EXECUTIVE SUMMARY

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) was retained by 130 Saint Felix Street LLC (the “User”) to prepare this Phase I Environmental Site Assessment (ESA) for the property located at 130 Saint Felix Street in Brooklyn, New York (the “Subject Property”). The Subject Property is identified as Brooklyn (Kings County) Tax Block 2111, Lot 40. The about 12,500-square-foot Subject Property is developed with an asphalt-paved parking lot. The Subject Property is located on an L-shaped city lot bounded by two multi-story Brooklyn Academy of Music buildings to the north, Saint Felix Street followed by multi-story residential buildings to the east, a multi-story, mixed residential and commercial building (One Hanson Place) and a multi-story church building to the south, and Ashland Place followed by an active construction site to the west. New York City Transit (NYCT) subway tunnels are located beneath Lafayette Avenue to the north, Saint Felix Street to the east, and Ashland Place, Fourth Avenue, and Flatbush Avenue to the west and south of the Subject Property. This Phase I ESA was performed in support of the User’s due diligence associated with a potential property transaction involving the Subject Property.

This Phase I ESA was conducted using the guidelines of the American Society for Testing and Materials (ASTM) International Practice 1527-13 (Standard Practice for ESA: Phase I ESA Process) and the United States Environmental Protection Agency’s (EPA) All Appropriate Inquiry (AAI) Rule (CFT Part 312). Completion of a Phase I ESA in accordance with the ASTM Practice and AAI Rule is needed to qualify for the bona fide prospective purchaser liability protections available under the Comprehensive Environmental Response Compensation and Liability Action (CERCLA). The objective of this Phase I ESA was to attempt to identify the presence or likely presence, use, or release on the Subject Property of hazardous substances or petroleum products as defined in ASTM E1527-13 as a Recognized Environmental Condition (REC).

The Phase I ESA identified the following RECs associated with the Subject Property:

REC 1 – Historical Use of the Subject Property

According to Sanborn maps, the Subject Property has been used as a parking lot since at least 1950. The Department of Finance classification of the Subject Property is as a garage/gasoline station. Auto repair or service activities may have taken place on the Subject Property, which is considered a REC. Additionally, during the site reconnaissance, concrete patches and patched asphalt were observed throughout the Subject Property, which are likely indicative of USTs.

Potential releases of petroleum products, solvents, and/or other hazardous materials may have adversely impacted soil, groundwater, and/or soil vapor at the Subject Property.

REC 2 – Historical Use of Adjoining and Surrounding Properties

The Environmental Database and Sanborn Map review identified the following notable uses on adjoining and surrounding properties with the potential to impact groundwater and/or soil vapor at the Subject Property:

- Drug manufacturer and medical laboratory from 1938 to 1969 and dry cleaner from 2003 to 2007 (western adjoining);
- Printer from 1915 to 1938 (about 100 feet north);
- Used cars lot from 1938 to 1950 (about 350 feet northeast);
- Laundry from 1950 to 1996 (about 400 feet northeast);
- Filling station from 1969 to 1993 (about 500 feet north);
- Dry cleaner from 1991 to 2012 (about 850 feet east);
- Dry cleaner from 2001 to 2003 (about 550 feet northeast);
- Dry cleaner from 2010 to 2012 (about 600 feet northeast);
- Dry cleaner from 2004 to 2011 (about 600 feet northeast)
- Dry cleaner from 2000 to 2010 (about 700 feet northeast); and
- Dry cleaner from 2007 to 2009 (about 900 feet east).

These historical uses of adjoining and surrounding properties are considered a REC. Unreported releases of solvents, petroleum products, or other hazardous substances associated with these historical uses may have impacted the groundwater and/or soil vapor at the Subject Property.

Historic use of the adjacent sites also results in a spill (NYSDEC Spill No. 0402131) reporting at One Hanson Place on May 18, 2004, when an unknown quantity of No. 2 fuel oil was released due to tank failure. Fuel oil impacts were observed in soil from about 4 to 40 feet below grade surface (bgs). Petroleum free phase product was observed on groundwater, which was measured at about 43 feet bgs. A work plan for delineation and an exposure assessment was submitted to the New York State Department of Environmental Conservation (NYSDEC) in November 2013. The spill was closed by NYSDEC on April 15, 2015; however, closure

documentation was not available for review. Groundwater and/or soil vapor at the Subject Property may have been affected by this spill incident and associated tanks.

Neither Historic RECs (HRECs) nor Controlled RECs (CRECs) were identified.

Chemical containers, ranging in size from about one to five gallons, were observed during the site reconnaissance near the active work area beneath scaffolding in the southwest corner of the Subject Property. Observed chemicals include muriatic acid, acetone, sealant, paint, and cement mix. Stored chemicals at the Subject Property is considered a de minimis condition.

1.0 INTRODUCTION

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) was retained by 130 Saint Felix Street LLC (the "User") to prepare this Phase I Environmental Site Assessment (ESA) for the property located at 130 Saint Felix Street in Brooklyn, New York (the "Subject Property"). The Subject Property is identified as Brooklyn (Kings County) Tax Block 2111, Lot 40. The about 12,500-square-foot Subject Property is developed with an asphalt-paved parking lot. The Subject Property is located on an L-shaped city lot bounded by two multi-story Brooklyn Academy of Music buildings to the north, Saint Felix Street followed by multi-story residential buildings to the east, a multi-story mixed residential and commercial building (One Hanson Place) and a multi-story church building to the south, and Ashland Place followed by an active construction site to the west. New York City Transit (NYCT) subway tunnels are located beneath Lafayette Avenue to the north, Saint Felix Street to the east, and Ashland Place, Fourth Avenue, and Flatbush Avenue to the west and south of the Subject Property.

This Phase I ESA was performed in support of the User's due diligence associated with a property transaction involving the Subject Property.

The purpose of this Phase I ESA is to accomplish the following:

(1) Identify Recognized Environmental Conditions (RECs) in connection with the Subject Property, as defined in The Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation E1527-13, which states: The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not considered RECs. De minimis conditions are further defined as conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

(2) Provide services consistent with the United States Environmental Protection Agency (USEPA) 40 Code of Federal Regulations (CFR) Part 312 Subpart C Standards and Practices §312.20 AAI Rule.

1.1 Scope of the Phase I ESA

This Phase I ESA was conducted utilizing a standard of good commercial and customary practice using the local standard of care that is consistent with ASTM International (ASTM) E1527-13. Any significant scope-of-work additions, deletions, or deviations to ASTM E1527-13 are noted in Section 8.0 of this report. In general, the scope of this assessment consisted of obtaining information from the User; reviewing reasonably ascertainable information and environmental data relating to the Subject Property; reviewing maps and records maintained by federal, state, and local regulatory agencies; interviewing persons knowledgeable about the Subject Property; and conducting a site inspection. The specific scope of this assessment included the following:

1. A site reconnaissance to characterize conditions and assess the Subject Property's location with respect to adjoining and surrounding property uses and natural surface features. The reconnaissance included the surrounding roads and observations of surrounding properties from public rights-of-way to identify obvious potential environmental conditions on neighboring properties. The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Subject Property and then progressing to adjacent and surrounding properties. Photographs taken as part of the site reconnaissance are provided in Appendix A.
2. As per ASTM E1527-13, a user questionnaire was provided to the User to obtain information related to the Subject Property. A copy of the completed questionnaire is provided in Appendix B.
3. A review of environmental databases maintained by the USEPA, state, and local agencies within the approximate minimum search distance. Environmental Data Resources, Inc. (EDR) prepared the environmental database report, which is included in Appendix C.
4. Freedom of Information Act (FOIA) requests were sent to federal, state, and local agencies. As of the date of this report, complete FOIA responses were not received. Any FOIA responses received that alter the conclusions made in this report will be documented in an addendum to this report. Copies of the FOIA requests are included in Appendix D.
5. New York City Department of Buildings (NYCDOB) records and a Planning Commission Zoning Map were reviewed. Available NYCDOB records and Zoning Map are included in Appendices E and F, respectively.

6. Physical characteristics of the Subject Property were determined through referenced sources for topographic, geologic, soils, and hydrologic data.
7. A review and interpretation of aerial photographs, Sanborn Fire Insurance Maps (Sanborn Maps), historical topographic maps, and city directories to identify previous activities on and in the vicinity of the Subject Property. Copies are included in Appendices G, H, I and J, respectively.
8. A review of an Environmental Lien search for the Subject Property. A copy of the environmental lien search report is included in Appendix K.
9. A review of published radon occurrence maps to determine if the Subject Property is located in an area with a propensity for elevated radon levels.

1.2 Assumptions, Limitations, and Exceptions

This Phase I ESA report was prepared for 130 Saint Felix Street LLC for the Subject Property located at 130 Saint Felix in Brooklyn, New York. The report is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility for use of this report for any property other than the Subject Property addressed herein, or by any other third party without a written authorization from Langan.

Langan's scope of services, which is described in Section 1.1, was limited to that agreed to with the User and no other services beyond those explicitly stated are implied. The services performed and agreed upon for this effort comports to those prescribed in the ASTM Standard E1527-13. Intrusive sampling (e.g., soil borings and groundwater sampling) was not performed as part of this Phase I ESA.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the Subject Property. The purpose of this investigation was limited to determining if there is reason to suspect the possibility of RECs at the Subject Property. It should be understood that even the most comprehensive Phase I ESA may fail to detect environmental liabilities at a particular Subject Property. Therefore, Langan cannot "insure" or "certify" that the Subject Property is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our client, with the customary standard of care exercised by professionals performing similar services under similar circumstances within the same jurisdiction.

The conclusions and opinions provided in this report are based solely on the specific activities as required for the performance of ASTM E1527-13 and are intended exclusively for the purpose stated herein, at the specified Subject Property as it existed at the time of our site visit.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Location and Description

The Subject Property is located at 130 Saint Felix Street in the Fort Greene neighborhood of Brooklyn, New York.

The Subject Property is identified as Brooklyn (Kings County) Tax Block 2111, Lot 40. The about 12,500-square-foot Subject Property is developed with an asphalt-paved parking lot. The Subject Property is located on an L-shaped city lot bounded by two multi-story Brooklyn Academy of Music buildings to the north, Saint Felix Street followed by multi-story residential buildings to the east, a multi-story mixed residential and commercial building (One Hanson Place) and a multi-story church building to the south, and Ashland Place followed by an active construction site to the west. New York City Transit (NYCT) subway tunnels are located beneath Lafayette Avenue to the north, Saint Felix Street to the east, and Ashland Place, Fourth Avenue, and Flatbush Avenue to the west and south of the Subject Property. Residential, commercial, and institutional buildings characterize the surrounding area.

According to the United States Geological Survey (USGS) Brooklyn Quadrangle 7.5-minute Series Topographic Map, the Subject Property sits at an elevation of about 45 feet above mean sea level. The Subject Property and surrounding area slope to the southwest toward the Gowanus Canal, which is located about a half mile southwest of the Subject Property. A site location plan is provided as Figure 1 and photographs showing the Subject Property are provided in Appendix A.

2.2 Description of Subject Property Improvements

Improvements at the Subject Property are summarized in the following table:

Site Improvements	
Size of the Subject Property	Approximately 12,500 square feet
Buildings/Spaces/Structures	Asphalt-paved parking lot
Unimproved Areas	None
Surface Water	None
Potable Water Source	Not applicable

Site Improvements	
Sanitary and Storm Sewer Utilities	New York City
Electrical Utilities	Not applicable
Construction Completion Date	Not applicable
General Construction Type	Not applicable
Cooling and Ventilation System Type	Not applicable
Heating System Type	Not applicable
Emergency Power	None identified

2.3 Title Records

Langan researched ownership records for the Subject Property at www.nyc.gov. The New York City Department of Finance – Office of the City Register did not provide ownership records for the Subject Property; however, an easement from October 28, 2013, listed 'One Hanson Place Condominium' as the grantee/buyer and 'CJUF II Hanson LLC' as the grantor/seller of the easement. The current owner of One Hanson Place, the southwestern adjoining property, was listed as 'CJUF II Hanson LLC'.

3.0 USER PROVIDED INFORMATION

3.1 User/Client Questionnaire

A User/Client questionnaire was provided to 130 Saint Felix Street LLC, to inquire about specialized information related to the Subject Property. Adam Zeidel, of Gotham Real Estate Developers, LLC, completed the questionnaire. Mr. Zeidel is not aware of any environmental cleanup liens, land use limitations, or environmental cleanups associated with the Subject Property. The completed User/Client questionnaire is included in Appendix B.

3.2 Previous Environmental Reports

Previous environmental reports were not provided by the client to Langan as part of this Phase I ESA.

4.0 RECORDS REVIEW

4.1 Environmental Records

A copy of regulatory database information was provided by EDR and is included in Appendix C. The EDR report is a listing of sites identified on select federal and state standard source environmental databases within the approximate search radius specified by ASTM Standard Practice for E1527-13. Langan reviewed each environmental database to determine if certain sites identified in the report are suspected to represent a potential impact to the Subject Property. Langan also reviewed "Orphan Sites" listed within the report. Orphan sites are those sites that could not be mapped due to inadequate address information. Any orphan sites that were identified by Langan within the ASTM search radii, either during the Subject Property reconnaissance or by cross-referencing to mapped listings, are addressed in the discussion below. All distances to adjacent properties are measured from the perimeter of the Subject Property.

The following table lists the number of sites by database within the prescribed search radius appearing in the EDR Report.

Database Record Summary			
Database Reviewed (Date of government version)	Minimum Search Area	Subject Property listed	Number of Sites Within Minimum Search Area
USEPA DATABASES			
National Priorities List (NPL) (12/16/2014)	1 Mile Radius	No	1
Delisted NPL (12/16/2014)	1/2 Mile Radius	No	0
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) and CERCLIS No Further Remediation Action Planned (NFRAP) (10/25/2013)	1/2 Mile Radius	No	0
Resource Conservation and Recovery Act (RCRA) Corrective Reports (CORRACTS) (12/9/2014)	1 Mile Radius	No	1
RCRA Treatment, Storage, and Disposal Facilities (TSDF) (12/9/2014)	1/2 Mile Radius	No	0
RCRA Generators (12/9/2014)	Subject Property and Adjoining	No	1
Facility Information System (FINDS) Database (1/18/2015)	Subject Property	No	0
Environmental Response Notification System (ERNS) (9/29/2014)	Subject Property	No	0

Database Record Summary			
Database Reviewed (Date of government version)	Minimum Search Area	Subject Property listed	Number of Sites Within Minimum Search Area
Engineering Controls (EC) Site Lists (9/18/2014)	Subject Property	No	0
Institutional Controls (IC) Site Lists (9/18/2014)	Subject Property	No	0
New York State Department of Environmental Conservation (NYSDEC) DATABASES			
Inactive Hazardous Waste Disposal Site (SHWS) (3/25/2015)	1 Mile Radius	No	4
Hazardous Substance Waste Disposal Site Inventory (HSWDS) (1/1/2003)	1/2 Mile Radius	No	0
Solid Waste or Landfill Facilities (SWF/LF) (4/8/2015)	1/2 Mile Radius	No	2
Leaking Tanks (LTANKS) (3/19/2015)	1/2 Mile Radius	No	55
SPILLS Information Database (NY SPILLS) (3/19/2015)	1/8 Mile Radius	No	48
EC Site Lists (3/25/2015)	Subject Property	No	0
IC Subject Site Lists (3/25/2015)	Subject Property	No	0
Voluntary Cleanup Program (VCP) (3/25/2015)	1/2 Mile Radius	No	0
Brownfields (3/25/2015)	1/2 Mile Radius	No	3
Petroleum Bulk Storage Facilities (PBS) Underground Storage Tanks (UST) and Aboveground Storage Tanks (AST) Databases (3/30/2015)	Subject Property and Adjoining	No	4
Chemical Bulk Storage (CBS) UST and AST Databases (1/1/2002)	Subject Property and Adjoining	No	0
Major Oil Storage Facilities (MOSF) UST and AST Databases (1/1/2002)	Subject Property and Adjoining	No	0
Registered Drycleaners (DRYCLEANERS) (1/12/2015)	1/4 Mile Radius	No	4
EDR (PROPRIETARY) DATABASES			
EDR Former Manufactured Gas Plant (MGP) Sites (NA)	1 Mile Radius (N/A)	No	2
Historical Cleaners (NA)	1/4 Mile Radius	No	14

NA Not Applicable; databases with a "Not Applicable" Minimum Search Radius are databases reviewed as part of the Phase I ESA but not required as per ASTM E1527-13.

A description of the reviewed databases is provided in the EDR Report (Appendix C). A summary of Subject Property database listings and other sites identified within the prescribed search area is presented below.

4.1.1 Federal Agency Database Findings

The Subject Property and/or sites within their respective minimum search distances as specified by ASTM E1527-13 were not listed in the following Federal Agency databases: Delisted NPL, CERCLIS, RCRA TSDF, FINDS, ERNS, EC, or IC.

The following summary describes the sites that were identified within the designated search radii:

National Priorities List

The NPL database identifies sites for priority cleanup under the Superfund Program. The Subject Property was not listed in the NPL database, however one listing was identified within the minimum search distance. The Gowanus Canal is identified in the NPL database in relation to sediments contaminated with PCBs and coal tar. The Gowanus Canal (EPA ID# NYN000206222) is located more than 2,700-feet southwest and down-gradient from the Subject Property. Due to the distance and down-gradient location from the Subject Property, the listing is not considered a REC.

CORRACTS Facilities List

CORRACTS is a list of handlers with RCRA Corrective Action Activity. This database identifies nationally-defined corrective action core events that have occurred for every handler that has had corrective action activity. The Subject Property was not listed in this database; however, one site, Patterson Chemical Co. Inc., was identified within one mile of the Subject Property. Patterson Chemical Co. Inc. is located more than 5,000 feet southwest and down-gradient from the Subject Property and is not considered a REC.

RCRA Generators

The RCRA Info database is USEPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous Waste Amendments (HSWA) of 1984. The database includes selective information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste or over 1 kg of acutely hazardous waste per month; small quantity generators (SQGs) generate between 100 kg and 1,000 kg of

hazardous waste per month; conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste or less than 1 kg of acutely hazardous waste per month, and RCRA NonGen, which do not presently generate hazardous waste.

The Subject Property was not listed in the database, however one listing was identified on an adjoining property and is described below:

Site Name: HSB BANK USA

Site Address: 1 Hanson Place – 2nd Floor

Location: This site adjoins the Subject Property to the southwest.

Description: This facility was listed as an CESQG in 2003, 2006, and 2007. Generated hazardous waste codes included D001 (non-listed ignitable wastes), D002 (non-listed corrosive wastes), D006 (cadmium), and F003 (spent non-halogenated solvents). No violations were listed for the facility. Due to the lack of information regarding a release associated with the waste generation, no violations associated with the listing, and the down-gradient location from the Subject Property, the listing is not considered a REC.

4.1.2 State Agency Database Findings

The Subject Property and sites within the respective minimum search distances as specified by ASTM E1527-13 were not listed in the following State Agency databases: HSWDS, EC, IC, VCP, CBS, or MOSF. The following summary describes the sites that were identified within the designated search radii:

State Hazardous Waste Sites (SHWS)

The SHWS database is a comprehensive listing of sites that are the state's equivalent to CERCLIS. These consist of priority sites planned for cleanup using state funds (state equivalent of Superfund) and/or potentially responsible parties.

The Subject Property was not listed in the SHWS database; however four properties, the Gowanus Canal, Former O.Z. Electrical (198 Douglass Street), Brooklyn Navy Yard (Kent Avenue), and Brooklyn Navy Yard Development Corp. (Flushing Avenue and Cumberland Street), were identified within one mile of the Subject Property. The SHWS sites are all located more than 2,700 feet and down-gradient from the Subject Property, and are not considered RECs.

Solid Waste or Landfill Facilities (SWF/LF) Database

The Solid Waste or Landfill Facilities (SWF/LF) database is a comprehensive listing of State permitted/recorded solid waste facilities. The Subject Property was not listed in the SWF/LF database; however, two properties, Baltic Recycling Corp. (524 – 26 Baltic Street) and Basin Haulage Inc. (462 – 470 Baltic Street) were identified within 1/2 mile of the Subject Property. The SWF/LF sites are located more than 2,200 feet and down-gradient from the Subject Property, and are not considered RECs.

Leaking Underground Storage Tanks Database

The LTANKS database contains an inventory of reported leaking storage tank incidents, including leaking underground storage tanks (USTs) and aboveground storage tanks (ASTs). As per ASTM E1527-13, the approximate minimum search distance required for LTANKS incidents is within 1/2 mile of the Subject Property. The Subject Property was not listed in the LTANK database.

A total of 55 LTANK sites were identified within a 1/2 mile radius of the Subject Property. Out of the 55 LTANK sites, 51 have been granted closed status by the NYSDEC, which indicates that they have been remediated to the satisfaction of the NYSDEC, and are therefore, not considered RECs.

Four LTANK incidents remain open. Of the four open LTANK incidents, three are located more than 1,400 feet and cross- or down-gradient from the Subject Property, and are not considered RECs. The remaining incident is described below:

Site Name: HSBC BANK

Site Address: 1 Hanson Place

Site Location: Adjoins the Subject Property to the southwest.

Description: A spill (NYSDEC Spill No. 0402131) was reported at One Hanson Place on May 18, 2004, when an unknown quantity of No. 2 fuel oil was released due to tank failure. According to the NYSDEC Spills Database, soil within the area was affected. According to the EDR report, two 7,000-gallon ASTs, believed to have been installed in 1928, were located in an oil tank room that has been completely filled with concrete. The ASTs are believed to have been abandoned in place. Borings were installed onsite and adjacent to the NYCT subway tunnel (underlying Ashland Place), located about 7 feet west of the site. Fuel oil impacts were observed in soil from about 4 to 40 feet bgs. About 0.5 to 1 inch of light non-

aqueous phase liquid (LNAPL) was observed in groundwater, measured at about 43 feet bgs. A work plan for delineation and exposure assessment was submitted to the NYSDEC by Environmental Resources Management (ERM) in November 2013. The spill was closed on April 14, 2015; however, no spill closure documentation was available for review. Soil, groundwater, and/or soil vapor at the Subject Property may have been affected by this open LTANKS incident; therefore, it is considered a REC.

SPILLS Database

The Spills database, maintained and updated by NYSDEC, is an inventory of sites where spills have been identified and reported to the NYSDEC. The Subject Property was not listed in the Spills database.

A total of 48 SPILLS sites were identified on surrounding properties located within 1/8-mile of the Subject Property. Out of the 48 SPILLS sites, 47 have been granted closed status by the NYS DEC, which indicates that they have been remediated to the satisfaction of the NYSDEC and are not considered RECs.

The remaining open Spills incident is located at a commercial parking lot located at 19 Lafayette Avenue, about 350 feet northwest (cross-gradient) from the Subject Property. According to the EDR report review and the NYSDEC Spills database, a spill (NYSDEC Spill No. 1401845) was reported at the site on May 20, 2014 due to equipment failure. An unknown quantity of unknown petroleum was encountered in soil. The contaminated soil was detected whilst Langan was onsite undertaking an unrelated geotechnical investigation. Sanborn maps of the area indicate that a 10,000-gallon tank may be located on the property. The cleanup is pending. According to Langan records regarding the spill, impacts are likely limited to soil media at the site, as no free product was measured on the groundwater table. This open spill is not considered a REC, as groundwater and/or soil vapor at the Subject Property was likely not affected.

Brownfield Sites

Brownfield sites are properties at which redevelopment or re-use may be complicated by the presence or potential presence of hazardous substances, pollutants, or contamination. The Subject Property was not listed as a Brownfield site; however, three Brownfield sites, Atlantic Terrace Cornerstone Project (669 Atlantic Avenue), Cinderella Cleaners (248 Flatbush Avenue), and 29 Flatbush Avenue, were identified within 1/2 mile of the Subject Property. All three sites

are located more than 900 feet cross- or down-gradient from the Subject Property, and are not considered RECs.

PBS UST and AST Database

The Petroleum Bulk Storage (PBS) UST and AST database contains records of registered USTs and/or ASTs. A registered PBS UST and/or AST does not constitute a REC, in and of itself. However, properties listed on the UST and/or AST lists with a reported leak, spill, or release could constitute a REC with respect to the Subject Property. As per ASTM E1527-13, the minimum search distance required for USTs and ASTs is the Subject Property and adjoining properties.

The Subject Property was not listed in the PBS database, however, four adjoining properties were listed and are described below:

Site Name: BROOKLYN ACADEMY OF MUSIC – SOUTH

Site Address: 113 Flatbush Avenue

Site Location: Adjoins Subject Property to the west.

Description: The registered tanks listed in the PBS database (PBS No. 2-612310) are in the table below:

Tank ID	Tank Location	Product Stored	Status	Capacity (Gal.)
001	Underground	No. 2 fuel oil	Closed - Removed	275
002	Underground	No. 2 fuel oil	Closed - Removed	275
003	Underground	No. 2 fuel oil	Closed - Removed	1,000

No spills or LTANK incidents are associated with the USTs. Because of the lack of reported releases associated with these tanks, the PBS listing is not considered a REC.

Site Name: BROOKLYN MUSIC SCHOOL

Site Address: 126 Saint Felix Street

Site Location: Adjoins Subject Property to the northeast

Description: PBS No. 2-246581 corresponds to an in-service 2,000-gallon capacity UST containing No. 2 fuel oil. No spills or LTANK incidents are associated with the

UST. Because of the lack of reported releases associated with these tanks, the PBS listing is not considered a REC.

Site Name: ONE HANSON PLACE

Site Address: 1 Hanson Place

Site Location: Adjoins Subject Property to the southwest

Description: PBS No. 2-607998 corresponds to two unregulated closed-in-place 7,000-gallon and 7,500-gallon capacity ASTs, each containing No. 2 fuel oil. As discussed above, these ASTs are associated with an open LTANKS incident on the site, which is considered a REC.

Site Name: THE BROOKLYN ACADEMY OF MUSIC ANNEX

Site Address: 321 Ashland Place

Site Location: Adjoins Subject Property to the northwest

Description: PBS No. 2-611272 corresponds to a temporarily out of service 1,900-gallon capacity AST containing No. 6 fuel oil, installed in January 1985 and closed in February 2010. Based on an absence of documented violations, this UST is not considered a REC.

Registered Drycleaners (DRYCLEANERS)

The DRYCLEANERS database is a listing of registered dry cleaning facilities. Dry cleaning facilities are associated with the use of tetrachloroethylene (PCE), a solvent that has the potential to infiltrate groundwater and can readily migrate to surrounding properties. The Subject Property was not listed in the DRYCLEANERS database; however, four DRYCLEANERS sites were identified within 1/4 mile of the Subject Property. Two of these dry cleaners are located more than 500 feet and down-gradient of the Subject Property, and are not considered RECs. The remaining two dry cleaner listings are discussed below:

Site Name: FRENCH GARMENTS CLEANERS

Site Address: 85 Lafayette Avenue

Location: About 790 feet northeast (up-gradient) of the Subject Property

Description: Registration effective date was listed as July 15, 2002. The facility appears to have been shut down. Generated waste information was not provided for the listing.

Site Name: DIFFERENCE CLEANERS II

Site Address: 696 Fulton Street

Location: About 850 feet east (up-gradient) of the Subject Property

Description: Registration effective date was not listed. The site was also listed as a RCRA-LQG in 1991, a RCRA Non-Gen in 1999, a RCRA-CESQG in 2006m and a RCRA-SQG in 2007. According to RCRA and manifest listings for the site, generated hazardous waste include spent halogenated solvents (F002). No violations were listed for the site.

Details regarding operations conducted at this site and chemicals used were not provided for the listings. It is unknown if dry cleaning operations are currently performed, or were performed in the past, on these properties; therefore, these dry cleaner listings are considered a REC.

4.1.3 Other Database Findings

Manufactured Gas Plant Sites

The MGP sites database is a proprietary database that includes records of historical manufactured coal gas plants compiled by EDR. The Subject Property was not listed in the MGP database; however, two sites, Fulton Works (Degraw Street and Nevins Street) and Fulton Municipal Works (Nevins, Degraw and Sackett Streets) were identified within a one-mile radius of the Subject Property. Both listings are located more than 2,900 feet down-gradient from the Subject Property, and are not considered a RECs.

Historical Cleaners

The historical dry cleaner sites database is a proprietary database that includes records of dry cleaner sites compiled by EDR. The Subject Property was not listed in the historical dry cleaners database. Fourteen historical dry cleaners sites were identified within 1/4 mile of the Subject Property. Six of these historical dry cleaners sites were located more than 200 feet cross- or down-gradient of the Subject Property, and are not considered RECs. The remaining eight historical dry cleaners sites are discussed below:

Site Address: 666 Fulton Street

Location: About 550 feet northeast (up-gradient) of the Subject Property

Description: 'Fulton One Laundromat Inc' was listed at the site for the years 2001, 2002, and 2003.

Site Address: 668 Fulton Street

Location: About 600 feet northeast (up-gradient) of the Subject Property

Description: 'Big Apple Cleaners' was listed at the site for the year 2010, and 'Yes Cleaners' was listed at the site for the years 2011 and 2012.

Site Address: 674 Fulton Street

Location: About 600 feet northeast (up-gradient) of the Subject Property

Description: 'Washington Courtney Fashion Studio' (or some variation thereof) was listed at the site for the years, 2004, 2010, and 2011.

Site Address: 81 Lafayette Avenue

Location: About 700 feet northeast (up-gradient) of the Subject Property

Description: 'Wash & Play Lotto Laundromat' was listed at the site for the years 2000, 2002, 2003, and 2010.

Site Address: 85 Lafayette Avenue

Location: About 800 feet northeast (up-gradient) of the Subject Property

Description: 'French Garment Cleaners' was listed at the site for the years 2003, 2006, and 2007.

Site Address: 696 Fulton Street

Location: About 850 feet east (up-gradient) of the Subject Property

Description: 'Different Cleaners' was listed at the Subject Property for the years 2005 through 2008, and 2010 through 2012.

Site Address: 769 Fulton Street

Location: About 900 feet east (up-gradient) of the Subject Property

Description: 'Louisma Laundromat' was listed at the site for the years 2007 through 2009.

Details regarding operations conducted at these sites, chemicals used, and reported violations were not provided for the listings. It is unknown if dry cleaning operations were performed on these properties in the past; therefore, these historical dry cleaner listings are considered a REC.

4.1.4 Local Regulatory Agency Findings

Freedom of Information Act Requests

FOIA requests were submitted to the following federal, state, and local agencies via written correspondence on May 14, 2015:

- New York City Department of Environmental Protection (NYCDEP);
- New York City Department of Health (NYCDOH);
- New York City Fire Department (FDNY);
- New York State Department of Health (NYSDOH);
- NYSDEC; and
- USEPA, Region 2.

Complete responses to the FOIA requests have not yet been received. Copies of the FOIA requests and any responses received are included in Appendix D. Should pending responses alter the conclusions provided within this report, we will issue the modified conclusions as an addendum.

New York City Department of Buildings

Langan conducted a records search through the NYCDOB online query system on May 13, 2015, for the Subject Property. The following is a summary of the findings.

The Department of Finance classification for the Subject Property is 'G6-GARAGE/GAS STAT'N'. Certificates of Occupancy (COs) and boiler records were not listed for the Subject Property.

