisition level due diligence since 2011

International Lender – Pre-foreclosure/Acquisition Assessments

Manage and oversee Phase I ESAs, PCAs, Construction Plan & Cost Reviews and Construction Monitoring assignments for an international lender throughout the US since 2009

National CMBS Lender - Project Marlin – 42 Malls in U.S.

Managed CMBS scope of Phase I ESAs, PCAs and Seismic Evaluations of 42 regional malls throughout the U.S. as part of a portfolio acquisition in 10 business days in 2006.

National CMBS Lender - Project Xanadu – Secaucus, NJ

Managed Phase I ESA and third party environmental reviews for preliminary stages of Project Xanadu retail development in the Meadowlands Sports Complex in 2006.

National CMBS Lender - Project Aikman – 55 Commercial Facilities in U.S.

Successfully completed third party reviews of Phase I ESAs and PCAs of 55 sites (hotels, office/retail buildings, light industrial buildings throughout the U.S. as part of a portfolio refinance in six business days in 2006.

National/Regional Real Estate Development/Management Firms –Multi-family Properties throughout Continental U.S.

Completed CMBS, Fannie Mae DUS and/or Freddie Mac scope Phase I Environmental Site Assessments, Property Condition Assessments and Seismic Evaluations for acquisition purposes in five to 15 business days for various regional and national real estate developers and management firms varying from five sites to 45 sites throughout the U.S between 2005 and 2009.

Regional and National Lenders– Las Vegas, NV and Atlantic City, NJ

Managed ESA, PCA, Seismic evaluations of several large casino resorts in both cities between 2006 and 2007

Professional Experience:

EFI Global, Inc., National Client Manager, March 2009-Present; District Manager, January 2014-March 2014; Sr. District Manager & Director of National Assessment Services – East Region, April 2015 to Present

LandAmerica Assessment Corporation, Client Manager, July 2005-March 2009; Project Manager, held Jan 2005-July 2005

Aaron & Wright Technical Services, Inc., Project Manager, Feb 2001-Dec 2004

AquaTerra Assessment Services Corporation, Environmental Scientist/Project Manager, May 1998-Feb 2001

Staten Island University Hospital, Associate Counselor, 1996-1998; Environmental Services Technician, 1992-1996

City University of New York – College of Staten Island, Adjunct Lab Technician, 1996-1997

Specialized Education:

Due Diligence at Dawn Seminars, Environmental Data Resources, Inc., 2007, 2008, 2010, 2015

NJDEP Regulatory Training in Underground Storage Tanks, Rutgers University Office of Continuing Professional Education, May 2011
