Broadway Builders (Broadway)					General Contractor (GC)	
Description and Location of Work Activities Performed						
<p>The contractor installed and welded rakers for support of excavation (SOE) in Grids 7 and 11. The contractor excavated soil/fill in Grid 11 (waste class grids WC-6 and 7) for installation of SOE along the western wall. Excavated and exported approximately 280 cubic yards of soil/fill from Grid 11 (waste class grids WC-6 and 7) for off-site disposal at the Bayshore Soil Management facility located in Keasbey, NJ. The contractor installed concrete forms and poured concrete in Grid 11.</p>

Comments:	None					

The map displays a grid of 15 numbered lots (1-15) within a pink boundary. Lot 6 is highlighted with a blue square and labeled 'Upwind Station'. Lot 11 is highlighted with a blue square and labeled 'Downwind Station'. The grid is labeled with numbers 1 through 15. The map also shows surrounding areas with lot numbers 17, 26, 28, 30, 31, 32, 35, 36, 63, 1, 147, 138, and 136. A road labeled 'Clove Rd' runs diagonally across the map. A legend on the right defines the symbols: pink line for BCP SITE BOUNDARY, blue line for LOT BOUNDARY AND TAX LOT NUMBER, 1309 for BLOCK NUMBER, yellow for BUILDING, and blue line for NUMERIC GRID. A scale bar at the bottom right indicates 0, 20, 40, and 80 feet.

Olivero Construction (Olivero)				SOE Installation		
Broadway Builders (Broadway)				General Contractor (GC)		
Description and Location of Work Activities Performed						
<p>The contractor installed and welded rakers for support of excavation (SOE) in Grid 7. The contractor excavated and exported approximately 180 cubic yards of soil/fill in Grids 9 and 11 (waste class grids WC-6, 7, 8, and 9) to the Bayshore Soil Management facility located in Keasby, NJ. The contractor excavated and exported approximately 120 cubic yards of soil/fill from Grids 4 and 8 (waste class grids WC-2 and 3) to the Impact Recovery and Reuse Center (IRRC) facility located in Lyndhurst, NJ. The contractor excavated soil/fill in Grids 4, 7, and 9 for installation of various foundation elements. The contractor installed pipe sleeves for future SVE well installation.</p>

Contractor Information						
Subcontractor				Service		
Olivero Construction (Olivero)				SOE Installation		
Control Point Associates (surveyor)				Soil Sample Location Survey		
Broadway Builders (Broadway)				General Contractor (GC)		
Description and Location of Work Activities Performed						
<p>The contractor installed and welded rakers for support of excavation (SOE) in Grid 7. The contractor imported 155.45 tons of crushed virgin stone from Vulcan Materials, Hamburg Quarry.. The contractor excavated soil/fill in Grids 4, 7, 9 and 11 for installation of various foundation elements. The contractor installed pipe sleeves for future SVE well installation in Grid 11. The contractor installed portions of the SSDS system in Grids 7, 11 and 4 including; PVC piping, GPA, polysheeting, and geotextile fabric. Poured concrete in Grids 4 and 7 for foundation elements. AKRF collected two post excavation soil endpoint samples (EP-53 and EP-54) from the excavation bottom and associated QA/QC samples in accordance with the NYSDEC-approved RAWP. The sample locations were surveyed by a licensed surveyor.</p>

Description and Location of Work Activities Performed						
<p>The contractor installed and welded rakers for support of excavation (SOE) in Grid 7. The contractor poured concrete for foundation footings in Grid 8, and for mud slab in Grids 9 and 13. Installed forms for the concrete mat slab in Grid 11. Installed a portion of the SSDS system including: geotextile fabric and gas permeable aggregate (GPA) in Grid 12. Hammered concrete in Grids 12 and 15. AKRF collected site-wide post excavation endpoint samples (EP-55 through EP-57) and one endpoint sample (post contaminated soil removal) from the former underground storage tank location along with the QA/QC samples in accordance with the NYSDEC-approved RAWP. Sample points were surveyed by a NYS-licensed surveyor. Electrical conduits were installed in Grid 11.</p>

The map displays a site grid plan for Block 1309. The grid consists of 15 numbered lots (1-15) arranged in a rectangular pattern. Lot 1 is at the top left, and Lot 15 is at the bottom right. The grid is bounded by a pink line. To the north of the grid is Clove Rd, and to the south is another road. Two stations are marked: 'Upwind Station' at the top right and 'Downwind Station' at the bottom left. A legend on the right explains the symbols: pink line for BCP Site Boundary, blue line for Lot Boundary and Tax Lot Number, 1309 for Block Number, yellow for Building, and blue line for Numeric Grid. A scale bar at the bottom right indicates 0 to 80 feet.

Site Grid Plan

The map displays a 4x4 grid of lots, numbered 1 through 15. Lot 6 is highlighted in blue. The grid is bounded by a pink line. Surrounding the grid are various other lots, including 17, 26, 28, 30, 31, 32, 35, 36, 63, 1, 147, 138, and 136. A road labeled "Clove Rd" runs diagonally across the right side of the grid. Two stations are marked: "Upwind Station" at the bottom left and "Downwind Station" at the top right. A legend on the right side of the map defines the symbols used: a pink line for the BCP Site Boundary, a blue line for Lot Boundary and Tax Lot Number, the number 1309 for the Block Number, a yellow rectangle for a Building, and a blue line for the Numeric Grid. A scale bar at the bottom right indicates a scale in feet, ranging from 0 to 80.
