Subject: **Phase I Environmental Site Assessment Report**
1288 Willoughby Avenue, Brooklyn, NY 11237
(1282, 1292, 1294 Willoughby Avenue; 373 Suydam Street)
ODELPHI Project #2155861-PI

Dear Mr. Litchfield:

Attached please find our *Phase I Environmental Site Assessment Report*, (the *Report*) for the above-mentioned Subject Property. During the property investigation and research, our property surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the property and its history. The *Report* was completed according to the terms and conditions authorized by you. This *Report* has been completed in general conformance with the ASTM Practice E1527-13.

The purpose of this *Report* is to assist *the perspective buyer*, in its transaction of the Subject Property described herein.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The Report speaks only as of its date, in the absence of a specific written update of the Report, signed and delivered by ODELPHI Environmental, Inc. (ODELPHI).

There are no intended or unintended third party beneficiaries to this Report, unless specifically named. ODELPHI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the Report or on the closing of any business transaction. Thank you for the opportunity to prepare this Report, and assist you with this project. Please call us if you have any questions or if we may be of further assistance.

Respectfully Submitted,

Casey Oh
Project Manager
Ph. D., CRS, CEM

EXECUTIVE SUMMARY

The subject property (APN: 03210-0022/23/25/26/47) at 1288 (1282/1292/1294) Willoughby Avenue and 373 Suydam Street, Brooklyn, NY 11237 is a 20,000 sq. ft. irregular shaped parcel and contains two (2) warehouses at 1282 and 1294 Willoughby Avenue ('1282' and '1294', respectively), one (1) mixed-use warehouse building at 1292 Willoughby Avenue ('1292'), one (1) industrial building at 1288 Willoughby Avenue('1288'), and a vacant land at 373 Suydam Street ('373') abutted each other forming one property for Guyana Plating, LLC., within Industrial (M1-1) zone, situated on the southeastern block of Willoughby Avenue and northwestern block of Suydam Street, in the Borough of Brooklyn, and City and State of New York.

The subject property sits as four (4) abutted rectangular shaped industrial buildings with vacant lot occupying entire frontage toward Willoughby Avenue and ward Suydam Street. According to the public record, the current structures on the property were developed in 1931 except 1294 building in 1985. The subject buildings were constructed with cinder brick, and concrete block structure on concrete slab foundation without basement except 1292 building with basement. The subject property is situated in Industrial (M1-1) zone where the properties were found to be industrial properties such as warehouse, residential properties, parking lots, and local roads. ODELPHI was not able to gain access to the apartment on the second floor of 1292 building and 373 lot. Approximately 90% of the property was improved with building, concrete/asphalt paved parking. Porous surface as dirt at 373 lot was observed from the subject property. Utilities to the subject property were Con Edison and National Grid for electric and gas, a private supplier for fuel oil, and municipality for water and sewer.

Overall setting of the vicinity is industrial, commercial, and residential mixed-use such as mixed-use warehouse and food factory to the northeast, parking lot to the southwest, local road with warehouse and residential properties to the northwest, and local and parking lot to the southeast of the subject property.

At the time of site reconnaissance on August 10, 2020, the subject property was vacant and abutted buildings with vacant land consisting of two (2) warehouses (1282/1294), vacant lot, former plating factory (1288), and mixed-use warehouse (1294). ODELPHI was not able to gain access to the 2nd floor apartment of 1292 building. Several oil stained area were observed from 373 vacant land. ODELPHI observed also staining of chemical spill on the metal floor at 1282 and 1292 warehouse. From 1288 main building, ODELPHI observed a gas-fired boiler, a gas meter, a grated drain cover, electric panel room, work area, and unidentified metal floor covers. Former fuel oil UST (closed in place) area also was observed in the front parking lot. Several unidentified drums, chemical staining, and severe oil staining on the floor of 1292 building were observed. ODELPHI observed electric meter area with several unidentified drums in the 1st level of basement and an oil-fired boiler, an inactive oil-fired boiler with a 550-gallon fuel oil AST inside concrete vault in the 2nd level of basement. Two (2) empty drums inside warehouse and asphalt patch at the parking lot were observed at 1294 warehouse building. No indication of underground storage tanks (USTs) was observed from the subject property. Source of heating was gas and fuel oil for the subject property.

Historical Sanborn Fire Insurance (Sanborn) Map has coverage for the subject property from 1888 to 2007 and depicts the subject property as residential dwelling from 1888 to 1979, vacant land in 1988

and from 1980 to 2007, railroad from 1888 to 1951, store and wagon shed in 1907, knitting null from 1933 to 1951, clothing mfg from 1965 to 1968, mixed-use clothing mfg and factory from 1977 to 1980, elec. plating from 1965 to 2007, and warehouse from 1979 to 2007. EDR has return Historical City Directories (CD) covering the subject property from 1928 to 2017 and listing environmentally sensitive businesses as plating company from 1994 to 2017 and machine from 2014 to 2017 for the subject property.

ODELPHI reviewed City of New York (NYC) Building Department files for the search of public records and found no items of environmental concerns except an oil burner application for 1292 and 1294 building in 1948 and 1972, respectively. ODELPHI requested file review to NYC Fire Department in regard to the presence of UST. The agency has not responded at the time of this report writing. Any significant finding will be added as an addendum.

At the time of site inspection, Mr. Dronacharje Balgobin, the property owner, were interviewed and accompanied the site inspection. Mr. Balgobin stated that he purchased the subject property in 2009 and the use of the subject property had not been changed since its development as a plating company in 1950 until early 2020. Mr. Balgobin also stated that the source of heating is gas and fuel oil and there is one (1) 550-gallon fuel oil aboveground storage tank (AST) in the basement of 1292 building and one (1) fuel oil UST was closed in place at the parking lot of 1288 building. He stated that the operation of plating was ceased in early 2020 with removal of all the equipment and the most of documents are no longer in the office except 2012 chemical inventory of fourteen (14) chemical brands. He also stated that all the chemical were recycled in the factory with no spill and he is not aware of any environmental incidents or issues at the subject property.

Government environmental records have information on the subject property, which is listed in ERNS, RCRA-LQG, ICIS, FTTS, HIST FTTS, US AIRS, FINDS, ECHO, NY MANIFEST, NJ MANIFEST, RCRA NonGen / NLR, and NY UST of the government records. The listing in ERNS was triggered by past spill of 100 gallon of NICKEL PLATING SOLUTION at the building floor and outside ground at 375 Suydam Street due to equipment failure. The listings in RCRA-LQG, ICIS, FTTS, HIST FTTS, US AIRS, FINDS, ECHO, NY MANIFEST are in regard to past operation of plating company as hazardous waste generators, treatment, storage, and disposal (TSD) facility with large quantity generator and evaluation of significant non-complier status at the subject property. The listings in NJ MANIFEST, RCRA NonGen / NLR, FINDS, ECHO, and NY MANIFEST were triggered by past activities of a public utility company (Con Edison) at 1292 Willoughby Avenue. The listing in NY UST is in regard to past existence of a 4000-gallon fuel oil UST at the subject property. ODELPHI does not consider the listing in NY UST poses risk of impact at the subject property based on its regulatory status (unregulated), and property condition (closed in place). ODELPHI consider the listings except NY UST pose risks of impact at the subject property based on its regulatory status (significant non-complier) and property condition and use (70 year operation from 1950 to 2020 of plating business). Government environmental records have information on the adjacent property, which is listed in RCRA-SQG, NY MANIFEST and NY AST of the government records. The listings are in regard to present operation of metal product wholesaler and past presence of a 2000-gallon fuel oil AST at 1261 Willoughby Aveneu. ODELPHI does not consider the listings pose risks of impact and liability at the subject property based on its regulatory status (Unregulated) and property condition (Closed in place; warehouse). Considering the property condition, liability, geographical location, and regulatory status, ODELPHI identified

no adjacent properties that pose potential risk of impact to the subject property.

ODELPHI's assessment has revealed Recognized Environmental Conditions (RECs) except Historical Recognized Environmental Conditions (HRECs), and Controlled Recognized Environmental Conditions (CRECs) in connection with the Subject Property in accordance with ASTM E1527-13. No Vapor Encroachment Conditions (VECs) were observed. The following was noted;

- According to the property owner, public records, and government database records, the subject property had been utilized as plating factory with hazardous waste generators and TSD facility from 1950 to 2020. Historical use of the subject property as a plating facility poses risk of possible subsurface impact by chemicals and hazardous waste because on-site use, handling, and storage of hazardous substances often results in subsurface impact. At the time of site reconnaissance, several oil stained area were observed at 373 vacant land. ODELPHI observed also staining of chemical spill on the metal floor at 1282 and 1292 warehouse. Considering the historical property use as a plating company and property condition, ODELPHI believe the subject property poses risk of contamination and further investigation is warranted.

Considering the historical and the current use of the subject property, further action or subsurface investigation is recommended based on the historical uses of the subject property due to the potential risk of contamination at the subject property.

REPORT COMPONENT	RECOMMEDED ACTIONS	ESTIMATED COST
Subject Property Characteristics (Current Tenant or Property Use Concerns)	The subject property has been an abutted industrial and warehouse building since 1931/1985. Currently the subject property is vacant and no environmental sensitive business occupies the subject property. No Further action.	N/A
Subject Property Reconnaissance	The subject property showed oil staining and chemical staining in several area. No fill port and vent pipe for UST were observed. Further Action	See below
Potential Asbestos Containing Material (ACM)	None observed (out of scope). No further action.	N/A
Lead-based Paint	None observed (out of scope). No further action.	N/A
Vapor Encroachment Condition	None observed. No further action	N/A

Other Non-CERCLA Items	Non-detect	N/A
Historical Use of Subject Property and Vicinity	Historical Sanborn Fire Insurance (Sanborn) Map has coverage for the subject property from 1888 to 2007 and depicts the subject property as residential dwelling from 1888 to 1979, vacant land in 1988 and from 1980 to 2007, railroad from 1888 to 1951, store and wagon shed in 1907, knitting null from 1933 to 1951, clothing mfg from 1965 to 1968, mixed-use clothing mfg and factory from 1977 to 1980, elec. plating from 1965 to 2007, and warehouse from 1979 to 2007. EDR has return Historical City Directories (CD) covering the subject property from 1928 to 2017 and listing environmentally sensitive businesses as plating company from 1994 to 2017 and machine from 2014 to 2017 for the subject property. Further Action	See below
Potential Off-site Sources	Considering the property condition, liability, geographical location, and regulatory status, ODELPHI identified no adjacent properties that pose potential risk of impact to the subject property. No further action	N/A
Federal, State and Local Agency Concerns	Government environmental records have information on the subject property, which is listed in ERNS, RCRA-LQG, ICIS, FTTS, HIST FTTS, US AIRS, FINDS, ECHO, NY MANIFEST, NJ MANIFEST, RCRA NonGen / NLR, and NY UST of the government records. The listing in ERNS was triggered by past spill of 100 gallon of NICKEL PLATING SOLUTION at the building floor and outside ground at 375 Suydam Street due to equipment failure. The listings in RCRA-LQG, ICIS, FTTS, HIST FTTS, US AIRS, FINDS, ECHO, NY MANIFEST are in regard to past operation of plating company as hazardous waste generators, treatment, storage, and disposal (TSD) facility with large quantity generator and evaluation of significant non-complier status at the subject property. ODELPHI consider the listings except NY UST pose risks of impact at the subject property based on its regulatory status (Significant Non-complier) and property condition and use (70 year operation from 1950 to 2020 of plating business).	Limited Phase II Subsurface Investigation: $10,000-20,000

	Further Action	

INACCESSIBLE OR UN-SURVEYED PORTIONS OF SUBJECT PROPERTY

There were no other notable portions of the Subject Property excluded from this survey except residential units.

1.0 SCOPE OF WORK & LIMITATIONS

The primary purpose of this *Phase I Environmental Site Assessment Report (the Report)* is to assist Client, in its underwriting of a proposed mortgage loan on the Subject Property, and to identify *recognized environmental conditions* in connection with the Subject Property described in this *Report*. The investigation was prepared in accordance with the Clients' Environmental Site Assessment scope of work for the use and benefit of the Client, its successors, and assignees and US SBA if financing is to be authorized by US SBA. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the Client. Neither this report, nor any information contained herein shall be used or relied upon for any other person or entity without the express written permission of the Client.

This report has been prepared by ODELPHI for the Client under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither ODELPHI, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject of surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved.

ODELPHI's liability to Client or any other person or entity with the express written permission of the Client wishing to use this *Report* is limited to the ODELPHI's E & O coverage of $2 MM. Amendments to ODELPHI's limitations as stated herein that may occur after issuance of the *Report* are considered to be included in this *Report.* Payment for the *Report* is made by, and ODELPHI's contact and *Report* extends to *Client* only.

The additional purpose of this *Report* is to assess a parcel of real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit Client to satisfy one of the requirements to qualify for the innocent landowner defense to CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good Industrial or customary practice" as defined in 42 USC § 9601(35)(B).

In defining a standard of good Industrial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions (RECs) means the present or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to *de minimis* conditions that generally do not present a material risk of harm to public health or the environmental and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

ODELPHI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13.

SCOPE OF WORK

This Report was prepared for the exclusive use of Client.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM E1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the property contract and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property. Municipal information was obtained through file reviews of reasonably ascertainable standard government record sources, and interviews with the authorities having jurisdiction over the property. Findings, conclusion and recommendations included in the Report are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents. ODELPHI renders no opinion as to the property condition at un-surveyed and /or inaccessible portions of the Subject Property, which are described below. ODELPHI relies completely on the information, whether written, graphic or verbal, provided by the property contact or as shown on any documents reviewed or received from the property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this Report are valid on the date of the survey. ODELPHI uses the reported date of construction to establish the Subject Property age.

The observations in this Report are valid on the date of the investigation. Where access to portions of the Subject Property or to structures on the Subject Property was unavailable or limited, ODELPHI renders no opinion as to the presence of petroleum products or hazardous substances in that portion of the Subject Property or structure. In addition, ODELPHI renders no opinion as to the presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over theses surfaces.

The conclusions provided by ODELPHI are based on the information obtained by visual survey of the Subject Property, and information provided by agents representing the Subject Property, or agents of the owner. In addition, ODELPHI has relied on certain information provided by state and other referenced parties, and on information contained in the files of federal, state and/or local agencies available to ODELPHI at the time of the assessment. Although there may have been some degree of overlap in the information provided by these various sources, ODELPHI did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these *Environmental Services*.

It is acknowledged that ODELPHI judgments shall not be based on scientific or technical tests or procedures beyond the scope of the Services or beyond the time and budgetary constraints imposed by the Client. It is acknowledged further that ODELPHI conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. Client also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement with respect to

such Services, are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, ODELPHI shall use that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

Client and ODELPHI agree that to the fullest extent permitted by law, ODELPHI shall not be liable to Client for any special, indirect or consequential damages whatsoever, whether caused by ODELPHI'S negligence, strict liability, breach of contract, breach of warranty or other cause of causes whatsoever.

The ASTM Standard E1527-13 does not encompass analytical testing to evaluate Asbestos Containing Materials (ACM), radon, lead-based paint (LBP), drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Such additional information of non-ASTM E1527-13 are merely extra contents, and cannot be used to bind this report as a whole to the compliance and conformance to ASTM guideline. *No disassembly of systems or building components or physical or invasive testing is to be performed unless Contract Engagement specifically called for such testing as an additional scope of work.* ODELPHI has performed this *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-13. *This Report* may not include all environmental conditions which can materially impact the subject property other than those defined as REC in ASTM E1527-13.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The *Report* speaks only as of its date, in the absence of a specific written update of the Report, signed and delivered by ODELPHI.

Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to ODELPHI so that our conclusions may be revised and modified if necessary, at additional cost.

Adjoining sites, neighboring sites or surrounding properties mentioned in this report are defined only up to one parcel immediately next to the subject property, and ODELPHI will only check immediately adjoining properties to identify historical use of the surrounding areas via historical source or data on such adjoining properties, and/or walk-through along subject property's perimeters to find obvious signs of environmental concerns.

It is often not possible (under "reasonably ascertainable" clause of ASTM guideline) to identify every single historical business tenants or occupants on the subject property. ODELPHI cannot be liable for not identifying all such past tenants or occupants of the project site.

INDEPENDANT CONTRACTOR STATUS

In performing Services under the mutually agreed contractual agreement and verbal engagement, ODELPHI shall operate as, and have the status of, an independent contractor.

PROFESSIONAL RESPONSIBILITY

Subject to any limitations established by the Client as to the degree of care and amount of time and expenses to be incurred and any other limitations contained in the mutually agreed contractual agreement and verbal engagement, ODELPHI shall perform the Services consistent with that level of care and skill ordinarily exercised by other professional consultants under similar circumstances at the time the Services are performed. Client hereby acknowledges that whenever a Project involves hazardous or toxic materials there are certain inherent risk factors involved (such as limitations on laboratory analytical methods, variations in subsurface conditions, economic loss to Client or property owner, a potential obligation for disclosure to regulatory agencies, a potential for a decrease in market value of real property, and the like) that may adversely affect the results of the Project, even though the Services are performed with such skill and care. No other representation, warranty, or guarantee, express or implied, is included or intended by the mutually agreed contractual agreement and verbal engagement.

LIMITATION OF LIABILITY

Client agrees that the liability of ODELPHI and all officers, employees, agents, and subcontractors of ODELPHI (the "ODELPHI Parties") to Client for all claims, suits, arbitration, or other proceedings arising from the performance of the Services under the mutually agreed contractual agreement and verbal engagement, including, but not limited to, ODELPHI's professional negligence, errors and omissions, or other professional acts, shall be limited to the Fee amount. ODELPHI Parties are not liable for any indirect, incidental or consequential damages, lost profits, lost revenue, or loss of property value based on the Services provided as part of the mutually agreed contractual agreement and verbal engagement.

ABBREVIATIONS

ODELPHI may use various abbreviations to describe various site, building or system components or legal descriptions. Not all abbreviations may be applicable to all reports. The abbreviations most often utilized are defined below.

ACM	Asbestos-containing material
ACT	Acoustic Ceiling Tile
ADA	Americans with Disabilities Act
AHU	Air Handling Unit
APA	American Plywood Association
APCD	Air Pollution Control District
AQMD	Air Quality Management District
AS	Air Sparging
AST	Aboveground storage tank
ASTM	American Society for Testing and Materials
bgs	Below Ground Surface
BOD	Biochemical oxygen demand
BTEX	Benzene-toluene-ethylbenzene-xylene
BTU	British Thermal Unit (a measurement of heat)
BTUH	British Thermal Units per Hour
CERCLA	Comprehensive Environmental Response Compensation and Liability Act
CFR	Code of Federal Regulations
CMU	Concrete Masonry Unit
COCs	Chemicals of Concern
DEC	Department of Environmental Conservation (NY)
DEP	Department for Environmental Protection (NJ, NYC)
DEQ	Department of Environmental Quality
DOE	Department of Ecology (WA)
DTSC	Department of Toxic Substance Control (CA)
EIFS	Exterior Insulating Finishing System
EP	Extraction procedure
EPA	Environmental Protection Agency
EPDM	Ethylene Propylene Diene Monomer (rubber membrane roof)
EUL	Expected Useful Life, Effective Useful Life
FCU	Fan Coil Unit
FEMA	Federal Emergency Management Agency
FHA	Forced Hot Air
FHW	Forced Hot Water
FID	Flame ionization detector
FIRM	Flood Insurance Rate Map
FOIA	Freedom Of Information Act
FRT	Fire retardant treated plywood
GC/MS	Gas chromatography/mass spectrometry
GFI	Ground Fault Interrupt (circuit)
GPR	Ground-penetrating radar
GWB	Gypsum Wall Board
HCP	Handicapped Person
HID	High Intensity Discharge (lighting)
HVAC	Heating, Ventilating and Air Conditioning
HWH	Hot Water heater
LBP	Lead-based paint
LDL	Laboratory Detection Limit
LEL	Lower explosive limit
LUST	Leaking underground storage tank
MCL	Maximum contaminant level
MDP	Main Distribution Panel
mg/L	Milligrams per Liter
MSDS	Material safety data sheet
MSSL	Maximum Soil Concentration Limit
MTBE	Methyl Tertiary Butyl Ether
NFA	No Further Action (letter)
NPDES	National Pollutant Discharge Elimination System
NPL	National Priorities List
O&M	Operating and maintenance
OVA	Organic vapor analyzer
PCB	Polychlorinated biphenyl
PEC	Potential Environmental Concerns
PEL	Permissible airborne exposure level
PID	Photoionization detector
POTW	Publicly owned treatment works
ppb	Parts per Billion
ppm	Parts per Million
PRG	Preliminary Remedial Goal
PRP	Potentially responsible parties
PTAC	Packaged Through-wall Air Conditioning (Unit)
QAQC	Quality assurance Quality control
RAP	Remedial Action Plan
RCRA	Resource Conservation and Recovery Act
REC	Recognized environmental condition
RI/FS	Remedial Investigation & Feasibility Study
RQ	Reportable quantity
RTU	Roof Top Unit
RWQCB	Regional Water Quality Control Board (CA)
SPCC	Spill Prevention Control and Countermeasure Plan
SQG	Small quantity generator
SVE	Soil Vapor Extraction
SVOC	Semi-Volatile organic compound
SWRCB	State Water Resource Control Board (CA)
TAT	Turn-around time
TCEQ	Texas Commission of Environmental Quality (TX)
TCLP	Toxicity characteristic leaching procedure
TOC	Total organic carbon
UBC	Uniform Building Code
UEL	Upper explosive limit
ug/L	Micrograms per Liter
USGS	United States Geological Survey
UST	Underground storage tank
VAV	Variable Air Volume box
VCT	Vinyl Composition Tile
VOC	Volatile organic compound
VWC	Vinyl Wall Covering

1.1. AUL SEARCH AND REVIEW OF LAND TITLE RECORDS

The information reported herein was obtained through sources deemed reliable, a visual site survey of areas readily observable, easily accessible or made accessible by the property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property.

Under ASTM E1527-13, Section 6 − User Responsibilities − User ("Client, Lender, Purchaser, Owner") has to search for environmental liens in the Land Title Records. This is a mandatory requirement in order to get the CERLCA protections under ASTM E1527-13 and All Appropriate Inquiries.

According to ASTM E1527-13, search for environmental liens and AULs from review of Land Title Records shall be performed by the *user ("Client, Lender, Purchaser")* that will help identify the possibility of *recognized environmental conditions* in connection with the *property*. These tasks do not require the technical expertise of an *environmental professional* and are generally not performed by *environmental professionals* performing a *Phase I Environmental Site Assessment*. We understand that as our standard procedure, customer has completed *User* Questionnaire to assist the *user* and ODELPHI Environmental in gathering information from the *user* that may be material to identifying *recognized environmental conditions*.

Review Title and Judicial Records for Environmental Liens or Activity and Use Limitations (AULs)—Reasonably ascertainable recorded land title records and lien records that are filed under federal, tribal, state, or local law should be reviewed to identify *environmental liens* or *activity and use limitations*, if any, that are currently recorded against the *property*. *Environmental liens* and *activity and use limitations* that are imposed by judicial authorities may be recorded or filed in judicial records, and, where applicable, such records should be reviewed. Any *environmental liens* or *activity and use limitations* so identified shall be reported to ODELPHI Environmental conducting a *Phase I Environmental Site Assessment*.

Unless added by a change in the scope of work to be performed by ODELPHI Environmental, this practice does not impose on ODELPHI the responsibility to undertake a review of *recorded land title records* and judicial records for *environmental liens* or *activity and use limitations*. The *user* should either *(1)* engage a title company or title professional to undertake a review of *reasonably ascertainable recorded land title records* and lien records for *environmental liens* or *activity and use limitations* currently recorded against or relating to the *property*, or *(2)* negotiate such an engagement of a title company or title professional as an addition to the scope of work to be performed by ODELPHI.

