Appendix G	Qualifications of Environmental Professional(s)

EXECUTIVE SUMMARY

WCD Group (WCD) performed a Phase I Environmental Site Assessment (ESA) of the property located at 2435 Pacific Street, Borough of Brooklyn, New York City, New York. This ESA identifies Recognized Environmental Conditions (RECs) in conformance with the scope and limitations of ASTM Practice E 1527-13, as well as conditions that do not meet the threshold to be considered a REC but represent a significant existing or likely environmental liability (de minimis conditions and items outside the ASTM Phase I ESA scope are noted as appropriate). WCD's findings, conclusions and recommendations are summarized below and presented in Section 4.0.

Subject Property Description and History

The subject property is a 0.8-acre vacant parcel located in an urban setting, comprised of two contiguous tax lots (Lot 46 to the east and Lot 58 to the west). The property was undeveloped as early as 1887, and was first developed for commercial and manufacturing use prior to 1928. Available information indicates that the former structure on Lot 46 (demolished 2007) was occupied by a garage (gasoline tanks are noted), several manufacturing companies, a surgical supply store and a church, and the former structure on Lot 58 (demolished in the early 1980s) was occupied by a clothing manufacturer and several clothing retail stores. Historical commercial uses at adjoining properties have include several automotive repair facilities and a gasoline filling station. Potential impacts from historical on-site (and adjoining) commercial and manufacturing uses, and from likely historical underground storage tank (USTs), are considered to be RECs. No further investigation of historical records is recommended.

Identified Areas of Environmental Concern

Category	Specific Environmental Concerns	Recommendations
RECs *	Potential impacts from historical on-site (and adjoining) commercial uses, including potential USTs	Perform a comprehensive subsurface investigation at both property lots to document the presence or absence of contamination and any USTs
General Environmental Concerns	Potential demolition debris in subsurface	Properly manage any materials encountered during site development/use
	The subject property has an "E" designation for hazardous materials, air quality, and noise issues	Conduct site investigation under NYC Office of Environmental Remediation (OER) oversight
Non-Scope Considerations	On-site debris (including materials potentially containing asbestos or lead)	Dispose off-site, in accordance with any applicable local, state and federal regulations

** No Historical RECs or de minimis conditions were identified in connection with the property.*

1.0 INTRODUCTION

1.1 Purpose of the Investigation

This Phase I Environmental Site Assessment (Report) identifies recognized environmental conditions (RECs) and/or other significant environmental liabilities resulting from or associated with the storage, use, transport or disposal of hazardous or other regulated materials on the property described in Section 2.1.

1.2 Methodology

This Report has been prepared in conformance with the attached Scope of Services and with guidelines set by the American Society for Testing and Materials (ASTM) Method E1527-13 (no exceptions to or deletions from this practice have occurred). All work was performed under the direct supervision and responsible charge of a qualified environmental professional, following the requirements for “all appropriate inquiry” as defined in 40 CFR Part 312.

WCD Group (WCD) performed the following work:

1. Investigation of the subject property’s history and characteristics through the analysis of available physical settings maps, historical documents, local municipal records, and information provided by subject property representatives and/or other knowledgeable individuals.
2. Review of Federal, State, and/or Tribal regulatory-agency computer databases and printed records for documentation of potential environmental liabilities relevant to the property, consistent with (or exceeding) applicable ASTM requirements.
3. Inspection of the property by Victoria Panico of WCD on January 15, 2019. Elaine Frazier, an employee of Love Fellowship Tabernacle, Inc. (the current property owner) since circa 1998, was present during the site inspection.

1.3 Limitations

This Report is an evaluation of the property described in Section 2.1 below and is not valid for any other property or location. It is a representation of the property analyzed as of the dates that services were provided. This Report cannot be held accountable for activities or events resulting in environmental liability after the respective dates of the site inspection or historical and regulatory research.

This Report is based in part on certain information provided in writing or verbally by federal, state, and local officials (including public records) and other parties referenced herein. The accuracy or completeness of this information was not independently verified. Unless specifically noted, the findings and conclusions contained herein must be considered not as scientific certainties, but as probabilities based on professional judgment. Any limitations specific to the site inspection are detailed in Section 3.3.

1.4 Definitions

Definitions of some key terms found in this ESA are provided below.

Recognized Environmental Condition (REC)

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. A material threat is a physically observable or obvious threat, which is reasonably likely to lead to a release that is threatening and might result in impact to public health or the environment. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. De minimis conditions (see below) are not RECs.

Controlled Recognized Environmental Condition (CREC)

A REC resulting from a past release that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (legal or physical restrictions or limitations on the use of, or access to, a site or facility to reduce or eliminate potential exposure to remaining contaminants, or to prevent activities that could interfere with the effectiveness of a response action).

Historical Recognized Environmental Condition (HREC)

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

De Minimis Conditions

An environmental condition is considered “de minimis” when that condition generally does not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. Conditions determined to be de minimis are not recognized environmental conditions.

Sensitive Environmental Receptors

Sensitive Environmental Receptors (SERs) are valued physical (natural or human-made) or biological features that may be adversely impacted by environmental contamination, and where a discharge or release could pose a greater threat than a discharge or release to other less valued areas. SERs include (but are not limited to) potable supply wells, wetlands, and protected wildlife habitat.

2.0 SITE LOCATION AND PHYSICAL SETTING

This ESA was performed for the parcels of land (“subject property”) located at 2435 Pacific Street, Borough of Brooklyn, New York City, New York (identified as Borough of Borough-name tax lots: Block 1437, Lots 46 and 58). A Site Location Map is provided on Page 6, a Selected Site Features Map illustrating the layout of the property is provided on Page 7 and photographs are provided in Appendix A. Sources of information documenting physical-setting conditions are cited in Section 5.0 and site-specific topographic, geological, hydrological, wetlands and/or other maps are provided in Appendix B.

2.1 Description of Subject Property

The subject property is a rectangular-shaped 0.8-acre parcel located on the northern side of Pacific Street, comprised of two contiguous tax lots (Lot 46 to the east and Lot 58 to the west). The property is comprised primarily of vacant, grassy land. Gravel and paved surfaces are located along the western and southern property borders, respectively. Comprehensive observations from a physical inspection of the property are provided in Section 3.3.

2.2 Description of Adjoining and Surrounding Area Properties

The property is in an urban area comprised primarily of residential and industrial properties. Current uses of adjoining and surrounding area properties are summarized below:

Direction	Adjoining Use(s)	Vicinity Use(s)
North	• Institute for Community Living (northwest) • Atlantic House Men’s Shelter (north-central) • Vacant land (north-central) • Kings Hotel (northeast)	• Atlantic Avenue • Residential • Industrial
East	• J. Stone Design, Inc.	• Industrial • Transportation
South	• Residential (southwest and south-central) • Vacant commercial structure (former filling station and automotive repair facility, southeast)	• Residential • Mixed-use (commercial and residential)
West	• Brooklyn Funeral Home	• Residential • Mixed-use (commercial and residential)

2.3 Physical Setting

2.3.1 Topography

Local area topography is generally level. Surface relief in the immediate vicinity of the subject property is relatively uniform, with overall gentle downward slopes to the southeast, towards Jamaica Bay.

The USGS Topographic map providing coverage for the subject property indicates an approximate on-site surface elevation of 70 feet above mean sea level. No on-site structures are depicted on the map (the property is located in a developed area where only selected landmark buildings are depicted). The map

did not indicate the presence of any soil/gravel mining operations or unusual topographic patterns indicative of landfilling activities on the property. Observations made during the site inspection are in general agreement with conditions depicted on the map.

2.3.2 Local Geology and Hydrogeology

Soils and Bedrock

Soils in the vicinity of the subject property are likely to be derived from glacial till, which overlie thick glacial deposits of sand, gravel and clay (bedrock is located well below the surface at this portion of Brooklyn). Soil survey maps indicate that Urban Land, till substratum (0-3% slopes) soils are likely to be located on the property. The Urban Land designation identifies areas where at least 80% of the surface is covered by buildings, parking areas or other impervious structures, and specific soil characteristics are generally not well known. The presence of former on-site structures suggests that soils located on the property may have been altered by cutting, regrading and/or filling activities. No bedrock was observed on the property.

