Langan Project No:	100688803	Project:	12074 Flatlands Avenue p/o Lot 1	Date:	08/26/2024
NYSDEC BCP Site No:	C224353			Time:	06:30 – 18:00

Consultant:

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C.

PERSONNEL ON SITE:

Langan: Daniel Horvath (Environmental)

Monadnock: Michael Sullivan

United Concrete: Claudio Cappiello, Miguel Flores and laborers

Morris-Shea Bridge Co.: Ariel Jaime and laborers

Mueser Rutledge Consulting Engineers: Rafael Alayo

EQUIPMENT ON SITE: Bobcat T76 Skid Steer, PVE 90DR Drill Rig, Skyjack SJ66T Boom Lift, JLG Skytrak 10054 Telehandler, Xtreme XR3034 Telehandler, Takeuchi TB240 Compact Excavator, and Liebherr THS 110 D-K Concrete Pump

Site Activities

- Morris-Shea Bridge Co. (Morris-Shea) began installing test piles in the northern and southern portions of the Site. No cuttings were generated during pile installation.

Samples Collected

- None

Community Air Monitoring Program (CAMP)

- Langan implemented the CAMP during import during soil disturbance. CAMP equipment consisted of a Aeroqual AQS 1 Air Quality Monitor at dedicated locations on the downwind and upwind perimeter of the Site, as well as a personal DataRam (pDR) and photoionization detector (PID) at a work zone monitoring station.
 - Dust and VOC concentrations were not detected in exceedance of the daily short-term exposure limit (STEL).

Problems Encountered

- None

Activities Scheduled for Next Day

- Trucks will traverse through the logistical zone of the Site to the adjacent Site to the east (BCP Site No. C224290) for the loading and export of material, the installation of SOE, and the installation of the deep foundation piles and dewatering wells.
- Morris-Shea will continue installing test piles.

Two Week Outlook

- Trucks will continue to traverse through the logistical zone of the Site to the adjacent Site to the east (BCP Site No. C224290) for the loading and export of material, the installation of SOE, and the installation of the deep foundation piles and dewatering wells.

Notes:

1. Basemap from the "Waste Characterization Sample Location Plan" Figure prepared by Langan dated 5/24/2024.
2. ST-3 contains non-hazardous material excavated from the northern portion of the Site for the construction of the truck wash and is located outside of the logistical zone.
3. ST-9 is being utilized as the construction ramp and contains non-hazardous material excavated from disposal grids WC-20, WC-21, WC-26, and WC27.