CLIENT-PROVIDE INFORMATION

According to ASTM Standards E-1527-13 and the USEAP AAIs, in order to qualify for the Land-owner Liability Protection (LLPs) offered by the Small Business Liability Relief and Brownfield's Revitalizations Act of 2001, User must provide the following information (if available) to the

environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

USER QUESTIONNAIRE for AUL

In order to qualify for one of the *Landowner Liability Protections (Landowner Liability Protections*, or *LLPs*, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* ("*Common Elements*" Guide) issued on March 6, 2003.) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

USER/CUSTOMER QUESTIONNAIRE	
QUESTION	**CUSTOMER TO ANSWER**
(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?	No
(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?	No
(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?	Yes

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30). Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*, (a.) Do you know the past uses of the *property*? (b.) Do you know of specific chemicals that are present or once were present at the *property*? (c.) Do you know of spills or other chemical releases that have taken place at the *property*? (d.) Do you know of any environmental cleanups that have taken place at the *property*?	a) Yes b) Yes c) No d) No
(6.) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?	No

ADDITIONAL USER QUESTIONNAIRE

In addition, certain information should be collected by the User, if available, and provided to the *environmental professional* selected to conduct the Phase I. This information is intended to assist the *environmental professional* but is not necessarily required to qualify for one of the *LLPs*. The information includes:

USER QUESTIONNAIRE	
QUESTION	**ANSWER**
(a) the reason why the Phase I is required	To obtain LLP
(b) the type of *property* and type of *property* transaction	Industrial buildings, Purchase
(c) the complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful)	1288 (1282, 1292, 1294) Willoughby Avenue and 373 Suydam Street, Brooklyn, NY 11237
(d) the scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527-13 are to be considered)	Due diligence (ASTM 1527-13)
(e) identification of all parties who will rely on the Phase I *report*	Mr. Isaac Litchfield

(f) identification of the site contact and how the contact can be reached	Mr. Greg Ngo, the broker, 310-403-4697 Mr. Dronacharje Balgobin, the property owner, in person
(g) any special terms and conditions which must be agreed upon by the *environmental professional*	No
(h) any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition)	No

User that provides above information: Mr. Dronacharje Balgobin _____

2.0 SUBJECT PROPERTY CHARACTERISTICS

2.1 PROJECT INFORMATION & PROPERTY LOCATION

ITEM	PROJECT INFORMATION
ODELPHI Project Number	2155861-PI
Client Project Number	N/A
Subject Property Address	1288 Willoughby Avenue, Brooklyn, NY 11237 (1282/1292/1294 Willoughby Avenue; 373 Suydam Street)
Subject Property Name	Industrial buildings
Property Inspection Date	August 10, 2020
Weather	Sunny
Environmental Assessor's Name	Chris Oh, Certified Environmental Engineer
QAQC Reviewer's Name	Casey Oh, Certified Environmental Assessor

The subject property (APN: 03210-0022/23/25/26/47) at 1288 (1282/1292/1294) Willoughby Avenue and 373 Suydam Street, Brooklyn, NY 11237 is a 20,000 sq. ft. irregular shaped parcel and contains two (2) warehouses at 1282 and 1294 Willoughby Avenue ('1282' and '1294', respectively), one (1) mixed-use warehouse building at 1292 Willoughby Avenue ('1292'), one (1) industrial building at 1288 Willoughby Avenue('1288'), and a vacant land at 373 Suydam Street ('373') abutted each other forming one property for Guyana Plating, LLC., within Industrial (M1-1) zone, situated on the southeastern block of Willoughby Avenue and northwestern block of Suydam Street, in the Borough of Brooklyn, and City and State of New York.

2.2 PROPERTY IMPROVEMENT & BUILDING/LAND DESCRIPTION

The subject property sits as four (4) abutted rectangular shaped industrial buildings with vacant lot occupying entire frontage toward Willoughby Avenue and ward Suydam Street. According to the public record, the current structures on the property were developed in 1931 except 1294 building in 1985. The subject buildings were constructed with cinder brick, and concrete block structure on concrete slab foundation without basement except 1292 building with basement. The subject property is situated in Industrial (M1-1) zone where the properties were found to be industrial properties such as warehouse, residential properties, parking lots, and local roads. ODELPHI was not able to gain access to the apartment on the second floor of 1292 building and 373 lot. Approximately 90% of the property was improved with building, concrete/asphalt paved parking. Porous surface as dirt at 373 lot was observed from the subject property. Utilities to the subject property were Con Edison and National Grid for electric and gas, a private supplier for fuel oil, and municipality for water and sewer.

Overall setting of the vicinity is industrial, commercial, and residential mixed-use such as mixed-use warehouse and food factory to the northeast, parking lot to the southwest, local road with warehouse and residential properties to the northwest, and local and parking lot to the southeast of the subject property.

The subject property is known to be a 20,000 sq. ft. irregular shaped lot. Reported zoning is under Industrial (M1-1) zone.

Entrance to the subject property is from the northwest of the subject property (Willoughby Avenue)

2.3 CURRENT OCCUPANTS & USE OF THE PROPERTY

ITEM	
Present Occupant/Business Operation	Vacant
Number of Occupants/Units	2 (1: Industrial; 1: Residential)

2.4 MUNICIPAL SERVICES & UTILITIES

ITEM	
Portable Water	City (Municipality)
Gas/Oil Source for Heating	National Grid (Public Utility) / Natural gas A private oil supplier / Fuel oil
Electrical	Con Edison (Public Utility)
Sewage Disposal System	City (Municipality)
Solid Waste Disposal	Private dumpster

3.0 SUBJECT PROPERTY RECONNAISSANCE

3.1 LIMITING CONDITIONS

The information reported herein was obtained through sources deemed reliable, a visual site survey of areas readily observable, easily accessible or made accessible by the property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property.

No disassembly of systems or building components or physical or invasive testing was performed. ODELPHI renders no opinion as to the property condition at un-surveyed and/or inaccessible portions of the Subject Property. ODELPHI relies completely on the information, whether written, graphic or verbal, provided by the property contact or as shown on any documents reviewed or received from the property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this Report are valid on the date of the survey.

The contents of the Report are not intended to represent an in-depth analysis of the Subject Property. The extent of the physical inspection for the production of this Report has been limited, by contract and agreed upon Scope of Work, to a brief "walk through" of the property. Assumptions regarding the overall condition of the property have been developed based upon a survey of "representative" areas of the building.

3.2 SUBJECT PROPERTY RECONNAISSANCE

SUBJECT PROPERTY RECONNAISSANCE		
ITEM	**NOTED**	**LOCATION AND DESCRIPTION**
Processes that generate or handle Petroleum Products or Hazardous Substances		None observed
Underground Storage Tank	✔	A 4000-gallon fuel oil UST was closed in place.
Aboveground Storage Tank	✔	A 550-gallon fuel oil AST in concrete vault was observed in the basement of 1292 building with no visual.
Fuel Islands / Dispensers		None observed
Any type of fueling systems		None observed
Containers of Hazardous Material & Petroleum Products related to subject operation/process		None observed
Other containers of suspicious hazardous materials in drums, barrels, or other storage or unlabeled/unidentified containers on site	✔	Several identified drums with empty drums were observed with no visual.
Containers not attributed to current use of the Subject Property		None observed
Surface staining either on unpaved or paved land	✔	Severe oil staining on dirt of 373 vacant lot was observed with visual concern.

		Severe oil staining on the floor of rear work area of 1292 warehouse was observed with visual concern.
Areas of asphalt patch or surface depressions	✔	An asphalt patch area was observed at the parking lot of 1294 warehouse.
Stockpiled Soils with visual contamination		None observed
Fill material of questionable origin/ Piles		None observed
Stressed vegetation		None observed
Any type of heavy equipments or machinery of environmental concern on site		None observed
Hydraulic equipment or machine of environmental concern (PCB-oil / hydraulic oil) such as hydraulic lift, compactor		None observed
Drains for Machinery/Equipment Cleaning or Flushing		None observed
Wastewater Treatment Units & Clarifiers		None observed
Pools of liquid		None observed
Drains and Sumps	✔	A grated drain area was observed at the 1288 building.
Any regulated surface wastewater discharges		None observed
Storm water or surface-water drainage system having any abnormal accumulation of petroleum or chemical run-off or foreign materials, any unusual blockage of the storm-water control system		None observed
Any stained catch basins, drip pads, or sumps		None observed
Visual indication of Herbicides & Pesticides use to pose environmental concern		None observed
Visual evidence of leak or contamination from septic systems or Cesspools		None observed
Wells (any irrigation wells, injection wells, abandoned wells, groundwater-monitoring wells, dry wells, septic wells, oil wells, gas wells, domestic water wells, vapor wells or other-monitoring wells)		None observed
Railroad tracks or spurs		None observed
Visual evidence of improper handling / disposal or solid wastes		None observed
Other visual evidence of spills, leakage, staining, corrosion, soil/groundwater contamination	✔	Several spots with staining on the floor of 1282 and 1292 warehouse were observed.

3.3 DETAILED DESCRIPTION OF ANY RECONNAISSANCE ITEMS OF CONCERN

At the time of site reconnaissance on August 10, 2020, the subject property was vacant and abutted buildings with vacant land consisting of two (2) warehouses (1282/1294), vacant lot, former plating factory (1288), and mixed-use warehouse (1294). ODELPHI was not able to gain access to the 2nd floor apartment of 1292 building. Several oil stained area were observed from 373 vacant land. ODELPHI observed also staining of chemical spill on the metal floor at 1282 and 1292 warehouse. From 1288 main building, ODELPHI observed a gas-fired boiler, a gas meter, a grated drain cover, electric panel room, work area, and unidentified metal floor covers. Former fuel oil UST (closed in place) area also was observed in the front parking lot. Several unidentified drums, chemical staining, and severe oil staining on the floor of 1292 building were observed. ODELPHI observed electric meter area with several unidentified drums in the 1st level of basement and an oil-fired boiler, an inactive oil-fired boiler with a 550-gallon fuel oil AST inside concrete vault in the 2nd level of basement. Two (2) empty drums inside warehouse and asphalt patch at the parking lot were observed at 1294 warehouse building. No indication of underground storage tanks (USTs) was observed from the subject property. Source of heating was gas and fuel oil for the subject property.

3.4 BUSINESS ENVIRONMENTAL RISK

Business Environmental Risk is defined as a risk, which can have material environmental impact, or environmentally driven impact on the business associated with the current or planned use of a parcel of Industrial real estate, not necessarily limited to the issues requiring investigation. Activity and Use Restriction arising from Business Environmental Risk or Compliance Violation is defined as restrictions on the use of, or access to, a site/facility to (1) reduce or eliminate exposure to hazardous substance onsite, or (2) prevent activities that could interfere with a response action either as Engineering Controls or Institutional Controls. ODELPHI also searched for compliance records, permits and plans, etc. in relation to the subject business operation in the past and presence, which includes but not limited to, Environmental Permits, Equipment Operation Permits, NPDES, Hazardous Material/Waste Inventory or Management Plans, etc., Non-Compliance, Violation, Notices, Correspondences, Community Right-to-Know Plan, Health & Safety Plan, IIPP, SPCC, MSDS, Waste Ticket, Generator ID, etc.

Business environmental risk was not observed at the subject property. However, historical business environmental risk as plating was observed.

3.5 NON-CERCLA ITEMS

The following table summarizes issues on which the survey of interior areas of the Subject Property focused:

NON-CERCLA ITEMS		
ITEM	**NOTED**	**LOCATION AND DESCRIPTION**
Suspicious asbestos-containing materials in damaged condition if the structure is built prior to 1978		None observed
Suspicious lead-based paint in damaged condition if the structure is built prior to 1978		None observed
Lead in drinking water		N/A

Radon gas concern		N/A
Visual evidence of Urea Formaldehyde		N/A
Suspicious PCB-oil concern with hydraulic equipment, ballasts, transformers, etc.		None observed
Wetland, creeks, swale, pits, ponds, lagoons, or any other water bodies		N/A
Visual evidence of mold problems from wet areas, roof leaks, moisture around air conditioning or plumbing units		None observed
Air quality problems (unusual smells, obnoxious odors, or visual emissions, air emission stacks)		N/A
Is the property under flood zone (Federal Emergency Management Agency Flood Insurance Rate Map)		N/A

3.5.1 Asbestos-Containing Material (ACM)

The use of asbestos in many building products was banned by the U.S. Environmental Protection Agency (EPA) by the late 1970s. In 1989, EPA issued a ruling prohibiting the manufacturing, importation, processing, and distribution of most asbestos containing products. This rule, known as the Ban & Phase-Out Rule, would have effectively banned the use of nearly 95% of all asbestos products used in the United States. However, the U.S. 5th Circuit Court of Appeals vacated and remanded most of the Ban and Phase Out Rule in October 1991. Due to this court decision, many asbestos containing product categories not previously banned (prior to 1989) may still be in use today.

Asbestos-containing material (ACM) represents a concern when it is subject to damage that results in the release of fibers. Friable ACM, which can be crumbled by hand pressure and is therefore susceptible to damage, is of particular concern. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition or other activities.

Asbestos for Industrial use was banned by federal government in 1978. In general, although asbestos-containing materials may be present in the building materials, so long as they would be in an undisturbed state without disturbances or dismantlement, such ACM's do not pose an immediate health risk to building occupants. Local Building & Safety Department and appropriate Air Quality Management District (AQMD) require all possible asbestos-containing materials (ACM's) to be identified and removed in the case of renovation or construction of existing structure which might disturb or dismantle the suspicious ACM's.

If it is found that asbestos is contained within subject building materials through comprehensive asbestos survey, the implementation of an Asbestos Operations and Maintenance Program shall be developed, in order to ensure the safety of occupants who may be exposed to potential asbestos hazards.

An AHERA Certified Inspector or a State Certified Asbestos Consultant can perform the asbestos survey involving bulk sampling and analysis at NIST/NVLAP accredited laboratory using Polarized Light Microscopy with Dispersion Station (PLM/DS) in accordance with the Environmental Protection Agency (EPA) "Interim Method of the Determination of Asbestos in Bulk Insulation Samples" (EPA-600-M4-82-020).

