1.0 INTRODUCTION

Castleton Environmental Geologic Services, DPC (Castleton), has prepared the following New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup Program (BCP) Application on behalf of the Requestor (CR 17 LLC) for the property located 291 Richardson Street, Brooklyn, New York (the site).

Castleton serves as the Requestor's environmental consultant and meets the definition of a Qualified Environmental Professional as defined at 6 NYCRR 375-1.2(ak) and DER-10 paragraph 1.3(b)49.

The Requestor is a corporate entity authorized to conduct business in New York State (NYS). A printout of the entity and member/ownership information for CR 17 LLC from the NYS Department of State (DOS) database are provided as Appendix A.

The information contained in the following sections supplements the completed BCP Application Form which accompanies this document.

2.0 PROJECT DESCRIPTION

The project site is located at 291 Richardson Street, in the Greenpoint/East Williamsburg Industrial section of Brooklyn, New York (Figure 1). Identified as Block No. 2849 Lot 120, the site is located on the north site of Richardson Street and measures approximately 0.08 acres in size. One, single story, 2,375 square foot building occupies the property. The building was constructed circa 1970 and occupies the majority of the parcel with minimal areas of exposed grounds or landscaped areas. A site plan is included as Figure 2.

The 0.08 acre site is part of a larger, NYSDEC Class 2 Inactive Hazardous Waste Site known as the Former Goodman Brothers Steel Drum Company (Former Goodman Bros.) site. The Former Goodman Bros. site, listed as NYSDEC Site Number 224211, is located on the south side of Division Place between Kingsland and Debevoise Avenues and is identified as 18 Division Place on the NYSDEC Environmental Site Remediation database.

The purpose of the project is to:

- Characterize site soil, soil vapor and groundwater quality,
- Remediate on-site contamination as a Volunteer under the NYSDEC BCP,
- Delist the site from the State Inactive Hazardous Waste Site Registry, or
- Administratively separate the site from the Former Goodman Bros. site, and
- Position the site for redevelopment.

In addition, the applicant will not seek a determination of the eligibility of the site for tangible property tax credits.

2.1 Anticipated Schedule

The project is entering the BCP at the investigation phase and the anticipated start date of the remedial program is May 1, 2019. The anticipated date of being granted a Certificate of Completion by the NYSDEC is December 31, 2020. A milestone schedule is shown below.

Milestone Schedule

Milestone	Duration (days)	Date
Execution of BCP Agreement	0	May 1, 2019
Community Participation Plan	20	May 21, 2019
Remedial Investigation Work Plan	30	May 31, 2019
Remedial Investigation	120	Sep 28, 2019
Remedial Investigation Report	60	Nov 27, 2019
Remedial Action Work Plan	45	Jan 11, 2020
Implementation of Remedy	90	Apr 10, 2020
Remedial Action Report	45	May 25, 2020
Environmental Easement (if required)	60	Jul 24, 2020
Site Management Plan	45	Sep 7, 2020
Final Engineering Report	45	Oct 22, 2020
Certificate of Completion	70	Dec 31, 2020

There are currently no redevelopment plans established for the site; however, it is anticipated that the future redevelopment will be consistent with the current zoning and land use requirements for the area and goals of the BCP.

3.0 PROPERTY'S ENVIRONMENTAL HISTORY

Investigations performed at the Former Goodman Bros. site have identified contaminants of concern at concentrations which exceed NYSDEC standards and cleanup objectives in both groundwater and soil. The site makes up a portion of the Former Goodman Bros. site, in the vicinity of the former wastewater treatment facility and the area identified by the NYSDEC as Area of Concern No. 2, Above Ground Storage Tanks. A Site Plan is included as Figure 2.

The primary contaminants of concern include VOCs, most notably tetrachloroethylene (PCE) and related breakdown products, 1,1,1 trichloroethane (TCA), benzene, toluene, ethylbenzene and xylene (BTEX) and polychlorinated biphenyls (PCBs). Many of these VOCs have also been detected soil vapor samples.

More detail regarding the contaminant profile for the Former Goodman Bros. site can be found in the site record from the NYSDEC Environmental Site Remediation Database included as Appendix B.

While soil and groundwater impacts have been identified across the Former Goodman Bros. site, limited data exists for the 291 Richardson Street site. Data from a recent Phase II ESA as well as information extracted from previous investigations performed on the site are summarized below.

3.1 Phase II Environmental Site Assessment – December 2018

A Phase II ESA was performed by Castleton in December 2018 in response to a Phase I ESA that identified the site's former industrial use, as well as its relationship to the adjacent Former Goodman Bros. site, as Recognized Environmental Conditions (RECs) requiring further evaluation.

The Phase II ESA consisted of the performance of a subsurface quality assessment which included a geophysical survey, soil boring program and the collection and laboratory analysis of select soil samples.

The geophysical survey identified no anomalies indicative of underground storage tanks (USTs). A utility hatch located in the driveway of the site was investigated and determined to serve as a vault for accessing the site's sanitary sewer lines which connect to the municipal system.

The soil boring program consisted of six soil borings performed using direct push technology (Geoprobe). Soil samples were collected continuously from each boring and logged and field screened with a photoionization detector (PID) for the presence of volatile organic compounds (VOCs). PID readings ranged from a low of 0.0 parts per million (ppm) to a high 1,045 ppm. Soil was observed to consist of silty sand and clayey sand. Groundwater was not encountered.

A total of four soil samples were laboratory analyzed for:

- VOCs by EPA Method 8260
- Semi-VOCs (SVOCs) by EPA Method 8270
- TAL Metals by EPA Method 6010/8483

Soil analytical results reported concentrations of VOCs including 1,1-dichloroethane, 1,2,4-trimethylbenzene, acetone, cis-1,2-dichloroethylene, ethyl benzene, methylene chloride, toluene, trichloroethylene, vinyl chloride, and xylenes above NYSDEC Part 375 Unrestricted Use Soil Cleanup Objectives (SCOs), but below Restricted Residential Use SCOs. One VOC, tetrachloroethylene (PCE), was reported above Restricted Residential SCOs, but below Commercial SCOs in one of the four samples. All other VOCs were reported as non-detect or below Unrestricted Use SCOs.

Soil analytical results reported concentrations of SVOCs including 1,2-dichlorobenzene, chrysene, indeno(1,2,3-cd)pyrene, and phenol above Unrestricted Use SCOs, but below Restricted Residential SCOs. All other SVOCs were reported as non-detect or below Unrestricted Use SCOs.

Soil analytical results reported concentrations of metals including barium, chromium, copper, nickel, and zinc above Unrestricted Use SCOs, but below Restricted Residential SCOs. Cadmium and lead were reported above Restricted Use SCOs. Mercury was reported above Commercial Use SCOs, but below Industrial Use SCOs in one of the four samples analyzed. All other metals were reported as non-detect or below Unrestricted Use SCOs.

The soil boring locations are illustrated on Figure 2.

Soil boring locations and reported soil chemical concentrations in excess of applicable SCO soil are depicted on Figure 3.

The data set is also summarized on Table 1 which follows the text of this report.

An electronic copy of the December 2018 Phase II ESA is provided as Appendix C.

3.2 Draft Facility Closure Plan - April 2003

A Facility Closure initiative was performed by Goodman Brothers Steel Drum, Inc. in 2003 as part their efforts to close out the facility Resource Conservation and Recovery Act (RCRA) permit(s) related to the site operations. An April 2003 Draft Facility Closure Plan prepared by Gannett Fleming Engineers and Architects, PC included a limited subsurface investigation which consisted of nine soil borings and the collection and laboratory analysis of soil and groundwater samples. Two of the nine soil borings were performed on the 291 Richardson Street property. One soil boring was performed in the northern portion of the site and the second near the center. These soil borings are illustrated Figure 3.

Three soil samples collected from these two borings were analyzed for:

- VOCs
- Semi-VOCs
- Metals
- PCBs

The April 2003 report compared the resulting analytical data to the Technical and Administrative Guidance Memorandum (TAGM) #4046 which was the prevailing criteria at the time. The dataset has been compared to the current Part 375 SCOs for the discussion below.

VOCs concentrations in the three soil samples analyzed did not exceed Unrestricted Use SCOs.

SVOCs concentrations in the three soil samples analyzed did not exceed Unrestricted Use SCOs.

Metals, including chromium, copper, lead, mercury and zinc were reported at concentrations in excess of Unrestricted Use SCOs but below Restricted Residential in one or more samples.

PCB concentrations were generally below Unrestricted Use SCOs with the exception of two samples which reported a PCB concentration above Unrestricted Use SCOs, but below Industrial Use SCOs.

The soil boring locations are illustrated on Figure 2.

Soil boring locations and reported soil chemical concentrations in excess of applicable SCO are depicted on Figure 3.

The data set is also summarized on Table 1.

An electronic copy of the April 2003 Draft Facility Closure Plan is provided as Appendix C.

4.0 PROPERTY INFORMATION

Information pertaining to the site and surrounding area is described in the following sections.

The sites tax parcel information is depicted on Figure 4 and a USGS 7.5 Minute Quadrangle Map is provided as Figure 5.

4.1 Property Description

The site is located at 291 Richardson Street, Brooklyn, New York. The site consists of a rectangular-shaped parcel with an estimated area of 0.08 acres.

The site location is depicted on Figure 1 and surrounding properties are depicted on Figure 6.

4.2 Site Features

The site is improved with a 1-story commercial building with no basement. This 2,375 square foot building is presently unoccupied. A review of the New York City Building Department property profile overview indicated that the building was constructed circa 1970. The building occupies the majority of the parcel with minimal areas of exposed grounds or landscaped areas bordered by municipal walkways and rights-of-way.

Site features are depicted on Figure 2.

4.3 Current Zoning and Land Use

The site and surrounding area is zoned as M1-1, which permits industrial and manufacturing uses. The site is currently unoccupied. The surrounding parcels are currently used for a combination of commercial and industrial purposes. The nearest residential area (R-6B) is located approximately 300-feet west of the site, on the west side of Kingsland Avenue.

Based upon review of the NYSDEC Environmental Zone (En-zone) map, the site is not in an En-zone.

4.4 Past Use of the Site

The site was historically used for drum storage between at least 1977 and 2007. This use is presumed to be associated with the Former Goodman Bros. operation. No other site uses are known.

4.5 Site Geology and Hydrogeology

The near surface geology in the Greenpoint portion of the Brooklyn is similar to other heavily developed areas found in this area. The site and surrounding area surficial geology is generally considered “urban land” and is characterized by a non-homogenous distribution of soil and fill types. Excavation and backfilling for building foundations, utility conduits, railway systems, and other construction has resulted in a varied subsurface profile. No bedrock outcroppings are present at the site.

Based upon soil boring data collected during the 2018 Phase II ESA groundwater at the site was not encountered up to a depth of 15-feet below ground surface. This is consistent with the 2013 Long Island Depth to Water Viewer maintained by the United States Geological Survey (<https://ny.water.usgs.gov/maps/li-dtw13/>) which reports groundwater at a depth of 33 feet below ground surface. Site geology consisted of silty and clayey sands. The nearest body of water is Newtown Creek, located approximately 0.75 mile to the east. Groundwater flow is therefore estimated to be towards the east or southeast.

5.0 REQUESTOR AND OWNER INFORMATION

The current property owner of the site is CR 17 LLC who is the Requestor to this BCP application. There are no known relationships between the Requestor and previous property ownership and/or operators except as noted. CR 17 LLC acquired the property in October 2017.

CR 17 LLC is a New York limited liability company. The members of Requestor are:

Member Name	Member Address
Marshall Kesten	33 Trapping Way, Pleasantville, NY 10570
MSK Realty Holdings, LLC	1036 Manhattan Avenue, Brooklyn, NY 11222

Previous property owners and operators were identified from Deed records obtained using the Automated City Register Information System (ACRIS) and City Directories. The records are summarized on the following table (Table 2).

ACRIS and City Directory records are contained in Appendix D.

6.0 ELIGIBILITY INFORMATION

Information pertaining to the Requestor and property eligibility is provided in the following sections.

6.1 Requestor Eligibility Information

The Requestor, CR 17 LLC has no enforcement actions, orders for the investigation, removal, or remediation, or outstanding claims by the NYSDEC for the site. In addition, the Requestor has not been determined in an administrative, civil, or criminal proceeding in violation of Environmental Conservation Law Article 27 Title 14, been denied entry to the BCP, been found in civil proceedings or convicted criminally to have committed negligent acts involving the handling, storage, treating, disposing, or transportation of contaminants, or other similar acts which would preclude their participation in the BCP.

6.2 Requestor's Status

Pursuant to ECL § 27-1405(1), requestor is properly designated as a Volunteer because its liability will arise solely from its ownership acquired after the disposal/discharge of contamination and because it has taken and will take reasonable steps to (i) stop any continuing release, (ii) prevent any threatened future release, and (iii) prevent or limit human, environmental, or natural resource exposure to any previously released contamination. The Requestor became owner of the property commencing in October 26, 2017. The Requestor has had no prior involvement or relationships with previous owners or operators of the site during the time of the release of hazardous chemicals to site soil and groundwater.

6.3 Proof of Site Access

The Requestor's relationship to the property is owner therefore proof of site access is not applicable.

A signed Consent Order of the Manager of CR 17 LLC is provided as Appendix E to confirm the authority of the Requestor to bind the entity. Deed records demonstrating proof of site ownership is also included as Appendix E.

6.4 Property Eligibility Information

The site is currently listed as a NYSDEC Class 02 Inactive Hazardous Waste Site (Site Number: 224211), as part of the Former Goodman Bros. site. The Former Goodman Brothers Steel Drum Company began operations in 1909 as a re-conditioner and recycler of used steel drums for re-

use or disposal. The NYSDEC first became involved with Goodman Brothers during a Resource Conservation and Recovery Act (RCRA) inspection conducted in September 1982. The company went out of business in June 2002 and since the operation ended, Goodman Brothers entered one consent order with the United States Environmental Protection Agency (USEPA) in 1983, and two consent orders with the NYSDEC in 1987 and 2003. In February 2003, a limited subsurface investigation was performed at the Former Goodman Bros. site. During the summer of 2011, the NYSDEC performed a characterization of the Former Goodman Bros. site as part of a plume track-down effort (Meeker Avenue Plume Trackdown, NYSDEC Site ID No. 224121).

At the time of the consent orders, Goodman Brothers agreed to pay penalties in the overall amount of \$28,000 for numerous violations. Current information related to the previous owners and/or operators of the property and their financial viability, including bankruptcy filing and corporate dissolution circumstances are unknown.

7.0 CONTACT LIST INFORMATION

Citizen participation is required at the onset and during the remedial process as part of the BCP. Initially, a site contact list must be prepared, and include at a minimum, certain local officials, adjacent property owners and residents, the public water supplier, and administrators of nearby schools and day care facilities.

A site contact list in accordance with Department of Environmental Remediation (DER)-23 / Citizens Participation Handbook for Remedial Programs is included as Appendix F.

8.0 LAND USE FACTORS

8.1 Current Site Use

The site was last occupied in September 2018 by Windmill Studios, a film and photo studio. The site was vacated shortly thereafter and is currently unoccupied. Industrial operations related to the Former Goodman Bros. site ceased in June 2002 and drum storage is reported to have ceased in 2007.

8.2 Post Remediation Site Use

There are currently no redevelopment plans for the site; however, it is anticipated that the future redevelopment will be consistent with the current zoning and land use requirements for the area and goals of the BCP. Current historical and/or recent development patterns support the anticipated future use of the site.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Castleton Environmental, to the best of its knowledge and belief, possesses the specific qualifications based on education, training, and experience to meet the definition of Qualified Environmental Professional as defined at 6 NYCRR 375-1.2(ak) and DER-10 paragraph 1.3(b)49.

Site Document Repository

Name: Brooklyn Public Library - Leonard Branch

Address: 81 Devoe Street
Brooklyn, NY 11211

Site Description

Location: The 0.67 acre site is located in the Greenpoint/East Williamsburg Industrial Area section of Kings County (Borough of Brooklyn, New York City). The site is located on the south side of Division Place between Kingsland and Debevoise Avenues. **Site Features:** The site is mostly covered with one-story buildings, with a storage yard located on the south side along Richardson Street. **Current Zoning and Land Use:** The site is zoned for manufacturing. The site is currently used by a furniture manufacturing company. Numerous commercial, industrial, and residential properties surround the site. **Past Use of the Site:** Goodman Brothers began operations in 1909 as a re-conditioner and recycler of used steel drums for re-use or disposal. The Department's initial involvement with the facility was a RCRA inspection conducted in September 1982, as the company was a large quantity generator of hazardous waste above a sole-source aquifer. The company went out of business in June 2002. During the last 20 years of its operation, Goodman Brothers entered into one consent order with the USEPA (1983), and two consent orders with the Department (1987 and 2003), and agreed to pay penalties in the overall amount of \$28,000 for numerous violations. In February 2003 a limited subsurface investigation was performed at the site; a total of nine soil borings were installed with soil samples collected from all nine borings and groundwater samples collected at four locations. The Department began a Site Characterization in this area during the Summer of 2011 as part of a plume trackdown investigation (Meeker Avenue Plume Trackdown, DEC Site ID No. 224121). **Site Geology and Hydrogeology:** The site is underlain by a sand/silty sand unit (~15-35' thick), a discontinuous sand/gravel unit within the sand/silty sand unit (~5' thick), a discontinuous clayey silt unit within the sand/silty sand unit (~5' thick), and a sand unit below. Groundwater is

approximately 15-20' below grade in the immediate vicinity of the site, and appears to be a perched unit. Groundwater below the site flows toward the east in the direction of Newtown Creek (~3,600' away).

Contaminants of Concern (Including Materials Disposed)

Contaminant Name/Type

lead
1,1,1-trichloroethane
toluene
xylene (mixed)
PCB aroclor 1260
tetrachloroethene (PCE)

Site Environmental Assessment

Nature and Extent of Contamination: - Groundwater The primary contaminants of concern at the site are tetrachloroethene (PCE) and its daughter compounds (trichloroethene, cis-1,2 dichloroethene and vinyl chloride); 1,1,1, trichloroethane (1,1,1 TCA); BTEX compounds (benzene, toluene, ethylbenzene, and xylene); and PCBs. These compounds have been found well above their respective Part 703.5 Class GA standards (shown in parenthesis). PCE has been found up to 30,000 ppb (5 ppb); trichloroethene (TCE) up to 2,800 ppb (5 ppb); cis-1,2 dichloroethene (DCE) up to 140,000 ppb (5 ppb); vinyl chloride up to 2,300 ppb (2 ppb); 1,1,1-TCA up to 15,000 ppb (5 ppb); benzene up to 2,400 ppb (1 ppb); toluene up to 54,000 ppb (5 ppb); ethylbenzene up to 2,400 ppb (5 ppb); total xylenes up to 12,100 ppb (5 ppb); and PCBs (Arochlor-1260) up to 940 ppb (0.09 ppb). All the contaminants listed above (except PCBs) have migrated off-site. - Soil Numerous compounds have been found in excess of their unrestricted use soil cleanup objective (shown in parenthesis). PCE has been found up to 260 ppm (1.3 ppm); TCE up to 140 ppm (0.47 ppm); DCE up to 70 ppm (0.25 ppm); 1,1,1-TCA up to 22 ppm (0.68 ppm); benzene up to 13 ppm (0.06 ppm); toluene up to 520 ppm (0.7 ppm); ethylbenzene up to 88 ppm (1 ppm); total xylenes up to 368 ppm (0.26 ppm); PCBs up to 80 ppm (0.1 ppm); lead up to 1,300 ppm (63 ppm); and mercury up to 240 ppm (0.18 ppm). **Significant Threat:** The site poses a significant environmental threat due to ongoing releases of PCE (and its breakdown products), BTEX compounds, and PCBs from source areas into soil and groundwater.

Site Health Assessment

Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential for soil vapor intrusion in on-site and off-site structures exists and should be evaluated and may need to be evaluated for off-site structures.

1.0 INTRODUCTION

Castleton Environmental Geologic Services DPC (Castleton) has prepared the following Phase II Environmental Site Assessment (ESA) report to document the findings of the subsurface investigation performed at 291 Richardson Street, Brooklyn, New York (the site). The scope of work performed was based upon the findings and recommendations contained in the Phase I ESA prepared by Middleton Environmental Inc. (MEI) dated September 30, 2018.

The objective of this investigation was to determine if contamination from past usage as drum storage has impacted the subsurface.

This objective was met through the performance of a subsurface quality assessment which consisted of a geophysical survey and the collection and laboratory analysis of soil samples.

2.0 SITE BACKGROUND

The site is located at 291 Richardson Street, Brooklyn, New York (Figure 1). The site consists of a rectangular-shaped parcel with an estimated area of 0.082 acres. The site is improved with a 1-story commercial building with no basement. This 2,375 square foot building is occupied by one (1) commercial tenant (Windmill Studios). A review of the New York City Building Department property profile overview indicated that the building was constructed circa 1970. The building occupies the majority of the parcel with minimal areas of exposed grounds or landscaped areas bordered by municipal walkways and right-of-ways.

The Phase I ESA identified the following Recognized Environmental Conditions (RECs):

- Historic Sanborn Fire Insurance Maps indicate the site was used for drum storage between at least 1977 and 2007. This use is presumed to be associated with the north adjoining cooperage, at 18 Division Place, site which is listed as a State Hazardous Waste site based on known significant contamination.

Based on the historic use of the site as drum storage, MEI recommended that a Phase II ESA be conducted to determine if the historic use has had an adverse impact on the subsurface.

3.0 PHASE II ESA FIELD INVESTIGATION

The following scope of work was completed to assess subsurface conditions in relation to the suspect UST and site operations.

Task	Objective
Geophysical Survey	Identify subsurface anomalies indicative of underground storage tanks or drums.
Soil Sampling	Characterize site soil quality related to historic usage of the site.

On-site work was completed on December 27, 2018. Sample collection locations are depicted on Figure 2.

3.1 Geophysical Survey

A geophysical survey was performed to identify evidence of subsurface anomalies indicative of underground storage tanks or drums, trace drainage piping, and to clear utilities and other subsurface obstructions prior to intrusive activities commencing. The survey was performed using a variety of remote sensing equipment/methods including a magnetometer to identify ferrous metallic objects, ground penetrating radar (GPR) to identify changes in soil density and a pipe locating device to trace piping runs. The geophysical survey was performed by Delta Geophysics, Inc. of Catasauqua, Pennsylvania.

A utility hatch located in the driveway of the site was traced to connect to the on-site sewer lines which ran east to west.

No other anomalies of concern were identified during the geophysical survey.

3.2 Soil Investigation

Soil borings were advanced to assess soil conditions at the site related to the historic use of the site. Soil borings were advanced with direct push technology (Geoprobe®) by Coastal Environmental Solutions, Inc of Medford, New York.

Six soil borings were advanced throughout the site to obtain representative coverage. Soil borings SB01 and SB03 through SB06 were installed to twenty feet below grade. SB02 was installed to fifteen feet below grade where refusal was encountered. Additionally, one soil sample, UH01, was collected from within the utility hatch.

Soil samples were collected continuously from each boring location, logged and field screened with a photoionization detector (PID) for the presence of volatile organic compounds (VOCs). PID readings ranged from 0.0 parts per million (ppm) in SB03, SB05 and SB06 to 1,045 ppm in SB01. Soil was observed to consist of silty sand and clayey sand. Groundwater was not encountered during this investigation.

Soil boring logs are provided as Appendix A.

Two soil samples were retained for laboratory analysis from boring SB01, and one soil sample was retained from SB04 and within the utility hatch (UH01):

Boring	Soil Sample Interval
SB01	0-2 feet
SB01	18-20 feet
SB04	2-4 feet
UH01	0-1 feet

Soil samples were placed into laboratory supplied glassware and submitted under chain of custody to York Analytical Laboratories of Stratford, Connecticut a New York State Department of Health (NYSDOH) ELAP certified laboratory. The soil samples were analyzed for:

- Volatile organic compounds (VOCs) by EPA Method 8260
- Semi-Volatile organic compounds (SVOCs) by EPA Method 8270
- TAL Metals by EPA Method 6010/8483

4.0 ANALYTICAL RESULTS AND DATA DISCUSSION

Soil quality analytical results were compared to NYSDEC Part 375 Soil Cleanup Objectives (SCOs).

Soil analytical results reported concentrations of VOCs including 1,1-dichloroethane, 1,2,4-trimethylbenzene, acetone, cis-1,2-dichloroethylene, ethyl benzene, methylene chloride, toluene, trichloroethylene, vinyl chloride, and xylenes above Unrestricted Use SCOs, but below Restricted Residential Use SCOs. One VOC, tetrachloroethylene (PCE), was reported above Restricted Residential SCOs, but below Commercial SCOs in one of the four samples. All other VOCs were reported as non-detect or below Unrestricted Use SCOs.

Soil analytical results reported concentrations of SVOCs including 1,2-dichlorobenzene, chrysene, indeno(1,2,3-cd)pyrene, and phenol above Unrestricted Use SCOs, but below Restricted Residential SCOs. All other VOCs were reported as non-detect or below Unrestricted Use SCOs.

Soil analytical results reported concentrations of metals including barium, chromium, copper, nickel, and zinc above Unrestricted Use SCOs, but below Restricted Residential SCOs. Cadmium and lead were reported above Restricted Use SCOs. Mercury was reported above Commercial Use SCOs, but below Industrial Use SCOs in one of the four samples analyzed. All other metals were reported as non-detect or below Unrestricted Use SCOs.

A summary table and the complete analytical report from the laboratory is included in Appendix B.

5.0 CONCLUSIONS AND RECOMMENDATIONS

Castleton has prepared this Phase II ESA report to document the findings of the subsurface investigation performed at 291 Richardson Street, Brooklyn, New York. The scope of work performed was based upon the findings and recommendations contained in the Phase I ESA prepared by MEI dated September 30, 2018.

The objective of this investigation was to determine if contamination from past usage as drum storage has impacted the subsurface.

This objective was met through the performance of a subsurface quality assessment which consisted of a geophysical survey and the collection and laboratory analysis of soil samples.

Six soil borings were advanced. Four soil samples were submitted for laboratory analysis.

Soil analytical results reported VOCs and SVOCs below Commercial SCOs. One metal, mercury, was reported above Commercial SCOs, but below Industrial SCOs in one of the four soil samples. Based on the data set, the soil quality meets the industrial/manufacturing zoning of the property. However, if site use/zoning changes, additional investigation and remediation will be recommended for the intended use (i.e. – commercial/residential).

Castleton recommends that a Soil Management Plan be developed for the property to address future soil disturbance and/or site development.

6.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that to the best of our knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR and, we have the specific qualifications based on education, training, and experience to perform Phase II Environmental Site Assessments.

Frank P. Castellano
Principal

Jessica Ferngren

NOTES:

Any Regulatory Exceedences are color coded by Regulation

Q is the Qualifier Column with definitions as follows:

D=Result is from an analysis that required a dilution

J=analyte detected at or above the MDL (method detection limit) but below the RL (Reporting Limit) - data is estimated

U=analyte not detected at or above the level indicated

B=analyte found in the analysis batch blank

E=Result is estimated and cannot be accurately reported due to levels encountered or interferences

P=This flag is used for pesticide and PCB (Aroclor) target compounds when there is a % difference for detected concentrations that exceed method dictated limits between the two GC columns used for analysis

NT=This indicates the analyte was not a target for this sample

~=This indicates that no regulatory limit has been established for this analyte

NOTES:

Any Regulatory Exceedences are color coded by Regulation

Q is the Qualifier Column with definitions as follows:

D= result is from an analysis that required a dilution

J= analyte detected at or above the MDL (method detection limit) but below the RL (Reporting Limit) - data is estimated

U= analyte not detected at or above the level indicated

B= analyte found in the analysis batch blank

E= result is estimated and cannot be accurately reported due to levels encountered or interferences

P= this flag is used for pesticide and PCB (Aroclor) target compounds when there is a % difference for detected concentrations that exceed method dictated limits between the two GC columns used for analysis

NT= this indicates the analyte was not a target for this sample

~ indicates that no regulatory limit has been established for this analyte

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on December 27, 2018 and listed below. The project was identified as your project: **CRLL1801**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Sample and Analysis Qualifiers section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the Sample and Data Qualifiers Relating to This Work Order section of this report and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

<u>York Sample ID</u>	<u>Client Sample ID</u>	<u>Matrix</u>	<u>Date Collected</u>	<u>Date Received</u>

General Notes for York Project (SDG) No.: 18L1143

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All analyses conducted met method or Laboratory SOP requirements. See the Sample and Data Qualifiers Section for further information.
6. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
7. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.
8. Analyses conducted at York Analytical Laboratories, Inc. Stratford, CT are indicated by NY Cert. No. 10854; those conducted at York Analytical Laboratories, Inc., Richmond Hill, NY are indicated by NY Cert. No. 12058.

Sample and Data Qualifiers Relating to This Work Order

S-08	The recovery of this surrogate was outside of QC limits.
S-03	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect. This effect was confirmed by reanalysis.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
M-MBLk	Analyte was detected in the batch method blank above the Reporting Limit.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL/LOD) or in the case of a TIC, the result is an estimated concentration.
IS-LO	The internal std associated with this target compound did not meet acceptance criteria (area <50% CCV) at the stated dilution due to matrix effects. Sample was rerun to confirm matrix effects.
CCV-E	The value reported is ESTIMATED. The value is estimated due to its behavior during continuing calibration verification (>20% Difference for average Rf or >20% Drift for quadratic fit).
B	Analyte is found in the associated analysis batch blank. For volatiles, methylene chloride and acetone are common lab contaminants.

Definitions and Other Explanations

*	Analyte is not certified or the state of the samples origination does not offer certification for the Analyte.
ND	NOT DETECTED - the analyte is not detected at the Reported to level (LOQ/RL or LOD/MDL)
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
LOQ	LIMIT OF QUANTITATION - the minimum concentration of a target analyte that can be reported within a specified degree of confidence. This is the lowest point in an analyte calibration curve that has been subjected to all steps of the processing/analysis and verified to meet defined criteria. This is based upon NELAC 2009 Standards and applies to all analyses.
LOD	LIMIT OF DETECTION - a verified estimate of the minimum concentration of a substance in a given matrix that an analytical process can reliably detect. This is based upon NELAC 2009 Standards and applies to all analyses conducted under the auspices of EPA SW-846.
MDL	METHOD DETECTION LIMIT - a statistically derived estimate of the minimum amount of a substance an analytical system can reliably detect with a 99% confidence that the concentration of the substance is greater than zero. This is based upon 40 CFR Part 136 Appendix B and applies only to EPA 600 and 200 series methods.
Reported to	This indicates that the data for a particular analysis is reported to either the LOD/MDL, or the LOQ/RL. In cases where the "Reported to" is located above the LOD/MDL, any value between this and the LOQ represents an estimated value which is "J" flagged accordingly. This applies to volatile and semi-volatile target compounds only.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

If EPA SW-846 method 8270 is included herein it is noted that the target compound N-nitrosodiphenylamine (NDPA) decomposes in the gas chromatographic inlet and cannot be separated from diphenylamine (DPA). These results could actually represent 100% DPA, 100% NDPA or some combination of the two. For this reason, York reports the combined result for n-nitrosodiphenylamine and diphenylamine for either of these compounds as a combined concentration as Diphenylamine.

If Total PCBs are detected and the target aroclors reported are "Not detected", the Total PCB value is reported due to the presence of either or both Aroclors 1262 and 1268 which are non-target aroclors for some regulatory lists.

2-chloroethylvinyl ether readily breaks down under acidic conditions. Samples that are acid preserved, including standards will exhibit breakdown. The data user should take note.

Certification for pH is no longer offered by NYDOH ELAP.

Semi-Volatile and Volatile analyses are reported down to the LOD/MDL, with values between the LOD/MDL and the LOQ being "J" flagged as estimated results.

For analyses by EPA SW-846-8270D, the Limit of Quantitation (LOQ) reported for benzidine is based upon the lowest standard used for calibration and is not a verified LOQ due to this compound's propensity for oxidative losses during extraction/concentration procedures and non-reproducible chromatographic performance.

Corrective Action: The sampling dates on the COC did not matched the container date & time of collection. The lab used the container information for sample login.

1.0 INTRODUCTION

Goodman Brothers Steel Drum, Inc. (hereafter referred to as Goodman Brothers) is submitting this facility closure plan in accordance with the New York State Department of Conservation (NYSDEC) regulations, under 6 NYCRR Subpart 373-3, "Final Status Standards for Owners and Operators of Hazardous Waste Treatment, Storage and Disposal Facilities". The regulations require owners or operators of a hazardous waste generation and disposal facility to close a facility in a manner that:

- Minimizes the need for further maintenance; and
- Controls, minimizes or eliminates, to the extent necessary to protect human health and the environment, post-closure escape of hazardous waste, hazardous constituents, leachate, contaminated run-off, or hazardous waste decomposition products to the ground or surface waters or to the atmosphere.

The Goodman Brothers facility located at 18-20 Division Place, Brooklyn, New York had typically generated hazardous wastes in quantities that designated the facility as a *Large Quantity Generator*. Goodman Brothers had ceased operation in June 2002, therefore, as a *Large Quantity Generator*; Goodman Brothers is submitting this closure plan to the State for review and approval.

A site location map and a facility map are provided in Appendix A and B, respectively.

1.1 Special Terms and Conditions and User Reliance

This Facility Closure Plan is based partially on information obtained from others and Gannett Fleming makes no representation or warranty concerning the accuracy or completeness of this

information in describing past or present site operations. Some of the information presented in this report may be subject to varying interpretations and conclusions. The information contained in this report was developed from information available and conditions observed on the survey date. Gannett Fleming is not liable for financial or other losses or subsequent damage caused by or related to any use of this document.

This report was prepared for the sole use of Goodman Brothers. Any other distribution without Gannett Fleming's written consent is prohibited.

2.0 PRODUCTION ACTIVITIES

Goodman Brothers operations include the reconditioning and recycling of used steel drums for re-use or disposal. Goodman Brothers received used RCRA drums from an outside source containing residual materials. After inspection, if the drum is suitable for reuse, the residual materials are removed utilizing a hot caustic water rinse. Clean drums are then spray painted with low volatile organic compound (VOC) paints to the exterior of the drum according to the client's specification for decorative and protective needs. Contaminated wastewater is then treated with the on-site water treatment system. Excess sludge and wastewater from the treatment system is held in a holding tank and shipped off-site for treatment and/or disposal. If the drums are not suitable for reuse, they are shredded and shipped off-site for recycling.

During the reconditioning process, the hazardous waste generated was stored, transported and disposed of in accordance with federal and state regulations.

3.0 HAZARDOUS WASTE GENERATED

During operation, Goldman Brothers generated hazardous wastes as part of the steel drum reconditioning process. The following hazardous waste streams were identified and are as follows:

- Paint from clean up and filters in spray booth.
- Wastewater treatment solids from wastewater treatment system (i.e., sludge and filter cake).
- Residual materials on the floor, sumps, etc.
- Wastewater treatment system by-products such as oil and miscellaneous chemicals.

During past operations, CWN Chemical Services, LLC. of Model City, New York, disposed of solid wastes and the wastewater was treated through Marisol, Inc., Middlesex, New Jersey.

4.0 DECONTAMINATION/REMOVAL PROCEDURES

4.1 Equipment Decontamination/Removal

In June 2002, when Goodman Brothers ceased operations, the decommissioning of the plant when into effect, under the direction and supervision of Prime Environmental, Inc. of Levittown, New York. The reconditioning process utilized by Goldman Brothers included cleaning and maintenance activities that controls the hazardous materials and wastes generated. All hazardous materials that were generated during the decommissioning of the facility, including but not limited to paint sludge, rags, gloves, filter cakes, waste water sludge's, were placed in 55-gallon drums and removed as hazardous waste.

As part of the facility closure, according to Simon Goodman, the reconditioning equipment was purchased and removed by a local vendor. No process equipment was left behind at this facility. No documentation was provided pertaining to the company that purchased the reconditioning equipment.

4.2 Hazardous Waste Disposal

All hazardous waste was transported to the designated disposal facility, Marisol, Inc (US EPA# NJD002454544) by either Marisol, Inc. themselves (USEPA ID# NJD002454544) or Freehold Carting, Inc (US EPA# NJD054126164). The disposal facility, Marisol, Inc., is located at 125 Factory Lane, Middlesex, New Jersey. Waste manifests are provided in Appendix C.

A list of hazardous waste with associated quantities generated during previous closure procedures are as follows:

WASTE GENERATED DURING CLOSURE ACTIVITIES					
Date	Transporter	Disposal Facility	Description	Quantity	Manifest Number
6/28/02	Marisol, Inc.	Marisol, Inc.	Waste Paint, UN1263, RQ (D001)	3,000 lb.	NJA 4096576
10/16/02	Freehold Cartage, Inc	Marisol, Inc	Oil, RCRA/DOT Non-Regulated	3,275 gal.	10600

5.0 SAMPLING INVESTIGATION

As part of this RCRA facility closure plan, Gannett Fleming performed a limited subsurface investigation on January 31, 2003 and February 13, 2003. The site investigation consisted of advancing direct-push *Earthprobe 2000* soil borings at 9 locations for the collection of soil and groundwater samples in areas of concern specified by the NYSDEC. Additionally, grab samples were collected from on-site stockpiled soils. A sample location plan is provided in Appendix D.

All samples were field-screened for volatile organic compounds (VOC) with a portable photoionizing detector (PID). If PID readings were observed, one soil sample was collected from the area with the highest PID reading and one soil sample was collected in the area directly below the contaminated. If an uncontaminated area was not observed, an additional soil sample was collected from the capillary fringe. If no soil contamination was observed, one soil sample was collected at a shallow depth.

Samples collected were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, and polychlorinated bi-phenyls (PCBs) by Ecotest Laboratories of North Babylon, New York.

It should be noted that the number in parenthesis after the sample ID (SB-1 (0-4)) indicated the depth interval in which the soil sample was collected.

5.1 Sampling Methodology

Soil, groundwater, and stockpiled soil samples were collected as follows:

- Four soil samples (SB-3 (0-4), SB-3 (4-8), SB-4 (0-4) and SB-4 (4-8)) were collected adjacent to the spray paint booth located along the northwestern corner of the facility.

- Two soil samples (SB-5 (4-8) and SB-5 (8-12)) and one groundwater sample (GW-1) were collected at the entrance of the facility along Division Place.
- Four soil samples (SB-1 (8-12), SB-1 (12-14), SB-2 (4-8) and SB-2 (8-12)) were collected in from the drum cleaning area located in the central section of the facility.
- Two soil sample (SB-6 (1-4) and SB-6 (8-12)) and one groundwater sample (GW-2) was collected from the wastewater treatment area located along the eastern section of the facility.
- One soil sample (SB-7 (0.5-4)) was collected adjacent to the former acid tank that is located along the eastern section of the facility adjacent to the wastewater treatment area.
- One soil sample (SB-8 (0.5-4)) and one groundwater sample (GW-3) were collected from the southeastern corner of the property, and two soil sample (SB-9 (0.5-4) and SB-9 (8-12)) and one groundwater sample (GW-4) were collected from the southwestern corner of the property.
- Two soil samples (GS-1 and GS-2) were collected from stock piled soils located in and adjacent to the wastewater treatment area.

5.2 Soil Analytical Results

Volatile Organic Compounds

VOCs were not detected in samples SB-1 (8-12), SB-1 (12-14), SB-3 (0-4), SB-6 (8-12), SB-7 (0.5-4), SB-8 (0.5-4), and GS-2.

VOCs were detected in concentrations above the New York State Department of Environmental Conservations (NYSDECs), Technical and Administrative Guidance Memorandum (TAGM): *Determination of Soil Cleanup Objectives and Cleanup Levels*, dated January 24, 1994 in the following samples collected: SB-2 (4-8), SB-2 (8-12), SB-3 (4-8), SB-4 (0-4), SB-4 (4-8), SB-5

(4-8), SB-5 (8-12), SB-6 (1-4), SB-9 (8-12), and GS-1. The highest concentrations of VOCs were detected in samples SB-4 (0-4), SB-4 (4-8), and SB-5 (8-12)

Metals

Metal concentrations were detected above the respective TAGM guidance values and Eastern US Background concentrations in all soil samples except SB-2 (4-8), SB-3 (0-4), SB-5 (4-8), SB-6 (1-4), SB-8 (0.5-4), and SB-9 (8-12). The remaining samples, SB-1 (8-12), SB-1 (12-14), SB-2 (8-12), SB-3 (4-8), SB-4 (0-4), SB-4 (4-8), SB-5 (8-12), SB-6 (8-12), SB-7 (0.5-4), SB-9 (0.5-4), GS-1, and GS-2. The highest concentrations of metals were detected in samples SB-3 (4-8), SB-7 (0.5-4), and GS-1.

PCBs

PCB concentrations were detected in samples SB-3 (4-8), SB-4 (0-4), SB-4 (4-8), and SB-5 (8-12) above the appropriate TAGM guidance values. The remaining soil samples did not contain concentrations of PCBs above their respective TAGM guidance value or above the laboratory detection limits.

Semi-Volatile Organic Compounds

Soil samples SB-1 (12-14), SB-2 (4-8), SB-2 (8-12), SB-3 (0-4), and SB-4 (4-8) contained concentrations of SVOCs above their respective TAGM guidance value. Sample SB-3 (4-8) contained the highest concentrations of SVOCs. The remaining samples did not contain detectable concentrations of SVOCs above the laboratory detection limits.

5.3 Groundwater Analytical Results

Volatile Organic Compounds

VOCs were detected in all samples at concentrations above the NYSDECs, Technical and Operational Guidance Series (TOGS): *Ambient Water Quality Standards and Guidance Values and Groundwater Limitations* dated June 1998. The highest concentrations of VOCs were detected in sample GW01, which is located in the presumed down-gradient section of the site.

Metals

Samples collected did not contain concentrations of metals above the appropriate TOGS standards or guidance values or laboratory limits of detection.

PCBs

PCB concentrations were detected in sample GW01, above the appropriate TOGS standard. All other groundwater samples collected did not contain any detectable concentrations of PCBs above the laboratory detection limits.

Semi-Volatile Organic Compounds

Groundwater samples GW02 and GW03 did not contain any detectable concentrations of SVOCs above the laboratory detection limits. However, groundwater samples GW01 and GW04 contained naphthalene at concentrations that exceed the appropriate TOGS standard.

Analytical tables are provided in Appendix E and laboratory analytical data is provided in Appendix F.

6.0 SCHEDULE OF CLOSURE

Upon approval of this Facility Closure Plan, Goodman Brothers will begin the following decommissioning procedures:

- Remove and dispose of the stockpiled soils from the rear of the facility appropriately.
- Remove and dispose of all drums appropriately.
- Perform additional subsurface soil characterization, if required.
- Submit a site remediation plan to the NYSDEC for approval.

SOLVENT RECYCLING

November 27, 2002

State of New Jersey
Department of Environmental Protection
Hazardous Waste Regulation Program
P.O. Box 421
Trenton, NJ 08625-0421

Attention: Mr. Ferdinand Scaccetti

Dear Mr. Scaccetti:

Please use this letter as notification that Marisol, Inc. located at 125 Factory Lane Middlesex, NJ 08846, and EPA ID # NJD002454544 received an un-manifested waste on 10/16/02 from Goodman Brothers located at 18 Division Place Brooklyn, NY 11222, and EPA ID # NYD047683776.

Goodman Brothers shipped 3,275 gallons of a non-hazardous and Non-RCRA mixture of oil, water, and antifreeze on 10/16/02. The non-hazardous manifest document number is 10600. The material was treated and managed as a hazardous waste fuel by Marisol, Inc.

On November 25, 2002, Marisol was notified by The New York DEC, inspector Haasan Hussein, that Goodman Brothers shipped an un-manifested waste on 10/16/02 to Marisol, Inc.. According to Mr. Hussein, NYDEC inspector, sometime before shipping the material on 10/16/02 to Marisol, Inc., Goodman Brothers was told and given written notification by the Department that their waste must be managed and manifested as F005 and D001 RCRA materials.

Goodman Brothers did not notify Marisol that the materials were hazardous waste at the time of profiling, sampling, and/or shipment.

Goodman Brothers was notified. If anything additional is required, please call me at 732/469-5100.

Joann Kohl

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT—THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY.

THIS INDENTURE, made the 12th day of November , in the year 2004

BETWEEN

B & F GOODMAN ASSOCIATES, INC., a New York corporation,
having offices at 18 Division Place, Brooklyn, NY

party of the first part, and RICHLAND PROPERTIES, INC., a domestic corporation,
having offices at 275 Richardson Street,
Brooklyn, NY

party of the second part,

WITNESSETH, that the party of the first part, in consideration of Ten Dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the

SEE ATTACHED SCHEDULE "A", ANNEXED HERETO,
AND MADE PART HEREOF

Being and intended to be the same premises conveyed to the
grantor herein of deed dated 4/19/67 recorded 5/1/67 in Record
Liber 413 at page 467.

This conveyance has been made with the unanimous consent in
writing of all the stockholders of the party of the first part,
and winds up the affairs of the grantor corporation.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.
AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

Commission Expires Nov. 30, 2005

These statements are made with the knowledge that a willfully false representation is unlawful and is punishable as a crime of perjury under Article 210 of the Penal Law.

NEW YORK CITY REAL PROPERTY TRANSFER TAX RETURNS FILED ON OR AFTER FEBRUARY 6th, 1990, WITH RESPECT TO THE CONVEYANCE OF A ONE- OR TWO-FAMILY DWELLING, OR A COOPERATIVE APARTMENT OR A CONDOMINIUM UNIT IN A ONE- OR TWO-FAMILY DWELLING, WILL NOT BE ACCEPTED FOR FILING UNLESS ACCOMPANIED BY THIS AFFIDAVIT.

THIS DEED, made the 14th day of
September, Nineteen hundred and Seventy - six
BETWEEN

IVAN E. IRIZARRY,

Finance Administrator of The City of New York, having his
principal office at Room 500, Municipal Building, Borough of
Manhattan, County, City and State of New York, GRANTOR and

THE CITY OF NEW YORK, a municipal corporation having its
principal office at City Hall, Borough of Manhattan, City
and State of New York, GRANTEE,

WITNESSETH:

That the Grantor, duly empowered by a judgment of
foreclosure entered on September 14, 1976,
at a Special Term, Part II,
of the New York Supreme Court, County of Kings,
in an action to foreclose certain tax liens owned and held
by The City of New York, entitled "In the Matter of the
Foreclosure of Tax Liens pursuant to Title 'D' of Chapter
'17' of the Administrative Code of The City of New York,
List of Delinquent Taxes, Sections 1 to 26,
Borough of Brooklyn, Action No. 30",
and in pursuance of the provisions of Section 247-12.0 of the
Administrative Code of The City of New York, here by and
convey unto the Grantee, its successors and assigns:

THIS INDENTURE, made the 26th day of October in the year 2017

BETWEEN

 MARSHALL KESTEN, 1036 Manhattan Avenue, Brooklyn NY 11222

party of the first part, and

 CR 17 LLC, 1036 Manhattan Avenue Brooklyn NY 11222

party of the second part,

WITNESSETH, that the party of the first part, in consideration of Ten Dollars and other valuable consideration paid by the party of the second part, does hereby remise, release and quitclaim unto the party of the part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the County of Kings, City and State of New York known as and by 291 Richardson Street, Brooklyn, N.Y. 11222

Block 2849

Lot 120

TOGETHER with all right, title and interest, if any, of the party of the first part of, in and to any streets and roads abutting the above-described premises to the center lines thereof; **TOGETHER** with the appurtenances and all the estate and rights of the party of the first part in and to said premises; **TO HAVE AND TO HOLD** the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

IN PRESENCE OF:

MARSHALL KESTEN

SCHEDULE A

All that certain plot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, being more particularly bounded and described as follows:

BEGINNING at a point on the Northerly side of Richardson Street distant 25 feet Westerly from the corner formed by the intersection of the Northerly side of Richardson Street with the Westerly side of DeBevoise Avenue;

RUNNING THENCE Northerly parallel with the Westerly side of DeBevoise Avenue, 142 feet 6 inches;

THENCE Westerly parallel with the Northerly side of Richardson Street, 25 feet;

THENCE Southerly again parallel with the Westerly side of DeBevoise Avenue, 142 feet 6 inches to the Northerly side of Richardson Street;

THENCE Easterly along the Northerly side of Richardson Street, 25 feet to the point or place of BEGINNING.

Customer Registration Form for Water and Sewer Billing

Property and Owner Information:

(1) Property receiving service: BOROUGH: BROOKLYN BLOCK: 2849 LOT: 120

(2) Property Address: 291 RICHARDSON STREET, BROOKLYN, NY 11222

(3) Owner's Name: CR 17 LLC

Additional Name:

Affirmation:

Your water & sewer bills will be sent to the property address shown above.

1036 Manhattan Ave
Brooklyn NY 11222

Customer Billing Information:

Please Note:

- A. Water and sewer charges are the legal responsibility of the owner of a property receiving water and/or sewer service. The owner's responsibility to pay such charges is not affected by any lease, license or other arrangement, or any assignment of responsibility for payment of such charges. Water and sewer charges constitute a lien on the property until paid. In addition to legal action against the owner, a failure to pay such charges when due may result in foreclosure of the lien by the City of New York, the property being placed in a lien sale by the City or Service Termination.
- B. Original bills for water and/or sewer service will be mailed to the owner, **at the property address or to an alternate mailing address**. DEP will provide a duplicate copy of bills to one other party (such as a managing agent), however, any failure or delay by DEP in providing duplicate copies of bills shall in no way relieve the owner from his/her liability to pay all outstanding water and sewer charges. Contact DEP at (718) 595-7000 during business hours or visit www.nyc.gov/dep to provide us with the other party's information.

Owner's Approval:

The undersigned certifies that he/she/it is the owner of the property receiving service referenced above; that he/she/it has read and understands Paragraphs A & B under the section captioned "Customer Billing Information"; and that the information supplied by the undersigned on this form is true and complete to the best of his/her/its knowledge.

REFEREE DEED

THIS DEED, made as of October 26, 2017, between JAMES CAFFREY, Esq., having offices at 111 John Street, New York, New York, as the Referee duly appointed in the foreclosure action hereinafter mentioned, and MARSHALL KESTEN, whose address is 1036 Manhattan Avenue, Brooklyn, New York, as Grantee.

WITNESSETH, that the Grantor, being the Referee appointed in a foreclosure action between NYCTL 1998-2 TRUST, and THE BANK OF NEW YORK as Collateral Agent and Custodian for the NYCTL 1998-2 Trust, Plaintiffs, and RICHLAND PROPERTIES, INC., et al., Defendants, foreclosing certain tax and other City of New York liens, as evidenced by a certain Tax Lien Certificate 3B dated August 13, 2014, recorded under CRFN 2014000278034 on August 20, 2014, and pursuant to a Judgment of Foreclosure and Sale entered on June 27, 2017 under index number 500076/2016 in the Supreme Court of the State of New York, held in and for the County of Kings, and in consideration of the sum of SIX HUNDRED AND FIFTY THOUSAND DOLLARS (\$650,000.00) paid by the Grantee, having the highest sum bid at the sale under such Judgment of Foreclosure and Sale, does hereby grant and convey unto the Grantee, its successors and assigns, the Premises described in Schedule "A" attached hereto and made a part hereof.

TO HAVE AND TO HOLD the Premises described in Schedule "A" and hereby conveyed unto the Grantee, its successors and assigns forever.

Premises are not subject to a Credit Line Mortgage.

IN WITNESS WHEREOF, the said Grantor has hereunto set his hand the day and year first above written.

JAMES CAFFREY, Esq., as Referee

Title No. ST17-0081K

SCHEDULE A

All that certain plot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, being more particularly bounded and described as follows:

BEGINNING at a point on the Northerly side of Richardson Street distant 25 feet Westerly from the corner formed by the intersection of the Northerly side of Richardson Street with the Westerly side of DeBevoise Avenue;

RUNNING THENCE Northerly parallel with the Westerly side of DeBevoise Avenue, 142 feet 6 inches;

THENCE Westerly parallel with the Northerly side of Richardson Street, 25 feet;

THENCE Southerly again parallel with the Westerly side of DeBevoise Avenue, 142 feet 6 inches to the Northerly side of Richardson Street;

THENCE Easterly along the Northerly side of Richardson Street, 25 feet to the point or place of BEGINNING.

**FOR CONVEYANCING ONLY, IF INTENDED TO BE CONVEYED.
TOGETHER WITH ALL RIGHTS, TITLE AND INTEREST OF, IN AND TO
ANY STREETS AND ROADS ABUTTING THE ABOVE DESCRIBED
PREMISES TO THE CENTER LINE THEREOF.**

ACKNOWLEDGMENT

STATE OF NEW YORK)
 : ss.:
COUNTY OF NEW YORK)

On the 26 day of October, 2017, before me, the undersigned, a Notary Public in and for said State, personally appeared JAMES CAFFREY, Esq., personally known to me or proved to me on the basis of satisfactory evidence to be the individual whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his capacity, and that by his signature on the instrument, the individual, or the person upon behalf of whom the individual acted, executed the instrument.

Customer Registration Form for Water and Sewer Billing

Property and Owner Information:

- (1) Property receiving service: BOROUGH: BROOKLYN BLOCK: 2849 LOT: 120
- (2) Property Address: 291 RICHARDSON STREET, BROOKLYN, NY 11222
- (3) Owner's Name: KESTEN, MARSHALL
- Additional Name: _____

Affirmation:

Your water & sewer bills will be sent to the property address shown above.

*Pls send to 1036 Manhattan Ave
Brooklyn NY 11222*

Customer Billing Information:

Please Note:

- A. Water and sewer charges are the legal responsibility of the owner of a property receiving water and/or sewer service. The owner's responsibility to pay such charges is not affected by any lease, license or other arrangement, or any assignment of responsibility for payment of such charges. Water and sewer charges constitute a lien on the property until paid. In addition to legal action against the owner, a failure to pay such charges when due may result in foreclosure of the lien by the City of New York, the property being placed in a lien sale by the City or Service Termination.
- B. Original bills for water and/or sewer service will be mailed to the owner, **at the property address or to an alternate mailing address**. DEP will provide a duplicate copy of bills to one other party (such as a managing agent), however, any failure or delay by DEP in providing duplicate copies of bills shall in no way relieve the owner from his/her liability to pay all outstanding water and sewer charges. Contact DEP at (718) 595-7000 during business hours or visit www.nyc.gov/dep to provide us with the other party's information.

Owner's Approval:

The undersigned certifies that he/she/it is the owner of the property receiving service referenced above; that he/she/it has read and understands Paragraphs A & B under the section captioned "Customer Billing Information"; and that the information supplied by the undersigned on this form is true and complete to the best of his/her/its knowledge.

Print Name of Owner: _____

Signature: _____ Date (mm/dd/yyyy)

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 401 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX E

Proof of Site Ownership

WRITTEN CONSENT OF THE MANAGER

The undersigned, being the manager of CR 17 LLC, a New York limited liability company (the "Company"), does hereby resolve that:

1. Marshall Kesten is a representative of the Company and has the full power and authority on behalf of the Company, as an Authorized Signatory, to:
 - a. Execute documents in connection with the application of the Company for participation in the New York State Brownfield Cleanup Program (the "BCP");
 - b. Enter into agreements with the New York State Department of Environmental Conservation (the "DEC") in connection with the Company's participation in the BCP;
 - c. Execute any and all documents in connection with the Company's participation in the BCP, including but not limited to applications, agreements, easements and tax returns;
 - d. Take any action necessary to the furtherance of the Company's participation in the BCP, including but not limited to conducting negotiations on behalf of the Company.
2. The authority hereby conferred shall be deemed retroactive, and any and all acts authorized herein which were performed prior to the passage of this consent are hereby approved and ratified. The authority hereby conferred shall continue in full force and effect until the DEC shall have received notice, in writing, of the revocation hereof by a resolution duly adopted by the Manager of the Company. Any such revocation shall be effective only as to actions taken by the Company subsequent to DEC's receipt of such notice.
3. The undersigned hereby represents and warrants that (i) the undersigned is the Manager of the Company; and (ii) the consent of the Manager is sufficient to authorize the Company to take the aforementioned actions.

THIS INDENTURE, made the 26th day of October in the year 2017

BETWEEN

 MARSHALL KESTEN, 1036 Manhattan Avenue, Brooklyn NY 11222

party of the first part, and

 CR 17 LLC, 1036 Manhattan Avenue Brooklyn NY 11222

party of the second part,

WITNESSETH, that the party of the first part, in consideration of Ten Dollars and other valuable consideration paid by the party of the second part, does hereby remise, release and quitclaim unto the party of the part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the County of Kings, City and State of New York known as and by 291 Richardson Street, Brooklyn, N.Y. 11222

Block 2849

Lot 120

TOGETHER with all right, title and interest, if any, of the party of the first part of, in and to any streets and roads abutting the above-described premises to the center lines thereof; **TOGETHER** with the appurtenances and all the estate and rights of the party of the first part in and to said premises; **TO HAVE AND TO HOLD** the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

IN PRESENCE OF:

MARSHALL KESTEN

SCHEDULE A

All that certain plot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, being more particularly bounded and described as follows:

BEGINNING at a point on the Northerly side of Richardson Street distant 25 feet Westerly from the corner formed by the intersection of the Northerly side of Richardson Street with the Westerly side of DeBevoise Avenue;

Customer Registration Form for Water and Sewer Billing

Property and Owner Information:

- (1) Property receiving service: BOROUGH: BROOKLYN BLOCK: 2849 LOT: 120
- (2) Property Address: 291 RICHARDSON STREET, BROOKLYN, NY 11222
- (3) Owner's Name: CR 17 LLC
- Additional Name:

Affirmation:

Your water & sewer bills will be sent to the property address shown above.

1036 Manhattan Ave
Brooklyn NY 11222

Customer Billing Information:

Please Note:

- A. Water and sewer charges are the legal responsibility of the owner of a property receiving water and/or sewer service. The owner's responsibility to pay such charges is not affected by any lease, license or other arrangement, or any assignment of responsibility for payment of such charges. Water and sewer charges constitute a lien on the property until paid. In addition to legal action against the owner, a failure to pay such charges when due may result in foreclosure of the lien by the City of New York, the property being placed in a lien sale by the City or Service Termination.
- B. Original bills for water and/or sewer service will be mailed to the owner, **at the property address or to an alternate mailing address**. DEP will provide a duplicate copy of bills to one other party (such as a managing agent), however, any failure or delay by DEP in providing duplicate copies of bills shall in no way relieve the owner from his/her liability to pay all outstanding water and sewer charges. Contact DEP at (718) 595-7000 during business hours or visit www.nyc.gov/dep to provide us with the other party's information.

Owner's Approval:

The undersigned certifies that he/she/it is the owner of the property receiving service referenced above; that he/she/it has read and understands Paragraphs A & B under the section captioned "Customer Billing Information"; and that the information supplied by the undersigned on this form is true and complete to the best of his/her/its knowledge.

Greetings from Brooklyn Public Library

Dear Brooklyn Public Library User:

You can consider this e-mail as confirmation that the Brooklyn Public Library will house the NYSDEC Documents in the SST Division (Science, Society, & technology). Remediation documents are typically held for two years.

I've included a mailing address below for your consideration.

More information about BPL can be found on our website: <https://www.bklynlibrary.org/>. Stay up to date with BPL programs, events and more. Sign up for our eNews and follow us on Facebook and Twitter! Connect with us here: <http://www.bklynlibrary.org/connect>.

We appreciate your inquiry.

Brooklyn Public Library

10 Grand Army Plaza

Brooklyn, NY 11238

Attention: Jeffrey Schwartz Government Documents Librarian

Please take a moment to fill out a survey at:
<https://www.questionpoint.org/crs/servlet/org.oclc.ask.Patr.onSurveyForm?&language=1&type=ask&qid=14356359>

Question History:

Patron: I am preparing to perform an environmental remediation for the New York State Department of Environmental Conservation (NYSDEC) and would like to use your library as the document repository. The NYSDEC requires that I provide an acknowledgement from the Library that it agrees to act as document repository. Is that something you can provide? I can be reached by e-mail or at 631.482.1818. Thanks.

Good afternoon Marie,

Thank you for your time today. To follow up on our conversation, I have prepared and attached a letter requesting that your office serve as the local document repository for the above site. As discussed, the NYSDEC requires an acknowledgement from the local community board that it will serve as document repository prior to accepting the site into the program. I am also sending a hardcopy with self-addressed stamped envelope.

As requested, I will follow up with you again on Monday when Mr. Esposito returns. Thank you, enjoy your weekend.

-Brian

Subject: RE: 291 Richardson St, Brooklyn, NY - NYS Brownfield Cleanup Program Document Repository

Good morning,

As described in the emails below, we are requesting that the Brooklyn Community Board serve as a document repository for the NYSDEC Brownfield redevelopment site at 291 Richardson St. An acknowledgement that the Board will serve as a repository is required prior to the DEC accepting the project application. Serving as a local repository allows community members the opportunity to stay informed and participate as the project progresses.

A simple reply to this email stating that you will serve as a repository is all that is needed. However, if you wish, we can prepare and submit a letter for your acknowledgement and return.

Your assistance is greatly appreciated. Thank you in advance,

-Brian

Good morning,

Per your request, this is a follow up to the below email requesting that the Brooklyn Community Board serve as a document repository for the above referenced NYSDEC Brownfield Cleanup Site. The State requires we include email confirmation that the local community board will serve as a document repository in the application package. Please respond with your reply at your earliest convenience. Thank you in advance.
