

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

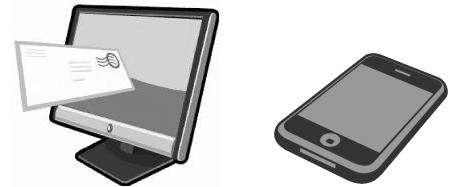

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

www.dec.ny.gov/chemical/61092.html

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- ☒ Get site information faster and share it easily;
- ☒ Receive information about all sites in a chosen county - read what you want, delete the rest;
- ☒ It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

FACT SHEET

Brownfield Cleanup Program

**1015 Atlantic Avenue
Brooklyn, NY**

May 2023

**SITE No. C224293
NYSDEC REGION 2**

Cleanup Action Completed at Brownfield Site

Action has been completed to address the contamination related to the 1015 Atlantic Avenue site ("site") located at 1015 Atlantic Avenue, Brooklyn, NY under New York State's Brownfield Cleanup Program (BCP). Please see the map for the site location.

Cleanup activities were performed by 1015 Holdings LLC ("applicant") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). The applicant has submitted a proposed Final Engineering Report (FER) for NYSDEC review which states that cleanup requirements have been achieved to fully protect public health and the environment for the proposed site use.

- Access project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C224293/>.
- The documents also are available at the locations identified at left under "Where to Find Information."

Highlights of the Site Cleanup: The following activities have been completed to achieve the remedial action objectives:

- Excavation and off-site disposal of approximately 7,530 tons of soil exceeding the Unrestricted Use soil cleanup objectives. The entirety of the site was excavated to a depth of ten feet below grade (ft-bg), with deeper excavation to 20 ft-bg for removal of a petroleum hotspot in the southcentral portion of the Site.
- Removal and offsite disposal of one 6,000-gallon and one 12,000-gallon gasoline underground storage tanks (USTs), one 4,000-gallon diesel fuel UST, and two sub-grade hydraulic lifts.
- Collection and analysis of end-point soil samples to evaluate the effectiveness of the remedy;
- Approximately 300 tons of quarry stone and 100 tons of 1.5-inch crushed stone were imported for use as backfill
- A Health and Safety Plan and Community Air Monitoring Plan were implemented during all ground intrusive activities.

Next Steps: When NYSDEC approves the (FER)Final Engineering Report, it will be made available to the

BROWNFIELD CLEANUP PROGRAM

public (see "Where to Find Information"). NYSDEC then will issue a Certificate of Completion (COC) that will be announced in a fact sheet. The applicant would be able to redevelop the site after receiving a COC. In addition, the applicant will be eligible for tax credits to offset a portion of the costs of performing cleanup activities and for redevelopment of the site.

Site Description: The site is located on the southwestern corner of the intersection between Atlantic Avenue, which runs east to west along the southern site perimeter, and Classon Avenue, and is identified as Block 2109, Lot No. 51 on the NYC Tax map. The site is 7,650 square feet (0.18 acres) and was previously occupied by a service station/auto repair shop. The site had been used as an automobile service station and gas station since the 1930s.

A new seven-story mixed-use commercial and residential building with a partial cellar was constructed at the Site following implementation of the Site cleanup.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C224293) at:

<https://www.dec.ny.gov/cfmx/extapps/derexternal/index.cfm?pageid=3>

Brownfield Cleanup Program: New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped.

These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://www.dec.ny.gov/chemical/8450.html>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