Asbestos-containing material (ACM) represents a concern when it is subject to damage that results in the release of fibers. Friable ACM, which can be crumbled by hand pressure and is therefore susceptible to damage, is of particular concern. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition or other activities.

Prior to demolition of the subject building, asbestos survey and abatement of identified ACMs prior to demolition shall be conducted in accordance with AQMD Rule 1403 and demolition codes of regulation.

No prior reports, records of testing or known listings of ACM at the Subject Property were provided to ODELPHI. Based upon non-residential use of the Subject Property, ODELPHI is not contracted to perform ACM survey at the subject property, thus it is beyond the scope of the service included in this report.

However, ACM-like material was observed in the Supermarket and storage area. It appeared to be in good shape. However, for any renovation to the area where ACM-like material was observed, it is recommended to consult with environmental professional.

3.5.2 Lead-Based Paint (LBP)

In 1978, the federal government banned the use of lead-based paint in residential applications; however, usage in general industry continued at a decreased rate to the present. Due to the dangers of lead poisoning, the Consumer Product Safety Commission banned the sale of lead-based paint (LBP), defined as containing more than 0.06% lead by weight, to consumers, and the use of LBP in residences and other areas where consumers have direct access to painted surfaces. Effective June 3, 1993, the Lead in Construction Standard codified in 29 CFR (Code of Federal Regulations) 1926.62 applies to sources or potential sources of lead exposure present in an "employment-related" context. Federal regulations specify that lead paint hazards must be abated in residential buildings occupied by children under the age six.

The trigger mechanism for application of the standard is an activity that, by its inherent nature, may cause exposure to lead. Therefore, within the context of regulatory compliance for OSHA (Occupation Safety and Health Agency), the subject property did not appear to require further response to suspect lead-based paint as no on-site activity by its inherent nature would cause exposure to lead.

Lead-based paint presents a hazard through inhalation or ingestion of paint chips or vapor fumes. The greatest cumulative health threat is to young children, and for this reason the Department of Housing and Urban Development (HUD) has promulgated lead standards and survey requirements for buildings affected by HUD funding. This HUD regulation represents the only federal

requirement for lead-based paint, hazard management applicable to privately owned structures. Based upon non-residential use of the Subject Property, ODELPHI is not contracted to perform LBP survey at the subject property, this it is beyond the scope of the service included in this report

3.5.3 Lead in Drinking Water

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and plumbing material. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing material. Based upon non-residential use of the Subject Property, ODELPHI is not contracted to perform the testing of lead content in water at the subject property, this it is beyond the scope of the service included in this report.

Newly installed UF foam insulation often releases the gas-phase UF for six to twelve months. Such volatilized gases can concentrate in the internal air of a building. While no evidence of UF foam insulation was observed during the subject property reconnaissance, the potential for UF on the site is presumed low. ODELPHI is not contracted to perform the testing of formaldehyde level on the subject property, this it is beyond the scope of the service included in this report.

3.5.4 Radon

Radon is a naturally occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a major cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to occupants of the lowest level of a building with inadequate ventilation. Radon sources can be found from earth and rock beneath building structures, well water, and building materials themselves. Though there is no immediate health effect, it is believed to account for approximately 10% of lung cancer deaths in the United States. Estimated national average is 1.5 picocuries per liter of air, however, levels as high as 200 picocuries per liter in some Industrial buildings can be found. USEPA and State Department of Health Services' Radon Survey Interim Results report show different U.S. regions according to general geological and climate information.

If a property region reportedly has radon concentration below 4 picocuries per liter of air in 99.5% of homes within the region, then, it is not likely impacted by the presence of radon gas, considering EPA action limit of 4 picocuries per liter of air volume. However, when your premises are tested for radon level and have high level of radon reading, seek proper measures such as increase in ventilation, installation of heat exchanger or heat recovery ventilator, or sealing of cracks and other openings in basement floor. Usual methods of radon testing involve charcoal canisters at HVAC systems or lowest livable level of the subject building. Based upon non-residential use of the Subject Property, ODELPHI is not contracted to perform Radon testing at the subject property, this it is beyond the scope of the service included in this report.

3.5.5 Potential Impact of Urea Formaldehyde

Formaldehyde, by itself, or in combination with other chemicals, serves a number of purposes in manufactured products. It had been widely used to add permanent press qualities to clothing and

draperies, as a component of glues and adhesives, and as a preservative in some paints and coating products. In Industrial buildings, the most significant sources of formaldehyde are pressed wood products made using adhesives that contain ureaformaldehyde (UF) resins, such as particleboard, hardwood plywood paneling, and medium density fiberboard. As a colorless, pungent-smelling gas, Formaldehydes can cause sensations in the mucous membrane and difficulty in breathing which could lead to asthmatic attack.

Newly installed UF foam insulation often releases the gas-phase UF for six to twelve months. Such volatilized gases can concentrate in the internal air of a building. No evidence of UF foam insulation was observed during the subject property reconnaissance. The potential for UF on the site is presumed low. ODELPHI is not contracted to perform the testing of formaldehyde level on the subject property, thus the delineation of its level is beyond the scope of the service included in this report.

3.5.6 Polychlorinated Biphenyls (PCBs) Equipment

Prior to 1978, PCBs were commonly used in dielectric fluids in transformers, capacitors, and light ballasts due to their desirable thermal characteristics, and hydraulic fluid compactor. Due to their demonstrated toxicity and persistence in the environment, PCB manufacturing in the United States was discontinued. By 1986, the US EPA required that Industrial property owners with transformers containing more than 500 ppm PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 5 meters (40 CFR 760.30). The US EPA has three different categories for PCB-containing transformers such as non-PCB containing transformer, if less than 50 ppm PCB, PCB-contaminated transformer, if between 50 and 499 ppm of PCB, and it must conform to the US EPA Fire Rule for disposal, and PCB-transformer, if greater than 500 ppm of PCB.

No PCB-containing light ballasts were inspected, which operate fluorescent light fixtures. Separate survey of PCB's on existing light ballasts can only determine the content, unless such ballasts contained in the fluorescent light fixtures are labeled with "no PCB". Prior to construction or any disturbances to the existing light fixtures, PCB ballasts survey has to be performed for any building structure constructed prior to 1978, and identified PCB-ballasts shall properly be disposed of by incineration or recycled within authorized facilities. ODELPHI is not contracted to perform the testing of PCB contents in suspicious fixtures and equipments on the subject property, thus the delineation of its level is beyond the scope of the service included in this report.

3.5.7 Pits, Ponds, Lagoons

No visible evidence of wetlands such as pits, ponds, lagoons, or any other water bodies were observed within the subject property's boundary lines.

Wetlands identification of the property is not part of an ASTM E1527-13 Phase I. ODELPHI is not contracted to perform the identification of wetlands on the subject property, thus the delineation of its level is beyond the scope of the service included in this report. However, wetlands on the property may reduce the allowable footprint that could be developed, which significantly changes the economics of the project. Wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plants and animal communities living in

the soil and on its surface. Wetlands can be further defined through classification according to the length of time that an area is inundated or saturated by water, and the type of plants and animals an area supports. There are five major wetland classifications: marine, estuarine, lacustrine, riverine, and plaustrine. Marine and estuarine wetlands are associated with the Essex and include coastal wetlands, such as tidal marshes. Lacustrine wetlands are associated with lakes, while riverine wetlands are found along rivers and streams. Plaustrine wetlands may be isolated or connected wet areas and include marshes, swamps, vernal pools, and bogs.

Pits, ponds and lagoons are often associated with the disposal of solid and liquid wastes, which may include hazardous materials. The Clean Water Act (1972), Section 404, establishes federal authority to regulate activities in wetlands, and US Department of Fish and Game mapping resources are often used for geographic wetland identification.

3.5.8 Mold (Fungi, Bacteria)

The presence of mold and mildew in residential and Industrial buildings is causing a surge of interest amongst building owners, architects, engineers and contractors regarding its source and consequences. In general, mold is a subset of the fungi family. Fungi are common and found in most ecosystems. Fungi is needed to help recycle organic material to sustain plant and animal life. In order to reproduce, mold release tiny spores into the air, which eventually attach onto surfaces favorable for growth. A class of fungi, molds have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments, and produce spores to reproduce as plants produce seeds. When mold spores land on a damp spot indoor, they may begin growing and digesting whatever they are growing on in order to survive. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problems remain undiscovered or not addressed.

Interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth. Moisture control is often the key to mold control, since molds need both food and water to survive.

Molds need three things to grow and thrive: Organic materials (food) such as wood, cloth, leather, carpets, or dust, Temperatures between 40 degrees and 100 degrees F. Moisture. If any of these three conditions are not present, a mold colony will become dormant. A dormant colony will become reactivated if favorable conditions return. Often molds release compound gases that create the common “musty” smell associated with mold.

Moisture is the one criterion that must be controlled in order to prevent, or stop, mold growth in interior or living environments. Aside from roof and drainage leaks, and leaky plumbing, there are numerous sources of moisture related to water vapor already in the air (relative humidity). Tubs/showers, cooking, plants, dishwashing, humidifiers and outdoor humid air all contribute moisture that can lead to condensation on, or within, wall surfaces, at windows or at air supply registers. If a must door exists within an area, there is a good chance that mold is present.

As mold becomes a more prevalent issue, building owners will need to stay informed on the subject. There are dozens of Internet websites geared to the topic, and increased litigation in this area is also fueling increased interest. With any new trend there often is misinformation, incorrect conclusions, and conflicting information. Those involved in the building industry should consider the source and weight of information carefully before drawing conclusions and making decisions.

Laboratory test and sampling by qualified industrial hygienist for air & wipe testing can only determine the environmental site conditions for various species of fungi such as Aspergillus, Cladosporium, Stachybotris and other mycotoxyns, and bacteria families such as Legionella, etc. Mold assessment or sampling of the property is not part of an ASTM E1527-13 Phase I. ODELPHI is not contracted to perform the identification of mold hazards on the subject property, thus the delineation of its level is beyond the scope of the service included in this report.

3.5.9 Flood Zone

ODELPHI is not contracted to search flood map to identify whether the subject property is located within 50-year, 100-year flood zone, within the scope of this environmental assessment.

3.5.10 Other Non-Scope Considerations

ODELPHI is not contracted to research the following non-scope considerations, within the scope of this environmental assessment. No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive:

Regulatory compliance, Cultural and historical resources, Industrial hygiene, Health and safety, Ecological resources, Endangered species.

3.6 PHYSICAL SETTING

Physical Setting Sources—A current *USGS 7.5 Minute Topographic Map* (or equivalent) showing the area on which the *property* is located shall be reviewed, provided it is *reasonably ascertainable*. It is the only *standard physical setting source* and the only *physical setting source* that is required to be obtained (and only if it is *reasonably ascertainable*).

One or more additional *physical setting sources* may be obtained in the discretion of the *environmental professional*. Because such sources provide information about the geologic, hydro-geologic, hydrologic, or topographic characteristics of a site, discretionary *physical setting sources* shall be sought when *(1)* conditions have been identified in which *hazardous substances* or *petroleum products* are likely to migrate to the *property* or from or within the *property* into the ground water or soil and *(2)* more information than is provided in the current
USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good Industrial or customary practice in initial *environmental site assessments* in the type of *Industrial real estate transaction involved*, in order to assess the impact of such migration on *recognized environmental conditions* in connection with the *property*.

Mandatory *Standard Physical Setting Source*
USGS—Current 7.5 Minute Topographic Map (or equivalent)

Discretionary and Non-Standard *Physical Setting Sources*
USGS and/or State Geological Survey—Groundwater Maps
USGS and/or State Geological Survey—Bedrock Geology Maps
USGS and/or State Geological Survey—Surficial Geology Maps
Soil Conservation Service—Soil Maps
Other *Physical Setting Sources* that are reasonably credible (as well as *reasonably ascertainable*)

It is ODELPHI's standard procedure and general practice that professional practice of geology or hydrogeology is certified by a licensed Professional Geologist or Professional Engineer, subject to the provisions of the Geologists and Geophysicists Act. ODELPHI's professional geologist or professional engineer was consulted to provide interpretation of geologic interpretation when the report contains such information.

TOPGRAPHY
The subject property's physical location was researched employing a United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad) Map relevant to the subject property. The USGS 7.5 Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and shows physical features with environmental significance such as wetlands, water bodies, roadways, mines, and buildings.

The physical and natural features illustrated on the Quad Map served as areas of visual emphasis when conducting the site inspection of the subject property. The USGS 7.5 Minute Quad Map was used as the only Standard Physical Setting Source, and is sufficient as a single reference.

The Subject Quad Map shows no physical features that may have environmentally impacted the subject property. The subject property and general area are identified as urban developed. No mines, wells, wetlands, or aboveground tanks were mapped in the general area of the subject property. The elevation of the site is approximately 38 feet above mean sea level with slightly down gradient toward the southwest.

While groundwater flow direction at the subject property cannot be confirmed without survey measurement of static groundwater level at triangular points, it is expected to flow in the direction of surface topographical contour, or toward the wetland or nearest water body or discharge basin (percolation channel). It is important to note that groundwater flow direction can be influenced locally and regionally by the present of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells.

SOURCE OF DATA
Current USGS 7.5 Minute Topographical Map

3.7 ADJACENT PROPERTIES

For the scope of this assessment, properties are defined and categorized based upon their physical proximity to the subject property. An adjoining property is any real estate property whose border is contiguous or partially contiguous with the subject properties, or that would be if the properties were not separated by a roadway, street, public thoroughfare, river, or stream.

Uses of Properties in Surrounding Area—Uses in the area surrounding the *property* shall be identified in the *report*, but this task is required only to the extent that this information is revealed in the course of researching the *property* itself (for example, an *aerial photograph* or *fire insurance map* of the *property* will usually show the surrounding area). If the *environmental professional* uses sources that include the surrounding area, surrounding uses should be identified to a distance determined at the discretion of the *environmental professional* (for example, if an aerial photo shows the area surrounding the *property*, then the *environmental professional* shall determine how far out from the *property* the photo should be analyzed). Factors to consider in making this determination include, but are not limited to: the extent to which information is *reasonably ascertainable*; the time and cost involved in reviewing surrounding uses (for example, analyzing *aerial photographs* is relatively quick, but reviewing *property tax files* for adjacent properties or reviewing *local street directories* for more than the few streets that surround the site is typically too time-consuming); the extent to which information is useful, accurate, and complete in light of the purpose of the *records review*; the likelihood of the information being significant to *recognized environmental conditions* in connection with the *property*; the extent to which potential concerns are *obvious*; known hydro-geologic/geologic conditions that may indicate a high probability of *hazardous substances* or *petroleum products* migration to the *property*; how recently local development has taken place; information obtained from *interviews* and other sources; and local good Industrial or customary practice.

Overall setting of the vicinity is industrial, commercial, and residential mixed-use such as mixed-use warehouse and food factory to the northeast, parking lot to the southwest, local road with warehouse and residential properties to the northwest, and local and parking lot to the southeast of the subject property.

4.0 SUBJECT PROPERTY AND VICINITY HISTORY

4.1 HISTORICAL RECORD SEARCH RESOURCES

Historical Records Search in conformance with the scope and limitations of ASTM Standard Practice E1527-13 was conducted for the Property. All *obvious* uses of the *property* shall be identified from the present, back to the *property's* first developed use, or back to 1940, whichever is earlier.

Intervals—Review of *standard historical sources* at less than approximately five year intervals is not required by this practice (for example, if the *property* had one use in 1950 and another use in 1955, it is not required to check for a third use in the intervening period). If the specific use of the *property* appears unchanged over a period longer than five years, then it is not required by this practice to research the use during that period (for example, if *fire insurance maps* show the same apartment building in 1940 and 1960,

Data Failure—The historical research is complete when either: *(1)* the objectives in ASTM E1527-13 section 8.3.1 through 8.3.2.2 are achieved; or *(2) data failure* is encountered. *Data failure* occurs when all of the *standard historical sources* that are *reasonably ascertainable* and likely to be useful have been reviewed and yet the objectives have not been met. *Data failure* is not uncommon in trying to identify the use of the *property* at five-year intervals back to first use or 1940 (whichever is earlier). Notwithstanding a *data failure*, *standard historical sources* may be excluded if: *(1)* the sources are not *reasonably ascertainable*, or *(2)* if past experience indicates that the sources are not likely to be sufficiently useful, accurate, or complete in terms of satisfying the objectives. *Other historical sources* may be used to satisfy the objectives, but are not required to comply with this practice. If *data failure* is encountered, the *report* shall document the failure and, if any of the *standard historical sources* were excluded, give the reasons for their exclusion. If the *data failure* represents a significant *data gap*, the *report* shall comment on the impact of the *data gap* on the ability of the *environmental professional* to identify *recognized environmental conditions*

4.2 PREVIOUS ENVIRONMENTAL REPORTS

ODELPHI was not provided with or aware of previous environmental reports performed for the Subject Property. ODELPHI did not identify previous environmental reports for the Subject Property at local agencies or other sources contacted during this assessment.

4.3 FIRE INSURANCE MAPS

Environmental Data Resources, Inc. (EDR) conducted a search of Sanborn Fire Insurance Company (SanBorn) maps for the area including the Subject Property and revealed coverage for the subject area as followed:

HISTORICAL SANBORN FIRE INSURANCE MAPS	
DATE	**DESCRIPTION**
1888	The subject properties appeared to be residential dwellings, vacant land, and railroad. The adjacent properties were viewed as local road, railroad, and vacant land.
1907	The subject properties appeared to be residential dwellings, store, wagon shed, vacant land, and railroad. The adjacent properties were viewed as local road, vacant land, office and stock of paper box mfg., railroad, and residential dwelling.
1933-1951	The subject properties appeared to be residential dwellings, knitting null, factory, and railroad. The adjacent properties were viewed as local road, office, garage, railroad, and residential dwelling.
1965	The subject properties appeared to be residential dwellings, clothing mfg, factory, and elec. plating. The adjacent properties were viewed as local road, wire mfg, office, garage, vacant land, and residential dwelling.
1968	The subject properties appeared to be residential dwellings, clothing mfg, factory, and elec. plating. The adjacent properties were viewed as local road, metal product mfg, office, garage, vacant land, and residential dwelling.
1977	The subject properties appeared to be residential dwellings, mixed-use clothing mfg, factory, and elec. plating. The adjacent properties were viewed as local road, metal product mfg, commercial, mfg, warehouse, vacant land, and residential dwelling.
1979	The subject properties appeared to be residential dwelling, warehouse, mixed-use clothing mfg, factory, and elec. plating. The adjacent properties were viewed as local road, metal product mfg, commercial, mfg, warehouse, vacant land, and residential dwelling.
1980	The subject properties appeared to be vacant land, warehouse, mixed-use clothing mfg, factory, and elec. plating. The adjacent properties were viewed as local road, metal product mfg, commercial, mfg, warehouse, vacant land, parking, and residential dwelling.
1981-1987	The subject properties appeared to be vacant land, warehouse, mixed-use mfg, and elec. plating. The adjacent properties were viewed as local road, metal product mfg, commercial, mfg, warehouse, vacant land, parking, and residential dwelling.

HISTORICAL SANBORN FIRE INSURANCE MAPS	
DATE	**DESCRIPTION**
1988-2007	The subject properties appeared to be vacant land, warehouse, mixed-use mfg, and elec. plating. The adjacent properties were viewed as local road, metal product mfg, commercial, mfg, warehouse, vacant land, and residential dwelling.
Sanborn Discussion	Sanborn Fire Insurance map (Sanborn Map) has coverage for the subject property from 1888 to 2007. The subject property was revealed as residential dwelling from 1888 to 1979, vacant land in 1988 and from 1980 to 2007, railroad from 1888 to 1951, store and wagon shed in 1907, knitting null from 1933 to 1951, clothing mfg from 1965 to 1968, mixed-use clothing mfg and factory from 1977 to 1980, elec. plating from 1965 to 2007, and warehouse from 1979 to 2007.

Environmental sensitive business as electric plating from 1965 to 2007 was observed in the subject property, but not in the adjacent properties based on historical Sanborn Fire Insurance Maps search.

4.4 HISTORIC AERIAL PHOTOGRAPHS

ODELPHI conducted a search of Aerial photographs for the area including the Subject Property.

DATE	SOURCE	DESCRIPTION
1924-1954	USGS	The subject property appeared to be old structure. The adjacent properties were viewed as local road, vacant land, and old structure.
1961-1984	USGS	The subject property appeared to be current structure. The adjacent properties were viewed as local road, vacant land, and old & current structure.
1991-2017	USGS	The subject property appeared to be current structure. The adjacent properties were viewed as local road, parking lot, and current structure.

Environmentally sensitive business was not observed in the subject and the adjacent properties based on historical Aerial Photograph search.

4.5 CITY DIRECTORIES

EDR Multi-Library City Directory Search showed 1928-2017 the following businesses listed as subject address.

SUBJECT PROPERTY	
YEAR	**BUSINESS LISTING**

1992	TIMMYS FINISHING	NYNEX Informantion Resource Co.

Refer to EDR City Directory for further residential listings for the subject/adjacent properties.

Environmentally sensitive businesses as plating company from 1994 to 2017 and machine from 2014 to 2017 were listed in the subject property, and in the adjacent properties as metal product from 1994 to 2017 based up on historical city directory search.

4.6 BUILDING RECORDS / PROPERTY PROFILE

ODELPHI reviewed City of New York (NYC) Building Department files for the search of public records and found no items of environmental concerns except an oil burner application for 1292 and 1294 building in 1948 and 1972, respectively. ODELPHI requested file review to NYC Fire Department in regard to the presence of UST. The agency has not responded at the time of this report writing. Any significant finding will be added as an addendum.

4.7 CHAIN OF TITLE / PRELIMINARY TITLE REPORT

The NETR Title Property Profile identifies use code of the subject property as light industrial (1288/1292), warehouse (1282/1294), and misc. building (373). Primary owner of the subject property is Guyana Plating, LLC.

4.8 HISTORICAL TOPOGRAPHICAL MAPS

No features of environmental concern were identified from The USGS Regional Quad Map (dated 1995, photo revised in 2013) Quadrangle.

4.9 INTERVIEWS

The following comments were made or interviews conducted during the Subject Property survey.

At the time of site inspection, Mr. Dronacharje Balgobin, the property owner, were interviewed and accompanied the site inspection. Mr. Balgobin stated that he purchased the subject property in 2009 and the use of the subject property had not been changed since its development as a plating company in 1950 until early 2020. Mr. Balgobin also stated that the source of heating is gas and fuel oil and there is one (1) 550-gallon fuel oil aboveground storage tank (AST) in the basement of 1292 building and one (1) fuel oil UST was closed in place at the parking lot of 1288 building. He stated that the operation of plating was ceased in early 2020 with removal of all the equipment and the most of documents are no longer in the office except 2012 chemical inventory of fourteen (14) chemical brands. He also stated that all the chemical were recycled in the factory with no spill and he is not aware of any environmental incidents or issues at the subject property.

4.10 OTHER HISTORICAL RECORDS

According to ASTM E1527-13, ODELPHI is to review historical data, and provide a description of the use of the site since 1940 or beginning with the earliest development of the site, whichever is earlier. ODELPHI obtained reasonably ascertainable historical data, i.e., public records from building & planning department, multi-library city directory search, Sanborn Fire Insurance Maps, aerial photographs, fire or environmental department records, historical topographical maps and Interview with Individuals knowledgeable about previous site usage.

No other historical records were used.

4.11 SUMMARY OF HISTORICAL PEROPRTY USE AND DATA GAP

Summary of Historical Property Use (in chronological order)
According to historical records, the subject building as current structure appeared to be built in 1931/1985. Historical data indicated that environmentally sensitive business as plating had occupied the subject property.

Data Gap
ASTM E1527-13 and the US-EPA AAIs requires that the report identify and comment on significant data gaps that affect the ability of the environmental professional to identify recognized environmental concerns.

SEARCHES FOR RECORDED ENVIRONMENTAL CLEANUP LIENS (§ 312.25) The all appropriate inquiries rule requires that environmental site assessments include searches for environmental cleanup liens against the subject property that are filed or recorded under federal, state, tribal, or local laws. The objective of this requirement is to identify liens placed upon the property that indicate that environmental response actions were taken to address past releases at, on, or to the subject property. The ASTM E1527-13 standard also requires a search for environmental cleanup liens, although the scope of the search is limited to reasonably ascertainable recorded land title records. The all appropriate inquiries rule differs from the ASTM E1527-13 standard with respect to the party responsible for conducting the search for environmental cleanup liens. Under the ASTM E1527-13 standard, the user, or prospective property owner, is responsible for the environmental cleanup lien search and is required to provide the results of the search to the environmental professional. **The all appropriate inquiries rule allows that either the prospective property owner or the environmental professional may conduct the search. If the search is performed by the prospective property owner and the property owner does not provide the search results to the environmental professional, the environmental professional should treat the lack of information as a data gap and should comment on the significance of the data gap on his or her ability to identify conditions indicative of releases or threatened releases.**

The largest data gap in this research was from 1888. From 1888 to present the data gaps ranged from one to fifteen years. The Fire Department file was not reviewed at the time of this report writing. However, ODELPHI does not believe that any gaps in the information reviewed would affect our ability to identify recognized environmental concerns.

5.0 REGULATORY RECORD SEARCH

5.1 PROCEDURE

The most current databases sources maintained by state and federal offices were searched and provided by governmental record search database suppliers. Such databases were searched for properties with reported environmental issues within radii specified by ASTM Standard E1527-13, either by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is included as an appendix to this *Report*.

The database report may identify a certain "orphan sites" which are those facilities that could not be mapped or geocoded due to inadequate address information.

5.2 FEDERAL AGENCY RECORDS

FEDERAL AGENCY RECORDS		
SOURCE	**CRITERIA FOR MINIMUM SEARCH DISTANCE (MILES)**	**NO. OF PROPERTIES WITHIN SEARCH DISTANCE**
NPL	1.0	1
De-listed NPL	0.5	0
SEMS	0.5	0
SEMS-ARCHIVE	0.5	2
RCRA-CORRACTS	1.0	0
RCRA-TSDF	0.5	0
RCRA-Generator	Subject & Adjoining Properties	1
ERNS	Subject Property Only	1
Federal IC/EC Registries	Subject Property Only	0
Other Federal List	Subject Property Only	9

National Priority List (NPL) and Proposed NPL

The NPL Report, also known as the Superfund List, is an EPA listing of the nation's worst uncontrolled or abandoned hazardous waste facilities. Listing as a Superfund Site is primarily based on a score that the facility receives from the EPA's Hazard Ranking System. These facilities are targeted for possible long-term remedial action under the Superfund Act. Such prioritized sites with significant risk to human health and the environment receive remedial funding under the Comprehensive Environmental Response Conservation and Liability Act (CERCLA). The *NPL* or *National Priorities List* is a list compiled by EPA pursuant to CERCLA, 42 U.S.C. §9605(a)(8)(B), of properties with the highest priority for cleanup pursuant to EPA's Hazard Ranking System. 40 C.F.R. Part 300 can be referenced. (*http://www.epa.gov/superfund/sites/npl/npl.htm*)

The search radius for NPL is one-mile. The subject property is not listed on the NPL. There is one (1) NPL site within one-mile of the subject property.

A review of the NPL list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NEWTOWN CREEK SUPERF	*NEWTOWN CRK - N LAT*	*NW 1/2 - 1 (0.831 mi.)*	*340*	*836*
Cerclis ID:: 206282 EPA Id: NYN000206282				

The site listed above is not suspected to have an adverse environmental impact on the Subject Property based on one or more of the following rationale: a) their distance from the Subject Property; b) their down/cross-gradient location with respect to the assumed shallow groundwater flow direction; c) the nature of the reported release (e.g., soil only); d) liability; and/or e) their regulatory status (e.g., Case Closed, No violation found).

De-listed National Priority List (NPL) – NPL Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

The search radius for De-listed NPL is ½ mile. The subject property is not listed on De-listed NPL. There is no De-listed NPL site within ½ mile of the subject property.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)/ No Further Remedial Action Planned (NFRAP)
The CERCLIS is the EPA compilation of sites for which the EPA has evidence of, or is investigating, a release or threatened release, of hazardous substances which may be subject to review in accordance with the terms and conditions of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund Act). Sites to be included are identified primarily by the reporting requirements of hazardous substances including degreasing solvents, oily waste, acid solutions, alkaline solutions, and heavy metal solutions, Treatment, Storage and Disposal (TSD) facilities and releases larger than specific Reportable Quantities (RQ), established by EPA.

SEMS (Superfund Enterprise Management System)/ SEMS-ARCHIVE (Superfund Enterprise Management System Archive)

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA

may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

The search radius for SEMS is ½ mile. The subject property is not listed on SEMS. There is no SEMS site within ½ mile of the subject property. The search radius for SEMS-ARCHIVE is ½ mile. The subject property is not listed on SEMS-ARCHIVE. There are two (2) SEMS-ARCHIVE sites within ½ mile of the subject property.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
TECHNICAL METAL FINI Site ID: 0202279 EPA Id: NYD980780894	*214 STARR STREET*	*W 0 - 1/8 (0.047 mi.)*	*E23*	*66*
AAA ALLOYS OF AMERIC	*12 WYCKOFF AVE*	*NW 0 - 1/8 (0.121 mi.)*	*K94*	*186*

The sites listed above are not suspected to have an adverse environmental impact on the Subject Property based on one or more of the following rationale: a) their distance from the Subject Property; b) their down/cross-gradient location with respect to the assumed shallow groundwater flow direction; c) the nature of the reported release (e.g., soil only); d) liability; and/or e) their regulatory status (e.g., Case Closed, No violation found).

Resource Conservation and Recovery Act (RCRA)-Corrective Action Tracking System (CORRACTS)

CORRACTS is a list of facilities that are found to have had hazardous waste releases and require Resource Conservation and Recovery Act (RCRA) corrective action activity, which can range from site investigations to remediation. This database is also known as RCRA Violators or Corrective Action Report (CORRACTS).

The search radius for CORRACTS is one mile. The source is from EPA Corrective Action Report. The subject property is not listed on CORRACTS. There is no CORRACTS site within one mile of the subject property.

RCRA-TSDF: Resource Conservation and Recovery Information System (RCRIS)

The RCRIS report of hazardous waste generators, treatment, storage, and disposal (TSD) facilities contains information pertaining to facilities that are required to register their hazardous waste activity under the Resource Conservation and Recovery Act (RCRA).

The search radius for RCRIS-TSD is ½ mile. The subject property is not listed as an RCRIS-TSD facility. There is no RCRIS-TSD site located within ½ mile of the subject property.

Resource Conservation and Recovery Act (RCRA) Generators
RCRA hazardous waste generators are identified as Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). RCRA LQGs are identified as those facilities, which generate at least 1,000 kilograms (2,200 pounds) of non-acutely hazardous waste (or 1 kilogram of acutely hazardous waste) monthly. RCRA SQGs are identified as those facilities that generate less than 1,000 kilograms of non-acutely hazardous waste monthly.

The search radius for RCRA list is the subject site and adjacent properties. The subject site is listed on the RCRA list. No RCRA site was identified on the EDR report as being adjacent to the subject site.

The listing is in regard to past operation of plating company as hazardous waste generators, treatment, storage, and disposal (TSD) facility with large quantity generator and evaluation of significant non-complier status at the subject property. ODELPHI consider the listings except NY UST pose risks of impact at the subject property based on its regulatory status (Significant Non-complier) and property condition and use (70 year operation from 1950 to 2020 of plating business).

Federal Emergency Response Notification System (ERNS)
The ERNS is a national database used to collect information on reported releases of petroleum products or hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the U.S. Coast Guard, the National Response Center and the U.S. Department of Transportation. The program is a cooperative effort of the Environmental Protection Agency, the Department of Transportation Research and Special Program Administration's National Transportation System Center and the National Response Center. There are primarily five Federal statues that requires release reporting: CERCLA Section 103; the Superfund Amendments and Reauthorization Act (SARA) Title III Section 304; the Clean Water Act of 1972 (CWA) Section 311(b)(3); and the Hazardous Material Transportation Act of 1974 (HMTA) Section 1808 (b).

The search radius for ERNS is the subject site. The subject site is listed on the ERNS list.

Site	Database(s)	EPA ID
1288 WILLOUGHBY AVE 1288 WILLOUGHBY AVE BROOKLYN, NY 11237	ERNS NRC Report #: 851923 Incident Date Time: 2007-10-18 04:30:00	N/A

The listing in ERNS was triggered by past spill of 100 gallon of NICKEL PLATING SOLUTION at the building floor and outside ground at 375 Suydam Street due to equipment failure. ODELPHI consider the listings except NY UST pose risks of impact at the subject property based on its regulatory status (Significant Non-complier) and property condition and use (70 year operation from 1950 to 2020 of plating business).

US Engineering Controls
A listing of sites with engineering controls in place.

Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

The search radius for ENGINEERING CONTROLS is the subject site. The subject site is not listed on the ENGINEERING CONTROLS list.

US Institutional Controls
Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.
Source: Environmental Protection Agency

The search radius for INSTITUTIONAL CONTROLS is the subject site. The subject site is not listed on the INSTITUTIONAL CONTROLS list.

Other Federal Lists (RCRA NonGen / NLR, ICIS, FTTS, HIST FTTS, US AIRS, FINDS, ECHO**)**
The search radius for **Other** is the subject site. The subject site is listed on the **Other** list.

The listings in RCRA-LQG, ICIS, FTTS, HIST FTTS, US AIRS, FINDS, and ECHO are in regard to past operation of plating company as hazardous waste generators, treatment, storage, and disposal (TSD) facility with large quantity generator and evaluation of significant non-complier status at the subject property. The listings in RCRA NonGen / NLR, FINDS, and ECHO were triggered by past activities of a public utility company (Con Edison) at 1292 Willoughby Avenue. ODELPHI consider the listings except NY UST pose risks of impact at the subject property based on its regulatory status (Significant Non-complier) and property condition and use (70 year operation from 1950 to 2020 of plating business).

State/Tribal Inactive Hazardous Waste Disposal Sites in New York State (SHWS)
State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid by potentially responsible parties. Available information varies by state.

The search radius for State SHWS Sites is one mile. The subject property is not listed on State SHWS Database. There are three (3) State SHWS sites located within one mile of the subject property.

A review of the NY SHWS list, as provided by EDR, and dated 05/12/2020 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
TECHNICAL METAL FINI Site Code: 57764	*214 STARR STREET*	*W 0 - 1/8 (0.047 mi.)*	*E23*	*66*
VARICK AVENUE Site Code: 55914	165 VARICK AVENUE	NW 1/2 - 1 (0.586 mi.)	337	826
FORMER JAYER PLATING Site Code: 57074	*2 INGRAHAM ST*	*WNW 1/2 - 1 (0.621 mi.)*	*338*	*828*

The sites listed above are not suspected to have an adverse environmental impact on the Subject Property based on one or more of the following rationale: a) their distance from the Subject Property; b) their down/cross-gradient location with respect to the assumed shallow groundwater flow direction; c) the nature of the reported release (e.g., soil only); d) liability; and/or e) their regulatory status (e.g., Case Closed, No violation found).

State/Tribal Solid Waste Facilities/Landfill (SWF/LF)
The SWF/LF is a listing of all permitted active, inactive, or closed landfills. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

The search radius for SWF/LF is ½ mile. The subject property is not listed on SWF/LF. There are six (6) SWF/LF sites within ½ mile of the subject property.

A review of the NY SWF/LF list, as provided by EDR, and dated 04/03/2020 has revealed that there are 6 NY SWF/LF sites within approximately 0.5 miles of the target property.

The sites listed above are not suspected to have an adverse environmental impact on the Subject Property based on one or more of the following rationale: a) their distance from the Subject Property; b) their down/cross-gradient location with respect to the assumed shallow groundwater flow direction; c) the nature of the reported release (e.g., soil only); d) liability; and/or e) their regulatory status (e.g., Case Closed, No violation found).

State/Tribal Leaking Underground Storage Tanks (LTANKS)

The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, and tank failures or tank overfills.

The search radius for the LTANKS list is ½ mile. The subject property is not listed on the LTANKS list. There are thirty-seven (37) sites and no HIST LTANKS site within ½ mile of the subject property.

A review of the NY LTANKS list, as provided by EDR, and dated 05/12/2020 has revealed that there are 37 NY LTANKS sites within approximately 0.5 miles of the target property.

None of the sites listed above are suspected to have an adverse environmental impact on the Subject Property based on one or more of the following rationale: a) their distance from the Subject Property; b) their down/cross-gradient location with respect to the assumed shallow groundwater flow direction; c) the nature of the reported release (e.g., soil only); d) liability; and/or e) their regulatory status (e.g., Case Closed, No violation found).

Historical Listing of Leaking Underground Storage Tanks (HIST LTANKS)

See above LTANKS listing.

State/Tribal Underground Storage Tank (UST) Database
The Underground Storage Tank database contains registered USTs which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data comes from the State Water Resources Control Board's Hazardous Substance Storage Container Database. Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons.

The search radius for UST is the subject site and adjacent properties. The subject site is listed on the UST list. There is no listed UST site and HIST UST site on properties adjacent to the subject property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
STATE REALTY CO	375 SUYDAM ST	0 - 1/8 (0.000 mi.)	A6	36
Database: UST, Date of Government Version: 03/23/2020				

The listing in NY UST is in regard to past existence of a 4000-gallon fuel oil UST at the subject property. ODELPHI does not consider the listing in NY UST poses risk of impact at the subject property based on its regulatory status (Unregulated), and property condition (Closed in place).

