Olivero Construction (Olivero)				SOE Installation		
Broadway Builders (Broadway)				General Contractor (GC)		
Description and Location of Work Activities Performed						
<p>Approximately 380 cubic yards of soil/fill from Grids 1, 2, 4, and 8 (waste class grid WC-3) were excavated and exported off-site for disposal at the IRRC facility located in Lyndhurst, NJ. No signs of gross contamination were noted in the excavated soil/fill. Installed heelblocks and welded rakers for support of excavation in Grids 1, 2, 6, and 15 (waste class grid WC-2, 3, 4, 5, and 11). Collected 10 post-excavation soil endpoint samples (EP-21 thru EP-30) from Grids 2, 5, 9, 13, and 14 (waste class grid WC-3, 4, 8, 9, and 11) along with associated QA/QC samples in accordance with the NYSDEC-approved RAWP.</p>

Description and Location of Work Activities Performed						
<p>Approximated 340 cubic yards of soil/fill were excavated and exported from Grids 2 and 5 (waste class WC-3 and 4) for off-site disposal at the Impact Recovery and Reuse Center facility located in Lyndhurst, NJ. Installed heelblocks and welded rakers for support of excavation (SOE) in Grids 1 and 2 (waste class grid WC-3, 4, and 5). Excavated and graded soil/fill in Grids 2, 6, and 15 (waste class grid WC-5 and 11). Drilled tiebacks in Grid 6 (waste class grid WC-5) as part of the SOE. General welding activities and housekeeping occurred. Collected a water sample, from the rainwater collected in the weir tank, and sent it for laboratory analysis of NYCDEP Discharge Parameters.</p>

Description and Location of Work Activities Performed

A total of 120.15 tons of ASTM #5 stone was imported to the site from Tilcon New York, Inc's West Nyack Quarry located in NY. The imported stone was used as the gas permeable aggregate (GPA) layer for the sub-slab depressurization system (SSDS). A total of approximately 340 cubic yards of soil/fill were excavated from Grids 4 and 5 (waste class grids WC-2 and 3) and exported for off-site disposal at the IRRRC facility located in Lyndhurst, NJ. Installed heelblocks and welded rakers for support of excavation(SOE) in Grids 1, 2, and 15 (waste class grid WC-3, 4, 5, and 11). Excavated and graded soil/fill in Grids 12 and 13 (waste class grid WC-8 and WC-9). Installed tiebacks in Grid 6 and 15 (WC-5,11). Completed welding for SOE and general housekeeping occurred. The contractor installed a portion of the SSDS pipe trench in Grids 2 and 6. The geotextile filter fabric was installed within the SSDS trench followed by the GPA and the slotted Sch 40 PVC pipe.

Subcontractor					Service	
Olivero Construction (Olivero)					SOE Installation	
Broadway Builders (Broadway)					General Contractor (GC)	
Description and Location of Work Activities Performed						
<p>A total of approximately 300 cubic yards of soil/fill were excavated from Grids 14 and 15 (waste class grids WC-10, and 11) and exported for off-site disposal at the Bayshore Soil Management facility in Keasby, NJ. Welded rakers for support of excavation(SOE) in Grid 15 (waste class grid WC-11). Excavated and graded soil/fill in Grid 15 (waste class grid WC-11). Preformed tieback load tests in Grid 6 and 15 (WC-5,11). Completed welding for SOE and general housekeeping occurred. The contractor installed a portion of the SSDS GPA layer underlain by geotextile fabric in Grid 2. The contractor poured the mud slab which was seperated from the GPA layer with 6-mil poly sheeting in portions of Grid 2.</p>
