RE: Phase I Environmental Site Assessment

Spenceran, Inc.
1100, 1102, 1116, and 1122 Myrtle Avenue and 356, 367, 369, 371, and 373 Vernon Avenue
Brooklyn, NY 11206

Dear Mr. Gonzalez:

EFI Global, Inc. (EFI) is pleased to provide the results of our Phase I Environmental Site Assessment (ESA) of the referenced property. This assessment was authorized on August 25, 2015 and was performed in general accordance with the scope of services outlined in the Professional Services Agreement, dated August 25, 2015.

This assessment was performed in accordance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and included a site reconnaissance, as well as research and interviews with private individuals, knowledgeable parties, and regulatory agency officials. An assessment was made, conclusions stated, and recommendations outlined.

If you have any questions concerning this report, or if we can assist you in any other matter, please contact Mandeep S. Sandhu at (732) 629-7930 or Mandeep_Sandhu@efiglobal.com.

Sincerely,
EFI Global, Inc.

EXECUTIVE SUMMARY

EFI Global, Inc. (EFI) has performed a Phase I Environmental Site Assessment (ESA) of Spenceran, Inc. located at 1100, 1102, 1116, and 1122 Myrtle Avenue and 356, 367, 369, 371, and 373 Vernon Avenue, Brooklyn, NY (the "Property") in accordance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This ESA was authorized by Bogopa Service Corp. on August 25, 2015 .

The Property is located within the Borough of Brooklyn in a mixed residential and commercial/retail area. The Property consists of multiple lots that are located at 1102-1122 Myrtle Avenue, approximately 150 feet west of the intersection of Myrtle Avenue on the south side of Myrtle Avenue; at 367, 369, 371 and 373 Vernon Avenue, located on the north side of Vernon Avenue approximately 300 feet east of the intersection of Vernon Avenue and Lewis Avenue and at 356 Vernon Avenue located on the south side of Vernon Avenue approximately 250 feet east of the intersection of Vernon Avenue and Lewis Avenue. The Property parcel along Myrtle Avenue is bordered to the north by Myrtle Avenue, beyond which are commercial storefronts, offices and apartments; to the east by a New York Transit Authority Substation; to the south by single and multi-family residential development located along Vernon Avenue; and to the west by a vacant, fence-enclosed lot followed by mixed use development. The Property parcels located along Vernon Avenue are surrounded by residential buildings located along Vernon Avenue and Lewis Avenue to the south. Based upon topographic map interpretation and site observations, the inferred direction of groundwater flow is to the north and east toward English Kills located approximately 0.9 mile north-northeast of the Property.

The Property consists of nine lots with a combined size of approximately 1.12 acres. The Property (located at 1102 to 1114 Myrtle Avenue) is improved with one single-story retail building that was constructed in 1921 and extended with a single-story storage area and loading dock (1100 Myrtle Avenue) to its current form in 1999. The Property parcels located at 1116 and 1122 Myrtle Avenue abut the supermarket building on the eastern side and are used as asphalt paved parking lots. The Property parcels located at 367, 369, 371, and 373 Vernon Avenue abut the supermarket building along the south side and consist of an unpaved fence-enclosed lot used for parking. The Property parcel located at 356 Vernon Avenue is a vacant fence-enclosed lot located on the south side of Vernon Avenue. The buildings at the Property are occupied by Food Bazaar Supermarket.

The buildings are of single-story mostly slab-on-grade construction with a small below grade level located along Myrtle Avenue on the northeastern portion of the Property. The buildings are finished on the exterior with brick masonry and stucco and covered with a flat roof. The buildings are heated and cooled by rooftop-mounted HVAC units fueled by natural gas.

The Property was improved with three, two-story dwellings on the northwestern portion along Myrtle Avenue from as early as 1887, and with a large, five-story multi-family residential building and two row houses north of Vernon Avenue from as early as 1904. One, two-story row house is present on the portion of the Property south of Vernon Avenue as of 1904 (356 Vernon Avenue). Starting in 1918, the portion of the Property along Myrtle Avenue is used largely for commercial or light industrial purposes, with the exception of two row houses on the northeast corner of the Property (1120 & 1122 Myrtle Avenue). A candy factory is present on the northwest portion of the Property (1100 Myrtle Avenue), which is vacated by 1935 and then occupied by a furniture manufacturer by 1947. A large, rectangular, single-story auto garage occupies the majority of the Property along Myrtle Avenue as of 1920, and is depicted with a 1,000-gallon gasoline UST in the northeast corner of the building (1114 Myrtle Avenue). In 1965, the row houses to the northeast are replaced by a two-story factory building. In 1977, the furniture manufacturing building has been demolished, and the lot is vacant. The garage building is used for auto repair, and

the UST is no longer depicted. In 1980, the western half of the single family residential building north of Vernon Avenue has been demolished and sits vacant, and by 1981, the entire Property is vacant with the exception of the commercial building (former auto repair building) on Myrtle Avenue, and the single row house south of Vernon Avenue. By 1996, the row house south of Vernon Avenue is demolished and the lot sits vacant. A small warehouse storage addition is constructed on the southwest corner of the commercial building on Myrtle Avenue in 1999 (1100 Myrtle Avenue).

The historical review indicates that the Property was used for residential as well as various commercial and light industrial activities; that included an automobile garage (1102-1114 Myrtle Avenue) equipped with a buried 1,000-gallon gasoline UST (shown in the 1947 to 1965 maps); auto repair activities from at least 1934 to 1980 (1102-1114 Myrtle Avenue) and furniture manufacturing (1947 to 1968).

No documentation was available to confirm that the former 1,000-gallon gasoline UST was properly closed or removed. In addition, historical environmentally sensitive operations including auto repair and furniture manufacturing activities at the Property represent an environmental concern. EFI previously conducted a Phase I ESA report dated January 2013 for a portion of the Property (parcels located at 1102-1122 Myrtle Avenue) and recommended and conducted a Limited Phase II Subsurface Investigation at the Property in March 2013. The investigation included the installation of three soil borings for the collection of soil and groundwater samples at the Property. Three soil samples and one groundwater sample were analyzed for volatile organic compounds (VOCs) by EPA Method 8260 and for semi-volatile organic compounds (SVOCs) by EPA Method 8270. According to the laboratory analytical report, several SVOCs were detected in groundwater sample TW-1 above the applicable NYSDEC Technical Operation & Guidance Series (TOGS) groundwater regulatory criteria. Specifically, benzo(a)pyrene was detected at 6.68 micrograms per liter (ug/l), exceeding the applicable TOGS criteria of equal to the laboratory method detection limit (MDL). Benzo(b)fluoranthene was detected at 9.22 ug/l, exceeding the applicable TOGS criteria of 0.002 ug/l. In addition, benzene, 2-butanone, and 10 SVOCs were detected in soil sample B-3 at concentrations less than the NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCO). The concentrations of two of SVOCs, benzo(a)pyrene (0.487 mg/kg) and benzo(b)fluoranthene (0.659 mg/kg), were slightly below the UUSCO and RUSCO of 1 mg/kg for these contaminants. With the exception of acetone, no other VOCs or SVOCs were reportedly identified in the soil samples collected at the Property.

The presence of acetone in the soils was attributed to laboratory contamination, as acetone is a common laboratory artifact.

The previous EFI report concluded that the sampling conducted during this investigation indicates that there does appear to have been an impact to the subsurface at concentrations exceeding state standards as a result of the historical uses of the Property. EFI recommended that the Property be entered voluntarily into the NYSDEC Brownfield Cleanup Program under 6 NYCRR Part 375 Subpart 375-3, and that further subsurface investigations be completed at the Property, primarily to address the concentrations of the SVOCs identified in the soil and ground water samples. The presence of confirmed soil and groundwater contamination represents a recognized environmental condition (REC) at the Property.

EFI reviewed regulatory databases and files from federal, state and local environmental regulatory agencies to identify use, generation, storage, treatment or disposal of hazardous materials or release incidents of such materials that may impact the Property. The records reviewed included, but were not limited to, the following: Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS); National Priorities List (NPL); Resource Conservation Recovery Information System (RCRIS); Treatment, Storage and Disposal Facilities (TSD); Large and Small Quantity Generators; Emergency Response Incidence Logs; state-registered underground storage tanks (UST); state leaking underground storage tank (LUST) incident reports; state solid waste facilities/landfill sites (SWF/LS); state hazardous waste sites (SHWS); and other local records.

According to the regulatory database, the Property is listed as a RCRA-LQG (1120 Myrtle Avenue), RCRA-Non Generator (369 Vernon Avenue) E-Designation (1100 Myrtle Avenue, 367 and 369 Vernon Avenue) and Spills (356 and 367 Vernon Avenue) site.

The database review indicated that Con Edison Service Boxes at the Property address of 1120 Myrtle Avenue are listed as a RCRA-LQG of hazardous waste, and are listed at 369 Vernon Avenue as RCRA-Non Generators. The database review indicated that no RCRA violations were listed for the Property. In addition, no reported leaks, spills or release incidents were listed for the Con Edison Service boxes at the Property. These RCRA listings do not represent an environmental concern at the Property.

Review of the regulatory database identified the Property parcels at 1100 Myrtle Avenue, 367, 369, 371, and 373 Vernon Avenue on the City of New York E-Designation database. The listing of the Property as an E-Designation site does not necessarily constitute a recognized environmental condition at the Property. However, the E-Designation requirements should be satisfied and proper approvals and permits should be obtained from the appropriate City of New York regulatory offices prior to any planned development activities.

In addition, the database review identified two Spills incidents at the Property (365 Vernon Avenue); one of which was reported in September 2013. According to the regulatory database, a 55-gallon drum containing diesel and water was abandoned at the Property. The drum was subsequently removed by the City of New York and the Spills incident was closed by the NYSDEC on September 26, 2013. Based on the resolved regulatory status and reported nature of the incident, the Spills incident does not represent an environmental concern and is considered a historical recognized environmental condition (HREC) at the Property, and a file review is not warranted.

An additional earlier Spills incident was reported at 356 Vernon Avenue in March 2010. According to information provided in the regulatory database, the Spills incident was reported at Godfrey's Residence and related to a leak from a boiler that reportedly spilled product on the cement floor. Of note, the Property at 356 Vernon Avenue was vacant from at least 2001. EFI's review of the online City of New York Department of Finance website indicated that the property address at 356A Vernon Avenue located to the adjoining east side of the Property (356 Vernon Avenue) is occupied by a private residence owned by Frances Godfrey. Therefore, it appears that this Spills incident occurred on the adjoining property to the east at 356A Vernon Avenue and not at the Property. In addition, according to the regulatory database, the spilled product was contained on the concrete floor of the boiler room and was subsequently closed by the NYSDEC on March 3, 2010. Based on the reported nature of the incident and resolved regulatory status, the Spills incident at the adjoining property to the east does not represent an environmental concern to the Property, and a file review is not warranted.

Review of the online City of New York Building Department records indicated that oil burner permits were issued at the Property (367, 369, 371, 373 and 356 Vernon Avenue). These Property parcels were previously occupied by residential buildings that appeared to have been demolished in the 1970s and 1980. It is likely that these Property buildings were previously equipped with oil-fired boilers that were fueled by heating oil stored in aboveground or underground storage tanks. The online review did not provide any information about the former heating oil storage tanks at the Property. It is not known if the former heating oil storage tanks were properly removed as per local and state regulations. This lack of information confirming the proper closure of the former heating oil storage tanks at the Property represents an environmental concern and is considered a REC at the Property.

Based on review of the Property's environmental setting and current uses, as well as a review of government records and the regulatory database report, EFI concludes that the Property does not contain a potential vapor encroachment condition (VEC).

Conclusions

EFI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of 1100, 1102, 1116, and 1122 Myrtle Avenue and 356, 367, 369, 371, and 373 Vernon Avenue, Brooklyn, NY the Property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions or Controlled Recognized Environmental Conditions in connection with the Property, except for the following:

- The historical review indicates that the Property was historically used for residential as well as various commercial and light industrial activities that included an automobile garage (1102-1114 Myrtle Avenue) equipped with a buried 1,000-gallon gasoline UST (shown in the 1947 to 1965 maps); auto repair activities from at least 1934 to 1980 (1102-1114 Myrtle Avenue) and furniture manufacturing (1947 to 1968). No documentation was available to confirm that the former 1,000-gallon gasoline UST was properly closed or removed. In addition, historical environmentally sensitive operations including auto repair and furniture manufacturing activities at the Property represent a REC to the Property. EFI previously conducted a Phase I ESA report dated January 2013 for a portion of the Property (parcels located at 1102-1122 Myrtle Avenue) and recommended and conducted a Limited Phase II Subsurface Investigation at the Property in March 2013. Three soil samples and one groundwater sample were analyzed for VOCs by EPA Method 8260 and for SVOCs by EPA Method 8270. According to the laboratory analytical report, several SVOCs were detected in groundwater sample TW-1 above the applicable NYSDEC TOGS groundwater regulatory criteria. Specifically, benzo(a)pyrene was detected at 6.68 ug/l, exceeding the applicable TOGS criteria of equal to the laboratory MDL. Benzo(b)fluoranthene was detected at 9.22 ug/l, exceeding the applicable TOGS criteria of 0.002 ug/l. In addition, benzene, 2-butanone, and 10 SVOCs were detected in soil sample B-3 at concentrations less than the NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCO). The concentrations of two of SVOCs, benzo(a)pyrene (0.487 mg/kg) and benzo(b)fluoranthene (0.659 mg/kg), are slightly below the UUSCO and RUSCO of 1 mg/kg for these contaminants. The presence of confirmed soil and groundwater contamination at the Property represents a recognized environmental condition.
- Review of the online City of New York Building Department records indicated that oil burner permits were issued at the Property parcels 367, 369, 371, 373 and 356 Vernon Avenue. These Property parcels were previously occupied by residential buildings that appeared to have been demolished in the 1970s and 1980. It is likely that these Property buildings were previously equipped with oil fired boilers that were fueled by heating oil stored in aboveground or underground storage tanks. The online review did not provide any information about the former heating oil storage tanks at the Property. It is not known if the former heating oil storage tanks were properly removed as per local and state regulations. This lack of information confirming the proper closure of the former heating oil storage tanks at the Property represents an environmental concern and is considered a REC.
- Review of the regulatory database identified the Property parcels at 1100 Myrtle Avenue, 367, 369, 371, and 373 Vernon Avenue on the City of New York E-Designation database. The listing of the Property as an E-Designation site does not necessarily constitute a REC at the Property. However, the E-Designation requirements should be satisfied and proper approvals and permits should be obtained from the appropriate City of New York regulatory offices prior to any planned development activities.

EFI's assessment included additional services to evaluate asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands and mold. This assessment has revealed no evidence of related conditions of concern in connection with the Property, except for the following:

- Suspect asbestos-containing building materials were observed in the building in the form of non-friable drywall and joint compound, non-friable ceiling tiles, non-friable vinyl floor tiles, non-friable grouts, mastics, and caulking and non-friable roofing materials. The aforementioned building components were noted to be in overall good condition with low potential for disturbance.

Recommendations

As a result of this assessment, EFI recommends the following:

- Historical Use / Soil and Groundwater Contamination - Petroleum-impacted soil and groundwater were previously detected at the Property, apparently from the historical use of the Property, however the Property is not currently listed in the Brownfields database in the EDR database report, or with the NYSDEC. EFI continues to recommend that the Property be entered voluntarily into the NYSDEC Brownfield Cleanup Program under 6 NYCRR Part 375 Subpart 375-3, and that further subsurface investigations be completed at the Property, primarily to address the concentrations of the SVOCs identified in the soil and groundwater samples.
- Former Heating Oil Tanks - Additional information is required to confirm that the former heating oil storage tanks have been properly removed and do not represent an environmental concern at the Property. A limited subsurface investigation including a geophysical survey may be required to confirm the presence or absence of USTs, and whether the current or former presence of USTs has adversely impacted the environmental integrity of the Property.
- E-Designation - E-Designation requirements should be satisfied and proper approvals and permits should be obtained from the appropriate City of New York regulatory offices prior to any planned development activities.
- Asbestos - Given the condition of the identified and suspect ACM, EFI is of the opinion that these materials can be effectively managed as part of an asbestos Operations and Maintenance (O&M) Plan until such time as renovation or demolition activities necessitate their removal. The objective of an O&M Plan is to implement a practical management approach to controlling identified ACM within the Property. The O&M Plan is designed to cleanup existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed.

Report Section	Comments	Recommendation and Cost
4.1 Standard Environmental Records Sources	Review of the regulatory database identified the Property parcels at 1100 Myrtle Avenue, 367, 369, 371, and 373 Vernon Avenue on the City of New York E-Designation database.	The listing of the Property as an E-Designation site does not necessarily constitute a recognized environmental condition at the Property. However, the E-Designation requirements should be satisfied and proper approvals and permits should be obtained from the appropriate City of New York regulatory offices prior to any planned development activities.
7.1 Asbestos-Containing Materials	Suspect asbestos-containing building materials were observed in the building in the form of non-friable drywall and joint compound, non-friable ceiling tiles, non-friable vinyl floor tiles, non-friable grouts, mastics, and caulking and non-friable roofing materials. The aforementioned building components were noted to be in overall good condition with low potential for disturbance.	Asbestos O&M Plan - \$500

1.0 INTRODUCTION

EFI Global, Inc. (EFI) was retained by Bogopa Service Corp. to perform a Phase I Environmental Site Assessment (ESA) of Spenceran, Inc. located at 1100, 1102, 1116, and 1122 Myrtle Avenue and 356, 367, 369, 371, and 373 Vernon Avenue in Brooklyn, NY (the "Property"). This ESA was performed in accordance with the Professional Services Agreement authorized on August 25, 2015.

1.1 Purpose

The purpose of the ESA was to conduct all appropriate inquiry (AAI) into the previous ownership and uses of the Property consistent with good commercial or customary practice as defined at 42 U.S.C. Section 9601(35)(B). As such, this assessment is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act liability.

1.2 Scope-of-Work

The scope of work for this project included observing Property and adjoining property conditions, reviewing regulatory agency database records, contacting local officials and other persons knowledgeable of the Property, and reviewing pertinent historical documents with regard to past land use, regional setting information, and ownership records, and summarizing our findings. Each task is conducted with the intent to identify recognized environmental conditions, as defined by American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments E 1527-13. This ASTM standard exceeds the requirements set forth in 40 CFR Part 312, Standards and Practices for AAI.

RECs generally include features suggesting the presence or likely presence of hazardous substances or petroleum products on the Property that cause or threaten to cause the incurrence of response actions. RECs include hazardous substances or petroleum products under conditions that are in compliance with laws. RECs may also include historical conditions that have been addressed in the past.

RECs do not include de minimis conditions that generally do not present a threat to human health or the environment, and generally would not be subject to enforcement action if brought to the attention of appropriate governmental agencies.

In addition to the scope of work outlined above, the following non-ASTM scope considerations were included in our scope of services:

- A limited lead-based paint evaluation was performed in accessible areas of the Property during the site reconnaissance. The potential for lead-based paint was based on the date of construction and the condition and location of painted surfaces where noted. If requested by the Client or stipulated in the agreed scope of work, screening for lead-based paint was performed by testing and/or sampling for laboratory analysis. See Section 7.2 for additional details regarding this scope of work.
- An evaluation of radon potential was provided utilizing average radon concentration zones available from the US Environmental Protection Agency (USEPA). If requested by the Client, sampling for site specific radon concentrations was performed. See Section 7.3 for additional details regarding this scope of work.
- A limited visual assessment of accessible areas of the Property were evaluated for the presence of mold growth. The location and quantity of mold growth observed, if any, was documented.

If requested by the client, confirmatory sampling for mold was performed. See Section 7.4 for additional details regarding this scope of work.

- A limited visual assessment for wetlands vegetation was performed as part of the completion of the site reconnaissance. In addition, EFI reviewed readily ascertainable jurisdictional data or maps to confirm if jurisdictional wetlands are located on the Property. See Section 4.4.5 for additional details.
- An evaluation for lead in drinking water was provided utilizing annual drinking water quality reports or interviews with municipal or utility officials. If requested by the Client, sampling for lead in drinking water was performed. See Section 7.5 for additional details regarding this scope of work.

It should be noted that non-ASTM scope considerations provided as part of this ESA are not intended to satisfy a regulatory requirement but are to give a lender or user of this report, an indication of significant (significant due to quantity, accessibility, or condition) conditions which may exist at the Property. Additional investigation may be appropriate to satisfy regulatory requirements, or in the event of future demolition or maintenance work which may impact suspect materials.

1.3 Significant Assumptions

In conducting this Phase I ESA, EFI relied on federal and state regulatory agency database information, published historical and physical setting sources, and interviews with knowledgeable parties, regulatory officials, and other private individuals. EFI has assumed where reasonable to do so that the information provided is true and accurate. If information to the contrary is discovered, our conclusions and recommendations may not be valid.

EFI obtained environmental agency database information from Environmental Data Resources, Inc. (EDR). The databases usually present the location of the entities by their street address. In many cases this is the only reasonable means by which we may locate a database entry. The actual location of an entry may not be accurately indicated by the street address given.

Certain environmental hazards are impossible to visually identify; their presence can be verified only by testing and analysis. EFI can make no direct inferences as to the subsurface conditions at the Property based on the Phase I scope of work, which does not include a physical investigation of the subsurface. No detailed wetlands assessments, endangered species, or fault investigations were performed during this site assessment.

Conditions other than those observed may exist in inaccessible or unobserved areas of the Property. During the site visit, materials identified on the Property were not disturbed and underlying conditions were not observed. Should there be a substantial change in the functional utilization of the Property, or if additional improvements are planned, the conclusions presented here may not be valid. If there are changes in the use of the Property or changes in the adjacent property activities or conditions, EFI should be notified so that we may observe these conditions.

Our conclusions and recommendations relate only to the areas we observed during the site reconnaissance and the findings of the research noted in this report. The scope of this report is limited to matters expressly covered.

1.4 Limitations and Exceptions

Other than the limitations set forth in various sections of the ASTM E 1527-13 protocol, there were no limitations or exceptions for this assessment.

1.5 Data Gaps

As required by the ASTM Standard E 1527-13, the ESA shall identify and comment on significant data gaps that affect the ability of the Environmental Professional to identify recognized environmental concerns.

No significant data gaps were encountered as a result of this assessment.

1.6 Deviations

No deviations from the recommended scope of ASTM Standard E 1527-13 were performed as part of this Phase I ESA with the exception of any additional services noted in Section 1.2 Scope of Work.

1.7 Special Terms and Conditions

There were no special terms and conditions. Instructions as to the location of the Property, access, and an explanation of the Property and facilities to be assessed were provided by Mr. Kevin Bai, Bogopa Service Corp.

1.8 User Reliance

All reports, both verbal and written, are for the benefit of Bogopa Service Corp. and JPMorgan Chase Bank, NA. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of EFI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with EFI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against EFI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with EFI's Proposal and General Conditions executed by Bogopa Service Corp. on August 25, 2015.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The Property consists of multiple lots that are located at 1102-1122 Myrtle Avenue, approximately 150 feet west of the intersection of Myrtle Avenue on the south side of Myrtle Avenue; at 367, 369, 371 and 373 Vernon Avenue, located on the north side of Vernon Avenue approximately 300 feet east of the intersection of Vernon Avenue and Lewis Avenue and at 356 Vernon Avenue located on the south side of Vernon Avenue approximately 250 feet east of the intersection of Vernon Avenue and Lewis Avenue. Information obtained from the New York City Department of Finance indicated that the tax assessment parcel numbers for the Property are Block 1586, Lots 12, 14, 24, 27, 51, 52, 53 and 56; Block 1589, Lot 20.

A legal description was not identified during the municipal records review and was not provided by property ownership/ management.

2.2 Site and Vicinity Description

The Property consists of approximately 1.12 acres and is developed with an approximately 22,045 square-foot commercial building. The ground surface at the Property slopes to the north-northeast. Ground cover consists primarily of footprint of the building (1100-1114 Myrtle Avenue), asphalt paved parking lot (1116-1122 Myrtle Avenue) and unpaved fence-enclosed lots (356, 367, 369, 371 and 373 Vernon Avenue). The Property can be accessed from Vernon Avenue located along the south and north sides and Myrtle Avenue to the north side.

The Property is zoned R6B-Residential and C4-4L Commercial. The area surrounding the Property is primarily mixed use consisting residential dwellings and buildings along Vernon Avenue and low-rise commercial and retail buildings along Myrtle Avenue.

2.3 Current Use of Property

The Property is currently occupied by Food Bazaar Supermarket.

2.4 Description of Structures and Other Improvements

The Property is improved with one single-story commercial building with attached warehouse and loading dock area, totaling approximately 22,045 square feet. The side (eastern) portion of the Property is improved with a concrete-paved parking area, while the western portion features a concrete-paved loading dock area. The current building was constructed circa 1920 and has reportedly been renovated over time. The building is concrete masonry unit (CMU) and steel-frame construction and is finished on the exterior with brick and stucco. The Property building has a flat roof.

The Property is heated via natural gas-fired rooftop HVAC units and ceiling-mounted natural gas-fired blowers in the warehouse which supply heating and cooling to the retail and office areas.

The utilities are summarized in the following below:

Property Summary	
Size of Property (approximate):	1.12 acres
General Topography of Property:	General slope to the north and east
Adjoining and/or Access/Egress:	Myrtle Avenue to the north; Vernon Avenue to the north and south

Paved or Concrete Areas (including parking):	Asphalt paved parking area on the eastern and western portions along Myrtle Avenue; Concrete sidewalks along the surrounding streets
Unimproved Areas:	Property parcels located along Vernon Avenue are fence enclosed unimproved lots
Landscaped Areas:	None
Surface Water:	None
Potable Water Source:	City of New York Department of Environmental Protection (NYCDEP)-Water Service
Sanitary Sewer Utility:	NYCDEP-Sewer Service
Storm Sewer Utility:	Municipal storm sewer
Electrical Utility:	Con Edison
Natural Gas Utility:	Con Edison

Building Summary	
Building Name:	Food Bazaar Supermarket 1100-1122 Myrtle Avenue
Number of Floors:	One
Total Square Feet of Space (approximate):	22,045
Construction Completion Date (year):	1920 and 1999
Construction Type:	Brick and stucco exterior steel beam support and flat roof
Interior Finishes Description:	Sheetrock walls, ceiling tiles and floor tiles covered floors
Exterior Finishes Description:	Brick and stucco exterior walls with flat roof
Cooling System Type:	Rooftop mounted HVAC units
Heating System Type:	Rooftop mounted HVAC units
Emergency Power:	None provided

2.5 Current Use of the Adjoining Properties

An area reconnaissance was conducted to assist in evaluating if adjacent land uses have or could have impacted the Property. The area reconnaissance was conducted within a quarter of a mile of the Property by touring the area by automobile/walking, by viewing particular businesses from public right-of-ways, and by physical observations at selected businesses or properties. The following summary describes land use on the adjoining properties, based on our observations.

Directions From Site	Occupant	Use	Comments
North	Mixed use retail and residential	Mixed use	Myrtle Avenue followed by multiple one, two and three story buildings are located to the north. The buildings are used for street level commercial and miscellaneous retail operations as well as upper level residential purposes. No areas of potential concerns were identified
South	Residential	Residential located along Vernon Avenue	No areas of potential concerns were identified
East	Mixed use	Residential located along Vernon Avenue and a NYC Transit System substation (1124-1126 Myrtle Avenue)	No areas of potential concerns were identified
West	Mixed use	Vacant parcel along Myrtle Avenue and residential along Vernon Avenue	No areas of potential concerns were identified

Our observations of the adjoining and adjacent properties did not reveal evidence of potential environmental concerns such as suspect storage facilities, visible fueling facilities or significantly stained surfaces.

3.0 USER PROVIDED INFORMATION

3.1 User Responsibilities

ASTM E 1527-13 requires that the Environmental Professional request from the user of the Phase I ESA, the Client, certain information discussed below concerning the Property or request from the user the names of other individuals who can provide this information.

ASTM E 1527-13 assigns to the Client or its representative, the responsibility to check or engage a title company or title professional to check reasonably-ascertainable recorded land title records for environmental liens, judicial records, or activity and use limitations currently recorded against the Property and provide that information for inclusion in this report.

If this Client or its representative is aware of specialized knowledge or experience that is material to the identification of recognized environmental conditions, or if they have actual knowledge that the purchase price of the Property is significantly less than the purchase price of comparable properties, ASTM E 1527-13 assigns to the Client the obligation to communicate that information for inclusion in this report.

Requested information was not received from the Client prior to the issuance of this report; however, the lack of this information is not considered to represent a significant data gap.

3.1.1 Title Records

EFI requested that the Client provide information regarding title records, judicial records, and environmental cleanup liens associated with the Property. This information is available through reasonably-ascertainable recorded land title records, judicial records, and lien records that are filed under federal, tribal, state or local law.

No information regarding title records, judicial records, or environmental cleanup liens was provided by the Client. Based on the lack of active spills or releases at the Property, the lack of this information is not considered a data gap.

3.1.2 Activity and Use Limitations Applicable to the Property

No information pertaining to AULs or governmental notification was provided by the Client. Based on the lack of active spills or releases at the Property, the lack of this information is not considered a data gap.

3.1.3 Specialized Knowledge or Experience of the User

The Client did not provide any specialized knowledge relating to the Property. Property ownership/management who was interviewed as part of this investigation did not report any specialized knowledge of the Property outside of what is contained in this report.

3.1.4 Commonly Known or Reasonably Ascertainable Information

EFI requested the Client to describe any commonly-known or reasonably-ascertainable information about the Property that would be helpful to EFI to identify conditions indicative of releases or threatened releases to the Property.

The Client did not provide any environmentally-relevant, commonly-known or reasonably-ascertainable information pertaining to the Property.

3.1.5 Relationship to the Purchase Price to Fair Market Value

EFI asked the Client if the purchase price being paid for the Property reasonably reflects the fair market value of the Property. If there was a difference in the purchase price and fair market value, whether the lower price was a result of contamination known or believe to be present at the Property.

No information indicating that the purchase price of the Property is significantly less than the purchase price of comparable properties was reported to EFI by the Client or its representative.

3.1.6 Reason For Performing Phase I

We understand that the purpose of this assessment is to complete an evaluation that will help to provide the factual support of the innocent landowner defense to CERCLA liability and to understand potential environmental conditions that could materially impact the operation of the business associated with the Property (business environmental risk).

3.2 Additional Owner, Property Manager, and Occupant Information

No other pertinent information in connection with the Property was provided by the owner, the property manager, or the occupants.

4.0 RECORDS REVIEW

4.1 Standard Environmental Records Sources

EFI contracted Environmental Data Resources, Inc. (EDR) to conduct a search of Federal and State regulatory agency databases containing known and suspected sites of environmental contamination. The databases searched and the number of listed sites identified within the approximate minimum search distance from the Federal and State environmental records database listings specified in ASTM Standard E 1527-13 are summarized in the following table. Detailed information for each Federal and State database is provided below. Copies of the EDR research data and a description of the reviewed databases are included in Appendix C of this report.