If sites are listed on the New York Leaking Underground Storage Tank (LTANKS) database with a "corrective action taken" status, it shall be interpreted as follows. The identified contamination at such sites was mitigated to a degree that the governing agency believed that these sites do not pose apparent concern/threat to the subsurface environment of the neighboring area. According to Lawrence Livermore National Laboratory Reports on Leaking Underground Fuel Tanks (LUFT's), approximately ninety percent of dissolved petroleum products is found less than 280 feet in distance from the origination source, and most of these plumes are either stable or decreasing in distance. And seventy percent of the plume is in shallow groundwater less than 25 feet below the ground surface.

Historical Listing of Underground Storage Tanks (HIST UST)
See above UST listing.

State/Tribal State Institutional Controls/Engineering Controls
Classification Exception Area Sites/Declaration Environmental Restriction/Deed Notice Sites
A Classification Exception Area is an institutional control providing notice that ground water contamination exists in a particular location above State standards. Legal Document that restricts the use of contaminated property; holds owner(s) to the regulatory/statutory requirements for cleanup.

The search radius for IC/EC is the subject site. The subject site is not listed on the IC/EC list.

State/Tribal State Voluntary Cleanup Sites
Site involved in the Voluntary Cleanup Program.

Through the VCP, responsible parties, developers, local officials, or individuals may work with the department to remediate non-priority contaminated sites that pose no immediate threat to human health or the environment.

The search radius for VCP Sites is ½ mile. The subject site is listed on the VCP Sites list. There are three (3) VCP sites within ½ mile of the subject property.

A review of the NY VCP list, as provided by EDR, has revealed that there are 3 NY VCP sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
JOYVA VACANT LOT Database: VCP, Date of Government Version: 05/12/2020 Site Code: 56948	498 JOHNSON AVENUE	NW 1/4 - 1/2 (0.397 mi.)	AP313	741

The sites listed above are not suspected to have an adverse environmental impact on the Subject Property based on one or more of the following rationale: a) their distance from the Subject Property; b) their down/cross-gradient location with respect to the assumed shallow groundwater flow direction; c) the nature of the reported release (e.g., soil only); d) liability; and/or e) their regulatory status (e.g., Case Closed, No violation found).

State/Tribal State Brownfield Sites

Brownfields are identified as former or current commercial or industrial use sites that are presently vacant or underutilized, on which there is suspected to have been a discharge of a contamination to the soil or groundwater at concentrations greater than applicable cleanup criteria.

The search radius for Brownfield Sites is ½ mile. The subject site is not listed on the Brownfield Sites list. There are two (2) Brownfield sites within ½ mile of the subject property.

A review of the NY BROWNFIELDS list, as provided by EDR, and dated 05/12/2020 has revealed that there are 2 NY BROWNFIELDS sites within approximately 0.5 miles of the target property.

The listing in NY MANIFEST are in regard to past operation of plating company as hazardous waste generators, treatment, storage, and disposal (TSD) facility with large quantity generator and evaluation of significant non-complier status at the subject property. The listings in NJ MANIFEST, and NY MANIFEST were triggered by past activities of a public utility company (Con Edison) at 1292 Willoughby Avenue. ODELPHI consider the listings except NY UST pose risks of impact at the subject property based on its regulatory status (Significant Non-complier) and property condition and use (70 year operation from 1950 to 2020 of plating business).

Non-ASTM Federal Supplementary Database

Proposition 65 Records (Notify 65)
Toxic Pits (TPC)
Well Investigation Program
Water Wells (USGS)
Historical UST Database (HIST UST)

TPC (Toxic Pits): The Toxic Pits Cleanup Act places strict limitations on the discharge of liquid hazardous wastes into surface impoundment, toxic ponds, pits and lagoons. Regional Water Quality Control Boards are required to inspect all surface impoundments annually, in addition, every facility was required to file a Hydro-geological Assessment Report. Recent legislation allows the Department of Health Services to exempt facilities that closed on or before December 51, 1985, if no significant environmental risk is shown to remain.

SWAT (Solid Waste Assessment Test): This program requires that disposal sites with more than 50,000 cubic yards of waste provide sufficient information to the regional water quality control board to determine whether or not the site has discharged hazardous substances which will impact the environment. Site operators are required to file Solid Waste Assessment Test reports on a staggered basis. Operators submit water quality tests to the Regional Water Quality Control Board, describing surface and groundwater quality and supply; and the geology within 1 mile of the site. Air

quality tests are submitted to the local Air Quality Management District or Air Pollution Control District.

Water Wells: The Groundwater Site Inventory (GWSI) database was provided by the United States Geological Survey (USGS), which contains information on over 1,000,000 wells and other groundwater which the USGS has studied, used or otherwise had reason to document through the course of research.

5.4 LOCAL AGENCY RECORDS

ODELPHI's field engineer contacted the following public agencies to find any records of former operation of gasoline UST or any other hazardous substances on the subject premises.

City of New York, Building Department => ODELPHI reviewed City of New York (NYC) Building Department files for the search of public records and found no items of environmental concerns except an oil burner application for 1292 and 1294 building in 1948 and 1972, respectively.

City of New York, Fire Department => ODELPHI requested file review to NYC Fire Department in regard to the presence of UST. The agency has not responded at the time of this report writing. Any significant finding will be added as an addendum.

6.0 FINDINGS AND CONCLUSIONS

ODELPHI performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this Report.

ODELPHI's assessment has revealed Recognized Environmental Conditions (RECs) except Historical Recognized Environmental Conditions (HRECs), and Controlled Recognized Environmental Conditions (CRECs) in connection with the Subject Property in accordance with ASTM E1527-13. No Vapor Encroachment Conditions (VECs) were observed. The following was noted;

- According to the property owner, public records, and government database records, the subject property had been utilized as plating factory with hazardous waste generators and TSD facility from 1950 to 2020. Historical use of the subject property as a plating facility poses risk of possible subsurface impact by chemicals and hazardous waste because on-site use, handling, and storage of hazardous substances often results in subsurface impact. At the time of site reconnaissance, several oil stained area were observed at 373 vacant land. ODELPHI observed also staining of chemical spill on the metal floor at 1282 and 1292 warehouse. Considering the historical property use as a plating company and property condition, ODELPHI believe the subject property poses risk of contamination and further investigation is warranted.

7.0 RECOMMENDATIONS AND OPINIONS

Considering the historical and the current use of the subject property, further action or subsurface investigation is recommended based on the historical uses of the subject property due to the potential risk of contamination at the subject property.

8.0 REFERENCES

During the preparation of this Report, a number of sources were contacted, many individuals interviewed, and various state, county or local municipal agencies consulted. Documentation applicable to the Subject Property in those departments and agencies was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM E1527-13. Individuals listed without phone numbers were contacted in person or by e-mail. Reference sources for site-specific information, hydro-geologic setting, technical data, historical research data, environmental reports and other records used are identified throughout this Report in corresponding sections, if not provided in the following table.

9.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of this part [40 CFR Part 312].

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Cerclis ID:: 206282
EPA Id: NYN000206282

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 9 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 05/12/2020 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 04/03/2020 has revealed that there are 6 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/12/2020 has revealed that there are 37 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 19 NY UST sites within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 05/12/2020 has revealed that there are 13 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 84 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: NYP004109526

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2020 has revealed that there are 2 FINDS sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RISK AND TECHNOLOGY REVIEW
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

WILCO FINISHING CORPORATION (Continued) **1000791648**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.
AIR MINOR
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Updated By: dcwalsh
Site Description: The Technical Metal Finishers Company was a plating company located in a light industrial/residential area. The company is out of business and the site is abandoned. The site was discovered in June 1982 when a fire occurred at the abandoned plant. The facility contained waste acids, caustics and cyanides stored in tanks and drums. The wastes contained in the tanks and drums were removed by a contractor hired by NYC Dept. of Environmental Protection. Clean up has been initiated by NYC Dept. of Environmental Protection through contract with Radiac Research Corporation. All tanks and debris have been removed from site and soil has been excavated. The building was demolished, and all work has been completed.
Env Problem: The site was delisted from the Registry as removal action conducted at the site has removed all hazardous waste.
Health Problem: NYSDOH has insufficient information to fully evaluate the potential for human exposures.

DEC Region:	2
DER Facility ID:	204622
DEC Memo:	"12/8/10-Vought-Primary off-hours responder. Vought called Jeff McKensey (Advanced Tank Services Cell: 973-229-5897 Off:800-440-8265) to determine if wet or dry leak. Vought called cell number for McKensey and asked him to return call to DEC. Vought called contact on expired PBS #2-605545 which was (RPS Properties - Pearl 718-384-5524) and number was not in service. PBS registration shows one 4000-gallon #2 fuel oil AST In contact with soil and registration expired 4/2/6. Vought called Advanced Tank and RP representative is Brian Kilcoyne (EBI Consulting Fax:781-418-2353 Ph:781-418-2349). Vought called Kilcoyne and left message to return call to DEC. Vought spoke to Kilcoyne and lender is closing on deal this week. No overt evidence of wet leak and as such tank not required to be emptied immediately. Kilcoyne will confirm dry leak. Vought provided Kilcoyne contact info for DEC Falvey as future project manager. Vought prepared TTF letter and had signed by DEC Falvey with one month due date for TTF and immediate due date for registration. Letter sent to owners address as per ACRIS and PBS: RPS Properties, LLC 116 Nostrand Avenue Brroklyn, NY 11205 Sam: (917)468-6871 Site contact: Chasikel Strulovitch (CS Management 718-599-8300 fax: 718-384-0864) with cc to Advanced Tank and ABI. Vought called CS Management and asked for Stulovitch and was told he was away and informed them of oil spill. Vought spoke to Pearl from RPS and informed her or failure and PBS expiration. Vought received call back from McKensey who confirmed that leak was dry leak. 10/18/12 Received call from Greg Ernst of Associated Environmental Services (631)234-4280. He wanted to know what he needed to do to close the case. Owner want to refinance property and bank is requiring needs spill case closure. I sent him the December 2010 ttf letter by email: grege@assocenvsvcs.com. bf 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to

APARTMENT BLDG - TTF (Continued) **S118953531**

V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 05/21/2014 - V. Brevdo Called Greg Ernst of Associated Environmental Services (631)234-4280 to discuss spill case. Left message with the receiptionist. VB 2/2/18 - Spill transferred to Central Office Spills. 2/21/18 - Josh Vaccaro NYSDEC and Randy Whitcher NYSDEC inspected the property on February 21st, 2018. The building appeared to be well maintained and currently functioning as an office building. Nearby properties included office buildings, auto repair shops, and restaurants. -JMV 5/8/18 - Called former owner found on PBS application he stated he stated that he no longer owns the property and took care of the tank prior to selling the site. He did not have any documentation. -JMV 8/10/18 - Central Office Spills Kevin Hale, Randy Whitcher, and Joshua Vaccaro discussed the spill and determined the spill will be closed administratively not meeting standards, based on the following assessment. The spill was a dry tank test failure. Contact with the buildings current owner have been difficult. The former owner who the spill occurred under stated that the tank was repair prior to the sale of the property; no reports are available to confirm. Contact information for the new owner was given (Joe 718-599-3500) several attempts were made to reach Joe but have been unable to get ahold of him. Based on the factors listed above the spill will be closed administratively on August 10, 2018, not meeting standards. Spill Closure report available in D2. - JMV"

Remarks: "5000 gal tank failed test. Repairs being scheduled."

Tank Number:	001
Tank Id:	62491
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

C03 - Pipe Location - Aboveground/Underground Combination
E00 - Piping Secondary Containment - None
I02 - Overfill - High Level Alarm
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron

P.S. 123 - BROOKLYN K123 (Continued) **A100194225**

F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
K01 - Spill Prevention - Catch Basin
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
L00 - Piping Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 02/01/2001
Capacity Gallons: 5000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is

PUBLIC SCHOOL K123 (Continued) **1004759545**

used to track emissions and compliance data from industrial plants.
AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 2006-01-01 00:00:00.0
Site name: S C PLATED PLASTIC INDUSTRIES INC
Classification: Not a generator, verified

Date form received by agency: 1998-09-22 00:00:00.0
Site name: S C PLATED PLASTIC
Classification: Large Quantity Generator

Site name: S C PLATED PLASTIC INDUSTRIES INC
Classification: Small Quantity Generator

Hazardous Waste Summary:

. Waste code: D002
. Waste name: CORROSIVE WASTE

S C PLATED PLASTIC INDUSTRIES INC (Continued) **1001197325**

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Generators - Records/Reporting
Date violation determined: 1998-08-13 00:00:00.0
Date achieved compliance: 1998-09-30 00:00:00.0
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 1998-08-13 00:00:00.0
Enf. disposition status: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

CON EDISON (Continued) **1018279831**

corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	46044
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

I02 - Overfill - High Level Alarm
E00 - Piping Secondary Containment - None
K00 - Spill Prevention - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
J02 - Dispenser - Suction Dispenser
L00 - Piping Leak Detection - None
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
G02 - Tank Secondary Containment - Vault (w/access)
I04 - Overfill - Product Level Gauge (A/G)
C01 - Pipe Location - Aboveground

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: B004
. Waste name: PCB articles containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs, excluding small capacitors. This includes oil-filled electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers and cable.

