Re: Report on Phase I Environmental Site Assessment  
465-471 President Street (Block 440, Lot 1)  
514-530 Union Street (Block 440, Lot 12)  
339-341 Nevins Street (Block 447, Lots 1 and 2)  
431 Carroll Street (Block 447, Lot 60)  
Brooklyn, New York (14-77)

Dear Ms. Schlegel:

In accordance with our proposal dated 15 April 2014 and your subsequent authorization, we have completed a Phase I Environmental Site Assessment (ESA) for the above-referenced property pursuant to American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-13). These methodologies are described as representing good commercial and customary practice for conducting an environmental site assessment of a property for the purpose of identifying recognized environmental conditions. We understand that the subject property is being considered for purchase and redevelopment.

The subject property is located on President Street, Union Street, Nevins Street, and Carroll Street in Brooklyn, Kings County, New York, as shown on the location map in Appendix A of this report. The larger parcel (Block 440) is approximately 48,955 square feet in area and the smaller parcel (Block 447) is approximately 4,100 square feet in area. The site is also identified as Block 440, Lots 1 and 12, Block 447, Lots 1, 2, and 60 on deed and property records.

The purpose of the Phase I ESA was to identify recognized environmental conditions in connection with the subject property. ASTM defines the term "recognized environmental conditions" as follows: "the presence or likely presence of any hazardous substances or petroleum products on or at a property: 1) due to a release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment".

Our scope of work for the Phase I ESA included the following:

- 1) A physical review of the subject property and the surrounding area in order to determine potential contamination sources to the site. Site photographs are presented in Appendix B of this report.
- 2) A literature review of the subject property to determine previous and present owners. This review is done to learn of the current and previous uses of the subject property and determine their potential for discharges to the environment.
- 3) A literature review of regulatory records for the compliance history of the subject property and all properties within the radius specified in ASTM E-1527 from the referenced site. Environmental professionals universally recognize this standard for the performance of ESAs.
- 4) Interviews with current occupants and representatives of the property owner.
- 5) Analysis of the literature listed above and field data obtained for the preparation of this report, which contains the results and our recommendations. Sources of data examined/reviewed are listed in Appendix F of this report.

## **EXECUTIVE SUMMARY**

EcoRise Development LLC retained Carlin-Simpson & Associates to perform a Phase I Environmental Site Assessment (ESA) for the properties identified as Block 440, Lots 1 and 12 and Block 447, Lots 1, 2, and 60, which are located on President Street, Union Street, Nevins Street, and Carroll Street in Brooklyn, Kings County, New York and is subsequently referred to in this report as “the subject property” or “the subject site”. This assessment was prepared in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation: E1527-13).

The purpose of this assessment was to identify, to the extent feasible, recognized environmental conditions in connection with the property. This assessment included a site and area reconnaissance, as well as a records search, and interviews with local government agencies and property representatives. The findings for the subject site are outlined below.

The results of this assessment have revealed three (3) recognized environmental conditions associated with the subject property. These conditions are as follows:

- The subject site is listed on the NYSDEC Leaking Underground Storage Tanks (LTANKS) database for a 3,500-gallon unregistered fuel oil tank that failed a tank test in 1994. Information provided by the owner indicates that this tank was abandoned in-place in 2001, but no soil sampling was performed below the tank prior to abandonment. It is possible that the site has been impacted as a result of this tank.
- The available historical information indicates that the site has a long history of industrial use. Waste management and general housekeeping practices at the site while being used for industrial purposes are unknown. Therefore, the past industrial use of the site is a recognized environmental condition (REC) since there is a possibility that the site has been detrimentally impacted as a result of these previous uses.
- Based on the database search results, there are two (2) nearby properties that may have impacted the subject property. These sites are the Gowanus Canal and the Verizon property on Nevins Street, which are both located to the west of the site. Given the proximity of these properties to the subject site, there is a possibility that contamination from these properties has impacted the groundwater below the site.

The results of this assessment have revealed no historical recognized environmental conditions and no controlled recognized environmental conditions in connection with the subject site.

This assessment has also identified three (3) de minimis conditions associated with the site, which are listed below. De minimis conditions do not present a current material risk of harm to public health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

- Suspect asbestos containing materials (ACM) were observed inside the building at 473-491 President Street during this assessment. The observed materials included pipe

insulation, vinyl floor tiles, and ceiling tiles. Based on the age of the structure, asbestos containing materials may be present in other portions of the building as well.

- Former structures were identified on the site. Former structures are an environmental concern since buried remains (i.e. foundations, debris, etc.) may still exist on the property. Buried building debris could possibly contain asbestos containing materials and/or lead based paint. Items such as fuel oil tanks and/or piping from oil tanks may have also been buried near or within the former building areas. In addition, the site may contain historic fill material (i.e. ash and cinders), which was historically used below building slabs and to raise grades in industrialized areas.
- Both parcels of the subject property are located within the 100-year and/or 500-year flood zones. This indicates that there is a risk of flooding at the subject site.

There were no data gaps that significantly affected our ability to identify recognized environmental conditions associated with the property. Any limitations and exceptions are discussed in Section 9.0 of this report. No additional services beyond the scope of the ASTM Standard 1527-13 were conducted as part of this assessment.

### **Recommendations**

Our recommendations for the subject property are summarized below.

- A Phase II Environmental Site Investigation (ESI) is recommended to investigate the recognized environmental conditions (RECs) discussed in this report. This investigation should include soil and groundwater sampling at the site.
- If no evidence of contamination is encountered around the abandoned fuel oil tank, the information should be submitted to the NYSDEC for the purpose of closing out the LTANKS case.
- In the event that buried debris is encountered in the areas of the former structures or historic fill material is encountered at the site, we recommend that these materials be completely removed from the site and properly disposed of at off-site facilities that accept these types of materials. The fill and debris should be removed and disposed of in accordance with all applicable local and state requirements. Depending on the type of materials encountered, the fill and debris materials may also have to be segregated for disposal purposes.
- We also recommend that an asbestos survey be performed prior to any renovation or demolition of the existing site buildings.

## **1.0 PROPERTY OVERVIEW**

### **1.1 Property Location**

The subject property consists of the following properties: 1) 514-530 Union Street; 2) 465-471 President Street aka 313-323 Nevins Street; 3) 473-491 President Street; 4) 339-341 Nevins Street; and 5) 431 Carroll Street, which are located in Brooklyn, Kings County, New York, as shown on the location map in Appendix A of this report.

These properties make up two (2) parcels that are referred to as Block 440, Lots 1 and 12 and Block 447, Lots 1, 2, and 60. The Block 440 parcel is located on the east side of Nevins Street and is bound by Union Street and President Street to the north and south, respectively. This property is approximately 48,955 square feet in total area. The Block 447 parcel is located on the east side of Nevins Street and is bound by Carroll Street to the south. This property is approximately 4,100 square feet in total area.

### **1.2 Current Use and Description of the Property**

The subject site currently contains two (2) buildings, which include a large one-story building on Union Street and President Street and a tall one-story building on Nevins Street and President Street. Both buildings have slab on grade floors with no basements. There is also an asphalt paved parking lot on the corner of Nevins Street and Carroll Street.

The one-story building on Union Street is occupied by Royal Palm Shuffleboard Club and the portion of the one story structure on President Street is currently vacant but was recently occupied by a wholesale warehouse company. The tall one-story structure with mezzanine on President Street and Nevins Street is currently occupied by Lower East Side Ecology Center aka E-Waste Warehouse.

### **1.3 Current Use of Adjoining Properties**

The properties immediately surrounding the subject site generally consist of commercial, industrial, and some residential properties. The subject site is bordered by Union Street to the north followed by multi-family residential and commercial properties that include an auto repair facility. To the east are residential and commercial properties along Union Street, President Street, and Carroll Street. To the south of the site is Carroll Street followed by commercial and industrial properties that include a parking area for food trucks and a contractor's building. The site is bordered by Nevins Street to the west followed by an industrial building (formerly Verizon) and then the Gowanus Canal.

### **1.4 Present and Previous Owners**

During our literature review, we searched property transfer records and tax records at the New York City Register's Office. Block 440, Lot 1 is currently owned by 469 President St. Co., LLC while Block 440, Lot 12 is currently owned by 473 President St. Co., LLC. The parcels identified as Block 447, Lots 1, 2, and 60 are owned by James Ribellino. The previous property owners and the transfer dates are summarized in the following tables.

**Table 1A: Summary of Previous Property Owners  
Block 440, Lot 1 – aka 469 President Street**

| <b>Date</b> | <b>Grantee</b>            | <b>Grantor</b>                                       | <b>Book-Page</b> |
|-------------|---------------------------|------------------------------------------------------|------------------|
| 12/30/1999  | 469 President St. Co. LLC | James & Lita Ribellino                               | 4787-2391        |

Other than those listed in Tables 1A through 1D above, no other deeds could be found for the subject site during this assessment.

### **1.5 Environmental Liens**

No records of any environmental liens were found during this assessment. A copy of the EDR Environmental Lien Search Report is included in Appendix E of this report.

### **1.6 Historical Document Review**

In order to determine the prior uses of the subject property, we reviewed topographic maps, aerial photographs, Sanborn maps, and City Directory data which were all provided by Environmental Data Resources (EDR). Our observations of the reviewed documents are outlined below.

#### **1.6.1 Historical Topographic Maps**

During this study, we reviewed seven (7) historical topographic maps, which were provided by EDR. The maps were dated 1900, 1924, 1947, 1956, 1967, 1979, and 1995.

The 1900 and 1924 topographic maps show Brooklyn and the general area of the site. The Gowanus Canal is present to the west of the site. The streets around the site are all present and the site is shown as developed with buildings but the scale of the maps is too small to determine the any specific characteristics of the subject property. The area surrounding the site appears to be densely developed on these maps.

The 1947 map indicates that the site and the surrounding area are densely developed. The site appears to be completely covered with buildings but the map does not show specific structures on the subject property. The Gowanus Canal and all of the surrounding streets are visible.

The 1956 map identifies developed areas but only shows large structures and public buildings. The site and the surrounding area are shaded to indicate that they are densely developed. There are no structures shown on the subject property but larger structures are shown on adjacent properties to the west and south of the site.

The 1967 map is consistent with the previous map. The site and the surrounding area are shaded to indicate that they are densely developed. There are no structures shown on the subject property or on adjacent properties.

The 1979 map is photo-revised from the 1967 map. The site and immediate surrounding area conditions are generally consistent with the previous map.

On the 1995 map, the site and the surrounding areas appear to be generally consistent with the previous maps. All of these maps identify the site and the immediate surrounding areas as densely developed. No structures or public buildings are identified on the site or on adjacent properties. The Gowanus Canal is also shown to the west of the site. A copy of this topographic map is included as Figure 1 in Appendix A of this report.

### **1.6.2 Aerial Photographs**

As part of this assessment, we also reviewed ten (10) aerial photographs, dated 1924, 1943, 1954, 1966, 1975, 1984, 1994, 2006, 2009, and 2011, which were also provided by EDR.

The 1924 aerial photograph indicates that the subject site is densely developed with existing buildings. The type of buildings cannot be determined from the photograph but a larger building on the northern parcel appears to be for industrial use. This structure appears to be generally consistent with the existing site building at this location. The Gowanus Canal is visible to the west of the site and all of the surrounding streets are present. The area surrounding the site is also densely developed except for the large parcel to the immediate west, which appears to be mostly open or possibly under construction.

The 1943 photograph appears to be generally consistent with the previous photograph. No significant changes were noted since 1924.

The 1954 aerial photograph also appears to be generally consistent with the previous photographs except that a few buildings have been constructed on the property to the west of the site. There are still several buildings present on the site but we are unable to distinguish any specific details about the site from this photograph.

On the 1966 photograph, there appears to be fewer structures present on the southern parcel of the subject property. In addition, a larger building has been constructed on the property to the west of the site. This structure appears to be consistent with the existing building at this location. A large number of trucks or trailers appear to be parked around the building.

On the 1975 photograph, the northern parcel of the site contains one (1) large building (consistent with the existing President Street/Union Street building) and a parking lot along Nevins Street. All of the previous smaller structures along Nevins Street have been removed. The southern parcel contains at least two (2) structures and appears to be generally consistent with the previous photograph. The areas surrounding the site appear to be generally consistent with the previous photographs.

The 1984 photograph is too dark to make out any specific details about the site. From what we can see, the surrounding area conditions appear to be generally consistent with the previous photograph.

The 1994 photograph is a little blurry but we are able to see that a second building has been constructed on the northern parcel. This building is consistent with the existing Nevins Street building. We are unable to make out any specific details about the southern parcel on this photograph. The areas surrounding the site appear to be generally consistent with the previous photographs.

The 2006 aerial photograph clearly indicates that the southern parcel is a parking lot and the northern parcel contains two (2) buildings that cover the site. These structures are consistent with the existing site buildings. The areas surrounding the site appear to be generally consistent with the previous photographs with a mix of commercial, industrial, and residential use.

On the 2009 and 2011 photographs, the site and surrounding area conditions appear to be generally consistent with the previous photographs. The site contains two (2) buildings on the northern parcel and a parking lot on the southern parcel. The areas surrounding the site appear to be used for a mix of commercial, industrial, and residential purposes. A copy of the 2011 photograph is included as Figure 2 in Appendix A of this report.

### **1.6.3 Sanborn Maps**

During this assessment, we reviewed 26 Sanborn maps, dated 1886, 1904, 1915, 1938, 1950, 1969, 1977, 1979, 1980, 1981, 1982, 1986, 1987, 1988, 1991, 1992, 1993, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006, and 2007, which were also provided by EDR. Copies of select Sanborn maps are available in Appendix D of this report.

On the 1886 map, the northern parcel of the site consists of larger buildings that are occupied by Kenyon and Newton Sash and Door Factory. The area along Nevins Street is occupied by eight (8) two-story and three-story structures that included dwellings and storefronts, as well as a few one-story auxiliary structures (i.e. sheds or garages). The southern parcel is occupied by four (4) two-story and three-story structures that contain stores. The areas surrounding the site include a mix of uses that include a paper mill to the south, a lumber yard to the west, a lime, brick, and lath yard to the northwest, and residential and commercial use to the north and east. The Gowanus Canal is also shown to the west of the site.

The 1904 and 1915 Sanborn maps indicate that the site conditions are generally consistent with the previous map. The larger building on the northern parcel is now occupied by Albion J. Newton Co. Trim and Planing Mill and a few of the structures along Nevins Street are now identified as dwellings instead of storefronts. There are lumber yards to the east and south of the site as well as a small yard between the two site parcels. There also appears to have been additional residential and commercial development to the north and east of the site.

The 1938 and 1950 maps indicate that the large building on the northern parcel is now occupied by Coca-Cola Bottling Co. of NY. There are two (2) gasoline tanks identified in the center of the building. The buildings on the remaining portions of the site are generally consistent with the previous maps. One building on the Nevins Street/Carroll Street property has been removed by 1950. The areas to the north, east, and south of the site also appear to be generally consistent with the previous maps. The property to the west is now identified as Kopper's Seaboard Coke Co. and one property between the two site parcels is identified as a garage and auto repair facility with a gasoline tank towards the front of the building near Nevins Street.

On the 1969 map, the large building on the northern parcel is now occupied by Dolin Metal Manufacturing Co. All of the small buildings on the northern lot along Nevins Street have been removed and the property now consists of a parking lot. There are still three (3) structures present on the southern parcel. A new building has been constructed on the property to the west of the site (built 1958) and is now identified as Motor Freight Stations. The garage and auto repair facility is still present between the two site parcels. The area to the south of the site is occupied by North East Plastics Co. and a junkyard.

The 1977 and 1979 Sanborn maps are generally consistent with the previous maps except that on the 1979 map, the property to the west is identified as NY Telephone Company. No

significant changes were noted on the subject site or on properties immediately surrounding the site since 1969.

The 1980, 1981, and 1982 maps indicate that the northern parcel is generally consistent with the previous maps. However, only one (1) structure (a two-story dwelling) remains on the southern parcel at 431 Carroll Street. The remainder of the southern parcel is vacant and presumably a parking lot. The area surrounding the site appears to be generally consistent with the previous maps.

On the 1986, 1987, 1988, 1991, and 1992 Sanborn maps, a warehouse building is present along Nevins Street on the northern parcel (built 1985). The southern parcel is completely vacant and presumably a parking lot. The garage and auto repair facility is still present between the two parcels and the areas surrounding the subject site appear to be generally consistent with the previous maps.

The 1993, 1995, and 1996 maps indicate that Dolin Metal Manufacturing Co. no longer occupies the larger building on the northern parcel of the site. The building use just says manufacturing and storage with no occupant named. The remaining site and surrounding area conditions appear to be generally consistent with the previous maps.

On the 2001 and 2002 maps, the site and surrounding area conditions appear to be generally consistent with the previous maps except that the building to the west of the site is now occupied by Bell Atlantic (Verizon).

The 2003, 2004, 2005, and 2006 Sanborn map indicate that the southern parcel is used for parking. The remaining site and surrounding area conditions appear to be generally consistent with the previous maps. No significant changes were noted on the subject site or on properties immediately surrounding the site.

The 2007 map is also generally consistent with the previous maps. No significant changes were noted on the subject property or on properties immediately surrounding the site. The southern parcel consists of a parking lot and the northern parcel has two buildings (one warehouse and one manufacturing/storage) that encompass the entire parcel. The area between the two site parcels consists of a garage and auto repair facility (not observed at the time of the site visit) and a candle manufacturing company (still present at the time of this assessment). The building to the west of the site is still occupied by Bell Atlantic/Verizon and the building to the southwest is still occupied by North East Plastics Co. on this map. There is a truck repair shop and a junkyard to the south of the site. To the north and east are commercial and residential properties along Carroll Street, President Street, and Union Street.

#### **1.6.4 City Directories**

City directory data was also provided by EDR for select years between 1928 and 2013. The City Directory listings for the subject site are summarized in the following table. No other pertinent information was provided in the city directory data.

**Table 2: City Directory Listings**

| <b>Year</b> | <b>Address</b>                                                                                  | <b>Name</b>                                                                                                                                                         |

### **1.6.5 Summary of Past Property Use(s)**

The Sanborn maps and other available information indicate that the large one-story building on Union Street and President Street was previously occupied by the following:

- Kenyon and Newton Sash and Door Factory in 1886;
- Albro J. Newton Co. Trim and Planing Mill in 1904 and 1915;
- Coca-Cola Bottling Co. of NY in 1938 and 1950;
- Dolin Metal Manufacturing Co. from 1969 to 1992; and
- Warehouse occupied by Omni Mail then Empire Trade Wholesale in the 1990s and 2000s.

The Sanborn maps also indicate that the tall one-story building on Nevins Street and President Street was built in 1985 and that the property was occupied by a parking lot back to 1969. The 1950, 1938, 1915, and 1904 Sanborn maps indicate that this parcel was occupied by nine (9) two-story and three-story structures that included dwellings, tenements, and storefronts, as well as a few one-story auxiliary structures (i.e. sheds or garages).

The existing parking lot on the corner of Nevins Street and Carroll Street has been present back to circa-1986. On the 1980 and 1982 maps, there is a two-story dwelling at 431 Carroll Street but the rest of the property is vacant, presumably a parking lot. The previous Sanborn maps indicate that the property was occupied by two (2) two-story and two (2) three-story buildings that consisted of dwellings and storefronts, as well as a few one-story auxiliary structures (i.e. sheds or garages). No other prior uses of the subject property could be found during this assessment.

The available historical information indicates that the site has a long history of industrial use, which includes Dolin Metal Manufacturing Co. between 1969 and 1992, Coca-Cola Bottling Co. of NY in 1938 and 1950, and woodworking businesses between 1886 and 1915. Typical contaminants associated with metal manufacturing operations include heavy metals (i.e. cadmium, chromium, and nickel), solvents, acids, and cyanide. Typical contaminants associated with woodworking include paints, stains, wood preservatives, adhesives, etc. The Sanborn maps also show two (2) gasoline tanks inside the one-story site building in 1938 and 1950. Waste management and general housekeeping practices at the site while being used for industrial purposes are unknown. Therefore, the past industrial use of the site is a recognized environmental condition (REC) since there is a possibility that the site has been detrimentally impacted as a result of these previous uses.

The former structures on the site are also an environmental concern since buried remains (i.e. foundations, debris, septic tanks, wells, etc.) may still exist on the property. Buried building debris could possibly contain asbestos containing materials and/or lead based paint. Items such as fuel oil tanks and/or piping from oil tanks may have also been buried near or within the former building areas. In addition, the site parcels may contain historic fill material (i.e. ash and cinders), which was historically used below building slabs and to raise grades in industrialized areas. This material is often contaminated with polycyclic aromatic hydrocarbons (PAHs) and metals. Any fill or debris material that is removed from the site as part of the proposed development must be properly disposed of at off-site facilities that accept these types of waste materials. Depending on the type of materials encountered, the fill and/or debris may also have to be segregated for disposal purposes.

## **2.0 ENVIRONMENTAL SETTING OF THE PROPERTY**

### **2.1 Soils**

According to the New York City Reconnaissance Soil Survey, the soils in the area of the subject site consist of urban land. Urban land is where at least 80% of the surface is covered with impervious pavement and buildings, which makes it difficult to identify the underlying soils. Typically with Urban Land, the site has been filled and/or the natural soil layers have been altered or mixed with manufactured materials, such as bricks, crushed concrete, or cinders. In the area of the site, the urban land has 0 to 8 percent slopes and is underlain by a wet substratum (swamp, tidal marsh, or open water). Near the site, the urban land is also underlain by glacial till.

### **2.2 Topography and Surface Drainage**

The site is located at approximately 12 feet above the National Geodetic Vertical Datum (NGVD) with the general topography in the vicinity of the site decreasing gently to the west. Rainwater on the subject property is currently discharged to the ground surface where it is directed to drain inlets on the site or catch basins in the surrounding streets.

### **2.3 Hydrology**

No water courses or wetland areas were observed on the subject property during the site visit. Based upon the topographic maps and the site conditions, we expect that groundwater is less than 10 feet beneath the ground surface on the subject property. Based on the topography in the vicinity of the site, we expect that local groundwater generally flows in a westerly direction towards the Gowanus Canal.

According to Environmental Data Resources (EDR), which reviewed wetlands maps and flood zone maps for the subject property and surrounding areas, the subject site does not contain any federal or state regulated wetland areas. However, the site is located within the 100-year and 500-year flood zones. A map showing the nearby wetland and flood zone areas is available within the EDR Database Report in Appendix C of this report.

### **2.4 Radon Evaluation**

Radon is a naturally occurring radioactive gas that originates from the natural breakdown of uranium in soil, rock, and water. Radon has the ability to migrate through soil, entering buildings through cracks and other holes in building foundations. Although the amount of radon in outdoor air is low, radon can become concentrated indoors.

Radon breaks down into solid radioactive particles known as radon progeny that can remain suspended in the air for a considerable length of time. When radon or radon progeny are inhaled, they can damage lung tissue which may eventually lead to lung cancer. Therefore, the greater the concentration of radon, the greater the risk to human health. The United States Environmental Protection Agency (USEPA) has established a threshold value for radon at 4 picocuries per liter (pCi/l) of air. If radon concentrations are above 4-pCi/l, then further action is warranted to mitigate a potential radon problem.

Radon tests have been performed throughout the state of New York. This test data is categorized by zip codes and used to assign a Tier Rating for each county and their respective municipalities. These Tier Ratings are provided below along with a brief explanation of what they represent:

|                                    |                                             |
|------------------------------------|---------------------------------------------|
| Zone 1 - High Radon Potential:     | Average indoor levels exceed 4 pCi/l.       |
| Zone 2 - Moderate Radon Potential: | Average indoor levels are between 2-4 pCi/l |
| Zone 3 - Low Radon Potential:      | Average indoor levels are less than 2 pCi/l |

Kings County is rated as Tier 3 – Low Radon Potential. Based upon the EPA radon tests data and the subsequent ratings issued for the area of the subject property, we believe that radon gas is not an issue at the referenced site.

### 3.0 ADJACENT PROPERTIES & OFF-SITE CONTAMINATION SOURCES

The area surrounding the subject property consists primarily of commercial, industrial, and some residential properties. The subject site is bordered by Union Street to the north followed by commercial and multi-family residential properties. To the east are residential and commercial properties along Union Street, President Street, and Carroll Street. To the south of the site is Carroll Street followed by commercial and industrial properties. The site is bordered by Nevins Street to the west followed by an industrial building and then the Gowanus Canal.

To determine potential off-site sources that may impact the subject site, we contracted EDR to perform a database search within a specified radius of the site as stated in the tables below. These radii meet or exceed the distances established by the ASTM E-1527 standard that are commonly used by environmental professionals when performing an ESA. A summary of our database findings is provided in the tables below.

We also conducted a visual inspection of properties adjacent to the subject property to determine if sources of contamination exist that could potentially impact the subject property. An evaluation of the database information and a description of observations made during our inspection of the adjacent properties are provided following the database summary tables.

Note – Not all databases are listed. Refer to the EDR Report in Appendix C for the complete list.

TP – Target Property

The subject property is not listed on any of the federal databases that were reviewed during this assessment. The federal database search did identify several nearby sites on the federal databases as shown in Table 3 above.

Upon review of the database report, we find that most of the identified facilities are located either down-gradient or cross-gradient of the site, are located a significant distance from the subject property, or are non-generators or small quantity generators with no violations. It is unlikely that these facilities have detrimentally impacted the subject property. However, there is one (1) listed property that may have detrimentally impacted the subject site.

The Gowanus Canal, which is located one (1) block to the west of the subject site, was placed on the National Priorities List (Superfund) in March 2010 since it is one of the most heavily contaminated water bodies in the nation. This site is also listed on the CERCLIS and ROD databases. This 1.8 mile long, 100 foot wide canal was built in the 19th century and historically was home to many industries including manufactured gas plants, cement factories, oil refineries, tanneries, and chemical plants. After nearly 150 years of use, the canal has become heavily contaminated with polychlorinated biphenyls (PCBs), heavy metals, pesticides, volatile organic compounds (VOCs), sewage solids from combined sewer overflows, and polycyclic aromatic hydrocarbons (PAHs). Given the proximity of the canal to the subject property, there is a possibility that contamination from the canal has impacted the groundwater below the site.

**Table 4: State Environmental Database Search Results**

| <b>New York Databases - ASTM Standard</b> | <b>Search Radius</b> | <b>Number of Sites within Search Radius</b> | <b>Number of Sites with Potential to Impact the Property</b> |
|-------------------------------------------|----------------------|---------------------------------------------|--------------------------------------------------------------|
| State Hazardous Waste                     | 1.0 mile             | 7                                           | 1                                                            |
| Vapor Intrusion Sites                     | 1.0 mile             | -                                           | -                                                            |

Note – Not all databases are listed. Refer to the EDR Report in Appendix C for the complete list.

TP – Target Property

The subject property is listed on the Leaking Storage Tanks (LTANKS) database with spill number 9412605. The record indicates that there was a tank test failure at the site in 1994 related to a 3,500-gallon unregistered fuel oil tank. This storage tank is discussed in more detail in Section 5.2.2 of this report.

The state database search also identified several nearby sites on the state databases as shown in Table 4 above. Upon review of the database report, we find that most of the identified facilities are either down-gradient or cross-gradient of the subject site, are located a significant distance from the subject property, and/or their cases have been closed by the appropriate governing agency. It is unlikely that these facilities will detrimentally impact the subject property. However, there are two (2) listed properties that may have detrimentally impacted the subject site. These properties are discussed below.

The Gowanus Canal, which is located one (1) block to the west of the subject site, is listed on the State Hazardous Waste Site (SHWS) database. This site is discussed in the federal database search results section above.

In addition, the former New York Telephone and Verizon, property, which is located at 318 Nevins Street, is situated across Nevins Street to the immediate west of the subject site. This property is listed on several of the state databases including the following:

- Leaking Storage Tanks (LTANKS) with a case that was closed in 2003.
- Underground Storage Tank (UST) with four (4) closed tanks.
- Historic Underground Storage Tank (Historic UST) with a total capacity of 8,275 gallons in seven (7) tanks that are now closed.
- Aboveground Storage Tank (AST) with one (1) closed tank.
- NY Spills database with four (4) reported spills, one of which is still open because of gasoline contamination in the groundwater.
- NY Manifest database for transport and disposal of hazardous material from the property.

Although the exact location of the spills on the Verizon property are unknown, given the proximity of this property to the subject site, there is a possibility that groundwater contamination from this property has impacted the groundwater below the subject site as well.

We also visited other properties surrounding the subject site to visually inspect for evidence of off-site sources of contamination. Other than the facilities discussed above, we found no indicators on the adjacent properties that would cause concern for detrimental environmental impacts to the subject site.

## **4.0 GOVERNMENT AGENCY FINDINGS**

During our literature review, we examined documents supplied by EDR and we visited or contacted several local government offices. In addition, we contacted the New York State Department of Environmental Conservation (NYSDEC) and the New York City Department of Health and Mental Hygiene under the Freedom of Information Law (FOIL) to request a file search of department records that may be applicable to the site. The purpose of the records review was to obtain and review records that will help identify recognized environmental concerns in connection with the property. The agencies contacted are listed in Appendix F of this report. Described below are our findings for the subject property.

### **4.1 Local Government Agency Findings**

At the local level, we visited or contacted the City Register, Department of Buildings, Department of City Planning, and Finance Department.

Based on our review of information obtained from these offices, we confirmed that the site is identified as Block 440, Lots 1 and 12 and Block 447, Lots 1, 2, and 60. The Block 440 lots are currently owned by 469 President St. Co. LLC and 473 President St. Co. LLC, respectively. The Block 447 lots are all currently owned by James Ribellino. The Block 440 parcel is approximately 48,955 square feet in total area and the Block 447 parcel is approximately 4,100 square feet in total area.

The Department of Buildings information indicates that Block 440, Lot 1 (465-471 President Street aka 313-323 Nevins Street) has one (1) existing building on the site and that there were previous structures present. There are no listed restrictions. The records show that there was one (1) complaint in 1990 that was unsubstantiated and 14 reported violations that were all later dismissed. No details were provided. There were reportedly alterations made to the existing building that included new partition walls, sprinkler system items, and HVAC equipment on the roof. The field actions included 11 alterations made between 1903 and 1946, building notices from 1931 and 1932, demolition permits from 1908, 1911, 1931, and 1932, an oil burner application from 1906, new building permits in 1911, and 1946, and plumbing repairs in 1903, 1904, 1905, 1931, and 1988. Certificates of occupancy (CO) were issued in 1948, 1950, 1986, and 2005. The CO from 1948 was for former Lot 5. This lot had a three-story building with a cellar that housed three families. The 1950 CO was for 321 and 323 Nevins Street. This property had a three-story building with a cellar that was heated with oil. There was manufacturing on the first floor, and office on the second floor, and a tenant on the third floor. The 1986 CO was for construction of the existing site building and the 2005 CO was for the existing building, which consists of a one-story warehouse with mezzanine.

The Department of Buildings information indicates that Block 440, Lot 12 (514-530 Union Street and 473-491 President Street) has one (1) existing building on the site. There are no listed restrictions. The records show that there were six (6) complaints from 2012 through 2014 and 12 reported violations between 1951 and 2004 that were all later dismissed. No details were provided. More recent alterations to the existing building included gas HVAC units in 1999, rooftop AC units in 2005, another AC unit in 2011, plumbing and structural work in 2012 and 2013, a new sprinkler system in 2013, and interior demolition work in 2012. In 1993, two (2) gas water heaters were installed and in 1997, five (5) oil heaters were converted to gas. Older work included 30 alterations between 1928 and 1969, building notices in 1942, 1981, and 1986, an oil

burner application in 1947, new buildings in 1908 and 1942, plumbing work in 1902, 1905, 1906, 1941, 1942, and 1949, and sprinklers in 1947. Certificates of occupancy (CO) were issued in 1928, 1938, 1959, and 2014. The 1928 CO was for 473-491 President Street, which included a one-story building that contained a warehouse and factory, an office, and two-car garage. The CO from 1938 was for a bottling plant at 473-491 President Street and 514-530 Union Street. There was a 550-gallon gasoline tank on the premises at this time. The 1959 CO was also for 473-491 President Street and 514-530 Union Street. The site building was used for die cutting at this time and the building was heated with fuel oil. The 2014 CO's are all related to the renovation of the 514-530 Union Street property into a shuffleboard club.

The Department of Buildings information lists Block 447, Lot 1 as 341 Nevins Street. There are no existing buildings and no listed restrictions. Alterations to previous buildings were made in 1946 and 1985 and building notices were issued in 1942 and 1967. In addition, certificates of occupancy (CO) were issued for this lot in 1954 and 1986. The 1954 CO indicates that there was a three-story building with a cellar. There were two (2) stores on the first floor and one-family apartments on the second and third floors. A demolition permit was issued in 1979. the Building Department had no files or records for Block 447, Lots 2 and 60.

At the Department of City Planning, we reviewed a Zoning Map for the area of the site, which was dated October 2012. The map indicates that the subject site is in Zone 'M1-2', which is a manufacturing district. M1 districts are often buffers between M2 or M3 districts and adjacent residential or commercial districts. This district typically includes light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. No other pertinent information was available from the Department of City Planning.

No other agencies had any files pertaining to the subject property and none had any records or files for this property with regards to storage, use, or disposal of hazardous substances.

#### **4.2 State Government Agency Findings**

We received a letter from the NYSDEC Region 2 office acknowledging receipt of our FOIL request. As of the date of this report, we have not received any further information from the NYSDEC regarding our FOIL request. Any pertinent information obtained from this agency at a later date will be provided in an addendum letter.

#### **4.3 Health Department Findings**

We also received response letters from the New York City Department of Health and Mental Hygiene first acknowledging receipt of our FOIL request and then stating that no records could be located for the subject property. Copies of the response letters are attached in Appendix F of this report.

#### **4.4 Permits, Licenses, and Registrations**

According to all of the records we have reviewed at the local, county, state, and federal levels, there are no current environmental permits for the subject site.

#### **4.5     Violations, Citations, and Inspections**

Our review of the public records supplied by EDR indicates that there have been no administrative orders or citations written for the subject property by either state or federal environmental agencies. However, records reviewed at the New York City government offices indicate that there have been violations issued for the site by the Department of Buildings. Some of the violations are old and all of the reported violations have been closed or dismissed.

## **5.0 SITE VISIT**

On 8 May 2014, the subject property was inspected by Ms. Meredith Anke of Carlin-Simpson & Associates. Ms. Anke was accompanied by Mr. Abraham Lowy and Mr. Michael Schlegel during the site visit. During this portion of this assessment, we conducted the following:

- A) Inspected various site areas, observing general site conditions to determine if and where potential contamination sources might exist on the subject site and/or on adjacent properties.
- B) Visually inspected the subject property and adjoining parcels for any recognized environmental concerns.
- C) Investigated properties in the area that were listed in our literature review, for possible sources that could impact the subject site. All issues for off-site contamination are discussed in Section 3.0 above.
- D) Interviewed knowledgeable personnel regarding the subject site. Refer to Section 6.0 below for more information.

The majority of the subject site was accessible at the time of the inspection. The only areas that we were not able to inspect were a few locked rooms and a former storage tank vault located at 473 President Street.

For this assessment we investigated all of the items listed in ASTM E-1527. Site photographs are presented in Appendix B of this report.

### **5.1 General Site Setting**

The subject property consists of the following properties: 1) 514-530 Union Street; 2) 465-471 President Street aka 313-323 Nevins Street; 3) 473-491 President Street; 4) 339-341 Nevins Street; and 5) 431 Carroll Street, which are located in Brooklyn, Kings County, New York, as shown on the location map in Appendix A of this report.

These properties make up two (2) rectangular-shaped parcels that are referred to as Block 440, Lots 1 and 12 and Block 447, Lots 1, 2, and 60. The Block 440 parcel is located on the east side of Nevins Street and is bound by Union Street and President Street to the north and south, respectively. This parcel contains two (2) buildings that encompass the entire parcel. The Block 447 parcel is located on the east side of Nevins Street and is also bound by Carroll Street to the south. This parcel contains a relatively flat asphalt-paved parking lot that is surrounded by a chain-link fence.

#### **5.1.1 Current Use(s) of the Property**

The subject site currently contains two (2) buildings, which include a large one-story building on Union Street and President Street and a tall one-story building on Nevins Street and President Street. Both buildings have slab on grade floors with no basements. There is also an asphalt paved parking lot on the corner of Nevins Street and Carroll Street.

The one-story building on Union Street is occupied by Royal Palm Shuffleboard Club and the portion of the one story structure on President Street is currently vacant but was recently occupied by a wholesale warehouse company. The tall one-story structure with mezzanine on President Street and Nevins Street is currently occupied by Lower East Side Ecology Center aka E-Waste Warehouse.

### **5.1.2 General Description of Existing Structures**

There are two (2) existing structures present on the subject property. The locations of these structures are shown on the Site Plan (Figure 3) in Appendix A of this report. The description of these structures is as follows:

The building located at 465-471 President Street aka 313-323 Nevins Street consists of a tall one-story structure with a mezzanine. The building has a concrete floor slab on grade with masonry block walls and a flat roof with metal framing. At the north end of the building is an office area that consists of sheetrock walls, carpeting or linoleum tiles on the floors, and a drop ceiling with fluorescent lights. The restrooms have tiled floors, sheetrock walls, and a drop ceiling.

The second building extends across the entire block from Union Street to President Street and contains two (2) interior spaces. On the Union Street side, the building is identified as 514-530 Union Street and is occupied by a shuffleboard club. This portion of the structure has a concrete floor slab on grade with brick and masonry block walls and a flat roof. The interior of the 514-530 Union Street property has been finished with a raised wood floor, sheetrock walls, and a wood ceiling. There are exposed pipes and ducts along the ceiling. The restrooms have tiled floors and walls with sheetrock ceilings.

On the President Street side, the building is identified as 473-491 President Street and consists of an empty warehouse building. This portion of the structure has a concrete floor slab on grade with brick and masonry block walls and a flat roof. The interior of the 473-491 President Street property consists mainly of an open warehouse with concrete floors, block, brick, and/or sheetrock walls, and overhead fluorescent lights. At the east end of the building is an office area that has sheetrock walls, vinyl floor tiles, and a drop ceiling with fluorescent lights. The restrooms have tiled floors and either tiled, paneled, or sheetrock walls.

### **5.1.3 Roads and Parking**

There are no roads located on the subject site but the Nevins Street/Carroll Street property (Block 447, Lots 1, 2, and 60) is occupied by an asphalt-paved parking lot.

### **5.1.4 Potable Water Supply**

Potable water is provided to the existing buildings by the City of New York.

### **5.1.5 Sewage Disposal System**

The existing buildings are currently connected to the public sanitary sewer system, which is maintained by the City of New York.

### **5.1.6 Other Utilities**

The buildings are also provided with natural gas that is supplied by National Grid and electricity service that is supplied by Con-Edison.

There is also a storm drain located in the parking lot on the Nevins Street/Carroll Street parcel. No staining or evidence of hazardous waste dumping was observed around the drain at the time of this assessment. This drain is reportedly connected to the local stormwater collection system, which is maintained by the City of New York.

## **5.2 Interior and Exterior Observations**

### **5.2.1 Hazardous Substances**

Very small quantities of hazardous substances were observed on the subject property during the site visit. These materials included cleaning supplies and maintenance items (paint, joint compound, floor sealer, propane cylinders, etc.) that were stored in their original containers inside the site buildings.

No other materials were observed and no improper storage or use of materials was observed on the subject property during this assessment. In addition, no evidence of deliberate dumping or on-site hazardous waste disposal (i.e. stained surficial soils, stressed vegetation, odors, etc.) was observed on the property at the time of the site visit.

No radioactive materials were observed on the subject property at the time of our inspection. Also, no records of past storage and/or disposal of hazardous materials or radioactive materials were found during this assessment.

Given the types, limited quantity, condition, and storage locations of the observed materials, the existing hazardous materials are not an environmental concern.

### **5.2.2 Storage Tanks**

Determining the presence of Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs) is considered essential in assessing potential contamination sources. Visual inspection and the review of tank registration records are used to determine the possible existence of past and present storage tanks at the subject property. It must be noted however, that the absence of certain site conditions or lack of records may restrict or prevent the determination of the number and contents of storage tanks on the subject property.

No aboveground storage tanks (ASTs) were observed on the subject property during this assessment and no evidence of existing underground storage tanks (USTs), such as fill ports or vent pipes, was observed on the site during this study.

As discussed above in Section 3, the subject property is listed in the NYSDEC Leaking Storage Tanks (LTANKS) database as Omni Mail located at 473 President Street with a secondary address of 514 Union Street. The spill number is 9412605. According to the database record, a 3,500-gallon unregistered fuel oil tank was formerly present on the site but there was a tank test failure on an abandoned line in 1994 that resulted in the LTANKS listing.

The owner's representative initially indicated that a fuel oil tank was removed from an underground vault area located on the President Street side of the building in the 1990s and that closure documentation was available from the owner. Information later provided by the owner indicated that the tank was actually abandoned in-place (pumped out, cleaned, and filled with sand) in September 2001 under the supervision of Omega-Abra Engineering LLC. A copy of the information provided by the property owner is attached in Appendix F of this report. The fill line was reportedly cemented, the vent line was removed, and other lines were reportedly plugged and/or capped. No information regarding soil sampling was provided.

The abandoned in-place fuel oil tank is a recognized environmental condition (REC) since there is an open LTANKS case related to this tank and no closure soil samples were collected from below the tank prior to abandonment.

### **5.2.3 Odors**

At the time of this assessment, there was a pungent trash odor inside the 473-491 President Street building. No unusual or unidentified odors were noted in the remaining building spaces or on the exterior of the subject property.

### **5.2.4 Drums**

No drums were observed on the subject property during this assessment.

### **5.2.5 Polychlorinated Biphenyls (PCBs)**

The past use of polychlorinated biphenyls (PCBs) in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors was common. PCBs in electrical equipment are controlled by United States EPA regulation 40 CFR, Part 761. According to this regulation there are three categories for classifying electrical equipment; less than 50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and greater than 500 ppm is considered "PCB".

During this assessment, we did not observe any electrical transformers that could contain PCBs on the subject property. Fluorescent light fixtures were, however, observed in the existing site buildings. Due to the age of the larger building, these light fixtures may contain PCBs but examination of individual light ballasts was not within the scope of this study.

### **5.2.6 Elevators and Lifts**

There are no elevators or lifts located on the subject site.

### **5.2.7 Suspect Asbestos Containing Materials (ACM)**

Suspect asbestos containing materials (ACM) were observed inside the building at 473-491 President Street during this assessment. The observed materials included pipe insulation, vinyl floor tiles, and ceiling tiles. Based on the age of the structure, asbestos containing materials may be present in other portions of the site building as well. An asbestos survey is recommended prior to demolition/renovation of the existing structure.

### **5.3 Interior Observations**

#### **5.3.1 Heating and Cooling**

The 514-530 Union Street building is heated and cooled using four (4) roof-mounted air handler units and multiple air conditioning units. The 473-491 President Street is heated via two (2) natural gas furnaces at the east end of the building and several natural gas heaters that are mounted near the ceiling in the warehouse areas. There is also one (1) air handler unit on the roof. The building did not appear to be provided with air conditioning. Remnants of a steam or hot water radiator system were observed in the furnace room. The 465-471 President Street aka 313-323 Nevins Street building is heated with several natural gas heaters that are mounted near the ceiling in the warehouse area.

#### **5.3.2 Stains and Corrosion**

No staining or corrosion was observed inside the existing site buildings during this assessment.

#### **5.3.3 Drains and Sumps**

A few floor drains were observed in various areas inside the existing site buildings. No staining was observed around the drains.

### **5.4 Exterior Observations**

#### **5.4.1 Pits, Ponds, or Lagoons**

No pits, ponds, or lagoons were observed on the subject property or on adjoining properties during this assessment.

#### **5.4.2 Stained Soils or Pavement**

No areas of stained surficial soils were observed on the subject property during the Phase I ESA site visit.

We did observe some minor oil staining from parked vehicles on the pavement in the Nevins Street/Carroll Street parking lot. Based on the limited amount of staining observed, it is unlikely that the subject site has been detrimentally impacted as a result of the minimal staining at these locations.

#### **5.4.3 Stressed Vegetation**

No areas of stressed vegetation were observed on the subject property during this assessment.

#### **5.4.4 Solid Waste Disposal**

Solid waste that is generated at 514-530 Union Street is collected curbside by a carting company on a daily basis. Previous solid waste disposal practices at 473-491 President Street are

unknown. At the time of the site visit, trash was being stored in bags inside the warehouse building. There was also a full dumpster situated outside the building at the time of our inspection.

Trash and recyclables (paper, cardboard, metal, etc.) generated at 465-471 President Street aka 313-323 Nevins Street are collected by Action Trash Disposal on a weekly basis. Electronic waste that cannot be refurbished or resold is sent off-site for disposal.

No evidence of on-site solid waste disposal or landfilling was observed on the subject property during this assessment. In addition, we found no records at any government agency indicating that the subject property was formerly used as a solid waste landfill.

#### **5.4.5 Surface Debris**

Only a small amount of surface debris and litter was observed around the perimeter of the parking lot on the Nevins Street/Carroll Street parcel during this assessment. Given the type and limited quantity of debris observed, these materials are not an environmental concern.

#### **5.4.6 Wells**

No existing wells (i.e. drinking water wells, irrigation wells, monitoring wells, etc.) were observed on the subject property during the site visit.

#### **5.4.7 Septic Systems**

The subject site and the area surrounding the site are currently connected to the public sanitary sewer system. No records pertaining to former septic systems could be located during this assessment.

## 6.0 INTERVIEWS

The purpose of interviews is to obtain information indicating recognized environmental conditions in connection with the subject property. The persons interviewed during this assessment are as follows:

**Table 5: Interviews**

| <b>Date</b> | <b>Name</b>      | <b>Organization</b>              |
|-------------|------------------|----------------------------------|
| 5/8/2014    | Michael Schlegel | EcoRise Development LLC          |
| 5/8/2014    | Abraham Lowy     | Pinnacle Realty                  |
| 5/8/2014    | Anthony Gambale  | Owner's Representative           |
| 5/8/2014    | Sam Huntington   | E-Waste Warehouse                |
| 5/8/2014    | Jonathan Schnap  | Royal Palm Shuffleboard Club LLC |

The above interviews were performed in person at the time of the site visit or by questionnaire. Any pertinent information obtained from the interviews is included within the text of this report. A copy of the interview questionnaires is included in Appendix G of this report.

We also requested information from the New York City Department of Buildings but individuals at this office were not specifically familiar with the subject site. Any information obtained from this agency is outlined in Section 4.0 above.

## **7.0 FINDINGS AND OPINION**

### **7.1 Recognized Environmental Conditions**

As defined by American Society of Testing Material (ASTM) E1527-13, the term “recognized environmental condition” means the presence or likely presence of any hazardous substances or petroleum products on or at a property: 1) due to a release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

***The results of this assessment have revealed three (3) recognized environmental condition associated with the subject property. These conditions are as follows:***

- The subject site is listed on the NYSDEC Leaking Underground Storage Tanks (LTANKS) database for a 3,500-gallon unregistered fuel oil tank that failed a tank test in 1994. Information provided by the owner indicates that this tank was abandoned in-place in 2001, but no soil sampling was performed below the tank prior to abandonment. It is possible that the site has been impacted as a result of this tank.
- The available historical information indicates that the site has a long history of industrial use. Waste management and general housekeeping practices at the site while being used for industrial purposes are unknown. Therefore, the past industrial use of the site is a recognized environmental condition (REC) since there is a possibility that the site has been detrimentally impacted as a result of these previous uses.
- Based on the database search results, there are two (2) nearby properties that may have impacted the subject property. These sites are the Gowanus Canal and the Verizon property on Nevins Street, which are both located to the west of the site. Given the proximity of these properties to the subject site, there is a possibility that contamination from these properties has impacted the groundwater below the site.

### **7.2 Historical Recognized Environmental Conditions**

The term “historical recognized environmental condition” as defined by ASTM is a past release of any hazardous substances or petroleum products in connection with the subject property that has been addressed to the satisfaction of the applicable regulatory authority or that meets the unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

***The results of this assessment have revealed no historical recognized environmental conditions associated with the property.***

### **7.3 Controlled Recognized Environmental Conditions**

The term “controlled recognized environmental condition” as defined by ASTM is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place on the site

subject to the implementation of required controls (i.e. property use restrictions, institutional controls, engineering controls, etc.).

***The results of this assessment have revealed no controlled recognized environmental conditions associated with the property.***

#### **7.4 De Minimis Conditions**

De minimis conditions do not present a current material risk of harm to public health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

***The results of this assessment have revealed the following three (3) de minimis conditions associated with the subject property.***

- Suspect asbestos containing materials (ACM) were observed inside the building at 473-491 President Street during this assessment. The observed materials included pipe insulation, vinyl floor tiles, and ceiling tiles. Based on the age of the structure, asbestos containing materials may be present in other portions of the building as well.
- Former structures were identified on the site. Former structures are an environmental concern since buried remains (i.e. foundations, debris, etc.) may still exist on the property. Buried building debris could possibly contain asbestos containing materials and/or lead based paint. Items such as fuel oil tanks and/or piping from oil tanks may have also been buried near or within the former building areas. In addition, the site may contain historic fill material (i.e. ash and cinders), which was historically used below building slabs and to raise grades in industrialized areas.
- Both parcels of the subject property are located within the 100-year and/or 500-year flood zones. This indicates that there is a risk of flooding at the subject site.

#### **7.4 Data Gaps**

A data gap is defined in ASTM E1527-13 as a lack of or inability to obtain information required by the standards and practices listed in the regulation despite good faith efforts by the environmental professional or prospective landowner to gather such information. Such data gaps may affect the environmental professional's ability to identify recognized environmental conditions at the property.

There were no data gaps that significantly affected our ability to identify recognized environmental conditions in connection with the subject property.

## **8.0 CONCLUSIONS AND RECOMMENDATIONS**

Carlin-Simpson & Associates has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E1527-13 for the property identified as: 1) 514-530 Union Street; 2) 465-471 President Street aka 313-323 Nevins Street; 3) 473-491 President Street; 4) 339-341 Nevins Street; and 5) 431 Carroll Street in Brooklyn, Kings County, New York. Any exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

This assessment has revealed three (3) recognized environmental conditions in connection with the subject property. These conditions are described in Section 7.1 above. This assessment has also identified three (3) de minimis condition, which is listed in Section 7.4 above. Conditions determined to be de minimis are not recognized environmental conditions. Our recommendations for the subject property are summarized below.

- A Phase II Environmental Site Investigation (ESI) is recommended to investigate the recognized environmental conditions (RECs) discussed above. This investigation should include soil and groundwater sampling at the site.
- If no evidence of contamination is encountered around the abandoned fuel oil tank, the information should be submitted to the NYSDEC for the purpose of closing out the LTANKS case.
- In the event that buried debris is encountered in the areas of the former structures or historic fill material is encountered at the site, we recommend that these materials be completely removed from the site and properly disposed of at off-site facilities that accept these types of materials. The fill and debris should be removed and disposed of in accordance with all applicable local and state requirements. Depending on the type of materials encountered, the fill and debris materials may also have to be segregated for disposal purposes.
- We also recommend that an asbestos survey be performed prior to any renovation or demolition of the existing site buildings.

## **9.0 LIMITATIONS AND EXCEPTIONS**

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the property may have occurred which could not be identified.

The ASTM Standard Practice notes that no environmental site assessment or investigation can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of a standardized environmental site assessment procedure is intended to reduce, but not eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the property, given reasonable limits of time and cost.

The services performed and outlined in this report were based, in part, upon visual observations of the site. Our opinion cannot be extended to portions of the site that were unavailable for direct observation, reasonably beyond the control of Carlin-Simpson & Associates. The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, state, and federal government laws and regulations was not included in our contract for services.

The report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM 1527-13, and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report. The possibility remains that unexpected environmental conditions may be encountered at the site in locations not specifically investigated. Should such an event occur, Carlin-Simpson & Associates must be notified in order that we may determine if modifications to our conclusions are necessary.

This report may be distributed and relied upon by EcoRise Development LLC and their lenders. This report may not be used or relied upon in connection with any other project or by other third parties. Carlin-Simpson & Associates disclaims liability for any such third party use or reliance without express written permission.

## **10.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS**

Over the last twenty (20) years, our firm has provided environmental engineering services throughout New Jersey, New York, Connecticut, Pennsylvania, Massachusetts, and Maryland. The environmental engineering services have included Phase I Environmental Site Assessments, Phase II Environmental Site Investigations, Phase III Remedial Investigations/Feasibility Studies, and the management of Phase IV Remediation Projects. In addition to the regulated phased work of environmental projects, we have also provided environmental engineering services which include asbestos and lead-based paint surveys, subsurface soil and groundwater investigations for the closure of underground storage tanks, research and laboratory studies on municipal incinerator ash for use in municipal landfills and road pavements.

Our Phase I Environmental Site Assessment projects have included the research of properties, which had previously been occupied by commercial establishments, light and heavy manufacturing facilities, service stations, foundries, dry cleaners, or residential buildings. Typically, the information regarding the previous operations at a particular property is not readily available at the site or from the present owner. Only through detailed and careful research of the public record will information present itself so that we can then appropriately target the property for a soil and groundwater investigation. Several of our Phase I Assessments included a visual inspection of the interior of the buildings for suspect asbestos containing materials and suspect lead paint. We have conducted Phase I Environmental Site Assessments for several properties in New Jersey, New York, Pennsylvania, and Connecticut.

The qualifications of the environmental professional(s) and personnel conducting this site assessment are provided in Appendix H of this report.

**11.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS**

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you for letting us assist you with this project. Should you have any questions or comments, please contact this office.

Very truly yours,

CARLIN-SIMPSON & ASSOCIATES

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

PRESIDENT STREET, UNION STREET, NEVINS STREET  
BROOKLYN, NY 11215

#### COORDINATES

Latitude (North): 40.6786000 - 40 40' 42.96"  
Longitude (West): 73.9876000 - 73 59' 15.36"  
Universal Transverse Mercator: Zone 18  
UTM X (Meters): 585559.6  
UTM Y (Meters): 4503361.0  
Elevation: 9 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 40073-F8 BROOKLYN, NY  
Most Recent Revision: 1995  
  
West Map: 40074-F1 JERSEY CITY, NJ NY  
Most Recent Revision: 1981

### AERIAL PHOTOGRAPHY IN THIS REPORT

Portions of Photo from: 2010, 2011  
Source: USDA

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

#### ***Federal CERCLIS list***

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

| <u>Equal/Higher Elevation</u>           | <u>Address</u>           | <u>Direction / Distance</u>             | <u>Map ID</u>     | <u>Page</u>       |

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

### State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 03/27/2014 has revealed that there are 7 NY SHWS sites within approximately 1 mile of the target property.

### State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/12/2013 has revealed that there are 9 NY SWF/LF sites within approximately 0.5 miles of the target property.

### State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/17/2014 has revealed that there are 42 NY LTANKS sites within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, and dated 03/31/2014 has revealed that there are 25

## EXECUTIVE SUMMARY

NY UST sites within approximately 0.25 miles of the target property.

NY MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY MOSF UST site within approximately 0.5 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

### Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/17/2014 has revealed that there are 32 NY Spills sites within approximately 0.125 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/11/2014 has revealed that there are 39 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 11/25/2013 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 02/28/2014 has revealed that there are 56 NY MANIFEST sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 5 EDR MGP sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 35 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 4 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

VERIZON (Continued)

S113405253

collected some samples. during assessment, they found SVOC  
contamination in area inside the vehicle maintenance shop. they  
suspect a former in-ground hydraulic lift as the source for this  
contamination. Tom mentioned that soil excavation will most probably  
begin on 03/04/13.Thomas H. BosshardEnvironmental SpecialistVerizon  
Global EH&S Compliance501 North Ocean AvenuePatchogue, NY 11772Ph.  
(631) 654-7920 (O) (631) 901-8272 (C)Fax (631) 475-2217email:  
thomas.bosshard@verizon.comcase assigned to DEC Zhune for  
follow-up.03/4/13-Zhune visited the site met Mr. Bosshard. The  
contractors were excavating the area of the concrete patch where  
boring GP-3 was installed and where they suspected the hydraulic lifts  
were located. As per Mr. Bosshard they did not find evidence of the  
hydraulic lifts, instead they found urban fill( brick, glass, ash and  
organics), They said due to the structure of the garage they will  
stop doing further excavation. They will backfill it. 6/17/13- Zhune  
received and reviewed the Request for Spill Closure Report sent by  
Verizon via email and dated 4/2/13. During a Phase II 7 soil borings  
were installed GP-1 through GP-7 and seven(7) soil samples were  
collected from the seven borings. The soil analytical results  
indicated no VOCs detected and SVOCs detected exceeding the NYSDEC  
CP-51 in all seven soil samples with the highest concentration  
detected at GP-3. Boring GP-3 was installed within a concrete patch,  
presumed to be the location of a former hydraulic lift in the garage  
portion of the building.The area of the concrete patch where boring  
GP-3 had previously been installed was excavated. A toal of 17.75  
tons of soil was excavated from the concrete patch area of the  
garage. The excavation measured approximately 11 feet long, 5 feet  
wide and 11 feet deep. Five post excavation samples were collected  
from each sidewall and bottom of the excavation. The soil analytcal  
results indicated no VOCs were detected in any of the post samples at  
concentrations exceeding the standards. SVOCs were detected at  
concntrations exceeding the NYSDEC CP-51. at samples from North  
sidewall, East sidewall, West sidewall and South sidewall.Based on  
the detected SVOC's associated with urban fill which is prevalent  
throughout the New York City , including downtown Brooklyn and the  
historical uses of the property as lumber and coal yards the spill is  
closed.  
soil samples confirm loss near former site of lift, c/u pending

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SUN"transferred from tang/sullivan to tibbe. see also 9314103 and 0306012 at the same location.09/23/03 Transferred from Tibbe to Sun10/01/03 Joe Sun of NYSDEC spoke to Jeff Bohlen of Envirotrac (Consultant to Verizon) regarding the removal of two (2)x4000 gallon FRP USTs, which are scheduled to be removed today, 10/01/03. J.Bohlen stated that they will take the end samples next Tuesday or Wednesday . He will call again to confirm the time and date for DEC people to be at the site to witness the soil sampling.10/02/03- Sun- Faxed letter to John Quatralo of Verizon and Jeff Bohlen of EnviroTrac requesting the area to be excavated in conjunction with the tank removal activities currently progressing on site. Soil excavation will remove the source of the groundwater contamination, and accelerate the remediation of the spill site. Since source material exists under the sidewalk, an attached letter can be used to expedite the DOT permit acquisition. 10/03/2003-Sun-Spoke with John Quatralo of Verizon about excavation of contaminated soils at 318 Nevins Street. He stated that he agrees with DEC's recommendation to excavate the area on south side of Union Stret. Per DEC's request, Verizon will proceed to expedite the DOT permit acquisition immediately. We will meet next week at the site to further survey the facility when Envirotrac starts to take end samples. 10/7/2003-Sun & Vought visited the Verizon's site and met John Quatralo of Verizon and Jeff Bohlen of Envirotrac. At the time of our visit, one 4000 gallon gasoline FRP UST was already removed. Based on our discussion, Verizon will take one end sample for every twenty five (25) feet on each side wall and one ground water sample on the bottom of the tank. The extent of excavation will be based on the PID readings. The analysis of volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) will be performed using EPA Methods 8260 &

8270, respectively. Verizon will excavate another 4000 gallon fiberglass coated steel UST (diesel tank) on 10/9/2003. 1/5/06: Case reassigned to Andersen. Reviewed the quarterly report for April - June 2005. There is a strong decrease in contaminants by natural attenuation. Max BTEX 2,855 (MW8) and max MTBE 110 (MW 8 and 9).1/12/06: Reviewed quarterly third 2005 quarterly report. Increase in contaminant concentration in the hotspot (MW-8 and MW12). Wait one more quarter and send and RAP required letter. Max BTEX 6,791 ppb (MW8) and max MTBE 145 ppb (MW8) 2/9/06: Reviewed fourth quarterly 2005 report. Fluctuating concentrations in MW-8. Max BTEX 3991 ppb and max MTBE 137 ppb. Sent RAP required letter. 4/6/06: RAP approved. Two closed-in-place 2,000 gallon tanks will be removed and soil excavated.4/27/06: Meeting with Verizon, NYSDEC, and EnviroTrac. Two closed in place tanks will be removed. There is old fill material and concrete remnants of old buildings in the ground. This site is adjacent to the Gowanus Canal.5/4/06: Access letter sent to envirotrac for MTA permit.5/11/06: Received first quarterly 2006 report. Excavation and tank removal planned for 5/15/06. Max BTEX 4,348ppb (MW8), max MTBE 61 ppb.8/25/06: One 2,000 gallon diesel and one 2,000 gallon gasoline previously abandoned USTs were removed in May 2006. Impacted soil was removed to limits of excavation (tieback wall of gowanus canal and retaining wall). A petroleum sheen was seen in water in excavation and 838 gallons of was were removed with a vacuum truck. Two endpoint samples collected, no VOC exceedances, some sVOC exceedances. Two monitoring wells were installed in the excavation (MW16 and MW17). Groundwater sampled on 6/15/06. Max BTEX 3,806 ppb in MW8, max MTBE 27ppb in MW17. Third quarter 2006 gw sampling scheduled for September. 11/27/06: Received July - September 2006 update report. Wells sampled on 9/11/06. Max BTEX 5,164 ppb in MW8. Fluctuating gw concentrations. This is the second sampling event since source removal. An RAP may be required after next sampling event.2/22/07: Reviewed update report. Wells sampled on 12/15/06. Max BTEX 1,648 ppb (MW8), max MTBE 46 ppb (MW17). Local treatment of MW8 may be required if it does not naturally attenuate.5/24/07: RAP required for groundwater treatment of MW8. Due 7/5/07.7/6/07: Received RAP for MNA until the end of 2007. "At that time, if the level of contamination warrants remedial action, the feasibility of chemical oxidation in the area of mw8 will be evaluated".8/30/07: Reviewed update report. Wells sampled on 6/8/07. Max BTEX 833 ppb (MW8), max MTBE 120 ppb (MW17). MNA until fourth quarter 2007. 7/2/08 - Carlson: Reviewed January - March 2008 update report. Wells sampled on 3/26/08. Max BTEX 1,848 ppb (MW8). Report states a workplan will be submitted under a separate cover. Emailed Tom Bosshard - what is the expected workplan submittal date.7/3/08 - Carlson: Received email from Tom Bosshard. RAP will be submitted by July 31, 2008.8/6/08 - Carlson: Approved Remedial Work Plan for the use of Regenox. Regenox will be injected into four new injection wells in the sidewalk adjacent to wells MW8 and MW12. 8/7/08 - Carlson: Received email from John Quatralo:"Labor negotiations are ongoing and the union is working without a contract since August 3, this may drag on for some time. That said, I am still trying to get the work done before the end of the month and will advise as to the actual scheduled date."8/25/08 - Carlson: Received OMMP report dated 8/25/08. Injection well installation scheduled for 9/9/08. Received email from Tom Bosshard : "Please note that baseline monitoring for parameters outlined in the OMMP will be conducted during the third quarter ground-water sampling event, which will be conducted during the week

of September 8th. We expect to conduct the RegenOx injection in late September or October, prior to the fourth quarter ground-water sampling event scheduled for December."Reviewed April through June 2008 Update Report. Wells sampled on June 20, 2008. Depth to water 4 - 9 ft. Maximum BTEX concentration 12,370 ppb (MW8).10/17/08 - Carlson: Reviewed July 2008 - September 2008 Update Report. Wells sampled on 9/7/08. Maximum BTEX concentration 720 ppb in MW12. Six injection wells installed and Regenox injected in September 2008. Monitoring wells MW8 and MW12 will be sampled in October 2008 to evaluate Regenox effectiveness.3/5/09 - Carlson: Reviewed October - December 2008 Quarterly Report. Regenox injected in November. Spike in MW8 may be from dissolution resulting from Regenox. Regenox injection planned again in May 2009.5/4/09 - Carlson: Reviewed update report. General decrease in contaminant concentrations. Another regenox injection planned in May 2009.8/20/09 - Carlson: Reviewed April 2009 through June 2009 Update Report. A third injection event was performed in May 2009. BTEX,tVOCs are still high in MW8. 12/18/09 - Carlson: Reviewed update report. EFR planned on December 10 to recover contaminants desorbed by Regenox.2/19/2010 - Carlson: Reviewed update report. EFR conducted in December 2009 prior to December sampling event. Impacted groundwater remains in MW8. Another EFR planned prior to March sampling event.5/13/2010 - Carlson: Reviewed update report. EFR on 3/3/2010. Wells sampled on 3/30/2010. Low dissolved concentrations. Another EFR event planned prior to June sampling event.8/27/2010 - Carlson: Reviewed April 2010 through June 2010 Update Report. EFR conducted from MW8. Spike in concentration in MW8. Quarterly EFR and groundwater sampling to continue.11/9/2010 - Breen. July through September Update report received from Environtrac. EFR extraction at MW-8 on 9-7-10. Next event scheduled for December. 2/17/2011 - Breen. Paper copy of October-December 2010 Update rpt received from Environtrac. 08/08/11: This spill case transferred from G. Breen to J. Kolleeny. Reviewed Update Rpt for Jan. thru March 2011 by EnviroTrac, submitted on 5/9/11 (in eDocs). Rpt gives results of 3/29/11 GW sampling event. High levels of contam continue to persist in MW-8, which had 7,410 ug/L total VOCs (down from 13,031 ug/L in Dec. 2010). Off-site up-gradient well MW-11 had 343 ug/L tVOCs (up a little from 322 ug/L in Dec. 2010), and up-gradient on-site well MW-12 had 401 ug/L tVOCs, up from 320 ug/L in Dec. 2010; contam in both MW-11 and MW-12 is primarily benzene (320 ug/L benzene in MW-11; 400 ug/L in MW-12). Rpt states that EFR events will continue at MW-8 on regular basis, with next EFR event scheduled for June 2011, and GW sampling to be conducted 2 or 3 weeks after that. Spoke with Tom Bosshard of EnviroTrac, who mentioned they found an unknown monitoring well across Union St. from MW-8, and wondered if I knew who installed it and if it would be OK for them to sample it for add'l up-gradient GW data. I could not find a nearby open spill case, but told Tom I see no reason not to sample well. I suggested that they should measure depth to bottom of well and determine screened interval to make sure well will provide reliable data. He said they would. Changed site priority ranking to P2, because site is in post-injection monitoring phase. - J. Kolleeny03/16/12: On 3/13/12, got phone message from Gavin Zollo of EnviroTrac asking that I review proposal in Sept. - Dec. 2011 Update Rpt to remove a number of monitoring wells from quarterly sampling program. I reviewed EnviroTrac's Update Rpts for April-June 2011, July-Sept. 2011, and Oct.-Dec. 2011, submitted 8/9/11, 11/18/11, and 3/13/11, resp. (all in eDocs). Rpts show no impacts in wells proposed

S103274088

for removal from quarterly GW mon. program, but increasing total VOCs in well MW-8 and to lesser extent in off-site wells MW-11 and MW-18 (across Union St. from MW-8). For June 2011 sampling event, MW-8 had 11,381 ug/L total VOCs, MW-11 had 439 ug/L tVOCs (MW-18, referred to in rpt as "unknown well," was not sampled, but rpt states that well will be inspected during Sept. 2011 event and if in satisfactory condition, will be sampled). In Sept. 2011, MW-8 had 12,671 ug/L tVOCs, MW-11 had 331 ug/L tVOCs, and MW-18 had 36 ug/L tVOCs. (Rpt notes that DEC conducted a spill search of area which did not reveal any open or closed spills that might explain presence of well MW-18; also says EnviroTrac requests that DEC conduct add'l review of properties up-gradient of site to northeast of Verizon site to try to find reason this well was installed, and states that it appears that an off-site source is impacting Verizon's "up-gradient monitoring well network.") For Dec. 2011 sampling event, MW-8 had 16,454 ug/L tVOCs, MW-11 had 423 ug/L tVOCs, and MW-18 had 343 ug/L tVOCs. Rpt recommends removing wells MW-3, MW-4, MW-6, MW-7, MW-10, MW-13, MW-15, MW-16 & MW-17 from quarterly GW sampling schedule; these wells would continue to be gauged for depth to water and presence of product on quarterly basis and would be sampled annually during September GW monitoring event. On 3/16/12, I sent email to Gavin Zollo of EnviroTrac: "Gavin, I've looked over EnviroTrac's Update Rpt for Sept. thru Dec. 2011 for this spill site, dated 3/13/12, and want to send out email approving recommendations to eliminate most on-site wells from quarterly sampling program but to continue to gauge them quarterly and sample them annually. Can you please provide contact info for your client, including name, position, address and email address? Also, looking back over last three quarterly status rpts, I notice that total VOC concentrations in problematic well MW-8 have steadily increased, from about 11,000 ug/L to over 16,000 ug/L. This is in spite of EnviroTrac performing quarterly EFR events on well and recently adding air sparging at several nearby wells that were installed for chem ox injections. Do you have any thoughts as to what might be going on at well MW-8? If you're going to suggest an up-gradient off-site source, I'm sorry but I don't buy it. First, even tho EnviroTrac's rpts refer to MW-8 as an off-site well, I don't consider it to be off site, just because it's in sidewalk. It's in immediate vicinity of Verizon's USTs that are known to have leaked. Second, concentrations in wells across street, MW-18 and MW-11, are much lower, which argues against an off-site plume reaching MW-8 from an up-gradient source. Third, as concentrations in MW-8 have increased, moderate VOC levels in wells across street have also increased, suggesting to me that they are responding to whatever is going on at MW-8; possibly there is some tidal effect from nearby Gowanus Canal smearing contamination in MW-8 over toward MW-18 and MW-11. Anyway, please let me know your thoughts on this, and please provide contact info for someone at Verizon." Gavin wrote back: "Jon, Please send all correspondence for any Region 2 Verizon facilities, including 318 Nevins Street, to Tom Bosshard. After a recent rearrangement of their env'tl group he is current Env'tl Manager for Verizon in NY area. His info is below:Thomas H. Bosshard, CPGEnvironmental Manager, Verizon Global EH&S Compliance501 North Ocean Avenue, Patchogue, New York 117720: 631-654-7920, F: 631-475-2217, C: 631-901-8272thomas.bosshard@verizon.comJeff Bohlen, who is out in field today, and myself will review other points mentioned in your email and get back with you next week. Thank you for expediting your review of current rpt prior to our next sampling

S103274088

event. We appreciate your efforts." - J. Kolleeny03/19/12: I sent email to Tom Bosshard of Verizon, cc to Gavin Zollo of EnviroTrac: "Dear Mr. Bosshard: I have reviewed Update Rpt for Sept. thru Dec. 2011 pertaining to this spill site, prepared by EnviroTrac Envt'l Svcs and submitted on 3/13/12. Rpt presents results of GW sampling performed at site in Dec. 2011, as well as historical GW sampling data. Based on data, EnviroTrac recommends removing monitoring wells MW-3, MW-4, MW-6, MW-7, MW-10, MW-13, MW-15, MW-16 & MW-17 from quarterly GW sampling schedule; these wells would continue to be gauged for depth to water and presence of free product on quarterly basis and would be sampled annually during September GW monitoring event. This recommendation is approved. However, DEC notes that contaminant levels in well MW-8, located in sidewalk along Union Street and in vicinity of removed gasoline & diesel USTs, have steadily increased over last three sampling events, from ~11,000 ug/L total VOCs in June 2011 to over 16,000 ug/L total VOCs in Dec. 2011. This increase has occurred in spite of quarterly enhanced fluid recovery events being performed on this well, plus recent addition of air sparging using several nearby injection wells installed for application of chemical oxidant. DEC requests that EnviroTrac review available historical soil data from UST removal and from install'n of monitoring and injection wells to evaluate possibility that residual soil contamination in this area may be acting as an ongoing source of GW contamination. If contaminant levels in MW-8 continue to remain elevated, add'l remedial actions may be required to address contamination. Please feel free to contact me if you have any questions." - J. Kolleeny03/20/12: Received email response from Gavin Zollo of EnviroTrac, with cc's to Jeff Bohlen of EnviroTrac and Tom Bosshard of Verizon Envt'l: "John, Per your request, attached is hydrograph of MW-8 with notes of significant events. As you can see, water table elevation has increased over last few years by approx 2-3 ft. A rise in water table appears to correlate with higher BTEX concentrations and following injection of RegenOx, BTEX apparently desorbed from soil resulting in higher BTEX concentrations as compared to previous levels (this is common with RegenOx and tapers off with time). I suggest we continue with EFR/Air Sparging schedule and evaluate BTEX levels after 6 months (following 3rd quarter sampling in September). If you have any questions, please contact me." I wrote back, with same cc's: "Gavin, Thanks for your comments and for hydrograph of well MW-8. It is very possible that rise in water table elevation and effects of RegenOx injections may explain increase in VOC concentrations in well MW-8. I agree with your suggestion that EnviroTrac continue with EFR/air sparging program and re-evaluate GW conditions after 3rd quarter 2012 sampling event." Email exchange is in eDocs, with hydrograph attached as last page. - J. Kolleeny07/05/12: Reviewed Update Rpt - Jan. thru March 2012 by EnviroTrac, submitted with transmittal sheet dated 4/13/12 and received 4/16/12 (in eDocs). Rpt states that enhanced fluid recovery was performed on worst well, MW-8, on 3/16/12, recovering 1,536 gals of GW, and portable air sparge system was also used to enhance recovery of residual soil vapors in vicinity of MW-8 by injecting air into surrounding injection wells IW-1 thru IW-3; effluent air had PID readings up to 31 ppm. GW samples were collected on 3/30/12 from wells MW-8, MW-9, MW-11, MW-12 and MW-18. Well MW-8 had 11,344 ug/L total BTEX (down from 12,018 ug/L in December 2011) and 17,528 ug/L total VOCs (up from 16,454 ug/L in December 2011); MW-11 had 344.5 ug/L tVOCs (down from 423.2 ug/L in Dec. 2011), MW-12 had 200 ug/L

S103274088

tVOCs (down from 261.1 ug/L in Dec. 2011), and MW-18 (which rpt refers to as "up-gradient") had 272.5 ug/L tVOCs (down from 343.4 ug/L in Dec. 2011). Well MW-18 seems to be cross-gradient to me, and contam there is likely due to tidal smearing from nearby Gowanus Canal. Rpt states that EFR events in conjunction with air sparging events will continue at MW-8 on quarterly basis, with next event scheduled for June 2012, followed by GW sampling 2-3 weeks later. - J. Kolleeny09/14/12: Reviewed Update Rpt April-June 2012 by EnviroTrac, submitted with transmittal sheet dated 8/20/12 (in eDocs). GW sampling on 6/28/12 showed worst well, MW-8, had 10,487 ug/L total VOCs (down from 17,528 ug/L in March 2012); well MW-11 had 501 ug/L tVOCs (up from 345 ug/L in March 2012) and well MW-18 had 341 ug/L tVOCs (up from 273 ug/L in March 2012). Rpt states that quarterly EFR events will continue to be performed on MW-8 in conjunction with AS events at surrounding injection wells, with next event scheduled for Sept. 2012; 3rd quarter 2012 GW sampling event will be conducted 2 or 3 weeks after EFR/AS event. Also, received phone call from Mark Godick of AKRF (914-922-2356), consultant to property owner (Verizon is tenant), who is trying to get NYC to rezone property. They plan to develop property with a bldg in a year or so; bldg will likely cover former UST area (but not sidewalk where MW-8 is located), and they will likely be excavating soil, perhaps dewatering, and installing vapor barrier beneath bldg (GW too shallow for SSDS). They will be doing a RAP for NYCOER related to this. We discussed remedial options for Verizon and whether re-development could interfere with spill cleanup, and agreed that this is unlikely since main residual impacts appear to be in sidewalk along Union St., not in former UST area. Mark will be in touch in future. - JK10/25/12: Met with Tom Bosshard of Verizon and Jeff Bohlen of EnviroTrac; Vadim Brevdo and Paul John of DEC also attended (sign-in sheet in eDocs). Verizon's lease expires at end of 2013, and they plan to close bldg by mid-December 2012. To expedite spill closure, they propose to excavate soil in sidewalk area around problem well MW-8 down to GW. I suggested they also apply oxidizing chemicals to GW in excavation; they agreed. They will prepare and submit work plan for excavation, separate from 3rd quarter monitoring rpt. - J. Kolleeny12/04/12: Reviewed Update Rpt July 2012 through Sept. 2012 by EnviroTrac, submitted under transmittal letter dated 11/28/12 (in eDocs). Rpt summarizes performance of EFR on well MW-8, and presents results of Sept. 2012 GW sampling event. EFR was done on Sept. 8, 2012, recovering total of ~1,135 gals of GW. Results of GW sampling on Sept. 25, 2012 show MW-8 had 7,147 ug/L total VOCs, down from 10,487 ug/L in June 2012; MW-11 had 381 ug/L tVOCs, down from 501 ug/L in June 2012; MW-12 had 330 ug/L tVOCs, up from 230 ug/L in June 2012; MW-18 had 92 ug/L tVOCs, down from 341 ug/L in June 2012. Rpt states that remedial alternatives for area of MW-8 are currently being evaluated; in meantime, quarterly GW monitoring and EFR events will continue, with next round scheduled for December 2012. - J. Kolleeny01/30/13: Reviewed Update Rpt Oct. thru Dec. 2012 by EnviroTrac, dated 1/23/13 (in eDocs). EFR was conducted on MW-8 on 12/11/12, with air sparging at nearby injection wells; during EFR with sparging, PID monitoring of effluent air stream at MW-8 gave readings up to 101 ppm. Vacuum measurements taken at nearby wells show no measurable vacuum influence; however, water levels in nearby wells decreased slightly, indicating creation of capture zone around MW-8. Total of 600 gals of water were recovered during 8-hr event. GW sampling on 12/28/12 showed significant decrease in VOCs in worst

S103274088

well MW-8, which had 2,690 ug/L total VOCs, down from 7,147 ug/L in Sept. 2012, and was 3rd consecutive quarterly decrease. Well MW-11 had 206 ug/L tVOCs (down from 381 ug/L in Sept. 2012) and well MW-12 had 331 ug/L tVOCs (~same as 330 ug/L in Sept. 2012). Rpt states that quarterly GW monitoring will continue, and that remedial plan to address area of MW-8 will be submitted under separate cover. - J. Kolleeny02/01/13: Reviewed Addt'l Remedial Work Plan by EnviroTrac, dated 1/31/13 (in eDocs). Work Plan proposes excavation of soil from vicinity of persistently most-contaminated well MW-8, in sidewalk along Union St adjacent to site, and application of RegenOxT and ORC Advancedr to excavation. Existing on-site monitoring wells will be abandoned, and any wells destroyed during excavation will be replaced for post-excavation GW monitoring, which will be performed and reported on quarterly basis. Work plan includes a Community Air Monitoring Plan (after request by DEC). I sent letter (in eDocs) to Tom Bosshard of Verizon, cc to Jeff Bohlen of EnviroTrac, approving plan but asking that end-pt soil samples be collected from excavation sidewalls if feasible, to document soil conditions at excavation limits. - J. Kolleeny08/07/13: Reviewed 4/29/13 Update Rpt Jan. thru March 2013 by EnviroTrac (in eDocs as "Post-Excavation Status Rpt"). Summarizes excavation of contam soil in sidewalk area along Union St. during Feb. 2013. Excavation done in two parts; from first area, two sidewall and one bottom end-pt soil samples were collected, results showed no significant residual impacts. In 2nd area, one bottom end-pt sample was collected (due to sheeting, no sidewalls could be collected); results again showed no significant residual impacts. Prior to backfilling, RegenOx and ORC Advanced were applied to both excavation areas. Well MW-8 (historically worst well) was destroyed during excavation but was reinstalled during backfilling. Total of 82.64 tons of soil were removed. After excavation, all on-site monitoring wells were properly abandoned (as previously approved by DEC). On March 29, 2013, off-site (i.e., sidewalk) wells MW-8, MW-9, MW-11, MW-12 and MW-18 were gauged and sampled. No free product detected. Results show MW-8 had 8,644 ug/L total VOCs, up from 2,690 ug/L in Dec. 2012; well MW-11 had 214.5 ug/L tVOCs, up from 206 ug/L in Dec. 2012. EnviroTrac states that increases are likely due to disturbance of subsurface by excavation and application of chem ox. Quarterly GW monitoring will continue, with next event to be in June 2013. - J. Kolleeny12/04/13: Reviewed 8/27/13 Update Rpt April-June 2013 by EnviroTrac (in eDocs). Results of June 2013 GW sampling event show well MW-8 had 4,052 ug/L total VOCs (down from 8,644 ug/L in March 2013), well MW-12 had 220 ug/L tVOCs (same as in March 2013), well MW-18 had 81 ug/L tVOCs (up from 37 ug/L in March 2013). EnviroTrac attributes tVOCs decrease in MW-8 to excavation of contam soil "source material" and subsequent chem ox application, states that well network will continue to be sampled on quarterly basis, in Sept. and Dec. 2013. - JK01/27/14: Reviewed 10/29/13 Update Rpt June-Sept. 2013 by EnviroTrac (in eDocs). Results of Sept. 2013 GW sampling event show well MW-8 had 4,378 ug/L total VOCs (up from 4,052 ug/L in June 2013), well MW-12 had 391 ug/L tVOCs (up from 220 ug/L in June 2013), well MW-18 had 9 ug/L tVOCs (down from 81 ug/L in June 2013). EnviroTrac notes that total BTEX in well MW-8 decreased from 1,983 ug/L in June 2013 to 1,814 ug/L in Sept. 2013, and attributes this to excavation of contaminated source material and subsequent chem ox/ORC application. Rpt states that well network will continued to be sampled quarterly, with Dec. 2013 event. - J. Kolleeny Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Delivery today to Monties Resturant in Brooklyn.Bottom of the tank has a pinhole leakPTC ((718) 624-4842; Anthony P. Lara) has been called and is at the site now pumping out the tank.11/7/2005 Sangesland confirmed that PTC completed a surface cleanup of the site. PTC submitted a proposal to replace the tank. Unknown what the condition under the slab floor is. Hold open until the full basement area is checked or until subsurface has been checked.12/8/05 - Raphael Ketani. I spoke to Anthony P. Lara of PTC. He said that PTC cleaned up the spilled oil and pumped out the two leaking 275 gal. tanks under the stairs. He gave an estimate to Frank Perone, the owner ((718)745-3576/(917) 805-6048), regarding what it would cost to remove the 2 tanks, replace them with one new 275 gal. tank, and do the below floor investigation. Mr. Perone told him he would get someone else. When I talked to Mr. Perone, he said that his brother had contacted Ferrantino Fuel ((718) 832-6700) for the below floor investigation. He said he would call me back regarding the extent of the oil spill investigation. I will send a "contaminated soil" letter to Mr. Perone at 1427 Bay Ridge Parkway, Brklyn., 11228-2212.12/9/05 - Raphael Ketani. I called Ferrantino Fuel and spoke to one of the supervisors there. He said Ferrantino didn't do a below floor investigation and he had no information if one was ever planned. Mr. Joseph Orechio (one of the owners; (718) 745-3576) called me to say that PTC had cleaned up the spilled oil in the tank vault under the street. He said the vault walls are cobble stone with a cement floor. He said only about 2 gals. was spilled. Mr. Orechio said that he switched his oil company to Blue Diamond. I told him that a soil investigation still needs to be done. He said he would get someone to do it.Anthony Lara of PTC called me back. He said that Mr. Orechio told him to do the soil investigation. Mr. Lara said that he will do 5 borings. One at each corner and one in the middle. He will take end point samples and send me the analyticals. Mr. Lara doesn't know whether there are any cracks in the vault floor, but he said about 20 gals. had leaked from the tanks.12/9/05 Ketani sent a "do work letter"12/20/05 - Raphael Ketani. Anthony of PTC called me to say that Mr. Orechio declined his services for the soil investigation. I called up Mr. Orechio, but could only leave a voice mail message.12/22/05 - Raphael Ketani. Mr. Issac Mungra of A. L. Eastmond & Son (718)378-7000 called to say that his company may be doing the soil investigation at the site. He will let me know if he gets the job, but first he has to inspect the tank vault. 12/28/05 - Raphael Ketani. I spoke to Mr. Mungra in person at another site. He told me that he plans to do one soil boring at each end of the tank and take soil samples at the bottom of the sump on the other side of the wall. I told him this would be sufficient for now.6/21/06 - Raphael Ketani. Today I received a FAX from Isaac of Eastmond with a floor plan for the 3 borings that were taken, the analytical results for the soil samples, and a detailed description of what type of work was performed. The analytical results showed no contamination was present

Tank Info:

Tank Number: 001  
Tank ID: 57989  
Tank Status: Closed - In Place  
Material Name: Closed - In Place  
Capacity Gallons: 275  
Install Date: 01/01/1988  
Date Tank Closed: 04/15/2009  
Registered: True  
Tank Location: Underground  
Tank Type: Steel/carbon steel  
Material Code: 0022  
Common Name of Substance: Waste Oil/Used Oil

Tightness Test Method: NN  
Date Test: Not reported  
Next Test Date: Not reported  
Pipe Model: C  
Modified By: NRLOMBAR  
Last Modified: 02/19/2010

Equipment Records:

A00 - Tank Internal Protection - None  
J02 - Dispenser - Suction Dispenser  
L09 - Piping Leak Detection - Exempt Suction Piping  
D06 - Pipe Type - Fiberglass Reinforced Plastic (FRP)  
G04 - Tank Secondary Containment - Double-Walled (Underground)  
C01 - Pipe Location - Aboveground  
E00 - Piping Secondary Containment - None  
H00 - Tank Leak Detection - None  
B01 - Tank External Protection - Painted/Asphalt Coating  
F04 - Pipe External Protection - Fiberglass  
K01 - Spill Prevention - Catch Basin  
B02 - Tank External Protection - Original Sacrificial Anode  
I00 - Overfill - None

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

**BROWNFIELDS:**

Program: BCP  
Site Code: 356610  
Site Description: This is a new BCP application and pertains to the Gowanus Village I, LLC-420 Carroll Street located at 420 Carroll Street, Brooklyn, Kings County. This site is approximately .92 acres in size.Current use of this site is commercial and future use of this site will be residential.Suspected contaminants at this site are chlorinated solvents, pesticides, SVOCs and PCBs. These contaminants are impacting the soil and groundwater. This BCP application is currently under review and the Department of Environmental Conservation will determine the application's approval and eligibility in conjunction with the Department of Health. 8/30/06: the BCP Application was denied.

Env Problem: Information submitted with the BCP application and additional information submitted regarding the environmental conditions at the site were reviewed. It was determined that due to lack of known contamination and the unlikely potential for contamination would not complicate the redevelopment of the site, the application was denied.

Health Problem: Not reported

DEC Memo: 2/9/05. J.Krimgold spoke to Linda Show. Phase 2 was done in preparation to enter in the State BCP. Robert Edwards is a DEC contact person (518-402-9767).3/30/07 - Austin - Trasferred to Patel for further review - end06/15/07-Hiralkumar Patel. went to site on 06/14/07. its an abandoned building. as per worker from neighbour, site had icecream factory.from property tax record, property owner:Gowanus Village I LLC34 4th AvenueBrooklyn, NY 11217-1927from NYS corporation and business entity database:Gowanus Village I LLCc/o Richard D. Marans, Esq.29 Broadway, Suite # 2400New York, NY 10006from ACRIS database:Gowanus Village I LLC700 Pacific StreetBrooklyn, NY 1121709/04/07-Hiralkumar Patel. spoke with Ms. Shaw, who reported spill. she mentioned that investigation was done as part of BCP program application. but application was rejected. Ms. Shaw will contact owner at Gowanus Village I LLC and someone will call from owner's/management office.Gowanus Village I, LLC owns three following lots under one project.a. 420 Carroll Street (Block #: 453, lot #: 1). alt. address: 434-440 Carroll Streetb. 430 Carroll Street (Block #: 453, lot #: 21). alt. address: 404-418 & 420-428 Carroll streetc. 153 2nd street (Block #: 967, Lot #: 1). alt. address: 322 3 avefound two BCP cases under name of Gowanus Village I LLC: - C224118 (for 420 Carroll Street site)- C224099 (for 430 Carroll Street and 153 2nd street site)BCP application C224118 was

MAP FINDINGS

430 CARROLL STREET (Continued)

S106704100

rejected on 08/30/06 with following reason:"1. site's known industrial and manufacturing history doesn't indicate that there was a sufficient disposal of contamination that would or may complicate the redevelopment of site;"BCP application C224099 was approved, but was terminated as owner never replied back.found following investigation reports from BCP application file C224118:1. Phase I, dated Feb. 16, 1999 - for 420 Carroll Street2. Phase II, dated Mar. 19, 1999 - for 420 Carroll Street3. Phase I, dated Dec. 31, 2004 - for 420 Carroll Street4. limited Phase II (adjacent properties), dated Mar. 1, 2005 - for 430 Carroll street and 153 2nd street5. subsurface investigation, dated Jun 28, 2005 - 420 & 430 carroll streetleft message for Sara Mirski (718-398-3200) at Boymelgreen developers, who applied for BCP program.  
\*\*\*\*\*phase II was done at 420 Carroll street site in 1999. abstract of Phase I and II reports:- three industrial buildings on-site: a two story and a three story industrial building on the front of the property and a single story warehouse behind the front buildings- during phase I, found 9 sealed floor drains in front buildings- review of sanborn maps indicated presence of a gasoline UST in parking lot- one 275 gal aboveground chemical storage tank noticed on the third floor of the front building, two 275 ASTs noticed inside boiler room and one 2000 gal AST noticed on the main floor of building- groundwater flow beneath the site is in a generally westerly direction as obtained from maps- prior to 1995, area of single story building was vacant and formerly utilized as a junk automobile storage area <----- two areas of concern were identified during Phase I; gasoline UST located in the parking area east of buildings and floor drains located in two story building on east side of the property <----- two soil borings were completed around tank location, borings were advanced from grade to water table- no PID readings were detected above background level and no soil samples were selected for analysis <----- one groundwater sample was collected from each borings- three floor drains (FD-1, FD-2 and FD-3) were identified in the two story building on east side of the property- drain for FD-1 discharges directly to subsurface soil. soil below drain were dry- drain for FD-2 was clogged with sludge, approx. one ft of sludge was removed and found pipe extending downward, discharge point could not be determined, sediments removed from drain was black and oily and had a strong pungent odor. sludge sample was collected- drain for FD-3 was connected to municipal sewar system- samples collected from drain 1 & 2- found contamination in sludge sample from FD-2 (Xylene: 7300 ppb, 1,2,4-Trimethylbenzene: 24,000 ppb)\*\*\*\*\*Limited Phase II was done at 430 Carroll street and 153 2nd Street sites. abstract of limited Phase II done in 2005:- Hydrotech did investigation- carroll street parcel is occupied by a Mister Softee-brand commercial icecream business and consists of a 1 story brick building with no basement- elevation of site is approx. 10-15 ft above sea level- regional groundwater flow beneath the site is toward the west, in the direction of Gowanus canal and Upper New York Bay <----- GPR survey was performed and no significant anomalies were noted- six soil probes were installed, three (HTE-2, HTE-3 and HTE-5) were installed on 2nd street parcel and three (HTE-6, HTE-7 and HTE-8) were installed in carroll street parcel (430 carroll st)- HTE-6 was installed at the area of concerned identified as a 275 gal waste oil AST and staining in the southwest portion of the parcel (430 carroll st)- HTE-7 was

MAP FINDINGS

430 CARROLL STREET (Continued)

S106704100

installed at the area of concerned identified as a 275 gal fuel oil AST in the eastern portion of the parcel (430 carroll st)- HTE-8 was installed in a former floor drain within the footprint of the building- max. PID (3,675 ppm) was measured at 2 to 4 ft at boring HTE-6 (at waste oil tank location)- sump pit was observed approx. 3 to 5 ft south of waste oil tank in southwest portion of carroll street parcel - petroleum staining was noted in the sump pit, on the waste oil tank and on the asphalt in the vicinity of both structures- due to the interior conditions of the sump pit, depth of pipe inside sump pit could not be determined- found contaminated sludge in sump pit- two groundwater probes (HTE-4: one in 2nd street parcel and HTE-6: one in carroll street parcel) were installed and one well (HTE-1: in 2nd street parcel) was sampled- groundwater probe HTE-6 was installed at the location of the waste oil tank and sump pit- depth to groundwater beneath the carroll street parcel was measured to 15 ft bg and beneath the 2nd street parcel was measured at 17 ft bg <----- no petroleum sheen or separate phase product was noted during sampling of any groundwater probe or well- found heavy SVOC contamination at HTE-2, HTE-3, HTE-5 (at 2nd street parcel with maximum at HTE-3), HTE-6 and HTE-7 (at carroll street parcel with maximum at HTE-7)- found VOC contamination at HTE-5 and HTE-8- found groundwater contaminated at HTE-1 (at 2nd street parcel)- found heavy groundwater contamination at HTE-6 (at carroll street parcel and close to waste oil tank and sump pit)soil analyticals from 2nd street parcel:

000Xylene-----12,000PID readings for HTE-6: 3162 ppm  
at 0-2 ft, 3675 ppm at 2-4 ft and 3175 ppm at 4-6 ft and found  
refusal at 6 ft\*\*\*\*\*subsurface  
investigation was done in June 2005 at 420 and 430 Carroll Street  
sites. abstract of subsurface investigation report:- during  
investigation installed three soil borings (GB-1/S, GB-2/S and  
GB-6/S: all on 420 carroll street), four monitoring wells (GB-1, GB-2  
and GB-3 on 420 carroll street and GB-4 on 430 carroll street) and  
five soil-gas probes (SG-1, SG-2 and SG-3 on 420 carroll street, SG-4  
and SG-6 on 430 carroll street)- soil probes were sampled from ground  
surface to depths ranging from 8 to 12 ft bg- olfactory evidence of  
petroleum constituents and low level of organic vapors ranging from  
10 to 50 ppm were encountered in soil samples obtained from GB-6/S  
(on 420 carroll street)- soil vapor samples were collected 2 inches  
below concrete slab in SG-1 through SG-4 and 4 ft below the surface  
at SG-6 <----- few SVOC compounds found above limit in soil  
sample from GB-1/S at 6-8 ft bg- no VOC contamination found in any  
soil or groundwater samples- no contamination found in soil gas  
samplesummary of above reports:- no PID readings found in two  
borings around suspected location of gasoline UST at 420 carroll  
street site- soil from only two sides of gasoline UST was screened-  
found contaminated sludge in floor drain 2 at 420 carroll street  
site- found SVOC contamination in soil sample (HTE-3) at 153 2nd  
street site- found chlorinated compounds in soil sample (HTE-5) at  
153 2nd street site- found chlorinated compounds in groundwater  
sample (HTE-1) at 153 2nd street site- found SVOC contamination in  
soil samples (HTE-6, HTE-7 and HTE-8) at 430 Carroll street site-  
found Xylene contamination in soil sample (HTE-8) at 430 Carroll  
street site- found heavy VOC contamination in groundwater sample  
(HTE-6) at 430 Carroll street site- HTE-6 sample was taken in area of  
aboveground waste oil tank and sump pit at 430 Carroll street  
site.09/14/07-Hiralkumar Patel. left message for Mr. Mirski (BCP  
applicant), for owner's information.09/17/07-Hiralkumar Patel.  
received email from Ms. Shaw stating that property is for  
sell.09/26/07-Hiralkumar Patel. sent email to Ms. Shaw requiring  
property owner's information.09/28/07-Hiralkumar Patel. received  
property owner's information from Ms. Shaw.property owner:Gowanus  
Village I LLC.Attn.: Sara MirskiBoymelgreen developers752 Pacific

Shaw LLPPh. (585) 546-8430Fax (585) 546-4324email:  
lshaw@nyenvlaw.com10/01/07-Hiralkumar Patel. spoke with Ms. Mirski to  
confirm property owner's information. she mentioned that site 153 2nd  
Street (aka: 332 3rd Ave.; Gowanus Village I Power Plant site) is  
included under current active brownfield cleanup program. spoke with  
Ms. Shaw (Ms. Mirski's attorney) regarding current active BCP file.  
she mentioned that 153 2nd Street site is currently under BCP #:  
C224099, but this BCP file only includes site at 153 2nd Street. it  
doesn't include site at 430 Carroll Street.need further investigation  
for sites 420 & 430 Carroll Street.10/02/07-Hiralkumar Patel. left  
message for Mr. Edwards in DEC central office as he is listed as  
project manager. received email from Mr. Edwards confirming that site

at 153 2nd street is currently under active Brownfield program. other  
two sites were dropped.10/05/07-Hiralkumar Patel. sent letter to Ms.  
Mirski requiring soil and groundwater delineation, site specific  
groundwater flow direction, submission of PBS application (as had  
2000 gal AST, 275 gal AST and unknown size gasoline UST at 420 carroll  
street and a waste oil tank at 430 carroll street), endpoint soil  
samples, surrounding area site map and RAP based on investigation  
results. also asked for installation of vapor barrier and SSDS, if  
site development occurs. letter emailed to Mr. Mirski and Ms.  
Shaw.10/22/07-Hiralkumar Patel. received email from Jason Hayes.  
spoke with Jason at Langan. he asked about extension of deadline.  
explained Jason that the department requires delineation work started  
while they are dealing with BCP program to include sites. asked Jason  
to submit a work plan including scaled site map. aksed him to include  
locations of all tanks and previous borings  
(soil/groundwater/soil-gas) on same map.Jason J. Hayes Langan  
Engineering & Environmental ServicesPh. (212) 479-5427 (O) (917)  
859-4908 (C)Fax (212) 479-5444 email:  
jahayes@Langan.com11/07/07-Hiralkumar Patel. spoke with Mr. Hayes. he  
just finished work plan and will email it.11/13/07-Hiralkumar Patel.  
received email from Mr. Hayes with proposed work plan. abstract:-  
eight soil borings will be advanced to water tablebased on previous  
sampling locations during previous studies, add three more sampling  
points than proposed. sent updated sampling plan to Mr. Hayes in  
email. asked Mr. Hayes to submit modified plan with added sampling  
points on site map.11/26/07-Hiralkumar Patel. spoke with Mr. Hayes.  
asked him to submit modified site map.12/04/07-Hiralkumar Patel.  
received modified site plan with added sampling points. sent email to  
Mr. Hayes asking submission of investigation report by Jan. 15,  
2008.01/31/08-Hiralkumar Patel. left message for Mr.  
Hayes.02/15/08-Hiralkumar Patel. received call from Mr. Hayes. after  
submitting proposals, he never received call from owner and he hasn't  
performed any work at the site.spoke with Ms. Mirski. she mentioned  
that under Gowanus LLC., they transferred their interest to Mr. Katan  
and now Mr. Katan is property owner/manager. Ms. Mirski asked to  
contact Mr. Katan. Isaac KatanGowanus Village I LLC.592 Pacific  
Street, Brooklyn, NY 11217Ph. (718) 855-7444 (O) (917) 742-7444  
(C)email: tj@katangroup.comspoke with Mr. Katan. he mentioned that  
they hired Hydrotech for required work and just signed contract.  
asked Mr. Katan to submit work plan by Feb. 26, 2008 and  
investigation report by March 31, 2008. Mr. Katan will talk to Mark  
Robins in Hydrotech and ask him to call. sent email to Mr. Katan with  
such requirements.HydrotechMark RobbinsPh. (631) 462-5866 (O)email:  
mrobbins@hydrotechenvironmental.com02/20/08-Hiralkumar Patel. left  
message for Mr. Robins at Hydrotech.02/26/08-Hiralkumar Patel.  
received call from Ms. Saha, project manager at Hydrotech. will  
submit work plan.Yash SahaHydro Tech Environmental, Corp. Ph. (718)  
636-0800Fax (718) 636-0900email:  
ysaha@hydrotechenvironmental.com02/27/08-Hiralkumar Patel. received  
work plan from Hydrotech. abstract- eight borings will be installed-  
four borings will be converted into permanent groundwater monitoring  
wells- borings will be installed to an anticipated depth of approx.  
12 ft, refusal or groundwater table- two soil samples will be  
collected from each soil probe; deepest dry soil sample and sample  
with the highest PID- groundwater samples will be collected from soil  
boring, if contamination hit groundwaterproposed boring locations are  
not in area where containation found during earlier studies.

S106704100

02/28/08-Hiralkumar Patel. sent site map with changes in proposed boring/well locations. asked Ms. Saha to submit revised work plan with modified map.spoke with Ms. Saha. she mentioned that they are planning to stick with 8 borings proposal from Langan. based on previous investigation reports, remove few boring locations from proposed plan. asked Ms. Saha to analyze groundwater for chlorinated compounds also as found some chlorinated compounds in previous study. also asked to trace end of floor drains at 420 Carroll street and to take soil/groundwater sample where floor drain ends (as found contaminated sludge in floor drain # 2). mentioned to Ms. Saha that proposed permanent well at location MW-4 is not necessary, but the department definitely requires soil and groundwater sample at boring SP#4 (at new location as shown in map) as it is downgradient from sump pit area (based on regional groundwater flow direction which is towards the west).sent another email to Ms. Saha with change in proposed boring/well locations. remove some proposed location, move some proposed locations and add some locations. asked to submit revised work plan by end of March 3, 2008.received revised work plan with following changes:- will install eight soil probes and one groundwater probe- if groundwater sample from probe found contaminated then covert boring to permanent well- will trace end of drains and will take soil samples at end of drains02/29/08-Hiralkumar Patel. sent email to Ms. Saha and Mr. Katan, with work plan approval. asked to submit investigation report by April 4th, 2008.03/20/08-Hiralkumar Patel. received call from Ms. Saha. they tried to install monitoring well near sump, but due to heavy rain they could not install, they will try next week. asked to extend deadline for report submission. approved Ms. Saha's request and asked to submit report by April, 14, 2008.04/14/08-Hiralkumar Patel. received call from Ms. Saha. they finished investigation work except for one monitoring well at sump location. Ms. Saha mentioned that sump is filled with water and owner is waiting for tenant to empty that sump. asked Ms. Saha to contact owner regarding installation of well and submission of complete investigation report by next week.left message for Mr. Katan.04/25/08-Hiralkumar Patel. received email from Ms. Saha. they have scheduled well installation next week and planning to submit complete report by May 10, 2008. sent email to Ms. Saha approving her request for deadline extension.05/08/08-Hiralkumar Patel. received email from Ms. Saha. she will submit complete report by May 22nd, 2008.07/01/08-Hiralkumar Patel. received investigation report from Hydrotech. abstract:- total of eight soil probes (SP-1 through SP-8) were installed- borings SP-1 through SP-4 were installed in 420 Carroll Street- boring SP-4 was installed in the vicinity of the inactive floor drain in the northeastern portion of the warehouse; end of this floor drain was traced and found to end at the city sewer line; due to proximity of the drain pipes to the main sewer line and building structures, no soil sample could be obtained from drain end (floor drain where found contaminated sludge during previous investigation) <----- soil probes SP-5 to SP-8 were installed at 430 carroll street- soil probe SP-8 was installed in the vicinity of the sump pit, located in the southwestern corner of the parking lot (where high VOC contamination found in groundwater, previous HTE-6 boring) <----- inactive floor drain indentified in the northern portion of the building during previous investigations could not be accessed due to debris, concrete rubble and a trailer in the vicinity- all soil probes were installed until clean soil or groundwater was encountered- soil

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

UNION STREET BRIDGE (Continued)

S108764295

Contact Phone: (646) 602-5850  
DEC Memo: 09/06/07-Vought-Called Peter Burger and left message to return call to DEC with owners info. 10/22/07-Vought-Received call and spoke to Burger. During geotech boring on western approach near western bulkhead, soil VOCs found at depth of 30' including benzene (1400ppb, ethylbenzene 10,000ppb), naphthalene (47000ppb). Groundwater at depth of 20' and soil contaminated below groundwater however no samples collected above groundwater as boring was geotech. STV is working with ADT and soil cuttings were drummed. Overall project requires Basis of Design Report for Union Street Bridge to be submitted to NYC. If bulkheads are reconstructed then soil contamination will be addressed. Geotechnical boring was not completed. No adjacent USTs but coal tar facilities across canal to the east. DEC requires : 1)delineation of soil and groundwater. Bulk fueling facility 500' to the north that has above ground UST. No further work will be performed until DOT authorizes 40 hour crew to perform additional geotech borings which will include additional borings on eastern approach. Berger will send address for contaminated soil letter. 01/14/08-Vought-Current file review by Vought. Received email from Burger on 10/22/07 and mailing address is: Mr. Balram Chandiramani, P.E. Director - Moveable Bridges New York City Dept. of Transportation 2 Rector Street - 5th Floor New York, NY 10006 Attn: Mr. Frank K. Kodah, P.E. Project Manager Phone: (212) 788-1774 Vought called Burger (646-602-5850) for update prior to sending CSL with above requirements. Vought sent out CSL with two month due date and cc to EP Burger. Vought received call from Peter Burger and no site activity since we last spoke. Vought faxed copy of CSL to Burger Fax:(646)654-1861. 01/18/08-Vought-Received call from John Kurre (NYCDOT Division of Bridges-212-788-2083 fax:212-788-1848). John looking to discuss site. Bridge goes over Gowanus Canal and borings done for geotech to examine possible bridge replacement. Soil contamination in middle of street and no NYCDOT petroleum facilities nearby. Right next to Bridge is Bayside Fuel Depot which maybe possible source. Site plan will be submitted to DEC to examine proximity to Bayside Fuel Depot and their possible source attribution and hence responsibility for further investigation.6/24/10 - Raphael Ketani. I received the spill case in early June. I tried to contact Peter Burger (646) 602-5850 of STV, but could only leave a message. I tried to contact Frank K. Kodah, P.E., Project Manager (212) 788-1774, but I reached the NYC Dept. of Health. I tried to contact John Kurre of the NYC DOT (212) 788-2083, but the number was out of service.I reviewed the NYC DOT 1/31/08 response letter to the DEC's 1/14/08 letter to Mr. Chandiramani of the NYC DOT. Mr. Kurre had explained that the DOT didn't have any oil storage facilities on site and didn't have any plans to do further soil borings. However, the Bayside Fuel Depot was next door. The STV report describing the one geotechnical boring, DN-B-01, was attached to the letter.I drafted a letter to Mr. Chandiramani requesting an update regarding plans for refurbishing the bridge. The letter was sent to Randall Austin, Chief of the Spills Unit, for his approval.The letter was approved and was sent out today.7/1/10 - Raphael Ketani. The letter that I had sent to Mr. Chandiramani was received unopened. It was marked "Forward Time Expired - Return to Sender." It is unknown what the problem was as, according to the 2008-2009 NYC Green Book, Mr. Chandiramani is still the director of the Movable Bridges section. I will send the letter again, but, this time, I will address it just to Mr. Chandiramani.7/19/10 - Raphael Ketani. I received a letter today from

UNION STREET BRIDGE (Continued)

S108764295

Ajit Thakore, PE of the NYC DOT (212) 839-4108. He stated that the bridge reconstruction project is in the preliminary design phase. The plans will be submitted sometime in December 2010.12/2/10 - Raphael Ketani. I spoke to Mr. Thakore. He said that the bridge refurbishment project has been delayed by 9 months due to budget issues. He said that he expects to receive the plans sometime during the middle of next year.7/26/11 - Raphael Ketani. I tried to contact Mr. Thakore (212) 839-4108 regarding progress with the bridge refurbishment project, but I could only leave a message.7/27/11 - Raphael Ketani. Mr. Thakore called me back. He said that the plans for the bridge have changed substantially. Now, the NYC OMD wants the NYC DOT to replace the bridge using a fixed construction design, not a draw bridge. The project is being reviewed by DOT staff and new plans are being drawn up. The project has to be coordinated with the Gowanus Canal superfund cleanup project which is scheduled to be completed during 2016. The construction is scheduled to begin 2019, barring objections by stakeholders and the general public during the review process.8/4/11 - Raphael Ketani. I spoke to Mr. Thakore (212) 839-4108. I asked him whether the replacement of the bridge will involve the driving of piles and the digging up of substantial amounts of soil. Mr. Thakore said that there will be a lot of digging in order to install concrete foundations for the bridge. He added that the west foundation will be right in the area of the boring. I asked Mr. Thakore whether he could send the DEC some preliminary plans. He said that he had a completed design report and that he will send it by e-mail.Mr. Thakore sent me a short informational document consisting of 4 pages. It wasn't a report, but rather a section of a report which described the state of the bridge, the impact to the community of closing the bridge and a little bit about the construction involved in replacing the bridge.Ajit Thakore, P.E., Movable Bridge Group, NYC DOT, 55 Water Street, 4th Floor, NY, NY, 10041 (athakore@dot.nyc.gov)8/19/11 - Raphael Ketani. I am closing the spill case effective today. The basis for closing the case is listed below:1) the oil spill did not come from the bridge itself as it does not contain product.2) as a utility, the bridge falls under the utility exemption whereby they are not required to remove the contaminated soil, nor specifically do environmental remediation for an oil spill, except if a piece of construction machinery or a vehicle happened to leak oil at the work site.3) they are going to install concrete foundations at both ends of the bridge. So any contaminated soil that is found in the vicinity of the geotechnical boring will be removed anyway.4) Mr. Thakore has been informed that he must make a wetlands permit application to the NYS DEC before work starts and that he must contact the Division of Environmental Permits in order to make application. He has informed the Department that the NYC DOT will do so in 2015 or 2016.5) The Division of Environmental Permits has been informed by the Spill Prevention and Response Bureau that the Union Street Bridge project will take place and that Mr. Thakore has been informed that the NYC DOT has to approach the Division of Environmental Permits in order to make a wetlands application.6) John Cryan, Regional Permit administrator, has informed Randall Austin, Chief of the Spill Prevention and Response Unit, that staff from his unit will look for the application or contact from the NYC DOT when the time comes to make an application in 2015 or 2016.Later, Mr. Cryan sent me an e-mail that the NYC DOT sent in an application to replace the dolphins for the bridge, but not the whole bridge (applic. #2-6103-00757).

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "TIPPLE" Prior spill number was 9605780 which said that the site was a demolition waste transfer station and a fuel storage area. The area was contaminated with petroleum soil & groundwater impacts. In approx 2001 two large residential condos were built on the site with an open spill number. The spill case was closed in early 2003 for "no recent activity" 4/26/2004 TradeWinds Environmental found a UST on site between 4,000 and 6,000 gal (#6 oil). The tank is being pumped out, but the tank is too close to the condo foundation to be removed safely. Steve Gordon would like to talk with the DEC rep about remediation options 6/23/04 Tipple spoke with Doug from Tradewinds site status requested 6/24/04 tipple spoke with owner, S. Gordon formerly with Tradewinds and D. Yudelso esq. The owner is currently looking into entering into a Brownfields Cleanup. Will keep DEC updated// tanks removed were encased in concrete and photos were taken/ Gordon stated that no soil contamination was observed adjacent to the tanks at the time of removal 06/20/06: This spill is

transferred from Mr. Koon Tang to Q. Abidi. Called to Jan Belessimo, Trade Wynds Environmental at (800)282-8701 she said that she will talk to her Project Manager regarding spill and she will call me back. -QA06/30/06: Contacted to Ms. Jan Belessimo because she faxed me only waste manifest of the spill She will talk to her supervisor Mr. R.D. Baldwin to send a clean up confirmation letter to me. -QA07/05/06: Called to Ms. Jane Belessimo and reminded her to talk to her boss for cleanup confirmation letter. -QA07/25/06: Contacted Jane, she said she will fax me today the closing confirmation letter. -QA08/09/06: Called Ms. Jane Belessimo regarding spill closing confirmation letter and left message to call me back. -QA09/12/06: Mr Argie Balgwin called me and said after talking to his attorney that he will send me a confirmation letter to close the spill. -QA10/25/06: Called Mr. Argie Balgwin (516)779-7824 and left message to call me back regarding closing confirmation letter for the spill. -QA11/16/06: Called Jan Belessimo about information of spill, she said that she will talk to her boss and call me. -QA11/27/06: Called Jan Belessimo about information of spill and left message to call me back. -QA12/14/06: Called Ms. Jan Belessimo regarding information of the spill. She said that she had already sent to me whatever waste manifest report Tradewinds Environmental has. Some other party worked for this spill. She gave attorney's name and phone number. Mr. David Yudelso (attorney) (212)421-2150. -QA12/18/06: This spill is being handled by Department's of Brownfield Program (Central Office). I don't need not to work on this spill. -QA05/14/07: Called Mr. David Yudelso at (212)421-2150 to discuss the spill. He was not there, left message to call me back. -QA05/18/07: Called Mr. David Yudelso (Attorney) at (212)421-2150 to discuss if this spill has been terminated from BCP program or not. He said, he will contact client and find out about it then he will call me back. -QA12/04/2007: This spill case was transferred to A. Doronova. AD02/08/2008: Called and left messages to A. Baldwin, D. Yedelso and spoke with Ms. Jan Belessimo of Trade-Wynds Env. regarding this site. She was not sure if their company is still involved with the site. She will call back later with some information. AD03/03/2008: Spoke with J. Belessimo of Trade-Wynds Env., she told me that they no longer work for this site. Called and left a message to D. Yedelso. AD03/04/2008: Received a call from D. Yedelso. He represents both property seller and potential buyer. Contract to be signed sometime in summer 2008. The buyer plans to redevelop the site. Neighbor property on 363 Bond Street which is currently under NYSDEC spill #0501697 is also in this contract but represented by other parties. Spoke with J. Kolleeny of DEC regarding this site. AD03/13/2008: Spoke with D. Yedelso regarding a submission of all investigation reports and scheduling a meeting with all involved parties to discuss the site situation and remediation. Possible STIP. AD03/20/2008: Received an email from John Grathwol from Albany. Local community group - FROGGs was concern about the site redevelopment and John scheduled a phone call for March 21, 2008 with FROGGs' representative to answer their questions. Sent an email to V. Brevdo of DEC with brief site status update, which was then forwarded to J. Grathwol. AD03/25/2008: Left a message to D. Yedelso regarding reports submission. He returned my call later, said that all reports are ready and he will email them to me today or tomorrow. Informed him about concerns from local organization. Told him that after I finish to review reports we will schedule a meeting. AD03/28/2008: Received old reports via email, downloaded them to eDocs. Will review. AD10/03/2008: Spoke with D.

Yudelso - attorney regarding situation with this site. He told that the owner wants to reapply for BCP project and that they applied for re-zoning, which will be decided in April, 2009. AD10/15/2008: Received an email from Mr. Yudelso saying: "Ainora - I am having a comprehensive report prepared by ELM for the Carroll Street/Bond Street sites which will show all existing data. I will forward it as soon as it is done. Dave" AD10/22/2008: Received an inquiry from Vadim Brevdo of DER regarding status of this spill. Inquiry came to Commissioner from City Councilman DeBlasio. Informed Vadim about situation with this case. Spoke with D. Yudelso. Env. Liability Management (ELM) preparing a summary report with conclusions and recommendations for remedial actions. Project manager - Mimi Raygorodetsky. AD10/27/2008: Sent an email to D. Yudelso saying: "Dear Mr. Yudelso, As per our previous phone conversation, please be advised that the Department requests to expedite the submission of the summary report for the above-referenced sites. The report should be submitted no later than November 14, 2008 and should include a remedial action plan. Feel free to contact me if you have any questions or comments. Sincerely, Ainura Doronova" AD11/13/2008: Called and left a message to D. Yudelso regarding the report submission. later received an email from him saying: "Ainura- got your voicemail but I am in a meeting. ELM is working on the report since your request and we should have it very shortly. I will find out the exact date and I will respond to you. Dave" and "Ainura - The effort to compile and synthesize all the prior work is taking a little longer than expected to make it understandable. I believe we will deliver the summary report next weds. Please let me know if this presents a problem so that we can avoid having anyone work overnight or on the weekend!!!" Postponed the report submission till November 21, 2008, but said that it is final. AD11/21/2008: called and left a message to D. Yudelso regarding the report submission. Later in the day received an email from M. Raygorodetsky saying: "Ms. Doronova, On behalf of Dave Yudelso of Sive, Paget & Riesel and Toll Brooklyn, LP, please find attached an electronic copy of the Remedial Investigation Report on Conceptual Remedy for the Toll Brooklyn, LLC site in Brooklyn, NY. A hard copy (with a CD containing previous studies) will be delivered to your office via Federal Express on Monday. The site is comprised of three adjacent parcels of land that are subject to three active spill listings: 363 Bond Street (Spill # 05-01697) 365 Bond Street (Spill # 04-07393) 400 Carroll Street (Spill # 04-00876) We look forward to working with you to remediate this site. Regards, Mimi Raygorodetsky | Associate Tel: 212.962.4301 ext.311 | Fax: 212.962.4302 | Mobile: 917.952.9906 mraygorodetsky@elmofny.com " DL the report to eDocs. Will review. AD Reviewed the report. It includes conceptual RAP with proposal to excavate contaminated soil. AD01/05/2009: Spoke with M. Raygorodetsky regarding submission of the actual RAP. She told me that their company does not have contract yet to perform the remediation. She will speak with the owner and then call back. AD01/12/2009: Received an email from M. Raygorodetsky saying: "Hello Ainura, We spoke last week about the timing of submission of a RAWP for the Toll Gowanus Site, which is subject to three spill numbers: 0501697, 0407393, and 0400876. I've spoken with the client, Toll Brooklyn, LLC and the environmental attorney, Dave Yudelso of Sive Paget & Riesel, PC about the timing of RAWP preparation. We will be finishing our draft of the RAWP this weekend providing it to our client for review. We hope to have a RAWP for you the week of January 19. Please let Dave Yudelso or me know if you

have any comments or questions. Mimi Mimi Raygorodetsky | Associate Tel: 212.962.4301 ext.311 | Fax: 212.962.4302 | Mobile: 917.952.9906 02/09/2009: On January 26, 2009 received this email from M. Raygorodetsky saying: "Hello Ainura, I wanted to let you know that we were slightly delayed in getting our RAWP submission to you last week. We are pulling together the final loose ends on the RAWP and hope to have something for you by the end of the week. I apologize for the delay. Thanks, Mimi Raygorodetsky" Received RAP by Env. Liability Management. DL to eDocs. Will review. AD Reviewed the RAP. It proposes excavation of the hot spots in the vicinity of the well MW-5 and soil boring SB-1 down 2 feet into the water table. Excavation in these areas will advance laterally in all directions until no further evidence of free product remains. ELM also proposes to implement in-place soil stabilization or chemical oxidation in areas where elevated concentrations of BTEX and SVOCs are present. According to a Phase II Site Investigation report for 400 Carroll Street, 3 1,500-gallon UST were removed from the site in 2004. No UST closure report was submitted to DEC. Location of the former UST area is not depicted at the site's plan. AD03/17/2009: Called and left a message to M. Raygorodetsky (MR) of ELM. AD03/20/2009: Called and had a conference call with MR and D. Yudelso (attorney) regarding the submitted RAP. Asked them, if there are any residential buildings in the vicinity of the site. Some of them are one block away from the subject property. Also, requested to submit a Figure 5 from the RAP with locations of the 3 former 1,500-gallon USTs, which were removed in 2004. Number of injection points for the oxidation will be given later in an addendum to the RAP, if this approach will be selected. GPS to identify any other USTs will be implemented after buildings on the site will be demolished. Will discuss this site with J. Kolleeny. AD03/25/2009: Discussed the RAP with J. Kolleeny. He indicated a contaminated area which should be included in remediation. Asked him about proposed soil stabilization method. Will wait for the submission of the requested information. AD04/08/2009: Called and left a message to D. Yudelso. Spoke with him later. Requested to submit all UST closure reports for all applicable parts of the project. Also asked if any remedial actions are planned for area of soil boring SB-3 on 363 Bond Street, which indicated high petroleum contamination. AD04/27/2009: Called and left a message to D. Yudelso. Requested to expedite the submission of the data. Spoke with him later. AD04/29/2009: Received an e-mail from D. Yudelso saying: "Ainura, I know that you asked for information on the tank removal, a registration correct and information about remedial response for sb3. Did I miss anything? I want to send a letter in respectfully requesting more time (a few weeks) to gather the information because the Superfund listing proposal for the site has all team members tied up and the project may die if we don't focus on that. Dave David S. Yudelso Partner Sive, Paget & Riesel P.C. 460 Park Avenue New York, NY 10022 917 295 6449" Sent him a reply, stating all information, which should be submitted to us. AD05/13/2009: Received a letter from D. Yudelso with a request to postpone data submission till June 15, 2009. Approved the request. AD06/18/2009: Called and spoke with D. Yudelso regarding the requested data submission. He told me that they have prepared the report and will send it with today's mail. AD06/19/2009: Received an e-mail from Basil Borisov of ELM saying: "Ms. Doronova, Attached is the Addendum to the Remedial Action Plan for the 363-365 Bond Street and 400 Carroll Street properties in Brooklyn, NY. A hard copy of the Addendum is being sent

to your offices by FedEx.If you have any questions or concerns, please don't hesitate to contact us or David Yudelson at Sive Paget & Riesel.Sincerely,BASIL BORISOV | Project ManagerTel 212.962.4301 ext 304 | Fax 212.962.4302 | Cell 646.895.2943"DL pdf copy to eDocs.

AD06/23/2009: Received hard copy of the Addendum to the RAP. Will review. AD06/24/2009: Reviewed the Addendum to the RAP.It proposes remediation in the vicinity of hot spot SB-3 as was requested by DEC. The addendum also includes a plan of 400 Carroll Street with locations of former USTs field. While no formal end-point sampling was performed as part of UTSs removal, ELM had subsequently installed one soil boring SB-9, one monitoring well MW-1 and one test pit TP-5 in the former USTs area as part of the Phase II ESI. Excavation in these areas will advance laterally in all directions until no further evidence of free product remains. ELM submitted more detailed explanation of in-place soil stabilization method, which was proposed for areas where elevated concentrations of BTEX and SVOCs are present. A bench-scale mixing study will be performed to select site-specific stabilization mix. Discussed the plan with J. Kolleeny of DER and possibility of excavation in the area of SB-3. Called and spoke with Jim Harrington - Chief Technology Section of Division of Environmental Remediation, Albany regarding application of soil stabilization method in NYS. Changed site priority from P0 to P1. AD06/25/2009: Sent to Mr. Harrington the Addendum to the RAP via e-mail for review. AD07/02/2009: Met with Mr. Harrington to discuss the feasibility of application of the soil stabilization method for this particular site. His opinion was that the site is a good candidate for the soil stabilization. A work plan for bench-scale mixing study should be submitted to DEC for review and approval. AD07/22/2009: Called and spoke with David Yudelson (attorney) regarding excavation of SB-3 area and a work plan for bench-scale mix study. He agreed to make these changes and asked for an e-mail request from DEC. He also mentioned that soil stabilization methods was approved by MGP of DEC (Albany) for Nyack MGP Site. Will send him e-mail. AD07/23/2009: Sent the e-mail to D. Yudelson with the following remarks to the Addendum to RAWP:- A work plan for bench-scale mix study should be submitted to DEC for its review and approval; - An excavation should be proposed for the area in the vicinity of SB-3 instead of in-situ remediation.Also, asked to provide me with information on the MGP site, where the soil stabilization method was approved by DEC. AD09/02/2009: Called and left a message to D. Yudelson regarding submission of bench-scale mix study WP. AD09/03/2009: Received an e-mail from Mr. Yudelson which states that ELM is working on the work plan. AD09/22/2009: Received an e-mail from Mr. Yudelson that he had received the work plan from ELM and now is in a process of reviewing it. The WP will be submitted to DEC shortly. AD10/15/2009: Received an e-mail from D. Yudelson with attached work plan for bench-scale mixing study. DL to eDocs. Will review. AD11/06/2009: Reviewed the work plan for bench-scale study. Discussed the work plan with Jim Harrington of DER Albany. Mr. Harrington made a few comments to the submitted work plan. The necessary changes to the proposed work plan will be required from the consultant before the work plan approval. AD11/10/2009: Called and left a message to Mr. Yudelson regarding the work plan modifications. AD01/20/2010: Called and spoke with D. Yudelson regarding the revised work plan for bench-scale mixing study. Requested to expedite the submission of the plan. He will contact ELM and get back to us. AD01/28/2010: Received an e-copy of the revised work plan. DL to

edocs. Will review. AD02/02/2010: Reviewed the revised bench-scale mixing study work plan for the Toll Brooklyn Site, and it seems that all the requested changes were made. AD02/03/2010: Forwarded the work plan to Jim Harrington. AD02/04/2010: Discussed the revised plan with J. Harrington and J. Kolleeny. Issued an approval letter to Mr. Yudelson. DL copy to eDocs. AD03/2010: This site was recently listed as Superfund as a part of Govanus Channel. 04/27/2010: Called and spoke with D. Yudelson regarding the site status. He told that EPA will perform some sampling at the site to study if the site is contributing to the Govanus Channel contamination, and the results will be ready in early fall. Asked him to send me an e-mail summarizing site status. AD04/29/2010: Received an e-mail from Mr. Yudelson (attorney for Toll Brothers) saying:"AinuraThis email is to confirm that I have met with EPA and EPA indicated they will not be in a position to determine what, if any, remedial activities they will require at the Bond Street properties regarding the Superfund Site until the fall. I expect to meet with them again and will inform you if anything changes. Dave(917)295-6449"AD06/2010: Called and spoke with Mr. Yudelson. He told me that Toll Brothers is no longer interested in buying the site, after it was listed as a Superfund site. Mr. Yudelson gave me a contact info in EPA: Mr. Brian Carr, phone: (212)637-3170. AD06/23/2010: Received a phone call from Mr. Brian Carr of EPA, phone: (212)637-3170. He told me that they performed some sampling at the site. He gave a contact info for the owner of the 400 Carrol Street site: Mr. David Levkovitz, phone: (917)838-2270. Discussed the site with J. Kolleeny and Vadim Brevdo of DEC. AD07/2010: Called and spoke with Mr. Yudelson regarding the site cleanup plans. AD07/26/2010: Called and spoke with Mr. Levkovitz. He asked to contact his attorney - Mr. Yudelson. Called and left a message to D. Yudelson. AD07/28/2010: Received a call from D. Yudelson. He told me that he is discussing the remedial option for the site with Mr. Levkovitz, and they considering to perform an excavation of the contaminates soil instead of the previously proposed soil stabilization. He is going to meet with Mr. Phillips - owner of 363 Bond Street site regarding the site cleanup and will contact us later with the results. Told him that a stipulation agreement should be signed by the site owners. AD12/03/2010: Received an e-mail from D. Yudelson saying:"Ainura, BrianHappy holidays! Attached please find a proposed remedial action plan for the 400 Carroll Street property. It provide for excavating and offsite disposal of the petroleum contaminated soil. Lets schedule a meeting or call to discuss this and scheduling issues. Dave"DL pdf copy of the RAP. Will review. AD12/23/2010: Reviewed the RAP. Although soil stabilization was initially proposed, and approved by DEC, now the consultant proposes excavation and disposal of soils in the "hot spot" areas, that were previously intended for soil stabilization, as more appropriate alternative. PWGC is proposing that soils in the three "hot spot" areas be excavated to a depth of approximately seven feet below grade. Since the project site is located on the Gowanus Canal, they will install soil erosion and sediment controls prior to excavation activities. They note that this RAP is intended to address petroleum impacted soils in order to obtain closure of the NYSDEC Spill File. They will not address historic fill material containing elevated concentrations of SVOCs and metals. AD01/2011: Called and spoke with David regarding a meeting to discuss the proposed RAP with him and EPA. He said that the meeting will be scheduled after EPA will review the work plan. AD04/20/2011: Called and left a message to

S102401891

D. Yudelson regarding the meeting. AD04/26/2011: Did not receive any response. Called again and left a message. AD05/10/2011: Called and spoke with David Yudelson regarding the meeting. Told him to schedule it after June 20th, when I will return from vacation. AD06/30/2011: Called and left a message to David. AD07/01/2011: Received a phone call from Mr. Yudelson. He said that he had a meeting with EPA last week. Requested why I was not informed about this meeting. Mr. Yudelson said that this meeting was regarding EPA's requirements to a proposed RAP. Required him to send me a summary e-mail. AD07/07/2011: Received an e-mail from David saying:"Ainura This email confirms our telephone conversation that we have been working with EPA and the owner is prepared to implement the RAP we had previously submitted to you. The work would be undertaken in the fall. Please confirm the RAP, which provides for excavation and offsite disposal is approved . Dave"Since this RAP was submitted to DEC in December of 2010 to require Mr. Yudelson to resubmit the work plan with a current date. Discussed with J. Kolleeny the proposed RAP. Post-excavation end-point soil samples from the bottom of the excavation should be collected. Called and left a message to Mr. Yudelson regarding submission of RAP with a current date. AD07/19/2011: Received the requested RAP. Sent an approval letter to Mr. Yudelson. DL pdf copy of the letter to eDocs. AD10/14/2011: Sent an e-mail to D. Yudelson requesting site status update info. AD11/30/2011: Called and spoke with D. Yudelson regarding site status update. He told me that they are waiting for excavation permit from DOB to start remediation. he will inform me before start of field work. AD01/2012: Called and spoke with D. Yudelson regarding RAP implementation at the site. AD04/25/2012: Sent an e-mail to D. Yudelson with a request for site status update. AD04/27/2012: Received an e-mail from Mr. Yudelson with a request for a site discussion over the phone for Monday, April 30, 2012. Responded to him that I will be off on Monday, and suggested Tuesday. AD05/02/2012: Called and spoke with Mr. Yudelson. He informed me that all three parcels are now under contract for purchase by Lightstone Group, which plans to redevelop the sites as rental properties. Revised work plan for 363 Bond Street and 365 Bond Street will be submitted to DEC for review and approval. Asked Mr. Yudelson to send me a summary e-mail. AD05/10/2012: Received the following e-mail from D. Yudelson:"AinuraIn response to your request, this is a status report on 400 Carroll Street. The owner has executed a contract of sale to sell the property to an entity that is also seeking to purchase the two other properties that constitute the former Toll Bros development project (363 and 365 Bond). It is expected that remedial work will begin in the fall. Let me know if you need any additional information. Dave" 11/13/2012: Received the following e-mail from D. Yudelson:"Ainura Attached is a remedial investigation work plan for the three sites to better delineate the hotspots for preparation of an excavation based RAP. Please let me know if this is acceptable. Thanks Dave"Looked at the work plan. The size of it is about 130 MGB. called and left a message to Dave with request to decrease the size of the submitted work plan, and to submit a hard copy of the work plan as well. AD11/16/2012: Received a short PDF version of the report (only work plan included). Spoke with D. Yudelson. Hard copy is in the mail. AD11/20/2012: Received a hard copy of the work plan. Will review. AD12/04/2012: Attended a meeting with City OER regarding the proposed work plan. OER involved because the site has "E" designation. OER wants to add few more soil borings and one more well. Discussed the site. Will review OER requests to

S102401891

the submitted work plan. Sent an e-mail to D. Yudelson with a request to submit data tables with a bigger font size. AD12/06/2012: Reviewed the work plan. It proposes to advance 18 soil boring with collection of soil samples, 3 groundwater monitoring wells and a total of 20 shallow and 10 deeper soil gas sampling. There are few discrepancies in numbers of soil boring samples and soil gas samples on pages 34, 35, 36 and 37. Also the proposed soil sampling intervals are questionable. Called and spoke with D. Yudelson regarding number of question which arised during the work plan review. Later sent the following e-mail with all questions and requirement to D. Yudelson:"Dave: In regards to the submitted investigation work plan, I need answers on the following questions: 1. Total number of site-related wells;2. Were all soil and groundwater samples analyzed for the full list of compounds;3. Why there are discrepancies in the number of soil samples from the proposed soil borings and in the number of soil vapor samples in the work plan (pgs: 34, 35, 36, 37);4. Why Langan proposing to sample the same locations they already sampled for the part 1 of Due Diligence; 5. What will be the sampling intervals for the 18 proposed soil borings, and why; Also I would like to mention that all summary tables with analytical data in the next reports from Langan should include a row with TVOCs and TSVOCs data, and the data should be in part per billion. Thank you, Sincerely,Ainura Doronova"Spoke with D. Yudelson again, requested to revise the work plan, correct all typos, include the revised site map with new location for soil borings and wells suggested by OER and to submit it to DEC for review.Received some correspondence from Cavy Chu of OER regarding the project. Told her about DEC requirements. She will fax the site map with the revised locations for soil borings and monitoring wells to D. Yudelson tomorrow. Discussed all changes with J. Kolleeny of DEC. AD12/07/2012: Received an e-mail from D. Yudelson saying:"Ainura and Cavy - Please see the attached Text, Table and Figure revisions which incorporate the comments that both of you have made. Additionally Ainura, I have addressed your comments below. Cavy, your comments were addressed as we spoke and I did add a couple QA/QC samples to the program.Please call with any questions that you may have and thank you very much for your review of this workplan.RegardsChristopher McMahon Project Geologist Direct: 201.398.4535Mobile: 201.218.2339 Langan Engineering & Environmental Services Cc: Chu, CavySubject: Bond Street Sites Dave: In regards to the submitted investigation work plan, I need answers on the following questions: 1. Total number of site-related wells;including the wells proposed as part of this workplan, there are 8 wells on the 365 Bond Street site; 7 wells on the 363 Bond Street property and 2 wells on the 400 Carroll Street property.2. Were all soil and groundwater samples analyzed for the full list of compounds;The majority of the samples collected were analyzed for the full list of compounds; however, the list of compounds was restricted on some of the samples due to being AOC specific. A summary of all of the sampling, including the compounds analyzed is provided in Table 1.3. Why there are discrepancies in the number of soil samples from the proposed soil borings and in the number of soil vapor samples in the work plan (pgs: 34, 35, 36, 37);Addressed in the text.4. Why Langan proposing to sample the same locations they already sampled for the part 1 of Due Diligence;Co-located boring locations will be installed to sample depth intervals that were not included in the Due Diligence investigation.5. What will be the sampling intervals for the 18 proposed soil borings, and why;This information is provided in the

text as well as in Table 10. All discrepancies have been revised. Also I would like to mention that all summary tables with analytical data in the next reports from Langan should include a row with TVOCs and TSVOCs data, and the data should be in part per billion." Looked at the revised work plan. Langan proposes advancement of 19 soil borings, five out which will be finished as a groundwater monitoring wells. There are again discrepancies in number of the soil and soil vapor samples on pages 33 to 37 in the revised work plan. Called and spoke with Cavy Chu of OER. She said that her requirements regarding number of soil vapor samples were not addressed, and that the proposed soil vapor sampling intervals and number of the proposed soil vapors are confusing. Called and spoke with D. Yudelson few times regarding the revised work plan. Requested to address OER requirements, to omit repetitions in the work plan on the pages 33 to 37, to correct typos, and to clarify soil sampling intervals. AD01/23/2013: Received a hard copy of the revised RIWP. Will review. AD01/25/2013: Reviewed the revised RIWP. DEC and OER requirements were addressed in this work plan. The revised RIWP proposes a supplemental investigation involving the drilling of 19 soil borings with collection of soil samples, the installation of five permanent groundwater monitoring wells followed by collection of groundwater samples, and the collection of 30 soil vapor samples. An investigation summary report with conclusions and recommendations for further actions will be prepared and submitted to DEC. Later in the day I was copied on the following e-mail from Chu cavy of OER:"Hi, Chris. OER has reviewed the latest version of the Final RIWP and has no more comments on the document. Please note that you will need DEC approval to move the work plan forward.Thanks,CavyCavy Chu, PEAssistant Director. OER"AD01/29/2013: Discussed the final version of the RIWP with J. Kolleeny of DEC. issued an approval letter to D. Yudelson. DL pdf copy of the letter to eDocs. ADThe site entered into BCP program (Albany). The site manager is John Grathwol. AD Were excavating on the property and found a tank in the ground that know one knew was there. The vent was missing on the tank causing the spill. Pumped the tank so far and have not yet removed the tank due to weather. removed 3000 gal of straight product so far.

DEC Memo: 02-06-12 - LZThe 01-25-12 semi-annual well gauging report (eDocs) and the 02-02-12 request for spill closure (eDocs) show that during two-year gauging of the five monitoring wells at the site no free product was detected except the March 2011 event (less than 0.01 foot in MW-4). Soil contamination was evaluated in the February 2010 revised Site Assessment Report and Remedial Action Plan. The spill case has been closed, and a spill closure letter sent to the facility owner. 04-28-11 - LZThe Annual Well Gauging Summary Report, dated March 18, 2011, prepared by AKRF, Inc. (eDocs) provides results of four quarterly rounds of well inspections. Five site monitoring wells were gauged for LNAPL; no LNAPL was observed in any of the wells in April, July, or October 2010. During both March gauging events, an immeasurable skim layer (less than 0.01 foot) of LNAPL was noted in MW-4. An oil-absorbent sock was placed across the water table in MW-4. AKRF will continue quarterly gauging in accordance with the Revised RAP. The next report to DEC will follow the March 2012 gauging.09/29/10 - LZThe AKRF, Inc., report (eDocs), dated July 28, 2010, provides data from April and July gauging of monitoring wells. No free product was detected in any wells. Next report is due January 2011. 03/24/10 - LZReviewed the February 2010 revised Site Assessment Report (SAR) and Remedial Action Plan (RAP)(eDocs), prepared by AKRF, Inc. Approved the revised submittals and required that the gauging be performed for two years, and reports reflecting the results of it twice a year. NYSDEC may require that the site achieve more stringent SCOs than for industrial use if the site zoning is to be changed or development of the site is inevitable. 12/22/09 - LZThe November 5th revised RAP (eDocs) includes advancing of two additional borings and installation of two monitoring wells. Soil from these borings would be analyzed for the presence of VOCs and SVOCs. On December 22th, AKRF performed two borings as provided in the revised RAP. A report summarizing December activities and soil analytical results will be

BAYSIDE FUEL OIL DEPOT CORP. (Continued)

S109826460

Remarks: submitted by January 31st. 10/23/09 - LZI has reviewed the October 14, 2009, Remedial Action Plan (RAP), prepared by AKRF, Inc. The RAP proposes installation of a monitoring well in the area where significant contamination was discovered to monitor and remove encountered free-phase product. I disapproved the proposed RAP since it does not address adequately the visual and olfactory contamination detected in borings B-10, B-13, and B-14. A revised RAP should be submitted by November 27, 2009. 08/17/09 - LZIn her letter (eDocs) of June 15, 2009, Kathleen Brunner of AKRF asserts that a investigation report will be submitted by July 17, 2009.08-11-9 - LZDEC approved the site assessment report and in its August 11th letter (eDocs)required a remediation action plan be prepared and submitted by October 14, 2009. Field tests revealed soil contamination at the above sight. MOSF 2-1220Case Manager name: Leszek Zielinski Stipulation agreement that is in place: R2-20081209-603

NY. This property consists of a 2.27 acre parcel located adjacent to the Gowanus Canal in a commercial/industrial area. The current owner is the Allegetti Group, LLC. The tax map identifies the various properties associated with this site as: Block 424, Lots 1 (Parcel A) and 20 (Parcel B) and Block 431, Lots 12 (Parcel C) and 17 (Parcel D). The BCP application for this site was approved on May 12, 2005.A Phase 1 and Phase II report were submitted with the application. The subject property is a Major Oil Storage Facility (MOSF) with a 1,500,000 gallon fuel oil capacity. Past operations onsite include coal storage, lumber yard, box factory, auto and truck repair garage, warehousing, and a motor freight station. Previous site uses have likely contributed to the source of the fuel oil contamination at the site and the consultant indicates that it is possible that there was an offsite source as well.Agreement Terminated - letter dated 12/5/07.

Used oil transfer facility: No  
Used oil transporter: No

**Historical Generators:**  
Date form received by agency: 01/01/2006  
Facility name: FINEST AUTO & RECOVERY  
Classification: Not a generator, verified

Date form received by agency: 09/22/2000  
Facility name: FINEST AUTO & RECOVERY  
Classification: Small Quantity Generator

Violation Status: No violations found

**FINDS:**

Registry ID: 110004564953

**Environmental Interest/Information System**  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**BROWNFIELDS:**  
Program: BCP  
Site Code: 478612  
Site Description: Location: This site is located at 388 Carroll Street and 363 Bond Street in Brooklyn, NY. Site Features: A portion of the site contains a one- and two-story light industrial building and another portion is improved with a two-story residential building. Two decommissioned secondary containment structures also exist on the property. The area of the two parcels is approximately 1.35 acres. Current Zoning/Use(s): Current use is residential, commercial, and industrial. Historical Use(s): Portions of this site has historically been used as an oil terminal, an auto storage yard, an automobile repair facility, and a paint manufacturer. Site Geology and Hydrogeology: The site is underlain by an approximately 6-to-17 foot thick layer of miscellaneous fill which is underlain by a clay layer. Groundwater was observed at the site at depths ranging from 1.25 to 10 feet below ground surface. Groundwater flow is affected by the tidal influence from Gowanus Canal. Current Status: The interim remedial measure (IRM) addressing the petroleum spill contamination at the site will begin in Spring 2014.  
Env Problem: Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.  
Health Problem: Information submitted with the BCP application regarding the

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Need to send CSL to Property Owner:Charlie DevitoBrooklyn Real Estate Mgt Corp.88 Ninth StreetBrooklyn, NY 1121510/04/06-Vought-Daytime runner. Vought sent soil contamination letter with one month due date to above address. Vought called Boeckel for more information and left message to return call prior to sending letter.8/3/07 - Austin - Transferred from Vought to Ketani for further review and action - end9/25/07 - Raphael Ketani. I found 2 unsigned copies of an October 2, 2006 CSL letter in the record. There is also an October 26, 2006 Phase II Subsurface Investigation Report from Associated Environmental Services, Ltd. (631) 234-4280. There is no PBS record.I reviewed the Phase II Report. Borings B-1 and B-2 were tanken on either side of a suspected UST at 20-20A Whitwell Place. Boring B-3 was taken on the east (street) side of a suspected UST at 14 Whitwell Place. Only groundwater samples were collected. These were from B-2 and B-3. Groundwater sample B-2 was completely non-detect. Groundwater sample B-3 had 2 hits that were 3 times the TAGM limit, several hits that were just above the TAGM limit and the rest non-detect.9/26/07 - Raphael Ketani. I spoke to Matt Boeckel of Associated Environmental. He said that after the project was done,

COMMERCIAL BUILDING (Continued)

S108130792

Mr. Devito didn't pursue any further activities. I asked Mr. Boeckel why only groundwater samples were taken. He said that Mr. Devito didn't want to spend any more money investigating the site. I looked up the owners of the property using Property Shark and ACRIS. I found several addresses for the owners of 20 Whitwell Place (block and lot 00454/0025). The owner is Whitwell Place Realty Corp. at either 20 Whitwell Place, Brooklyn or 335 Chelsea Road, Staten Island. There was another Brooklyn address at 88 9th Street, Brooklyn, 11215. The 9th Street address is the latest one. I looked up the owners of the property at 14 Whitwell Place (block and lot 00454/0022). ACRIS listed Frozen Music Incorp., 10 Whitwell Pl., Brklyn., and Property Shark listed C.W. Grinnell, 325 E. 41 Street, Ste 501, NY, 10017. As the 14 Whitwell Place site had the indications of contamination, I will pursue the remediation of this location only. I sent a CSL to both addresses for the owners. 10/2/07 - I received a call today from Daniel Wax regarding the CSL. He said that DEC had the wrong property and that no borings were done on his site. He said that Frozen Music Incorporated and Ms. Grinnell owned 10 Whitwell Place, but this is not where the boring occurred. He said that the NYC Property database and ACRIS listed Ms. Grinnell and his company as the owner of 14 Whitwell, but this has been a mistake that he has not been able to correct. He asked what he should do. I asked him who owned 14 Whitwell. He said he didn't know. I told him that I will look into the matter. I tried to contact Mathew Boeckel of Associated Environmental, but could only leave a message. 10/3/07 - Raphael Ketani. I made an unannounced site visit. The site is a red painted 3 story building. It contains offices for a book company, a lobster company, and some other business on the ground floor. I met Roger Coy, a tenant who rents an office on an upper floor of the building. He called up the owner of the property, Charlie Devito (914) 482-5520 (Ninth Street Storage). I spoke to Mr. Devito and explained that Associated Environmental Services had done a boring on the property which had discovered contaminated soil next to an anomaly that was never defined. He said that he was aware of the investigation. He said that he thought the anomaly was a tank that had never been removed. I told him that a larger investigation was necessary to delineate the contamination and that the tank has to be either closed in place or removed. I told him he had to hire an environmental company and start the work. He said he will do this and he will contact me later in the week. Mr. Devito's company is Ninth Street Self Storage, 88 9th Street, Brooklyn, 11231, (718) 788-0880. A CSL was sent out today to Mr. Devito. 12/3/07 - Raphael Ketani. I tried to contact Mr. Devito, but could only leave a message with his secretary. 12/12/07 - Raphael Ketani. I tried to contact Mr. Devito, but could only leave a message with the secretary. I told her that if DEC doesn't hear from him towards the end of regular business hours, then we will send a warning letter. Mr. Devito called me back. He said that he had lost the letter and that is why nothing has taken place to date. I FAXed him (718) 788-3233 the 10/3/07 letter. He said that he will give it to Associated Environmental. 12/27/07 - Raphael Ketani. Bill Locke of Trade Winds Environmental (631) 289-5500 called. He said he was putting together a proposal for Mr. Devito. He said there is an inactive 550 tank buried behind a brick wall under the back half of the property. Then there are two active 275 gal. tanks in the half basement in the front part of the property. He said that he will abandon or pull all three tanks. He said he will do at least 6 soil borings to investigate the fill port, fill line and

COMMERCIAL BUILDING (Continued)

S108130792

tanks. 1/3/08 - Raphael Ketani. I tried to reach Mr. Locke, but could only leave a message. 1/7/08 - Raphael Ketani. Mr. Locke called back. He said that he plans to start the investigation at the site today. 1/10/08 - Raphael Ketani. I spoke to Doug Schrimpf (cell (516) 779-7822) of Trade Winds. He is the project manager and contact. His crew removed 2 ASTs in the basement. The tanks were in good condition and not leaking. The old fuel line to the old UST was rotten and leaking and 2 drums of contaminated soil were removed. More soil will be removed. They will expose the line in its entirety to see if it leaked in other locations. Borings will be done through the bottom of the old UST after it is cleaned out. I will meet Mr. Schrimpf tomorrow at the site. 1/11/08 - Raphael Ketani. I made the site visit at about 12:30PM. I met Carol, the head of the work crew. I took 3 pictures. He showed me the 1,000 gal. tank that had been cut open. It looked very clean inside and was odor free. He showed me the fuel pipes that his crew was following and trying to expose. He said he wasn't sure where they will lead him, but he was hoping that, somewhere, they will contact to the 1,000 gal. tank which wasn't completely exposed yet. After my overview of the situation, I left the site. Later, I spoke to Mr. Schrimpf. I told him that it looked like his crew was doing a good job. I also told him that since there was a 1000 gal. tank and two 275 gallon tanks, this puts the site over the 1100 gal. ceiling for total capacity. I told him that all 3 tanks need to be registered. He said he will do this and he will keep me informed of the progress. 1/15/08 - Raphael Ketani. I spoke to Mr. Schrimpf today. He said that his crew exposed the rest of the fuel and return line, but found no contamination. So they filled the 1000 gallon tank with sand and abandoned it in place. They also filled the old fill port in the basement with cement. He said he that three soil samples were taken below the bottom of the tank and he will attempt a boring in the sidewalk to see whether there is any contamination. 4/2/08 - Raphael Ketani. I spoke to Mr. Schrimpf (cell (516) 779-7822). He said Mr. Locke is the one I should be speaking to regarding the report. He said he will talk to Mr. Locke and get everything out to me. 8/18/08 - Raphael Ketani. I spoke to Mr. Locke. He said that Mr. Devito, the owner, owes him thousands of dollars. So he can't release the report. He said Mr. Devito is paying him in "drips and drabs." The case is being prepared for transfer due to a case realignment within the unit. The case manager needs to send Mr. Devito a warning letter stating that he is in violation of the NAV Law and the regulations because DEC has no documentation that the spill is cleaned up. 9/19/08 - Raphael Ketani. Mr. Schrimpf called me. He asked whether I had ever received the remediation report. I told him no. He asked why. I told him that from the case notes describing my conversations with Mr. Locke, the report wasn't going to be released until Mr. Devito paid Trade Winds in full for the work. He said he will put the report together, but he will let Mr. Devito know that it won't be sent until payment is received. 2/27/09 - Raphael Ketani. Mark Pasco of Analytical Testing Labs (a consulting firm) (908) 241-5040 called to find out the status of the site. He represented a bank involved with a potential purchaser. I told him that I was no longer the case manager and to talk to Veronica Zhune. However, I also told him that Trade Winds is out of business and that DEC never received the investigation-remediation report. He said that he will talk to Ms. Zhune. 2/27/09 - Melissa DiBella 718-482-4984 from whitwell Place Realty Corp. faxed the report. The report included: 1. A cover letter to the report. 2. Affidavit 3. Two manifest for waste

disposal and oil disposal4. Chain of custody Endpoint soil Samples Results5.Site Map.The letter states: Trade-Winds Environmental Restoration Inc. was contracted by property owner to remove (2)275 gallon AST containing fuel oil and abandon or remove(1) 550 gallon UST containing fuel oil.Subsurface sampling was conducting by property owners previus Environmental Contractor and a NYSDEC Spill number 0606675 was assigned to property.On January 7th, 2008 Trade-Winds Environmental removed, cut and cleaned (2)275 gallon AST that contained fuel oil and disposed of them at a permitted disposal facility. In addition Trade-Winds project team excavated and exposed (1)550 gallon UST that contained fuel oil. During the process of exposing (1) 550 gallon tank Trade-Wind encountered fuel oil contaminated soil around tank. All oil impacted soils were excavated and placed in 55 gallon drums and the total of 7 drums were generated. Trade-winds project team then cut an opening into tank and entered tank and decontaminated tank interior. Tank excavation and decontaminated tank was left open for NYSDEC inspection. Based on inspection NYSDEC case manager required to collect samples from beneath tank and samples from tank excavation. Three holes were cut in bottom of tank (East, Middle, West) and soil samples were collect at each location. In addition 3 samples were taken from tank excavation for a total of 6 samples. Soil samples were analyzed for methods 8260 and 8270 and forwarded to NYSDE case manger for review.On January 15th ,2008 completed the abandoment of the 550 gallon fuel oil tank was filled to 100% capacity with masonry sand and excavation and new concrete slab were completed.The analytical results identified VOC's and SVOC's below the minimun detection limit for samples #2(Tank Middel and #3(Tank west). Sample #1 Tank East results identified VOC's below the minimun detection limit but some SVOC's (Benzo-b-fluoroanthe, Benzo-k-fluoroanthe, Benzo-1-pyrene, Indeno (1.2.3,-c,d)Pyrene and Dibenzo-a,h anthracene) were exceding the NYCSEDEC Recomend Soil Cleanup Objectives (RSCOs).The analytical results identified VOC's and VOC's below the minimun detection limit for samples #4(Excavation middle), #5(East Excavation). Sample #6(Tank top)results showed VOC's below the minimun detection. Some SVOC's (Phenanthrene, Anthracene, Fluoranthene, Benzo-a-anthracene, Chrysene, Pyrene, Benzo-b-fluoroanthe, Benzo-k-fluoroanthe, Benzo-a-pyreneIndeno (1.2.3,-c,d)Pyrene, Dibenzo-a,h anthracene and benzo-g,h,y,i perylene) were exceding the NYCDEC Recomend Soil Cleanup Objectives (RSCOs).03/16/09-Zhune called Doug Schrimf from trade-winds to find out about SOV's contamination in sample #6. As per Doug all oil impacted soil were excavated and removed. Spill Closed.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was

"KRIMGOLD"11/15/2005: Lead transferred to Joe White as part of the Spill Initiative Project.12/08/2005: Joe White spoke sith James Merlo, the NYC Schools spill coordinator, who will be sending the closeout report for this spill.1/9/2006: Mr Merlo indicated that this property is not managed by the NYC Division of School Facilities but is privately owned.1/23/2006: Joe White sent a letter to school superintendent requesting additional information. A copy of this letter is on eDocs files system for our records.1/27/2006: Joe White received a call from the school maintenence, Vinnie Peters (718-923-1650) who indicated that they had no records for the spill and the contact number for the Berger firm that did the work did not work. However, Vinnie indicated that there is no obvious problem currently at the site and no work is ongoing at present to address any problem and they are not aware of any problem. This spill was addressed in the past and work concluded. Joe White will follow up to see if we can get something from the Berger firm to document closure.11/16/06 - Austin - Reassigned to Rahman for followup/review

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110004317855

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Ketani responded to the site.7/6/11 - Raphael Ketani. I arrived at the site at about noon time. The site was a large yard with a gray building on the back left corner that fronts on Nevins Street. The address is 242 Nevins Street (near Degraw and Nevins), Brooklyn, 11217. Several companies had their signs on the corrugated fence. These companies were Brooklyn Truck & Equipment, Phoenix Services Corp. (718) 567-2023, and Cole Partners, Inc. (718) 875-8300. I entered the yard and saw a red painted trailer (possibly with a cement pump) on the left that had been leaking hydraulic fluid. The floor of the front half of the yard appeared to be partially paved and partially laid with paving stones. There was a steel plate in one location with holes in it. Vehicles were parked on both sides of the front half of the yard, but I did not see any leaks.Next, I went to the back half of the yard. The ground appeared to be only dirt. There were vehicles and construction machines parked along the west side and north edges of the yard. The Gowanus Canal bordered the west side of the yard and the water level was nearly even with the yard (maybe 3 feet below ground level). Most of the trucks belonged to two different garbage carting companies, M&G Carting, 303 5th Avenue, NY, 10016, (212) 689-0332, and Flash Recycling, 132 Ludlow Street, NY, 10002, (212) 673-6194 (Prince Street Station, P.O. Box 515, NY, 10012). Some of the trucks had leaked either motor oil or hydraulic oil. There was oil on the ground near one of the Flash Recycling trucks. One of the M&G Carting trucks looked like it hadn't been operational for a long time. There was a rolling container near this truck with many plastic bottles that had contained motor oil. I didn't see any leaking from the container, but this was not a proper container for liquids of any kind.After my tour of the back half of the yard, I entered the gray building. In many places, there was oil on the floor. I saw a zipper drain that looked like it may contain sludge. I entered the office of Brooklyn Truck & Equipment and met ECO Jennifer Okonuk (718) 482-4885 and the owner of the business, Bob Hepplewhite (718) 237-7976. ECO Okonuk informed me that she had called in the spill. She had been making inspections of garages when she came across Brooklyn Truck & Equipment. She said that she had issued two tickets to Mr. Hepplewhite, for noisome and unwholesome. Mr. Hepplewhite, ECO Okonuk and myself toured the garage. ECO Okonuk pointed out the area with oil saturated Speedi Dri next to a 275 gal. waste oil tank and a 275 gal. tank that Mr. Hepplewhite said contained fresh motor oil for the trucks. One of the workers at the garage dug through the Speedi Dri and showed us that there was a concrete floor below. I pointed out to Mr. Hepplewhite that there were containers of motor oil on racks in the back of the oil contaminated area. He said that these weren't his and that they were empty and had been there since before he had moved his business in. Mr. Hepplewhite added that the oil tank next to them also wasn't his

ROYAL RECYCLING CORP. (Continued)

S105841715

and he knew nothing about it.Next, we went outside to the yard. I asked Mr. Hepplewhite about the trucks. He said that he makes extra money by leasing space for parking the trucks. I pointed out the spilled oil, the rolling container with oil bottles, and the derelict truck. I told him that he had to inform M&G Carting and Flash Recycling and get them to clean up the site and remove the oil bottles and the derelict leaking truck (ECO Okonuk claimed it was leaking). He said that he will do this. ECO Okonuk and I asked about the steel plate in the back half of the yard and the perforated steel plate in the front half of the yard, and whether he leased both halves. Mr. Hepplewhite said that he leased only the gray building and the back half of the yard. He added that the plates covered sewer tanks. He went on to say that when it rains, the entire yard floods 8 to 10 inches because the sewers back up under the street. Mr. Hepplewhite added that even the Gowanus Canal floods during the rain storms and spills into his yard. The yard and the vicinity is a low area. ECO Okonuk told me that she has seen this happen, too. He also stated that the building to the south can not be sold because there is oil underground from the coal gasification that took place many years ago. Mr. Hepplewhite commented that the EPA and the NYC DEP did borings throughout the yard and elsewhere because of the underground contamination. While we were in the yard, Andrew Kelly, enforcement officer - Emergency Response Engineer with the ER Unit (718) 595-4761 of the NYC DEP arrived. We went back inside the shop and I went over what needed to be done to clean up the site. These items were:1) clean up the saturated Speedi Dri and make sure fresh absorbent is kept at this location for any future spills that take place2) hire an environmental company to do soil borings in the saturated area, along the sides of the zipper drains and in the back half of the yard - if contamination is found, then it will have to be cleaned up3) call M&G and Flash and have them clean up their spills4) clean up the floor of the garage and have someone keep on top of the spills with absorbent and power washing (Mr. Hepplewhite stated that the garage is powerwashed once a month)5) hire a company to clean out the zipper drains (Mr. Hepplewhite said that there is a plug at the end of the last zipper and that nothing can flow to the sewers)I told Mr. Hepplewhite that the DEC will be sending a contaminated soil letter to him and to the owners of the property with a C-c to ECO Okonuk. I added that we will want a clean up report after everything is done. Mr. Hepplewhite said that he understood.There was one other spill case for the site. It was #0510846. It involved a 200 gal. oil spill to the yard and the street and the sewer on 12/16/05. Bonafide Energy was the responsible party. A valve had broken. The site was cleaned up by 4/21/06 and the case was closed. 7/8/11 - Raphael Ketani. I tried contacting M&G Carting (212) 689-0332 to let them know that they have to clean up the spilled oil around and under their trucks. However, I reached the answering machine of Frank Mormando. I left a message for him to contact me.I contacted Billy Huang, the owner of Flash Recycling (212) 673-6194. I told him that he had to clean up the spilled oil from under and around his trucks and the pool of stinking leachate. He said that he will get one of his crew to do this. I told him that the oil has to be put in an appropriate container for oil disposal and that the DEC will do an inspection next week to see whether he has complied with our request. I added that if the oil and leachate aren't cleaned up, then he could face fines and penalties. Mr. Huang said that the oil and leachate will be removed.I looked up the property ownership using ACRIS. The latest

deed for block and lot 418 and 1 is held by 242 Nevins, Inc., 444 Third Avenue, Brklyn, 11215. The deed date is 7/27/05, it was prepared on 10/5/05, and filed on 1/12/06. The property manager is Marino Mazzei, Bonified Realty, 140 Portland Road, Highland, NJ, 07732, (718) 788-2222. I spoke to Mr. Mazzei and told him about the leaking red painted trailer, the leaking trucks and the spills at Brooklyn Truck & Equipment. I told him that Mr. Hepplewhite will take care of the spills in his garage and that the trucking companies have been notified about the spills from their trucks. Mr. Mazzei said that he will visit the site and see to it that everything is cleaned up. I sent a CSL to 242 Nevins, Inc. regarding the hydraulic fluid that is leaking from the red trailer and the leaking trucks. Another CSL went to Mr. Mazzei regarding the same issues. I also sent Mr. Hepplewhite (718) 237-7976 and Mr. Mazzei CSLs with the 5 items from above. Later, Mr. Mormando, the owner of M&G Carting (212) 689-0332, called me back. He said that he will clean up the spill under and around his trucks and he will have the rolling container emptied. 7/12/11 - Raphael Ketani. Mr. Mazzei cell (347) 231-6440 called. He said that everything that the DEC was concerned about in the garage and in the yard has been cleaned up. He invited me to check the place. I told him that I will this week. However, I added that Mr. Hepplewhite still has to hire an environmental company to do soil borings in the former oil saturated area and along the sides of the zipper drains. He said that he understood. 7/19/11 - Raphael Ketani. The CSL to 242 Nevins Inc. was returned in an unopened envelope as ATTEMPTED - NOT KNOWN. 8/5/11 - Raphael Ketani. I made an unannounced site visit. The oil spill under the red trailer had been cleaned up. The small oil spills next to and around the garbage trucks had also been cleaned up. The small rolling trash dumpsters (about 1.5 cu. yds. each) had been emptied. I met Mr. Hepplewhite. He showed me the area inside the garage that had been badly affected by spilled oil. He said that the oil was actually on sheets of plywood, not on the garage floor. This appeared to be true as most of this area of the garage floor was very clean as if there had never been oil tanks here. It was cleaner than it could have been if someone had power washed the floor. All of the tanks and buckets had been removed. However, I did see a darkened corner of this area next to the racks which used to hold containers of oil. I knelt down at this corner, but didn't sense any oil odors. I assumed the darkening to be the result of moisture as it had rained heavily earlier during the week and the corrugated walls were not sealed to the floor. There still were mud puddles in the backyard where the garbage trucks were. Next, he showed me the new location of the waste oil tank. It was now in a larger tank which served as secondary containment - should any of his workers spill oil while transferring it to the tank. The tank was in between the two back garage doors. Mr. Hepplewhite showed me the zipper drains. They were now covered by steel plates which fit flush with the garage floor. The plates had holes so that wash water can enter the drains. He lifted up one plate and I could see the concrete bottom of the drain. There were no odors and the bottom of the drain looked to be in good condition without any cracks. Lastly, he showed me the drums of sediment that had been removed from the drains. The lids were securely attached to the drums and they looked to be ready for pickup. Mr. Hepplewhite said that the person who runs the waste oil pickup company will arrange for the drums to be picked up. I looked at the floor of the shop and it was very clean, except for a small puddle under one engine. This engine

had just been drained. I pointed this out to Mr. Hepplewhite and he said that the spill will be cleaned up immediately. After this, I left. As the former waste oil tank area was very clean and as the zipper drains didn't smell as if they had oil and were in good condition, I decided that soil borings weren't necessary at the site. As the spills appeared to have been remediated, I have determined that there is no threat to the public or the environment. Therefore, I am closing the spill case. DLE had issued tickets. So their case will remain active. The whole ground of the garage is saturated. Been dumping there for 6 years. No clean up as of yet.

Hazardous Waste Summary:

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "KOLLEENY"PAH'S FOUND IN SOIL, MTBE FOUND IN GROUNDWATER. PAH'S MAY BE FILL RELATED, RATHER THAN PETROLEUM RELATED.SITE TRANSFERRED FROM KOLLEENY TO I. ISLAM.11/10/05- Reviewed the GW monitoring report dated Sept. 28, 2005 submitted by Shaw Envtl. The site's only GW contamination remediation through natural attenuation was under semi-annual monitoring by GW samplings. Of the four monitoring wells, only one well was showing MTBE concentration ranging from 9ppb to 44ppb during the last four sampling events. During the latest sampling event in Sept/05, the MTBE level (9ppb)in that well was below TOGS guidance value. However, based on the historical data of the site and as per discussion in a meeting (11/9/05)with consultant & NYCDDC, it was decided to close the spill case and NFA letter is issued today. - II  
  
Remarks: caller received results of soil tests that were done at water pumping station which indicated contamination

|--------------------|------------|

Remarks: floating up from mass on bottom of canal. DEP also responded as requested by USCG because it was near thier outfall.The petroleum on the bottom of the canal is an old problem that apparently had been disturbed, tarballs were floating up from the bottom resulting in a sheen. Barring the dredging of the canal, this will continue to be an occasional annoyance.  
Caller reports unknown amount of what is believed to be oil in the Gowanus Canal. Caller believes it is coming from the Unknown Fuel Depot at 210 Douglas Street. Coast Guard is enroute to the scene. No cleanup company has been contacted as of yet.

BROWNFIELDS:  
Program: BCP  
Site Code: 348572

Actual:  
17 ft.

Site Description: Remediation of the site is proposed under the Brownfield Cleanup Program. The Toll Brooklyn, LP site is located in Kings County, NY and is comprised of three separate parcels, which were investigated separately between 1997 and 2005. The parcels include 363 Bond Street (Tax Block 452, Lot 1), 365 Bond Street (Tax Block 458, Lot 1) and 400 Carroll Street (Tax Block 452, Lot 15). The specific addresses listed in the BCP Application are: 64-98 1st Street; 82-107 1st Street; 119-145 2nd Street; 357-379 Bond Street; and 400-402 Carroll Street. Residential use is proposed for the Toll Brooklyn, LP site. Due to rezoning issues, the applicant withdrew their BCP application without prejudice in December 2006.

Env Problem: Despite the termination of this project, there is an ongoing spill investigation at this site. Spill #04-07393 was referred to the DEC Region 2 spills office in Long Island City, Queens County.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Classification: Not a generator, verified

Violation Status: No violations found

FINDS:

Registry ID: 110004411388

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: CSL has been sent to:Joseph PhillipsP.O.Box 451New York, NY 10028-0018YK 10/18/04. Paul Casowitz (212-421-2150)an attorney for Mr. J. Fillips called and informed that he is a contact person for this case. And a formal letter in response to our CSL will be sent soon. Y.K.08/30/05: I attempted to return Paul Casowitz's phone call. His message stated that his client would be filing a brownfields application to handle all the environmental concerns. I will check on this. Steve ScharfPcasowitz@sprlaw.comPaul Casowitz Sive Paget & Riesel, P.C. 460 Park Avenue New York, NY 10022 AKRF Inc. (Ally, King, Rosen and Fleming) will be consultant submitting application. Toll Brothers Inc., is buying the property.description: Phillips Bros is a trust, the purchase money is going mostly into escrow until the environmetnal issues are resolved. site is on the erie basin of the Gowonus canal. There was some free product identivied in the due diligence environmental sampling. Sampling was done by Petroleum Tank cleaners (718)624-4842. S. Scharf 09/07/05Sent the following e-mail to Paul Casowitz 2/28/06- "I am following up on 365 Bond Street. You were going to get back to me with regard to the open spill, spill No. 0407393, on the property and whether your client was going to file a Brownfields application. " thanks Steven M. Scharf, P.E.Reply: Steven,My client is the owner--Toll Bros is the contract vendee, they may have closed on title, I am not sure. Toll Brothers filed the BCP application for the site. I am away on vacation from 3/1-8--let me know if you have an application from Toll Bros. Of course in real estate, one never knows the name--special purpose entities being the rule. The BCP group should be able to advise you by the site location.- Paul Casowitz-Sive Paget & Riesel, P.C., 460 Park AvenueNew York, NY 10022 03/02/06: Copy of E-mail to Paul Casowitz:Paul,What I'm being told is that, under the NYS Navigation Law (Article 12), the owner at the time (your client) of the reported spill is responsible for remediation of the discharge. thanks, Steven M. Scharf, P.E. greater than greater than greater than "Paul

Casowitz" 3/2/2006 9:44:11 AM greater than greater than greater than Steve, Good---I assume any issues re the spill will be addressed to the applicant.Paul: pcasowitz@sprlaw.com From: Steven Scharf [mailto:sxscharf@gw.dec.state.ny.us] Sent: Thu 3/2/2006 9:33 AMTo: Paul Casowitz Subject: RE: 365 Bond Street, Brooklyn, Spill no 0407393 Paul,FYI, A BCP application, App. No. C224116, was processed on 6/7/05.Thanks: Steven Scharf, P.E. NYSDECrefer to John Grathwol. Working on brownfield. S. scharfPreviously assigned to S. Scharf and J. Grathwol in Albany office.10/11/06 - Austin - Reassigned from Central Office staff to Piper, for follow up and closure - endDue to rezoning issues. the applicant withdrew the BCP application in December 2006.12/08/2008: This spill case was transferred to A. Doronova. ADFrom now on the progress on this case should be tracked under spill case No.0400876. Toll Brothers is potential buyer who will redevelop the site. AD04/2010: This site was listed as a part of Gowanus Cannal to EPA's Superfund Program. AD04/29/2010: Received an e-mail from Mr. Yudelson (attorney for Toll Brothers) saying:"AinuraThis email is to confirm that I have met with EPA and EPA indicated they will not be in a position to determine what, if any, remedial activities they will require at the Bond Street properties regarding the Superfund Site until the fall. I expect to meet with them again and will inform you if anything changes. Dave(917)295-6449\*06/2010: Called and spoke with Mr. Yudelson. He told me that Toll Brothers is no longer interested in buying the site, after it was listed as a Superfund site. Mr. Yudelson gave me a contact info in EPA: Mr. Brian Carr, phone: (212)637-3170. AD07/26/2010: Called and left a message to D. Yudelson. AD07/28/2010: Called and left a message to Mr. P. Casowitz - attorney for Mr. Joseph Phillips. Later received a call from D. Yudelson. He told me that the site is owned by Mr. Phillips and Citibank. The site is currently for sale, and Mr. Yudelson is representing a potential buyer. He is going to meet with Mr. Phillips regarding the site cleanup and will contact us later with the results. AD08/04/2010: Called and spoke with Mr. Yudelson. He gave me a contact info of Mr. Niel Dorman (212)753-7500 - attorney for Mr. Phillips. Will call him. AD12/2/11 - Austin - Received call from Craig (917-952-8216), an independent consultatrit, who wished to know who the DEC project manager was for this spill report. I provided him DEC Doronova's name and phone #. He indicated that he was working with Dave Yudelson on this site, onbehalf of a new buyer (who, according to Craig, was a different buyer than was previously involved with Mr. Yudelson). - end 12/02/2011: Received a messade from Craig Puerta, phone: 917-952-8216. Called and spoke with him regarding site remediation. Mr. Puerta said that they plan to do remedial excavation instead of soil stabilization as per old approved work plan. Requested him to submit revised work plan for review. AD 01/06/2012: Called and spoke with Mr. Puerta. He told me that his company did not signed the contract yet with the potential buyer, so they are waiting for buyer's decision. Called and spoke with D. Yudelson. He informed me that he is working for the potential buyer, who wants to buy all three properties, previously known as Tall Brooklyn Project and included three spill sites: # 0407393, # 0501697 and # 0400876. Mr. Yudelson said that the contract will be probably singed within next weeks. Mr. Graig Puerta is working with Mr. Yudelson and will be performing environmmetal services to the buyer. Mr. Yudelson will contact me, when contract will be finalazied. AD08/22/2012: Received the following e-mail from D. Yudelson:"Ainura - This project is under

consideration and I represent the prospective purchaser, Lightstone Group. The attached is proposed additional delineation sampling with an objective of amending the RAP's for excavation like at 400 Carroll. I believe if this is a go work will start this winter. We are coordinating with EPA and NYC as well. I will keep you posted on the progress and let me know if you have questions. Dave From: David Yudelson Sent: Monday, July 23, 2012 10:19 AMTo: Cole, Daniel (DanielCo@dep.nyc.gov)Cc: Steve Ciambuschini (sciambuschini@Langan.com); Christopher McMahon (cmcmahon@Langan.com)Subject: Need to schedule a meeting asapDan Attached are compilations of all existing data and proposed sampling locations. Soil gas has been added on each site and additional delineation is proposed. There is also an approved DEC work plan for 400 which provides for excavation. I need to know if the additional sampling is adequate as we are doing it asap during due diligence. Dave"DL documents into eDocs. AD10/22/2012: Called and spoke with D. Yudelson. He said that they planning to start additional investigation soon, and that a work plan for such investigation will be submitted in one week. ADThis site entered into BCP agreement and is managed by Albany. Site's PM is John Grathwol.12/5/13: Under BCP site code C224174, IRM Work Plan is approved to be release for public comment. Citizen Participation Plan is under Department review. A public availability session will be held during the public comment period. It is anticipated that the spill contamination will be removed during this IRM. The 2014 Decision Document will address the remaining, if any, contamination. (Grathwol)

BROWNFIELDS:

Program: BCP  
Site Code: 478842  
Site Description: Location: The site is located at 365 Bond Street, Brooklyn, Kings County. The site is south of the intersection of Bond Street and First Street. It is bounded to the northeast by First Street, to the southeast by the Gowanus Canal, to the southwest by Second Street and to the northwest by Bond Street. Site Features: The site contains a vacant two-story commercial building that occupies the block's entire Bond Street frontage and a vacant lot used for truck parking and storage adjacent to the canal. It is approximately 2 acres in size.

Current Zoning and Land Use(s): The site is zoned as M1-4/R7-2, a Special Mixed Use District comprised of light industrial, commercial and community facility (residential) uses, which is currently vacant.Past Use of the Site: Past uses of the site include an oil terminal, a lumber company, automobile storage and repair facility, and a dry cleaning facility.Site Geology and Hydrogeology: The site is underlain by a layer of miscellaneous fill material that is underlain by a continuous clay layer. It is underlain by an approximately 5.5-foot to 13-foot thick layer of miscellaneous fill material that is underlain by a clay layer that terminates at 15 feet below ground surface (bgs).Groundwater is approximately 2.5 to 10 feet bgs. Due the site's proximity to the Canal, groundwater flow is tidally influenced. An approximately 5 foot to 8 foot thick clay confining unit is located approximately 9 feet to 10 feet bgs that separates the shallow aquifer from the lower groundwater unit.Current Status: The Department approved the Interim Remedial Measure (IRM) Work Plan in March 2014. The excavation of soil source area and off-site disposal (the major component of this IRM) will begin in March 2014.

Env Problem: The primary contaminants of concern are xylene, lead, and benzo(a)anthracene. Soil source removal and off-site disposal and soil cover to prevent contact with remaining contamination will be the major components of remedial activities.Groundwater contamination is nominal and will improve upon the removal of contaminated soil.Based on insignificant levels of volatile organic compounds found in the soil gas results, soil vapor intrusion is not anticipated for this site. As a precaution, any newly constructed buildings will have a vapor barrier membrane and a sub-slab depressurization system.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Description: LOCATION:The Site is located at 198 Douglass Street in Brooklyn, between Bond Street and the Gowanus Canal. SITE FEATURES:The property is 0.18 acres and features a one-story warehouse building which is currently used for the storage of art and antique goods and furniture. CURRENT USE/ZONING:The property is currently used for the storage of antique goods. It is zoned for manufacturing use.HISTORICAL USES:The Site has historically been used for a variety of industrial purposes. Prior to its current use, the Site was owned and operated by Paramount Plumbing (approx. 1995 to 1998) and O.Z. Electrical Manufacturing Company Inc. (approx. 1960 to 1995). O.Z. also formerly owned and operated on the adjacent property (196 Douglass) as well as three buildings to the west, across Bond Street (262 Bond Street). Earlier owners/operators include P.H. Hughes Lime, Brick and Lath Yard (approx. 1887 to 1900); a gravel/crushed stone yard (approx. 1900 to 1930); and the Knickerbockers Ice Company, which included a machine shop (1930's). SITE GEOLOGY AND HYDROGEOLOGY:Fill material consisting of sand, silt, gravel, and construction/demolition debris has been encountered to approximately 10 feet below ground surface (fbgs). Beneath the fill material (10 to 36 fbgs) is a sequence of inter-bedded silt, clay, sand, and peat layers atop fine to coarse-grained sand to a depth of approximately 48 fbgs. Groundwater has been encountered at depths ranging from 1.5 fbgs to 9 fbgs, during various investigations. USEPA Superfund investigations in the area of the Gowanus Canal have found that shallow groundwater flows toward the canal at both low and high tide. Intermediate groundwater generally flows upward toward the canal. Based on water chemistry measurements in surface water and groundwater (collected during Superfund investigations of the Gowanus Canal), it was concluded that infiltration from the canal controls water quality in shallow wells adjacent to the canal, with decreasing influence with distance from the canal.The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites. NATURE AND EXTENT OF CONTAMINATION:A Site Investigation performed in April/May 2012 confirmed that tetrachloroethene (PCE) previously detected in groundwater was limited and not indicative of a release of hazardous waste. GROUNDWATER:In 2006, PCE was detected in

groundwater at a concentration of 1,600 parts per billion (ppb) and benzene at 14 ppb, from one grab groundwater sample collected from one boring. In the 2012 Site Investigation, groundwater was sampled from four groundwater monitoring wells. Groundwater samples were analyzed for volatile organic compounds (VOCs). Several VOCs were detected; however, the only contaminants detected at concentrations that exceed standards were isopropylbenzene (detected at 5.1 ppb compared to the standard of 5.0 ppb) and methyl tertiary butyl ether (MTBE) (detected at 10.7 ppb compared to the standard of 10 ppb). The standards cited for groundwater are the NYS Ambient Water Quality Standards and Guidance Values for Water Class GA from NYSDEC Technical & Operational Guidance Series (TOGS) 1.1.1.SOIL:The 2012 Site Investigation included soil sampling from 7 soil borings and analysis for VOCs. The only contaminant detected above standards was isopropylbenzene, detected at 3.91 parts per million (ppm) compared to the CP-51 Supplemental Soil Cleanup Objective for protection of groundwater of 2.3 ppm. A few VOCs were detected on site in the 2006 soil boring, but at very low concentrations.SOIL VAPOR:In soil vapor, trichloroethene (TCE) was detected in two samples at a maximum concentration of 200 micrograms per cubic meter (ug/m3); however TCE was not detected above reporting limits in concurrent indoor air samples.The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites.

DEC Memo: DEC Piper contacted Caller Jeff Flannigan. He will copy report and analytical and send to DEC.9/8/06- DEC Piper reviewed subsurface investigation report. AS per report, investigaestigation was due to the presence of petroleum vaprs inside work area. 1 boring was completed. Groundwater was encountered at 9 feet bgs. A water sample was collected at 34 feet which contained elevated levels of benzene, PCE and a variety of SVOCs were above standards. A soil sample was collected at 36 feet bgs which indicated trace levels of chlorinated solvents. Indoor air samples revealed elevated levels of petroleum and chlorinated solvents were detected above standards. Due to the soil and gw samples not being collected at the gw interface, the concentrations observed where collected, and indoor air quality, additional investigation is warranted. Case referred to remediation.9/20/06- DEC Piper . Spill transfferred to remediation as per Austin on 9/8/06.11/13/06 - reviewed site assessment report, found PERC in GW. Need to contact consultant to get more delineation

MAP FINDINGS

FORMER O.Z. ELECTRICAL (Continued)

S108057803

of the GW contamination. - KST4/11/08 - This spill has been transferred to D. Kaplan. Since previous reports were missing the representative of the site was contacted and the subsurface investigation report was obtained from the environmental consultant. 5/7/08 - Met the environmental consultant (Djamel Lekmine, AMEC), architect Jeff Flannigan who was acting as representative of the owner (was in charge of construction at the time the spill was reported), and attorney for the owner at the site. The entire lot is covered with a building with slab on grade finished floor. The building serves as a storage facility for fine art. It was explained that additional investigation was necessary. 5/19/08 - Environmental consultant sent a proposed work plan for additional investigation which was very incomplete (see edocs). 5/27/08 - A letter was sent to the environmental consultant describing additional requirements for a subsurface investigation.8/26/08 - Attorney for the owner has been trying to work out a site access agreement with the owner of the adjacent property (196 Douglass St). Representative for the owner of 196 indicated that they are unwilling to grant site access.9/26/08 - After negotiations with the owner of 196 Douglass for site access proved unsuccessful, DEC attorney (John Urda) sent a letter to the owner siting statutory authority for site access for investigation work. See edocs.5/11/09- The work was performed February 10th and 11th. The report has not yet been received.6/18/10-Vought-Received inquiry from DEC Austin as to whether Site should be transferred to Vought as P-Site . Vought discussed with DEC O'Connell and spill reassigned from Kaplan to Vought and entered into P-Site Tracking Spreadsheet.2/8/11-Vought-Spill transferred from DEC Vought to DEC Kaplan for further action.6/10/11 - Transferred to hazardous waste program as potential hazardous waste site (P site 224152)

REMARKS: THERE WAS SOIL SAMPLE TESTING AND GROUND WATER TESTING. THERE WAS DIFFENENT MATERIAL THAT WAS FOUND AT THE SITE. THERE ARE TRACES OF VOLITALE ORGANIC COMPOUND, TETRACHLOROETHENE,ETHYLBENZENE, XYLENE WAS FOUND IN SOIL SAMPLE. THE WATER SAMPLE HAD BENZINE, TETRACHLOROETHENE. THEY WERE DIGGING AT THIS SITE.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "O'CONNELL"From DEC # 9608854 file: 11/21/96: KATZ SPOKE WITH CHERYL PAYNE, CON ED - FREE PRODUCT FOUND IN WELL. TIGHTNESS TEST DONE ON TANK & PIPING AND FOUND TO BE TIGHT. UNKNOWN SOURCE OF PRODUCT - POSSIBLY OVERFILLS. 2000 GALLON GASOLINE & 2000 GALLON DIESEL UNDER CONCRETE MAT. NOT AWARE OF ANY PROBLEMS WITH DISPENSERS. (GHK)2/10/97: Con Ed submits pre-closure assessment for north and south tank areas (north UST area contains 1 x 2,500 gallon gasoline and 1 x 2,500 gallon diesel tank; south UST area contains 1 x 4,000 gallon gasoline and 1 x 4,000 gallon diesel tank). Results of soil and groundwater sampling indicate both areas have been impacted by releases from the tanks and/or piping. Con Ed proposes to conduct site investigation. (GHK)9/30/98, 12:31 PM: Voice message from Ann Ip (Con Ed Remediation) - digging around 2,500 gal diesel UST (north UST area) - found contaminated soil. Estimated 15 cu yds soil. (CAE)10/8/98: Spoke with Tom Lasker (Con Ed Const Mgmt) - 2500 gal tanks are not out yet. He doesn't anticipate that excavation will be ready for inspection til next Tuesday. Jim Seisfeld is handling the project for Ann Ip while she is away. (CAE)10/21/98: Excavation for removal of 2500 gallon tanks (north area) - excavation about 15 feet deep, 20' x 30'. No apparent visible contamination. No odor. Will do 5 composites (5:1) on side walls, 5 grabs. (CAE)11/2/98: Tank pulls - Con Ed Construction Mgmt. has excavated as deep as they need to go to put in new tanks. Inspected soil from bottom of excavation - strong petroleum odor. Jar test - sheen on water. Dug down with bucket into bottom of excavation - groundwater about 1.5 to 2 feet below bottom. Told Con Ed to excavate to that depth on entire excavation. Will tanke 4 grab, 4 composite samples for VOCs, SVOCs - 3 walls and bottom. Already did some sampling when tank was originally pulled (5 grab, 5 composite) but present excavation extends beyond original so have to do more samples. (CAE)11/12/03: e-mail from Ray Fitzpatrick (Con Ed Remediation) indicating that 2 x 4000 gallon tanks (south UST area) are to be removed on Nov. 19 (tentative schedule). 6/20/00: Meeting w/ Angel Chang (Con Ed Remediation) - Con Ed was told of possible off-site contamination at Mendon Truck Leasing site (located south of Third Ave Yard). Ground water analytical data provided by Mark Tibbe (DEC project manager) indicates contamination in two of their upgradient wells - gw contour map shows Con Ed's south UST area is immediately upgradient (across the street) from these wells. Con

Ed is to submit draft work plan for additional investigation around both north and south UST areas. (JHO)7/24/00: Con Ed submits Tank Closure Report documenting results of post-excavation soil samples, and a Site Investigation Work Plan (SIWP). Proposal includes 6 soil borings/4 monitoring wells for the north UST area, and 10 soil borings/7 monitoring wells for the south UST area.9/11/00: Comment letter to Con Ed on SIWP - requests addition of one well upgradient of the north UST area; clarifies soil sampling protocol; clarifies lab analytical methods. (KMF)11/22/00: response form Con Ed satisfactorily responds to comments.11/27/00: SIWP approved. (KMF)12/13/00: Field work commences.1/18/01: Free product found in well MW-4N in north UST area. This is the well immediately north (upgradient) of the tanks. Approximately 1 inch of product was noted. Absorbent sock installed to recover product. (KMF)6/1/01: Site Characterization Report submitted. Results indicate elevated concentrations of BTEX and MTBE in soils and groundwater for both tank areas, and intermittent free product in north UST area (well MW-4N).2/13/03: comment letter to Con Ed - recommends monthly gauging to continue, and include VEFR event; requests installation of 2 add'l borings/wells northeast and west of north UST area (work plan required); requests submittal of historic groundwater analytical data. (KMF)3/6/03: VEFR event postponed - waste characterization results for groundwater has benzene concentration of 3.7 ppm (cannot be accepted at Astoria waste treatment facility - must arrange for subcontractor. (KMF)3/7/03: Clarified with M. Gonzalez that quarterly sampling to be conducted on all wells. Also, monthly monitoring on all wells. (KMF)3/17/03: Response letter from Con Ed addresses comments in 2/13/03 letter.4/21/03: Work Plan for installation of 3 additional wells at the north UST area. Plan prepared by First Environment.6/25/03: comment letter to Con Ed - clarifies sampling and analytical protocols; and requests revisions to QAPP. (KMF)10/9/03: Response letter from Con Ed satisfactorily addresses comments in 6/25/03 comment letter. (JHO)10/14/03: Work plan approved. (JHO)12/16/03: Meeting with M. Gonzalez - VEFR requested by K. Foley in March 2003 was done. Con Ed only implemented quarterly sampling at this location in 2003 - three quarters done so far (4Q this week). Dissolved-phase contamination found in both north and south tank areas. Free product only noted in one well (MW-4N, north tanks). Three new wells are to be installed by First Environment in January. Following meeting, e-mail sent to M. Conzalez requesting lead be added to list of analytes for future quarterly sampling events. (JHO)11/05/09: Multitple documents had been received over interim period including RAWP, GW monitoring reports and subsequent IRM WP. RAWP was not implemented. Free product identified in one well in south UST area in September 2009. RP's consultant proposed additional delineation investigation of south UST area with VEFR and IRM for injection of ORC to address GW contamination remaining in north UST area. Discussed project with RP's consultant and a revised IRM WP will be submitted. (JOC)5/23/12: Draft remedial selection/remedial action work plan submitted 2/28/12. Document reviewed and letter with comments sent 3/19/12. Letter response and revised work plan received on 5/4/12. (JOC)6/8/12: Reviewed 5/4/12 response from Con Edison and AECOM and sent comments via email 5/25/12; met today with Con Edison and AECOM to discuss those comments. As agreed today, Con Edison will put together a letter which documents the changes; based on some anticipated logistical issues at the facility, the pre-design work will be separated out

with the objective of getting it completed within the next 3 weeks, so the focus of the letter should be to document changes to the pre-design work; the revisions to the RAWP can come later based on the pre-design work. Overall we had reached agreement on all the issues. (JOC)9/6/12 - received email 9/4/12 from AECOM for Con Edison which was text as received at 6/8/12 meeting; attached to email was revised pre-design investigation summary, revised sample table, revised figure. Under review. (JOC)9/28/12 - sent letter conditionally approving pre-design investigation as a separate effort from the remedial action 9/14; per discussion with Con Edison 9/24, their consultant is waiting for purchase order finalization through from Con Edison before they will start the work; Con Edison is working on getting the changes into their new PO system and will advise of updated schedule when available (JOC)10/23/12 - received email from Con Edison:>>> "Gonzalez, Mariela" 10/23/2012 9:29 AM >>>Joe, preparation field activities for the drilling work are in progress. AECOM and GEOD mobilized on October 17 to start with a geophysical survey and then to commence with utility clearance which will continue thru the end of this week. (1)Aztec, a subcontractor for AECOM, is pre-clearing the soil boring locations using a Safex unit and hand tools dig; and (2) day lightening (by test pits ) of marked out utilities with GEOD surveying location and depths.Below a brief chronology of activities completed thru October 22nd. Wednesday October 17, 2012: Geod was on site to perform GPR of the excavation. A sketch was created for field use. A map will be completed in a couple weeks. Thursday October, 18, 2012: Geod was on site to continue with the topographical survey. Allstate a subcontractor of Geod cleared 3 locations of asphalt. Friday October 19, 2012: Geod and AECOM were on site. Allstate was scheduled to be on site at 730 with a vac truck but failed to show up. It was raining and there was a good deal of traffic. At 11AM Allstate was still en route and the day was called. Allstate will not be allowed on site to complete the work. Monday October 22, 2012: Aztech Pre cleared down to 5 feet D1 and D6. 3 locations were started for day lighting, to uncover gas lines and electrical lines. Geod pinpointed the depth of the gas lines. Con Ed electrical Operations crew on site to assist determining which lines are active or dead. Called Con Edison PM to discuss/confirm. Pre-clearing should be finished this week; drilling should start next week. They will keep me posted on the schedule if any changes. (JOC)11/09/12 - PDI activities were completed on October 26th. No impediments were identified to implementing the investigation as approved. Field progress updates in edocs. (JOC)5/3/13 - Investigation continued to attempt to delineate the soil contamination around the south UST area, but is not completed. Notably one area (to the northwest of the UST area) had contamination with a different profile than observed in the UST area and may not be related to UST operations. Reviewed the report and sent comments/items for discussion to Con Edison via email 4/10/13; meeting was scheduled for 4/24 but was cancelled by Con Edison. (JOC) CONTRACTORS REMOVING GAS TANK AND DISCOVERED APPROX 15 SQ YARDS OF STAINED SOIL THAT SMELLS LIKE GASOLINE. CROSS REF TO 96-05014

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

| Waste name: | IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE. |

| Waste name: | A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE. |

|           | Description: Handler: Non-Generators do not presently generate hazardous waste |

Handler Activities Summary:

|                                     |    |
|-------------------------------------|----|
| U.S. importer of hazardous waste:   | No |
| Mixed waste (haz. and radioactive): | No |
| Recycler of hazardous waste:        | No |
| Transporter of hazardous waste:     | No |
| Treater, storer or disposer of HW:  | No |
| Underground injection activity:     | No |
| On-site burner exemption:           | No |
| Furnace exemption:                  | No |
| Used oil fuel burner:               | No |
| Used oil processor:                 | No |
| User oil refiner:                   | No |
| Used oil fuel marketer to burner:   | No |
| Used oil Specification marketer:    | No |
| Used oil transfer facility:         | No |
| Used oil transporter:               | No |

Historical Generators:

DEC Memo: Prior to Sept. 2004 data translation this spill Lead\_DEC Field was "FOLEY / ARAKHAN"7/25/02 Met with M. Sicherman and Sam Arakhan to discuss the high PCB readings in the employee parking lot. She explained that this spill was called in and was thought to be gasoline. We discussed combining the UST and PCB investigations. (KMF)9/5/02 Phonecall from Maureen Sicherman. So far, they cannot locate 14 tanks. Suggested Con Ed submit proposal to do a site investigation. (KMF)9/16/02 Phone converstaion with M. Sicherman. Submitting letter on how they're going to locate tanks. Not going to try GPR because they've tried this in the area before and were unsuccessful. Going to dig 5' deep trenches and test pits based on information from property records and Sanborne maps. These records indicate tanks were removed in 1964 (they disappear from map to map). QAPP/Workplan being rewritten. (KMF)9/25/02 Received UST Investigation proposal from M. Gonzalez. (KMF)10/9/02 Phone conversation with M. Sicherman. Include diesel as contaminant and PCBs. Use "Fuel oil contaminated soil" TAGM 4046. Will send letter confirming conversation. (KMF)10/9/02 Relayed Sam Arakhan's comments

to M. Sicherman. Requested site map and MW-2 location. (KMF)10/10/02 Spoke with M. Sicherman. Will address comments when she receives a letter. (KMF)10/10/02 Sent out letter in response to scope of work. (KMF)11/4/02 Received QAPP for the Groundwater Investigation and Remedial Action Plan for PCBs and unknown USTs in the employee parking lot dated May 28, 2002 (revised November 1, 2002).11/21/02 Yesterday afternoon found wall of tank while trenching. Appear to be heating oil tanks (maybe 250gal). Clean Harbors uncovered another tank while looking for port to first tank. Excavation is 40'X20'. Asked about 30day requirement to notify DEC to close the tanks. Replied that this did not apply in this case. Also directed her to arrange to register the tanks. (KMF)11/21/02 Update: Removed 3 drums of oily sludge from tanks. Will fully characterize and analyze for PCBs. Regular turnaround for rolloff waste characterization of soils and sludge. Appendix B Category B deliverables will cause them to store rolloff for about a month.11/25/02 Construction management was proceeding this morning and saw two tanks ad adjacent two tanks. Four tanks altogether. Appear to be 550gal. Will sample liquid and determine flash point and product. (KMF)11/25/02 Update: UST-II area (where they had shifted the soil within the excavation) was expanded another 5' north and uncovered top of tanks. Found mostly water inside. Took samples and saw some sludge at bottom.12/11/02Update: PCB confirmatory sampling results are not yet available. All potentially impacted soil from around lube tanks had been excavated and samples collected from soil. Also reported as hazardous for lead. Will be disposed of as such. At the south area, gas tanks liquids were treated as hazardous for benzene. (KMF)12/17/02Mariela Gonzalez informed me that an additional 6 tanks were located and were full of water. Will sample for oil ID, PCBs and RCRA. Soil is stained under the other 4 tanks. Concrete anchoring slab was broken out (approx 4" thick) and contamination was found. Waiting to see if water in excavation percolates. Will inspect graves tomorrow afternoon if possible. (KMF)12/19/02Met with M. Gonzalez and Chad of Jacques Whitford. Met to discuss results of preliminary samples. She will send a summary of results with an updated map of tank areas. Mariela is concerned about levels of metals and requested that DEC negotiate cleanup levels and amounts of soil to be removed. Sidewalk on east side of UST-II area mat be undermined. One high PCB hit (26ppm) on south side of PCB-II area. Mariela is concerned about how much soil will need to be removed from this area. Will research test pit data and determine extent of contamination in this area if possible. UST-I area - no tanks were found initially. Found two lube oil tanks when trench was extended. Additionally 6 tanks located north of UST-I area. Samples have been taken from the tanks. (KMF)1/05/04 Arakhan PCB cleanup and removal of old USTs have been completed. ConEd (Maria Gonzalez) will submit report shortly. Subsequent to completion of PCB remediation, elevated concentrations of BTEX/gasoline detected in monitoring wells. Additional investigation and remediation efforts conducted. (JHO)4/22/04: Con Edison submits UST Closure Summary Report for 14 tanks uncovered during excavation and removal of PCB contaminated soil associated with the employee parking lot. The report documents post-excavation soil sampling resultsfor PCBs, VOCs and SVOCs.5/27/04: E-mail from Con Ed (M. Gonzalez) transmitting results of May 2004 groundwater sampling event. To summarize, there are low to moderate concentrations of BTEX compounds in groundwater which exceed standards. For example, benzene = 22 ppb max, toluene = 15 ppb max, ethylbenzene = 140 ppb max, xylene = 170 ppb max. See

eDocs for results. (JHO)6/7/04: revised groundwater contour map submitted by Con ed. See eDocs. (JHO)6/8/04: e-mail to Con Ed Mariela Gonzalez:"This is the third different groundwater contour/flow direction that I have seen for this site. I guess the addition of the wells around the north UST area helped get a better handle on it. I reviewed the groundwater analytical data for both the employee parking lot and the Service Center tanks [NOTE - see spill no. 9808009 for Service Center spill - JHO]. I think we are dealing with two distinct plumes, based on the following observations:1. I don't see any MTBE associated with the employee parking lot plume. If this was, in fact, the leading edge of the plume from the Service Center, I would expect to see MTBE in addition to the BTEX.2. The presence of lead in the employee parking lot soils also leads me to believe this is a plume of older gasoline (leaded gas, no MTBE). How long before the new building is to be constructed on the employee parking lot? My suggestion would be to use ORC on this plume (hopefully we can do this now before construction begins) and install two wells each in the sidewalk adjacent to MW-1 and MW-3." (JHO)6/10/04: E-mail update from M. Gonzalez: "I'm glad you had the chance to catch up with this site. It is my understanding that construction activities at this site may begin in early August or September. [NOTE: Con Ed is planning on constructing a new office building on the former employee parking lot area.- JHO] Regarding ORC application at this site, I believe that because of the aggressive remediation at this site (more than 9,000 tons of soil removed and all 14 USTs removed) and the current levels of VOCs in GW -range between 11 ppb (Benzene) to 160 ppb (Xylenes), it wouldn't be necessary. It seems like the plume is stable and mainly around the MW1. I know that we have a short window of opportunity to do it and with the ORC treatment being able to get a faster remediation conditions to achieve a NFA, rather than waiting and monitoring GW for much longer time. So, I'm open to discuss. Perhaps, we could perform one ORC application but limited to the North Area (around MW1), since the middle and south areas (where MW2 and MW3) are clean. The approximate cost of ORC application for the north area is \$30-40 K. Regarding installation of additional MWs, we need to further evaluate the number and the location required because heavy presence of all kind of underground utilities between the property and the Fourth Ave. Within the property say, by the north-east corner (about 60-65 feet north of MW1) is a possibility. MW1 and MW 3 will be preserved. I'll be calling you to discuss." (JHO)6/25/04: e-mail from M. Gonzalez proposing ORC injection for wells at parking lot, as follows:"Jane, here attached the GW flow contour for the 3rd Ave Yard (combining the MWs at the Service Center and the parking Lot). Also, FE [First Environment]used Regensis calculation web tool to determine the optimal grid size and ORC material required for a limited ORC injection to address VOCs exceedances in the MW#1. I provided FE the end-point soil results for the North excavation area. John plotted the soil VOC results in the proposed ORC injection site Plan. (Note: I took a second look to those end-point soil VOCs concentration, and they are below the TAGM Recommended Cleanup objective to protect GW, Also to note that excavation at the north area went down to 10-11 feet, in contrast to the south or TP15 area which were excavated as deep as 14 feet.) I would like to schedule the ORC application at the Parking Lot ASAP." See eDocs for e-mail and attachments. (JHO)7/9/04: E-mail to Con Ed Gonzalez approving ORC proposal:"I reviewed the info you e-mailed me on June 25 and agree with the ORC proposal with one change: I'd like

U001832241

FE to install one new monitoring well in the sidewalk downgradient of the ORC injection area. I know you told me that well MW-1 will be spared from the construction activities, but I'd still like to have a monitoring point that is outside of the immediate injection zone." (JHO)7/23/04: e-mail from Con Ed Gonzalez: "This note to update you with our plans regarding the ORC project at the 3rd Ave yard Parking Lot." Monday, July 26: A field walk among Remediation, CM, the consultant and subcontractor is scheduled at 9 AM. We will be reviewing the scope of work and selecting the injection points. Also we will be reviewing utility drawings and the code 753 markups so that we can select a location for the requested sentinel MW."The ORC implementation will commence on July 30th."Pending on MW location, if for example is to be done outside the site property (on the sidewalk), a street permit will have be secured, at this time we don't know, or at which sidewalk the MW will be installed, therefore, upon Monday field walk, I'll update you regarding proposed schedule to install this MW." (JHO)7/26/04: site visit with Con ed (Mariela Gonzalez, Vinny Desiderio and Ulrick Samuel) and First Environment (John Engdahl). 2 additional wells will be installed to the northeast and southeast of existing well MW-1 in the former parking lot area. Both proposed wells are within property/fence line.(JHO)7/26/07: e-mail from Con Ed Gonzalez: As we discussed, I'm attaching GW data from the original three MWs installed at the parking Lot. These wells were destroyed during soil excavation. Also attached is GW data (three rounds of data) for the existing MW#3 (at the south area). I only summarized VOCs since SVOC are either ND or below GW standards.And to document, below I typed some of the clarifications regarding the scope of work:- Two MWs (could be 2" diameter) to be installed at about 5' south and north of the ORC injection borders. The wells to be located the closest possible toward the property fence at 4th Ave, but inside the parking lot property.- At these two MW locations, soil sampling is not anticipated since wells are being drilled on clean sand from 0 to 10'. If soil below 10' shows any evidence of contamination (odor, color or high PID readings) then a soil sample above the GW elevation should be collected.- The MW #1 and #2 will be extended out [NOTE: converted to stick up wells - JHO] so that the MWs are not covered during paving/site surface restoration activities." E-mailed response to Gonzalez: "The concentrations in groundwater from the one round of sampling of the original wells in the south tank area indicates no detectable VOCs. These wells were closer to the tanks (the ostensible source of the contamination). The concentrations in new MW-3 seem to be fairly consistent, and are low. You can stick to the original plan - i.e., ORC for the north tank area. The south area will be capped with the new building, preventing any further rainwater infiltration. I would recommend that well MW-3 be sampled on the same frequency as the north area wells in order to track any remaining contaminant concerns." NOTE ADDED 9/11/07 BY JHO - there were 14 x 550-gallon gasoline USTs located in the northern area, which is the source of the contamination. (JHO)7/28/04: NFA letter for PCBs in soil issued to Con Edison. (SKA)9/24/04: E-mail from M. Gonzalez transmitting lab results for soil and groundwater collected during installation of additional monitoring wells. High concentrations of gasoline constituents were noted in soil along fence line, where no soil was previously excavated. The original excavation for the PCB contaminated soil encountered a number of 550-gallon gasoline USTs, which were excavated and removed. However, in an effort to prevent

the fence along the site perimeter from collapsing, excavation was halted before reaching clean end-points. The two new wells (MW-4 and MW-5) were installed in the "native" material. Concentrations in soil in the native material range from ND for benzene to 1416 ppm for xylenes. Groundwater collected from wells MW-1, MW-3, MW-4 and MW-5 show moderate to high concentrations of dissolved BTEX (highest benzene = 1730 ppb, toluene = 7070 ppb, ethylbenzene = 3170 ppb, xylene = 16,600 ppb). These are the concentrations following ORC injection, which was completed on July 31, 2004.10/5/04: Con Ed submits report on September 2004 monitoring well installation and groundwater sampling event. 8/6/07: e-mail from John Engdahl (First Environment) transmitting conceptual proposal for surfactant injection to enhance product recovery efforts: "Attached please find our memo summarizing the recent investigation activities and the proposed investigation (soil gas) and remediation (VEFR w/ surfactant injection) for the 3rd Avenue Employee Parking Lot. Your expedited review of the document would be greatly appreciated, particularly the soil gas sampling portion. We followed the NYS DOH guidance document, however the guidance document does not specifically address our situation (i.e., near slab samples for VI assessment purposes, unconfined surface cover, etc.). We developed our scope based on our experience and knowledge from other sites and other guidance documents, including the NJDEP, EPA, ITRC, and API. We have schedule the GeoProbe for this Thursday, August 9, 2007." See eDocs for memo. (JHO)8/9/07: e-mail response to First Environment (Engdahl): "As we discussed on the phone this morning, NYSDOH has reviewed the soil vapor sampling plan and finds it acceptable. You will not need to run the SIM method, since the TO-15 detection limits should be sufficient. Please make sure to tell the lab what contaminants you are specifically interested in (i.e., BTEX). As for the proposal for surfactant flushing, please send a hard copy of the memo with the revised figure to Jim HarringtonNYSDEC - Bureau of Technical Support625 BroadwayAlbany, NY 12233-7020Please send me a hard copy of the revised figure, and e-mail me a PDF version as well."NOTE: memo saved in eDocs contains both original and revised site plan. (JHO)8/22/07: Spoke with Jim Harrington, DER Technical Support - he has assigned this to Kevin Carpenter, who will review the proposal and provide comments. (JHO)1/31/14 - Remedial action work plan recieved from consultant recommended surfactant injection to address LNAPL which has been recurring in site wells. Sent comments/questions reply via email. (JOC)

DEC Memo: Sangesland spoke to Joe Ostrowski. He said there was a 55 gal drum that broke while being loaded onto a truck. Spill was contained and cleaned. Joe says there was NO oil into the storm drain.Piper will make a site visit.Piper. While moving a drum of waste oil fro mthe yard. The bottom broke. An oil water mixture ran down the curb and int othe sewer . upon arrival PTC was pumping the sewer clean and the roadway was cleaned using speedy dry. Spill closed.

Remarks: caller states that there is a massive oil spill coming from a tank out of a garage and flowing down the street into the sewer. caller states that the oil is flowing like a small stream. caller was driving by and noticed the spill.

DEC Memo: During a PBS inspection on 11/1/11, petroleum staining was found on the ground around various UST's. In addition, there was a sheen visible on the water, which should not be present, in the secondary containment basin of Tank 005. On the floor of the boiler room, there were spill pads saturated with petroleum.1/27/12 Spill case opened today at request of DLE. PBS settlement conference held today. General Counsel will be issuing a consent oprder to PTC shortly. PTC was told today to provide sampling locations and depths of the unpaved areas where contaminated soil was found. They provided photos showing no visible contamination at the unpaved areas. No photos of the secondary containment area of Tank 005 or of the boiler room were provided. PTC stated that those areas were cleaned and epoxied (photos to be required in the compliance schedule). At the meeting, PTC was told that photos opf these areas are required. bf 2/24/12 Yesterday, sent e-mail to Nathan Edeson, engineer. He also e-amiled

me on 2/15/12 and called and left messages on 2/15, 2/21, and 2/23. He requested approval of their sampling plan and a copy of the PBS Inspection Report. The contaminated soil in the yard was removed according to PTC. Tjhey will sample in the affected areas. I replied to Mr. Edeson by e-mail yesterday requesting a list of contaminants they plan on sampling for and I provided the inspection report. He replied that they will sample for B-Tex. Today I responded stating that they need to sample for the contaminants listed in Table 3 of CP-51. I sent attached a pdf of Table 3 to the e-mail. bf9/10/12 Called N. Edeson (917)299-4340. Left voicemail message requesting the status of the sampling results. bf

Site name: PETROLEUM TAMA CLEANERS  
Classification: Unverified

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 06/01/1987  
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE  
Area of violation: Not reported  
Date achieved compliance: Not reported  
Evaluation lead agency: State

| AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. |

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number: 046  
Tank ID: 51360  
Tank Status: In Service  
Material Name: In Service  
Capacity Gallons: 4000  
Install Date: 08/01/1996  
Date Tank Closed: Not reported  
Registered: True  
Tank Location: Underground  
Tank Type: Equivalent technology  
Material Code: 2712  
Common Name of Substance: Gasoline/Ethanol

Tightness Test Method: 09  
Date Test: 12/01/1996  
Next Test Date: Not reported  
Pipe Model: Not reported  
Modified By: NRLOMBAR  
Last Modified: 05/13/2013

Equipment Records:

F04 - Pipe External Protection - Fiberglass  
K01 - Spill Prevention - Catch Basin  
C02 - Pipe Location - Underground/On-ground  
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring  
I02 - Overfill - High Level Alarm  
I03 - Overfill - Automatic Shut-Off  
D06 - Pipe Type - Fiberglass Reinforced Plastic (FRP)  
G04 - Tank Secondary Containment - Double-Walled (Underground)  
L07 - Piping Leak Detection - Pressurized Piping Leak Detector  
E04 - Piping Secondary Containment - Double-Walled (Underground)  
B04 - Tank External Protection - Fiberglass  
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring  
A00 - Tank Internal Protection - None  
J01 - Dispenser - Pressurized Dispenser

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SUN"01/23/2004-Sun-File Review by Sun:Site Status Update Report, Arip 2003 through August 2003, by Geological Services Corp (GSC), dated 10/16/2003: Six (6) monitorin wells were gauged and sampled on July 17, 2003. A soil vaplr extraction well (SVE-1) was installed on July 30, 2003 and pilot test on SVE-1 was conducted on August 8, 2003. No LPH was detected. The groundwater depth ranged from 11.74 feet to 15.68 feet, and groundwater flow was in northwest direction. MW-2 has the maximum BTEX concentration of 11,400 ug/l and maimum MTBE concentration of 1,800 ug/l. Work performed during this period included repair and patch leak from wall in oil closet located in the subway. installation of three additional wells. A remedial action plan will be submitted by GSC based on the results of the pilot test. Per Hess' letter to DEC dated 10/28/2003, Hess is working with the New York City Transit Authority (NYCTA) to address an apparent hydrocarbon sheen in conjunction with groundwater seepage within a subsurface subway station utility closet. (Sun) 01/22/2004- Site visit by Joe Sun and Mark Tibbe on 1/22/2004. Inspection with Mike Matri of Hess and William Schaefer of GSC showed that some slight infiltration of groundwater continues where the urethane grout waterproofing did not adhere to the concrete. GSC has recommended a second waterproofing event utilizing a hydraulic concrete product. The product is now waiting for NYCTA's approval. (Sun)SEE Also Spill Nos. 0104798/0201876.05/05/04-File Update by Sun: On 05/05/04 Sun sent a letter to Hess requiring complete delineation of soil and groundwater contamination, submittal of an Investigation Summary report followed by a Remedial Action Plan. The Department set a deadline of May 28, 2004 for signing the Stipulation Agreement. (Sun)06/06/05 File Update by Sun: On 06/06/05, Sun sent a letter to Hess' Project Manager, Mike Matri, informing him that the Department approves Hess' proposed plan to take the opportunity of station renovation commencing in June, 2005 to install below ground environmental remediation infrastructure for future remediation of petroleum impacted soil and groundwater. Specifically, the Department approves the following planned installations at the station:  
1.Installation of three additional SVE wells (PMW-8 through PMW-10).  
2.Modification of existing 2-inch well FW-7 to include a 1-inch "injection " line which will be piped to the proposed remediation system location, The piping will potentially be used in the future for injection purposes (e.g., Biosolve, chemical oxidation and/or bioremediation). 3.Monitoring wells SVE-1, MW-2, and the three proposed SVE wells (PMW-8 through PMW-10) will have environmental piping installed from the wells to the proposed system location

S104276740

area. The Department requires a formal Remedial Action Plan (RAP) in conjunction with the station redevelopment activities be submitted by Hess during the third quarter of 2005. (Sun) 10/19/2005: Project reassigned from Sun to Andersen 10/19/2005: Reviewed hydrogeologic groundwater report dated 8/29/2005. Report indicated liquid phase hydrocarbons and BTEX concentrations of up to 19,520 ppb. Report indicated that informal proposed remedial action plan discussed in abovementioned 6/6/05 entry is delayed and possibly canceled. The report states "Amerada Hess Corporation will either request an extension to submit the currently proposed Remedial Action Plan or to submit a revised Remedial Action Plan". The next triannual sampling event is scheduled for November 2005. Additionally, a Stip was sent out on 5/5/04, which was never signed due to Hess waiting for a Consent Order. 10/25/05: Mailed a failure to sign Stip letter. Stip signature due on 11/15/2005. 1/26/06: 1/25/06 meeting between Quantum, NYSDEC, and GSC/Kleinfelder. The site is under redevelopment. An RAP will be prepared. Delineation will be investigated on the other side of 4th avenue. 3/1/06: Signed stipulation agreement, effective date 2/23/06. Investigation plan due 4/24/06. 4/24/06: Reviewed the site status update report/investigation plan dated 4/21/06. Report indicates that additional delineation on the east side of 4th avenue is not feasible due to utilities. Max BTEX 28,587 ppb (SVE1) and max MTBE 1,710 ppb (MW2). Depth to water 10-15 ft. RAP due 6/22/06. 5/25/06: Pilot testing on 5/25/06/29/2006: Meeting with Hess, NYSDEC, Quantum, EnviroTrac and GSC on 6/28/2006. RAP in progress. Endpoint sampling will be submitted for spill bucket replacement excavation. 7/28/06: RAP submission deadline extended to 9/21/06. 8/9/06: Conference call with Hess, Quantum, and GSC/Kleinfelder. The ROI during SVE pilot testing was only 10 ft. A Hivac pilot test will be performed on 8/10/06 to try to increase the ROI. If it fails an extension will be required to perform additional testing prior to RAP submittal. 8/11/06: Received phone call from Gail Helfrick. A HVAC test was performed which did not result in a significant increase in the RIO. An RAP will be submitted on 9/21/06 as planned, but will require additional sampling to improve the ROI. 8/15/06: See spill 06-02980. The RAP should include remediation for the soil contamination from spill 06-02980. 9/12/06: Received RAP. SVE proposed. Pilot testing was conducted on May 25, 2006 and August 10, 2006. Two existing wells (MW-3 and SVE-1), and six proposed wells (SVE-2 - SVE-7) will be used as extraction points to be connected to a SVE remediation system. The ROI varies from 10 to 50 feet throughout the site. Soil samples will be collected during installation of the new SVE wells, as well as from a soil boring proposed adjacent to MW-6. During system startup operation and maintenance visits will be conducted daily for three days, followed by weekly for the first monthly, followed by monthly. Based on start-up testing, a determination will be made as to whether emission treatment is necessary. Contamination from spill 06-02980 addressed, spill 06-02980 closed and consolidated with 9605719. Numerous sensitive receptors: subway, utilities, basements, schools, Gowanus Canal. AS not proposed due to the proximity of the subway, which runs parallel and adjacent to the site. RAP conditionally approved, with additional groundwater treatment required. 9/21/06: Received phone call from Gail Helfrick (Quantum) and Al Tonn (GSC-K) requesting that the RAP be approved without additional gw treatment. Confirmed that additional gw treatment is required for MW-2, SVE-1, and FW-8. 10/3/06: Received email from gail helfrick: "This email is to confirm

S104276740

our conversation on Tuesday, September 26, 2006 regarding the Remedial Action Plan (RAP) for Hess Station # 32530 in Brooklyn, New York. In the RAP, Hess proposed the installation and operation of a Soil Vapor Extraction system at the site. The NYSDEC approved the proposal for SVE, and also requested groundwater remediation. Based on our conversations, it was agreed that Hess would install underground piping for groundwater treatment during the installation of the SVE system. It was further agreed that Hess would operate the SVE system for 1 full year, and during that year, Hess would 1) evaluate the performance of the SVE system on a monthly basis, 2) continue to monitor groundwater quality (March, July and November), and 3) submit progress reports to the NYSDEC (May, September and January). If after that 1 year period, the data demonstrates that groundwater remediation is necessary, alternative remedial technologies will be evaluated and discussed with the NYSDEC. "10/4/06: Received update report dated 9/27/06. Groundwater samples collected on 7/27/06. BTEX 38,200 ppb (SVE1), mtbe 208 ppb (SVE1). SVE implementation required. 12/11/06: Sent email to Hess to followup on implementation schedule. 12/18/06: Received email from Hess: "We still hope to be able to obtain the MTA permits needed to complete the subsurface intrusive work by January 10, 2007. Once these permits are obtained, we will provide the NYSDEC a schedule for system installation." 1/17/07: Meeting on 1/16/07 with Hess, Delta, NYSDEC. SVE implementation in progress. 3/26/07: Reviewed update report. Wells sampled on 12/26/06. Max BTEX 30,720 ppb (SVE1), Max MTBE 1,000 ppb (MW2). SVE implementation in progress. 5/31/07: Reviewed site status report. Wells sampled on 3/16/07. Max BTEX 25,280 ppb (SVE1), Max MTBE 410 ppb (MW2). SVE installation in progress. 9/20/07: Reviewed site status report. Wells sampled in July 2007. LNAPL in MW 2 (0.03 ft). Max BTEX 30,370 ppb (SVE1). SVE startup planned for November 2007. Sent letter requiring RAP addendum for groundwater treatment (pipes for water removal are planned on being installed as a back-up plan). And increased sampling frequency to quarterly sampling. 5/14/08 - Carlson: Meeting on May 7th 2008 - Hess/Envirotrac will submit a RAP addendum. Reviewed First Quarterly 2008 Update Report. Wells sampled on 2/5/08. Max BTEX concentration 24,220 ppb (SVE1), max MTBE concentration 71 ppb (SVE1). MW-2 was dry. 8/7/08 - Carlson: Reviewed July 2008 Update Report. Wells sampled on 5/22/08. Maximum BTEX concentration 43,693 ppb (SVE1). Maximum MTBE concentration 554 ppb (MW2). RAP Addendum will be submitted under a separate cover. Emailed Hess/Envirotrac requiring submission of RAP Addendum by 9/8/08. Received email from Ed Russo stating that 9/8/08 deadline can probably be met. 9/8/08 - Carlson: The Department approved an extension until 10/1/08 to submit an RAP Addendum. 10/22/08 - Carlson: Meeting with Hess/Envirotrac. RAP Addendum will be submitted by 12/15/08. 11/20/08 - Carlson: Reviewed October 2008 Update Report. Wells sampled on 8/14/08. Maximum BTEX concentration 41,837 ppb (SVE1). RAP Addendum not received. Sent failure to comply letter. Start legal proceedings if RAP Addendum not submitted by 12/5/08. 12/23/08 - Carlson: Received Remedial Action Plan Addendum. Two SVE system, two wells strippers, and monthly dual phase extraction events proposed. Revised RAP Addendum required with following modifications: 1) removal of two wells from SVE system, 2) relocation of two of the proposed monitoring wells, 3) startup report must be submitted, 4) inclusion of more detailed information about the well strippers. 2/19/09 - Carlson: Received email from Ed Russo in response to 12/23/08 letter. Monthly O&M visits requiring monthly

WS water effluent testing, monthly SVE air discharge testing by PID, and quarterly SVE air discharge testing by laboratory. Revised letter addendum required.3/11/09 - Carlson: Reviewed update report dated January 2009. Wells gauged and sampled on 11/5/08. LNAPL at depth of 0.02 ft in MW2. Maximum BTEX concentration 12,672 ppb (SVE1).3/18/09 - Carlson: Meeting with Hess/Envirotrac. Revised addendum due in April 2009. 5/7/09 - Carlson: Reviewed April 2009 Update Report. Revised addendum letter overdue. Emailed John Schenkewitz about overdue letter/report.5/11/09 - Carlson: Received revised RAP Addendum letter. Issued approval letter. 5/28/09 - Carlson: Well installation scheduled for 6/22/09.8/7/09 - Carlson: Reviewed update report. Monthly EFR IRM ongoing. What is status of RAP implementation?8/19/09 - Carlson: Meeting with Hess. RAP addendum will be submitted to include air sparge on the eastern portion on the site.10/21/09 - Carlson: Reviewed RAP addendum. Issued approval letter. SVE/AS will be installed, except in sidewalk (because of subway). SVE in sidewalk with HVAC events to treat impacted groundwater.11/17/09 - Carlson: Reviewed update report. Monthly HVAC events from sidewalk wells ongoing. SVE/AS system installation in progress.1/27/2010 - Carlson: Meeting with Hess. 2/5/2010 - Carlson: Reviewed update report. EFR conducted in September and October. SVE/AS installation not begun yet.5/20/2010 - Carlson: Meeting with Hess. They are working with MTA because the property is adjacent to the subway. 5/27/2010 - Carlson: Reviewed April 2010 Update Report. Six AS wells and one MW installed. HVAC was not conducted this quarter.7/22/2010 - Carlson: Reviewed wastewater UST closure report. Tank abandoned in place with concrete slurry. Endpoint samples collected from the east wall (clean) and north wall (trace VOCs/sVOCs detected). West wall/south wall were not accessible for sample collection.8/13/2010 - Carlson: Reviewed July 2010 Update Report. EFR events ongoing. System construction pending NYCTA permits.5/9/11 - Obligado - This spill transferred to Obligado as per Brevdo. I reviewed the 4Q10 update report. Free product (0.03 ft) was found in MW2. Max BTEX 17674 ug/L in SVE1. They are still waiting for MTA permits. 8/30/11 - Obligado - I reviewed the 2Q11 update report. They are still waiting on NYCTA permits. Max BTEX is 9800 ug/L. No product detected this quarter. 11/14/11 - Carlson: Reviewed October 2011 update report. System construction pending NYCTA permits. Monthly EFR ongoing.3/13/2012 - The site has SVE/AS system operation pending on the NYCTA's permission. Spoke to the consultant who works for the property owner next door in the Union Street. Groundwater contamination was identified during their Phase 2 investigation. Advised to call in for a spill number and prove to DEC it is from Hess site as they believe. 8/23/2012 - 1Q2012, 4/30/2012, by EnviroTrac. The groundwater was sampled on 2/13/2012. DTW 9.98 to 15.70 feet. Flows to north. No LNAPL. The remediation system construction is pending permit approval by NYCTA. CW-9, 560.1 BTEX, 182 MTBE. MW-7, 7.52J BTEX, 22.8 MTBE. DEC Memo: 6/19/06: Left Mike Matri a voice message requesting a report with endpoint sampling. Received voice message from Mike Matri, post-excavation sampling results will be submitted.8/7/06: Sent followup email for endpoint sampling results to Dawn Coughlin of Hess.8/15/06: Received the results of endpoint sampling conducted during spill bucket replacement. Contaminants exceeding TAGM standards were found in both samples. A monitoring well is required adjacent to endpoint sampling locations. If possible, the RAP due for Spill 96-05719 should include remediation of spill 06-02980.9/12/06: Consolidated with spill 96-05719. A RAP for installation of a SVE system was approved which will remediate spills 96-05719 and 06-02980. Not reported

Date form received by agency: 04/29/2008

Facility name: CON EDISON - NEVINS STREET SUBSTATION

Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008

Waste name: LEAD

Waste code: D009

Waste name: MERCURY

Violation Status: No violations found

Site Description: The Gowanus Canal runs through a highly developed area in Brooklyn, New York, and is impacted by contaminated sediments, principally due to activities of former Manufactured Gas Plants (MGPs). Surface sediments contain PCBs at levels up to 350 ppm, and coal tar residue up to 23% by weight of sample.

Site Description: The Gowanus Canal is a man-made navigational waterway in southeastern Brooklyn, Kings County NY. Nearly the entire canal is bounded by hard urban shorelines in the form of bulkheads, moorings, and retaining walls. The site definition includes only the canal and its attached barge slips, totaling slightly over 1.5 linear miles of waterway. Averaging 100 feet in width, the open water area defined as

the site totals approximately 1,000,000 square feet or 29 acres. The canal also serves as a storm water drain for the surrounding area. Currently, approximately six square miles of highly urbanized land drains into the canal. Sanitary sewers no longer discharge directly; however, numerous combined sewer overflows (CSO) continue to discharge to the canal during storm events. Industrial discharges from a wide variety of industrial processes were also historically routed to the canal, via private discharge pipes or the municipal sewers. Stagnant water conditions have plagued the canal since its initial construction. To combat this, a flushing tunnel at the north end of the canal was constructed in 1911 to divert water from the Buttermilk Channel to maintain flow through the canal to Gowanus Bay. Operation of the flushing system has had numerous problems resulting in lengthy periods during which it was inoperable. Significant upgrades to this system are scheduled over the next few years to increase the volume of water flushing the canal. Currently the flushing tunnel has been de-activated to facilitate its upgrade and an oxygenation system has been installed at the upper end of the canal. The first of three new tunnel pumps was brought back on line in Jan 2014, and the remaining two are slated for start up in April. Site History Prior to European settlement, this area formed a large tidal marsh, drained by Gowanus Creek and surrounded by higher ground to the west (present-day Carroll Gardens) and east (present-day Park Slope). In the mid 1800s, the Canal was constructed, more or less along the alignment of Gowanus Creek, by straightening and deepening the stream channel and dumping the excavated materials behind rows of timber piles along the shoreline. Combined with other urban filling activities in the surrounding area, the result was a large area of reclaimed land with a dendritic, dead-end canal providing barge access through the middle. The canal offered barge access far inland into Brooklyn, effectively increasing Brooklyns available tidewater frontage for water-borne commerce. Development of the area was rapid, and by 1869, the layout of the canal and the local street network were essentially complete. Long term decline of the local manufacturing economy has led to a marked decrease in commercial use of the Canal, with only a handful of petroleum distributors and concrete batch plants as regular users. Roughly the northern half no longer hosts barge movements as a result of siltation due to the significant CSOs which discharge street waste and sewage solids. The canal has not been dredged in several decades, consequently, substantial amounts of sediment have been deposited in upstream areas, and water depths approach zero at low tide. The sediment consists largely of solids settled from stormwater and CSO discharges. Presumably, industrial discharges to the canal have diminished in line with the de-industrialization of the surrounding neighborhood, although this is difficult to verify directly due to a lack of historical records for comparison.

Env Problem: Water quality issues have plagued the Gowanus Canal almost since its construction. Tidal flushing is largely ineffective due to the length, narrowness, and circuitous layout of the canal channel. Operation of the flushing tunnel has improved the situation during the years when flushing was being conducted; however, the current tunnel requires significant upgrades and is likely to be off-line for a year or more as the upgrades are performed. The canal is currently classified by NYSDEC as Class SD water body, acknowledging that natural or man-made conditions limit attainment of higher standards. Even the SD standards are not currently met. Oily sheens are common

GOWANUS CANAL SITE (Continued)

S110487590

on the water surface during low tides, dissolved oxygen levels are low and surface contamination has been identified. Sediment quality is also low. Ongoing CSO discharges have resulted in extensive deposits of settled solids, particularly in the more sheltered areas near the upper end. Some parts of the canal bottom are exposed at low tide. Another particularly important contributor to sediment quality problems is the presence of three former manufactured gas plant (MGP sites) along the length of the canal. Although all three MGPs have been closed for decades, coal tar-impacted sediments have been identified at numerous locations along the length of the canal. The three MGPs are all covered by cleanup agreements with NYSDEC, and are at various stages of investigation, remedy selection and implementation. The Fulton Works, immediately east of the canal at its northern extremity, is in the Remedial Investigation process. The Carroll Gardens site (also widely known as Public Place) is in the Brownfield Cleanup Program, and is slated for remediation and redevelopment as a mixed commercial/residential project. The former Metropolitan works, immediately south of the 9th Street bridge, was partially redeveloped under a Voluntary Cleanup Agreement in 2002-2003. However, more work remains to be done part of the MGP facility lies beneath an active retail building. A Remedial Investigation began in March 2010. Numerous oil storage and handling facilities, asphalt plants, manufacturing facilities and chemical, paint, fertilizer and plastic manufacturers have, or continue to, operate along the canal.

Health Problem: People using the canal for recreational purposes such as swimming and boating may come into direct contact with chemical contaminants and harmful biological organisms. People should avoid any activity that would result in swallowing or accidentally ingesting Canal water. Additionally, people using the canal for any purposes should wash their hands or shower after contacting the water, especially before eating and at the end of the day. Those people who are considering eating fish and shellfish caught in the Canal should follow the NYSDOH consumption advisory for fish and shellfish taken from the Upper Bay of New York Harbor. This advisory specifically includes: The NYSDOH recommends that women of childbearing age and children under the age of 15 not eat any fish from the Canal. Other people should eat no gizzard shad, white perch and crab hepatopancreas and crab cooking liquid. Also, other people should eat no more than one meal per month of American eel, Atlantic needlefish, bluefish, rainbow smelt and striped bass. People should eat no more than one (1/2 pound) meal per week of all other fish species except blue crab meat (six crabs per week).

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

|                                         |                                        |

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

#### Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

#### Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

### **Federal RCRA non-CORRACTS TSD facilities list**

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014

### **Federal RCRA generators list**

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014  
Date Data Arrived at EDR: 03/13/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014  
Date Data Arrived at EDR: 03/13/2014

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

### State and tribal leaking storage tank lists

#### LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

|                                         |                                                  |

#### RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

### State and tribal voluntary cleanup sites

#### VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### State and tribal Brownfields sites

#### ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### Records of Emergency Release Reports

#### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2013  
Date Data Arrived at EDR: 01/03/2014  
Date Made Active in Reports: 02/24/2014  
Number of Days to Update: 52

Source: U.S. Department of Transportation  
Telephone: 202-366-4555  
Last EDR Contact: 04/01/2014  
Next Scheduled EDR Contact: 07/14/2014  
Data Release Frequency: Annually

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

#### SPILLS: Spills Information Database

Data collected on spills reported to NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

Date of Government Version: 02/17/2014  
Date Data Arrived at EDR: 02/19/2014  
Date Made Active in Reports: 04/02/2014  
Number of Days to Update: 42

Source: Department of Environmental Conservation  
Telephone: 518-402-9549  
Last EDR Contact: 02/19/2014  
Next Scheduled EDR Contact: 06/02/2014  
Data Release Frequency: Varies

#### HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002  
Date Data Arrived at EDR: 07/08/2005  
Date Made Active in Reports: 07/14/2005  
Number of Days to Update: 6

Source: Department of Environmental Conservation  
Telephone: 518-402-9549  
Last EDR Contact: 07/07/2005  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

#### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 12/14/2012  
Date Data Arrived at EDR: 01/03/2013  
Date Made Active in Reports: 02/12/2013  
Number of Days to Update: 40

Source: FirstSearch  
Telephone: N/A  
Last EDR Contact: 01/03/2013  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

#### SPILLS 80: SPILLS80 data from FirstSearch

Spills 80 includes those spill and release records available from FirstSearch databases prior to 1990. Typically, they may include chemical, oil and/or hazardous substance spills recorded before 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 80.

Date of Government Version: 11/02/2010  
Date Data Arrived at EDR: 01/03/2013  
Date Made Active in Reports: 03/07/2013  
Number of Days to Update: 63

Source: FirstSearch  
Telephone: N/A  
Last EDR Contact: 01/03/2013  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators

RCRAinfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/11/2014  
Date Data Arrived at EDR: 03/13/2014  
Date Made Active in Reports: 04/09/2014  
Number of Days to Update: 27

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

### HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

### SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

### E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

**US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)**  
 The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### EDR HIGH RISK HISTORICAL RECORDS

#### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013  
Date Data Arrived at EDR: 08/19/2013  
Date Made Active in Reports: 10/03/2013  
Number of Days to Update: 45

Source: Department of Energy & Environmental Protection  
Telephone: 860-424-3375  
Last EDR Contact: 02/21/2014  
Next Scheduled EDR Contact: 06/02/2014  
Data Release Frequency: Annually

### NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2011  
Date Data Arrived at EDR: 07/19/2012  
Date Made Active in Reports: 08/28/2012

### WI MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2012  
Date Data Arrived at EDR: 08/09/2013  
Date Made Active in Reports: 09/27/2013  
Number of Days to Update: 49

Source: Department of Natural Resources  
Telephone: N/A  
Last EDR Contact: 03/17/2014  
Next Scheduled EDR Contact: 06/30/2014  
Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### Electric Power Transmission Line Data

Source: Rextag Strategies Corp.  
Telephone: (281) 769-2247  
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Day Care Providers

Source: Department of Health  
Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation  
Telephone: 518-402-8961

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision: 1981

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|-------------------------------------------|
| Not Reported  |                         |                                           |

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### ROCK STRATIGRAPHIC UNIT

|         |                                            |
|---------|--------------------------------------------|
| Era:    | Mesozoic                                   |
| System: | Cretaceous                                 |
| Series: | Upper Cretaceous                           |
| Code:   | uK (decoded above as Era, System & Series) |

### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

|                       |              |
|-----------------------|--------------|
| Soil Component Name:  | URBAN LAND   |
| Soil Surface Texture: | variable     |
| Hydrologic Group:     | Not reported |
| Soil Drainage Class:  | Not reported |

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Org. Identifier: USGS-NY  
Formal name: USGS New York Water Science Center  
Monloc Identifier: USGS-404037073584001  
Monloc name: K 3301. 1  
Monloc type: Well  
Monloc desc: Not Reported  
Huc code: 02030201  
Drainagearea Units: Not Reported  
Contrib drainagearea units: Not Reported  
Longitude: -73.9773609

Drainagearea value: Not Reported  
Contrib drainagearea: Not Reported  
Latitude: 40.6767699  
Sourcemap scale: 24000

# GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Horiz Acc measure: 1  
Horiz Collection method: Interpolated from map  
Horiz coord refsyst: NAD83  
Vert measure units: feet  
Vert accmeasure units: feet  
Vertcollection method: Level or other surveying method  
Vert coord refsyst: NGVD29  
Aquifername: Northern Atlantic Coastal Plain aquifer system  
Formation type: Glacial Aquifer, Upper  
Aquifer type: Not Reported  
Construction date: 19840301  
Welldepth units: ft  
Wellholeddepth units: ft

Horiz Acc measure units: seconds  
Vert measure val: 60.6  
Vertacc measure val: 0.1  
Countrycode: US  
Welldepth: 70  
Wellholeddepth: 70

Ground-water levels, Number of Measurements: 136

## GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS RADON

### AREA RADON INFORMATION

Federal EPA Radon Zone for KINGS County: 3

Note: Zone 1 indoor average level > 4 pCi/L.  
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.  
: Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for KINGS COUNTY, NY

Number of sites tested: 51

| Area        | Average Activity | % <4 pCi/L | % 4-20 pCi/L | % >20 pCi/L |
|-------------|------------------|------------|--------------|-------------|
| Living Area | 0.750 pCi/L      | 100%       | 0%           | 0%          |
| Basement    | 1.370 pCi/L      | 88%        | 10%          | 2%          |

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

### HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>®</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

### GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Carlin Simpson and Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## EDR Environmental Lien and AUL Search

## EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

Bargain & sale deed, with covenant against grantor's acts - Ind. or Corp.: single sheet

DEED 1787862394

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT - THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY

**THIS INDENTURE**, made on the 30th day of December, nineteen hundred and ninety-nine  
**BETWEEN** JAMES RIBELLINO, JR. and LITA RIBELLINO, residing at 4 Continental Court,  
Marlboro, New Jersey 07746

party of the first part, and 473 PRESIDENT STREET COMPANY, LLC, with an address at c/o  
Associates Management Corp., 624 Court Street, Brooklyn, New York 11231

party of the second part,

**WITNESSETH**, that the party of the first part, in consideration of Ten Dollars and other valuable consideration  
paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors  
and assigns of the party of the second part forever,

**ALL** that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying  
and being in the

Borough of Brooklyn, County of Kings, City and State of New York, bounded  
and described as follows:

**BEGINNING** at a point on the northerly side of President Street, distant 80 feet easterly from the  
corner formed by the intersection of the northerly side of President Street and the easterly side of  
Nevins Street;

**RUNNING THENCE** easterly along the northerly side of President Street, 200 feet;

**THENCE** northerly parallel with the easterly side of Nevins Street, 100 feet;

**THENCE** westerly parallel with the northerly side of President Street 20 feet 6 inches;

**THENCE** northerly parallel with the easterly side of Nevins Street and part of the distance through  
a party wall, 90 feet to the southerly side of Union Street;

**THENCE** westerly along the southerly side of Union Street, 179 feet 6 inches;

**THENCE** southerly parallel with the easterly side of Nevins Street, 190 feet to the northerly side  
of President Street, the point or place of **BEGINNING**.

Said premises are, however, subject to a certain consolidated first mortgage in favor of Fleet Bank,  
N.A.

**TOGETHER** with all right, title and interest, if any, of the party of the first part in and to any streets and  
roads abutting the above described premises to the center lines thereof; **TOGETHER** with the appurtenances  
and all the estate and rights of the party of the first part in and to said premises; **TO HAVE AND TO HOLD**  
the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of  
the second part forever.

**AND** the party of the first part covenants that the party of the first part has not done or suffered anything whereby  
the said premises have been encumbered in any way whatever, except as aforesaid.

**AND** the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first  
part will receive the consideration for this conveyance and will hold the right to receive such consideration as a  
trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to  
the payment of the cost of the improvement before using any part of the total of the same for any other purpose.  
The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

**IN WITNESS WHEREOF**, the party of the first part has duly executed this deed the day and year first above  
written.

Bargain & sale deed, with covenant against grantor's acts - Ind. or Corp.; single sheet

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT - THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY

THIS INDENTURE, made on the 30th day of December, nineteen hundred and ninety-nine  
BETWEEN JAMES RIBELLINO, JR. and LITA RIBELLINO, his wife, 4 Continental Court,  
Marlboro, New Jersey 07746

party of the first part, and 469 President Street Company, I.L.C., c/o Associates Management  
Corp., 624 Court Street, Brooklyn, New York, 11231

party of the second part,

WITNESSETH, that the party of the first part, in consideration of Ten Dollars and other valuable consideration  
paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors  
and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying  
and being in the

Borough of Brooklyn, County of Kings, City and State of New York, bounded  
and described as follows:

BEGINNING at the corner formed by the intersection of the easterly side of Nevins Street  
with the northerly side of President Street; RUNNING THENCE northerly, along the easterly side  
of Nevins Street, 160 feet; thence easterly and parallel with the northerly side of President Street,  
80 feet; thence southerly and parallel with the easterly side of Nevins Street, 160 feet to the  
northerly side of President Street; thence westerly, along the northerly side of President Street, 80  
feet to the corner aforementioned, the point or place of Beginning.

Said premises are, however, subject to a certain consolidated first mortgage in favor of Fleet Bank,  
N.A.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and  
roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances  
and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD  
the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of  
the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby  
the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first  
part will receive the consideration for this conveyance and will hold the right to receive such consideration as a  
trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to  
the payment of the cost of the improvement before using any part of the total of the same for any other purpose.  
The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above  
written.

IN PRESENCE OF:

*Vanessa Hunt*

*James V. Ribellino, Jr.*  
JAMES RIBELLINO, JR.  
*Lita Ribellino*  
LITA RIBELLINO

ACKNOWLEDGEMENT IN NEW YORK STATE (RPL 308-a)  
 State of New York, County of New York SS.:

On December 30, 1999 before me, the undersigned,  
 personally appeared James Ribellino, Jr.

personally known to me or proved to me on the basis of satis-  
 factory evidence to be the individual(s) whose name(s) is (are)

## CERTIFICATE OF AFFIDAVIT

Robert A. Abramo being duly sworn, says, that on September 25, 2001 Omega-Abra Engineering LLC supervised the PERMENANT ABANDONMENT of (1), 3500 gallon Underground Heating Oil Tank in compliance with Title 3 RCNY @ 21-02.

- The tank was abandoned in a legal manner-pumped out, squeegee cleaned, and filled with sand.
- All lines, interconnected were internally plugged and/or capped. The fill line has been cemented. The vent line has been removed.

- This affidavit is issued to attest the proper **ENVIRONMENTAL ABANDONMENT PROCEDURE** by a LICENSED New York City Fire Department Underground Tank Installer. License number: 63435564.  
Expiration Date 12/03/2001

Capacity: 3500 gallons # 2 Fuel

## GAS FREE CERTIFICATE

On September 25, 2001 we examined the above storage tanks to determine the presence of combustible matter.

The examination was performed using a LEL Gas Detector Meter, Model #500/501.

Readings in the tanks indicated the absence of any combustible matter and noxious gases.

**PHYSICAL AND ATMOSPHERIC CHANGES WILL AFFECT THE GAS FREE  
CONDITION OF ABOVE SPACE, IN CASE OF DOUBT, IMMEDIATELY STOP ALL  
WORK AND CONTACT THE UNDERSIGNED.**

FOIL: R2-14-1254

Meredith R Anke/Carlin Simpson & Associates  
732-432-5757  
F 732-432-5717  
meredith@carlinsimpson.com

Re: -465-471 President St aka 313-323 Nevins St  
-514-530 Union St aka 473-491 President St in Brooklyn  
-339-341 Nevins St  
-431 Carroll St in Brooklyn

Dear Ms. Anke:

We are in receipt of your Foil request for the above referenced site. The identification Number(s) assigned is: R2-14-1254.

If for any reason you need to contact us again please use these numbers. When the programs are done gathering the files/information, this office will contact you.

Please email your future FOILs to Region 2 directly to the following email address:  
r2foil@gw.dec.state.ny.us

Please expect our response within 20 business days from the date of this letter.

If you have any questions @ your FOIL, please call Gloria Silva/ or Cynthia Whiting/FOIL Secretary at 718-484507, or email me providing the above FOIL # at:  
r2foil@gw.dec.state.ny.us

Sincerely yours,  
Fawzy I. Abdelsadek, Ph.D., P.E.  
Regional Enforcement Coordinator

Please be advised that in your future submission of FOILs to Region 2, you should include the Spill(s), or PBS(s) number(s) to expedite your request. This will give you more information @ all records that we may have related to your FOIL(s). So that you will submit FOILs, for those that the additional information/records are needed.

Please be advised that relevant information responsive to your request may be found at the following Department of Environmental Conservation/Remediation's websites:

The Spills Database link is as follows:

<http://www.dec.ny.gov/cfm/external/derexternal/index.cfm?pageid=1>

HWR/Environmental Remediation Website:

<http://www.dec.ny.gov/cfm/external/derexternal/index.cfm?pageid=3>

The PBS Database link is as follows:

<http://www.dec.ny.gov/cfm/external/derexternal/index.cfm?pageid=4>

Also, you can search for Permits issued by NYSDEC by using the Link:

<http://www.dec.ny.gov/cfm/external/envapps/>

If you need assistance on how to search the above websites, please contact me.

Please email your future FOILs to Region 2 directly to the following email address:

[r2foil@gw.dec.state.ny.us](mailto:r2foil@gw.dec.state.ny.us)

If after your search, additional information/records are needed, please include the spill #(s), or PBS #(s), Permit #(s) and exact street address of the site(s) you are requesting information for, and email your request(s) to Region 2. Please note that Region 2 policy is to submit a FOIL request for a maximum of two (2) sites/FOIL. If you didn't provide the results (i.e. spills/PBS #(s) of your websites search within 10 days, your FOIL will be closed

You may resubmit your FOIL again providing the above requested information.

Thank you for your FOIL request. If you have any questions, please call Gloria Silva/FOIL Secretary at (718) 482-4507, or email me providing the above FOIL # at: [r2foil@gw.dec.state.ny.us](mailto:r2foil@gw.dec.state.ny.us).

Sincerely yours,

Fawzy I. Abdelsadek, Ph.D., P.E.

Attention: Meredith Anke

**Re: 465-471 President Street, 514-530 Union Street, 339-341 Nevins Street and 431 Carroll Street,  
Bklyn- SEE REQUEST  
Control #: 2014FR01295**

The New York City Department of Health and Mental Hygiene acknowledges receipt of your Freedom of Information Law request. It has been assigned the above-noted control number and has been forwarded to the following bureau or office for processing:

**Bureau / Office**

☐ Lead Poisoning Prevention  
Ben DelPercio  
(646) 632-6006

☒ Environmental Health Services  
Dylsia Tapia or Shirley Wiley  
(646) 632-6494

☐ Contract Services  
Ellen Rieser  
(347) 396-6629

☐ Bureau of Human Resources  
Ana Perez  
(347) 396-2108

☐ Communicable Diseases  
Beth Nivin  
(347) 396-2616

☐ Other \_\_\_\_\_

You should receive a response from the program/bureau within twenty(20) business days. Please note that responses are provided electronically whenever possible, and that there is a fee of 25 cents per page for copies of records not available electronically. You will be advised by the program/bureau of the fee that is due and, upon receipt of your payment by check or money order, the copies will be forwarded to you.

All inquiries about the status of your request should be made with the program/bureau noted.

Sincerely,

Chari Anhouse, Esquire

Request No: 2014FR01295

Dear Meredith Anke:

In response to your recent request for environmental records on:

**Site A Premises**-465-471 President Street aka 313-323 Nevins Street; 514-530 Union Street aka 473-491 President Street, Brooklyn, NY

**Site B Premises**-339-341 Nevins Street; 431 Carroll Street, Brooklyn, NY

Please note the following:

- ☒ The Office of Environmental Investigations has "NO" record of an investigation at the above address.
- ☐ Enclosed are copies of the requested records we have on file.

Sincerely,

A handwritten signature in black ink, appearing to read "Chris D'Andrea", written over a horizontal line.

RE: Control #: 2014FR01295

Dear Ms. Anke:

In response to your recent request for the record(s) concerning the address/es listed below:

|                                            |                                            |                                         |
|--------------------------------------------|--------------------------------------------|-----------------------------------------|
| 465 President Street<br>Brooklyn, NY 11225 | 471 President Street<br>Brooklyn, NY 11225 | 313 Nevins Street<br>Brooklyn, NY 11201 |
| 323 Nevins Street<br>Brooklyn, NY 11201    | 524 Union Street<br>Brooklyn, NY 11201     | 530 Unions Street<br>Brooklyn, NY 11201 |
| 473 President Street<br>Brooklyn, NY 11201 | 491 President Street<br>Brooklyn, NY 11201 | 339 Nevins Street<br>Brooklyn, NY 11201 |

Please be advised that based upon a thorough review of the files available to the Office of Public Health Engineering, our records revealed there are no record(s) located in our files pertaining to your request.

Yours truly

Li Huang, PE  
Director  
Office of Public Health Engineering

## **APPENDIX G**

### **INTERVIEW QUESTIONNAIRES**

## INTERVIEW QUESTIONNAIRE

### Client/User

**Interview Date:** 8 May 2014

**Name:** Mr. Michael Schlegel

**Title:** Partner

**Company/Organization:** Eco Rise Development LLC

**Status:**

- ☒ Client/User  
☐ Current Owner  
☐ Site Manager/Representative  
☐ Occupant  
☐ Government Official  
☐ Other \_\_\_\_\_

**What is the reason why the Phase I ESA is required for this site?**

Due diligence

**What type of property transaction is it (sale, purchase, exchange, refinance, other)?**

Purchase

**Have you engaged a title company or professional to review recorded land title records? If so, what were the results of the review?**

No

**Are any services beyond the requirements of Practice E1527-05 required?**

No

**What is the current use of the property?**

Warehouses and shuffleboard club

**Who is the site contact for the property and how can they be reached?**

Abraham Lowy

**Who is the current owner of the property?**

Joseph Ribellino

**Other than you, what other parties will rely on the Phase I ESA report?**

Lenders

**Do you have any other knowledge or experience with the property that may be pertinent to the environmental assessment (i.e. copies of any prior ESA reports, documents, correspondence, etc.)?**

☐ Yes ☒ No

If yes describe:

---

**Are you aware of any environmental liens associated with the property?**

☐ Yes ☒ No

If yes describe:

---

**Are you aware of any engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry?**

☐ Yes ☒ No

If yes describe:

---

**As the user of the ESA, do you have any specialized knowledge or experience related to the property or nearby properties?**

☐ Yes ☒ No

If yes describe:

---

**Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If not, have you considered whether the price difference is due to contamination?**

☒ Yes ☐ No

---

**Do you know the history or past uses of the subject property?**

☒ Yes ☐ No

If yes describe:

Warehouse for at least 10 years

---

**Do you know of specific chemicals that are present or once were present at the property?**

☐ Yes ☒ No

If yes describe:

---

**Do you know of spills or other chemical releases that have taken place at the property?**

☐ Yes ☒ No

If yes describe:

---

**Do you know of any environmental cleanups that have taken place at the property?**

☐ Yes ☒ No

If yes describe:

---

**Do you know of any environmental permits that are required for the property?**

☐ Yes ☒ No

If yes describe:

---

**As the user of the ESA, based on your knowledge and experience related to the property, are there any indicators that point to the presence or likely presence of contamination at the property?**

☐ Yes ☒ No

If yes describe:

---

## INTERVIEW QUESTIONNAIRE

### Owner's Representative

**Interview Date:** 8 May 2014

**Name:** Mr. Abraham Lowy

**Title:** Associates Broker

**Company/Organization:** Pinnacle Realty

**Status:**

☐ Client/User

☐ Current Owner

☒ Site Manager/Representative

☐ Occupant

**During what time period are you familiar with the property?**

1999 to present

**What was type of business was at the property?**

Mail order printing and direct mail (Omni Mail)

Electronic waste warehouse

**Do you know the past uses of the property?**

☐ Yes ☒ No

If yes describe:

**Who are the occupants of the property?**

E-waste Warehouse

Royal Shuffleboard Club

Wholesale warehouse (just moved out)

**Do you know of specific chemicals that are present or once were present at the property?**

☐ Yes ☒ No

If yes describe:

**Do you know of spills or other chemical releases that have taken place at the property?**

☐ Yes ☒ No

If yes describe:

**Do you know of any environmental cleanups or storage tank closures that have taken place at the property?**

☐ Yes ☒ No

If yes describe:

---

---

**Do you have any other knowledge or experience with the property that may be pertinent to the environmental professional?**

☐ Yes ☒ No

If yes describe:

---

---

**Are you aware of any environmental liens against the property that are filed or recorded under federal, tribal, state or local law?**

☐ Yes ☒ No

If yes describe:

---

---

**Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry?**

☐ Yes ☒ No

If yes describe:

---

---

**Do you have copies of any past environmental documents (i.e. Phase I Environmental Site Assessments, Subsurface Investigation Reports, Tank Closure Reports, Remediation Reports, etc.) related to the property?**

☒ Yes ☐ No

If yes, please describe:

The owner has documentation for a storage tank removal.

---

---

---

---

## INTERVIEW QUESTIONNAIRE

### Owner's Representative

**Interview Date:** 8 May 2014

**Name:** Mr. Anthony Gambale

**Title:** N/A

**Company/Organization:** N/A

**Status:**

☐ Client/User

☐ Current Owner

☒ Site Manager/Representative

☐ Occupant

**During what time period are you familiar with the property?**

Last 40 years

**What was type of business was at the property?**

Omni Mail Direct Marketing

Electronic waste warehouse

**Do you know the past uses of the property?**

☐ Yes ☒ No

If yes describe:

**Who are the occupants of the property?**

E-waste Warehouse

Royal Shuffleboard Club

Wholesale warehouse (just moved out)

**Do you know of specific chemicals that are present or once were present at the property?**

☐ Yes ☒ No

If yes describe:

**Do you know of spills or other chemical releases that have taken place at the property?**

☐ Yes ☒ No

If yes describe:

**Do you know of any environmental cleanups or storage tank closures that have taken place at the property?**

☐ Yes      ☒ No

If yes describe:

---

---

**Do you have any other knowledge or experience with the property that may be pertinent to the environmental professional?**

☒ Yes      ☐ No

If yes describe:

The Gowanus Canal has contamination issues. They are cleaning it up but who knows how bad it really is.

---

**Are you aware of any environmental liens against the property that are filed or recorded under federal, tribal, state or local law?**

☐ Yes      ☒ No

If yes describe:

---

---

**Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry?**

☐ Yes      ☒ No

If yes describe:

---

---

**Do you have copies of any past environmental documents (i.e. Phase I Environmental Site Assessments, Subsurface Investigation Reports, Tank Closure Reports, Remediation Reports, etc.) related to the property?**

☐ Yes      ☒ No

If yes, please describe:

---

---

---

---

---

## INTERVIEW QUESTIONNAIRE

### Occupant

**Interview Date:** 8 May 2014

**Name:** Mr. Sam Huntington

**Title:** Warehouse Manager

**Company/Organization:** E-Waste Warehouse

**Status:**

☐ Client/User

☐ Current Owner

☐ Site Manager/Representative

☒ Occupant

**During what time period are you familiar with the property?**

Business opened in 2012. I started in July 2012.

**What was type of business do you have at the property?**

Electronic waste drop-off, refurbishing center, and resale

No processing, waste is sent off-site for disposal

**Do you know the past uses of the property?**

☐ Yes ☒ No

If yes describe:

Next door was a mailing center

**Do you know of chemicals that are present or once were present at the property?**

☐ Yes ☒ No

If yes describe:

**Do you know of spills or other releases that have taken place at the property?**

☐ Yes ☒ No

If yes describe:

**Do you know of any environmental cleanups or storage tank closures that have taken place at the property?**

☐ Yes ☒ No

If yes describe:

**Do you have any other knowledge or experience with the property that may be pertinent to the environmental professional?**

☐ Yes ☒ No

If yes describe:

Partner - Chief Engineer. Mr. Simpson is responsible for the planning of subsurface soil, foundation, and environmental engineering investigations, analyzing the data obtained from such studies and writing geotechnical and environmental engineering reports (RI/FS). Mr. Simpson has a complete knowledge of geotechnical and environmental engineering principles and he applies these principles to projects performed by the firm.

In the geotechnical engineering field, he has been involved in such projects as the Garden State Parkway Interchange 127; Paterson N.J. Jail Addition; the Pennsylvania Turnpike Northeast Interchange; High Rise Condominiums, Yonkers, N.Y.; Westage Business Center, Fishkill, N.Y.; St. Lawrence Center Mall, Massena, N.Y.; Dam Reconstruction, Dancer Farm Subdivision, Freehold, N.J., and highway pavement design, N.J. Rt. 70, Howell, N.J.

Over the past 28 years, he has directed geotechnical investigations on hundreds of diverse projects throughout the northeast and has developed geotechnical design recommendations for projects involving shallow foundations, deep foundations, retaining walls, slope stabilization, groundwater dewatering, underpinning, earth dams, settlement, pavement design, tunneling, and ground improvement techniques such as surcharging, grouting, and geotextiles. His expertise has also led to providing forensic engineering services and expert testimony involving geotechnical issues for a variety of regulatory and legal matters.

Environmental Engineering  
Geotechnical Engineering  
Phase I Environmental Site Assessments  
Phase II Environmental Site Investigations  
Subsurface Investigations  
Retaining Wall Design  
Hydrogeological Studies  
Site Remediation Engineering

Mrs. Anke is responsible for the planning of environmental investigations, analyzing the data obtained from such studies, and writing environmental engineering reports. Mrs. Anke has knowledge of environmental engineering principles and she applies these principles to various projects performed by the Firm. Over the past 14 years as an environmental engineer, Mrs. Anke has been involved in Phase I, Phase II and Phase III environmental engineering studies, underground storage tank closures, asbestos inspections, hydrogeologic studies, soil and groundwater plume migration studies, and remedial investigations to determine the most practicable remedial technology for soil and groundwater clean up projects located in New Jersey and New York.

In addition, Mrs. Anke is responsible for the planning of geotechnical investigations, analyzing the data obtained from such studies, and writing geotechnical engineering reports. This includes the development of site specific engineering recommendations for the design of shallow and deep foundations, retaining walls, stormwater management systems, flexible and rigid pavement, soil and rock slopes, and temporary earth support systems. Mrs. Anke has also prepared construction design drawings and specifications for various projects in New Jersey and New York involving retaining walls, soil or rock slope stabilization, underpinning, dewatering systems, compaction grouting, and temporary earth support systems.
