	Daily Activity Report					
	975 Nostrand Avenue					
	Brooklyn, NY					
	BCP Site No. C224335					
General Site Information						
Date:	Thursday, March 2, 2023					
Weather:	39-57 °F, Partly Cloudy					
Wind Direction/Speed (towards):	South @ 3 mph					
AKRF Personnel on Site:	Anna Brooks					
AKRF Equipment on Site:	Mini RAE 3000 Photoionization Detectors [(PID) x3] and DustTrak Aerosol Monitors (x3)					
Visitors:	None					
Contractor Information						
Subcontractor				Service		
Olivero Construction (Olivero)				SOE Installation		
Broadway Builders (Broadway)				General Contractor (GC)		
Description and Location of Work Activities Performed						
The contractor welded rakers and installed lagging for support of excavation (SOE) in Grids 1 and 3. Rebar was installed along the site wall in GGrids 1, 2, 6, 9, and 10. Hammered concrete (C&D) in Grid 11. No intrusive work occurred.

CAMP Air Monitoring Results						
CAMP Station	UPWIND			DOWNWIND		
Odors:	None			None		
VOC Action Level Exceedance(s):	None			None		
Particulate Action Level Exceedance(s):	None			None		
Maximum VOC Level (ppm) 15-min avg:	0.6519			0.3655		
Maximum Particulate Level (mg/m ³) 15-min avg:	0.7463			0.3259		
CAMP Response Actions: Multiple elevated particulate readings were noted at the Upwind CAMP Station in the morning due to close proximity to welding work. Around 10:12am, the Upwind Station was hit by a metal bar being carried by the contractor and the telemetry system malfunctioned, leading to elevated readings for the remainder of the day. An elevated particulate reading was reading at the Downwind CAMP Station due to equipment movement in the vicinity. The readings went down to background levels immediately after the work was completed. The exceedances were not attributed to any soil disturbance at the site.						
Additional Information						
Planned Work Activity for Next Day/Week:	Installation of SOE, soil excavation, installation of the vapor barrier membrane, rebar work, and installation of the SSDS.					
Comments:	None

Olivero Construction (Olivero)				SOE Installation		
Broadway Builders (Broadway)				General Contractor (GC)		
Description and Location of Work Activities Performed						
<p>Approximately 120 cubic yards of soil/fill were excavated from Grids 1 and 3 (waste class grid WC-01) and exported off-site for disposal at the Impact Recovery and Reuse Center (IRRC) facility located in Lyndhurst, NJ. The contractor welded rakers and installed lagging for support of excavation (SOE) in Grids 1 and 3. Limited excavated occurred in Grids 1 and 3 (WC-01) and the soil was stockpiled for future export. Rebar and forms for the foundation wall were installed along the site wall in Grids 1, 2, 6, 9, and 10. Hammered concrete (C&D) in Grid 11. A total of 22.62 tons of 1.5-inch crushed stone was imported from the IRRC facility for the truck tracking ramp.</p>

Contractor Information						
Subcontractor				Service		
Olivero Construction (Olivero)				SOE Installation		
Broadway Builders (Broadway)				General Contractor (GC)		
Description and Location of Work Activities Performed						
Excavated and exported approximately 420 cubic yards of soil from Grids 11, 12 and 13 (waste class grids WC-7 and 8) to Bayshore Soil Management facility located in Keasbey, NJ, and approximately 180 cubic yards of soil from Grids 1 and 3 (was class grids WC-1 and 2) to Impact Recovery and Reuse Center (IRRC) facility located in Lyndhurst, NJ. The contractor welded rakers and installed lagging for support of excavation (SOE) in Grids 1 and 3. Limited excavated occurred in Grids 1 and 3 (waste class grids WC-01 and WC-02) and the soil was stockpiled for future export. Concrete was hammered in Grid 1. Rebar was installed in grids 12 and 13. Concrete forms for footings were constructed in grid 13.

Description and Location of Work Activities Performed						
Excavated and exported approximately 160 cubic yards of soil from Grids 1 and 3 (waste class grids WC-1 and 2) to Impact Recovery and Reuse Center (IRRC) facility located in Lyndhurst, NJ. The contractor welded rakers and installed lagging for support of excavation (SOE) in Grids 1, 3, and 12. Concrete was hammered in Grid 1. Rebar was installed in Grid 2 along the northern wall of the site. Concrete forms for footings were constructed in Grid 13 and partially poured.

Broadway Builders (Broadway)				General Contractor (GC)		
Description and Location of Work Activities Performed						
Excavation occurred in Grids 1, 3 and 4 (WC-1 and 2) and excavated material was stockpiled for off site disposal. The contractor welded rakers and installed lagging for support of excavation (SOE) in Grid 12. Concrete was hammered in Grids 9 and 15. Rebar was installed in Grids 13 and 6. Concrete forms were installed along the eastern wall of the site in Grid 6. Waterproofing/vapor barrier membrane was installed along the northern wall of the site in Grid 2. Installed heelblocks for SOE and conducted limited excavation in Grid 13 (waste class grid WC-9).

AKRF Equipment on Site:	Mini RAE 3000 Photoionization Detectors [(PID) x3] and DustTrak Aerosol Monitors (x3)					
Visitors:	None					
Contractor Information						
Subcontractor				Service		
Olivero Construction (Olivero)				SOE Installation		
Broadway Builders (Broadway)				General Contractor (GC)		
Description and Location of Work Activities Performed						
<p>Excavated and exported approximately 360 cubic yards of soil/fill from Grids 1, 3 and 4 (WC-1 and 2) for off-site disposal at the Impact Recovery and Reuse Center (IRRC) facility located in Lyndhurst, NJ. In addition, approximately 220 cubic yards of soil/fill were excavated and exported from Grids 12, 13 and 14 (WC-7, 8 and 9) for disposal at the Bayshore Soil Management facility located in Keasby, NJ. The contractor welded rakers and installed lagging for support of excavation (SOE) in Grid 12. Concrete was hammered in Grid 9. Concrete forms were installed along the eastern wall of the site in Grids 6 and 15. Installed heelblocks for SOE and conducted limited excavation in Grid 13 (waste class grid WC-9) and Grid 4 (waste class grid WC-4).</p>

<p>CAMP Response Actions: Around 12:45pm, the contractor accidentally knocked down the Upwind CAMP Station which caused a particulate exceedance. The dust track malfunctioned and was offline for the remainder of the day. Troubleshooting efforts will continue tomorrow. A particulate exceedance was noted at the Downwind CAMP Station around 7:45am while moving the equipment to a safe location and away from construction equipment. This exceedance was not related to any intrusive work and levels went back to normal immediately after the equipment was re-located.</p>						
Additional Information						
Planned Work Activity for Next Day/Week:	Installation of SOE, soil excavation, installation of the vapor barrier membrane, rebar work, and installation of the SSDS.					
Comments:	None

Contractor Information

Subcontractor	Service
Olivero Construction (Olivero)	SOE Installation
Broadway Builders (Broadway)	General Contractor (GC)

Description and Location of Work Activities Performed

The contractor excavated and exported approximately 240 cubic yards of soil/fill from Grids 7, 8, 11, 12, (waste class grids WC- 6 and 7) for off-site disposal at the Bayshore Soil Management facility located in Keasby, NJ. The contractor welded rakers and installed lagging for support of excavation (SOE) in Grid 11. Installed components of the SSDS system in Grid 9, including: SSDS piping; gas permeable aggregate (GPA); and geotextile fabric (below the GPA). Installed rebar in Grids 14 and 15 along the southern wall of the site.