Groundwater

Soil survey data indicate generalized groundwater depths greater than 2 feet in Urban Land soils. Shallow groundwater flow in the vicinity of the property is likely to generally follow surficial topography and be in an overall southeasterly direction, toward Jamaica Bay (located approximately 3 miles from the property).

Site-Specific Information

WCD has not reviewed any reports or other information documenting site-specific subsurface conditions.

2.3.3 Surface Hydrology and Wetlands

No waterbodies or wet areas were observed on the subject property or in the immediate vicinity during the site inspection. Federal and state mapping data do not identify any classified surface waterbodies, wet areas, or regulated wetlands on or in the immediate vicinity of the property.

2.3.4 Sensitive Environmental Receptors

The review of maps and observations made during the site inspection indicate that no SERs are located on or in the immediate vicinity of the subject property.

Site Location Map

2435 Pacific Street
Borough of Brooklyn
New York City, New York

File No: AB19001.10

January 2019

Page 6

3.0 INVESTIGATION

3.1 Site History

The history of the subject property was researched by interviewing knowledgeable individuals and reviewing both standard ASTM historical sources (local agency records, historical maps, aerial photographs or city directories) and additional sources (if reasonably ascertainable and sufficiently useful, accurate, and complete considering the objective of the records review).

3.1.1 User-Reported Information

ASTM Practice E 1527-13, Section 6, requires that the User (the party seeking to complete the environmental site assessment [ESA] of the property) provide specific information to the Environmental Professional to meet the requirements for “all appropriate inquiry”. Michael McCarthy, representing Alembic Community Development (the User), has responded to a questionnaire provided by WCD, which requested information regarding the subject property as specified in Section 6. Mr. McCarthy stated that the subject property is an “E” designated site but otherwise had no specialized knowledge or experience, actual knowledge, or knowledge of commonly known or reasonably ascertainable information regarding: 1) information material to recognized environmental conditions or other environmental liabilities in connection with the property; 2) the results of a review of title and/or judicial records for environmental liens/AULs; or 3) reason(s) for a purchase price that does not reasonably reflect fair market value because of known or suspected contamination.

WCD assumes that Alembic Community Development requested performance of the Phase I ESA to qualify for one or more Landowner Liability Protections (LLPs) to CERCLA liability and to document potential environmental liabilities on the subject property.

3.1.2 Interviews

Elaine Frazier, an employee of Love Fellowship Tabernacle, Inc. (the current property owner) since circa 1998, was identified as a Key Site Manager (a person having good knowledge of the uses and physical characteristics of the subject property) and was interviewed regarding specific site conditions and recent uses, as well as the topics detailed in the User Questionnaire (see Section 3.1.1, above). Ms. Frazier stated that the former building on Lot 46 was demolished in 2007, was used as a church and community center between 2001 and 2006, and was formally occupied by a medical supply store. Ms. Frazier had no other specialized knowledge or experience, actual knowledge, or knowledge of commonly known or reasonably ascertainable information regarding potential environmental conditions and/or liabilities in connection with the property.

Pertinent information from interviews is provided in relevant report sections, where appropriate.

3.1.3 Ownership Records

Property ownership information, based on City Register records, is summarized below.

Tax Lot Parcel	Owner	Date of Ownership
Lot 46	Love Fellowship Tabernacle, Inc. (Current Owner)	12/28/2001
	East New York Pacific Co.	7/30/1991
	Broskan Realty Corp.	10/27/1966
	Jefden Realty Corp.	Unknown
Lot 58	Love Fellowship Tabernacle, Inc. (Current Owner)	12/28/2001
	East New York Pacific Co.	7/30/1991
	Kantor Brothers Neckwear	Unknown
	City of New York	7/7/1986
	Kantor Brothers Etc.	7/37/1984
	NYC Public Development Corp.	7/31/1984
	The City of New York	4/18/1979
	Commissioner of Finance of the City of New York	Unknown
	2402 Atlantic Ave Corp.	12/4/1947
	Duraldo Realty Co, Inc.	Unknown

3.1.4 Standard ASTM Historical Sources

A summary of environmentally significant information obtained from a review of standard historical sources is provided below. [Note: Any property outlines, as drawn by WCD on maps and/or photographs, are approximations.]

Sanborn Fire Insurance Maps

WCD reviewed historical Sanborn Fire Insurance Company Maps dated 1887, 1888, 1907, 1908, 1928, 1932, 1950, 1951, 1963, 1965, 1966, 1977-1983, 1986-1989, 1991-1996, and 2001-2007 (relevant copies of these maps are provided in Appendix C). [Note: 1907, 1928, 1950, 1966, 1977, 1981, 1983, 1986 and 1996 maps provide coverage only for limited portions of the surrounding area to the east and south].

1887- Municipal water is depicted as being available to the property. No petroleum or chemical
1928: bulk storage tanks are noted at the subject property or adjoining properties. The subject
property and northern adjoining properties are vacant. The eastern adjoining property is
vacant (1887), and then contains a dwelling (beginning 1888) and several commercial
structures labeled lime and cement storage and "slate works" (beginning 1908). Southern
and western adjoining properties are vacant (1887) and then contain either dwellings or
stores (specific uses are unknown, beginning 1888). The surrounding area is moderately
developed, primarily with dwellings and stores.

- 1932: Lot 46 now contains a single-story garage (capacity of 130 cars) with two gasoline tanks and Lot 58 contains a four-story loft structure. The northwestern and northern-central adjoining properties now contain four-story structures labeled lofts, and the northeastern adjoining property now contains a four-story structure occupied by "East New York Continuation School". The southeastern adjoining property is labeled as a filling station (three gasoline tanks are present) and a store, and the western adjoining property now contains a garage (one gasoline tank is present). The surrounding area is now highly developed, primarily with dwellings and stores.
- 1950-1951: The structure on Lot 46 is now occupied by an elevator and dumbwaiter factory with a small, single-story addition located to the north used for shipping purposes (the gasoline tanks are noted as "not used"). The northeastern adjoining property is now occupied by lofts. Two southern-central adjoining properties now contain automotive repair facilities, and the western adjoining property is now occupied by a wholesale drug store (the gasoline tank is no longer present). No other significant changes are noted.
- 1963-2007: The gasoline tanks on Lot 46 are no longer present and the structure is occupied by a lamp manufacturer (1963-1977), a necktie manufacturer (1978-1992), and a warehouse and exercise center (beginning 1993). Lot 58 is vacant beginning in 1987. The northwestern and northern-central adjoining properties are now occupied by a treatment center (beginning 2001) and a men's shelter (beginning 2004), respectively. The eastern adjoining property is now occupied by an automotive repair facility. The store located on the southeastern adjoining property is labeled as an automotive repair facility (beginning 1991) and the filling station is no longer present (beginning 2005). No other significant changes are noted.

City Directories

WCD reviewed historical city directories dated 1928, 1934, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980, 1985, 1992, 1997, 2000 and 2005 for the subject property and for several adjoining properties (data sources are provided in Appendix D). Occupants of the former on-site building on Lot 46 have included Al Autos Garage (1928), Excelsior Garage (1934), Dinowitz Motor Corp. and Garage (1934), "Hirsch JB Co Fcty" (1960-1965; a likely factory), and a surgical supply store (1997-2000). Occupants of the former on-site building on Lot 58 have included a clothing manufacturer and several retail stores (1928-1976).

A southeastern adjoining property at 2436 Pacific Street is identified as Williams Fredrick Gas & Service Station (1934), the southern-central adjoining property at 2418 Pacific Street is identified as an automotive repair facility (1949), and the western adjoining property at 2385 Pacific Street is identified as a garage (1928-1934) and an automotive repair facility (1928). No other uses of adjoining properties were identified that are likely to represent a significant environmental threat to the subject property.

Supporting information for the database review presented in Section 3.2 includes a non-ASTM database of potential automotive repair facilities, based on historical business directories. One site, an adjoining property to the southeast at 1727 East New York Avenue (“Lincoln Service Station”), has been identified as a potential automotive repair facility (1969-1995). This filling station was observed to be inactive during the site inspection.

3.1.5 Municipal and Regulatory Agency Records

City Register Records

New York City Register computerized ownership records for the subject property were reviewed on January 7, 2019. No information pertinent to the environmental integrity of the subject property was contained in these records. Readily available property ownership information is summarized in Section 3.1.3.

Assessor’s Office Records

New York City Assessor’s Office computerized data for the subject property were accessed on January 7, 2019 using the Center for Urban Research’s Open Accessible Space Information System (OASIS). According to these records, Lots 46 and 58 are comprised of vacant land (no on-site structures are noted). No other information pertinent to the environmental integrity of the subject property was present in these records.

Building Department Records

Block and Lot Records

New York City computerized Building Department Block and Lot records for the subject property were reviewed on January 10, 2019. No references were found to permits/documents potentially pertaining to the on-site storage or use of petroleum products or chemicals, or to activities potentially associated with the handling of hazardous materials. Summary lists of Building Department permits/documents for Lot 58 indicate that a new building was constructed circa 1901, alterations occurred in 1903, 1904 and 1993, and a demolition permit was issued in 1923. A certificate of occupancy issued for Lot 46 in 1929 indicates that an on-site single-story structure was utilized as an office and warehouse.

The subject property is indicated as an “E” designated site, which is a designation identifying potential environmental issues (related to either air quality, hazardous materials or noise) that may be associated with a specific property or a group of properties. Building Department permits may not be issued for redevelopment of identified properties until specific requirements are reviewed and approved by the NYCDEP Office of Environmental Remediation (OER). The subject property has received an E designation based on hazardous materials, air quality, and noise issues, which does not necessarily imply the presence of known or suspected hazardous materials, or releases of petroleum, on the subject property.

Environmental Control Board (ECB) Violations

A review of computerized Building Department records indicates there are no open ECB violations relating to the environmental integrity of the subject property.

Local Agency Interviews

NYSDEC

A request was made on January 7, 2019 to search available NYSDEC records for information regarding the subject property. No response from this agency has been received as of the date of this Report.

3.1.6 Previous Environmental Reports

WCD did not review any relevant previous environmental reports (site assessment, investigation, remediation or closure reports, or similar documents) for the subject property.

3.2 Review of Federal and State Agency Records

Federal and state computer databases and printed records were reviewed for documentation of environmental conditions and/or liabilities relevant to the property.

3.2.1 Methodology

The following ASTM Standard Environmental Record Sources (as available for the subject property's locality) were reviewed (search distances are consistent with, or exceed, ASTM requirements).

- Federal National Priority List (1.0 mile) and delisted National Priority List sites (0.5 mile)
- Federal SEMS (formerly CERCLIS) list and SEMS NFRAP site list (0.5 mile)
- Federal RCRA CORRACTS facilities list (1.0 mile)
- Federal RCRA non-CORRACTS TSD facilities list (0.5 mile)
- Federal RCRA generators list (subject/adjoining properties)
- Federal ERNS list (subject property)
- Federal, State, and Tribal Institutional Control / Engineering Control registries (subject property)
- State- and Tribal-equivalent NPL (1.0 mile)
- State- and Tribal-equivalent SEMS (0.5 mile)
- State and Tribal Brownfield and voluntary cleanup sites (0.5 mile)
- State and Tribal leaking storage tank lists (0.125 mile)*
- State (including locally administered) and Tribal registered storage tank lists (subject/adjoining properties)
- State and Tribal landfill and/or solid waste disposal site lists (0.5 mile)

* *The search distance for this ASTM database has been reduced due to the high level of development of the area in which the subject property is located.*

Additional Environmental Record Sources (as available for the subject property's locality) were reviewed to enhance and supplement the review of standard sources, including: state spill file records and MOSF lists, federal and state radon data (by local municipality as available) and wastewater discharge permits, and federal Toxic Release Information System (TRIS) and Facility Index System (FINDS) databases.

A copy of relevant portions of a database search conducted by Environmental Data Resources, Inc. (EDR) for WCD is provided in Appendix E. Not all sites contained in the attached database search may be referenced below; some sites may have been excluded based on either ASTM requirements, WCD's scope of services or professional opinion, and/or information obtained during the review of historical records and the site inspection. Some information may have been deemed to not be practically reviewable (e.g., records lack adequate address information). Sites or additional information not included in the database search may also be referenced based on WCD's knowledge of the subject property area.

WCD's opinion is presented for any sites identified within the specified approximate minimum search distances as to any possible impacts that might result in RECs in connection with the subject property, arising from the migration of contaminated soil, soil vapor and/or groundwater. Evaluation of potential impacts to the subject property is based on: distance and direction to the identified site; type of regulated materials and other relevant information found in available records; presence of intervening roadways and/or other physical conduits; local physical setting (topography, soil conditions, geology, hydrology, etc.); and other information known to WCD.

3.2.2 Findings of Regulatory Records Review

Federal Hazardous Waste-Contaminated Sites

The subject property is not identified on the United States Environmental Protection Agency's (USEPA): National Priority List (NPL) of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions; Superfund Enterprise Management System (SEMS, formerly known as CERCLIS) list of sites that are proposed to the NPL or that are in the screening and assessment phase for possible proposal to the NPL; SEMS-Archive list (formerly known as CERCLIS NFRAP), which are former SEMS sites that were delisted because no significant contamination was found, or because the site has been remediated; or Federal Brownfields list of sites with known or potential contaminants receiving federal cleanup funding. The property is not identified on available USEPA Institutional Control/Engineering Control registries.

No NPL sites are located within one mile of the property and no SEMS sites or delisted NPL sites are located within a half mile of the property.

State Sites

Inactive Hazardous Waste Disposal Sites

NYSDEC maintains a Registry of Inactive Hazardous Waste Disposal Sites (IHWDS), a state equivalent to the federal NPL, which are commonly referred to as "Registry" or "Superfund" sites. Sites are placed on the Registry if there is evidence that hazardous waste was disposed and NYSDEC and NYSDOH determine that a significant threat to public health is present. When a site has been remediated, it is reclassified or removed from the Registry (delisted) to indicate that the significant threat(s) has been addressed. Non-Registry sites may (but usually do not) also present significant threats. The subject property is not identified as a NYSDEC IHWDS site, and has not been listed as a site under investigation for inclusion in the IHWDS Registry (a state equivalent to the federal SEMS List).

No NYSDEC IHWD sites are located within one mile of the property.

Voluntary Cleanup, Brownfields Cleanup, and Environmental Restoration Programs

Significantly contaminated properties that are not Registry sites may be listed in NYSDEC database records based on participation in the Voluntary Cleanup (VCP), Brownfields Cleanup (BCP) or Environmental Restoration (ERP) NYSDEC environmental remediation programs. The subject property has not been identified as a NYSDEC remedial program site.

No participating properties are located within a half mile of the subject property.

New York Institutional and Engineering Controls

The subject property is not identified in NYSDEC Institutional and Engineering Control databases.

Federal Hazardous Waste Handlers

The SEMS database details facilities that report treatment, storage or disposal of hazardous waste (TSD facilities) or generation or transportation of hazardous waste. Facilities that have been notified by the USEPA to take corrective action regarding their handling of hazardous waste are classified as CORRACTS facilities.

CORRACTS and/or TSD Facilities

The subject property is not registered with the USEPA as a CORRACTS and/or TSD facility for hazardous waste or materials. No CORRACTS and/or TSD facilities are located within one mile of the property.

Generators or Transporters (Non-CORRACTS)

The subject property is not registered with the USEPA as a generator or transporter of hazardous waste. No generators or transporters of hazardous waste are located on adjoining properties.

Landfills and Solid Waste Disposal Facilities

The NYSDEC's Facility Register does not list the subject property as an active or inactive landfill or solid waste disposal facility.

The following relevant sites have been identified:

<u>Site Name</u>	<u>Status</u>	<u>Distance/Direction</u>	<u>Classification</u>
Aries Autoworld LTD	Inactive	0.08 mile, NE	Vehicle dismantling facility
Gershow Recycling of Brookly	Active	0.27 mile, SE	Mobile vehicle crushers
Bif Apple Auto Inc.	Inactive	0.35 mile, SE	Vehicle dismantling facility
F & S Auto	Inactive	0.48 mile, SE	Vehicle dismantling facility
Five Star Auto Rebulders Inc.	Inactive	0.46 mile, N	Vehicle dismantling facility

Based on a review of reported information, these sites are not likely to impact the subject property.

Chemical Bulk Storage (CBS)

The subject property and adjoining properties are not identified in database records as CBS facilities. Observations made during the site inspection did not indicate the presence of chemical bulk storage on the subject property or at adjoining properties.

Petroleum Bulk Storage (PBS)

Subject Property

The subject property is not identified in database records as either a regulated or an unregulated PBS facility. Observation made during the site inspection indicated the presence of a likely fill port (potentially associated with a former/abandoned underground storage tank [UST]) located in the sidewalk (see Section 3.2.2 Petroleum Storage). The capacity and status of this tank (abandoned, closed-in-place or removed) is unknown. No NYSDEC spills are reported for the subject property.

Adjoining Properties

The northwestern adjoining property at 2384 Atlantic Avenue (PBS Number: 2-602054) is reported as an unregulated facility that formerly contained a 1,080-gallon fuel-oil underground storage tank (UST) that was removed in 2006. The northern-central adjoining property at 2402 Atlantic Avenue (PBS Number: 2-608095) is reported as an unregulated facility that formerly contained a 3,000-gallon fuel-oil aboveground storage tank (AST) that was removed in 2002.

No open NYSDEC spill events are reported for these adjoining properties.

Major Oil Storage Facilities

The subject property is not listed with the NYSDEC as a major oil storage facility (MOSF). No MOSFs are located within a half mile of the property.

Federal Chemical and Petroleum Spills

The USEPA Emergency Response Notification System (ERNS) database details initial reports of releases of oil and hazardous substances as reported to federal authorities. There are currently no chemical or petroleum spills on record for the subject property.

State Chemical and Petroleum Spill and Leaking Underground Storage Tank Events

NYSDEC database records were reviewed to determine possible impacts from leaking tanks and other reported releases within an eighth mile of the subject property. No spill events are known to have occurred at the subject property.

Three closed spill events are report for northern adjoining properties. Spill number 0512499 was reported for the Institute for Community Living property in January 2006 due to a tank test failure. The tank was removed, contaminated soil was excavated and the spill was closed in October 2006 following confirmatory endpoint samples showing “no contamination”. Spill numbers 0514130 and 0514131 (reported for the Atlantic House Men’s Shelter property) were reported after approximately 100 gallons of

diesel spilled onto the roadway due to a “truck traveling over a sunken manhole cover and rupturing the saddle tank”. The spills were cleaned up and closed without state cleanup standards being met. Based on WCD’s review of reported information, these closed spill events are unlikely to have impacted the subject property.

No other relevant spill events were identified in database records.

Air Discharges

No NYSDEC permits for air discharges from the subject property are known to exist. No operations likely to require a NYSDEC air discharge permit were noted on the subject property.

Wastewater Discharges

No USEPA National or NYSDEC State Pollutant Discharge Elimination System (NPDES or SPDES) permit was identified for the subject property. No wastewater discharges are known to exist on the subject property. According to available information, the subject property has access to the municipal wastewater system. No adjoining properties are registered as NPDES or SPDES facilities.

Radon

Information on radon levels was obtained from New York State Department of Health (NYSDOH) documents. No regulatory standards for radon levels currently exist in New York State. The USEPA has established a guidance value (the level where mitigation measures may be appropriate) for radon concentrations of 4.0 or greater picoCuries/liter (pCi/l). Other regulatory authorities (e.g., OSHA) have established guidance levels that are directly related to specific site activities (a determination as to applicable radon guidance levels is beyond the scope of this report). Available radon information for the subject property’s vicinity is summarized below (all radon levels provided in picoCuries/liter [pCi/l]).

NYSDOH Radon Information	Borough of Brooklyn	New York City
Number of Homes Tested	474	1,478
Average Radon Level	1.24	0.92
Percent of Homes >4.0 pCi/l	11.0	7.3

These average radon levels are below the USEPA’s guidance value of 4.0 pCi/l and less than 15% of the homes tested in the subject property’s vicinity had levels above this guidance value. These data support the conclusion that elevated radon levels are not likely to be present on the subject property.

3.3 Site Inspection

3.3.1 Protocol

The site inspection was conducted on January 15, 2019 to address any potential concerns raised during the investigation of the site’s history (Section 3.1) and the regulatory agency records review (Section 3.2), and to identify any additional indications of contamination from the use, storage, or disposal of hazardous

or regulated materials. To the extent possible, site structures, vegetation, topography, surface waters, and other relevant site features were examined for any obvious evidence of existing or previous contamination or unusual patterns (e.g., vegetative stress, soil staining, surface water sheen, or the physical presence of contaminants), which would indicate that the environmental integrity had been or could be impacted.

Section 3.3.2 describes the physical characteristics of the subject property. Section 3.3.3 is divided into topics on specific environmental conditions or concerns, actual or potential, noted on the subject property during the site inspection. Section 3.3.4 describes the physical characteristics of adjoining properties as they concern the potential or actual environmental condition of the subject property.

A Selected Site Features Map illustrating the general layout of the subject property and the locations of specific areas of concern (if any) is provided on Page 7, and photographs of the subject property are provided in Appendix A.

3.3.2 Physical Characteristics of the Subject Property

3.3.2.1 Property

The subject property (comprised of two contiguous tax lots, Lot 46 to the east and Lot 58 to the west) is a rectangular-shaped 0.8-acre parcel, which has 350 feet of frontage on the northern side of Pacific Street and a maximum depth of 100 feet. The property is comprised primarily of vacant, grassy land. Gravel and paved surface areas are located along the western and southern property borders, respectively. Chain-link fences and concrete block walls define the property borders.

3.3.2.2 Structures

No structures are present on the subject property. No overt evidence of former on-site structures (e.g., foundation remains, supply wells, etc.) was observed during the site inspection.

3.3.3 Specific On-Site Environmental Conditions

Debris Areas

Scattered debris (likely demolition materials and household trash) are located throughout the property. Demolition debris is a potential source of materials containing lead and asbestos; no other materials are likely to represent a threat to the environmental integrity of the subject property.

Petroleum Storage

A metal cover (labeled "Tide Water Oil"), located off-site in the sidewalk approximately 10 feet from the southern-central property border of Lot 46, is likely to be a cover for a fill port, indicating the likely presence of a former/abandoned UST (potentially on the subject property). Historical maps show two gasoline tanks present on Lot 42 between 1932 and 1951. The capacity and status of this tank (abandoned, closed-in-place or removed) is unknown. No other small quantities of petroleum products, aboveground storage tanks or indications of underground petroleum storage tanks (e.g., fill ports or vent pipes) were observed on the subject property.

Chemical Storage

No evidence of the on-site storage or use of chemical products (small containers, aboveground tanks or indications of underground tanks) was observed on the subject property.

Asbestos-Containing Materials and Lead Based Paint

The likely dates of construction of the former on-site buildings (pre-1950) suggests that asbestos-containing materials (ACM) and lead-based paint (LBP) may have been used during initial building construction and/or during subsequent maintenance work. According to available information, no asbestos or lead based surveys have been conducted on the subject property. All structures have since been demolished. Debris observed at the surface may be from former on-site buildings, and demolition debris may be present in the subsurface; such materials could contain asbestos or LBP.

Wastewater Discharges

The term “wastewater” indicates water that: (1) is or has been used in an industrial or manufacturing process; (2) or is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant; (3) or conveys or has conveyed sewage (water originating on or passing through or adjacent to a site, such as stormwater flows, is not generally considered to be wastewater). No evidence of wastewater discharges into drains, ditches, or streams on or adjacent to the property was observed during the site inspection.

Stormwater Management and Exterior Drains/Sumps/Conduits

No exterior stormwater catch basins, drains, sumps, or other potential significant conduits to the subsurface, or indications of liquid discharges into drains, ditches, or streams on or adjacent to the property, were observed on the subject property.

Staining/Corrosion/Leaks

No evidence of corrosion, leaks, or staining (indicative of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products onto the subject property, including paved areas) was observed during the site inspection.

Topographic Irregularities

No overt topographic irregularities (e.g., sinkholes or berms) indicative of the presence of non-natural materials (including debris) in the subsurface were observed on the subject property.

Vegetative Features

No overt areas of stressed or dying vegetation indicative of the presence of contaminants in surface or subsurface soils were observed on the subject property.

Pits, Ponds, or Lagoons

No pits, ponds, or lagoons exhibiting evidence (e.g., discolored water, distressed vegetation, obvious wastewater discharge) of holding liquids or sludge containing hazardous substances or petroleum products were observed on the subject property.

Surface Waters

No surface water bodies are located on the subject property.

Odors

No unusual odors indicative of the presence of contamination were noted during the site inspection.

PCBs

Polychlorinated biphenyls (PCBs) were widely used in equipment such as transformers, capacitors, and hydraulic equipment until 1979 when the USEPA regulated their use in this capacity. No equipment likely to contain PCBs was noted on the subject property.

3.3.4 Environmental Concerns at Adjoining and Nearby Properties

Adjoining and nearby properties were observed from the subject property and from public thoroughfares to identify any recognized environmental conditions or other potential environmental concerns. No conditions likely to significantly impact the subject property were observed during the site inspection.

3.4 On-Site Environmental Investigations

On-site environmental sampling was not conducted by WCD in conjunction with the Phase I ESA.

4.0 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

WCD Group (WCD) has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 to identify recognized environmental conditions (RECs), historical RECs (HRECs) and/or other significant environmental liabilities resulting from or associated with the storage, use, transport, or disposal of hazardous or regulated materials at the property located at 2435 Pacific Street, Borough of Brooklyn, New York City, New York. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

Summary information regarding RECs is presented in Section 4.1. WCD's findings, conclusions and recommendations regarding RECs, other potential environmental liabilities associated with the property, and de minimis conditions are presented in Sections 4.2 through 4.5.

4.1 Recognized Environmental Conditions

Significant Data Gaps

The Environmental Professionals preparing this report have not identified any significant data gaps that affect their ability to identify RECs.

Overview of Identified RECs

This assessment has revealed evidence of the following RECs in connection with the property:

- Potential impacts from historical on-site (and adjoining) commercial uses – Section 4.2
- Potential historical on-site underground storage tanks (USTs) – Sections 4.2 and 4.3

Historical RECs and De Minimis Conditions

This assessment has revealed no evidence of Historical RECs or de minimis conditions in connection with the property.

4.2 Site History

The property was undeveloped as early as 1887, and was first developed for commercial and manufacturing use prior to 1928. The former structure on Lot 46 (demolished 2007) was occupied by a garage (gasoline tanks are noted), manufacturing companies, a surgical supply store and a church, and the former structure on Lot 58 (demolished in the early 1980s) was occupied by a clothing manufacturer and several clothing retail stores. Historical commercial uses at adjoining properties have include several automotive repair facilities and a gasoline filling station. Potential impacts from historical on-site (and adjoining) commercial and manufacturing uses, and from likely historical USTs, are considered to be RECs. The site has "E" designations for hazardous materials, air quality and noise.

No further investigation of historical records is recommended. A subsurface investigation should be conducted under the NY City Voluntary Cleanup Program to document site conditions.

The potential exists that debris from the demolition of former on-site structures may be present in the subsurface (such debris could contain lead, asbestos, or other regulated materials).

Any future development activities at the property should be conducted with an awareness of the potential presence of subsurface debris and provision should be made for the proper management of any materials that warrant special handling.

4.3 Review of Regulatory Records

The subject property was not identified during the review of regulatory agency records. No adjoining or nearby properties were identified that are likely to impact the environmental integrity of the subject property.

No further investigation of regulatory records is recommended.

4.4. Relevant Site Observations and General Environmental Concerns

A likely fill port for a potential UST is located off-site in the sidewalk near the southern-central property border of Lot 46. Historical maps show two gasoline tanks present on Lot 42 between 1932 and 1951. The capacity and status of this tank (abandoned, closed-in-place or removed) is unknown. Releases from the UST may have impacted the subject property.

The presence or absence of any USTs and related contamination conditions should be evaluated during the subsurface investigation recommended in Section 4.2.

4.5 Non-scope Considerations

Environmental issues and/or concerns that are outside the scope of ASTM E 1527-13 are discussed below, as warranted.

Debris (potential demolition materials and household trash) is located throughout the property. Demolition debris is a potential source of materials containing lead and asbestos; no other materials are likely to represent a threat to the environmental integrity of the subject property.

It is recommended that debris materials be segregated into appropriate waste streams (i.e., those which can be disposed of as non-regulated solid waste and those which require special handling) and be disposed of off-site, in accordance with any applicable local, state and federal regulations.

6.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

The following statements are required by 40 CFR 312.21(d) of the environmental professional(s) responsible for conducting and preparing the Phase I Environmental Site Assessment report.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

and

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 8 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 09/30/2018 has revealed that there are 5 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/12/2018 has revealed that there are 3 NY LTANKS sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 2 NY VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/12/2018 has revealed that there are 20 NY Spills sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 69 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY DRYCLEANERS: A listing of all registered drycleaning facilities.

A review of the NY DRYCLEANERS list, as provided by EDR, and dated 03/07/2018 has revealed that there is 1 NY DRYCLEANERS site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ROBO DRY CLEANERS Facility Id: 2-6105-00610	2103 BERGEN STREET	WSW 1/8 - 1/4 (0.246 mi.)	Z132	260

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

BELMONT STATION	BELMONT, WILLIAMS, A	SE 1/2 - 1 (0.508 mi.)	147	273

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past

EXECUTIVE SUMMARY

sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

NY RGA LF: The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Conservation in New York.

A review of the NY RGA LF list, as provided by EDR, has revealed that there are 6 NY RGA LF sites within approximately 0.5 miles of the target property.

the property was to be developed for affordable housing units. They were onsite to remove an abandoned 4,800-gallon fuel oil UST (See PBS #2-237973) and noted contaminated soil around and below the tank. Vought noted that DEC Ahmed was the project manager and that CSL would be drafted by Vought and signed by Ahmed. Vought drafted CSL with one month due date and the following requirements: 1)delineation of soil and groundwater (if applicable) contamination 2)collection of endpoint samples 3)strong recommendation for installation of SSDS and VB 4)Updating PBS Registration 2-237973 to reflect current closed status of UST (as per DEC Falvey this was required, PBS registration also expired as of 7/20/92). 5)cc to FLS Ahmed 6)advisement that site should not be developed until RAP approved by DEC. Vought sent letter with above requirements to address provided by FLS Ahmed: Our Lady of Loreto Catholic Church c/o Progress of Peoples Development Corporation 191 Joralemon Street Brooklyn, NY 11201 Attention: Claire Hilger 11/7/11-Fu-Intern Fu completed summary of reports: SUMMARY UST CLOSURE REPORT & REMEDIAL ACTION PLAN (Fleming Lee Shue)- 08/17/11. On Jan 05 2011, at request of L Riso & Sons, Fleming-Lee Shue performed an UST field investigation in order to remove the tank but end in finding approximately 30 by 30 feet in size and extending approximately 16-37 feet below grade petroleum-impacted area. Then a spill was reported. Between June and July 2011, the UST removal activities was observed, including the removal of the decommissioning material, consisting of cement slurry, and the removal of the tank and associated piping. A 3 section was required to remain in the excavation due to structural and shoring concerns. Excavation and removal of 1249 tons of petroleum-impacted soil (to depth approximately 32ft-bgs) were conducted. On July 8 2011, 8 soil samples were collected per NYSDEC s request. 3 VOCs, Ethylbenzene, Xylene, and Isopropylbenzene, were detected above standard at EP-BE; Ethylbenzene was detected above SCO at EP-BW. One MW will be installed at the site. After installation, the MW will be sampled. If the gw is not found to be contaminated, Closure Report will be submitted; if the gw is contaminated, two additional MWs will be installed downgradient. SUMMARY SPILL CLOSURE REPORT (Tenen Environmental)-Sept 2011. Based on the removal of all structurally-accessible soil, documentation that gw has not been impacted, the incorporation of vapor barrier and SSDS and composite cover system over the area of UST, Tenen requests that this spill be closed. The subsurface investigation dated January 2011 consisted of: 1)Excavation of the soil in the area of the UST, visual and olfactory observations, and PID measurements of organic vapors; and 2) Installation of five (5) soil borings adjacent to the UST and sampling and analysis of soil. The results of the investigation, which are detailed in FLS letter dated January 20, 2011, identify a petroleum-impacted area approximately 30 by 30 feet in size and extending to approximately 16 to 37 feet bgs. Based on the results of the January 2011 subsurface investigation, FLS prepared a January 21, 2011 Remedial Action Work Plan (RAWP). The RAWP described the following remedial actions: installation of sheeting and shoring, excavation of non-impacted soil, tank removal, excavation and disposal of petroleum-impacted soil, post excavation soil sampling, installation of a vapor barrier and SSDS, and preparation of a closure report. June-July 2011 Tank Closure / Interim Remedial Measures On August 17, 2011, FLS submitted an Underground Storage Tank Closure and Remedial Action Report. July-August 2011 Supplemental Remedial Investigation: MW-1, in the center of the

OUR LADY OF LORETO CHURCH (Continued)

U000402330

excavation was installed on July 29, 2011. The soil boring was advanced using a Sonic drill rig with continuous samples collected starting at a depth of 30 feet bgs and continuing to the groundwater table. 9 samples were collected and analyzed. The analytical results indicate the presence of several petroleum-related VOCs in seven (7) of the nine (9) soil samples collected. All detected VOCs were below the Part 375 Unrestricted Use and Protection of Groundwater SCO's and CP-51 Fuel Oil SCLs except ethylbenzene, isopropylbenzene and xylenes in samples collected from 43-45 and 48-50 feet bgs. The analytical results detected several SVOCs in eight (8) of the nine (9) soil samples collected. SVOCs detected in the soil samples primarily included polycyclic aromatic hydrocarbons (PAHs). All VOCs in MW-1 were detected at concentrations below the Class GA Standards except chloroform, which was detected at 21.9 parts per billion (ppb), above the Class GA Standard of 7 ppb. No SVOCs were detected above the NYSDEC Class GA Standards except phenol. The proposed redevelopment of site includes construction of 4 buildings of 8 dwellings each for a total of 32 dwelling units, designed as the Pacific St Cluster. The area directly above the impacted soil will be redeveloped as a paved parking area. The following potential exposure routes have been identified: direct contact & inhalation of VOCs from soil and inhalation of VOC from soil vapor. A vapor barrier and SSDS (73 wide *52 deep) will be incorporated into the two buildings closest to the church. The principal components of the SSDS are a layer of gravel beneath the basement slab, a suction pit within the gravel layer, solid-construction piping from the suction pit to an exterior suction fan on the roof and monitoring points through the basement slab. The system has been designed in general accordance with NYSDOH's Guidance for Evaluating Soil Vapor Intrusion in the State of New York, October 2006 (NYSDOH Soil Vapor Guidance), including Section 4.2.2, System-specific recommendations. Several types of composite cover systems will be employed to prevent direct contact with and mitigate inhalation of residual petroleum constituents. "

Remarks: "Contaminated soil found at construction site. Cleanup pending assessment and pre-plan."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

FACTORY
2465 ATLANTIC AVE
001
HOWARD KARP
"contact at Petro is: Sangesland spoke to Mr. Karp. Yesterday during a fuel delivery they noticed oil coming through the wall around the fill line. Probably oil in the soil under the sidewalk cement along the remote fill pipe line. Mr. Karp said that Petro would be repairing the pipe, but Sangesland specifically wanted to know who would do the soil digout/remediation once the sidewalk was opened up and the fill line exposed. Mr. Karp said Petro would come back on Nov 20th to make the repairs. There is a chance that the sidewalk fill line is installed through a coal chute into the basement wall and NOT through soil. When Petro opens up the sidewalk on Nov 20th they will call the DEC to confirm that either No soil was impacted OR there was soil impact and they will hire a company to do the cleanup. 12/19/08 Spoke with Mr. Karp. Mr. Karp told me the spill in the basement was cleaned up with speedy dry. He has no idea about any soil contamination at the site. I told him to find out exactly where was the leak on fill line and if the leaky portion of the line runs underground through the soil. He said he would contact Petro oil to find out the information. Letter was sent to Apex Airtronics Inc 2465 Atlantic Avenue Brooklyn, NY 11207-2305 Attn: Howard Karp (sr) 03/31/09 Performed site visit today. Tank is totally vaulted, i.e. can't be seen without taking the top cement off. No PBS registration found though the capacity is above 1,100 gallon. Tightness testing required. As per Mr. Karp, the spill was minor quantity from the fill line in the tank room. Spill was on the concrete floor that was cleaned up by Petro Oil. Fill line has been replaced. No evidence of spill exists in the tank room. I told Mr. Karp to register the tank and have the tightness testing done. (sr) ** Case closed as there is no evidence of oil spill present at the site ** S.R."

Remarks:

"FILL PIPE IS LEAKING AND SEEPED THROUGH THE WALL; PETRO ON SCENE"

Tank Info:

Tank Number: 01
Tank Id: 228149
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

G03 - Tank Secondary Containment - Vault (w/o access)
I05 - Overfill - Vent Whistle
J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None
E03 - Piping Secondary Containment - Vault (without Access)
C01 - Pipe Location - Aboveground
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
B00 - Tank External Protection - None
L00 - Piping Leak Detection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)

Tank Location: 2
Tank Type: Steel Tank in Concrete
Tank Status: Tank Converted to Non-Regulated Use
Pipe Model: Not reported
Install Date: 01/01/1956
Capacity Gallons: 550
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "No CSL was sent to this owner. The consultant has already done most of the work necessary and they said they would send in the results when the end point sample results come back from the lab. 03/06/06 Sharif Rahman- I tried to call Nelson Abramas,(908)947-0274 and left messege to his voice mail to follow up about the status of the vacant lot. 04/06/06 Sharif Rahman- CSL was sent via mail and facsimile to NYC Economic Development Corp. 110 William Street New York, NY 10038 Attn: Kay Zias, Fax:(212)312-3989. 04/25/06 Sharif Rahman- Rec'd tank closure report from Metcalf & Eddy of New York,Inc. One 550 gallon #2 UST was removed from the site. Approx. 12 tons of petroleum contaminated soil was removed from the site.No VOC was detected above TAGM limit in the post excavation end point samples.Minor exceedances of SVOC are similar to the fill material observed during the Phase II site assesment.NFA required."
Remarks: "While removing an underground tank found holes in the tank. The contaminated was stock piled and samples have been taken. More clean up will be done depending on the test results. Excavation was lined with plastic then filled in with clean soil."

AUTO REPAIR SHOP (Continued)

S108296635

Spiller Name: LINDA CALABRESE
Spiller Company: AUTO REPAIR SHOP
Spiller Address: 1649 EAST NEW YORK AVE
Spiller Company: 001
Contact Name: LINDA CALABRESE
DEC Memo: "12/18/06 - Raphael Ketani. Contaminated soil was found on 12/8/06 after the property was sold. The seller, Linda Calabrese (718) 241-9134, was forced to clean up the site. The site is an auto repair shop. There is no PBS case. I received the phase II report on 12/15/06. The report was generated by Vertex Environmental Services, Inc. (781) 952-6000. The report states that the site has been used as an auto repair shop since the 1940s. The 15 borings drilled encountered historical waste just below the concrete floor of the site which consisted of wire, railroad ties, gravel, asphalt, rubber, and brick. The site sits at approximately 65 feet above sea level, according to the Site Locus Map, Figure 1. Groundwater should be at about 10 feet above sea level in this area, according to published reports from the U.S. Geological Survey. However, the site is about 55 feet above the water table. Strong petroleum odors with PID readings of 75 to 487 ppm were encountered in the field at borings B-2, B-5, B-9, B-12, and B-14, with lesser odors at B-13. There were VOCs in the soil samples from B-5 (6) and B-13 (7), but they were well below the TAGM RSCO standards. Soil samples from borings B-3, B-9, B-13, and B-14 had many PAH hits ranging from several thousand PPB to a high of 41000 ppb. Most of these hits are the benzo series of PAHs, with anthracene, chrysene, flouranthene, indeno(1,2,3-c,d)pyrene, phenanthrene, and pyrene. The great majority of the PAH hits exceeded the TAGM standards. My analysis of the phase II investigation report is that the analytical environmental impact of car repair work that has taken place at the site is minimal and does not require remediation. The rubber, wire, railroad ties, brick, and asphalt are historical fill that is similar to historical fill that has been buried over the past century in many parts of NYC. During the 1940s, the former owners may have buried junked car parts and debris on site. The site may not have always been paved as it is now. They probably spilled some oil and gas on the ground at that time. Hence the odors from some of the soil samples. However, the water table is 55 feet below the site. Soil samples from sites nearby have indicated that this auto repair shop probably sits atop a thick layer of boulder glacial till. The till consists principally of a mixture of sand, silt, and clay, with some cobbles and boulders. This would explain the drillers hitting refusal at depths of from 3.5 feet to 8.5 feet. The thick glacial till also has good a absorbtive capacity for oil and other contaminants, and so the groundwater is probably not affected by the spillage at this site. Lastly, the high PAH hits at four of the boring sites are probably from buried incinerator ash or coal combustion ash, as most of the analytes are of the benzo series with chrysene and pyrene - all are combustion products. The boring logs B-9 to B-14 even describe blackish soils, which is suggestive of the presence of ash. In summation, the phase II report was found to be adequate for describing the investigation and for serving as a report of the site conditions. The only problem is that the waste oil tank is unregistered. I called up Ms. Calabrese (718) 241-9134 and told her she had to get the tank registered. She asked me to send her the form. I sent the form out today. 1/5/07 - Raphael Ketani. Ms. Calabrese called to ask whether the waste oil tank registration had gone through. I looked it up in the PBS

database and found registration #2-610441 for a 275 gal. waste oil tank at the site. I told her the tank registration was in-place. Based upon the phase II investigation report generated by Vertex Environmental Services and the PBS registration, I am closing the spill case. 1/23/07 - Raphael Ketani. I received a call from Diego Pinzon of HSBC Bank (718) 297-4169. He said that the bank was holding money in escrow for Ms. Calabrese and wont release it unless they receive a letter from the Department stating that the site has been cleaned up. I told Mr. Pinzon that I will send an NFA letter. He said that his address was HSBC Bank, 147-02 Hillside Avenue, Jamaica, 11435. Linda Calabrese's address is 2220 E. 71 Street, Brooklyn, 11234. I sent the NFA letter. "

Remarks: "ON NOVEMBER 7TH CALLER SOLD AUTO SHOP, BUT A TESTING COMPANY DOING SOIL TESTING FOUND CONTAMINATED SOUIL AND CALLER HAS TO HAVE IT TAKEN CARE OF:"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was
TIBBE LOT WAS A REPAIR SHOP. ACCORDING TO NYCT, LOT CONTAINED APPROX.
20 DRUMS OF WASTE OIL. NYCT WAS SUPPOSED TO START USING THE LOT TODAY
TO STORE BUSES, WHEN THEY NOTICED THAT MOST OF THE DRUMS WERE GONE
EXCEPT FOR A FEW CRUSHED ONES. THERE APPEARED TO BE STAINING AROUND
THE STORM WATER DRAIN ON THE PROERTY. NYCT (SANJIV'S PAGER #
917-651-4670) OBSERVED SERVERAL INCHES OF WASTE OIL IN THE STORM
WATER DRAIN. DEP NOTIFIED. DEP REQUESTED THAT I NOTIFY ENCON POLICE.
9/29/00 SITE VISIT. MET WITH SANJIV KURAY (NYCT), CECIL MORRIS
(CARAVAN TRANSPORTATION), ALDO VASAPOLLI (CONTRACTOR), MARK TIBBE
(DEC). MR. VASAPOLLI INFORMED TIBBE THAT THERE WERE SEVERAL DRUMS
ONSITE THAT HIS COMPANY TOOK DURING THE CLEANING OF THE LOT. MOST OF
THEM WERE EMPTY AND WERE TAKEN BACK TO HIS YARD. ONE CONTAINED WATER,
ONE CONTAINED ANTI-FREEZE, ONE CONTAINED WINDSHIELD WASHER FLUID, ONE
CONTAINED A LITTLE WASTE OIL AND TWO CONTAINED WHAT APPEARED TO
HYDRALIC OR TRANSMISSION FLUID. NONE OF THE DRUMS WERE FULL.
ACCORDING TO MR. VASAPOLLI, ALL BUT THE HYDRALIC FLUID WERE DUMPED IN
THE STORM WATER DRAIN ON THE PROPERTY. THE HYDRALIC OIL DRUMS WERE
PUNCTURED BY THE BACKHOE WHILE IT WAS CLEANING SOME DEBRIS. THE
RESULTING SPILL WAS SWEEPED INTO THE SAME DRAIN. TIBBE PLACED A CALL TO
IRA TURRET (OWNERS ATTORNEY) AND INFORMED HIM THE THE SPILL AND THE
DRAIN WOULD HAVE TO BE CLEANED. HE INFORMED TIBBE THAT HE WAS ALREADY
WORKING ON GETTING A CONTRACTOR, BUT HE WOULD LIKE A LETTER DIRECTING
THEM WHAT TO DO. THE OWNER OF THE PROPERTY IS LAWRENCE GREEN. As per
10/19/00 letter from Ira Turret, the spill was cleaned by Dola
Construction."
Remarks: "PARKING LOT - NYC TRANSIT WAS SUPPOSED TO OCCUPY THIS TODAY, BUT
THERE A LOT OF DRUMS ON SITE - SUBJ MAY HAVE DUMPED THE OIL INTO
SEWER"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking

environmental facility information found across the State.

AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- . Waste code: D001
- . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 11/14/2018	Source: EPA
Date Data Arrived at EDR: 11/27/2018	Telephone: N/A
Date Made Active in Reports: 12/07/2018	Last EDR Contact: 12/28/2018

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

Data Release Frequency: Varies

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

UTM X (Meters):	592540.4
UTM Y (Meters):	4503095.0
Elevation:	68 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940597 BROOKLYN, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Mesozoic
System: Cretaceous
Series: Upper Cretaceous
Code: uK (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS RADON

AREA RADON INFORMATION

Federal EPA Radon Zone for KINGS County: 3

Note: Zone 1 indoor average level > 4 pCi/L.

: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.

: Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for KINGS COUNTY, NY

Number of sites tested: 51

<u>Area</u>	<u>Average Activity</u>	<u>% <4 pCi/L</u>	<u>% 4-20 pCi/L</u>	<u>% >20 pCi/L</u>
Living Area	0.750 pCi/L	100%	0%	0%
Basement	1.370 pCi/L	88%	10%	2%

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database

Source: Department of Environmental Conservation

Telephone: 518-402-8072

These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

APPENDIX F

Scope of Services

Phase I Environmental Site Assessment
Scope of Services

Task 1.0 Description of Subject Property and Surrounding Area Physical Settings

- 1.1 Description of property location, topography, geology, hydrogeology, surface hydrology and wetlands
- 1.2 Identification of adjoining and surrounding area properties

Task 2.0 Historic Investigation (Review of Applicable, Reasonably Ascertainable Sources)

- 2.1 Review of historic maps and plans (to the earliest date of available maps)
- 2.2 Review of aerial photographs
- 2.3 Review of local records (e.g., building department), including cursory ownership information and City Directories, if applicable.
- 2.4 Interviews with User, Key Site Manager, and other knowledgeable individuals
- 2.5 Review of User or property owner provided documents and/or analytical results

Task 3.0 Federal and State Regulatory Agency Records Review

- 3.1 Review of ASTM-required federal, state, and/or tribal databases at required search distances and analysis of the relationship of each Site (e.g., upgradient, downgradient) to the Subject Property;
 - Federal NPL (1.0 mile) and delisted NPL sites (0.5 mile)
 - Federal CERCLIS list and CERCLIS NFRAP site list (0.5 mile)
 - Federal RCRA CORRACTS facilities list (1.0 mile)
 - Federal RCRA non-CORRACTS TSD facilities list (0.5 mile)
 - Federal RCRA generators list (subject/adjoining properties)
 - Federal ERNS list (subject property)
 - Federal, state, and tribal institutional control/engineering control registries (subject property)
 - State- and tribal-equivalent NPL (1.0 mile)
 - State- and tribal-equivalent CERCLIS (0.5 mile)
 - State and tribal Brownfield and voluntary cleanup sites (0.5 mile)
 - State and tribal leaking storage tank lists (0.5 mile)
 - State (including locally administered) and tribal registered storage tank lists (subject/adjoining)
 - State and tribal landfill and/or solid waste disposal site lists (0.5 mile)
 - NYC E-Designation List
- 3.2 Review of additional federal and state environmental databases:
 - State spill file records (0.5 mile)
 - State MOSF list (0.5 mile)
 - State radon data (by local municipality as available)
 - Federal and state wastewater discharge permits (subject/adjoining properties)
- 3.3 Interviews (as applicable) with government representative regarding regulatory compliance

Task 4.0 Physical Inspection

- 4.1 Inspection of property and structures for potential contamination and contaminant sources, including:
 - Hazardous/medical/radioactive waste storage and disposal areas
 - Petroleum and/or chemical storage (including tanks and associated piping)
 - Spatial extent and current condition of suspect asbestos-containing materials (ACM), suspect lead-based paint (LBP) and mold
 - Site conditions that may indicate the potential for radon and lead in drinking water
 - If ACM or LBP is identified as presumed or suspect, provide estimates of the quantity of such material and costs for abatement to the extent feasible.
 - Wastewater and stormwater discharge systems
 - Equipment potentially containing polychlorinated biphenyls (PCBs)
- 4.2 Inspection of property for the following:
 - Presence of contamination (e.g., debris, soil staining)
 - Evidence of prior structures and uses
 - Unusual or man-made topographical formations (e.g., berms, sinkholes)
 - On-site surface water quality
 - Evidence and location of wells
 - Vegetative stress
- 4.3 Identification of overt on-site sensitive environmental receptors (e.g., wetlands)
- 4.4 Limited inspection of adjoining and nearby properties for:
 - Potential off-site sources of contamination
 - Sensitive environmental receptors
- 4.5 If appropriate, interviews with owners/tenants/operators and other available knowledgeable individuals present during physical inspection

Task 5.0 Preparation of Written Summary Report

- 5.1 Summary of findings of Tasks 1.0 through 4.0
- 5.2 Identification of any Recognized Environmental Conditions and/or other potential concerns
- 5.3 Conclusions and Recommendations, including any specific additional investigatory or remedial work
- 5.4 Production and transmission of the final Phase I ESA to Client in PDF format, and hard copy if requested.

APPENDIX G

Qualifications of Environmental Professionals

Scott Spitzer
Director of Environmental Investigations
sspitzer@wcdgroup.com

PROFESSIONAL EXPERIENCE

Director of Environmental Investigations, WCD Group, Poughkeepsie, NY 2017 - Present
Director of Environmental Investigations, Ecosystems Strategies, Poughkeepsie, NY 2013 - 2017

Management and quality review of environmental site assessments, technical environmental investigations, and remedial projects including Brownfield sites. Conducts research to obtain field and regulatory information about the environmental status of a designated area. Reviews all documents prepared by WCD Poughkeepsie Office to ensure consistency and technical accuracy. Responsibilities associated with the preparation of site assessments include: investigating site histories, conducting facility inspections, reviewing regulatory agency records, documenting facility compliance with relevant State and Federal regulations, and preparing reports. Management of complex technical environmental investigations (including sites currently on the NYSDEC Registry of Inactive Hazardous Waste Sites), including coordinating subcontractors, overseeing fieldwork, designing and implementing sampling plans, preparing technical reports, and interfacing with regulatory agency personnel.

Senior Project Manager, Long-Form Reports, The 451 Group, Inc., New York, NY 2008-2011

- Managed the production of over 150 technical white papers.

Senior Project Manager, Ecosystems Strategies, Inc., Poughkeepsie, NY 2001 - 2008

- Conducted Environmental Site Investigations and prepared final site assessment reports. Over 300 Investigations and Final Reports completed as lead manager.
- Investigated site histories.
- Conducted facility inspections.
- Reviewed regulatory agency records.
- Documented facility compliance with relevant State and Federal regulations.
- Conducted Phase II Technical Environmental Investigations and prepared technical reports.
- Researched field and regulatory information.
- Managed tank removals.
- Coordinated subcontractors.
- Oversaw fieldwork and handled collection of material, soil and water samples.

Select Projects

Scenic Hudson Land Trust, Inc., Beacon Waterfront Project, Beacon, NY

ESI conducted soil and groundwater investigations on a former MOSF and adjacent scrap yard. Projects involved soil remediation of both petroleum and PCB-contaminated soils and long-term groundwater monitoring. Both projects were classified as Voluntary Clean-Up projects by the NYSDEC and closure status was attained.

Sakmann Restaurant Corporation Site, Fort Montgomery, NY

Conducted Phase I Environmental Site Assessment and Phase II Subsurface Investigations for former filling station and automotive repair garage contaminated by solvent and waste-oil discharges to an on-site drywell.

Designed and implemented a sampling plan for soils impacted by chlorinated hydrocarbons, petroleum, and metals. Created Workplan (in coordination with the NYSDEC Voluntary Cleanup Program) for remediation of on-site contamination and long-term sampling of on-site groundwater monitoring wells.

Staten Island Marina Site, Staten Island, NY

Conducted Phase I Environmental Site Assessment and Phase II Subsurface Investigation for an active marine facility engaged in boat painting and engine maintenance activities. Coordinated the delineation of metals contamination over a three-acre area and analyzed potential impacts from on-site fill materials. Submitted remedial and budgetary analysis in support of regulatory agency approval for conversion of boatyard into a public park.

Octagon House Development Site, Roosevelt Island, NY

Conducted Phase I Environmental Site Assessment and Phase II Subsurface Investigations at the former site of a large, urban hospital. Interpreted the results of geotechnical studies, extended test pits, and conducted extensive soil sampling, to document subsurface soil conditions in support of client's application to the U.S. Housing and Urban Development Agency (HUD). Created Workplan (in coordination with the NYCDEP Office of Environmental Planning and Assessment) for site-wide remediation of contaminated soils and secured NYCDEP approval for site remediation as required by HUD.

Camp Glen Gray Boy Scout Facility, Mahwah, NJ

Conducted Phase I Environmental Site Assessment and Phase II Subsurface Investigations at an approximately 800-acre campground containing numerous structures. Documented subsurface soil conditions at the locations of aboveground and underground storage tanks, and delineated lead contamination at a former firing range. Assisted in design and implementation of remediation plans for removal of petroleum and lead contaminated soils, and obtained NJDEP approvals.

EDUCATION

SUNY at Stony Brook, Bachelor of Science - Biology, SUNY at Stony Brook May 1992
SUNY at Purchase, extensive studies in Environmental Science

PROFESSIONAL CERTIFICATIONS

OSHA Hazardous Waste Site Operations and Emergency Response (HAZWOPER) – 40 hr
