ESA_Parcel 1 (FINAL 2018-08-24).docx

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was prepared by Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. on behalf of Innovative Urban Living LLC to identify current or potential environmental concerns and Recognized Environmental Conditions (RECs) at the ±2.08-acre proposed development site consisting of the property on the western portion of Block 4434, Lot 1 at 12074 Flatlands Avenue in Brooklyn, New York. The ESA included a site inspection, review of historical information, completion of a federal/state/local environmental database search, and interviews with local and state agencies to assess current and past site conditions.

The subject property is currently a vacant lot covered with compacted recycled concrete aggregate (RCA) currently used for parking by the Christian Cultural Center (CCC) and previously used for automobile junking. The subject property reportedly originally consisted of marshlands and was filled in during the early 1900's with ash and waste from the city solid waste incinerator. Historical site operations include automotive junking. A Phase II Environmental Investigation completed for the subject property by Langan in May 2018 documented the presence of ash in the fill layer. Additionally, odors and/or elevated photoionization detector (PID) readings were detected in subsurface soils in the northern portion of the subject property in the vicinity of the historical automobile junking operations. The collection of soil samples for laboratory analysis revealed the presence semi-volatile organic compounds (SVOCs), pesticides, polychlorinated biphenyls (PCBs), and metals in contaminated fill throughout the subject property exceeding the New York State Department of Environmental Conservation (NYSDEC) Unrestricted Use Soil Cleanup Objectives (SCOs) and/or Restricted Residential, Commercial, and Industrial Restricted Use Soil Cleanup Objectives (RUSCOs) throughout the subject property. Elevated concentrations of SVOCs, PCBs, and total metals were also identified in groundwater and are attributed to likely sediment entrainment of contaminated fill material of unknown origin in the groundwater samples. Finally, methane was not detected in the subsurface.

Based on information obtained during the visual inspection of the subject property, review of environmental databases and historic information, and contact with federal/state/local official agencies, the following recognized environmental conditions (RECs) and business environmental risks that may impact proposed redevelopment of the site were identified:

Recognized Environmental Conditions

A REC is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. It is the opinion of the environmental professional that the following represent RECs:

Former On-Site Automobile Junkyard

Based on the review of historical Sanborn Maps, an automobile junkyard was identified on the northern portion of the subject property from 1967 through 2001. The potential exists for adverse environmental impacts to the subsurface due to the potential cumulative effect of unreported petroleum releases associated with these operations. Moreover during the May 2018 Phase II Environmental Investigation, odors and/or elevated PID readings and elevated concentrations of PAHs were detected in subsurface soils in the northern portion of the subject property in the vicinity of the historical automobile junking operations; therefore, historical automobile junking operations represents a REC.

Presence of Contaminated Fill

Based on the 2003 Phase I ESA prepared by Soil Mechanics Environmental Services, the subject property historically consisted of marshland and was filled in the early 1900's with ash and waste from the city's solid waste incinerator. During the May 2018 Phase II Environmental Investigation, contaminated fill containing ash was observed in the subsurface and laboratory analytical results for soil revealed the presence of elevated concentrations of PAHs and metals above the NYSDEC Restricted Residential, Commercial, and Industrial RUSCOs. The presence of contaminated fill containing impacts exceeding state regulatory cleanup objectives represents a REC.

Business Environmental Risks

A BER is defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations. It is the opinion of the environmental professional that the following represent business environmental risks:

Potential Presence of Undocumented Underground Heating Oil Storage Tanks

While no evidence or records confirming use of fuel oil USTs was observed during the site inspection or noted during this ESA, small one-story structures were historically identified throughout the subject property associated with historic site use for auto junking. Due to the presence of these structures and this historical use of the site, it is the opinion of the environmental professional that the potential presence of heating oil USTs beneath the lot or adjacent sidewalks represents a business environmental risk. Preparation and implementation of a contingency plan to address the presence of any USTs that may be encountered during site excavation activities would adequately address this issue.

Surrounding Sites

Potential impacts from current and historical operations conducted at adjacent and nearby properties involving automobile wrecking/dismantling sites, automobile repair, gasoline filling stations, dry cleaners, the use of USTs, spills, and the generation and disposal of hazardous waste represent a business environmental risk due to the potential for offsite migration of contaminants to impact sub-slab soil and/or groundwater below the subject site. This may impact any proposed dewatering operations as laboratory analytical results documenting discharge water quality are required for city sewer discharge permits.

1.0 INTRODUCTION

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) has completed a Phase I Environmental Site Assessment (ESA) of a ±2.08-acre site located on the western portion of Block 4434, Lot 1 at 12074 Flatlands Avenue in Brooklyn, Kings County, New York (Figure 1).

This ESA was conducted to identify current or potential environmental concerns and/or Recognized Environmental Conditions (RECs) resulting from past or current activities on the subject property, as well as to evaluate immediately surrounding environs with the potential to impact upon the property. The assessment consisted of a site reconnaissance of all accessible property areas, a review of State and Federal environmental databases as they concern the subject property and surrounding areas, contact with Federal, State and local agencies, a review of Sanborn Fire Insurance Maps of the subject property and surrounding areas, and a review of local/county records.

The ESA was conducted in a manner consistent with industry standard and practice and in accordance with the Standards of the American Society for Testing and Materials (ASTM) E1527-13 Standard Practice for Environmental Site Assessments. Any deviations from this practice are provided in Section 11.0 of this report.

2.0 RELIANCE/LIMITATIONS

This ESA report was prepared for Innovative Urban Living LLC, for the western portion of Block 4434, Lot 1 identified as 12074 Flatlands Avenue, and for the objectives of due diligence. The report is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility for use of this report for any property other than the subject property addressed herein, or by any third party without a written authorization from Langan.

Langan's scope of services, as described in the proposal dated 2 November 2017, revised 21 November 2017, was limited to that agreed to with Innovative Urban Living LLC and no other services beyond those explicitly stated are implied. No exploratory borings, sampling of soil, soil vapor, or groundwater, or laboratory analysis were performed by Langan as part of the scope of services.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the subject property. The purpose of this investigation was limited to determining if there is reason to suspect the possibility of Recognized Environmental Conditions (RECs) at the subject property. It should be understood that even the most comprehensive Phase I ESA may fail to detect environmental liabilities at a particular site. Therefore, Langan cannot “insure” or “certify” that the subject property is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our client, with the customary thoroughness and competence of our profession. The user is cautioned that federal, state, and local laws may impose environmental obligations that are beyond the scope of ASTM Practice E 1527-13.

The conclusions, opinions and recommendations provided in this report are based solely on the following activities:

- Visual observations of the subject property and the immediate vicinity at the time of Langan’s site visit;
- Review of relevant available historical information; and,
- Correspondence and/or discussion with personnel knowledgeable about the site.

The conclusions, opinions and recommendations are intended exclusively for the purpose stated herein, at the specified subject property, as it existed at the time of our site visit.

The User is responsible for the review and identification of environmental liens, activity, and use limitations, and for ascertaining reasons for significantly lower purchase property price in accordance with Section 6 of ASTM E 1527-13. A questionnaire covering these above-concerns was provided to Innovative Urban Living LLC and is included as Appendix A. In addition, a similar questionnaire was provided to Mr. Elder Gerald Shaw Sr., the current site manager, and is included as Appendix B. If any of these above-concerns were uncovered during the course of the Phase I ESA, they are addressed in this report.

The report findings are based in part on information provided by local, county and state officials and environmental databases from Federal and State sources. Langan assumes no responsibility for the accuracy and completeness of this information.

Visual observations discussed in this report represent conditions at the time of the site inspection and may not be representative of the past or future site conditions.

As per ASTM E1527-13, Phase I ESA Report deviations, as well as professional opinions regarding these deviations, are listed in Section 11.0.

This ESA has been prepared for the sole use of Innovative Urban Living LLC. This ESA should not be relied upon by other parties without the express consent of Langan and Innovative Urban Living LLC. In accordance with Section 4.6 of ASTM E 1527-13 and 40 CFR §312.20, a Phase I ESA may be considered valid for one year starting from the commencement date of the assessment listed on the front cover of this report. The formal property acquisition/real estate transaction must take place during this period. However, the following components must be conducted or updated within 180 days (six months) prior to the date of the property acquisition/real estate transaction:

- Interviews with past and present owners, operators and occupants;
- Searches for recorded environmental cleanup liens;
- Review of governmental records;
- Site Reconnaissance of the property and adjoining properties; and,
- The declaration by the Environmental Professional.

3.0 SITE DESCRIPTION

The subject property is designated as the western portion of Block 4434, Lot 1 by the New York City Department of Finance (Figure 2). A tax lot subdivision application has been provided to New York City such that this western portion of Lot 1 will be redefined as its own lot and the eastern portion will be provided a new lot number as Lot 10. The subject property consists of a large vacant, unpaved, RCA covered lot and is used for surplus parking at street level during church service or events at the CCC building located to the west of the subject property.

According to the 1908 historical Sanborn Map, historical address ranges associated with the subject property include:

- 74-96 Fairfield Avenue;
- 1035-1079 Georgia Avenue; and,
- 1040-1084 Sheffield Avenue.

In 1967, Fairfield Avenue is converted to Flatlands Avenue and the new addresses along the northern frontage associated with the subject property include 12074-12096 Flatlands Avenue.

The subject property is bound to the north by Flatlands Avenue (formerly Fairfield Avenue prior to 1967) followed by an automobile dismantling company and used automobile parts business, medical offices, and the Oasis Hotel, to the east by an RCA-paved lot (future Lot 10) and a twelve-story multi-family residential apartment building, to the south by an additional twelve-story multi-family residential apartment building, and to the west by an offsite extension of the RCA covered lot located on the subject property followed by the CCC building and its surrounding asphalt-paved parking lot.

The subject property is currently zoned as a residential district (R5) according to the New York City Department of City Planning (NYCDCP) zoning map effective 7 September 2017.

4.0 GEOLOGIC AND HYDROGEOLOGIC CONDITIONS

For the purpose of report completeness and to better understand the subsurface conditions, the geologic conditions in the general area of the subject property are discussed in this section.

The "Surficial Geologic Map of New York" Lower Hudson Sheet by the New York State Museum State Geological Survey identifies that the surficial geology at the site consists of outwash sand and gravel which is generally a well-rounded and stratified layer of coarse to fine gravel with sand. According to the "Geologic Map of New York – Lower Hudson Sheet" by the University of the State of New York, geology at the site consists of silty clay, sand, and gravel.

A Limited Due Diligence Phase II Environmental Investigation was completed on the subject property in May 2018. Based on field observations during test pit and soil boring completion, the subject property is underlain by an approximately 16- to 25-foot thick layer of contaminated fill. A layer of ash up to 3 feet thick was observed in four of the five soil borings completed across the site at depths that ranged from 10 to 20 feet below existing grade. Native sand was encountered in one of the five soil borings at 16 feet and extended to the bottom of the boring. Soil borings were only advanced to 20 to 25 feet below existing grade; as such, the potential exists for contaminated fill that may

contain ash to extend deeper than the vertical limit of the Phase II investigation at locations where native soil was not encountered.

Based on site/area topography, groundwater flow within the overburden material is anticipated to be to the southeast, towards the North Channel of Jamaica Bay.

5.0 USER PROVIDED INFORMATION

A questionnaire was completed by the User and is included in Appendix A. Information typically obtained from this questionnaire is discussed in the sections below. Documents provided by the User are discussed in this section.

5.1 Title Records

A Title Search was not provided by the User for this ESA. Langan completed a limited review of available online records maintained by the New York City Department of Finance to determine current and former site ownership. These records are discussed in Section 8.0.

5.2 Environmental Liens or Activity and Use Limitations

Reasonably ascertainable recorded land title records and lien records that are filed under federal, tribal, state, or local law should be reviewed to identify environmental liens or activity and use limitations, if any, that are currently recorded against the property. Any environmental liens or activity and use limitations are required to be reported to the Environmental Professional conducting the ESA per ASTM E1527-13.

No environmental liens or use limitations (engineering or institutional controls) were identified for the subject property in the EDR report or by the User. Information regarding the 'E'-designation status of the property can be found in Section 8 of this report.

5.3 Specialized Knowledge

Specialized knowledge is defined by ASTM E 1527-13 as *“any specialized knowledge or experience that is material to recognized environmental conditions in connection with the property”*. For example, a User is involved in the same line of business as current or former occupants of the property or adjoining

property and has specialized knowledge of the chemicals and processes used in this line of business.

The User did not provide specialized knowledge material related to recognized environmental conditions in connection with the property as part of this ESA.

5.4 Valuation Reduction for Environmental Issues

In a transaction involving the purchase of a parcel of commercial real estate, the User shall consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for a lower price which does not reasonably reflect fair market value if the property were not contaminated.

The User indicated that no valuation reduction for environmental issues occurred for the subject property.

5.5 Commonly Known Information

If the user is aware of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the property, it is the User's responsibility to communicate such information. This information may include past uses of the property, specific chemicals that were used on site, spills or releases or environmental cleanups that have taken place.

No additional information regarding the environmental condition of the subject site was provided to Langan other than that discussed in Section 5.6, below.

5.6 Documentation Provided by the User

Phase I ESA, Soil Mechanics Environmental Services (April 2003)

In April 2003, Soil Mechanics Environmental Services (Soil Mechanics) prepared a Phase I ESA report for the entire 10-acre CCC property on behalf of a party that appears to have been a prospective buyer. The Phase I ESA also included summaries of historical investigations.

According to the Phase I ESA, a Technical Memorandum for the Draft Environmental Impact Statement (DEIS) was prepared for the entire 10-acre CCC

property in June 1991 by AKRF, Inc. as part of the New York City Environmental Quality Review (CEQR) process for the New York City Department of City Planning (NYCDCP) and New York City Department of Environmental Protection (NYCDEP). The Technical Memorandum documented that the CCC property originally consisted of marshlands and was filled in during the early 1900's with ash and waste from the city solid waste incinerator. A subsurface assessment was completed to establish baseline soil and groundwater quality conditions at the site.

A geophysical investigation revealed two anomalies near Flatlands Avenue, one of which was located within the subject property, and one near Vandalia Avenue; test pits completed to approximately 7-feet below ground surface in these areas identified the presence of automobile parts such as gasoline tanks and tire rims, and a crushed drum in one location.

A soil gas survey completed in the area of the former gasoline station located on the portion of Block 4434 Lot 1 identified as adjacent to the east of the subject property (future Lot 10) revealed the presence of methane gas which was attributed to the former marsh deposits and presence of historic fill; no volatile organic compounds (VOCs) associated with gasoline were detected. Soil sampling activities, including from one soil boring advanced on the subject property, revealed the presence of elevated concentrations of total petroleum hydrocarbons and metals throughout the site as well as elevated concentrations of semi-volatile organic compounds (SVOCs) in several surficial and subsurface soil samples.

Elevated concentrations of metals, VOCs, and SVOCs, were also detected in groundwater samples collected from monitoring wells installed on the adjacent CCC building parking lot, the portion of Block 4434 Lot 1 identified as adjacent to the east of the subject property (future Lot 10), and within the non-adjacent lot identified as Block 4434, Lot 75, which were attributed to the presence of historic fill that was identified as being impacted with the same compounds, which is in contact with groundwater.

Based on the results of the investigation, AKRF, Inc. recommended the implementation of a health and safety plan (HASP) during future construction activities and the construction of a soil capping system to prevent human exposure to remaining impacts in soil.

The Phase I ESA also included a summary of a Subsurface Investigation and Report prepared by SESI Consulting Engineers and dated March 1994 for the entire CCC property. The investigation included the installation of eight soil borings to between 26- and 51.5-feet below ground surface. Miscellaneous fill was encountered in all locations at depths ranging from 18.5- to 35-feet below ground surface. The fill reportedly consisted of cinders and ash mixed with sand, silt, gravel, and clay and various debris such as concrete, wood, rubble, metal, brick, glass, and asphalt. Groundwater was encountered between 17- and 23-feet below ground surface.

Soil Mechanics' concluded that the recommendations for a HASP and soil capping system detailed by AKRF Inc. be strictly followed and noted that a methane mitigation system may be required as part of any future building construction. Soil Mechanics also recommended that future site activities be conducted under the oversight of NYCDEP or NYSDEC and that all USTs encountered during redevelopment be removed in accordance with all applicable laws. Finally, Soil Mechanics recommended the proper removal of all miscellaneous waste that was observed on the subject property including an abandoned crane, rubber tires, and demolition debris and noted that a groundwater investigation would be required to evaluate for potential impacts from upgradient properties of concern.

Limited Due Diligence Phase II Environmental Investigation Report, May 2018 (Langan)

A Limited Due Diligence Phase II Environmental Investigation (EI) was completed on the subject property for the purposes of due diligence and to evaluate if potential subsurface impacts exist associated with historical site use as an automobile junkyard and automobile dismantling facilities and historical gasoline filling station operations at nearby sites, if subsurface impacts exist associated with the presence of historic fill, and if methane identified during previous investigations is present in the subsurface which would require mitigation of soil vapor intrusion into proposed site buildings.

The Limited Due Diligence Phase II EI included installation of five soil borings to approximately 20 to 25 feet below sidewalk grade, installation of two flush-mounted permanent groundwater monitoring wells, excavation of two test pits to between approximately 5 and 6 feet below existing grade, the completion of methane monitoring in soil vapor, and the collection of 10 soil samples and two groundwater samples for laboratory analysis.

Based on field observations during the test pit and soil boring activities, the subject property is underlain by an approximately 16- to 25-foot thick layer of historic fill. A layer of ash up to 3 feet thick was observed in four of the five soil borings completed across the site at depths that ranged from 10- to 20-feet below existing grade. Native sand was encountered in one of the five soil borings located near the northern property boundary at 16feet below grade and extended to the bottom of the boring. Soil borings were only advanced to 20 to 25 feet below existing grade; as such, the potential exists for historic fill that may contain ash to extend deeper than the vertical limit of the Phase II investigation at locations where native soil was not encountered.

Odors and elevated PID readings up to 22.1 parts per million (ppm) were detected in the northern portion of the subject property from 8 to 14 feet below street level (bsl). These observations were identified in the vicinity of the historical automobile junking operation located on the northern portion of the subject property.

Groundwater was measured at 13.7 feet below current site grade at the permanent groundwater monitoring well installed in the northern part of the subject property and 18.8 feet below grade at the permanent groundwater monitoring well installed in the central portion of the subject property.

Soil analytical results identified elevated concentrations of the VOC acetone, a common laboratory artifact, in three samples collected. Elevated concentrations of PAHs, pesticides, PCBs, and metals were detected in fill material throughout the subject property exceeding the NYSDEC Unrestricted Use SCOs. PAHs and metals were also detected in fill material exceeding the Restricted Residential, Commercial, and Industrial RUSCOs, which are attributed to historical operations and/or the quality of contaminated fill material of unknown origin.

Groundwater analytical results identified elevated concentrations of the VOC methyl-tert butyl ether, a common fuel additive, above the NYSDEC Technical & Operational Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards and Guidance Values in one groundwater sample collected from within the eastern portion of the subject property. An elevated concentration of the semi-volatile organic compound (SVOC) 3&4 methylphenol, which is a derivative of phenol (a petroleum derived compound), was also detected at this locations. These detections are associated with historical operations as automobile junking. Elevated concentrations of SVOCs, PCBs, and metals were also identified and are attributed to likely sediment entrainment of contaminated fill material of unknown origin in the groundwater samples. Dissolved metal exceedances are attributed to naturally occurring background concentrations.

Soil vapor/methane field screening results did not identify the presence of methane in the subsurface.

Langan concluded that based on the soil and groundwater analytical results, the subsurface has been impacted from historical subject property operations and contaminated fill containing elevated concentrations of SVOCs, pesticides, PCBs, and metals has been identified. Methane was not detected in the subsurface.

6.0 REVIEW OF PREVIOUS LAND USE

Historic Sanborn Fire Insurance Maps and City Directory Information were requested from Environmental Data Resources (EDR) of Shelton, Connecticut. Provided are descriptions of the materials provided by these resources.

6.1 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps of the subject property and surrounding area dated 1908, 1928, 1950, 1967, 1969, 1977, 1979, 1980, 1981, 1983, 1986, 1987, 1989, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006, and 2007 were obtained from Environmental Data Resources and reviewed as part of this ESA. Copies of Sanborn Maps are provided in Appendix C.

Subject Property

Historical Sanborn Fire Insurance Maps show the subject property as mostly vacant undeveloped lots in 1908; a one-story shed and one-story wagon house

are located within the central portion of the subject property. The western portion of the subject property includes Georgia Avenue running north to south through the site. The current Flatlands Avenue is identified as Fairfield Avenue. The two one-story structures shown in 1908 are shown on the 1928 Sanborn Map in a slightly different orientation and are labeled as vacant sheds.

The two one-story structures are no longer shown in 1950. In 1967, the northwestern corner of the subject property is labeled as auto junk and the northeastern corner contains a one-story office building. Conditions shown on the 1969 through 1983 Sanborn Maps are similar to those shown on the 1967 Sanborn Map, with the exception of the entire northern portion of the subject property being labeled as auto junk starting in 1977. Fairfield Avenue is renamed to Flatlands Avenue in 1969 and Georgia Avenue crossing the subject property is identified as not being open in 1977.

In 1986, the one-story office building is no longer shown. Conditions shown on the 1987 through 2001 Sanborn Maps are similar to those shown on the 1986 Sanborn Map. In 2002, the northern portion of the subject property is no longer labeled as auto junk and Georgia Avenue is no longer shown. No other changes are shown for the subject property through 2007.

Adjacent Properties

In 1908, the subject property is surrounded by predominantly vacant lots. Fairfield Avenue runs adjacent to the north and Sheffield Avenue runs adjacent to the east, and vacant lots run adjacent to the west of the subject property. In 1950, one of the adjacent properties to the north of the subject property following Fairfield Avenue is developed with a used automobile parts facility (northwest corner at the intersection of Sheffield and Fairfield Avenues). A non-adjacent filling station with three gasoline tanks is also identified at the northeast corner at the intersection of Fairfield Avenue and Sheffield Avenue. A filling station with no gasoline tanks shown is also identified adjacent to the east of the subject property following Sheffield Avenue along Fairfield Avenue between Sheffield Avenue and Pennsylvania Avenue. A one-story storage building with frontage along Pennsylvania Avenue is also shown adjacent to the east of the subject property following Sheffield Avenue.

Fairfield Avenue is renamed as Flatlands Avenue on the 1967 Sanborn Map. An additional adjacent property to the northwest of the subject property is shown as

being used for automobile junking and repair. The filling station building shown on the 1950 Sanborn Map to the northeast of the subject property is still present; however, the gasoline tanks are no longer shown. The filling station located adjacent to the east is now labeled as automobile wrecking. The frontage along Flatlands Avenue of the adjacent properties to the west are labeled as auto junk. Additional non-adjacent automobile facilities including junking and used automobile sales are also identified to the west of the site.

No changes are shown on adjacent properties to the north, south, east, or west on the 1969 through 1981 Sanborn Maps with the exception that the gasoline filling station located across the intersection of Fairfield Avenue and Sheffield Avenue to the northeast is labeled as an automobile repair facility in 1979 and then its use is not specified in 1981.

In 1983, the frontage of the adjacent property to the west is no longer labeled as auto junk and the site is shown to be vacant. No changes are shown on the 1986 Sanborn Map. In 1987 the used auto parts building at the intersection of Sheffield and Flatlands Avenues is no longer shown. In 1989, the property is developed with a four-story hotel. Additionally, the adjacent property to the east is no longer used for auto wrecking and the former storage building to the east is no longer shown. The former building on the property at the northeast corner at the intersection of Fairfield Avenue and Sheffield Avenue is no longer shown, and a car wash is shown at that property in 1991. No changes are shown until 2002 when a 12-story residential building labeled apartments for elderly is shown adjacent to the south. Additionally, Sheffield Avenue is no longer shown running adjacent to the east of the subject property. No other changes are shown through 2007.

Sanborn Map Review Conclusions

Based on the identification of an auto junk yard on the northern portion of the subject property along Flatlands Avenue between 1967 and 2001, it is in the opinion of the environmental professional that the historical site use may have adversely impacted the subject property and, therefore represents a REC.

Historical uses of concern were identified on adjacent properties to the north and northwest, including automobile junking, repair, and parts facilities between 1950 and 2007. Historical uses of concern were identified on the adjacent property to the east including a gasoline filling station in 1950 and an auto wrecking facility between 1967 and 1987. Historical uses of concern were identified on the adjacent properties to the west including auto junk facilities between 1967 and 1981. Although not adjacent, historical uses of concern were identified at the property across the intersection of Flatlands Avenue and Sheffield Avenue to the northeast of the subject property, including a gasoline filling station between 1950 and 1977 and an automobile repair facility in 1979. It is in the opinion of the environmental professional that the historical uses of adjacent properties to the north, east, and west represent a business environmental risk.

6.2 City Directory Search

City directory information was obtained from EDR in an attempt to identify past uses of the subject property and establishments in the surrounding area. As provided in the City Directory Abstract (Appendix D), business directories including city, cross-reference and telephone directories were reviewed. City directories records for the surrounding properties were available for the years 1965 through 2014 including 1965, 1970, 1976, 1985, 1992, 1997, 2010, and 2014. The City Directory Abstract did not include records for the subject or adjacent properties.

The address 12026 Flatlands Avenue located approximately 500-feet west of the subject property included listings for ISO Auto Wreckrs from 1960 through 1976. This listing corresponds to the property use (auto junk) identified for 12026 Flatlands Avenue on the Sanborn Maps from 1967 through 1981. Although the dates do not match those listed in the City Directory Abstract, an office building is shown on the Sanborn Maps located at 12026 Flatlands Avenue from 1977 through 1981.

City Directory Review Conclusions

It is the opinion of the environmental professional that historical auto wrecking operations at surrounding sites represents a REC.

7.0 REGULATORY DATABASE SEARCH

A database search report that identifies sites listed on state and federal databases within the ASTM-required radii was obtained for the property from Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. A copy of EDR's complete report is provided as Appendix E.

The report included the following databases specified by the ASTM Phase I protocol as well as non-ASTM databases (not listed):

RECOMMENDED/ REQUIRED SEARCH DISTANCES
<i>1.0-mile</i>
Federal National Priority List (NPL) Federal RCRA CORRACTS Facilities List State- and Tribal-Equivalent NPL
<i>0.5-mile</i>
Federal Delisted NPL Federal CERCLIS/SEMS** Federal CERCLIS NFRAP List/SEMS-Archive** Federal RCRA non-CORRACTS TSD Facilities List State- and Tribal-Equivalent CERCLIS State and Tribal Landfill and/or Solid Waste Disposal Site Lists State and Tribal Leaking Underground Storage Tanks (LUSTs) State and Tribal Voluntary Cleanup Sites State and Tribal Brownfields Sites
<i>Subject Property and Adjacent Properties Only</i>
Federal RCRA Generators List State and Tribal Registered Storage Tanks
<i>Subject Property Only</i>
Federal ERNS List Federal Institutional Controls/Engineering Controls Registries State and Tribal Institutional Controls/Engineering Controls Registries

* A description of these databases and a complete listing of sites identified on the above-referenced databases is provided in the EDR Report.

** As of March 2016, SEMS replaced the CERCLIS database and SEMS-Archive replaced the CERCLIS NFRAP database.

Subject Property

The subject property was not identified in any of the databases according to the Radius Report.

NY Spills	19	0 / 22	0	1

Based on the large number of database records identified within one mile of the subject property (153), Langan limited the review of surrounding properties to sites within 1/8-mile from the subject property. It is the environmental professional's opinion that based on the dense development of the site area, and former, current and proposed use of the site that the review of the database pertaining to this more limited area is appropriate.

Langan evaluated the following to determine whether additional environmental records with respect to these facilities, including the orphan sites, should be reviewed:

- Case status (i.e., whether a No Further Action letter has been issued or a case has been closed);
- Type of database and whether the presence of soil or ground water contamination is known;
- Distance of the site from the subject property; and,
- Whether the site is upgradient or downgradient of the subject property based on local topography and the anticipated southeastern groundwater flow direction. Although EDR defines properties north as topographically downgradient from the subject property and properties to the south as topographically upgradient from the subject property, it is assumed that the site is assumed that properties to the north of the subject property at hydraulically upgradient based on the inferred groundwater flow direction to the south.

Langan reviewed the information provided using the above criteria and the findings are discussed below.

Former Gasoline Stations

Two upgradient gasoline filling and/or service stations were identified to the northeast of the subject property across Flatlands Avenue and one upgradient gasoline filling/service station was identified northeast of the subject property across the Flatlands and Pennsylvania Avenue intersection from the subject property. Each of the two sites across Flatlands Avenue was identified as a filling station on the Sanborn Maps, however only the site nearest to the subject property (i.e., the Flat Gas Inc. site located at 120-99 Flatlands Avenue) was discussed in Section 6.1 above.

Flat Gas Inc., 120-99 Flatlands Avenue

Flat Gas Inc. located approximately 150-feet to the northeast and hydraulically upgradient from the subject property is identified in the NY AST and NY UST databases as an active petroleum bulk storage (PBS) facility. According to the Radius Report, the site is listed in the NY AST database for one 275-gallon AST containing motor oil, one 275-gallon AST containing transmission fluid, and one 275-gallon AST containing waste oil, all of which were installed in January 1991 and are currently in service. The site is identified in the NY UST database for a 1,000-gallon UST installed in January 1990 containing motor oil, a 2,500-gallon UST installed in February 1990

containing waste oil, and a 2,500-gallon UST installed in February 1990 containing motor oil. All three USTs identified at this site are currently in service.

No spills or releases were reported on this property and based on the review of historical Sanborn Maps, this site is identified as a filling station from 1950 to 1977, an auto repair facility from 1979 to 1980, and an auto wash between 1991 and 2007.

Flat Gas Inc. / Spartan Petroleum Inc. (Former Flat Gas), 1130 Pennsylvania Avenue

This site, located approximately 300-feet to the northeast and hydraulically upgradient from the subject property is identified in the NY Spills, RCRA NonGen/NLR, US AIRS, EDR Hist Auto, NY Manifest, and NY UST databases. According to the EDR Radius Report, this site is identified in the NY UST database as an active PBS facility for two 4,000-gallon gasoline USTs installed in December 1972 and reportedly closed-in-place in June 1993, for three 4,000-gallon gasoline USTs installed in December 1978 and removed in June 1993, and for five 4,000-gallon gasoline USTs installed in June 1993 that are currently in service. This site is identified in the EDR Hist Auto database as a gasoline service station between 1996 and 2014. The site is identified in the NY Spills database for a minor (less than one-gallon) gasoline release due to a leaky fuel pump flex hose on 21 January 2003 and assigned Spill No. 0210596 by the NYSDEC. No further information was provided and NYSDEC administratively closed Spill No. 0210596 on 10 March 2003.

This site is identified in the RCRA NonGen/NLR database for forms received by the United States Environmental Protection Agency (USEPA) on 1 January 2007 classifying the site as a non-generator. Historical generator information reveals that the site was classified as a non-generator of hazardous wastes in 2006 and 1999 and that the site was classified as a Large Quantity Generator (LQG) in 1991 for the generation of undefined hazardous waste, ignitable waste, and waste impacted with hazardous concentrations of lead and benzene. No violations are reported for the site. The site is identified in the AIRS database, which classified this facility as a minor air emissions facility regulated under the USEPA Clean Air Act (CAA), and as a gasoline service station according to the Standard Industry Classification (SIC) Code reported for this facility. This site is identified in the NY Manifest database for the disposal of waste impacted with hazardous concentrations of lead in 2014 and ignitable waste in 1995 and 1998.

Only a portion of this site is visible on historical Sanborn Maps, but the visible area was labeled as a filling station between 1950 and 2007.

Penn & Flat Getty, Joe's Archer Thriftway Autorama, 1121 Pennsylvania Avenue

This site, located approximately 350-feet northeast and hydraulically upgradient from the subject property at 1121-1133 Pennsylvania Avenue (alternate address 12121-12133 Flatlands Avenue) is identified in the NY UST, EDR Hist Auto, RCRA NonGen/NLR, and NY Spills databases according to the EDR Radius Report. The site is identified as an active PBS facility for two 4,000-gallon gasoline USTs installed in January 1978 and removed in October 1996, for seven 550-gallon gasoline USTs installed in December 1969 and closed-removed in October 1996, for three 4,000-gallon gasoline USTs installed in April 1997 that are currently in-service, and for one 4,000-gallon gasoline/ethanol UST installed in April 1997 that is currently in-service. This site is listed in the EDR Hist Auto database as a gasoline service station between 1969 and 1974, as a general automotive repair shop between 1989 and 1992, and as a gasoline service station in 1995 and from 2001 to 2014.

This site is identified in the NYSDEC Spills database for the observation of petroleum impacts in soil during excavation for removal of seven 550-gallon and two 4,000-gallon gasoline USTs, reported to NYSDEC on 29 October 1996 and assigned Spill No. 9609479. The removal of the seven 550-gallon and two 4,000-gallon gasoline USTs in October 1996 are consistent with information provided in the NY UST database. According to the NYSDEC case narrative provided by EDR, all but one of twenty post-excavation soil endpoint samples collected revealed volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) below the NYSDEC Technical and Administrative Guidance Memorandum (TAGM) soil cleanup objectives (SCOs). An underground storage tank closure report that included disposal documentation for the petroleum contaminated soil surrounding the USTs was submitted and NYSDEC administratively closed Spill No. 9609479 on 20 March 2007. Additionally, this site is identified in the NY Spills database for the release of approximately 20-gallons of gasoline during unspecified equipment repair that was reported to NYSDEC on 24 January 1998 and assigned Spill No. 9711920. According to the NYSDEC case narrative provided by EDR, 15-gallons were recovered and the remaining 5-gallons were released into the sewer. The NYSDEC administratively closed Spill No. 9711920 on 23 April 1998.

This site is identified in the RCRA NonGen/NLR database for forms received by the USEPA on 1 January 2007 classifying the site as a non-generator of hazardous waste. Historical generator information identified the site as a non-generator of hazardous waste in 1995, 2006, and 2007, and as a conditionally exempt small quantity generator (CESQG) of ignitable waste for forms received by the USEPA on 23 October 2003. No violations were reported for this facility.

This site was not included on historic Sanborn Maps; therefore, historic use of this site could not be confirmed based on a review of historical Sanborn Maps.

ISO Auto Service, 12026 Flatlands Avenue

This site located approximately 500-feet west and hydraulically downgradient of the subject property at 12026 Flatlands Avenue is identified in the EDR Hist Auto database as a gasoline service station which operated between 1969 and 1975. The subject property was not identified in any other of any of the databases according to the Radius Report.

RCRA Large Quantity Generators (LQG)

The RCRA LQG database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kg of hazardous waste per month or over 1 kg of acutely hazardous waste per month.

According to EDR, there are no RCRA LQG sites located adjacent to the subject property.

RCRA Conditionally-Exempt Small Quantity Generators (CESQG)

The RCRA CESQG database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally-exempt small quantity generators (CESQGs) generate less than 100 kg and 1,000 kg of hazardous waste per month or less than 1 kg of acutely hazardous waste per month.

According to EDR, there are no CESQG sites located adjacent to the subject property.

RCRA Non-Generators (NonGen)

The RCRA NonGen database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). RCRA Non-Generators do not currently generate hazardous waste.

According to EDR, there are 11 RCRA NonGen sites within 1/8-mile of the subject property. There are no RCRA NonGen sites located adjacent to the subject property, however Spartan Petroleum Inc./Former Flat Gas, identified as a gasoline service station located northeast of the subject property, is identified as a RCRA NonGen site and is discussed in detail above.

MANIFEST

The NY Manifest and NJ Manifest databases list and track hazardous waste from the generator through transporters to a TSD facility.

According to the EDR Radius Report, there are 14 Manifest sites within 1/8-mile of the subject property. There are no Manifest sites located adjacent to the subject property, however Spartan Petroleum Inc./Former Flat Gas, identified as a gasoline service station located northeast of the subject property, is identified as a Manifest site and is discussed in detail above.

NY UST

The Underground Storage Tank (UST) database contains USTs registered with the NYSDEC under the PBS division. These USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the NYSDEC PBS Database.

According to the Radius Report provided by EDR, there are nine NY UST sites located within 1/8-mile of the subject property. There are no NY UST sites located adjacent to the subject property, however Spartan Petroleum Inc./Former Flat Gas and Flat Gas Inc., identified as gasoline service stations located northeast of the subject property, are identified as NY UST sites and are discussed in detail above.

Although not located adjacent to the subject property, the following NY UST sites identified within 1/8-mile of the subject property are also identified in the NY SPILLS database:

- 980 Alabama Avenue (a.k.a. 966-988 Alabama Avenue), 966-988 Alabama Avenue
- Iron Shop South (a.k.a. Cozine Island Shop, NYCTA Cozine Avenue Iron Shop), 50 Cozine Avenue

Each of these spill cases was administratively closed in 2015 and 2004, respectively.

Due to the administratively closed status of NYSDEC Spill cases associated with these NY UST sites it is in the opinion of the environmental professional that the potential for adverse impacts to the subject property from these sites is low. However, it should be noted that the number and proximity of NY Spill cases associated with gasoline filling stations may have a cumulative effect on regional groundwater and/or soil vapor quality.

NY AST

The Aboveground Storage Tank (AST) database contains NYSDEC registered ASTs. ASTs are regulated under Subtitle I of RCRA. The information for this database comes from the NYSDEC PBS Database.

According to the Radius Report provided by EDR, there are four NY AST sites located within 1/8-mile of the subject property. There are no NY AST sites located adjacent to the subject property, however Flat Gas Inc., identified as a gasoline service station located northeast of the subject property, is identified as a NY AST site and is discussed in detail above.

New York State Solid Waste Facilities/Landfill Sites (NY SWF/LF)

The NY SWF/LF database contains records of solid waste disposal facilities or landfills in New York State.

According to the Radius Report provided by EDR, there are two NY SWF/LF site located adjacent to the subject property

- East New York Auto Sales Inc., 73 Flatlands Avenue
- Ultimate Used Auto Parts Inc., 120-49 Flatlands Avenue

East New York Auto Sales Inc. located adjacent to the north and hydraulically upgradient from the subject property at 73 Flatlands Avenue is identified in the NY SWF/LF database as an inactive vehicle dismantling facility.

Ultimate Used Auto Parts Inc., located adjacent to the northwest and hydraulically upgradient from the subject property at 120-49 Flatlands Avenue is identified in the NY SWF/LF database as an active vehicle dismantling facility. This site is identified as auto junking on historical Sanborn Maps.

Based on the lack of violations or releases reported for these facilities, it is in the opinion of the environmental professional that the potential for adverse impacts to the subject property from these sites is low. However, it should be noted that based on the close proximity of these sites to the subject property, historical auto junking and/or dismantling operations performed, and the potential for unreported releases associated with former site use may have a cumulative effect on regional groundwater and/or soil vapor quality.

New York City Restrictive Declaration (NY RES DECL)

The NY RES DECL database includes a list of sites that are currently bound to specified conditions on the future use and development of a property. Restrictive declarations are assigned to property lots by the New York City Planning Commission and are applicable to present and future property owners.

According to EDR, there are no NY RES DECL sites located adjacent to the subject property.

EDR Hist Auto

EDR searched selected national collections of business directories and collected listings of potential gas station/filling station/service station sites. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

According to the Radius Report provided by EDR, there are six EDR Hist Auto sites located within 1/8-mile of the subject property. There are no EDR Hist Auto sites located adjacent to the subject property, however Flat Gas Inc., identified as a gasoline service station located northeast of the subject property, is identified as an EDR Hist Auto site and is discussed in detail above.

NY LTANKS

The NY LTANKS database contains an inventory of reported leaking storage tank incidents from April 1986 to the present. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents identified within this database are either tank test failures, tank failures or tank overfills.

According to the Radius Report provided by EDR, the only NY LTANKS site located within 1/8-mile of the subject property is Vandalia-NYCHA, located approximately 250-feet to the south and hydraulically downgradient of the subject property at 17 Vandalia Avenue. The site is identified in the NY LTANKS database for the release of approximately 15-gallons of no. 2 fuel oil as a result of a tank overfill that occurred on 23 January 1991 and was assigned NYSDEC Spill No. 9011231. According to the NYSDEC case narrative provided by EDR, fuel oil was released onto exposed soil from the vent pipe during a tank overfill. NYSDEC administratively closed Spill No. 9011231 on 6 July 1993 following a reported cleanup by NYCHA personnel. This site is also identified in the NY Spills database for releases of no. 2 fuel oil related to equipment failures as discussed below. The Vandalia-NYCHA site is also identified in the NY database.

Based on the closed regulatory status of the NY LTANKS spill record, the small volume of no. 2 fuel oil, and the downgradient location from the subject property, it is in the opinion of the environmental professional that the potential for adverse impacts to the subject property from this site is low.

NY Spills

The NY Spills database includes data collected on spills reported to NYSDEC. It includes spills active as of April 1, 1986, as well as spills occurring since this date.

According to the Radius Report provided by EDR, there are 19 NY Spills sites associated with 22 separate release incidents located within 1/8-mile of the subject property; each of the 22 NY Spills cases were administratively closed between 1987 and 2016. The only NY Spills site located adjacent to the subject property is the Construction Site located adjacent to the north and hydraulically upgradient from the subject property at 127-205 Flatlands Avenue. The site is identified in the NY Spills database for the release of approximately 5 gallons of hydraulic oil due to human error on 6 January 2004 and assigned Spill No. 0311317 by NYSDEC. According to the NYSDEC case narrative provided by EDR, the affected soil was

containerized in an unspecified number of 55-gallon drums and no further action was required. Spill No. 0311317 was administratively closed by NYSDEC on 14 January 2004.

Although non-adjacent, Spartan Petroleum Inc./Former Flat Gas, identified as a gasoline service station located northeast of the subject property, is identified as a NY Spills site and is discussed in detail above.

Due to the cleanup activities completed and the closed regulatory status of the spill cases, it is the opinion of the environmental professional that the potential for adverse impacts to the subject property from these sites is low. It should be noted that 22 spill reports were identified within 1/8-mile of the subject property which have the potential for adverse impacts to regional groundwater and/or soil vapor quality.

Drycleaners

The Drycleaners database is a list of registered drycleaning facilities.

According to the Radius Report provided by EDR, the following NY Drycleaners sites located within 1/8-mile of the subject property:

- 1110 Pennsylvania Cleaners, 1110 Pennsylvania Avenue
- Kent Cleaners, 111-18 Flatlands Avenue

The 1110 Pennsylvania Cleaners site, located approximately 350-feet to the north and hydraulically upgradient of the subject property at 1110 Pennsylvania Avenue is identified in the NY Drycleaners database with an installation date in 1994 and is reportedly shut down. The 1110 Pennsylvania Avenue address is identified in the RCRA CESQG database in 2006 and 2007 and as a SQG in 1994 and NY Manifest database in 2007 as Professional Cleaners Inc., for the generation and disposal of spent halogenated solvents commonly used in drycleaning operations. No violations are reported for this facility. Professional Cleaners Inc. is also identified in the EDR Hist Cleaner database as a drycleaning plant, except rugs, between 1996 and 2011.

The Kent Cleaners site, located approximately 950-feet west-southwest and hydraulically crossgradient from the subject property at 111-18 Flatlands Avenue is identified in the NY Drycleaners database with an installation date in 1998. It is not identified if this facility is shutdown or currently operational. This site is also

identified in the RCRA CESQG database in 1998, 2006, and 2007 and NY Manifest database in 2016 for the generation and disposal of waste impacted with hazardous concentrations of chromium, lead, tetrachloroethylene, trichloroethylene and an undefined type of hazardous waste. No violations are reported for this facility. This site is also identified in the EDR Hist Cleaner database as a garment pressing and cleaners' agents facility between 1986 and 2011.

Based on the distance of the active drycleaning operations from the subject property, it is the opinion of the environmental professional that the potential for adverse impacts to the subject property from these sites is low. However, it should be noted that any unreported releases associated with these facilities may contribute to an adverse impact on regional groundwater and/or soil vapor quality.

EDR Hist Cleaner

EDR searched selected national collections of business directories and collected listings of potential dry cleaner sites. The review was limited to those categories of sources that might include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

According to the Radius Report provided by EDR, there are three EDR Hist Cleaners sites located within 1/8-mile of the subject property. The following listings were identified as sites with potentially active drycleaning operations:

- Professional Cleaner, 1110 Pennsylvania Avenue
- Kent Cleaner, 11118 Flatlands Avenue

Each of these sites is discussed in detail above.

Government Databases Review Conclusions

Based on Langan's review of the sites identified above, environmental impacts to the subject property from the above identified sites are not anticipated. Specific sites of concern that may have contributed to a cumulative impact on regional groundwater and/or soil vapor quality are discussed in detail at the beginning of this section and include Flat Gas Inc., Flat Gas Inc./Spartan Petroleum Inc. (Former Flat Gas), and Penn & Flat Getty/Joe's Archer Thriftway Autorama. However, it should be noted that 153 sites were identified in the radius report and the potential exists that

these urban sites may have a cumulative impact on regional groundwater quality. It is the opinion of the environmental profession that this represents a business environmental risk.

Additionally, the potential for vapor intrusion impacts to the subject property from onsite or nearby sources was evaluated. No specific potential vapor intrusion concerns (pVICs) were identified as part of this Phase I ESA; however, it should be noted that due to the number of spill sites, gasoline stations, and historical uses associated with automobile junking identified in the area of the subject property, the potential for groundwater impacts in the site area, vapor intrusion issues at the site may exist.

8.0 GOVERNMENT AGENCY RECORDS REVIEW

Federal, state and local agencies were contacted via written correspondence, telephone interviews and/or personnel interviews regarding records of environmental concerns, violations, and/or permits, or any other potentially environmentally-relevant records on the subject property. In addition, government information that was readily available online on government websites was also reviewed. A listing of agencies/individuals contacted by Langan as part of this ESA is provided in Table 1. Copies of government correspondence are provided in Appendix F.

US Environmental Protection Agency (USEPA)

The USEPA online FOIL request form was submitted for the subject property. In a letter dated 17 January 2018, Langan received a response from the USEPA indicating that all records are publically available on the online database (<https://www.epa.gov/enviro/frs-query-page>). Upon review of the USEPA database, no records are available for the subject property. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

Langan also reviewed the RCRAInfo Search, Enforcement and Compliance History Online, and the Superfund Enterprise Management System (SEMS) databases maintained online by USEPA. No records were identified for the subject property.

US Fish and Wildlife Service (US FWS)

Information regarding critical habitats or endangered species with the vicinity of the subject property was obtained from the US FWS Information Service Information for Planning and Conservation online database (<http://ecos.fws.gov/ipac/wizard/>

[chooseLocation!prepare.action;jsessionid=8E0AF61206046AE7AC0F01D38BC87E45](#)).

Two threatened bird species, the Piping Plover and Red Knot, as well as one endangered bird species, the Roseate Tern, were identified in the vicinity of the subject property. The threatened flowering plant species Seabeach Amaranth is also identified in the vicinity of the subject property. No critical habitats are defined for the four species identified by the US FWS IPaC database and no critical habitats were identified within the extents of the subject property.

In a letter from the US FWS Long Island Ecological Services Field Office dated 15 January 2018, the findings of the US FWS IPaC online database review were confirmed.

New York State Department of Environmental Conservation Region 2

A file review request was submitted to the NYSDEC online record request database on 15 January 2018. In an email dated 15 January 2018, Langan received a response acknowledging receipt of the request. To date, no further response has been received by Langan regarding this request. If any additional pertinent information is provided subsequent to issuance of this report, it will be provided as an addendum. Langan also reviewed the Environmental Site Database records maintained online by the NYSDEC. No spills, storage tanks, or remediation sites were identified for the subject property.

NYSDEC Division of Fish, Wildlife, & Marine Resources

Langan reviewed records maintained online on the NYSDEC Environmental Resource Mapper (<http://www.dec.ny.gov/gis/erm/>) which revealed that no significant natural communities or rare plants and animals are found in the vicinity of the subject property. An online file review request was submitted to the NYSDEC Division of Fish, Wildlife, & Marine Resources. In a letter dated 19 January 2018, the NYSDEC Division of Fish, Wildlife, & Marine Resources identified no records of rare or state-listed animals or plants, or significant natural communities at the project site or in its immediate vicinity. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

New York State Department of Health (NYSDOH)

The NYSDOH Records Access Officer was contacted by Langan and a written file review request was submitted for the subject property. In a letter dated 18 January 2018, Langan received acknowledgement from the NYSDOH of the records request. To date, no further response has been received by Langan regarding this request. If any additional

pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum

New York City Department of Environmental Protection (NYCDEP)

The NYCDEP online FOIL request form was submitted for the subject property. In an electronic response dated 15 January 2018, Langan received acknowledgement from the NYCDEP of the records request. In a letter dated 8 February 2018, Langan received a response from the NYCDEP Division of Emergency Response and Technical Assessment (DERTA) stating that no records were identified related to this request. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

According to records maintained online by the NYCDEP Clean Air Tracking System (CATS), one expired application for a boiler fired by natural gas and one expired application for a boiler fired by no. 2 fuel oil are documented for the property. These expired boiler applications are associated with the address 100 Flatlands Avenue, which is historically associated with Block 4434, Lot 1.

New York City Department of Health & Mental Hygiene (NYC DOHMH)

Ms. Rene Bryant, the NYC DOHMH Records Access Officer, was contacted by Langan and a written file review request was submitted for the subject property. To date, no response has been received by Langan regarding this request. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

New York City Department of City Planning (NYC DCP)

An electronic version (effective zoning date 7 September 2017) of the NYC Zoning Map for the subject property was downloaded from the NYC DCP website (http://www.nyc.gov/html/dcp/html/zone/zh_zmactable.shtml).

New York City Mayor's Office of Environmental Coordination (NYC MOEC)

Records maintained online by NYC MOEC through the CEQR Access Portal (<https://a002-ceqraccess.nyc.gov/ceqr/>) were reviewed on 15 January 2018. The subject property was not identified as being a part of the CEQR program.

'E'-Designation Status

The New York City Department of City Planning coordinated a program identifying properties for special environmental concerns based on documented historical use, neighborhood noise concerns, and neighborhood air quality issues. These properties are identified on 'E'-designated sites on zoning maps and in the NYC Department of Buildings (NYCDOB) Building Information System (BIS) database. The NYCDOB is restricted from issuing building permits for the property until the NYC Mayor's Office of Environmental Remediation (NYC OER) has reviewed information prepared by an environmental professional and made a determination to issue of "Notice-of-No-Objection" or a "Notice-to-Proceed" to the NYCDOB. Prior to the NYCOER's creation in 2008, the NYC Department of Environmental Protection (NYCDEP) conducted these reviews.

- Appendix C: CEQR Environmental Designations List dated 19 December 2017 (http://www.nyc.gov/html/dcp/pdf/zone/appendixc_tab1.pdf),
- Appendix C: CEQR Restrictive Declaration List dated 17 October 2017 (http://www.nyc.gov/html/dcp/pdf/zone/appendixc_tab2.pdf),
- NYCOER Environmental Project Information Center (EPIC) (<https://a002-epic.nyc.gov/app/search/erdproperty>) on 30 January 2018, and,
- NYCDOB BIS on 15 January 2018 (<http://a810-bisweb.nyc.gov/bisweb/bispi00.jsp>).

The subject property was not listed as an E'-designated site based on these resources.

Fire Department of New York City (FDNY)

Information regarding the presence of petroleum or chemical storage tanks was requested from the FDNY. To date, no response has been received to our written request to the New York City Fire Department. If any pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

New York City Department of Buildings (NYC DOB)

Langan completed a limited review of available online records maintained by the NYC DOB. Certificates of Occupancy records were not available for the subject property.

New York City Department of Finance (NYC DOF)

A review of online records maintained by the NYC DOF was conducted as part of this ESA to determine current and former site ownership (<http://www.nyc.gov/html/dof/html/home/home.shtml>). Ownership history was available from 1916 to present.

According to the DOF, the subject property is currently owned by Christian Cultural Center Inc. It is in the opinion of the environmental professional that ownership information maintained by the NYC DOF provides no additional information regarding environmental conditions related to past usage different than represented by review of other historical information sources.

9.0 SITE RECONNAISSANCE

Langan conducted an inspection of the site on 8 May 2018 during completion of the Phase II Environmental Investigation discussed in Section 5.0. The inspection included a walk-through inspection of the entire site for the purposes of identifying Recognized Environmental Conditions (RECs). Typical RECs may include:

Drum storage	Dumpsters	Aboveground storage tanks	Stained areas
Drains and Sumps	Wells	Underground storage tanks	Pump stations
Waste piles	Landfills	Loading and transfer areas	Boiler rooms
Pits, Ponds, Lagoons	Swales	Process air vents	Process sinks
Storm sewers	Trenches	Detention ponds	PCBs
Impoundments	Lagoons	Floor drains and piping	Transformers
Septic systems	Dry wells	Waste treatment areas	Capacitors
Rail spurs	Incinerators	Compressor discharges	Odors
Pools of liquid	Wastewater	Stressed vegetation	Surface waters

Limiting conditions were not encountered during the inspection of the site.

Photographs of the subject property taken during the site inspection are provided in Appendix G. Langan was accompanied by Mr. Elder Gerald Shaw, Sr. who provided access and answered questions during the site inspection. Mr. Shaw has been the on-site facilities manager for the CCC complex for approximately 18 years. A questionnaire was completed by the property site manager and is included as Appendix B. The inspection included a walk-through inspection of the entire site for the purposes of identifying Recognized Environmental Conditions (RECs) as detailed below.

Western Portion of Block 4434, Lot 1

The subject property consists of a vacant lot used for additional parking and storage. According to Mr. Shaw, the parking lot surface is compacted RCA. One trash compactor, one 30-cubic-yard dumpster, and four metal storage trailers were identified at the southwest corner of Block 4434, Lot 1 spanning both sides of the western subject property boundary line. The storage trailers contained household lighting, decorations, wardrobe clothing, and audio equipment used for special events at the CCC.

Adjacent Properties

A visual inspection of adjoining properties from the subject property line, public rights-of-way or other vantage point (e.g. aerial photography) including a visual inspection where hazardous substances may be or may have been stored, treated, handled or disposed was also conducted.

Limiting conditions encountered during the inspection of adjoining properties were encountered due to the dense urban nature of the surrounding areas which only allowed for limited line of sight that did not extend to areas where hazardous materials or substances might be stored.

Properties located adjacent to the subject property consist of commercial and residential buildings. Fill and vent pipes associated with underground or aboveground storage tanks were not observed; however, active gasoline filling stations were observed at non-adjacent properties to the northeast of the subject property. Adjoining properties to the north of the subject property included an automobile dismantling/junkyard business for used automobile parts sales, medical offices, and a hotel. One groundwater monitoring well was observed in the Pennsylvania Avenue sidewalk east of the eastern adjoining property, and one groundwater monitoring well was observed in the Flatlands Avenue sidewalk north of the subject property.

A vacant lot and a residential apartment building adjoin the subject property to the east, a residential apartment building adjoins the subject property to the south, and an extension of the onsite RCA covered lot followed by the CCC building and associated asphalt paved parking lots adjoin the subject property to the west.

10.0 ADDITIONAL ISSUES

The following items fall outside the scope of ASTM 1527-13, however Langan can and often does provide these services to its clients if specifically requested and included in the proposed scope of work or are issues that may impact current or proposed site use.

10.1 Wetlands/Floodplain Designation

A wetland and floodplain designation assessment was not conducted as part of this ESA.

Langan reviewed the United States Fish and Wildlife National Wetland Inventory (NWI) and New York State Freshwater Wetlands maps. Based on these documents no mapped wetlands are listed on the subject property.

10.2 Protected Endangered Species / Critical Habitats

A determination regarding the potential presence of protected or endangered species and critical habitats on or near the subject property was not conducted as part of this ESA. This determination is often required in order to receive state or federal grants, loans, and/or permits.

The presence of endangered species and critical habitats on the subject property was evaluated and information requests were submitted the NYSDEC Division of Fish and Wildlife Natural Heritage Program and the US FWS as discussed in Section 8.0 above.

10.3 Asbestos

There are no onsite buildings, therefore asbestos-containing materials (ACMs) are not anticipated.

10.4 Lead-based Paint

There are no onsite buildings, therefore the presence of lead-based paint is not anticipated.

10.5 Lead in Drinking Water

A lead in drinking water survey was not conducted as part of this ESA.

10.6 Indoor Air / Microbial Assessment (Mold)

A mold survey was not conducted as part of this ESA.

10.7 Radon

The subject property is located in a Tier 3 Zone as identified by USEPA based on sampling conducted of buildings within the site area. The Tier 3 Zone is considered an area of low radon gas intrusion potential with typically concentrations less than 2 pCi/liter. A radon survey of the existing building was not conducted as part of this ESA. Radon test results from adjacent or surrounding properties are not necessarily indicative of radon conditions on the subject property. As no building specific radon survey documentation was provided to Langan, no opinion regarding potential risks associated with radon gas exposure can be made.

As per USEPA guidelines, the only way to assess potential radon gas exposure risks is to conduct a radon assessment. In addition, the US EPA recommends that follow-up tests on large buildings should be conducted when major modifications are made either to the building structure or HVAC system or the HVAC system's operation settings.

10.8 Historical and Archaeological Review

Langan reviewed the NYCityMap (<http://maps.nyc.gov/doitt/nycitymap/>) to review the potential presence of historical landmark buildings near the subject property. No designated historic districts, designated scenic landmarks, landmarked structures, or landmarked interior structures were identified.

In addition, Langan reviewed the NYSHPO online database (<http://nysparks.com/shpo/online-tools/>). As of 6 February 2018, no National Register Listed or State Register Listed sites were identified on or adjacent to the subject property. In addition, Langan reviewed the New York City Landmarks Preservation Commission (NYCLPC) online historic maps (<https://nyclpc.maps.arcgis.com/apps/webappviewer/index.html?id=93a88691cace4067828b1eede432022b>). As of 6 February 2018, no Historic Districts or Landmarks were identified on the subject property.

10.9 Universal Waste

A universal waste survey was not completed as part of this Phase I ESA.

11.0 DEVIATIONS

This Phase I ESA conforms with ASTM with the following deviations noted:

- Property use was only determined back to 1908, not to first development, as historical property records were not reasonably available;
- Data gaps in excess of 5 years were encountered during the review of historic resources;
- Government agencies that have not responded to record review inquiries are listed above - additional pertinent information provided to Langan subsequent to the issuance of this report will be provided in an addendum;
- Based on the large number of database records identified within one mile of the subject property (153), Langan limited the review of surrounding properties to sites within 1/8-mile from the subject property; and,
- Interviews of former business operators were not conducted.

It is the opinion of the reviewing Environmental Professional that the above-deficiencies will not detrimentally affect the identification of potential recognized environmental conditions. This opinion is based on the following factors:

- Based on the Sanborn Maps and the City Directory information reviewed, the use of the property is consistent between the 5 year data gaps. Therefore, operations on the site between these data gaps will not detrimentally affect the identification potential RECs.
- Langan limited the database review to sites within 1/8-mile from the subject property. It is the environmental professional's opinion that based on the dense development of the site area, and former, current and proposed use of the site that the review of the database pertaining to this more limited area (1/8-mile) is appropriate and will not detrimentally affect the identification of potential recognized environmental conditions.

12.0 FINDINGS/OPINIONS

Based on information obtained during the visual inspection of the subject property, review of environmental databases and historic information, and contact with federal/state/local official agencies, the following recognized environmental conditions (RECs) and business environmental risks that may impact proposed redevelopment of the site were identified:

1. Former On-Site Automobile Junkyard;
2. Presence of contaminated fill material;
3. Potential Presence of Undocumented Underground Heating Oil Storage Tanks; and,
4. Potential impacts from current and historical operations conducted at adjacent and nearby properties.

Based on the review of historical Sanborn Maps, an automobile junkyard was identified on the northern portion of the subject property along Flatlands Avenue from 1967 through 2001. Therefore, Finding 1 represents a REC. Based on the review of historical environmental reports, the subject property was reportedly filled with incinerator ash and waste. The Phase II Environmental Investigation completed in May 2018 identified the presence of contaminated fill and ash and revealed elevated concentration of PAHs and metals in the subsurface. Finding 2 represents a REC.

It is in the opinion of the environmental professional that undocumented heating oil USTs may be present beneath the lot or adjacent sidewalks associated with small structures shown on historical Sanborn Maps and associated with former auto junkyard operations on the subject property. Therefore, Finding 3 represents a BER. Automobile junkyards/dismantling facilities, automobile repair shops, and gasoline filling stations located adjacent to the north, east, and west of the subject property between 1950 and 2007 were identified on historical Sanborn Maps and in the Radius Report. Finding 4 represents a BER.

13.0 CONCLUSIONS

Langan has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of a ±2.08-acre site located on the western portion of Block 4434, Lot 1 in Brooklyn, Kings County in New York, the subject property. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this report.

Based on information obtained during the visual inspection of the subject property, review of environmental databases and historic information, and contact with federal/state/local official agencies, this assessment has revealed the following recognized environmental conditions (RECs) in connection with the property:

Recognized Environmental Conditions

It is the opinion of the environmental professional that the following represent RECs:

Former On-Site Automobile Junkyard

Based on the review of historical Sanborn Maps, an automobile junkyard was identified on the northern portion of the subject property from 1967 through 2001. The potential exists for adverse environmental impacts to the subsurface due to the potential cumulative effect of unreported petroleum releases associated with these operations. Moreover during the May 2018 Phase II Environmental Investigation, odors and/or elevated PID readings and elevated concentrations of PAHs were detected in subsurface soils in the northern portion of the subject property in the vicinity of the historical automobile junking operations; therefore, historical automobile junking operations represents a REC.

Presence of Contaminated Fill

Based on the 2003 Phase I ESA prepared by Soil Mechanics Environmental Services, the subject property historically consisted of marshland and was filled in the early 1900's with ash and waste from the city's solid waste incinerator. During the May 2018 Phase II Environmental Investigation, contaminated fill containing ash was observed in the subsurface and laboratory analytical results for soil revealed the presence of elevated concentrations of PAHs and metals above the NYSDEC Restricted Residential, Commercial, and Industrial RUSCOs. The presence of contaminated fill containing impacts exceeding state regulatory cleanup objectives represents a REC.

14.0 QUALIFICATIONS / CERTIFICATION

The following professionals assisted in the completion of this report.

We, the undersigned, declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property as documented in Appendix H. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX A

USER QUESTIONNAIRE

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

Providing the following information (if available) to the environmental professional (Langan) is one of the requirements to qualify for one of the *Landowner Liability Protections* offered under CERCLA. Missing or incomplete information could result in a determination that "all appropriate inquiry" is not complete.

General Information

User/Client Name (s): GO UCL LLC
Property Name: Christian Cultural Center
Address: 12020 Flatlands Avenue
Brooklyn, NY 11207
Property Type: Existing community facility + parking
Type of Property Transaction: at grade

Purchase of property

Financing of property

Sale of property

Ground Lease

Build to Suit Lease

Other JV development w/owner

Reason Why Phase I ESA is required: Diligence

Site Contact (s): Stephen Straterman, Gotham ORG
SStraterman@gothamorg.com 1212-716-2585

Required Information

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Yes

No

(2.) Activity and Land Use (AUL) limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Yes

No

- (3.) Specialized knowledge or experience of the person seeking to qualify for LLP (40 CFR 312.28).** Yes No
- Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
- (4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).** Yes No
- (a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Parts 4a and 4b.]
- (b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
- (c.) Identify an explanation for the lower price and provide a written record of such explanation as an attachment.
- (5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30).** Yes No
- Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,
- (a.) Do you know the past uses of the property?
- (b.) Do you know of specific chemicals that are present or once were present at the property?
- (c.) Do you know of spills or other chemical releases that have taken place at the property?
- (d.) Do you know of any environmental cleanups that have taken place at the property?
- (6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).** Yes No
- Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

SIGNATURE:

It is understood that the information presented in this form is an integral part of the Phase I ESA process and that Langan will evaluate and rely on this information in the development of the final Phase I ESA report.

Limited Permission To Make Copies

Langan Engineering (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

PUBLIC SCHOOL 306K	970 VERMONT ST	NNE 1/8 - 1/4 (0.240 mi.)	T106	297

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CUMBERLAND FARMS#702	108-04 FLATLANDS AVE	SW 1/8 - 1/4 (0.207 mi.)	O81	231

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/15/2017 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 09/25/2017 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 10/31/2017 has revealed that there are 21 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 12 NY UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the NY MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY MOSF UST site within approximately 0.5 miles of the target property.

State and tribal institutional control / engineering control registries

NY RES DECL: A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

A review of the NY RES DECL list, as provided by EDR, has revealed that there is 1 NY RES DECL site within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

Site Code: 58389

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there is 1 NY VCP site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 10/31/2017 has revealed that there are 19 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2017 has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank ID: 52515
Tank Status: In Service
Material Name: In Service
Capacity Gallons: 4000
Install Date: 04/01/1997
Date Tank Closed: Not reported
Registered: True
Tank Location: Underground
Tank Type: Equivalent technology
Material Code: 0009
Common Name of Substance: Gasoline

Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Pipe Model: Not reported
Modified By: MFLEONAR
Last Modified: 09/06/2017

Equipment Records:

L07 - Piping Leak Detection - Pressurized Piping Leak Detector
E04 - Piping Secondary Containment - Double walled UG
J01 - Dispenser - Pressurized Dispenser
C03 - Pipe Location - Aboveground/Underground Combination
F04 - Pipe External Protection - Fiberglass
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
B04 - Tank External Protection - Fiberglass
D06 - Pipe Type - Fiberglass Reinforced Plastic (FRP)
I02 - Overfill - High Level Alarm
K01 - Spill Prevention - Catch Basin
A00 - Tank Internal Protection - None

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FINDS:

Registry ID: 110004555561

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Spiller Company: 999
Contact Name: CARLA SULLIVAN
DEC Memo: "4/2/2015 - Feng - Duty Desk. Called Laurel Environmental (631-673-0612) and Carla Sullivan just left for the day. The receptionist said they have received lab results and preparing a report. The report is not ready yet. Carla is the only one who can provide further information. They will return my call tomorrow. 4/3/2015 - Talked to Carla Sullivan of Laurel Environmental (CSullivan@LaurelEnv.com). The property was in real estate transaction. The buyer hired a environmental company to do an investigation and found contamination. the seller did not trust the results and hired another environmental company to do another investigation and found no contamination. Laurel Environmental was brought in to do investigation and to confirm whether there is or no contamination. Laurel Environmental found contamination in soil where VOCs exceeded CP-51. The building was built in 1963. The tank, i.e. 2,500-gallon fuel oil UST, was beneath the slab of the building and now is noted abandoned. There is no fillport, no vent pipe. They mapped it out in the GPR survey. The soil smell like diesel. She is not sure about the current use of the property nor the future use of the property. The soil borings went to groundwater, but they did not collect any groundwater samples. I advised her that DEC may require groundwater sampling if soil contamination is found. Searched PBS- 1) PBS 2-604377, Alabama Ave Realty Inc 980 Alabama Ave, Brooklyn (1) 2,500-gallon steel #2 fuel oil UST, in service, next test 9/2/2014 2) PBS 2-360643 LADS Associates 960 Alabama Ave, Brooklyn (1) 5,000-gallon steel #2 fuel oil UST, closed-in-place email from Carla Sullivan. The former owner: Mayer Berkovitz mayerberkovitz@gmail.com cell: 917-854-8098 Brief to V.Zhune and transferred the spill to V.Zhune. 6/9/15-Vought-DEC Zhune away from office on extended leave. Vought received call from and spoke to Dotty (ABC Tank) that the tank has been removed and they are installing shoring and soil borings have been performed and results were sent to DEC Zhune. They will begin excavation and send report, including endpoint sample analyses, to DEC Zhune. 6/16/15-Vought-Received call from Donna from ABC Tank and they have reached structural limitations. Donna will send in endpoints results with site and recommendations for further action. Vought discussed need for delineation of soil contamination (such as possible groundwater sample collection to residence) and possible of installation of sub-slab venting system and excavation will be covered with plastic. Donna will send soil endpoint results to DEC and will also send them to a consultant (eg Preferred Environmental) for review and further recommendations. 8/14/15-Donna from ABC Tank Repair & Lining Inc. sent the spill closure report. Spill Closed. 8/14/15-Donna emailed the Phase II prepared for Laurel Environmental Associates. Laboratory analysis of soil samples collected from eight(8) borings within the proximity of the 2500 gallon UST found levels of VOC above NYSDEC CP-51 in four of the borings locations (SB-4, SB-5, SB-7 and SB-8). 8/14/15-Donna emailed the spill closure letter and the analytical results. ABC Tank broke up the cement & dug

up to expose the top of the buried (1) 2500 gallon tank. The tank was filled with sand & improperly abandoned by others. The top of the tank was cut open and all product (oily sand) was removed from the interior of the tank & placed in (30) drums for proper disposal. All lines on top of the tank has been cut and removed during the abandonment by others. ABC tank cut and removed the existing (1) 2500 gallon buried tank from the site. ABC dug up the contaminated soil from the affected area and placed all the contaminated soil in (16) drums for proper disposal. ABC tank was able to remove the existing contaminated soil from around the footing. ABC tank obtained(4) end-point soil samples labeled North East, North West, South East & South West. Each sample was obtained 10' to 16' below grade level. The soil analytical results were below the NYSDEC CP-51 unrestricted residential soil standard."

Remarks: "soil samples done twice in the past by two different companies, 1st time contamination found, 2nd time no contamination found, today new test done confirms contamination. Tank present under slab"

Classification: Not a generator, verified

Date form received by agency: 10/22/1997
Site name: PEP BOYS 483
Classification: Conditionally Exempt Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE WASTE

Violation Status: No violations found

FINDS:

Registry ID: 110004538126

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"This spill case was reassigned from DEC (Sigona) to Rommel on 02/10/2004. This spill site has been consolidated under Spill No. 9409298. RE: Spill Investigation Nos. 9409298, 9612806 & 9913633, Conoco Phillips - Former ExxonMobil S/S, 108-04 Flatlands Avenue, Brooklyn, N.Y. - Petroleum Bulk Storage (PBS) No. 2-218006. Reassigned from DEC O'Dowd on March 2000 to Sigona. DEC's comments regarding a site visit on February 24, 2003, to evaluate proposed investigatory work and facility compliance with State and Federal PBS regulations. The DEC has also reviewed the results of the Subsurface Investigation Report (SIR) from Groundwater & Environmental Services (GES), dated September 4, 2002. The results of the PBS inspection were documented by this Department, and a notice regarding those results have been forwarded to Conoco Phillips in a separate letter, dated April 3, 2003. The results of the SIR indicates there are elevated levels of Volatile Organic Compounds (VOCs), which have already impacted the groundwater at this site. This indicates the need for further investigation. In addition, the DEC's records indicate there are at least two (2) additional unresolved spill cases recorded under Spill Nos. 9409298 and 9612806, which require investigation. 03/29/06: Talked with Bill Simmons from ECS about any progress. He said that our request for three additional wells would be implemented in April, and that one well would have to be shifted slightly due to utilities. I said that was fine. - SK Spill No. 9409298 - Soil contamination discovered during removal of former 1,000 gallon Underground Storage Tank (UST) which stored used oil. Spill No. 9612806 - 4,000 gallon double-walled Buffide tank was reported to have a leak in the primary tank, and super unleaded gasoline was pumped from the secondary containment in January 1997. A letter was sent to DEC on January 30, 1997, indicating that Exxon would inform DEC of its actions regarding the disposition of this tank. 10/25/2004: DEC Lead transferred from J. Rommel to D. Harrington. 11/23/2004: Sent letter to Cumberland Farms requiring work plan for additional investigation and an environmental site history. (Harrington) 1/12/2005: Approved SI work plan (installation of four (4) new monitoring wells). Harrington 6/14/05: This spill case transferred from Harrington (Central Office) to J. Kolleyeny (Region 2). - JK 6/30/05: Reviewed Site Status Update letter from ECS, dated May 6, 2005. Letter states that ECS completed a subsurface investigation at the site in April 2005, installing 4 monitoring wells. Results of soil and groundwater sampling will be presented in an upcoming Subsurface Investigation Report, and ECS will continue quarterly groundwater monitoring. - J. Kolleyeny 11/2/05: Transferred from J.Kolleyeny to S.Kraszewski. Reviewed Subsurface Investigation

Report from ECS for work performed in April and May 2005. 4 MWs were installed in addition to 3 other MWs installed in 2000 by ATC Associates for a subsurface investigation. Soil samples were taken from each of the four borings before they were converted to MWs. PID readings from MW-4 and MW-5 ranged from 496ppm to 2807ppm. Multiple VOCs were detected from the soil sample analyses: MW-4 ranged from 1.6% to 56% concentrations of BTEX and other VOCs. GW samples exhibited elevated levels of VOCs also. ECS will continue quarterly monitoring and reporting. Received and reviewed Site Status Update Report July - Sept 2005 with most recent GW sample analysis on 9/19/05. Presence of VOCs remain in all wells but most concentrations have dropped dramatically. Elevated levels of MTBE, ethylbenzene and benzene remain in several wells suggesting that plume may be still migrating in proximity to residential and educational units. May require several more wells to ensure complete delineation of plume. - SK 12/21/05: DEC sent letter sent to A.Pinmental at Cumberland Farms and W.Simmons at ECS requesting further investigation. Asked for 3 MWs to delineate contamination plume. Investigation report should be submitted with recommendations for remedial action. - SK 03/31/06: Reviewed Oct.2005-Dec.2005 Quarterly Update Report from ECS. 7 MWs were gauged and samples collected for analysis. 5 of the 7 MWs exhibited BTEX and or MTBE in concentrations exceeding TAGM AWQS. GW flow direction is generally north to northeast. Overall, most concentrations have remained consistently elevated for almost all contaminated wells. One noticeable change was the concentration of benzene in MW-6: an increase from 5.3 ppb to 103 ppb since the last quarterly report from September. Also, MW-1 now exhibits benzene whereas in all previous samplings since June 2003 none was ever detected. Based on the data, the dissolved plume seems to be extending East towards 108th Street and North towards Flatlands Avenue. ECS mentions that the Departments request for additional MWs will be implemented in April 2006. ECs recommends continued quarterly gauging, sampling and reporting. - SK 05/16/06: Reviewed Site Status Update Report from ECS prepared on April 30, 2006. Included in this investigation, ECS performed GW flow direction gauging and GW sampling from seven MWs. GW flow direction seems to be heading N - NE towards Flat-lands Avenue. BTEX and MTBE concentrations remain mostly consistent with the past several sampling events. MW-7, which has no previous exceedances now shows MTBE at 11 ppb. MW-7 seemed isolated from the GW plume but more sampling is necessary. ECS recommends continued quarterly gauging, sampling and reporting. - SK 05/25/06: ECS installed 3 on-site wells on 5/11/06 and collected soil data. ECS will sample all GW wells in early June. - SK 08/22/06: Reviewed the On-Site Subsurface Investigation Report submitted on July 10, 2006 by ECS. By request of the department, ECS installed three new MWs, MW-8,9,10 on-site to further delineate the dissolved contamination plume. Boring samples revealed PID hits as high as 623ppm from 10-17 fbg for MW-8. MW-9 and MW-10 had no PID hits. Soil samples from MW-8 show highly elevated VOC levels at the GW. MW-9 showed trace VOC contamination in the soil. MW-10 exhibited only xylene as high as 3ppm in the soil. GW ranges from 9 to 10 fbg on-site. No free product detected from any wells. All MWs including newly installed wells were sampled for GW contamination. MWs 4,5,6,8,9 and 10 all detected elevated BTEX, MTBE or both in GW samples. Based on the historic monitoring data, the dissolved plume seems to be migrating with the GW flow direction. The highest readings are located from the corner of East 108th Street along the sidewalk bordering Flatlands Avenue.

ECS recommends continued quarterly GW monitoring and reporting from all wells except MW-1,2,3 and 7 due to the continued absence of minor concentration of VOCs. SK discussed the work plan with JK. DEC requests that ECS provide alternatives to the monitoring recommendation, i.e. more active remedial approach. SK sent letter disapproving monitoring and requesting a new remedial proposal. ECS may discontinue quarterly sampling from MW-3 and MW-7. The proposal is due before the next quarterly report. - SK 02/05/2007: This spill is transferred from SK to A. Doronova. - AD. JK sent e-mail to Bill Simmons of ECS regarding current situation on the site. 02/06/07: Received e-mail from B. Simmons saying that they have continued quarterly sampling and monitoring the site, that now they are in a process of preparation of remedial strategy proposal and that there is meeting scheduled with CFI. Sent e-mail to B. Simmons with request to submit all outstanding quarterly reports ASAP and remedial strategy proposal later this month. 02/14/2007: Received Site status update report (09/06-12/06) from ECS. They gauged ten MW and sampled eight MW on September and December 2006. MWs 1, 2, 5, 6 and 9 detected elevated BTEX, MBTE or both in GW samples. Maximum increase of total BTEX from 13,800ug/L to 14,853ug/L was detected in GW sample from MW-8; also there was increase of total BTEX from 276.4ug/L to 916.4ug/L in samples from MW-10. ECS will submit feasibility proposal of more active remedial measures by the end of February 2007. AD 03/01/2007: Spoke to B. Simmons regarding remedial feasibility proposal for this site. He told me that proposal is not ready yet and will be submitted in the end of March. AD 05/10/2007: Received an email from B. Simmons. They still work on Remedial Feasibility Report (RFR). Bill wrote that they will probably need air sparge and soil vapor extraction system to address soil and groundwater contamination at the site. They would like to postpone submittal of RFR till June 2007. AD 05/11/2007: Spoke with B. Simmons regarding RAP submission, he said it will be ready in the beginning of June. AD 06/29/2007: Received RAP from ECS. Soil and groundwater analytical data indicate that elevated VOC concentrations still present in northern and north-western portion of the site. RAP proposes in-situ chemical oxidation in the vicinity of monitoring wells MW-2, MW-4 and MW-8, combined with monitored natural attenuation as a remedial approach at the site. AD 07/16/2007: Sent a letter to Chris Johnson of CFI approving RAP with the request to extend ISCO treatment area in order to include wells MW-5 and MW-10 in the remedial program. AD 08/28/2007: Visited the site to observe application of chemical oxidant (sodium persulfate) via injection wells. Michelle Spilter (chemist of ESC) was at the site with two technicians. Depth of the injection wells - 20 feet. Depth to GW - 10-12 ft. They were mixing sodium persulfate with water in 100 gallons container and injecting 2 full volumes of container in each injection point. The consultant plans to inject a total of 2,000 gallons of the oxidant at 10 temporary well points. Subsequent injection events may be scheduled pending evaluation of quarterly groundwater monitoring data. AD 04/09/2008: Received an email from B. Simmons of ECS saying: Hi Ainura, Please find attached the electronic pdf version of the Remedial Action GW Evaluation Update Report (June 2007-March 2008) for Cumberland Farms Inc. 108-04 Flatlands Avenue, Brooklyn, NY Spill#9409298 that was mailed to you that you should receive shortly. Thank you. William A. Simmons Senior Project Manager/Associate DL the Remedial Action Groundwater Evaluation Update Report to eDocs. Will review. Later received a hard copy of the report. Reviewed the Remedial Action Groundwater Evaluation Update Report submitted on April 9, 2008 by ECS. During August 27-29, 2007, ECS performed chemical oxidation program via injection. Chelated iron complex (Fe-EDTA) catalyzed Sodium Persulfate (Na₂S₂O₈) was mixed and injected in a total of ten borings. On March 5, 2008, all wells were surveyed. Depth to GW ranges from 10 to 12 fbg on-site. A general GW flow direction towards the west to northwesterly across the site. Groundwater monitoring: On September 13, December 13, 2007 and March 13, 2008, EDC gauged and sampled up to 10 monitoring wells. No free product was detected in any of the wells. Groundwater samples results revealed VOCs ranged from 7,269 ppb in well MW-8 to 14,7 ppb in MW-7. GW analytical data show decreasing trend in VOCs concentrations in wells: MW-1, MW-2, MW-5, MW-6, and MW-10. Increase in VOCs level were noted in wells: MW-4 (from 4.2ppm to 2,908ppm), MW-8 (from 7,120ppb to 7269ppb) and MW-9 (from 73.7ppm to 86.1ppm). The highest GW contamination is located on the north, north-west portion of the property, from the corner of East 108th Street along the sidewalk bordering Flatlands Ave. ECS will continue quarterly GW monitoring for all wells except MW-7 due to the absence of concentration of VOCs. April - September Update Report will be prepared and submitted. No response is needed. AD 10/20/2008: Received a Groundwater Evaluation Update report for April-September 2008, prepared by ECS. DL to eDocs. Will review. AD 12/04/2008: Reviewed the report. Groundwater monitoring: On June and September 2008, EDC gauged and sampled nine monitoring wells. No free product was detected in any of the wells. Groundwater samples results revealed VOCs ranged from 11.9 ppb in well MW-1 to 3,952.3 ppb in MW-4 (June 2008) and from 50.9 ppb in well MW-9 to 9,357 ppb in MW-8 9September 2008). GW analytical data for this monitoring period indicated increasing trend in VOCs concentrations in wells: MW-1(11.9-997.13), MW-4(3,952-4091), MW-5(47.3-166.8), MW-6(255.7-1350), MW-8(7,266-9,357), MW-9(11-50.9)and MW-10(745-1353). Decrease in VOCs level were noted in only one well: MW-2(from 42.16ppm to ND. The highest GW contamination appears to be located on the north, north-west, southwest and westerly portions of the property. ECS suggests that this increasing trend in VOCs may be due to the migration of the dissolved-phase plume. ECS will continue quarterly GW monitoring for all wells except MW-3 due to the absence of concentration of VOCs. Have to speak with B. Simmons of ECS regarding effectiveness of the performed remediation. And also will request ECS to submit historical total VOCs table for all site's wells. ECS calculates BTEX and other VOCs separately, which makes it difficult to track changes in total VOC concentrations over time. AD 06/19/2009: Received an e-mail from B. Simmons saying: Hi Ainura, Please find attached the Groundwater Evaluation Update Report for period October 2008 through April 2009 for SP No. 9409298 for the Cumberland Farms Inc. property at 108-04 Flatlands Avenue, Brooklyn, NY. The original is in the mail. Thank you. Bill William A. Simmons II DL the pdf copy to eDocs. Will review. AD 07/23/2009: Reviewed the report. On January 8 and April 8, 2009, EDC sampled eight monitoring wells. No free product was detected in any of the wells. Groundwater sampling results revealed VOCs ranged from ND ppb in wells MW-1 to 4,725.9 ppb in MW-4 (April 2009). GW analytical data for this monitoring period indicate decreasing trend in VOCs concentrations in 6 wells: MW-1, MW-2, MW-5, MW-6, MW-8, and MW-10. Significant increase in VOCs level was noted in well MW-4(from 2,529ppb to 4,725ppb). The highest GW contamination appears to be located on the north of the property in hte vicinity

of wells MW-4(4,725ppb) and MW-8(3,027ppb). The rest of the wells exhibited low levels of VOCs. ECS will continue quarterly GW monitoring, which will include field analysis for groundwater geochemical parameters (DO, temperature, redox potential, specific conductivity and pH levels). No response is needed. AD 02/02/2010: Received an e-mail from Mr. Simmons of ECS saying: Hi Ainura, Please find attached the electronic pdf version of the Groundwater Update Report and Remedial Action Plan Addendum for the Cumberland Farms Inc Facility # 70226 located at 108-04 Flatlands Avenue, Brooklyn, NY for Spill # 94-09298. The hard copy is in the mail. Thank you. Bill William A. Simmons II DL the report to eDocs. AD 09/13/2010: Received an e-mail from B. Simmons: Hi Ainura, Please find attached the electronic pdf version of the Groundwater Update Report and Remedial Action Plan Status for the period January June 2010 for the Cumberland Farms Inc Facility # 70226 located at 108-04 Flatlands Avenue, Brooklyn, NY for Spill # 94-09298. The hard copy is in the mail. Thank you. Bill DL the report to eDocs. AD 09/15/2010: Received a hard copy of the Groundwater Update Report and Remedial Action Plan Addendum for the Cumberland Farms Inc Facility # 70226 located at 108-04 Flatlands Avenue, Brooklyn, NY for Spill # 94-09298 for a period of January - June 2010. Will review. AD 10/28/2010: Reviewed the report. On February 9, 2010 ORC sock were installed in wells: MW-4, MW-5, MW-6, MW-8 and MW-10. On February 25, 2010 one monitoring well MW-11 was installed across the Flatlands Avenue in the sidewalk, as was required by DEC. On January 18, 2010 EDC sampled eight monitoring wells, and on May 13, 2010 - nine wells were sampled. No free product was detected in any of the wells. Groundwater sampling results revealed VOCs ranged from ND ppb in wells MW-9 and MW-11, to low levels in wells MW-1 (29ppb), MW-2 (12.5ppb) and MW-6 (122ppb) to significant concentrations of VOCs in wells: MW-4 (5364ppb), MW-5 (1595ppb), MW-8 (9719ppb) and MW-10 (1638ppb). GW analytical data for this monitoring period indicate decreasing trend in VOCs concentrations in 3 wells: MW-1, MW-2 and MW-6. Significant increase in VOCs level was noted in well MW-5 (from 696ppb in January to 1595ppb in May). The highest GW contamination appears to be located on the west part of the property in the vicinity of wells MW-4(5364ppb) and MW-8(9719ppb). Newly installed well MW-11 had ND results for VOCs. ECS will continue quarterly GW monitoring, which will include field analysis for groundwater geochemical parameters (DO, temperature, redox potential, specific conductivity and pH levels). AD 03/21/2011: Received a hard copy and pdf copy of the Groundwater Evaluation Update and Remedial Action Plan Status Report for a period of July-December 2010. DL e-copy to eDocs. Will review. AD 04/29/2011: Reviewed the report. On August 12 and November 8, 2010 ECS gauged and collected GW samples from 8 wells. No free product was detected in any of the wells. Groundwater sampling results revealed TVOCs ranged from ND ppb in wells MW-2, MW-9 and MW-11, to low levels in wells MW-1 (8ppb), and MW-6 (120ppb) to significant concentrations of VOCs in wells: MW-8 (8,737ppb from 9719ppb in May 2010) and MW-10 (885ppb from 1638ppb in May 2010). GW analytical data for this monitoring period indicate decreasing trend in VOCs concentrations in 3 wells: MW-1, MW-4 and MW-5. Significant increase in VOCs level was noted in well MW-8 (from 3,357ppb in August to 8,737ppb in November 2010). The highest GW contamination appears to be located in the vicinity of wells MW-10(885ppb) and MW-8(8,737ppb). Newly installed well MW-11 had ND results for VOCs. ECS will continue quarterly GW monitoring, which will include field analysis for groundwater

geochemical parameters (DO, temperature, redox potential, specific conductivity and pH levels). AD 08/18/2011: Received a Groundwater Evaluation Update and RAP Status Report for period of January - June of 2011. DL pdf copy to eDocs. Will review. AD 09/29/2011: Reviewed the report. On February 8 and May 12 2011 ECS gauged and collected GW samples from 8 wells. No free product was detected in any of the wells. Groundwater sampling results revealed TVOCs ranged from ND ppb in wells MW-1, MW-2, MW-9 and MW-11, to low levels in wells MW-5 (25.68ppb), and MW-6 (7.78ppb) to significant concentrations of VOCs in wells: MW-8 (6,067ppb and 4,726ppb in February and May 2011) and MW-4 (1,327ppb in May 2011 from 164ppb in February 2011). GW analytical data for this monitoring period indicate decreasing trend in VOCs concentrations in 2 wells: MW-1 and MW-5. Significant decrease in VOCs level was noted in well MW-8 (from 8,737ppb in November 2010 to 4,726ppb in May 2011). The highest GW contamination appears to be located in the vicinity of wells MW-10(444ppb), MW-8(4,726ppb) and well MW-4 (1,327ppb). Newly installed well MW-11 had ND results for VOCs. ECS will continue quarterly GW monitoring, which will include field analysis for groundwater geochemical parameters (DO, temperature, redox potential, specific conductivity and pH levels). Next semi-annual report is due. AD 03/23/2012: Received a Groundwater Evaluation Update and RAP Status Report for period of July - December of 2011. No pdf copy was submitted. To request its submission. Will review the report. AD 05/03/2012: Received requested PDF copy of the report. DL the report to eDocs. Reviewed the report. It states that on August 9 and December 1, 2011, ECS gauged all Site-related monitoring wells and collected groundwater samples from up to eight (MW-1, MW-2, MW-4, MW-5, MW-6, MW-8, MW-9, MW-10 and off-site well MW-11) and submitted the samples for analysis of VOCs. Samples collected from wells MW-2, MW-4, MW-5, MW-8 and MW-10 were submitted for analysis of dissolved iron, nitrates and sulfates. No free product was detected in any of the wells. Depth to water on August 9, 2011 as measured from grade ranged from approximately 10.32 fbg in MW-4 to 11.79 fbg in well MW-1. Depth to water on December 1, 2011 as measured from grade ranged from approximately 10.04 fbg in well MW-2 to 11.45 fbg in well MW-1. The December 1, 2011 gauging data was used to calculate the groundwater flow direction that was determined to trend towards well MW-4 due to a slight elevation anomaly in the area of well MW-4 as compared to all other on-site wells. If well MW-4 is removed from the calculations, groundwater flow is towards the west. August 2011 sampling: Groundwater sampling results revealed TVOCs ranged from ND ppb in wells MW-9 and MW-11, to low levels in wells MW-1 (51.6ppb), MW-6 (13.1ppb) to moderate levels in MW-2 (182.9ppb), MW-5 (216ppb) and MW-10 (195ppb) to significant concentrations of TVOCs in wells: MW-8 (5, 775ppb from 4,726ppb in May 2011) and MW-4 (2,611ppb from 1,327ppb in May 2011). December 2011 sampling: Groundwater sampling results revealed TVOCs ranged from ND ppb in 4 wells: MW-1, MW-2, MW-6, and MW-9, to low levels in wells MW-4 (29.75ppb), MW-5 (75.47ppb) to moderate levels in MW-10 (263.2ppb), to significant concentrations of TVOCs in well MW-8 (4,709.5ppb from 5, 775ppb in August 2011). Evaluation of the August and December 2011 groundwater data indicate fluctuation trend in VOCs concentrations in 6 wells: MW-1, MW-2, MW-4, MW-5 and MW-6. Fluctuation in VOCs level was noted also in well MW-8 (from 4,726ppb in May 2011 to 5, 775ppb in August 2011 to 4,709.5ppb in December 2011). The highest GW contamination appears to be located in the vicinity of well MW-8(4,709ppb). Well

S104495237

MW-10 indicated slight increase in VOCs concentrations from 195ppb in August 2011 to 263ppb in December 2011. Overall decreasing VOCs levels historical trend noted at the site. ECS will continue to perform quarterly groundwater monitoring that will consist of depth to groundwater gauging of all Site-related wells, field analysis for groundwater geochemical parameters (i.e. DO, ORP, specific conductivity, temperature, and pH levels) of all wells that are sampled, and the collection of groundwater samples from monitoring wells MW-1, MW-2, MW-4, MW-5, MW-6, MW-8, and MW-10 for VOCs according to USEPA Method 8260 NYSDEC STARS gasoline-related compounds. ORC socks will continue to be utilized in wells MW-4, MW-5, MW-6, MW-8 and MW-10 and changed out as necessary. AD 09/26/2012: Received a Groundwater Evaluation Update and RAP Status Report for period of January - June of 2012. DL pdf copy to eDocs. Will review the report. AD 11/07/2012: Reviewed the report. It states that on February 15 and May 2, 2012, ECS gauged all eleven site-related monitoring wells and collected groundwater samples from eight (MW-1, MW-2, MW-4, MW-5, MW-6, MW-8, and MW-10). Samples collected from wells MW-2, MW-4, MW-5, MW-8 and MW-10 on February 15, 2012 were also submitted for analysis of dissolved iron, nitrates and sulfates. Evaluation of the February and May 2012 groundwater data indicates continued decreasing VOC concentrations to the lowest levels since sampling began, with certain various VOCs in wells MW-2, MW-5, MW-6, MW-8, and MW-10 above NYSDEC TOGS Groundwater Quality Standards (GWQS). February 2012 sampling - TVOCs (ppb) - MTBE (ppb): 1. MW-1 - ND - 2; 2. MW-2 - ND - 9; 3. MW-4 - 7 - ND; 4. MW-5 - 143 - 21; 5. MW-6 - 3.3 - 8.7; 6. MW-8 - 4,186 - 2.6; 7. MW-10 - 25 - 14. Groundwater sampling results revealed TVOCs ranged from ND ppb in wells MW-1 and MW-2, to low levels in wells MW-4 (7ppb), MW-6 (3.3ppb) and MW-10 (25ppb) to moderate levels in MW-5 (143ppb) to significant concentrations of TVOCs in well MW-8 (4,186ppb) May 2012 sampling - TVOCs (ppb) - MTBE (ppb): 1. MW-1 - ND - 7; 2. MW-2 - ND - 14; 3. MW-4 - ND - ND; 4. MW-5 - 10.6 - 8.5; 5. MW-6 - 2.3 - 15.4; 6. MW-8 - 1,546 - 3; 7. MW-10 - 97 - 60. May groundwater sampling results revealed TVOCs ranged from ND ppb in 3 wells: MW-1, MW-2 and MW-4, to low levels in wells MW-5 (10.6ppb), MW-6 (2.3ppb) to moderate levels in MW-10 (97ppb), to significant concentrations of TVOCs in well MW-8 (1,546ppb which is a decrease from 4,709.5ppb in February 2012). Depth to water on February 15, 2012 as measured from grade ranged from approximately 10.8 fbg in MW-4 to 12.11 fbg in well MW-1. Depth to water on May 2, 2012 as measured from grade ranged from approximately 10.43 fbg in well MW-2 to 11.93 fbg in well MW-1. The May 2, 2012 gauging data was used to calculate the groundwater flow direction that was determined to trend towards the west. ECS will continue to perform quarterly groundwater monitoring that will consist of depth to groundwater gauging of all Site-related wells, field analysis for groundwater geochemical parameters (i.e. DO, ORP, specific conductivity, temperature, and pH levels) of all wells that are sampled, and the collection of groundwater samples from monitoring wells MW-1, MW-2, MW-4, MW-5, MW-6, MW-8, and MW-10 for VOCs according to USEPA Method 8260 NYSDEC STARS gasoline-related compounds. AD 03/27/2013: Received the following e-mail from B. Simmons: Hi Ainura, Please find attached the electronic pdf version of the Site Status Update and Remedial Action Plan Status Report for SPILL # 94-09298 for period July-December 2012 for the Cumberland Farms. Inc (CFI) Facility # 70226 located at 108-04 Flatlands Avenue, Brooklyn, NY. A hard copy and a CD are also being mailed to you.

EXXON S/S (Continued)

S104495237

Thank you. Bill William Simmons Senior Project Manager/Associate DL the report to eDocs. Will review. AD 04/18/2013: Reviewed the report. It states that ECS visited the site on August 6 and November 28, 2012. Depth to water on August 6, 2012 as measured from grade ranged from approximately 10.34 fbg in RW-2 to 11.26 fbg in well MW-6. Depth to water on November 28, 2012 as measured from grade ranged from approximately 10.43 fbg in well RW-2 to 11.15 fbg in well MW-6. The November 28, 2012 gauging data was used to calculate the groundwater flow direction. The contours indicated a very flat gradient with several flow pattern variations. The August and November 2012 data indicated no VOC concentrations above TOGS GWQS in wells MW-1, MW-4, and MW-6, and only MtBE just above the TOGS GWQS in well MW-2. The highest VOC concentrations continue to be present in well MW-8 but comparison of this current data to the historical high concentrations correlates to an approximate 92-94% decrease in total BTEX concentrations, and an 80-81% decrease in total other VOC concentrations. GW - August - November 2012 sampling - TVOCs (ppb): 1. MW-1 - ND - ND; 2. MW-2 - ND - ND; 3. MW-4 - ND - ND; 4. MW-5 - 40 - 135; 5. MW-6 - ND - ND; 6. MW-8 - 3,379 - 2,848; 7. MW-10 - 40 - 184. ECS will continue to perform quarterly gauging of Site-related wells, and collect groundwater samples from wells MW-2, MW-4, MW-5, MW-8, and MW-10 for VOCs. If evaluation of the next two rounds of groundwater samples collected from on-site wells MW-2 and MW-4 continue to indicate similar VOC concentrations below the TOGS GWQS and/or the absence of VOC concentrations, ECS will propose either eliminating these wells from the quarterly monitoring program or reducing sampling of these wells to semi-annually. ORC socks will continue to be utilized in wells MW-4, MW-5, MW-6, MW-8 and MW-10 and changed out as necessary. AD 09/06/2013: Received the Site Status Update and Remedial Action Plan Status Report for SPILL # 94-09298 for period January - June 2013. DL the report to eDocs. Will review. AD 10/07/2013: Reviewed the report. It states that on February 14 and May 15, 2013, ECS gauged eleven site-related monitoring wells and collected groundwater samples from five (5) wells: MW-2, MW-4, MW-5, MW-8, and MW-10. Evaluation of the February and May 2013 groundwater data indicates continued decreasing VOC concentrations to the lowest levels since sampling began, with certain various VOCs in wells MW-2, MW-5, MW-8, and MW-10 above NYSDEC Technical and Operational Guidance Series (TOGS) Groundwater Quality Standards (GWQS). GW - February - May 2013 sampling - TVOCs (ppb): 1. MW-2 - ND - ND; 2. MW-4 - ND - ND; 4. MW-5 - 64.34 - 127; 5. MW-6 - NS - NS; 6. MW-8 - 954 - 1,252; 7. MW-10 - 332 - 304. Evaluation of groundwater data collected since 2003 indicates the MNA program has been demonstrating biodegradation of petroleum constituents as evidenced by the lowest overall total BTEX and other various VOC concentrations in Site-related wells since monitoring began in June 2003. The current 2013 data indicated only a concentration of MtBE in well MW-2 during the February 2013 sampling event just above the TOGS GWQS, and the continued absence of VOCs above TOGS GWQS in samples collected from well MW-4 for the sixth (6) consecutive sampling event (Table 1). The highest VOC concentrations continue to be present in well MW-8 but are at the lowest concentrations since sampling began in June 2006, and comparison of this current data to the historical high concentrations correlates to an approximate 98% decrease in total BTEX concentrations, and an approximate 83% decrease in total other VOC concentrations. Based on the MNA program that had been demonstrating biodegradation of petroleum constituents, ECS concluded that the continued collection

EXXON S/S (Continued)

S104495237

of groundwater samples for nitrate, iron, and sulfate analysis was determined to not be critical for future evaluation of the effectiveness of the MNA program and these analyses would no longer be performed. As discussed in previous submittals, the addition of the ORC socks have allowed sustained increased dissolved oxygen concentrations within the aquifer in the vicinity of these wells to allow for aerobic respiration of residual petroleum hydrocarbons present in groundwater. ORC socks were left in well MW-6 even though this well is no longer sampled. ORC socks will continue to be utilized in wells MW-4, MW-5, MW-8 and MW-10, and periodically replaced. based on the continued absence of VOCs in groundwater samples collected from on-site wells MW-2 and MW-4 ECS propose eliminating these wells from the quarterly monitoring program. ECS will continue to perform quarterly gauging of the site related wells and will sample MW-5, MW-8 and MW-10 for TVOCs. ORC socks will be left in MW-2 and MW-4, even these wells are proposed to no longer be sampled. ORC socks will continue to be utilized in wells MW-5, MW-8 and MW-10 and periodically replaced. AD 04/17/2014: Received the Site Status Update and Remedial Action Plan Status Report for SPILL # 94-09298 for period January - June 2013. DL the report to eDocs. Will review. AD 05/16/2013: Reviewed the report. It states that on August 12, 2013 ECS gauged the eleven (11) Site-related monitoring wells and collected groundwater samples from five (5) (MW-2, MW-4, MW-5, MW-8, and MW-10). On November 1, 2013 ECS gauged the eleven (11) Site-related monitoring wells and collected groundwater samples from three (3) (MW-5, MW-8, and MW-10). Depth to water on August 12, 2013 as measured from approximate surface grade ranged from approximately 9.27 fbg in MW-4 to 11.26 fbg in well MW-1. Depth to water on November 1, 2013 as measured from approximate surface grade ranged from approximately 10.26 fbg in well MW-2 to 11.74 fbg in well MW-1. The November 1, 2013 gauging data was used to update the groundwater flow direction. The contours indicated a very flat gradient with several flow pattern variations similar to historic trends due to slight elevation anomalies in certain on-site wells (MW-4 and MW-5). GW - August - November 2013 sampling - TVOCs (ppb): 1. MW-2 - ND - ND; 2. MW-4 - ND - ND; 4. MW-5 - 41 - 32 5. MW-6 - NS - NS 6. MW-8 - 639 - 869 7. MW-10 - 42 - 45 Evaluation of the August and November 2013 groundwater data indicate certain various VOCs in wells MW-2, MW-5, MW-8, and MW-10 above NYSDEC TOGS GWQS. Most contaminated well MW-08 indicated fluctuating trend in VOC concentrations. Conclusions and recommendations: According to ECS, evaluation of the current 2013 groundwater data indicates the lowest overall total BTEX and other various VOC concentrations in Site-related wells since monitoring began in June 2003. ECS proposes transitioning the quarterly sampling program to semi-annual to include the gauging of all site-related wells and the sampling of wells MW-5, MW-8, and MW-10 for analysis of VOCs according to USEPA Method 8260 NYSDEC STARS gasoline-related compounds. Field analysis for groundwater geochemical parameters (i.e. DO, ORP, specific conductivity, temperature, and pH levels) will also be measured in the wells that are sampled. ORC socks will be left in wells MW-4 and MW-6 even though these wells are no longer sampled. ORC socks will continue to be utilized in wells MW-5, MW-8 and MW-10, and periodically replaced. The data will be evaluated in the subsequent Semi-Annual Site Status Update and RAP Status Reports. AD 03/06/2015: Received the following e-mail from B. Simmons: Hi Ainura, Please find attached the electronic pdf version of the Site Status Update and Remedial Action Plan Status Report for Spill#

94-09298 for period July-December 2014 for the Cumberland Farms. Inc (CFI) Facility # 70226 located at 108-04 Flatlands Avenue, Brooklyn, NY. Based on the small size of this document, we will not mail you a CD unless you require one. If so, please just let us know. Thank you. Bill William Simmons Senior Project Manager/Associate Environmental Compliance Services, Inc. 296 Nonotuck Street Florence, MA 01060 Tel: 413-789-3530 Ext. 339 Fax: 413-789-2776 Cell: 413-519-0769 wsimmons@ecsconsult.com www.ecsconsult.com Will review. AD 04/08/2015: Reviewed the report. It states that historical depth to groundwater ranges from approximately 10 to 11.5 feet below grade (fbg). Groundwater flow direction has historically been determined to have fluctuating flow patterns in certain areas of the Site with predominantly westerly patterns which is evidenced by evaluation of historical groundwater dissolved-phase contaminant migration patterns. On November 13, 2014, ECS gauged the ten (10) on-site wells and collected groundwater samples from three wells (MW-5, MW-8, and MW-10). Evaluation of the 2014 groundwater data indicates continued decreasing VOCs to the lowest levels in wells MW-5, MW-8 and MW-10 since sampling began, with certain various VOCs in all three wells above NYSDEC TOGS Groundwater Quality Standards (GWQS). GW data: May - November 2014 sampling - TVOCs (ppb): 1. MW-2 - NS - NS; 2. MW-4 - NS - NS; 4. MW-5 - ND - 5 5. MW-6 - NS - NS 6. MW-8 - 573 - 707 7. MW-10 - 137 - 31 Evaluation of the current November 2014 groundwater data indicates the lowest overall total BTEX and other various VOC concentrations in on-site wells MW-5, MW-8 and MW-10. ECS proposes continued semi-annual gauging of site-related wells and the sampling of wells MW-5, MW-8, and MW-10 for analysis of VOCs according to USEPA Method 8260 NYSDEC STARS gasoline-related compounds. Field analysis for groundwater geochemical parameters (i.e. DO, ORP, specific conductivity, temperature, and pH levels) will also be measured in the wells that are sampled. ORC socks will be left in wells MW-4 and MW-6 even though these wells are no longer sampled. ORC socks will continue to be utilized in wells MW-5, MW-8 and MW-10, and periodically replaced. The data will be evaluated in the subsequent Semi-Annual Site Status Update and RAP Status Reports. AD 07/13/2015: Received the following e-mail from Bill Simmons: Hi Ainura, Please find attached the electronic pdf version of the Site Status Update Report & Spill No. 94-09298 Closure Request for period January-June 2015 for the Cumberland Farms. Inc (CFI) Facility # 70226 located at 108-04 Flatlands Avenue, Brooklyn, NY. We will be mailing you a CD & a hard copy. Please let me know if you have any questions. Thank you. Bill William Simmons Senior Project Manager/Associate Environmental Compliance Services, Inc. 296 Nonotuck Street Florence, MA 01060 Tel: 413-789-3530 Ext. 339 Fax: 413-789-2776 Cell: 413-519-0769 wsimmons@ecsconsult.com www.ecsconsult.com Will review. AD 07/14/2015: Reviewed the report. It documents a summary of historical response actions performed at the site during 2000-2015 as well as the most recent groundwater sampling results collected on May 22, 2015. GW sampling: On May 22, 2015, ECS gauged the ten (10) on-site monitoring wells (except well MW-3 that was covered by a vehicle) and collected groundwater samples from three (3) (MW-5, MW-8, and MW-10). Samples were submitted to Test America of Nashville, Tennessee, for analysis of VOCs by USEPA Method 8260 NYSDEC STARS List for gasoline-related compounds. Evaluation of the May 2015 groundwater data indicates continued decreasing VOC concentrations to the lowest levels in wells MW-5, MW-8 and MW-10 since sampling began, with certain various VOCs in

S104495237

wells MW-8 and MW-10 above NYSDEC TOGS GWQS. GW data: May - 2015 sampling - TVOCs (ppb): 1. MW-2 - NS; 2. MW-4 - NS; 4. MW-5 - ND; 5. MW-6 - NS 6. MW-8 - 408; 7. MW-10 - ND. Based on the historical data evaluation, including the May 2015 groundwater data, it indicate continued decreasing VOC concentrations to the lowest levels in wells MW-5, MW-8 and MW-10 since sampling began, with certain various VOCs in wells MW-8 and MW-10 remaining above the TOGS GWQS. Based on the data presented in this report, ECS does not recommend any additional monitoring and/or remedial actions. ECS respectfully requests closure of Spill No. 94-09298. Will discuss the closure request with J. Kolleeny of DEC. AD 07/21/2015: Discussed the closure request with J. Kolleeny of DEC. Taking into consideration the actions performed at the site, such as: 1. Several site investigation with delineation of contamination plume; 2. In-situ chemical oxidation in 2007; 3. Installation of ORC sock into most contaminated wells in 2010; 4. Quarterly groundwater monitoring and reporting, and most recent data provided which concludes that: 1. There is no off-site migration of contamination; 2. Approximate 98% decrease in total VOCs in groundwater comparing to historical data; 3. Absence of free product, it was decided to approve the spill closure request. Case closed. AD" "REMOVED U/G TANK FOUND CONTAMINATED SOIL POSSIBLE DUE TO OVERFILLS OVER TIME-SAMPLES SENT IN-WILL CONTINUE CLEANUP."

FINDS:

Registry ID: 110064187071

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110000892277

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED FROM Y.KRIMGOLD. The spill Lead_DEC Field is I. Islam with effect from 02/02/05. 4/20/05- The site is under remediation by LiRo Engineers. Reviewed quarterly report (Nov./04-Jan./05). Soil remediation ended up. Groundwater contamination persists in 2 wells only. ORC socks installation has been recommended in those two wells. Quarterly groundwater monitoring to continue. - II 7/11/05- Reviewed the Feb.-Apr./05 monitoring report. Presented data reveal that low level GW contamination persists in two wells (MW-4 and MW-27) only. However ORC socks have been

S104621535

installed in these two wells in Mar/05. Quarterly sampling of these wells is to continue. Installed the report in the eDoc Folder. - II. 10/11/05- Reviewed the May-July/05 monitoring report dt. Sept. 6/05. All of a sudden in June/05, free product was identified in MW-27 and measured at 0.06' on June 1 and 0.03' on June 14. The product was identified through fingerprinting as kerosene/diesel fuel mixture. Most recent (Sept1/05) monitoring revealed a sheen only in this well, and LiRo comments this product as transient. Recent GW results showed low level contamination at well EW-19, and wells MW-4 and MW-14 showed no detections of petroleum compounds. However LiRo recommends continuing GW sampling at wells EW-19, MW-4 and MW-27 and quarterly reporting. Filed the report in the eDoc Folder.-II 11/15/05- Sept/05 GW sampling results were presented by the consultant in the meeting (11/10/05) with DDC and DEC. Most of site wells were eliminated from the monitoring program based on repeated compliances with GW standards. GW sample (Sept/05)from well MW-27 showed TVOCs of 139ppb while historical data from the well show generally lower than 100ppb. Based on these, Koon gave a decision to close the spill, and it is closed today. - II"

Remarks:

"LEAK DETECTOR IN TANK MALFUNCTIONED. DURING REPAIR FOUND 1200 GAL, MISSING - SUSPECT BROKEN LINE. 10/7/93-TANK TEST FAILURE. 11/4/93-SOIL FOUND IN TANK PULL. 11/11/93 CONTAMINATED SOIL FOUND. See spill #s 9308251, 9309753, 9309468."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

1972 and stored #4 and #6 oil currently stores #2 oil. Both as scheduled for a retest in 2008. No recovery system or MWs on site. NYCHA will provide DEC with a site assessment. - SK 06/10/08 : site reassigned to J.Kann. Spill 0207201 closed and consolidated with this spill at the same address. J.Kann 3/1/12: J.Kann - rcvd iwp 2/28/12 and edoced today. 1/23/14: J.Kann - email sent to NYCHA requesting some info on Dec. 30, 2013. Received info on Jan. 9 and reviewed it today. Email approving IWP with mods sent out today and edoced. SIR due July 23, 2014. 11/5/14: J.Kann - visited site during field work on September 4, 2014. Reminded NYCHA to collect a sample in the area of the former mobile boiler. Two young trees and grass were thriving in the area of the former mobile boiler. Observed soil samples collected around the tank. No visible impacts noted. Received the SIR on 10/15/14. Reviewed the report. No exceedences of CP-51 or TOGS 1.1.1 for VOCs in groundwater or soil (with the exception of MTBE in one gw sample at 13 ppb (10ppb standard)). Minor SVOC impacts were detected in three soil locations. SB-4 in area of former mobile boiler contained no VOCs and minor SVOC (1200-1400 ppb of 4 constituents with guidances of 800-1000 ppb). Location SBFL2 contained slightly higher SVOCs attributed to asphalt in the soil (poor quality fill). Benzo(a)anthracene was detected in gw at two locations with a concentration of 0.06ppb (guidance of 0.002 ppb). Based on the site investigation, no additional investigation is warranted and the spill closed. "

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY THE MOBILE BOILER WITH THE LEAKY GAUGE WAS SITUATED ON AN AREA WITH GRASS AND EXPOSED EARTH, OUTSIDE BOILER ROOM. AFTER REMOVAL OF THE BOILER, AN AREA OF STAINED SOIL ABOUT 7 BY 10 FEET WAS REVEALED. ON APRIL 29, 2003, MARIC PIPING OF LONG ISLAND CITY (CONTRACTOR WHO INSTALLED THE MOBILE BOILER WITH FAULTY GAUGE) EXCAVATED CONTAMINATED SOIL, DIGGING OUT AN AREA ABOUT 12 FEET LONG, 8 FEET WIDE, AND FOUR FEET DEEP. PID SCREENDING OF EXCAVATION SIDEWALLS AND BOTTOM SUGGESTED SOME SUBSTANTIAL RESIDUAL CONTAMINATION REMAINS. FIVE END-POINT SAMPLES WERE TAKEN; DEPENDING ON LAB RESULTS, ADDITIONAL WORK MAY BE REQUIRED. - JK 11/04/05: This spill transferred from J.Kolleeny to S.Kraszewski. 07/07/06: NYCHA summary report states that no wells exist on-site. Soil/GW conditions unknown. NYCHA will provide a site assessment to the Department. - SK 02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann. 06/10/08: J.kann - site closed and consolidated with 9614567. "

"6/12/2008 Cross ref to #9608289 TTF on Tank #10 06/13/08: Related spill case 9608289 (also for TTF of Tank #10 at this site) closed to consolidate with this spill case. - J. Kolleeny 08/07/09: USTs involved in this spill were removed in 2006; one end-point sample had some high levels of VOCs. Ryan Piper of Spill Response was at site, directed DEP to do add'l work; they then took 14 add'l soil samples and 2 GW grab samples (see data in eDocs). [For add'tl info regarding this site, including UST closure rpt, see spill no. 0610043, Ryan Piper, and spill no. 0509695, Sharif Rahman.] In 2008, Takcheun Chan of DEP contacted me about closure of this spill. I asked if any of add'tl 14 soil and/or 2 GW samples were collected near hot end-pt sample, and if any kind of remediation was done. On 8/6/09, Mr. Chan submitted documents via email showing that one of 14 soil samples (sample 3B) was near hot end-pt. sample (G2), but lab result showed much lower levels of VOCs; GW samples showed no significant impact to GW. Also, docs indicated that ORC advanced was applied to open excavation to enhance bioremediation of residual contamination. Mr. Chan's email, with my earlier email to him and all supporting documents are in eDocs. Based on submitted information, no further action is warranted and spill case is closed. - JK"

DEC Memo: "Spill during delivery. Tank is inside a sealed vault and surrounded with pea gravel. 280 gal of oil was spilled into the pea gravel. Contractor (PTC ?) has been hired to suck out all the gravel and clean the vault. 7/19/12- DECPiper spoke with Joe Reddington. Work is progressing though they had to remove the tank. There is another tank in the vault which has to be shored off for stability. Once they reach clean gravel, they will call for inspection. 2/6/15- DEC Piper received and reviewed spill closure report. Based on work to date, this spill is closed. See dec docs for report. Closed."

DEC Memo: "10/6/06 sent ttf letter to: Michael Quinn, Director, Facilities Engineering NYCDEP Bureau of Wastewater 96-05 Horace Harding Expressway Corona, NY 11368 bf 10/25/06 received response to 10/6/06 letter from Jerry Fragias, Chief, Div. of Facilities Planning. Will isolate, excavate, and retest. If any questions, contact Ioannis Iliopoulos (718)595-4845. bf 3/8/07 On 2/22/07, received letter from Tak Cheun Chin, Environmental Engineer Intern, NYCDEP. Letter contains tank tightness test reports for test on 2/8/07 and requests closing of spill. Called Mr. Chan and requested a third party letter explaining what happened. Mr. Chan told me manhole cover was loose causing failure. Cover fitting was tightened and then tank passed. He said he will get letter and send to me. Action Environmental did the repair work. bf 4/4/07 received call from Mr. Chin on 4/3 re:letter response regarding failure. Called him back today. letter was sent certified mail. Could not find. He will email the package as a pdf file to me today. bf 4/9/07 reviewed letter from Mr. Chin. Tank tested and passed. Manway need new bolts and gasket. No mention of contaminated soil found or not found. Sent email to Mr. Chan requesting a third party letter regarding soil contamination. bf 4/27/07 Received call from Mr. Chin. He will email a copy of letter from contractor regarding soil contamination. bf 5/7/07 Received photos by email from Mr. Chan showing manholes which can be inspected for no petroleum contamination. NFA. bf"
Remarks: "Ullage failure. Manway covers are not bolted down properly . Caller can hear air coming from there."

DEC Memo: "need to send CSL to DEP PBS #2-456489 Nov 25, 2005 A Contaminated Soil Letter was sent to: Mr. Gopalakrishnan NYC-DEP Bureau of Wastewater 96-05 Horace Harding Expressway Corona, NY 11368 03/06/06 Sharif Rahman- I spoke with Harold Monchik who was the spill caller from DEP. He told me the spill was cleaned up and the line was repaired but he does n't have much information about who did the work/any paper work. He suggested me to contact Paul Adams or Toma, Senior Stationary Engineers@718-642-7705. They are out on field right at this moment. Need to call back later.Later on today, I called again and left messege to Frank Sebastiano. 07/20/06 Rahman- I spoke with Maria Duran@212.860.9315/9350 who works under Joe Reddington of safety division. She will look into it and send DEC the available paper works for review. 08/11/06 Rahman- Spill occurred due to leak on return line while doing soil borings.Approx. 800 gallons of #4 oil spilled on the ground through the damaged pipe.The spill was confined to the area above the buried encasement.There are no adjacent waterways.A total of 769 tons of oil water mixture were vacuumed to a vac truck and 59 tons of petroleum contaminated soil was removed in the vicinity of the fuel oil supply line to a depth of approx. 10 ft below the grade.One composite end point sample was taken from four locations at 15 ft spacing in the area of the spill.Soil analyticals are non detect for voc and there are slight exceedances for SVOC which do not warranty further remediation.Waste disposal manifest are attached.NFA required. 11/30/2006 Rep from Engineering firm (who?) called to say that they have rediscovered another problem at the site. The prior problem was limited to the fill line. Now they are removing the tank and the area under the old tank is heavily contaminated. They want to install a new tank vault and tank system. They need to come up with a plan as soon as possible to deal withthis problem. The rep will contact Sharif Rahman within next 1-2 days. ****Sangesland reopened this spill.**** Jerry Fragias@(718)595-4968 is the contact at DEP. Spill#0610043 was assigned as tanks were being removed.Hence, spill #0509695 is closed."

Remarks: 6/10/09. Work performed without DEC approval of work plan. 5/25/12: J.kann - briefly scanned report and noticed NYCHA requests closure. Therefore, I identified the site as a P1. 06/105/17: J.Kann - after file review, some shallow contamination needs to be removed as per the SIR submitted in 2009 prior to closure. NYCHA was informed of that in the 2/14/17 meeting (see notes). Spill reassigned to Andre Obligado."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD Tank Test Failure letter sent to: Sunnysdale Farms Inc. 400 Stanley Ave Brooklyn, NY 11207 Attn: Raymond Kearney 5/10/05. J.Krimgold spoke to Mark Turoff (Energy Tank & Environmental Services) at 917-750-1843. He has done a site assessment at this site. Most likely the site will require spill investigation due to the contamination found so far. He will submit a report this week. Owner wants to have a CO or stip for this site. Owner: Stanley Eisenberg phone 561-414-7221 400 Stanley Ave Brooklyn, NY 11207 08/09/05. - spoke to Mark Turoff. (E-mail address- ENVCOM3@aol.com) there are four 5,000 gallon fuel tanks with some containing diesel. there are are four 10,000 gallon heating oil tanks, mostly no. 2 and was some No. 4. Mark will send me the address of the property owner so that a stipulated agreement can be sent. S. Scharf 08/10/05 - Spoke to Stanley Eisenberg. I sent Stanley a stipulation agreement. Accountant: Daphne Stasco (Email: Dstasco@optline.net DJSpargamentadvisors.com) 115 Quaker ridge Manhasset, NY 11030 08/12/05- Spoke to Stanley Eisenberg. He will sign the stipulation agreement and send it back in to me. He has hired a company called Pro-Test (ENVCOM30@AOL.COM) that will: Submit the required I&R work plan for 400 stanley ave. For 383-389 Stanley ave there are tanks also. they will test, and if fail get new spill nubmer and will address all the tanks at once. 400 stanley Ave has 4-5,000 tanks for gasoline to be removed, and 4-10,000 fuel oil tanks of which three have already been closed ad the 4th on requires closure.- S. scharf 383-389 Stanley Ave will also require remediation. 09/20/05- Called Pro Test to talk to either John or tom (son)Liddy. Not in Told worker that Eisenberg signed the stipulation and we are waiting for the work plan to attache to it.-S.Scharf. John Leddy calls back same day. will submit the required work plan. 09/23/05- John Leddy from Pro-Test called. He will be submitting a work plan. proTest wants to start on the 4-10,000 gallon tanks on the north end. Pro-Test Inc 410 Lexington Ave North Babylon, NY 11704 (631)-321-4670 10/07/05 Several calls with John Leddy. Overall, Pro-Test has removed the concrete cover on the 4-10,000 gallon fuel oil tanks. Three of the four tanks were previously abandoned in place with slurry. removed the fourth tank, washed it and cut it up for removal. Oil contaminated soils on north and south side and under abandoned tanks. So far, Protest has

removed 275 yards of soil and are segregating contaminated versus non-contaminated. He will assess the situation monday and make a decision as to whether to pull the abandoned ones in order to complete remediation.- Steven scharf- PM. Thursday and Friday 10/20-1/05 have tested stockpiled soils and will have allied Waste remove this week. Week of 10/31/05- On tuesday took out contaminated soils from a back hoe delivered by Stanley Eisenberg. Work has started on the 5-4,000 gallon gasoline tanks. Four are diesel and one is gasoline. The tank contents have been pumped out by petroleum tanks cleaners. The Gas tanks will be cleaned on monday.- S. Scharf 11/29/05- In the area of the 5-4,000 gallon motor fuel tanks, two additional tanks were identified. All the motor fuel tanks were cleaned, cut up and removed from the site. All the soils from the heating oil tanks were tested, manifested and removed from the site. Spoke to both John Leddy of Protest and Ray Carney. A status report is coming ASAP and there is a request to fill in the pit around the former 10,000 gallon tanks.- S. Scharf 12/02/05- Spoke with John Leddy. Need to put in two monitoring wells for northern heating oil tank removal. GW is evident at the bottom of the pit and need to confirm that all the heating oil is out. Therefore, put one well on either side and fill in the pit.- S. Scharf 12/05/05- Spoke to Ray Carney of Red Banana Inc. Will approve the monitoring wells so that filling in pits can proceed. Already has soil stockpiled.- S. Scharf 12/07/05-spoke to John leddy of Pro Test. I will get him MW approval letter and he will put it on the work schedule. S. Scharf 12/13/05- Letter sent to ProTest summerizing work ot date, need for wells on north and need for further investigation on south.- S. Scharf January 2006. brought in a cotractor to do a magnetonmetry survey. found eight 550 gallon tanks. Search of NYC records confirmed the eight tanks installed in 1958. Contractor was brought in to remove the eight tanks, that were all empty. confirmatory sampling showed no problems in these areas. Sunnysdale made a proposal to offsite dispose of the excavated materials, fill in the excavation and install monitoring wells and insitu injeccion wells. approval was granted on this action for the northern tanks 2/06- S. Scharf 2-3/06-The five-4,000 fuel tanks were removed and several hundred yards of dirt. Adjacent tanks, eight-550 gallon tanks were discovered and removed. additional soils were stockpiled. The removed tanks were deconned, cut up and removed for Scrap. All the stockpiled soils were tested, manifested and properly disposed offsite. I reviewed the proposal to back fill the holes and install monitoring wells and wells that chemox can be injected in. I approve plan and Red Banana will be submitting the remediation plan. S. Scharf 3/06- Holes have been backfilled and wells have been installed. per converation with Ray Carney.- S. Scharf 6/06- Send letter to Ray Carney that the wells need to be monitored now and in near future for detemination whether to close spill or use chem-ox. 7/06- Mark turo calls as Sunnysdale Farms Env. consultant. 917-750-1843. He will sample wells for Stars on 7/11/06.-S. Scharf 9/06- Energy, Tank and Environmental Services Inc. report on the groundwater sampling is approved and the spill is officially closed by correspondence on 9/7/06. S. Scharf "

Remarks: "5 tanks tested all failed Tanks 4 and 5 are also 4000 gallons and were tested with the same test method as the other 3 tanks."

DEC Memo:

"This spill is associated with a former spill from the site #0404235 which was closed out in Sept 2006 by Steve Scharf (DEC Albany). Region 2 just got this new spill report (0706859) for the site at 400 Stanley Ave Brooklyn. Delta Environmental has done some new drilling on the site (Phase 2 ?) and has found problems with soil and water. Since this site already had a spill that was investigated and closed out, we should probably try to compare the previous sample results to the current results and determine what we'll do with this site. 9/21/2007 Steve Scharf - DEC Albany - Forwarded the following response to a request for a hard copy of the Aug 2006 report. All the reports were filed together here in the Central office by spill number and then shipped back to the region. There were a number of 550 gallon tanks and soils removed and sent offsite. Also two of the three 10,000 fuel oil tanks were removed, the other had filled with concrete a while back and was abandoned onsite. Monitoring well data did not show any offsite impacts from the removed source area(s). What part of the site was Delta drilling on when this was found? DEC needs to: 1) Connect with Delta Environmental & determine what work was done, what work they intend to do, etc. 2) Review the old & new sample results to determine what work needs to be done. 01/23/08-Rec'd Phase II Acquisition Subsurface Assessment Report prepared by Delta Consultants. The report was prepared in response to a request by the client (Stanley Realty & Malta Realty, LLC) to assess and document subsurface environmental conditions on the subject site. On July 2007, four borings were advanced on the subject site to a depth of 10 to 19 ft. Soil samples were taken from both above the soil water interface and below the soil water interface. Samples were analyzed for VOCs/SVOCs according to EPA Methods 8260/8270. Three of the four soil borings were converted to temporary monitoring wells for ground water sampling purpose. Delta collected three GW samples from the three wells. Light non aqueous phase liquid (LNAPL) was not detected in any of the temporary wells. Laboratory analysis of soil and ground water showed minor exceedances of one or two VOC/SVOCs which are residual in nature, and do not warrant further remediation. Considering non residential nature of the property, extent of the residual contaminaton, absence of sensitive receptor, this spill case is closed. (SR)"

Site Code: 58389

Site Description: Location: The site is located at 107-23 Farragut Rd. in the Canarsie section of Brooklyn, NY, and is known as the former Duralab Equipment Corporation Facility. It is identified on the Kings County Tax Map as Section 24, Block 8156, Lot 1. The 6.6 acre site is bordered on the south by Farragut Rd., on the east by East 108th St., on the north by the Long Island Railroad and on the west by East 105th St. Site Features: The site contains a parking lot and a 165,000 square foot building that was built in 1971, with an addition constructed in 1986. Current Zoning: The property is owned by New York City and subleased by Federal Express through Cargex Corp. The building and parking lot are used by Fed Ex as a shipping facility and major distribution center. The surrounding area is composed of residential, industrial and commercial uses. Institutional controls (deed restrictions) were executed in April 2006 that prohibit residential usage on the property. Historical Use: From 1971 to 1997 a cabinet manufacturer operated on the site and used trichloroethene as a degreaser. Site Geology and Hydrogeology: Approximately 10 feet of fill materials overlay glacial outwash deposits of fine to medium sand with little silt. These deposits extend to a depth of approximately 175 ft bgs and reportedly become coarser with depth. Bedrock occurs at approximately 400 feet bgs. The groundwater table was encountered at approximately 10 ft bgs in the glacial outwash aquifer. Groundwater flow direction is towards the east-northeast.

Env Problem: Nature and Extent of Contamination: The site was contaminated with trichloroethylene (TCE) which was used as a degreaser at the former Duralab facility located on the site. TCE was detected in groundwater in the range of 100 to 240,000 ppb when the site underwent an investigation in 1998. A Soil Vapor Extraction and Air Sparging (SVE/AS) system was operated for more than two years and remediated a

FEDERAL EXPRESS CORP (Continued)

1000148573

large portion of the groundwater contamination. The system was shut down after the mass of TCE contamination in groundwater was reduced to asymptotic levels. Post remedial groundwater monitoring was performed and indicated that the residual groundwater contamination is not migrating from the site. After five years of monitoring for natural attenuation, residual contamination remains in the groundwater and is being evaluated.

Health Problem: There are no known human exposure pathways for chemicals in the on-site subsurface soil. Although groundwater is contaminated, public water serves the surrounding community. The NYSDOH and NYSDEC will be evaluating the need to conduct additional investigations to determine the potential for soil vapor intrusion into structures on or near the site.

SWIS: 2401
Region: 2
Town: New York City
Acres: 6.6
Date Record Added: 11/30/2000
Date Record Updated: 08/02/2011
Updated By: JHOCONNE

Site Description: Location: The site is located at 107-23 Farragut Rd. in the Canarsie section of Brooklyn, NY, and is known as the former Duralab Equipment Corporation Facility. It is identified on the Kings County Tax Map as Section 24, Block 8156, Lot 1. The 6.6 acre site is bordered on the south by Farragut Rd., on the east by East 108th St., on the north by the Long Island Railroad and on the west by East 105th St. Site Features: The site contains a parking lot and a 165,000 square foot building that was built in 1971, with an addition constructed in 1986. Current Zoning: The property is owned by New York City and subleased by Federal Express through Cargex Corp. The building and parking lot are used by Fed Ex as a shipping facility and major distribution center. The surrounding area is composed of residential, industrial and commercial uses. Institutional controls (deed restrictions) were executed in April 2006 that prohibit residential usage on the property. Historical Use: From 1971 to 1997 a cabinet manufacturer operated on the site and used trichloroethene as a degreaser. Site Geology and Hydrogeology: Approximately 10 feet of fill materials overlay glacial outwash deposits of fine to medium sand with little silt. These deposits extend to a depth of approximately 175 ft bgs and reportedly become coarser with depth. Bedrock occurs at approximately 400 feet bgs. The groundwater table was encountered at approximately 10 ft bgs in the glacial outwash aquifer. Groundwater flow direction is towards the east-northeast.

Env Problem: Nature and Extent of Contamination: The site was contaminated with trichloroethylene (TCE) which was used as a degreaser at the former Duralab facility located on the site. TCE was detected in groundwater in the range of 100 to 240,000 ppb when the site underwent an investigation in 1998. A Soil Vapor Extraction and Air Sparging (SVE/AS) system was operated for more than two years and remediated a large portion of the groundwater contamination. The system was shut down after the mass of TCE contamination in groundwater was reduced to asymptotic levels. Post remedial groundwater monitoring was performed and indicated that the residual groundwater contamination is not migrating from the site. After five years of monitoring for

natural attenuation, residual contamination remains in the groundwater and is being evaluated.

Health Problem: There are no known human exposure pathways for chemicals in the on-site subsurface soil. Although groundwater is contaminated, public water serves the surrounding community. The NYSDOH and NYSDEC will be evaluating the need to conduct additional investigations to determine the potential for soil vapor intrusion into structures on or near the site.

FINDS:

Registry ID: 110004332892

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Spiller Address: 165 ELMIRA LOOP
Spiller Company: 999
Contact Name: DAVID STONE
DEC Memo: "4/12/17 TJD Teleconference with John Friel (Director, Power Plant) at Spring Creek Towers (STARRETT CITY POWER STATION). He states the facility is a MOSF, currently undergoing an upgrade and fuel conversion from #6 to #2 FO and is in the testing phase after the retrofit on the first of four boilers was completed. Spill was caused by a leaking union on 2 inch pipe suction line from 1 of 4 20K #2 UST's on site. There is also one 10K #2 UST at this site. Upon discovery of the leak, equipment was secured and an estimated 5 gallons of #2 FO was contained and cleaned from the affected concrete surfaces. No drains or soils were reported to have been affected by petroleum discharge. Mr. Friel ten stated he retained the services of ABC Tank who responded and completed the cleanup. As Mr. Freil stated the spill was cleaned prior to hiring a contractor, DeMeo reviewed all information provided a second time and requested a copy of the internal document summarizing the spill response. An email was received at 7:04PM with the requested information as follows: Mr. DeMeo, I apologize for missing your call. I understand from my Director that you wanted a copy of the e-mail I wrote, recapping the event of this afternoon. That e-mail follows below. Should you have any questions, please do not hesitate to call. Sincerely, David Stone Assistant Director, Power Plant Spring Creek Towers 165 Elmira Loop Brooklyn, NY 11239 (718) 942-0433 (917) 804-3178 Cell From: David Stone Sent: Wednesday, April 12, 2017 17:20 To: A.S. Qureshi Cc: John Friel; James Jaskiewicz; Mark B. Muir; William Fallon Subject: Fuel Oil Spill Salim, At about 3:25 this afternoon, an oil leak was discovered in the fuel oil pit of the Power Plant. #2 fuel oil was found on the floor of the pit. There was evidence of leakage, but no

I saw no sign that oil sprayed out under pressure. Staff took immediate measures to secure the source of the leak, which appears at this time to be one or more fittings on the #2 fuel oil lines. The leak looks to be on the new piping that was installed in support of the NOxRACT project. ABC Tank was contacted at approx. 3:45 PM, and they dispatched a vacuum truck to our location. The truck arrived at 4:00 PM, and clean-up began immediately. Oil was vacuumed from the floor the fuel oil pit, and that stage of the clean up was completed by 4:30. ABC then used soap solution to clean the remaining film of oil from the floor, and vacuumed up the used soap solution. By 5:00 PM, all clean up activities were complete. In accordance with NYS DEC regulations, I called this event into the DEC Spill Hotline at about 5PM. Spill #1070403 was assigned. In speaking with the DEC rep on the phone, I stressed that the spill was contained, the source immediately controlled, and clean-up was already completed, all within 2 hours of discovery. Before operating the new fuel oil pumps again, I would request AKS be brought on-site to evaluate and correct the source of the leak. - Dave David Stone Assistant Director, Power Plant Spring Creek Towers 165 Elmira Loop Brooklyn, NY 11239 (718) 942-0433 (917) 804-3178 Cell Based upon the information provided the spill is closed. Last inspection was 5/16/13. Tank #9 is 378,000 gallon #6 oil tank. Informed PBS/MOSF (Zielinski) of reported spill." "Union failed on line and spilled onto concrete. Cleanup is complete." Not reported

Facility Address: 165 ELMIRA LOOP
BROOKLYN, NY 11239
Enforcement Action Type: Notice of Violation
Facility County: KINGS
Program System Acronym: AIR
Enforcement Action Forum Desc: Administrative - Informal
EA Type Code: NOV
Facility SIC Code: 6514
Federal Facility ID: Not reported
Latitude in Decimal Degrees: 40.647476
Longitude in Decimal Degrees: 73.8843135
Permit Type Desc: Not reported
Program System Acronym: NY0000002610500263
Facility NAICS Code: 531110
Tribal Land Code: Not reported

US AIRS (AFS):

Envid: 1000368739
Region Code: 02
County Code: NY047
Programmatic ID: AIR NY0000002610500263
Facility Registry ID: 110001570773
D and B Number: Not reported
Facility Site Name: STARRETT CITY POWER PLANT
Primary SIC Code: 6514
NAICS Code: 531110
Default Air Classification Code: MAJ
Facility Type of Ownership Code: Not reported
Air CMS Category Code: TVM
HPV Status: ADDRESSED HPV

US AIRS (AFS):

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company

DEC Memo:	"6/20/05- Reassigned to Benjamin 1/20/10. J.Krimgold reviewed the case and found that the initially report address Williams Street does not exists in NYC. Most likely the address is Williams Avenue. This address corresponds with PS 260 and this facility has a UST that stors #4 oil. TTF letter was sent to: Raymond Correa NYC Board of Education 28-11 Queens Plaza North, L.I.C., NY 11101 08/13/12 - LZ As Randy Austin requested, the spill has been reassigned to Tim DeMeo 10/09/14-Hiralkumar Patel. reviewed available documents for DEC DeMeo. alternate address: 857-897 Williams Ave, 342-352 Stanley Ave no other spills found. PBS #: 2-354309. as per PBS record, the site has two (2) 7,500 gal #4 oil USTs, in-service, installed in Aug. 1953. NYC Department of Education Field Operations - Fuel Division 44-36 Vernon Blvd. Long Island City, NY 11101 Attn.: Munendra Sharma Ph. (718) 349-5752 as per tank testing record, on PBC edocs, both #4 oil tanks failed a tightness test on 04/13/1995 (subject spill) and both tanks passed the test on 06/16/1995. 11/18/14 TJD File review - as per above, both tanks failed tightness tests on 4/13/95 and passed subsequent tightness tests on 6/16/95. Test reports uploaded to DECDOCS from PBS EDOCS. No further information available regarding cause of failure or repairs performed. Spill administratively closed." Not reported

HESS/MERIT STATION 32STA (Continued)

S103574868

Meets Standard: False
UST Involvement: True
Remediation Phase: 5
Date Entered In Computer: 1993-04-01
Spill Record Last Update: 2017-08-01
Spiller Name: Not reported
Spiller Company: HESS/MERIT
Spiller Address: Not reported
Spiller County: 001
Spiller Contact: Not reported
Spiller Phone: Not reported
Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 481406
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SUN 10/08/93: REPLACED ELBOW RETESTED AND PASSED 4/19/93 NO CONTAMINATION FOUND. 04/16/04-File Update by Sun: - TRI-nnual Report-September 2003 through 2004, prepared by William Schaefer of GSC-Twelve (12) wells were gauged and sampled on 12/30/04, including (MW-1 through MW-4, MW-7. MW-9 through MW-14, MW-18, and SVE-1). Groundwater depths ranged from 10.35 feet to 12.82 feet. Groundwater flow direction was towards southwest. MW-10 had the maximum Benzene concentration of 730 ug/l. MW-13 had the maximum MTBE concentration of 77 ug/l. An SVE/AS system is now operating on site. 08/22/05-File Update by Sun: Also refer to Spill #98-10899 at the same location. (Sun) 10/28/05: Project reassigned from Sun to Andersen. Reviewed the triannual report dated 6/2/05. The site is making good progress with the SVE system currently in use. 1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and GSC/Kleinfelder:SVE will be turned off and a remedial action plan developed for peak in MW-8 (may use ORC), there can't be additional release because this station is not an active station). 3/9/06: Reviewed monitoring report dated 2/27/06. Max BTEX 17,770 (MW8), max MTBE 66 (MW2). Depth to water 10 ft. Eleven wells sampled on 12/14/05. SVE will be shut off and bioremediation used in MW8. Request to remove sampling of MW3 was approved. 6/23/06: Received triannual monitoring report dated 6/14/06. SVE/AS shutoff. Max BTEX 17,730ppb (MW8) and max MTBE 40ppb (MW2). RAP required for MW's:1,4,7,8,10,11,14. Discuss during meeting scheduled for 6/28/06. 6/30/06: Meeting on 6/28/06 with Hess, Quantum, NYSDEC, EnviroTrac and GSC. An RAP utilizing regenox will be submitted. An upgradient source in MW-11 is suspected, from Exxon or Mobil. 7/11/06: RAP workplan for bioremediation using RegenOx conditionally approved. Workplan proposed RegenOx application only to MW-8. Groundwater sampling showed rebounding in MW-10 and MW-11 following shut down of the SVE/AS system in February 2006. Conditional RAP approval required RegenOx application to MW-10 and MW-11. 9/6/06: Received cc of a letter requesting permission from current property owner to inject regenox. 10/16/06: Received email from Gail Helfrick: Despite several attempts, we have not been able to contact the property owner in order to revise the access agreement to allow for this work scope. Currently, we are trying to obtain contact information through the current tenant. 10/20/06: Sent letter to Mr. Karron, current owner, to request access. 11/1/06: Reviewed triannual report dated October 25, 2006. Groundwater sampled on August 10, 2006. Rebounding in MW 1, 4, 10, 11. High residual concentrations in MW 8. Regenox use planned in MW 8, 10, 11, but access is problematic. 11/10/06: Letter to Mr. Karron returned to sender. 11/16/06: Emailed Gail Helfrick to confirm

S103574868

Mr. Karron's address. 12/11/06: Sent email to Hess to followup on access for implementation. 12/18/06: Received email from Aaron Lapine of Delta: We are not sure of the property owner's address. When Kleinfelder sent (via certified mail) the access letter to the address they had, the letter could not be delivered. Kleinfelder was not sure if it was because the property owner moved or just that no one was home to sign the certified letter receipt. Kleinfelder then dropped off a copy of the access letter and recently the NYSDEC letter to the tenant and requested that the tenant forward the letters to the property owner. Until site access is confirmed with the property owner, the injection event cannot occur. Delta will work with Kleinfelder to confirm access by obtaining the owner's correct address and confirming with the tenant that the information was delivered to the owner. 1/17/07: Meeting on 1/16/07 with Hess, Delta, and NYSDEC. Mr. Karron's address is still unknown. 2/22/07: Received email from Aaron Lapine: Access has not yet been granted. We have not been able to locate the property owner. We performed a review of NYC tax records and the owner is listed as 810-820 Pennsylvania Avenue Corporation and the mailing address given is the site address. I have called the current tenant (Buddy's Car Wash) numerous times and have only been able to get a hold of the manager once. The manager would not give me the owner's mailing address only his name (Boris Thomas), but stated if I called back the same day after 2pm Boris would be at the car wash. When I called back, I was told they did not know anyone by the name of Boris Thomas. I have been unable to contact the manager since then. Although we were trying to locate the owner's current address, we re-sent the access agreement via FedEx to the car wash property. 3/5/07: Resent access required letter to Mr. Karron at: 70 Curtis Avenue Manasquan, NJ 08736 and 810-820 Pennsylvania Avenue Corp. c/o Soloman and Bernstein 1178 Broadway, 5th Floor New York, NY 10001-5404 3/6/07: Reviewed the Site Status Report. Wells sampled on 12/1/06. Fluctuating concentrations. Max BTEX 13,520 ppb (MW11), max MTBE 40 ppb (MW2). RAP not implemented because of access issues. 3/14/07: Letter to 810-820 Pennsylvania Avenue returned to sender. 3/20/07: Spoke to Mr. Karron (site owner) (914-960-9213, akarron@optonline.net). He will provide access for RAP implementation. 5/24/07: Received email from Aaron Lapine: We are currently working with property owner for access. We have discussed the possibility of mobile AS/SVE treatment event(s) as an alternative to RegenOx, since it is less intrusive than the injections. 7/6/07: Reviewed update report. Groundwater sampled on 4/27/07. Fluctuating groundwater concentrations. Max BTEX 614 (MW8). Mobile short term SVE/AS proposed and approved. The mobile AS/SVE event would utilize air sparge points SP-6, SP-7, SP-9, and SP-9, and SVE wells MW-4, MW-8, MW-10, and MW-11. One 8 hour event will be performed, and used as a pilot test for this technology. 8/3/07: Approved use of method TO3 to analyse air effluent samples. 10/16/07: Spoke to Tim Fisher. Mobile SVE/AS will be conducted on 10/17/07. Effluent air sample will be collected. Report will be submitted by the end of the month. 12/3/2007 - Feng - Reviewed update report, 10/26/2007. The monitoring wells were gauged and sampled on 8/15/2007. DTW 9.95' to 12.19' bg. Flows to south. No LNAPL. Max BTEX 3,340 ppb (MW-4). Max MTBE 20 ppb (MW-2). Mobile SVE/AS event on 10/17/2007. Next round sampling will be in 12/2007. (RJF) 2/13/08 - Carlson - Reviewed October 2007 - January 2008 Site Status Update Report. A mobile AS/SVE event was conducted on October 17, 2007. The event indicated extractable hydrocarbons are still present in the

S103574868

subsurface. Hess plans on restarting the existing SVE/AS system. Groundwater sampled on December 21, 2007. Max BTEX 5,050 ppb (MW11), max MTBE 12 ppb (MW2). 5/7/08 - Carlson: May 7th meeting with Hess and Envirotrac. They ordered parts to repair and restart system. Upgradient delineation required. 7/7/08 - Carlson: Reviewed June 2008 Update Report. Wells sampled on 4/9/08. Fluctuating concentration in some wells. Maximum BTEX concentration 12,291 ppb (MW4). Maximum MTBE concentration 8 ppb (MW2). Sent to email to Erin Quell: when will system be restarted, IP required for upgradient well as per may 7th meeting. 10/22/08 - Carlson: Meeting with Hess, NYSDEC, and Envirotrac. Delineation workplan due 2/09. When will system be restarted? Do not connect all wells to system when it is restarted. 11/17/08 - Carlson: Reviewed update report dated October 2008. Wells sampled on 8/21/08. MW4 was not sampled - no reason provided. Maximum BTEX concentration 4,729 ppb (MW11). System has not been restarted yet. 11/19/08 - Carlson: Emailed Ed Russo - When will system be restarted? 12/11/08 - Carlson: Received email from Ed Russo: the system was re-activated on 12/3/08. The SVE system was activated first and PID readings were recorded as a range from ND to 2.5 ppm. The air sparge system was then activated and PID readings increased to 183 ppm. We are evaluating ways to optimize the performance of the system and will do so in order to maximize recovery from the areas of the most impact. We are scheduled for another round of O&M next week and then system O&M will continue on a monthly basis thereafter. Results of system O&M events will be submitted within all future site update reports. 2/20/09 - Carlson: Reviewed January 2009 Update Report. System restarted on 12/3/08. Wells sampled on 11/26/08. Maximum BTEX concentration 3,545 ppb (MW4). 3/18/09 - Carlson: Meeting with Hess and Envirotrac. IP deadline extended to May 2009. Hess notes that there are many potential upgradient sources in the area (Wendys). 5/6/09 - Carlson: Reviewed April 2009 update report. AS/SVE system was restarted. Wells sampled on 2/27/09. Maximum BTEX concentration 5,414 ppb (MW11). Dissolved concentrations are still fluctuating. 8/10/09 - Carlson: Reviewed update report. SVE/AS restarted, low PID, is it effective? Report states hess will propose an investigation plan. 8/19/09 - Carlson: Meeting with Hess. Work plan will be submitted. 10/8/09 - Carlson: Reviewed IP. Hess states that upgradient Mobil spill is off-site source, Mobil should install additional downgradient wells 11/10/09 - Carlson: Emailed DEC Haggerty requesting Mobil install an additional well downgradient of MW15. 11/17/09 - Carlson: Reviewed update report, SVE/AS in operation. only trace PID recovered from SVE/AS system. 1/27/2010 - Carlson: Meeting with Hess. Off-site delineation issue has not been resolved. Review case file and null IP internally. 2/5/2010 - Carlson: Reviewed 4th Quarter 2009 Update Report. SVE/AS in operation. 5/20/2010 - Carlson: Meeting with Hess. NYSDEC to review file and discuss delineation with upgradient Exxonmobile site. 5/27/2010 - Carlson: Reviewed update report. SVE to be shut down due to low recovery. 8/13/2010 - Carlson: Reviewed July 2010 Update Report. SVE/AS shutdown. Hess to provide soil data to determine if an off-site plume is affecting property. 11/10/11 - Carlson: Reviewed October 2011 Update Report. SVE/AS shutdown. General increase in dissolved concentrations in several upgradient wells. Need to review case file for potential upgradient sources. 2/6/2012 - Carlson: Spoke to Joseph Rennie. LNAPL in two wells. Weekly bailing to occur. NEED TO REVIEW CASE FILE FOR SOIL POTENTIAL UPGRADIENT SOURCES. Significant soil impact was left after tank removal in 1998.

2/22/2012 - Carlson: Left message for DEC Michael Haggerty 518-402-9768 (Central Office PM for upgradient Mobil Spill 9406497). Recent reports are not in edocs. Spoke to Michael Haggerty - recent Mobil reports were uploaded to edocs. Left message for Joe Rennie - need to ask him: 1) was recent product ID'd, 2) which wells recently had product, and 3) were soil borings completed since SVE/AS was shut down to see if system successfully remediated soil impact? 2/23/2012 - Carlson: Spoke to Joe Rennie. Product was not sent to a lab for fingerprinting. LNAPL is being recovered. Recommended installing soil borings to see how much soil impact remains after SVE/AS treatment. 3/14/2012 - case review and discussed with DEC Raphael Ketani and Hassan Hussein. Need proof on whether there are upgradient sources impacting the Hess site. A letter sent to Hess requiring additional delineation in upgradient. Work Plan by 4/13/2012. Wendy's property resident: Penbrow Inc., 1916 Linden Blvd, Brooklyn, NY 11207 Wendy's property owner: Briad Wenco LLC, 30 Vreeland Road, Apt #A, Florham Park, NJ 07932-1904 7/17/2012 - 1Q2012, 4/30/2012, by EnviroTrac. LNAPL in some wells. MW-7, 0.21' on 2/2/2012, 0.21' on 2/7/2012 and 0.17' on 2/14/2012. MW-10, 0.84' on 2/7/2012, 0.72' on 2/14/2012. MW-11, 0.52' on 2/2/2012, 0.39' on 2/7/2012 and 0.28' on 2/14/2012. Groundwater sampled on 2/2/2012. MW-4, 2,239.5 ug/L BTEX, MTBE ND. MW-10, 7,723.9 ug/L BTEX, MTBE ND. MW-1, 2,018 ug/L BTEX, MTBE ND. MW-9, 4,384.7 ug/L BTEX, MTBE ND. MW-18, 18,330 ug/L BTEX, MTBE ND. MW-2, 1,575.9 ug/L BTEX, MTBE ND. Hand bailed LNAPL from the 3 wells MW-7, MW-10 and MW-11 on 2/27/2012 and 2/14/2012. Placed absorbent socks in monitoring wells MW-7 and MW-11 to enhance product recovery. email to Hess/EnviroTrac We reviewed the 1Q2012 report. Product was present in some of the monitoring wells, MW-7, MW-10 and MW-11. I see that the product was hand bailed twice during this quarter. Based on the thickness of the product, you need to have a more aggressive product removal method. I don't find any history of the occurrence of product in the report. Is this the first time product show up in these wells? As I can see from the hydrographs, water table also drops 1-2 feet during this quarter and the product show up. Have the LNAPL sampled? If not, please do so. And according to our notes, we required some work plan for upgradient delineation. How is that going? 10/19/2012 - 2Q2012, 7/31/2012, by EnviroTrac. The groundwater was sampled on 5/8/2012. Gauged on 3/27/2012, LNAPL in MW-10 and MW-11, removed and replaced absorbent socks from MW-7, MW-10 and MW-11. Gauged on 4/5/2012, LNAPL in MW-7, MW-10 and MW-11, removed and replaced an absorbent sock in monitoring well MW-11. Gauged on and 5/8/2012, LNAPL in MW-8, MW-10 and MW-11. DTW 12.51 to 14.94. Flows to southeast. MW-8, 0.35' LNAPL. MW-10, 0.36' LNAPL. MW-11, 0.40' LNAPL. MW-4, 6,469 BTEX, MTBE ND. MW-1, 3,025 BTEX, 7.7 MTBE. MW-9, 543.5 BTEX, 0.69J MTBE. MW-7, 4,619 BTEX, 6.6J MTBE. MW-2, 1,166.3 BTEX, 1.8J MTBE. AS/SVE shutdown due to no recovery. Continue monthly gauging and product bailing and quarterly sampling. The next sampling will be in August 2012. 10/24/2012 - STIP along with a comment letter on case reievew was sent to Hess/EnviroTrac. DEC required: 1) fingerprint the product. 2) more aggressive product removal. 3) provide all previous soil borings/monitoring wells installation information. 4) upgradient delineation. 5) explain the discrepancies in between the PBS record and the reported removed tanks. Need signed STIP by 11/23/2012. 1/18/2013 - 3Q2012, 10/31/2012, by EnviroTrac. 6/6/2012 and 7/12/2012, LNAPL in MW-10, hand bailed. Removed and replaced absorbent socks from MW-7, MW-8, MW-10 and MW-11. Groundwater was sampled on 8/2/2012. No LNAPL in the

August sampling event. DTW 11.67 to 13.92 bg. Flows to southeast. MW-4, 4,695.4 BTEX, MTBE ND. MW-11, 18,053.8 BTEX, MTBE ND. MW-1, 8,440 BTEX, MTBE ND. MW-10, 24,207.7 BTEX, MTBE ND. MW-9, 2,484.7 BTEX, MTBE ND. MW-7, 6,467.5 BTEX, MTBE ND. MW-2, 482.3 BTEX, MTBE ND. 9/23/2013 - 4Q2012, 1/31/2013, by EnviroTrac. Groundwater was sampled on 11/15/2012. DTW 10.74 to 13.11 feet. Flows to south-southeast. NO LNAPL. Removed and replaced absorbent socks from MW-7, MW-8, MW-10 and MW-11 on 9/5/2012. MW-11, 4,140.5 BTEX. MW-4, 1,051.1 BTEX. MW-1, 12,527 BTEX. MW-10, 31,762 BTEX. MW-8, 7,838.2 BTEX. MW-9, 157.3 BTEX, 2.2 MTBE. MW-7, 315.2 BTEX, 4.8 MTBE. MW-2, 299.88J BTEX, 5.8 MTBE. Hess reiterates its request to have Exxon Mobil complete a full delineation of its plume to include the Wendy's property located north of the former Merit Station. 1Q2013, 4/30/2013, by EnviroTrac. Groundwater was sampled on 2/14/2013. DTW 10.13 to 11.33 feet. Flows to south-southeast. NO LNAPL. MW-11, 678.8 BTEX. MW-1, 3,761 BTEX, 7 MTBE. MW-10, 11,024 BTEX. MW-8, 64.4 BTEX. MW-9, 62.4 BTEX, 2.2 MTBE. MW-2, 85.68J BTEX, 7 MTBE. Hess reiterates its request to have Exxon Mobil complete a full delineation of its plume to include the Wendy's property located north of the former Merit Station. 2Q2013, 7/31/2013. Work performed on 5/23/2013. DTW 10.71 to 13.04 feet. Flows to south-southeast. MW-11, 1735.47J BTEX. Mw-4, 3,566 BTEX. MW-10, 4,990.9 BTEX. MW-1, 2,961 BTEX. MW-8, 1,759 BTEX. Mw-9, 55.7 BTEX. MW-2, 272.7 BTEX. 10/30/2013 - DEC K. Hale, J. Vought, S. Mahat and J. Feng conducted site visit. Met with the carwash owners Richie Krause and Mannuel Viegas. The carwash has been there for 30 years and the building has been there for 15 years. According to the owners, there is a pumping well for the carwash operation and the well water has been used for the bathroom. The owners do not know the location of the pumping well and the water from the well has never been sampled. They have agreement with Hess that Hess will take care of the spill. 11/14/2013 - Reviewed the monitoring data trend with R. Austin and J. Vought. DEC will send letter to Wendy's for information. 11/22/2013 - Letter was sent to Wendy's property owner: Pennbrow, Inc, at 181-06 Tudor Road, Jamaica, NY 11432. DEC requires: 1) Submission of a detailed site history including: previous site usage; current and historical petroleum storage (including tank removals and abandonments; location, sizes of tanks removed/abandoned and types of product stored); tightness test results, the number of tanks; associated spill numbers if any; and the Petroleum Bulk Storage (PBS) Registration and Record. 2) Submission of any records or information regarding subsurface investigations that have been done at the property (e.g. a subsurface investigation that would have been done for the purpose of a property transaction). Response by 30 days. 11/5/2014 - 1Q2014, 4/30/2014. Monitoring on 11/13/2013. DTW 11.02 to 13.31 feet. Flows to south-southeast. MW-1, 2,745.2 BTEX. MW-10, 5,841.5 BTEX. MW-2, 64.7 BTEX. 2Q2014, 7/31/2014. Groundwater monitoring on 5/31/2014. DTW 10.12 to 12.48 feet. Flows to south-southeast. AS/SVE shutdown due to non-detected recovery. MW-11, 913 BTEX. MW-4, 29.5 BTEX. Mw-10, 608.8 BTEX. MW-1, 1,601.2 BTEX. MW-8, 1,594 BTEX. Hess reiterates its request to have ExxonMobil complete a full delineation of its plume to include the Wendy's property located north of the former Merit Station. 11/17/2014 - 3Q2014, 11/7/2014. AS/SVE shutdown due to non-detect recovery. 8/31/2014, sampled groundwater. DTW 0.67 to 13.05 feet. Flows to south-southeast. MW-11, 379.12J BTEX. MW-4, 4,218.3 BTEX. MW-10, 5,690.6J BTEX. MW-1, 2,493.5 BTEX. MW-8, 4,786 BTEX. 3/30/2016 Feng This spill is transferred from J. Feng to V.

Brevdo as per J. Vought 3/30/16 - Raphael Ketani. This spill case has been assigned to me effective today. According to ACRIS, the owner of the property is 810-820 Pennsylvania Avenue Corp., c/o Solomon & Bernstein, 351 Broadway, Third Floor, NY, NY, 10013. The block and lot are 4346 and 12. PBS case record #2-297372 lists Perrier Auto Wash, Inc. as the owner. Their address is 810 Pennsylvania Avenue. One 275 gallon waste oil tank is in service. One 4000 gallon UST was closed in place. Eight USTs of various sizes were closed and removed on 2/1/98. According to a 10/24/12 case note, a Stipulation was sent to HESS with a return date of 11/23/12. Also, the DEC required that the product be fingerprinted, more aggressive removal take place, provide all prior soil boring and well installation information, upgradient delineation, and explain the discrepancies between the PBS record and the reported tank removals. The Stipulation was never returned. The case notes indicate the following total VOCs concentrations for the groundwater samples: date very high results high results 8/2/12 MW-10, 11 MW-1, 4, 7, 9 11/15/12 MW-1, 10 MW-4, 8, 11 2/14/13 MW-10 MW-1 5/23/13 MW-1, 4, 8, 10, 11 11/13/13 MW-1 and 10 5/31/14 MW-1 and 8 8/31/14 MW-1, 4, 8 10 Speedway/Hess contact: Matthew Butler, (732) 738-2924, MButler1@Speedway.com Consultants: Edward Russo (EnviroTrac), (631) 924-3001, EDR@EnviroTrac.com Joseph Rennie (EnviroTrac), (631) 924-3001, JoeR@EnviroTrac.com Mr. Butler's mailing address is: Speedway, LLC, 500 Speedway Drive, Enon, OH 45323. Other spill cases for the site include: 8801521: name = 810 Penn. Ave., tank overfill, 150 gals. of gas into the sewer, sewer was flushed and there was no sign of gasoline, case closed 9/30/88 8801651: name = Merit, tank test failure (which tank not indicated), closed 11/2/88 9010161: name = 810 Penn. Ave., 2000 gal. and 4000 gal. tanks failed their integrity tests, will excavate, isolate and retest, closed 7/22/94 and referred to spill 9214515 9301033: name = 810 Penn. Ave., tank overfill, contained with Speedi-Dri, closed 5/24/93 9810899: name = Merit Station, digging for a foundation and found contaminated soil, closed 8/22/05 and referred to 9214515 According to a 10/30/13 case note, a site visit was made. As part of the visit, staff asked about the water supply well. Personnel at the site stated that the water was used for the bathroom. However, the location of this well was unknown. An 11/22/13 case note indicates that a letter was sent to the owners of the Wendy's restaurant. In the letter, the owners were asked to provide all historical records and records of any previous investigations. A response date was set by DEC as 12/22/13. - There is no documentation in the case file regarding Wendy's. The 11/5/14 case note regarded the second quarter 2014 report. In the report, it was stated that the AS/SVE system had been turned off because the results were non-detect. 4/11/16 - Raphael Ketani. As there has been no communication nor report submissions by the representatives of Speedway or EnviroTrac since the submission of the third quarter 2014 quarterly report, I sent an email to Mr. Butler, Mr. Russo and Mr. Rennie requesting the latest groundwater report. I also wrote that they were in violation of the Stipulation Agreement as it was never returned. Lastly, I included that they must respond to the DEC requirements as described in the 10/24/12 case note. 4/25/16 - Raphael Ketani. I received the below email from Mr. Russo: This correspondence is in response to your email below regarding the former Hess/Merit station 32STA. Please note that Speedway/EnviroTrac was conducting quarterly sampling, monitoring, and reporting up until October 2014. In October 2014, Speedway LLC (Speedway) purchased the retail assets of Hess

Corporation and is now the responsible party with respect to New York State Department of Environmental Conservation (NYSDEC) Spill # 92-14515. As a result of this sale, we now longer have access to the property. On December 15, 2014, EnviroTrac notified the NYSDEC case manager via email of this situation that site access is pending a new access agreement. An access agreement is currently being pursued between the current property owner and Speedway, and as a result, we cannot conduct any work on the subject property until access is finalized. Quarterly sampling, monitoring, and reporting will resume immediately upon obtaining access. Please be advised that we have consistently been in communication with the NYSDEC regarding updates on the status of NYSDEC s up-gradient investigations, as follows: " 2/6/2012 EnviroTrac/Hess submitted a FOIL request to review NYSDEC case files regarding the up-gradient Mobil spill case and there have been numerous follow up correspondences between NYSDEC and EnviroTrac/Hess on FOIL status. " 4/3/2012 - Speedway emailed NYSDEC case manager to respectfully request that the NYSDEC allow Hess to complete a detailed file review of the NYSDEC's documents prior to moving forward with or committing to any additional actions. " 10/24/2012 NYSDEC letter to Hess. " 11/21/2012 EnviroTrac/Hess response to 10/24/2012 NYSDEC letter. " 1/10/2013 NYSDEC provided reports to EnviroTrac/Hess regarding the Mobil spill case. " 11/22/2013 NYSDEC sent a letter to Pennbrow Inc/Wendy s asking for a detailed site history and a summary of investigations performed on their property. " 8/15/2014 EnviroTrac requested via email with NYSDEC case manager a status of Pennbrow Inc./Wendy's subsurface investigation and followed up with the NYSDEC on 1/29/15, 11/16/15, and 1/4/16. " 12/15/2014 EnviroTrac notified NYSDEC case manager via email that site access is pending new access agreement. " 4/2/2015 - EnviroTrac received email correspondence from NYSDEC noting that they have received a Phase 1 from the adjacent up-gradient Wendy's property (former service station), and that NYSDEC is working on a determination on who will conduct an investigation. " 7/7/2015 - Ed Russo (ETNY) spoke to June Feng (NYSDEC case manager). June stated that she will look into Wendy's progress related to a Phase 2 ESA that the NYSDEC required of Wendy's and she will get back to us re: the status. To our knowledge to date, there has been no up gradient delineation by Mobil or any correspondence from Pennbrow (the Wendy s property owner). Please be advised that Speedway reiterates its request to have Mobil complete a full delineation of its plume to include the Wendy s property located north of the Former Merit Station. Copies of any correspondence can be provided, upon request. Product Removal/Fingerprint Pending site access, and if product is present, Speedway and EnviroTrac will aggressively remove product during future monitoring events. PBS/Tank Removal Discrepancies Speedway/EnviroTrac to research PBS records and tank removal reports and will rectify discrepancies.

***** I checked the UIS database for the former service station address at 1916 Linden Boulevard, Brooklyn. However, I did not find a spill case listing, nor a PBS case listing. The NYC Department of Buildings database also lists various alternative addresses for this location. So I checked addresses 1918 to 1938 Linden Boulevard, 786 to 196 Pennsylvania Avenue and 787 to 797 Sheffield Avenue. However, no Spills cases nor any PBS cases were found in the UIS system. The ESA Phase I for the Wendy's property was archived in the DECdocs system. The Phase I was written by Executive

Environmental Group, Inc. at 1373 Coney Island Avenue in Brooklyn, (718) 677-1007. The date of the Phase I is 11/26/03. There is a cover letter attached dated 12/4/13 from Natalie Gurin of Eiseman Levine Lehrhaupt and Kakoyiannis at 805 Third Avenue, NY, 10022, (212) 752-1000. According to the Phase I the present Wendy's property contained dwellings up until 1967. From 1967 to 1981 the property was occupied by a filling station. The Phase II still hasn't been received by the Department. I will write a letter to Ms. Gurin requesting that some type of subsurface investigation take place at the Wendy's property. 4/26/16 - Raphael Ketani. I sent a letter to Ms. Gurin (representing Penbrow, Inc.) requesting the submission of a Phase II RIWP by June 3, 2016. The latest address in ACRIS for Penbrow, Inc. is 331 Madison Avenue, NY, 10017 - according to a 3/10/11 UCC-1 document. However, there is a deed from the nineteen nineties which shows the address Penbrow, Inc., 181-06 Tudor Road, Jamaica, NY 11432. The property is block and lot 4346 and 6. A UCC-3 Continuation document in ACRIS shows the party Briad Wenco, LLC, c/o The Briad Group, 78 Okner Parkway, Livingston, NJ, 07039. 5/24/16 - Raphael Ketani. Wayne Lehrhaupt (212) 752-1000, the attorney for Norman Bobrow of Penbrow, Inc., called inquiring about the DEC's 4/26/16 letter requesting the Phase II RIWP. He explained that Ms. Gurin had received the letter shortly after 4/26/16, but he hadn't received it until yesterday. He asked how the DEC came to the conclusion that an investigation was necessary. I told him that, based upon my review of the case file and the case notes, information was found that indicated the existence of a source of contamination. I added that the information also suggested the existence of an upgradient source. Lastly, I stated that Ms. Feng (the previous DEC case manager) had requested a Phase II Report. However, the Phase II was never done. Mr. Lehrhaupt said that he understood what I was saying. He asked whether a magnetic survey would be required. I told him that if one hadn't been done before, then one should be done now. Mr. Lehrhaupt mentioned that he was used to working with a private individual out on Long Island who does environmental work. I told Mr. Lehrhaupt that the DEC would require a report with a site map to scale with surveyed locations, surveyed water table elevation data, a groundwater flow map, soil sample descriptions, the full suite of VOC and SVOC analyses and more. I asked whether his environmental person was knowledgeable about what would be included in a Phase II. He said that he wasn't sure. He asked whether the DEC could recommend a company which is familiar with the area. I told him that the DEC doesn't make recommendations, but there are dozens of environmental companies in the metropolitan area from which to choose. Lastly, Mr. Lehrhaupt asked for an extension of the Phase II RIWP submission date. I asked him whether July 11th would be alright. He said he will call me back today with the answer. With that, the conversation ended. 5/25/16 - Raphael Ketani. Today I received the green return card for the 4/26/16 letter I had sent Ms. Gurin. 6/16/16 - Raphael Ketani. Today Dave Yudelson of Sieve Paget and Riesel (law firm; (212) 421-2150/ cell (917) 295-6449) called regarding the DEC's 4/26/16 letter requesting the Phase II investigation for the Wendy's facility. He said that he had been hired by Wendy's (1916 Linden Blvd.) and needed the documents from the case file for the HESS station site. He said that he was aware there was an indication that the groundwater contamination was coming from upgradient. I retrieved the documents from the DECdocs system that I thought would be useful to Mr. Yudelson for his review and put them on my Desktop. However, I

S103574868

sent him an email that he needed to make a formal FOIL request since this was the DEC policy. Later, I looked through one report for the site and came across two spill case numbers. The first was for a MOBIL station and was #9406497. The second was for an EXXON station and was #9409096. I also found an air photo in the latest report for the site. It showed that the MOBIL station was due north of the site on the north side of Linden Blvd. (1935 Linden Blvd.). The EXXON station was to the northeast and on the other side of Linden Blvd. Its address is 765 Pennsylvania Avenue. The EXXON spill case was closed on 7/27/11. However, the MOBIL station spill case was still active. The latest case notes for the MOBIL case indicated that the air sparge system had been restarted during 2014. A 2011 report for the MOBIL site showed that there still were very high total BTEX concentrations in the groundwater both onsite and off site to the south. 6/28/16 - Raphael Ketani. Mr. Yudelson (212) 421-2150/ cell (917) 295-6449) had made a FOIL request for the reports associated with the site. The request number was W008818-062116. The date of the request was 6/21/16. 7/8/16 - Raphael Ketani. Mr. Yudelson (law firm; (212) 421-2150/ cell (917) 295-6449) sent me an email requesting an extension of the deadline for responding to the Department's requirement that an investigation take place at the Wendy's location. I set the new deadline as August 1, 2016. 8/1/16 - Raphael Ketani. I received the August 2016 P.W. Grosser (PWGC) SIWP for the Wendys property at 1916 Linden Boulevard, Brooklyn. The plan was dated 8/1/16. I began my review. The work plan really takes the form of a historical review of the spills at the MOBIL station (#9406497; 1935 Linden Blvd.), the former EXXON (now Gulf) station (#9409096; 1939 Linden Blvd.) and at the subject former HESS station. In the beginning and the latter parts of the work plan, PWGC stated that much more documentation is needed from the EPA, the State and the City regarding all 3 sites, along with specific documents from the spill files for each site, so that they can create a Preliminary Conceptual Site Model (PCSM) before they undertake an investigation of the Wendy's Restaurant property. The reason for this, they state, is to that a better focused plan of action can be created and so that data gaps can be identified. Even after all of this information is obtained, they intend to further refine their PCSM in order to improve their focus and plan of action. Only after all of this has been done will they initiate an investigation. They did not indicate when this investigation would eventually take place. The notes below form a synopsis of this work plan. PWGC states that the owners of the former HESS station (hereafter referred to as the HESS station) stated that the contamination below their site was coming from the upgradient MOBIL station site and the upgradient former EXXON station site (hereafter referred to as the EXXON station). No investigation will take place by Pennbrow until all of the available documentation regarding the sites can be evaluated. They believe that a review of this documentation will support the conclusion that the sources of the contamination are the HESS station, the MOBIL station and the EXXON station. The depth to groundwater is from 10 to 12 feet below grade. The regional groundwater flow varies from the southeast to the southwest. PWGC performed site visits at all 3 sites on 7/19/16. The MOBIL station had the components of a remedial system, but they were uncertain whether it was operating. The EXXON station had a remedial system, but it appeared to be abandoned. The HESS station remedial system was not operating. The Wendy's property was used as a gas station from 1967 to 1981. After this period, a new building was

Site

Database(s)

EDR ID Number
EPA ID Number

HESS/MERIT STATION 32STA (Continued)

S103574868

constructed as the Wendy's Restaurant. A gas station was present at the HESS location from 1949 to 1988. In 1988, HESS changed from a gas station to an auto repair service and a car wash. A filling station existed at the EXXON location from 1928 to 1950. An EnviroTrac September 2009 report indicated that the HESS pumps, USTs and piping were removed during January and February of 1998. Soil was removed to 5 feet beyond the limits of the tank field and from 2 to 6 feet below the pipes and fills. Residual soil contamination was identified from 5 to 12 feet below grade. LNAPL was present in the HESS MW-7, 8, 10 and 11 wells to July 2012 (the case notes from the previous DEC case manager, June Feng, indicate that there was no NAPL in these wells from 2014 onward). A quarterly report for HESS stated that there was very high groundwater MTBE contamination up to 120,000 ppb. Figure 3 indicated the thickness of the LNAPL at the monitoring wells on the HESS site during 2012 as well as the extent of the residual LNAPL in the soil. The information was presented in the work plan for wells MW-1 to MW-3, 7, 8 and 18 for the period June 1995 to August 2000. The data concerned only the MTBE concentrations. The results were up to 120,000 ppb. Figure 4 presented the dimensions of the core of an MTBE plume that appears to have migrated from the MOBIL site. Historical BTEX concentrations had been greatest at MW-8 (34,200 ppb) during March 2003, at MW-10 ((31,762 ppb) during November 2011 and at MW-11 (34,420 ppb) during April 2002. The available information in the case record included groundwater sampling results through August 2014. EnviroTrac in their September 2009 report indicated their concerns that the contamination was from the MOBIL site. In this report, it was requested that the DEC ask MOBIL to further delineate the contamination. The report also indicated that the DEC requested HESS to investigate the potential upgradient sources. The Stipulation Agreement (Stip) sent to HESS required HESS to have the LNAPL fingerprinted that was found in the wells during 2012, implement a more aggressive LNAPL removal program, provide all previous soil boring/monitoring well installation data and related information, conduct an upgradient delineation and explain the discrepancies between the PBS record and the reported tank removal performed during 1998. According to PWGC, it was not clear whether the Stip was executed or if the requested information had been provided. Correspondences in the DEC case file indicated that HESS requested multiple times that EXXON and MOBIL fully delineate the MTBE plume and include the Wendy's property. It was unknown whether this was done. During January 2013, the DEC provided reports to HESS and EnviroTrac regarding the MOBIL site spill case. In addition, it was discovered that the car wash utilizes a pumping well to supply water. However, the location is not known. MOBIL site spill #9406497 is still active. The ARCADIS November 2011 report indicated that 18 wells had been sampled in connection with the October 1997 Stip. The depth to groundwater was found to be from 11 to 12.5 feet below grade and to be flowing to the southeast. Two non-potable wells were located within 300 meters to the south-southeast. Fifteen USTs had been removed during 1989 and were replaced with five 4000 gallon USTs. During January 2008, the report indicated that LNAPL was found in MW-18 (south of the dispensers) during August 2006. The LNAPL recovery system operated from January 1985 to March 20, 1992. The AS/SVE system operated from April 1995 to October 1998. EFR events took place from August 2005 to June 2008. From May 2009 to February 2010, RegenOx injections took place. On 6/4/08, the DEC approved the removal of MW-12, 14, 17 and 20 from the sampling array. MW-9 and

EPA ID Number

HESS/MERIT STATION 32STA (Continued)

S103574868

MW-11 contained MTBE at up to 95,000 ppb from January 1995 to September 1997. According to PWGC, this indicated that the spill had occurred prior to 1995. MTBE was detected in MW-13 during October 1998 at 23,000 ppb. PWGC stated in the work plan that the EXXON site spill case #9409096 was still open. However, this spill case was closed on 7/27/11. A Preliminary Conceptual Site Model (PCSM) had been developed in order to obtain a general understanding of the Wendy's property. The PCSM considered the site history and context, including the fate and transport, potential sources, release mechanisms and the physical and chemical mechanisms controlling fate and transport. PWGC stated that there is ongoing source contamination originating from HESS. They also stated that there is source contamination at MOBIL and that it is affecting HESS. They indicated the location and extent of the MTBE plume from MOBIL in Figure 4 of the work plan. PWGC stated that data gaps were identified through the PCSM in connection with the quality and source of the groundwater that is flowing onto and off of the site (HESS). Before the site investigation is undertaken, the data gaps should be addressed to the extent practicable so that the PCSM can be refined and the site investigation focused. PWGC defined the data gaps as the need to obtain all work plans, reports and documents concerning the HESS site, including the Stipulation Agreement, fingerprint analysis, PBS record discrepancy resolution documentation, pumping well documents, soil boring logs, well installation logs, groundwater results since August 2014, access to all wells, and specific reports in the UIS system from the MOBIL and EXXON case files. The objective of the Site Investigation Work Plan (SIWP) is to reduce the uncertainty regarding the quality and source of the groundwater that is flowing onto and off of the Wendy's site as it relates to known sources of contaminated soil and groundwater. The scope of work includes: sampling up gradient MOBIL site wells MW-12 to MW-16 and HESS downgradient wells MW-4 and MW-11. PWGC will gauge and collect the usual field measurements and collect additional data via the documents for the HESS site, the MOBIL site and the EXXON site for a more comprehensive scope of work. Upon receipt of these documents, PWGC would review them for additional data gaps. A Remedial Investigation Report (RIR) will be sent to the DEC. Figure 3. There is a pool of product in the northeast quarter of the HESS site with the center of the pool being 0.84' of product. Wells MW-7, 8, 10 and 11 (upgradient) had from 0.21' to 0.56' (the data is from 2012 as no product is present in the wells since 2014). However, the figure does not indicate that any USTs were ever in this area. Figure 4. An MTBE plume is depicted as emanating from MOBIL wells MW-9 and MW-11. As drawn, it extends from the MOBIL station, then under the Wendy's location and ends under the HESS site. Groundwater flow is southeast. The Sanborn maps were at the end of the work plan. The 1950 map showed a dairy in the northern part of the future Wendy's property and two filling stations across Linden Boulevard and another one to the east of the future HESS site. A metal products manufacturing building was shown to have existed on other maps for many decades in the northwest quarter of the future HESS site. A 1967 map shows a filling station in the exact location of the future Wendy's Restaurant location (the center of this property). The 1977 map was the first to show the filling station and the auto laundry on the future HESS property. It also showed that the previous filling station building did not exist, but another one was constructed at the southern boundary of this property and was adjacent to the metal

MAP FINDINGS

HESS/MERIT STATION 32STA (Continued)

S103574868

products building. The 1981 map showed the filling station in the south and east parts of the future HESS property with the metal products facility still present. The 1983 map was the first to show the Wendy's building at its present location. The 2001 map showed that the HESS filling station was now a car wash and that the filling station to the east across Pennsylvania Avenue was also now just a car wash. The last map in the work plan was for 2007 and depicted essentially the same conditions as in the 2001 map. I checked Google Earth and viewed a current photo of the HESS site. The property still contains the car wash and the historical metal products manufacturing building is still there. However, from the emptiness of the parking spaces around this building, it is not clear that there is metal products manufacturing taking place at this location.

----- Case manager's review notes for the August 2016 P.W. Grosser (PWGC) SIWP : Having reviewed the work plan as submitted by P.W. Grosser Corporation, I determined that it did not follow the work plan format typically used by industry and therefore was deficient. There were no descriptions or figures showing where PWGC would install soil borings and wells on the Wendy's property. Also, there were no statements, nor figures regarding the geophysical methods that would be used to locate any structures (e.g. USTs) that may still exist on site. PWGC indicated in their SIWP that they would look for and review documents concerning the other sites, but not documents for the Wendy's property. In all likelihood, New York City agencies (e.g. Fire Department, Department of Design and Construction, the real property department and the taxation department) must have some types of records which may indicate the former presence of USTs. Also, the various historical societies may have their own records of the general area, if not the Wendy's property itself. Still, PWGC does not mention any intent to review possible Wendy's records at these sources. Lastly, the wording of the SIWP takes the form of a very extensive literature search and review and a modeling exercise. Because of the above deficiencies, I disapproved the SIWP. 8/9/16 - Raphael Ketani. I sent an email to Joe Rennie of EnviroTrac (631) 924-3001 asking whether Speedway had signed a new access agreement for continuing the environmental monitoring work. I added that if they hadn't, then the State will take enforcement action against them. I also called him to give him the above information. Mr. Rennie stated that he will pass the information along to Mr. Butler. I told him that Mr. Butler was the main recipient of the email. Speedway/Hess contact: Matthew Butler, (732) 738-2924, MButler1@Speedway.com Consultants: Edward Russo (EnviroTrac), (631) 924-3001, EDR@EnviroTrac.com Joseph Rennie (EnviroTrac), (631) 924-3001, JoeR@EnviroTrac.com Michael Haggerty (518) 402-9688 in the DEC Central Office in Albany is the case manager for the MOBIL spill (#9406497). He sent me the ARCADIS August 2016 Receptor Evaluation Report dated 8/8/16 for the MOBIL station. I reviewed the report. The AS/SVE system was restarted on 8/28/14, but the VOC concentrations temporarily exceeded the capacity of the catalytic oxidizer. In light of this, the AS part of the system was shut down. However, it was restarted on 12/11/14 after the system logics were reprogrammed. A total of 14.71 lbs. of BTEX and 1898 lbs. of total petroleum hydrocarbons were recovered since the system had been restarted on 8/28/14. The system was shut down during February 2016 as per DEC approval in order to check for contaminant rebound. The depth to groundwater varies from 10 to 12 feet bgs and the flow

MAP FINDINGS

HESS/MERIT STATION 32STA (Continued)

S103574868

direction is to the south. The latest groundwater monitoring took place on 6/13/16. Groundwater samples were collected from MW-1 to 7, 9, 11, 13, and 15 to 19. The samples were analyzed for BTEX, MTBE and ethanol. The analytical results for the groundwater samples from well MW-3 had 320 ppb of ethylbenzene and some low hits. The sample from MW-4 had 1100 ppb ethylbenzene and 1300 ppb total xylenes, along with a few low results. Both wells MW-3 and MW-4 are on site in the southeast corner of the MOBIL station. The results for the groundwater samples from the other on site wells were either entirely non-detect or had non-detects and low hits. The samples from off site down gradient wells MW-13, 15 and 16 were entirely non-detect, except for 8 ppb of MTBE in the sample from MW-13. All of the above results suggest that any contamination that is in the groundwater under the Former HESS site IS NOT from the MOBIL site spill. I sent a copy of the ARCADIS August 2016 Receptor Evaluation Report to Mr. Rennie and Mr. Russo at EnviroTrac. Mr. Russo called me up afterwards and stated that HESS is no longer involved in the project. He added that the access issue was between the owner, 810-820 Pennsylvania Avenue Corporation, and Speedway and that I should contact Mr. Butler and send him the report. Hearing this, I sent Mr. Butler at the ARCADIS report. I also asked Mr. Butler to expedite the access agreement. Later, I looked up the ownership of the Speedway property. The CEO is Abraham Karron at 810-820 Pennsylvania Avenue Corp., 70 Curtis Avenue, Manasquan, NJ, 08736. 8/11/16 - Raphael Ketani. I sent a letter and 4 reports by email to Mark Chertok of Sive Paget & Riesel (SPR), Joyce E. Kung of SPR and to Richard T. Kampf of P.W. Grosser Consulting Engineer & Hydrogeologist, PC. The letter explained that the Department was sending the EnviroTrac first to third quarter 2014 groundwater monitoring reports as requested by P.W. Grosser. I added that we were also including the August 2016 groundwater monitoring report for the up gradient MOBIL station. I explained in the letter that the data in the MOBIL report indicated that the contamination at monitoring wells MW-13, 15 and 16 was very low. So, there was little or no contaminated groundwater coming from this site. In addition, I stated, that the data did not provide evidence of an MTBE plume. I also stated that staff at the Department had noticed that the only wells which had high groundwater contamination at the former HESS site were MW-1, 4, 8 and 10, which were located up gradient from the tank field. I mentioned that the groundwater samples from the wells down gradient had very low analyte concentrations. Continuing, I stated that, given the above information, it was the Department's determination that the contaminated groundwater was coming from the Wendy's property. In light of this, the Department was requiring the submission of a new investigation work plan which will include a geophysical survey of the property, soil borings and the installation of groundwater wells. I set a deadline of 9/9/16 for the submission of this work plan. Pennbrow, Inc. latest address is: 488 Madison Avenue, 19th Floor, NY, 10022 Mark Chertok's contact information at SPR Law is: mchertok@sprlaw.com; (212) 421-2150 Ms. Kung's contact information is: 460 Park Avenue, 10th Floor, NY, 10022; jkung@sprlaw.com/(212) 421-2150/(646) 378-7288 Mr. Kampf's contact information is: Richard T. Kampf, PG, Director, rkampf@pwgrosser.com 8/16/16 - Raphael Ketani. Mr. Butler (732) 738-2924/MButler1@Speedway.com sent me an email today stating that Speedway has been granted access to the site. A groundwater monitoring report will be submitted during September. 8/17/16 - Raphael Ketani. Mr. Kampf (212) 786-7420/rkampf@pwgrosser.com called

HESS/MERIT STATION 32STA (Continued)

S103574868

me today. He said that the geophysical survey of the Wendy's property will take place on 8/23/16. I told him that the DEC would like the footprint of the Wendy's Restaurant to also be investigated. He said that he didn't know how this could be done. I told him that an acoustic instrument survey may work through the restaurant floor. He said that he will see what can be done. I added that the DEC would like a cover letter explaining what will take place and a map showing the where the geophysical transects will be run. Mr. Kampf stated that the transects will just be whatever the width of the instrument is and they will run as many transects as necessary. I told him this would be fine. Additionally, Mr. Kampf asked for any well construction logs from previous EnviroTrac reports and any soil contamination delineation reports. I told him that I will look and see what we have. With that, the conversation ended. 8/18/16 - Raphael Ketani. Mr. Kampf called me earlier today and stated that he could not find a company which could do a geophysical survey within the Wendy's as the tables and chairs are fixed to the floor. I told Mr. Kampf that if he can't find a geophysical service that can do the work, then he should just say so in a cover letter to the geophysical survey plan. Mr. Kampf stated that he would do this. Later, as the soil borings report and the well construction report were not in the electronic archive, I searched for them in the paper file. However, they were not in the paper file, either. As a result, I sent letters to Merit Oil Corporation and HESS Corporation requesting these documents. The letters were sent to the following addresses: Manager, Environmental Management Division, Merit Oil Corporation, 551 West Lancaster Avenue, Haverford, PA, 19041-1419. Dawn M. Coughlin, Manager, Marketing and Refining Remediation, HESS Corporation, 1 HESS Plaza, Woodbridge, NJ, 07095. 8/22/16 - Raphael Ketani. On 8/19/16, I received an email from Mr. Kampf memorializing and adding to our discussion over the phone on 8/17/16 regarding the Wendy's property. In his 8/19/16 email, Mr. Kampf wrote that his client has authorized P.W. Grosser to move ahead with the geophysical survey of the Wendy's property. The owner of the Wendy's has stated that there is no basement and the building is heated by gas. The geophysical survey will be conducted both outside and inside the building. A contractor will be hired to conduct the survey. A Fischer TW-6 metallic locator (type RD8000 pipe and cable locator) will be used to detect buried tanks and other ferrous anomalies. Any detections will be followed up with a GPR survey. A cart mounted GPR device will be used at a 2 to 3 foot spacing in both directions. A mini-GPR will be used inside the restaurant in order to locate objects directly below the building. I approved the geophysical plan. In the latter part of his email, Mr. Kampf again asked for any contamination delineation information and any well construction information for the former HESS site. He also asked for information regarding the MOBIL site. I responded by email and wrote that staff had looked in both our electronic archive and our file cabinets for any records concerning the contamination and the wells at the HESS site. However, we had not found such documentation. I explained that letters had been sent to MERIT and HESS requesting any documents that concerned the soil contamination and well construction. I added that the MOBIL site is managed in our Albany office and that he should make a FOIL request. I sent him the FOIL website address. 8/23/16 - Raphael Ketani. I received a call from Mr. Kampf (212) 786-7420 (rkampf@pwgrosser.com) today. The GPR survey took place as scheduled. However, nothing was found. Mr. Kampf explained that the GRPR was done outside the restaurant and inside

MAP FINDINGS

HESS/MERIT STATION 32STA (Continued)

S103574868

the restaurant. They were able to move the tables and chairs in the dining area. So they were successful in their attempt to look under the slab the restaurant sits on, though the kitchen area was not as well surveyed as it was tight quarters. Mr. Kampf added that it was possible that tanks were still there as the GPR could look only 3 feet down. He commented that he was not sure the geophysical survey would be able to pick up any tanks. He stated that they may try electrical resistivity as a deeper sensing tool. He has been speaking with a contractor for this service and they told him that the signal penetrated as deep as 29 feet at one site. Mr. Kampf added that he thought the restaurant was sitting on historical fill. I told him that I wasn't sure the contractor would be able to get a clear picture regarding whether tanks were underground or not. I added that I thought they would come up with just a lot of interference because of the fill. Mr. Kampf stated that he will have to discuss this with the contractor before trying the method to see under the restaurant. The client stated that if no tanks are found, then he wants the spill case to close. A request was sent to the Fire Department for any records regarding USTs under the property. I asked Mr. Kampf what he would do if the resistivity machine sensed one object here and then one somewhere else, but nothing else. He said he wasn't sure what he would do next. I told him that the best investigative method may be to do a series of soil borings with wide spacing just to see whether any contamination is present underground. Mr. Kampf asked whether he should forego the resistivity testing and just do soil borings. I told him that I wasn't sure. He commented that they would be doing an investigation based on a contamination concentration gradient. He added that he will get back to me regarding the resistivity testing method. With that, the conversation ended. 8/25/16 - Raphael Ketani. Mr. Kampf (212) 786-7420 (rkampf@pwgrosner.com) sent me the below email today with an attachment showing the draft proposed boring plan: As discussed earlier this week, the geophysical survey performed at the above-referenced property on August 23rd did not indicate evidence of the presence of underground storage tanks (USTs). Pursuant to our subsequent discussions, we understand that NYSDEC does not believe that performing an electrical resistivity (ER) survey is likely to provide any additional useful information with regard to locating USTs beneath the building. Based upon discussions with our contractors, we have come to a similar conclusion. As such, we are finalizing a work plan that includes soil sampling, and, if warranted based on the soil sampling results, groundwater sampling. As discussed, the objective of the soil sampling investigation would be to evaluate whether the Wendy's restaurant may be the source of the dissolved-phase petroleum hydrocarbon (gasoline) - related constituents in groundwater observed in monitoring wells at the former Hess property. As previously presented in the August 2016 Subsurface Investigation Work Plan we submitted to NYSDEC, the data indicate that the former Hess property is the source of these dissolved-phase constituents given the presence of residual LNAPL on that property resulting from Hess' failure to characterize and remove contaminated soil in the northern portion of its property during the 1998 UST removal action. As discussed, based on the conceptual site model presented in the August 2016 Subsurface Investigation Work Plan, we have prepared a sampling approach that will evaluate concentration gradients of gasoline-related total petroleum hydrocarbons along two transects (A - A' and A - A'') that extend from the approximate center of the

MAP FINDINGS

HESS/MERIT STATION 32STA (Continued)

S103574868

residual LNAPL mass and former UST locations on the former Hess property and which extend to the north / north west across the Wendy's property. Soil samples would be analyzed for TPH-GRO (total petroleum hydrocarbons - gasoline range organics). Please find attached a figure that presents the proposed sampling locations. Please note that extensive coordination will be required with Wendy's to ensure that there is minimal disruption to their business operations. Please let me know if you agree with this approach or if have any questions or comments and would like to discuss the proposed scope of work in greater detail. We intend to finalize the work plan and re-submit for your approval next week. We intend to perform the work as quickly as possible, pursuant to contractor availability.

----- I responded to Mr. Kampf's email with the following comments: I have reviewed the draft proposed boring plan. Let me first say that I am not sure whether doing a contaminant concentration gradient analysis will definitively point to one location or the other (former HESS site) as being the source. However, the choice is yours to do this. We will simply review the data and make our own conclusions. Secondly, any initial investigation should include more borings at the Wendy's property than have been depicted. We suggest conducting the additional borings as we have indicated on our revised plan (see attached). We make this suggestion as there is no record regarding where the USTs or the pump islands used to be during the time that the property contained the filling stations. Additionally, all soil and groundwater analyses should conform to methods 8260B and 8270C. We ask for the expanded lists in order to see which volatiles and SVOCs will show up. If only a limited number of VOCs and SVOCs appear in the initial samples, then we would allow the testing to be for a limited suite of analytes the STARS list of 14 VOCs and 16 SVOCs. Lastly, the boring map you have sent me shows old information for the subsurface conditions at the former HESS site. We had sent P.W. Grosser the third quarter 2014 EnviroTrac groundwater monitoring report. In this report, they indicate that there is no NAPL in wells MW-7, 8, 10 and 11. 8/30/16 - Raphael Ketani. Mr. Kampf (212) 786-7420 (rkampf@pwgrosser.com) called me today. He said that P.W. Grosser and the client agreed to the extra borings requested by DEC. He also said that he wanted to have the soil and groundwater samples analyzed just for the STARS list of VOCs since this was a gas station and also since the HESS site was being tested only for VOCs. I told Mr. Kampf that this would be fine and to send the Department a cover letter confirming our agreement about doing only VOC analyses and about conducting the additional borings. He said he would. 8/31/16 - Raphael Ketani. Today I received the letter that I had sent to Merit Oil Corp. in which I had requested copies of any documents they may have regarding the site. The envelope was unopened and marked by the U.S. Post Office Not Deliverable as Addressed. The sticker was dated 8/27/16. The address I used for Merit appeared to be a legitimate one that I had copied from Merit's web page. 9/7/16 - Raphael Ketani. I reviewed the revised investigative boring work plan which was submitted by Mr. Kampf by email on 9/6/16. Eleven soil borings will be performed through the Wendy's property. Eight of these boring locations were chosen by P.W. Grosser. Three were chosen by the DEC. Each borings will be drilled to 20 feet bgs. The soil samples will be analyzed for CP-51 Table 2 VOCs (14 VOCs) and TPH GRO. The work will take place on 9/13/16 and on 9/14/16. I sent Mr. Kampf an email approving the work

plan. 9/12/2016 - Colton McPartland. Scanned paper file for DEC Raphael Ketani and placed on computer desktop for future bulk upload once naming convention is received from DEC Jane Obrecht. 9/13/16 - Raphael Ketani. Mr. Kampf (212) 786-7420/(716) 392-4933 (rkampf@pwgrosner.com) called me early this morning to say that 2 borings situated in the drive-thru lane had been completed to 13.5 and 15.5 feet below grade, respectively. He added that some dark stained soil was collected which had petroleum odors. The samples will be sent to the lab for analysis. 9/19/16 - Raphael Ketani. I received an email from Mr. Kampf on 9/16/16. The email stated the following: Pursuant to the work plan approved by NYSDEC on September 7, 2016 regarding 1916 Linden Blvd, we performed the Subsurface Investigation this week which included advancing a total of 12 soil borings to approximately 20 ft bgs. Please refer to the attached sketch, which shows a site plan, including the location of the 12 soil borings. The groundwater table was present at approx 11.5 to 13 ft bgs. Boring logs indicate the presence of a petroleum hydrocarbon-related smear zone approximately 8 to 10 ft thick (approx. 12 - 13 to 20 - 23 ft bgs) at the three soil borings that were advanced farthest south along the boundary between the Wendy's and former Hess property (SB003, SB008, and SB009). Moving north, on the western side of the restaurant, the smear zone thickness decreased to approximately 5.5 ft (approx. 13.5 to 19 ft bgs) at SB001 and SB002) and to about 5 ft thick at SB012. PID readings also generally decreased with distance from the boundary of the former Hess gas station. SB010 and SB011, located further to the west, did not indicate any evidence of petroleum contamination. On the eastern side of the restaurant, also north of the former Hess property, the smear zone thickness decreased to approximately 6 ft (approx. 11.5 to 17.5 ft bgs) at SB004 and SB007, 3.5 ft at SB005 (approx. 11.5 to 15 ft bgs), and 1ft thick at SB006 (approx.. 13 to 14 ft bgs). PID readings also generally decreased with distance from the boundary of the former Hess gas station. There was no evidence of petroleum hydrocarbon-related constituents compounds above the water table at any boring location, no indication of the presence of any USTs, and no evidence that a petroleum hydrocarbon release has taken place on the Wendy's property. In summary, a total of 17 samples were collected for analysis from 12 borings. The observed thinning out of the smear zone from south, along the former Hess property boundary, to north, across the Wendy's property, supports the conclusion that the petroleum hydrocarbon material observed in borings at the Wendy's property originated from spill(s) that took place at the former Hess property. We will have analytical results next week. I reviewed the Site Plan keeping in mind the text of Mr. Kampf's associated email. It seemed reasonable that the smear zone should be thickest at the border with the former HESS station. This was because HESS wells MW-8, 10 and 11 did have free product up to 2012. I sent a response email to Mr. Kampf stating that he should send the DEC a report with analytical summary tables, the raw data package, boring logs, a description of the work which had taken place and any other information which is pertinent. 9/27/16 - Raphael Ketani. I reviewed the EnviroTrac 9/27/16 August 2016 Update Report. On 8/17/16, 12 wells were gauged and sampled. The wells gauged and sampled were MW-1, 2, 4, 7 to 14 and 18. Product was not detected in any of the wells. Groundwater was found at 10.71 to 13.04 feet. Flow was southeasterly. The groundwater analytical results for the samples from MW-2, 9, 12 to 14 and 18 were either completely non-detect for

HESS/MERIT STATION 32STA (Continued)

S103574868

BTEX or were mostly non-detect with only one or a few very low hits. MW-1, 4, 7, 8, 10 and 11 had BTEX concentrations that varied from 737.5 ppb to 5884 ppb. These wells were located either in the former UST area (MW-7) or in the northern part of the site where soil contamination had been extensive and where AS/SVE actions had been concentrated. The benzene results were either low or moderate in concentration for the high BTEX samples. The AS/SVE system remained shut down due to non-detect recovery. Speedway intends to conduct a pilot test during the fourth quarter of 2016 to evaluate the efficiency of the mobile AS/SVE system and the inactive remediation system. Operation and maintenance take place monthly and groundwater sampling takes place quarterly. The next sampling round will take place during November 2016. I approved the report without comment. 11/1/16 - Raphael Ketani. I reviewed the P.W. October 2016 Grosser Site Investigation Report dated 10/28/16 for the Wendy's Restaurant property. A gas station operated at 1916 Linden Boulevard from 1950 to 1967 and then from 1969 to 1977. Between 1981 and 1983, a new commercial building was constructed. The INTRODUCTION section of the report states that, according to the DEC, a lot of contaminated soil was left under the HESS site after the tanks were removed during 1998. It is also stated that the extent of the soil contamination was not fully delineated. Additionally, P.W. Grosser states that the petroleum contamination from HESS had migrated under the Wendy's property. The P.W. Grosser investigation did not find USTs under the property nor petroleum contamination above the water table. The smear that was found decreased in thickness away from the HESS site. Following the INTRODUCTION, the report explains in detail the history of the investigation and remediation work at the HESS site. Information is also provided regarding the environmental monitoring by EnviroTrac. Depth to groundwater is from 11 to 15 feet bgs and flow is to the south. In Section 4.0 - Subsurface Investigation Activities, it is explained that EnviroProbe Services Inc. performed a geophysical survey on 8/23/16. A cart mounted GPR and an RD unit were utilized. The GPR penetration depth was generally 3 feet with a penetration depth of 3.5 feet in the rear (far parking lot) of the property. Tanks, piping, anomalies and utilities were looked for. The survey took place in a grid pattern. Rebar and possible steel mesh were detected at 4 inches below grade. However, no tanks or piping were found. From 9/13/16 to 9/14/16, 12 soil borings were installed from 16 to 24 feet below grade. A Geoprobe machine was used to conduct the borings. Soil samples were generally collected from the interval above the water table, or the interval with the highest PID reading. Nine of the 12 borings showed signs of petroleum contamination. The depth to groundwater was from 11.5 to 13.5 feet bgs. A smear zone was discovered from 7.5 to 10.5 feet in thickness in the 3 borings that were located along the property boundary with the former HESS station (SB003, SB008 and SB009). A Preliminary Conceptual Site Model (PCSM) was incorporated into the Site Investigation Work Plan which was previously submitted. The PCSM considered site history and context, including factors influencing distribution and fate and transport. The factors included the potential sources, release mechanisms and the physical-chemical mechanisms that control fate and transport. The CSM was refined based upon the information obtained via the site investigation. P.W. Grosser then explained how LNAPL would behave in the subsurface (i.e. how it might migrate) as is typically stated in a hydrogeology textbook and included a typical diagram. Their explanation amounted

MAP FINDINGS

HESS/MERIT STATION 32STA (Continued)

S103574868

to them building a case for the contamination having come from the former HESS site. They used information from the historical reports for the site. In the CONCLUSION section of the report, they list 16 points to support their claim that the Wendy's property does not have a spill and that the contamination below ground at 1916 Linden Boulevard is entirely from the spill at the former HESS station. Table 1 listed the soil analytical results for the samples that had been collected. The set of analytes were the STARS list of 16 gasoline VOCs. The great majority of the VOC sample results were either very low or had very low to low hits with high exceedences for only total xylenes. The samples from SB004, SB005, SB007, the shallow sample from SB008 and the shallow sample from SB009 had high to very exceedences for one or both trimethylbenzene analytes and total xylenes. Only the samples from SB005 and SB007 had high naphthalene exceedences. Figures 1 to 5 were the same figures as were presented in previous P.W. Grosser reports. Figure 6 showed a cross section of the smear zone from SB003 to SB012. The smear zone was shown to decrease in thickness from 10 feet to 3 feet, respectively. The total BTEX concentrations decreased from 8.59 ppm at SB003 to 0.075 ppm at SB012, with the exception of 142.51 ppm in the deeper sample from SB002. Figure 7 showed that the smear zone decreased in thickness from about 6 feet at SB009 to about 3 feet at SB005. The total BTEX concentrations were 1301.3 ppm in the shallow sample and 1.0201 ppm in the deep sample from SB009, respectively. The lowest concentration was 1.68 ppm at SB006 along this transect. However, the shallow and deep results for the middle location at SB007 were 1158.4 ppm and 1575.5 ppm, respectively. The shallow and deep samples from SB004 (between SB009 and SB007) were 84.02 ppm and 396.3 ppm, respectively. Figure 8 showed the BTEX results for soil samples taken from the 12 borings locations. Most of the results were either entirely non-detect, or had only low hits, or had moderate to high total xylene exceedences with the other analytes being low to moderate in concentration. The shallow soil sample at SB009 had 3 high exceedences. The shallow soil sample at SB007 had 110 ppb of ethylbenzene and 970 ppb of total xylenes. The deep soil sample at SB007 had 210 ppb of ethylbenzene and 1300 ppb of total xylenes. Sanborn maps were included as Attachment 1. No tanks were depicted on the maps for the Wendy's property. Attachment 2 contained NYC PBS search documentation. Attachment 3 showed the extent of the soil excavation at the former HESS site. Attachment 4 showed the soil vapor extraction and air sparge piping layout for the former HESS site. Attachment 5 contained the groundwater gauging and elevation data. Attachment 6 contained the BTEX-MTBE-groundwater elevation graphs. Attachment 7 contained the Enviroprobe Service report dated 8/23/16. The information in this report had been included in the body of the text for the SIR. Attachment 8 contained the borings logs. In general, fill material extended from 0 to 5 feet below grade. Natural sediments consisting of either silty sand, sand or gravelly sand start at depths from 4 to 7 feet below grade. The zone of contamination (smear zone or gray to dark gray sand zone) typically extended from 13 to 17 feet below grade. At some boring locations, the gray zone with petroleum odors extended continuously from 12 or 13 feet below grade to total depth at 20 or 24 feet. The York Analytical Laboratories Inc. 9/21/16 analytical report was Attachment 9. 11/8/16 - Raphael Ketani. The information in the October 2016 P.W. Grosser report appeared to have been generated by methods which are typically used by the environmental industry. The resulting data was

S103574868

coherent and consistent. So I approved the SIR. However, a deeper penetrating geophysical survey would have been more definitive. 11/9/16 - Raphael Ketani. I contacted Mr. Kampf by phone (212) 786-7420/(716) 392-4933 (rkampf@pwgrosner.com) and discussed whether there were any other geophysical methods which could definitely penetrate deeper below the Wendy's property, given the subsurface conditions. Mr. Kampf stated that he had discussed this issue with several geophysical companies and none could guarantee that their instruments could give results for depths below about several feet (about 3 to 4 feet below grade). As a result of our conversation, I sent a letter to Penbrow, Inc. at 488 Madison Avenue, 19th Floor, Manhattan, New York, 10022. In the letter, I stated that, in consideration of the information in the SIR, the Department has determined that the Wendy's property is not a source of environmental contamination. A pdf file of the letter was sent by email and a hard copy was sent to Penbrow. 2/2/17 - Raphael Ketani. I reviewed the EnviroTrac January 2017 Quarterly Update Report dated 1/31/17. On 11/29/16, 12 wells were gauged and sampled. The wells gauged and sampled were MW-1, 2, 4, 7 to 14 and 18. Product was not detected in any of the wells. Groundwater was found at 10.95 to 13.11 feet. Flow was southeasterly. The groundwater analytical results for the samples from MW-9, 12, 14 and 18 were non-detect for BTEX. The samples from MW-2 and MW-13 had a few low hits. For the other samples, the BTEX concentrations were 2475 ppb (19 ppb benzene) at MW-1, 2834.4 ppb (5.4 ppb benzene) at MW-4, 138.1 ppb at MW-7, 529.8 ppb (234 ppb benzene) at MW-8, 3508.1 ppb (4.1 ppb benzene) at MW-10, and 7130 ppb (non-detect benzene) at MW-11. The AS/SVE system remained shut down due to non-detect recovery. 4/28/17 - Raphael Ketani. Today I received an email from Mr. Butler that he is leaving Speedway. He stated that John Engdahl [jjengdahl@speedway.com (732) 738-2923] will take over his duties. 5/2/17 - Raphael Ketani. I reviewed the EnviroTrac April 2017 Quarterly Update Report dated 4/28/17. On 2/21/17, 12 wells were gauged and sampled. The wells gauged and sampled were MW-1, 2, 4, 7 to 14 and 18. Product was not detected in any of the wells. Groundwater was found at 10.63 to 12.79 feet. Flow was southeasterly. The groundwater analytical results for the samples from MW-9, 12 to 14 and 18 were either entirely non-detect for BTEX or had one very low hit. The sample from MW-2 had 35.5 ppb of BTEX. For the other samples, the BTEX concentrations were 1901.2 ppb (23.2 ppb benzene) at MW-1, 8497.8 ppb (17.8 ppb benzene) at MW-4, 228.3 ppb at MW-7, 6312 ppb (906 ppb benzene) at MW-8, 6639.1 ppb (4.1 ppb benzene) at MW-10, and 141.1 ppb (non-detect benzene) at MW-11. I approved the report without comment. 8/1/17 - Raphael Ketani. I reviewed the EnviroTrac July 2017 Quarterly Update Report dated 7/28/17. On 5/19/17, 12 wells were gauged and sampled. The wells gauged and sampled were MW-1, 2, 4, 7 to 14 and 18. Product was not detected in any of the wells. Groundwater was found at 11.74 to 14.03 feet below grade. Flow was southeasterly. The groundwater analytical results for the samples from MW-2, 9, 12 to 14 and 18 were either entirely non-detect for BTEX or had a low concentration. For the other samples, the BTEX concentrations were 2257.2 ppb (40.2 ppb benzene) at MW-1, 16,130 ppb (110 ppb benzene) at MW-4, 473 ppb at MW-7, 1560.8 ppb (345 ppb benzene) at MW-8, 5222.4 ppb (3.4 ppb benzene) at MW-10, and 3829 ppb (non-detect benzene) at MW-11." SUN 11/25/97 mmm:PBS RECORDS INDECATATE THAT TANKS OVERDUE FOR TESTING BY 3 YEARS. SPILL # 88-00531 ALSO ACTIVE FOR THE SITE, FOR TANK #4 FAILING TT ON 4/16/88 (SULLIVAN). SULLIVAN SPILL WILL BE CLOSED AND THIS SPILL NUMBER WILL REMAIN ACTIVE FOR THE SITE. 1/2/2004 Reassigned from Mulqueen to Sun. 12/16/2005 - Feng - Reassigned from Sun to Feng as per Sun. (RJF) 10/30/06 Reassigned from Tang to Sun. (MS) 11/16/06 Sun sent Outstanding Violation/Tank Test Failure letter to Eric S. Miller, owner of Arnold's Service Station at 1868 Linden Blvd on 11/09/06, requiring the following to be received by December 9, 2006: 1. An explanation of the cause of the tank system failure; 2. Either a description of the work performed to restore the integrity of the tank system (including retesting results), or a description of the work performed to close (decommission) the tank; 3. Information regarding petroleum contamination found at the site and cleanup activities (if any) associated with a release from this tank system; 4. Any available documentation (i.e., invoices, bills, sampling analysis reports, etc.) pertaining to the work performed at this site associated with this violation. (JS/MS) 1/4/07: Above letter was returned (no such name). Found a recent tank renewal application for same address and sent letter (same as above) to Mr. Tzali Hirschler on 1/3/07. (JS/MS) 3/7/07: Received some documents associated with a UST upgrade including invoices and confirmation from tank installation company. Reviewing, however submittal is not pertaing to tank test failure. (JS/MS) 8/1/07: ACRIS search also indicates Mr. Eric Miller as person responsible for satisfaction of morgage. Need to further research current and accurate contact info and telephone number. (JS/MS) 1/24/08: Sol Hirschler at 516.901.1666. 4/24/08: 2nd clean up letter sent to Eric Miller (2x, different addr for Ham II Realty) and Tzali. 2006 tank test report and 1995 soil boring logs + GW data does not address this 1997 spill. (JS/MM) 5/12/08: Sent 2nd letter + SIWP for subsurface investigation report. (JS/MM) 5/14/08: Dean Sommer (518-438-9907 x236) called; representing Tzali Hirschler. Trying to put documents together, not quite sure who is responsible.(JS/MM) 5/20/08: JS received voicemail from Jeff Ruderman, attorney for Eric Miller; Miller bought property but had an agreement with the previous owner. Previous owner would be responsible for all environmental concerns. Sent email to Jeff for clarification. (JS/MM) 5/21/08: Extension granted to Miller/Ruderman. Due 7/23/08. (JS/MM) 7/16/08: Preferred Environmental retained, requesting extension and FOIL request. SIWP due 9/7/08. (JS/MM) 08/05/08: Transferred to Kolleeny/Mandac. - JK 10/8/08: PES late with SIWP. (JK/MM) 12/30/08: Spoke with Jill Haimson. She said they have been trying to get a road opening permit. I told her I didn't have any documents from her and the last correspondence was Preferred's request for an extension for the SIWP. She said she will pull the file and see what documents she has. (JK/KG) 01/06/09: Rec'd following email from Bill Schlageter. SIWP under review. Kathleen: As requested, attached is the Site Investigation Work Plan to be conducted by Preferred Environmental Services at the Citgo Station at 1868 Linden Boulevard, Brooklyn, NY. We are currently obtaining the required sidewalk opening permit and anticipate receipt of same sometime next week. As soon as we have a set schedule, I will update you. In the interim, please do not hesitate to contact me or Jill. Thank You, Bill (JK/KG) 01/07/09: SIWP approved and letter sent to Eric Miller. SIR due 03/31/09. Scope of work includes installation of 6 borings, collection of soil and GW samples, and submission of SIR. DEC approved the work plan with the following modifications: GW

CLOSED-LACKOF RECENT INFO (Continued)

S102959961

samples must be collected from existing accessible wells, any damaged wells should be replaced, permanent wells should be installed where contamination is encountered, additional borings/wells should be installed as necessary to fully delineate contamination plume, new and existing wells should be surveyed, and soil and GW samples should be collected at all boring locations. (JK/KG) 01/27/09: Rec'd phone call from Bill concerning modifications requested by DEC to the approved work plan. He stated all of the existing wells are in bad condition and will not be able to collect samples from them. DEC requested wells to be installed where contamination was encountered. Instead of installing permanent wells the day the borings are conducted he would like to first submit the soil and GW samples for lab analysis. Then, based on the lab results, Preferred will submit a report with recommendations for well locations. After the wells are installed they will be surveyed. I told him that was okay. Groundwater and soil samples will be collected from all 6 borings. He expects to get the sidewalk permits this week and anticipates work to commence next week. (JK/KG) 02/09/09: Rec'd email from Bill on 02/06/09 stating that site work is tentatively scheduled for 02/12/09. (JK/KG) 04/08/09: Rec'd email from Bill: I apologize, but the report for 1868 Linden Boulevard, Brooklyn has been delayed between revisions between our office and the client's attorney. We expect to have the report to your office in the next few days. Please bear with us and I apologize for the inconvenience. Pdf of report was submitted on 4/8/09; under review. (JK/KG) 04/16/09: Investigation on 2/12/09 included 6 borings and collection of soil and groundwater samples. GW results: GW-1: Total VOCs plus oxygenates - 46,318.4 ug/L GW-2: Total VOCs plus oxygenates - 33,290.0 ug/L GW-3: Total VOCs plus oxygenates - 39,638.4 ug/L GW-4: Total VOCs plus oxygenates - 144.76 ug/L GW-5: Total VOCs plus oxygenates - 427.3 ug/L GW-6: Total VOCs plus oxygenates - 25.74 ug/L Soil: VOCs detected above TAGM RSCOs in SB-2(8-10') and SB-3(8-10'). Preferred has indicated that a RAP is necessary. A letter was sent to the RP requiring a RAP be submitted by 6/5/09. At a minimum the RAP will propose installation of permanent monitoring wells, delineation of the groundwater contaminant plume, a groundwater elevation survey, and installation of a soil and groundwater treatment system. (JK/KG) 06/01/09: Rec'd a call from Bill Schlageter requesting a 2 week extension to submit the RAP. I asked him to send an email requesting an extension. Kathleen: As we discussed, Preferred is respectfully requesting that the NYSDEC grant us an extension on the June 5, 2009 deadline to prepare the NYSDEC-required Remedial Action Plan (RAP) for the above-referenced property. We are in the process of developing a scope of work to address the remaining on-site impacts and need some more time to finalize the specifics of same. I thank you in advance for your patience. Regards, Bill Bill, Your request for an extension is granted. The new deadline for submission of the RAP is June 19, 2009. Feel free to contact me if you have any questions. Thanks, Kathy (JK/KG) 06/22/09: I spoke to Bill Shlageter and he said he sent Mr. Miller a proposal for two different remedial options and is waiting for his approval. (JK/KG) 07/06/09: Rec'd the following email from Jill Haimson: We have been conferring with Mr. Miller relative to the above parcel and have provided him with various remedial options that the NYSDEC would find acceptable. He has indicated that he is having internal meetings and will make a decision by the end of the week. We will reach back out to you early next week to confirm a conceptual scope and overall schedule for implementation. Thanks and we will

S102959961

talk to you shortly. Jill S. Haimson 08/05/09: Sent an email to Jill requesting an update on the status of the RAP. (JK/KG) 08/06/09: Rec'd email from Jill: The client has decided to contract with us for the preparation of the RAP - he has been out of the country for the last two weeks and will be back in 1-2 weeks. At that time, he will execute our contract and we can set a schedule for the submission of the RAP. We're getting there! Jill S. Haimson (JK/KG) 08/31/09: Spoke to Jill Haimson, she said Mr. Miller accepted Preferred's proposal. She will call Mr. Miller and get back to me next week. (JK/KG) 09/30/09: Follow up with Haimson and Miller. RAP is past due. (JK/KG) 11/03/2009: This spill case was transferred to A. Doronova. - AD 12/15/2009: PDF copy of the RAP was submitted. DL to eDocs. AD 12/28/2009: Received a hard copy of the RAP. Will review. Changed site priority from P0 to P1. AD 01/07/2009: Reviewed the RAP. Preferred Env. proposes application of a bioremediation agent. The proposed remediation will consist of the in-situ soil and GW treatment using a bioremediation technology by MicroBac International, Inc. This involves injection of natural bacteria. Scope of work includes: - installation of one injection well and rehabilitation of four existing wells for use in application of MicroBac injection; - installation of three permanent monitoring wells; - application of MicroBac and associated nutrients via 5 injection wells; - monthly sampling of DO, ferrous iron and other relevant parametrs. - quarterly GW sampling for one year with reporting to DEC. The GW contamination is not delineated at the site. Additional wells should be installed. Discussed the RAP with J. Kolley of DEC. Called and spoke with Bill Schlageter of Preferred Env. Requested to submit a revised work plan for monitoring wells installation only. Two additional wells should be installed at the site. Off-site wells MW-6 and MW-7 should be sampled if feasible, if not - they should be replaced. After all wells will be installed, surveyed and sampled, RAP can be reviewed by DEC. Response is due January 19, 2010. AD 02/17/2010: Received an e-mail from B. Schlageter of Preferred Env. saying: greater than greater than greater than Bill Schlageter 2/17/2010 6:15 PM greater than greater than greater than Ms. Doronova: We spoke relative to this project a few weeks ago as the NYSDEC has additional requirements other than those set forth in the Remedial Action Work Plan submitted by Preferred on behalf of the property owner. Could you please send a letter or e-mail documenting these additional requirements so that we may pass them on to the property owner as an additional scope specifically required by NYSDEC beyond what was proposed in our RAWP? Thank You Bill William J. Schlageter Operations Manager/Senior Hydrogeologist PREFERRED ENVIRONMENTAL SERVICES Certified Port Authority of New York and New Jersey (PANYNJ), NYS and NYC Women-Owned Business Enterprise (WBE) 323 Merrick Avenue North Merrick, New York 11566 Tel: (516) 546-1100 ext. 22 Fax: (516) 213-8213 Cell: (917) 715-0752 AD 02/18/2010: Sent an e-mail to Mr. Schlageter: Dear Mr. Schlageter: As we discussed it previously, DEC opinion is that the groundwater contamination is not delineated at the site. Additional wells should be installed. A revised work plan for monitoring wells installation only, should be submitted to DEC for review and approval. Two additional wells should be installed at the site. Off-site wells MW-6 and MW-7 should be sampled if feasible, if not - they should be replaced. After all wells will be installed, surveyed and sampled, a investigation summary report with a proposed remedial actions can be reviewed by DEC. Response is time sensitive.

06/22/2010: Called and spoke with Bill Schlageter regarding submission of the report. He said that the owner of the site was out of contry, so they were not able to discuss with him new scope of work. he will contact the owner and will send a status update info till July 1, 2010. AD 07/15/2010: Called and left a message to Mr. Schlageter. Later spoke with B. Schlageter. Mr. Schlageter aked for an official letter from DEC with an additional investigation request. Requested him to send a recent contact info of the owner including his e-mail address. AD 07/21/2010: Received an e-mail from B. Schlageter saying: Ms. Doronova: As you requested, the current property owner information is as follows: Mr. Eric Miller Iberia World Foods 1900 Linden Boulevard Brooklyn, New York 11207 Please copy me on any correspondence with the property owner. Thank you, Bill William J. Schlageter Operations Manager/Senior Hydrogeologist AD 07/26/2010: Issued a letter with a request for additional investigation. Mr. Schlageter does not have e-mail address of the owner. Sent the letter to Mr. Schlageter, so he can forward it to Mr. Miller. DL pdf copy to eDocs. Response is due August 16, 2010. AD 08/13/2010: Received an e-mail from B. Shlageter: Ainura: I am requesting a few more days on the work plan for 1868 Linden Boulevard, Brooklyn, NY. I have spoken to the property owner and provided him with our proposal, but he is not available this afternoon, and I feel that I won t have his authority by Monday to submit our work plan to you. Thank you for your patience and cooperation. Bill William J. Schlageter Operations Manager/Senior Hydrogeologist . AD 08/16/2010: Received an e-mail from Bill: Ainura: As required by the NYSDEC, attached is the investigation work plan for the above-referenced property for your review. Please contact me with any comments. Regards, Bill William J. Schlageter DL the work plan to eDocs. Will review. AD 08/27/2010: Reviewed the work plan. It proposes installation of up to eight (8) two-inch diameter groundwater monitoring wells. If the off-site groundwater monitoring wells MW-6 and MW-7 are located, only six wells will be installed and wells 6 and 7 will be rehabilitated; The investigation work plan also includes: " Collection and laboratory analysis of up to 12 soil samples for VOCs; " Survey, gauging and sampling of all installed groundwater monitoring wells (up to eight) with groundwater samples submitted for VOCs plus fuel oxygenates by USEPA Method 8260. A summary investigation report to be submitted to NYSDEC including boring logs, groundwater flow map, data table and a proposed remedial action. AD 09/01/2010: Issued and sent an approval letter with a comment regarding a soil sampling interval. DL pdf copy to eDocs. AD 06/24/2011: called and spoke with Bill Schlageter of Preferred regarding implementation of the RAP. He said that because the site owner travel a lot, and spends majority of the year outside of the country, it if difficult to get hold of him and schedule a field work at the site. Asked Bill to provide an info for the owner's assistant, to whom I can sent a letter requiring expedition of the site remediation. This info will be submitted shortly. AD 08/2011: Did not receive any information from Preferred. AD 01/12/2012: called and spoke with Bill Shlageter. There was no any changes in the site status. Issued and sent a letter to the owner by certified mail (#7006 0100 0006 2620 3504)with a reqirement to perform site investigation and to submit a summary report by March 8, 2012. DL the pdf copy of the letter to eDocs. AD 02/14/2012: Received a call from B. Schlageter of Preferred. He said that the site owner contacted them to proceed with site investigation. Bill asked for a copy of the letter sent to the owner. Sent him the copy. AD 02/16/2012: Received

the following e-mail from Bill saying: Ainura : We have scheduled the field activities for the Thursday and Friday February 23-24, 2012. Please let me know if you will attend the delineation activities. Regards, Bill William J. Schlageter Operations Manager/Senior Hydrogeologist PREFERRED ENVIRONMENTAL SERVICES AD 02/17/2012: Received an e-mail from B. Schlageter saying: Ainura: We are planning on conducting the sampling and well installation activities next week February 23-24, 2012. As we will not receive lab data until March 7, 2012 and need some time to evaluate data and discuss results with the client, we are respectfully requesting that the NYSDEC grant us a three (3) week extension of the deadline to submit the subsurface investigation summary report from March 8, 2012 to March 29, 2012. Please let me know if this request is granted. Thank you, Bill Sent him an e-mail granting deadline extension till March 29, 2012. AD 04/03/2012: Received the following e-mail from Bill: Ms. Doronova: Attached is the report on the soil and groundwater delineation conducted by Preferred Environmental Services on behalf of the Property Owner for 1868 Linden Boulevard, Brooklyn, New York. Please review and feel free to contact me to discuss. An original copy and CD will follow by mail. Regards, Bill DL the report to eDocs. AD 04/09/2012: Received a hard copy of the report. Will review. AD 05/16/2012: Reviewed the Soil and Groundwater Delineation report. It states that the purpose of the February - March 2012 investigatory activities were to further delineate the extent of previous gasoline-related impacts identified in soil and groundwater at the subject property. Additional subsurface investigation was conducted on February 12, 2009 by Preferred which consisted of the following: " Installation of six soil borings at the site via a Geoprobe; " Collection and laboratory analysis of nine soil samples; " Installation of six temporary groundwater monitoring wells utilizing the Geoprobe; " Collection and laboratory analysis of six groundwater samples; and " Completion of an elevation survey and the development of a groundwater flow map. Based on the results of subsurface investigation is was concluded that petroleum-related impacts to soil and groundwater are present at the site and the highest concentrations of gasoline-related organic compounds and gasoline-related fuel oxygenates were identified adjacent to the in-service USTs. Eight monitoring wells were installed at the site. Upon installation, the 8 new groundwater monitoring wells, and 3 existing groundwater monitoring wells (MW-1, MW-2 and MW-4) were gauged for the presence of free-phase product. Upon gauging of the wells, free phase product was present in 5 wells: MW-1, MW-2, MW-13, MW-14 and MW-16/MW-7. All of these wells are located south of and proximate to historic dispensing areas, and/or USTs (such as MW-2). The three out of five wells with the thickest free phase product were identified as: MW-13 (1.41 feet); MW-1 (1.01 feet); MW-2 (0.81 feet). These three wells are located immediately south and adjacent to the historic and current gasoline dispensing areas. The six monitoring wells that did not contain free product (MW-4, MW-9, MW-10, MW-11, W-12 and MW-15/MW-6) were subsequently developed and sampled. TVOCs ranged in concentrations from 10.93 ug/L in MW-12 to 11,820 ug/L in MW-11. With the exception of MTBE at a concentration of 120 ug/L in MW-15/MW-6, no fuel oxygenates were detected above their MDLs in any of the six groundwater samples. Based upon the above, Preferred recommends a product recovery via a Vacuum Enhanced Fluid Recovery (VEFR) program. The VEFR program should consist of the periodic and repeated sustained use of a vacuum truck, exerting a strong vacuum on

CLOSED-LACKOF RECENT INFO (Continued)

S102959961

these wells to remove free phase product. Product recovery testing should be performed in tandem with these efforts, to ascertain the actual product thickness, and to assess the best available and most appropriate technology to address this issue. Additionally, a means to eliminate the continued introduction of gasoline from fueling operations should be developed and implemented in tandem with the VEFR. Upon the successful removal of free phase product to minimal and non-recurring levels, a subsequent remedial program should be designed to address the remainder of residual gasoline related impacts (e.g., dissolved phase) on and off-site. AD 05/17/2012: Called and spoke with B. Schlageter of Preferred. Requested to submit a detailed pilot study work plan for the proposed EFR. he asked for an official letter for RP to get their approval. Will issue a letter. AD 07/02/2012: Issued and sent a recommendation approval letter addressed to Mr. Miller with a request to submit a brief work plan for EFR. DL pdf copy of the letter to eDocs. AD 08/20/2012: Received an IRM work plan for EFR. It states that according to the results of subsurface investigation, petroleum-related impacts to soil and groundwater are present at the site and that the highest concentrations of gasoline-related compounds and LNAPL were identified in the vicinity of the in-service USTs. Preferred proposes a Vacuum Enhanced Fluid Recovery (VEFR) on a weekly basis as an interim remedial measure to remove free product from five site wells. Upon the successful removal of free phase product, remedial action will be proposed to address the remaining residual gasoline related impacts on and off-site. additional delineation of free product plume is needed. AD 08/27/2012: Discussed the IRM work plan with J. Koley of DEC. called and talked with B. Shlageter of Preferred. He agreed to additional delineation. Issued and sent a letter which approves the IRM work plan with the following comments: - A brief work plan for delineation of the free product plume should be prepared and submitted to DEC for review and approval; - Groundwater sampling should be performed at the site on a quarterly basis. DL pdf copy of the letter to eDocs. AD 01/24/2013: Called to B. Schlageter of Preferred Env. regarding report submission. He informed me that the report is ready and he will submit it soon. AD 03/05/2013: Received an e-mail from J. Haimson of Preferred with an attached report. DL the report to eDocs. Will review. AD 05/01/2013: Reviewed the report. It is a summary of continued monitoring, and prior pump down tests and product recovery activities conducted by Preferred Environmental Services (Preferred) from August 2012 through February 2013 at the site. From August 2012 through February 2013, Preferred implemented remedial activities including the Vacuum Enhanced Fluid Recovery (VEFR) program, monitoring and a pump down test. On-site and off-site monitoring wells were gauged using an oil-water interface probe, to identify wells needing product recovery. When the VEFR program was initiated, a vacuum truck was utilized to exert a strong vacuum on monitoring wells identified to have free-phase product within them. EFR: The first VEFR event was performed on August 31, 2012. A total of 398 gallons was recovered from groundwater monitoring wells 1, 2, 4, 7, 10, 11, 13, and 14. All monitoring wells had a non-measurable thickness of free floating product with the exception of off-site monitoring well MW-7, which reported a thickness of 0.65 feet. The second VEFR event was performed on October 8, 2012. A total of 95 gallons was recovered from MW-7. Again, MW-7 had the only measurable free floating product, with a thickness of .03 feet. Waste manifests were obtained for each VEFRs and are provided as an attachment.

S102959961

Evaluation of the ongoing monitoring after the VEFRs noted the continued absence or very limited measurable product from Mid October 2012, November - December 2012 (no measurements were done in this time frame due to Tropical Storm Sandy and inability to access wells due to snow piles), and through January 30, 2013. As of January 30, 2013, no measurable free phase product was present at MW-1, MW-2, MW-4, MW-6 to MW-14. Pump Test: During the initial VEFR event on August 31, 2012, a time-rated product recovery test on selected groundwater monitoring wells was performed to ascertain the actual product thickness and associated product and groundwater elevation recovery rate. Monitoring wells 7, 14, 13, 1, 2, and 11 were selected due their specific characteristics and historic product levels. Groundwater monitoring well, MW-7, had the greatest product recovery rate with .01 feet of product recovered at intervals greater than ten (10) minutes. However, no more than a total of .04 feet of product was observed to have been recovered from the MW-7 while Preferred was on-site performing the product recovery test. Conclusions and recommendations: From August 2012 through February 2013, remedial activities and/or continued monitoring efforts were conducted at the site. The results of this effort are summarized below: " An initial scope of multiple VEFR and product recovery test events were completed; " Continued monitoring of the site has proved that a drastic reduction of free-floating product levels had occurred on all on-site monitoring wells to non-measurable levels as of January 30, 2013; " The only groundwater monitoring well to periodically exhibit free floating product is the off-site MW-7 monitoring well. The recovery rate of product within the well is greater than .001 ft of product/minute. No product was measurable as noted in January 30, 2013; " Based upon the removal of free-phase product and the non-resurgence of significant measurable product over the last few months (inclusive of the potential effects from Tropical Storm Sandy flooding), it appears that the product phase was likely trapped and may not re-occur. " Based upon the results of the VEFR, continued monitoring program and absence of free phase product, in order to develop a final remedy for this property, Preferred proposes to conduct an updated round of groundwater sampling, inclusive of those wells that have not been sampled before, wherein product was present. This will enable a determination of what level of remediation is still required, as well as the best available and most appropriate technology to address the remaining dissolved phase impacts present in deep soils and groundwater. If agreeable, a new round of groundwater sampling will be conducted as soon as feasible. AD 06/03/2013: Called and spoke with B. Shlageter of Preferred regarding GW report submission. He said that they sampled the wells few weeks ago and are in a process of preparing the report. It will be submitted to DEC approximately by June 14, 2013. AD 09/09/2013: Received the following e-mai from J. Haimson: Hi Ainura please find attached: Summary Monitoring Report & Update for NYSDEC Spill 97-09774, Service Station - 1868 Linden Blvd, Brooklyn, New York 11207. A hard copy is being sent as well. Thanks and best regards. Jill S. Haimson, CGWP, PG Principal PREFERRED ENVIRONMENTAL SERVICES 323 Merrick Avenue North Merrick, New York 11566 DL the report to eDocs. Will review. AD 10/09/2013: Reviewed the report. It states that from April 2013, remedial activities and/or continued monitoring efforts conducted at the commercial property at 1868 Linden Blvd, Brooklyn, NY. The results of this effort are summarized below: " Continued monitoring of the Subject Property has proved that a

MAP FINDINGS

CLOSED-LACKOF RECENT INFO (Continued)

S102959961

drastic reduction of free floating product levels had occurred on all on-site monitoring wells to non-measurable levels as of January 30, 2013; " The only groundwater monitoring well to periodically exhibit free floating product is the off-site MW-7 monitoring well. The recovery rate of product within the well is greater than 0.001 ft of product/minute. No free phase product was measurable as noted in January 30, 2013; " Based upon the removal of free-phase product and the non-resurgence of significant measurable product over the last few months (inclusive of the potential effects from Tropical Storm Sandy flooding), it appears that the product phase was likely trapped and may not re-occur; and " Based upon the results of the VEFR, continued monitoring program and absence of free phase product, in order to develop a final remedy for this property, Preferred proposed to conduct an updated round of groundwater sampling, inclusive of those wells that have not been sampled before, wherein product had formerly been present. This will enable a determination of what level/type of spill remediation is still required, as well as the best available and most appropriate technology to address the remaining dissolved phase impacts present in deep soils and groundwater. As per this recommendation, a new round of groundwater sampling was conducted on April 11, 2013, which is documented in this report. Groundwater samples were collected from ten (10) monitoring wells (MW-1, MW-2, MW-4, MW-6 (MW-15), and MW-9 to MW-14) on April 11, 2013. MW-7 (MW-161) was not sampled due to the presence of an intermittent sheen. Subsequent to the groundwater sampling of the existing wells across the study area, a measurement of water levels were recorded. During January 30, 2013 and April 11, 2013, no free phase floating product was identified in any of the ten (10) monitoring wells (MW-1, 2, 4, 6 (a.k.a. MW-15), MW-7 (a.k.a. MW-16), 9, 10, 11, 12, 13 and 14) evaluated, with the exception of the very limited and intermittent product noted at MW-7 (sheen to 0.01 foot). Depth to water ranged from 10.75 feet below grade surface (bgs) to 12.60+ feet bgs in April 2013. The highest concentrations of residual petroleum impacts to groundwater were detected in samples MW-1 (3,388 u/L), MW-13 (3,361 ug/L), MW-14 (2,509 ug/L), MW-2 (1,046 uL), MW-11 (1,989 u/L), with lower TVOC concentrations reported at the other wells. Preferred concludes that there is a clear correlation with the presence of remaining elevated TVOCs with respect to wells with prior history of free-phase product as measured in March 2, 2012. This specifically includes MW-1, MW-2, MW-13 and MW-14. Three wells are located next to each other and all are hydrogeologically downgradient of the dispenser islands. It is common for wells that previously contained free-phase floating product to continue to demonstrate slightly elevated concentrations due to the propensity for the former product to have coated the interior of the well screen and surface of the sand pack. A comparison of VOC concentrations in groundwater from April 2013 to the prior sampling round in March 2012 noted the following significant information: TVOCs decreased dramatically at MW-4 (from 184 ug/L to 27 ug/L); decreased to non-detect at MW-9; decreased from 1,476 ug/L to 327 ug/L at MW-10 with no oxygenates detected historically; a ten-fold decrease was reported at MW-11 from 11,820 ug/L down to 1,989 ug/L, with a low level new detection MTBE; very slight increase in MW-12 (less than one order of magnitude) of VOCs and oxygenates; decreased from 1,328 ug/L to 628 ug/L at MW-15 (MW-6), including a decrease in oxygenate concentrations. An evaluation of the April 2013 groundwater data with comparison to historical data clearly demonstrates a significant reduction in the

S102959961

presence of any residual floating product coupled with a large decrease in dissolved phase gasoline constituents. Based upon this information, Preferred recommends continuing monitoring of groundwater conditions on a semi-annual basis as an appropriate next step in the remedial process for this property. As free-phase floating product has virtually diminished, and dissolved phase concentrations have also decreased substantially due to the removal of product and continued natural attenuation, the next groundwater sampling round is proposed for October 2013. 07/14/2014: Called and spoke with B. Schlageter regarding site status update. He will contact site owner and get back to us. AD 01/2015: called and left a message to Mr. Schlageter. AD 06/28/2017: called and spoke with B. Schlageter. They did not work for the site for a long time. Will send a letter. AD"

Bilardy (River Manor). 2/11/04. J.Krimgold spoke to Ken (Empire Fuel). USA tank will excavate the top of the tank, isolate lines and retest. Ken should call me back with an update on 2/23/04. 2/19/04. Ken from Empire Fuel called and informed that after isolation of piping tank was retested and failed the test. They pumped out the tank and the facility is currently running on gas. They are planning to repair the tank and USA Tank will perform the site assessment. YK. 2/19/04. Contaminated soil letter has been sent to RUDY BILARDI (River Manor Care Center). YK. 6/9/04. J.Krimgold spoke to Mr. Bilardy. He stated that they have a signed contract with Empire Fuel to remediate the site. He should fax to me a letter report with investigation summary today. Subcontractor USA Environ. 6/9/04 J.Krimgold spoke to Ken Reed (Empire) @ (516)643-4910. He stated that a subcontractor USA Environmental performed a site investigation and will submit the report in 2-3 days. 11/01/04. J.Krimgold spoke to Ken Reed and requested the status of this site. Mr. Reed tolled that he was sure that an investigation report has been sent to DEC 2-3 month ago. He will check with USA Env. and get back to me. 11/16/04. The Department has reviewed the report dated July 12, 2004 submitted by ICET (201-933-2121) regarding abovementioned site. Based on the information provided, the petroleum release which was on this site has been satisfactorily cleaned up. NFA letter. "

Spiller Company: 001
Contact Name: VINCENT MARIO
DEC Memo: "12/08/05: This spill transferred from J.Kolleeny to S.Kraszewski.
01/20/06: Called Anjali Sahni from NYCHA Planning and Development to explain about the possibility of moving one or more MWs at this site for construction purposes. She had asked if they required any DEC permits, or guidelines that needed to be followed. I explained to her that there are no permits or guidelines for moving MWs on the site. They are the Housing Authority's wells and they can do whatever they want with them. I told her to keep in mind that the contamination still needs to be delineated on that site for future recovery efforts and monitoring. This spill will remain open until the DEC feels that the site poses no threat, and to do that MWs and investigations are necessary. I suggested that she talk to Ralph Trocchio from NYCHA Fuel Oil Remediation about this. She will get back to me next week. - SK 03/22/06: Visited on-site with NYCHA and Gannett Fleming personnel to discuss what possible remedial actions could address this site. Ivy Hidalgo-Olberding: Gannett Fleming Project Manager Cris Sawyer: NYCHA Oil Remediation Luis Ponce: NYCHA Assistant Director Ralph Trocchio: NYCHA Oil Remediation Burton Leon: NYCHA Deputy Director Four former fuel oil tanks were removed in 1999. Each stored #4 and #6 oil during operation. Currently, two USTs containing #2 oil are in place. In 1995, a subsurface investigation found several feet of heavy oil in the vicinity of the tanks. GF was on-site to assess the area for an up-coming subsurface investigation to delineate the plume and check GW quality. I told NYCHA and GF that since this oil is thick and the smear zone would last a long time the best remediation is excavation of the contaminated soil. Construction is planned on the adjacent lot, but before they begin work the site must be closed or remedial activity performed. Since the two operation tanks were installed in 1999, Ralph and Chris are considering excavating around the tanks. Shoring would be installed around the tanks for protection. They believe that since they were installed with clean fill and lack of oil in the perimeter wells is clean they could avoid removing the tanks. I told them they will have to be certain no heavy contamination exists beneath those tanks. I asked NYCHA to keep me up to speed on the site and to make sure that any work plans or documents submitted by GF reach my desk. GF will start soil borings by the end of the week and will continue on into next week. Expecting soil/GW sample results by April 15. - SK 07/20/06: Staff met with NYCHA personnel and developer staff to talk about remediation options for NYCHA. Since department staff have not been given a chance to review the investigation performed by Gannett Fleming (an investigation solely for the purpose of this development, not the

S102150012

entire site) it was difficult to narrow down what options are available. Overall, the Department suggested that any development extending into an area of known contamination would require a vapor barrier and sub-slab venting system. Also, NYCHA would have to take remedial step on their property to ensure that the contamination would not migrate any closer to the development. NYCHA is retaining most of the contaminated property but several parcels of the lot, which have contaminated soil, will be developed into housing. Staff would contact NYCHA once we have had a chance to review the investigation report. - SK 11/16/06: J.Kann - Staff met with NYCHA personell (Cris Sawyer) and Ivy Olberding of Gannett Fleming at the site. An ISRP was submitted and reviewed in September 2006. Delineation of the free-phase product plume was not complete. NYCHA was informed that a work plan must be submitted by November 30, 2006 which would include the delineation of the plume. Well locations were identified at the on-site meeting. 02/19/08: J.Kann - Met with HDP and NYCHA. NYCHA was informed that they need to submit a RAWP for the Linden site. They agreed to do this by spring 2008. 06/23/08: J.kann - Discussed site RAWP in a meeting with NYCHA and GF on 6/5/08. Draft RAWP for the site was submitted via email. 06/30/08: J.Kann - email sent to NYCHA as follows: Ralph - I reviewed the draft Remedial Action Work Plan prepared by Gannett Fleming for Linden Houses. The plan does address some of the items discussed in the meeting held with GF on June 5, but it is not complete. The installation of additional wells and borings were discussed at the meeting and are fine. However, at the meeting it also was discussed that GF was to prepare a proposal for remediation for the site, along with a professional discussion on why the remediation they selected for the site was best suited for the site. It was also my understanding that a fingerprint was going to be collected before preparation of the remedial work plan, because this would aid in selection of the remedial action. Continued product removal with monthly submittals may be adequate if other remedal options are not feasible. However, a discussion on feasibility needs to be included in the work plan. 08/08/08: J.kann. Received revised RAWP on 7/14/08. Comments sent in June 30 email were not addressed. Accepted report as an IRM with an increase of product removal on 7/22/08. Received Phase II report for the development parcel from NYCHA on July 29. Steve Malenowsky of CA Rich (516-746-8844) called on August 7. Questions were asked about DEC's role in the development of the parcel and he also had questions about specs that were prepared for the parcel. He wanted to know if DEP was the lead or DEC was the lead. DEC's involvement is related to the open spill, and it is not clear what HUD is looking for from the DEC. It is likely that a meeting will need to be held with NYCHA and DEC to discuss this. 10/21/08: J.Kann - Jacob Krimgold and Jennifer Kann met with NYCHA and Kretchner Developers on 9/08/08. Discussed the contamination on the 696 Stanley Avenue parcel. NYCHA expressed their need for a letter from the Department indicating that the adjacent properties are not affected. NYCHA was informed that a FOIL request should be submitted. A FOIL request was submitted on 9/23 and is being processed by Fawzy Abdelsadek. Recieved a call from Kristin Pagano of techtonic engineering (845)534-5959 and an email. She is performing a phase 1 on 610 Stanley Avenue. Told her NYCHA delineated the plume and based on the information we have it has not migrated. 2/4/15: J.Kann - sent an email to Yelena requesting an update. Have not received a quarterly report in two years. 06/05/2017: J.Kann - Spill reassigned to Andre Obligado. 8/9/17 - Obligado - I reviewed

Mike Haggerty 9/26/07 - Haggerty - approved moving back sampling one month this quarter. Station upgrade underway during the month of September would have prevented some wells from being sampled. Subsequent quarterly sampling will stay on previous schedule. 6/4/08 - Haggerty: sent approval of -Quarterly EFR events can be discontinued -MW's 12,14,16,17,20 can be removed from the sample network although they should be maintained as viable wells. I would like to continue sampling MW-7 as the sole upgradient well. 8/12/08 - Haggerty: reviewed QMR. Gave the following comments Kleinfelder states on the first page, A review of groundwater quality data indicates a generally decreasing trend in concentrations of both BTEX and MTBE in the MW's included in the sampling network with the exceptions of MW-5 and MW-18, which show fluctuating trends. I believe that MW-1, MW-4, and MW-19 concentrations fluctuate to an equal extent. MW-5 and MW-18 as well as MW-1, MW-4, and MW-19 are all located in the southeast portion of the site. Dating back to the mid-1980's, the south-southeast portion of the site has shown the greatest groundwater impact. Groundwater may be being feed by residual contaminated soil from the old 550gal tanks or a heavily contamination smear zone directly underneath the old 550's/current canopy. These fluctuations in groundwater concentrations lead me to believe this area will not naturally degrade in a reasonable time-frame. Up to this point, ExxonMobil has performed several remedial technologies to reduce contaminate concentrations. 11/20/08 - sent email to ExxonMobil requiring a Remedial Investigation Work Plan/ Feasibility Study must be submitted within 60 days. Kleinfelder intended to propose MNA. PM stated that MNA will not be sufficient considering the amount of residual contamination. 2/11/09 - Haggerty: approved Remedial Investigation work plan April 2010 Approved RegenOx Pilot Study to address remaining groundwater contamination April 15, 2009. PM on-site May 13, 2009 while injection points were being installed (10 injection points). Feasibility report approved but additional injection of RegenOx is warranted to determine is this technology is viable. Mixed results encountered after the initial Pilot test. Additional injection took place in 2/10. PM reviewed 2nd injection report. Additional groundwater monitoring needed to evaluate effectiveness May 2010 Final determination of whether RegenOx is a viable remedial technology still pending. Additional groundwater monitoring required August 2010 - Site Status Update/ Feasibility Report under review Oct.2010 - A work plan is due 11/13/10 (SD) January 2011 - site divested to BOLLA EM REALTY February 2011 - SI work plan under review March 2011 - Approved work plan to delineate soil contamination in the eastern portion of the site. RegenOx injections had no effect on dissolved conc June 2011 - reviewed soil investigation report. contamination confirmed to be limited to the saturated zone. Arcadis will evaluate of the feasibility of using the SVE/AS components remaining on-site to determine whether its stall viable. Feasibility report will be included in the next SSUR Sept. 2011 - Arcadis intends to retrofit the existing SVE/AS infrastructure and install more AS wells in the southeast corner. RAP due in 45days November 2011 - received RAP/CAP for SVE/AS December 2011 - approved RAP/CAP with conditions. Bolla has CO for this site. Water table dropped ~1.5ft causing LNAPL to re-appear. New SPill called in until fingerprinting confirms age of product February 2012 - SSUR due this month. LPH fingerprinting will be included. April 2012 - SSUR and fingerprinting data was not sufficient proof that the product was from a new release. The water table dropped significantly and

S102672574

residual LNAPL trapped within smear zone pore space was liberated June 2012 - SSUR under review. August - installation of new SVE/AS system underway December 2012 - CAP is under review. This is a Bolla site and already has a CO under the global order 1/7/13-spoke with Dave Tracy from Arcadis. he has revised the CAP per my comments and the CAP is with Bolla's attorney. I told him it would be best to have this approved by before I go out on medical leave May 2013 - Arcadis is currently renting a SVE trailer. Plans to improve the system underway October 2013 - trenching for the new SVE/AS system will begin 11/4/13. Additional system wells have already been installed June 2014 - Haggerty: Last update was incorrect. SVE/AS system installed but ConEd is dragging their feet to give the system the final approval to turn the system on. August 2014 - Haggerty: system operational. September 2014 - Haggerty: AS component of the system shutdown until it could be reprogramed. The system couldn't maintain the 0.5lbs/hr effluent limit with the full SVE/AS system operating. The system will be programmed to cycle through the AS wells rather than all operating at once at least until the influent concentration decreases significantly. January 2016 - Haggerty: approved temporary shutdown of system to monitor for rebound."

Remarks: "SPILL ON PAVEMENT & INTO STATION CATCH BASIN-CONTAINED IN CATCH BASIN-UNK CONTRACTOR ENROUTE-TYREE IS PRIMARY CONTACT"

Site Description: Location: The 50,000 square foot (1.38 acre) site is located at 350 DeWitt Avenue, Brooklyn, NY in an urban area. The site is bordered by DeWitt Avenue and single-family residential units to the north, by Hinsdale Street to the east, by a one story industrial/manufacturing

MAP FINDINGS

350 DEWITT AVE (Continued)

U000406087

building to the south, and by Snediker Avenue and single- and multi-family residential units to the west. Site Features: The site is occupied by a 1 story manufacturing facility. There is asphalt-oaved parking along the east side of the site building. Current Zoning/Use(s): The site is zoned as M1-1, and is surrounded by industrial, commercial and residential uses. Historical Use(s): The Site is an industrial building that houses manufacturing of plumbing and lighting fixtures, bathroom accessories and hardware for commercial and residential markets. A former employee at Watermark reported that the company was illegally dumping industrial waste into the New York City sewer system. During the metal-plating process, waste water containing metals such as Copper, Zinc, Chromium, and Silver is generated. Proper disposal of the waste water requires a costly, multi-step process that ensures any solid toxic materials be removed by a regulated waste-hauler. Watermark instead disposed of the industrial waste water, which included the hazardous metals, through a hose inserted in a floor drain. NYCDEP obtained water samples from within the floor drain and the results showed high levels of metals including but not limited to Copper, Zinc, Chromium, and Silver. NYCDEP personnel noted that when they went to sample the floor drain, they encountered soil in the drain, suggesting that the drain is physically compromised and partially open to the underlying soil. Site Topography, Geology and Hydrogeology: Fill material is encountered to five feet bgs, underlain by layers of fine to medium silty sand and silt. Groundwater is encountered at about 10-12 feet bgs. In general, groundwater flow direction is southerly of the site. Not reported

Env Problem:

Nature and Extent of Contamination: Information is based on the results of water samples collected by NYCDEP during the preliminary investigation of the site. TCLP lead was found at concentrations of up to 53.8 ppm and TCLP nickel was found at concentrations of up to 5.5 ppm. Analysis for total metals found cyanide at up to 107 ppm, lead at up to 500 ppm, chromium at up to 327 ppm, selenium at up to 372 ppm, nickel at up to 53.6 ppm, arsenic at up to 4.4 ppm, and barium at up to 124 ppm. The floor drain s discharge line was traced in July 2012 and found to enter the main house trap and discharges to the municipal sewer on the northern side of the site. In September 2013, a preliminary site characterization was completed in accordance with the NYSDEC required scope of work. Work was completed within the time frame specified in the scope of work. Seven borings were completed along the drain line, and soil and groundwater samples were collected to determine subsurface conditions in this portion of the site. All samples were analyzed for VOCs and metals (total and dissolved). In general, fill material was encountered to five feet bgs, underlain by layers of fine to medium silty sand and silt. Groundwater was encountered at 10-12 feet bgs. No VOCs were detected in the soil samples above the 6 NYCRR Part 375 industrial SCOs. Only TCE exceeded the groundwater standard at one location (9.8 ug/l). No metals were detected in the soil samples above the industrial SCOs. Total metals in groundwater were generally above the standards, but dissolved metals were well below the standards. The exception to the groundwater results was iron, manganese and sodium, where results for dissolved metals were above the groundwater standards. This is typical for groundwater in this area. Based on these data results, the site classification was changed from P to N . Significant Threat: Based on the data results discussed above, it was determined that no significant threat exsits at the site and no further action is

Updated By: SXDEWES

Site Description: Location: The site is located on the southeast corner of Elton Street and Wortman Avenue, Brooklyn, NY 11208. The full extent of the site is unknown. Site Features: The full extent of the site has yet to be identified. Current Zoning and Land Use: The full extent of the site has yet to be identified. The surrounding properties are mixed commercial and industrial, as well as residential properties comprised of single and multi-family homes. Past Use of the Site: The full extent of the site has yet to be identified. The surrounding neighborhood has been developed since the 1900's and utilized for commercial, industrial and residential uses. Site Geology and Hydrogeology: The site is located over the Long Island aquifer system, which underlies all of Nassau, Suffolk, Kings(Brooklyn), and Queens Counties. The unconsolidated aquifer formations form a southward-dipping wedge that attains a maximum thickness in Kings County about 800 feet in the southeast area of Brooklyn. Overlying bedrock is the Lloyd, Magothy, Jameco, and Upper Glacial aquifer systems. The lithologic description of sediments from soil borings identifies the material as fill to approximately five feet below grade, underlain by layers of fine to medium silty sands and silt. Groundwater at the site is encountered at approximately 11 feet below grade. Groundwater beneath the property is class GA denoting potential use as potable water. The site lies within New York City, which utilizes reservoirs from upstate New York as sources of potable water.

Env Problem: Groundwater: Wells were installed in Fall of 2014 to assess the off site plume of Brownfield Cleanup program(BCP) site C224139, Former Watermark Design Facility (FWDF). During baseline sampling in November 2014, monitoring well MW-13S returned concentrations of Chlorinated Volatile Organic Compounds (CVOCs). Among the CVOCs returned within the analysis were dissolved phase Tetracholoethane, 1,1,1-trichloroethane, and 1,1-dichloroethane. Since the aforementioned CVOCs were not characteristic of FWDF and nature of the FWDF plume is sinking prior to MW-13s, this potential site was created. MW-13S was analyzed for CVOCs in April 2016 and October 2016 as well. Each sample collected showed increasing concentrations of Tetracholoethane, 1,1,1-trichloroethane, and 1,1-dichloroethane.

Health Problem: As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns.

Site Description: Location: The site is located at 491 Wortman Ave in the Spring Creek section of Brooklyn, a mixed industrial and manufacturing area. Site Features: The site is occupied by a one story commercial building that occupies the entire lot and is comprised of three warehouse sections referred to as Building 1, Building 2 and Building 3. The building is approximately 19,000 square feet and the site is 0.44 acres in size. Current Zoning: Manufacturing and industrial buildings surround the site to the north, south, east and west. The closest residential units are 0.08 miles to the west-southwest. Historical Uses: The site was formerly utilized as a metal etching company, a steel tube manufacturing company, and a plumbing faucet/fixture company. Since approximately 1985, the site has been owned and operated by Watermark Designs Ltd. to manufacture, store, package, and ship decorative fixtures, bathroom accessories, and hardware. Manufacturing processes on the property included cleaning, painting, plating, etching, polishing, and specific machining of metals and metal products. Cleaning agents such as TCE and PCE were "routinely used" by Watermark Designs to fine clean and polish metals and metal products. The site is currently leased to a religious group that gathers at the site several times per week. Watermark Designs Ltd. relocated to a new location, 350 Dewitt Avenue, Brooklyn in or around 2007. In 2008, the site was put on the "open market" for sale. Site Geology and Hydrogeology: Subsurface geology is comprised of historic fill materials overlying

S109374287

native sands. Groundwater is approximately 15 ft below ground surface. The direction of groundwater flow can not be determined after one round of groundwater measurements. Other: One TCE degreasing tank was removed from the site however details including the tank size and dates of removal have not been determined. There are no PBS or CBS registrations for the site. One fuel oil AST of unknown size encased in concrete blocks is also located in the basement of the site. Also, floor drains were observed in the building. The following reports have been submitted to date: Supplemental Subsurface Investigation Report dated December 2008; Limited Subsurface Investigation Report dated February 2009; a Phase II Environmental Site Assessment dated January 2009 and a Environmental Services Report Proposed Corrective Action and Remedial Investigation Work Plan dated July 2009. A final Site Characterization work plan was approved in February of 2011. Draft Site characterization reports have been reviewed. The Department and site owner executed a "P site" investigation Order on Consent and Administrative Settlement. For more information, see Site # C2-24-139

Env Problem:

A site characterization (SC) was performed in 2011. Results detailed in the draft SC Report indicate soil, groundwater and soil vapor are impacted by chlorinated volatile organic compounds (CVOCs) and, to a much lesser extent, petroleum-related compounds. Concentrations of CVOCs in soil samples collected in 2011 are below commercial soil cleanup objectives (SCOs) but exceed the protection of groundwater SCOs. Concentrations of CVOCs in groundwater samples collected in 2011 significantly exceed groundwater standards with magnitudes greater than 1 ppm in half of the monitoring locations and a maximum concentration of 3.5 ppm for PCE and 2.3 ppm for TCE. Based on concentrations of CVOCs at the site boundaries, contamination likely is migrating off-site. Concentrations of CVOCs (primarily TCE) in multiple subslab soil vapor samples exceed 100,000 ug/m³. TCE appears to be migrating into the on-site building as results from indoor air samples show detections between 140 and 250 ug/m³. The magnitude of CVOC concentrations in the groundwater indicate the potential for DNAPL at the site. Previous phase II investigations indicated magnitudes of contamination in soil and groundwater to be an order of magnitude or two higher.

Site Description:

Site Location: The Former Watermark Designs Facility (site) is located at 491 Wortman Avenue in Brooklyn, NY, Kings County. It is identified as block 4384, lots 31 and 36 on the Kings County Tax Maps and is approximately 0.44 acres in size. It is bounded by a one-story building to the north, Wortman Avenue to the south, Essex Street to the east, and Linwood Street to the west. The nearest body of water is Hendrix Creek, which is about 0.5 miles southwest of the site.
Site Features: The site consists of a one story brick and steel building, with a partial basement, that occupies the entire area of the property. The majority of the building, except for the partial basement, rests on concrete slab. The interior of the building is divided by a wall into east and west areas. No exposed soil or vegetation is present on the subject property. Current Zoning and Land Use: The vacant site is located in an urban setting characterized by industrial buildings to the north, east, and south and residential buildings to the west. Land use within a half mile of the site is primarily industrial and residential, but also includes public parks, public institutions, day care centers, and school facilities. The site is zoned for industrial/manufacturing uses. There is no current plan for redevelopment of the site. Past Use of the Site: US Tube and Foundry Company, Inc. operated at the site between 1945 and 1973. The National Hanger Company, Inc. operated at the site in 1976. J and H Holding Company, LLC has owned the property since 1983 and manufacturing activities continued until 2007. The site previously manufactured, stored, packaged, and shipped decorative fixtures and hardware for bathrooms and kitchens.

491 WORTMAN AVENUE (Continued)

S109374287

Env Problem:

Processes involved cleaning, painting, plating, etching, polishing, and specific machining of metals and metal products. A cleaning and degreasing area was located along the west side of the building. Chlorinated solvents, specifically trichloroethylene (TCE) and tetrachloroethylene (PCE) were used in the manufacturing process to clean various products. Currently, the western portion of the site building is used as a warehouse to store sound equipment, and the eastern portion is unoccupied. Site Geology and Hydrogeology: The soil profile at the site generally consists of 2 to 5 feet of miscellaneous uncontrolled fill underlain by medium to fine sand with some gravel. The estimated depth to groundwater is about 10 feet below grade surface (bgs). Based on local topography, groundwater is expected to flow to the southwest towards Hendrix Creek.

For OU1: On-Site Areas Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based upon investigations and an interim remedial measure (IRM) conducted to date, the primary contaminants of concern include trichloroethene (TCE) and tetrachloroethene (PCE) in groundwater, sub-surface soil and soil vapor at the site and at some near-field off-site locations. An off-site investigation conducted further downgradient of the site determined that VOC contamination in groundwater and soil vapor in the far-field locations is not related to the site. (A characterization of the far-field contamination is currently being conducted by the Department as part of a separate remedial program.)

Soil: In 2013, site-wide soil sampling was completed. The maximum concentration of TCE was detected at 12,000 parts per million (ppm) at one location from within the truck scale pit area, at a depth of 0 to 2.5 feet. This exceeded the TCE commercial use soil cleanup objective (SCO) of 200 ppm. Arsenic, lead and mercury also exceeded the commercial use SCOs in samples collected from the pit area samples at 0 to 2 feet deep. All other contaminants were below the commercial use SCOs. No impacts to off-site soils were detected.

Groundwater: In 2015, the highest concentrations of TCE (1,800 ppb) and PCE (750 ppb) were detected at two shallow wells near the truck scale pit area. At the near-field off-site wells, which are both shallow wells, the maximum concentration of TCE was 780 ppb and PCE was 710 ppb. Concentrations of PCE and TCE have decreased at all other on-site and near-field monitoring wells since implementation of the AS/SVE system. Adjustments were made to the AS/SVE system to address these concentrations of TCE and PCE at the near-field off-site wells.

Soil Vapor, Sub-Slab Vapor and Indoor Air: In 2013, indoor air in the area of the truck scale pit was 2 g/m³ for TCE and 13 g/m³ for PCE. Sub-slab concentrations in this same area were 26,500 g/m³ for TCE and 568 g/m³ for PCE. Indoor air samples were also collected from the east side of the site building (former office and congregation areas). In the congregation areas, TCE in indoor air ranged from 64.5 g/m³ to 214 g/m³ and PCE ranged from 3.8 g/m³ to 8.88 g/m³. In the office area, TCE in indoor air ranged from 83 g/m³ to 138 g/m³ and PCE ranged from 6.98 g/m³ to 10.3 g/m³. In 2014, off-site soil vapor sampling was completed in conjunction with off-site groundwater sampling (access was not granted to any off-site buildings). TCE in soil vapor ranged from 12 to 2900 g/m³ and PCE ranged from 110 to 500 g/m³. The highest concentrations were seen at the same locations where TCE and PCE concentrations were highest in shallow groundwater. In 2015, an IRM was implemented to address soil,

Health Problem: groundwater and soil vapor contamination from chlorinated VOCs. The IRM included installation and operation of an air sparge and soil vapor extraction system. To date, the system has effectively decreased concentrations of chlorinated VOCs in groundwater and soil vapor and continues to operate. As of January 2017, the maximum PCE and TCE concentrations in groundwater at the site were 19 ppb and 10 ppb, respectively. Based on initial investigations and data, NYSDEC and NYSDOH determined that the site presented a significant threat to public health and the environment. People may contact contaminants in the soil if they dig below the buildings. People are not drinking contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Actions have been recommended to address soil vapor intrusion in the on-site structure in the event that the building is routinely occupied. Soil vapor intrusion is a concern for off-site structures; however, access to investigate has been denied at off-site structures.

DEC Memo:

"08/15/09-HRAHMED- As per PropertyShark records: Street address: 491 Wortman Ave Primary address: 1009 Linwood St Zip 11208 Borough Brooklyn Block & lot 04384-0036 First 3 alt addresses 481-491 Wortman Ave, 1009-1019 Linwood St 1/26/10-Vought-File review by Vought: Supplemental Subsurface Investigation Report (PW Grosser-John Eichler-Ph:631-589-6353)-12/9/08. Sent to: Mr. Jack Abel Watermark Designs 350 Dewitt Avenue Brooklyn, NY 11207 Site has one commercial building that covers entire area of property. Site formerly used as a metal etching company, steel tube manufacturing company and a plumbing faucet/fixture company. Possible plating pit in northwest corner of building. Phase II shows elevated TCE in soil collected from northwest portion of building . Attempts made to dye flush test floor drain in bathroom but drain was blocked but drain appeared to lead to a sewer connection pit which discharges to the municipal sewer . Fuel oil AST encased in concrete block in the basement and soil samples below AST shows that soils were not impacted . Plating pit later discovered to be a loading/bay truck scale. Based on conversations with the current owner of the property, the sources of TCE appears to have been a TCE degreasing tank with was formerly located directly to the south of the former loading bay/truck scale. Report recommends additional soil and groundwater investigation via soil borings. Proposal of soil boring investigation to delineate contamination via Geoprobe collection of soil and groundwater samples. Delineation will also include vertical profile of groundwater contamination to a depth of 50'bg (i.e collection of vertical groundwater samples at 10 foot intervals from 10-50'bg to study DNAPL). Cost estimate included in proposal. EnviroTrac Limited Subsurface Investigation Report (EnviroTrac-David Lorthior-631-924-3001)-2/1/09. Seven soil boring and one well were installed including collection of five groundwater samples. Borings installed via Geoprobe. Fill from 6-8'bg and sand below. Soil analyticals show: 2400ppb TCE (B2 8-10'bg), 2000ppb TCE (B3 0-5'bg), 8800ppb TCE(B4 6'bg), 14000ppb TCE(B7 2-5'bg), 5000ppb PCE(B7 2-5'bg), 4400ppb TCE(B8 3-5'bg), 3300ppb TCE(B8 7-7.5'bg). PCE not used at site and suggests that a possible source associated with the prior usage of he building could be repsonsible for the impacted soil in this area. Depth to groundwater is 12'bg. Groundwater analyticals show:54ppb TCE(B2 15'bg), 91ppb PCE(B2 15'bg), 5700ppb TCE(B5 15'bg), 510ppb PCE(B5 15'bg), 36ppb TCE(B5 25'bg), 97ppb PCE(B5 25'bg), 14ppb TCE(B5 35'bg), 26ppb PCE(B5 35'bg), 18ppb TCE(B5 45'bg), 38ppb PCE(B5 45'bg). Report recommends submission of a Remedial Investigation Work Plan. No petroleum contamination found at site. Phase II Environmental Site Assessment (PW Grosser John Eichler Ph:631-589-6353)-1/13/09. Seven soil borings were installed at site in Nov 2008 via Geoprobe. Groundwater at 10'bg and two samples collected for analysis. Groundwater flow estimated to south. Fuel and vent noted leading to AST in basement. One boring installed adjacent to UST with no petroleum staining observed. Floor drain dye test resulted in determination drain was clogged. Boring B-02 was located in the reported vicinity of a former TCE degreasing tank. Based on this, the degreasing tank appears to be the source of TCE in the soil . Soil analyticals show: 201ppb MTBE (GP2 8-10'bg), 18900ppb TCE(GP-02 0-2'bg), 63100ppb TCE(GP-02 8-10'bg). Groundwater analyticals show: 24000ppb TCE(GP1), 544ppb PCE(GP1) 7ppb DCE(GP1), 78ppb PCE(GP4), 24ppb TCE(GP4). Report recommends further investigation to delineate contaminaton and that indoor air quality be evaluated and that AST be properly closed. Environmental Services

Report Proposed Corrective Action and Remedial Investigation Work Plan(Impact Environmental-Tony Kloss-Ph:908-534-8820)-7/10/09. Prepared for Watermark Designs. Onsite building has three sections and properly is currently vacant and unoccupied. Building owned by Watermark Designs for past 25 years to manufacture, store, package and ship hardware, bathroom fixtures. Onsite processes included painting, plating, etching, polishing, and machining. Cleaning agents, such as trichloroethylene(TCE) and tetrachlorethylene(PCE) were routinely used by Watermark Designs, Ltd. at the subject property to fine clean and polish metals and metal products. Watermark purchased new property at 350 Dewitt Avenue and moved and looking to sell this site. Proposal to isolate each building section and excavated contaminated soil. It is estimated that a total of approximately 400 tons of chlorinated VOC contaminated soil will be excavated from two designated work areas in Building 1... . Work activities will include the evacuation of as much chlorinated VOC contaminated groundwater as is safe and practical with estimates of removal of 18,000 gallons of contaminated groundwater. Proposal to collect endpoint soil and bottom groundwater samples and submit results report. Email from Abel to DEC Ahmed-12/3/09. I'm following-up on our most recent conversation about the NYSDEC Spill Case No. 0809879 assigned to 491 Wortman Avenue, Brooklyn, NY. Were you able to identify and/or obtain a copy of the NYSDEC correspondence issued to Mr. Jack Abel from Watermark Designs Ltd. for the subject property? Watermark Designs Ltd. received some type of NYSDEC correspondence about the subject property but misplaced the letter. The NYSDEC correspondence would have been dated late October 2009 or early November 2009. Our firm advised Watermark Designs Ltd. that the subject property is the first site assigned to a new program within the NYSDEC system for hazardous TCE and DNAPL type contaminant investigation and corrective action. As a responsible party and environmental steward, Watermark Designs Ltd. is prepared to move forward with the scope of work presented in the Proposed Corrective Action and Remedial Investigation Work Plan prepared by our firm and dated 10 July 2009. Watermark Designs Ltd. would like to start the project as soon as possible. Please provide our firm and/or Mr. Jack Abel at Watermark Designs Ltd. withan update concerning the project at your earliest convenience. I included Jack Abel's contact information below. Thank you for your time and attention to the matter. Mr. Jack Abel Watermark Designs Ltd. (p) 718.257.2800, Ext. 20 (f) 718.257.2144 (e) jabel@watermark-designs.com Email from Impact (Kloss) to DEC Ahmed-1/5/10. We spoke approximately four (4) weeks ago concerning thecorrective action project for Watermark Designs Ltd. at 491 Wortman Avenue, Brooklyn, NY. Did you have an opportunity to issue an update letter or e-mail to Mr. Jack Abel from Watermark Designs Ltd concerning the project? Also, what is the status of the consent order for the project? When last we spoke in early December 2009, you indicated that the consent order would be issued to Mr. Jack Abel within three (3) to four (4) weeks. DEC possibly requires: 1)P-Site letter 2)Check PBS for AST registration 3)delineation of chlorinated solvent soil and groundwater contamination 4)possible approval of proposal to evaluate indoor air (property vacant as per 7/09 report). 1/26/10-Vought-Meeting with DEC Krimgold and Austin. Spill reassigned from Ahmed to Vought. 1/28/10-Vought-Received email from Abel that Good morning. I'm following up on our conversation yesterday morning and the internal NYSDEC meeting you had for the contaminated soil and groundeater project at 491 Wortman Avenue,

Brooklyn, NY. When you have a moment today (Thursday, 28 January 2010), please provide a brief update for the proposed project at the subject property. The update can be forwarded to me and/or Mr. Jack Abel of Watermark Designs Ltd. Contact information for Mr. Jack Abel is below. 02/2/10-Vought-Received message from Kloss (908-534-8820) and returned call and left message. 02/5/10-Vought-Received message from Impact (Kloss) and returned call and left message to return call. 02/10/10-Vought-DEC O'Connell preparing Class II package. Site code received from DEC Spath as: Site Remediation Code:224139 T&A Code:65335 2/11/10-Vought-Received message from Impact (Kloss cell:908-623-0310) and returned call and spoke to Kloss and informed him of reclassification of site as Class II site. Vought also provided him contact info for DEC Oliva for further information regarding Class II CO and possibly beginning of soil excavation. Kloss noted that he had suspected the site would be listed as Class II and has already prepared Watermark Designs for such possibilities. Vought to complete Remediation Database so that DEC O'Connell can designate new Section A project manager. Received email from Impact (Kloss) that again, thank you for the phone call concerning the latest administrative information for 491 Wortman Avenue, Brooklyn, NY. The initial information is very much appreciated and will be a great help to our client (Watermark Designs Ltd.). Our firm will be reviewing the information with the client tomorrow morning. 2/12/09-Vought-Obtained Lat and Long from Google Earth as:40deg39min40secN and 73deg52min32sec W. Note Google earth based on same datum as DEC GIS system used by DEC O'Connell. Area of lot is .44 acres as per Report and .218 acres when using dimensions from 491 Wortman deed only. Vought to use acreage as per Report as site may encompass other addresses in addition to 491 Wortman. Vought spoke to DEC Barrie and provided acreage of .44 acres and she also will transfer E-docs into UIS database. 02/15/10-Vought-Received email from Kloss to DEC Oliva that Late last week I spoke with Mr. Jeffery Vought (NYSDEC Liaison at this point) concerning the NYSDEC Remediation Case Site Code 224139 assigned to the hazardous waste site project at 491 Wortman Avenue, Brooklyn, NY. Mr. Vought provided a much anticipated update and NYSDEC agency contact information. During the conversation Mr. Vought requested that the owner/operator of the subject property (Mr. Jack Abel - Watermark Designs Ltd.) contact you to discuss a Stipulation Agreement/Consent Order for the project. I was informed that Mr. Abel is out of his office this week and will return on Monday, 22 February 2010. I'm certain Mr. Abel will contact you shortly after his return to the office. 3/11/10-Vought-DEC Oliva sent draft CO to Kloss and Abel. 3/15/10-Vought-Meeting with DEC O'Connell and DEC Austin and spill manager transferred to DEC O'Connell for further action. "

Remarks: "CALLER STATES THAT THEY RECIEVED SOIL BORING SAMPLES BACK TODAY INDICATING CONTAMINATED SOIL AND GROUND WATER. CLEAN UP IS PENDING."

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017	Source: EPA

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENV RES DECL: Environmental Restrictive Declarations

The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SE
Site Name:	PENNSYLVANIA/FOUNTAIN AVE LF
Site EPA ID Number:	NY6141790018
Groundwater Flow Direction:	TOWARD JAMAICA BAY.
Measured Depth to Water:	approximately 5 to 10 feet above mean sea level.
Hydraulic Connection:	Detailed hydraulic connection information is not available. The site is underlain by silt, sand, and gravel to a depth of approximately 55 feet. The Gardiners Clay unit underlies the upper silt, sand, and gravel, and is estimated to be 20 feet thick.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Pleistocene
Code: Qp (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Dear Sir or Madam

We hereby acknowledge receipt of your Freedom of Information Law ("FOIL") request. Your request is important to us and will be handled as expeditiously as possible. Please be advised however, that because of the large volume of pending complex FOIL requests handled by the Department of Environmental Protection ("DEP"), and the available staffing, your response is anticipated to take between 120-150 days from the date of this acknowledgement.

Please also be advised that for requests that appear to be submitted in connection with a Phase I site assessment of a property, DEP's response will exclude records relating to asbestos, and discharges into the sewers, as non-scope items, unless the FOIL request explicitly asks for those records. To the extent you require this information, please specify so in the FOIL request. In addition, any information on boiler permits filed with DEP is already publicly available at the following website <https://a826-web01.nyc.gov/DEP.BoilerInformationExt/>. Accordingly, DEP's response assumes you have directly obtained any relevant records from that website, and will exclude those records, as well.

Sincerely,
Records Access Officer

Langan Engineering

Re: 12020 Flatlands Ave Brooklyn, NY

Dear Matthew Oleske:

We write to inform you that a search of records maintained by The Division of Emergency Response and Technical Assessment, (DERTA) yielded documents responsive to your FOIL request. Your request is granted. Copies of records responsive to your request and to which you are entitled access are enclosed.

Please be advised that a search of records maintained by DERTA was made and records you requested were not found.

In the event that you disagree with this determination, you may appeal it within 30 days, by writing to:

DEP FOIL Appeals Officer
NYC Department of Environmental Protection
59-17 Junction Blvd., 19th Floor
Flushing, NY 11373

FOIL 166628

Sincerely,

P. Abbott

Request Confirmation

Request Information

Tracking Number : [EPA-R2-2018-003366](#)

Requester Name : Matthew Oleske

Date Submitted : 01/15/2018

Request Status : Submitted

Description :

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your department may have regarding the property at 12020 Flatlands Avenue Brooklyn NY (Block 4430, Lot 1; Block 4431, Lots 1 and 200; Block 4432, Lot 1; and, Block 4434, Lot 1) The property is bordered by Flatlands Avenue to the north, Pennsylvania Avenue to the east, an active construction site to the south, and Louisiana Avenue to the west on the land parcels identified by the above New York City tax map lot numbers. According to the information we have available at this time, the site is currently occupied by the two-story Christian Cultural Center building constructed in 1997, and surrounding parking lot at street level. Block 4434, Lot 1 remains an undeveloped vacant lot. Based on records maintained online by the City Planning Commission, the subject property is zoned for residential use (R5). According to the New York City Department of Finance (NYC DOF), the site is currently owned by Christian Cultural Center Inc.

January 17, 2018

Dear Matthew Oleske,

EPA-R2-2018-003366 has been processed with the following final disposition: Full grant.

This is in response to your Freedom of Information Act (FOIA) request, identified above, dated 01/15/2018, that you submitted to the U.S. Environmental Protection Agency (EPA). Your request seeks to obtain the environmental conditions at the following property:

12020 Flatlands Avenue Brooklyn NY (Block 4430, Lot 1; Block 4431, Lots 1 and 200; Block 4432, Lot 1; and, Block 4434, Lot 1)

The information that you are seeking is publicly available on EPA's *MyPropertyInfo* online database. The database will provide you with information concerning records the EPA has about a specific property, and it can be accessed at the link below:

<https://www.epa.gov/enviro/frs-query-page>

Because this information is publicly available, your FOIA request for this information is being administratively closed, in accordance with EPA's FOIA regulations. See 40 C.F.R. Part 2, Subpart A. ***Please note you should perform the initial search of a property of interest by visiting the above link. If your search produces results, then proceed with an information request for additional records under FOIA. Your FOIA submittal should be accompanied by these results.***

If you consider this response to be a denial of your request, you may appeal this determination to the National Freedom of Information Office, U.S. EPA, 1200 Pennsylvania Avenue, N.W. (2822T), Washington, DC 20460 (U.S. Postal Service Only). Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, N.W. If you are submitting your appeal via hand delivery, courier service, or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, N.W., Room 6416J, Washington, DC 20001. Your appeal must be made in writing, and it must be received no later than 90 calendar days from the date of this letter. The Agency will not consider appeals received after the 90 calendar day limit. Appeals received after 5:00 pm EST will be considered received the next business day. The appeal letter should include the FOIA tracking number listed above. For quickest possible handling, the subject line of your email, the appeal letter, and its envelope, if applicable, should be marked "Freedom of Information Act Appeal." Additionally, you may seek assistance from EPA's FOIA Public Liaison at hq.foia@epa.gov or (202)566-1667, or from the Office of Government Information Services (OGIS). You may contact OGIS in any of the following ways: by mail, Office of Government Information Services, National Archives and Records Administration, Room 2510, 8610 Adelphi Road, College Park, MD 20740-6001; e-mail, ogis@nara.gov; telephone, 301-837-1996 or 1-877-684-6448; and facsimile, 301-837-0348.

Please contact Ms. Wanda Calderon of my staff if you have web access difficulties. This letter concludes our response to your request. Thank you for your interest in this information.

Respectfully,

/s/

Dear Mr. Oleske:

This will acknowledge receipt of your request for records under the Freedom of Information Law, received by this office on January 15, 2018.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

A determination as to whether your request is granted or denied will be reached in approximately 20 business days or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble, and review documents that may be responsive to your request.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

Rosemarie Hewig, Esq.

Re: Christian Cultural Center
County: Kings Town/City: Kings

Dear Mr. Oleske:

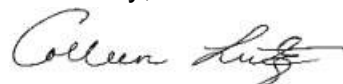

In response to your recent request, we have reviewed the New York Natural Heritage Program database with respect to the above project.

We have no records of rare or state-listed animals or plants, or significant natural communities at the project site or in its immediate vicinity.

The absence of data does not necessarily mean that rare or state-listed species, significant natural communities, or other significant habitats do not exist on or adjacent to the proposed site. Rather, our files currently do not contain information that indicates their presence. For most sites, comprehensive field surveys have not been conducted. We cannot provide a definitive statement on the presence or absence of all rare or state-listed species or significant natural communities. Depending on the nature of the project and the conditions at the project site, further information from on-site surveys or other resources may be required to fully assess impacts on biological resources.

This response applies only to known occurrences of rare or state-listed animals and plants, significant natural communities, and other significant habitats maintained in the Natural Heritage database. Your project may require additional review or permits; for information regarding other permits that may be required under state law for regulated areas or activities (e.g., regulated wetlands), please contact the NYS DEC Region 2 Office, Division of Environmental Permits, as listed at www.dec.ny.gov/about/39381.html.

Sincerely,

Colleen Lutz

January 15, 2018

Consultation Code: 05E1LI00-2018-SLI-0200

Event Code: 05E1LI00-2018-E-00437

Project Name: CCC

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF>

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the wind energy guidelines (<http://www.fws.gov/windenergy/>) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm>; <http://www.towerkill.com>; and <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Project Summary

Consultation Code: 05E1LI00-2018-SLI-0200

Event Code: 05E1LI00-2018-E-00437

Project Name: CCC

Project Type: ** OTHER **

Project Description: Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the property at 12020 Flatlands Avenue Brooklyn NY (Block 4430, Lot 1; Block 4431, Lots 1 and 200; Block 4432, Lot 1; and, Block 4434, Lot 1)

The property is bordered by Flatlands Avenue to the north, Pennsylvania Avenue to the east, an active construction site to the south, and Louisiana Avenue to the west on the land parcels identified by the above New York City tax map lot numbers. According to the information we have available at this time, the site is currently occupied by the two-story Christian Cultural Center building constructed in 1997, and surrounding parking lot at street level. Block 4434, Lot 1 remains an undeveloped vacant lot. Based on records maintained online by the City Planning Commission, the subject property is zoned for residential use (R5). According to the New York City Department of Finance (NYC DOF), the site is currently owned by Christian Cultural Center Inc.

Project Location:

Approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/place/40.65121791360481N73.88799969698621W>

Counties: Kings, NY

Endangered Species Act Species

There is a total of 4 threatened, endangered, or candidate species on this species list. Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

Birds

NAME	STATUS
Piping Plover <i>Charadrius melodus</i> Population: [Atlantic Coast and Northern Great Plains populations] - Wherever found, except those areas where listed as endangered. There is final critical habitat for this species. Your location is outside the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/6039	Threatened
Red Knot <i>Calidris canutus rufa</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/1864	Threatened
Roseate Tern <i>Sterna dougallii dougallii</i> Population: northeast U.S. nesting pop. No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/2083	Endangered

Flowering Plants

NAME	STATUS
Seabeach Amaranth <i>Amaranthus pumilus</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/8549	Threatened

Application for Records Under FOIL

FOIL Request Form

Please complete the form below. If responsive records are located, you will be notified and informed of the required payment. Advance payment is required in check or money order payable to the NYC DEP at a cost of \$.25 per page, or actual cost of reproduction before documents will be released. Before you submit the request, please save a copy of your completed request for your records.

Please read this before submitting a FOIL Request

• DEP FOIL Frequently Requested Records

Check one: Under Article 6 of the New York State Public Officers Law ("FOIL"), I hereby apply to:

- Inspect copies; or
- Receive copies of the following records.

Check one: Is this FOIL request the subject of ongoing litigation against New York City?

- Yes
- No

Specify/Describe the records you are requesting in detail. Include any relevant location, address, permit #, complaint #, court index #, incident date, etc. If applicable, please submit separate requests for multiple locations, account #'s or incidents.

Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, groundwater sampling, radon, hazardous materials and any other documents that your department may have regarding the property at 12020 Flatlands Avenue Brooklyn NY (Block 4430, Lot 1; Block 4431, Lot 1 and Lot 200; Block 4432, Lot 1; Block 4434, Lot 1)

New York State Department of Health
Corning Tower, Room 2364
Albany, New York 12237-0044

**Re: Request for Review of Information
12020 Flatlands Avenue
Brooklyn, New York
Block 4430, Lot 1; Block 4431, Lots 1 and 200; Block 4432, Lot 1; and,
Block 4434, Lot 1
Langan Project No.: 100688801**

To Whom It May Concern,

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your department may have regarding the above-referenced property.

The property is bordered by Flatlands Avenue to the north, Pennsylvania Avenue to the east, an active construction site to the south, and Louisiana Avenue to the west on the land parcels identified by the above New York City tax map lot numbers. According to the information we have available at this time, the site is currently occupied by the two-story Christian Cultural Center building constructed in 1997, and surrounding parking lot at street level. Block 4434, Lot 1 remains an undeveloped vacant lot. Based on records maintained online by the City Planning Commission, the subject property is zoned for residential use (R5). According to the New York City Dept of Finance (NYC DOF), the site is currently owned by Christian Cultural Center Inc.

If possible, please email (moleske@langan.com) or fax a response to (973) 560-4901 and/or send a hard-copy response to my attention. Please contact me at (973) 560-4574 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,
**Langan Engineering, Environmental, Surveying
and Landscape Architecture, D.P.C.**

Matthew Oleske
Senior Staff Engineer

STATE OF NEW YORK DEPARTMENT OF HEALTH

2364 Corning Tower

Governor Nelson A. Rockefeller Empire State Plaza

Albany, New York 12237

1. TO THE NEW YORK STATE DEPARTMENT OF HEALTH:

I hereby apply to **Inspect** or **Receive Copies** of the following records (use additional sheets as needed and attach)

Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, groundwater sampling, asbestos abatement, radon, hazardous materials and any other documents that your department may have regarding 12020 Flatlands Avenue Brooklyn NY (Block 4430, Lot 1; Block 4431, Lots 1 and 200; Block 4432, Lot 1; and, Block 4434, Lot 1)

NAME: Matthew Oleske PHONE: 973-560-4273 EMAIL: moleske@langan.com

FIRM: Langan

ADDRESS: 300 Kimball Drive, Floor 4, Parsippany NJ 07054

SIGNATURE:  DATE: 1-15-2018

2. TO THE APPLICANT:

-Records Provided

The reproduction costs for the records are \$_____. Please forward a check payable to the New York State Department of Health to the address listed above. If we do not receive your payment within **60** days, we will assume that you no longer wish to receive the materials, and they will be sent back to the originating unit. Accordingly, any future requests for information will require an initial deposit before processing.

Records have been (partially, fully) provided. (If not fully provided, date when records are expected to be fully provided:_____).

-Records Not Available

Records cannot be found after a diligent search.

The Department does not maintain records indicated, please contact:_____

-Records Denied or Redacted

I hereby certify that access to the records—or part of the records—have been denied to the applicant for the reason(s) checked below (You may appeal this denial of access in writing within 30 days to the Records Access Appeals Officer, Empire State Plaza, 1455 Corning Tower, Albany New York 12237):

Specifically exempt by other statute(s).

Unwarranted invasion of personal privacy.

Would impair present or imminent contract awards or collective bargaining negotiations.

Are examination questions or answers.
Are inter-agency or intra-agency materials that are not: -statistical or factual tabulations or data

-instructions to staff that affect the public
-final agency policy or determinations; or
-external audits, including but not limited to audits performed by the comptroller and the federal government.

Are trade secrets.

Could, if disclosed endanger the life of any person.

Are compiled for law enforcement purposes and which, if disclosed would:
-interfere with law enforcement investigations or judicial proceedings
-deprive a person of the right to a fair trial or impartial adjudication
-identify a confidential source or disclose confidential information relating to a criminal investigation, or
-reveal criminal investigative techniques and procedures

Would jeopardize an agency's capacity to guarantee the security of its information technology assets, such assets encompassing both electronic information systems and infrastructures.

Department Representative _____ Date: _____

Contact E-Mail:

akritzer@langan.com

Type of Record(s) Requested:*

Other ▼

Description of Record(s) Requested:*

Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, groundwater sampling, asbestos abatement, radon, hazardous materials and any other

NYSDEC Office processing the Request:*

- Central Office (Albany) Covers the entire state
- Region 1: (Long Island) Covers the counties of: Nassau and Suffolk
- Region 2: (New York City) Covers the counties of:
 - ▾ Brooklyn, Bronx, Manhattan, Queens and Staten Island
- Region 3: (Lower Hudson Valley) Covers the counties of: Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster and Westchester
- Region 4: (Capital Region/Northern Catskills) Covers the counties of: Albany, Columbia, Delaware, Greene,

Montgomery, Otsego, Rensselaer, Schenectady and Schoharie

Region 5: (Eastern Adirondacks/Lake Champlain)

Covers the counties of: Clinton, Essex, Franklin, Fulton, Hamilton, Saratoga, Warren and Washington

Region 6: (Western Adirondacks/Eastern Lake Ontario) Covers the counties of: Herkimer, Jefferson, Lewis, Oneida and St. Lawrence

Region 7: (Central New York) Covers the counties of: Broome, Cayuga, Chenango, Cortland, Madison, Onondaga, Oswego, Tioga and Tompkins

Region 8: (Western Finger Lakes) Covers the counties of: Chemung, Genesee, Livingston, Monroe, Ontario, Orleans, Schuyler, Seneca, Steuben, Wayne and Yates

Region 9: (Western New York) Covers the counties of: Allegany, Chautauqua, Cattaraugus, Erie, Niagara and Wyoming counties

If your request pertains to just one Region, select that Region. If your request pertains to more than one Region, select Central Office. If you're unsure which Region your request pertains to, select Central Office. The Department will route your request to the appropriate Region(s)

Preferred Method to Receive Records:*

Electronic copies

Pick-up Copies

Inspect in Office

<input type="checkbox"/>	Copies by Fax
<input type="checkbox"/>	Express Mail (UPS)
<input type="checkbox"/>	Regular Surface Mail (USPS)

NYSDEC will use its best efforts to provide records via the method you select. However, in some cases a particular delivery method is not feasible. In such cases NYSDEC will deliver the records via an alternative method

Please note not all public documents are available in electronic format. If the document(s) requested are not available electronically, we will make them available for inspection or by paper copy in accordance with the Public Records Law.

Note: The maximum total file size per attachment is 80MB.

Project Screening Request Form

The New York Natural Heritage Program will review locations of proposed projects, activities, and SEQR-subject actions for any records of rare species or significant natural communities in our database. We will report records which are in the vicinity of the location and for which impacts from the project or action may need to be assessed.

To request a review of a specific project site, please complete and submit this form.

We recommend that you submit a map of your project site as a .pdf file as part of this form.

If you do not have a map in .pdf format, you must provide at least two of the following: tax parcel number, latitude/longitude, and street address.

Do not use this form if your project

- is more than 1000 acres in size
- is a linear project such as a transmission line or pipeline more than 2 miles in length
- is a wind farm project of more than two turbines
- includes parts of three or more counties.

For these types of projects, please send a request and map or GIS file of your project site directly to the New York Natural Heritage Program.

If you have any questions or need further information, please contact the New York Natural Heritage Program at NaturalHeritage@dec.ny.gov.

Project Summary *

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property.

Briefly describe the proposed project or activity, including why you need information (e.g., SEQR review, environmental assessment for permit, planning board approval, management plan). If the proposed action is undergoing SEQR review, also include the name of the lead agency. Example: "A 25 unit residential single-family housing development is proposed for an 150-acre parcel. The development will occupy 100 acres; the remaining 50 acres will be left undisturbed. We have been contracted to review the environmental impacts of the project and prepare the Environmental Assessment Form under SEQR, to be reviewed by the Town of Red Hook acting as Lead Agency. In order to complete the EAF, we will need to know whether the proposed project would likely impact any ecologically significant areas or rare species of plants or animals."

Current Land Use

The property is bordered by Flatlands Avenue to the north, Pennsylvania Avenue to the east, an active construction site to the south, and Louisiana Avenue to the west on the land parcels identified by the above New York City tax map lot numbers. According to the information we have available at

Briefly describe the current land use and habitats at the project site (e.g., wooded, agricultural, developed commercial). Example: "The site is currently undeveloped, and mostly wooded with some former agricultural fields."

PDF Map

Please attach one or two maps of your project site as .pdf files. The map should include names of nearby roads and other landmarks, and the boundary of the proposed project site should be clearly labeled, marked or highlighted. You may submit more than one map if they show the project site at different scales or with different backgrounds. Please do not send architectural

or engineering drawings or photographs. If you are not submitting a map, you must complete at least two of the following: Tax parcel number, Latitude/Longitude, and Street Address of Project Site.

PDF Map 2

Same directions as above.

Tax parcel number

If you are submitting a map, this field is optional.

Latitude If you are submitting a map, this field is optional.

Longitude If you are submitting a map, this field is optional.

Street Address of Project

If you are submitting a map, this field is optional.

Project Notes

Any other information regarding this request not addressed in the previous fields.

IPaC Information for Planning and Consultation **U.S. Fish & Wildlife Service**

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Location

Kings County, New York

Local office

Long Island Ecological Services Field Office

☎ (631) 286-0485

📠 (631) 286-4003

340 Smith Road
Shirley, NY 11967

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population, even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species

¹ are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service.

1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information.

The following species are potentially affected by activities in this location:

Birds

NAME	STATUS
Piping Plover <i>Charadrius melodus</i>	Threatened
There is final critical habitat for this species. Your location is outside the critical habitat.	
https://ecos.fws.gov/ecp/species/6039	

Red Knot *Calidris canutus rufa* Threatened
 No critical habitat has been designated for this species.
<https://ecos.fws.gov/ecp/species/1864>

Roseate Tern *Sterna dougallii dougallii* Endangered
 No critical habitat has been designated for this species.
<https://ecos.fws.gov/ecp/species/2083>

Flowering Plants

NAME	STATUS
Seabeach Amaranth <i>Amaranthus pumilus</i> No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/8549	Threatened

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

THERE ARE NO CRITICAL HABITATS AT THIS LOCATION.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act

¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described [below](#).

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern <http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php>
- Measures for avoiding and minimizing impacts to birds <http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php>
- Nationwide conservation measures for birds <http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ [below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see maps of where birders and the general public have sighted birds in and around your project area, visit E-bird tools such as the [E-bird data mapping tool](#) (search for the name of a bird on your list to see specific locations where that bird has been reported to occur within your project area over a certain timeframe) and the [E-bird Explore Data Tool](#) (perform a query to see a list of all birds sighted in your county or region and within a certain timeframe). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME

BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE. "BREEDS ELSEWHERE" INDICATES THAT THE BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)

American Oystercatcher *Haematopus palliatus*

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/8935>

Breeds Apr 15 to Aug 31

Bald Eagle *Haliaeetus leucocephalus*

This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.

<https://ecos.fws.gov/ecp/species/1626>

Breeds Oct 15 to Aug 31

Black Skimmer *Rynchops niger*

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/5234>

Breeds May 20 to Sep 15

Black-billed Cuckoo <i>Coccyzus erythrophthalmus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9399	Breeds May 15 to Oct 10
Bobolink <i>Dolichonyx oryzivorus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 20 to Jul 31
Buff-breasted Sandpiper <i>Calidris subruficollis</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9488	Breeds elsewhere
Cerulean Warbler <i>Dendroica cerulea</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/2974	Breeds Apr 29 to Jul 20
Clapper Rail <i>Rallus crepitans</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Apr 10 to Oct 31
Eastern Whip-poor-will <i>Antrostomus vociferus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 1 to Aug 20
Evening Grosbeak <i>Coccothraustes vespertinus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds elsewhere
Golden-winged Warbler <i>Vermivora chrysoptera</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/8745	Breeds May 1 to Jul 20
Gull-billed Tern <i>Gelochelidon nilotica</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9501	Breeds May 1 to Jul 31
Hudsonian Godwit <i>Limosa haemastica</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds elsewhere

Kentucky Warbler <i>Oporornis formosus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Apr 20 to Aug 20
Least Tern <i>Sterna antillarum</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	Breeds Apr 20 to Sep 10
Lesser Yellowlegs <i>Tringa flavipes</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9679	Breeds elsewhere
Long-eared Owl <i>asio otus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3631	Breeds elsewhere
Nelson's Sparrow <i>Ammodramus nelsoni</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 15 to Sep 5
Prairie Warbler <i>Dendroica discolor</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 1 to Jul 31
Prothonotary Warbler <i>Protonotaria citrea</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Apr 1 to Jul 31
Purple Sandpiper <i>Calidris maritima</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds elsewhere
Red-headed Woodpecker <i>Melanerpes erythrocephalus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds May 10 to Sep 10
Red-throated Loon <i>Gavia stellata</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds elsewhere
Rusty Blackbird <i>Euphagus carolinus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds elsewhere

Seaside Sparrow *Ammodramus maritimus* Breeds May 10 to Aug 20
 This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Semipalmated Sandpiper *Calidris pusilla* Breeds elsewhere
 This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Short-billed Dowitcher *Limnodromus griseus* Breeds elsewhere
 This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
<https://ecos.fws.gov/ecp/species/9480>

Snowy Owl *Bubo scandiacus* Breeds elsewhere
 This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Whimbrel *Numenius phaeopus* Breeds elsewhere
 This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
<https://ecos.fws.gov/ecp/species/9483>

Willet *Tringa semipalmata* Breeds Apr 20 to Aug 5
 This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Wood Thrush *Hylocichla mustelina* Breeds May 10 to Aug 31
 This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in your project's counties during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For

example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.

2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the counties of your project area. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

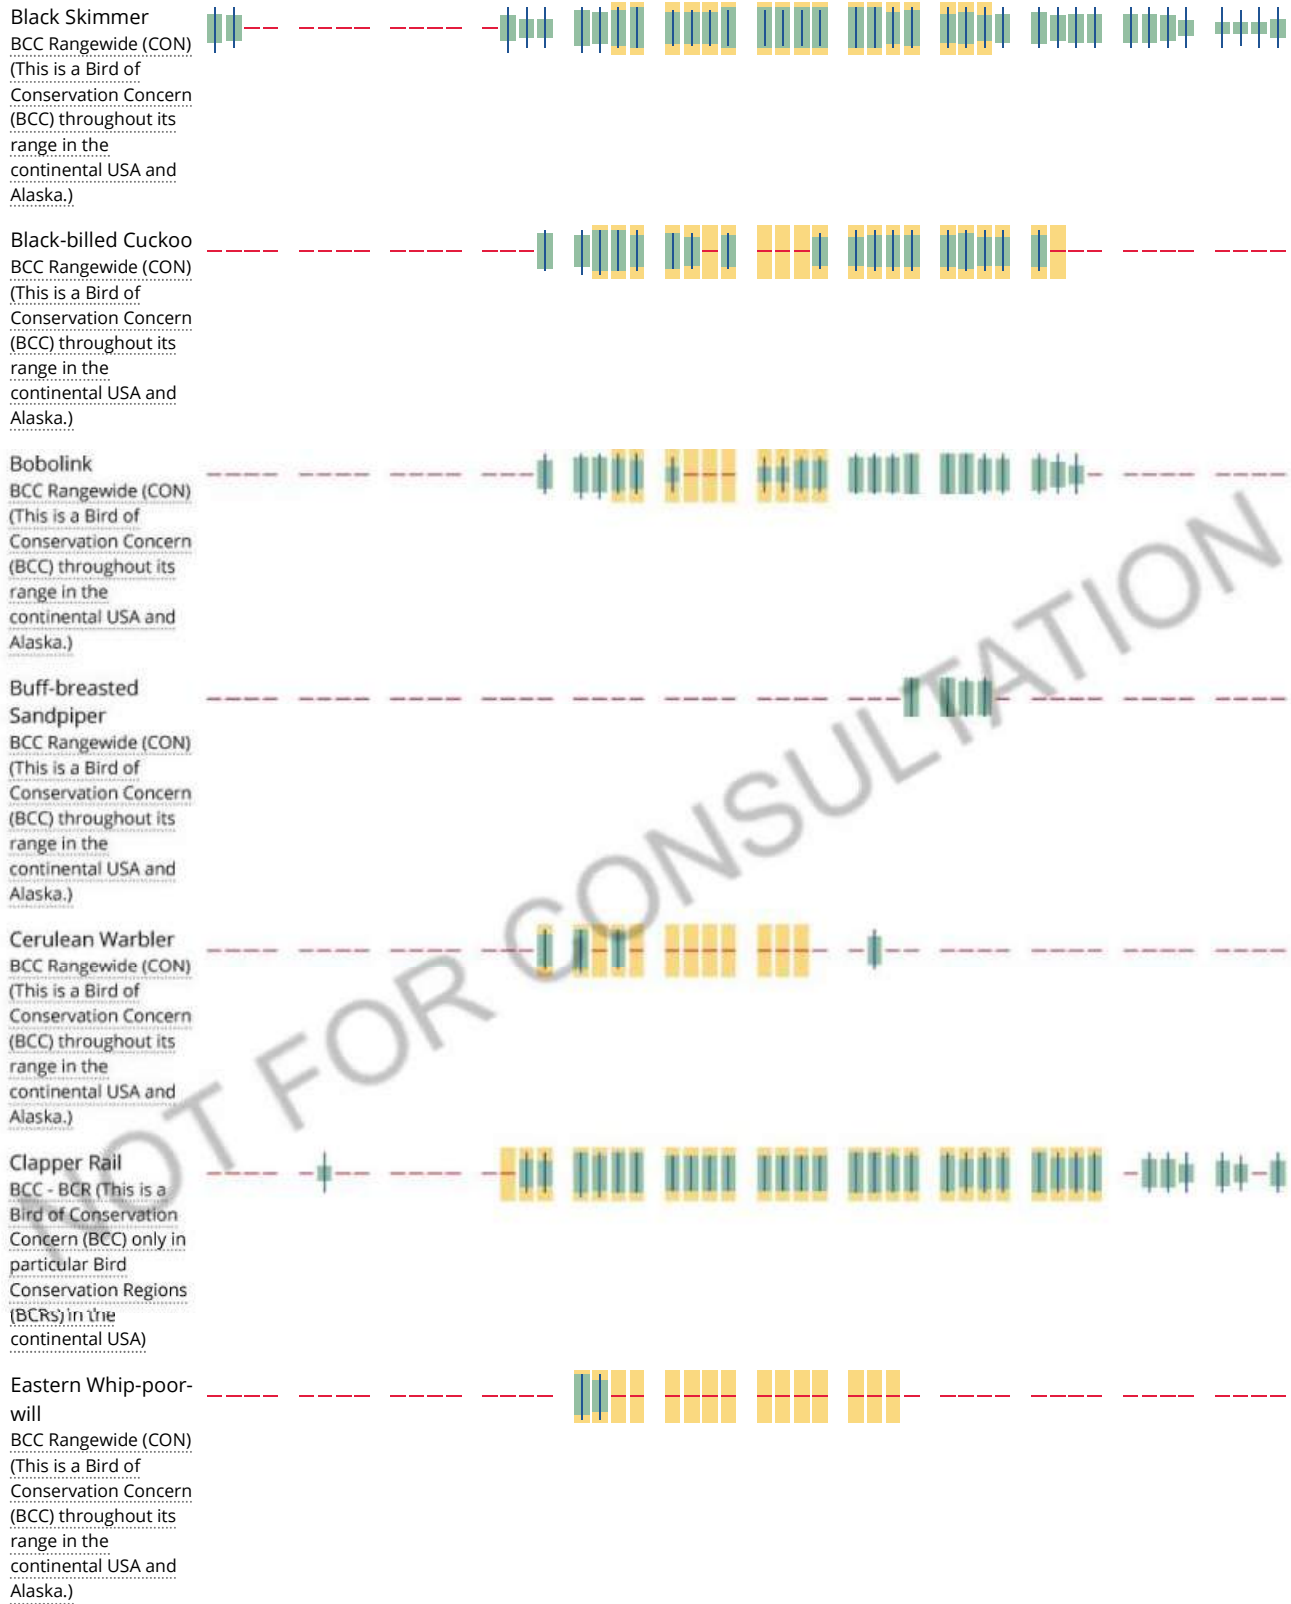

No Data (-)

A week is marked as having no data if there were no survey events for that week.

Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information.

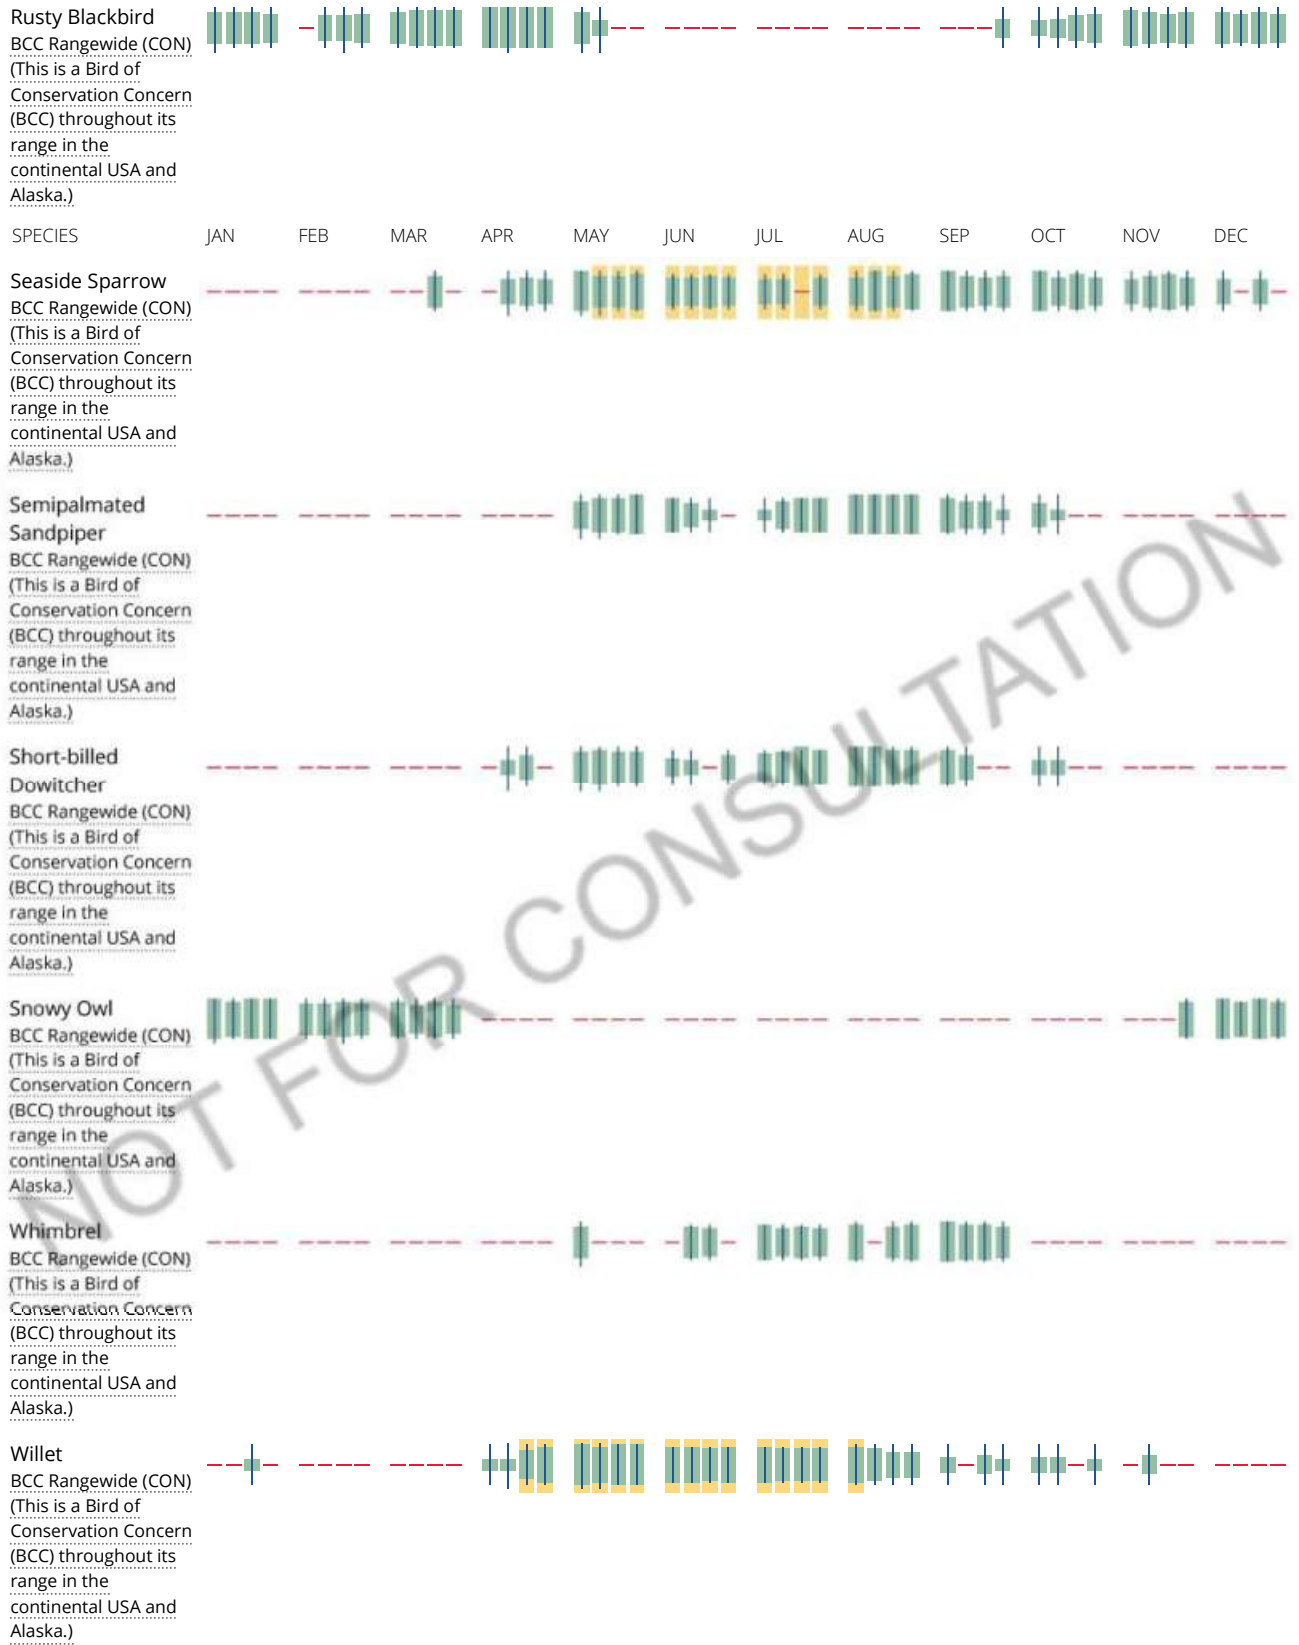

NOT FOR CONSULTATION

Wood Thrush
 BCC Rangewide (CON)
 (This is a Bird of
 Conservation Concern
 (BCC) throughout its
 range in the
 continental USA and
 Alaska.)

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the *Probability of Presence Summary*. [Additional measures](#) and/or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the counties which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [E-bird Explore Data Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the *Probability of Presence Summary* and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: The [The Cornell Lab of Ornithology All About Birds Bird Guide](#), or (if you are unsuccessful in locating the bird of interest there), the [Cornell Lab of Ornithology Neotropical Birds guide](#). If a bird entry on your migratory bird species list indicates a breeding season, it is probable that the bird breeds in your project's counties at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the BGEPA should such impacts occur.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

THERE ARE NO KNOWN WETLANDS AT THIS LOCATION.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

APPENDIX H

LANGAN RESUMES

Matthew Oleske

Senior Staff Engineer

**Environmental Oversight, Environmental Site Assessment,
Remedial Investigation, Remedial Action**

7 years in the industry ~ 2 year with Langan

Mr. Oleske has over 7 years of experience that includes working on environmental projects, particularly investigation and remediation of environmental contamination. He has assisted in remedial investigations and has been involved in the collection of field data and assisted in the preparation of reports and other environmental regulatory documents for projects in the New York area.

Mr. Oleske's experience includes collection of soil, groundwater, soil-vapor, sub-slab vapor and indoor air samples for environmental analysis, supervision of remedial excavation activities, and air monitoring to ensure compliance with Occupational Safety and Health Standards. Mr. Oleske has also provided oversight for sub-slab depressurization system, soil-vapor extraction system, and composite cover system installations as well as follow up operations and maintenance.

Selected Projects

250 South Street Development, New York, NY
101-111 Murray Street Development, New York, NY
225 East 39th Street Development, New York, NY
525 West 52nd Street Development, New York, NY
2350 Fifth Avenue, New York, NY
Sky View Parc Development, Flushing, NY
Carroll Gardens Development, Brooklyn, NY

Publications

OSHA 10-Hour Training in Construction

Amanda Forsburg, CHMM

Project Scientist

Environmental Oversight, Remedial Investigation,
Remedial Action

9 years in the industry ~ 9 years with Langan

Ms. Forsburg has over nine years of experience that includes working on environmental projects, particularly investigation and remediation of environmental contamination. She has assisted in remedial investigations and has been involved in the collection of field data and assisted in the preparation of reports and other environmental regulatory documents for projects in New Jersey and New York.

Ms. Forsburg's field experience includes investigation and remediation of contaminated sites including the collection of soil, groundwater, and air samples for environmental analysis, supervision of injections and remedial excavations, and the completion of air monitoring to ensure OSHA compliance on HAZWOPER sites. Office experience includes management of field investigation and remediation as well as completion of proposals, Phase I Environmental Site Assessments, remedial investigation reports, and remedial closure reports in support of these activities. Ms. Forsburg has worked on projects under regulatory oversight of the New Jersey Department of Environmental Protection (NJDEP), New York State Department of Environmental Conservation (NYSDEC), and New York City Office of Environmental Remediation (NYCOER).

Selected Projects

- NYSDEC Brownfield Redevelopment, Remedial Investigation and Remedial Action – 363 and 365 Bond Street, Brooklyn, NY
- NYSDEC Brownfield Redevelopment, Remedial Investigation – Fashion Outlets of Niagara Falls, NY
- NYSDEC Spills Redevelopment, Remedial Action – 540 West 26th Street, New York, NY
- NYSDEC Spills Redevelopment, Remedial Investigation and Remedial Action – 101 Murray Street, New York, NY
- NYSDEC Spills Redevelopment, Remedial Investigation and Remedial Action – 110 University Place, New York, NY
- NYSDEC Spills Redevelopment, Remedial Action, Lowe's Home Centers, Kings Plaza Site Redevelopment – Brooklyn, NY
- NYSDEC Spills Remediation, Con Edison Soil Remediation - Bronx, NY
- NYSDEC Spills Remediation, Con Edison NAPL Monitoring and Removal, Various Sites – Manhattan, NY
- NYCOER E-Designation Remediation and Volunteer Cleanup Program Redevelopment, Remedial Investigation and Remedial Action – 400 Park Avenue South, New York, NY
- NYCOER E-Designation Remediation and Volunteer Cleanup Program Redevelopment, Remedial Investigation and Remedial Action – 540 West 53rd Street, New York, NY
- Remedial Action – 508 West 24th Street, New York, NY

Former First Aviation Services Facility, Groundwater Monitoring and Remediation, Teterboro, NJ

Phase I Environmental Site Assessments and Due Diligence Investigations, Various Sites – NJ and NY

Steven Ciambuschini, PG, LEP

Principal/Vice President

Environmental Site Assessments/Investigations,
Brownfield Remediation, UST Management

32 years in the industry ~ 27 years with Langan

Mr. Ciambuschini has over 30 years of experience in hydrogeologic and environmental investigations including management of environmental and geotechnical investigations relating to petroleum and chlorinated solvent spill sites, underground storage tank sites, manufactured gas plant sites, landfills, wastewater treatment facilities and industrial/commercial sites. His experience includes managing environmental compliance audits, remedial investigation, pre-acquisition due diligence and permitting assessment, feasibility studies and design, construction and operation of complex innovative remediation systems to treat, contain and recover contaminated soil and groundwater. These projects are managed under various NJDEP, PADEP, NYDEC, NYCDEP and CTDEP programs. Mr. Ciambuschini provides consultation to a diverse group of clients including private developers, utilities, retail and industrial facilities and is expert in assessing remediation options and funding options under various state and federal grant, loan and tax reimbursement programs including Brownfield programs.

Selected Projects

- Brodson Property, Montville NJ, (RCRA, NJDEP ACO Cleanup)
- Carroll Gardens, Brooklyn, NY (NY Brownfield, EPA Superfund, OER E-designated Site)
- Con Edison Appendix B Spill Sites - Various Locations, NY
- Former MGP Site, Brooklyn, NY (VCP Site)
- Extell Development, Hudson Yards, New York, NY (NYC E-designated, NYS Brownfield Site)
- Pan Graphics, Bergen County, NJ (ISRA, LSRP)
- New Jersey Turnpike General Environmental Services Contract, Various Sites, NJ
- Liberty Science Center, Jersey City, NJ (EO 215)
- Blue Back Square, West Hartford, CT (UST, Transfer Act, Brownfield)
- Hershey, Act II Investigation (PA VCP)
- Hershey, Naugatuck, CT (CT Transfer Act)
- Halby Chemical Sites, Various Sites, DE (CERCLA)
- Unisys, Middletown CT, (CT Transfer Act, Brownfield)
- Ryder Rental, Various Sites in CT (CT Transfer Act)
- St. Marks Avenue, Brooklyn, NY (Vapor Mitigation)
- Pan Graphics, Lodi, NJ (Eco Risk Assessment, LSRP)