ASTM-REQUIRED STANDARD ENVIRONMENTAL RECORD SOURCES				
DATABASE	SEARCH RADIUS	PROPERTY LISTINGS	ADJACENT LISTINGS	TOTAL LISTINGS
Federal National Priorities List (NPL)	1 mile	0	0	0
Federal Delisted NPL Sites	1/2 mile	0	0	0
Federal CERCLIS List	1/2 mile	0	0	0
Federal CERCLIS NFRAP List	1/2 mile	0	0	0
Federal Corrective Action Sites (CORRACTS) Sites	1 mile	0	0	2
Federal RCRA Non-CORRACTS Treatment/Storage/Disposal (TSD) Facilities	1/2 mile	0	0	0
Federal RCRA Generators List	On-site and adjoining property	2	0	0
Federal Institutional Control/Engineering Control Registries	On-site	0	0	0
Federal ERNS List	On-site	0	0	0
State and Tribal Hazardous Waste Sites (SHWS)	1 mile	0	0	1
State and Tribal Landfill and/or Solid Waste Disposal Sites (SWLF)	1/2 mile	0	0	2
State and Tribal Registered Underground Storage Tank (UST) Sites	On-site and adjoining property	0	0	0
State and Tribal Leaking Underground Storage Tank (LUST) Sites	1/2 mile	0	1	24
State and Tribal Institutional Control/Engineering Control Registries	On-site	0	0	0
State and Tribal Voluntary Cleanup Program (VCP) Sites	1/2 mile	0	0	0
State and Tribal Brownfield Sites	1/2 mile	0	0	1

ASTM-REQUIRED STANDARD ENVIRONMENTAL RECORD SOURCES				
DATABASE	SEARCH RADIUS	PROPERTY LISTINGS	ADJACENT LISTINGS	TOTAL LISTINGS
OTHER PERTINENT FEDERAL AND STATE DATABASES THAT HAD LISTINGS FOR THE PROPERTY AND/OR PROPERTIES IN THE VICINITY				
Other-E Designation	On-Site	5	NA	NA
Other-Spills	On-site and adjoining property	1	2	22
EDR US Historical Auto Stations	1/4 mile	0	2	17
Above-ground Storage Tanks (AST)	1/4 Mile	0	1	16

4.1.1 Federal Databases

Federal National Priority List (NPL)

The NPL is the U.S. EPA's list of uncontrolled or abandoned hazardous waste sites that have been identified for priority remedial actions under the Comprehensive Environmental Response, Compensation and Liability Act (Superfund).

The Property is not a Federal NPL facility and no Federal NPL facilities were identified within one mile of the Property.

Federal Delisted NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL when no further response is appropriate.

The Property is not a Federal Delisted NPL facility and no Federal Delisted NPL facilities were identified within one mile of the Property.

Federal CERCLIS List

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites that are either proposed to be or are on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL.

The Property is not a Federal CERCLIS-listed facility and no Federal CERCLIS-listed facilities were identified within a half mile of the Property.

Federal CERCLIS NFRAP Sites List

The CERCLIS No Further Remedial Action Planned (NFRAP) List indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL

site.

The Property is not listed as a CERCLIS-NFRAP facility and no CERCLIS-NFRAP sites are listed within a half mile of the Property.

Federal Resource Conservation and Recovery Act (RCRA) CORRACTS Facilities List

The EPA Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Treatment, Storage and Disposal (TSD) database is a compilation by the EPA of reporting facilities that treat, store or dispose of hazardous waste. The CORRACTS database is the EPA's list of treatment storage or disposal facilities subject to corrective action under RCRA.

The Property is not listed as a RCRA CORRACTS TSD facility. Two RCRA CORRACTS TSD facilities were listed within one mile of the Property. According to the regulatory database, the two facilities are located at least 0.623 mile at a lower hydraulic gradient relative to the Property. Based on the relative distance and gradient, these facilities are not RECs to the Property.

Federal Resource Conservation and Recovery Act (RCRA) Non-CORRACTS TSD Facilities List

The RCRA TSD database is a compilation by the EPA of reporting facilities that treat, store or dispose of hazardous waste.

The Property is not listed as an RCRA TSD facility and no RCRA TSD sites are listed within a half mile of the Property.

Federal RCRA Generator and Non-Generator Lists

The RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Generators database is a compilation by the EPA of reporting facilities that generate hazardous waste.

The Property is listed as an RCRA Generator.

- The database review indicated that Con Edison Service Box at the Property address at 1120 Myrtle Avenue is listed as a RCRA-LQG facility and at the Property address at 369 Vernon Avenue as a RCRA-Non Generator. The database review indicated that no RCRA violations were listed for the Property. In addition, no reported leaks, spills, or release incidents were listed for the Con Edison Service boxes at the Property. These RCRA listings do not represent a REC to the Property.

Four additional RCRA Non-Generators are listed on the adjoining properties located at 359 Vernon Avenue, 793 Willoughby Avenue, 926 Broadway, and 11267, 1131, and 1135 Myrtle Avenue and are associated with Con Edison service boxes. According to the regulatory database, no reported RCRA violations were listed for these facilities.

Federal Institutional Control/Engineering Control Registries

The EPA maintains a listing of sites with institutional controls currently in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional

controls.

The Property is not listed as a US IC/EC Controlled property.

Federal Emergency Response Notification System (ERNS)

The Emergency Response Notification System (ERNS) records information on reported releases of oil and hazardous substances. The database contains preliminary information on specific releases, including the spill location, substance released and the responsible party.

The Property is not listed on the ERNS database.

4.1.2 State Databases

State CERCLIS-Equivalent List

The State Hazardous Waste Sites (SHWS) records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Sites identified on the SHWS include both priority sites planned for clean up using state funds (state equivalent of Superfund) and sites where clean up will be paid for by potentially responsible parties.

The Property is not listed as a SHWS facility. The database indicated that one SHWS site is listed within one mile of the Property. According to the regulatory database, the facility is located approximately 0.873 mile to the northeast at a lower hydraulic gradient relative to the Property. Based on the distance and relative lower hydraulic gradient this facility is not a REC to the Property.

Solid Waste Landfill Facilities (SWLF)

SWLF records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The SWLF database was searched by EDR and reviewed by EFI for evidence of landfills and solid waste treatment facilities within a half mile of the Property.

The Property is not listed as a SWLF facility. Two SWLF facilities were identified within the search radius:

- The Bedford Auto Sales site is located at 984 Myrtle Avenue, approximately 0.31 mile west and down gradient of the Property. The available information indicates that vehicle dismantling activities are currently performed at this site. Based on respective distance, regional topography, and since the site was not identified on additional federal or state databases related to the release or storage of hazardous substances, this facility is not considered a REC to the Property.
- The Ram Auto Wreckers site is located at 230 Cook Street, approximately 0.46 mile north-northeast and down gradient of the Property. The available information indicates that vehicle dismantling activities are currently performed at this site. Based on respective distance, regional topography, and since the site was not identified on additional federal or state databases related to the release or storage of hazardous substances, this facility is not considered a REC to the Property.

State Registered Underground Storage Tank List (UST)/HIST UST

The New York State Department of Environmental Conservation (NYSDEC) compiles a list of

registered UST locations.

The Property is not listed as an UST or HIST UST facility. No registered UST facilities are listed adjacent to the Property.

State Registered Aboveground Storage Tank List (AST)/HIST AST

The NYSDEC compiles a list of registered AST locations.

The Property is not listed as an AST or HIST AST facility. One registered AST facility is listed adjacent to the Property.

- Five Star Transmission, Inc. is listed on the northern adjoining property at 1123 Myrtle Avenue. The available information indicates that a 275-gallon AST was formerly in use at this site. At present, the building is occupied by a New York 99 Cent Store. Based on the cross-gradient location of this site in relation to the Property, and since site was not identified on additional federal or state databases related to the release or storage of hazardous substances, this facility is not considered a REC to the Property.

State Leaking Storage Tank List (LTANKS)/ HIST LTANKS

The NYSDEC compiles lists of all reported leaks of hazardous substances from USTs and ASTs.

The Property is not listed as a LTANKS or HIST LTANKS facility. Twenty-four LTANKS facilities were identified within a half mile of the Property. Fifteen of the facilities are located at least 0.25 mile at a lower or cross hydraulic gradient and therefore do not represent RECs to the Property. Seven of the remaining nine LTANKS/ HIST LTANKS sites are noted to be closed by the NYSDEC; therefore, based on the regulatory status, these sites are not considered RECs to the Property. The two active and one adjoining closed LTANKS sites are discussed below:

- The Private Parking Area at 358-374 Vernon Avenue is located to the adjoining south side of the Property. This facility is listed as a closed LTANKS site related to the identification of petroleum-impacted soil during the removal of gas and fuel oil tanks in 1998. Following cleanup activities, that included the removal of approximately 40-50 yards of contaminated soil, the spill case was closed in July of 1999. Subsequent to the removal activities, the facility was redeveloped with the existing residential building in 2001. Based on resolved regulatory status and cross-gradient location, this facility is not considered a REC to the Property.
- Sumner Houses-NYCHA 10 Lewis Avenue is located approximately 0.114 mile to the northwest at a lower hydraulic gradient relative to the Property. A tank test failure was reported at this facility in July 1995 and the LTANKS incident is identified by the NYSDEC Spills #9505222. The facility is currently undergoing remedial investigation under the NYSDEC oversight. Based on the on-going remedial activities, relative distance and lower hydraulic gradient, this facility does not represent a REC to the Property.
- Sumner Houses-NYCHA 10 Lewis Avenue is located approximately 0.223 mile to the south-southwest at a lower hydraulic gradient relative to the Property. A tank test failure was reported at this facility in December 2005 and the LTANKS incident is identified by the NYSDEC Spills #9415020. The facility is currently undergoing remedial investigation under the NYSDEC oversight. Based on the on-going remedial activities, relative distance and lower hydraulic gradient, this facility does not represent a REC to the Property.

State Institutional Controls

The NYSDEC compiles lists of No Further Action (NFA) Sites with Land Use Restrictions and Monitoring. A land use restricted site is a property where there are limits or requirements on future use of the property due to varying levels of cleanup possible, practical, or necessary at the property.

The Property is not listed as having Land Use Restrictions or Institutional Controls.

State Voluntary Cleanup Program (VCP) Sites

The NYSDEC compiles a listing of sites that are being voluntarily cleaned up by the Responsible Party(s) under supervision of State officials. The VCP database was searched by EDR and reviewed by EFI for evidence of properties in this program within a half mile of the Property.

The Property is not listed on the VCP database and no VCP properties were identified within the search radius.

State Brownfield Sites

The NYSDEC compiles an inventory of Brownfields Projects. A Brownfields site is an abandoned, idled, or underused property where the threat of environmental contamination has hindered its redevelopment. All of the sites in the inventory are working toward a Brownfields agreement for cleanup and liability control. The state's Brownfields' database was searched by EDR and reviewed by EFI for evidence of properties in this program within a half mile of the Property.

The Property is not listed on the Brownfields database. One Brownfields property was identified within the search radius. According to the regulatory database, Former Getty Service at 1103-1107 Dekalb Avenue is located approximately 0.312 mile to the southeast at a lower hydraulic gradient. Based on the relative distance and lower hydraulic gradient of this facility, it does not represent a REC to the Property.

4.2 Additional Environmental Record Sources

A summary of all additional environmental record sources can be found below.

Federal ASTM Supplemental

- Superfund (CERCLA) Consent Decrees (CONSENT)
- Records of Decision (ROD)
- National Priority List Deletions (Delisted NPL)
- Facility Index System/Facility Identification Initiative Program Summary Report (FINDS)
- Hazardous Materials Information Reporting System (HMIRS)
- Material Licensing Tracking System (MLTS)
- Mines Master Index File (MINES)
- Federal Superfund Liens (NPL Liens)
- PCB Activity Database System (PADS)

- Department of Defense Sites (DOD)
- Indian Reservations (INDIAN RESERV)
- Open Dump Inventory (ODI)
- Uranium Mill Tailings Sites (UMTRA)
- Formerly Used Defense Sites (FUDS)
- RCRA Administrative Action Tracking System (RAATS)
- Toxic Chemical Release Inventory System (TRIS)
- Toxic Substances Control Act (TSCA)
- Section 7 Tracking Systems (SSTS)
- FIFRA/TSCA Tracking System (FTTS INSP)

State or Local ASTM Supplemental

- Spills Incidents (SPILLS)
- Registered Bulk Fertilizer and Pesticide Storage Facilities (BULK)
- Drycleaner Facility Listing (DRYCLEANERS)

EDR Proprietary Historical Databases

- Former Manufactured Gas (Coal Gas) Sites
- US Historical Auto Stations
- US Historical Cleaners

Brownfields Databases

- Listing of Brownfields Sites (US Brownfields)
- Sites with Restrictions (AUL)

Orphan (Unmappable) Sites

A total of eight sites were identified by EDR in this list; however, based on a cursory review, the Property and immediately adjacent properties did not appear to be included.

E Designation - Review of the regulatory database identified the Property parcels at 1100 Myrtle Avenue, 367, 369, 371, and 373 Vernon Avenue on the City of New York E-Designation database. An E-Designation is a NYC zoning map designation that indicates the presence of an environmental requirement pertaining to potential Hazardous Materials Contamination, Window/Wall Noise Attenuation, or Air Quality impacts on a particular tax lot. E-Designations are established on the Zoning Map by the Office of Environmental Remediation and City Council as a part of a zoning change/action. The E-Designation rule sets forth

procedures that landowners and developers must follow to satisfy E-Designations and obtain city building permits for their projects. According to information provided in the regulatory database, the Subject Property is listed as an E-Designation facility for "Air Quality-HVAC fuel limited to natural gas", Hazardous Materials -Phase 1 and Phase 2 Testing Protocol" and Window Wall Attenuation & Alternate Ventilation". The listing of the Property on an E-Designation database does not necessarily constitute a recognized environmental condition at the Property. However, the E-Designation requirements should be satisfied and proper approvals and permits have to be obtained from the appropriate City of New York regulatory offices prior to any planned development activities.

Spills - The database review identified two Spills incidents at the Property parcel 365 Vernon Avenue; one of which was reported in September 2013. According to the regulatory database, a 55-gallon drum containing diesel and water was abandoned at the Property. The drum was subsequently removed by the City of New York and the Spills incident was closed by the NYSDEC on September 26, 2013. Based on the resolved regulatory status and reported nature of the incident, the Spills incident does not represent an environmental concern and is considered a historical recognized environmental condition at the Property, and a file review is not warranted.

An additional earlier Spills incident was reported at 356 Vernon Avenue in March 2010. According to information provided in the regulatory database, the Spills incident was reported at Godfrey's Residence and related to a leak from a boiler that reportedly spilled product on the cement floor. Of note, the Property at 356 Vernon Avenue was vacant from at least 2001. EFI's review of the online City of New York Department of Finance website indicated that the property address at 356A Vernon Avenue located to the adjoining east side of the Property (356 Vernon Avenue) is occupied by a private residence owned by Frances Godfrey. Therefore, it appears that this Spills incident occurred on the adjoining property to the east at 356A Vernon Avenue and not at the Property. In addition, according to the regulatory database, the spilled product was contained on the concrete floor of the boiler room and was subsequently closed by the NYSDEC on March 3, 2010. Based on the reported nature of the incident and resolved regulatory status, the Spills incident at the adjoining property to the east does not represent a REC to the Property, and a file review is not warranted.

The database also identified twenty (20) additional Spills within one-eighth mile of the Property. According to the regulatory database, all reported Spills incidents were identified as closed by the NYSDEC and therefore do not represent RECs to the Property.

EDR US Historical Auto Stations - The database review identified a total of seventeen (17) historical auto stations in EDR's proprietary database information. Two of the identified historical auto stations are located at adjoining properties, and are described below:

- The northwesterly adjoining property located at 1123 Myrtle Avenue was identified as Naz Transmission & Auto Repairs Incorporated for the years 1999 to 2003. This property location is also listed as Five Star Transmission in the AST database; however no releases were reported. Based on the cross-gradient location of this site in relation to the Property, and since site was not identified on additional federal or state databases related to the release of hazardous substances, this facility is not considered a REC to the Property.
- The northeasterly adjoining property located at 1135 Myrtle Avenue was identified as Tony's Auto Repair for the years 2005, 2008, and 2010. Tony's Auto Repair was also observed to be present during the property reconnaissance visit, and no evidence or conditions indicative of a release was observed. Based on the down-gradient location of this site in relation to the Property, and since site was not identified on additional federal or state databases related to the release or

storage of hazardous substances, this facility is not considered a REC to the Property.

No other issues of concern were identified during the review of the additional environmental record sources.

4.3 Regulatory Agency and Records Review

If the Property and/or any of the adjoining properties are identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed as a part of the Phase I ESA investigation. The purpose of the regulatory file review is to obtain sufficient information to assist in determining if a REC, HREC, CREC, or de minimis condition exists at the Property in connection with the listing. This applies to information that is attainable within a reasonable time and cost constraint.

The Property and an adjacent property were identified on the various databases. However, because no active spills or releases are associated with the listings, a regulatory file review is not warranted.

4.4 Physical Setting Source(s)

The elevation of the Property is approximately 70 feet above mean sea level, as depicted on the U.S.G.S. 7.5 Minute Series Topographic Map of the Brooklyn, NY Quadrangle, dated 1995. The Property and surrounding properties slope gently to the north and east. Storm water flow is routed to storm drains along the adjoining Myrtle Avenue.

4.4.1 Topography

The terrain in the general vicinity of the Property slopes gently to the north and northeast. The Property has been graded to generally level with engineered slopes for drainage. Land in the general vicinity consists of highly developed relatively flat urban land. The Property did not appear to receive significant surface water runoff from adjoining properties.

4.4.2 Surface Water Bodies

No surface water is located on the Property. The nearest surface water in the vicinity of the Property is English Kills, located approximately 0.9 miles to the north northeast of the Property.

4.4.3 Soils/Geology

Based on the soil survey maps published by the United States Department of Agriculture (USDA) Natural Resources Conservation Service, the Property is mapped as Urban Land, which is made up of areas where the original soil characteristics have been permanently altered due to extensive urban development.

The Property is situated within the central portion of Kings County, and according to the Generalized Bedrock Geology Map of New York, is comprised of consolidated gravels, sands and clays of the Cretaceous era. The estimated depth to bedrock is more than 30 feet below land surface.

4.4.4 Hydrology

Shallow groundwater flow generally follows the local topography, but may be affected by localized conditions. Based on the local topography of the area, shallow groundwater in the vicinity of the Property is expected to flow to the north and northeast.

According to information obtained from a prior Phase II Limited Subsurface Investigation conducted at the Property in March 2013, the depth to groundwater was reported to be 14 feet below grade

level.

4.4.5 Wetlands

No wetlands, settling ponds, lagoons, surface impoundments, or natural catch-basins were observed at the Property during this investigation. According to the US Fish and Wildlife Service Geospatial Wetlands Information online map, there are no wetlands on the Property. A map illustrating the wetlands in the vicinity of the Property is provided in the EDR database.

4.4.6 Flood Zone Information

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency, was performed. According to Panel Number 3604970208F, dated September 5, 2007 the Property is located in Flood Zone: Zone B, X (shaded): Moderate risk areas within the 0.2-percent-annual-chance floodplain, areas of 1-percent-annual-chance flooding where average depths are less than 1 foot, areas of 1-percent-annual-chance flooding where the contributing drainage area is less than 1 square mile, and areas protected from the 1-percent-annual-chance flood by a levee. No BFEs or base flood depths are shown within these zones. (Zone X (shaded) is used on new and revised maps in place of Zone B). A map illustrating the flood plains in the vicinity of the Property is provided in the EDR database.

4.4.7 Oil and Gas Exploration

No oil or gas wells were identified at the Property.

4.4.8 Mining Activities

No indication of mining activities was identified during completion of this assessment.

4.5 Historical Use

4.5.1 Historical Summary

Historical information identifying the past use of the Property was obtained from a variety of sources as detailed in Appendix B of this report and included city directories, Sanborn Fire Insurance maps, and local agency records. Review of historical information indicated that the Property was improved with three, two-story dwellings on the northwestern portion along Myrtle Avenue from as early as 1887, and with a large, five-story multi-family residential building and two row houses north of Vernon Avenue from as early as 1904. One, two-story row house is present on the portion of the Property south of Vernon Avenue as of 1904 (356 Vernon Avenue). Starting in 1918, the portion of the Property along Myrtle Avenue is used largely for commercial or light industrial purposes, with the exception of two row houses on the northeast corner of the Property (1120 & 1122 Myrtle Avenue). A candy factory is present on the northwest portion of the Property (1100 Myrtle Avenue), which is vacated by 1935 and then occupied by a furniture manufacturer by 1947. A large, rectangular, single-story auto garage occupies the majority of the Property along Myrtle Avenue as of 1920, and is depicted with a 1,000-gallon gasoline UST in the northeast corner of the building (1114 Myrtle Avenue). In 1965, the row houses to the northeast are replaced by a two-story factory building. In 1977, the furniture manufacturing building has been demolished, and the lot is vacant. The garage building is used for auto repair, and the UST is no longer depicted. In 1980, the western half of the single family residential building north of Vernon Avenue has been demolished and sits vacant, and by 1981, the entire Property is vacant with the exception of the commercial building (former auto repair building) on Myrtle Avenue, and the single row house south of Vernon Avenue. By 1996, the row house south of Vernon Avenue is demolished and the lot sits vacant. A small warehouse storage

addition is constructed on the southwest corner of the commercial building on Myrtle Avenue in 1999 (1100 Myrtle Avenue).

Review of historical information indicates the following areas of suspect environmental concern at the Property.

- The historical review indicates that the Property was historically used for residential as well as various commercial and light industrial activities that included an automobile garage (1102-1114 Myrtle Avenue) equipped with a buried 1,000-gallon gasoline UST (shown in the 1947 to 1965 maps); auto repair activities from at least 1934 to 1980 (1102-1114 Myrtle Avenue) and furniture manufacturing (1947 to 1968).

The historical Property and adjoining site operations are discussed in the following sections.

4.5.2 City Directories

EFI reviewed city directories for the Property and adjoining properties provided by EDR that covered the years [1928, 1934, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980, 1985, 1992, 1997, 2000, 2005, 2007 and 2012. The Property addresses were first listed in 1928 as a garage (1102), Robert S Storage Batteries (1120), Amity Products Corporation, Just Born Inc. French Chocolates, and Norma Chocolate Works (1100) and multiple residential listings.

A copy of the city directories is provided in Appendix B. A summary of the city directories is provided below:

Summary

Date	Site Comments	Surrounding Area Comments
1928	Amity Products Corporation, Just Born Inc. French Chocolates, S H Born, Norma Chocolate Works and Irving C. Shaffer (1100); Garage and David Katz (1102); B A R Ellis (1118) and Robery S. Storage Batteries and Gustav Wanderer (1120); Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1934	Just Born Inc. (1100); Meile Auto Repair Company (1102); residential listings (1108); Broadway Garage and Pinkus Realty Corporation (1114); residential listings 1118); Serval Sales and Service (1120) and Max Mallio HDW (1122). Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings

Date	Site Comments	Surrounding Area Comments
1940	Dante Furniture Company (1100); Broadway Garage (1114); residential listing (1118); and Best Wick Distributors and Lester and Company Hardwoods (1122). Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1945	Dante Furniture Company and Charles Spina Furniture (1100); Broadway Garage (1114); residential listing (1118); and Brooklyn Show Machinery Company and Ralph Catalano Machinery (1122). Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1949	Ferrigno Brothers Furniture Company Inc. (1100); Brooklyn Truck Renting Company (1114); Mallin Lock Manufacturing Company and residential listing (1118); and Brooklyn Show Machinery Company and Ralph Catalano Machinery (1122). Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1960	Majestic Staple Company and Trova Sportswear Inc. (1100); Metropolitan Truck Leasing Service (1114); Durro Process Printing Company and Glenwood Sportswear Inc. (1118); and Ralph Catalano Machinery (1122). Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1965	PG Dean Inc. (1098); Majestic Staple Company and Trova Sportswear Inc. (1100); Metropolitan Truck Leasing Service (1114); Durro Elliot Corporation (1116); and Brooklyn Shoe Machinery Company and Anthony Fedele Machinery (1122). Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1970	Stabbe Senter Press Inc. (1116) and Brooklyn Shoe Machinery Company (1122). Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1973	Brooklyn Shoe Machinery Company and Speed O Magic Corporation (1122). Residential listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings

Date	Site Comments	Surrounding Area Comments
1976	L&L Auto Radiator Service (1102) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1980	No listing (1100-1122) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1985	Skate City (1102) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1992	No listing (1100-1122) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
1997	Neighborhood Wholesaler Brooklyn (1102) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
2000	AFS Market (1102) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
2005	First Dimension AFS Market Inc. (1102) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
2007	No listing (1100-1122) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings
2012	No listing (1100-1122) No listing (356, 369, 371, 373 Vernon Avenue)	Residential and miscellaneous retail listings

4.5.3 Aerial Photos

Based on the dense, urbanized nature of the surrounding area, historical aerial photographs for the Property and surrounding area were not reviewed for this assessment.

4.5.4 Sanborn/Historical Maps

Historical Sanborn Fire Insurance maps dated 1887, 1888 1904, 1907, 1933, 1935, 1947, 1950, 1951, 1965, 1968, 1977, 1979, 1980, 1981, 1982, 1984, 1986, 1987, 1988, 1989, 1991, 1994, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006 and 2007 for the Property were provided by EDR. Review of historical information indicated that in the historical maps 1887, 1904 and 1915, the Property lots at 1110 to 1120 Myrtle Avenue were occupied by two story residential dwellings and the lot 1122 Myrtle Avenue was occupied by a single story retail store. Copies of the maps are included in Appendix B of this report. A summary of the Sanborn maps is provided below.

Summary

Date	Site Comments	Surrounding Area Comments
1887	The Property lots at 1110 to 1120 Myrtle Avenue were occupied by several two-story dwellings; the lot at 1122 Myrtle Avenue was occupied by a single story retail store, and the lot at 356 Vernon Avenue was occupied by a three-story dwelling. All remaining Property lots were vacant.	Mostly vacant lots along Vernon Avenue; a large area to the north of Myrtle Avenue is identified as Stables & Repair Shop. Scattered residential development is depicted to the south and east
1904	No major changes along Myrtle Avenue. The dwelling at 356 Vernon Avenue has been replaced with a two-story row house. The lots at 367, 369, 371 and 373 Vernon Avenue have been improved with a five-story multi-family residential building.	Surrounding properties along Myrtle Avenue appear to be improved commercial/retail and mixed use residential and retail stores; with residential development depicted along Vernon Avenue
1918	No major changes, except the two-story dwelling at 1110 Myrtle Avenue has been demolished and the lot is depicted as vacant. The lots located at 1098-1100 Myrtle Avenue are depicted as developed with a candy factory.	Similar to that depicted in the previous map
1935	The 1102-1114 Myrtle Avenue portion of the Property is shown as a 120-car parking garage. A 1,000-gallon gasoline UST is located near the northeast corner of the garage, adjacent to a former boiler room. 1116-1118 Myrtle Avenue are occupied by two, two-story dwellings. 1120 and 1122 Myrtle Avenue are occupied by commercial storefronts. The former candy factory is depicted as a vacant commercial building. Properties along Vernon Avenue appear similar to that depicted in the previous map	Similar to that depicted in the previous map
1947-1968	The 1102-1114 Myrtle Avenue portion of the Property remains occupied by the above-referenced 120-car parking garage with associated 1,000-gallon gasoline UST. 1116-1120 Myrtle Avenue is occupied by a furniture manufacturing facility, and 1122 Myrtle Avenue is occupied by a commercial storefront. In addition, the former candy factory building is depicted as occupied by a furniture manufacturing facility (1098-1100 Myrtle Avenue). Properties along Vernon Avenue appear similar to that depicted in the previous map	Similar to that depicted in the previous map

Date	Site Comments	Surrounding Area Comments
1977-1980	The 1102-1114 Myrtle Avenue portion of the Property is shown as an auto repair facility and the formerly depicted UST is not present. The former furniture building is shown as an undeveloped lot. Properties along Vernon Avenue are depicted as vacant parcels, with the exception of 356 Vernon Avenue.	Similar to that depicted in the previous map; with a vacant parcel depicted to the adjoining south side of Vernon Avenue
1981-1989	The 1102-1114 portion of the Property is shown with a commercial building. 1116-1120 Myrtle Avenue is depicted as an open lot, with an apparent commercial storefront located at 1122 Myrtle Avenue. The 1098-1100 portion is shown as a vacant lot. Properties along Vernon Avenue are depicted as vacant parcels, with the exception of 356 Vernon Avenue.	Similar to that depicted in the previous map
1991-1995	The 1122 Myrtle Avenue portion of the Property is shown as a fire ruin. No additional major changes to the Property were noted. Properties along Vernon Avenue are depicted as vacant parcels, including 356 Vernon Avenue.	Similar to that depicted in the previous map; with a residential building depicted on the adjoining south that was previously shown as a vacant parcel
2001-2007	The Property is improved with a commercial structure located at 1102-1114 Myrtle Avenue, and appears to have been combined with the current one-story warehouse building located at 1098-1100 Myrtle Avenue. The 1116-1122 portion of the Property is depicted as a vacant (parking) lot. Properties along Vernon Avenue are depicted as vacant parcels.	Similar to that depicted in the previous map

4.5.5 Historical Topographic Maps

Historical topographic maps were not reviewed as part of this assessment. Historical use of the Property was researched using other standard historical sources.

4.5.6 Title Records

Review of a 50-year chain of title was not included in the scope of the assessment. A title report was requested from the Client, but was not received prior to issuance of this report. As a result, the information required for review of recorded land title records is considered not to be readily ascertainable.

4.5.7 Other Environmental Reports

The following prior assessments were provided to EFI for review.

Phase 1 Environmental Site Assessment Report, AFS Market, Inc., 1102-1122 Myrtle Avenue,

Brooklyn, New York, 11206; prepared by EFI Global of Farmingdale, NJ dated January 4, 2013. The following is a brief summary of information obtained from the report:

- According to the EFI Report, the Property was located within the Borough of Brooklyn, New York in an area consisting primarily of single and multi-family residential and commercial storefront development. The Property is located at 1102-1122 Myrtle Avenue, was reportedly comprised of four adjoining tax parcels comprising 0.74 acre of land and is improved with a one-story supermarket, paved parking, and loading dock areas. The building is of one-story slab-on-grade construction with no below-grade areas.
- The EFI report stated that according to the historical information, the Property was first developed for residential purposes prior to 1887 with four residential dwellings located at 1110 and 1116-1120 Myrtle Avenue, one commercial storefront located at 1122 Myrtle Avenue and several vacant lots. The 1098-1100 Myrtle Avenue portion of the Property was originally developed as a Candy Factory which operated from approximately 1918 to 1934. This building was also operated as a furniture manufacturer from at least 1947 until at least 1968, and as the current supermarket warehouse and loading dock since approximately 2001. The 1102-1114 Myrtle Avenue portion of the Property was originally constructed circa 1921 and has historically been occupied by a parking garage from approximately 1921 to 1968, truck rental company from at least 1949 to approximately 1965, auto repair facility from at least 1977 to 1980, skating rink from 1981 to the early 1990s, and a supermarket since 1993. The 1116-1120 Myrtle Avenue parcels were originally developed for residential and purposes prior to 1887. By 1904, 1116 Myrtle Avenue was converted to a commercial storefront. All three parcels were also occupied by a furniture manufacturer from at least 1947 until approximately 1980. The former structures were reportedly demolished in 1947 and 1979, and this portion of the Property has since been occupied by paved parking areas associated with the current supermarket. The 1122 Myrtle Avenue parcel was originally developed as a commercial storefront prior to 1887 and is known to have been occupied by a paint shop in the early 1900s. The building was reportedly demolished in the early 1990s, and has since been occupied by paved parking areas associated with the current supermarket.

The Report identified the following recognized environmental conditions at the Property:

- A 1,000-gallon gasoline UST was utilized at the Property between the approximate years of 1947 and 1968. The tank was situated in the northeast portion of the former parking garage building located at 1102-1114 Myrtle Avenue. As no records related to the removal or investigation of this UST have been identified to date, the potential presence of an unregulated UST is considered a REC relative to the Property.
- The Property has been historically utilized for a variety of commercial and light industrial uses dating back to approximately 1921. Prior historic uses of environmental concern have included a furniture manufacturer from at least 1947 to 1968 (1098-1100 Myrtle), auto repair facility in 1934 and from at least 1977 to approximately 1980 (1102 Myrtle), and furniture manufacturer from at least 1947 to approximately 1980 (1116-1120 Myrtle). Based on the potential for adverse environmental impacts to the Property subsurface as the result of the former on-site activities, the historical use and occupancy of the Property has been identified as a REC.

- Suspect asbestos-containing building materials were observed in the building in the form of non-friable drywall and joint compound, non-friable ceiling tiles, non-friable vinyl floor tiles, non-friable grouts, mastics, and caulking and non-friable roofing materials. The aforementioned building components were noted to be in overall good condition with low potential for disturbance.

EFI Recommended that following:

- EFI recommended a Phase II Limited Subsurface Investigation be performed to determine if the subsurface of the Property has been impacted by the former operation of a 1,000-gallon gasoline UST.
- Historic Property Use - EFI recommends a Phase II Limited Subsurface Investigation be performed to determine if the subsurface of the Property has been impacted by the historical use of the Property for furniture manufacturing and auto repair.

Limited Phase II Subsurface Investigation Report, AFS Market, Inc., 1102-1122 Myrtle Avenue, Brooklyn, New York, 11206; prepared by EFI Global of Farmingdale, NJ dated January 4, 2013. The following is a brief summary of information obtained from the report:

- Based on the above identified RECs, EFI's investigation was performed to determine whether the historical use of the Property as an automotive garage and the presence of petroleum underground storage tanks (USTs) formerly in use onsite have negatively impacted the subsurface conditions at the Property.
- The investigation included the installation of three soil borings for the collection of soil and groundwater samples at the Property. Three soil samples and one groundwater sample (TW-1), were analyzed for VOCs by EPA Method 8260 and for SVOCs by EPA Method 8270. According to the laboratory analytical report, several SVOCs were detected in groundwater sample TW-1 above the applicable NYSDEC TOGS groundwater regulatory criteria. Specifically, benzo(a)pyrene was detected at 6.68 micrograms per liter (ug/l), exceeding the applicable TOGS criteria of equal to the laboratory MDL. Benzo(b)fluoranthene was detected at 9.22 ug/l, exceeding the applicable TOGS criteria of 0.002 ug/l. In addition, benzene, 2-butanone, and 10 SVOCs were detected in soil sample B-3 at concentrations less than the NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCO). The concentrations of two SVOCs, benzo(a)pyrene (0.487 mg/kg) and benzo(b)fluoranthene (0.659 mg/kg), are slightly below the UUSCO and RUSCO of 1 mg/kg for these contaminants. With the exception of acetone, no other VOCs or SVOCs were reportedly identified in the soil samples collected at the Property. The presence of acetone in the soils was attributed to laboratory contamination, as acetone is a common laboratory artifact.
- The EFI Report concluded that the sampling conducted during this investigation indicates that there does appear to have been an impact to the subsurface at concentrations exceeding state standards as a result of the historical uses of the Site. EFI recommended that the Site apply to be entered voluntarily into the NYSDEC Brownfield Cleanup Program under 6 NYCRR Part 375 Subpart 375-3, and that further subsurface investigations be completed at the Site, primarily to address the concentrations of the SVOCs identified in the soil and ground water samples collected.

4.5.8 Building Department Records

Records from City of New York Building Department online Building Information System were reviewed for evidence indicating the developmental history of the Property, and for the presence of documentation relative to USTs. The online records provided the following information:

- 1098-1100 Myrtle Avenue - Alteration permits were identified dating back at least 1917 and a full demolition permit was identified in 1970. The current warehouse addition was first occupied in 2001.
- 1102 Myrtle Avenue - A new building permit was identified in 1920 and 1921. Certificates of Occupancy for a roller skating rink and supermarket were also identified in 1981 and 1993, respectively.
- 1116 Myrtle Avenue - Permit records dating back to 1921 were identified, including two demolition permits in 1946 and 1979 as well as an oil burner application in 1947.
- 1122 Myrtle Avenue - References to the 1935 installation (construction) of a store and one-car garage were identified, in addition to an oil burner application in 1948 and full demolition permit in 1992.
- 367 Vernon Avenue- Permits dating back to 1939 were identified. A demolition permit was reportedly issued in 1974. An oil burner application was reportedly filed in 1947 and 1960.
- 369 Vernon Avenue - Permits dating back to 1914 were identified. A demolition permit was reportedly issued in 1980. An oil burner application was filed in 1963 and 1973 at this Property.
- 371 Vernon Avenue- Permits dating back to 1912 were identified. A demolition permit was reportedly issued in 1980. An oil burner application was filed in 1950 at this Property.
- 373 Vernon Avenue- Permits dating back to 1920 were identified. A demolition permit was reportedly issued in 1980.
- 356 Vernon Avenue-Permits dating back to 1923 were identified. An oil burner application was filed in 1950 at this facility. A demolition permit was reportedly issued in 1992.

The review of the online City of New York Building Department records indicated that oil burner permits were issued at the Property parcels 367, 369, 371, 373 and 356 Vernon Avenue. These Property parcels were previously occupied by residential buildings that appeared to have been demolished in the 1970s and 1980. It is likely that these Property buildings were previously equipped with oil-fired boilers that were fueled by heating oil stored in aboveground or underground storage tanks. The online review did not provide any information about the former heating oil storage tanks at the Property. It is not known if the former heating oil storage tanks were properly removed as per local and state regulations. This lack of information confirming the proper closure of the former heating oil storage tanks at Property represents a recognized environmental condition at the Property.

No other records of historical or environmental significance were identified. Please see Appendix F for a copy of the pertinent records.

4.5.9 Other Land Use Records

City of New York Department of Finance-

EFI reviewed assessment records on the New York City Department of Finance website. The Property is known as 1102-1122 Myrtle Avenue (Block 1586, Lots 12, 14, 24 and 27), 367, 379, 371 and 373 Vernon Avenue (Block 1586 and Lots 51, 52, 53 and 56) and 356 Vernon Avenue (Block 1589 and Lot 20). The lots encompass a reported 31.12 acre of land. The Property buildings were noted to total approximately 22,045 SF and is listed with a construction date of 1921 and 1999. No additional pertinent information was identified.

City of New York Health Department-

EFI submitted a Freedom of Information Letter (FOIL) for the Property to the New York City Department of Health and Mental Hygiene-Bureau of Environmental Health Services for information pertaining to hazardous substances, USTs, releases, inspection records, asbestos, mold and LBP violations, etc. A response has not been received from this agency as of the release date of this report. Any pertinent information will be forwarded to the Client upon receipt. Please see Appendix F for a copy of the FOIL request.

City of New York Department of Planning

According to the City of New York online information, the Property is zoned C4-4L Commercial use and R6-B-Residential use.

4.6 Data Failure

Based on the definition presented in ASTM E 1527-13, data failure occurs when all of the standard historical sources that are reasonably-ascertainable and likely to be useful have been reviewed and the historical use of the Property has not been documented back to the Property's first developed use, or 1940 whichever is earlier. When data failure occurs, ASTM E 1527-13 requires the Environmental Professional to document the data failure and assess the potential impact on the ability of the Environmental Professional to identify recognized environmental conditions.

EFI was able to document the historical use of the Property in accordance with the Standard and therefore no related data failure was identified.

4.7 Vapor Encroachment Conditions

As summarized in Sections 4.1 and 4.2 of this report, the Property was not identified in the regulatory database report for releases or spills. Based on these current conditions, a vapor encroachment condition (VEC) is not considered a concern with regards to the Property.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance was conducted on September 8, 2015 by Ramesh Challapalli, Field Professional with EFI, accompanied by Kevin Bai of Bogopa Service Corporation. The weather was sunny with an approximate temperature of 85 degrees Fahrenheit. The visual reconnaissance consisted of observing the boundaries of the Property and systematically traversing the Property to provide an overlapping field of view, wherever possible. The peripheries of the on-site structures were observed along with interior accessible common areas, storage areas, and maintenance areas. The roof of the building was not accessible at the time of the site visit. Photographs of pertinent site features identified during the site reconnaissance are included in Appendix A.

5.2 General Site Setting

5.2.1 Site Description

The Property consists of approximately 1.12 acres and is developed with an approximately 22,045 square foot, single-story commercial building. The ground surface at the Property slopes gently downward to the north. Ground cover consists primarily of the building, and asphalt and unpaved, fence-enclosed lots. The Property can be accessed from Vernon Avenue located along the south and north sides and Myrtle Avenue to the north side.

The Property building is entirely occupied by Food Bazaar Supermarket. The lots along Vernon Avenue are unpaved, fenced-enclosed parcels.

5.2.2 Exterior Observations

The buildings are single-story, slab-on-grade construction, with the exception of a small basement located on the northeast corner of the supermarket building. The buildings are finished on the exterior with brick masonry and stucco. No surface water bodies are observed on or in the vicinity of the Property.

5.2.3 Interior Observations

The building finishing materials included drywall, painted concrete, carpet, and ceramic and vinyl floor tiles. No evidence of trench drains, pits, significant staining, bulk chemical storage, etc. was observed inside the building other than those installed in the kitchen and food processing areas installed to catch surface runoff.

5.2.4 Potable Water

The Property is connected to the municipal water supply provided by City of New York Department of Environmental Protection-Water Department. The source of the water is groundwater wells, lake, reservoirs, etc., located in Upstate Catskills Region of New York. According to the NYCDEP's 2014 Annual Drinking Water Supply & Quality Report, the public water supply has met all required drinking water regulatory requirements, including those for lead and copper.

5.3 Site Visit Findings

5.3.1 Hazardous Substances

EFI found no evidence of hazardous substance other than typical household maintenance/cleaning supplies. No unlabeled containers or drums were observed during the site reconnaissance.

5.3.2 Petroleum Products

No evidence of petroleum products was identified on the Property during the site reconnaissance.

5.3.3 Underground Storage Tanks (USTs)

No evidence of USTs was observed at the Property during the site reconnaissance; however, one 1,000-gallon gasoline UST was depicted on historical Sanborn fire insurance maps in the northeast corner of the subject building, adjacent to a former boiler room. The UST is depicted on maps dated 1935-1965.

No documentation was available to confirm that the former 1,000-gallon gasoline UST was properly closed or removed. In addition, historical environmentally sensitive operations including auto repair and furniture manufacturing activities at the Property represent an environmental concern. EFI Global previously conducted a Phase I ESA report dated January 2013 for a portion of the Property (parcels located at 1102-1122 Myrtle Avenue) and recommended and conducted a Limited Phase II Subsurface Investigation at the Property in March 2013. The investigation included the installation of three soil borings for the collection of soil and groundwater samples at the Property. Three soil samples and one groundwater sample were analyzed for volatile organic compounds (VOCs) by EPA Method 8260 and for semi-volatile organic compounds (SVOCs) by EPA Method 8270. According to the laboratory analytical report, several SVOCs were detected in groundwater sample TW-1 above the applicable NYSDEC Technical Operation & Guidance Series (TOGS) groundwater regulatory criteria. Specifically, benzo(a)pyrene was detected at 6.68 micrograms per liter (ug/l), exceeding the applicable TOGS criteria of equal to the laboratory method detection limit (MDL). Benzo(b)fluoranthene was detected at 9.22 ug/l, exceeding the applicable TOGS criteria of 0.002 ug/l. In addition, benzene, 2-butanone, and 10 SVOCs were detected in soil sample B-3 at concentrations less than the NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCO). The concentrations of two of SVOCs, benzo(a)pyrene (0.487 mg/kg) and benzo(b)fluoranthene (0.659 mg/kg), were slightly below the UUSCO and RUSCO of 1 mg/kg for these contaminants. With the exception of acetone, no other VOCs or SVOCs were reportedly identified in the soil samples collected at the Property. The presence of acetone in the soils was attributed to laboratory contamination, as acetone is a common laboratory artifact.

The previous EFI report concluded that the sampling conducted during this investigation indicates that there does appear to have been an impact to the subsurface at concentrations exceeding state standards as a result of the historical uses of the Site. EFI recommended that the Site apply to be entered voluntarily into the NYSDEC Brownfield Cleanup Program under 6 NYCRR Part 375 Subpart 375-3, and that further subsurface investigations be completed at the Site, primarily to address the concentrations of the SVOCs identified in the soil and ground water samples collected. The presence of confirmed soil and groundwater contamination represents a recognized environmental condition at the Property.

Summary

Use Status	Year Installed	Capacity (gals.)	Contents	Construction Materials	Comments
No Longer Utilized	Unknown	1,000	Gasoline	Unknown	Depicted on Sanborn fire insurance maps dated 1935-1965.

5.3.4 Aboveground Storage Tanks (ASTs)

No evidence of ASTs was observed at the Property during the site reconnaissance.

5.3.5 Subsurface Equipment

The presence of subsurface equipment, such as sump pumps, septic systems and elevators, was not observed at the time of the reconnaissance.

5.3.6 Other Suspect Containers

No evidence of other suspect containers was observed on the Property during the site reconnaissance.

5.3.7 Polychlorinated Biphenyl Compounds (PCBs)

Electrical transformers and certain equipment that contains hydraulic fluids are a potential source of environmental concern due to the potential presence of polychlorinated biphenyl (PCB) containing cooling oils used in some units.

Con Edison transformer vaults were observed along the Myrtle Avenue sidewalk. The vaults are owned and operated by Con Edison and accessible to authorized Con Edison personnel. Con Edison would be responsible for cleanup and disposal in the event of a leak or release. No exterior evidence of leaks, spills or discoloration was observed in the vicinity of the Con Edison vaults at the time of the site visit.

5.3.8 Interior Staining/Corrosion

No interior staining or corrosion was observed in the buildings during the site reconnaissance.

5.3.9 Discharge Features

Discharge features (floor drains, catch basins, oil/water separators, etc.) were not observed, other than those installed in the kitchen and food processing areas installed to catch surface runoffs, on the Property during the site reconnaissance. Also, no waste water discharge, with the exception of sanitary waste, occurs at the Property.

5.3.10 Pits, Ponds, and Lagoons

Pits, ponds, lagoons and pools of liquids were not observed on the Property during the site reconnaissance.

5.3.11 Solid Waste Dumping/Landfills

Readily apparent evidence of solid waste dumping, suspect fill material, or landfills was not identified

on the Property during the site reconnaissance.

5.3.12 Stained Soil/Stressed Vegetation

Stained soil or stressed vegetation was not observed on the Property during the site reconnaissance.

5.3.13 Wells

Evidence of water supply or groundwater monitoring wells was not observed on the Property during the site reconnaissance.

5.3.14 Additional Hazardous Observations

During the site reconnaissance, EFI did not observe evidence of additional hazards at the Property. No additional hazards were reported by those interviewed during the site visit. Additionally, EFI did not note any unusual odors indicative of hazardous substances.

6.0 INTERVIEWS

6.1 Interview with Owner

EFI provided an environmental property questionnaire to property ownership requesting information about the Property, past and current operations, historical uses and any known environmental concerns including asbestos-containing material, lead-based paint, underground storage tanks, aboveground storage tanks, poly-chlorinated biphenyls, and spills or releases of hazardous materials.

A completed copy of the questionnaire was not returned to EFI. Please see Appendix F for a blank copy of the questionnaire.

6.2 Interview with Site Manager

According to Mr. Kevin Bai of Bogopa Service Corp, who has been familiar with the Property since 1990, the Property has historically been utilized for commercial purposes since at least the late 1990s. He indicated that he was not familiar with the historical use of the Property parcels located along Vernon Avenue. Mr. Bai indicated that the supermarket building was historically heated by natural gas-fired HVAC units. He indicated that he was not aware of any environmental concerns at the Property.

6.3 Interviews with Site Occupants

Mr. Kevin Bai also represents the site occupant, and information obtained from his interview is provided above.

6.4 Interviews with Local Government Officials

Please see Section 4.5.8 and 4.5.9 for information obtained from interviews with local government officials/agencies.

6.5 Interviews with Others

No additional individuals, agencies, and/or sources were interviewed during the course of this assessment.

7.0 OTHER ENVIRONMENTAL CONDITIONS

7.1 Asbestos-Containing Materials

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Common asbestos-containing materials include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide on Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). The Green Book was used as a guide in identifying suspect materials while the definition of suspect ACM and presumed asbestos-containing material is taken from 29 CFR Parts 1910, et al. Occupational Exposure to Asbestos; Final Rule. OSHA considers building materials (and specifically friable surfacing material and thermal system insulation) installed prior to 1981, presumed to be asbestos containing until tested by laboratory analysis to prove otherwise.

Based on the 1920 and 1999 construction, building materials may contain asbestos. According to the EPA, while suspect or presumed ACM may be managed in place under an operations and maintenance (O&M) program, sampling would be required to document the presence or absence of asbestos-containing material. A summary of suspect or presumed ACM is provided below.

Summary

Material	Location	Estimated Quantity	Friable	Physical Condition	Action
Drywall/ Sheetrock and joint compound	Throughout the building	Not estimated	Friable	Good	O&M Plan
Ceiling tiles	Retail area	Not estimated	Friable	Good	O&M Plan
Floor tiles and mastic	Throughout the building	Not estimated	Non-friable	Good	O&M Plan
Grout	Throughout the building	Not estimated	Non-friable	Good	O&M Plan
Roofing materials	Throughout building roof	Not estimated	Non-friable	Good	O&M Plan

7.2 Lead-Based Paint

Many buildings constructed before 1978 have paint that contains lead. Due to the 1920 and 1999 construction date (pre-1978), lead-based paint may be present. All painted surfaces were observed to be in good condition with no chalking, peeling, or flaking. Because the Property is not used for residential purposes, lead-based paint is not considered to be a significant concern.

7.3 Radon

Radon gas is a product of the decay series that begins with uranium. Radon is produced directly from radium, which can be commonly found in bedrock that contains black shale and/or granite. Radon gas can migrate through the ground and enter buildings through porous concrete or fractures. Radon tends to accumulate in poorly ventilated basements. Long-term exposure to radon has been associated with lung cancer.

To satisfy the requirements of the Client, an evaluation of radon potential was performed utilizing the research results available from the USEPA. The USEPA has designated three zones depending on radon potential. Zone 1 is an area with the average predicted indoor radon concentration in residential dwellings exceeding the EPA action limit of 4.0 picoCuries per Liter (pCi/L). Zone 2 are areas with average predicted indoor radon concentration of 2.0 - 4.0 pCi/L and Zone 3 are those areas with an average predicted indoor radon concentration in residential dwellings below 2.0 pCi/L.

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location.

Review of the USEPA Map of Radon Zones places the Property in Zone 3. Based on the zone classification and the non-residential use of the Property, radon is not considered to be a concern.

7.4 Microbial Contamination (Mold)

In accordance with the scope of work, the site reconnaissance is to include a visual inspection for indications of water intrusions or the presence of active mold growth on readily accessible interior and exterior surfaces. Confirmation sampling was not included in the scope of work for the ESA. Readily accessible areas of the building were observed for visual or olfactory indications of mold and for areas of water damage.

No evidence of mold growth or suspect moisture intrusion was identified.

7.5 Lead in Drinking Water

The Property receives its drinking water from City of New York Department of Environmental Protection (NYCDEP)-Water Department. According to online information obtained from the department's website (annual water quality report), the water is tested before it enters the distribution system. The water supplied to the Property meets federal and state drinking water standards, including those for lead and copper.

8.0 CONCLUSIONS AND RECOMMENDATIONS

8.1 Findings and Opinions

8.1.1 Recognized Environmental Conditions

Recognized Environmental Conditions are associated with the presence or likely presence of any hazardous substances or petroleum products in, on, or at a Property due to any release to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment.

- The historical review indicates that the Property was historically used for residential as well as various commercial and light industrial activities that included an automobile garage (1102-1114 Myrtle Avenue) equipped with a buried 1,000-gallon gasoline UST (shown in the 1947 to 1965 maps); auto repair activities from at least 1934 to 1980 (1102-1114 Myrtle Avenue) and furniture manufacturing (1947 to 1968). No documentation was available to confirm that the former 1,000-gallon gasoline UST was properly closed or removed. In addition, historical environmentally sensitive operations including auto repair and furniture manufacturing activities at the Property represent an environmental concern at the Property. EFI Global previously conducted a Phase I ESA report dated January 2013 for a portion of the Property (parcels located at 1102-1122 Myrtle Avenue) and recommended and conducted a Limited Phase II Subsurface Investigation at the Property in March 2013. Three soil samples and one groundwater sample were analyzed for VOCs by EPA Method 8260 and for SVOCs by EPA Method 8270. According to the laboratory analytical report, several SVOCs were detected in groundwater sample TW-1 above the applicable NYSDEC TOGS groundwater regulatory criteria. Specifically, benzo(a)pyrene was detected at 6.68 ug/l, exceeding the applicable TOGS criteria of equal to the laboratory MDL. Benzo(b)fluoranthene was detected at 9.22 ug/l, exceeding the applicable TOGS criteria of 0.002 ug/l. In addition, benzene, 2-butanone, and 10 SVOCs were detected in soil sample B-3 at concentrations less than the NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCO). The concentrations of two of SVOCs, benzo(a)pyrene (0.487 mg/kg) and benzo(b)fluoranthene (0.659 mg/kg), are slightly below the UUSCO and RUSCO of 1 mg/kg for these contaminants. The presence of confirmed soil and groundwater contamination at the Property represents an recognized environmental condition.
- Review of the online City of New York Building Department records indicated that oil burner permits were issued at the Property parcels 367, 369, 371, 373 and 356 Vernon Avenue. These Property parcels were previously occupied by residential buildings that appeared to have been demolished in the 1970s and 1980. It is likely that these Property buildings were previously equipped with oil fired boilers that were fueled by heating oil stored in aboveground or underground storage tanks. The online review did not provide any information about the former heating oil storage tanks at the Property. It is not known if the former heating oil storage tanks were properly removed as per local and state regulations. This lack of information confirming the proper closure of the former heating oil storage tanks at the Property represents an environmental concern and is considered a recognized environmental condition.
- Review of the regulatory database identified the Property parcels at 1100 Myrtle Avenue, 367, 369, 371, and 373 Vernon Avenue on the City of New York E-Designation database. The listing of the Property as an E-Designation site does not necessarily constitute a

recognized environmental condition at the Property. However, the E-Designation requirements should be satisfied and proper approvals and permits should be obtained from the appropriate City of New York regulatory offices prior to any planned development activities.

8.1.2 Controlled Recognized Environmental Conditions

Controlled Recognized Environmental Conditions (CRECs) are past releases of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (such as property use restrictions, activity and use limitations, institutional controls, or engineering controls).

No Controlled Recognized Environmental Conditions were identified on the Property or on adjacent properties.

8.1.3 Historical Recognized Environmental Conditions

Historical Recognized Environmental Conditions are environmental conditions which in the past would have been considered a Recognized Environmental Condition, but have been remediated/mitigated to an unrestricted clean-up standard i.e., "no controls".

The following Historical Recognized Environmental Conditions were identified during the course of this assessment.

- The database review also identified a Spills incident at the Property parcel 365 Vernon Avenue, which was reported in September 2013. According to the regulatory database, a 55-gallon drum containing diesel and water was abandoned at the Property. The drum was subsequently removed by the City of New York and the Spills incident was closed by the NYSDEC on September 26, 2013. Based on the resolved regulatory status and reported nature of the incident, the Spills incident does not represent an environmental concern and is considered a historical recognized environmental condition at the Property.

8.1.4 De Minimis Environmental Conditions

De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized environmental conditions.

No de minimis environmental conditions were identified in connection with the Property during completion of this assessment.

8.1.5 Other Environmental Considerations (Non-ASTM Scope Considerations)

This assessment also included other environmental considerations. The following related Issues of Concern were identified:

- Suspect asbestos-containing building materials were observed in the building in the form of non-friable drywall and joint compound, non-friable ceiling tiles, non-friable vinyl floor tiles, non-friable grouts, mastics, and caulking and non-friable roofing materials. The aforementioned building components were noted to be in overall good condition with low potential for disturbance.

8.2 Conclusions

EFI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of 1100, 1102, 1116, and 1122 Myrtle Avenue and 356, 367, 369, 371, and 373 Vernon Avenue, Brooklyn, NY the Property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions or Controlled Recognized Environmental Conditions in connection with the Property, except for the following:

- The historical review indicates that the Property was historically used for residential as well as various commercial and light industrial activities that included an automobile garage (1102-1114 Myrtle Avenue) equipped with a buried 1,000-gallon gasoline UST (shown in the 1947 to 1965 maps); auto repair activities from at least 1934 to 1980 (1102-1114 Myrtle Avenue) and furniture manufacturing (1947 to 1968). No documentation was available to confirm that the former 1,000-gallon gasoline UST was properly closed or removed. In addition, historical environmentally sensitive operations including auto repair and furniture manufacturing activities at the Property represent an environmental concern at the Property. EFI Global previously conducted a Phase I ESA report dated January 2013 for a portion of the Property (parcels located at 1102-1122 Myrtle Avenue) and recommended and conducted a Limited Phase II Subsurface Investigation at the Property in March 2013. Three soil samples and one groundwater sample were analyzed for VOCs by EPA Method 8260 and for SVOCs by EPA Method 8270. According to the laboratory analytical report, several SVOCs were detected in groundwater sample TW-1 above the applicable NYSDEC TOGS groundwater regulatory criteria. Specifically, benzo(a)pyrene was detected at 6.68 ug/l, exceeding the applicable TOGS criteria of equal to the laboratory MDL. Benzo(b)fluoranthene was detected at 9.22 ug/l, exceeding the applicable TOGS criteria of 0.002 ug/l. In addition, benzene, 2-butanone, and 10 SVOCs were detected in soil sample B-3 at concentrations less than the NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCO). The concentrations of two of SVOCs, benzo(a)pyrene (0.487 mg/kg) and benzo(b)fluoranthene (0.659 mg/kg), are slightly below the UUSCO and RUSCO of 1 mg/kg for these contaminants. The presence of confirmed soil and groundwater contamination at the Property represents an recognized environmental condition.
- Review of the online City of New York Building Department records indicated that oil burner permits were issued at the Property parcels 367, 369, 371, 373 and 356 Vernon Avenue. These Property parcels were previously occupied by residential buildings that appeared to have been demolished in the 1970s and 1980. It is likely that these Property buildings were previously equipped with oil fired boilers that were fueled by heating oil stored in aboveground or underground storage tanks. The online review did not provide any information about the former heating oil storage tanks at the Property. It is not known if the former heating oil storage tanks were properly removed as per local and state regulations. This lack of information confirming the proper closure of the former heating oil storage tanks at the Property represents an environmental concern and is considered a REC.
- Review of the regulatory database identified the Property parcels at 1100 Myrtle Avenue, 367, 369, 371, and 373 Vernon Avenue on the City of New York E-Designation database. The listing of the Property as an E-Designation site does not necessarily constitute a REC at the Property. However, the E-Designation requirements should be satisfied and proper approvals and permits should be obtained from the appropriate City of New York regulatory offices prior to any planned development activities.

EFI's assessment included additional services to evaluate asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands and mold. This assessment has revealed no evidence of related conditions of concern in connection with the Property, except for the following:

- Suspect asbestos-containing building materials were observed in the building in the form of non-friable drywall and joint compound, non-friable ceiling tiles, non-friable vinyl floor tiles, non-friable grouts, mastics, and caulking and non-friable roofing materials. The aforementioned building components were noted to be in overall good condition with low potential for disturbance.

8.3 Recommendations

As a result of this assessment, EFI recommends the following:

- Historical Use / Soil and Groundwater Contamination - Petroleum-impacted soil and groundwater were previously detected at the Property, apparently from the historical use of the Property, however the Property is not currently listed in the Brownfields database in the EDR database report, or with the NYSDEC. EFI continues to recommend that the Property be entered voluntarily into the NYSDEC Brownfield Cleanup Program under 6 NYCRR Part 375 Subpart 375-3, and that further subsurface investigations be completed at the Property, primarily to address the concentrations of the SVOCs identified in the soil and groundwater samples.
- Former Heating Oil Tanks - Additional information is required to confirm that the former heating oil storage tanks have been properly removed and do not represent an environmental concern at the Property. A limited subsurface investigation including a geophysical survey may be required to confirm the presence or absence of USTs, and whether the current or former presence of USTs has adversely impacted the environmental integrity of the Property.
- E-Designation - E-Designation requirements should be satisfied and proper approvals and permits should be obtained from the appropriate City of New York regulatory offices prior to any planned development activities.
- Asbestos - Given the condition of the identified and suspect ACM, EFI is of the opinion that these materials can be effectively managed as part of an asbestos Operations and Maintenance (O&M) Plan until such time as renovation or demolition activities necessitate their removal. The objective of an O&M Plan is to implement a practical management approach to controlling identified ACM within the Property. The O&M Plan is designed to cleanup existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed.

10.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

As required by 40 CFR 312.21(d), the report shall include the following statements of the environmental professional(s) responsible for conducting the Phase I Environmental Site Assessment and preparation of the report.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312; and, we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mandeep S. Sandhu
Director, Assessment Services - East Region

11.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

11.1 Definition of an Environmental Professional

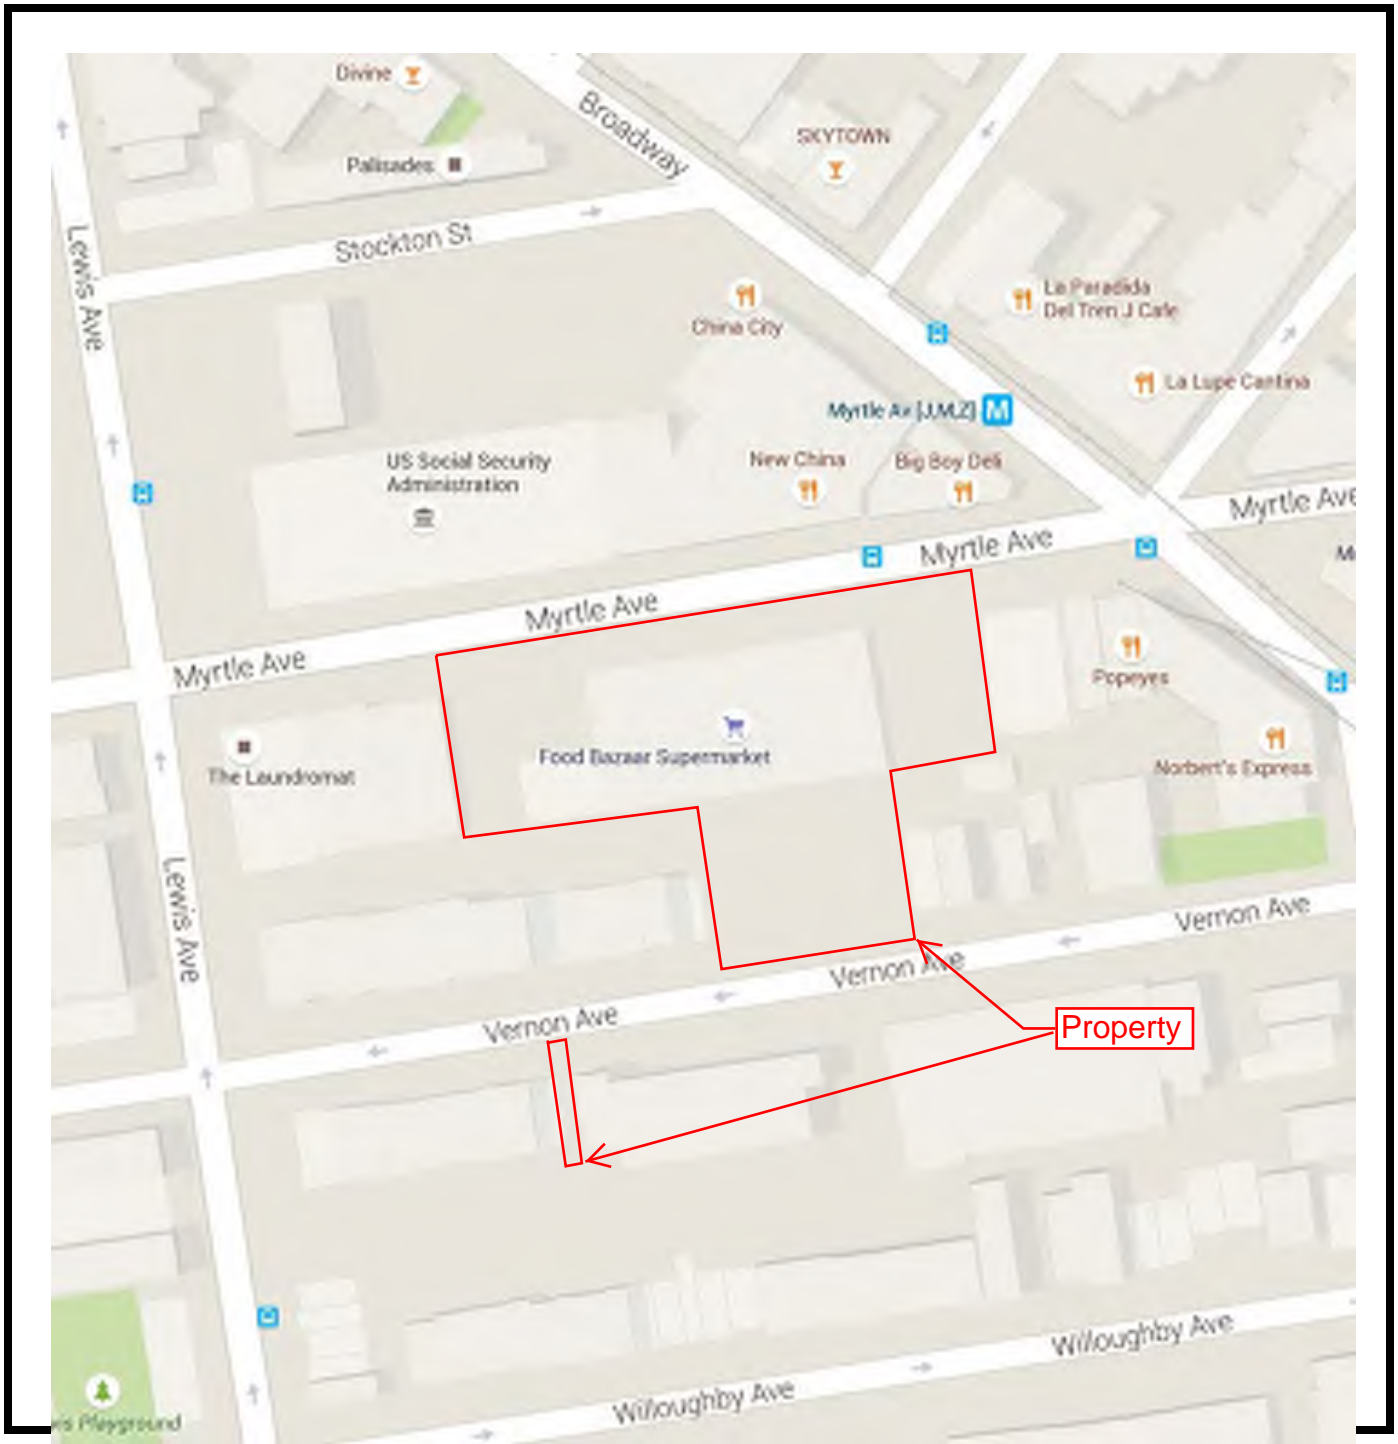

An *Environmental Professional* means: (1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f). (2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience. (3) An environmental professional should remain current in his or her field through Participation in continuing education or other activities. (4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as Part of the inquiry identified in §312.21(b). (5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this Part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

11.2 Relevant Experience

Relevant experience, as used in the definition of environmental professional in this Section, means: Participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the Property.

Resumes for the Environmental Professionals involved in this project are included in Appendix G.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/10/2015 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 6 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 06/26/2015 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 06/24/2015 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 07/21/2015 has revealed that there are 24 NY LTANKS sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 07/21/2015 has revealed that there are 22 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there are 66 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NJ MANIFEST: Hazardous waste manifest information.

A review of the NJ MANIFEST list, as provided by EDR, and dated 08/01/2015 has revealed that there are 6 NJ MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SCHOLES ST. STATION	SCHOLES ST 7 BOGART	N 1/2 - 1 (0.869 mi.)	299	542

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 17 EDR US

EXECUTIVE SUMMARY

Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 13 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 6/15/12-Vought-Daytime duty officer. Spill assigned to DEC Feroze as part of Con Edison minor spill portfolio review and possible closure. Initial EMIS #230051 added to Cross Reference Field, deleted from proxy and added to e-docs. As per EMIS, "UG Splicer P.Sardone emp#75445 reports: On location M1043 for feeder (5B28) inspection (acc#C3255) and found a 3C cable leaking in duct (B/E/G/N) @1 drop per 11 min., 1/2 pt dielectric on to wall of structure and 200 gals of water in structure. Envir.tag#68398 has been placed."3/26/13 - Austin - 1/2 pint feeder leak in duct - Con Ed contained and cleaned up the spill - See eDocs for further information - Spill closed - end

Remarks: Leaking into a duct then dripping into manhole. 1 drip to 11 min.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "BREEN"10-30-03. Taking over from Saccasio. See related spills: 0006763, 9505160 and 9011525.01/11/06: This spill transferred from Breen to S.Kraszewski. Unsure if this site relates to Sumner Houses. - SK7/3/07: Apparently spill was never transferred to Kraszewski, and was still assigned to Breen in the database. As of today, the spill is being transferred to Jennifer Kann. (JHO)12/3/07: J.Kann - investigative work plan submitted on 11/5/07.7/21/2014: J.Kann - reviewed IWP. Provided minor comments to NYCHA and required an SIR be submitted to the Department by 1/21/2015.11/17/14: J.Kann - September 2000 Site Assessment Report prepared by UTB during the tank replacement activities was located and reviewed. Eight endpoint samples were collected and analyzed for VOCs and SVOCs. All concentrations detected were below CP-51 with the exception of one locations where chrysene was 2.4 ppm (guidance of 1.0 ppm). Based on clean end point samples and the fact that this spill was the last spill called in due to contaminated soils found around tank during excavation, the spill was closed. 2000 UTB report scanned and dedoced. NFA. NYCHA was called and notified and an email sent.
Remarks: UNDERGROUND TANK WAS DISCOVERED TO BE LEAKING WHEN IT WAS REMOVED - UNK CLEAN UP

DEC Memo:

12/5/05-Vought-Off hours duty responder. Vought called and spoke to owner's wife who refused access initially as per Petro Wheeler. Vought then spoke to owner (Ariss) who agreed to access. Vought called Petro and told them to contact Ariss who agreed to access and return call if problem. Vought received call from Petro that they were onsite for 1.5 hours and left due to no show of Ariss. Spill extent was still unknown. Vought called Ariss who said just arrived on site, Vought called Petro again to arrange site visit. Later Vought received phone call that spill was limited to top of tank through manway and also through vent on sidewalk. Both spills cleaned by Petro using adsorbent. Spill on concrete and no sewers or drains affected. Spill closed by Vought.

Remarks: Customer reports that 2 delivery trucks were there, the 2nd of which overfilled tank in tenant-house, spilling unkn amt of oil in basement. Refuses to let Petro rep. into house to investigate and/or cleanup.2nd phone # for contact: 917-886-0434.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: 11/21/05: This spill transferred from J.Kolleeny to S.Kraszewski.01/03/06: Two 35K tanks pulled and replaced with one 25K tank. Fascimile document mentions a Site Assessment to be performed on May 23, 2000 by UTB - United Technology, Inc. There is no indication that this report exists, at least on file. Need to have that site assessment report or have one performed. Contact UTB to find report. - SK07/10/06: NYCHA update summary mentions no site assessment performed. The 25K tank was installed on July 1, 2000 and is in service. Recommends a site assessment be conducted. Summary

Pulaski Street. tank has direct fill port. Robert mentioned that currently a sub-contractor is fixing a standpipe along the side of the building, along boiler room wall. while excavating in area with backhoe, contractor pulled return line by the building. this cause the return line to disconnect from a fitting inside the boiler room. inspected boiler room. found disconnected return line by the foundation wall. the lines runs along boiler room ceiling. approximately 200 gal #2 oil spilled onto concrete floor in boiler room. spilled material got into nearby drains, which ends into boiler room sump. on-site crew immediately turned off the leaking line and disconnected the sump pump. housing authority pumped out loose product from floor as well as sump. boiler room floor was cleaned using absorbent. drains were washed and oil was collected from sump. boiler room floor was found in good condition. no odors noted in boiler room. as per on-site crew, no odor complaints from building occupants. currently, they are using gas service for heating. inspected excavation along the wall. no signs of spill noted in excavation. 01/10/14-Hiralkumar Patel. after discussing with DEC Austin, case closed based on observations during the site visit. clean up underway

CONWAY/EMPTY BUILDING - TTF (Continued)

S113406309

Remarks: AST failed tightness test. Tester (ATS) determined the cause of the failure was the fill pipe - failure point was interior (tank room) where the pipe penetrated the concrete wrap. Tank was entirely above ground with no petroleum discharge noted during inspection by tester and author of Phase 2 report (PW Grosser). Tank has subsequently been removed and structure was converted to natural gas heat. Based upon the documentation received there was no petroleum discharge from reported tank test failure. All received documentation has been uploaded to DECDOCS. No further action is required. Spill closed.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ENGELHARDT"Petroleum Tank Cleaners (PTC, Dennis Mankowski) arrived on scene at 09:30 on 6/6/97. Removed 200 gal of oiland applied speedy dry to floor. Tank is covered in concrete and is leaking. PTC broke through top of tank and removed oil.Citizen on second floor is Angela Reida 718-919-2650 had trouble sleeping last night. Building owner is Henry Alexis. Managing company is Cape Management (718) 855 2967, agent is "David"2/19/2003 - Austin, As per directive to closeout spills with no recent history, closed out.

Remarks:

Appears to have been an overfill on the part of the oil company - have contacted oil company answering service to get owner to get a crew to clean up - dyking area with speedy dry - no need for contact

Actual:
57 ft.

Location: The site is located in the Bedford Stuyvesant section of Brooklyn (Kings County) and has 75 feet of frontage on Dekalb Avenue and 150 feet of frontage on Malcom X Boulevard, followed by multi-story apartments with first-floor commercial units to the south and Malcolm X Boulevard followed by an active Getty Petroleum Marketing, Inc. (GPMI) gas station to the west. The site is also bordered by multi-story apartments with first-floor commercial units to the east, a commercial building to the northeast and a commercial parking lot to the north. Site Features: The site is comprised of two (2) tax parcels totalling approximately 0.218 acres, currently developed with a one-story masonry service station building. Current Zoning and Land Use(s): The site is currently used as an auto repair and vehicle storage yard. Past Use of the Site: The site was formerly used as a gas station and auto service station. Site Geology and Hydrogeology: The bedrock in this area of Brooklyn is an igneous intrusive classified as Ravenswood grano-diorite of middle Ordovician to middle Cambrian age. Unconsolidated sediments overlie the bedrock and consist of Pleistocene-aged sand, gravel and silty clays, deposited by glacial-fluvial activity. Subsurface soils at the site consists of a mixture of silty non-native fill, fine to coarse sand and sandy silt to a depth of approximately 10 feet below grade followed by sandy-clay to a depth of approximately 15 feet below grade. Groundwater is present under water table conditions at a depth of approximately 45 feet below the surface and flows in a west north-west direction toward the East River.

Env Problem:

On February 12, 2013, a limited Phase II investigation began at the subject Site as part of the due diligence to complete the purchase of the property. Although eight borings and groundwater samples were planned, due to accessibility issues and scheduling constraints four soil borings were installed. A total of four soil samples and six groundwater samples including three from the borings and three from existing monitoring wells were collected. Soil samples were submitted for analysis of VOCs, PCBs and metals. Groundwater samples were submitted for analysis of VOCs only. Soil: The results of this limited investigation revealed elevated petroleum related VOC levels in two of the four samples with total VOCs ranging from 184 ppm to 705 ppm. Xylenes, naphthalene, and n-propylbenzene were reported above unrestricted use soil cleanup objectives (UUSCOs) while 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene and ethylbenzene were all reported above restricted residential use SCOs (RRUSCOs). In addition to the VOCs, chromium was also reported in two soil samples above UUSCO. Groundwater: Petroleum VOCs were reported above standards in four of six groundwater samples ranging from 605ppb to 7,993 ppb. Chlorinated VOCs, including tetrachloroethene were reported above standards in five of the six samples and ranged from 22 ppb to 34

Health Problem: ppb. The historical use of the site as an auto repair shop suggests that CVOC contamination in groundwater is related to an on-site source. The second most-common use of tetrachloroethene is in automotive brake cleaners and it has also been used extensively in automotive parts washing solutions. The most likely source area for this type of release scenario would be surface spills within the automotive shop area of the building, the waste oil tank and along the sewer line. Of these potential sources only the waste oil tank area was investigated due to accessibility and time constraints. Soil vapor: No soil vapor sampling was done as part of the Phase II investigation.

Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern because the site is vacant. Furthermore, environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

SPILLS:

Facility ID: 9810224
Facility Type: ER
DER Facility ID: 117960
Site ID: 137945
DEC Region: 2
Spill Date: 11/13/1998
Spill Number/Closed Date: 9810224 / 2/8/2013
Spill Cause: Equipment Failure
Spill Class: Known release that creates potential for fire or hazard. DEC Response. Willing Responsible Party. Corrective action taken.

Contact Name: CALLER
Contact Phone: (516) 249-3150
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT.6/30/2003-Vought-File review by Vought:Tank Closure Report-March 1999-Tyree Brothers Environmental Services (Paul Hatcher 631-249-3150)-Tank upgrade part of EPA mandate. Vacant parking lot to north and three story building to the east of site. Removal of twelve (550-gallon) gasoline USTs, one (4000-gallon) gasoline UST, one (550-gallon) waste oil UST and one (550-gallon) fuel oil UST. Installation of two (4000-gallon) gasoline USTs. Two (4000-gallon) USTs placed in former location of twelve (550-gallon) USTs. Endpoint soil samples taken for analysis (analyticals provided). Soil analyticals show concentrations up to 4510ppb benzene (SW8), 52200ppb toluene (S2) and 79200 ppb MTBE (SW8). Approximately 661.36 tons of soil were removed from Site (disposal manifest provided). Subsurface Investigation Report-July 2000-Tyree-Service station across street to the west. Groundwater at 45' below grade. Four soil borings/wells performed to the north and west of tank pad. Soil analyticals show concentrations up to 504ppb benzene(W2), 1510 ppb toluene(SB7) and 689ppb MTBE (W2). Groundwater analyticals show concentrations up to 47.5ppb benzene(MW2), 5810 ppb xylenes(MW2) and 854ppb MTBE(MW2).Quarterly Monitoring Reports-Nov 2000 thru Apr 2002-Tyree-Four monitoring wells on-site. Groundwater concentrations up to 369ppb benzene(W2) and 10200ppb MTBE(W2).Subsurface Investigation Report-July 2002-Tyree-Installation of two soil borings. Soil analyticals show concentrations up to 3740ppb benzene(B1), 18500ppb toluene (B1) and 4680ppb MTBE(B1). Tyree requested that all future NYSDEC requests be made in writing. Quarterly Monitoring Reports-May thru May 22, 2003-Tyree-Three monitoring wells on-site. Groundwater concentrations up to 75ppb benzene (W2), 911ppb xylene (W2)and 2110ppb MTBE(W2). Well W1 has been dry for 9 out of 10 sampling events.6/30/2003-Vought-NYSDEC requires 1)soil and groundwater delineation west of MW2, west of B1, and east of B1 2)surrounding area site plan and sensitive receptor survey 3)groundwater flow direction (quarterly reports indicate no flow direction) 4)reinstallation of W1 (well dry for 5 out of 6 quarterly sampling events) 5)STIP, CAP and RAP sent by Vought.8/13/2003-Vought-STIP signed by Kevin Shea implemented by Kunkel(DEC).8/26/2003-Vought-Investigation Plan (Tyree Brothers-David Pachan) 518-786-3200. Investigation Plan submitted including: 1)site plan with all well locations 2)Installation of four 2" wells 3)reinstallation of SVE W1 4)soil samples will be obtained every five feet until groundwater interface 5)monitoring of wells to determine flow direction 5)Quarterly sampling.8/26/2003-Quarterly Monitoring Report Tyree Brothers. Groundwater flow to the north at depth of 45'. Groundwater analyticals show 37ppb benzene(W2) with three a total of three wells monitored.10/31/2003-Vought-Sent letter to Shea approving 8/26/03 Investigation Plan.11/3/2003-Vought-Spoke to Pachan who will be sending Investigation Report 12/15/03.5/5/04-Vought-Reviewed Subsurface Investigation Report (Tyree Org) dated November 2003. Five monitoring wells were installed in October 2003. Groundwater encountered at 45' below grade and flow to the north. Five soil samples and five groundwater samples sent for analysis. Report recommends quarterly groundwater monitoring. Soil analyticals show 3210ppb xylene(MW4 10-12'), 15900ppb 1,2,4-trimethylbenzene(MW4

10-12'), 7500ppb ethylbenzene(MW8 30-32'), 104000ppb 1,2,4-trimethylbenzene(MW8 20-32'), 19400ppb naphthalene(MW8 20-32'). Groundwater analyticals show 42.1ppb benzene(MW4), 650ppb naphthalene(MW4), 82.8ppb ethylbenzene(MW5), 24.9ppb naphthalene(MW5), 586ppb benzene(MW6), 8848ppb xylene(MW6), 966ppb naphthalene(MW6), 917ppb benzene(MW8), 11521ppb benzene(MW8) and 1710ppb naphthalene(MW8).5/5/04-Vought-Reviewed Quarterly Monitoring Reports (Tyree) from August 2003 thru January 2004. Eight monitoring wells onsite. Groundwater flow to the northwest and at depth of 44-45' below grade. Groundwater analyticals show: dry well(W1), 231ppb benzene(W2), 48.2ppb benzene(W4), 14ppb xylene(W5), 479ppb benzene(W6) and 442ppb benzene(W8). Well W7 was not accessible.DEC requires: 1)sampling of MW7 2)two wells installed downgradient of MW6 3)surrounding area site plan. Vought sent letter with above requirements to Getty and handed copy to Tyree during 5/6/04 Getty/DEC meeting. 7/29/04-Vought-Sent email to Lindell/Hatcher regarding status of additional investigation required on 5/6/04. 08/31/2005 - Feng - Case transferred from Vought to Feng.10/28/2005 - Feng - Supplemental Subsurface Investigation Report, 8/19/2004. On 7/14/2004, Tyree performed 2 off-site monitoring wells located on the sidewalk across Malcolm X Blvd. Groundwater encountered at approximately 46' below grade, the borings ended at 55' bg. Soil samples didn't show any exceedances. Both groundwater samples collected from W-9 and W-10 show VOCs exceedance. all units are in ppb. W-9, 34.5 MTBE, 16.7 Benzene, 13.1 Toluene, 1,280 Toluene, and 2007.3 total Xylenes. W-10, 2,780 MTBE, 35.7 Benzene, <7 Toluene, 2,890 Ethylbenzene, 3,107.1 total Xylenes. A surrounding properties sketch was attached. An existing Getty Service Station is located across Malcolm X Blvd. Tyree recommended to delineate further to the north downgradient of W-6,7 and 10. 10/28/2005 - Feng - Quarterly Monitoring Report, 2/2005 - 4/2005. 9 monitoring wells. Groundwater flows to northwest at depth of 43.57' to 45.18'. all unit for concentration are ppb. SVE-1 was dry. W-2, 5,568.3 BTEX and 4,010 MTBE. W-3, 66.26 BTEX and MTBE BDL. W-4, 129.65 BTEX and 129 MTBE. W-5, BTEX BDL, 0.75 MTBE. W-6, 12,785.25 BTEX and 6,690 MTBE. W-7, 2,047.89 BTEX and 312 MTBE. W-8, 1,836.4 BTEX and 329 MTBE. W-9, 4,796.1 BTEX and MTBE BDL. W-10, 696.92 BTEX and 1,420 MTBE. 1/4/2006 - Feng - Quarterly Monitoring Report, 11/2005 - 1/2006. The site is currently Malcolm X Automobile repair shop. There are 10 monitoring wells on and off site. W-1, dried. W-2, not sampled. W-3, low and 1.12 ppb BTEX, MTBE MDL. W-4, 129.4 ppb BTEX, 28.9 ppb MTBE. W-5, MDL and low. W-6, fluctuating and 8,778 ppb BTEX, fluctuating and 2,800 ppb MTBE. W-7, sharp decreased and MDL, 20.4 ppb MTBE. W-8, increased and 2,615 ppb BTEX, increased and 434 ppb MTBE. W-9, fluctuating and 4,230 ppb BTEX, MTBE MDL. W-10, 784.7 ppb BTEX, 233 ppb MTBE. (RJF)3/28/2006 - Feng - Emailed to Jennifer Kotch (Tyree) and requested the status of offsite delineation and reminded her of needed of RAP. (RJF)3/28/2006 - Feng - Reply from Jen Kotch "I have requested quotes from drillers and am working on putting together a work plan to submit for the additional wells downgradient on the Getty property across the street from this site." (RJF) 4/11/2006 - Feng - Reviewed the WorkPlan Jennifer Kotch (Tyree) submitted. 3 monitoring wells were proposed. Approved the WorkPlan with adding 1 more monitoring well to the side-gradient of W-6. Emailed and attached the map with additional well on to Jenn Kotch. (RJF)5/4/2006 - Feng - Sent letter to Manny Shurka, Petroleum Distribution Inc at 10 Malcolm X Blvd, to assist Tyree to gain access to the property and

install the 3 wells in the east and northeast portion of the property. cc to Tyree, Delta and Getty Properties. (RJF)5/11/2006 - Feng - Email update from Jenn Kotch, the owner of 10 Malcolm X Blvd is still waiting to confirm with Getty who is responsible for payment. And she emailed to Getty to speed that process up. She told the owner the work is covered and gave him a week to get the answer before told him Tyree's delineation. (RJF)6/9/2006 - Feng - Proposed wells location site plan submitted by Jenn Kotch. W-9 and W-10 are located in the east of the apartment building. New wells locations are proposed. This plan is approved. (RJF)8/14/2006 - Feng - Quarterly Monitoring Report, 4/2006 - 6/2006, by Tyree. The site is Malcolm X Automobile repair shop. Groundwater at 43.57' to 45.07' bg and flows to west. As of sampling on 6/5/2006, 10 monitoring wells. W-1, dry. W-2, 4,312.9 ppb BTEX (488 ppb B, 64.9 ppb T, 1,650 ppb E, 2,110 ppb X), 1,590 ppb MTBE. W-3, 18.7 ppb BTEX, MTBE MDL. W-4, 1,906.6 ppb BTEX, MTBE MDL. W-5, MDL. W-6, 2,600 ppb BTEX, 424 ppb MTBE. W-7, BTEX MDL, 4.5 ppb MTBE. W-8, 1,107 ppb BTEX, 329 ppb MTBE. W-9, 5,140 ppb BTEX (MDL B, MDL T, 2,300 ppb E, 2,840 ppb X), MDL MTBE. W-10, 616 ppb BTEX, 73 ppb MTBE. Emailed Jen Kotch (Tyree) for SIR. (RJF)9/20/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, by Tyree. The site is Malcolm X Automobile repair shop. Groundwater sampling and gauging on 7/13/2006. Groundwater flows to west at the depth of 43.50' to 44.86' bg. 10 monitoring wells. W-1, dry. W-2, 4,617.8 ppb BTEX (338 ppb B, 29.8 ppb T, 1,550 ppb E, 2,700 ppb X), 614 ppb MTBE. W-3, 6.4 ppb BTEX, MTBE MDL. W-4, 1,415.9 ppb BTEX, 2.9 ppb MTBE. W-5, 1.5 ppb BTEX, MTBE MDL. W-6, 2,570 ppb BTEX, 261 ppb MTBE. W-7, MDL. W-8, 1,367 ppb BTEX, 213 ppb MTBE. W-9, 6,760 ppb BTEX (MDL B, MDL T, 2,740 ppb E, 4,020 ppb X), MTBE MDL. W-10, 650.7 ppb BTEX, 133 ppb MTBE. (RJF)10/17/2006 - Feng - Email updates from Jenn Kotch (Tyree). She is working on scheduling hope to have days tied down with in the week. (RJF)12/5/2006 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 11/9/2006, by Tyree. Malcolm X Automobile repair shop. Groundwater sampled and gauged 10/20/2006. 10 monitoring wells. DTW 55.74' to 55.93' bg. Flows west. No LNAPL. BTEX ND to 5,189 ppb (MW-9). MTBE ND to 1,130 ppb (MW-6). Noted that 4 additional monitoring wells to be installed on 12/14 through 12/14/2006. (RJF)1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. 3 wells were installed offsite. Contamination found in the station across street from the site. DEC requested a scaled site plan for the location of wells. SIR is ready 1/1007. (RJF)5/2/2007 - Feng - Reviewed the Subsurface Investigation Report dated March 2007 and submitted by Tyree on behalf of Getty Properties. Tyree did an offsite investigation to delineate the extent of the groundwater cotnamination. Tyree has installed 3 monitoring wells W-11, W-12 and W-13. Low VOCs in soil collected from W-11, W-12 (35'-37', 40'-42'), and W-13 (30'-32', 40'-42'). Some SVOCs exceedance found soil collected from W-13 (30'-32', and 40'-42'). 3 groundwater collected. W-11, 47.6 ppb MTBE. W-12, 25,196 ppb BTEX. W-13, no analytical results available for EPA 8260 because one of the voas broke in transit. W-12 and W-13 are located in the property at 10 Malcolm X Blvd. W-12 is near the dispenser islands. The high BTEX concentration detected in these two wells suggested a possible petroleum discharge originated from the gasoline station at 10 Malcolm X Blvd and further delineation of the subsurface contamination is warranted. Checked the PBS registration record, 2-600417. Latest test date is 8/1/1988, and the 8/1/2003 test has not performed as required. Tyree called in and Spill #06-12492 was

assigned to 10 Malcolm X Blvd. Noted that DEC sent letter to 10 Malcolm X Blvd requiring tank test and investigation work plan. Quarterly Monitoring Report, 1/2007 - 3/2007, 3/13/2007. Groundwater monitored and sampled 1/23/2007. 13 monitoring wells. DTW 55.74' to 55.93' bg. Flows westerly. No LNAPL. W-1, Dry. W-2, 12,160.8 ppb BTEX, 576 ppb MTBE. W-3, 60 ppb BTEX, MTBE MDL. W-4, 1,634.1 ppb BTEX. W-5, MDL. W-6, 1,228.3 ppb BTEX, 639 ppb MTBE. W-7, MDL. W-8, 622.6 ppb BTEX, 116 ppb MTBE. W-9, 8,127.7 ppb BTEX. W-10, 902.5 ppb BTEX, 607 ppb MTBE. W-11, 4.4 ppb BTEX. W-12, 26,459 ppb BTEX. W-13, 17,429 ppb. (RJF) 5/8/2007 - Feng - PBS inspection conducted by DEC B. Falvey. PBS violations were found and Notice of Violation was issued. 5/10/2007 - Feng - Letter to Getty Properties requiring RAP for onsite contamination. For the offsite contamination, Getty Properties should work with the RP for 10 Malcolm X Blvd upon the completion of the delineation at 10 Malcolm X Blvd. Onsite RAP due 6/25/2007. (RJF) 7/2/2007 - Feng - Quarterly Monitoring Report, 4/2007 - 6/2007, 5/14/2007. Groundwater sampled 4/11/2007. 13 monitoring wells. DTW 54.78' to 55.84' bg. Flows to west. No LNAPL. W-1, dry. W-2, 17,331 ppb BTEX, 280 ppb MTBE. W-3, 1.6 ppb BTEX. W-4, 1,329 ppb BTEX. W-5, 0.6 ppb BTEX. W-6, 2,175 ppb BTEX, 537 ppb MTBE. W-7, 3.8 ppb BTEX. W-8, 123 ppb BTEX, 96 ppb MTBE. W-9, 7,591 ppb BTEX. W-10, 1,259 ppb BTEX, 21.8 ppb MTBE. W-11, 1.5 ppb BTEX, 27.3 ppb MTBE. W-12, 23,963.6 ppb BTEX. W-13, 18,420 ppb BTEX. (RJF) 11/7/2007 - Feng - Quarterly Monitoring Report, 7/2007 - 9/2007, 10/2007. Groundwater sampled 8/1/2007. 13 monitoring wells. DTW 54.78' to 55.84' bg. Flows to west. No LNAPL. Onsite wells, BTEX range 0.64 ppb to 5,048 ppb (W-2), MTBE range ND to 334 ppb (W-2). Offsite wells, BTEX range 2.5 ppb to 12,182 ppb (W-12), MTBE range ND to 20 ppb (W-11). (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. DEC had some comments on the RAP dated 7/10/2007. Don't use the existing monitoring wells for the SVE wells and need to have the soil and gw plume contour maps. DEC will send Getty Properties a letter for the comments on the RAP. (RJF) 12/5/2007 - Feng - Emails from Paul Lindell (Delta). RAP changes proposed. The site is currently being negotiated for sale and a permanent system would be impaired or destroyed should the deal go through and construction be implemented. There is opportunity to remove more impacted soil when removing the USTs in near future (within next 6 months). There are 2 (4,000-gallon) tanks closed-in-place at the site. No information on how the tanks being closed and if there is any remaining gasoline inside the tanks. DEC requires the information of those closed tanks when planning the chem ox injection and selection of the chem ox type. DEC also requires to check the vertical profile of soil contamination to see the remaining soil contamination from the bottom of excavation to water table and treat the soil contamination. DEC recommends the treatment of groundwater and soil contamination be started at this time because the effectiveness of chem ox will be monitored. Then remove the tanks and more soil when the excavation time comes. DEC requires a work plan detail the work, schedule and calculation of the chem ox amount. P. Lindell will instruct Tyree to plan. (RJF) 3/20/2008 - Feng - Email to Tyree and Delta for revised RAP status. (RJF) 3/25/2008 - Feng - Quarterly Monitoring Report, 1Q2008, 2/2008. Malcolm X Automobile repair shop. Groundwater was gauged and sampled 1/31/2008. 13 monitoring wells. DTW 55.35' to 56.36' bg. Flows to west. No LNAPL. Onsite BTEX range 0.64 ppb to 4,856 ppb (W-2). Onsite MTBE range ND to 356 ppb (W-2). Offsite BTEX range ND to 12,034 ppb (W-12). Offsite

S104277466

MTBE range ND to 16.6 ppb (W-11). (RJF)4/24/2008 - Feng - Reviewed the Revised RAP, dated 3/20/2008, by Tyree, no hard copy, only pdf copy. Tyree proposed limited excavation of the impacted soil including the current existing USTs and the injection of RegenOx. Comments were provided to Tyree and Delta via email. (RJF)6/13/2008 - Feng - Quarterly Monitoring Report, 2Q2008, 5/2008. Groundwater was gauged and sampled 4/29/2008. 13 monitoring wells. DTW 55.23' to 56.22' bg (cover page doesn't match the gauging data). Flows to west. No LNAPL. Onsite BTEX range 0.64 ppb to 2,407 ppb (W-2). MTBE range ND to 202 ppb (W-2). Offsite BTEX range ND to 6,931 ppb (W-12). MTBE range ND to 34 ppb (W-11). Reviewed the Revised RAP revision, received 5/9/2008. The revision has not addressed all the previous comments. Comments provided to Tyree. (RJF)8/21/2008 - Reviewed the Revised RAP dated 8/1/2008. The Revised RAP does not address all the soil contamination identified. 1) former 4,000-gallon UST area in the south portion of the site, soil contamination at 5 feet and 10 feet. 2) soil contamination in the existing USTs area, soil borings identified soil contamination at 20 feet and 30 feet, the proposed excavation will be only 17 feet and would not address all the soil problem. 3) former dispensers and associated piping information have not included in any investigation or tank closure report, might be still in place. Letter to Getty Properties disapproving the Revised RAP and provided the above 3 comments. Revised RAP revision will be submitted within 30 days. (RJF)9/4/2008 - Getty Properties portfolio meeting with Tyree and Delta. Will plan to excavate everything. Will revise the RAP in a month. (RJF)12/2/2008 - 3Q2008, 7/2008 - 9/2008, 8/2008, by Tyree. Malcolm X Automobile repair shop. Groundwater was gauged and sampled 7/29/2008. 13 monitoring wells. DTW 55.23' to 56.37' bg. Flows to west. No LNAPL. on site BTEX range ND to 2,804 ppb (W-2). Onsite MTBE range ND to 235 ppb (W-2). Offsite BTEX range ND to 4,946 ppb (W-12). offsite MTBE range ND to 79.5 ppb (W-11). (RJF)12/2/2008 - Reviewed the Revised RAP, dated 10/1/2008, by Tyree. Tyree proposed to excavate soil in the former tanks area, former dispensers area, and former tank area near W-3. The existing tanks will be removed. Soil will be excavated down to 20 feet. RegenOx and ORC will be injected from 20 to 60 feet and a monitoring program will be followed. DEC provided comments via email to Tyree. (RJF)1/6/2009 - Getty Properties portfolio meeting with Tyree and Delta. Potential development but not clear with the schedule. Revised RAP was submitted, under review. (RJF)4/17/2009 - Quarterly Monitoring Report, 4Q2008 10/2008 - 12/2008, 12/2008, by Tyree. Malcolm X Automobile repair shop. Groundwater was gauged and sampled 11/24/2008. 13 monitoring well. DTW 55.61' to 56.13' bg. Flows to west. NO LNAPL. Onsite BTEX range ND to 5,888.7 ppb (W-6). Onsite MTBE range ND to 145 ppb (W-6). Offsite BTEX range ND to 9,072.6 ppb (W-12). Offsite MTBE range ND to 9.7 ppb (W-10). (RJF)6/10/2009 - Reviewed RAP revision, dated April 20, 2009, pdf via email on 5/19/2009, by Tyree. Limited soil excavation, approximately down to 20 feet and to the maximum achievable depth of the excavator. Investigate the former pump islands and piping, remove if encountered. Endpoint samples for STARS. Prior to the chemox injections, DO, temp, pH and ORP readings will be taken from MW-1 to MW-9, plus baseline samples for STARS. Soil samples for baseline samples from the injection points. Injection point will be installed to depth of 60 feet. 9 injection points. The RegenOx will be 35%, 133 lbs of RegenOx and 66 lbs of ORC Advanced per hole. DO will be monitored in MW-1 through MW-9 monthly basis for the month prior to

and the initial 6 months following the injection, then quarterly for 2 quarter to complete the 12 months monitoring. Temp, pH and DTW will be measured on a monthly basis. After 3 months of DO monitoring, quarterly sampling of gw for EPA 8260, as well as BOD, COD, total iron and dissolved iron. 6 months after the injection program is completed, soil samples will be collected. The borings will be advanced down to 60 feet? Work to be started within 45 days of the approval. Quarterly Monitoring Report, 1Q2009, 1/2009 - 3/2009, pdf via email on 5/22/2009, by Tyree. Malcolm X Automobile repair shop. Groundwater was monthly gauging and quarterly sampling. Groundwater was sampled on 1/29/2009. 13 monitoring wells. DTW 43.48' to 44.94' bg. Flows to southeast. NO LNAPL. Onsite BTEX range ND to 11,571 ppb (MW-2). Onsite MTBE range ND to 312 ppb (MW-2). Offsite BTEX range ND to 11,151 ppb (MW-12). Offsite MTBE range ND to 11 ppb (MW-11). (R.JF)9/2/2009 - Quarterly Monitoring Report, 2Q2009, 4/2009 - 6/2009, pdf via email on 7/20/2009, by Tyree. Malcolm X Automobile repair shop. Monthly gauging. Quarterly sampled 4/2/2009. 13 monitoring wells. DTW 44.03' to 45.31' bg. Flows to northwest. NO LNAPL. Onsite BTEX range ND to 11,844 ppb (W-2), MTBE range ND to 533 ppb (W-2). Offsite BTEX range ND to 17,291 ppb (W-12), MTBE range ND to 4.9 ppb (W-11). Quarterly Monitoring Report, 3Q2009, 7/2009 - 9/2009, pdf via email 9/1/2009, by Tyree. Malcolm X Automobile repair shop. Groundwater was gauged and sampled on 8/3/2009. 13 monitoring wells. DTW 44.04' to 45.38' bg. Flows to west north west. Onsite BTEX range ND to 9,828 ppb (W-2), MTBE range ND to 392 ppb (W-2). Offsite BTEX range 1.1 ppb to 19,120 (W-12), MTBE range ND to 5.8 ppb (W-11). 6/30/2010 - Subsurface Investigation Report, dated 2/17/2010, by Tyree. On october 26-28, 2009, Tyree oversaw Associated Environmental Services during the advancement of 7 soil borings (SB-1 through SB-7) using a Geoprobe 6620DT direct push drill rig. Upon collection of all soil samples, the borings were backfilled with native soil, topped with sand and finished to grade with asphalt or concrete. SB-1 hit refusal at 9-9.5' bg in 2 locations. PID readings were detected in all soil borings except SB-1 and SB-3. 10 soil samples were taken. SB-1 (5-10'), BDL. B-2 (10-15'), no exceedance. SB-3 (45-50'), BDL. SB-4 (15-20'), no exceedance. SB-5 (15-20'), BDL. SB-5 (40-45'), 600 benzene, 73,300 ethylbenzene, 271,000 xylenes, 346,250 BTEX, 11,200 isopropylbenzene, 31,300 n-propylbenzene, 132,000 1,2,4-trimethylbenzene, 47,500 1,3,5-trimethylbenzene, 13,900 naphthalene. SB-6 (10-15'), 10,200 xylenes, 12,260 BTEX, 68,800 1,2,4-trimethylbenzene, 21,500 1,3,5-trimethylbenzene. SB-6 (40-45'), no exceedance. SB-7 (15-20'), no exceedance. SB-7 (45-50'), no exceedance. These investigation results will be used to prepare for the RAP preparation. 11/3/10. In June 2010 Tyree wrote in the Quarterly Monitoring report that they would submit a revised RAP by 8/31/10. Breen 2/1/2012 - Project management is transferred to KGH, who begins file review. Former Getty #564 which is NOT a currently operating station is located across the street from a Getty "flagged" station. There is considerable debate between the parties over groundwater flow direction. KGH 12/10/2012 - Received letter from Dan Yarom of C.D.S.P. who requests closure as all necessary work has been completed. Requested KGH review groundwater flow direction over time. 12/14/2012 - KGH evaluates GW flow based on available information. Tyree indicates west-northwest GW flow direction with blue arrow on all plots reviewed. This is consistent with expected regional flow. Potentiometric plots on a local scale vary overtime and are apparently influenced by infiltration to catch-basins, leaking sewers

and other subsurface infrastructure. The J.R. Holzmacher GW evaluation report agrees with west-northwest flow and its higher resolution look at the issue provides insight into the complexity of localized flow superimposed upon regional. A second line of evidence supporting W-NW flow out of former source area is the net-transport of dissolved petroleum to the W-NW. This raises the issue that this site may have had some impact on the active Getty across the street in the past as some contend. KGH1/16/13 - Conference call between DEC (Jane O'Connell, Jim Quinn, BC and KGH) and prospective buyer (PB) of property Moris Y. who is represented by Charles Sosik and Larry Schnapf. PB would like to redevelop this site into Hotel with retail space. PB is concerned about future liability for off-site impacts and wants a "bright line" separating his responsibility from that of the RPs. BC advised that site is not eligible as a BCP for petroleum due to enforcement action. KGH 2/5/13 - Received QMP from Tyree along with NFA request 2/8/2013 - (KGH) The Department has evaluated the body of remedial work conducted to remedy Spill # 9810224 and accepts the petition for closure. The system that leaked has been removed and contaminated soil excavated or treated. Long-term monitoring has demonstrated that any on-site residual is low-level and decreasing. It is possible that pockets of residual soil contamination have escaped prior excavation efforts however; the groundwater beneath the site has cleaned up nicely. There is no indication of significant residual contaminant mass on-site or flux of contaminant moving off-site. The Department has evaluated the potential for Spill 9810224 to be an on-going source of groundwater contamination to the neighboring station and finds it to be quite low. The neighboring station appears to have issues of its own that need to be addressed. No Further Action (NFA) is required at this time. NFA (KGH) caller installing new tanks, encountered contaminated soil. ORIGINAL SPILL ASSIGNED TO O'DOWD.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"3/14/2002-VOUGHT-Site visit by Vought on 2/7/2002. Spill was a result of overfill and an unscheduled delivery. Small spill (1/2 gal out of vent and large spill (approximately 30 gallons in basement). The spill in basement was the result of a ruptured tank patch caused by overfill pressure. No sewers or drains affected. Spill was on concrete and no cracks were evident. Building super is Joseph Connets (718-573-9329). Resident above tank room is Keisha Hancock (718-443-3769). Spiller was County Oil Company (David Rosen 718-626-7000). Spill was cleaned by County oil using speedy dry, biosolve, sweet air and a vacuum truck to pump out the tank so repairs could be performed (AB Oil). All contaminated materials in basement were disposed of by JB Waste Oil Co. (invoice provided 718-777-8298). County Oil Company hired New York City Tank Testing Inc (718-731-7011) to tightness test the tank after they dug and

replaced the vent line, refitted the suction and return, resealed tank patch and resealed manway to the tank (invoice and tightness test results provided). Site visit on 3/7/2002 by Vought confirmed that the cleanup was complete. Interview with Keisha Hancock revealed that she no longer had any odors in her apartment. Spill closed by Vought.
Remarks: customer probly recieved a delivery he did not order fd is on the scene and shut down his burner they did ventilate the cellar the homeowner did flush with water down the sewer

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SAWYER"10/4/03 1900 Hrs Sawyer - I went to the location and found that Satewide Environmental had already cleaned up the spill.10/6/03 0930 Hrs - Sawyer - Lisa Hauer called me to ask if there were any areas that were not cleaned to DEC standards. I pointed out the piping area and under a table saw were not cleaned. She said the men she sent out today would take care of these areas and finish the job. I will call for confirmation from the residents. 11/13/03 1218 Hrs - Sawyer - I received end-point samples and a chain of custody from Action-Borough, who was contracted by Tri-State to do the work. Closed
Remarks: Not reported
cleanup by tri-state enviro.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site Description: The Technical Metal Finishers Company was a plating company located in a light industrial/residential area. The company is out of business and the site is abandoned. The site was discovered in June 1982 when a fire occurred at the abandoned plant. The facility contained waste acids, caustics and cyanides stored in tanks and

drums. The wastes contained in the tanks and drums were removed by a contractor hired by NYC Dept. of Environmental Protection. Clean up has been initiated by NYC Dept. of Environmental Protection through contract with Radiac Research Corporation. All tanks and debris have been removed from site and soil has been excavated. The building was demolished, and all work has been completed.

Env Problem: The site was delisted from the Registry as removal action conducted at the site has removed all hazardous waste.

Health Problem: NYSDOH has insufficient information to fully evaluate the potential for human exposures.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015	Source: EPA

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/10/2015
Date Data Arrived at EDR: 03/31/2015

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

SPENCERAN, INC.
1100 MYRTLE AVENUE
BROOKLYN, NY 11206

TARGET PROPERTY COORDINATES

Latitude (North):	40.6966 - 40° 41' 47.76"
Longitude (West):	73.9361 - 73° 56' 9.96"
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	589887.8
UTM Y (Meters):	4505410.5
Elevation:	73 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940597 BROOKLYN, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> KINGS, NY	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	360497 - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> BROOKLYN	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

RECORD OF COMMUNICATION	
Communication with: Mr. Kevin Bai of Bogopa Service Corporation	
On: September 8, 2015	
Recorded By: Ramesh Challapalli	
Summary of Communication:	
<p>According to Mr. Kevin Bai of Bogopa Service Corp, who has been familiar with the Property since 1990, the Property has historically been utilized for commercial purposes since at least the late 1990s. He indicated that he was not familiar with the historical use of the Property parcels located along Vernon Avenue. Mr. Bai indicated that the supermarket building was historically heated by natural gas-fired HVAC units. He indicated that he was not aware of any environmental concerns at the Property.</p> <p>Mr. Bai informed EFI that no environmental violations or liens were associated with the Property. He further noted that he was unaware of any prior environmental reports for the Property.</p>

RE: Phase I Environmental Site Assessment
AFS Market, Inc.
1102-1122 Myrtle Avenue
Brooklyn, NY 11206
Project #: 51-12-01004-001

Dear Ms. Stutz:

EFI Global, Inc. (EFI) is pleased to provide the results of our Phase I Environmental Site Assessment (ESA) of the referenced property. This assessment was authorized and performed in general accordance with the scope of services outlined in the Project Task Order dated December 12, 2012, the JP Morgan Chase Bank, N.A. Environmental Due Diligence Guidance Document (revised December 2009) and the Master Service Agreement for Environmental Services between EFI and JP Morgan Chase & Co. dated November 4, 2009.

This assessment was also performed in accordance with ASTM E 1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and included a site reconnaissance, as well as research and interviews with private individuals, knowledgeable parties, and regulatory agency officials. An assessment was made, conclusions stated, and recommendations outlined.

EFI has no present or contemplated future ownership interest or financial interest in the real estate that is the subject of this Environmental Assessment Report; and EFI has no personal interest with respect to the subject matter of the Environmental Assessment Report of the parties involved and consultant has no relationship with the property or the owners thereof which would prevent an independent analysis of the environmental or other conditions of the property.

We appreciate the opportunity to provide environmental services to JP Morgan Chase Bank, N.A. on this project. If you have any questions concerning this report, or if we can assist you in any other matter, please contact Mandeep S. Sandhu at 732-256-9111 or mandeep_sandhu@efiglobal.com.

Sincerely,

EFI Global, Inc.

EXECUTIVE SUMMARY

EFI Global, Inc. (EFI) has performed a Phase I Environmental Site Assessment (ESA) of AFS Market, Inc. located at 1102-1122 Myrtle Avenue, Brooklyn, NY (the "Property") in accordance with ASTM E 1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This ESA was authorized by JP Morgan Chase Bank, N.A. on December 12, 2012.

The Property is located within the Borough of Brooklyn, New York in an area consisting primarily of single and multi-family residential and commercial storefront development. The Property is located at 1102-1122 Myrtle Avenue, approximately 150 feet west of the intersection with Myrtle Avenue and Broadway. The Property is bordered to the north by Myrtle Avenue, beyond which are commercial storefront, offices and apartments; to the east by a New York Transit Authority Substation; to the south by single and multi-family residential development and an open lot; and to the west by Kinights Auto Care Quick Lube. Based upon topographic map interpretation and site observations, the inferred direction of groundwater flow is to north and east toward English Kills located approximately 0.9 mile north-northeast of the Property.

The Property is comprised of four adjoining tax parcels comprising 0.74 acre of land and is improved with a one-story supermarket, paved parking, and loading dock areas. The building is of one-story slab-on-grade construction with no below-grade areas. The building is finished on the exterior with brick masonry and stucco, and has a flat roof surfaced with asphaltic paper. The building is heated and cooled by rooftop HVAC units fueled by natural gas.

According to the historical information, the Property was first developed for residential purposes prior to 1887 with four residential dwellings located at 1110 and 1116-1120 Myrtle Avenue, one commercial storefront located at 1122 Myrtle Avenue and several vacant lots. The 1098-1100 Myrtle Avenue portion of the Property was originally developed as a Candy Factory which operated from approximately 1918 to 1934. This building was also operated as a furniture manufacturer from at least 1947 until at least 1968, and as the current supermarket warehouse and loading dock since approximately 2001. The 1102-1114 Myrtle Avenue portion of the Property was originally constructed circa 1921 and has historically been occupied by a parking garage from approximately 1921 to 1968, truck rental company from at least 1949 to approximately 1965, auto repair facility from at least 1977 to 1980, skating rink from 1981 to the early 1990s, and a supermarket since 1993. The 1116-1120 Myrtle Avenue parcels were originally developed for residential and purposes prior to 1887. By 1904, 1116 Myrtle Avenue was converted to a commercial storefront. All three parcels were also occupied by a furniture manufacturer from at least 1947 until approximately 1980. The former structures were reportedly demolished in 1947 and 1979, and this portion of the Property has since been occupied by paved parking areas associated with the current supermarket. The 1122 Myrtle Avenue parcel was originally developed as a commercial storefront prior to 1887 and is known to have been occupied by a paint shop in the early 1900s. The building was reportedly demolished in the early 1990s, and has since been occupied by paved parking areas associated with the current supermarket.

EFI reviewed regulatory databases and files from federal, state and local environmental regulatory agencies to identify use, generation, storage, treatment or disposal of hazardous materials or release incidents of such materials that may impact the Property. The records reviewed included, but were not limited to, the following: Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS); National Priorities List (NPL); Resource Conservation Recovery Information System (RCRIS); Treatment, Storage and Disposal Facilities (TSD); Large and Small Quantity Generators; Emergency Response Incidence Logs; state-registered underground storage tanks (UST); state leaking underground storage tank (LUST) incident reports; state solid waste facilities/landfill sites (SWF/LS); state hazardous waste sites (SHWS); and other local records.

No recognized environmental conditions (RECs) were noted based on the regulatory database search.

A 1,000-gallon gasoline UST was utilized at the Property between the approximate years of 1947 and 1968. The tank was situated in the northeast portion of the former parking garage building located at 1102-1114 Myrtle Avenue. As no records related to the removal or investigation of this UST have been identified to date, the potential presence of an unregulated UST is considered a recognized environmental condition (REC) relative to the Property.

The Property has been historically utilized for a variety of commercial and light industrial uses dating back to approximately 1921. Prior historic uses of environmental concern have included a furniture manufacturer from at least 1947 to 1968 (1098-1100 Myrtle), auto repair facility in 1934 and from at least 1977 to approximately 1980 (1102 Myrtle), and furniture manufacturer from at least 1947 to approximately 1980 (1116-1120 Myrtle). Based on the potential for adverse environmental impacts to the Property subsurface as the result of the former on-site activities, the historic use and occupancy of the Property has been identified as a REC.

Conclusions

EFI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of 1102-1122 Myrtle Avenue, Brooklyn, NY, the Property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the Property, except for the following:

- A 1,000-gallon gasoline UST was utilized at the Property between the approximate years of 1947 and 1968. The tank was situated in the northeast portion of the former parking garage building located at 1102-1114 Myrtle Avenue. As no records related to the removal or investigation of this UST have been identified to date, the potential presence of an unregulated UST is considered a REC relative to the Property.
- The Property has been historically utilized for a variety of commercial and light industrial uses dating back to approximately 1921. Prior historic uses of environmental concern have included a furniture manufacturer from at least 1947 to 1968 (1098-1100 Myrtle), auto repair facility in 1934 and from at least 1977 to approximately 1980 (1102 Myrtle), and furniture manufacturer from at least 1947 to approximately 1980 (1116-1120 Myrtle). Based on the potential for adverse environmental impacts to the Property subsurface as the result of the former on-site activities, the historic use and occupancy of the Property has been identified as a REC.

EFI's assessment included additional services to evaluate asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands and mold. This assessment has revealed no evidence of related conditions of concern in connection with the Property, except for the following:

- Suspect asbestos-containing building materials were observed in the building in the form of non-friable drywall and joint compound, non-friable ceiling tiles, non-friable vinyl floor tiles, non-friable grouts, mastics, and caulking and non-friable roofing materials. The aforementioned building components were noted to be in overall good condition with low potential for disturbance.

Recommendations

As a result of this assessment, EFI recommends the following:

- UST - EFI recommends a Phase II Limited Subsurface Investigation be performed to determine if the subsurface of the Property has been impacted by the former operation of a 1,000-gallon gasoline UST.
- Historic Property Use - EFI recommends a Phase II Limited Subsurface Investigation be performed to determine if the subsurface of the Property has been impacted by the historic use of the Property for furniture manufacturing and auto repair.
- Asbestos - Given the condition of the identified and suspect ACM, EFI is of the opinion that these materials can be effectively managed as part of an asbestos Operations and Maintenance (O&M) Plan until such time as renovation or demolition activities necessitate their removal. The objective of an O&M Plan is to implement a practical management approach to controlling identified ACM within the Property. The O&M Plan is designed to cleanup existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed.

Environmental Report Summary

Report Section		No Further Action	REC	HREC	Issue/Further Investigation	Comments/Costs
2.3	Current Use of Property	X				
2.5	Current Use of the Adjoining Properties	X				
4.1	Standard Environmental Records Sources	X				
4.4.1	Historical Summary		X		X	Furniture manufacturing and auto repair activities were historically conducted on the Property - Phase II investigation - \$9,000 to \$11,000

1.0 INTRODUCTION

EFI Global, Inc. (EFI) was retained by JP Morgan Chase Bank, N.A. to perform a Phase I Environmental Site Assessment (ESA) of AFS Market, Inc. located at 1102-1122 Myrtle Avenue in Brooklyn, NY (the "Property"). This ESA was performed in accordance with the Project Award Form dated December 12, 2012.

1.1 Purpose

The purpose of the ESA was to conduct all appropriate inquiry (AAI) into the previous ownership and uses of the Property consistent with good commercial or customary practice as defined at 42 U.S.C. Section 9601(35)(B). As such, this assessment is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act liability.

1.2 Scope-of-Work

The scope of work for this project included observing Property and adjoining property conditions, reviewing regulatory agency database records, contacting local officials and other persons knowledgeable of the Property, and reviewing pertinent historical documents with regard to past land use, regional setting information, and ownership records, and summarizing our findings. Each task is conducted with the intent to identify recognized environmental conditions, as defined by American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments E 1527-05. This ASTM standard exceeds the requirements set forth in 40 CFR Part 312, Standards and Practices for All Appropriate Inquiries.

Recognized environmental conditions generally include features suggesting the presence or likely presence of hazardous substances or petroleum products on the Property that cause or threaten to cause the incurrence of response actions. Recognized environmental conditions include hazardous substances or petroleum products under conditions that are in compliance with laws. Recognized environmental conditions may also include historical conditions that have been addressed in the past.

Recognized environmental conditions do not include de minimis conditions that generally do not present a threat to human health or the environment, and generally would not be subject to enforcement action if brought to the attention of appropriate governmental agencies.

In addition to the scope of work outlined above, the following additional non-ASTM scope considerations were included in our scope of services:

- EFI conducted a limited visual evaluation of accessible areas of the Property to determine the potential for asbestos containing material to be present at the Property. As a part of this evaluation, the condition and location of suspect or presumed asbestos containing materials were reported. If requested by the Client or stated in the Client's scope of work, sampling of suspect asbestos containing materials was performed. See Section 7.1 for additional details regarding this scope of work.
- A limited lead-based paint evaluation was performed in accessible areas of the Property during the site reconnaissance. The potential for lead-based paint was based on the date of construction and the condition and location of painted surfaces where noted. If requested by the Client or stipulated in the agreed scope of work, screening for lead based paint was performed by testing and/or sampling for laboratory analysis. See Section 7.2 for additional details regarding this scope of work.

- An evaluation of radon potential was provided utilizing average radon concentration zones available from the US Environmental Protection Agency (USEPA). If requested by the Client, sampling for site specific radon concentrations was performed. See Section 7.3 for additional details regarding this scope of work.
- A limited visual assessment of accessible areas of the Property were evaluated for the presence of mold growth. The location and quantity of mold growth observed, if any, was documented. If requested by the client, confirmatory sampling for mold was performed. See Section 7.4 for additional details regarding this scope of work.
- A limited visual assessment for wetlands vegetation was performed as part of the completion of the site reconnaissance. In addition, EFI reviewed readily ascertainable jurisdictional data or maps to confirm if jurisdictional wetlands are located on the Property. See Section 4.3.5 for additional details.
- An evaluation for lead in drinking water was provided utilizing annual drinking water quality reports or interviews with municipal or utility officials. If requested by the Client, sampling for lead in drinking water was performed. See Section 7.5 for additional details regarding this scope of work.

It should be noted that non-ASTM scope considerations provided as part of this ESA are not intended to satisfy a regulatory requirement but are to give a lender or user of this report, an indication of significant (significant due to quantity, accessibility, or condition) conditions which may exist at the Property. Additional investigation may be appropriate to satisfy regulatory requirements, or in the event of future demolition or maintenance work which may impact suspect materials.

1.3 Significant Assumptions

In conducting this Phase I ESA, EFI relied on federal and state regulatory agency database information, published historical and physical setting sources, and interviews with knowledgeable parties, regulatory officials, and other private individuals. EFI has assumed where reasonable to do so that the information provided is true and accurate. If information to the contrary is discovered, our conclusions and recommendations may not be valid.

No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.

EFI obtained environmental agency database information from Environmental Data Resources, Inc. (EDR). The databases usually present the location of the entities by their street address. In many cases this is the only reasonable means by which we may locate a database entry. The actual location of an entry may not be accurately indicated by the street address given.

Certain environmental hazards are impossible to visually identify; their presence can be verified only by testing and analysis. EFI can make no direct inferences as to the subsurface conditions at the Property based on the Phase I scope of work, which does not include a physical investigation of the subsurface. No detailed wetlands assessments, endangered species, or fault investigations were performed during this site assessment.

Conditions other than those observed may exist in inaccessible or unobserved areas of the Property. During the site visit, materials identified on the Property were not disturbed and underlying conditions were not observed. Should there be a substantial change in the functional utilization of the Property, or if additional improvements are planned, the conclusions presented here may not be valid. If there are changes in the use of the Property or changes in

the adjacent property activities or conditions, EFI should be notified so that we may observe these conditions.

Our conclusions and recommendations relate only to the areas we observed during the site reconnaissance and the findings of the research noted in this report. The scope of this report is limited to matters expressly covered.

1.4 Limitations and Exceptions

Along with all of the limitations set forth in various sections of the ASTM E 1527-05 protocol, the accuracy and completeness of this report may be limited by the following:

Outstanding Information Requests - At the time of report completion, replies from certain local government agencies/officials had yet to be received. Pertinent data will be forwarded to the Client upon receipt. Additionally, a completed environmental site assessment questionnaire was not provided to EFI.

Historical Data Source Failure - EFI was not able to document the historical use of the Property prior to 1887. This data failure is not considered critical and does not change the conclusions of this report, as the 1887 Sanborn map revealed the Property to be utilized for primarily residential and commercial storefront purposes. Additionally, gaps of greater than five-year intervals in the historical record were noted by EFI. However, because the Property occupants were consistent for the majority of these intervals, this data failure is not considered a significant concern.

It should be noted that this assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems (EMS) that may exist on the property. Where required, the documents provided in the appendices were used as reference material for the completion of the Phase I ESA. Some of the information presented in this report was provided through existing documents and interviews. Although attempts were made, whenever possible, to obtain a minimum of two confirmatory sources of information, EFI in certain instances has been required to assume that the information provided is accurate.

The information and conclusions contained in this report are based upon work undertaken by trained professional and technical staff in accordance with generally accepted engineering and scientific practices current at the time the work was performed. The conclusions and recommendations presented represent the best judgment of EFI based on the data obtained from the work. Due to the nature of investigation and the limited data available, EFI cannot warrant against undiscovered environmental liabilities. Conclusions and recommendations presented in this report should not be construed as legal advice.

Should additional information become available which differs significantly from our understanding of conditions presented in this report, we request that this information be brought to our attention so that we may reassess the conclusions provided herein.

1.5 Data Gaps

As required by the ASTM Standard E 1527-05, the ESA shall identify and comment on significant data gaps that affect the ability of the Environmental Professional to identify recognized environmental concerns.

No significant data gaps were encountered as a result of this assessment.

1.6 Deviations

No deviations from the recommended scope of ASTM Standard E 1527-05 were performed as part of this Phase I ESA with the exception of any additional services noted in Section 1.2 Scope of Work.

1.7 Special Terms and Conditions

There were no special terms and conditions. Authorization to perform this assessment was given by the client on December 12, 2012. Access to the Property was arranged by Mr. David Chung.

1.8 User Reliance

All reports, both verbal and written, are for the benefit of JPMC, its participants, co-lenders, and assignees of any indebtedness secured by the Property. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of EFI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with EFI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against EFI, its officers, employees, vendors, successors or assigns. Reliance on this report by the Client and all authorized parties will be subject to the terms, conditions and limitations stated in accordance with JPMC's Task Order Form and the Master Services Agreement for Environmental Services, dated November 4, 2009, between EFI and JP Morgan Chase Bank, N.A.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The Property is known as AFS Market, Inc. and is located on the south side of Myrtle Avenue, approximately 150 feet west of the intersection of Myrtle Avenue and Broadway. Information obtained from the New York City Department of Finance indicates that the tax assessment parcel numbers for the Property are 1586-12, 1586-14, 1586-24 and 1586-27.

A legal description in the form of a tax parcel map was obtained from the New York City Department of Finance. A copy of the tax map is provided in Appendix F.

2.2 Site and Vicinity Description

The Property consists of approximately 0.74 acres and is developed with an approximately 21,000 square-foot commercial building. The ground surface at the Property is relatively flat with engineered slopes to facilitate site drainage. Ground cover consists primarily of the building footprint and concrete, asphalt-paved parking, and loading dock areas. The Property can be accessed from the south side of Myrtle Avenue or from an unpaved vacant lot on the rear (southern) side of the building.

The Property is zoned C8-2 (Commercial). The area surrounding the Property is comprised of a mixture of residential dwellings and commercial storefronts.

2.3 Current Use of Property

The Property is currently occupied by a Food Bazaar Supermarket.

2.4 Description of Structures and Other Improvements

The Property is improved with one single-commercial building with attached warehouse and loading dock area, totaling approximately 21,000 square feet. The side (eastern) portion of the Property is improved with a concrete-paved parking area, while the western portion features a concrete-paved loading dock area. The current building was constructed circa 1920 and has reportedly been renovated over time. The building is of concrete masonry units (CMU) and steel-frame construction and is finished on the exterior with brick and stucco. The Property building has a flat roof surfaced with rolled asphaltic paper.

The Property is heated via natural gas-fired rooftop HVAC units and ceiling-mounted natural gas-fired blowers in the warehouse which supply heating and cooling to the retail and office areas.

The utilities are discussed in the table below.

Property Summary

Size of Property (approximate):	0.74 acre
General Topography of Property:	Relatively flat
Adjoining and/or Access/Egress Roads:	Myrtle Avenue (adjoining to north)
Paved or Concrete Areas (including parking):	Asphalt and concrete-paved parking and loading dock areas
Unimproved Areas:	None
Landscaped Areas:	None
Surface Water:	None
Potable Water Source:	City of New York
Sanitary Sewer Utility:	City of New York

Storm Sewer Utility:	City of New York
Electrical Utility:	Con Edison
Natural Gas Utility:	Con Edison

2.5 Current Use of the Adjoining Properties

An area reconnaissance was conducted to assist in evaluating if adjacent land uses have or could have impacted the Property. The area reconnaissance was conducted within a ¼-mile radius of the Property by touring the area by automobile/walking, by viewing particular businesses from public right-of-ways, and by physical observations at selected businesses or properties. The following summary describes land use on the adjoining properties, based on our observations.

Direction From Site	Occupant	Use	Comments
North	Social Security Administration (1111)	Office	No features of potential environmental concern were noted.
North	New York 99 Cent Store (1123)	Retail	No features of potential environmental concern were noted.
North	L. Salzinger (1125-1127)	Commercial	Site is occupied by a historical nut and bolt manufacturer. No features of potential environmental concern were noted.
North	Star Deli & Grocery (1129)	Retail	No features of potential environmental concern were noted.
North	Bargain Bazaar Warehouse (1131)	Retail	An apparent basement AST fill port was noted along the front (northern) side of the building. No evidence of release or spillage was identified.
North	Vacant Building (1133)	Commercial	No features of potential environmental concern were noted.
North	New China Chinese Restaurant (1135)	Commercial	No features of potential environmental concern were noted.
North	Metro PCS (1137)	Retail	No features of potential environmental concern were noted.
North	Apartment Building (1139)	Residential	No features of potential environmental concern were noted.
East	NYC Transit System Substation (1124-1126)	Commercial	No features of potential environmental concern were noted.
South	Single and Multi-Family Dwellings (367-371 and 375-381 Vernon Avenue)	Residential	No features of potential environmental concern were noted.
South	Vacant Lot (367-373 Vernon Avenue)	Unimproved	No features of potential environmental concern were noted.
West	Knights Auto Care Quick Lube (1090)	Commercial	Site is used for auto repair purposes. No features of potential environmental concern were noted.

Our observations of the adjoining and adjacent properties did not reveal evidence of potential environmental concerns such as suspect storage facilities, visible fueling facilities or significantly stained surfaces. It should be noted that historical research indicates that a variety of commercial and industrial activities have historically been performed on the northern and western adjoining properties, however no environmental concerns were observed on these properties.

3.0 USER PROVIDED INFORMATION

3.1 User Responsibilities

ASTM E 1527-05 requires that the Environmental Professional request from the user of the Phase I ESA, the Client, certain information discussed below concerning the Property or request from the user the names of other individuals who can provide this information.

ASTM E 1527-05 assigns to the Client or its representative, the responsibility to check or engage a title company or title professional to check reasonably-ascertainable recorded land title records for environmental liens or activity and use limitations currently recorded against the Property and provide that information for inclusion in this report.

If this Client or its representative is aware of specialized knowledge or experience that is material to the identification of recognized environmental conditions, or if they have actual knowledge that the purchase price of the Property is significantly less than the purchase price of comparable properties, ASTM E 1527-05 assigns to the Client the obligation to communicate that information for inclusion in this report.

Requested information was not received prior to the issuance of this report. As a lender, the Client is assumed to have no knowledge of the Property which would significantly impact our ability to satisfy the objectives of this assessment and the lack of this information is not considered to represent a significant data gap.

3.1.1 Title Records

EFI requested that the Client provide information regarding environmental cleanup liens associated with the Property. This information is available through reasonably-ascertainable recorded land title records and lien records that are filed under federal, tribal, state or local law.

No information regarding environmental cleanup liens was provided by the Client.

3.1.2 Activity and Use Limitations Applicable to the Property

No information pertaining to AULs or governmental notification was provided by the Client.

3.1.3 Specialized Knowledge or Experience of the User

The Client did not provide any specialized knowledge relating to the Property. Property ownership/management who was interviewed as part of this investigation did not report any specialized knowledge of the Property outside of what is contained in this report.

3.1.4 Commonly Known or Reasonably Ascertainable Information

EFI requested the Client to describe any commonly-known or reasonably-ascertainable information about the Property that would be helpful to EFI to identify conditions indicative of releases or threatened releases to the Property.

The Client did not provide any environmentally-relevant, commonly-known or reasonably-ascertainable information pertaining to the Property.

3.1.5 Relationship to the Purchase Price to Fair Market Value

EFI asked the Client if the purchase price being paid for the Property reasonably reflects the fair market value of the Property. If there was a difference in the purchase price and fair market value, whether the lower price was a result of contamination known or believe to be present at the Property.

No information indicating that the purchase price of the Property is significantly less than the purchase price of comparable properties was reported to EFI by the Client or its representative.

3.1.6 Reason for Performing Phase I

We understand that the purpose of this assessment is to complete an evaluation that will help to provide the factual support of the innocent landowner defense to CERCLA liability and to understand potential environmental conditions that could materially impact the operation of the business associated with the Property (business environmental risk).

3.2 Additional Owner, Property Manager, and Occupant Information

No other pertinent information in connection with the Property was provided by the owner, the property manager, or the occupants.

4.0 RECORDS REVIEW

4.1 Standard Environmental Records Sources

EFI contracted Environmental Data Resources, Inc. (EDR) to conduct a search of Federal and State regulatory agency databases containing known and suspected sites of environmental contamination. The databases searched and the number of listed sites identified within the approximate minimum search distance from the Federal and State environmental records database listings specified in ASTM Standard E 1527-05 are summarized in the following table. Detailed information for each Federal and State database is provided below. Copies of the EDR research data and a description of the reviewed databases are included in Appendix C of this report.

Map Findings Summary

Database	Target Property	Search Distance (Miles)	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	> 1	Total Plotted
NPL		1	0	0	0	0	NR	0
Proposed NPL		1	0	0	0	0	NR	0
NPL LIENS		TP	NR	NR	NR	NR	NR	0

4.1.1 Federal Databases

Federal National Priority List (NPL)

The NPL is the U.S. EPA's list of uncontrolled or abandoned hazardous waste sites that have been identified for priority remedial actions under the Comprehensive Environmental Response, Compensation and Liability Act (Superfund).

The Property is not a Federal NPL facility and no Federal NPL facilities were identified within one mile of the Property.

Federal Delisted NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL when no further response is appropriate.

The Property is not a Federal Delisted NPL facility and no Federal Delisted NPL facilities were identified within one mile of the Property.

Federal CERCLIS List

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites that are either proposed to be or are on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL.

The Property is not a Federal CERCLIS-listed facility and no Federal CERCLIS-listed facilities were identified within a half mile of the Property.

Federal CERCLIS NFRAP Sites List

The CERCLIS No Further Remedial Action Planned (NFRAP) List indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

The Property is not listed as a CERCLIS-NFRAP facility and no CERCLIS-NFRAP sites are listed within a half mile of the Property.

Federal Resource Conservation and Recovery Act (RCRA) CORRACTS Facilities List

The EPA Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Treatment, Storage and Disposal (TSD) database is a compilation by the EPA of reporting facilities that treat, store or dispose of hazardous waste. The CORRACTS database is the EPA's list of treatment storage or disposal facilities subject to corrective action under RCRA.

The Property is not listed as a RCRA CORRACTS TSD facility. One RCRA CORRACTS TSD facility is listed within one mile of the Property.

- The Pfizer Inc. facility is located at 13 Bartlett Street, approximately 0.65 mile west-northwest and down gradient of the Property. The available information indicates that site-wide investigations were conducted in 1992 and 1994 which resulted in a determination of medium corrective action priority. Based on respective distance, current site status, and regional topography, this facility is not considered an REC to the Property.

Federal Resource Conservation and Recovery Act (RCRA) Non-CORRACTS TSD Facilities List

The RCRA TSD database is a compilation by the EPA of reporting facilities that treat, store or dispose of hazardous waste.

The Property is not listed as an RCRA TSD facility and no RCRA TSD sites are listed within a half mile of the Property.

Federal RCRA Generator List

The RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Generators database is a compilation by the EPA of reporting facilities that generate hazardous waste.

The Property is not listed as a RCRA Generator and no RCRA Generator sites are listed on the adjoining properties.

Federal Institutional Control/Engineering Control Registries

The EPA maintains a listing of sites with institutional controls currently in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

The Property is not listed as a US IC/EC Controlled property and no US IC/EC Controlled properties are listed within a half mile of the Property.

Federal Emergency Response Notification System (ERNS)

The Emergency Response Notification System (ERNS) records information on reported releases of oil and hazardous substances. The database contains preliminary information on specific releases, including the spill location, substance released and the responsible party.

The Property is not listed on the ERNS database.

4.1.2 State Databases

State CERCLIS-Equivalent List

The State Hazardous Waste Sites (SHWS) records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Sites identified on the SHWS include both priority sites planned for clean up using state funds (state equivalent of Superfund) and sites where clean up will be paid for by potentially responsible parties.

The Property is not listed as a SHWS facility. One SHWS site is listed within a half mile of the Property.

- The Technical Metal Finishers site is located at 214 Starr Street, approximately 0.89 mile northeast and down gradient of the Property. The available information indicates that discovery, preliminary assessment and site inspection activities and investigations were conducted in 1984 and 1985 which resulted in a determination of low priority for corrective action. The site was officially archived in 1997 and can also be found on the Delisted SHWS database. Based on respective distance, current site status, and regional topography, this facility is not considered an REC to the Property.

Solid Waste Landfill Facilities (SWLF)

SWLF records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The SWLF database was searched by EDR and reviewed by EFI for evidence of landfills and solid waste treatment facilities within a half mile of the Property.

The Property is not listed as a SWLF facility and two SWLF facilities were identified within a half mile of the Property.

- The Bedford Auto Sales site is located at 984 Myrtle Avenue, approximately 0.31 mile west and down gradient of the Property. The available information indicates that vehicle dismantling activities are currently performed at this site. Based on respective distance, regional topography, and since the site was not identified on additional federal or state databases related to the release or storage of hazardous substances, this facility is not considered an REC to the Property.
- The Ram Auto Wreckers site is located at 230 Cook Street, approximately 0.46 miles north-northeast and down gradient of the Property. The available information indicates that vehicle dismantling activities are currently performed at this site. Based on respective distance, regional topography, and since the site was not identified on additional federal or state databases related to the release or storage of hazardous substances, this facility is not considered an REC to the Property.

State Registered Underground Storage Tank List (UST)/ HIST UST

The New York State Department of Environmental Conservation (NYSDEC) compiles a list of registered UST locations.

The Property is not listed as an UST or HIST UST facility and no registered UST facilities were listed adjacent to the Property.

State Registered Underground Storage Tank List (AST)/ HIST AST

The NYSDEC compiles a list of registered AST locations.

The Property is not listed as an AST or HIST AST facility. One registered AST facility is listed adjacent to the Property.

- Five Star Transmission, Inc. is listed on the northern adjoining property at 1123 Myrtle Avenue. The available information indicates that a 275-gallon AST has been operated at this site in the past. At present, the building is occupied by a New York 99 Cent Store. Based on the cross-gradient location of this site in relation to the Property, and since site was not identified on additional federal or state databases related to the release or storage of hazardous substances, this facility is not considered an REC to the Property.

No other adjacent AST or HIST AST sites were identified in the database.

State Leaking Storage Tank List (LTANKS)/ HIST LTANKS

The NYSDEC compiles lists of all reported leaks of hazardous substances from USTs and ASTs.

The Property is not listed as a LTANKS or HIST LTANKS facility. A total of 19 LTANKS facilities and 17 HIST LTANKS facilities were identified within a half mile of the Property.

- The Private Parking Area is located at 358-374 Vernon Avenue, approximately 200 feet south of the Property. This facility is listed as a closed LTANKS and HIST LTANKS site related to the identification of petroleum-impacted soils during the removal of gas and fuel oil tanks in 1998. Following cleanup activities, that included the removal of approximately 40-50 yards of contaminated soil, the spill case was closed in July of 1999. Based on current site status and cross-gradient location, this facility is not considered an REC to the Property.

The remaining LTANKS/ HIST LTANKS sites are situated in excess of 700 feet from the Property. Based on the distances, site statuses and gradient locations, these listings are not considered to represent REC to the Property.

State Institutional Controls

The New York Department of Environmental Conservation (NYSDEC) compiles lists of No Further Action (NFA) Sites with Land Use Restrictions and Monitoring. A land use restricted site is a property where there are limits or requirements on future use of the property due to varying levels of cleanup possible, practical, or necessary at the Property.

The Property is not listed as having Land Use Restrictions or Institutional Controls.

State Voluntary Cleanup Program (VCP) Sites

The DEC compiles a listing of sites that are being voluntarily cleaned up by the Responsible Party(s) under supervision of State officials. The VCP database was searched by EDR and reviewed by EFI for evidence of properties in this program within a half mile of the Property.

The Property is not listed on the VCP database and no VCP properties were identified within a half mile of the Property.

State Brownfields Sites

The DEC compiles an inventory of Brownfields Projects. A Brownfields site is an abandoned, idled, or underused property where the threat of environmental contamination has hindered its redevelopment. All of the sites in the inventory are working toward a Brownfields agreement for cleanup and liability control. The state's Brownfields' database was searched by EDR and reviewed by EFI for evidence of properties in this program within a half mile of the Property.

The Property is not listed on the Brownfields database and no Brownfields properties were identified within a half mile of the Property.

4.2 Additional Environmental Record Sources

A summary of all additional environmental record sources can be found below.

Federal ASTM Supplemental

- Superfund (CERCLA) Consent Decrees (CONSENT)
- Records of Decision (ROD)
- National Priority List Deletions (Delisted NPL)
- Facility Index System/Facility Identification Initiative Program Summary Report (FINDS)
- Hazardous Materials Information Reporting System (HMIRS)
- Material Licensing Tracking System (MLTS)
- Mines Master Index File (MINES)
- Federal Superfund Liens (NPL Liens)
- PCB Activity Database System (PADS)
- Department of Defense Sites (DOD)
- Indian Reservations (INDIAN RESERV)
- Open Dump Inventory (ODI)
- Uranium Mill Tailings Sites (UMTRA)
- Formerly Used Defense Sites (FUDS)
- RCRA Administrative Action Tracking System (RAATS)
- Toxic Chemical Release Inventory System (TRIS)
- Toxic Substances Control Act (TSCA)
- Section 7 Tracking Systems (SSTS)
- FIFRA/TSCA Tracking System (FTTS INSP)

State or Local ASTM Supplemental

- Spills Incidents (SPILLS)
- Registered Bulk Fertilizer and Pesticide Storage Facilities (BULK)
- Drycleaner Facility Listing (DRYCLEANERS)

EDR Proprietary Historical Databases

- Former Manufactured Gas (Coal Gas) Sites

Brownfields Databases

- Listing of Brownfields Sites (US Brownfields)
- Sites with Restrictions (AUL)

Orphan (Unmappable) Sites

The Property is not listed as a NY SPILLS or HIST SPILLS facility. A total of 8 NY SPILLS and 5 HIST SPILLS facilities were identified within one quarter mile of the Property. As closure has been granted in association with each of the reported SPILLS incidents, the nearby SPILLS and HIST SPILLS listings are not considered an environmental concern to the Property.

No other potential issues of concern were identified during the review of the additional environmental record sources.

4.3 Physical Setting Source(s)

The elevation of the Property is approximately 70 feet above mean sea level, as depicted on the U.S.G.S. 7.5 Minute Series Topographic Map of the Brooklyn, NY Quadrangle, dated 1995. The Property and surrounding properties slope gently to the north and east. Storm water flow is routed to storm drains along the adjoining Myrtle Avenue.

4.3.1 Topography

The terrain in the general vicinity of the Property slopes gently to the north and northeast. The Property has been graded to generally level with engineered slopes for drainage. Land in the general vicinity consists of gently rolling hills. The Property did not appear to receive significant surface water runoff from adjoining properties.

4.3.2 Surface Water Bodies

No surface water is located on the Property. The nearest surface water in the vicinity of the Property is English Kills, located approximately 0.9 mile north-northeast of the Property.

4.3.3 Soils/Geology

Based on the soil survey maps published by the United States Department of Agriculture (USDA) Soil Conservation Service, the Property is mapped as Urban Land, which is made up of areas where the original soil characteristics have been permanently altered due to extensive urban development.

The Property is situated within central portion of Kings County, and according to the Generalized Bedrock Geology Map of New York, is comprised of consolidated gravels, sands and clays of the Cretaceous-era. The estimated depth to bedrock is more than 30 feet below land surface.

4.3.4 Hydrology

Based on the local topography of the area, shallow groundwater in the vicinity of the Property is expected to flow to the north and east. Available USGS data indicates that groundwater may be encountered at a depth of less than 25 feet below the ground surface.

4.3.5 Wetlands

No wetlands, settling ponds, lagoons, surface impoundments, or natural catch-basins were observed at the Property during this investigation. According to the US Fish and Wildlife Service Geospatial Wetlands Information online map interface (<http://www.fws.gov/wetlands/Data/Mapper.html>), there are no jurisdictional wetlands on the Property. A map illustrating the wetlands in the vicinity of the Property is provided in the EDR database.

4.3.6 Flood Zone Information

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency, was performed. According to Panel Number 208 of 457, dated September 5, 2007, the Property is located in Flood Zone X. Flood Zone X regions consist of areas that are not within the 500-year flood zone. The distance to the nearest 500-year flood plain is approximately 0.9 mile to the north-northeast. A map illustrating the flood plains in the vicinity of the Property is provided in the EDR database.

4.3.7 Oil and Gas Exploration

No oil or gas extraction or exploration wells were identified at the Property during completion of this assessment.

4.3.8 Mining Activities

No indication of mining activities was identified during completion of this assessment.

4.4 Historical Use

4.4.1 Historical Summary

Historical information identifying the past use of the Property was obtained from a variety of sources as detailed in Appendix B of this report and included city directories, aerial photographs, Sanborn Fire Insurance maps, and topographic maps and building department records. According to the historical information, the Property was first developed for residential purposes prior to 1887 with four residential dwellings located at 1110 and 1116-1120 Myrtle Avenue, one commercial storefront located at 1122 Myrtle Avenue and several vacant lots.

The 1098-1100 Myrtle Avenue portion of the Property was originally developed as a Candy Factory which operated from approximately 1918 to 1934. This building was also operated as a furniture manufacturer from at least 1947 until at least 1968, and as the current supermarket warehouse and loading dock since approximately 2001.

The 1102-1114 Myrtle Avenue portion of the Property was originally constructed circa 1921 and has historically been occupied by a parking garage from approximately 1921 to 1968, truck rental company from at least 1949 to approximately 1965, auto repair facility from at least 1977 to 1980, skating rink from 1981 to the early 1990s, and a supermarket since 1993.

The 1116-1120 Myrtle Avenue parcels were originally developed for residential and purposes prior to 1887. By 1904, 1116 Myrtle Avenue was converted to a commercial storefront. All three parcels were also occupied by a furniture manufacturer from at least 1947 until approximately 1980. Former structures were reportedly demolished in 1947 and 1979, and this portion of the Property has since been occupied by paved parking areas associated with the current supermarket.

The 1122 Myrtle Avenue parcel was originally developed as a commercial storefront prior to 1887 and is known to have been occupied by a paint shop in the early 1900s. The building was reportedly demolished in the early 1990s, and has since been occupied by paved parking areas associated with the current supermarket.

Review of historical information indicates the following areas of suspect environmental concern at the Property and/or immediately adjoining properties:

- 1098-1100 Myrtle Avenue was utilized for candy manufacturing purposes from at least 1918 to approximately 1934.
- 1098-1100 Myrtle Avenue was utilized for furniture manufacturing purposes from at least 1947 to at least 1968.
- 1102-1114 Myrtle Avenue was utilized as a commercial parking garage with associated 1,000-gallon gasoline UST from at least 1935 to at least 1968.
- 1102-1114 Myrtle Avenue was utilized as an auto repair facility from at least 1977 to approximately 1980.
- 1116-1120 Myrtle Avenue was utilized for furniture manufacturing purposes from at least 1947 to at least 1980.
- 1122 Myrtle Avenue was utilized as a paint shop during the early 1900s.

The historical Property and adjoining site operations are discussed in the following sections:

4.4.2 City Directories

EFI reviewed city directories for the Property and adjoining properties provided by EDR that covered the years 1928, 1934, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980, 1985, 1992, 1997, 2000, 2005, 2007 and 2012. The Property addresses were first listed in 1928 as a garage (1102), Robert S Storage Batteries (1120), Amity Products Corporation, Just Born Inc. French Chocolates, and Norma Chocolate Works (1100) and multiple residential listings. A copy of the city directories is provided in Appendix B. A summary of the city directories is provided below.

Summary

Date	Site Comments	Surrounding Area Comments
1928	Amity Products Corporation, Just Born Inc. French Chocolates, S H Born, Norma Chocolate Works and Irving C. Shaffer (1100); Garage and David Katz (1102); B A R Ellis (1118) and Robery S. Storage Batteries and Gustav Wanderer (1120)	Max Hermann Furniture and Wolf Brothers Wall Paper and Moulding (1125)
1934	Just Born Inc. (1100); Meile Auto Repair Company (1102); residential listings (1108); Broadway Garage and Pinkus Realty Corporation (1114); residential listings 1118); Servel Sales and Service (1120) and Max Mallio HDW (1122).	Wolf Brothers Wall Paper (1125)
1940	Dante Furniture Company (1100); Broadway Garage (1114); residential listing (1118); and Best Wick Distributors and Lester and Company Hardwoods (1122).	Wolf Brothers Wall Paper and Moulding (1125)
1945	Dante Furniture Company and Charles Spina Furniture (1100); Broadway Garage (1114); residential listing (1118); and Brooklyn Show Machinery Company and Ralph Catalano Machinery (1122).	No surrounding addresses listed.
1949	Ferrigno Brothers Furniture Company Inc. (1100); Brooklyn Truck Renting Company (1114); Mallin Lock Manufacturing Company and residential listing (1118); and Brooklyn Show Machinery Company and Ralph Catalano Machinery (1122).	National Bolt and Nut Company and Louis Salzinger Bolts & Nuts (1125)
1960	Majestic Staple Company and Trova Sportswear Inc. (1100); Metropolitan Truck Leasing Service (1114); Durro Process Printing Company and Glenwood Sportswear Inc. (1118); and Ralph Catalano Machinery (1122).	National Bolt and Nut Company and Louis Salzinger Bolts & Nuts (1125)
1965	PG Dean Inc. (1098); Majestic Staple Company and Trova Sportswear Inc. (1100); Metropolitan Truck Leasing Service (1114); Durro Elliot Corporation (1116); and Brooklyn Shoe Machinery Company and Anthony Fedele Machinery (1122).	National Bolt and Nut Company Inc. and Louis Salzinger Bolts & Nuts (1125)
1970	Stabbe Senter Press Inc. (1116) and Brooklyn Shoe Machinery Company (1122).	National Bolt and Nut Company Inc. and Louis Salzinger Bolts & Nuts (1125)

Date	Site Comments	Surrounding Area Comments
1973	Brooklyn Shoe Machinery Company and Speed O Magic Corporation (1122).	National Bolt and Nut Company Inc. and Louis Salzinger Bolts & Nuts (1125)
1976	L&L Auto Radiator Service (1102)	No surrounding addresses listed.
1980	Addresses not listed.	No surrounding addresses listed.
1985	Skate City (1102)	Naz Auto Repairs Inc. (1123)
1992	Addresses not listed.	Naz Transmission and Auto Repairs Inc. (1123)
1997	Neighborhood Wholesaler Brooklyn	Naz Transmission and Auto Repairs Inc. (1123)
2000	AFS Market Inc. (1102)	Naz Trans & At Inc. (1123); B&Z Steel Equipment (1125)
2005	First Dimension AFS Market Inc. (1102)	Five Star Transmissions (1123); B&Z Steel Equipment (1125)
2007	Addresses not listed.	No surrounding occupants of potential environmental concern were identified.
2012	Addresses not listed.	No surrounding occupants of potential environmental concern were identified.

4.4.3 Aerial Photos

Available aerial photographs dated 1954, 1966, 1980, 2004 and 2006 from HistoricAerials.com and 1994, 2001, 2008, and 2012 from Google Earth were reviewed for this Environmental Site Assessment. Copies of selected photographs are included in Appendix B of this report. A summary of the aerial photographs is provided below.

Summary

Date	Site Comments	Surrounding Area Comments
1954 - 1966	The Property is depicted with structures located at 1098-1100 Myrtle Avenue, 1102-1114 Myrtle Avenue, and 1116-1122 Myrtle Avenue (four buildings). No on-site features of concern were noted.	Surrounding areas are fully developed for apparent commercial and residential purposes. No off-site features of concern were noted.
1980	The structure at 1098-1100 Myrtle Avenue has been demolished, as have the structures located at 1116, 1118 and 1120 Myrtle Avenue. The 1122 Myrtle Avenue commercial storefront is visible at the eastern edge of the Property.	No major changes to surrounding areas were noted.
1994	The Property appears as currently configured. The current warehouse and loading dock at 1098-1100 Myrtle Avenue have not been constructed yet, and appear as an open lot.	No major changes to surrounding areas were noted.
2001 - 2012	The Property appears as currently configured. The current warehouse and loading dock at 1098-1100 Myrtle Avenue are clearly visible.	Surrounding areas remain fully developed for apparent commercial and residential purposes. No off-site features of concern were noted.

4.4.4 Sanborn/Historical Maps

Historical Sanborn Fire Insurance maps dated 1887, 1888 1904, 1907, 1933, 1935, 1947, 1950, 1951, 1965, 1968, 1977, 1979, 1980, 1981, 1982, 1984, 1986, 1987, 1988, 1989, 1991, 1994, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006 and 2007 for the Property were provided by EDR. EFI's review of the maps indicates that the Property was originally

developed for residential and commercial storefront purposes sometime prior to 1887. Copies of selected maps are included in Appendix B of this report. A summary of the Sanborn maps is provided below.

Summary

Date	Site Comments	Surrounding Area Comments
1887	The Property is occupied by four residential dwellings (1110 and 1116-1120 Myrtle Ave.), one commercial storefront (1122 Myrtle Ave.) and several vacant lots. No on-site features of concern were noted.	Surrounding areas are occupied by stables, repair shops, iron works, print shop and horse sheds to the north; commercial storefronts to the east; and vacant lots to the south and west. No off-site features of concern were noted.
1904	The 1122 Myrtle Avenue portion of the Property is depicted as a commercial storefront and paint shop. No additional major changes to the Property were noted.	Surrounding areas are occupied by commercial storefronts and an elevated rail station to the north and northeast; commercial storefronts to the east; and residential dwellings to the south and west. No off-site features of concern were noted.
1918	The Property is occupied by residential dwellings (1116-1118 Myrtle Ave.), commercial storefronts (1120-1122 Myrtle Ave.) and several vacant lots. The westernmost portion of the Property (current warehouse/loading dock) is depicted with a candy factory, with an address of 1098-1100 Myrtle Avenue. No on-site features of concern were noted.	No major changes to surrounding areas were noted. Surrounding areas remain occupied by commercial storefronts and an elevated rail station to the north and northeast; commercial storefronts to the east; and residential dwellings to the south and west. No off-site features of concern were noted.
1935	The 1102-1114 Myrtle Avenue portion of the Property is shown as a 120-car parking garage. A 1,000-gallon gasoline UST is located near the northeast corner of the garage, adjacent to a former boiler room. 1116-1120 and 1122 Myrtle Avenue are occupied by a two-story structure (apparent commercial) and commercial storefront, respectively. In addition, there is a vacant commercial building located at 1098-1100 Myrtle Avenue (current warehouse/loading dock). The presence of an unregulated gasoline UST associated with the former garage is considered a REC to the Property.	Surrounding areas are occupied by commercial storefronts, parking garage and elevated rail station to the north and northeast; commercial storefronts to the east; and residential dwellings to the south and west. A 750-gallon gasoline UST is located on the northern adjoining parking garage property beyond Myrtle Avenue. No additional off-site features of concern were noted.
1947 - 1968	The 1102-1114 Myrtle Avenue portion of the Property remains occupied by the above-referenced 120-car parking garage with associated 1,000-gallon gasoline UST near the northeast corner of the garage, adjacent to a former boiler room. 1116-1120 Myrtle Avenue is occupied by a furniture manufacturing facility, and 1122 Myrtle Avenue is occupied by a commercial storefront. In addition, there is a furniture manufacturing facility located at 1098-1100 Myrtle Avenue (current warehouse/loading dock). The presence of an unregulated gasoline UST associated with the former garage is considered a REC to the Property.	One of the northern adjoining commercial storefronts is identified as a wholesale hardwood facility on the 1947 and 1950 Sanborn maps. The former parking garage to the north is shown as a furniture warehouse in the 1965 Sanborn map. No additional major changes to surrounding areas were noted.

Date	Site Comments	Surrounding Area Comments
1977 - 1980	The 1102-1114 Myrtle Avenue portion of the Property is shown as an auto repair facility, while 1116-1120 remains occupied by a furniture manufacturing facility, and 1122 by a commercial storefront. The 1098-1100 portion is shown as an undeveloped lot. No references to the aforementioned 1,000-gallon gasoline UST were identified, and no additional major changes to the Property were noted.	Surrounding areas are occupied by commercial storefronts, an auto repair shop and elevated rail station to the north and northeast; NYC Transit Authority Substation to the east; residential dwellings and vacant lots to the south; and several vacant lots to the west. No additional off-site features of concern were noted.
1981 - 1989	The 1102-1114 portion of the Property is shown with a commercial building. 1116-1120 Myrtle Avenue is depicted as an open lot, with an apparent commercial storefront located at 1122 Myrtle Avenue. The 1098-1100 portion is shown as an undeveloped lot. No on-site features of concern were noted.	No major changes to surrounding areas were noted. Surrounding areas remain occupied by commercial storefronts, an auto repair shop and elevated rail station to the north and northeast; NYC Transit Authority Substation to the east; residential dwellings and vacant lots to the south; and several vacant lots to the west. No additional off-site features of concern were noted.
1993 - 1996	The 1122 Myrtle Avenue portion of the Property is shown as a fire ruin. No additional major changes to the Property were noted.	The western adjoining property appears as a junk yard in the 1995 and 1996 Sanborn maps. No additional major changes to surrounding areas were noted.
2001 - 2007	The Property is improved with a commercial structure located at 1102-1114 Myrtle Avenue, and appears to have been combined with the current one-story warehouse building located at 1098-1100 Myrtle Avenue. The 1116-1122 portion of the Property is depicted as a vacant (parking) lot. No on-site features of concern were noted.	Surrounding areas are occupied by commercial storefronts, an auto repair shop and elevated rail station to the north and northeast; NYC Transit Authority Substation to the east; residential dwellings and undeveloped lots to the south; and junk yard to the west. No off-site features of concern were noted.

4.4.5 Historical Topographic Maps

Available topographic maps dated 1906, 1910, 1916, 1924, 1931, 1938, 1947, 1958, 1959, 1961, 1966, 1967, 1970, 1975, 1979 and 1999 from HistoricAerials.com were reviewed for this Environmental Site Assessment. Representative copies have not been included in the appendices due to copyright concerns. A summary of the topographic maps is provided below.

Summary

Date	Quad	Site Comments	Surrounding Area Comments
1906-1938, 1948, 1959, 1961 and 1966	Brooklyn, NY	The eastern portion of the Property appears developed. Remaining areas to the west are depicted as undeveloped land. No on-site features of concern were noted.	Surrounding areas are shown as developed to the north, east and south with undeveloped land depicted to the west. No off-site features of concern were noted.
1947	Brooklyn, NY	The entire Property is shown as developed. No on-site features of concern were noted.	Surrounding areas are shown as developed in all directions. No off-site features of concern were noted.
1958, 1967-1999	Brooklyn, NY	The Property is depicted with pink/orange shading indicative of dense urban development. No building	Surrounding areas are shown with pink/orange shading indicative of dense urban development. An

		footprint or other on-site features were noted.	elevated rail station is located further north of the Property. No additional off-site features were noted.
--	--	---	---

4.4.6 Title Records

Review of a 50-year chain of title was not included in the scope of the assessment. A title report was requested from the Client, but was not received prior to issuance of this report. As a result, the information required for review of recorded land title records is considered not to be readily ascertainable.

4.4.7 Other Environmental Reports

No prior environmental assessments or other reports were provided for EFI's review as part of this assessment.

4.4.8 Building Department Records

Records from New York City Department of Buildings were reviewed for evidence indicating the developmental history of the Property, and for the presence of documentation relative to USTs utilizing the department's internet website and the Property Profile Overview (PPO) records. Pertinent information relative to each Property parcel is as follows:

1098-1100 Myrtle Avenue - Alteration permits were identified dating back at least 1917 and a full demolition permit was identified in 1970. The current warehouse addition was first occupied in 2001.

1102 Myrtle Avenue - A new building permit was identified in 1920. Certificates of Occupancy for a roller skating rink and supermarket were also identified in 1981 and 1993, respectively.

1116 Myrtle Avenue - Permit records dating back to 1921 were identified, including two demolition permits in 1946 and 1979 as well as an oil burner application in 1947.

1122 Myrtle Avenue - References to the 1935 installation (construction) of a store and one-car garage were identified, in addition to an oil burner application in 1948 and full demolition permit in 1992.

No other records of historical or environmental significance were identified. Please see Appendix F for a copy of the pertinent records.

4.4.9 Other Land Use Records

New York City Fire Department (NYCFD)-

EFI submitted a Fuel Tank Special Report Request Form for the Property to the NYCFD on December 21, 2012 for evidence indicating the presence of fuel oil tanks at the Property. A response has not been received from the NYCFD as of the release date of this report. Any pertinent information will be forwarded to the upon receipt. Please see Appendix F for a copy of the Tank Request Form.

New York City Department of Finance-

EFI reviewed assessment records on the New York City Department of Finance website. The Property is known as 1102-1122 Myrtle Avenue (Block 1586, Lots 12, 14, 24 and 27). The lots encompass a reported 32,501 square feet (0.74 acres) of land. The Property is occupied by a one-story supermarket with attached one-story warehouse and loading dock with a footprints of

195.67 feet by 100 feet and approximately 40 feet by 50 feet, respectively. The Property owner is listed as Spenceran Inc. No additional information of interest was listed.

New York City Department of Health-

A review of pertinent information was conducted at the New York City Environmental Health Department's website. One active "work without a permit" violation related to the demolition of 1122 Myrtle Avenue is listed in February of 1992. No additional environmental control board (ECB) violations were identified for the Property.

In addition, EFI submitted a Freedom of Information Letter (FOIL) for the Property to the New York City Department of Health and Mental Hygiene-Bureau of Environmental Health Services on December 23, 2012 for information pertaining to hazardous substances, USTs, releases, inspection records, asbestos, mold and LBP violations, etc. A response has not been received from this agency as of the release date of this report. Any pertinent information will be forwarded to the Client upon receipt. Please see Appendix F for a copy of the FOIL request.

