Olivero Construction (Olivero)					SOE Installation	
Broadway Builders (Broadway)					General Contractor (GC)	
<b>Description and Location of Work Activities Performed</b>						
<p>Approximatly 240 CY of soil/fill were exported from Grids 14 and 15 (waste class grid WC-10 and 11) to the Bayshore Soil Management facility in Keasby, NJ. Welded rakers for support of excavation(SOE) in Grid 13 and 14 (waste class grids WC-10 and WC-11). Excavated and graded soil/fill in Grid 15 (waste class grid WC-11). The contractor installed a portion of the SSDS GPA layer and SSDS piping underlain by geotextile fabric in Grids 9 and 10. Contractor continued installing the waterproofing/vapor barrier membrane and continued rebar work in Grids 2, 4, 5, and 6.</p>

<b>CAMP Station</b>	<b>UPWIND</b>			<b>DOWNWIND</b>			
Odors:	None			None			
VOC Action Level Exceedance(s):	None			None			
Particulate Action Level Exceedance(s):	Yes			None			
Maximum VOC Level (ppm) 15-min avg:	0.3907			0.3349			
Maximum Particulate Level (mg/m³) 15-min avg:	0.3620			0.0710			
<p>CAMP Response Actions: An elevated particulate reading was noted at the Upwind CAMP Station during system startup. Reading went down to normal immediately afterwards and the exceedance was not attributed to the intrusive work. Additionally, the PID at the Upwind CAMP Station was not transmitting data in the morning. AKRF staff troubleshot the unit and the issue was resolved. No exceedance were noted at the Downwind Station or with the roving equipment.</p>							
<b>Additional Information</b>							
Planned Work Activity for Next Day/Week:	Installation of SOE, soil excavation, installation of the vapor barrier membrane, rebar work, and import of stone/installation of the SSDS. The first portion of the eastern tower mat slab will be poured tomorrow.						
Comments:	None

Maximum VOC Level (ppm) 15-min avg:	0.2051			0.2076			
Maximum Particulate Level (mg/m³) 15-min avg:	0.2609			0.0669			
<p>CAMP Response Actions: The dusttrack at the Upwind CAMP Station was not transmitting data in the morning. AKRF staff troubleshot the unit and the issue was resolved. Air monitoring was conducted using the roving equipment during the downtime- see attached Supplemental Air Log. No exceedances were noted at the downwind CAMP Station or with the roving equipment during that time. An elevated particulated particulate reading was noted at the Upwind CAMP Station from approximately 13:48-13:58pm as the station was accidentally hit by workers moving building materials in the area. The readings went back to normal immediately afterwards and the exceedance was not attributed to the intrusive work.</p>							
<b>Additional Information</b>							
Planned Work Activity for Next Day/Week:	Installation of SOE, soil excavation, installation of the vapor barrier membrane, rebar work, and installation of the SSDS.						
Comments:	None

<b>Description and Location of Work Activities Performed</b>						
<p>Excavated and exported approximately 280 cubic yards of soil/fill from Grids 2, 5, 6 (waste class Grid 5) for disposal at the Clean Earth of Carteret facility located in Carteret, New Jersey. The contractor welded rakers for support of excavation(SOE) in Grids 13 and 14. Excavation and grading occurred in Grids 2, 4, 12, 13, 14, and 15 (waste class grids WC-2, 3, 8, 9, 10, and 11). Constructed wooden forms for the concrete mat slab foundation in Grid 10. Installed PVC pipes for the sub-slab depressurization system (SSDS) in Grid 14. Erected scaffolding along the eastern site wall in Grids 2 and 6. Installed rebar in Grid 10.</p>

		975 Nostrand Avenue					
		Brooklyn, NY					
		BCP Site No. C224335					
<b>General Site Information</b>							
Date:		Tuesday, February 14, 2023					
Weather:		39-53 °F, Clear					
Wind Direction/Speed (towards):		Southeast @ 12 mph					
AKRF Personnel on Site:		Anna Brooks, Chad Walters					
AKRF Equipment on Site:		Mini RAE 3000 Photoionization Detectors [(PID) x3] and DustTrak Aerosol Monitors (x3)					
Visitors:		None					
<b>Contractor Information</b>							
<b>Subcontractor</b>				<b>Service</b>			
Olivero Construction (Olivero)				SOE Installation			
Broadway Builders (Broadway)				General Contractor (GC)			
<b>Description and Location of Work Activities Performed</b>							
<p>A total of 452.91 tons of gas permeable aggregate (GPA) stone was imported to the site for use below the concrete slab from Vulcan Materials (Hamburg Quarry). The contractor welded rakers for support of excavation (SOE) in Grid 13 and hammered concrete at the secant wall in Grid 12. Constructed wooden forms for the concrete mat slab foundation and footings in Grid 14. Installed components of the sub-slab depressurization system (SSDS) including: GPA; geogrid; monitoring point; and PVC pipes in Grids 10, 14, and 15. Erected scaffolding along the eastern site wall in Grids 2 and 6. Poured concrete mud slab in areas in Grids 10, 14, and 15. A poly sheeting was placed over the GPA layer prior to pouring the concrete mud slab. AKRF collected 6 post-excavation endpoint samples (EP-31 thru EP-36) from the south-central portion of the site along with the associated QA/QC samples in accordance with teh NYSDEC-approved RAWP. The sample locations were surveyed by a licensed surveyor.</p>

Particulate Action Level Exceedance(s):	None			None		
Maximum VOC Level (ppm) 15-min avg:	0.3888			0.2206		
Maximum Particulate Level (mg/m <sup>3</sup> ) 15-min avg:	0.6528			0.1709		
<p>CAMP Response Actions: Three separate incidents(between 10:44-11:18am, 11:23-11:55am, and 12:40-1:44pm) of particulate level exceedances were noted at the Upwind CAMP Station due to welding activity being conducted in the vicinity. The readings went down to immediately after the welding work was completed. A particulate exceedance was noted (between 7:22-7:33am) at the Downwind CAMP Station due to equipment exhaust coming from the excavator. The readings went back to normal shortly afterwards and the elevated concentration was not attributed to the remedial excavation work. CAMP was suspended at 1:45pm due to inclement weather.</p>						
<b>Additional Information</b>						
Planned Work Activity for Next Day/Week:	Installation of SOE, soil excavation, installation of the vapor barrier membrane, rebar work, and installation of the SSDS.					
Comments:	None