. Waste code: B007
. Waste name: Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags and dredge material.

Violation Status: No violations found

FINDS:
Registry ID: 110066948726

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	36920
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
J00 - Dispenser - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None
G01 - Tank Secondary Containment - Diking (Aboveground)
L00 - Piping Leak Detection - None

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1937
Capacity Gallons:	3000
Tightness Test Method:	21
Date Test:	01/15/2014
Next Test Date:	Not reported

Elevation:	38 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940597 BROOKLYN, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

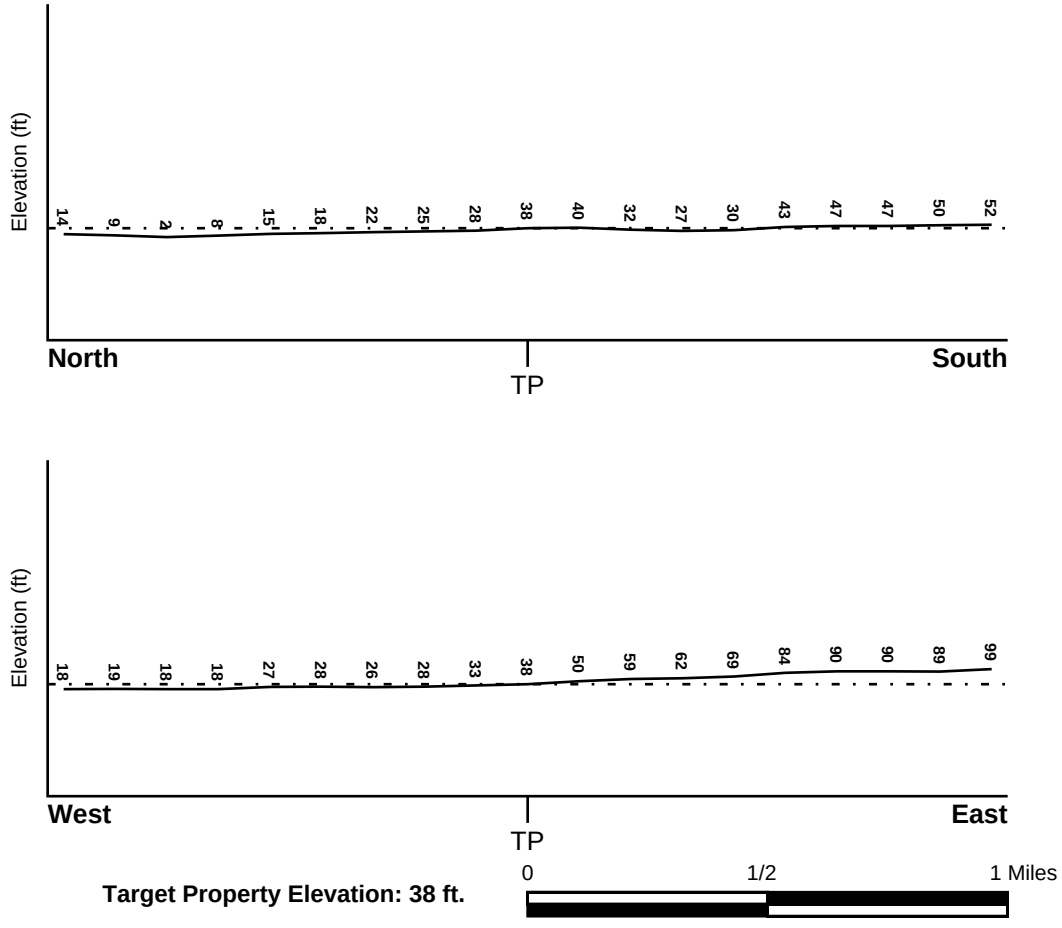

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 38 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970208F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Mesozoic
System:	Cretaceous
Series:	Upper Cretaceous
Code:	uK *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Basement	1.370 pCi/L	88%	10%	2%

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

New York Public Water Wells
Source: New York Department of Health
Telephone: 518-458-6731

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database
Source: Department of Environmental Conservation
Telephone: 518-402-8072
These files contain records, in the database, of wells that have been drilled.

RADON

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

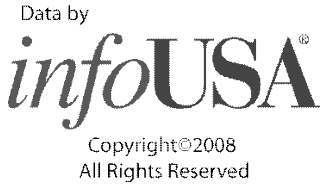

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Palisades Park, NJ 07650
Contact: Chris OH

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Odelphi Environmental Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # CE4F-4624-91B1

Sanborn® Library search results

Certification #: CE4F-4624-91B1

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Odelphi Environmental Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

APPENDIX F
ENVIRONMENTAL QUESTIONNAIRE

ODELPHI Environmental

Environmental Consulting & Real Estate Due Diligence

76 W. Ruby Ave., #A, Palisades Park, NJ 07650
T 201-943-5000, F 201-943-5003

Date: 8/10/20

Environmental Questionnaire and Disclosure Statement

Applicant: Prospective Buyer

Address and location of property: 1288 Willoughby Ave, B'klyn, NY 11237

Assessor's Parcel Number (if available): 3210-

The purpose of this questionnaire is to provide information about past and present ownership and uses of the real property upon which the lender will rely in deciding whether or not to extend credit. Please respond fully to all questions and provide supporting documentary evidence where appropriate. If unable to answer, please respond "unknown" or "not applicable". Where space is inadequate to answer, please attach additional pages as needed. If applicant has an interest in (leasehold or fee interest) and conducts business at multiple locations, a separate disclosure statement should be supplied for each location.

1. The present owner(s) of the property: Guyana Plating, LLC
2. The present occupant of the property is: Industrial Properties
3. Date of last transfer of ownership: 2009

   Was pre-acquisition site assessment or environmental audit required? Have any environmental investigations (Phase I or Phase II) been conducted on the subject property? If so, include a copy of report. Unknown

4. To the extent known, please identify the prior uses of the property and the prior owner(s) of the site during the past 50 years:

Date	Owner	Use
1952-2020		Plating

5. The present and previous use(s) of the adjacent properties (north, south, east, west):

   North: Industrial / Mfg property.
   South: Parking
   East: Local Road + Parker
   West: " + Residential / Factory / warehouse

6. Has the real property or any adjacent property ever been used for industrial, manufacturing, refining, processing, or agricultural purposes? If so, please describe.

   Yes

7. When were buildings on the premises constructed?

1931

Date of completion of original construction or any subsequent major renovations:

Date of Original Construction: _____
Date of Last Major Remodel: _____
Square Footage of Building & Lot: _____

8. If buildings or improvements on premises were constructed prior to 1978, was asbestos used for insulation or other purposes?

NO

9. Have any asbestos tests or surveys been performed on site? If so, please attach copies of the results.

N/A

10. Are electrical transformers, switchers, capacitors, or other comparable devices on the premises? Have they been inspected for the presence of PCBs or other hazardous toxic substances? If inspection reports have been made, include copies.

NO

11. Have there been any leaks, spills, or fires on site involving PCB electrical equipment? If so, please describe.

N/A

12. Are there now, or have there ever been underground storage tanks located on the site? If so, indicate the number of tanks, as well as the contents and age for each tank.

Yes Seal w/ Concrete

Number of Underground Storage Tanks or Above-ground Tanks
Tank Type/Specification
Contents
Purpose 1050 gal
Size
Product Type Fuel oil
Installation year or age
Number of islands, dispensers, nozzles (fueling points), product description
UST Upgrade Certificate, Last upgrade Year
Recent Tank Testing, SB989 Testing, Leak Testing
Permits (AQMD, HazMat, Fire Department, Health Department)
Leak Detection, Fueling System Monitoring, Spill Prevention/Containment System
Emergency Shut-Off System
Location and number of vent pipes
Phase I and Phase II Vapor Return System
Secondary Containments (for above ground tanks)

Have there been any previous tanks or fueling operation in the past? If so, provide closure/investigation report.

NO

Have the pipelines been inspected or tested for leaks? If so, please indicate the results.

N/A

Have there been any previous wastewater clarifier/sump in the past? If so, provide closure/investigation report / monitoring report, industrial water discharge permit.

NO (Recycled chemical)

13. Have any of the following measures been provided for the underground storage tanks, dispensers, their associated piping and other fueling system, and are any of the following in compliance with present regulatory requirements?

N/A

Integrity testing (primary line pressure testing for tank and piping)
Inventory reconciliation
Leak detection system / monitoring certificate
Overfill spill protection
Dispenser sump containment
Secondary containment
Enhanced vapor recovery testing
1998 UST Upgrade including cathodic protection
Other (please describe)

Has a leak or a potential leak ever been detected in these tanks, or any compliance testing failed?
NO

14. Does your business use chemicals or substances which require permits or licenses to generate, own, use, handle, process, or remove from the property?
Yes

15. How are those chemicals or substances generated, processed and removed from the property?
In containers
the

16. Are there any pipelines above or below ground used to transfer or store chemicals on site? If so, please describe: above

17. Drycleanering or equipment solvent washing / metal plating - closed loop, vapor recovery, secondary containment, perc recycling, air vent, etc. (Refer Drycleaner Inspection Sheet attached)
plating (1950–2014)

18. Are chemicals and wastes currently stored on site, or have they been stored in the past? If so, check all applicable storage methods:
Removed

Drums
Containers
Waste Piles
Pits
Sumps
Above-ground tanks
Surface impoundments/pond/lagoons

19. Are there disposal facilities or dumpsites, storing or use of hazardous waste/toxic materials, within a 2000-foot radius (half a mile) of the property? If so, please describe.
No

20. If the answer to any of the previous questions is in the affirmative, disclose whether the Environmental Protection Agency, State Department of Health Services or other local oversight regulatory agency requires a permit for your occupancy of this property.
NO

21. Has there been or is there physical evidence of any spills, leaks, or other releases of any toxic/hazardous chemicals/substances on the property or adjoining property?
No

22. Are all appropriate licenses and permits current and are you presently in compliance with all regulations for continued utilization of licenses/permits? If not, and you are subject to pending suspension or revocation action, please describe the basis for it and attach copies of suspension/revocation action.
Yes.

23. Please attach copies of permits/licenses involving chemicals or substances used or removed on the premises, including waste disposal permits.
N/A.

24. Are there any past, current or pending regulatory actions by federal, state, or local environmental agencies alleging noncompliance with regulations? If so, please describe.
NO

25. Are there any past, current or pending lawsuits or administrative proceedings naming the facility for alleged environmental damages? If so, please describe.
NO

26. Has the facility or any nearby property ever been listed, proposed, or investigated as a federal or state Superfund site? If so, please describe.
NO

27. Has the facility ever been involved in site investigations, cleanup actions, corrective action programs or other regulatory requirements regarding potential or known contamination on site? If so, please describe.
NO

28. Utilities
Source of Potable Water (private water well? Portability or water quality testing certification?)
City
Sewage Disposal System (Any Septic Tank or such system with leach field?)
City
Solid Waste Disposal
Private Dumpster
Source of Fuel for Heating and Cooling (heating oil tank or natural gas?)
Gas (National Grid) Elec (Con Ed)

29. Do you have any knowledge to the following document? If so, please provide copies.

29.1 Environment site assessment *reports*,
29.2 Environment compliance audit *reports*,
29.3 Environmental permits (for example, solid waste disposal permits, *hazardous waste* disposal permits, *wastewater* permits, NPDES permits, *underground injection* permits),
29.4 Registrations for underground and above-ground storage tanks,
29.5 Registrations for *underground injection* systems,
29.6 *Material safety data sheets*,
29.7 Community right-to-know plan,
29.8 Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.,
29.9 *Reports* regarding hydrogeologic conditions on the *property* or surrounding area,
29.10 Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the *property* or relating to *environmental liens* encumbering the *property*,
29.11 *Hazardous waste* generator notices or *reports*,
29.12 Geotechnical studies,

29.13 Risk assessments, and
29.14 Recorded AULs.

I am familiar with the real property described in this questionnaire. By signing below, I represent and warrant to the Lender that the answers to the above questions are complete and accurate to the best of my knowledge. I also understand that the Lender will rely on the completeness and accuracy of my answers in assessing any environmental liability risks associated with the property.

Property Owner / Owner's Representative / Business Tenant / Person knowledgeable about present / historical use of the property