4.5 Data Failure

Based on the definition presented in ASTM E1527-05, data failure occurs when all of the standard historical sources that are reasonably-ascertainable and likely to be useful have been reviewed and the historical use of the Property has not been documented back to the Property's first developed use, or 1940 whichever is earlier. When data failure occurs, ASTM E 1527-05 requires the Environmental Professional to document the data failure and assess the potential impact on the ability of the Environmental Professional to identify recognized environmental conditions.

The following data failures have been identified:

- EFI was not able to document the historical use of the Property prior to 1887. This data failure is not considered critical and does not change the conclusions of this report, as the 1887 Sanborn map revealed the Property to be utilized for primarily residential and commercial storefront purposes. In addition, the adjacent and surrounding areas are shown as a mixture of commercial occupancy and undeveloped land.
- Gaps of greater than five-year intervals in the historical record were noted by EFI. However, because the Property occupants were consistent for the majority of these intervals, this data failure is not considered a significant concern.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance was conducted on December 20, 2012 by Christopher Reiss, Field Professional with EFI, accompanied by Mr. John Park, Food Bazaar Manager. The weather was partly cloudy an approximate temperature of 35 degrees Fahrenheit. The visual reconnaissance consisted of observing the boundaries of the Property and systematically traversing the Property to provide an overlapping field of view, wherever possible. The periphery of the on-site structure was observed along with interior accessible common, storage, maintenance, mechanical and warehouse areas of the supermarket. Photographs of pertinent site features identified during the site reconnaissance are included in Appendix A.

5.2 General Site Setting

5.2.1 Site Description

The Property consists of approximately 0.74 acres and is developed with an approximately 21,000 square-foot commercial building occupied by a Food Bazaar Supermarket. The ground surface at the Property is relatively flat with engineered slopes to facilitate site drainage. Ground cover consists primarily of the building footprint and concrete and asphalt-paved parking and loading dock areas. The Property can be accessed from the south side of Myrtle Avenue or from an unpaved vacant lot on the rear (southern) side of the building.

5.2.2 Exterior Observations

The building is single-story, slab-on-grade construction. The building is finished on the exterior with brick masonry and stucco. Asphalt-paved parking areas are located on the eastern side of the building, with an attached warehouse and loading dock present off the western side.

5.2.3 Interior Observations

The building finishing materials included sheetrock, 2'x 4' ceiling tiles, fiberglass-reinforced plastic, unpainted concrete, and ceramic and vinyl floor tiles. No evidence of trench drains, pits, significant staining or bulk chemical storage was observed inside the building.

5.2.4 Potable Water

The Property is connected to the municipal water supply provided by the City of New York. The source of the water is from a variety of regional surface resources.

5.3 Site Visit Findings

5.3.1 Hazardous Substances

EFI found evidence of hazardous substances in the form of small quantities of motor/lubricating oils located in the rooftop compressor room during the inspection of the Property.

Summary

Material	Quantity	Use	Comments
Motor/Lubricating Oils	Less than 10 gallons	Compressor Maintenance	The materials appeared to be properly managed and maintained at the time of the site inspection. No evidence of significant fluid release or spillage was identified.

5.3.2 Petroleum Products

Petroleum products were identified on the Property during the site reconnaissance. A summary of the materials, quantities, and use is provided below.

Summary

Material	Quantity	Use	Comments
Motor/Lubricating Oils	Less than 10 gallons	Compressor Maintenance	The materials appeared to be properly managed and maintained at the time of the site inspection. No evidence of significant fluid release or spillage was identified.

5.3.3 Underground Storage Tanks (USTs)

No evidence of USTs was observed at the Property during the site reconnaissance. However, a review of Sanborn maps has identified a 1,000-gallon gasoline UST which was operated at the Property from at least 1935 to at least 1965. The tank was identified near the northeast corner of the former parking garage (current supermarket building), adjacent to western side of a former boiler room. No evidence of the removal or prior investigation of this unregulated storage tank has been identified to date.

5.3.4 Aboveground Storage Tanks (ASTs)

No evidence of ASTs was observed at the Property during the site reconnaissance.

5.3.5 Subsurface Equipment

The presence of subsurface equipment such as sump pumps, septic systems or elevators was not observed at the time of the reconnaissance.

5.3.6 Other Suspect Containers

No evidence of other suspect containers was observed on the Property during the site reconnaissance.

5.3.7 Polychlorinated Biphenyl Compounds (PCBs)

Electrical transformers and certain equipment that contains hydraulic fluids are a potential source of environmental concern due to the potential presence of polychlorinated biphenyl (PCB) containing cooling oils used in some units.

Con Edison transformer vaults and manholes were noted in the sidewalk areas along Myrtle Avenue. As Con Edison would be responsible for cleanup and disposal in the event of a leak or release, the presence of the utility-owned transformers are not considered an REC to the Property.

A hydraulic trash compactor and cardboard baler were noted in the loading dock area on the western side of the building. No evidence of the release or spillage of hydraulic fluids was noted in locations proximal to the compactor or baler. Based on the anticipated age of the units (relatively new), PCB-containing fluids are not anticipated to exist within the units.

5.3.8 Interior Staining/Corrosion

No interior staining or corrosion was observed in the building during the site reconnaissance.

5.3.9 Discharge Features

Floor drains and storm drains were observed at the Property. Other discharge features (oil/water separators, etc.) were not observed at the Property. Details regarding the observations are provided below.

Summary

Feature Identified	Location	Discharge Points	Details
Floor drain(s)	Meat Department	Sanitary sewer	No evidence of the improper disposal of hazardous materials such as staining or corrosion was observed around or in close proximity to the identified floor drains.
Other	Loading Dock Area	Sanitary sewer	Storm drains were noted adjacent to the loading dock on the western side of the building. No evidence of hazardous material disposal such as staining or corrosion was observed around or in close proximity to the identified storm drains.

5.3.10 Pits, Ponds, and Lagoons

Pits, ponds or lagoons were not observed on the Property during the site reconnaissance.

5.3.11 Solid Waste Dumping/Landfills

Readily apparent evidence of solid waste dumping, suspect fill material, or landfills was not identified on the Property during the site reconnaissance.

5.3.12 Stained Soil/Stressed Vegetation

Stained soil or stressed vegetation was not observed on the Property during the site reconnaissance.

5.3.13 Wells

Evidence of water supply or groundwater monitoring wells was not observed on the Property during the site reconnaissance.

5.3.14 Additional Hazardous Observations

During the site reconnaissance, EFI did not observe evidence of additional hazards at the Property. No additional hazards were reported by those interviewed during the site visit. Additionally, EFI did not note any unusual odors indicative of hazardous substances.

6.0 INTERVIEWS

6.1 Interview with Owner

A representative from property ownership was not available for interview as part of this assessment.

6.2 Interview with Site Manager

EFI provided an environmental property questionnaire to property management requesting information about the Property, past and current operations, historical uses and any known environmental concerns including asbestos-containing material, lead-based paint, underground storage tanks, aboveground storage tanks, poly-chlorinated biphenyls, and spills or releases of hazardous materials. A completed copy of the questionnaire was not returned to EFI. Please see Appendix F for a blank copy of the questionnaire.

According to Store Manager Mr. John Park, who has been familiar with the Property for the last six months, the Property has historically been utilized for commercial purposes. Mr. Park was not aware of any USTs, ASTs, releases or spills associated with the Property. Additionally, Mr. Park informed EFI that no environmental violations or liens were known to exist in association with the Property. He further noted he was unaware of any prior environmental assessment or other reports for the Property.

6.3 Interviews with Site Occupants

For the purposes of this assessment, the site manager and site occupant are one and the same. Details associated with the site manager are interview are presented above.

6.4 Interviews with Local Government Officials

Please see Section 4.4.8 and 4.4.9 for information obtained from interviews with local government officials / agencies.

6.5 Interviews with Others

No additional individuals, agencies, and/or sources were interviewed during the course of this assessment.

7.0 OTHER ENVIRONMENTAL CONDITIONS

7.1 Asbestos-Containing Materials

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for asbestos-containing material (ACM) was evaluated based the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide on Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). The Green Book was used as a guide in identifying suspect materials while the definition of suspect ACM and presumed asbestos-containing material is taken from 29 CFR Parts 1910, et al. Occupational Exposure to Asbestos; Final Rule. OSHA considers building materials (and specifically friable surfacing material and thermal system insulation) installed prior to 1981, presumed to be asbestos containing until tested by laboratory analysis to prove otherwise.

Based on the circa 1920 date of construction, building materials may contain asbestos. According to the EPA, while suspect or ACM may be managed in place under an operations and maintenance program (O&M), sampling would be required to document the presence or absence of asbestos-containing material. A summary of suspect or presumed ACM is provided below.

Summary

Material	Location	Estimated Quantity	Friable	Physical Condition	Action
Drywall and Joint Compound	Throughout	Not Quantified	No	Good	O&M Plan
Ceiling Tiles	Retail Areas	15,000 sq ft	No	Good to Fair	O&M Plan
Vinyl Floor Tiles	Retail Areas	15,000 sq ft	No	Good to Fair	O&M Plan
Grouts, Caulking, Mastics and Adhesives	Throughout	Not Quantified	No	Good	O&M Plan
Roofing Materials	Rooftop	21,000 sq ft	No	Good	O&M Plan

7.2 Lead-Based Paint

Many buildings constructed before 1978 have paint that contains lead. Due to the circa 1920 construction date (pre-1978), lead-based paint may be present. All painted surfaces were observed to be in good to fair condition with no chalking, peeling, or flaking. Since the Property is not used for residential purposes, lead-based paint is not considered to be a significant concern.

7.3 Radon

Radon gas is a product of the decay series that begins with uranium. Radon is produced directly from radium, which can be commonly found in bedrock that contains black shale and/or granite. Radon gas can migrate through the ground and enter buildings through porous concrete or fractures. Radon tends to accumulate in poorly ventilated basements. Long-term exposure to radon has been associated with lung cancer.

To satisfy the requirements of the Client, an evaluation of radon potential was performed utilizing the research results available from the USEPA. The USEPA has designated three zones depending on radon potential. Zone 1 is an area with the average predicted indoor radon concentration in residential dwellings exceeding the EPA action limit of 4.0 picoCuries per Liter (pCi/L). Zone 2 are areas with average predicted indoor radon concentration of 2.0 - 4.0 pCi/L and Zone 3 are those areas with an average predicted indoor radon concentration in residential dwellings below 2.0 pCi/L.

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location.

Review of the USEPA Map of Radon Zones places the Property in Zone 2. Based on the zone classification and the current non-residential use of the Property, radon is not considered to be a significant concern. No additional action is warranted at this time.

7.4 Microbial Contamination (Mold)

In accordance with the scope of work, the site reconnaissance is to include a visual inspection for indications of water intrusions or the presence of active mold growth on readily accessible interior and exterior surfaces. Confirmation sampling was not included in the scope of work for the ESA. Readily accessible areas of the building were observed for visual or olfactory indications of mold and for areas of water damage.

No evidence of mold growth or suspect moisture intrusion was identified.

7.5 Lead in Drinking Water

The Property receives its drinking water from the City of New York. According to the annual water quality report, the water is tested before it enters the distribution system. The water supplied to the Property meets federal and state drinking water standards, including those for lead and copper.

8.0 CONCLUSIONS AND RECOMMENDATIONS

8.1 Findings and Opinions

8.1.1 On-Site Recognized Environmental Conditions

The following on-site Recognized Environmental Conditions were identified during the course of this assessment:

- A 1,000-gallon gasoline UST was utilized at the Property between the approximate years of 1947 and 1968. The tank was situated in the northeast portion of the former parking garage building located at 1102-1114 Myrtle Avenue. As no records related to the removal or investigation of this UST have been identified to date, the potential presence of an unregulated UST is considered a REC relative to the Property.
- The Property has been historically utilized for a variety of commercial and light industrial uses dating back to approximately 1921. Prior historic uses of environmental concern have included a furniture manufacturer from at least 1947 to 1968 (1098-1100 Myrtle), auto repair facility in 1934 and from at least 1977 to approximately 1980 (1102 Myrtle), and furniture manufacturer from at least 1947 to approximately 1980 (1116-1120 Myrtle). Based on the potential for adverse environmental impacts to the Property subsurface as the result of the former on-site activities, the historic use and occupancy of the Property has been identified as a REC.

8.1.2 Off-Site Recognized Environmental Conditions

No off-site Recognized Environmental Conditions were identified that were considered likely to impact the Property.

8.1.3 Historical Recognized Environmental Conditions

Historical Recognized Environmental Conditions are environmental conditions which in the past would have been considered a Recognized Environmental Condition, but which may or may not be considered a Recognized Environmental Condition currently based on the current threat or regulatory status of the concern.

No Historical Recognized Environmental Conditions (HRECs) were identified during the course of this assessment.

8.1.4 De Minimis Environmental Conditions

De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

No *de minimis* environmental conditions were identified in connection with the Property during completion of this assessment.

8.1.5 Other Environmental Considerations (Non-ASTM Scope Considerations)

This assessment also included other environmental considerations identified at Section 7.0. The following related Issues of Concern were identified:

- Asbestos- Suspect ACMs were observed in the building in the form of non-friable drywall and joint compound, non-friable ceiling tiles, non-friable vinyl floor tiles, non-friable

grouts, mastics, and caulking and non-friable roofing materials. The aforementioned building components were noted to be in overall good condition with low potential for disturbance.

8.2 Conclusions

EFI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of 1102-1122 Myrtle Avenue, Brooklyn, NY. Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the Property, except for the following:

- A 1,000-gallon gasoline UST was utilized at the Property between the approximate years of 1947 and 1968. The tank was situated in the northeast portion of the former parking garage building located at 1102-1114 Myrtle Avenue. As no records related to the removal or investigation of this UST have been identified to date, the potential presence of an unregulated UST is considered a REC relative to the Property.
- The Property has been historically utilized for a variety of commercial and light industrial uses dating back to approximately 1921. Prior historic uses of environmental concern have included a furniture manufacturer from at least 1947 to 1968 (1098-1100 Myrtle), auto repair facility in 1934 and from at least 1977 to approximately 1980 (1102 Myrtle), and furniture manufacturer from at least 1947 to approximately 1980 (1116-1120 Myrtle). Based on the potential for adverse environmental impacts to the Property subsurface as the result of the former on-site activities, the historic use and occupancy of the Property has been identified as a REC.

EFI's assessment included additional services to evaluate asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands and mold. This assessment has revealed no evidence of related conditions of concern in connection with the Property, except for the following:

- Suspect asbestos-containing building materials were observed in the building in the form of non-friable drywall and joint compound, non-friable ceiling tiles, non-friable vinyl floor tiles, non-friable grouts, mastics, and caulking and non-friable roofing materials. The aforementioned building components were noted to be in overall good condition with low potential for disturbance.

8.3 Recommendations

As a result of this assessment, EFI recommends the following:

- UST - EFI recommends a Phase II Limited Subsurface Investigation be performed to determine if the subsurface of the Property has been impacted by the former operation of a 1,000-gallon gasoline UST.
- Historic Property Use - EFI recommends a Phase II Limited Subsurface Investigation be performed to determine if the subsurface of the Property has been impacted by the historic use of the Property for furniture manufacturing and auto repair.
- Asbestos - Given the condition of the identified and suspect ACM, EFI is of the opinion that these materials can be effectively managed as part of an asbestos Operations and Maintenance (O&M) Plan until such time as renovation or demolition activities necessitate their removal. The objective of an O&M Plan is to implement a practical management approach to controlling identified ACM within the Property. The O&M Plan

is designed to cleanup existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed.

10.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

As required by 40 CFR 312.21(d), the report shall include the following statements of the environmental professional(s) responsible for conducting the Phase I Environmental Site Assessment and preparation of the report.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312; and, we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

11.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

11.1 Definition of an Environmental Professional

An Environmental Professional means: (1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f). (2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience. (3) An environmental professional should remain current in his or her field through Participation in continuing education or other activities. (4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as Part of the inquiry identified in §312.21(b). (5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this Part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

11.2 Relevant Experience

Relevant experience, as used in the definition of environmental professional in this Section, means: Participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the Property.

Resumes for the Environmental Professionals involved in this project are included in Appendix G.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

Interview Records

Record of Communication

Name: Mr. John Park

Affiliation: Site Manager

Telephone #: (718) 919-0197

Conversation Date: 12/20/2012

RE: Environmental Concerns / Historical Knowledge

Comments: According to Store Manager Mr. John Park, who has been familiar with the Property for the last six months, the Property has historically been utilized for commercial purposes. Mr. Park was not aware of any USTs, ASTs, releases or spills associated with the Property.

Mr. Park informed EFI that no environmental violations or liens were known to exist in association with the site. He further noted he was unaware of any prior environmental assessment or other reports for the Property.

2 Sales & Values Maps

1 Exemptions and Tax Abatements

Both the City and State of New York offer property tax reductions through exemptions and abatements for residential property, commercial constructions, and properties used by governmental, industrial, and not-for-profit organizations. Exemptions provide tax relief by reducing a property's assessed value, and abatements reduce taxes by applying credits to the amount of tax due. The information in this section presents a summary of the granted amounts and other related values of the benefit programs. This data comes from NYC Department of Housing Preservation and Development (HPD) and the Department of Finance, departments which administer the [J-51 Program](#) and the [421a Program](#).

2 Tentative Values

Every year in January, the NYC Department of Finance Commissioner publishes the tentative property assessment roll for the current fiscal year. All properties are valued by law according to their condition on the taxable status date of January 5th. Owners who believe that the Department of Finance has used incorrect information to determine their market value may [file forms](#) providing corrections. After Finance verifies the complaints, the agency will make any corrections before the final assessment roll is published on May 25. The final roll will also include changes, based on the decisions made by the New York City Tax Commission, an independent City agency, as well as new information Finance gathers about abatements, exemptions and other adjustments. In June, Finance will use the final roll and new tax rates adopted by the City Council to generate property tax bills for the fiscal year beginning July 1st.

Tentative Transitional Values

Tentative transitional land	\$88,200
Tentative transitional total	\$889,470
Tentative exempt land	\$0
Tentative exempt total	\$0

Tentative Actual Values

Tentative actual land	\$88,200
Tentative actual total	\$958,950
Tentative actual exempt land	\$0
Tentative actual exempt total	\$0

3 Property Tax

The following values are from the latest assessment roll and give information about the fiscal years **2011/2012** and **2012/2013**. The City's fiscal year runs from July 1 to June 30.

Market Value

The property tax assessment process starts when the city's assessors estimate a property's market value, based upon the available information. The assessors use three approaches to value the property: sales, cost, and income. The *market value* is generally defined as what the property would sell for in a competitive and open market.

		2011/2012		2012/2013
Land market value		\$196,000		\$196,000
Building market value	+	\$1,856,000	+	\$1,935,000
Market value	=	\$2,052,000	=	\$2,131,000

Assessed Value

Assessed value is a calculation of the property value for tax purposes. It usually represents a percentage of the market value and is subject to limits on annual increases. Sometimes the city will exempt part of the assessed value from taxation, as an incentive to make improvements to an existing structure or to build on a vacant lot. There are also several [tax reductions programs](#) for residential properties that may apply and may lower the property's tax bill.

		2011/2012		2012/2013
Land assessed value		\$88,200		\$88,200
Building assessed value	+	\$835,200	+	\$870,750
Assessed value	=	\$923,400	=	\$958,950
Exemptions granted by city	-	\$0	-	\$0
Net assessed value	=	\$923,400	=	\$958,950

Transitional Value

While the city's assessors have noted the rapid appreciation of property in New York City, the state understands that it would be burdensome for

property taxes to rise too fast. Therefore, increases in the *assessed value* are phased in over a number of years. This introduces the *transitional assessed value*, which is a limit on the portion of the assessed value introduced into the tax base. When the *assessed value* is phased in, sometimes the *exemptions* are as well.

		2011/2012		2012/2013
Transitional land value		\$88,200		\$88,200
Transitional building value	+	\$1,025,280	+	\$801,270
Transitional value	=	\$1,113,480	=	\$889,470
Transitional exemption value	-	\$0	-	\$0
Transitional net value	=	\$1,113,480	=	\$889,470

Taxable Value

The *taxable value*, for 2011/2012, is the smaller of the city's *net assessed value* and the *transitional net assessed value*.

Taxable value = \$923,400

Property Tax

Base tax is an estimate of what an owner **not** benefiting from tax exemptions would pay and is determined by multiplying the assessed value by the *tax rate*. *Current tax* is calculated by multiplying the taxable value by the tax rate.

For a very small number of properties owner-related exemptions (for which we currently don't have information) apply, and so the values given below may be slightly different from the official ones. In addition to exemptions, the city also grants *tax abatements* to some properties. An *abatement* is simply a discount which is subtracted directly from the current tax. This results in the *property tax*, the amount the current owner pays.

Tax description	Assessed/taxable value 11/12	Tax rate 11/12	Tax amount 11/12
Base tax	\$923,400	* 10.1520%	= \$93,743.00
Current tax	\$923,400	* 10.1520%	= \$93,743.00
Total abatements			- \$0.00
Property tax			= \$93,743.57

Tax description	Assessed/taxable value 12/13	Tax rate 11/12	Tax amount 12/13
Base tax	\$889,470	* 10.1520%	= \$90,298.99
Current tax	\$889,470	* 10.1520%	= \$90,298.99
Total abatements			- \$0.00
Property tax			= \$90,298.99

Description: Repair existing decayed pipes in the fl. slab. repair existing floor drains. install one new floor drain in meat cutting area. install a new sink by the wall near storage area. there is no change of egress or occupancy, or use

Please note: the NYC Department of Buildings is the only authoritative source for information on building permits. Please consult the Building Information System on the [DOB web site](#).

4 DOB Actions

No records found.

For more information please consult the [DOB web site](#).

1 Housing Preservation and Development Violations

When excessive violations are present, this can adversely affect the support given by The NYC Department of Housing Preservation and Development (HPD). These violations can result in building-wide inspections, fees, and the requirement of extensive repair work to correct underlying conditions. In some cases, outstanding violations may result in a lien being placed on the property. It is also substantially more difficult to mortgage a building with extensive violations.

HPD Violations

On this color-coded map, view all properties with open violations that have been left uncorrected.

Legend

- Uncorrected Violation(s)
- Total number of violations

* Sorry, for this property we don't have any information about open violations.

Description of the Classes

Sorry, no records were found!

Please note: the NYC HPD is the only authoritative source for information on housing violations. Please consult the [HPD web site](#) for up-to-date violations.

PropertyShark obtains its records from HPD and updates them monthly.

2 ECB Violations

There are eleven city agencies that administer the City's quality-of-life laws and issue Notices of Violation (NOVs) for alleged violations. The ECB is a separate and independent agency that hears challenges to those NOVs. The agencies that issue the most violations for real estate are:

- Department of Buildings (DOB)
- Department of Environmental Protection (DEP)
- Fire Department
- Landmarks Preservation Commission (LPC)
- Department of Sanitation

PropertyShark obtains its ECB NOV records from the DOB and updates them nightly. Records go back to 1988

No records found.

For more information about the ECB and the types of NOVs that it handles, visit its [home page](#) or this page with a [list of rules, laws and agencies](#).

1 Exemptions and Tax Abatements

Both the City and State of New York offer property tax reductions through exemptions and abatements for residential property, commercial constructions, and properties used by governmental, industrial, and not-for-profit organizations. Exemptions provide tax relief by reducing a property's assessed value, and abatements reduce taxes by applying credits to the amount of tax due. The information in this section presents a summary of the granted amounts and other related values of the benefit programs. This data comes from NYC Department of Housing Preservation and Development (HPD) and the Department of Finance, departments which administer the [J-51 Program](#) and the [421a Program](#).

2 Tentative Values

Every year in January, the NYC Department of Finance Commissioner publishes the tentative property assessment roll for the current fiscal year. All properties are valued by law according to their condition on the taxable status date of January 5th. Owners who believe that the Department of Finance has used incorrect information to determine their market value may [file forms](#) providing corrections. After Finance verifies the complaints, the agency will make any corrections before the final assessment roll is published on May 25. The final roll will also include changes, based on the decisions made by the New York City Tax Commission, an independent City agency, as well as new information Finance gathers about abatements, exemptions and other adjustments. In June, Finance will use the final roll and new tax rates adopted by the City Council to generate property tax bills for the fiscal year beginning July 1st.

Tentative Transitional Values		Tentative Actual Values	
Tentative transitional land	\$64,270	Tentative actual land	\$72,900
Tentative transitional total	\$64,270	Tentative actual total	\$72,900
Tentative exempt land	\$0	Tentative actual exempt land	\$0
Tentative exempt total	\$0	Tentative actual exempt total	\$0

3 Property Tax

The following values are from the latest assessment roll and give information about the fiscal years **2011/2012** and **2012/2013**. The City's fiscal year runs from July 1 to June 30.

Market Value

The property tax assessment process starts when the city's assessors estimate a property's market value, based upon the available information. The assessors use three approaches to value the property: sales, cost, and income. The *market value* is generally defined as what the property would sell for in a competitive and open market.

		2011/2012		2012/2013
Land market value		\$157,000		\$162,000
Building market value	+	\$0	+	\$0
Market value	=	\$157,000	=	\$162,000

Assessed Value

Assessed value is a calculation of the property value for tax purposes. It usually represents a percentage of the market value and is subject to limits on annual increases. Sometimes the city will exempt part of the assessed value from taxation, as an incentive to make improvements to an existing structure or to build on a vacant lot. There are also several [tax reductions programs](#) for residential properties that may apply and may lower the property's tax bill.

		2011/2012		2012/2013
Land assessed value		\$70,650		\$72,900
Building assessed value	+	\$0	+	\$0
Assessed value	=	\$70,650	=	\$72,900
Exemptions granted by city	-	\$0	-	\$0
Net assessed value	=	\$70,650	=	\$72,900

Transitional Value

While the city's assessors have noted the rapid appreciation of property in New York City, the state understands that it would be burdensome for property taxes to rise too fast. Therefore, increases in the *assessed value* are phased in over a number of years. This introduces the *transitional assessed value*, which is a limit on the portion of the assessed value introduced into the tax base. When the *assessed value* is phased in, sometimes the *exemptions* are as well.

		2011/2012		2012/2013
Transitional land value		\$56,747		\$64,270
Transitional value	=	\$56,747	=	\$64,270
Transitional exemption value	-	\$0	-	\$0
Transitional net value	=	\$56,747	=	\$64,270

Taxable Value

The *taxable value*, for 2011/2012, is the smaller of the city's *net assessed value* and the *transitional net assessed value*.

Taxable value = \$56,747

Property Tax

Base tax is an estimate of what an owner **not** benefiting from tax exemptions would pay and is determined by multiplying the assessed value by the *tax rate*. *Current tax* is calculated by multiplying the taxable value by the tax rate.

For a very small number of properties owner-related exemptions (for which we currently don't have information) apply, and so the values given below may be slightly different from the official ones. In addition to exemptions, the city also grants *tax abatements* to some properties. An *abatement* is simply a discount which is subtracted directly from the current tax. This results in the *property tax*, the amount the current owner pays.

Tax description	Assessed/taxable value 11/12	Tax rate 11/12	Tax amount 11/12
Base tax	\$56,747	* 10.1520%	= \$5,760.00
Current tax	\$56,747	* 10.1520%	= \$5,760.00
Total abatements			- \$0.00
Property tax			= \$5,760.96

Tax description	Assessed/taxable value 12/13	Tax rate 11/12	Tax amount 12/13
Base tax	\$64,270	* 10.1520%	= \$6,524.69
Current tax	\$64,270	* 10.1520%	= \$6,524.69
Total abatements			- \$0.00
Property tax			= \$6,524.69

For more information please visit New York City's [property tax section](#). Also, you can view this property's assessment, tax bill and account statements [here](#).

3 Building Permits

No records found.

1 Housing Preservation and Development Violations

When excessive violations are present, this can adversely affect the support given by The NYC Department of Housing Preservation and Development (HPD). These violations can result in building-wide inspections, fees, and the requirement of extensive repair work to correct underlying conditions. In some cases, outstanding violations may result in a lien being placed on the property. It is also substantially more difficult to mortgage a building with extensive violations.

HPD Violations

On this color-coded map, view all properties with open violations that have been left uncorrected.

Legend

- Uncorrected Violation(s)
- 25 Total number of violations

Open A class violations: **0**
 Open B class violations: **0**
 Open C class violations: **0**
 Open I class violations: **0**

Number of units: **0**

* Sorry, for this property we don't have any information about open violations.

Description of the Classes

Sorry, no records were found!

Please note: the NYC HPD is the only authoritative source for information on housing violations. Please consult the [HPD web site](#) for up-to-date violations.

PropertyShark obtains its records from HPD and updates them monthly.

2 ECB Violations

There are eleven city agencies that administer the City's quality-of-life laws and issue Notices of Violation (NOVs) for alleged violations. The ECB is a separate and independent agency that hears challenges to those NOVs. The agencies that issue the most violations for real estate are:

- Department of Buildings (DOB)
- Department of Environmental Protection (DEP)
- Fire Department
- Landmarks Preservation Commission (LPC)
- Department of Sanitation

PropertyShark obtains its ECB NOV records from the DOB and updates them nightly. Records go back to 1988

No records found.

For more information about the ECB and the types of NOVs that it handles, visit its [home page](#) or this page with a [list of rules, laws and agencies](#).

NO CHANGE OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE COMMISSIONER OF BUILDINGS.

Unless an approval for the same has been obtained from the Commissioner of Building change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved to one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the stresses in the construction in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated; shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other persons in possession or control of the building, or any part thereof, from obtaining such permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the construction and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order of the fire commissioner with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the tenement house commissioner unless it is also approved and endorsed by him; and it must be replaced by a full certificate at the date of its expiration.

Examined by

Thomas H. Madden

Ernest H. Thibodeau

David Chung
Bogopa Service Corp.
650 Fountain Avenue
Brooklyn, NY 11028

**Re: Phase II Limited Subsurface Investigation Report
AFS Market, Inc.
1102-1122 Myrtle Avenue
Brooklyn, New York 11206**

Dear Mr. Chung:

EFI Global, Inc. (EFI) is presenting the results from a Phase II Limited Subsurface Investigation (Phase II) performed at AFS Market, Inc. 1102-1122 Myrtle Avenue, Brooklyn, New York (Property). The investigation was performed to determine whether the historical use of the Property as an automotive garage and the presence of petroleum underground storage tanks (USTs) formerly in use onsite have negatively impacted the subsurface conditions at the Property. This Phase II was performed in accordance with EFI's proposal dated February 18, 2013. This report is intended for the sole use and benefit of Bogopa Service Corp. and may not be relied upon by any other party without the permission of EFI Global, Inc.

PURPOSE

The purpose of this investigation was to assess the current environmental status of the recognized environmental conditions (RECs) identified in a Phase I Environmental Site Assessment (ESA) that was recently completed at the Site. The information provided in this Phase II report describes the scope of work performed during the investigation and provides documentation of the factual findings of the investigation.

BACKGROUND INFORMATION

The Property is located at 1102-1122 Myrtle Avenue, approximately 150 feet west of the intersection with Myrtle Avenue and Broadway. The Property is comprised of four adjoining tax parcels comprising 0.74 acre of land and is improved with a one-story supermarket, paved parking, and loading dock areas. Based upon topographic map interpretation and site observations, the inferred direction of groundwater flow is to north and east toward English Kills located approximately 0.9 mile north-northeast of the Property.

A 1,000-gallon gasoline UST was utilized at the Property between the approximate years of 1947 and 1968. The tank was situated in the northeast portion of the former parking garage building located at 1102-1114 Myrtle Avenue. As no records related to the removal or investigation of this UST has been identified to date, the potential presence of an unregulated UST was considered a REC relative to the Property.

The Property has been historically utilized for a variety of commercial and light industrial uses dating back to approximately 1921. Prior historic uses of environmental concern have included a furniture manufacturer from at least 1947 to 1968 (1098-1100 Myrtle), auto repair facility in 1934 and from at least 1977 to approximately 1980 (1102 Myrtle), and furniture manufacturer from at least 1947 to approximately 1980 (1116-1120 Myrtle). Based on the potential for adverse environmental impacts to the Property subsurface as the result of the former on-site activities, the historic use and occupancy of the Property was identified as a REC. Figure 1 is a Topographic Map of the Site and surrounding area.