Classification of the Subject Property as a garage/gas station is considered a REC, as undetected releases of chemicals associated with these operations may have adversely impacted soil, groundwater, and/or soil vapor on the Subject Property.

Copies of the NYCDOB property profile and other pertinent NYCDOB records are provided in Appendix E.

New York City Department of City Planning

According to the New York City Department of City Planning (NYCDCP) Zoning Map 16c, the Subject Property is located in a C6-1 commercial district, which permits a wide range of high-

bulk commercial uses and allows a floor area ratio (FAR) of 6.0. The Subject Property does not contain an E-Designation for Hazardous Materials, Air Quality or Noise. A copy of the zoning map is provided in Appendix F.

4.2 Physical Setting Sources

4.2.1 Topography

According to the United States Geological Survey (USGS) Brooklyn Quadrangle 7.5-minute Series Topographic Map, the Subject Property sits at an elevation of about 45 feet above mean sea level. The general topographic gradient of the Subject Property and surrounding properties slopes to the southwest toward the Gowanus Canal, which is located about a half mile southwest of the Subject Property.

4.2.2 Geology

Geological surface features (e.g., rock outcroppings) were not observed on the Subject Property. Based on a review of the "Bedrock and Engineering Geologic Maps of Bronx County and Parts of New York and Queens Counties, New York, and Parts of Bergen and Hudson Counties, New Jersey" (Baskerville Map), dated 1992 and prepared by Charles A. Baskerville, the underlying bedrock formation in this area is the Hartland Formation, which is typically encountered in the area of the Subject Property at depths greater than 100 feet. The Harland Formation consists of gray schist with quartz, biotite, and muscovite. Based on geotechnical investigations conducted by Langan within the area, the depth to bedrock is greater than 90 feet below ground surface (bgs).

4.2.3 Hydrology

Groundwater flow is typically topographically influenced, as shallow groundwater tends to originate in areas of topographic highs and flows toward areas of topographic lows, such as rivers, stream valleys, ponds, and wetlands. A broader, interconnected hydrogeologic network often governs groundwater flow at depth or in the bedrock aquifer. Groundwater depth and flow direction are also subject to hydrogeologic and anthropogenic variables such as precipitation, evaporation, extent of vegetation cover, and coverage by impervious surfaces. Other factors influencing groundwater include depth to bedrock, the presence of artificial fill, and variability in local geology and groundwater sources or sinks.

Based on the general topography of the surrounding area, inferred groundwater flow is to the southwest toward the Gowanus Canal, which is located about a half mile southwest of the Subject Property. According to a Phase II Environmental Site Assessment performed by

Langan on the northern adjoining property (321 Ashland Place) in 2008, depth to groundwater is about 38 feet bgs.

5.0 HISTORICAL USE INFORMATION

Langan reviewed available historic resources (including aerial photographs, Sanborn and topographic maps, and city directories) dated 1887 to 2013. Findings of the reviews are presented below.

5.1.1 Aerial Photographs

Langan reviewed aerial photographs of the Subject Property and surrounding areas for the years 1924, 1951, 1954, 1961, 1966, 1974, 1978, 1980, 1984, 1991, 1994, 2006, 2009, and 2011. The photographs indicate that the Subject Property was located in a densely developed urban by as early as 1924. In the 1924 aerial photograph, the Subject Property, and adjoining and surrounding properties appear to be improved with one- to two-story buildings. In the 1951 and 1954 aerial photographs, two buildings are shown north and south of the Subject Property; however, due to the poor quality of the image, it is unclear whether buildings were still present on the Subject Property. From 1961 to 2011, a parking lot is shown on the Subject Property. From 1974 to 2011, a parking lot occupies the triangular-shaped western adjoining property (across Ashland Place). From 1924 to 2009, the Long Island Rail Road (LIRR) is shown to the southeast of the Subject Property. In the 2011 aerial photograph, the LIRR is no longer shown and construction of the Barclays Center to the southeast of the Subject Property is shown.

The review of the aerial photographs did not identify RECs. Copies of the aerial photographs are included in Appendix G.

5.1.2 Sanborn Fire Insurance Maps

A search for historical fire insurance maps for the Subject Property and surrounding properties for the years 1887, 1904, 1915, 1938, 1950, 1969, 1977, 1979 through 1982, 1986 through 1989, 1991, 1992, 1993, 1995, 1996, and 2001 through 2007, was conducted by EDR and reviewed by Langan. Sanborn Maps constitute a database of prior site uses of real property for many cities and towns in the United States. The Subject Property and surrounding area were shown as developed in all reviewed maps.

Historical use of the Subject Property includes the following:

- From 1887 to 1915, the Subject Property was completely occupied by several multi-story dwellings (with basements depicted beginning in the 1904 Sanborn map).
- In 1938, the western portion of the Subject Property appeared blank, and the eastern portion of the Subject Property was occupied by four multi-story dwellings.

- From 1950 to 2007, a parking lot was located on the Subject Property, with a small single-story building located in the southwestern corner of the Subject Property beginning in 1995.

The Subject Property has been used as a parking lot since at least 1950. Considering the Department of Finance classification of the Subject Property as a garage/gas station, it is likely that auto repair or service activities also took place on the Subject Property, which is considered a REC. Potential releases of petroleum products, solvents, and/or other hazardous materials may have adversely impacted soil, groundwater, and/or soil vapor at the Subject Property.

Surrounding properties have generally been occupied by dwellings, stores, parking lots, performing arts spaces, and a church, and included the following notable uses:

- Block 2111, Lot 15, located about 100 feet north of the Subject Property, contained a printer (part of the Academy of Music) from 1915 to 1938;
- Block 2113, Lots 22 and 31, located about 350 feet northeast of the Subject Property, contained a used cars lot from 1938 to 1950;
- Block 2113, Lot 37, located about 400 feet northeast of the Subject Property, contained a laundry from 1950 to 1996;
- Block 2110, Lot 3, adjoining the Subject Property to the west, contained a drug manufacturer and medical laboratory from 1938 to 1969;
- Block 2108, Lot 1, located about 500 feet north of the Subject Property, contained a filling station from 1969 to 1993;

Historic uses of these adjoining and surrounding properties is considered a REC, as potential releases of petroleum products, solvents, and/or other hazardous materials may have adversely impacted groundwater and/or soil vapor at the Subject Property.

Copies of the maps are included as Appendix H.

5.1.3 Historical USGS Topographic Quadrangles

Langan reviewed historical USGS Topographic Quadrangles obtained from EDR for information regarding past uses of the Subject Property. Quadrangle maps were available for the years 1900, 1924, 1947, 1956, 1967, 1979, and 1995. Based on a review of the historic topographic maps, the Subject Property was developed within a dense urban area as early as 1900. Beginning in the 1900 map, Prospect Park can be seen to the south of the Subject Property. Beginning in 1947, the US Navy Yard can be seen to the northeast and the Gowanus Canal to

the southwest of the Subject Property. Beginning in 1956, Long Island University can be seen to the northwest and Brooklyn Hospital to the north of the Subject Property

The review of the historic topographic maps did not identify RECs. Copies of the topographic maps are provided in Appendix I.

5.1.4 City Directories

The City Directory Abstract, obtained from EDR, is a review of available business directories, including city, cross-reference, and telephone directories, at approximately five-year intervals for the years spanning 1928 through 2013.

From 1928 to 1997, several residences were listed for the Subject Property. Multiple commercial businesses, schools, churches, and residences were listed at adjoining and surrounding properties.

The review of city directories did not identify RECs. A copy of the City Directory Abstract is provided in Appendix J.

5.1.5 Environmental Lien Search

Langan contracted EDR to conduct an Environmental Lien search for the Subject Property. The results of the search, which included a compilation of available data and verification of the findings with the appropriate regulatory authorities, revealed that there are no Environmental Liens or other Activity and Use Limitations (AUL) associated with the Subject Property. A copy of the Environmental Lien Search is provided in Appendix K.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

The site reconnaissance was conducted in a systematic manner focusing on the spatial extent of the Subject Property and then progressing to the adjacent and surrounding properties. The assessment of the adjacent and surrounding properties was limited to identifying, if possible, any indications of past or current use that may involve the use, storage, disposal, or generation of hazardous substances or petroleum products; noting the general type of current use; the general topography of the surrounding area; and providing a general description of adjoining or adjacent structures.

See Appendix A for site reconnaissance photos.

6.1.1 Date and Time of Inspections

The site reconnaissance was performed at 1:00 pm on May 21, 2015, by Natasha Bell of Langan. The weather at the time of the inspection was overcast and approximately 55°F.

6.1.2 General Site Setting and Reconnaissance Observations

The approximately 12,500-square-foot Subject Property is developed with an asphalt-paved parking lot. At the time of the site reconnaissance, scaffolding surrounding the southwest adjoining building (One Hanson Place) was observed on the Subject Property, and various construction materials were located in the southwest corner of the Subject Property. The condition of asphalt beneath the stored construction materials could not be observed, and is considered a data gap.

Minor vegetation was observed along the northern and southern boundaries of the Subject Property. Three two-yard containers and one about 65-gallon container, all containing trash (paper, cardboard, black trash bags, furniture, etc.), were observed along the northern boundary of the Subject Property. Two drains were observed on the Subject Property: one in the northwestern corner and one in the center of the Subject Property. The drains appeared to be full of trash and leaves. One square metal-covered hatch, measuring about four square feet, was observed in the northwestern portion of the Subject Property. Two square metal-covered hatches, each measuring about one square foot, were observed in the center of the Subject Property. One of the hatches appeared to contain soil and debris (the other hatch appeared to be welded shut). One monitoring well was observed along the southern boundary (adjoining One Hanson Place) of the Subject Property.

Concrete patches and patched asphalt were observed throughout the Subject Property, which are likely indicative of USTs. The likely presence of unregistered USTs at the Subject Property, in conjunction with the Department of Finance classification of the Subject Property as a garage/gasoline station, is considered a REC, as potential releases of petroleum products, solvents, and/or other hazardous materials may have adversely impacted soil, groundwater, and/or soil vapor at the Subject Property.

The Subject Property was bounded by two multi-story Brooklyn Academy of Music buildings to the north, a chain-linked fence followed by Saint Felix Street to the east, a multi-story mixed residential and commercial building (One Hanson Place) and a multi-story church building to the south, and a chain-linked fence followed by Ashland Place to the west.

Pits, Ponds, Lagoons

Pits, ponds and lagoons were not observed at the Subject Property.

Pools of Liquid

Pools of liquid were not observed at the Subject Property.

Storm Drains, Wells, and Cisterns

Two storm drains were observed at the Subject Property. Both drains appeared to be filled with trash and leaves. One monitoring well was observed in the center of the Subject Property. One monitoring well was observed along the southern boundary (adjoining One Hanson Place) of the Subject Property.

Polychlorinated Biphenyl (PCB) Transformers and Suspect Equipment

PCT transformers and suspect equipment were not observed at the Subject Property.

Storage Containers and Drums

Three two-yard containers and one about 65-gallon container, all containing trash (paper, cardboard, black trash bags, furniture, etc.), were observed along the northern boundary of the Subject Property.

Chemical containers, ranging in size from about one to five gallons, were observed near the active work area beneath scaffolding in the southwest corner of the Subject Property. Observed chemicals include muriatic acid, acetone, sealant, paint, and cement mix. Stored chemicals at the Subject Property is considered a de minimis condition.

Air Emissions or Wastewater Discharges

Air emissions or wastewater discharges were not observed at the Subject Property.

Floor Drains, Sumps, and Sewage Ejector Pit

Floor drains, sumps, and sewage ejector pits were not observed at the Subject Property.

USTs or ASTs

A fill port (labeled as 'FUEL OIL FILL #2') and vent pipe were observed at the northern wall of the southwestern adjoining building (One Hanson Place). The fill port and vent pipe are likely associated with one or both of the known closed-in-place ASTs located there. As mentioned in Section 4.1, a spill involving the ASTs was reported at One Hanson Place in 2004, when an unknown quantity of No. 2 fuel oil was released due to tank failure. Soil, groundwater, and/or soil vapor at the Subject Property may have been affected by this spill incident and associated ASTs; therefore, it is considered a REC.

Stained or Discolored Soil

The Subject Property is entirely covered with asphalt or concrete. Stained or discolored soil was not observed during the Phase I site reconnaissance.

Leachate or Seeps

Leachate or seeps were not observed at the Subject Property.

Adjoining and Surrounding Property Uses

The Subject Property was bounded by two multi-story Brooklyn Academy of Music buildings to the north, Saint Felix Street followed by multi-story residential buildings to the east, a multi-story, mixed residential and commercial building (One Hanson Place) and a multi-story church building to the south, and Ashland Place followed by an active construction site to the west.

Residential, commercial, and institutional buildings characterize the surrounding area.

Site Reconnaissance Conclusions

The following conclusions were made based on the site Reconnaissance:

- Concrete patches and patched asphalt were observed throughout the Subject Property, which are likely indicative of USTs. The likely presence of unregistered USTs at the

Subject Property, in conjunction with the Department of Finance classification of the Subject Property as a garage/gasoline station, is considered a REC, as potential releases of petroleum products, solvents, and/or other hazardous materials may have adversely impacted soil, groundwater, and/or soil vapor at the Subject Property.

- Soil, groundwater, and/or soil vapor at the Subject Property may have been affected by ASTs and associated known spill incident at the southwestern adjoining property (One Hanson Place); therefore, it is considered a REC.
- Chemical containers, ranging in size from about one to five gallons, were observed near the active work area beneath scaffolding in the southwest corner of the Subject Property. Observed chemicals include muriatic acid, acetone, sealant, paint, and cement mix. Stored chemicals at the Subject Property is considered a de minimis condition.
- The condition of asphalt beneath the stored construction materials in the southwest corner of the Subject Property could not be observed, and is considered a data gap.

7.0 INTERVIEWS

7.1 Subject Property Owner/Occupant

The owner of the Subject Property was not interviewed as part of this Phase I ESA.

7.2 Owners/Tenants of Adjacent Properties

Owners/tenants of adjacent properties were not interviewed as part of this Phase I ESA.

8.0 ADDITIONAL SERVICES

8.1 Radon

Radon is a colorless, odorless radioactive gas that results from the natural breakdown of uranium minerals in soil, rock, and water, which subsequently enters the atmosphere. It can concentrate in buildings, entering through cracks and other penetrations of a building foundation. Some areas are more likely to have elevated concentrations of radon than others, reflecting subsurface lithologic conditions.

According to the USEPA radon map, New York (including Brooklyn) is considered a Zone 3 area, which indicates the predicted average indoor radon levels are less than 2 picoCuries per liter (pCi/L). The NYSDOH maintains a database of radon test results on a local and county level. According to the NYSDOH, 441 basement and 102 first floor radon tests have been conducted in Kings County with results indicating that 9.8% of basements and 2.0% of living areas have radon concentrations above the USEPA action level of 4 pCi/L. According to Federal Area Radon Information for Kings County, as reported in the EDR Radius Map Report, a total of 51 radon tests have been conducted in Bronx County, with an average radon level of 0.750 pCi/L in living areas. Based on this information, it is unlikely that elevated levels of radon gas are present at the Subject Property.

8.2 ACM, LBP and PCBs

A formal survey to identify asbestos-containing material (ACM), lead-based paint (LBP) and/or PCB-containing material was not conducted as part of this Phase I ESA.

9.0 DEVIATIONS AND DATA GAPS

9.1 Deviations

Langan has performed a Phase I ESA of the Subject Property utilizing a standard of good commercial and customary practice that is consistent with the ASTM E1527-13. Significant deviations were not made to the above referenced standards.

9.2 Data Gaps

In order to address data gaps, additional sources of information may be consulted. According to ASTM E 1527-13, Section 8.3.2.3, "historical research is complete when either: (1) the objectives in 8.3.1 through 8.3.2.2 are achieved; or (2) data failure is encountered. Data failure occurs when all standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. If data failure is encountered, the report shall document the failure and, if any of the standard historical sources were excluded, give the reasons for the exclusion."

This Phase I ESA was completed with the following data gaps:

- Complete responses to all FOIA requests have not been received.
- The condition of asphalt beneath the stored construction materials in the southwest corner of the Subject Property could not be observed during the site reconnaissance.

Sufficient information has been provided from other data sources to render conclusions regarding the presence of RECs at the Subject Property. As such, this data gap is not expected to impact the overall conclusions of the Phase I ESA. Should additional information provided in the FOIA responses alter the conclusions of this Phase I ESA, we will issue an addendum to this report.

10.0 FINDINGS, CONCLUSIONS, AND OPINIONS

This Phase I ESA was conducted in accordance with the ASTM International (ASTM) Practice E1527-13 (Standard Practice for ESA: Phase I ESA Process), which also satisfies the United States Environmental Protection Agency's (USEPA) All Appropriate Inquiry (AAI) Rule needed to qualify for the bona fide prospective purchaser liability protections available under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA). The objective of this Phase I ESA was to attempt to identify the presence or likely presence, use, or release on the Subject Properties of hazardous substances or petroleum products as defined in ASTM E1527-13 as a recognized environmental condition (REC).

The Phase I ESA identified the following RECs associated with the Subject Property:

REC 1 – Historical Use of the Subject Property

According to Sanborn maps, the Subject Property has been used as a parking lot since at least 1950. The Department of Finance classification of the Subject Property is as a garage/gasoline station. Auto repair or service activities may have taken place on the Subject Property, which is considered a REC. Additionally, during the site reconnaissance, concrete patches and patched asphalt were observed throughout the Subject Property, which are likely indicative of USTs. Potential releases of petroleum products, solvents, and/or other hazardous materials may have adversely impacted soil, groundwater, and/or soil vapor at the Subject Property.

REC 2 – Historical Use of Adjoining and Surrounding Properties

The Environmental Database and Sanborn Map review identified the following notable uses on adjoining and surrounding properties with the potential to impact groundwater and/or soil vapor at the Subject Property:

- Drug manufacturer and medical laboratory from 1938 to 1969 and dry cleaner from 2003 to 2007 (western adjoining);
- Printer from 1915 to 1938 (about 100 feet north);
- Used cars lot from 1938 to 1950 (about 350 feet northeast);
- Laundry from 1950 to 1996 (about 400 feet northeast);
- Filling station from 1969 to 1993 (about 500 feet north);
- Dry cleaner from 1991 to 2012 (about 850 feet east);

- Dry cleaner from 2001 to 2003 (about 550 feet northeast);
- Dry cleaner from 2010 to 2012 (about 600 feet northeast);
- Dry cleaner from 2004 to 2011 (about 600 feet northeast)
- Dry cleaner from 2000 to 2010 (about 700 feet northeast); and
- Dry cleaner from 2007 to 2009 (about 900 feet east).

These historical uses of adjoining and surrounding properties are considered a REC. Unreported releases of solvents, petroleum products, or other hazardous substances associated with these historical uses may have impacted the groundwater and/or soil vapor at the Subject Property.

Historic use of the adjacent sites also results in a spill (NYSDEC Spill No. 0402131) reporting at One Hanson Place on May 18, 2004, when an unknown quantity of No. 2 fuel oil was released due to tank failure. Fuel oil impacts were observed in soil from about 4 to 40 feet below grade surface (bgs). Petroleum free phase product was observed on groundwater, which was measured at about 43 feet bgs. A work plan for delineation and an exposure assessment was submitted to the New York State Department of Environmental Conservation (NYSDEC) in November 2013. The spill was closed by NYSDEC on April 15, 2015; however, closure documentation was not available for review. Groundwater and/or soil vapor at the Subject Property may have been affected by this spill incident and associated tanks.

Neither Historic RECs (HRECs) nor Controlled RECs (CRECs) were identified.

Chemical containers, ranging in size from about one to five gallons, were observed during the site reconnaissance near the active work area beneath scaffolding in the southwest corner of the Subject Property. Observed chemicals include muriatic acid, acetone, sealant, paint, and cement mix. Stored chemicals at the Subject Property is considered a de minimis condition.

12.0 STATEMENT OF QUALIFICATIONS AND SIGNATURES

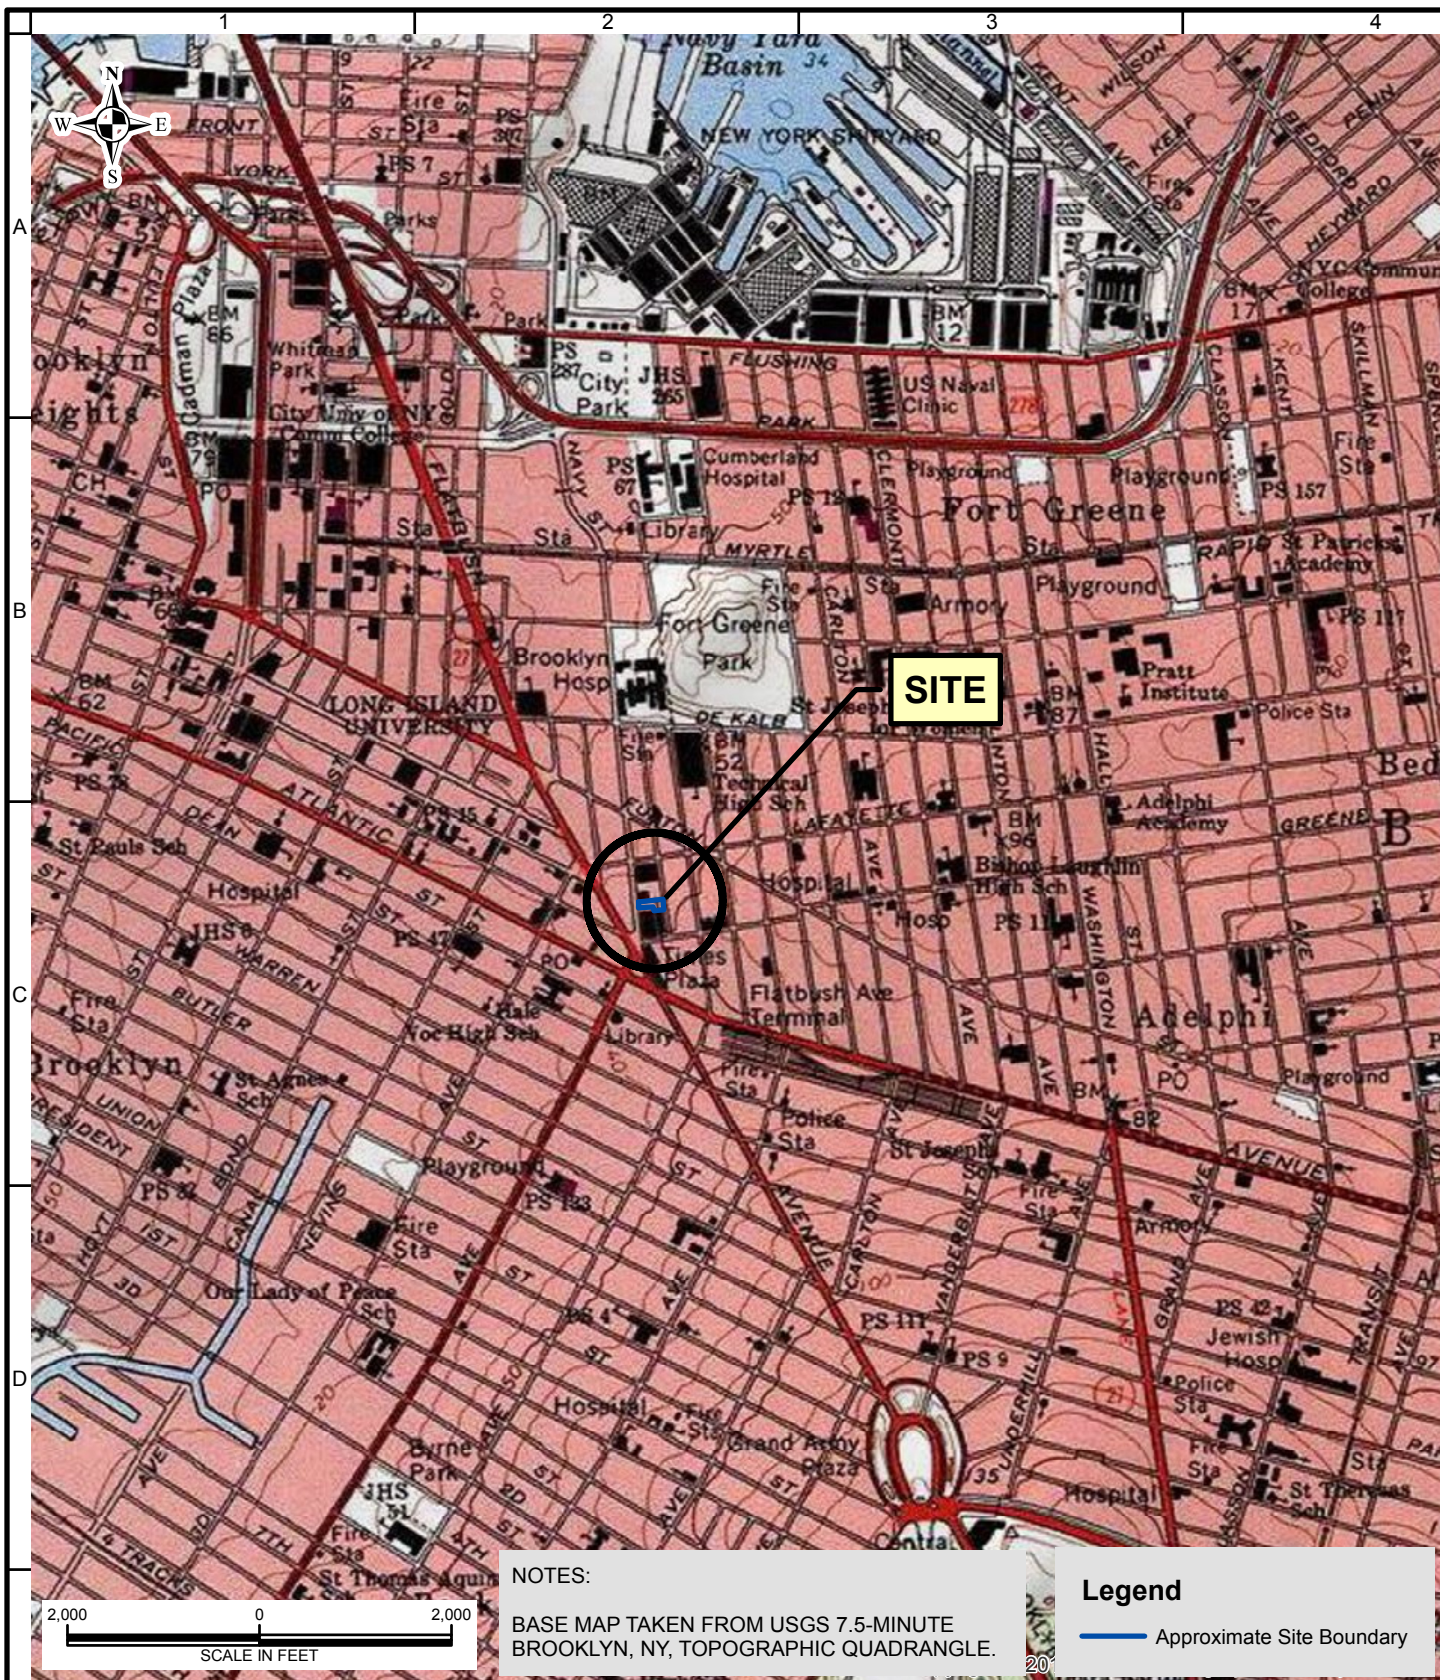

Langan declares that, to the best of its professional knowledge and belief, the personnel who performed this Phase I ESA meet the definition of Environmental Professional as defined in Subsection 312.10 of 40 CFR 312 and that they have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Properties. They have developed and performed the Phase I ESA in conformance with the standards and practices set forth in ASTM Practice E1527-13, which also satisfies the USEPA AAI Rule. Resumes outlining the qualifications of the Environmental Professionals who performed this Phase I ESA are provided in Appendix L.

User/Client Questionnaire

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The User is defined as the party seeking to use Practice E1527 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. These inquiries must also be conducted by the EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

Required Information

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

LANGAN

(1.) Environmental liens that are filed or recorded against the property (40 CFR 312.25).

Yes ☐ No ☐

Did a search of recorded land title records (or judicial records, where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Note 1 – In certain jurisdictions, federal, tribal, state or local statutes or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

(2.) Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi)).

Yes ☐ No ☐

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Yes ☐ No ☒

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Yes ☒ No ☐

- (a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Part 5.] ☒
- (b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? ☐ N/A

(5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30).

Yes ☐ No ☒

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- (a.) Do you know the past uses of the property? ☐ ☒
- (b.) Do you know of specific chemicals that are present or once were present at the property? ☐ ☒
- (c.) Do you know of spills or other chemical releases that have taken place at the property? ☐ ☒
- (d.) Do you know of any environmental cleanups that have taken place at the property? ☐ ☒

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Yes ☐ No ☒

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/16/2014 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/09/2014 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 9 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2014 has revealed that there are 12 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 03/25/2015 has revealed that there are 4 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 04/08/2015 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 03/19/2015 has revealed that there are 55 NY LTANKS sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 03/19/2015 has revealed that there are 48 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2014 has revealed that there are 42 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
FULTON WORKS	DEGRAW STREET AND NE	SW 1/2 - 1 (0.562 mi.)	AU289	895
FULTON MUNICIPAL WOR	NEVINS, DEGRAW AND S	SW 1/2 - 1 (0.594 mi.)	AU291	899

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 9 EDR US

EXECUTIVE SUMMARY

Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 14 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was

"ENGELHARDT"Lisa Lukeshides: Con Ed ERT, 12/24/97 - The total quantity of transformer oil (<10 ppm) is 20 gallons and it is presumed to have entered the sewer. A 16" public sewer connection was found in the vault. It was discovered that there were three adjacent vaults involved in this spill. TM#941 was cleaned up on Dec 2. The remaining two vaults V889 and V2754 are partially clean awaiting the removal of the transformers only. 3/22/98 e-mail from Con Ed ERT Lukshides: All three vaults were cleaned as of 2/9/98. One of the transformers did not hold a tightness test and was removed. Information on it's replacement will follow. 4/13/98 from Brooklyn Customer Service Environmental Manager Steve Zalloughi: On 2/9/98 Environmental Operations reported that they recleaned vaults V - 2754, 889 & 941 and removed Yellow Stop Tag # 03496. The new transformer is in and this job is closed out. See Incident # 113729 for full report.
Remarks: transformer leaked unk qty in vault - 10 ppm pcb - unk qty entered nyc sewer system

DEC Memo: e2mis no. 157463:3/3/05 - 1755hrs - Guy Palladino # 46015 OS Networks reports while performing a phase check on fdr 1B60 found 10 gallons unknown oil on 100 gallons water in V4295. This unit is on fdr 1B60. There is a drain to adjacent structure but after inspecting that structure he determined there is no evidence of oil in same. Unit is at min + level and Palladino will perform pressure test. Will advise of the results of same. Sample has been taken from unit - chain of custody # EE09207 - E priority. Env. stop tag # 37302 placed. Historical records indicate pcb results to be 19ppm - dated 10/9/02. Clean up pending sample results.Update - 1900hrs Manhole records

indicate that there is a sewer drain from adjacent vault (V4219). This vault has not been affected by oil - only has water in it. Drain appears to be clogged or sealed since water is sitting in structure. Palladino is performing pressure test at this time. Update - 1910hrs Advised E. Cortes of the above information that the adjacent structure V4219 appears to have a sewer drain as per the mh information and that it is not affected by oil. EPA# 004129326 Update - 3/3/05 1930hrs G. Palladino reports unit failed pressure test. Unit being taken off on a Priority 2. Cannot take fdr 1b60 off until fdr 1b51 comes back online. Networks will remain on location. Courier is picking up sample. From: Brown, Brian Sent: Thursday, March 03, 2005 11:16 PM To: Neville, Christine Subject: Update for VS Ashland Ave & Willoughby St. (Incident # 157463) Update for VS Ashland Ave & Willoughby St. (Incident # 157463): An >50 Tanker arrived at V4295 and pumped out the oil from the structure. The Environmental Crew left the location. A network Crew remains at the location with the setup. Lab Sequence Number: 05-01869-001 Date Approved: 3/04/2005 TOTAL PCB 26 ppm 3/04/2005 12:10 HRS. -- G. PALLADINO OF EQUIPMENT GROUP REPORTS HE CAME BACK OUT TO RE-INSPECT UNIT AFTER OIL & WATER WAS REMOVED FROM THE VAULT. ADDED 10 GAL OF TRANSFORMER OIL TO UNIT, BRINGING IT TO A "50" OIL LEVEL. PRESSURE-TESTED UNIT AT 7 LBS. FOR 2 HOURS AND PRESSURE DID NOT DROP. HE ALSO SEES WHAT APPEARS TO BE FUEL OIL COMING THROUGH WALLS OF VAULT. THIS IS A POSSIBLE THIRD PARTY SPILL SINCE VAULT IS LOCATED ALONGSIDE HEATING FACILITY BUILDING FOR BROOKLYN HOSPITAL AND THEY ARE DOING WORK ON BOILERS. UPON THIS FURTHER INSPECTION, HE DETERMINED TRANSFORMER IS NOT LEAKING AT THIS TIME, BUT WILL FOLLOW-UP AND RE-INSPECT OIL LEVEL IN A WEEK. HE ALSO TOOK TWO OIL SAMPLES FROM STRUCTURE: ONE FOR OIL ID TEST AND ONE FOR PCB TEST. HE ALSO REQUESTED I NOTIFY EH&S TO FOLLOW-UP ON POSSIBLE THIRD-PARTY SPILL. 3/04/2005 12:25 HRS. -- I CONTACTED ON CALL EH&S REP. EDGAR CORTES, HE REPORTS HE ALREADY SPOKE WITH PALLADINO ABOUT INCIDENT AND REQUESTED A FLASH POINT SAMPLE BE TAKEN. I CALLED G. PALLADINO BACK AND HE SAID HE WILL MARK CHAIN OF CUSTODY FORM FOR OIL ID AND FLASHPOINT TESTS. SINCE ORIGINAL PCB RESULTS WERE FOR SAMPLE FROM TRANSFORMER (WHICH IS NOT LEAKING), HE WILL CONTACT E. CORTES TO SEE IF PCB TEST FOR OIL IN VAULT IS ALSO NEEDED. 3/04/2005 15:13 HRS. -- G. PALLADINO REPORTS SAMPLES FOR OIL ID AND FLASH POINT WILL BE DELIVERED TO CHEM LAB ON CHAIN OF CUSTODY FORM # DD-05475. Lab Sequence Number: 05-01908-001 Date Approved: 3/04/2005 Analysis indicates the presence of a transformer oil. Lab Sequence Number: 05-01907-001 Date Approved: 3/04/2005 Flash Point, PMCC > 140 deg F D93-00/EPA 1010 Update - 1725hrs - 3/7/05 G. Palladino reports took sample from structure. Courier picking up & delivering to chem lab. 3-8-05 04:00hrs lab seq# 05-01989-001 31 ppm. UPDATE 3/9/05 14:18 HRS ENV OPS CARSON REPORTS STRUCTURE WAS DOUBLE WASHED WITH BIO-GEN 760, AND THE ENV TAG WAS LEFT IN PLACE PENDING PRESSURE TEST. -----Original Message----- From: Fernandez, Celestino Sent: Wednesday, March 09, 2005 9:57 PM To: Hogan, Christopher M Cc: Jacobi, George L. Subject: Oil Incident 1574633/9/05 = 1930 Hrs = Env. Op. Supv C. Fernandez reports that after Networks Supervisor G. Palladino and his crew pressure tested Vault 4295 and it held pressure they removed Env tag # 37302. Job is complete at this time. UPDATE 11/16/05 07:16 OIL WAS DISCOVERED AGAIN ON 3/15/05, NEW INCIDENT #157612 WAS OPENED. THE TRANSFORMER WAS FOUND TO BE LEAKING. ID SAMPLES FROM STRUCTURE CAME BACK AS TRANSFORMER OIL. THE TRANSFORMER WAS DRAINED, REMOVED AND STRUCTURE WAS CLEANED ON 8/3/05. STRUCTURE WAS CHECKED ON 8/11/05 AND NO OIL WAS FOUND. INCIDENT WAS THEN CLOSED.

DEC Memo: 3/31/10 - Raphael Ketani. Tank removal work was taking place today by staff from Langan Services when contaminated soil was discovered. The tank has a capacity of 1900 gals. and is in a vault. It used to contain #2 oil. Jason Hayes of Langan Services (212) 479-5427 was on site when the tank was pulled. The tank is located at BAM Annex, 321 Ashland Place, Brklyn, 11201. The PBS is #2-611272. There is one 1900 gal. UST that is temporarily out of service since 2/23/10. It held #6 oil. The owner of the property is the Brooklyn Academy of Music, 30 Lafayette Street, Brklyn, 11217, (718) 636-4153. I sent a CSL to Jonathan Jones at the Brooklyn Academy of Music. Later, I spoke to Mr. Hayes. He said that the property is being developed. They had removed the tank and the vault and discovered discoloration under the vault. So they dug down 6 to 7 feet and took a soil sample. It came back with SVOCs at about TAGM. They will take more samples. 04/27/10 Email from Langan contains plan to remove the concrete vault slab, excavation of impacted material to the extent feasible, end point sampling (STAR VOCs and SVOCs), and preparation of a closure report. (sr) 05/18/10 Tank closure report in edocs. AST was removed and five end point samples were collected from the bottom and side walls. No VOCs/SVOCs in soil samples. Tank closure report in edocs. Case closed. (sr)
Remarks: REMOVAL OF A 1900 GALLON VAULTED UST. SOIL IMPACTS WERE FOUND CLEAN UP PENDING.

DEC Memo: e2mis no. 128005:9/25/99 08:40 hrsS. Fuller #37342, Splicer with Bklyn/Queens Equipment Group, reports while responding to oil alarm in V-3007 (fdr 1B56) at 08:25 hrs. found approx. 20 gal. transformer oil leaked onto dirt on floor of vault, f/o 351 Ashland Pl, bet. Hanson Pl. & Lafayette Ave. Source of oil visually determined as leak in bottom of transformer (could not perform pressure test since unit is below min oil level). Historical PCB results indicate 22 ppm. Vault has drain to sump in adjacent bus compartment -- that sump pump has been disabled and there is no oil in the sump pit. Spill appears to be contained to vault. No sewers or waterways affected. Env. stop tag #08638 placed. Liquid sample taken from source on 4-6 hour turnaround. Due to amount of oil, Equipment Group to remain on location until Env. Ops crew responds. Will treat as 50-499 ppm pending results - cleanup will start when feeder is taken off system.-- Records indicate transformer mfr date 7/1/1953 and installed 1/1/1956-- Vault print indicates drain in V-3007 -- adjacent bus compartment shows sump pump and sewer connection.-- Notified Bklyn Env Ops supervisor K. Kavanagh, Env Ops crew will respond.9/25/99 13:05 HRS -- LAB SEQ #99-10073, 14 PPM PCB. UPDATE: 9/25/99 14:50HRS S. FULLER CALLED AND STATED TOOK MEASUREMENT AND FOUND A 50 GALLON LOSS FROM TRFS. NOT 20 GALLONS AS PREVIOUSLY REPORTED. CHECKED NORTH COMPARTMENT, ADJACENT TO THIS VAULT, AND FOUND NO OIL AND UNPLUGGED SUMP PUMP. NO DISCHARGE OF OIL IN ADJACENT COMPARTMENT.UPDATE 9-25-99 1830 HRS S.FULLER NETWORK REPORTS AT 1815 HRS HE DRAIN TRANSF IN V3007 AND REMOVED 385 GALLONS OF OIL.update 0927 9/27 D.HEARNS OS EQUIPMENT REPORTS CAN NOT REMOVE UNIT AT THIS TIME DUE TO DISCOVERY OF OVER 10 SQUARE FEET OF ASBESTOS, REQUIRING AN ASBESTOS ABATMENT. DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"10/25/2002 Sangesland was on "Desk Duty" and sent out a tank test failure form letter11/1/2002: RECEIVED FAX FROM FRANK DIANDREA WHICH INDICATE THAT THE TANK PASSED THE TEST TODAY. THEY FOUND 2 MANWAY GASKETS BAD. THEY WILL BE TESTING PIPING WHEN THEY CAN LOCATE BUILDING PLAN TO DETERMINE WHERE PIPING TRAVELS. FAX FILED WITH LETTER OF TANK TEST FAILURE. ARS.1/30/2003-Vought-Duty Desk received message from Rich Baldwin (631-499-2222) inquiring about project manager. Vought called Baldwin and spoke with him. Baaldwin will be performing three soil borings along two parallel fill lines. If soil contamination is found lines will be replaced. Tipple will require work invoice, passing system test and soil samples if old fill line needs to be abandoned in place.3/6/03 Tipple spoke with R. Baldwin and suggested staggering the borings along the piping run if the markouts show that it is feasible. If contaminated soil is encountered in the borings no analyticals need be tested at this point in the investigation if a digout is to follow.4/8/03 Tipple spoke with R. Baldwin contamination found to a depth of approx.17 ft bgs. to be delineated laterally and a work plan to be produced.4/10/03 Summary of field activities submitted to DEC continued investigation planned. see file6/26/03 tipple reviewed investigation report and nfa was issued

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SAWYER"5/26/2004 Sangesland spoke to William Schlageter of Freudenthal & Elkowitz. He said he works for the property owner and finally got approval today to call in a spill that was discovered on May 18th.On May 18th, during a walk through of a subbasement, several puddles of fuel oil were found outside of an oil tank containment room. The room contains two 7,000 AST's that were probably installed around 1928. At some point in the history of the building, they believe the room was filled in with cement. This now means that the two tanks are totally encased in cement up to several feet thick around the tanks.The tanks were recently presure tested. One tank passed, the other tank had an "inconclusive" test result. This tank has been taken out of service and has been drained (except for the final 400 gal which can't be easily removed).Mr. Schlageter's company is coming up with a plan to completely clean out this "inconclusive" tank, clean up the site and then identify the extent of contamination on the site.Contaminated Soil Letter sent to:William SchlageterFreudenthal & Elkowitz368 Veterans Memorial HwyCommack, NY 117256/7/04 - Sawyer - Received a detailed work plan through e-mail from William of F&E.1/21/05 - Sawyer - Met Richard Baldwin & Bill Schlaghter of Freudenthal & Elkowitz Consulting Group at the above address. Received basic tour of affected areas and witness working recovery system in basement. Checked outside to see how close to subway exterior wall is located. Rich and Bill proposed insitu remediation for the contaminated soil between the outside wall and the subway. They will send more information.Transferred to CO (MJSCIBEL)5/30/2006 - Mike - Contacted Freudenthal & Elkowitz Consulting and asked for an update on the project.7/26/06 - Mike -

Left another message for an update with F+E.3/30/07 - Austin -
Trasferred to Patel for further review - end04/10/07-Hiralkumar
Patel.alternate addresses: 325-351 Ashland Place, 1-9 Hanson PlacePBS
#: 2-607998. as per PBS record, the site had one 7,000 gal AST on
saddles and one 7,500 gal AST in subterranean vault with access. both
tanks were used to store #2 oil and were closed-in-place.other
spills: 8605094, 9710706, 0103988, 0207736, 0211355, 0412697spill #:
8605094 was reported on 11/10/1986 as ethylene chloride was seeping
into air conditioning system. case closed.spill #: 9710706 was
reported on 12/19/1997 by ConEd, due to transformer oil leak into
vault. case closed.spill #: 0103988 was reported on 07/14/2001 by
ConEd, due to transformer oil leak into vault. case closed.spill #:
0207736 was reported on 10/25/2002 due to tightness test failure for
two #2 oil tanks. during subsequent work, contamination was found
along the two fill lines. case closed after reviewing investigation
report.spill #: 0211355 was reported on 02/13/2003 due to transformer
oil leak into vault. case closed.spill #: 0412697 was reported on
03/03/2005 by ConEd, due to oil in vault. case closed.the subject
spill reported after findings of oil/water in crawl space under
sub-basement.

-----review of available documents under spill #:
0207736:1) 10/25/2002: Duty desk officer sent TTF to HSBC Bank.2)
10/31/2002: fax from Island Pump and Tank Corp.: after replacing bad
manway gaskets, two tanks passed test- will test piping3)
03/04/2003: Site Investigation Plan:- work plan for subsurface
investigation along leaking fill lines- fill line runs about 15 ft
under sidewalk- proposed to install three borings: one at fill port,
one in midway and one at the building wall4) 04/02/2003: Soil
Investigation Results:- ASTs are located in vaults in sub-basement
level of the building- two sets of fill port piping and conduits
located along the western side of the property- fill piping was
probed (using fill port) utilizing a steel measuring tape and
determined to elbow 90 degrees (from vertical to horizontal) towards
the exterior building wall at a depth of 89 inches (7.4 ft) bgs less
than ----- two pipes were determined to occupy an area
between 24 to 27 inches and the interior walls were determined to be
approx. 6 to 8 inches apart- two subgrade natural gas lines were
traced from connection boxes located within the sidewalk to the north
of the location of the fill port piping. the natural gas lines were
determined to transect the location of the fill lines in a
north-south direction approx. 7.5 ft west of the exterior building
wall less than ----- building drawings indicate that a subway
wall runs in a north-south direction at an unknown depth, approx. 8
ft from exterior building wall less than ----- three soil
borings (B-1, B-2 and B-3) were installed along fill lines- boring
B-1 was installed 50 inches west of the exterior building wall, in
order to avoid the "building foundation which extended approx. 3 ft
to the west of the building wall" less than ----- refusal
encountered at a depth of 12 ft bg in boring B-1, in the form of
brick and concrete debris believed to be potentially associated with
the underlying subway system- boring B-2 was installed to a depth of
20 ft bg- no contamination noted in soil from 18-20 ft depth in
boring B-2- boring B-3 was installed to a depth of 10 ft bg where
refusal encountered- petroleum-impacted soil was discovered in depth
from approx. 6 to 17 ft bg- no samples were submitted for lab
analysis5) 06/25/2003: Summary of Spill Investigation:- installed 12

soil borings- the area of impact was estimated to be approx. 15.25 ft from north to south and extend the entire width of the concrete sidewalk (15 ft) along the western portion of the site- based upon field characteristics, four soil samples (B-5, B-11, B-13 and B-14) were collected from the "edges" of the area of impact less than ===== soil samples were collected to be representative of the depth at which the most significant field characteristics of fuel oil impact (ranging from 7.5 to 11 ft bgs) were observed in borings with the area of impact- based upon a review of MTA drawings, the roof of the subway tunnel is situated at a depth of approx. 27 ft below the concrete sidewalk and approx. 20 ft below the fuel oil fill line less than ===== based upon the vertical delineation of the area of impact (17 ft bg), the roof of the subway lines is 7 ft below the fuel oil-impacted soils6) 06/26/2003: DEC Tipple issued no further action
letter.-----*****
***-----review of available documents for the subject
spill:*****
-*****1) 05/26/2004: DEC Sangesland sent letter requiring subsurface investigation.2) 06/07/2004: Investigation Work Plan, submitted by F&E:- subject property is situated at the northwest corner of the intersection of Hanson Place and Ashland Place- the property is currently improved with a commercial clock-tower building constructed circa 1927-1928- two 7000 gal #2 ASTs are located within a vault in the sub-basement level adjacent to the west wall of the building along Ashland Place- floor of the sub-basement floor where the access hatch to the top of the AST vault is located, is at approx. 40 ft bgs- did tightness test on both tanks on 05/06/04: found Tank #2 (eastern side tank) tight and Tank #1 (western side tank) failed less than ----- area of fuel oil was observed within the crawl space beneath an out-of-service flash tank formerly associated with the building's steam boiler system- area of fule oil is located outside the northwest corner of the bottom of tank vault, at the northern base of AST #1- during tightness test on 10/25/2002, found both tanks tight but fill lines were leaking (spill #: 0207736) less than ----- based upon following results of investigation after leaking fill line findings, spill # 0207736 was closed: * depth of fuel oil impacted soils below the concrete surface (6-17 ft bgs) was such that the underlying NYC subway line was not being impacted from same * relatively low concentrations of remnant fuel oil in subsurface soils * discontinued future use of the fuel lines * constraints due to subsurface features (subway line, natural gas utility)- groundwater is discharged, from area inside crawl space 30-40 ft away from fuel oil impacted area, by a sump pump system at over 100 gallon per minute to sewer system less than ----- based on tank chart on wall, the ASTs are 70 inches in diameter, 33 ft 4 inches long- based upon teh reported depths of the sub-basement floor (40 ft bgs) and crawl space (45 ft bgs), and the dimensions of the ASTs (70 inches in diameter), the bottom of the ASTs and the associated vault, are at the same elevation of the crawl space and the fuel oil impacted area less than =====3) 07/14/2004: Interim Investigation Report, submitted by F&E:- fuel oil from AST #1 was removed- upon opening of the AST, several heating coils were observed within tank, likely utilized when the tank stored #4 or #6 fuel oil in the past less than ===== total of 578 gal of remnant fuel oil and bottom sludges were removed- bottom of the tank was observed to be slightly

deteriorated in some locations, but no holes were observed within the wall of the AST- 3/4 inch diameter exploratory holes were cut through the north end of the tank at heights of approx. 52 inches, 35 inches and 17 inches above the bottom of the tank- a 10 by 10 inch hole was cut in the north end cap at 7 inches above the bottom of the tank to allow for the evaluation in the bottom conditions of the tank vault- dry fine-grained sand was observed to immediately pour into the AST from holes- no evidence of fuel oil impacts was observed within any of sands entering AST- northern vault wall was approx. 3 ft off the end of AST #1- backfill material (fine sand) was not observed under the southern end of the tank- bottom of AST lies approx. 33 inches above the base of concrete vault floor- top of the vault floor appears to occur several inches below the top of the crawl space floor less than ===== based upon the water observed entering the weep hole in crawl space, the base of the vault may be constructed below the local water table. if correct, the groundwater is not entering into the vault indicating that vault is water tight. therefore, if oil had been released it would not likely have leaked through the water-tight vault less than ===== after cleaning impacted area in crawl space, approx. 4 inch tall by 6 inch wide hole was observed within the western wall of the crawl space beneath the souther end of flash tank- hole is located at the base of the out-of-service elevator shaft and may be a "weep hole" for same less than ===== mix of fuel oil and water enter the crawl space through the weep hole- conducted an initial mechanical probe of the interior of the hole. it appears that the hole accesses a channel cut beneath the base of the out-of-service elevator shaft less than ===== according to facility personnel, the former elevator equipment was pully driven and didn't utilized hydraulic-oil containing equipment- bottom of weep hole appeared to be at least 3 inches below the floor of the crawl space. pooled water with floating oil was observed in the bottom of weep hole less than -----4)

07/30/2004: Investigation report and Proposed Remedial Action Plan, submitted by F&E:- subway line runs approx. 7.3 ft west of building wall and the top of the tunnel is at 27 ft bgs, base of tunnel is at approx. 52 ft bgs- did soil borings 2.5 ft away from building wall- five borings (B-1A, B-2A, B-3A, B-4A and B-5A) were installed- oil impacts were not observed in boring #s 1A, 4A and 5A- only minor fuel oil impacts were observed in the unsaturated soils, from approx. 20-24 ft bgs in boring # 2A- soil impacted by fuel oil were observed from 4 ft bg through the entire unsaturated soil column (40-42 ft bgs) in boring # 3A- impacted soils appears to be limited to a 15 ft area between boring 2A and 4 (boring in April 2003) in the north-south direction- extent of impact to west could not be confirmed due to the presence of burried utilities and NYC subway (as per letter from NYC Transit: NYCT could not approve the proposed boring locations associated with the installation of test product recovery well and bio-vent cluster wells proposed to be installed within the sidewalk adjacent to the exterior western wall of the building. letter was issued on 12/15/2004) less than -----

unsaturated soil in the area of concern were composed of fill materisl consisting of a heterogeneous mix of sand, silt, clay, gravel, concrete, brick, wood and other un-identifiable debris- native materials, consisting of gray fine and medium grained sand and/or silty sand, was encountered at approx. 40-42 ft bgs, coincident with the first occurrence of groundwater- groundwater was encountered in boring #s 1A, 2A, 3A and 5A (all borings terminated at

HSBC BANK (Continued)

S105997119

depth of about 42 ft bgs) less than ----- (borings done deeper than that done in 2003)- 0.5 inch to 1 inch of light non-aqueous-phase liquid (LNAPL) was observed on water table in borings B-1A, B-2A, B-3A and B-5A- unmarked monitoring well observed in the sidewalk adjacent to Hanson Place. no NAPL was observed and groundwater was measured at 43.44 ft from the elevation mark on the well- groundwater was observed entering the crawl space of the building to the southeast of the oil impacted water in the weep hole. no odors were associated with this groundwater and no LNAPL or significant sheen. therefore, it does not appear that the LNAPL layer extends under the footprint of the building less than ----- conclusion: " neither of 7000 gal ASTs appeared to have leaked and contaminants are not present in the associated vault. fuel oil impacted soils area present from approx. 4 ft bgs to water table in the vicinity of boring 3A. 0.5 inch to 1 inch thick layer of NAPL is present along the western exterior of the building footprint" less than -----5) 12/15/2004: Update on Remedial Activities:- installation of LNAPL recovery system within the crawl space is scheduled of 12/20/04- MTA indicated that wells could be installed within the sidewalk at the desired locations, however, the depth of the wells could only be completed to a depth within 5 ft of the roof of the underlying subway tunnel (which means wells allowed only to 22 ft bg) less than =====6) 09/29/2006: Project Update:- both ASTs have been abandoned-in-place less than ----- F&E installed a concrete berm to contain the water/LNAPL mix entering the building's sub-basement through the weep hole less than ----- the containment berm is equipped with a product-only pump which has successfully removed 70-80 gal of oil- due to presence of the subway line, the NYCTA will only allow biovent test wells to be installed to a max depth of 20 ft bgs- new owner of site: CJUF- CJUF conducting major renovation activities within the building, which has included the removal of the majority of the former equipment associated with the building's heating system- part of the sub-basement activities, the immediate vicinity of the LNAPL-recovery system has been isolated from the remainder of the sub-basement area by newly-constructed walls lined with plastic sheeting (the floor area had also been lined with plastic sheeting) less than ----- water level is well above the top of the weep hole through which the LNAPL had previously entered into building- elevated water level is likely attributable to the cessation of the high-capacity pumps formerly utilized to remove groundwater from the sub-basement crawl space area- F&E plan to seal the weep hole and remove any related equipment and accumulated groundwater from the containment area, if DEC approves it.- F&E requested closure of case based on following information: * primary potential route of exposure for LNAPL was through weep hole which is below water level now * extent of remnant fuel oil within the unsaturated zone underlying the sidewalk along Ashland Place is believed to be limited and present below 6 ft bgs, the invert elevation of the former product delivery lines * ongoing source of fuel oil (former leaking product lines) and two ASTs have been abandoned-in-place, thus no potential for future releases of fuel oilF&E recommended to conduct an exposure assessment to evaluate realistic potential exposure pathways before closing the case.*****
-*****after reviewing available files, found that contamination that was found to depth of 17 ft in 2003 is moving deeper and found at depth of 42 ft bg during investigation in 2004.

!!!!!!! (not contained) Richard J. Baldwin, CPG Vice President, Environmental Services Freudenthal & Elkowitz Consulting Group, Inc. 1757-24 Veterans Memorial Highway Islandia, New York 11749 PH. (631) 499-2222 Fax (631) 499-5928 email: rbaldwin@fecg.us current property owner: CJUF II Hanson LLC/O The Dermot Company 320 West 57th Street New York, NY 10019 Contact: Alexander Krukis Ph. (212) 262-1220 (212) 991-8006 (212) 488-1633 Fax (212) 202-4349 04/13/07-Hiralkumar Patel. discussed with DEC Austin. his main concern was hydro-pressure from water outside the building as pump inside crawl space, which used to pump out groundwater from that area (100 gal per min), has shut down. because this pump shut down, water level is raising and now water with oil can enter through other weak points in building or could enter into somebody else's basement or subway lines which running next to building. Austin asked for engineering evaluation of building at site and also sensitive receptor survey in area along with investigation inside subway tunnel. he also asked to contact NYC Transit regarding this matter. spoke with Mr. Baldwin and explained him the same. he will send report at end of work. 04/17/07-Hiralkumar Patel. left message for Mr. Krukis at Dermot company. left message for Liz Deluca (718-694-4271) at NYC Transit system safety. 04/18/07-Hiralkumar Patel. spoke with Mr. Krukis. he will ask property owner/representative to call. 04/19/07-Hiralkumar Patel. received message from Kristin Neil (212-488-1622). left message for Kristin. spoke with Liz at NYC Transit. she will send crew to check subway tunnel (servicing the M, N and R lines) for any oil leak into tunnel and will call back. 04/20/07-Hiralkumar Patel. received call from Ms. Neil from Dermot company. they are aware of contamination and remediation at site and as per their agreement with HSBC, prior owner, HSBC will continue remediation at site. Ms. Neil will be contact person at new management. explained Ms. Neil that as part of remediation, the department may require installation of equipment inside building, which Ms. Neil agree with. 04/23/07-Hiralkumar Patel. received call from Liz from NYC Transit. they checked subway tunnel and found no oil leak or odors inside tunnel. 04/24/07-Hiralkumar Patel. received email from Mr. Baldwin with contact info for person in HSBC: Christopher Philipp Director, Environmental Health & Safety HSBC Bank USA, National Association 2700 Sanders Road Prospect Heights, IL 60070 ph. (847) 564-6634 fax (847) 205-7542 email: chris.c.philipp@us.hsbc.com sent letter to Mr. Philipp (previous owner and responsible party) and Ms. Neil (current owner) requiring Exposure Assessment and soil/groundwater delineation via monitoring wells. letter emailed to Mr. Philipp, Ms. Neil (kneil@dermotcompany.com), Mr. Baldwin at F&E and Ms. Deluca (Elizabeth.DeLuca@nyc.com) in NYC Transit. 04/27/07-Hiralkumar Patel. received email from Mr. Baldwin requesting deadline extension for report submission. reason for extension is getting permits from city agencies for sidewalk borings. approved his request with condition of regular updates on the project. 05/10/07-Hiralkumar Patel. received call from Steven Kaplan (631-499-2222), who will handle this project as Mr. Baldwin no longer work with F&E. 06/14/07-Hiralkumar Patel. left message for Mr. Philipp. 06/20/07-Hiralkumar Patel. received message from Gregory Ernst (631-499-2222). left message for Mr. Ernst. 06/21/07-Hiralkumar Patel. received call from Mr. Ernst. he mentioned that site is currently under construction and have crane on sidewalk, where the department requires monitoring wells for delineation and as per construction manager, crane will be there for about nine months. and without site specific groundwater flow

S105997119

direction, Mr. Ernst can't do receptor survey. asked Mr. Ernst to send contact info for property owner and construction manager. Gregory Ernst Senior Project Manager Freudenthal & Elkowitz Consulting Group, Inc. Ph. (631) 499-2222 (O) (516) 815-5151 (C) Fax (631) 499-5928 email: gernst@fecg.us received email from Mr. Ernst. he spoke with property owner Ms. Neil. Ms. Neil mentioned that they have construction hoist on sidewalk, installed on concrete base and not possible to remove until project finish (at least 9-12 months). Mr. Ernst asked for site visit to locate sampling location. Kristin Neil **current owner's representative** Ph. (212) 488-1622 email: kneil@dermotcompany.com sent email back to Mr. Ernst informing that before any site visit, the department requires work plan submitted. asked Mr. Ernst to visit site with Ms. Neil and submit work plan with scaled site map including: all former boring/well locations, proposed new well locations and location of construction hoist. asked Mr. Ernst to submit work plan by 06/29/07. 06/29/07-Hiralkumar Patel. received email from Mr. Ernst. he is preparing work plan and will submit by July 13, 2007. they will start exposure assessment once they get approval on work plan. Mr. Ernst mentioned that they can't install any monitoring wells for groundwater delineation as construction hoist is on sidewalk and drilling machine can't fit under scaffolding. based on construction schedule, monitoring well installation will be done after nine months. 07/10/07-Hiralkumar Patel. discussed with DEC Austin. he asked to start dewatering from crawl space again to bring water level down to remove free product. left message for Ms. Neil (property owner) to install pumping system for such oil recovery. spoke with Mr. Ernst and asked him to contact owner for such installation. Mr. Ernst will contact owner and will call back. 07/11/07-Hiralkumar Patel. received call from Ms. Neil. explained her that as monitoring well installation is not possible on sidewalk, the department wants pump installed (again) in basement to reduce water level, so oil can be recovered from basement area (as before). 07/13/07-Hiralkumar Patel. received email from Mr. Ernst. abstract:- the pumping system which previously operated in the building has been removed and the basement walls and drainage areas grouted up to seal-off further groundwater infiltration into the building. therefore will not be able to restart groundwater pumping to renew free product recovery in the weep hole along Ashland Place.- have identified an opportunity to install two groundwater monitoring wells along the exterior of the building adjacent to Ashland Place in the vicinity of former boring locations B-3A and B-4A. as part of the reconstruction activities, a new sewer line is schedule to be excavated and installed approximately 20 feet north of the abandoned elevator shaft where the previous soil borings were drilled. During the sewer line excavation, the adjacent scaffolding and access ramp to the construction hoist will be temporarily dismantled. - currently plan to gain access to the former boring locations immediately following backfilling the sewer line excavation and prior to re-assembling the scaffolding and access ramp. the current schedule for the sewer line excavation and installation is for that work to begin within the next couple weeks and is expected to take six weeks to complete, thereby allowing us access for drilling in roughly six to eight weeks.- Freudenthal & Elkowitz will: prepare a work plan as you requested to conduct an Exposure Assessment and install the groundwater monitoring/product recovery well; prepare an access request and drilling permit application and site plan to NYCTA to inspect the subway tunnel for indication of petroleum leakage and

S105997119

to install vibration monitoring equipment needed during drilling operations adjacent to the subway, and initiate Exposure Assessment activities of the surrounding properties.07/19/07-Hiralkumar Patel. spoke with Mr. Ernst regarding boring locations (B-3A and B-4A) that he mentioned in last email. from site map, B-3A was located closed to old fill port (source area, south of weep hole) and B-4A was located north of weep hole. both boring locations are about 30 ft apart. Mr. Ernst mentioned that owner is installing sewer line about 20 ft north of elevator shaft (weep hole) and after backfilling excavated area for sewer line, they have opportunity to install wells at some boring locations. Mr. Ernst mentioned that they will install monitoring wells (if get permission from MTA due to subway running parallel to site) at B-3A (close to source site) and B-1A (close to weep hole). Mr. Ernst also mentioned that boring B-4A was terminated at 27 ft depth (could be because of subway structure) before groundwater. asked Mr. Ernst to install well at location B-4A also and if get refusal before groundwater, asked him to try other point around B-4A (to see any oil going north of weep hole). asked Mr. Ernst to check possibility for monitoring well installation on south of previous boring location B-5A (for delineation purpose). mentioned to Mr. Ernst that if it requires to go across the street (Hanson Place) then install well on sidewalk on other side of street, eventhough that location is far away (by considering that due to parellel subway line groundwater must be flowing either in north or in south direction, so oil can be detected in monitoring well across the street)spoke with Mr. Neil. she will meet at site at 1:30 PM.07/20/07-Hiralkumar Patel. visited site. met Ms. Neil. went to basement. Ms. Neil mentioned that they have filled entire sub-basement/crawl space except part of weep hole area. there is no opportunity to install any pump for dewatering. Ms. Neil mentioned that they will remove scaffolding for sewer line installation. told Ms. Neil not to re-install scaffolding until they install monitoring wells on sidewalk. found one monitoring well in front of building entrance along Hanson Place.07/23/07-Hiralkumar Patel. spoke with Mr. Ernst. asked him to install monitoring wells on south of previous boring B-5A also and asked him to check one well in front of building (that was observed during site visit). Mr. Ernst will submit all plan to MTA and once he hear from them, he will forward all to the department.10/11/07-Hiralkumar Patel. left message for Mr. Ernst.spoke with Mr. Neil. they are still waiting for permit for sewer line installation. once they receive permit, they will remove scaffolding and will install require wells.11/07/07-Hiralkumar Patel. spoke with Mr. Ernst. he has submitted all required plan and documents to MTA, but hasn't got final authorization from MTA. he will call once gets approval and schedule for work.01/14/08-Hiralkumar Patel. spoke with Mr. Ernst. they are still waiting for approval from MTA. he mentioned that owner has changed plan to install sewer line. now they will not install sewer line where the department wants monitoring wells, in that case scaffolding will be removed only once project is finished.03/20/08-Hiralkumar Patel. spoke with Mr. Ernst. they got verbal approval from MTA. asked him to submit copy of written approval from MTA, once available, alongwith copy of plan submitted to MTA. as per Mr. Ernst, scaffolding may be removed in July 2008.12/01/08-Hiralkumar Patel. spoke with Mr. Ernst. he mentioned that scaffolding is still in place and according to owner, it will be removed in this month.left message for Mr. Krukis and Ms. Neil.12/15/08-Hiralkumar Patel. received

DEC Memo: Glycol was spilled on the LIRR tracks. All has been cleaned up.8/18/05 - Raphael Ketani. I spoke to Lou Wunderlach of the L.I.R.R. environmental engineering group on 8/18. He said that they used Speedi-Dri to clean up the propylene glycol that had spilled onto the Flatbush platform. Twenty gallons was recovered and 15 to 20 gals. soaked into the track bed. The leak was due to damage to a fan coil pipe in the ceiling which is connected to a chiller unit. The pipe was bent possibly as a result of damage by a ceiling repair crew.

Remarks: A PIPE WAS BROKEN THAT TELLS THE TEMP. OF GLYCOL TEMP: ABOUT 40 LBS: IS BEING REPAIRED: UNSURE HOW IT GOT BROKEN OTHER CONTRACTORS WERE ON SITE; SOME WENT ON TRACKS

Contact Phone: (917) 612-5299
DEC Memo: 9/4/12-Vought-Primary off-hours responder. FDNY Kearney (Ph:(914) 269-8532) Hazmat 1 noted that bags of dry ammonia discovered at a commercial facility. Vought called and left message and received return call from Kearney who noted that he also contacted DEP Hazmat with respect to spill. Vought called DEP Hazmat (Jon Wilson Cell:646-879-7329) and he will return call to Vought with more information. Vought received callback from and spoke to DEP Hazmat (Victor) who noted that the site was a two family home with retail space and FDNY received reports of odors of ammonia from neighbors. FDNY arrived onsite and found source of vapors was pit in basement. Victor also at site and noticed no signs of industrial operations or hazardous waste storage. Victor issued DEP Commissioners Order to remove impact dirt in pit with ammonia and find source of odors. Vought informed RSE of same. Spill closed by Vought as non-petroleum spill and no impact to soil and/or groundwater. See also duplicate spill 1205540.

Remarks: CALLER HUNG UP ON DISPATCH WHILE FILLING SPILL REPORT OUT. CALLER ASKED IF WE WERE GONNA COME OUT IMMEDIATELY FOR CONTAMINATED SOIL AND I RESPONDED I HAVE NO IDEA THATS NOT UP TO ME. CALLER STATED THAT FDNY WAS THERE WITH OEM SO THATS WHY I'M SENDING TO REGION 2!

DEC Memo: 2/19/08 bf: Sent ttf letter to:Pietro Ruggiero25 Lafayette Assoc.104 South Central Ave., Rm. 10Valley Stream, NY 115802/26/08 bf: Letter returned and marked "RETURN TO SENDER, ATTEMPTED - NOT KNOWN, UNABLE TO FORWARD." Called Piero Ruggiero of 25 Lafayette Assoc., which is the contact on application. They no longer own the property. They gave me new owner as 25 Lafayette Investor LLC and phone number is (212)262-1220. Called there and was given this number (212)488-1770. Spoke to Irvan Daniel. He said person handling tank tests is on vacation this week(Carmen Santingo - he was unsure of the last name). Told him I will email a letter to him explaining what needs to be done. TTF letter sent to:Irvan DanielThe Dermot Company25 Lafayette Investor, LLC320 West 57th St.New York, NY 100193/27/08 Received fax from Ted Dros of ProTest on 3/18/08. They were hired as the contractor to make repairs. bf9/04/08: Received TTT via fax from Pro Test on behalf of property owner. Pro Test performed on Feb. 6, 2008 tankk & system TT and it failed with a dry leak. On April 11, 2008 Pro Test technicians regasketed and rebolted the manhole cover and the tank & system passed second test. Technician reports that no visible sign of any contamination was found. TTT results reviewed and processed. Spill case is closure. (MA)

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"11/12/10 - spill re-assigned from Tibbe to Joe O'Connell11/28/11 - Obligado - spill re-assigned from O'connell to Obligado2/12/13 - Raphael Ketani. This spill case was reassigned to me.7/1/13 - Raphael Ketani. Soil borings were being done for the design of an NYCT ventilation plant in the vicinity of Lafayette Avenue and Rockwell Place. However, soil contamination was found 30 feet below grade. The source was unknown.I attempted to make a site visit today. I found the intersection of the two streets, but I wasn't sure of where the ventilation plant was. There was no surface expression of a ventilation motor building, duct works or such. There was a small garden park at this intersection. Across Flatbush Avenue, there was a triangular vacant lot with some construction office trailers, a little construction equipment and rubble. However, the surface of the lot was just a flat surface. Across Lafayette Avenue, there was a large pay parking lot and a defunct garden supply center, but nothing else. So, I took some pictures.I sent an e-mail to Toni Watts of NYCT (646) 252-5939/Toni.Watts@nyc.com wherein I requested information regarding the location of the ventilation plant.8/13/13 - Raphael Ketani. Ms. Watts sent me an e-mail today with information regarding the location and construction of the ventilation plant.In her e-mail she wrote the following:I just spoke to Gregory and Cadecia. They forwarded me this site and explained that the vent plant contruction is completed. In the process of the construction, there was an excavation that was 40 feet deep. If contamination was present, it would have been removed. We do not have any additional information at this time. The only thing that would be noticeable at the site would be a concrete slab on top of the vent. The vent is underground and they are not sure if it is accessible.She had included the web address for the Judlau OHL Group construction projects web site (www.judlau.com/projects/completed), I obtained the following information:Client: New York City TransitLocation: Brooklyn, NYProject Value: \$48,978,000Time Frame: 40 monthsDescription: This project involved the construction a new underground tunnel ventilation facility for New York City Transit. A new four-fan vent plant was constructed along with a substation enclosure. There was a significant amount of work on the tracks, as Judlau had to isolate each of the individual tunnels through the use of over 180 remotely controlled dampers. Judlau also built a brand new substation structure for future development.This project required that a secant pile wall be installed, as the excavation took place adjacent to a 12 story masonry building. The work involved a large open cut excavation approximately 500 feet long, in excess of 40 feet deep and from curb line to curb line. The work site is located in a busy and densely-populated residential and commercial area.Also, I was able to download 6 pictures from this website which show the location of the site and the construction which took place. The pictures are in the e-docs. One of the pictures is a view looking north towards the Lafayette Avenue and Rockwell Place intersection. This picture confirms that the ventilation plant is under the large, triangular, pay parking lot that I had walked around. As the pictures were undated, I used the date I downloaded them, 8/13/2013, in order to save them in the e-docs.8/15/13 - Raphael Ketani. The spill case was presented to Hassan Hussein for closure. I stated that though the soil contamination was found at 30 feet below grade. They had dug

Site

Database(s)

EDR ID Number
EPA ID Number

160 FEET FROM NE CORNER (Continued)

S106017089

down to 40 feet below grade. Also, the excavation reached the limits of the property boundaries. So, the contamination was most likely removed. I also presented the pictures I had taken and the pictures that Judlau staff had taken - proving that I had visited the same location and that the excavation was deep and to the property limits. Mr. Hussein approved the spill case for closure. As the excavating took place down to 40 feet below grade (below where the soil contamination had been found) and to the limits of the property, I determined that there is little or no residual contamination left. Also, the pictures do not indicate the presence of groundwater in the former excavation pit. So the contamination, in all likelihood, will not travel. Additionally, any residual contamination is trapped between the secant wall and the native soil. Therefore, the residual contamination is not a threat to the public or the environment. I closed the case effective today.

Remarks: they were doing boring samples for design work for ventalating plant and found petroleum contamination 30 feet below the surface.

"O'CONNELL"con ed e2mis notes:While doing routine inspections on FDR 6B53 he found 1 qt oil on mud in bottom of MH 1854. Marchione has stated he sees a joint regulator and it appears wet around fittings. He has stated the oil may be coming from the joint regulator. He has stated the amount of mud is approx. 10-1 gallon buckets. Sample has been taken. Also changed to unknown oil- dielectric.Also changed to unknown oil, dielectric, found a drain hole that water is running through. No evidence of oil running thru. Drain is not in contac area of oil, about 2' away. Will place bolognies to secure drain. 2 samples - 1 from under the joint regulator on floor and other from cable (epoxy patch was leaking). There is a D-Fault in MH.Cement sealed the drain. No oil reached drain.Seq#99-09801@1ppm, cleanup completed and tag removed, incident is closed.

DEC Memo: 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 7/11/13 - Raphael Ketani. I made a site investigation today in order to check and see whether oil was still seeping into the station. I tried to find column #344 + 40. However, there are 2 Atlantic Avenue stations in downtown Brooklyn. At first, I checked the station served by the B,Q,2,3,4,5 trains. I walked all 3 platforms, but didn't find the column. The few column numbers I did find started with "1" - as in 156 or such. However, there were no signs of oil leakage. I went over to the station served by the D,N,R trains. Once there, I met a NYCT worker who showed me where the #4 track was. However, there were no column numbers. I looked up at the ceiling over track #4 and saw two large dark areas. They appeared to be oil stains and the stains descended down the wall separating this track from the adjacent one. One stain was entirely black, but the other had orange coloration. This suggested that groundwater had also been seeping into the subway at this location. I took four pictures. I then went to the platform on the other side of this wall and saw another large dark stain which ran from the ceiling over the track and down the separating wall. I took a picture. The stain also contained some orange coloring which suggested that groundwater had also been seeping through the ceiling. At all three locations, there were no signs of current seepage. Also, at all three locations, the tracks and their beds were free of oil. There were no oil odors, either. 7/19/13 - Raphael Ketani. I made an unannounced site visit to the street above the Atlantic Avenue station. I looked at both sides of 4th Avenue in the vicinity of the intersection of 4th Avenue and Pacific Street. I did not see any fill ports or vent pipes. I assumed that every store had gas service. 8/7/13 - Raphael Ketani. I presented the spill case for

closure to Hassan Hussein, E.E. III and head of Unit C in Region 2. I explained to him what I had found during my inspections and that the seeping was not presently active and that the source had never been found. He gave me permission to close the spill case. As the spill had stopped flowing from wherever the source had been, and as no oil was presently impacting the public or the physical structure of the station, I determined that there was no threat to the public or the environment. Therefore, I closed the spill case effective today.

Remarks: COLUMN # 344 + 40: APPEARS TO BE COMING OUT OF THE EAST WALL AND ABOUT 20 FEET UP;

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Date form received by agency: 07/08/1999
Site name: NYCTA - A A BULK STORAGE
Classification: Not a generator, verified

Date form received by agency: 03/20/1996
Site name: ATLANTIC AVE STA/NYCT
Classification: Large Quantity Generator

Date form received by agency: 12/12/1994
Site name: NYCTA - A A BULK STORAGE
Classification: Small Quantity Generator

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 09/20/1998
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: EPA

DEC Memo: 06/06/08-Hiralkumar Patel. visited site yesterday (06/05/08) at 4:45 PM. its six story commercial building. met with building owner Mr. Awad. Mr. Awad mentioned that they are converting to gas heating system and are removing 3000 gal #2 oil tank (which found unregistered). Mr. Awad hired P&T Home Improvement for required work and P&T hired PBG Construction to remove tank. Marvin from PBG removed leftover oil from tank and to remove sludge from bottom, he was cutting piece of tank using torch and fire broke out.FDNY extinguished fire and due to oil fumes/smoke inside building, they cut power supply.found oil/water mix inside tank and boiler room inside basement. as per Marvin tank is sitting on floor along foundation wall along Atlantic ave. and boiler is about 15-20 ft away from tank. fill/vent pipes running aboveground and found no sign of leak under these pipes. no information about supply/return lines as area around tank and boiler was flooded with oil/water and as no power in basement. owner sealed fill port.NYC DOB Boiler division ordered to evacuate the building until they perform safety inspection of the site. Mr. Falnnery from Boiler division asked owner to hire another contractor and asked not to allow PBG construction again for futher work (tank removal).at the end of site visit, Boiler division asked owner to pump out oil/water from basement only, so they can perform safety inspection. NYC DOB Boiler division don't want any other work performed inside building until they inspect the building. tank must be removed once DOB inspect the site and approves further work.visited site this morning (06/06/08). met with Ali, member of owner's corp. they hired Recovery Environmental. met Tom from Recovery environmental. asked him to remove oil/water only from tank/boiler room and to notify the department once they done. Tom will either collect oil/water into drums and store in building for later disposal or will collect it into vacuum truck.received call from Tom. he mentioned that there is a water leak from main water line inside boiler room. Tom requested to turn off water supply. spoke with Ali. he asked for help to have water supply turned off. spoke with Garcia (212-689-1520) at NYC DEP. he asked to contact

Austin asked to visit site only after DOB boiler division gives ok after their safety inspection. 06/09/08-Hiralkumar Patel. visited site. met Tom from Recovery environmental. they removed all stuff from tank/boiler room. walked into boiler and tank room and found both room floors in good condition. no cracks noticed. no odors noticed during site visit. Tom mentioned that they pumped out total 1500 gal of oil/water from tank room, boiler room as well as from tank itself. as per Tom, tank had oil in it and 6-8 inches thick sludge at the bottom. asked Tom to seal all drums which are filled with contaminated material and asked to wait for DOB inspection prior to powerwash. visited site at 2 PM. met Mr. Awad at site. he mentioned that inspector from NYC DOB boiler division inspected site before i reached to the site and DOB gave them ok to occupy the building again. gave Mr. Awad PBS registration form and asked him to register tank prior to any tank removal. met Mr. Anton, insurance adjuster. informed him the same. Joseph Anton Anton Adjustment Co., Inc. PH. (718) 641-5700 (O) (516) 624-0541 (C) Fax (718) 641-5691 06/10/08-Hiralkumar Patel. discussed with DEC Austin and DEC Vought regarding investigation under tank, once tank removed. Austin mentioned that as no cracks found in floor anywhere else in tank and boiler room, he believes that tank must have installed on solid concrete and he doesn't believe any cracks in floor. DEC Austin asked to close the case once gets tank registered. 06/17/08-Hiralkumar Patel. received cleanup report from Recovery environmental. 06/24/08-Hiralkumar Patel. spoke with Mr. Awad about tank registration. he mentioned that tank has been removed from site and he doesn't know company's name who removed the tank. Mr. Awad asked to contact Omar Ali. spoke with Todd at Recovery environmental. he didn't removed tank. 06/25/08-Hiralkumar Patel. visited site. tank has been removed. inspected visible area only in tank room (as no light in tank room) and found floor in good condition. no odors noticed. received call from Ali. asked him to register tank. sent email to Ali (ahmedels@hotmail.com) with PBS form and instruction. spoke with Marvin from PBG construction, who removed the tank. this is the same company who was cutting tank when fire broke out. Mrvin mentioned that NYC DOB allowed them to remove tank

DEC Region: 2
DER Facility ID: 233501
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"3/11/03 - SAMUEL- File available in active unassigned spill files.1/14/2004 Reassigned from O'Dowd to Sun.Also refer to Spill # 8911007 for this site.01/22/04 Sun sent a letter to Rendel Forbes, the Respondent requiring the following: 1) A subsurface investigation to adequately characterize site hydrogeology and to completely delineate the full extent of petroleum contamination both on-site and off-site must be performed. The investigation at a minimum must include installation of borings/well: south of MW-DG in the vicinity of sidewalk of Fulton Street about mid-point between MW-UPG and MW-D, 2) Re-sample the two previously installed wells, and 3) A surrounding property sketch.06/4/04 Letter from Andrew Rudko of AKRF to Joe Sun of DEC with an attachment of subsurface investigation report: The investigation revealed that elevated levels of VOCs were detected in the soil sample collected from the groundwater interface, sample MW-DG (35'-37'). Low levels of SVOCs were detected below the NYSDEC TAGM 4046 Recommended Soil Cleanup Objectives. NO VOCs or SVOCs were detected in the sample from MW-UG. Elevated level of VOCs were detected in MW-DG above the NYSDEC groundwater quality standards. NO SVOCs were detected in MW-DG. Based on the test results, MW-DG had BTEX concentration of 14,710 ug/l, including 130 ug/l of Benzene concentration, 2300 ug/l of Ethylbenzene concentration, 680 ug/l of Toluene concentration, 3700 ug/l of o-Xylene concentration and 7900 ug/l of m&p-Xylene concentration. The above concentrations are in excess of NYSDEC Water Quality standards.06/25/04-File Update by Sun: On 06/22/04 Sun sent a letter and Stipulation Agreement to Rendel Forbes, the property owner requiring complete delineation of soil and groundwater contamination, submittal of an Investigation Summary Report followed by a Remedial Action Plan. The Department set a deadline of July 13, 2004 for signing the Stipulation Agreement by the Respondent.07/21/04-File Update by Sun: On 07/21/04 Sun sent a letter to Rendle Forbes (Property Owner) and Andrew Rudko (Consultant with AKRF) informing them that the Department has reviewed and approved the remediation method proposed by AKRF, dated June 4, 2004. The Department approves the use of the Oxygen Release Compound (ORC) bioremediation technology for the remediation of the contaminated groundwater in the area of the former gasoline tanks. 12/19/05-File Update by Sun: AKRF submitted a letter report dated 10/17/05. The report indicated that Oxygen REleasing Compound (ORC) was injected into the spill area in August/September 2004. The two wells on the site were sampled on 9/25/05 following low-flow sampling procedures. No gasoline-related compounds were detected in the upgradient well (MWUPG). Concentrations of gasoline-related compounds in the downgradient well (MW-DG) have declined since the baseline sampling was performed in April 2004. Analytical results of MW-DG well showed the following concentrations: ND (benzene), 1400 ug/l (ethylbenzene), 38 ug/l toluene), 130 ug/l (o-xylene), 1000 ug/l (m, p-xylene), 120 ug/l (naphthalene), ND (MTBE), 400 ug/l (n-propylbenzene), 940 ug/l (sec-butylbenzene), 110 ug/l (1,3,5-triethylbenzene), 1100 ug/l (1,2,4-triethylbenzene), 350 ug/l (n-butylbenzene). (Sun)12/28/05-Sun: Sun received a letter report dated 12/27/05 from AKRF. The report is based on the samples taken on 12/4/2005. (Sun)02/21/06-Sun: On 02/17/06, Sun received a report from AKRF for

assessment of potential impacts of the residual groundwater contamination on the 620 Fulton Street on the adjacent subway tunnels. Review of this report is pending. (Sun)04/21/06-Sun: A NFA letter was issued based on assessment of potential impacts of the residual groundwater contamination, performed by AKRF in their letters dated 02/17/06 and 03/15/06. The NFA was based on the following: 1)The gasoline tanks and all associated gasoline-impacted soil down to a depth of 22 feet below grade were removed in 1994; 2)Groundwater contamination in the source area under the former tank location has now been significantly reduced. Overall concentrations have been reduced by about 90 percent; 3) Groundwater is at a depth of 37 feet below grade within a dense glacial till with low permeability. There is a subway line directly to the west of the site which further restricts any groundwater movement off-site. 4) The residual concentrations are much too low to have any impact on the adjacent subways; and 5) For total m.o. and p-xylene, the DEC Div. of Air Resource Short-term Guidance Concentration (SGC) is 4300 ug/m3, which is over ten times the estimated maximum concentration (340 ug/m3) in the tunnel. (Sun)

re-assigned from Tibbe to Joe O'Connell 9/29/11 - Raphael Ketani. Case transferred from O'Connell to Ketani. 12/21/11 - Raphael Ketani. I reactivated the spill/PIN case. There are 5 other associated cases, but only #9108033 has any documentation. All of these cases have been closed and referred back to this one. There are 3 full file draws with documentation. However, very little of it has been e-doc'd. The case started when oil (diesel fuel) was found to be dripping onto the R Line subway platform under 4th Avenue and between 25th Street and 26th Street, Brooklyn. The oil had also drained from the platform and onto the tracks. The DEC was notified by the NYCTA about the spill. The FDNY responded and put down absorbent sand. The date of the spill is 7/19/93. However, it wasn't called in until 7/24/93. A fingerprint analysis indicated that the oil was a mix of weathered diesel and/or #2 oil between 10 and 15 years old. The pool of oil was initially estimated to be greater than 100,000 gals. and was mostly being held in place by the subway wall. However, subsequent DEC contractors have indicated that the oil pool is much smaller. The recovery system was extensively damaged during the construction of the Dunkin Donuts. Mobile Hi-Vacs were used to collect the oil. Bright red #2 oil was detected entering the pool of oil from upgradient. So it is believed that there is an ongoing source of unknown origin. Recent excavation beneath the surface of the site revealed that the soil is free of diesel with only minor gasoline contamination. The sources of the #2 oil may be a warehouse that is directly upgradient or other locations. A knee wall was installed on the subway platform to catch the seepage, but is sometimes overwhelmed during rain events. The source was eventually traced to the Eagle Service Station at 737 4th Avenue, Brooklyn, 11232. The site is owned by Ralph and Susan Guarino. Mr. Guarino bought the property during 1987. Though the new tanks that were installed by Mr. Guarino were not believed to be the source. The source was believed to be the old diesel tanks that were in existence when MOBIL owned the site up until 1987. Initially, Mr. Guarino was cooperative with the DEC contractors regarding the spill investigation. According to an August 5, 2001 NY Daily News article, Ralph and Susan Guarino were determined to be the responsible parties. Mr. Guarino was an FBI informant. He twice turned off the recovery system, which resulted in diesel leaking onto the platform. He threatened to pour concrete down the monitoring wells and for 8 months prevented remediation staff from coming onto his property to do their work. Eventually in 1999, the Attorney General went to court to get an emergency injunction against Mr. Guarino to prevent him from interfering. In 1999, Mr. Guarino agreed to let the remediation staff onto his property. The gas station was demolished and the site is now a Dunkin Donuts. According to the September 26, 2001 Second Demand Letter, Susan Guarino (128 Maitland Avenue, Altamonte Springs, FL, 32701-4902) is being held liable by the AG's office for \$1,924,150.68. Though, \$2,121,183 had been spent on the project by the DEC up to 2002. One of the previous DEC case managers, Mark Tibbe, sent me an e-mail regarding the history of the spill case. He wrote that nothing significant happened between 2001 and 2011. The DEC contractors were monitoring and bailing wells because the recovery system wasn't working. It was too old to repair and replacing it was too expensive. The subway was being monitored to make sure that product wasn't showing up. In the early 2000s there wasn't much product, but it showed up again. It was believed that the former service station was the primary source and that there was a fresh source of #2 oil. Later, I found the latest site report. It was

PACIFIC BRANCH (Continued)

U001839490

written by Environmental Assessment and Remediations. The report was dated August 18, 2006 and covered the period from January 2006 to June 2006. Groundwater was generally found at 22 feet below grade. It was believed that the subway tunnel was affecting groundwater flow. The groundwater was moving through a layer of glacial till and outwash sediments. The outwash sediments contained sand and gravel. Discontinuous thin clay lenses were also present. During 2001, several wells showed increasing amounts of product. On 4/24/01, red oil appeared in well MW10A. Wells MW82, MW90, MW32B, and MW13A also had red oil at this time. At this time, MW9 showed signs of dark oil with sludge. There were several oil tanks in the neighborhood. The tank at 220 25th Street was a 2,500 gal. #2 oil UST. The system was tested and found to be sound. The property at 225 25th Street had a 10,000 gal. #6 oil AST. One private building at 228 25th Street had a 275 gal. oil tank, but nothing else was known. There was a 1,000 gal. UST at 217 25th Street, directly upgradient from the site, but it was never investigated. From 2002 and 2004, EAR continued to maintain the remediation system. In 2004, EAR received permission from the DEC to abandon 17 wells that weren't providing useful data. The wells were abandoned from April to June of 2004. Throughout 2005, EAR continued to maintain the remediation system. During August 2005, renovations were made to the subway oil containment system. Weekly visits were made and spent absorbent was removed and replaced. The wells continued to be monitored on a weekly basis. On April 20, 2006, the recovery system was shut down to see how much product would appear. The recovery system remained off during the reporting period. Wells MW9, MW10, MW13, MW13A, MW23, MW23A, MW31, MW32B and MW82 showed a rebound of product. From January to April, a total of 26.99 gals. of liquids were recovered from all of the wells during. Product thickness on 6/22/06 was much less than 1 foot in the wells that were exhibiting oil. 12/22/11 - Raphael Ketani. Today I spoke to Dave Lorthioir of EnviroTrac (631) 924-3001, the DEC's consultant, regarding the project. He said that they have been monitoring and bailing wells on a weekly basis. However, they only deal with the wells in and immediately around the site. The water table is high right now and they haven't seen any product. However, in the spring of 2011, there had been a good amount of product. Before EnviroTrac took over the project a few years ago, they spoke to the previous DEC consultants. These consultants told them that there hadn't been any oil in the subway for some time. Mr. Lorthioir said that EnviroTrac hadn't seen oil in the subway, either. A report will be sent to the DEC soon. Later, Mr. Lorthioir sent me the 2011 groundwater monitoring data tables. Very few of the wells had shows of oil. Wells MW-8, MW-8A, MW-9 and MW-31 all had periods of from 2 to 7 consecutive months during which there were weekly shows of oil during 2011. A small number of other wells had sporadic shows of oil consisting of about several weeks during which oil was seen, but the weeks were not consecutive. Wells MW-8, MW-8A, MW-9 and MW-31 are all in the southern corner of the Dunkin Donuts property. MW-9 is directly over a rectangular figure in the well location diagram. Wells MW-40 and MW-41 were abandoned earlier. According to the case notes, seventeen wells were abandoned some time ago. Mr. Lorthioir also included a DRAFT 10/29/10 Status Report for the site. The report covered the years 2009 to 2010. I reviewed the report. The data inside indicated that the same wells that had oil in 2011 had oil during 2009 and 2010. There were also some other wells that had oil shows in and around the Dunkin Donuts store. 1/4/12 - Raphael Ketani.

I received CAP 31 for EnviroTrac. The bill is DC2023.01-32 for the period 10/31/11 to 11/27/11. The date of the invoice is 12/13/11. The work consisted of project management, project coordination, generate internal work order, revise internal work order, prepare for monitoring event, travel to and from site, calls to technician at site, gauge 36 wells, bail product by hand, update product recovery tables and enter data, use of low value equipment, light duty vehicle and sonic probe, purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.1/30/12 - Raphael Ketani. I received CAP 32 for EnviroTrac. The bill is DC2023.01-33 for the period 11/28/11 to 1/1/12. The date of the invoice is 1/16/12. The work consisted of project management, review data from last monitoring event, generate internal work order, revise internal work order, prepare for monitoring event, project management communication with DEC, calls to technician at site, decontaminate equipment, gauge 34 wells, bail product by hand, update product recovery tables and enter data, use of low value equipment, light duty vehicle and sonic probe, travel to and from site, purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.2/21/12 - Raphael Ketani. I received CAP 33 for EnviroTrac. The bill is DC2023.01-34 for the period 1/2/11 to 1/29/12. The date of the invoice is 2/13/12. The work consisted of project management and coordination, prepare internal work order, do budget projections, project management communication with DEC, travel to and from site, calls to technician at site, well gauging and product recovery, tabulate gauging data from December 30, 2011 field activities, review and tabulate gauging and product recovery data from field activities during January 12, 2012, use of low value equipment, light duty vehicle and sonic probe, purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.4/10/12 - Raphael Ketani. I received CAP 35 for EnviroTrac. The bill is DC2023.01-35 for the period 2/1/12 to 2/26/12. The date of the invoice is 3/15/12. The work consisted of project coordination. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.7/26/12 - Raphael Ketani. I received a request to abandon 16 wells at the site. I asked Mr. Lorthioir where the oil had appeared and what it had looked like. He said that it was NOT red oil, but looked weathered. He added that the oil sometimes appears in well MW-46, in the alleyway behind 753 4th Avenue. This is across the street and to the south (side gradient) of the site. Mr. Lorthioir said that it is hard to get to this well as the alleyway is usually locked and so he hadn't been back in a long time. Getting in involves getting ahold of the owner, which is difficult. One time he went through the back of a store in order to get to the well.8/8/12 - Raphael Ketani. I sent an e-mail to Sandy Camacho of the NYFD requesting his help in finding any oil tanks at 751, 753 and 755 4th Avenue, and at 204, 214-216 and 220 25th Street. 10/1/12 - Raphael Ketani. I received CAP 41 for EnviroTrac. The bill is DC2023.01-36 for the period 7/30/12 to 8/26/12. The date of the invoice is 9/13/12. The work consisted of project management, produce work order, create monitoring schedule, review results of site inspection, obtain DOT permits for well abandonment, gauge wells, replace socks, product recovery, travel to and from site, use of low value equipment, sonic interface probe and light duty vehicles, purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.10/25/12 - Raphael Ketani. I received CAP 42 for EnviroTrac. The bill is DC2023.01-37 for the period 8/27/12 to

9/30/12. The date of the invoice is 10/12/12. The work consisted of project management, calls to technician in the field, produce work order, review results of site inspection, compile and review data, gauge 37 wells, 1 well product recovery, hand bail wells as required, travel to and from site, use of low value equipment, sonic interface probe and light duty vehicles, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.11/29/12 - Raphael Ketani. I received CAP 43 for EnviroTrac. The bill is DC2023.01-38 for the period 10/1/12 to 10/28/12. The date of the invoice is 11/15/12. The work consisted of project management, prepare work order, obtain NYC DOT permits, prepare for well abandonment, travel to and from site, well gauging, product recovery, review and tabulate gauging and product recovery data, review latest monitoring data, abandon 11 wells, sidewalk restoration, calls to crew at site, use of light and heavy duty vehicles, low value equipment, sonic interface probe, generator, jack hammer, concrete cutter, concrete mixer and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.12/24/12 - Raphael Ketani. I received CAP 44 for EnviroTrac. The bill is DC2023.01-39 for the period 10/29/12 to 11/25/12. The date of the invoice is 12/11/12. The work consisted of project management, project coordination, tabulation of gauging data, review latest data from monitoring event, travel to and from site, well gauging, product recovery, use of light duty vehicle, low value equipment and sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.1/22/13 - Raphael Ketani. I received CAP 45 for EnviroTrac. The bill is DC2023.01-40 for the period 11/26/12 to 12/30/12. The date of the invoice is 1/14/13. The work consisted of project management, project coordination for upcoming activities, work order, generate internal work order, call to technician in the field, tabulation of gauging and product recovery data, review latest data from monitoring event, generate internal report, travel to and from site, gauging of 36 wells, product recovery from 3 wells, replaced 7 absorbent socks, use of light duty vehicle, low value equipment and sonic interface probe, and subcontractors and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.2/27/13 - Raphael Ketani. I received CAP 46 for EnviroTrac. The bill is DC2023.01-41 for the period 12/31/12 to 1/31/13. The date of the invoice is 2/11/13. The work consisted of project management, call to technician in the field, well gauging and product recovery, tabulation of gauging and product recovery data, review latest data and data from last 3 monitoring events, generate internal work order, travel to and from site, gauging of 34 wells, product recovery from 2 wells, replaced 6 absorbent socks, use of light duty vehicle, low value equipment and sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.3/22/13 - Raphael Ketani. I received CAP 47 for EnviroTrac. The bill is DC2023.01-42 for the period 2/1/13 to 2/24/13. The date of the invoice is 3/13/13. The work consisted of project management, prepare internal work order, calls to technician in the field, well gauging and product recovery, calls regarding full drums, calculate product thickness for wells during 2011 and 2012, review and tabulate gauging and product recovery data, review 2011 and 2012 data, edit and prepare site map, generate internal work order, load vehicle, travel to and from site, gauging of 37 wells, use of light duty vehicle, low value equipment and sonic interface probe, and purchase

supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.5/1/13 - Raphael Ketani. I received CAP 48 for EnviroTrac. The bill is DC2023.01-43 for the period 2/25/13 to 3/31/13. The date of the invoice is 4/15/13. The work consisted of project management, generate internal work order, well gauging, bailing wells, install socks, calls to technician in the field, review and tabulate gauging and product recovery data, respond to emergency call - leaking drum enclosure, calls for removal of drums, load vehicle, travel to and from site, use of light duty vehicle, low value equipment, sonic interface probe, 55 gallon drum and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.5/23/13 - Raphael Ketani. I received CAP 49 for EnviroTrac. The bill is DC2023.01-44 for the period 4/1/13 to 4/28/13. The date of the invoice is 5/14/13. The work consisted of project management, generate internal work order, gauged 33 wells, bailed product from 3 wells, calls to technician in the field, calls to manager of Dunkin Donuts regarding possible garbage issue at the site, calls regarding drum removal, review and tabulate gauging and product recovery data, travel to and from site, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.6/27/13 - Raphael Ketani. I received CAP 50 for EnviroTrac. The bill is DC2023.01-45 for the period 4/29/13 to 5/26/13. The date of the invoice is 5/26/13. The work consisted of project management, generate internal work order, gauged wells, bailed product from wells, calls to technician in the field, call to Dunkin Donuts tenant, review and tabulate gauging and product recovery data, travel to and from site, use of light duty vehicle, low value equipment, sonic interface probe, use of AARCO Environmental subcontractor for product collection services, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.7/29/13 - Raphael Ketani. I received CAP 51 for EnviroTrac. The bill is DC2023.01-46 for the period 5/27/13 to 6/30/13. The date of the invoice is 7/15/13. The work consisted of project management, generate internal work order, gauged 33 wells, bailed product from wells, review and tabulate gauging and product recovery data, travel to and from site, calls to technician at site, use of light duty vehicle, low value equipment, sonic interface probe, PID meter, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.8/29/13 - Raphael Ketani. I received CAP 52 for EnviroTrac. The bill is DC2023.01-47 for the period 7/1/13 to 7/28/13. The date of the invoice is 8/14/13. The work consisted of project management, generate internal work order, gauged 37 wells, bailed product from wells, review and tabulate gauging and product recovery data, travel to and from site, calls to technician at site, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.10/2/13 - Raphael Ketani. I received CAP 53 for EnviroTrac. The bill is DC2023.01-48 for the period 7/29/13 to 8/25/13. The date of the invoice is 9/13/13. The work consisted of project management, generate internal work order, gauged 39 wells, bailed product from wells, review and tabulate gauging and product recovery data, travel to and from site, calls to technician at site, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.10/28/13 - Raphael

U001839490

Ketani. I received CAP 54 for EnviroTrac. The bill is DC2023.01-49 for the period 8/26/13 to 9/29/13. The date of the invoice is 10/14/13. The work consisted of project management, generate internal work order, gauged 37 wells, bailed product from 3 wells, review and tabulate gauging and product recovery data, travel to and from site, calls to technician at site, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.12/4/13 - Raphael Ketani. I received CAP 55 for EnviroTrac. The bill is DC2023.01-50 for the period 9/30/13 to 10/27/13. The date of the invoice is 11/12/13. The work consisted of project management, generate internal work order, gauged 34 wells, bailed product from 1 well, review and tabulate gauging and product recovery data, travel to and from site, calls to technician at site, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.12/19/13 - Raphael Ketani. Mr. Lorthioir sent me two pictures of the cover for well MW-87. The cover had been damaged during the snow plowing of the Dunkin Donuts property. He wrote that he would like to fill in the void below ground which used to house equipment for the recovery system and then replace the large well cover with a small round one. I responded back that he should do this.1/6/14 - Raphael Ketani. I received CAP 56 for EnviroTrac. The bill is DC2023.01-51 for the period 10/28/13 to 11/24/13. The date of the invoice is 12/13/13. The work consisted of project management, generate internal work order, gauged wells, bailed product from wells, review and tabulate gauging and product recovery data, travel to and from site, calls to technician at site, call to landlord, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.1/17/14 - Raphael Ketani. Donna Amoscato of EnviroTrac sent an e-mail with pictures describing and showing a leaking drum. Speedi Dri was applied to the liquid (combination of water and product) which leaked in the drum storage area and which had spread to the sidewalk outside. Ms. Amoscato wrote that the spill was contained. Two pictures show Speedi Dri on the ground. The drum had leaked because it had become frozen. In the future, Ms. Amoscato wrote, the drums will be removed during the winter months. Some of the liquid had entered a vault nearby. I sent an e-mail to Ms. Amoscato stating that the vault had to be opened if it is not a Con Ed vault and cleaned out. If it is a Con Ed vault, then Con Ed must be notified about the incident.2/4/14 - Raphael Ketani. I received CAP 57 for EnviroTrac. The bill is DC2023.01-52 for the period 11/25/13 to 12/29/13. The date of the invoice is 1/15/14. The work consisted of project management, generate internal work order for monitoring event, gauged wells, bailed product from wells, replaced collection socks, review and tabulate gauging and product recovery data, travel to and from site, calls to technician at site, call to landlord, arrangements for repair of well cover, installed new well pad, cleaned up containment area, use of light duty vehicle, low value equipment, sonic interface probe, 55 gallon drum and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.2/11/14 - Raphael Ketani. I reviewed the EnviroTrac Project Status Report dated 2/10/14 for the year 2013. During 2013, the product impacts to the wells were as follows:MW-8A - product during all but 3 weekly visits; product thickness from 0.02' to 1.31'; MOST IMPACTED well of the monitoring

U001839490

arrayMW-8 - product during all but 11 weekly visits; product thickness 0.01' to 0.41'MW-9 - product during 9 visits; 0.01' to 0.07'MW-10A - product during 11 visits; 0.01' to 0.07'MW-31 - product during 11 visits; 0.01' to 0.65'MW-6A - product during 6 visits; 0.01' to 0.47'MW-46 - product during 2 visits (due to locked gate); 0.08' to 0.09'MW-82 - product during 1 visit; 0.02'The other 29 wells never had product and MW-15 was always dry during the year.During 2013, gauging took place at 37 select wells. Wells MW-8A, MW-8 and MW-9 are located a little east of 4th Avenue and along the northern sidewalk for 25th Street. They are the main area for the occurrence of product. EnviroTrac recommends a trial period for EFRing wells MW-8A, MW-8 and MW-9. There would be EFR events every other week for 2 months (a total of 4 events). Then the wells would be gauged for the following 2 months and the data would be evaluated to see whether EFRing is effective in removing the product. Weekly gauging and product removal would continue for the other select wells.3/4/14 - Raphael Ketani. I received CAP 58 for EnviroTrac. The bill is DC2023.01-53 for the period 12/30/13 to 1/31/14. The date of the invoice is 2/11/14. The work consisted of project management, project coordination, generate internal work order, gauged 33 wells, bailed product from wells, replaced collection socks, review and tabulate gauging and product recovery data, create data tables and enter data into them, update CADD figures, draft 2013 summary letter, draft portions of 2013 Annual Report, travel to and from site, calls to field staff at site, call to landlord, e-mail to DEC and upload pictures, cleaned up containment area, use of light duty vehicle, use of heavy duty vehicle, low value equipment, sonic interface probe, 55 gallon drum and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.3/26/14 - Raphael Ketani. I received CAP 59 for EnviroTrac. The bill is DC2023.01-54 for the period 2/1/14 to 2/28/14. The date of the invoice is 3/13/14. The work consisted of project management, project coordination, generate internal work order, gauged wells, bailed product from wells, replaced collection socks, review and tabulate gauging and product recovery data, create data tables and enter data into them, complete 2013 Annual Report and submit for internal review, travel to and from site, calls to field staff at site, generate internal work order, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.5/5/14 - Raphael Ketani. I received CAP 60 for EnviroTrac. The bill is DC2023.01-55 for the period 3/1/14 to 3/31/14. The date of the invoice is 4/17/14. The work consisted of project management, project coordination, generate internal work order, gauged wells, bailed product from wells, replaced collection socks, review and tabulate gauging and product recovery data, create data tables and enter data into them, travel to and from site, calls to field staff at site, generate internal work order, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.5/21/14 - Raphael Ketani. I received an e-mail from Mr. Lorthioir regarding the sudden increase in the thickness of product in well MW-31. Mr. Lorthioir wrote:The attached scan has three items. The first is a hydrograph showing product thickness in well MW-31 for 2013, the second for 2014 (to date). The last is a site plan showing the location of MW-31 and general groundwater flow direction. There was not much product observed in MW-31 in 2013. Only intermittently at

the beginning of the year and a small amount (0.2 feet) in October. Since the beginning of 2014, however, and has twice been observed to be 10 inches or thicker. This re-appearance of product in MW-31 is what lead EnviroTrac to request the performance of EFR at the site. It is too early to tell if the EFR events have had the desired effect. If you look at the site plan, you can see that MW-31 is located in a slightly upgradient part of the site. The other wells which have been exhibiting product are MW-8, MW-8A and MW-9. These wells are all located in the sidewalk along 25th Street. These wells, especially MW-8 and MW-8A, have been exhibiting varying amounts of product for the last several years. Wells MW-8, 8A and 9 were located near the former tank locations and, given this, I can understand why they might still exhibit product. But MW-31 is farther away from the former tanks and there was no product observed for quite a while. I know a rising and falling groundwater table can cause the re-appearance of free product, but to go from no product to over 10 inches is, in my opinion, fairly extreme. Also of note, the change in water table elevation has not caused the re-appearance of free product in any of the wells near MW-31. Some of these wells are less than 10 feet away and they should, in my opinion, also be exhibiting free product. My concern is that there could be another site impacting upon the Dunkin Donuts property. I am proposing that we collect product samples from MW-31 and MW-8 and have them analyzed for composition and age. We have been monitoring the upgradient wells on the street (MW-10, 10A and 11), and no product has been observed in them. The possibility exists, however, that petroleum is entering the site from underneath the building adjacent to the site, where there are no upgradient wells. 5/23/14 - Raphael Ketani. Mr. Lorthioir sent me an e-mail today. He stated that well VEFRing is taking place today. He remarked that well MW-31 had been free of product most of the year. So, it was surprising that 10 inches of product should suddenly appear. However, MW-8 (next to the subject well) has also often had some product. So Mr. Lorthioir does not believe this is a dumping incident. He added that his staff will knock on doors in order to find out whether someone has a fuel system problem nearby. 6/5/14 - Raphael Ketani. I received CAP 61 for EnviroTrac. The bill is DC2023.01-56 for the period 4/1/14 to 4/27/14. The date of the invoice is 5/13/14. The work consisted of project management, project coordination, generate internal work order, gauged wells, VEFR product from wells, review and tabulate gauging and product recovery data, create data tables and enter data into them, travel to and from site, calls to field staff at site, generate internal work order, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies, contracting with Metro Environmental Contracting for providing a vacuum truck for VEFRing the wells. I found the pay package to be acceptable and notified Steve Karwiel by e-mail. 6/10/14 - Raphael Ketani. Mr. Lorthioir called again (631) 924-3001. He said that they checked the wells last week that had shown the presence of product and found thick product again in some of the wells. The product was bailed. Mr. Lorthioir commented that he wanted to do two things to help resolve the sudden appearance of the product. One is to contact Mr. Comacho from the NYFD and find out whether the commercial facilities next door have or had fuel oil tanks. The other is to do Kryzinski tests on the wells with product in order to find out how thick the product may be outside the well bores. This test involves bailing out the product from a well and then measuring it every 30 seconds or so to see how

U001839490

fast it comes back. The results are put into a formula and the outside the well thickness measurement is generated. I told Mr. Lorthioir to go ahead with both tasks. Later, Mr. Lorthioir sent me an e-mail as a carbon copy. The e-mail was addressed to Mr. Camacho of the NYFD and asked for his assistance in locating any fuel oil tanks that may be in buildings next to the site. 6/12/14 - Raphael Ketani. Mr. Camacho responded to Mr. Lorthioir by e-mail with a list of other places that have tanks near the site. Later, Mr. Lorthioir sent me an e-mail with an attached map highlighting the addresses that Mr. Camacho had included in his list. The highlighted map showed a location at 209 25th Street which was only two properties upgradient from the site. Mr. Lorthioir stated that he thought this property may be the source of the newly appeared product in well MW-31 and the others. 6/13/14 - Raphael Ketani. I researched the following properties that are on 25th Street via the Spills database in order to see whether they had or do have spills: 207; 209; 217; 220; and 225. None of these properties appeared in the Spills database. So, all I could assume was that they never had a spill or that they had a spill, but it was unknown to the DEC. Next, I checked the PBS database. The location of 207 25th Street was not listed. As it was not listed on Mr. Camacho's list as ever having had a tank, I assumed that there was little likelihood of a spill coming from this location. I found that the tanks for the locations 220 and 225 25th Street were both registered in the PBS database. However, the tanks at the locations 209 and 217 25th Street had never been registered. I sent an e-mail to Mr. Lorthioir stating that the DEC will knock on doors and see what we can find out about the tank systems at the unregistered properties. Presently, 209 and 217 25th Street are in violation of the PBS regulations. I let Lezsek Zielinski, EE II and head of the PBS Unit, know about the unregistered tanks. He said that he will send someone out to inspect the properties in the very near future. 6/19/14 - Raphael Ketani. I spoke with Mr. Zielinski today. He stated that yesterday he had inspected the four facilities in question at 209, 217, 220 and 225 25th Street. He reported that the 220 and 225 25th Street facilities looked fine. Though, the 225 25th Street site may have more USTs than are listed on their PBS registration. So, he will have the owner come in for a meeting to settle this potential PBS violation. However, he told me that the 209 and 217 25th Street facilities have just a complete concrete floor. Mr. Zielinski did not see any remote fill ports, nor any piping that would lead him to believe that USTs were present. The owners stated that they never knew of any USTs below their buildings (though the NYFD records show that tanks were present at least at some time). The DEC doesn't have any spill or PBS violations pertaining to the 209 and 217 locations. So, there doesn't appear to be any leverage that the DEC can use to get the owners to do GPR or electromagnetic surveys in order to possibly find any tanks. I sent an e-mail to Mr. Lorthioir with this information and told him to just continue to collect the product that appears. 7/1/14 - Raphael Ketani. Today I received a non-hazardous waste manifest for the disposal of oil contaminated debris at Republic Environmental Systems in Hatfield, Pennsylvania. The representative from the receiving facility signed the document on 6/10/14. 7/3/14 - Raphael Ketani. I received CAP 62 for EnviroTrac. The bill is DC2023.01-57 for the period 4/28/14 to 5/25/14. The date of the invoice is 6/11/14. The work consisted of project management, project coordination, generate internal work order, load vehicle, mobilization to site, gauged wells, VEFR product

from wells, review and tabulate gauging, product recovery and EFR data, create data tables and enter data into them, create 2013 and 2014 hydrographs for select wells and complete hydrographs, travel to and from site, calls to field staff at site, call to lab regarding doing age dating, e-mail to DEC regarding proposed work, review old reports from DEC regarding product history, review proposal of Triassic Labs regarding age dating oil, e-mail to DEC regarding doing age dating of newly appeared product, generate internal work order and e-mail to DEC, coordinate drum pickup for full absorbent drums, use of light duty vehicle, low value equipment, sonic interface probe, and purchase supplies, contracting with Metro Environmental Contracting for providing a vacuum truck for VEFring the wells. I found the pay package to be acceptable and notified Steve Karwiel by e-mail.7/15/14 - Austin - This PIN project is being transferred from Ketani to Vought, for project consolidation and review purposes - end8/5/14-Vought-Contract Payment Package (EnviroTrac)-(6/18/14 thru 6/29/14. Work performed included working on baildown test graphics/data entry and report writing, well monitoring and bailing, sock replacement, review and tabulation of gauging and EFR data, project coordination.8/12/14-Vought-Called and spoke to NYSOAG Karpen and noted that DEC was performing full file review. NYSOAG noted a prior meeting with DEC where there was discussion of possible sources in addition to the Guarino site and the need for investigation of those possible additional sources. NYSOAG noted that Guarino still may be responsible for current onsite contamination if DEC still remediating that same contamination and as such no ISR was needed until additional responsible parties (if any) were found.9/17/14-Vought-Contractor Application for Payment (EnviroTrac)-(6/30/14 thru 7/27/14). Gauged wells and bailed product, replaced absorbent socks, review and tabulation of gauging data, project coordination.10/6/14-Vought-Contractor Application For Payment(EnviroTrac)- (7/28/14 thru 8/31/14). Work performed included: Site travel, monitoring and bailing of wells, review and tabulation of product recovery data, selecting and preparing files for submittal to NYSDEC, project coordination, File review by EnviroTrac at DEC offices from 8/11 thru 8/15, assembly of older data for submission to DEC, review of timeline generated by DEC, project management.11/18/14-Vought-Contractor Application For Payment(EnviroTrac)- (9/1/14 thru 9/28/14). Work performed included: Site travel, monitoring and bailing of wells, review and tabulation of product recovery data, selecting and preparing files for submittal to NYSDEC, project coordination, project management.12/9/14-Vought-Contractor Application For Payment(EnviroTrac)- (9/29/14 thru 10/26/14). Work performed included: Site travel, monitoring and bailing of wells, review and tabulation of product recovery data.12/9/14-Vought-Contractor Application For Payment(EnviroTrac)- (10/27/14 thru 11/30/14). Work performed included: Site travel, monitoring and bailing of wells, review and tabulation of product recovery data, removing broken sock and other debris from MW81/26/15-Vought-Contractor Application For Payment(EnviroTrac)- (12/19/14 thru 1/31/15). Work performed included: Site travel, monitoring and bailing of wells, review and tabulation of product recovery data, project coordination.3/10/15-Vought-Contractor Application For Payment(EnviroTrac)- (12/19/14 thru 1/31/15). Work performed included: Site travel, monitoring and bailing of wells, review and tabulation of product recovery data, project coordination.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D004
Waste name: ARSENIC
Amount (Lbs): 3680400

Waste code: D008
Waste name: LEAD
Amount (Lbs): 3680400

Facility Has Received Notices of Violations:

Regulation violated: Not reported
Area of violation: Universal Waste - Small Quantity Handlers
Date violation determined: 07/31/2013
Date achieved compliance: 10/25/2013
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 10/25/2013
Enf. disposition status: Not reported
Enf. disp. status date: Not reported

Waste Description: HAZARDOUS WASTE LIQUID NOS
Quantity: 100
WT/Vol Units: P
Item Number: 1
Transporter Name: SAFETY KLEEN
Transporter EPA ID: TXR000050930
GEN Cert Date: 2/14/2011
Transporter Receipt Date: 2/14/2011
Transporter 2 Receipt Date: 2/17/2011
TSDF Receipt Date: 2/17/2011
Transporter 2 ID: NJD071629976

NY MANIFEST:

EPA ID: NYD986985489
Country: USA
Location Address 1: 696 FULTON ST
Location Address 2: Not reported
Location City: BROOKLYN
Location State: NY
Location Zip Code: 11217
Location Zip Code 4: Not reported

Mailing Info:

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"4/12/04-Vought-Spill transferred from Mulqueen to Vought as per Rommel.9/27/05 - Obligado - Spill transferred from Vought to Obligado11/18/05 - Obligado - File Review:9/9/93 - NOV letter dated reporting failed inspection for no registration, no tank testing.5/18/94 - Affidavit, B & M Service station maintenance reports no Stage 1 or Stage 2 vapor recovery systems in place.5/27/94 - UST closure plan submitted by Dames and Moore and approved by the department on 6/10/94.12/94 - UHaul Corporation UST abandonment report. Amended closure plan to abandon the USTs in place. Amendment approved by DEC Krimgold. The site contained 1 4000 gallon gasoline underground storage tank. Piping was less than 15 feet and did not require sample collection. 1 dispenser pump was located on site. 4000 gallon gasoline UST was encased in concrete and could not be removed so it was closed in place under supervision of a NYC fire Department certified tank installer. The condition of the tank was good, with no corrosion holes. A site assessment was completed at the tank location. Three soil borings performed, B1, B2, and B3 and a total of 5 soil samples collected. NO impacts at B1 and B2 to 27 ft bgs. SOIL IMPACTS AT B3(20-23 ft) showing 25000 ppb ethylbenzene, 203000 ppb xylene, 15000 isopropylbenzene, 26000 n-propylbenzene, 130000 1,2,4 trimethylbenzene, 70000 1,3,5 trimethylbenzene, 59000 n-butylbenzene, 18000 naphthalene. At B3 (26-27) show 5500 ppb ethylbenzene, 33000 xylene, 37000 trimethylbenzene, 18000 2,3,5 trimethylbenzene, 21000 nbutylbenzene, 20000 sec-butylbenzene. Boring B3 advanced to 28 ft, showing up to 500 ppm with PID. Soil is brown medium sand and silt, GROUND WATER NOT ENCOUNTERED. Based on soil results spill number 9412191 was assigned. "Based on site assessment boring results, remedial measures will be required. A supplemental site assessment plan should be submitted to the NYSDEC and remedial activities implemented after NYSDEC approval"12/12/05 - Obligado - Call Michael Morris at ATC, inquire as to site status. He said he will contact his client.From GIS parcel information:Site resident & owner:M & V RENTALS INC622 ATLANTIC AVENUEBROOKLYN NY, 11217Mortgage:U-HAUL CO OF NEW YORKPO BOX 29046 Apt# PHOENIX AZ, 85038-90465/11/06 - Obligado - Sent letter to Amerco Real Estate requiring additional site assessment and submission of investigation workplan within 30 days of receipt of letter. 5/16/06 - Obligado - Phone call from Joey Peck (602-263-6555 ext.3957) of Amerco Real Estate. He said they had a 10 gallon spill in 1994 and asked what they needed to do to close the spill. I told them they needed to install monitoring wells to ensure ground water is clean in order to close the spill. 5/22/06 - Obligado - Delivery confirmation - 5/15. Workplan due 6/15.6/9/06 - Obligado - Extension request for workplan from Michael Morris. Granted extension workplan due 7/11.6/29/06 - Obligado - received Workplan submitted by ATC via email. Proposed 3 soil borings and installation of 3 2" wells with Geoprobe. Called John Mascioli to discuss workplan. Sent ATC/RP email reply approving workplan however with recommendation to use more powerful drill rig due to boulders and depth to groundwater as reported in 1994 American High Tech Report. Due date for Remedial Investigation Report is 9/1/06.8/30/06 - Obligado - Call from Pam at ATC. Required as to GW standards to be compared to. Told her it was TOGS.9/11/06 - Obligado

U000416589

- Received Phase II Limited Subsurface Site Investigation, submitted by ATC Associates, dated August 31, 2006. Groundwater encountered at approximately 37 ft. Silt and fill underlain by coarse grain sand with gravel. Six soil samples collected. 3 monitoring wells installed. 3 GW samples collected. VOC soil impacts at MW1B at approximate water interface with 11,700 ppb 1,2,4-trimethylbenzene. Minor SVOC PAH impacts at 15 ft bgs. GW analyticals show impacts for VOCs at MW1 and MW2, also some minor SVOCs at MW1 and MW2. GW results in ppb: MW-1 (downgradient of former tank) - 16700 BTEX and 32000 total VOCs (2570 ethylbenzene, 13700 xylene, 1890 naphthalene, 1290 n-propylbenzene, 9870 1,2,4 trimethylbenzene, 2710 1,3,5 trimethylbenzene) MW-2 - minor exceedences with 76.65 BTEX and 261 total VOCs MW-3 - NDSent Stipulation agreement requiring additional delineation and submission of RAP. Due date for signed STIP is 9/2/06. 9/15/06 - Obligado - Spoke to Cecil Fleckton of Environmental Resource Management (ERM). She is the new consultant handling this site (315-445-2554 ext 27 and 315-506-9537). 9/29/06 - Obligado - Email from Rob Fraley. He had questions about the STIP and requested an extension. Called him and left a message to call the DEC. 10/10/06 - Obligado - Called Rob Fraley (602) 263-6555 ext 4735. Left message to call DEC. 10/17/06 - Obligado - Emailed Fraley to inquire about Stipulation Agreement. 11/14/06 - Obligado - Called Rob Fraley to inquire about Stipulation Agreement. Left message with Joey Peck to have Rob Fraley call DEC. 11/17/06 - Obligado - Called Rob Fraley again. Left message to call back DEC. 11/20/06 - Obligado - Spoke to Rob Fraley. He said they sold the property to: AY 622 Atlantic, LLC c/o Forest City Ratner Companies One MetroTech Center North 11th Floor Brooklyn, NY 11201 Attn: General Counsel He Emailed me a copy of the sales agreement (not signed by purchaser) which said that the property has been sold at a reduce rate (\$218,000 less) due to a failure to complete the "Underground Tank Work". I will send a new Stipulation to AY 622 Atlantic, LLC. 11/20/06 - Obligado - Spoke to Rob Fraley. He said they sold the property to: AY 622 Atlantic, LLC c/o Forest City Ratner Companies One MetroTech Center North 11th Floor Brooklyn, NY 11201 Attn: General Counsel He emailed me a copy of the sales agreement (not signed by purchaser) which said that the property has been sold at a reduce rate (\$218,000 less) due to a failure to complete the "Underground Tank Work". 12/5/06 - Obligado - Sent a new Stipulation to AY 622 Atlantic, LLC. Signature by 12/26/06, with ISR in 60 days, RAP in 60 days. 12/6/06 - Obligado - Received additional contact information from Robert Fraley. Their point of contact was: Andy Zlotnick, Sr. VP, Real Estate Development Department 718.923.8467 azlotnick@fcr.com Called Mr. Zlotnick, left message to call DEC. 12/7/06 - Obligado - Emailed Mr. Zlotnick, attached copy of STipulation Agreement. 12/8/06 - Obligado - Received email reply from Mr. Zlotnick, he will forward to the environmental team. 12/12/06 - Obligado - Received delivery confirmation - 12/7/06. 1/3/07 - Obligado - Called Mr. Zlotnick to follow up. Left message to call back DEC. 1/12/07 - Obligado - DEC meeting - Forest City Ratner, Rioux Environmental, DEC. They did a phase 2 investigation with several borings and one additional gw well. They plan to excavate the entire site down to 45 ft and treat water (gw at ~42 ft). They plan to excavate around July. In the meantime I will work with Rioux to develop a workplan for some additional ground water delineation. After discussion with Sin Senh next week (Roux - 631-232-2600) I will put together a CAP for a STIP for additional delineation and a RAP submittal. 1/17/07 - Obligado - Voice mail from

Daren Moss from Roux. Called back and left message. 1/23/07 - Obligado - Spoke with Sin Senh from Roux. Told him I wanted one additional well to delineate west of MW13, due to elevated concentrations. Told him I would put together a new CAP. 2/26/07 - Obligado - Stipulation agreement with new CAP sent to FCR by John Urda. Due date for signature is 3/16/07. 4/13/07 - Obligado - Phone message from DEC Urda who spoke with FCR attorney. Signed stip should be received by Monday. 4/24/07 - Obligado - Spoke to Urda, STIPs not received. Called Sin Senh and Darren Moss to inquire about site, neither of them were in the office, left message to call DEC. 4/30/07 - Obligado - STIPULATION executed by Oliva. 5/3/07 - Obligado - Received executed Stip from Legal. 5/4/07 - Obligado - Email stip to Roux. Due date for ISR is 6/15/07. 5/31/07 - Obligado - Received extension request for ISR to 7/6/07. 6/07 - Obligado - Received Investigation Summary Report. The report summarizes additional investigation with regard to both this spill and spill 0611832, which is located across the street. The investigation revealed 2 separate ground water plumes, both of limited areal extent. No free product was encountered. The ground water plume has been adequately delineated. Contamination does not appear to have migrated off-site from the formal UHaul site. Sent email requiring Remedial Action Plan within 60 days. 10/23/07 - Obligado - Reviewed a RAP, submitted by Roux, dated September 17, 2007. The RAP is similar to the RAP proposed for 179 Flatbush. Proposes Excavation down to 25 to 32 ft bgs followed by chemical oxidation using the product RegenOx. According to REgenOx literature, the mixing of regenox in subsurface generates minimal heat. Proposes 7 injection points and at least 2 applications, spaced 1 month apart. Baseline sampling will be performed prior to injection and performance monitoring 1 month after. Approved of the workplan with following modifications: 1) Soil endpoint samples will be collected in accordance with DER-10 in the area of concern subsequent to the soil excavation. 2) Foundation construction will not proceed in the area of concern until the Department has had a chance to review and approve the remedial evaluation report. 3) Due to adsorption and desorption equilibrium in soil and ground water systems, contaminant concentrations in ground water often rebound subsequent to chemical oxidation treatment. Since long term ground water monitoring may not be feasible due to the proposed site construction, the Department may require confirmatory soil sampling to confirm contaminant mass reduction in the subsurface soils. 4) The soil management work plan and a RAP implementation schedule must be submitted to the Department within 30 days of receipt of this letter. RAP implementation due within 45 days. 11/29/07 - Obligado - Meeting with Roux and FCR. The project is delayed due to litigation holding up the project. They also had issues with some of the above modifications. They will submit a letter with concerns within 14 days. They want to modify the CAP as the 45 day implementation requirement is not possible due to litigation. They also were concerned about item 2. We agreed that the foundation could be poured as long as remediation can proceed via installation of injection and monitoring wells through the foundation slab to treat ground water. 1/15/08 - Obligado - Review Quarterly monitoring report. Combined, 11 ground water monitoring wells were sampled from 622 Atlantic and 179 Flatbush on September 20, 2007. No LnAPL was detected. VOCs and SVOCs in excess of standards in 4 wells. BTEX ranged from ND to 7400 ug/L in MWATC1. GW Flow is to the northwest. Concludes no free product on site, VOC levels have not

U000416589

significantly changed. Roux plans to implement the RAP for the site. Review letter dated December 14, 2007 in response to the RAP approval. DEC RAP modification is #2 above is modified so that the foundation can be poured after excavation but ground water remediation and monitoring will proceed through foundation if necessary. A Soil Management Plan was also submitted. I reviewed the plan and the only thing missing was a odor control and monitoring plan. I emailed Daren and requested he modify the plan as such. 3/17/08 - Obligado - Received Community Air Monitoring Plan for this site. The CAMP is for the entire AY site and addresses odor and dust. 5/6/08 - Obligado - Review quarterly monitoring report for sp#9412191 and 0611832. VOCs in excess of standards in MW13, MW27, MWATC1, and MWATC3. SVOCs in excess of MW13, MW27, and MWATC3, and MWATC1. Max VOCs in MWATC1 (20,240 ug/L). Max SVOCs in ATC1 660 ug/L. 7/28/08 - Obligado - Review quarterly monitoring report for sp#9412191. Max total VOCs at the former UHAUL site are 16820 ug/L (MWATC1). Max SVOCs show 680 ug/L naphthalene in MWATC1. Roux plans to implement the RAP. 9/8/08 - Obligado - Meeting with Forest City Ratner and Roux. They want to proceed with chem ox injection and UST removal prior to mass soil excavation. They will submit letter as such. 9/16/08 - Obligado - Received letter requesting start UST removal and chemox injection. Asked Daren to resubmit the letter to include compliance with EPA UIC program and implementation schedule. 9/25/08 - Obligado - Received revised letter. They will comply with EPA UIC program. The implementation schedule was not detailed. Only that it would start within 2 weeks of UST removal. I called Daren to inquire about the timing of baseline sampling, well installation, injection, performance sampling, re-injection, and reporting. He said he wasn't sure about the scheduling and he would need to get back to me. But he requested permission to proceed with UST pull. I sent email to Daren approving UST pull but requiring more detailed implementation scheduling for injections. 10/13/08 - Obligado - Received implementation schedule for Regenox injections: * October 10, 2008 form received by EPA for UICP * November 10, 2008 Start of injection work (30 day notification after sending form to EPA) * We estimate 7 days to complete installation of injection points and inject at 622 Atlantic Avenue (Spill #94-12191) * We estimate 5 days to complete installation of injection points and inject at 179 Flatbush Avenue (Spill #06-11832) * The post injection monitoring will be performed approximately one month after the injections. Once we receive the post injection monitoring results, we will provide another update as to the schedule for completion of the injections. ~11/10/08 - Obligado - Spoke to Daren Moss and Sin Senh about this project. They said that they have not received authorization to proceed with chemical oxidation. They wanted to request an extension until 2nd quarter 2009 to begin injections. They said there was another legal challenge and the development wouldn't start until 2009. I told him the chemical injections were not dependent on development and they should proceed as scheduled. I told him I would not approve the extension and they should start work as soon as possible. ~11/11/08 - Obligado - Spoke to Kate Bicknell. She basically reiterated the above. They did not want to start remediation because the development project was put on hold. I told her that if they didn't begin remediation FCR was in violation of Agreement. I informed her of penalties for violations. 11/24/08 - Obligado - spoke to Daren Moss. They have not gotten authorization to proceed with chemical injection. He will contact Kate. 12/4/08 - Obligado - Emailed Kate

U000416589

Bicknell and required start of remediation as per RAWP or case would be referred to Legal for enforcement. 12/5/08 - Obligado - Email from Kate that they will begin injections in January. 1/15/09 - Obligado - Emailed Daren to inquire if remediation had begun. 1/21/09 - Obligado - Email from Sin: They mobilized to the site 1/12/09 but had difficulty drilling due to boulders. They will switch to ODEX drilling and return to the site on 1/26/09. 5/27/09 - Obligado - Sent email to Daren requiring submission of overdue monitoring reports. Required that going forward please submit the quarterly reports on a CD to the Department no later than 30 days after the end of the calendar quarter - i.e., the 1st Quarter report should be submitted by April 30, the 2nd Quarter report by July 30, etc. For sites undergoing chemical oxidation, the reports should include summary of any injection activities, and results of all performance sampling. 9/22/09 - Obligado - Reviewed quarterly reports - The concentration of VOCs decreased in MWATC1, MW13, and MW27. VOCs increased in MWATC3. According to the report the chemical oxidants have been consumed and the second phase of ISCO injections will be performed using the same injection points as the first injection event and began on June 1, 2009. Sent email to Daren requiring hydrographs for each well showing water table fluctuations, BTEX and MTBE concentration trends, and free product thickness (if present) over time. The graphs should show all data dating back to when the wells were first installed. The graphs should also indicate dates of any remedial actions, such as excavations or chemical injections. 1/6/10 - Obligado - Have not received 3Q09 quarterly report for 622 Atlantic and 179 Flatbush. I sent email to Sin Senh of Roux to submit reports ASAP. 1/8/10 - Obligado - I received the 3Q09 quarterly report. I emailed Frank Cherena to remind him that the 4Q09 report was due by the end of the month. 2/10/10 - Obligado - I received the January 2010 sampling report. Ground water concentrations rebounded significantly in the most recent sampling round. At 622 Atlantic, concentrations of total VOCs in MW13 increased to 10,689 ug/L. On 179 Flatbush, MW27 was destroyed and could not be sampled. Recommends discussing these results at the next meeting. 2/11/10 - Obligado - Held a meeting with Roux Associates Sin Senh and Charlie McGuckin, and attorney Richard Leeland, all representing Forest City Ratner. DEC Brevdo, Obligado, and Tibbe attended. Roux presented revised drawings of the Arena development plan. The proposed foundation is not as deep as originally proposed in the RAP, approximately 5 to 10 feet higher. As a result, additional contamination soil at 622 Atlantic would be left unexcavated. According to Roux the with the capping of these soils in addition to the aggressive ground water remedy, the vadose contaminated soils will not impact ground water. DEC pointed out that the effectiveness of the ground water remedy has not yet been demonstrated, as the recent sampling results showed significant rebound. Roux will do additional aggressive injections to treat the saturated zone. They will also submit more information about the levels and amount of the contaminated soil which will remain as a result of the change in plans. Only a small portion of 179 Flatbush is in the arena footprint. The other areas will be a plaza with no building on top. According to Sin, MW27 will be reinstalled concurrent with the delineation of the 195 Flatbush site. 2/18/14 - Obligado - Completed Review of Remedial Action Completion Report (RACR) dated October 2012 and RACR Addendum Letter dated 2/10/14. Spill has been closed due to: 1) All USTs (8 800 gallon gasoline USTs, one previously closed in place 4000 gallon USTs, and

U000416589

one 550 gallon waste oil UST were closed and removed.2) Contaminated soil excavated to depth 26 ft bgs. A total of 30,200 tons of soil was removed from teh 622 Atlantic Avenue property.3) 7 endpoint samples were collected. No VOC or SVOC exceedences were found at the arena foundation endpoint depth.4) 4 insitu chemical oxidation events were conducted in February 2009, June 2009, March 2010, and December 2010 to try and address the residual saturated impacts at 45 ft depth. A total of 14,200 lbs of Regenox was injected to try and reduce groundwater contaminant levels. MW13 demonstrated a 49% reduction in groundwater contaminant levels from baseline in 2008 to January 2010 prior to the well being destroyed. MWATC1 demonstrated a 39 % reduction in gw contaminant levels prior to being destroyed. 5)The plume was delineated and appeared to be shrinking6) Due to the depth of contamiantion and the presence of a vapor barrier beneath the arena and the size of the arena compared to the small size of the contaminant plume, vapor impacts are not a concern7) The source of the spill has been removed and the spill has been remediated to the extent feasible. 8) This spill no longer appears to poses a threat to human health or the enviroment.Spill Closed. RACR filed in edocs under spill #0107438

29 FLATBUSH AVENUE (Continued)

S110487598

Site Features:The site is about 0.412 acres in size and is bordered by Fulton Street to the north, Rockwell Place to the east, and Flatbush Avenue to the west. Adjacent properties principally consist of commercial, retail and office uses. **Current Zone/Use:**The site is owned by 29 Flatbush Associates, LLC and it is currently vacant. It is zoned for commercial and office buildings (C6-4). The proposed future use of the site will be mixed commercial and residential. **Historic Use:**The site was most recently developed as an asphalt-paved, hydraulic-lift parking lot, which operated from 1960 until 2004. At the time of the application, there were no on-site structures with the exception of a prefabricated parking lot attendants booth situated atop a concrete slab. The hydraulic aboveground car lifts are no longer present at the Site, and it is not known when operation of the lifts ceased. The Site was previously occupied by the Orpheum Theater (circa 1900), and prior to the theater the Site contained numerous residential dwellings, some including retail space, along Fulton Avenue, Flatbush Avenue and Rockwell Place. Past adjacent and surrounding properties consisted of residential, institutional and retail development. **Site Geology and Hydrogeology:**Soil at the site consists of a layer of urban fill extending from the surface to depths ranging from 12 to 24 feet below grade underlain by an unstratified glacial till. Groundwater is approximately 27 to 30 feet below grade surface and flows toward the southwest. June 7, 2013 - DEC signed the Certificate of Completion for this site.

Env Problem: **Nature and Extent of Contamination:**Prior to Remediation:Based on the investigations conducted to date, known contaminants including chlorinated solvents, semi-volatile organic compounds (SVOCs), metals, and pesticides are present in the subsurface. These contaminants are impacting soil and groundwater. Soil - No volatile organic compounds (VOCs) were detected in soil exceeding their respective SCGs. Soil sample results indicated that SVOCs, mainly carcinogenic polycyclic aromatic hydrocarbons (cPAHs), metals (primarily lead), and pesticides (primarily 4,4-DDT) at concentration exceeding Part 375 Unrestricted use SCOs. The reported total concentration of SVOCs detected in soil ranges from 1.4 ppm to 116 ppm, the total lead concentration reported ranges from 39 ppm to 2780 ppm, and the concentration of 4,4-DDT reported ranges from 0.0045 ppm to 0.0355 ppm. Groundwater - VOCs detected in groundwater include tetrachloroethylene (PCE) at concentrations ranging from 16 to 18 ppb which is only marginally above the standard. Coupled with the absence of VOCs in soil, the PCE is likely attributable to an upgradient source, and not derived from on-site contamination. Soil Vapor - VOCs detected in the eight soil vapor samples collected at the site include PCE. PCE was detected in one sample at a concentration of 73.24 ug/m3. The presence of VOCs in soil vapor is attributed to an unknown off-site source due to the lack of VOCs in on-site soil. **Post-Remediation:**Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were Lead and SVOCs in soil. **Significant Threat:**NYSDEC in consultation with NYSDOH determined that the site does not pose a significant threat to the environment or public health based on the data available.

Health Problem: All contaminated soil has been removed from the site thereby eliminating potential human contact. Contaminated groundwater at the site is not used for drinking or other purposes as the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the

groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. New on-site buildings have been constructed with ventilated underground parking garages and vapor barriers minimizing the potential for vapor intrusion.

DEC Memo: 09/30/10 - LZReviewed correspondence (eDocs) from Bethlehem Lutheran Church concerning repairs done to the tank after it failed the tightness test. After the fill line had been replaced, the tank passed the tightness test. Obviously, the tank is located in a subterranean vault without access, but the UIS shows the tank as aboveground (see cross-reference). Sent out a spill closure letter that contains a requirement for tank information correction. The spill case is closed. 11/24/2009 TTF letter sent to:Rev. Paul KnudsenBethlehem Lutheran Church490 Pacific StreetBrooklyn, NY 11217
Remarks: TANK TEST FAILURE ON A 1500 GALLON UST.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DER Facility ID: 28241

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"01/26/04Transferred from Rommel to Austin02/17/04: Reassigned from AUSTIN to KRIMGOLD.11/05/2005 Left messages for Dean Peterson at new location at Community Living (718-855-4035). Did not receive a callback. Bishop09/13/06 This case was transferred from Albany to Region 2. Zhune called Mr. Petersen several times. He never call back. A TTF letter was sent to: Mr. Dean Petersen40 Rector StreetNew York, NY 1000608/14/08-Zhune visited the site spoke to Tiffany Adams Office/Building Manager (718) 855-4035 ext. 1303. Tiffany called Crris Heighter the Director of the Institue of Community Livingcelll 347- 219-8991, office 718- 272-6046. He said by the time that the tank failed the test in 2001 he was not the Director of the Community Living. The 3000 gallons # 2 fuel tank was recently tested by ACR Mechanical and passed the test. He will be back from vacation on september and will search for papers work. A TTF lettter was sent to:The Institute of Community Living2384 Atlantic Ave.Brooklyn NY 11233Att: Chris Heighter09/19/08 Chris Heighter sent the result for the last Tightness test. The 3000 gallons #2 fuel tank was tested on 05/07/08. The result indicates that the tank passed the test Therefore DEC is asking for information that happened in 2001.09/30/08- Zhune called Chris and gave him the phone # of Crown Leak Detection which was the company that tested the tank on 07/30/2001. 11/26/08-Chris sent the 02/21/03 tank test results thst was done by Protest.11/26/08-Zhune spoke to Bob from Protest. As per Bob the tank system was tested in December, 2002 and failed the test with a Ullage (dry) leak. They replaced the remote fill and the vent line. On 02/21/03 the system was retested and passed the test. He also said that he did not see any note about contamination at this site. Worker who did this job are no longer with ProtestSpill closed.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HE WILL TAKE A LIQUID SAMPLE FROM SOURCE (TRANSF) AND REQUEST A EMERG PRIORITY FOR PCB SAMPLE RESULTS. THEY WILL START CLEANUP AS 50- 499 PPM. A FLUSH CREW IS ON LOCATION AND SPILL VAN WAS DISPATCHED TO LOCATION. A OVER 50 PPM TANKER WAS ORDER (EPA # NYP004096343) E.S.TAG 30044WAS PLACED. CHAIN OF CUSTODY # BB01466 . OS A. LOSCHIAVO WILL BRING SAMPLE TO CHEM LAB. ENVIR REP R. JAMES WAS NOTIFIED AT 1126 HRS. CIG B. MURPHY WAS NOTIFIED 1143 HRS. 26-FEB-2002 13:25 HRS.NETWORKS DEPT. LEAD MECH REPORTS: ASTORIA > 50 TANKER REMOVED 225 GAL'S OF DIELECTRIC FLUID FROM UNIT. UNIT FLUID CAPACITY PLATE INDICATES UNIT CAPACITY IS 265 GALS. IT IS NOW DETERMINED 40 GALS OF DIELECTRIC FLUID HAS BEEN RELEASED FROM UNIT IN TO THE DIRT OF THE CONCRETE STRUCTURE.2-26-02 15:20HRS R. JAMES REPORTS, DRAIN WAS FOUND IN T.M AND IT WAS CLOGGED S.PACE 49874.UPDATE-----2/27/02 BECAUSE THE DRAIN WAS CLOGGED NO LIQUIDS COULD ESCAPE THE STRUCTURE THROUGH THE DRAIN.2-26-02 LAB SEQ# 02-01631-001 40 PPM.2-26-02 A. WALKER REORTS (ENV OPS) T.M REMOVED AND DRAINED TOTAL LIQUIDS FROM STRUCTURE WAS 75 GALLONS OF WATER AND 225 GALLONS OF OIL. 10 DRUMS OF SOLIDS REMOVED. STRUCTURE DOUBLE WASHED WITH BIO GEN 760. NO SUMP, BUT DRAIN WAS PRESENT, AND NOT WORKING AND IT WAS FOUND CEMENTED. JOB WAS 100% COMPLETED.

Remarks: leak from transformer pcb ppm 37 12/11/84

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Town: New York City
Update By: SRHEIGEL
Site Description: The remediation of this site is currently being proposed under the Brownfield Cleanup Program (BCP). The site is approximately 0.35 acres, located at 669 Atlantic Avenue, Borough of Brooklyn, Kings County and is part of the Atlantic Terminal Urban Renewal Area. The site is located on the northern side of Atlantic Avenue between South Oxford Street and South Portland Avenue. It occupies the entirety of a C6-1 zone that is immediately surrounded by residential (R7-2), commercial (C6-4) and manufacturing (M1-1) zones. Current use is vacant, historical records indicate that it was utilized for automotive fuel storage and dispensing purposes. The Brownfield Cleanup Agreement was terminated in 2007 at the request of the Volunteer. The Site is associated with NYSDEC spill #0103681 and #9912465.

ATLANTIC TERRACE CORNERSTONE PROJECT (Continued)

S113916481

Env Problem: The primary contaminants of concern at the site which are known or suspected to affect the soil, groundwater and soil gas are petroleum, chlorinated solvents, SVOC's, and metals. Investigations indicate concentrations of metal and PAHs that exceed RSCOs include barium, chromium, lead (14,200 on the South side of the property), mercury (up to 3 ppm), chrysene, benzo(a)anthracene, benzo(a) pyrene, and dibenz(a,h)anthracene. VOCs (ethylbenzene, toluene, trimethylbenzene, xylenes and naphthalene), SVOCs (including naphthalene) and metals have been measured in groundwater in concentrations that exceed their respective standards. In addition, soil gas exhibited elevated concentrations of petroleum-related compounds (i.e. 2,2,4 ? Trimethylpentane concentration of 28,471 g/m3). Also, a soil gas TCE concentration of 30 g/m3 has been reported.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D000
. Waste name: Not Defined

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

FINDS:

Registry ID: 110019651811

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"10/10/95: This is additional information about material spilled from the translation of the old spill file: 75 YDS CONTAIN SOIL.6/7/04 TIPPLE UPDATING///TRANSFERRED FROM TIBBE TO TIPPLE/// Ernesto Samuels property mgt agent (718-875-5040 ex.11) contacted. Investigation workplan to be forwarded for review. 8/30/06 - Austin - Received correspondence and 2 phtos from Alastiar James, treasurer of Lafayette Court Apartment Coop at 147c Lafayett Ave., Bronx. Letter requested closure of spill report. Reassigned from DeCandia in Albany to Ketani in Region 2 office, to review submittal and evaluate for closure. - end8/31/06 - Raphael Ketani. I spoke to Alastair James, Treasurer, Lafayette Court Apartment Coop, 147C Lafayette Avenue, Brooklyn, NY, 11238. He explained that this was a very small spill when it took place. He said it was just an overfill and only a very small area was affected - "maybe 5 by 5."Based upon my conversation with Mr. James, the pictures he has enclosed with his letter showing the that the garden has recovered, and the small (1 gal.) size of the spill, I am closing the spill case.Mr. James wrote that he would like a closure letter. I will send one out today.

Remarks: OIL LEAKS FROM VENT TO BRICK PATHWAY & SOIL AREA & SHRUBS. ALMAR FUEL CO. RETURNED & APPLIED SPEEDI-DRI. APPROX. 1 WEEK LATER P/U & REMOVED & SAND WAS APPLIED. CHEMICAL CONSULTING CORP. TESTED SAMPLES

DEC Memo:

06/22/07-Vought-Off hours responder. Vought called Frank Cherena(631-232-2600) for more information. Vought left message to return call to DEC. Vought called Debbie Bhatt and left message to return call to DEC. 07/17/07-Vought-Received message from Bhatt (718-923-8651) and returned call and left message to return call.9/1/10 - Raphael Ketani. The spill took place on 6/6/07, but was reported on 6/21/07. It consisted of an overfill of a 1,080 gal. UST. Twenty five gallons of #2 oil spilled onto the ground. Allegedly, the contaminated soil was dug up the day of the spill.The site is block and lot 1127 and 50. It was a private residence. It was sold on 9/5/06 by David Bijur of 123 7th Avenue, #216, Brklyn. to AY 473 Dean, LLC, c/o Forest City Ratner Companies, One Metrotech Center North, Brklyn, 11201. There is no paper file and there are no E-docs. Frank Cherena of ROUX Associates (631) 232-2600 was the environmental company contact. Debbie Rabbino Bhatt (718) 923-8400 was the contact for the owners. I tried calling Ms. Bhatt, but the phone number wasn't working. I did make contact with Mr. Cherena. Mr. Cherena said that ROUX did not do the cleanup themselves. He said that Ferrantino Oil was hired by the owners to do the work and came out immediately after the spill. The overfill resulted in oil coming out the vent pipe in the back and spilling onto the ground. The surface soil was removed, but end point samples weren't taken. Mr. Cherena went on to state that the building has since been demolished as part of a much larger project involving Atlantic Yards. He said that this larger project involves several other sites which are all under the management of Andre Obligado of Unit B of DER. The tank is still in the ground and it will be removed, along with the contaminated soil, once the construction moves over to this part of the project. They will dig down 20 or 30 feet. The tank itself has been cleaned out and the sludge was hauled away. He said that he has the paper work for this part of the job and he will send it to me.9/2/10 - Raphael Ketani. I called up Ferrantino Fuel Corp., 176 9th Street, Brooklyn, NY, 11215. I spoke to the dispatcher, Dennis Goldstein (718) 832-6700 about the spill and the cleanup of the contaminated soil. He couldn't find it in his computer system. So he will call me back later with the information.11/23/10 - Raphael Ketani. I tried to contact Mr. Cherena of ROUX Associates (631) 232-2600 regarding the documentation for the cleaning of the fuel tank. I contacted Mr. Goldstein of Ferrantino Fuel and asked him for the documentation which indicates that the 25 gals. spill had been cleaned up. I gave him the site address, but he couldn't find it in his database. He will call me back with the information.12/9/10 - Raphael Ketani. I spoke to Mr. Goldstein again. He said that he had given the task of looking for the cleanup documentation to a worker in his office. He said that he will talk to this person and get back to me.12/14/10 - Raphael Ketani. Michael of Ferrantino Fuel called. He said that he remembered the job. He said that the overfill came out the vent and onto the soil and onto concrete. He added that Ferrantino did the entire cleanup. Michael also mentioned that two years after a new boiler was installed in the building, the owners had the building knocked down. Michael said that he will send the DEC a cover letter explaining what had happened and how the spill had been cleaned up, along with a diagram showing the spill area and a manifest for the contaminated materials that were removed. I told him that will be fine.12/17/10 - Raphael Ketani. Mr. Cherena of ROUX Associates (631) 232-2600 called and said that he had the overfill

soil spill report and the tank cleanout and removal report for the site. He will send them to me by e-mail. Mr. Cherena sent me an e-mail later today along with three documents (see e-docs):As discussed, here are the documents that you requested, along with a synopsis of work at the above spill Site.On June 6, 2007, Ferrantino Fuel Corporation overfilled the 1,080-gallon UST at 473 Dean Street, which resulted in the release of approximately 25 gallons of #2 fuel oil to soil located adjacent to the fill port of the UST. Ferrantino applied 10 bags of absorbent powder to soak up the released #2 fuel oil. Subsequently, one fifty-five gallon drum of waste (soil and oil-soaked absorbent powder) was removed from around the spill area and was transported to American Biomass located in Waterboro, South Carolina for proper disposal (Attachment 1). The proximity of the UST to the building prevented its removal prior to the building demolition; and therefore, in June 2010, ABC Tank Repair & Lining was contracted by Ferrantino to pump out and scrape clean the interior of the UST in order to prepare the site for demolition (Attachment 2). Following demolition of the building (August - September 2010), Roux Associates contracted Brookside Environmental to complete the cleanup and removal of the UST. Brookside Environmental removed the UST from ground, accessed the tank interior for cleaning, and removed 2 drums of sludge/sediment for offsite disposal in October 2010. Following completion of this work, Brookside Environmental issued an New York City Fire Department Affidavit certifying final cleanout and removal of the UST. Copies of all manifests and affidavits associated with the work completed by Brookside Environmental are provided in Attachment 3. The tank was then removed off-site for scrap disposal by Breeze Demolition (Demo Contractors). Following removal of the tank, no visual soil contamination was observed in this area.12/20/10 - Raphael Ketani. I reviewed the letters that Mr. Cherena had sent regarding the cleanup of the overfill in 2007 and the removal of the 1080 gal. fuel tank and the removal of the replacement 1000 gal. As the 06/18/07 Ferrantino letter and manifest indicated that the spill had been cleaned up, and as the ABC Tank and Brookside Environmental letters indicated that the two tanks had been removed, I have determined that the oil contamination had been successfully removed. Therefore, there is no threat to the public or the environment. So, I am closing the spill case.

Remarks: Tank overfill on a 1080gal. UST.... impacted soil. One 55gal. drum of contaminated soil and absorbents were removed from the site. Clean up was believed to have been done that same day 6/6/07.

DEC Memo: DEC Piper spoke with PAul at Milro. Milro was kicked off job. They were called in to due to oil water seeping in though wall where fill enters building. The tank room is filled with unknown amount of oil and water. Petro said they were going to take care of it and it was less than 3 gal of oil though it doesnt explain why water is present. The story is awkward. DEC Zhune to respond.02/01/11-Zhune responded to this site. Spoke to Benjamin Ramos 718-789-6262(Maintenance) and Gary Lieberman (Administrator) The fill line is leaking inside the builging in a former tank room. Aproximately 3 gallons of # 2 fuel oil on the concrete floor of the former tank room. There is a sump in this room but is closed. Spill is under contol. Petro is going to replace the line and clean the spill. 02/18/11 Gary Lieberman Administrator from New Carlton Rehabilitation Nursing Center sent the following e-mail: This is to verify our phone communication this morning. The Oil spill that we spoke about earlier today was immediately cleaned up. It was not a lot of oil and there was no

DEC Region: 2
DER Facility ID: 270534
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND" There was a second spill number which was closed for this same event: See notes on spill #0109974 Gregory Suhr of Fenley & Nicol said there was a gross failure of the Tank test. 600 gal in tank. Probably leaking to the soil. Tony Caggiano of Liro says tank will be pulled "soon" 11-08-2005 The site was handled under DDC CO. J. Kolleeny was a PM for the site. This spill was under S. Sangesland name. See spill 9705043. AZ1-19-2006 There was a heating oil spill at the site which was never investigated. DDC refused to investigate the site under the existing contract but stated that the site will be investigated under the future contract. Site should be investigated as soon as new contract is in place. AZ4-11-2006 The site was reclassified as P0 as per Koon Tang request. AZ8-6-2010 Received SSIP prepared by LiRo on July 20, 2010. Discussed the site with S. Frank on 8-5-2010. Requested that 2 wells and 3 borings be installed around the tank. LiRo originally proposed 4 borings and 1 well. If soil is contaminated all borings should be converted into wells. The plan is approved. AZ8-10-2010 Received an e-mail from S. Frank (LiRo): "Alex, Thank you for your quick response to our SSIP submitted for the EC 219 heating oil tank spill. As we discussed during our phone conversation on August 5th, LiRo will add at least one more monitoring well to the boring/well program. If field screening results indicate contamination at other locations, LiRo will install additional wells. LiRo understands that additional wells may be required if laboratory analytical results indicate elevated contaminant levels at locations that were expected to be clean based on field screening results. LiRo will collect a minimum of two soil samples at each location for laboratory analysis. Deep borings will be sampled at the high PID interval and at the water table. Please call or email back if you have any additional questions or concerns." AZ7-29-2011 Reviewed the Investigation Report dated January 7, 2011, and received on July 15, 2011. The following e-mail was sent to S. Frank/F. Ashkan/V. Brevdo: "I have reviewed the Investigation Report dated January 7, 2011, and received on July 15, 2011. The report stated that the spill report was filed when 3,000 gal heating oil UST failed the tightness testing. The tank was closed in place in 2002 but not replaced. DEC approved the SSIP for this site on August 5, 2010. LiRo finished the field work in October 2010. Only one well

out of two wells planned could be installed due to difficult drilling conditions. Five soil borings were advanced. None of the collected soil samples exhibited contamination. Groundwater sample was collected and the analytical results for VOC/SVOC were non-detect. Based on the documentation provided to date, spill case 0102628 has been closed. All monitoring wells associated with this project should be closed according to the Department's "Groundwater Monitoring Well Decommissioning Procedures". The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was not addressed by this evaluation. II. Environmental conditions related to the Site which were unknown to the Department at the time of this approval. III. Information received, in whole or in part, after the Department's spill case closure, which indicates that the corrective action was not sufficiently protective of human health for the reasonably anticipated use(s) of the site; of the site; or IV. Fraud in obtaining this approval for inactivation. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use. The Department's files regarding this release may not be maintained indefinitely." AZ DRY ULLAGE

"KOLLEENY"HOUSING AUTHORITY WILL NOTIFY KOLLEENY OF DEC BEFORE RE-TEST.11/07/05: This spill transferred from J.Kolleeny to S.Kraszewski.12/23/05: Tank has been removed and replaced (2004.) No tank closure assessment performed. - SK07/07/06: NYCHA summary report states no recovery system and no MWs on-site. A site assessment is available and NYCHA recommends the Department review it. - SK02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann.7/22/10: J.kann - investigation work plan received on 7/15/10.12/27/12: J.Kann - reviewed IWP. Emailed NYCHA requesting that the SAR referenced in the IWP be submitted for review before comments can be finalized on the IWP. 1/14/13: J.Kann - comments on the IWP sent to NYCHA on 1/9/13.3/4/13: J.Kann - An addendum to the Work Plan and a revised Figure was received on February 27, 2013. The addendum and the revised figure were reviewed and the IWP with addendum approved on March 4, 2013. The SIR is due September 4, 2013.1/28/14: J.Kann - a modification was approved to the SIR and edoced.3/4/14: J.Kann - SIR received.3/20/14: J.Kann - looked briefly at report. No groundwater sample collected at SB-3 as discussed (see email from 1/28). Spoke to Steve of JCB earlier this month and pointed that out to him. He said he would get back to me with a response.6/13/14: J.Kann - sent an email to NYCHA indicating that a gw sample was supposed to be collected at the SB-3 location and was not. This information is necessary to consider the investigation complete and review the site for closure.

Remarks: TANK TEST FAILURE AT ABOVE LOCATION. TANK TO BE ISOLATED AND RETESTED.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"01/07/04ALso refer to Spill #04-070829/27/04-Reassinged from Rommel to sun.9/28/04 File Update by Sun: On 9/29/04, Joe Sun conducted a site visit. Sun spoke to Mark Turoff of Environmental System Group (Tel: 917-750-1483) about the site investigation he has recently performed. Per Turoff, his company had installed twelve soil temporary wells on 9/27/04 and had collected soil and groundwater samples from eleven wells except one which contained one foot of free phase product. He will send me the invstigation report after the laboratory report is complete.10/7/04 Sun received an e-mail from Lauren Gallagher, Project Manager from NYCDEP on 10/7/04 for this "Little E Restricted" site. She will fax to me a copy of Phase II

testing and accompanying HASP which they approved on 9/8/04.
04/08/05-File Update by Sun: The Stipulation Agreement was signed by the owner and executed by the Department on 12/15/04.-On April 6, 2005, DEC received an Investigation Summary Report from owner's consultant, Advanced Site Restoration, LLC. Joe Sun called the owner (Paul Rigas) on 04/08/05, informing him that the Department disapproved the report, since it does not delineate the off-site contamination. A meeting is scheduled for April 19, 2005 at the site between the DEC and the owner to discuss the location of off-site wells. -WJS04/25/05-File Update by Sun: On 5/25/05, Sun sent a letter to the property owner (George Rigas), informing him that the Department has reviewed and approved the Investigation Summary Report with the incorporation of the following items: 1. Install two (2) two-inch (minimum) off-site monitoring wells in sidewalk east of Butler Street between 3rd Avenue and 4th Avenue in Brooklyn, New York. The monitoring wells should be selected at locations down-gradient of the existing monitoring wells TMW-16 and TMW-17. The new wells will provide the additional off-site delineation of dissolved groundwater contamination plumes. Pursuant to the Stipulation Agreement signed and dated effective December 15, 2004, the Department requires a Remedial Action Plan (RAP) be submitted by June 24, 2005. The Department requires that the RAP shall detail the work proposed to remediate all contaminated media (groundwater and soil) and provide a detailed descriptions of a vapor mitigation efforts used in the construction of the residence including the installation of vapor barriers and sub-foundation venting systems. (WJS)06/29/05 File Update by Sun: On 06/29/05, Sun sent a letter to the property owner (George Rigas), informing him that the Department has reviewed and approved the Remedial Action Plan, prepared by Advanced Cleanup Technologies, Inc., with the incorporation of the following items: 1. The OMMP shall describe and tabulate the operation, maintenance and monitoring schedule (frequency) for system equipment and their performance, influent and effluent water sample, system influent and effluent air emission, all monitoring wells and soil vapor monitoring points. EPA Method TO-14A, not TO-02 as stated in Reference 1, shall be used to sample and analyze air stream before and after carbon treatment. 2. Soil Vapor Extraction System (SVES) Data sheet and Air Stripper Data Sheet shall be completed and submitted to the Department by November 15, 2005 for review. The Blank SVES and Air Stripper Data sheets are attached here for your reference. 3. Measurements of groundwater levels in all area are to be conducted monthly for the first three months, and then quarterly. Collection and analysis of groundwater and soil vapor samples shall be conducted monthly for all monitoring wells and soil vapor monitoring points. (Sun)12/09/05-Sun: Sun received an email from Paul Stewart of ACT, Inc., informing the Department on the current status of the projec: The owner modified development plans for the property to include a full basement with elevator room and underground parking rather than a partial basement with elevator room only. The NYCDEP required modifications to the work plan approved by the NYSDEC to account for the full basement. The modified work plan was approved by the NYCDEP and includes a vapor barrier under the entire property and a more extensive subslab ventilation system. A supplemental soil and ground water investigation is currently being performed and should be completed by Friday. The existing cased wells were surveyed and a flow direction to the west was calculated. The results of the supplemental investigation will be used to size and locate the soil

vapor extraction and ground water recovery systems.

(Sun)01/11/06-Sun: Sun sent a letter to the property owner, Paul Bregianos of Arc Electrical and Mechanical, approving the revised Remedial Action Plan prepared by Advanced Cleanup Technologies, Inc. dated 01/04/06, as noted below: Soil Vapor Extraction System (SVES) data sheet and Air Stripper Data Sheet shall be completed and submitted to the Department by March 31, 2006 for review, (2)The owner must notify the Department of site status change from Closed-In Place to Closed-Removed for seven (7) 550-gallon gasoline underground storage tanks (USTs) within 30 days prior to substantially modifying a facility. (Sun)03/27/06-Sun received an email from Paul Stewart of ATC on 03/06/06 informing DEC that they are planning to issue to DEC a formal report on the extent of free product and dissolved gasoline in ground water beneath the site. It will also contain a summary of underground storage tank closure activities as requested in DEC's correspondence to the property owner. We should have the report to DEC by the end of this week. (Sun)03/27/06-Sun sent an email to Paul Stewart of ATC stating that DEC is still waiting to receive a report from ATC on the extent of free product and dissolved gasoline in ground water beneath the site and a summary of underground storage tank closure activities as requested in DEC's correspondence to the property owner. (Sun)06/16/06-Sun: Paul Stewart of ACT (Consultant for RP) informed the Department that installation of the recovery well, monitoring wells and vapor monitoring points is complete. The horizontal ventilation screens and piping associated with the vapor extraction wells is also complete. Tomorrow, we will be overseeing installation of the vapor extraction wells. We will also be connecting those wells to piping leading to the location of the treatment system. Next week we will be installing the remaining sections of the 20 mil HDPE liner. The concrete foundation floor will be poured soon after that. Once the first floor parking garage has been completed, we will perform a ground water pump test and a pilot soil vapor extraction test to size a treatment system. Installation of the treatment system will depend upon the construction schedule and access to the alleyway where it will be located. We expect that will take place this fall. (Sun)09/06/06-Sun: Sun received an email dated 09/04/06 from Paul Stewart of ACT (Consultant for RP) as follows: "All wells and subsurface piping have been installed. We are waiting for completion of the first floor so we can install a pilot system and perform a pilot SVE and ground water pump test. I expect that should take place in October". (Sun)12/13/06-Sun: Sun received an email from Paul Stewart on 10/30/06, stating that All of the wells and piping for a pump and treat system, vapor extraction system and subsurface depressurization system have been installed. He is currently waiting for completion of the first floor of the building so he can install a pilot system and perform a pilot SVE and ground water pump test. He spoke with Paul Bregianos who said the first floor would be completed after the steel was installed which should be this winter.

(Sun)03/23/07-Sun: On 03/23/07 Sun received the following email from Paul Stewart: We completed piping the soil vapor extraction and recovery well conduits to the western portion of the utility room and the concrete floor was installed. We are now awaiting installation of electric service to the utility room in order to perform a pilot SVE and pump test. I will notify you when the pilot tests are scheduled.

(Sun)10/19/07-Sun: On 10/18/07 Sun received the following email from Paul Stewart of ACT for the status of this project: We performed a pilot test of the soil vapor extraction system and a pump test on the

S101658438

recovery well last week and plan to have a pilot test report issued next week. The full scale remedial system should be installed before Thanksgiving". (Sun)12/18/07-Sun: Sun received the following email from Paul Stewart of ACT,"A pump test performed on the recovery well indicated that ground water could not be recovered at a flow rate that could contain the ground water plume. Therefore, we will rely upon two 15 Hp regenerative blowers to remediate soil and ground water in the 6 SVE wells installedbeneath the site. A 5.5 Hp regenerative blower for a sub-slab depressurization system is also being installed as a precaution to protect building occupants. The remedial system is being delivered this week and will be installed and put into operation the first week of January, 2008. I will forward a startup report to you and the NYCDEP once the remedial system has been rendered operational." (Sun) 2/25/08-Sun: Sun received the following email from Paul Stewart of ACT, the consultant for the RP,"The remedial system has been completely installed and is ready for full scale operation. We are waiting for the owner to provide us with an active telephone line to permit unattended operation. The telephone line should be installed within 10 days at whichtime the remedial system will be turned on. A Startup Report and an Operation, Maintenance and Monitoring Plan will be forwarded to your attention in approximately 2 weeks. A Closure Report will also be submitted to the NYCDEP with a copy to you." (Sun)3/12/08-Sun: Sun visited the site to witness the start-up of the remedial system. (Sun)4/2/08-Sun; Sun received the Remedial System Operation, Maintenance and Monitoring Plan (OMMP) from Paul Stewart of ACT, Inc. (Phone # 631-293-4992). (Sun)4/11/08: Sun sent the following email to Paul Stewart: "Hi, Paul,While I was reviewing the Remedial System OMMP, submitted by you, dated April 1, 2008 for the above referenced site, I found the following documents are missing in the OMMP report: 1. Figure 1: Remedial System Layout 2. Figure 2: Treatment Room Equipment Layout 3. Table 1: Troubleshooting Guidance TableI also noticed that P&ID was not included in the OMMP. The P&ID is a very important document which shows all the equipment, and instrumentation and control. Please revise your OMMP to include P&ID.I have reviewed SVES Data Sheet and found one error on Item #12 (Contaminant). Based on 33 ft of Stack Height and 250 CFM of Air Flow Rate, the Permissible Air Output Concentration for Benzene is 0.02206 LBS/HR, NOT 0.00494 LBS/HR as indicated in your SVES Data Sheet. (Please note that 0.00494 LBS/HR is based on 15 ft of Stack Height).Please address the above comments and resubmit." (Sun)4/22/08-Sun: Sun reviwed the Remedial System Operation, Maintenance and Monitoring Plan (OMMP), dated 3/31/08, submitted by RP's consultant, Advanced Cleanup Technologies, Inc. (ACT). The Department also reviewed the supplemental documents submitted by ACT on April 16, 2008, including Figure 1 through 3 and Table 1 which were missing in Reference 1 and a revised SVES Data Sheet indicating the correct Permissible Air Output Concentration for Benzene as 0.002206 LBS/HR. The Department approved the OMMP with the condition that a third Pressure gauge & sampling port be installed on inter-connection between two Vapor Carbon Filters. (Sun) 6/24/08-Sun: Sun received the following email from Paul Stewart of ACT,"Operation, maintenance and monitoring of the remedial system is being performed on a monthly basis. A quarterly monitoring report will be prepared for submittal in August." (Sun)8/1/2008 - Project reassigned to Feng. 1/21/2009 - Quarterly Monitoring Report, 4/2008 - 7/2008, 10/3/2008, by ACT. The site is occupied by a ten-story residential apartment building. A

S101658438

remdial program was started 3/12/2008 consisting of an active SVE and treatment system and an active sub-slab depressurization system and monitoring system. There are 3 vacuum probes VP-1 to VP-3 for monitoring sub-slab vacuum monthly and Groundwater monitoring wells MW-01 and MW-03 for quarterly monitoring, are located in the cellar floor. Additional monitoring well RW-01 is located in the first floor treatment room. A circuit breaker malfunctioned on the B-200 SVE blower causing it to remain off since 5/30/2008. The two SVE manifolds were joined together. Increased pressure in the B-100 carbon units required the B-100 SVE blower to be shut down until the problem could be resolved. Average DTW 11.71 feet. 4 wells were sampled on 4/28/2008. BTEX range 600 ug/L in MW-01 to 9,842 ug/L in MW-02. MTBE range from 23.1 ug/L in MW-01 to 229 ug/L in MW-02. (RJF)1/26/2009 - Letter to Paul Bregianos (Arc Electrical and Mechanical). DEC requires 1) explanation of the reason why groundwater treatment is missing, 2) surrounding map, 3) delineation work plan for offsite. Investigation work plan include addressing the above comments by 3/16/2009. (RJF)10/1/2009 - Site Status Report for 2/2009 to 7/2009, dated 9/2/2009, by Advanced Cleanup Technology. On July 16, 2009, a low flow pump test was performed on RW-01. Groundwater recharge is relatively fast. On July 22, 2009, the configuration of the SSD and SVE piping was modified by connecting the casing to RW-01 and the influent piping from the SSD system to the influent piping for SVE Blower B-100. The modified configuration was operated for a few days when high room temp required shut down of the B-100 blower. The ball valves for the SSD piping were re-directed to the 5.5 Hp B-300 blower which was turned on. The B-100 blower was turned off until ambient temp decrease this fall. DTW 13.53' in MW-02 to 14.05' in MW-01. DTW in RW-01 was 22.84'. Groundwater was sampled on 7/22/2009. BTEX range 177 ug/L in MW-01 to 7,200 ug/L in MW-03. MTBE range 15 ug/L in MW-01 to 76 ug/L in MW-03. Will continue monthly system operation, maintenance and monitoring and quarterly groundwater sampling. (RJF)5/19/2010 - received inquiry regarding the two monitoring wells in front of the 355 Butler Street. The two wells were installed back in 5/2005, sampled once during installation, but no included in the quarterly. 6/1/2010 - email to Paul Steward (ACT) for information on these two wells, and required site plan with all the wells, their monitoring data and contour map in the next quarterly. 11/4/10. Site Status Report was due in early September 2010. Breen11/20/10. Sent e-mail to Paul Steward asking for status reports subsequent to 9-2-09.06/28/2012 - V. Brevdo - Discussed project with Paul Stuart of ATC Environmental via telephone (Phone # 631-293-4992). Sent the following e-mail to Mr. Stuart: "June 28, 2012 Dear Mr. Stuart: Thank you for discussing status of the project with me earlier today. It is my understanding that the project has undergone investigation, remediation and is currently in operations, maintenance and monitoring stage with groundwater monitoring ongoing. I also appreciate your thoughts regarding further course of action for the project. It is my understanding that you will be preparing a Project Status Update report and you intend to submit status update report to the Department for review within 30 days. You also agreed to e-mail me a synopsis /briefing describing main highlights of the project and its current status and accomplishments. We agreed that you and I will further evaluate whether current site conditions and remedial progress at this project may advance it into a spill closure status. In evaluation of spill closure potential I would like you to be cognizant of the main criteria which we, in the Division of

Environmental Remediation, Region 2 office are looking at when making a spill closure decision. These spill closure criteria are as follows: free product must be removed, grossly contaminated soil with visible staining must be removed, source of contamination must be removed, concentrations of contaminants in soil and groundwater are either at the levels of cleanup guidance values or higher but within acceptable range to DEC, no migration of contaminant off site occurs, remaining contamination is contained, no threat of exposure to vapors from remaining contamination exists, and site poses no further threat to human health and environment. We also use engineering controls such as vapor barriers and SSDS system where necessary. Please note that it is DEC's strong preference that SSDS system remain in operation and be maintained and functioning as an engineering control after spill case is closed. The system must be monitored and maintained in accordance with the procedures set forth in the future Spill Closure Report (when DEC agrees that spill closure is appropriate), including all system equipment such as piping, fans, vacuum gauge and low vacuum visual alarm. Furthermore, the Department strongly recommends the performance of an annual inspection of the system and requires notification of significant operational and maintenance related issues. I look forward to receiving a project synopsis via e-mail as well as Project Status Update report. Please note that I need one hard copy and one electronic PDF copy on CD of all the submissions (except e-mails). Please contact me at 718-482-4928 or via e-mail if you have questions regarding this matter. Respectfully, Vadim Brevdo" 01/11/2013 - V. BrevdoLeft telephone voice mail to Paul Stuart, requested a return call to discuss project's status. Paul Stuart returned call and said will submit report within a week.V. Brevdo01/17/2013 - V. BrevdoE-mail from consultant, submitted spill closure request report dated January 17, 2013 with the following e-mail:"Vadim,Attached please find an electronic copy of our report for the above-referenced property entitled Request for Spill Closure. Please contact me if you would like a CD or hard copy of our report or if you require further information concerning remedial activities at the subject property.Thank you for your assistance and cooperation in this matter.Regards, Paul P. Stewart, PresidentAdvanced Cleanup Technologies, Inc.960 South Broadway, Suite 100Hicksville, New York 11801Phone: (516) 933-0655 x 12Cell: (516) 840-8197Fax: (516) 933-0659Email: pauls@actenvirons.com01/18/2013 - V. BrevdoReviewed January 17, 2013 Spill Closure Report and spill closure request.The site consists of a ten-story residential apartment building surrounded by commercial and residential properties. The site was utilized as a gasoline service station from 1963 to 2000 which resulted in impacted soil and ground water beneath the site. Remedial activities have taken place at the site from 2005 through the current date. Petroleum storage facilities and impacted soil were removed from the site during construction of the existing building and below grade parking garage. Residual soil and ground water contamination have been remediated through the installation and operation of a pump and treat system, soil vapor extraction and sub-slab depressurization (SVE/SSD) system that has continually operated from March 2008 to date. Recent ground water quality data indicate that asymptotically low levels of petroleum constituents have been attained in ground water beneath the site. Advanced Cleanup Technologies, environmental engineering consultant for the responsible party, submitted January 17, 2013 remediation report and requested closure of spill case. SSD

component of the remedial system will remain in operation as an engineering control to ensure that there is no threat of exposure to vapors from the remaining residual contamination. The Department reviewed remediation report, including analytical data for the site, and concluded that closure of the spill case is appropriate based on the following: 1) Free-phase product has not been identified at the site since underground storage tanks were removed and petroleum impacted soil was excavated during construction of the existing building. 2) All underground storage tanks and petroleum-impacted soil were removed and properly disposed of during site development as indicated in ACT's March 31, 2008 Closure Report. 3) A review of historical ground water quality data demonstrates an asymptotic improvement in water quality beneath the site. 4) Air beneath building remains under negative pressure due to the active SSD system and as a result no migration of vapors from remaining contaminants into the building will occur. 5) The site poses no further threat to human health and the environment. Spill is closed effective January 18, 2013. Spill Closure Letter sent to Paul Stuart of ACT with the following e-mail: "January 17, 2013 Dear Mr. Stuart: The Department reviewed Spill Closure Report and request for spill closure dated January 17, 2013. Based on the review of the report, investigative and remedial activities completed to date, analytical data presented in the report, and Conclusions/Recommendations section of the Report, the Department agree that the closure of this spill case is appropriate at this time. Therefore, spill case is closed effective January 17, 2013. Spill closure letter is attached for your file. It is my understanding that the SSD system will remain in operation at the site as an engineering control to prevent possibility of exposure to potential vapors from remaining residual contamination beneath the site. If you have questions regarding this matter, please contact me. Respectfully, Vadim Brevdo"

S106124004

Management and the current management agent Ms. Miriam Stolin (718.875.9225). Teleconference with Ms. Stolin reveal that property is a co-op comprised of (5) building for a total of 292 units. Ms. Stolin states she has managed the property since 2009 and was unaware of any open spill file associated with this site - she further states that in April 2014 the complex converted to natural gas from dual fuel and will no longer be using oil - they will be abandoning the UST in place. DeMeo requested of all documentation available concerning the tank system at this property. 8/12/14 TJD File review - duplicate PBS numbers found for this facility 2-279617 & 2-608923. Property has had multiple management agents since reported tank test failure - historical records are unavailable. Facility was able to produce records (work orders and invoices) for work associated with the (2) 10K UST's registered at this facility. The contractor Petroleum Tank Cleaners isolated the tanks and performed tank only tests with passing results in February 2004, a failed cross-over line was identified and replaced in May 2004, followed by passing system test in June 2004. There is no mention of any contamination discovered during the replacement of the failed cross-over line by PTC. Another passing system test was performed in January 2012. As per information obtained during discussions with the current property manager the facility has switched to a natural gas in April 2014 and will no longer be using the (2) 10K UST's which they plan to close in place ASAP. Based upon the documentation available - no further action is required at this time. Spill is administratively closed. Due to the multiple PBS numbers associated with this property Spills (DeMeo). referred the PBS discrepancies to PBS unit (Zielinski) for any necessary follow-up. All available documentation has been uploaded to DECDOCS.

Remarks: gross failure, above ground tank. recommend tank cleaning and retest

BROWNFIELDS:

Program: BCP
Site Code: 465470
Acres: .057
HW Code: C224160
SWIS: 2401
Town: New York City
Update By: MJKOMORO
Site Description:

Site Location: The site is located at 248 Flatbush Avenue in Brooklyn, Kings County, and is Block 936 and Lot 12. It is bounded to the east by Flatbush Avenue, to the south by a commercial building, to the west by a small courtyard and residences, and to the north by a liquor store and restaurant. Site Features: The site is a one-story building with a full basement that encompasses the entire property. It is approximately 2,300 square feet in area and is currently vacant. There is no parking associated with the site. The topography of the site is generally flat and the surrounding area slopes gradually to the northwest. The building is serviced by municipal water and sewer. The sewer connection is present in the southeast corner of the basement. The building was formerly heated via fuel oil-fired heating equipment located in the boiler room of the basement. The heating equipment and associated aboveground storage tank (AST) were disconnected and the heating equipment was removed. The closed AST remains in place. Current Zoning/Use(s): The site is located in a R7A residential zone with a C2-4 commercial overlay. This zoning permits both residential and commercial uses. The site was most recently used for commercial purposes. Anticipated future use of the site will be commercial and residential, with a structure similar to the architecture of the neighboring buildings on St. Marks Avenue. Historic Uses(s): The building was constructed between 1888 and 1906 and housed a dry cleaner and shoe repair facility for the last twenty years. Previous uses included a dry goods store, book store, closet/wardrobe business and a woodworker. In 2005, an investigation focused on a reported historic leak of cooling water from the first floor dry cleaning machine into the basement boiler room. Based on elevated field instrument readings, it was concluded that the subsurface soil beneath the boiler room was impacted by solvents. Contaminated soil was excavated, under direction of the owner, to a depth of 5 feet below the basement floor. Confirmation sampling resulted in trace levels of volatile organic compounds (VOCs) below the recommended levels in the Departments technical and administrative guidance memorandum (TAGM) 4046 in use at that time. Also in 2005, deeper soil borings were installed in the basement to determine whether groundwater was impacted. (The full basement is approximately 8 to 10 feet in height.) These borings were installed from the basement floor to a depth of 10 feet and sampled continuously for VOCs. No VOCs were detected above the SCOs. Site Geology and Hydrogeology: The topographic elevation of the site vicinity is approximately 70 feet above mean sea level. Soils underlying the site are classified as Urban Land and consist of brown silty fine sand and brown to medium sand with some cobbles and trace fine to medium and coarse gravel. The depth to groundwater beneath

1000188071

Env Problem:

the site is approximately 60 feet below the basement floor and groundwater flow direction is generally to the northwest. No public water or other supply wells were identified within one-half mile of the site. The nearest body of water is the Gowanus Canal located approximately 0.67 miles west-northwest of the site.

Nature and Extent of Contamination:Based on investigations conducted to date, the primary contaminant of concern is tetrachloroethylene (PCE).Groundwater -In early 2014, three new monitoring wells were installed and sampled to further evaluate on-site groundwater conditions. PCE exceeded the NYS groundwater standard at each of the wells, ranging from 6.4 to 25 parts per billion (ppb). The maximum PCE detection was from a location in the basement directly below the former dry cleaning machine. Petroleum-related VOCs were noted at one well at concentrations slightly exceeding the NYS groundwater standards. Previous groundwater and soil data did not show any petroleum-related VOCs, indicating that these detections are not site related. No SVOCs, pesticides, PCBs or site-related metals exceeded the NYS groundwater standards. Soil -In late 2013, soil sampling was conducted to further evaluate soil conditions near the former dry cleaning machine and the sewer connection. Soil samples were collected from below the basement slab at depths of 5 to 10 feet, with the deeper borings concentrated in areas of potential contamination. (The basement floor is approximately 8 to 10 feet below ground surface.) All results for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, pesticides and polychlorinated biphenyls (PCBs) were below the Part 375 residential use SCOs. One sample was collected from the limited material present within a concrete box that contained the sewer trap. All results for VOCs were below the NYS Part 375 unrestricted use SCOs.Soil Vapor, Indoor Air and Sub-Slab Vapor -In August 2011, an on-site vapor intrusion investigation included the collection of three sub-slab soil vapor samples, three indoor air samples and one ambient air sample. PCE was detected in the indoor air at concentrations ranging from 1.7 g/m3 to 24.4 g/m3, and in the sub-slab at concentrations ranging from 4,010 g/m3 to 20,800 g/m3. According to the NYSDOH Matrix 2 for PCE, mitigation to minimize vapor intrusion and subsequent human exposures is recommended.In early 2014, an off-site soil vapor, sub-slab soil vapor, and indoor air investigation was conducted to further delineate off-site vapor impacts. At the adjacent court yard, the maximum concentration of PCE in soil vapor was 13 g/m3. Indoor air and sub-slab soil sampling were performed in the basements of two off-site locations southeast and northwest of the site at 254 Flatbush Avenue and 76 St. Marks Avenue. An ambient air sample was also collected from a location outside of 254 Flatbush Avenue. At 254 Flatbush Avenue, PCE in the sub-slab was 3.2ug/m3 and 440 ug/m3; and indoor air was 3.6ug/m3 and 5.7 ug/m3. At 76 St. Marks Avenue, PCE in the sub-slab was ND and 8.4 ug/m3; and indoor air was 1.1 ug/m3. PCE at the ambient air location was 3.9 ug/m3. Further delineation of off-site vapor and groundwater impacts will be completed under the State Superfund Program.

Health Problem:

Direct contact with contaminants in soil is unlikely because the site is covered with buildings. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon

gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Indoor air impacts that may be the result of soil vapor intrusion have been identified in one on-site building and three off-site structures. Actions are needed to minimize soil vapor intrusion for these structures. Sampling indicates that soil vapor intrusion is a concern for off-site structures and additional investigation is necessary.

Program: BCP
Site Code: 477008
Acres: Not reported
HW Code: C224160A
SWIS: 2401
Town: New York City
Update By: MJKOMORO
Site Description: Site Location: This is an Offsite of the BCP site located at 248 Flatbush Avenue in Brooklyn, Kings County (Block 936 and Lot 12). The following description is for the BCP site. It is bounded to the east by Flatbush Avenue, to the south by NYCDDC's Eastern Parkway Project Resident Engineer's Field office, to the west by a courtyard for a restaurant, and to the north by a liquor store and restaurant. Site Features: The site is a one-story building with a full basement that encompasses the entire property. It is approximately 2,300 square feet and is currently vacant. There is no parking associated with the Site. The topography of the site is generally flat and the surrounding area slopes gradually to the northwest. Current Zoning/Use(s): The site was most recently used for commercial purposes. The buildings to the north appear to have residential apartments located on the floors above the businesses. Historical Uses(s): The building was constructed between 1888 and 1906 and most recently housed a dry cleaner and shoe repair facility for the last twenty years. Previous uses included clothing, book store and the sale of dry goods. Site Geology and Hydrogeology: Soils underlying the site are classified as Urban Land and consist of brown silty fine sand and brown to medium sand with some cobbles and trace fine to medium and coarse gravel. The nearest body of water is the Gowanus Canal located approximately 3,400 feet to the west-northwest of the site that flows into the Gowanus Bay. The site is serviced by city water provided by NYC Municipal Water.
Env Problem: Groundwater - In 2005, sampling results for groundwater indicated that PCE was present at 285 ppb, above the NYS groundwater standard of 5 ppb. In 2011, results indicated that PCE range from 12 ppb to 69 ppm at on-site wells. Additional sampling of on-site groundwater is proposed as part of the RIWP under the BCP. Soil Vapor - In 2007, results from on-site sub-slab sampling detected PCE ranging from 5,000 to 607,000 ug/m3. In 2011, an on-site vapor intrusion investigation was conducted of sub-slab, indoor air and ambient air. PCE was detected in the indoor air at concentrations ranging from 1.7 ug/m3 to 24.4 ug/m3. PCE was detected in the sub-slab at concentrations ranging from 4,010 to 20,800 ug/m3. Later in 2011, a limited off-site vapor intrusion evaluation was conducted at adjacent properties. Six sub-slab, three indoor air, and one ambient air samples were collected at 250 Flatbush Avenue, 252 Flatbush Avenue and 80 St. Marks Street. At 250 Flatbush, PCE was detected in the sub-slab vapor at concentrations ranging from 454 ug/m3 to 1,480 ug/m3; and in indoor air at 12.1 ug/m3. At 252 Flatbush, PCE was detected in the sub-slab vapor at concentrations ranging from 185

1000188071

ug/m3 to 450 ug/m3; and in indoor air at 2.67 ug/m3. At 80 St. Marks Avenue, PCE was detected in sub-slab vapor at concentrations ranging from 3,810 ug/m3 to 20,400 ug/m3; and in indoor air at 30.3 ug/m3. According to the NYSDOH Decision Matrix 2 for PCE, the indoor air and sub-slab results at 250 Flatbush Avenue and 80 Marks Street indicate that mitigation is recommended. The results at 252 Flatbush Avenue indicate that monitoring is recommended.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Remarks: "Alishia" Overfilled the tank. Oil came out of the manhole and was contained within the vault. 5/12/2009 Sangesland reviewed a closure report prepared by Triumvirate Environmental. Report estimates that 80 to 100 gal of oil had spilled in the vault area. It was Triumvirate's opinion that the tank had been overfilled based on the taining pattern on the sides of the tank. On Feb 10th Triumvirate returned to the site to pressure wash the tank vault floor/walls. After cleaning, staining was still evident, but was not treated further. See eDocs for Triumvirate's report.
CALLER STATES THAT THERE MAY HAVE BEEN AN OVERFILL OF PRODUCT TO A TANK. PRODUCT IS CONTAINED TO THE VAULT. CLEAN UP IS PENDING. UNK AMOUNT.

DEC Memo: 10/27/04. S. Sagesland attempted to contact Mrs. Smith over the phone several times. However, the phone is busy.10/28/04. J.Krimgold spoke to Petro Oil (Karen)@ (516)686-2027. She stated that the costomer complaint about no oil in the tank just a few days after delivery.12/20/04. J.Krimgold attempted to contact the RP (Mrs. Smith). However, the phone is busy.J.Krimgold spoke to Petro Oil. According to their records a new AST was installed at this site on 11/26/04. No info regarding the old tank.J.Krimgold spoke with Mr. Ralph Litao (Trade Service) 917-881-5554. He stated that his co. excavated the top of the tank, pumped out about 450 gal of oil and then closed the tank in-place by filling it with concrete slurry after cleaning up the tank. The tank appear to be in a good condition with no apparent holes or bad seams. The problem was with a gloged product line. Mrs. Smith assumed that oil is not comming to the boiler because there are no product in the tank and that product was leaked out. NFA.

DEC Memo: 08/9/13- John Bonanno called and said the remote fill line is corroded and need to be replace.9/7/13- As per Arlene Gianchetta (Owner's wife). They are refinancing the building and the bank recommended to the owner to hire ARRCO to test the oil tank.9/7/13-Arlene sent an email with invoice of the company (Harris Plumbing \$ Heating) that fixed the fill line dated 8/15/13. The invoice stated the following:Cut out and discard the defective 2" oil line into the existing oil tank. Installed a new 2" oil fill line from the tank up to the cellar door stairway instead of up the first street level.9/7/13-Arlene sent an email with result of the tightness test performed after the line was fixed and dated 8/19/13.The system was tested by Petroleum Tank Cleaner. The result indicated the system passed the test. 9/10/13-Zhune visited the site. Based on the

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"2/23/99Spoke to Morris KreppelAfter repair the manhole manifold, they retested the tank and it passed. He will submit paperwork for my review. 3/1/99Spoke to Morris Kreppel. After installing a new gasket, the tank passed the retest. Phil Lodico, enforcement attny in Albany, got involved after 3 notices that the tank was overdue for testing. Apparently the city operates the tank so Kreppel forwarded the notices to the city who then ignored them. Currently being fined \$11K, \$10K of which will be waived if they comply within 60 days. Told Kreppel that he needs to submit an exposure affidavit complete with whether or not contamination was encountered during the work. 3/19/99Spill closed as per 3/4/99 letter from ABC Tank signed by Mark Salamack indicating that a gasket, nuts and bolts were replaced on the manhole and the system passed the HEZ3 retest and that no contamination was discovered during repairs.
Remarks: TANK TEST PERFORMED ON BEHALF OF COMMERCIAL COOLING SERVICE, HELEN, (718) 492-2100. COMMERCIAL COOLING TO BE GIVEN A QUOTE FOR ISOLATING AND RETESTING THE TANK ONLY.

DEC Memo: 02/28/05 - Sawyer - On the 11/11/04, I responded to the address above to find a overfill spill that had impacted a stairwell as well as the entrance way to the building. The spill impacted 3 flights and the maintenance workers were trying to handle the problem. I suggested the realty company get a professional cleanup company. I will follow up to see if this suggestion was taken.03/08/05 - Sawyer - Received information on the spill clean up from Richard Chirra with management company. No further action required on this spill.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"4/28/04. All State is an insurance carrier for home owner hired Milro to clean up. They found cracks on the concrete floor slab and belief that some oil went through. YK.5/10/04. J.Krimgold spoke to Poul (Milro). They removed concrete around cracks and found substantial soil contamination. Currently they excavated 6'x6' area to the depth of 3-4' and will take post excavation samples. 6/01/04. J.Krimgold spoke to Poul (Milro). Soil analytical show some contaminants above TAGM levels. However, due to a construction constraints further excavation is not feasible. Agreed to cease excavation, apply bio nutrients into excavation pit, fill with clean soil, seal with concrete and epoxy paint. NFA.

Remarks: Tank has a hole in it which caused the leak. The spill is currently being cleaned up.

Site Description: The Gowanus Canal runs through a highly developed area in Brooklyn, New York, and is impacted by contaminated sediments, principally due to activities of former Manufactured Gas Plants (MGPs). Surface sediments contain PCBs at levels up to 350 ppm, and coal tar residue up to 23% by weight of sample.

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site Description: The Gowanus Canal is a man-made navigational waterway in southeastern Brooklyn, Kings County NY. Nearly the entire canal is bounded by hard urban shorelines in the form of bulkheads, moorings, and retaining walls. The site definition includes only the canal and its attached barge slips, totaling slightly over 1.5 linear miles of waterway. Averaging 100 feet in width, the open water area defined as the site totals approximately 1,000,000 square feet or 29 acres. The canal also serves as a storm water drain for the surrounding area. Currently, approximately six square miles of highly urbanized land drains into the canal. Sanitary sewers no longer discharge directly; however, numerous combined sewer overflows (CSO) continue to discharge to the canal during storm events. Industrial discharges from a wide variety of industrial processes were also historically routed to the canal, via private discharge pipes or the municipal sewers. Stagnant water conditions have plagued the canal since its initial construction. To combat this, a flushing tunnel at the north end of the canal was constructed in 1911 to divert water from the Buttermilk Channel to maintain flow through the canal to Gowanus Bay. Operation of the flushing system has had numerous problems resulting in lengthy periods during which it was inoperable. Significant upgrades to this system are scheduled over the next few years to increase the volume of water flushing the canal. Currently the flushing tunnel has been de-activated to facilitate its upgrade and an oxygenation system has been installed at the upper end of the canal. The first of three new tunnel pumps was brought back on line in Jan 2014, and the remaining two are slated for start up in April.

Site History Prior to European settlement, this area formed a large tidal marsh, drained by Gowanus Creek and surrounded by higher ground to the west (present-day Carroll Gardens) and east (present-day Park Slope). In the mid 1800s, the Canal was constructed, more or less along the alignment of Gowanus Creek, by straightening and deepening the stream channel and dumping the excavated materials behind rows of timber piles along the shoreline. Combined with other urban filling activities in the surrounding area, the result was a large area of reclaimed land with a dendritic, dead-end canal providing barge access through the middle. The canal offered barge access far inland into Brooklyn, effectively increasing Brooklyn's available tidewater frontage for water-borne commerce. Development of the area was rapid, and by 1869, the layout of the canal and the local street network were essentially complete. Long term decline of the local manufacturing economy has led to a marked decrease in commercial use of the Canal, with only a handful of petroleum distributors and

concrete batch plants as regular users. Roughly the northern half no longer hosts barge movements as a result of siltation due to the significant CSOs which discharge street waste and sewage solids. The canal has not been dredged in several decades, consequently, substantial amounts of sediment have been deposited in upstream areas, and water depths approach zero at low tide. The sediment consists largely of solids settled from stormwater and CSO discharges. Presumably, industrial discharges to the canal have diminished in line with the de-industrialization of the surrounding neighborhood, although this is difficult to verify directly due to a lack of historical records for comparison.

Env Problem: Water quality issues have plagued the Gowanus Canal almost since its construction. Tidal flushing is largely ineffective due to the length, narrowness, and circuitous layout of the canal channel. Operation of the flushing tunnel has improved the situation during the years when flushing was being conducted; however, the current tunnel requires significant upgrades and is likely to be off-line for a year or more as the upgrades are performed. The canal is currently classified by NYSDEC as Class SD water body, acknowledging that natural or man-made conditions limit attainment of higher standards. Even the SD standards are not currently met. Oily sheens are common on the water surface during low tides, dissolved oxygen levels are low and surface contamination has been identified. Sediment quality is also low. Ongoing CSO discharges have resulted in extensive deposits of settled solids, particularly in the more sheltered areas near the upper end. Some parts of the canal bottom are exposed at low tide. Another particularly important contributor to sediment quality problems is the presence of three former manufactured gas plant (MGP sites) along the length of the canal. Although all three MGPs have been closed for decades, coal tar-impacted sediments have been identified at numerous locations along the length of the canal. The three MGPs are all covered by cleanup agreements with NYSDEC, and are at various stages of investigation, remedy selection and implementation. The Fulton Works, immediately east of the canal at its northern extremity, is in the Remedial Investigation process. The Carroll Gardens site (also widely known as Public Place) is in the Brownfield Cleanup Program, and is slated for remediation and redevelopment as a mixed commercial/residential project. The former Metropolitan works, immediately south of the 9th Street bridge, was partially redeveloped under a Voluntary Cleanup Agreement in 2002-2003. However, more work remains to be done part of the MGP facility lies beneath an active retail building. A Remedial Investigation began in March 2010. Numerous oil storage and handling facilities, asphalt plants, manufacturing facilities and chemical, paint, fertilizer and plastic manufacturers have, or continue to, operate along the canal.

Health Problem: People using the canal for recreational purposes such as swimming and boating may come into direct contact with chemical contaminants and harmful biological organisms. People should avoid any activity that would result in swallowing or accidentally ingesting Canal water. Additionally, people using the canal for any purposes should wash their hands or shower after contacting the water, especially before eating and at the end of the day. Those people who are considering eating fish and shellfish caught in the Canal should follow the NYSDOH consumption advisory for fish and shellfish taken from the Upper Bay of New York Harbor. This advisory specifically includes: The NYSDOH recommends that women of childbearing age and children under

the age of 15 not eat any fish from the Canal. Other people should eat no gizzard shad, white perch and crab hepatopancreas and crab cooking liquid. Also, other people should eat no more than one meal per month of American eel, Atlantic needlefish, bluefish, rainbow smelt and striped bass. People should eat no more than one (1/2 pound) meal per week of all other fish species except blue crab meat (six crabs per week).

Site Description:

LOCATION:The Site is located at 198 Douglass Street in Brooklyn, between Bond Street and the Gowanus Canal. SITE FEATURES:The property is 0.18 acres and features a one-story warehouse building which is currently used for the storage of art and antique goods and furniture. CURRENT USE/ZONING:The property is currently used for the storage of antique goods. It is zoned for manufacturing use.HISTORICAL USES:The Site has historically been used for a variety of industrial purposes. Prior to its current use, the Site was owned and operated by Paramount Plumbing (approx. 1995 to 1998) and O.Z. Electrical Manufacturing Company Inc. (approx. 1960 to 1995). O.Z. also formerly owned and operated on the adjacent property (196 Douglass) as well as three buildings to the west, across Bond Street (262 Bond Street). Earlier owners/operators include P.H. Hughes Lime, Brick and Lath Yard (approx. 1887 to 1900); a gravel/crushed stone yard (approx. 1900 to 1930); and the Knickerbockers Ice Company, which included a machine shop (1930?s).SITE GEOLOGY AND HYDROGEOLOGY:Fill material consisting of sand, silt, gravel, and construction/demolition debris has been encountered to approximately 10 feet below ground surface (fbgs). Beneath the fill material (10 to 36 fbgs) is a sequence of inter-bedded silt, clay, sand, and peat layers atop fine to coarse-grained sand to a depth of approximately 48 fbgs. Groundwater has been encountered at depths ranging from 1.5 fbgs to 9 fbgs, during various investigations. USEPA Superfund investigations in the area of the Gowanus Canal have found that shallow groundwater flows toward the canal at both low and high tide. Intermediate groundwater generally flows upward toward the canal. Based on water chemistry measurements in surface water and groundwater (collected during Superfund investigations of the Gowanus Canal), it was concluded that infiltration from the canal controls water quality in shallow wells adjacent to the canal, with decreasing influence with distance from the canal.The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites.

April/May 2012 confirmed that tetrachloroethene (PCE) previously detected in groundwater was limited and not indicative of a release of hazardous waste. GROUNDWATER:In 2006, PCE was detected in groundwater at a concentration of 1,600 parts per billion (ppb) and benzene at 14 ppb, from one grab groundwater sample collected from one boring. In the 2012 Site Investigation, groundwater was sampled from four groundwater monitoring wells. Groundwater samples were analyzed for volatile organic compounds (VOCs). Several VOCs were detected; however, the only contaminants detected at concentrations that exceed standards were isopropylbenzene (detected at 5.1 ppb compared to the standard of 5.0 ppb) and methyl tertiary butyl ether (MTBE) (detected at 10.7 ppb compared to the standard of 10 ppb). The standards cited for groundwater are the NYS Ambient Water Quality Standards and Guidance Values for Water Class GA from NYSDEC Technical & Operational Guidance Series (TOGS) 1.1.1.SOIL:The 2012 Site Investigation included soil sampling from 7 soil borings and analysis for VOCs. The only contaminant detected above standards was isopropylbenzene, detected at 3.91 parts per million (ppm) compared to the CP-51 Supplemental Soil Cleanup Objective for protection of groundwater of 2.3 ppm. A few VOCs were detected on site in the 2006 soil boring, but at very low concentrations.SOIL VAPOR:In soil vapor, trichloroethene (TCE) was detected in two samples at a maximum concentration of 200 micrograms per cubic meter (ug/m3); however TCE was not detected above reporting limits in concurrent indoor air samples.The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites.

DEC Memo: DEC Piper contacted Caller Jeff Flannigan. He will copy report and analytical and send to DEC.9/8/06- DEC Piper reviewed subsurface investigation report. AS per report, investigation was due to the presence of petroleum vapors inside work area. 1 boring was completed. Groundwater was encountered at 9 feet bgs. A water sample was collected at 34 feet which contained elevated levels of benzene, PCE and a variety of SVOCs were above standards. A soil sample was collected at 36 feet bgs which indicated trace levels of chlorinated solvents. Indoor air samples revealed elevated levels of petroleum and chlorinated solvents were detected above standards. Due to the soil and gw samples not being collected at the gw interface, the concentrations observed where collected, and indoor air quality, additional investigation is warranted. Case referred to

remediation.9/20/06- DEC Piper . Spill transferred to remediation as per Austin on 9/8/06.11/13/06 - reviewed site assessment report, found PERC in GW. Need to contact consultant to get more delineation of the GW contamination. - KST4/11/08 - This spill has been transferred to D. Kaplan. Since previous reports were missing the representative of the site was contacted and the subsurface investigation report was obtained from the environmental consultant. 5/7/08 - Met the environmental consultant (Djamel Lekmine, AMEC), architect Jeff Flannigan who was acting as representative of the owner (was in charge of construction at the time the spill was reported), and attorney for the owner at the site. The entire lot is covered with a building with slab on grade finished floor. The building serves as a storage facility for fine art. It was explained that additional investigation was necessary. 5/19/08 - Environmental consultant sent a proposed work plan for additional investigation which was very incomplete (see edocs). 5/27/08 - A letter was sent to the environmental consultant describing additional requirements for a subsurface investigation.8/26/08 - Attorney for the owner has been trying to work out a site access agreement with the owner of the adjacent property (196 Douglass St). Representative for the owner of 196 indicated that they are unwilling to grant site access.9/26/08 - After negotiations with the owner of 196 Douglass for site access proved unsuccessful, DEC attorney (John Urda) sent a letter to the owner siting statutory authority for site access for investigation work. See edocs.5/11/09- The work was performed February 10th and 11th. The report has not yet been received.6/18/10-Vought-Received inquiry from DEC Austin as to whether Site should be transferred to Vought as P-Site . Vought discussed with DEC O'Connell and spill reassigned from Kaplan to Vought and entered into P-Site Tracking Spreadsheet.2/8/11-Vought-Spill transferred from DEC Vought to DEC Kaplan for further action.6/10/11 - Transferred to hazardous waste program as potential hazardous waste site (P site 224152)

Remarks:

THERE WAS SOIL SAMPLE TESTING AND GROUND WATER TESTING. THERE WAS DIFFERENT MATERIAL THAT WAS FOUND AT THE SITE. THERE ARE TRACES OF VOLATILE ORGANIC COMPOUND, TETRACHLOROETHENE,ETHYLBENZENE, XYLENE WAS FOUND IN SOIL SAMPLE. THE WATER SAMPLE HAD BENZENE, TETRACHLOROETHENE. THEY WERE DIGGING AT THIS SITE.

Description:

The Navy Barracks are located in the County of Kings, Borough of Brooklyn, City of New York, State of New York. The site is bounded on the North by Flushing Avenue, on the South by Park Avenue, on the East by Vanderbilt Avenue and on the West by Clermont Avenue. The site was improved by a six story concrete building utilized as a military prison and three story brick building used as barrack and for administrative purposes. The NYC Department of Corrections is used as the Brooklyn Correctional Facility. The former military prison

History: building and associated utilities are beneficially used by the present owner the New York City Department of Corrections. The former Navy barrack and administrative building is abandoned and owned by GSA. There are number of underground storage tanks, which were never used by the present owner.

As per Declaration of Taking dated 29 January 1941, the Department of the Navy obtained 2.638 acres fee. On 15 April 1975, the Department of the Navy conveyed 2.638 acres fee to GSA. As per quitclaim deed dated 4 June 1979, GSA conveyed 0.294 acre fee to the Department of Health and Hospitals Corporation (HHC) of the City of New York. Said deed did not contain any recapture or restoration clauses but did contain a restrictive clause (to be used public health purposes for a period of thirty years -from the date of conveyance). As per quitclaim deed dated 22 February 1985, GSA conveyed 2.344 acres fee to the City of New York. Said deed did not contain any recapture, restoration or restrictive clauses. On 8 September 1986, the 0.294 acre fee reverted back to GSA because of a breach of contract by HHC. GSA is still the owner of record of the 0.2 94 acre fee.

Site Description: Location: This site is on the north-east portion of the Brooklyn Navy Yard Development Corp. Industrial Park (BNYDC) and is operated by the NYC Department of Sanitation. The site is bordered by the East River on the north and west, by Kent Avenue on the east, and by the rest of BNYDC site on the south. Site Features: The 13-Acre parcel site includes a barge basin, the Building 419 transformer substation, two former drum storage areas, and a railroad siding area. The 224019A site deals with only 9.5 acres of the parcel, and excludes the former coal gasification plant known to have existed at the remaining 3.5 acres of the site. Those 3.5 acres have been designated as a separate site and given the ID number of 224019B. Current Zoning and Land Use: The site is zoned for commercial and industrial uses, and is currently used for vehicle and materials storage. The surrounding area includes industrial, commercial and residential uses. Past Use of the Site: The site was used in support of ship building and repair activities. Support actions included waste storage at the two drum storage areas, and power distribution at the transformer substation. The railroad siding area was used for the loading and unloading of materials and fuels. These uses, as well as historic filling practices throughout the waterfront, have led to demonstrable levels of lead, Polycyclic Aromatic Hydrocarbons (PAHs) and/or

Env Problem:

polychlorinated biphenyls (PCB) contamination. Site Geology and Hydrogeology: The site is underlain by historic fill to a depth of approximately fifteen feet in many areas. Beyond the fill material is a silt sand, then sand unit down to a depth of approximately 100 feet where the Gardiners Clay is found. Groundwater occurs at depths of approximately five feet, and flow is generally to the north and west towards the East River.

Nature and Extent of Contamination: Soils are contaminated with lead and polycyclic aromatic hydrocarbons (PAHs) throughout the site, though more so at the railroad siding and drum storage areas, where concentrations of lead have been observed to sometimes exceed the Toxicity Characteristic Leaching Procedure (TCLP) limit for characteristically hazardous waste. The lead and PAHs are believed to be due primarily to historic fill having been placed throughout the area in order to render the land usable. Polychlorinated biphenyls (PCBs) have been detected in site soils, primarily near the Building 419 transformer substation, but also at the railroad siding area. The level of PCBs detected outside of the Building 419 area are relatively low, with only a few exceedances of the 1 part per million (PPM) commercial cleanup level. PCBs nearer Building 419 have been found well in excess of the 1 PPM commercial cleanup level in near surface soils, and above the 10 PPM level often used for cleanups in deeper soil. The highest concentration detected in soil within this area was 210 PPM. In general, observed concentrations of contaminants in groundwater at the site do not indicate a significant source of groundwater contamination due to waste management at the site. However, there are minor excesses of groundwater standards found sporadically on the parcel, presumably due to historic operations at the site, as well as the presence of historic fill. No source area of contamination relative to these minor groundwater impacts was found during the investigation. Special Resources Impacted/Threatened: The site is largely paved and is not considered an area of significant habitat. Contaminant concentrations found in barge basin sediments are generally consistent with those found throughout the region, and no clear contribution of sediment contamination from the site was determined. Significant Threat: The site was determined to be a significant threat due to the presence and release of hazardous substances.

Health Problem:

Exposure to site-related contaminants in surface soil has been minimized by an interim remedial measure (IRM) to remove hot spot soil contamination. Since some contaminated soils remain at the site below concrete or backfill, people will not come in to contact with contaminated soils unless they dig below the surface materials. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Since there are no on-site buildings, inhalation of site contaminants in indoor air due to soil vapor intrusion does not represent a concern for the site in its current condition. However, the potential exists for the inhalation of site contaminants due to soil vapor intrusion for any future on-site development. An evaluation of the potential for soil vapor intrusion to occur will be completed.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Elevation:	45 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-F8 BROOKLYN, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
KINGS, NY

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 360497 - FEMA DFIRM Flood data

Additional Panels in search area:
3604970055B - FEMA Q3 Flood data
3604970063B - FEMA Q3 Flood data
3604970073B - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
BROOKLYN

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Location Relative to TP: 1/2 - 1 Mile SW
Site Name: Vidan Auto Salvage
Site EPA ID Number: NYD986961167
Groundwater Flow Direction: SW TOWARD THE NARROWS.
Inferred Depth to Water: approximately 38 feet.
Hydraulic Connection: The surficial aquifer and underlying aquifer are hydraulically connected.
Sole Source Aquifer: No information about a sole source aquifer is available
Data Quality: Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Mesozoic
System: Cretaceous
Series: Upper Cretaceous
Code: uK (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Re: Freedom of Information Request

130 Saint Felix Street

Block 2111, Lot 40

Brooklyn, New York

Langan Project No. 170366001

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above property, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The Subject Property is located at 130 Saint Felix Street in the Fort Greene neighborhood of Brooklyn, New York (Block 2111, Lot 40). The Subject Property is located on an L-shaped city lot bounded by two multi-story Brooklyn Academy of Music buildings to the north at 321 Ashland Place and 126 Felix Street (Block 2111, Lots 11 and 37), Saint Felix Street followed by multi-story residential buildings to the east at 123-131 Saint Felix Street (Block 2112, Lots 9, 10, 11, 12, and 13), a multi-story mixed residential and commercial building at 1 Hanson Place and a multi-story church building at 144 Saint Felix Street (Block 2111, Lots 1 and 45) to the south, and Ashland Place followed by an active construction site at 113 Flatbush Avenue (Block 2110, Lot 3) to the west.

Please contact me at 212-479-5443 with any questions or send your response to my attention at nbell@langan.com or at the below address:

Langan Engineering and Environmental Services, P.C.

Langan Project No. 170366001**

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above property, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The Subject Property is located at **130 Saint Felix Street in the Fort Greene neighborhood of Brooklyn, New York (Block 2111, Lot 40)**. The Subject Property is located on an L-shaped city lot bounded by two multi-story Brooklyn Academy of Music buildings to the north at 321 Ashland Place and 126 Felix Street (Block 2111, Lots 11 and 37), Saint Felix Street followed by multi-story residential buildings to the east at 123-131 Saint Felix Street (Block 2112, Lots 9, 10, 11, 12, and 13), a multi-story mixed residential and commercial building at 1 Hanson Place and a multi-story church building at 144 Saint Felix Street (Block 2111, Lots 1 and 45) to the south, and Ashland Place followed by an active construction site at 113 Flatbush Avenue (Block 2110, Lot 3) to the west.

Please contact me at 212-479-5443 with any questions or send your response to my attention at nbell@langan.com or at the below address:

Langan Engineering and Environmental Services, P.C.

Dear Ms. Bell:

This will acknowledge receipt of your request for records under the Freedom of Information Law, received by this office on May 18, 2015.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

A determination as to whether your request is granted or denied will be reached in approximately 20 business days or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble, and review documents that may be responsive to your request.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

Shayla Johnson

**NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT**

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the directionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with an authorized direction to remove encroachment into a public highway or other public place, whether attached or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 64 of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

All internal copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan Engineering, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

THIS INDENTURE, made the 16th day of May, 2005

BETWEEN HSBC Bank USA, National Association, successor by merger to HSBC Bank USA, successor by merger to Republic Bank of New York, N.A., successor by conversion to Republic National Bank of New York, successor by merger to Republic Bank for Savings, National Association, successor by conversion to Republic Bank for Savings, formerly known as The Manhattan Savings Bank, successor by merger to The Williamsburg Savings Bank, a National Association, having an address at 1 West 39th Street, New York, NY 10018.

party of the first part, and

CJUF II HANSON LLC, a Delaware limited liability company, having an office at c/o The Dermot Company, Inc.
320 West 57th Street, 5th Floor, New York, NY 10019

party of the second part,

WITNESSETH, that the party of the first part, in consideration of

dollars

paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the

SEE ATTACHED SCHEDULE 'A'

SAID PREMISES BEING KNOWN AS ONE HANSON PLACE, BROOKLYN, NY

SECTION: 7 BLOCK: 2111 LOT: 1

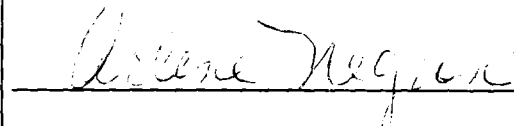

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose. The word "party" shall be construed as if it read "parties" when ever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

IN PRESENCE OF:

HSBC BANK USA, NATIONAL ASSOCIATION

By: 

Michael L. Gembecki
First Vice President

DESCRIPTION - SCHEDULE A
(AMENDED: January 21, 2005)

ALL that certain plot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at the corner formed by the intersection of the easterly side of Ashland Place and the northerly side of Hanson Place;

RUNNING THENCE easterly along the northerly side of Hanson Place, 99 feet to a point on the northerly side of Hanson Place distant 100 feet 2¼ inches westerly from the corner formed by the intersection of the northerly side of Hanson Place and the westerly side of St. Felix Street;

* of Dickey Realty, Ltd., as managing partner of Dermot Property Associates, as managing member of DC Hanson, LLC, as a member and operator of CJUF II Hanson LLC.

Appendix L

Resumes

Jason J. Hayes, PE, LEED AP

**Senior Associate/Vice President
Environmental Engineering**

14 years in the industry

Mr. Hayes has experience in New York, New Jersey, Washington D.C., California, Washington, Oregon, Alaska, and Internationally. His experience includes Environmental Protection Agency (EPA), New York State (NYS) Brownfield's application, investigation, and remediation; New York City Department of Environmental Protection (NYCDEP) and New York City Office of Environmental Remediation (OER) E-designated site application, investigation, and remediation; Phase I and II Environmental Site Investigations and Assessments; contaminated building cleanup and demolition; Underground Storage Tank (UST) permitting, removal specifications, and closure reporting; soil vapor intrusion investigation and mitigation system design (depressurization systems, etc.); development of groundwater contaminant plume migration models; environmental analysis; and oversight, design and specification generation for remediation operations with contaminants of concern to include polychlorinated biphenyls (PCBs), solvents, mercury, arsenic, petroleum products, asbestos, mold and lead.

Selected Projects

West & Watts (New York State Brownfield Cleanup Program [BCP]),
New York, NY
Hudson Yards Redevelopment (Phase I ESA and Phase II ESI),
New York, NY
Smith Street (Remedial Investigation and Report), Brooklyn, NY
Gateway Center II Retail (Phase I ESA and Phase II ESI), Brooklyn, NY
261 Hudson Street (Phase I ESA, Phase II ESI, BCP, and RAWP),
New York, NY
28-29 High Line (Phase I ESA and Phase II ESI), New York, NY
Riverside Center, Building Two (BCP, Phase I ESA and Phase II ESI),
New York, NY
New York Police Academy, (Sub-Slab Depressurization and Vapor
Barrier System), College Point, NY
Gateway at Bronx Terminal Market (BCP, RIWP, RAWP, EIS),
Bronx, NY
Jacob Javits Convention Center (Phase I ESA and Phase II ESI),
New York, NY
Yankee Stadium Development Waterfront Park (NYSDEC Spill Sites),
Bronx, NY
Bushwick Inlet Park (Phase I ESA, Approvals for NYC E-Designation),
Brooklyn, NY
Silvercup West Residential (BCP, RIWP, RIR, RAWP, and RAA),
Long Island City, NY
29 Flatbush Residential Tower (Groundwater Studies, RIR and RAWP),
Brooklyn, NY
Gowanus Village I (BCP, RIWP and RIR), Brooklyn, NY

Education

M.S., Environmental Engineering
Columbia University

B.Sc., Chemistry, Environmental
Toxicology
Humboldt State University

Business Administration (minor)
Humboldt State University

LANGAN

Jason Hayes, PE, LEED AP

Sullivan Street Hotel (Site Characterization Study and Owner Representation), New York, NY
Riker's Island Co-Generation Plant (Soil and Soil Vapor Quality Investigations), Bronx, NY
The Shops at Atlas Park (Sub-Slab Depressurization and Vapor Barrier Design), Glendale, NY
Memorial Sloan-Kettering Cancer Center (Subsurface and Soil Vapor Intrusion Investigations), New York, NY
Element West 59th Street (Oversight and Monitoring of Sub-Slab Depressurization and Vapor Barrier Systems), New York, NY
Teterboro Airport (Delineation and Remedial Oversight of Petroleum-Contaminated Soils), Teterboro, NJ
Proposed New York JETS Stadium (Phase I ESA), New York, NY
Former Con Edison Manufactured Gas Plant Sites (Research Reports), New York, NY
7 World Trade Center (Endpoint Sampling and Final Closure Report), New York, NY
Peter Cooper Village, Oversight of Subsurface Investigations, New York, NY

Selected Publications, Reports, and Presentations

NYC Mayor's Office of Environmental Remediation – Big Apple Brownfield Workshop – Presented on Soil Vapor Intrusion Remedies (e.g., SSD Systems, Vapor Barriers, Modified HVAC)

New York City Brownfield Partnership – Presented on environmental considerations and complications of the Hudson yards Development

Joseph Good, PE, LEED AP

Project Engineer
Environmental Engineering

5 years in the industry

Mr. Good is an engineer with international experience working on environmental projects. He has conducted environmental research on water treatment technology designed to remedy nutrient leaching from agricultural fields and to remove metals from urban stormwater. His consulting experience includes New York State Brownfield investigations and remediation, New York City Department of Environmental Protection (NYCDEP) E-designated site application, investigation, and remediations; Phase I and II Environmental Site Assessments; remedial engineering and system design; Underground Storage Tank (UST) permitting, removal specifications, and closure reporting; soil vapor intrusion investigation. His field experience includes: subsurface investigations; groundwater, soil, and air sampling programs; monitoring well installations; driller supervisions; subcontractor oversights; and waste characterizations.

Selected Projects

55 Hudson Yards, New York, NY
State University of New York (SUNY) Downstate Medical Center,
Brooklyn, NY
504-520 West 34th Street, New York, NY
19 West 20th Street, New York, NY
New York Aquarium Shark Tank and Animal Care Facility,
Brooklyn, NY
28-29 High Line, New York, NY
Hunters Point Library, Queens, NY
627-641 Smith Street, Brooklyn, NY
Silvercup West, Queens, NY
Gateway at Bronx Terminal Market, Bronx, NY
Bronx Terminal Market Waterfront Park Development (Yankee Stadium
Development), Bronx, NY
Bushwick Inlet Park, Brooklyn, NY
Abraham Joshua Heschel School, New York, NY
The Shops at Atlas Park, Glendale, NY
New Meadowlands Stadium Redevelopment, East Rutherford, NJ

Natasha Bell, EIT

Staff Engineer

Environmental Engineering

1 year in the industry

Ms. Bell is an environmental engineer with one year of experience working on environmental projects in New York. She has conducted Phase I Environmental Site Assessments and waste characterization investigations. She has experience working with regulatory agencies, such as the New York State Department of Environmental Conservation (NYSDEC). Her field experience includes soil sampling, excavation and construction oversight, and Community Air Monitoring Program (CAMP) implementation.

Selected Projects

Brooklyn Bridge Park Pier 1, Brooklyn, NY
Greenpoint Landing, Brooklyn, NY
One Hudson Boulevard, New York, NY
419 Ninth Avenue, New York, NY
Georgetown Heating Plant, Washington DC
80-110 Flatbush Avenue, Brooklyn, NY
22-12 Jackson Avenue, Long Island City, NY
Socrates Park, Astoria, NY
823 Eleventh Avenue, New York, NY
421 Kent Avenue, Brooklyn, NY
514 West 24th Street, New York, NY
1525 Bedford Avenue, Brooklyn, NY
143 Fulton Street, New York, NY
Dyer Avenue Towers, New York, NY
29-37 41st Avenue, Long Island City, NY
42 Crosby Street, New York, NY
295 Locust Avenue, Bronx, NY
46-73 Metropolitan Avenue, Ridgewood, NY
Horace Mann School, Science Building, Bronx, NY
86 Fleet Place, Brooklyn, NY
351-357 Broadway, New York, NY
846 Sixth Avenue, New York, NY
Greenpoint Terminal Market, Brooklyn, NY
601 Washington Street, New York, NY
New York University, 383 Lafayette Street, New York, NY
50 West Street, New York, NY
HighLine 28-29, New York, NY
West 17th Street Development, New York, NY
Hudson Yards Redevelopment, Special Inspection, New York, NY
