	<b>Daily Activity Report</b>					
	975 Nostrand Avenue					
	Brooklyn, NY					
	BCP Site No. C224335					
<b>General Site Information</b>						
Date:	Tuesday, April 4, 2023					
Weather:	47-65 °F, Clear					
Wind Direction/Speed (towards):	Southeast @ 4 mph					
AKRF Personnel on Site:	Hank Westly and Jack Kelleher-Ferguson					
AKRF Equipment on Site:	Mini RAE 3000 Photoionization Detectors (PID) x3 and DustTrak Aerosol Monitors (x3)					
Visitors:	None					
<b>Contractor Information</b>						
<b>Subcontractor</b>					<b>Service</b>	
Olivero Construction (Olivero)					SOE Installation	
Broadway Builders (Broadway)					General Contractor (GC)	
<b>Description and Location of Work Activities Performed</b>						
<p>The contractor welded rakers and installed lagging for support of excavation (SOE) in Grids 1, 4 and 11. Disassembled concrete forms in Grid 15 along the southern wall. Installed rebar in grid 14 along the southern wall. The contractor exported approximately 20 tons of concrete and demolition debris (C+D) to the Impact Recovery and Reuse Center (IRRC) facility in Lyndhurst, NJ. Two 275-gal underground storage tanks (USTs) containing gasoline/water mixture were discovered in grid 7 (waste class grid WC-6) during excavation for lagging along the western wall of the site. Evidence of a potential third tank grave, i.e., previously removed UST, was identified. Some petroleum-contaminated soil was present on the top portion of the tank, presumed to be from the fill. Some contaminated soil around the top of the tank was placed on poly sheeting and covered. The USTs will be left in place until a qualified contractor can properly clean and remove them. Screening for, and removal of, contaminated soil will resume during the tank removal activities, anticipated to occur later in the week.</p>

<b>Description and Location of Work Activities Performed</b>						
<p>The contractor welded rakers and installed lagging for support of excavation (SOE) in Grids 1 and 4. Excavation occurred in Grids 1 and 4 (waste class grid WC-2) and the excavated material was stockpiled. Removed concrete forms in Grid 15 along the southern wall and installed rebar in Grid 14. Installed portions of the SSDS system in Grid 13 including; PVC piping, gas-permeable aggregate (GPA) and geotextile fabric. Excavated soil and installed foundation footings in Grids 9 and 13 (was class grid WC-9). The contractor exported approximately 20 cubic yards of concrete and demolition debris (C&amp;D) to the Impact Recovery and Reuse Center (IRRC) facility located in Lyndhurst, NJ.</p>

Maximum VOC Level (ppm) 15-min avg:	2.0767			0.1659		
Maximum Particulate Level (mg/m³) 15-min avg:	0.2909			0.0515		
<p>CAMP Response Actions: Multiple instances of particulate exceedences were recorded throughout the day at the upwind CAMP station. There was an exceedence from 7:50 to 8:00am caused by the station being moved during operation; and between 8:20-9:20am, 9:55-10:10am, 10:45-10:55am, 13:15-13:30pm, 13:45-14:00pm and 14:45-15:00pm. The exceedences were caused by dust generated by the concrete trucks driving close to the station. Dust suppression (water) was deployed throughout the day in an effort to lower dust levels. There were no exceedences at the downwind enclosure.</p>

<b>Contractor Information</b>						
<b>Subcontractor</b>				<b>Service</b>		
Olivero Construction (Olivero)				SOE Installation		
Broadway Builders (Broadway)				General Contractor (GC)		
<b>Description and Location of Work Activities Performed</b>						
<p>The contractor welded rakers for support of excavation (SOE) in Grid 7. Installed heelblocks and rakers for SOE in Grids 11 and 12. The contractor excavated soil/fill in Grids 11 and 12 (waste class grid WC-7) and the excavated material was stockpiled. Approximately 240 cubic yards of soil/fill were excavated from Grids 5, 9, 11, and 12 (waste class grids WC-3, 7, and 8) exported off-site for disposal at the Bayshore Soil Management facility located in Keasbey, NJ. Installed scaffolding in Grid 4 (along the northern wall). Installed waterproofing/vapor barrier membrane in Grids 9 and 13.</p>

<b>Contractor Information</b>						
<b>Subcontractor</b>				<b>Service</b>		
Olivero Construction (Olivero)				SOE Installation		
Broadway Builders (Broadway)				General Contractor (GC)		
<b>Description and Location of Work Activities Performed</b>						
<p>The contractor installed and welded rakers for support of excavation (SOE) in Grid 11. Installed concrete forms in Grids 4 and 5. The contractor excavated soil/fill in Grid 11 (waste class grid WC-6) for installation of SOE along the western wall. Excavated and exported approximately 300 cubic yards of soil/fill from Grid 11 (waste class grid WC-6) for off-site disposal at the Bayshore Soil Management facility located in Keasby, NJ. Imported 48.10 tons of ASTM #5 stone from Tilcon's West Nyack Quarry, and 25.86 tons of ASTM #5 stone from Tilcon's Mt. Hope Quarry. The stone will be used as part of the SSDS installation. Installed portions of the sub-slab depressurization system (SSDS) in Grid 9, including: PVC piping, and gas permeable aggregate (GPA).</p>

The map displays a grid of 15 numbered lots (1-15) within a pink boundary. Lot 6 is highlighted with a blue square and labeled 'Upwind Station'. Lot 11 is highlighted with a blue square and labeled 'Downwind Station'. The grid is labeled with numbers 1 through 15. The map also shows surrounding areas with lot numbers 17, 26, 28, 30, 31, 32, 35, 36, 63, 1, 147, 138, and 136. A road labeled 'Clove Rd' runs diagonally across the map. A legend on the right defines the symbols: pink line for BCP SITE BOUNDARY, blue line for LOT BOUNDARY AND TAX LOT NUMBER, 1309 for BLOCK NUMBER, yellow for BUILDING, and blue line for NUMERIC GRID. A scale bar at the bottom right indicates 0, 20, 40, and 80 feet.