HEALTH AND SAFETY PLAN

EFI developed a Health and Safety Plan that was specific to the Site. The development of this plan is required by the Occupational Safety and Health Administration (OSHA) under Hazardous Waste Operations & Emergency Response 29 CFR 1910.120. The Health and Safety Plan was designed to reduce the risk of physical or chemical exposures that may affect on-site workers in the proposed work area. The Health and Safety Plan includes information about chemicals expected on the Site, health and safety procedures, and emergency response procedures. The Health and Safety Plan is on file at EFI's office.

UTILITY LOCATING

Prior to drilling or digging, a utility inspection was performed at the Site prior to the initiation of the subsurface investigation, as required by New York law. This utility clearance request consisted of notifying utility members to mark their underground utility locations. The ticket number is 13065140.

SUBSURFACE INVESTIGATION

Field Activities

Subsurface Investigation

The Phase II Limited Subsurface Investigation was conducted on March 15, 2013. Prior to initiating the field activities, it was determined that a New York City Street Opening Permit Type

0126 would be required to complete a soil boring within the public sidewalk area along Myrtle Avenue at the north side of the Property, which would also include full replacement of the damaged concrete sidewalk flag. Therefore, in order to expedite the field operations, no boring was advanced within the public sidewalk along Myrtle Avenue to the north of the Property. This is not anticipated to be critical at this time.

During the investigation, three soil borings (B-1, B-2, and B-3) were advanced within the eastern parking lot at the Property by Goldstar Environmental Services (Goldstar) with a tractor-mounted Geoprobe drilling rig. The boring locations are depicted in Figure 2.

Boring B-1 was advanced to a terminal depth of 15.75 feet below grade level (BGL), where refusal in the form of an apparent rock outcrop was encountered prior to reaching the shallow groundwater table.

Boring B-2 was advanced to a terminal depth of 9.5 feet BGL, where refusal in the form of an apparent rock outcrop was encountered prior to reaching the shallow groundwater table. Based on visual observations, it appeared the location of B-2 would be at the down-gradient position at the Property. It should be noted that numerous additional attempts were made to advance a boring near the area around B-2 (northeast corner of the building), however refusal was encountered at these locations at depths ranging from 1 to 3 feet BGL. In addition, Goldstar attempted to advance an additional boring further to the east within the down-gradient southern side of the asphalt parking lot. However, refusal was encountered at approximately 3 feet BGL. Due to constraints regarding traffic entering and exiting the parking lot, no other borings could be attempted within the parking lot between the building and this additional boring location.

Boring B-3 was advanced to a terminal depth of 18 feet BGL, where refusal in the form of an apparent rock outcrop was encountered. The shallow groundwater table was encountered in B-3 at approximately 14 feet BGL.

Soil Sampling

Soil samples were continuously collected from borings B-1, B-2, and B-3 with a four-foot long stainless-steel macro core and disposable acetate sleeves to the respective terminal depths. The soil samples collected from each boring were field screened with a photo-ionization detector (PID) to determine if volatile organic vapors were present. There were no field screening readings detected in any of the soil samples, and no visual or olfactory evidence of impacted soil was identified. At borings B-1 and B-2, soil samples for laboratory analysis were collected from the boring termini at 14.75 to 15.75 feet BGL and 8.5 to 9.5 feet BGL, respectively. At boring B-3, no volatile organic vapors were detected with the PID, and no visual or olfactory evidence of impacted soils were identified. Therefore, a soil sample for laboratory

analysis was collected from boring B-8 at the apparent interval at the capillary fringe (i.e. vadose and groundwater interface) at 13 to 14 feet BGL. The soil samples collected for laboratory analysis were labeled B-1, B-2, and B-3, respectively.

Soil encountered at the Site consisted mainly of brown clay with varying degrees of sand and gravel. The soil boring logs are presented in Appendix I.

Ground Water Sampling

Ground water was encountered only in boring B-3, at approximately 14 feet BGL. Temporary ground water monitoring well TW-1 was installed in boring B-3 in order to collect a ground water sample for chemical analysis. The temporary well was constructed of one-inch diameter schedule 40 poly-vinyl chloride (PVC) well screen and riser pipe. A peristaltic pump attached to disposable plastic tubing was utilized to remove the ground water sample. The ground water sample was labeled TW-1.

The borings were abandoned in accordance with New York regulations following the collection of the soil and ground water samples.

Laboratory Analytical Results

The soil and ground water samples were transported under chain of custody to Pace Analytical Services, Inc. (Pace), Schenectady, New York, a New York Department of Environmental Conservation (NYSDEC) certified laboratory. Soil samples B-1, B-2, and B-3, and groundwater sample TW-1, were analyzed for volatile organic compounds (VOCs) by EPA Method 8260 and for semi-volatile organic compounds (SVOCs) by EPA Method 8270.

According to the laboratory analytical report, several SVOCs were detected in groundwater sample TW-1 above the applicable NYSDEC Technical Operation & Guidance Series (TOGS) groundwater regulatory criteria. Specifically, benzo(a)pyrene was detected at 6.68 micrograms per liter (ug/l), exceeding the applicable TOGS criteria of equal to the laboratory method detection limit (MDL). Benzo(b)fluoranthene was detected at 9.22 ug/l, exceeding the applicable TOGS criteria of 0.002 ug/l.

Acetone, fluoranthene, and pyrene were detected in the ground water sample, however the concentrations of these contaminants do not exceed the applicable TOGS criteria. No other contaminants were detected in the ground water sample.

According to the laboratory analytical report, acetone was detected in soil sample B-3 at 0.0136 milligrams per kilogram (mg/kg). This concentration exceeds the most stringent applicable

NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCOs) of 0.05 mg/kg, however acetone is a common laboratory artifact, and it is suspected that the acetone that was detected in this sample is due to laboratory contamination. Therefore, no further evaluation of acetone impact to the subsurface at the Property is warranted at this time. No other VOCs and no SVOCs were detected in soil sample B-3 above the applicable UUSCOs. However, it should be noted that benzene, 2-butanone, and 10 SVOCs were detected in soil sample B-3 at concentrations less than the UUSCO. The concentrations of two of SVOCs, benzo(a)pyrene (0.487 mg/kg) and benzo(b)fluoranthene (0.659 mg/kg), are slightly below the UUSCO and RUSCO of 1 mg/kg for these contaminants. No contaminants were detected in soil samples B-1 and B-2.

The soil analytical results are summarized in Table 1. The ground water analytical results are summarized in Table 2. The laboratory analytical report and chain-of-custody forms are included as Appendix II.

RELIANCE

The use of and reliance on this report are strictly limited. This report is the intellectual property of EFI, protected by copyright law and other laws, and has been prepared solely for the use and benefit of Bogopa Service Corp. Unless authorized in writing by EFI, reliance on or use (collectively, "Use") of this report by additional parties is strictly prohibited and shall be at the sole risk of the user, without rights of recourse or recovery from or against EFI. Any such unauthorized user shall be responsible to protect, indemnify and hold EFI, Bogopa Service Corp. and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. The unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

FINDINGS AND CONCLUSIONS

The following conclusions are based on the results of a Phase II limited subsurface investigation performed at AFS Market, Inc., 1102-1122 Myrtle Avenue, Brooklyn, New York in accordance with EFI's proposal dated February 18, 2013. This investigation was intended to assess the potential for the historical presence of a 1,000-gallon gasoline UST and the use of the Site as an automotive repair facility and furniture manufacturing facility to have negatively impacted the subsurface conditions at the Property, as identified in the Phase I ESA. It was not intended to satisfy the level of inquiry that may be necessary to support remedial solutions or determine migration pathways related to a release from the RECs. This report was prepared for Bogopa Service Corp. in accordance with an approved agreement governing the nature, scope, extent and purpose of the work as well as other matters critical to the engagement.

The sampling conducted during this investigation indicates that there does appear to have been an impact to the subsurface at concentrations exceeding state standards as a result of the historical uses of the Site. EFI recommends that the Site apply to be entered voluntarily into the NYSDEC Brownfield Cleanup Program under 6 NYCRR Part 375 Subpart 375-3, and that further subsurface investigations be completed at the Site, primarily to address the concentrations of the SVOCs identified in the soil and ground water samples collected. The scope of work should include, but may not be limited to, further horizontal and vertical delineation of impacted soil, and the installation of at least three permanent ground water monitoring wells at the Site to determine groundwater flow direction and for the collection and laboratory analysis of ground water samples.

Sincerely,

EFI GLOBAL, INC.

RE: Project: AFS Market 94705-04869.1
Pace Project No.: 92151458

Dear Mr. Burkart:

Enclosed are the analytical results for sample(s) received by the laboratory on March 16, 2013. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

Analyses were performed at the Pace Analytical Services location indicated on the sample analyte page for analysis unless otherwise footnoted.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Tabitha M Dacal for
Kevin Herring
kevin.herring@pacelabs.com

CASE NARRATIVE

March 25, 2013

CASE NARRATIVE

This data package (SDG ID: 13030160) consists of 1 water sample and 3 soil samples received on 3/16/2013. The samples are from Project Name: EFI - AFS Market.

This sample delivery group consists of the following samples:

<u>Lab Sample ID</u>	<u>Client ID</u>	<u>Collection Date</u>
AQ03584	B-1	3/15/2013 09:15
AQ03585	B-2	3/15/2013 09:45
AQ03586	B-3	3/15/2013 10:35
AQ03587	TW-1	3/15/2013 11:30

Sample Delivery and Receipt Conditions

- (1.) All samples were delivered to the laboratory via FEDEX delivery service on 3/16/2013.
- (2.) All samples were received at the laboratory intact and within holding times.
- (3.) The following pH measurements of VOA vials were recorded using pH strips: AQ03587 pH=2.
- (4.) The following cooler temperature was recorded at sample receipt (Control limits are between 0-6 Degrees Celsius): 5.1 (IR) degrees Celsius. Please see Chain of Custody for details.

Volatile Organics Analysis (liquid)

Analysis for Volatile Organics was performed by method SW-846 8260B. There were no technical or administrative items noted for the analysis.

Volatile Organics Analysis (Solid)

Analysis for Volatile Organics was performed by method SW-846 8260B. The following technical and administrative items were noted for the analysis:

- (1.) Samples for Volatile Organic Analysis were collected in accordance with Method 5035/5035A in Terra Core (or Encore) containers.
- (2.) Vinyl acetate and 2-chloroethylvinylether recovered below LCS QC limits for AQ03427L. Low bias may be indicated for samples: AQ03584, AQ03585, and AQ03586. Please see associated certificated for details.
- (3.) 1,2-dichloroethane-d4 recovered above surrogate QC limits for sample AQ03585. Alternate surrogates were within limits.

Semivolatile Organics Analysis (liquid)

Analysis for Semivolatile Organics was performed by method SW-846 8270C. Samples were extracted by Continuous Liquid/Liquid Extraction (EPA - Method 3520C). The following technical and administrative items were noted for the analysis:

- (1.) 2-Fluorobiphenyl was recovered above established surrogate QC limits for sample AQ03587. Alternate surrogates were within limits.
- (2.) Benzo(a)anthracene was recovered above established LCS QC limits. Sample is ND for that analyte. No bias indicated.

Semivolatile Organics Analysis (solid)

Analysis for Semivolatile Organics was performed by method SW-846 8270C. Samples were extracted by Accelerated Solvent Extraction (EPA Method 3545). The following technical and administrative items were noted for the analysis:

- (1.) 2-Fluorobiphenyl was recovered above established surrogate QC limits in the method blank. Please see associated certificates for details.
- (2.) Benzo(a)anthracene was recovered above established LCS QC limits. May indicate high bias recovery for Benzo(a)anthracene in sample AQ03586.

% Moisture

Analysis for % Moisture was performed by EPA Method SW-846 3545 Sec. 7.2.1. There were no technical or administrative items noted for the analysis.

Respectfully submitted,

Carrie Minner
Project Manager

QUALIFIERS

Organic Laboratory Qualifiers Defined

B - Denotes analyte observed in associated method blank or extraction blank. Analyte concentration should be considered as estimated.

D - Surrogate was diluted out. The analysis of the sample required a dilution such that the surrogate concentration was diluted below the laboratory acceptance criteria.

E - Denotes analyte concentration exceeded calibration range of instrument. Sample could not be re-analyzed at secondary dilution due to insufficient sample amount, quick turn-around request, sample matrix interference or hold time excursion. Concentration result should be considered as estimated.

J - Denotes an estimated concentration. The concentration result is greater than or equal to the Method Detection Limit (MDL) but less than the Reporting Limit (RL).

P - Indicates relative percent difference (RPD) between primary and secondary GC column analysis exceeds 40 % or indicates percent difference (PD) between primary and secondary GC column analysis exceeds 25 %.

U - Denotes analyte not detected at concentration greater than or equal to the RL. RL's are adjusted for sample weight/volume and dilution factors.

Z - Chromatographic interference due to PCB co-elution.

* - Value not within control limits.

Inorganic Laboratory Qualifiers Defined

B - Denotes analyte observed in associated method blank or digestion blank. Analyte concentration should be considered as estimated.

E - Denotes analyte concentration exceeded calibration range of instrument. Sample could not be re-analyzed at secondary dilution due to insufficient sample amount, quick turn-around request, sample matrix interference or hold time excursion. Concentration result should be considered as estimated.

J - Denotes an estimated concentration. The concentration result is greater than or equal to the Method Detection Limit (MDL) but less than the Reporting Limit (RL).

U - Denotes analyte not detected at concentration greater than or equal to the RL. RL's are adjusted for sample weight/volume and dilution factors.

* - Value not within control limits.

¹Qualifier column where "*" denotes value outside the control limits or 'D' denotes value was diluted out.

ND: Denotes analyte not detected at a concentration greater than the PQL.

PQL (Practical Quantitation Limit). Denotes lowest analyte concentration reportable for the sample.

Wet Chemistry - % Moisture

¹Qualifier column where '*' denotes value outside the control limits or 'D' denotes value was diluted out.

ND: Denotes analyte not detected at a concentration greater than the PQL.

PQL (Practical Quantitation Limit). Denotes lowest analyte concentration reportable for the sample.

¹Qualifier column where '*' denotes value outside the control limits. Note: RPD criteria does not apply if either the sample and duplicate sample are not detected.

Surrogate	CAS No.	% Recovery	Limits (%)	Q ¹	File ID
Bromofluorobenzene	460-00-4	97.1	45.4-170		MS08-1240-4
Dibromofluoromethane	1868-53-7	96.0	79.3-122		MS08-1240-4
toluene-d8	2037-26-5	98.6	77.0-133		MS08-1240-4
1,2-Dichloroethane-d4	17060-07-0	94.5	80.9-116		MS08-1240-4

¹Qualifier column where '*' denotes value outside the control limits or 'D' denotes value was diluted out.

ND: Denotes analyte not detected at a concentration greater than the PQL.

PQL (Practical Quantitation Limit). Denotes lowest analyte concentration reportable for the sample.

FREEDOM OF INFORMATION LAW REQUEST FORM

To: Records Access Officer
NYC Department of Health and Mental Hygiene
42-09 28th Street, 14th Floor, CN 31
Long Island City, NY 11101
Phone: (347) 396-8078/6116
Fax: (347) 396-6087
recordsaccess@health.nyc.gov

Date 9/1/2015 15

Dear Record Access Officer:

I, Ramesh Challapalli request copies of any inspection reports and/or records located in the Bureau of Enviromental Health, of the New York City Department of Health and Mental Hygiene.

The records pertain to:

- Lead Poisoning, Animal bite, Employment/Human Resources, Contracts/RFPs, Pest Control, Correctional Health, Early Intervention, Food Safety, Mental Health, Communicable Diseases, School Health, Day Care, Other: Petroleum, hazardous materials spills or releases

Please specify/describe the records you are requesting from the above program(s):

- 173 W. 85th Street, New York, NY.
203 W. 84th Street, New York, NY.
460 W. 60th Street, New York, NY.
1100-1122 Myrtle Avenue Brooklyn, NY.
373 -365 Vernon Ave, Brooklyn, NY.
151 West 54th Street, New York, NY.
835 Sixth Avenue, New York, NY.

Requester's Name: Ramesh Challapalli (Please print) and signature

Requester's Organization:

Requester's Address: 2 McCathern Court, Bridgewater, NJ 08807

Telephone Number: (908) 296 - 4338 E-mail: ramesh@capars.com

Instructions for Application for Records under FOIL

Completion of this form is voluntary. However, it will expedite access to the records you seek, if available.

- Please identify the types of records being requested.
Descriptions of the bureaus and/or records they retain are as follows:
 - Agency Chief Contracting Office (ACCO):** Contracts, Bids and Procurement records
 - Bureau of Customer Services (BCS):** Water bills, water metering
 - Bureau of Environmental Compliance (BEC):**
 - Asbestos Control Program, Hazardous Materials response
 - Air and Noise Permits and inspection records
 - Bureau of Environmental Design and Construction (BEDC):** Design and construction of wastewater treatment plants, water-supply related projects and infrastructure projects
 - Bureau of Environmental Planning and Assessment (BEPA):** SEQRA/CEQR and other environmental review-related records
 - Bureau of Wastewater Treatment (BWT):** Industrial pretreatment program, sewer discharge violations, operation of wastewater treatment plants
 - Bureau of Water and Sewer Operations (BWSO):** Water and sewer main repair
 - Bureau of Water Supply (BWS):** Watershed/aqueduct/reservoir operations, water quality
 - DEP Police:** Reports for watershed- area law enforcement incidents
- Please indicate whether you want to receive copies or want to inspect the records prior to copies being made.
- Please describe, with the greatest amount of detail possible, the type of records you are requesting. Include, if available and when applicable, complaint numbers, contract numbers, addresses, block and lot information, Notice of Violation number, specific time frames or date of incident/occurrence, name of document/form, and account numbers. **Please DO NOT request information about more than one account, NOV, property, etc.,** Please use a separate form for each request.
- Please provide your name, firm/company name, address, phone number or e-mail address where you want the response forwarded.
- Please, either mail or fax the form to the DEP Records Access Officer at the address and number listed on the form. **DO NOT FAX AND MAIL THE FORM.**
- You will receive an acknowledgment of receipt of the request.
- After the search has been performed, you will be contacted by bureau personnel informing you of the results of the search.
- Please do not send payment for records until such time it has been requested. Copying fees are \$.25 per page.

NEW YORK CITY DEPARTMENT OF ENVIRONMENTAL PROTECTION

Application for Records, Article 6 – New York State Public Officers Law, Freedom of Information Law

Complete Part I of this form. Please refer to instruction sheet for assistance in completing this form. If responsive records are located, you will be notified and informed of the required payment. Advance payment is required in check or money order payable to the City of New York before documents will be released. Either send the completed application to the Records Access Officer at NYC DEP, 59-17 Junction Blvd., 19th Fl., Flushing, NY 11373, or fax to (718) 595-6543. **DO NOT FAX AND MAIL.**

Dear Mr./Ms:

NYSDEC/Region 2 has reviewed your request for the above referenced records under New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by number under the names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided.

If no records have been located, this does not necessarily mean, and should not be interpreted to mean that there have never been any violations, complaints, claims, investigations or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, claims, investigations or inquiries.

Attached please find [# Attached pdf file (s)] of free copy of the records located for the names and/or addresses you provided. .

Therefore, your FOIL request has been satisfied and closed.

Please email your future FOILs to Region 2 directly to our email address: r2foil.foil@dec.ny.gov

Please send me an email confirming the receipt of the attachment(s).

Thank you for your request. If you have any questions, please call the FOIL Secretary Gloria Silva at 718-482-4507, or email it to me at r2foil.foil@dec.ny.gov

Sincerely yours,

Fawzy I. Abdelsadek, Ph.D., P.E.
Regional Enforcement Coordinator

Appendix G: Qualifications of Environmental Professionals

Ramesh Challapalli, Field Professional, PMP, LEED AP

Years Experience: 20

Professional Summary:

- A certified Project Management Professional with Master's degree in Geology and twenty years experience in all facets of environmental investigations including Phase I and Phase II Environmental Site Assessments, Property Condition Assessments, regulatory and compliance audits, remedial investigations, underground storage tank (UST) closure and removal projects.
- The majority of the environmental consulting work conducted in association with a lender or property owner to establish liability management practices and effectively address the stringent due diligence requirements with property transfer. Mr. Challapalli is also a US Green Building Council certified LEED AP professional.
- Phase 1 Environmental Site Assessments- An independent environmental consultant providing contract-based consulting work to major environmental companies, real estate developers and attorneys. Conducted over 1000 Phase I Environmental Site Assessments of commercial, industrial, educational, and multi-family residential properties throughout the northeast.
- Third New York City Water Tunnel - Provided third party independent geological, hydrogeological and geophysical review and analysis to the City of New York for dispute resolution on claims by contractors on differing site conditions encountered during the construction of the Third NYC Water Tunnel in Manhattan.
- Westchester, NY- Prepared preliminary assessment and performed site investigation and remedial investigation prior to the construction of large shopping mall located within Westchester, NY. This investigation involved the installation of over 60 soil borings in order to characterize the site and determine the extent of petroleum contamination prior to initiation of construction activities.
- Auto Parts Retail and Service Chain –Conducted comprehensive environmental investigation of multiple sites within the NY City Metro area and Long Island prior to the acquisition and development by a large national chain involved in automobile parts retail and services. The projects included conducting a Phase I environmental site assessment followed by soil and groundwater sampling to identify potential environmental concerns prior to the initiation of development activities at each site

Licenses and Certifications:

LEED-AP
Project Management Professional
AHERA

Specialized Education:

Master in Sciences, 1989-Brooklyn College of the City University of New York.
Project Management Professional (PMP) Certification

USGBC Certified LEED AP

Licensed AHERA Inspector

Certified NJDEP UST Subsurface Investigator

OSHA 40 HOUR HAZMAT Trained

Property Condition Assessment Course offered by ASTM 2006

How to Inspect and Evaluate the Physical Condition of a Property-New York University-2007

Education:

Brooklyn College, City University of New York
Master of Science-Geology, 1989

Danielle Salerno, Project Manager

242 Old New Brunswick Road, Piscataway, New Jersey, 08854

732-629-7930

Danielle_Salerno@efiglobal.com

Years Experience: 9

Professional Summary:

Ms. Salerno has over nine years of experience in the environmental consulting industry in a variety of roles, including remediation case management as a consultant for major oil companies in New Jersey, national environmental due diligence experience, and wetlands delineation and GIS training. Danielle is an AHERA-accredited asbestos inspector and management planner.

Ms. Salerno has conducted and managed Phase I and II Environmental Site Assessments of commercial, industrial and residential properties throughout the north east United States for a wide range of clients. She has performed and is familiar with Preliminary Assessments and Site Remediation Case Management in accordance with NJDEP regulations for a range of commercial and industrial properties in New Jersey. Ms. Salerno is a licensed AHERA Asbestos Inspector and Asbestos Management Planner.

Ms. Salerno meets the definition of an Environmental Professional as defined in 312.10 of 40 CFR 312.

Project Experience:

Phase I ESAs – Nationwide

Performed hundreds of environmental assessments at a variety of residential, commercial, and industrial properties across the nation at locations ranging from rural areas to large cities. Scope of work typically includes property assessment and determination of potential environmental concerns, historical and regulatory research due diligence and risk assessment in accordance with the latest ASTM standard, as well as asbestos, lead paint, lead in drinking water, and radon sampling.

Preliminary Assessments – Various locations throughout New Jersey

Performed Preliminary Assessments at a variety of commercial and industrial properties throughout New Jersey for the purpose of establishing the requirements to fulfill clients' due diligence obligation for the innocent landowner defense. Scope of work typically includes property assessment and determination of potential environmental concerns, detailed property ownership and operations history, and thorough historical and regulatory research due diligence in accordance with the New Jersey Department of Environmental Protection's Technical Requirements for Site Remediation.

Asbestos-Containing Materials Operation and Maintenance Plan Development – Nationwide

Developed several ACM O&M Plans for various commercial and industrial properties throughout the nation in accordance with OSHA and EPA regulations.

Building Demolition and Excavation Oversight – Various locations throughout New Jersey

Managed the oversight of various building demolition projects, including coordination of contractors, removal of hazardous materials, demolition of building, removal of USTs, dispensers, and appurtenant piping, and excavation of impacted soils. Typically involves working closely with clients, including daily construction updates and budget meetings.

Hazardous Materials Inventories – Various locations throughout the mid-Atlantic region

Part of a team of consultants that performed complete hazardous materials inventories of a 3.4 million square foot auto manufacturing plant and a large decommissioned hospital. Acted as company-client liaison for the entire team, communicating issues and findings from the group and answering client questions.

Utility Survey and Wetlands Delineation of a Steel Foundry – Rockaway, New Jersey

Performed a utility assessment of an operating steel foundry. The assessment included exploring and re-mapping historical utility vaults throughout the property using GPR, magnetic tracing wire, and fiber-optic cameras. Also delineated forested wetlands in a forested area adjacent to the steel forge along the Rockaway River.

GIS Mapping and Survey of a 600-acre Retreat Center – Red Feather Lakes, Colorado

Participated in a large-scale effort to map utilities, trails, buildings, and water features of a 600-acre retreat center in the Rocky Mountains of Colorado using GPS units, GIS software, and historical surveys and maps.

Professional Experience:

Property Solutions Inc., Edison, NJ
2013 - 2015
Project Manager

Shambhala Mountain Center, Red Feather Lakes, CO
Summer 2013
Assistant to the Director of Expansion and Planning

Partner Engineering & Science, Red Bank, NJ
2012- 2013
Staff Professional II

Groundwater Environmental Services, Wall, NJ
2009 - 2012
Associate Environmental Scientist

GZA GeoEnvironmental, Inc., Wayne, NJ
2006-2009
Environmental Scientist II

Specialized Education:

American Red Cross CPR/AED for the Professional Rescuer, Morris Hills YMCA, 2006
OSHA 40-Hour HAZWOPER training, EMILCOTT, 2007
Methodology of Delineating Wetlands, Rutgers University 2007
USDOT/IATA Transportation and Shipping of Hazardous Materials, GZA 2008
OSHA 8-Hour Site Supervisor training, GES, 2009
AHERA Asbestos Inspector Training, Rutgers University 2014
AHERA Asbestos Management Planner Training, Rutgers University 2014

Education:

Kings College, Wilkes-Barre, PA
B.S. Environmental Sciences, 2006

**Mandeep S. Sandhu, Sr. District Manager
Director of Assessment
Services – East Region**

242 Old New Brunswick Road, Suite 414, Piscataway, NJ 08854

Office Ph: 732-629-7930

Mobile Ph: 646-372-9889

Email: Mandeep_Sandhu@efiglobal.com

Years Experience: 17

Professional Summary:

Mr. Sandhu has over 17 years of experience conducting and supervising the execution of environmental, industrial hygiene, engineering and other forensic services to a wide variety of industries including insurance companies, finance institutions, government entities and commercial property managers. Mr. Sandhu combines his strengths in business development and client service with his strong management skills focusing on quality, schedule and budget to satisfy the needs of a many stakeholders. He has experience conducting field investigations, reporting, and design as well as managing field staff in completing a wide range of work. Mr. Sandhu also has considerable experience managing large projects encompassing multiple facilities, including coordination of engineering catastrophe response during Hurricane Sandy.

With many years of experience in the due diligence consulting industry, Mr. Sandhu has conducted and managed Property Condition; Physical Needs; Seismic and Phase I and II Environmental Site Assessments and Construction Progress Monitoring and Cost Analysis of commercial, industrial and residential properties throughout the United States and Caribbean for a wide range of clients. As part of environmental investigations, he has performed and aided in indoor air quality (IAQ) assessments, geotechnical sub-surface explorations, groundwater well development, and remedial activity design and implementation. His current responsibilities include managing and developing client relationships from a defined list of key accounts, business development, and leadership for the successful execution of assignments. Mr. Sandhu has extensive knowledge of Fannie Mae DUS requirements, Freddie Mac environmental and engineering guidelines, Small Business Administration (SBA) protocol, conduit lending protocols, and ASTM International E-1527-13 and ASTM E 2018-08 standards.

Mr. Sandhu meets the definition of an Environmental Professional as defined in 312.10 of 40 CFR 312.

Licenses and Certifications:

Occupational Safety and Health Administration (OSHA) 40-Hour Basic Safety and Hazardous Materials Handler

ASTM Property Condition Assessment Training

AHERA Asbestos Inspector

AHERA Asbestos Management Planner

Project Experience:

National CMBS Lender – Retail Strip Centers – 25 retail strip centers in U.S.

Managed Phase I Environmental Site Assessments (ESAs) and Property Condition Assessments for 25 retail strip centers throughout the US as part of a \$175 million portfolio for financing purposes in 2015

Hurricane Sandy, Forensic Investigations

Managed numerous expedited catastrophe response engineering (structural, electrical, mechanical) and environmental (IAQ, microbial and subsurface contamination) investigations for numerous insurance claims between 2012 and 2013

National Portfolio Lender – Petroleum Wholesale – 26 gasoline service station in Southwest U.S.

Managed ESAs for 26 gasoline service stations throughout the southwest as part of a portfolio for financing purposes in 2011

International Hotel Management/Owner & Operator – WHG

Manage and oversee Phase I ESAs, acquisition level Property Condition Assessment (PCAs) and Seismic Evaluations for an international hotel management, owner/operator throughout the US whether it's for financing or acquisition level due diligence since 2011

International Lender – Pre-foreclosure/Acquisition Assessments

Manage and oversee Phase I ESAs, PCAs, Construction Plan & Cost Reviews and Construction Monitoring assignments for an international lender throughout the US since 2009

National CMBS Lender - Project Marlin – 42 Malls in U.S.

Managed CMBS scope of Phase I ESAs, PCAs and Seismic Evaluations of 42 regional malls throughout the U.S. as part of a portfolio acquisition in 10 business days in 2006.

National CMBS Lender - Project Xanadu – Secaucus, NJ

Managed Phase I ESA and third party environmental reviews for preliminary stages of Project Xanadu retail development in the Meadowlands Sports Complex in 2006.

National CMBS Lender - Project Aikman – 55 Commercial Facilities in U.S.

Successfully completed third party reviews of Phase I ESAs and PCAs of 55 sites (hotels, office/retail buildings, light industrial buildings throughout the U.S. as part of a portfolio refinance in six business days in 2006.

National/Regional Real Estate Development/Management Firms –Multi-family Properties throughout Continental U.S.

Completed CMBS, Fannie Mae DUS and/or Freddie Mac scope Phase I Environmental Site Assessments, Property Condition Assessments and Seismic Evaluations for acquisition purposes in five to 15 business days for various regional and national real estate developers and management firms varying from five sites to 45 sites throughout the U.S between 2005 and 2009.

Regional and National Lenders– Las Vegas, NV and Atlantic City, NJ

Managed ESA, PCA, Seismic evaluations of several large casino resorts in both cities between 2006 and 2007

Professional Experience:

EFI Global, Inc., National Client Manager, March 2009-Present; District Manager, January 2014-March 2014; Sr. District Manager & Director of Assessment Services – East Region, April 2015 to Present

LandAmerica Assessment Corporation, Client Manager, July 2005-March 2009; Project Manager, held Jan 2005-July 2005

Aaron & Wright Technical Services, Inc., Project Manager, Feb 2001-Dec 2004

AquaTerra Assessment Services Corporation, Environmental Scientist/Project Manager, May 1998-Feb 2001

Staten Island University Hospital, Associate Counselor, 1996-1998; Environmental Services Technician, 1992-1996

City University of New York – College of Staten Island, Adjunct Lab Technician, 1996-1997

Specialized Education:

Due Diligence at Dawn Seminars, Environmental Data Resources, Inc., 2007, 2008, 2010, 2015

NJDEP Regulatory Training in Underground Storage Tanks, Rutgers University Office of Continuing Professional Education, May 2011

Mold Awareness Training, ALC Environmental, Inc. 2004

Certified Microbial Investigator (CMI) / Certified Microbial Consultant (CMC) Training, NAETI, 2011

AHERA Asbestos Inspector, NAETI, 2014

AHERA Asbestos Management Planner, NAETI, 2014

Education:
