Re: Phase I Environmental Site Assessment Report

731 4th Avenue in Brooklyn, New York 11232

MEI Project #: 13-323

In accordance with our agreement, Middleton Environmental Incorporated (MEI), has performed a Phase I Environmental Assessment of the above referenced property in accordance with ASTM E 1527-2005 Scope of Work. Please find a copy of the report enclosed.

We declare that to the best of our knowledge and belief, we meet the definition of Environmental professional as defined in §312.10 of 40 CFR and, we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you for choosing MEI as your consultant for this project. If you have any questions, or if we can be of additional service, please contact us at 631 321 4300.

Respectfully submitted,

Middleton Environmental Incorporated

1.0 EXECUTIVE SUMMARY

At the request of Signature Bank, Middleton Environmental Incorporated (MEI) has performed a Phase I Environmental Site Assessment (ESA) of the property located at 731 4th Avenue in Brooklyn, New York, herein referred to as the Subject Property. The main objective of this ESA was to identify **recognized environmental conditions** in connection with the Subject Property, defined in ASTM Practice E 1527-05 as the presence or likely presence of any hazardous substances or petroleum products that indicate an existing release, a past release, or a material threat of a release. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-05. This assessment has revealed no evidence of REC's in connection with the Subject Property.

The Subject Property includes one (1) rectangular-shaped parcel totaling approximately 0.12-acres. The Subject Property is currently improved with one (1) one-story commercial building with no basement or below grade areas and one (1) one and two-story commercial building with no basement or below grade areas. The buildings total 4,317 square feet and 3,500 square feet in size and contain three (3) commercial units that are in the process of being completed (front building) as well as the remains of an auto body shop with second story office space (rear building). A review of the New York City Building Department property profile overview indicates construction of the front building began in 2012, with the rear building constructed in approximately 1960. The buildings occupy the entire parcel, with no areas of exposed grounds or landscaped areas observed.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. MEI's Findings and Opinions and Recommendations for further action or investigation (if any), are presented in Section 10.0.

| ASSESSMENT SUMMARY TABLE | | | |
|--|----------------|---------------------|----------------|
| Assessment Component | Section(s) | Recommended Actions | Estimated Cost |
| Historical Review | 5.3, 5.4 & 5.5 | No Further Action | |
| Current Occupants / Operations | 3.3 | No Further Action | |
| Hazardous Substances / Petroleum Products | 7.2 | No Further Action | |
| Drains, Sumps & Storm Water Drywells | 7.2 | No Further Action | |
| Storage Tanks | 7.2 | No Further Action | |
| PCBs | 7.2 | No Further Action | |
| Regulatory Agency / Database Review | 5.1 | No Further Action | |
| Asbestos Containing Materials | 9.1 | No Further Action | |
| Lead-Based Paint | 9.2 | No Further Action | |
| Lead in Drinking Water | 9.3 | No Further Action | |
| Radon | 9.4 | No Further Action | |
| Mold | 9.5 | No Further Action | |
| Wetlands | 9.6 | No Further Action | |

2.0 INTRODUCTION

2.1 Purpose

MEI has performed a Phase I Environmental Site Assessment (Phase I ESA) of property located at 731 4th Avenue in Brooklyn, New York (Subject Property). The purpose of this Phase I Environmental Site Assessment (Phase I ESA) is to investigate and identify recognized environmental conditions associated with the Subject Property and/or surrounding property. Recognized environmental conditions, as defined in the ASTM Standard Practice E 1527-05, including the following:

The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

For the purpose of this Phase I ESA, *recognized environmental conditions (REC's)*, may also include the presence or likely presence of other conditions as noted in the Scope of Services.

2.2 Scope of Services

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-05. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-05 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
 - Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
 - Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
 - Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
 - Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
 - Past ownership through a review of available prior reports and local municipal file review.
- The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-05: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water, radon, mold, and wetlands.

2.3 Assumptions and Limitations

There is a possibility that even with the proper application of these methodologies there may exist on the Subject Property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. MEI believes that the information obtained from the record review and the interviews concerning the Subject Property is reliable. However, MEI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide the User with information relating to the Subject Property.

The findings, opinions and conclusions of this report contain the limitations inherent in these methodologies that are referred to in ASTM E 1527-05. Specific limitations and exceptions to this ESA are set forth below:

Historical and environmental information pertaining to the Subject Property has been included in this report to the extent that such information is "reasonably ascertainable" as defined in the above-referenced standard practice and in accordance with the project specific timeframes.

MEI reviewed an environmental database search report. MEI's conclusions based on the search report are limited to the accuracy of that report. To the extent possible, MEI's field observations are used to verify the information or identify errors and inconsistencies in the search report regarding the listed facilities in the immediate vicinity of the Subject Property.

With respect to conditions outside the scope of the ASTM Standard, MEI's observations are limited to physical observations and a review of published data. Unless otherwise stated, no sampling for Asbestos Containing Materials, Lead Based Paint, Drinking Water, Radon, Mold or Wetlands was conducted.

2.4 Special Terms and Conditions

This Phase I Environmental Site Assessment (the report) has been prepared to assist Signature Bank in its underwriting of a proposed mortgage loan or financing on the Subject Property. This report can be relied upon by only the parties stated in the transmittal letter at the front of this report. MEI's liability to a purchaser wishing to use this report is limited to the cost of the report. Amendments to MEI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. Payment for the report is made by, and MEI's contract and report extends to Signature Bank only, in accordance with MEI Terms and Condition and the MEI Scope of Work.

2.5 Data Gaps

Any data gaps identified herein, as defined by ASTM Practice E 1527-05 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

3.0 SITE DESCRIPTION

3.1 Ownership and Location

According to the Automated City Register Information System (ACRIS) operated by the New York City Department of Finance identified the Subject Property as Block 652, Lot 7 and the property is owned by 128 Merrick Realty LLC.

The property is located at 731 4th Avenue in Brooklyn, New York. MEI did not identify any prior owners or occupants of potential environmental concern in the property records obtained from the NYC Department of Finance.

3.2 Improvements

The Subject Property includes one (1) rectangular-shaped parcel totaling approximately 0.12-acres. The Subject Property is currently improved with one (1) one-story commercial building with no basement or below grade areas and one (1) one and two-story commercial building with no basement or below grade areas. A review of the New York City Building Department property profile overview indicates construction of the front building began in 2012, with the rear building constructed in approximately 1960. The buildings occupy the entire parcel, with no areas of exposed grounds or landscaped areas observed.

3.3 Current Use of the Subject Property

The buildings total 4,317 square feet and 3,500 square feet in size and contain three (3) commercial units that are in the process of being completed (front building) as well as the remains of an auto body shop with second story office space (rear building).

3.4 Services, Utilities and Roadways

Street Address(es): 731-735 4th Avenue and 250-258 24th Street

City and State: Brooklyn, New York

County: Kings

Owner: 128 Merrick Realty LLC

Property Size: 0.12 acres

Access Roadway to site: 4th Avenue to the west and 24th Street to the north of the Subject Property

Site Use: One (1) one-story commercial building and one (1) one and two-story commercial/office building

Occupants: The front building will contain three (3) commercial units with the rear building housing the remains of an auto body shop and office space.

Electricity Provider: Consolidated Edison

Natural Gas Provider: National Grid

Fuel Oil Provider: Not applicable

Potable Water: Municipal Water Supply

Sewer Services: Municipal Sewer System

Heating System: The building will be heated by a roof-top natural gas-fired HVAC system.

3.5 Adjoining Properties

The current use of the adjoining properties is commercial and mixed use. The Subject Property borders are as follows:

North - The property is bordered to the north by 24th Street, followed by a mixed use building with a driving school, checks cashed, business services, barber, pizza parlor, restaurant, deli, office, coffee house, and dry cleaner on the first floor.

South - The property is bordered to the south by a Dunkin Donuts / Baskin Robbins.

East - The property is bordered to the east by an office/light-industrial building.

West - The property is bordered to the west by 4th Avenue, then commercial buildings occupied by Asiana Limousine and C&H Auto Repair.

4.0 USER PROVIDED INFORMATION

4.1 Environmental Pre-Survey Questionnaire

Pursuant to ASTM E 1527-05, MEI requested the following site information from the User of this report and from the site contact. The following section summarizes information provided by Signature Bank with regard to this Phase I Environmental Site Assessment.

| ITEM | PROVIDED BY USER | NOT PROVIDED BY USER | DISCUSSED BELOW | DOES NOT APPLY |
|---|------------------|----------------------|-----------------|----------------|
| 4.1 Environmental Pre-survey Questionnaire | | X | | |
| 4.2 Title Records | | X | | |
| 4.3 Environmental Liens or Activity and Use Limitation | | X | | |
| 4.4 Specialized Knowledge | | X | | |
| 4.5 Commonly Known or Reasonably Ascertainable Information | | X | | |
| 4.6 Valuation Reduction for Environmental Issues | | X | | |
| 4.7 Identification of Key Site Manager | | X | | |
| 4.8 Reason for Performing Phase 1 ESA | X | | | |
| 4.9 Prior Environmental Reports | | X | | |

4.2 Title Records

Title record information associated with the Subject Property has not been provided to MEI by Signature Bank. Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3 Environmental Liens or Activity and Use Limitation

The property owner/user/key site personnel did not report any Environmental Liens or Activity/Use Limitations on the site. An environmental lien search was not included in the scope of work of this assessment and therefore was not performed. However, if the findings of a lien search performed by any other party does reveal the presence of an environmental related lien on the Subject Property, this information should be forwarded to MEI for review, and any significant findings will be added to this assessment as an addendum to this report.

4.4 Specialized Knowledge

Signature Bank provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. MEI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3 of this report.

4.5 Commonly Known or Reasonably Ascertainable Information

Signature Bank has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

4.6 Valuation Reduction for Environmental Issues

Signature Bank has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

4.7 Identification of Key Site Manager

Signature Bank provided contact information for the Subject Property owner, manager and/or occupants. The Contact person for site access was Mr. Paul Greenbaum.

4.8 Reason for Performing Phase I ESA Report

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-05) in connection with the Subject Property. This ESA was also performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E-1527-05 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

4.9 Prior Environmental Reports

No previous environmental reports were supplied with regard to the Subject Property.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

Information from standard Federal and state environmental record sources was provided through Environmental Data Resources (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. This integrated database also contains postal service data in order to enhance address matching. Records from one government source are compared to records from another to clarify any address ambiguities. The demographic and geographic information available provides assistance in identifying and managing risk. The accuracy of the geocoded locations is approximately +/-300 feet.

In some cases, location information supplied by the regulatory agencies is insufficient to allow the database companies to geocode facility locations. These facilities are listed under the unmappables section within the EDR report. A review of the unmappable facilities indicated that none of these facilities are within the ASTM minimum search distance from the Site.

Regulatory information from the following database sources regarding possible recognized environmental conditions, within the ASTM minimum search distance from the Site, was reviewed. Specific facilities are discussed below if determined likely that a potential recognized environmental condition has resulted at the Site from the listed facilities (see appendix 12.5 for Environmental Database Report).

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

| SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS | | | |
|---|--|--------------------------------|---|
| Regulatory Database | Approximate Minimum Search Distance | Subject Property Listed | Off-site Listings Within Search Distance |
| Federal NPL Sites | 1.0 mile | No | 0 |
| Federal Delisted NPL Sites | 0.5 mile | No | 0 |
| Federal CERCLIS Sites | 0.5 mile | No | 0 |
| Federal CERCLIS NFRAP Sites | 0.5 mile | No | 1 |
| Federal RCRA CORRACTS Sites | 1.0 mile | No | 1 |
| Federal RCRA Generators Sites | Property & Adjoining | No | 1 |
| Federal RCRA Non-CORRACTS TSD Sites | 0.5 mile | No | 1 |
| Federal Engineering / Institutional Control Sites | Property & Adjoining | No | 0 |
| Federal ERNS Sites | Subject Property | No | 0 |
| State and Tribal equivalent NPL Sites | 1.0 mile | No | 4 |
| State and Tribal equivalent CERCLIS Sites | 0.5 mile | No | 0 |
| State and Tribal Leaking Storage Tank Sites | 0.5 mile | No | 27 |
| State and Tribal Spills Sites | Subject Property | No | 0 |
| State and Tribal Landfill or Solid Waste Disposal Sites | 0.5 mile | No | 3 |
| State and Tribal Registered Storage Tank Sites | Property & Adjoining | No | 2 |
| State and Tribal Engineering / Institutional Control Sites | Property & Adjoining | No | 0 |
| State and Tribal Voluntary Cleanup Sites | 0.5 mile | No | 0 |
| State and Tribal Brownfield Sites | 0.5 mile | No | 0 |

- **Federal National Priority List (NPL) Sites**

The National Priorities List (NPL) is the Environmental Protection Agency (EPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program. The Subject Property is not listed as a Federal NPL site. No Federal NPL sites are located within a mile radius of the Subject Property.

- **Federal Delisted National Priority List (NPL) Sites**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. The Subject Property is not listed as a Federal Delisted NPL site. No Federal Delisted NPL sites are located within a mile radius of the Subject Property.

- **Federal CERCLIS Sites**

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list is a compilation of sites that the EPA has investigated or is currently investigating for a release or threatened release of hazardous substances. The Subject Property is not listed as a Federal CERCLIS site. No Federal CERCLIS sites are listed within a half mile radius of the Subject Property.

- **Federal CERCLIS NFRAP Sites**

The CERCLIS No Further Remedial Action Planned (NFRAP) List is a compilation of sites that the EPA has investigated, and has determined that the facility does not pose a threat to human health or the environment. The Subject Property is not listed as a Federal CERCLIS-NFRAP site. One (1) Federal CERCLIS NFRAP site is listed within a half mile radius of the Subject Property. US Information Agency at 29th Street and 3rd Avenue is almost one-third mile west-southwest and downgradient of the Subject Property. This site would not have an apparent adverse impact on the Subject Property based upon the distance to the Property and direction of groundwater flow.

- **Federal RCRA CORRACTS Sites**

RCRA Corrective Action Tracking System (CORRACTS) is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies Transportation, Storage or Disposal (TSD), facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. The Subject Property was not identified on the RCRA CORRACTS site list. The Subject Property was not identified on the RCRA CORRACTS site list. One (1) RCRA CORRACTS site is listed within a mile radius of the Subject Property. This site would not have an apparent adverse impact on the Subject Property based upon the distance to the Subject Property and direction of groundwater flow.

- **Federal RCRA Hazardous Waste Generators Sites**

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQGs). A RCRA-LQG is a facility that generates over 1,000 kilograms (Kg) of hazardous waste. A RCRA-SQG is a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month while a RCRA-CESQG generates less than 100 Kg of hazardous waste per month. The Subject Property is not listed as a Federal RCRA Hazardous Waste Generator site. The former Apple Auto Body at 737 4th Avenue is identified as a RCRA Non-Generator with no violations found. As such, this listing would not have an apparent adverse impact on the Subject Property.

- **Federal RCRA non-CORRACTS TSD Sites**

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) sites are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). The Subject Property is not listed as a Federal RCRA non-CORRACTS TSD site. The Subject Property is not listed as a Federal RCRA non-CORRACTS TSD Site. One (1) Federal RCRA non-CORRACTS TSD site is listed within a half mile radius of the Subject Property. Debevoise Co. at 74 20th Street is approximately three-tenths mile north-northwest and downgradient of the Subject Property. This site would not have an apparent adverse impact on the Subject Property based upon the distance to the Subject Property and direction of groundwater flow.

- **Federal Engineering Control / Institutional Control Sites**

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. The Subject Property is not listed as a Federal Engineering Control or Institutional Control Site. No Federal Engineering Control or Institutional Control Sites are listed within a half mile radius of the Subject Property.

- **Federal Emergency Response Notification System (ERNS) Sites**

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property is not listed as a Federal ERNS site.

- ***State and Tribal equivalent NPL Sites***

State and Tribal equivalent NPL databases were searched for sites located within 1.0 mile of the Subject Property. The Subject Property is not listed as a State and Tribal equivalent NPL Site. Four (4) State and Tribal equivalent NPL sites are listed within a mile radius of the Subject Property. Each are located at least three-tenths mile cross-gradient or downgradient of the Subject Property, and as such, these sites would not have an apparent adverse impact on the Subject Property based upon the distance to the Subject Property and direction of groundwater flow.

- ***State and Tribal equivalent CERCLIS Sites***

State and Tribal equivalent CERCLIS databases were searched for sites located within 0.5 mile of the Subject Property. The Subject Property is not listed as a State and Tribal equivalent CERCLIS Site. No State and Tribal equivalent CERCLIS sites are listed within a half mile radius of the Subject Property.

- ***State and Tribal Leaking Storage Tank Sites***

Leaking Storage Tank Sites are properties where releases of hazardous substances or petroleum products from underground storage tanks (USTs) and/or aboveground storage tanks (ASTs) have been identified and reported to state, tribal, or local agencies. The Subject Property is not identified as a State and Tribal Leaking Storage Tank site.

There were twenty-seven (27) sites located within 0.5 mile of the Subject Property that were identified as State and Tribal Leaking Storage Tank Sites. Of the listed sites, 20 of the sites are located greater than 0.125 mile from the Subject Property and based on the distance from the Subject Property and the dense urban environment surrounding the Subject Property, these sites are considered unlikely to represent an existing release, past release or material threat of release of hazardous substances or petroleum products on the Subject Property.

Five of the seven remaining sites located within 0.125 mile of the Subject Property have been fully remediated and the spill files have been closed by the NYSDEC (and no further remedial action is warranted). Therefore, none of these sites would have an apparent adverse impact on the Subject Property based upon case status, the distance to the Subject Property, and direction of groundwater flow.

One of the closed incidents abuts the Subject Property to the south (NYSDEC Bureau of Spills at 737 4th Avenue). Regulatory database information indicates that a spill resulted from a tank overfill on May 26, 1994, with the spill subsequently closed that same day. Although no further information was provided regarding this former gasoline station (now a Dunkin Donuts / Baskin Robbins) evidence of a remediation system as well as monitoring wells were observed on this abutting property. Based on a presumed westerly direction of groundwater flow toward the Gowanus Bay, this former station would not have an apparent adverse impact on the Subject Property.

The remaining site (Private Home at 720 4th Avenue) is located approximately 300 feet north and downgradient of the Subject Property. Regulatory database information indicates that a suspect release was reported in July of 2007 following the failure of a tank tightness test. Although no further information was provided regarding any identified contamination, this site would not have an apparent adverse impact on the Subject Property based upon the distance to the Subject Property and direction of groundwater flow.

- ***State and Tribal Spills Sites***

A review of the State and Tribal Spills database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property is not listed as a State and Tribal Spills site, with three adjoining Spills incidents. 4th Avenue / 24th Street at the intersection of 4th Avenue and 24th Street, is the intersection of the Subject Property. Regulatory database information indicates that a spill was reported in 1999 following a manhole cover “blowing” at the intersection. The FDNY responded and did not discover any elevated petroleum vapors. Based on a lack of vapors, the NYSDEC closed the case on February 13, 2003. Therefore, this incident would not have an apparent adverse impact on the Subject Property.

Apartment at 725 4th Avenue is across 24th Street to the north of the Subject Property. Regulatory database information indicates that a spill was reported on December 2, 2005 following a tank overfill which resulted in a release of fuel oil onto the sidewalk. The spill was cleaned and the case subsequently closed on December 5, 2005. Therefore, this incident would not have an apparent adverse impact on the Subject Property.

249 24th Street at 249 24th Street is across 24th Street to the north of the Subject Property. Regulatory database information indicates approximately 20 gallons of fuel oil was released during a tank fill that was contained on the sidewalk in front of this property. The spill was cleaned, with the case subsequently closed on June 7, 1995. Therefore, this incident would not have an apparent adverse impact on the Subject Property.

- ***State and Tribal Landfill Sites and Solid Waste Disposal Sites***

The State and Tribal landfill and solid waste disposal site databases identify active or inactive landfill and transfer station facilities, as well as open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. The Subject Property is not listed as a State and Tribal landfill and solid waste disposal site. Three (3) State and Tribal landfill and solid waste disposal sites are listed within 0.5 mile of the Subject Property. Each are located at least 950 feet downgradient of the Subject Property, and as such, these sites would not have an apparent adverse impact on the Subject Property based upon the distance to the Subject Property and direction of groundwater flow.

- ***State and Tribal Registered Storage Tank Sites***

The Subject Property is not listed as a State and Tribal Registered Storage Tank site. The attached EDR database indicates that the Subject Property is identified as a registered AST facility under PBS Number 2-305057. However, the listing is for 7311 4th Avenue, not 731 4th Avenue, and as such, this listing is not associated with the Subject Property. The property to the south is identified as a State and Tribal Registered Storage Tank site due to the former presence of fourteen (14) 550-gallon USTs that were removed in 1999. In addition, the adjoining property to the north across 24th Street is identified as a State and Tribal Registered Storage Tank site due to the presence of an aboveground heating oil tank.

- ***State and Tribal Engineering Control / Institutional Control Sites***

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. The Subject Property is not listed as a State and Tribal Engineering Control or Institutional Control Sites. Four (4) State and Tribal Engineering Control or Institutional Control Sites are listed within 0.5 mile of the Subject Property. None are adjoining the Subject Property, and these sites would not have an apparent adverse impact on the Subject Property based upon the distance to the Subject Property and direction of groundwater flow.

- ***State and Tribal Voluntary Cleanup Sites***

The Subject Property is not listed as a State and Tribal Voluntary Cleanup site. No State and Tribal Voluntary Cleanup Sites are listed within 0.5 mile of the Subject Property.

- ***State and Tribal Brownfield Sites***

The Subject Property is not listed as a State and Tribal Brownfield site. No State and Tribal Brownfield sites are listed within 0.5 mile of the Subject Property.

5.2 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the New York City Building Department, the New York City Department of Finance and the New York City Fire Department. MEI did not identify documented adverse environmental conditions, violations, or complaints associated with the Subject Property in the information provided by these agencies. Similarly, MEI did not identify records of spills or releases of hazardous substances or petroleum products having occurred at the Subject Property in the information provided by these agencies.

New York City Building Department

MEI reviewed information listed in the online NYC Building Information System (BIS) provided by the New York City Building Department's website, <http://a810-bisweb.nyc.gov/bisweb/bsqpm01.jsp>. According to information viewed on the New York City Building Department's website, a variety of interior renovations, building improvements and system upgrades have occurred throughout its history, which is not uncommon for a property of this age and type. A review of the New York City Building Department property profile overview indicates construction of the front building began in 2012, with the rear building constructed in approximately 1960. A Certificate of Occupancy was issued in 1965 for a parking lot at the Subject Property.

New York City Department of Finance

MEI reviewed information provided by the New York City Department of Finance. Specific information provided by the New York City Department of Finance includes lot sizes and dimensions, building sizes, building zoning and use, and the approximate date of construction. The information provided by New York City Department of Finance did not identify any conditions or reported events that would indicate the presence of a recognized environmental condition in connection with the Subject Property.

New York City Fire Department

MEI reviewed information provided by the New York City Fire Department (NYCFD). Specific information obtained from the NYCFD includes any active storage tank permits for the Subject Property. A review of the NYCFD storage tank files did not indicate the presence of any registered storage tanks on the Subject Property.

5.3 Sanborn Fire Insurance Maps

Historical fire insurance maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the fire insurance maps are presented in Appendix 12.6.

| FIRE INSURANCE MAP SUMMARY | | |
|----------------------------|--------------|---|
| Year | Issues Noted | Observations |
| 1888 | No | Subject Property: The 1888 Sanborn Map shows the Subject Property as developed with a dwelling in the western portion of the site. |
| | | Surrounding Area: The 1888 Sanborn Map shows the surrounding area as undeveloped with scattered dwellings. Stone cutters are present to the east. |
| 1906 | No | Subject Property: The 1906 Sanborn Map shows the presence of a commercial building that includes junk storage in the western portion of the lot with a dwelling in the eastern portion of the Subject Property. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1888 Sanborn Map. |
| 1926 | No | Subject Property: The 1926 Sanborn Map shows the Subject Property as a junk yard. |
| | | Surrounding Area: The 1926 Sanborn Map shows a garage with gasoline tanks to the south, dwellings and shops to the east, and shops across 4 th Avenue to the west. |
| 1951 | No | Subject Property: The 1951 Sanborn Maps shows the existing commercial building in the eastern portion of the property (identified as a metal shop), with a dwelling in the western portion of the site. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1926 Sanborn Map. |
| 1965 | No | Subject Property: The 1965 Sanborn Map shows the existing commercial building at the Subject Property, with the dwelling no longer in place in the western portion of the site. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1951 Sanborn Map, with a filling station now identified to the south. |
| 1979 | No | Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1965 Sanborn Map. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1965 Sanborn Map. |
| 1988 | No | Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1979 Sanborn Map, with the commercial building identified as an auto repair shop. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1979 Sanborn Map. |

5.5 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by researching available historical aerial photographs from www.historicaerials.com and other available resources. Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table.

| AERIAL PHOTOGRAPH SUMMARY | | |
|---------------------------|--------------|---|
| Year | Issues Noted | Observations |
| 1954 | No | Subject Property: The 1954 photograph shows the presence of the existing building and parking lot on the Subject Property. |
| | | Surrounding Area: The 1954 photograph shows the presence of apartment, commercial, and warehouse buildings to the east, west, north and south of the Subject Property. |
| 1966 | No | Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1954 photograph. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1954 photograph. |
| 1980 | No | Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1966 photograph. |
| | | Surrounding Area: Conditions on the Subject Property appear to be similar to those depicted on the 1966 photograph, with what appears to be a gasoline station in place to the south. |
| 1987 | No | Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1980 photograph. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1980 photograph. |
| 2004 | No | Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1980 photograph. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1980 photograph, with the existing Dunkin Donuts building in place to the south. |
| 2006 | No | Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 2004 photograph. |
| | | Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 2004 photograph. |

5.5 City Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by MEI and Environmental Data Resources (EDR). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix 12.6.

| Year | Occupants |
|------|---|
| 1935 | No listing |
| 1945 | K&H Welding |
| 1949 | S&L Metal Products |
| 1955 | S&L Metal Products, Howard Malliband |
| 1960 | No listing |
| 1973 | Big Time Auto Body Shop |
| 1976 | Big Time Auto Body Shop |
| 1980 | Felix Used Car Sales |
| 1985 | Park Slope Auto Body, Glass Wide Auto |
| 1992 | TNT Collision |
| 2000 | M Almaca, Car Star Plus II |
| 2005 | Car Star Plus II |
| 2012 | Car Star Plus, Island Auto Club, 3M Accounting, Downtown Automotive Repair |

6.0 PHYSICAL SETTING

6.1 Topography

The Subject Property and vicinity characteristics listed below were analyzed utilizing a current USGS 7.5 Minute Topographic Map. This information is useful in determining the grade and topography of the Subject Property. The Subject Property is located at an elevation of approximately 34 feet above mean sea level (msl). The topography of the Subject Property is relatively flat and there were no slopes, depressions or rolling hills observed on the Subject Property and slopes on the Subject Property range from 0 to 3 percent. The Subject Property has been graded for commercial usage.

6.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Near-surface geology in heavily developed areas such as the Subject Property and vicinity is considered "urban land" and is characterized by a non-homogeneous distribution of soil and fill types. Excavation and backfilling for building foundations, utility conduits, subway systems and other construction results in a varied subsurface profile. In this setting, estimation of local subsurface parameters such as permeability, moisture content, and organic fraction is not feasible without site-specific testing data.

6.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest surface water body is Gowanus Bay.

Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow to the west. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

7.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Michael Fiscina on March 21, 2013. Mr. Fiscina was accompanied by and interviewed the Property Manager.

7.1 Methodology and Limited Conditions

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. The building interiors of the new commercial spaces, partially demolished building, and first floor of the auto body shop were observed during the site inspection. There was no access to the second floor of the rear building or either roof.

7.2 Physical Observations

Underground Storage Tanks

MEI did not observe any fill port or vent pipes for any underground storage tanks on the Subject Property. A review of the New York City Fire Department (NYCFD), storage tank files and the New York State Department of Environmental Conservation (NYSDEC), Petroleum Bulk Storage Tank database did not indicate the presence of any registered underground storage tanks at the Subject Property. Available Sanborn Fire Insurance Maps did not indicate the presence of any underground storage tanks at the Subject Property.

Aboveground Storage Tanks

MEI did not observe any aboveground heating oil storage tanks inside the basement of the building.

Hazardous Substances and Petroleum Products

MEI did not observe any hazardous substances or petroleum products at the Subject Property.

Non-Hazardous Substances and Petroleum Products

MEI did not observe any non-hazardous substances or petroleum products at the Subject Property.

Unidentified Substances Containers

MEI did not observe any unidentified substances containers at the Subject Property.

Drains or Storm Water Drywells

MEI observed the presence of one (1) floor drain inside the building. MEI did not observe any signs of chemical staining in the vicinity of the floor drains. It was reported that these floor drains lead to the municipal sewer system. MEI did not observe any floor drains inside the other accessible areas of the building. MEI did not observe any storm water drywells at the Subject Property.

Polychlorinated Biphenyls (PCB's)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979 before being banned by Congress. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. MEI did not observe any PCB-containing equipment at the Subject Property.

Stains or Corrosion

MEI did not observe any stains or corrosion at the Subject Property.

Odors

MEI did not observe any strong, pungent or noxious odors at the Subject Property.

Pools of Liquid

MEI did not observe any pools of liquid at the Subject Property.

Stressed Vegetation

MEI did not observe any stressed vegetation at the Subject Property.

Stained Soil or Pavement

MEI did not observe any stained soil or pavement at the Subject Property.

Wells

MEI did not observe any irrigation wells or groundwater monitoring wells at the Subject Property.

Sumps, Pits, Ponds or Lagoons

MEI did not observe any sumps, pits, ponds or lagoons at the Subject Property.

Waste Water

MEI did not observe any improper disposal of waste water into drains, ditches or streams at the Subject Property.

Solid Wastes Disposal

All solid wastes generated on-site are carted away by a licensed waste hauler to an approved solid waste facility and are not disposed at on-site.

8.0 INTERVIEWS

8.1 Interview With Property Owner and/or Property Manager

The property manager was interviewed during the site reconnaissance on March 21, 2013 and the property manager did not indicate the presence of any environmental liens or was unaware of any contamination concerns regarding the Subject Property.

9.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-05

9.1 Asbestos Containing Material (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable ACM are those which can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. MEI did not observe any ACM in any accessible areas of the building. There were no signs of ACM spray-on fireproofing noticed inside the building.

9.2 Lead Based Paint (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

MEI observed that the painted surfaces inside the buildings were in good condition, free of obvious chipping, flaking or peeling. Given the commercial use of the Subject Property, there are no lead based paint violations on file with the New York City Department of Housing Preservation and Development's (NYCHPD), Code Enforcement Database.

9.3 Lead in Drinking Water

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, the USEPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing such as lead solder, brass, bronze, and other lead containing alloys. The USEPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg/L). Based on the date of construction, the presence of lead in drinking water is unlikely and not considered to be a potential non-scope business environmental risk issue. MEI did not observe any brass fixtures or lead fixtures at the Subject Property.

9.4 Radon

Radon is a colorless, odorless, radioactive gas. Radon comes from the natural decay of uranium that is found in nearly all soils. Radon typically moves through the ground and into building through cracks and openings in the foundation. The USEPA has developed a "Map of Radon Zones" indicating the levels of radon concentrations from testing and aerial surveys conducted in all counties in New York State. The U.S. Environmental Protection Agency's Map of Radon Zones identified the Subject Property as a radon zone Level 3. Level 3 signifies that the average predicted radon level indoors is less than 2 pico-Curies per liter and this is the lowest level in the state. This level compares favorably with the EPA action level of 4.0 pico-Curies per liter as the guideline (it should be noted that current radon information and EPA Action Levels are designated for residential spaces only. Commercial and industrial facilities are not subject to EPA's Action Level of 4 pico-Curies per liter as the guideline and definitive information concerning radon gas in an individual building can only be obtained through long term testing).

9.5 Mold

Molds are a class of fungi, and have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth.

As part of this assessment, MEI performed a limited visual inspection for the conspicuous presence of mold. MEI observed the accessible interior areas of the Subject Property structure(s), including interior walls and ceilings of the building for the presence of conspicuous mold or observed water intrusion or accumulation. This evaluation did not include a review of pipe chases or areas behind enclosed walls and ceilings. MEI did not observe conspicuous visual or olfactory indications of the presence of mold, nor did MEI observe obvious indications of significant water damage inside the accessible areas of the building.

9.6 Wetlands

MEI reviewed available information regarding wetlands on the Subject Property, including National Wetlands Inventory online GIS mapping. MEI additionally made general site observations for readily observable potential wetland characteristics. MEI did not observe surface water bodies or any evidence of potential wetlands on or adjacent to the Subject Property.

10.0 FINDINGS, OPINIONS AND RECOMMENDATIONS

MEI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-05. This assessment has not identified evidence of recognized environmental conditions (RECs) in connection with the Subject Property.

The site reconnaissance, interviews and review of records have not found the presence or possible presence of hazardous substances or petroleum related products that could indicate an existing release, past release or significant threat of a release into structures on the property, into ground, groundwater or surface water.

No conditions outside of ASTM E 1527-05 were identified in connection with the Subject Property. It is the opinion of MEI that no further testing (subsurface or otherwise), is warranted on the Subject Property.

11.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

This Phase I Environmental Site Assessment (ESA) Report documents the research methodology used by qualified environmental professionals of MEI to identify recognized environmental conditions using the scope and limitations of ASTM Standard E 1527-05.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 8 of the attached EDR Radius Map report:

| Site | Database(s) | EPA ID |
|--|-------------|--------|
| SUSAN GUARINO 731 FOURTH AVENUE BROOKLYN, NY | LIENS | N/A |
| PARK SLOPE AUTO BODY 735 4TH AVENUE BROOKLYN, NY 11232 | FINDS | N/A |
| 7311 4TH AV 731 4TH AVE BKLYN, NY 11209 | HIST AST | N/A |

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: A review of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
