

(Fact Sheet Begins Next)

## Act Now to Continue Receiving Information About This Site!

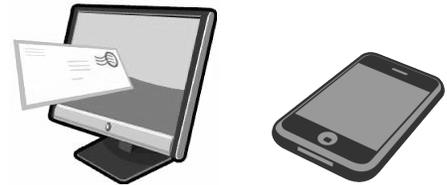

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

**You must sign up for the DER email listserv:**

[www.dec.ny.gov/chemical/61092.html](http://www.dec.ny.gov/chemical/61092.html)

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

### Why You Should Go “Paperless”:

- Get site information faster and share it easily;
- Receive information about all sites in a chosen county - read what you want, delete the rest;
- It helps the environment and stretches your tax dollars.

**If “paperless” is not an option for you**, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Conservation

## Where to Find Information

Access project documents through the DECinfo Locator

<https://www.dec.ny.gov/data/DecDocs/C224295/>

and at these location(s):

### Brooklyn Public Library – Pacific Branch

25 4th Avenue,  
Brooklyn, NY 11217  
(718) 638 - 1531

### Brooklyn Community Board 6

250 Baltic Street  
Brooklyn, NY 11201  
(718) 643 - 3027

## Who to Contact

Comments and questions are welcome and should be directed as follows:

### Project-Related Questions

Steven Wu, Project Manager  
NYSDEC  
47-40 21st Street, Long Island City, NY  
11101-5407  
718-482-6725  
[steven.wu@dec.ny.gov](mailto:steven.wu@dec.ny.gov)

### Project-Related Health Questions

Dan Tucholski  
NYSDOH  
Empire State Plaza – Corning Tower Room  
#1787, Albany, NY 12237  
(518)-486-7016  
[beci@health.ny.gov](mailto:beci@health.ny.gov)

# FACT SHEET

Brownfield Cleanup Program

204 4<sup>th</sup> Avenue  
204 4<sup>th</sup> Avenue  
Brooklyn, NY 11217

**SITE No. C224295**

**NYSDEC REGION 2**

**July 2022**

## Environmental Cleanup to Begin at Brownfield Site

Action is about to begin that will address contamination related to the 204 4<sup>th</sup> Avenue site ("site") located at 204 4<sup>th</sup> Avenue in Brooklyn, NY. Please see the map for the site location. The cleanup activities will be performed by 204 4<sup>th</sup> Avenue, LLC ("applicant") with oversight provided by the New York State Department of Environmental Conservation (NYSDEC). NYSDEC has determined that the Remedial Action Work Plan (RAWP) protects public health and the environment and has approved the plan.

- Access the approved June 2022 RAWP and other project documents online through the DECinfo Locator:
- <https://www.dec.ny.gov/data/DecDocs/C224295/>.
- The documents also are available at the location(s) identified at left under "Where to Find Information."

Remedial activities are expected to begin in July 2022 and last approximately 8 months.

**Highlights of the Upcoming Cleanup Activities:** The goal of the cleanup action for the site is to achieve cleanup levels that protect public health and the environment. The key components of the remedy are:

- Excavation and removal of a previously abandoned 2,000-gallon fuel oil underground storage tank (UST);
- Excavation and off-site disposal of contaminant source soil above the water table exceeding protection of groundwater soil cleanup objectives (SCOs);
- Excavation and off-site disposal of soil in the upper 2 feet in all other areas of the site exceeding restricted residential SCOs;
- Collection of post-remedial confirmation and documentation soil samples to evaluate the effectiveness of the remedy;
- Application of chemical remediation products to treat petroleum impacted groundwater and soil below the water table (being implemented under a previously approved Interim Remedial Measures Work Plan);
- Installation of a cover system consisting of buildings, asphalt, or concrete pavement, and/or a minimum of 2 feet of soil meeting the restricted residential SCOs;
- Installation of an active vapor mitigation system under the new building;
- Implementation of a Health and Safety Plan (HASP) and a Community Air Monitoring Plan (CAMP) during all ground intrusive activities;
- Implementation of a Site Management Plan (SMP) for long-term maintenance of the remedial systems; and
- Recording of an Environmental Easement to ensure proper use of the site.

# BROWNFIELD CLEANUP PROGRAM

**Next Steps:** After the applicant completes the cleanup activities, they will prepare a Final Engineering Report (FER) and submit it to NYSDEC. The FER will describe the cleanup activities completed and certify that cleanup requirements have been achieved or will be achieved.

When NYSDEC is satisfied that cleanup requirements have been achieved or will be achieved for the site, it will approve the FER. NYSDEC will then issue a Certificate of Completion (COC) to the applicant. The applicant would be able to redevelop the site in conjunction with receiving a COC. In addition, the applicant would be eligible for tax credits to offset the costs of performing cleanup activities and for redevelopment of the site.

NYSDEC will issue a fact sheet that describes the content of the FER. The fact sheet will identify any institutional controls (for example, environmental easements) or engineering controls (for example, a site cover) necessary at the site in relation to the issuance of the COC.

**Site Description:** The 0.44-acre site is located at 204 4th Avenue in Brooklyn, NY and is identified on the Kings County Tax Map as Block 434, Lot 35. The site is bounded by Sackett Street to the north, 4<sup>th</sup> Avenue to the east, Union Street to the south, and commercial properties to the west. The site had historically operated as a gasoline station from approximately the 1930s until 2019. Planned redevelopment includes a fourteen-story mixed use residential building with ground-floor retail.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, C224295) at:

<https://www.dec.ny.gov/cfm/extapps/derexternal/index.cfm?pageid=3>

**Brownfield Cleanup Program:** New York's Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as "brownfields" so that they can be reused and redeveloped. These uses include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by DEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:

<https://www.dec.ny.gov/chemical/8450.html>
