

(Fact Sheet Begins Next)

## Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

**You must sign up for the DER email listserv:**

[www.dec.ny.gov/chemical/61092.html](http://www.dec.ny.gov/chemical/61092.html)

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

### Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

**If “paperless” is not an option for you**, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Environmental  
Conservation**

## Where to Find Information

Access project documents through the  
DECinfo Locator

<https://www.dec.ny.gov/data/DecDocs/C224287/>  
and at these location(s):

### **Brooklyn Public Library - Greenpoint Branch**

107 Norman Avenue  
Brooklyn, NY 11222  
(718) 389-4394

### **Brooklyn Public Library - Williamsburg Branch**

240 Division Avenue  
Brooklyn, NY 11211  
(718) 302-3485

### **Brooklyn Community Board 1**

435 Graham Avenue  
Brooklyn, NY 11211  
(718) 389-0009  
[bk01@cb.nyc.gov](mailto:bk01@cb.nyc.gov)

## Who to Contact

Comments and questions are welcome and  
should be directed as follows:

### **Project-Related Questions**

Bryan Wong, Project Manager  
NYSDEC  
47-40-21<sup>st</sup> Street, LIC, NY 11101  
(718) 482-4905  
[yukylin.wong@dec.ny.gov](mailto:yukylin.wong@dec.ny.gov)

### **Project-Related Health Questions**

Stephen Lawrence  
NYSDOH  
Empire State Plaza,  
Corning Tower Rm. 1787  
Albany, NY 12237  
(518) 402-0450  
[beeji@health.ny.gov](mailto:beeji@health.ny.gov)

# FACT SHEET

**Brownfield Cleanup Program**

**Former NuHart East Site**

**22-32 Clay St. & 67-93 Dupont St.  
Brooklyn, NY 11222**

**SITE No. C224287**

**NYSDEC REGION 2**

**October 2023**

## Cleanup Action Completed at Brownfield Site

Action has been completed to address the contamination related to the Former NuHart East site ("site") located at 22-32 Clay Street and 67-93 Dupont Street, Brooklyn, NY under New York State's Brownfield Cleanup Program (BCP). Please see the map for the site location.

Cleanup activities were performed by Dupont Street 1 LLC, and Dupont Street Owner 2 LLC ("applicants") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). The applicants have submitted a draft Final Engineering Report (FER) for NYSDEC review which states that cleanup requirements have been or will be achieved to fully protect public health and the environment for the proposed site use.

- Access project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C224287/>.
- The documents also are available at the location(s) identified at left under "Where to Find Information."

**Highlights of the Site Cleanup:** The following activities have been or will shortly be completed to achieve the remedial action objectives:

- Installation of a support of excavation (SOE) system with steel sheet piles to facilitate remedial excavation;
- Excavation and off-site disposal of contaminated soil to a depth of: approximately 8 feet below surface grade (ft bsg) across the majority of the site; approximately 16 ft bsg in the northern portion of the site; approximately 6 ft bsg in the southeast portion of the site; and approximately 10 ft bsg in one localized area in the center of the site;
- Collection and analysis of post-remedial soil samples to evaluate the effectiveness of the remedy;
- Implementation of soil erosion, pollution, and sediment control measures in compliance with applicable laws and regulations;
- Removal of underground storage tanks (USTs) and collection and analysis of post-remedial soil samples at the base and sidewalls of each tank;
- Installation of a temporary negative pressure enclosure system (remediation tent) in the northern portion of the site to facilitate the excavation of petroleum contaminated soil and USTs;
- Dewatering, characterization, and treatment of water accumulated in excavation prior to discharge;

# BROWNFIELD CLEANUP PROGRAM

- Appropriate off-site disposal of material removed from the site in accordance with federal, state, and local regulations for handling, transport, and disposal;
- Completion of a Soil Vapor Intrusion (SVI) Evaluation following completion of remedial excavation activities; and
- Implementation of a Construction Health and Safety Plan and Community Air Monitoring plan during all ground intrusive activities.

**Next Steps:** When NYSDEC approves the FER, it will be made available to the public (see "Where to Find Information"). NYSDEC then will issue a Certificate of Completion (COC) that will be announced in a fact sheet. The applicant would be able to redevelop the site after receiving a COC. In addition, the applicant will be eligible for tax credits to offset a portion of the costs of performing cleanup activities and for redevelopment of the site.

**Site Description:** The Former NuHart East BCP site, identified as Block 2487, Lot 18 (Formerly lots 17, 18, 20, 21 and 57) on the New York City tax map, is 1.102-acres in size. The site is bounded by Clay Street followed by industrial and manufacturing buildings to the north, residential apartment buildings to the east, Dupont Street followed by residential apartment buildings and a senior living facility to the south, and the Former NuHart Plastic Manufacturing site, an inactive hazardous waste site, to the west. Prior to remediation the site was developed since at least 1887 and was used for metalworking, manufacturing of light fixtures, soaps, and water proofing materials through 1950. From 1950 until 2004, the site and associated manufacturing buildings to the west were used by the NuHart Company for the production, storage, and shipping of plastic and vinyl products.

The proposed redevelopment plan includes construction of a 5-story residential building with an affordable housing component. Building construction is ongoing at the site.

Additional site details, including environmental and health

assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C224287) at:

<https://www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3>

**Brownfield Cleanup Program:** New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:
