

**(Fact Sheet Begins Next)**

## **Act Now to Continue Receiving Information About This Site!**

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites *electronically by email*.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

**You must sign up for the DER email listserv:**

[www.dec.ny.gov/chemical/61092.html](http://www.dec.ny.gov/chemical/61092.html)

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

### **Why You Should Go “Paperless”:**

- Get site information faster and share it easily;
- Receive information about all sites in a chosen county - read what you want, delete the rest;
- It helps the environment and stretches your tax dollars.

**If “paperless” is not an option for you**, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Conservation

# FACT SHEET

Brownfield Cleanup Program

975 Nostrand Avenue

Brooklyn, NY 11225

SITE No. C224335

NYSDEC REGION 2

June 2022

## Where to Find Information

Access project documents through the  
DECinfo Locator

<https://www.dec.ny.gov/data/DecDocs/C224335/>

and at these location(s):

### Brooklyn Public Library - Crown Heights Branch

560 New York Ave  
Brooklyn, NY 11225  
(718) 773-1180

### NYC Brooklyn Community Board 9

890 Nostrand Avenue  
Brooklyn, NY 11225  
(718) 778-9279  
[bk09-1@cb.nyc.gov](mailto:bk09-1@cb.nyc.gov)

## Who to Contact

Comments and questions are welcome and  
should be directed as follows:

### Project-Related Questions

Christopher H. Allan - Project Manager  
NYSDEC  
Division of Environmental Remediation  
47-40 21st Street  
Long Island City, NY 11101  
(718) 482-4065  
[Christopher.Allan@dec.ny.gov](mailto:Christopher.Allan@dec.ny.gov)

### Project-Related Health Questions

Sally Rushford - Public Health Specialist  
NYSDOH  
Empire State Plaza, 1787  
Albany, NY 12237  
(518) 402-5465  
[beei@health.ny.gov](mailto:beei@health.ny.gov)

## Remedy Proposed for Brownfield Site Contamination; Public Comment Period Announced

The public is invited to comment on a proposed remedy being reviewed by the New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), to address contamination related to the 975 Nostrand Avenue site ("site") located in Brooklyn, NY. Please see the map for the site location.

Based on the findings of the investigation, NYSDEC in consultation with the NYSDOH has determined that the site poses a significant threat to public health or the environment. This decision is based on the potential for off-site migration of contaminants in the soil vapor. To address this threat, NYSDEC has developed the proposed remedy summarized below.

**How to Comment:** NYSDEC is accepting written comments about the proposed plan, called a "Draft Remedial Action Work Plan (RAWP)" for 45 days, from **June 30 through August 14, 2022.**

- Access the RAWP and other project documents online through the DECinfo Locator: <https://www.dec.ny.gov/data/DecDocs/C224335/>.
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

**Draft Remedial Work Plan:** The proposed Conditional Unrestricted Use remedy consists of:

- Excavation and off-site disposal of contaminated soil to 15 feet below surface grade across the entire site;
- Screening for indications of contamination of all excavated soil during any intrusive site work;
- Sampling and off-site disposal of all materials removed from the site in accordance with all federal, state, and local rules and regulations for handling, transport, and disposal;
- Removing Underground Storage Tanks (USTs), if any are encountered;
- Collecting and analyzing post excavation confirmation soil samples to evaluate the effectiveness of the remedy;
- Importing clean material that meets the established Soil Cleanup Objectives for use as backfill;
- Implementing a Health and Safety Plan and Community Air Monitoring Plan during all ground intrusive activities;

# BROWNFIELD CLEANUP PROGRAM

- Installation and operation of an active sub-slab depressurization system to mitigate the potential for soil vapor intrusion into the new building to be constructed at the site.
- Installation of a contingent soil vapor extraction system to prevent off-site migration of contaminated soil vapor.
- Developing a Site Management Plan (SMP) for maintenance of the remedial systems.
- Recording of an Environmental Easement to ensure proper use of the site.

If the implemented remedy does not achieve the remedial action objectives within 5 years and engineering controls continue to be required, the conditional Track 1 remedy will revert to a track 2 remedy requiring long term monitoring and maintenance of the engineering controls.

The proposed remedy was developed by Nostrand Green LLC (“applicant”) after performing a detailed investigation of the site under New York’s Brownfield Cleanup Program (BCP). A “Remedial Investigation Report,” which describes the results of the site investigation was submitted concurrently with the Remedial Action Work Plan and is also available for review at the locations identified on Page 1.

**Next Steps:** NYSDEC will consider public comments, revise the cleanup plan as necessary, and issue a final Decision Document. NYSDOH must concur with the proposed remedy. After approval, the proposed remedy becomes the selected remedy. The applicant(s) may then design and perform the cleanup action to address the site contamination, with oversight by NYSDEC and NYSDOH.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

**Site Description:** The site consists of an irregularly shaped 1.369-acre parcel that was most recently developed with a vacant one-story commercial use building (formerly used as a supermarket) built between 1965 and 1970 on a portion of the site with the remainder comprising an asphalt-paved surface parking lot. Prior to the construction of the current building, the site was occupied by various uses including stores, a

parking garage, a printing facility, upholstery facility, and a carpenter, an auto repair shop, a printing press, hand laundry facility, an exterminator, and an auto school.

The site will be redeveloped with a new mixed-use residential and commercial use building. Additional site details, including environmental and health assessment summaries, are available on NYSDEC’s Environmental Site Remediation Database (by entering the site ID, C224335) at:

<https://www.dec.ny.gov/cfm/xtapps/derexternal/index.cfm?pageid=3>

**Summary of the Investigation:** Contaminants of concern include VOCs, PAHs, pesticides, and metals in soil/fill, chlorinated solvent-related VOCs and metals in groundwater, and chlorinated solvent-related and petroleum-related VOCs in soil vapor.

**Brownfield Cleanup Program:** New York’s Brownfield Cleanup Program (BCP) encourages the voluntary cleanup of contaminated properties known as “brownfields” so that they can be reused and redeveloped. These uses may include recreation, housing, business or other uses. A brownfield site is any real property where a contaminant is present at levels exceeding the soil cleanup objectives or other health-based or environmental standards, criteria or guidance adopted by NYSDEC that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations.

For more information about the BCP, visit:
