PHASE I ENVIRONMENTAL SITE ASSESSMENT

1032 and 1036-1038 Manhattan Avenue

Brooklyn, New York

May 21, 2019

Structural Engineering Technologies appreciates the opportunity to work for ASH NYC at the property located at 1032 and 1036-1038 Manhattan Avenue in Brooklyn, New York.

Should you require any additional information or have any comments regarding the contents of this report, please feel free to contact our office at your convenience.

I declare that, to the best of my professional knowledge and belief, I meet the personnel meet the definition of an environmental professional as defined in §312.10 of 40 C.F.R. 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Very Truly Yours,

X 

Rachel Ataman, PG
Senior Geologist

1.0 EXECUTIVE SUMMARY

At the request of ASH NYC a prospective purchaser of the Subject Property, Structural Engineering Technologies (SET) has performed a Phase I Environmental Site Assessment (ESA) of the property located at 1032 and 1036-1038 Manhattan Avenue in Brooklyn, New York, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions (RECs)* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

The Subject Property (1032 and 1036-1038 Manhattan Avenue) consists of three individual tax lots that collectively occupy an area of approximately 0.25 acres. The 1032 Manhattan Avenue Property (Lot 5) is currently not used for any purposes, but was recently occupied by a hardware store. The hardware store merchandise was present during the inspection. A partial basement occupying approximately 2/3 of the property is present beneath the building. The basement was found to be vacant with a 275-gallon aboveground storage tank (AST) and a sump pump near the western portion.

The 1036 Manhattan Avenue Property (Lot 6) contains a three-story building and the 1038 Manhattan Avenue Property (Lot 8) contains a one-story building. The main floors of the 1036 and 1038 Manhattan Avenue buildings are connected and are both occupied by Nappa Auto and Truck Parts. Offices are located in the western portion of the building and the eastern portion is used to store automobile parts. A partial basement exists beneath the western 2/3rd of the buildings. These basements are partially empty and partially used for the storage of automobile parts. The basement of each of these buildings were observed to contain a sump pump.

This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) in connection with the Subject Property except for the following:

- The historic use of the Site as Kelly Cleaners. The City Directory provides evidence this dry cleaning facility as it is listed at the Subject Property (1036 and 1038 Manhattan Avenue) from 1949 to 1985. The EDR database reveals Kelly Dry Cleaners was generator of hazardous waste; therefore, laundering of clothes was done on-site. In addition, waste manifests for the disposal of spent halogenated solvents were listed in the EDR database. Contamination of the subsurface soils and a vapor intrusion condition cannot be ruled out. However, it should be noted that the current owner, Mr. Marshal Kesten, does not believe Dry Cleaning activities were being performed on-site.

No other RECs, HRECs, CRECs or De minimis conditions were identified at the Subject Property.

2.0 INTRODUCTION & SCOPE OF WORK

2.1 Introduction

Structural Engineering Technologies (SET) ("**Preparer**") has been retained by ASH NYC (the "**User**") to perform a Phase I Environmental Site Assessment at the property identified as 1032 and 1036-1038 Manhattan Avenue. The Phase I Environmental Site Assessment was prepared to investigate the site prior to its purchase. The User is the "**prospective purchaser**" of the property. The property will hereafter be referred to as the "**Subject Property**".

The purpose of a Phase I Assessment is to characterize the environmental quality of the Subject Property through the determination of the presence of Recognized Environmental Conditions (RECs). As defined by the American Society of Testing and Materials (ASTM), a REC is, "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property" (ASTM E 1527-13, §1.1.1). Similarly, the goal of an AAI-compliant Phase I Assessment is to identify "conditions indicative of releases or threatened releases of hazardous substances..." (40 CFR Part 312).

To this end, SET, has collected information through a number of sources including, but not limited to: a property and neighborhood inspection by trained environmental personnel, a review of historical and current information collected from various federal, state, county and municipal agencies and personnel interviews with Site representatives. Firms subcontracted by SET and the User may have collected some information used in this report. Some or all of the Assessment has been performed or supervised by environmental professionals as required by 40 CFR Part 310. The procurement of Title and Judicial Records for Environmental Liens and/or Activity and Use Limitations ("AULs") by SET is beyond the scope of this practice (ASTM E1527-13) and investigation.

2.2 Scope of Work

The general activities of the Phase I Assessment included the performance of the following tasks:

1. A detailed inspection of the Site and its general vicinity.
2. A review of all reasonably ascertainable regulatory agency documents.
3. A neighborhood hazardous waste survey utilizing Federal and State databases.
4. A review and evaluation of reasonably ascertainable geologic and hydrogeologic reference materials.
5. Interviews with representatives of the Site.
6. ASTM E2600 vapor encroachment screening.
7. Preparation of a Phase I Environmental Site Assessment.

The Phase I ESA was performed in accordance with both ASTM E 1527 and the AAI Rule except where noted in Section 2.3 and SET. As required by ASTM & AAI, the user has supplied information that has been relied upon by SET in the rendering of findings, conclusions and opinions, except where indicated in Section 2.3 or elsewhere in the report.

2.3 Limitations, Deviations and Exceptions

Asbestos, radon, lead based paint and Business Environmental Risks have not been considered and are not included in the scope of work. This Phase I Assessment is not intended to address the soil/groundwater quality at the Subject Property for general Site characterization or waste disposal purposes. This Phase I Assessment is not intended to evaluate the fair market price of the property if it is not affected by hazardous or petroleum products.

Portions of this report have been prepared utilizing information provided by third party sources or the user. As such, SET relies upon these sources and has recorded findings, conclusions and opinions based upon this information. SET cannot attest to the accuracy of this information but where possible had attempted to verify the information.

It should be noted that the USEPA has determined in their final ruling (40 C.F.R. Part 312, Standards and Practices for All Appropriate Inquiries) of November 1, 2005 that “persons conducting all appropriate inquiries may use the procedures included in the ASTM E1527-13 standard to comply with today’s final rule.” Therefore, while all appropriate inquiry could be considered satisfied as this ESA was prepared in exceedance of the ASTM E1527-13 standard, persons attempting to utilize this ESA while seeking one of CERCLA’s LLPs must note that; a) they will not maintain CERCLA liability protections unless they also comply with all of the continuing obligations established under the statute that are beyond the scope of this practice (ASTM E1527-13) and investigation; and b) in order to qualify for one of the CERCLA LLPs, the person commissioning the Phase I Environmental Site Assessment must have provided site-specific information (if available) to SET before the date of this ESA, otherwise a determination could be made that all appropriate inquiry is not complete.

2.4 Data Gaps

Any data gaps identified herein, as defined by ASTM Practice E1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

3.0 SUBJECT PROPERTY DESCRIPTION

3.1 Ownership and Location

The Subject Property is currently owned by Lisa Cohen Trustee O and Marshal Kesten, LLC. It is located at 1032 and 1036-1038 Manhattan Avenue in Brooklyn, New York. The Subject Property consists of three rectangular tax lots identified as Block 2513 and Lots 5 (1032 Manhattan Avenue), Lot 6 (1036 Manhattan Avenue), and Lot 8 (1038 Manhattan Avenue). The tax lots cumulatively total approximately 0.25 acres $\pm$ in area. Figure 1 - Location Map depicts the location of the Subject Property on a street map of Brooklyn, New York. Figure 2 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

3.2 Subject Property Description

The southern portion of the Subject Property is identified as 1032 Manhattan Avenue and is currently not used for any purposes, but was recently occupied by a hardware store. This unit contains a vacant partial basement, a 275-gallon AST and are sump pump are located in the western portion. The central portion contains the 1036 Manhattan Avenue property, which consists of a three-story building and the 1038 Manhattan Avenue property contains a one-story building. The main floors of the 1036 and 1038 Manhattan Avenue buildings are connected and are both occupied by Nappa Auto and Truck Parts. Offices are located in the western portion of the building and the eastern portion is used to store automobile parts. A partial basement exists beneath all the 1036 and 1038 Manhattan Avenue buildings, but only the western 2/3rd of the property. These basements are partially empty and partially used for the storage of automobile parts. Two sump pumps are identified in the basements.

3.3 Adjacent Land Use

The Subject Property is located in a residential and commercial area. The following properties are identified immediately adjacent to the Subject Property:

<u>Direction</u>	<u>Adjacent Parcel</u>	<u>Surrounding Parcels</u>
North	Freeman Street	Multi-story residential and commercial
South	Multi-story residential and commercial 1026-1030 Manhattan Avenue	One-story medical
East	Multi-story residential	Multi-story residential
West	Manhattan Avenue	Multi-story residential and commercial

The adjacent property to the south, 1026-1030 Manhattan Avenue, is listed in the New York City Office of Environmental Remediation Program (NYCOER) as an "E"-designated site. This site is not expected to impact upon the Subject Property. Details of this adjacent property will be further discussed in Sections 4.4, 5.0, and 9.0.

No other adjacent properties should be impacting upon the environmental quality of the Subject Property.

3.4 Environmental Setting

3.4.1 Size and Shape of Parcel

The Subject Property consists of three tax lots that collectively occupy an area of approximately 0.25 acres. Each lot is rectangular in shape and occupies the following area:

- 1032 Manhattan Avenue (Lot 5) is approximately 2,500 square feet.
- 1036 Manhattan Avenue (Lot 6) is approximately 3,375 square feet.
- 1038 Manhattan Avenue (Lot 8) is approximately 4,975 square feet.

3.4.2 Topography

The Subject Property is relatively flat with a slight slope towards the north. The topography of the area is best described as flat. No outcrops of bedrock were noted during the Site Reconnaissance. According to the United States Geological Survey (USGS), Brooklyn, New York 7.5 Minute Series topographic map, the Subject's topographic elevation is approximately 14 feet above sea level.

3.4.3 Surface Water and Wetlands

Surface Waters

There are no bodies of water on or adjacent to the Subject Property. The East River is located approximately 0.25 to 0.50 miles to the west and Newtown Creek is located approximately 0.25 to 0.35 miles to the north of the Subject Property.

Wetlands

According to the National Wetlands Inventory, US Department of Interior, Fish and Wildlife Service, no federally regulated wetlands were identified on the Subject Property. Additionally, SET did not observe vegetation characteristic of wetlands at the Subject Site.

No National wetlands are located within 0.25 miles of the Subject Property.

3.4.4 Topography, Geology and Groundwater

Topography

The Subject Property is located at an elevation of approximately 14 feet above mean sea level (msl). The topography of the Subject Property is relatively flat and slopes gently to the north. The Subject Property is located in a relatively flat area, and the general slope of the surrounding region is to the north (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Brooklyn, New York USGS 7.5 Minute Topographic Quadrangle).

Geology

No bedrock outcroppings were observed at the Subject Property. Near-surface geology in heavily developed areas such as the Subject Property and vicinity is considered “urban land” and is characterized by a non-homogeneous distribution of soil and fill types. Excavation and backfilling for building foundations, utility conduits, subway systems and other construction results in a varied subsurface profile. In this setting, estimation of local subsurface parameters such as permeability, moisture content, and organic fraction is not feasible without site-specific testing data.

According to the Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS) website (<http://websoilsurvey.nrcs.usda.gov/app/>), the dominant soil composition in the vicinity of the Subject Property is classified as Urban Land-Flatbush complex, 0 to 3 percent slopes. This soil consists of mainly urban land with 75 percent outwash substratum. Cemented material is mainly present from zero to 60 inches. Gravelly and is present from 20 to 72 inches.

According to the Environmental Data Resources, Inc. (EDR) GeoCheck Physical Setting Source Summary, the dominant soil composition in the vicinity of the Subject Property is classified as Urban Land.

Groundwater

Under natural, undisturbed conditions, shallow groundwater flow generally follows the topography of the land surface and on this basis the topography suggests that groundwater flow across the Subject Property is towards the west. Site specific groundwater flow direction can only be confirmed through the installation and surveying of at least three monitoring wells. Since monitoring wells are currently not present on the Subject Property the site-specific groundwater flow direction cannot be confirmed.

According to the Long Island Depth to water viewer (<https://ny.water.usgs.gov/maps/li-dtw10/>) depth to water at the Site is approximately 11 to 20 feet below grade.

4.0 USER PROVIDED INFORMATION

The following section summarizes information provided by The user, ASH NYC, with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property.

4.1 Title Records

Title record information associated with the Subject Property has not been provided to SET by the user, The user, ASH NYC,.

4.2 Environmental Liens and Activity and Use Limitations

The user, ASH NYC, has provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property.

4.3 Specialized Knowledge

The user, ASH NYC, provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. SET was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property.

4.4 Commonly Known or Reasonably Ascertainable Information

The user, ASH NYC, has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

However, SET was able to locate Reports prepared for the neighboring Property at 1026-1030 Manhattan Avenue. The following reports were reviewed:

1. Remedial Investigation Report, CEQR Number: 09DCP056K, OER Site Number: 18EH-N139K, prepared by EBC in November 2017.
 - Depth to water was measured at 4.8 to 7.5 feet below cellar grade.
 - Soil sampling revealed several semi-volatile organic compounds (SVOCs), two pesticides, and several metals exceeded Unrestricted Use Soil Cleanup Objectives (UUSCO).
 - Groundwater sampling revealed only the metals aluminum, manganese and sodium exceeded New York State Groundwater Quality Standards. Volatile organic compounds (VOCs), SVOCs, Pesticides, and PCBs were not detected above New York State Groundwater Quality Standards.
 - Petroleum-related compounds and chlorinated compounds were detected in soil gas samples. All chlorinated VOCs were detected below the monitoring level ranges established by New York State Department of Health (NYSDOH).

2. Remedial Action Work Plan, NYC VCP Site Number: 18CVCP040K, CEQR Number: 09DCP056K, OER Site Number: 18EH-N139K, prepared by EBC in December 2017.
 - Summarizes proposed remedial actions, which includes the removal of approximately 325 cubic yards (490 tons) of soils, collections of confirmation end-point soil samples, installation of demarcation barrier, and the installation of a vapor barrier.

4.5 Valuation Reduction for Environmental Issues

The user, ASH NYC, has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

4.6 Owner, Property Manager, and Occupant Information

The user, ASH NYC, provided contact information for the Subject Property owner, manager and/or occupants.

4.7 Reason for Performing Phase I ESA

The user, ASH NYC, retained SET to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

5.0 Records Review

5.1 Standard Environmental Records

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded “orphan” properties within the same zip code. The database report is presented in **Appendix A**.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, SET uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Subject Property Listed	Off-site Listings Within Search Distance
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal SEMS Sites	0.5 mile	No	1
Federal SEMS-ARCHIVE Sites	0.5 mile	No	1
Federal RCRA CORRACTS Sites	1.0 mile	No	4
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	Yes	17
Federal Engineering / Institutional Control Sites	0.5 mile	No	0
Federal ERNS Sites	Property	No	NA
State and Tribal equivalent CERCLIS Sites	1.0	No	19
State and Tribal Spills Sites	0.125 mile	No	24
State and Tribal Landfill or Solid Waste Disposal Sites	0.5 mile	No	9
State and Tribal Leaking Storage Tank Sites	0.5 mile	No	23
State and Tribal Registered Storage Tank Sites	0.25 to 0.50 miles	No	66
State and Tribal Engineering / Institutional Control Sites	0.5 mile	No	0
State and Tribal Voluntary Cleanup Sites	0.5 mile	No	20
State and Tribal Brownfield Sites	0.5 mile	No	5

5.1.1 Federal Agency Database Records

National Priority List (NPL)

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)

The National Oil and Hazardous Substance Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 miles of the Subject Property were identified on the Delisted NPL database.

Superfund Enterprise Management System (SEMS)

SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Action (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for the possible inclusion of the NPL. The Subject Property is not listed in the database; however, there is one site located within 0.5 miles of the Subject Property identified as Fortune Metal Inc. This site is located approximately 0.2 miles from the Subject Property at 239 India Street and is listed with EPA ID NYR000170555. No site assessment work is needed at this site, which was finalized in August 2011. Based upon the information reviewed and distance of this site to the Subject Property, a direct negative impact to the Subject Property is not expected.

SEMS-Archive

SEMS-Archive tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS-NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-Archive sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. The Subject Property is not listed in the database; however, there is one site located within 0.5 miles of the Subject Property identified as Fox & London Inc. This site is located approximately 0.3 miles from the Subject Property at 21 Provost Street. The most recent listing in the database is the finish date of the project, which was July 2014. Based upon the information reviewed and distance of this site to the Subject Property, a direct negative impact to the Subject Property is not expected.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. The Subject Property is not listed in the database; however, there are four sites located within 1.0 mile of the Subject Property. The nearest site is identified as Kosan Industrial Corp. located approximately 0.6 miles from the Subject Property. This facility operated as a paint and coating manufacturer. Based upon the information reviewed and distance of these sites to the Subject Property, a direct negative impact to the Subject Property is not expected.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject

Property nor any sites located within 0.5 miles of the Subject Property were identified on the RCRA non-CORRACTS TSD database.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month.

The Subject Property is not listed as a RCRA generator, but is listed as a RCRA Non-generator (EPA ID NYD049146186) with the facility name Kelly Cleaners at 1036 Manhattan Avenue. The RCRA Non-generator listings are from the years 1999 and 2006. It should be noted that this facility was identified as a RCRA LQG in 1985 for wastes related to dry cleaning operations. No RCRA violations were noted in the database for Kelly Cleaners.

There are 8 RCRA-LQG, 4 RCRA-SQG, and 5 RCRA-CESQG sites located with the approximate search radius of the Subject Property. None of the listings in the database are adjacent to the Subject Property. The nearest listing is a RCRA LQG identified as MTA NYCT Green Street Substation (EPA ID NYR000076620), which is located at the corner of Green Street and Manhattan Avenue (approximately 0.025 miles south southwest of the Subject Property). This site is listed as generating lead and corrosive waste, which most recently was disposed of in 2007. No RCRA violations were noted in the database for MTA NYCT Green Street Substation.

In addition, there is a RCRA SQG and CESQG identified as Nuvite Chemical (EPA ID NYR000154708 and NYN008016354) located at 213 Freeman Street, which is approximately 0.087 miles east northeast of the Subject Property. This site is listed as generating ignitable waste, corrosive waste, arsenic, chromium, spent halogenated solvents, spent non-halogenated solvents, and hexachlorophene or phenols, which was most recently disposed of in 2015. No RCRA violations are listed in the database for Nuvite Chemical.

Based upon the listing of Kelly Cleaners in the RCRA generator database the Subject Property is also listed in the FINDS and ECHO database for Environmental Interest/Information System. Due to the use of the Subject Property as a dry cleaner with known halogenated solvent usage, a direct negative impact to the Subject Property may have occurred.

Based upon the information reviewed for the RCRA generators listed in the database along with their distance to the Subject Property, a direct negative impact to the Subject Property is not expected.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal

Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

5.1.2 State and Tribal Agency Database Records

State and Tribal equivalent CERCLIS Sites

State and tribal equivalent CERCLIS databases were searched for sites located within 1.0 mile of the Subject Property. The Subject Property is not listed on the database; however, there are 19 sites located within the specified minimum search distances were identified on state and/or tribal databases. None of this sites are adjacent to the Subject Property. The nearest sites are identified as Nuhart Co located at 49 Dupont Street (approximately 0.2 miles to the west northwest of the Subject Property) and Former New Smelting located at 269 Freeman Street (approximately 0.2 miles to the east northeast of the Subject Property). Based upon the information reviewed and distance of these sites to the Subject Property, a direct negative impact to the Subject Property is not expected.

State and Tribal Spills Sites (Spills)

A review of available Spills databases was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property is not listed in the Spills Database. There are 24 spills sites located with 0.125 miles of the Subject Property. None of these spills sites are located adjacent to the Subject Property. The nearest spills occurred at the intersection or near the intersection of Manhattan Avenue and Freeman Street. All spills have been closed out to the satisfaction of NYSDEC. Based upon the information reviewed and distance of these sites to the Subject Property, a direct negative impact to the Subject Property is not expected.

State and Tribal Landfill Sites and Solid Waste Disposal Sites

The state and tribal landfill and solid waste disposal site databases identify active or inactive landfill and transfer station facilities, as well as open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The Subject Property and no adjacent properties are listed as a state or tribal landfill or solid waste disposal site. The nearest site is identified as Michael Ferone Brick Co. located at 247 Greene Street, which is approximately 0.18 miles east of the Subject Property. Based upon the information reviewed and distance of these sites to the Subject Property, a direct negative impact to the Subject Property is not expected.

State and Tribal Leaking Storage Tank Sites

Leaking Storage Tank Sites are properties where releases of hazardous substances or petroleum products from underground storage tanks (USTs) and/or aboveground storage tanks (ASTs) have been identified and reported to state, tribal, or local agencies. The Subject Property and no adjacent properties are identified on the leaking storage tank database; however, there are 23 sites located within 0.5 miles of the Subject Property.

The nearest recorded leaking storage tank site is identified as the Shaughnessy Residence located at 115

Green Street, which is located approximately 0.141 miles west southwest of the Subject Property. All of the leaking storage tank site spill numbers have been closed out to the satisfaction of NYSDEC. Based upon the information reviewed and distance of these sites to the Subject Property, a direct negative impact to the Subject Property is not expected.

State and Tribal Registered Storage Tanks

The Subject Property and no adjacent properties are identified on state or tribal Registered Storage Tank databases. There are 66 registered storage tanks listed in the database. The nearest tank is an above ground tank located at 158 Green Street, which is located approximately 0.040 miles from the Subject Property. This tank contains #2 fuel oil for on-site consumption. Based upon the information reviewed and distance of these sites to the Subject Property, a direct negative impact to the Subject Property is not expected.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites within 0.5 mile of the Subject Property were identified on state or tribal Engineering Control or Institutional Control Registries.

State and Tribal Voluntary Cleanup Sites

The Subject Property and no adjacent properties are listed in the state or voluntary cleanup site database. However, there are 20 sites located within 0.5 mile of the Subject Property. These nearest site is identified as 1048 Manhattan Avenue, which is approximately 0.018 miles north of the Subject Property. This property is located north and across the street from the Subject Property and is listed as having a Remedial Investigation Report and Remedial Action Work Plan prepared in 2017. This site has undergone an investigation and remediation under the auspices of New York City Office of Environmental Remediation (NYCOER).

Based upon the information reviewed and the distance of these sites to the Subject Property, a direct negative impact to the Subject Property is not expected.

State and Tribal Brownfield Sites

The Subject Property and no adjacent properties are listed as state or tribal brownfield site; however, there are 5 state or tribal brownfield sites located within 0.5 mile of the Subject Property. The nearest site is identified as Former BRT Railroad Car Barn located at 1121-1137 Manhattan Avenue, which is approximately 0.171 miles north of the Subject Property. Based upon the information reviewed and the distance of the sites to the Subject Property, a direct negative impact to the Subject Property is not expected.

5.2 Regulatory Agency Documents

Freedom of Information Act (FOIA) requests were issued to the following regulatory agencies with respect to the Subject Property. All reasonably ascertainable municipal records are provided with this report.

Appendix B provides copies of the regulatory agency documents.

- New York City Department of Buildings
- New York City Department of Health
- New York City Department of Environmental Protection
- New York City Department of Finance ACRIS
- New York City Open Accessible Space Information Space (NYCOASIS)
- New York State Department of Environmental Conservation
- On-line Research of the Property

New York City Department of Buildings

An online query was made of the New York City Department of Buildings website. The database revealed the following information:

1032 Manhattan Avenue

- The subject Property has environmental restrictions related to hazmat and noise.
- A Certificate of Occupancy from 1931 indicates the Subject Property contains a one-story building with a cellar and is listed for ordinary use.

1036 Manhattan Avenue

- The subject Property has environmental restrictions related to hazmat and noise.
- A Certificate of Occupancy from 1965 indicates the Subject Property contains a three-story building with a cellar and is listed for ordinary use in the cellar, a tailor on the first floor, and residential use on the second and third-floors.

1038 Manhattan Avenue

- The subject Property has environmental restrictions related to hazmat and noise.
- A Certificate of Occupancy from 1940 indicates the Subject Property contains a one-story building with a cellar and is listed for storage in the cellar and stores on the first-floor.
- A Certificate of Occupancy from 1947 indicates the Subject Property contains a one-story building with a cellar and is listed for storage in the cellar and as a restaurant/bar and grill on the first-floor.
- A Certificate of Occupancy from 1987 indicates the Subject Property contains a one-story building with cellar and is listed for ordinary use in the cellar and as a retail store, furniture store and wholesale establishment on the first floor.

New York City Department of Health

A FOIA request was submitted to New York City Department of Health and Mental Hygiene. A response from the Department has not been received at time of this Report

New York City Department of Environmental Protection

A FOIA request was submitted to the New York City Department of Environmental Protection. In addition, a query of the New York City Department of Environmental Protection CATS information database was conducted. The database query revealed the following:

1032 Manhattan Avenue

- The Subject Property is not listed in the database.

1036 Manhattan Avenue

- The Subject Property is listed as using a #2 fuel oil powered boiler.

1038 Manhattan Avenue

- The Subject Property is not listed in the database.

New York City Department of Finance ACRIS

An online query of the New York State Department of Finance ACRIS system was made for Subject Property. The database revealed the following information.

1032 Manhattan Avenue

- The most recent deed transfer was completed in 2005 between Lisa Cohen and Lisa Cohen Trustee of H. Simon Asset Management Trust.

1036 Manhattan Avenue

- The most recent deed transfer was completed in 2010 between Marshall Kesten and Marshall Kesten LLC.

1038 Manhattan Avenue

- The most recent deed transfer was completed in 2010 between Marshall Kesten and Marshall Kesten LLC.

New York City Open Accessible Space Information System (OASIS)

1032 Manhattan Avenue

- The Subject Property is listed with a lot area of 2,500 square feet, built in 1931, and listed with a primary zoning of R7A and a commercial overlay C2-4.

1036 Manhattan Avenue

- The Subject Property is listed with a lot area of 2,500 square feet, built in 1931, and listed with a primary zoning of R7A and a commercial overlay C2-4.

1038 Manhattan Avenue

- The Subject Property is listed with a lot area of 5,000 square feet, built in 1931, and listed with primary zoning of R7A and a commercial overlay C2-4.

New York State Department of Environmental Conservation

A FOIA request was submitted to the New York State Department of Environmental Conservation (NYSDEC) for all Lots within the Subject Property. The NYSDEC assigned the FOIL referenced number **W052361-051319**. The NYSDEC indicated that a response to the FOIA request will be received no later than June 11, 2019.

6.0 SITE HISTORY

6.1 Historical Maps

A search for historical fire insurance maps depicting the Subject Property and its vicinity were not available from Environmental Data Resources, Inc. (EDR). A copy of the fire insurance maps is provided in **Appendix C**.

FIRE INSURANCE MAP SUMMARY		
Year	Issues Noted	Observations
1887	No	Subject Property: The Subject Property contains numerous buildings, including a two-story dwelling (504 Manhattan Avenue) three-story store (506 Manhattan Avenue), two four-story stores (508 and 510 Manhattan Avenue), a three story store (176 Freeman Street). 505 and 510 Manhattan Avenue are located at present-day 1038 Manhattan Avenue, 506 Manhattan Avenue is located at present-day 1036 Manhattan Avenue and 504 Manhattan Avenue is located at present day 1032 Manhattan Avenue. The buildings resemble the size and configuration of the present-day buildings. Surrounding Area: Adjacent properties include a three-story store to the south and a three-story dwelling to the east. Manhattan Avenue borders the Subject Property to the west and Freeman Street to the north. The general area is well-developed with dwellings and stores.
1905 1916	No	Subject Property: The Subject Property appears similar to the 1887 map; however, the property addresses have changed. The present-day 1038 Manhattan Avenue property is listed as 1038-1042 Manhattan Avenue. The 1032 and 1036 Manhattan Avenue properties are located in their present-day locations. Surrounding Area: Adjacent and nearby properties are similar to the 1887 map
1942	No	Subject Property: The subject Property appears similar to the 1916 map. Surrounding Area: Adjacent and nearby properties are similar to the 1916 map; however, an undertaker is denoted to the north of the Subject Property at 169-173 Freeman Street.
1951	No	Subject Property: The Subject Property appear similar to the 1942 map; however, the Subject Property at the 1036 Manhattan Avenue address is denoted as "Paints". Surrounding Area: Adjacent and nearby properties are similar to the 1942 map.
1965	Yes	Subject Property: The Subject Property appears similar to the 1951 map; however, the 1036 Manhattan Avenue address is denoted as "Dry Cleaning" and the 1032 Manhattan Avenue address is denoted as "Paints". Surrounding Area: Adjacent and nearby properties are similar to the 1951 map.
1978 1979	Yes	Subject Property: The Subject Property appear similar to the 1965 map.

FIRE INSURANCE MAP SUMMARY			
Year		Issues Noted	Observations
1980	1981		Surrounding Area: Adjacent and nearby areas appear similar to the 1965 map.
1982	1983		
1986	1987		
1988	1989		
1991	1993		
1995	1996		
2001	2002	No	Subject Property: The Subject Property appears similar to the 1996 map; however, the 1036 Manhattan Avenue address is not denoted as dry cleaner and is denoted as commercial on the first and two residential
2003	2004		
2005	2006		
2007			Surrounding Area: Adjacent and nearby properties are similar to the 1996 map.

6.2 City Directory Search

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community.

A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR) or ERIS. Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in **Appendix C**.

STREET DIRECTORY SUMMARY 1032 MANHATTAN AVENUE		
Year	Issues Noted	Occupants
2014	No	Simons Hardware
2010	No	Simons Hardware and Locksmith Inc.
2005	No	Simons Hardware Supplies
2000		
1997		
1992		
1985		
1980		
1976		
1973		
1970		
1965		
1949	Yes	Levinsky S. and Greenpoint Furniture Co.
1945	Yes	Levinsky S.
1940	No	Klugman R and Nathans Hardware and Bedding Co.
1928	No	Hertz Jos.

STREET DIRECTORY SUMMARY 1036 MANHATTAN AVENUE		
Year	Issues Noted	Occupants
2014	No	MK Realty of Brooklyn LLC and PM Industries Intl Inc.
2010	No	Flushing Transmission World, MK Realty of Brooklyn LLC, and PM Industries Intl Inc.
2005 2000 1997 1992	No	PM Auto Parts
1985 1976 1973 1970	Yes	Kelly Cleaners Co.
1965	Yes	Kelly Cleaners Co. and Santos Arrival
1949	No	Dancz Wm F., Klugman R, Nathans Hardware and Bedding Co., and Spielman Irving A.
1945	No	Klugman R, Nathans Hardware and Bedding Co., and Spielman Irving A.
1940 1928	No	Spielman B.

STREET DIRECTORY SUMMARY 1038 MANHATTAN AVENUE		
Year	Issues Noted	Occupants
2005 2000	No	H Kesten Marshall
1985 1976 1973 1970	No	Miller/MDSE
1960 1949	Yes	Kelly Cleaners Co.
1928	Yes	McGough WM and Weissberg Y.

The address 176 Freeman Street, which is adjacent to the east, was searched, but no listings were found. Known adjacent property usage includes residential and restaurant use at 1030 Manhattan Avenue.

6.3 Internet Search

An internet search of “1032, 1036, and 1038 Manhattan Avenue, Brooklyn, New York”. The resulted identified 1032 Manhattan Avenue as Simon’s Hardware (closed), 1036 Manhattan Avenue as MK Property Management, and 1038 Manhattan Avenue did not reveal any relevant listings

An internet search of Simon’s Hardware did not reveal any relevant listings. An internet search revealed MK Property Management is a mid-sized property management company of owners and operators of

commercial and residential real estate.

6.4 Previous Studies

SET was not provided with any reports regarding the Subject Property.

6.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

6.6 Environmental Liens and Activity and Use Limitation

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

6.5 Historical Use Summary

Based on a review of available information provided and/or obtained for the Subject Property as of the date of this ESA it appears the Subject Property was first developed no later than 1887 and for residential and store purposes. The configuration of the Subject Property in 1887 is similar to the present-day. In the 1951 Sanborn Map the Subject Property is listed as "Paints" and in 1965 is listed as "Paints" and "Dry Cleaner". The Sanborn Maps denote the Dry Cleaner from 1965 to 1996 and Paints from 1951 to 2007.

The City Directory provides further evidence of a dry cleaning facility, Kelly Dry Cleaners, as is listed at the Subject Property (1036 and 1038 Manhattan Avenue) from 1949 to 1985. The EDR database reveals Kelly Dry Cleaners was generator of hazardous waste; therefore, laundering of clothes was likely done on-site.

The Subject Property is located in a historically well-developed area of Brooklyn. Sanborn Maps reveal adjacent property usage has been solely for residential/dwelling and store purposes. An undertaker was noted north of the Subject Property across Freeman Street from 1942 to 2007. City Directory records reveal the adjacent property to the south, 1030 Manhattan Avenue, has been used for residential purposes and as restaurants.

The EDR database reveals the Subject Property is listed as an "E"-designated site, along with adjacent and many nearby properties. The "E"-designation for the Site (and general area) is for hazardous materials and/or noise. The Site was assigned an "E"-designation (E-232) during the Greenpoint-Williamsburg Contextual Rezoning action completed by the City in July 2009 (CEQR No. 09CDP056K). Because the Site is listed as an "E"-designated site for hazardous materials, an investigation is required by the New York City Office of Environmental Remediation (NYCOER). Although an "E"-designation has been placed on a property, it does not mean the property is contaminated.

The remaining EDR listings (EDR Historical Cleaner, RCRA NonGen/NLR, FINDS, ECHO, and NY Manifest) are all listed as Kelly Dry Cleaners. Because the Subject Property was occupied by a dry cleaner it is expected that it would be listed in these databases.

Due to the historical usage of the Subject Property as a dry cleaner, (which appeared to conduct laundering activities on-Site based upon the RCRA information) a direct negative impact to the Subject Property may have occurred.

The neighboring property to the south (1030 Manhattan Avenue) is listed as an “E”-designated site for hazardous materials and noise. A remedial investigation was conducted at the site in November 2017 and revealed minimal amounts of contamination, which was discussed earlier in the Report, in Section 4.4. In addition, the report does not identify any environmentally detrimental previous uses at the property. This “E-designated site adjacent to the Subject Property is not expected to negatively impact the Subject Property.

7.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Rachel Ataman, P.G. on May 8, 2019. Ms. Ataman was accompanied by and interviewed Mr. Marshal Kesten and Lisa Cohen the current owners of the Subject Property. Photographs of the Site Reconnaissance is provided in **Appendix G**.

7.1 Methodology and Limiting Conditions

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Unimproved portions of the Subject Property were observed along the perimeter and in a general grid pattern in safely accessible areas. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was sunny and approximately 65° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed.

7.2 Site Reconnaissance

The following pertinent information was obtained during the Subject Property Site Reconnaissance:

1. Industrial Processes:

No industrial processes were observed.

2. Suspect Asbestos-Containing Materials:

Suspect Asbestos Containing Material was not considered in the scope of this Phase I ESA.

3. Suspect Lead-Based Paint:

Suspect Lead Based Paint was not considered in the scope of this Phase I ESA.

4. Drum Storage:

No drums storage areas were identified during the Site Reconnaissance.

5. Storage Tanks:

One above ground storage tank was identified in the western portion of the basement beneath 1032 Manhattan Avenue. The tank was 275-gallons in capacity and according to the Subject Property owner, Ms. Lisa Cohen was previously emptied. The tank was previously used to store fuel oil. No stains, odors, spills or evidence of a petroleum release was identified in the vicinity of the AST.

Based upon the size of the AST the NYSDEC does not require it to be registered. The presence of an inactive AST is considered unlikely to impact upon the environmental conditions of the Subject Property.

No evidence of former ASTs or USTs were identified during the Site Reconnaissance.

6. Drains:

No floor drains were observed at the Subject Property. No evidence of former floor drains was observed at the Subject Property.

7. Subsurface Drainage Structures:

No subsurface drainage structures were identified during the Site Reconnaissance.

8. PCB-Containing Equipment:

No leaking electric transformers containing PCBs are observed at the Subject Property. No evidence of PCBs or PCB-containing equipment are observed at the Subject Property.

9. Lead in Drinking Water:

The testing of drinking water for lead is beyond the scope of this Phase I ESA.

10. Monitoring / Potable Water Wells:

No monitoring wells or potable water wells are observed at the Subject Property. No monitoring wells are observed on adjacent properties.

11. Visual Evidence of Mold:

No visual evidence of mold was identified at the Subject Property.

12. Pits, Ponds, or Lagoons:

No waste disposal pits, ponds, or lagoons are observed at the Subject Property. No evidence of former pits, ponds, or lagoons are observed at the Subject Property.

13. Distressed Vegetation:

No distressed vegetation is observed at the Subject Property.

14. Fill / Land Disposal:

No areas of fill or evidence of land disposal of material(s) were observed at the Subject Property.

15. Engineering Controls:

No engineering controls were noted at the Subject Property.

16. Petroleum Stains and Odors:

No Petroleum Stains or Odor were identified during the Site Reconnaissance.

17. Hazardous Substance / Petroleum Containers:

No evidence of suspect hazardous substance or petroleum containers were identified at the Subject Property.

8.0 INTERVIEWS & CLIENT / USER-PROVIDED INFORMATION

During the course of the Phase I Assessment, interviews were conducted with respect to the operation and history of the Site and a Client/User Questionnaire was provided. The client user did not return the Phase I ESA questioner.

According to Mr. Marshall Kesten whom has owned the Subject Property for 34 years, the Subject Property has historically been used as a bar and sewing factory. Mr. Kesten believes the Subject Property was also used as Kelly's Dry Cleaner but does not believe any on-site dry cleaning activities were taking place.

9.0 VAPOR ENCROACHMENT SCREENING

SET performed a vapor encroachment screening in accordance with ASTM Standard E2600. The purpose of the screening is to determine if there are any potential chemicals of concern (COC) that may migrate as vapors into the vadose zone of the property as the result of contaminated soil and/or groundwater on or near the property.

The results of the Vapor Encroachment screening indicates that the historical and current adjacent property usage to the south and east is unlikely to be impacting upon the vapor quality beneath the Site. The 1030 Manhattan Avenue site is currently listed as an "E"-designated site; however, the results of the remedial investigation from 2017 does not reveal a vapor issue requiring mitigation exists at the 1030 Manhattan Avenue building. Historically and currently, nearby properties have been predominantly denoted and listed for residential/dwelling and store usage. A review of the EDR database, Sanborn Maps, City Directory and site reconnaissance did not identify a soil vapor encroachment issue.

The Subject Property is identified as "Paints" (1032 Manhattan Avenue) in the 1951 Sanborn Maps and as "Paints" (1032 Manhattan Avenue) and "Dry Cleaner" (1036 Manhattan Avenue) in 1965. The Sanborn Maps denote the Dry Cleaner from 1965 to 1996 and Paints from 1951 to 2007.

The City Directory provides further evidence of a dry cleaning facility, Kelly Dry Cleaners, as is listed at the Subject Property (1036 and 1038 Manhattan Avenue) from 1949 to 1985. The EDR database reveals Kelly Dry Cleaners was generator of hazardous waste; therefore, laundering of clothes was likely done on-site.

Based upon the information reviewed, a vapor encroachment condition from neighboring properties is unlikely to exist; however, the previous usage of the Property as a dry cleaner may have negatively impacted the Subject Property and a vapor intrusion condition may exist.

10.0 DISCUSSION OF RESULTS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of 1032 and 1036-1038 Manhattan Avenue in Brooklyn, New York. Any exceptions to, or deletions from, this practice are described in Section 2.3 of this *report*. This assessment has revealed no evidenced of recognized environmental conditions in connection with the Subject Property with the exception of the following:

- The historic use of the Site as Kelly Cleaners. The City Directory provides evidence this dry cleaning facility as it is listed at the Subject Property (1036 and 1038 Manhattan Avenue) from 1949 to 1985. The EDR database reveals Kelly Dry Cleaners was generator of hazardous waste; therefore, laundering of clothes was done on-site. In addition, waste manifests for the disposal of spent halogenated solvents were listed in the EDR database. Contamination of the subsurface soils and a vapor intrusion condition cannot be ruled out. However, it should be noted that the current owner, Mr. Marshal Kesten, does not believe Dry Cleaning activities were being performed on-site.

No other RECs, HRECs, CRECs or De minimis conditions were identified at the Subject Property.

11.0 CREDENTIALS & DECLARATION

11.1 Credentials

In accordance with ASTM E 1527, the credentials of those personnel directly involved with the production of this Phase I are provided with this report. **Appendix E** provides a copy of the personnel credentials.

11.2 Environmental Professional Declaration

We declare that to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in 40 CFR Part 312.21(d). We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the Subject Property. Only where indicated we have developed and performed the AAls in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

13.0 EXCLUSIONS & DISCLAIMER

The observations described in this report were made under the conditions stated therein. The conclusions presented in the report were based solely upon the services described therein, and not on scientific tasks or procedures beyond the scope of described services or the time and budgetary constraints imposed by the Client.

In preparing this report, **SET** may have relied on certain information provided by state and local officials and other parties referenced therein, and on information contained in the files of state and/or local agencies available to **SET** at the time of the subject property assessment. Although there may have been some degree of overlap in the information provided by these various sources, **SET** did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this subject property assessment.

Observations were made of the subject property and of structures on the subject property as indicated within the report. Where access to portions of the subject property or to structures on the subject property was unavailable or limited, **SET** renders no opinion as to the presence of non-hazardous or hazardous materials, or to the presence of indirect evidence relating to a non hazardous or hazardous materials, in that portion of the subject property or structure. In addition, **SET** renders no opinion as to the presence of hazardous materials, or the presence of indirect evidence relating to hazardous materials, where direct observation of the interior walls, floors, or ceiling of a structure on a subject property was obstructed by objects or coverings on or over these surfaces.

SET did not perform testing or analyses to determine the presence or concentration of asbestos at the subject property or in the environment of the subject property under the scope of the services performed.

The conclusions and recommendations contained in this report are based in part, where noted, upon the data obtained from a limited number of soil samples obtained from widely spaced subsurface explorations. The nature and extent of variations between these explorations may not become evident until further exploration. If variations or other latent conditions then appear evident, it will be necessary to reevaluate the conclusions and recommendations of this report.

Any water level reading made in test pits, borings, and/or observation wells were made at the times and under the conditions stated in the report. However, it must be noted that fluctuations in the level of groundwater may occur due to variations in rainfall and other factors different from those prevailing at the time measurements were made.

Except as noted within the text of the report, no qualitative laboratory testing was performed as part of the subject property assessment. Where such analyses have been conducted by an outside laboratory, **SET** has relied upon the data provided, and has not conducted an independent evaluation of the reliability of the data.

The conclusions and recommendations contained in this report are based in part, where noted, upon various types of chemical data and are contingent upon their validity. The data have been reviewed and interpretations were made in the report. As indicated within the report, some of the data may be preliminary "screening" level data, and should be confirmed with quantitative analyses if more specific information is necessary. Moreover, it should be noted that variations in the types and concentrations of contaminants and variations in their flow paths may occur due to seasonal water table fluctuations, past

disposal practices, the passage of time, and other factors. Should additional chemical data become available in the future, the data should be reviewed, and the conclusions and recommendations presented herein modified accordingly.

Chemical analyses have been performed for specific constituents during the course of this subject property assessment, as described in the text. However, it should be noted that additional chemical constituents not searched for during the current study may be present in soil and/or groundwater at the subject property.

This report was prepared solely for the use of the Client/User and is not intended for use by third parties. Unauthorized third parties shall indemnify and hold SET harmless against any liability for any loss arising out of, or related to, reliance by any third party on any work performed hereunder, or the contents of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

1036 MANHATTAN AVENUE
BROOKLYN, NY 11222

COORDINATES

Latitude (North):	40.7342310 - 40° 44' 3.23"
Longitude (West):	73.9545950 - 73° 57' 16.54"
Universal Transverse Mercator:	Zone 18
UTM X (Meters):	588275.4
UTM Y (Meters):	4509569.0
Elevation:	14 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

Version Date:	2013
North Map:	5940599 CENTRAL PARK, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
3604970202F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

3604970206F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Ordovician
Code: Oe *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Eugeosynclinal Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

135347

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing height shall be made; nor shall the building be covered from one location or position to another; nor shall it be by any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in construction in any story shall not exceed the live loads specified on reverse side; the number of persons of any sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as are prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with authorized direction to remove encroachments upon a public highway or other public place, whether attached or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face and certifies to the legal use and occupancy of only such parts of the building; it is subject to all provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with special requirements or with the State Labor Law or any other law or ordinance; that there are no outstanding violations or orders pending in the Department of Housing and Buildings at this time; that Section 22 of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

§ 246 P. No certificate of occupancy shall be issued for any building, structure, machine, play premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded in the certificate of occupancy.

Additional history of this certificate, will be distributed by Bureau Bureau of Records in the Building or Division, when provided in a form of 1917 form and approved.

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

No. 09280

Sept. 7, 1940

CERTIFICATE OF OCCUPANCY

State of Connecticut, the Board of Public Health, and the Department of Health, Section 140 of the New York Chapter, and Sections C-26-135.0 to C-26-16.0 with their Administrative Code 2.3.3.1 to 2.3.3.7. Finally, Code 2.3.3.8.

ii) $\text{supp}(f) \subseteq \text{supp}(g)$ and $f \neq 0$ implies $f = g$.

• $\frac{1}{2} \times 10^{-10}$ s = 0.5 femtoseconds (the length of a molecule)

PLATE 10. *Platypharodon* (see text for details). $\times 100$.

125 Madison Avenue, just W. of 22nd St. of Madison Street

100 2513 1 2

the 1990s, the number of people who have been employed in the private sector has increased by 10 million, and the number of people who have been employed in the public sector has decreased by 10 million. This has led to a significant increase in the number of people who are employed in the private sector, and a significant decrease in the number of people who are employed in the public sector. This has led to a significant increase in the number of people who are employed in the private sector, and a significant decrease in the number of people who are employed in the public sector.

~~1 Entry~~ 12. 1954/56

Contact: Rachel Ataman

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Touchstone Environmental Geology, Corp were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Limited Permission To Make Copies

Touchstone Environmental Geology, Corp (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice. Copyright 2019 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

SUMMARY OF EXPERIENCE

Having worked in the environmental field since 2003, I have a vast understating of the Environmental world in New York State. I have worked on multiple projects ranging from Phase I ESAs, Phase II ESAs, Mold Investigations to New York State Brownfield Cleanup Projects. Additionally, I have worked closely with clients to meet their specific project needs such as deadlines, project grants and program requirements. Using my vast experience I also assisted clients in cost estimates for future investigations or remediations.

RELEVANT PROJECT EXPERIENCE

Was instrumental in entering the first site (Pelham Parkway) into New York City Brownfield Cleanup program (BCP) and bringing Mayor Bloomberg to the Site to announce the start of the City's BCP. I then managed the environmental requirements of the site including City Environmental Quality Review, Phase I ESAs, Site Investigations, Remedial Action Work Plans and the Site Remedation during development.

Managed a large variety of New York City Brownfield Cleanup Projects including the preparation of the Site Investigation Work Plans, implementation of the fieldwork, the preparation of Site Investigation Report and Remediation Action Plans. Also successfully managed the implementation of Remedial Action Plans during fieldwork. On a site location on North 8th Street in Brooklyn, New York, supervised the removal of 10,000 tons of contaminated soil and the installation of a vapor barrier and sub-slab depressurization system. Knowledgeable in the characterization of soil for disposal. On a NYC BCP site located on Third Avenue in the Bronx I successfully investigated and managed the disposal of over 2,000 tons of hazardous soil.

Recently completed the investigation and remediation of a site located in Whitestone New York under the New York State Brownfield Cleanup Investigation. The Investigation consisted of the installation and sampling of over 50 soil borings and 8 groundwater probes. The remediation then followed with the removal of over 30,000 tons of contaminated urban fill material. During the remediation soil disposal was coordinated with the NYSDEC waste management division, the site engineers, the property owners and several soil disposal facilities in New Jersey. Following the completion of the soil investigation over 70 end point samples were collected from a grid pattern. The site is currently in final review for its certificate of completion.

Successfully managed the closure of multiple NYSDEC Spill Sites. For example, at a property located on Burnside Avenue in Inwood I supervised the removal of three underground storage tanks (USTs), over 100 tons of petroleum contaminated soil, the injection of Oxygen Releasing Compounds (ORC) and the performance of monthly monitoring and quarterly sampling of groundwater over a 2 year period. The remediation was successful in reducing the levels of contamination in groundwater and the NYSDEC Spill number was closed.

Performed multiple Environmental Assessment Statements (EAS) for both state and city environmental quality review including simple EAS for city variances to more complicated EAS with traffic and noise studies for the development of a property with a school or livery business

Performed hundreds of Phase I ESA site inspections and has reviewed and written hundreds of Phase I ESAs as well. Based upon the results of the Phase I ESA, determined the proper scope of work for the

Phase II ESAs, prepared Phase II ESA scopes of work and proposals and then properly implemented the Phase II ESA.

Technical Responsibilities:

Coordinates work with regulatory agencies and organizes project schedules with clients, project geologists, and field managers.

Phase I and Phase II Environmental Site Assessments

Design and Management of Site Investigations

"E"-Designations

Site Supervision and Remediation

Environmental Assessment Statements

Mold testing

Air Quality/control

Technical review of assessment reports, remedial action plans, mold investigations

Remedial Action:

Implemented numerous Remedial Action Plans. Supervised the construction and managed the operation of numerous hydrocarbon and chlorinated solvent remediation systems for soil and groundwater.
