Project: BCP Site No. C224262, Former Dutch Masters Paint & Varnish Co.	
Engineer: Matthew Carroll, P.E. Tenen Environmental, LLC	Field Technician: Sean Constant Tenen Environmental, LLC
Developer: Double U Development LLC	Foundation Contractor: Braga Corp.

<p>Work Activities Performed:</p> <p>1) Minor excavation to accommodate SOE installation.</p>
<p>Samples Collected (Since Last Report): None.</p>

<p>Air Monitoring (Since Last Report): CAMP graphs are included below. No VOC exceedances were noted.</p>
--

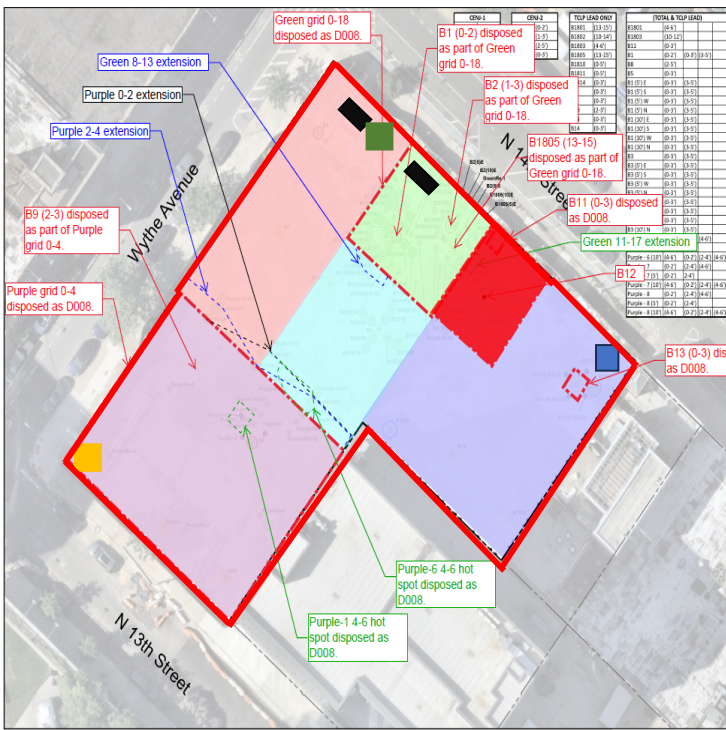

<p>Problems Encountered: A momentary particulate exceedance was noted on the downwind CAMP station at approximately 9:40 AM due to human interference (touching the sampling inlet) while adjusting the station. Soil disturbance activities were not occurring onsite at the time of the exceedance. The perimeter DustTrak experienced connectivity issues at approximately 1:15 PM. The onsite field technician will troubleshoot the issue.</p>
--

<p>Planned Work Activities for Next Day/Week:</p> <p>SOE installation will continue. Continue bulk excavation and offsite disposal of soil.</p>

<p>Air Monitoring (Since Last Report): CAMP graphs are included below. No particulate exceedances were noted.</p>
<p>Problems Encountered: The downwind DustTrak experienced connectivity issues upon mobilization. The onsite field technician troubleshot and resolved the issue by approximately 9:00 AM. Elevated particulate concentrations were not noted on the perimeter or upwind CAMP stations throughout the day. A VOC exceedance was noted on the perimeter CAMP station at approximately 8:45 AM due to an open canister of diesel placed in close proximity to the station. The canister of diesel was moved away from the station and VOC concentrations returned to normal within a few minutes.</p>
