1.0 EXECUTIVE SUMMARY

RSK Environmental Group, LLC (RSK) was retained by 880 Rogers LLC to prepare this Phase I Environmental Site Assessment (ESA) for the properties located at 880 Rogers Avenue, Brooklyn New York 11226 and 2601 Snyder Avenue, Brooklyn New York 11226 (Block: 5107, Lots: 101 & 88); hereafter referred to as the "Subject Property". The Subject Property is located at south of Erasmus Street bounded by Veronica Place to the west, Rogers Avenue to the east, and Snyder Avenue to the south. A Site Location Map is provided as Figure 1.

This Phase I ESA was conducted in general conformance with the American Society of Testing Materials (ASTM) Standard E1527-13 – "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The overall objective of this ESA is to identify, to the extent feasible, recognized environmental conditions (RECs), historical RECs (HRECs), controlled RECs (CRECs), and other environmental issues, as defined by the standards set forth for a Phase 1 ESA in the aforementioned ASTM document.

The Subject Property is currently operating as an auto body repair shop improved with a 1-story commercial garage building with a building area of 3,600-ft² on a lot size of 3,600 square feet and is adjoined by a parking lot with a lot size of 4,487-ft² located in the Flatbush section of Brooklyn, New York. The adjoining properties appear to be residential and retail/commercial. According to the NYC Tax Records, the Site is owned by Vibert McEwen. The lot Primary zoning is R6 (Residential District) and is situated in a mixed-use neighborhood. Based on the available records, the Subject Property has been used for commercial purposes since it was constructed in 1931. There were no environmental liens or other environmental encumbrances on the Subject Property. The Subject Property is situated approximately 47-feet above sea-level.

RSK performed a site reconnaissance on February 25, 2019; during our site reconnaissance, the 1-story building occupies the entire lot and was identified as a commercial auto body repair shop. The current property owner provided access into the building and access was gained throughout the building and the adjoining parking lot.

SURROUNDING LAND USE

DIRECTION	ADJOINING USE(S)	VICINITY USE(S)
North	North 858 Rogers Avenue, Brooklyn, NY 11226	
	(Block: 5,107 Lot: 97)	
	Attached 2-story buildings	
South	888 Rogers Avenue, Brooklyn, NY 11226	Mixed-Use
	(across Snyder Ave.)	
	Mixed residential & commercial buildings	
East	871 Rogers Avenue, Brooklyn, NY 11226	Institutional
	(across Rogers Ave.)	
	Public Facility/ Institution	
West	49 Veronica Place, Brooklyn, NY 11226	Residential
	(Block: 5,107 Lot: 83)	
	Detached 2-story building	

• Surrounding properties consist of mainly mixed-use (residential and commercial). Industrial properties are scattered within a one-mile radius to the subject property.

SITE ACTIVITIES

- During our site reconnaissance, all areas of the subject property was accessible.
 - Lot 101 is developed with a semi-attached 1-story garage building and Lot 88 is a parking lot.
 - The building was operating as an auto body repair shop at the time of inspection.

MUNICIPAL RECORDS REVIEW

- The subject property is listed with the NYC Dept. of Buildings (NYCDOB) as Block: 5107, Lot: 101 and Block: 5107, Lot: 88.
- There were four NYCDOB Certificates of Occupancy available as of the date of this report.
- Certificate No. 149480-062056 dated June 20, 1950 as a manufacturing factory for tools and dies.
- Certificate No. 2581-060732 dated June 7, 1928 lists as an automobile paint shop.
- Certificate No. 19919-071323 dated July 13, 1923 lists as a private garage for two cars and office.
- Certificate No. 229334-88 dated March 3, 1988 lists as an auto repair shop limited to electrical and muffler replacement with accessory painting and not more than two (2) quarts to use per day, not more than 20 gallons stored on premises.
- Certificate No. 116731-090842 is not applicable to the Subject Property.
- There were no NYCDOB Certificates of Occupancy for Lot: 88, there were no Certificates of Occupancy on file.

SITE HISTORY

Certified Sanborn® Map Report

In reviewing the history of the building and property, a Sanborn Map Search was conducted and determined for 880 Rogers Avenue, Brooklyn, NY 11226 and 2601 Snyder Avenue, Brooklyn New York 11226. The Sanborn Map available for the subject property were from 1888 to 2007. The following were depicted on the historic maps:

- The 1888-1929 maps depict Lot: 101 and Lot: 88 of the subject property as vacant parcels.
- The 1951 map depict Lot: 101 as a developed auto machine shop and Lot: 88 as a developed two (2) 1-story buildings and one (1) 2-story building. Surrounding properties are developed residential and commercial properties; three (3) auto-repair garages, an auto paint shop, a drycleaner (north) and a gas-filling station (north-east) were in the vicinity of the subject property.
- The 1969 map depicts no major changes to the subject property. Surrounding properties depict no significant changes.
- The 1977-1981 maps depict a change in the usage of Lot: 101 as a 1-story developed building. Lot: 88 is shown as a vacant parcel. Surrounding properties north of the subject property depicts a change where a 3-story dwelling converted to a 2-story tin blacksmith shop.
- The 1983-1986 maps depict no significant changes to the subject property. Surrounding properties north of the subject property depict a change in activities of the 2-story tin/steel blacksmith shop to a commercial building.

- The 1987-1989 maps depict no significant changes to the subject property. Surrounding properties did not depict major changes.
- The 2001 map depicts a change in the usage of Lot: 101 from a 1-story building to an auto-repair shop. Surrounding properties did not depict major changes.
- The 2002-2007 maps depict no significant change to the subject property. Surrounding properties did not depict major changes.
- ** Any data gaps identified herein, as defined by ASTM Practice E 1527-13 are not considered to have significantly affected the ability to identify Recognized Environmental Conditions (RECs) in connection with the subject property and do not alter the conclusions of this report.

FUEL OIL AND GASOLINE STORAGE TANK

- At the time of inspection, no existing fuel oil and/or gasoline storage tank was identified.
- A FDNY search was performed for tanks closed in place or removed; results are pending.

PCB's

• During our site reconnaissance, no signs PCB storage tanks were utilized within or on the exterior of the subject property.

ENVIRONMENTAL DATA RESEARCH

• An Environmental Data Research Summary was performed for the subject lot:

DATABASE	SEARCH	TARGET	OFF-SITES
	DISTANCE	PROPERTY	LISTED
SEMS-ARCHIVE	½ MILE	-	1
RCRA-LQG	1/4 MILE	-	2

^{**} Due to poor or inadequate address information, 4 sites were not mapped.

CONDITIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

• ASBESTOS CONTAINING MATERIALS (ACM)

LOCATION	FOOTAGE	CONDITION	RECOMMENDATION
	880 Rogers	Avenue & 2601 Snyder Aven	nue, Brooklyn, NY
None	N/A	N/A	Prior to redevelopment, RSK recommends that an Asbestos Inspection is advised to verify any existing ACM.

Please note: NO core samples were taken during this inspection unless noted, in the event of change in present status, e.g., demolition, alteration, modification, all suspect materials should tested and verified free of any ACM by a certified asbestos investigator.

• LEAD BASED PAINT (LBP)

• During our site reconnaissance, no signs of flaking or chipped paint was noticed.

Please note: NO paint samples were taken during this inspection unless noted, in the event of change in present status, e.g., demolition, alteration, modification, all suspect materials should tested and verified free of Lead by a certified lead inspector.

LEAD IN DRINKING WATER

• The Property is connected to the municipal potable water supply provided by City of New York. According to the New York City 2016 Drinking Water Supply and Quality Report, the drinking water supplied to the Property is compliant with state and federal standards, including those for lead and copper.

Please note: NO drinking/potable water samples were taken during this inspection unless noted; where required, it is recommended that drinking/potable water samples should be tested and verified free of lead by a certified inspector.

MOLD

• During our site reconnaissance, limited visual inspection for the noticeable presence of mold was performed. RSK observed no visually noticeable indications of suspected mold affected ceiling areas within the building.

RADON

• Radon is a colorless, odorless, radioactive gas. Radon comes from the natural decay of uranium that is found in nearly all soils. Radon typically moves through the ground and into building through cracks and openings in the foundation. The USEPA has developed a "Map of Radon Zones" indicating the levels of radon concentrations from testing and aerial surveys conducted in all counties in New York State. The U.S. Environmental Protection Agency's Map of Radon Zones identified the Subject Property as a radon zone Level 3.

WETLANDS

• RSK reviewed available information regarding wetlands on the subject property, including National Wetlands Inventory online GIS mapping. RSK made general site observations for readily observable potential wetland characteristics. RSK did not observe surface water bodies or any evidence of potential wetlands on or adjacent to the subject property.

FINDINGS

Sam Rosenbaum

RSK has performed this Phase-I ESA of the subject property in accordance with the scope and limitations of ASTM Standard E 1527-13. Based on the site inspections performed and the data reviewed, this assessment has identified the following:

- The Site is listed in the ECHO, US Airs and FINDS An environmental review for the Site confirms that air pollutants consisting of automotive body, paint, interior repair and maintenance exist.
- The Site was identified for previous usage for manufacturing for tools & dye and the twenty-two (22) years of auto repair shop activities as a recognized environmental condition.

CONCLUSIONS AND RECOMMENDATIONS

This Phase I ESA has revealed evidence of a recognized environmental conditions (RECs) in connection with the subject property. Based on the site assessments performed and review of available environmental data for the subject property and surrounding properties, RSK recommends that an environmental subsurface assessment should be performed for the subject property in order to identify any contamination that exists beneath the building. As part of the subsurface assessment, RSK suggests that a vapor intrusion assessment should be performed.

2.0 INTRODUCTION

RSK Environmental Group LLC. (RSK) has been retained by 880 Rogers LLC (the "User") to perform a Phase Environmental Site Assessment (ESA) for the properties located at 880 Rogers Avenue, Brooklyn, New York and 2601 Snyder Avenue, Brooklyn, New York, (hereafter referred to as the "Site"). The legal description for the site is Tax Block 5107, Lots: 101 & 88. This Phase I ESA has been performed in general accordance with the ASTM 1527-13 – "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", and the USEPA's All Appropriate Inquires (AAI) Rule.

2.1 Purpose

The general purpose of this Phase-I Environmental Site Assessment is to determine whether or not the property is subject to certain Recognized Environmental Conditions (*RECs*) that may affect property use or increase the risk of liability exposure associated with the property. Recognized Environmental Conditions include the presence or possible presence of hazardous substances or petroleum related products that indicate an existing release, past release, or a significant threat of a release into structures on the property, into the ground, groundwater or surface water. Recognized Environmental Conditions can include past uses, disposal practices, spills, off-site contamination, and regulatory compliance.

This Phase I ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Standard Practice E 1527-13. Any significant scope-of-work additions, deletions, or deviations to ASTM Practice E 1527-13 are noted or in the corresponding sections of this report. In general, the scope of this assessment consisted of reviewing readily available information and environmental data relating to the Subject Property. To thoroughly inspect all accessible areas and facilities in and around the property located at 880 Rogers Avenue, Brooklyn, NY 11226 and 2601 Snyder Avenue, Brooklyn New York 11226 to assess the environmental status of the subject property. The tasks were conducted via a visual inspection of the site, review of available historical records documenting usage of the property along with persons knowledgeable about the subject property.

2.2 Scope of Phase I

The main objective of this ESA was to identify *Recognized Environmental Conditions* (*RECs*) in connection with the subject property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products that indicate an existing release, a past release, or a material threat of a release. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

This Environmental Site Assessments report includes a description of the subject property and surrounding areas, review of records and contains information gathered during site reconnaissance and interviews. RSK Environmental Group (RSK) Phase-I Environmental Site Assessments are prepared by environmental professionals, supervised by Professional Engineers.

This survey assessed any ongoing or former operations, whether current or former operators/lessees used or stored chemicals on the premises, if any waste materials arising from operations have been dumped on the premises or if any landfill operations have taken place. Visual inspection of the immediate vicinity around the premises were also conducted, wherever possible or reasonable, in order to determine whether any sites adjoining the premises are used for heavy

manufacturing or the generation, storage, shipping or disposal of hazardous waste, chemical materials or fuel supplies; if there are any underground or suspended transformer, capacitors, etc. containing PCB's on the subject property or if there are any underground storage tanks.

As part of this environmental survey, inquiry was made with the U.S. Environmental Protection Agency and appropriate State and Local Agencies to ascertain the location of any potential, alleged or known hazardous waste sites within a one-half mile radius of subject property. The CERCLIS (Comprehensive Emergency Response, Compensation and Liability Information System) is the U.S. EPA's compilation of such alleged, potential or known hazardous waste sites brought to the attention of the U.S. EPA Office of Emergency and Remedial Response, which has been, will be or are currently under investigation for suspected or known environmentally hazardous activities. The National Priorities List (NPL) is the U.S. EPAs listing of known contaminated sites, which have been targeted for cleanup due to the immediate threat posed to human health, and/or the environmental integrity of that property as well as its marketability.

If appropriate inquiry was also made with the US Environmental Protection Agency and appropriate State and Local agencies regarding their acknowledgment that the presence and/or disposal of hazardous or toxic chemicals, if any, are within their guidelines and compliance.

Recommendations, wherever appropriate, have been given as to the action, if any, which should be taken to confirm with the most current guidelines and rules for compliance as set forth by these agencies.

The Phase I Environmental Survey is limited in budget and scope. No sampling, testing or laboratory analysis is conducted unless so noted and the assessment is based on the professional opinion of the Environmental Consultant. The Phase I Environmental Survey is not and should not be considered a warranty or guarantee about the presence or absence of environmental contaminants which might affect the subject property.

The owner is responsible for investigating environmental liens on the subject property. This report was prepared in accordance with ASTM E 1527-13 protocols for Phase I Environmental Site Assessments.

2.3 Limiting Conditions & Methodology Utilized

The limiting conditions and methodology used in preparing this Phase-I Environmental Site Assessments report are those contained in ASTM Standard E 1527-13. This practice does not address requirements of any state or local laws or any federal laws other than the appropriate inquiry provisions of *CERCLA's "Innocent Landowner Defense"*. Users are cautioned that federal, state and local laws may impose environmental assessments obligations that are beyond the scope of this practice. Users should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on property that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for noncompliance.

The report is not, and should not be construed as, a guaranty, warranty, or certification of the presence or absence of any toxic substances, (which can be made only with testing), and contains no formal plans or recommendations to rectify or remediate the presence of any toxic substances, (which may be subject to regulatory approval). No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice under ASTM Standards is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property.

Except for acts and omissions by RSK, or its employees which are shown to be grossly negligent and which represent intentional misconduct, the client has agreed, to the maximum extent permitted by law, to hold harmless and indemnify R from and against any and all claims and liabilities arising in respect to the Environmental Site

Assessment performed by RSK on behalf of the client. All liability on the part of RSK shall be limited solely to the cost of this report. RSK shall have no liability for any other damages, whether consequential, compensatory, punitive, or special arising out of, incidental to, or as a result of this report. RSK assumes no liability for the use of this report by any person of entity other than the client for whom the report was prepared.

3.0 SITE DESCRIPTION

3.1 Survey of the Subject Property

The Phase-I Environmental Site Assessment survey was conducted on the property located at 880 Rogers Avenue, Brooklyn, NY 11226 and 2601 Snyder Avenue, Brooklyn, NY 11226 which are listed with the NYCDOB as Block: 5107, Lots: 101 & 88, beginning with a visual inspection by an Environmental Professional to determine if hazardous or potentially toxic materials or substances might be present. RSK performed a site reconnaissance on February 25, 2019; the weather was mostly cloudy and 40°F. A Phase-I Environmental Site Assessment does not involve any sampling, testing or laboratory analysis of on-site soil or groundwater, unless so noted and cannot confirm the nature of subsurface soil or groundwater quality on the subject property.

3.2 Location and Legal Description of the Subject Property

Lot: 101 and Lot: 88 of the Subject Property are rectangular shaped parcels, with a total area of 3,600 square feet and 4,487 square feet in size. The lot Primary zoning is R6 and is situated in a mixed-use neighborhood. The lots are situated south of Erasmus Street, between Rogers Avenue (east) and Veronica Place (west) and on Snyder Avenue in the Borough of Brooklyn in the City of New York. The subject property is developed with an attached 1-story building. The building is constructed with pour-concrete, concrete masonry units (c.m.u.), brick and with a wood framed flat roof.

3.3 Site Physical Setting

3.3.1 Topography

The Subject Property and vicinity characteristics listed below were analyzed utilizing a current USGS 7.5 Minute Topographic Map. This information is useful in determining the grade and topography of the Subject Property. The Subject Property is located at an elevation of approximately 66-feet above mean sea level (msl). The topography of the Subject Property is relatively flat and there were no slopes, depressions or rolling hills observed on the Subject Property and slopes on the Subject Property range from 0 to 3 percent. The general topographic gradient is generally northeast. The Subject Property has been graded for commercial usage.

3.3.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Near-surface geology in heavily developed areas such as the Subject Property and vicinity is considered "urban land" and is characterized by a non-homogeneous distribution of soil and fill types. Excavation and backfilling for building foundations, utility conduits, subway systems and other construction results in a varied subsurface profile. In this setting, estimation of local subsurface parameters such as permeability, moisture content, and organic fraction is not feasible without site-specific testing data.

3.3.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the subject property. The nearest surface water body is the Prospect Park Lake located south-southwest of the subject property. Local groundwater gradient is expected to follow with surface topography; therefore, groundwater flow near the subject property is expected to flow to the north-

northeast. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

3.4 Current Uses of the Subject Property

During our site reconnaissance, all areas of the subject property was accessible. Our site reconnaissance identified that the Lot: 101 as a 1-story building utilized as an auto-repair shop and Lot: 88 as a parking lot.

4.0 ADJOINING PROPERTIES

4.1 Current Uses of the Surrounding Properties

The current uses of the adjoining properties are mainly residential and commercial properties, industrial properties are scattered within a one-mile radius to the lot. The property borders are as follows:

DIRECTION	ADJOINING USE(S)	VICINITY USE(S)	
North	858 Rogers Avenue, Brooklyn, NY 11226	Mixed-Use	
	(Block: 5,107 Lot: 97)		
	Attached 2-story buildings		
South	888 Rogers Avenue, Brooklyn, NY 11226	Mixed-Use	
	(across Snyder Ave.)		
	Mixed residential & commercial buildings		
East	871 Rogers Avenue, Brooklyn, NY 11226	Institutional	
	(across Rogers Ave.)		
	Public Facility/ Institution		
West	49 Veronica Place, Brooklyn, NY 11226	Residential	
	(Block: 5,107 Lot: 83)		
	Detached 2-story building		

The adjoining properties are not expected to impact the environmental integrity of the Subject Property and are not recognized environmental conditions.

5.0 HISTORICAL USE RESEARCH

5.1 Title Records

New York City Department of Buildings (NYCDOB)

RSK performed an online search of the NYCDOB records for the subject property on February 28, 2019. The NYCDOB records indicate no violations with respect to the Subject Property.

There were four NYCDOB Certificates of Occupancy available as of the date of this report.

- Certificate No. 149480-062056 dated June 20, 1950 as a manufacturing factory for tools and dies.
- Certificate No. 2581-060732 dated June 7, 1928 lists as an automobile paint shop.
- Certificate No. 19919-071323 dated July 13, 1923 lists as a private garage for two cars and
 office.
- Certificate No. 229334-88 dated March 3, 1988 lists as an auto repair shop limited to electrical and muffler replacement with accessory painting and not more than two (2) quarts to use per day, not more than 20 gallons stored on premises.
- Certificate No. 116731-090842 is not applicable to the Subject Property.
- There are no certificate of occupancy for Lot 88.

5.2 Historical USGS Topographic Quadrangles

RSK reviewed historical topographic maps provided by EDR on February 28, 2019. Available topographic maps provide little or no useful information regarding the historic use of the subject property or the surrounding properties. Historical topographic maps from 1897, 1898, 1900, 1947, 1955, 1956, 1966, 1967, 1979, 1995 and 2013 only depict the subject property and surrounding areas as developed/built-up areas but no site-specific features are shown.

5.3 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by researching available historical aerial photographs from www.historicaerials.com and other available resources. Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table.

AERIAL PHOTOGRAPH SUMMARY			
YEAR	OBSERVATIONS		
1924	The 1924 photo identified the subject property is on developed land.		
1951	The 1951 photo identified the subject property similar to the 1951 photo. Surrounding properties had no major changes.		
1954	The 1954 photo identified the subject property (Lot 88 is used as a parking lot) similar to the 1954 photo. Surrounding properties had no major changes.		
1961-	The 1954 to 2017 photos identified the subject property similar to the 1954 photo.		
2017	Surrounding properties had no major changes.		

A review of the available historical aerial photographs indicated that Lot: 101 of the subject property was utilized mainly as a 1-story commercial building and Lot: 88 of the subject property was utilized as a parking lot.

5.4 Historical Usage of the Subject Property and Surrounding Properties

In reviewing the history of the subject property, a Sanborn Map Search was conducted and determined for 880 Rogers Avenue, Brooklyn, NY 11226 and 2601 Snyder Avenue, Brooklyn, NY 11226

A Sanborn site history "mapping and geographic" search was conducted for approximately a 100-year span with data gaps and 28 maps were provided (see documentation).

SANBORN (FIRE INSURANCE) MAPS SUMMARY			
YEAR	OBSERVATIONS		
1888-1929	The 1888 map depicts the subject property is shown as vacant parcels		
1951	The 1951 map depicts that Lot:101 of the subject property is shown as developed machine shop and Lot: 88 of the subject property is shown as developed two (2) 1-story buildings and one (1) 2-story building. Surrounding properties were developed with commercial and residential properties.		
1969	The 1969 map depicts no major changes to the subject property. Surrounding properties were developed with commercial and residential properties.		
1977-1981	The 1977-1981 map depicts the subject property Lot: 101 as a 1-story developed building. Surrounding properties were developed with commercial and residential properties.		
1983-1986	The 1983-1986 maps depict no major changes to the subject property usage similar as the 1965 map. Surrounding properties were developed with commercial and residential properties.		
2001	The 2001 map depict change of usage for Lot: 101 of subject property from a 1-story building to an auto repair shop. Surrounding properties did not depict major changes.		

^{**} Any data gaps identified herein, as defined by ASTM Practice E 1527-13 are not considered to have significantly affected the ability to identify Recognized Environmental Conditions (RECs) in connection with the subject property and do not alter the conclusions of this report.

SEE SANBORN (FIRE INSURANCE) MAP SEARCH ATTACHED AS APPENDIX B.

5.5 City Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by RSK and EDR. Historical street directories were reviewed and are summarized in the following table.

	CITY DIRECTORY SUMMARY			
YEAR	OCCUPANTS: 1255 Bedford Avenue, Brooklyn, NY			
1928	Scileppi Jaos & Co Inc			
1934	McKenna Bros Auto Access			
1940	Benfred Motors			
1945	Schenck Rudolph Manchstr			
1949	Bklyn Prince Hall Council Inc

A review of the available City Directory information indicated that the subject property was utilized as mainly as a commercial building.

SEE CITY DIRECTORY SEARCH ATTACHED AS APPENDIX C.

6.0 RECORDS REVIEW

Standard Environmental Record Sources

Information from standard Federal and State environmental record sources was provided through Environmental Data Resources, Inc. (EDR). Data from governmental agencies lists are updated and integrated into one database, which is updated accordingly as these data are released. This integrated database also contains postal service data in order to enhance address matching. Records from one government source are compared to records from another to clarify any address uncertainties. The demographic and geographic information available, provides assistance in identifying and managing potential environmental risk. The accuracy of the geological locations ranges between 1/8-mile to 1-mile radius to the subject property.

In some cases, location information supplied by the regulatory agencies are insufficient to allow the database companies to map facility locations. These facilities are listed under the unmappables section within the EDR report. A review of the unmappable facilities indicated that none of these facilities are within the ASTM minimum search distance from the subject property. Pertinent regulatory files/records associated with the subject property and/or any adjoining site(s) may be requested for review in the event the listing is associated with a facility at which a suspected or confirmed release has occurred that has not yet been closed to the satisfaction of the regulatory agency and/or if the facility represents a REC in connection with the subject property.

Regulatory information from the following database sources regarding possible recognized environmental conditions, within the ASTM minimum search distance from the subject property, were reviewed. Specific facilities are discussed below if determined likely that a potential recognized environmental condition has resulted at the subject property from the listed facilities. Specific properties identified within the database report are further discussed below.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/13/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 6 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 09/30/2018 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

A review of the NY LTANKS list, as provided by EDR, and dated 11/12/2018 has revealed that there are 56 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

A review of the NY UST list, as provided by EDR, has revealed that there are 20 NY UST sites within approximately 0.25 miles of the target property.

NY AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

A review of the NY AST list, as provided by EDR, has revealed that there are 38 NY AST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 3 NY VCP sites within approximately 0.5 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/12/2018 has revealed that there are 8 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY DRYCLEANERS: A listing of all registered drycleaning facilities.

A review of the NY DRYCLEANERS list, as provided by EDR, and dated 03/07/2018 has revealed that there are 3 NY DRYCLEANERS sites within approximately 0.25 miles of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste

Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there are 1 NY HSWDS sites within approximately 0.5 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 01/01/2019 has revealed that there are 43 NY MANIFEST sites within approximately 0.25 miles of the target property.

PA MANIFEST: Hazardous waste manifest information.

A review of the PA MANIFEST list, as provided by EDR, and dated 12/31/2017 has revealed that there are 1 PA MANIFEST sites within approximately 0.25 miles of the target property.

NJ MANIFEST: Hazardous waste manifest information.

A review of the NJ MANIFEST list, as provided by EDR, and dated 12/31/2017 has revealed that there are 9 NJ MANIFEST sites within approximately 0.25 miles of the target property.

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 1 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 1 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

SEE RADIUS MAP SEARCH ATTACHED AS APPENDIX A.

6.2 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the New York City Building Department, the New York City Department of Finance and the New York City Fire Department. Information was reviewed in order to determine the possibility of documented adverse environmental conditions, violations or complaints associated with the subject property.

New York City Building Department / New York City Department of Finance

RSK has reviewed information listed in the online NYC Building Information System (BIS) provided by the New York City Building Department's website, http://a810-bisweb.nyc.gov/bisweb/PropertyProfileOverviewServlet?boro=3&block=5107&lot=101 as well http://a810-bisweb.nyc.gov/bisweb/PropertyProfileOverviewServlet?boro=3&block=5107&lot=88 information from the New York City Department of Finance website, Automated City Register Information System (ACRIS), https://a836-acris.nyc.gov/DS/DocumentSearch/BBLResult. Specific information provided by these websites includes lot sizes and dimensions, building zoning and usage. These websites also include information pertaining to interior renovations, building improvements and approximate date of construction. The information provided by New York City Department of Finance and New York City Building Department did identify conditions or reported events that would indicate the presence of a recognized environmental condition in connection with the subject property. A review of available information from these websites indicated that the building was constructed on the subject property in 1931.

New York City Fire Department

At this time RSK has reviewed information recorded by the New York City Fire Department (NYCFD). Specific information obtained from the FDNY included any active and/or voided storage tank permitted for the subject property. Results from the FDNY search are pending at the time of this written report.

Vapor Encroachment Conditions

All readily ascertainable information including all applicable Federal, State, Tribal and local database information, historical usage information, soil and groundwater sources and information from the site reconnaissance were reviewed to determine if there is a possibility of a Vapor Encroachment Condition regarding the Subject Property. Based upon the results of the site reconnaissance and review of readily ascertainable information, the Vapor Encroachment Condition survey is described below:

A review of available Sanborn Fire Insurance Maps, available historical aerial photographs and available City Directory information indicated that the historical usage of the site and surrounding properties may have impacted the subsurface quality at the subject property. Based on this information, a vapor encroachment condition (VEC) is a concern with regards to the subject property at this time.

Presence of PCB's in Transformers and Other Electrical Equipment

An inspection was conducted at the subject property and in the immediate vicinity for the presence of any underground, surface or suspended transformers and visible power supply sources. Oil-containing transformers are known to frequently contain PCBs (Polychlorinated biphenyls). PCBs are contained in older transformers and other electrical equipment and have the potential for serious health risks. The U.S. Environmental Protection Agency, Regulations 40 CFR Part 761, regulates the level of PCB content in such transformers and electrical equipment.

During our site reconnaissance, no containment of PCBs was identified.

Fuel Oil and Gasoline Storage Tanks

The New York State Department of Environmental Conservation regulates the storage and handling of petroleum storage facilities. Aboveground and Underground storage tanks storing petroleum can, if not properly installed and maintained, because serious environmental problems include contamination of a water supply. In an effort to prevent leaks and spills, the Petroleum Bulk Storage Law (Article 17, Title 10 of the Environmental Conservation Law) requires the DEC to develop and enforce a State Code for the storage and handling of petroleum. The resulting regulations are Parts 612, 613 and 614. Any facility with a stationary tank combined capacity exceeding 1,100 gallons must be registered with the New York State Department of Environmental Conservation.

At the time of inspection, no fuel oil and/or gasoline above ground storage tanks was identified. A FDNY search was performed for tanks closed in place or removed; results are pending.

7.0 USER PROVIDED INFORMATION

7.1 Interview with Key Site Manager

No key site manager was available for an interview during the preparation of this report. Access into the building was gained by an associate of the owner named Vibert McEwen. No interviews were conducted during our site reconnaissance. There was no specialized knowledge or experience, actual knowledge, or knowledge of commonly known or reasonably ascertainable information regarding potential environmental conditions and/or liabilities in connection with the individual subject property.

7.2 Environmental Pre-Survey Questionnaire

Pursuant to ASTM E 1527-13, RSK requested the following site information from the User of this report and from the site contact.

Title Records

Title record information associated with the subject property has not been provided to RSK by the property owner/tenant/occupant/user. Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

7.3 Environmental Liens

The property owner/key site personnel have no special knowledge of Environmental Liens or Activity/Use Limitations on the site. An environmental lien search was not performed and not included in the scope of work for this assessment. However, if the findings of a lien search performed by any other party does reveal the presence of an environmental related lien on the subject property, this information should be forwarded to RSK for review and any significant findings will be added to this assessment as an addendum to this report.

7.4 Specialized Knowledge

The property owner/key site personnel have no specialized knowledge concerning Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs). RSK was not provided with or made aware of previous environmental assessments or other documentation that is material to RECs, CRECs or HRECs in connection with the Subject Property.

7.5 Commonly Known or Reasonably Ascertainable Information

The owner/key site personnel have no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

Reason for Performing Phase I ESA Report

As part of a real estate transaction, this Phase I Environmental Site Assessment (ESA) was requested in order to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E 1527-13) in connection with the Subject Property. This ESA was

also performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E 1527-13 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35) (B).

7.6 Prior Environmental Reports

No prior environmental reports were available for review at the time of preparation of this Phase-I report.

8.0 ENVIRONMENTAL SITE ASSESSMENT

A visual inspection of the subject property and surrounding areas took place on February 25, 2019; the weather was cloudy and 40°F. All areas of the subject property were accessible excluding the roof.

8.1 Improvements

The Site is two (2) rectangular shaped parcels; with the Lot: 101 is approximately 3,600 square feet in size developed with an attached 1-story structure approximately 3,600-square feet. Lot: 88 is approximately 4,487 square feet in size with a parking lot. The lot Primary zoning is R6. The building is constructed with pour-concrete and concrete masonry units (c.m.u.), brick and with a wood framed flat roof.

8.2 Streets

The lots are situated south of Erasmus Street, between Veronica Place Avenue (west) and Rogers Avenue (east) on Snyder Avenue in the Borough of Brooklyn in the City of New York.

8.3 Potable Water Supply

The potable water in the neighborhood supply comes from the municipal water supply system within the vicinity.

8.4 Sewage Disposal

The sewage disposal in the neighborhood is provided by the municipal sewer system.

8.5 Heating and Cooling System

During our site reconnaissance, the building is equipped with a gas-fired burner for heating and portable window air conditioners for cooling.

8.6 Electrical Supply

Electrical service to the site is provided by Consolidated Edison Company of New York.

9.0 FINDINGS

RSK has performed this Phase-I ESA of the subject property in accordance with the scope and limitations of ASTM Standard E 1527-13. Based on the site inspections performed and the data reviewed, this assessment has identified the following:

- The Site is listed in the ECHO, US Airs and FINDS An environmental review for the Site confirms that air pollutants consisting of automotive body, paint, interior repair and maintenance exist.
- The Site was identified for previous usage for manufacturing for tools & dye and the twenty-two (22) years of auto repair shop activities as a recognized environmental condition.

CONCLUSIONS AND RECOMMENDATIONS

This Phase I ESA has revealed evidence of a recognized environmental conditions (RECs) in connection with the subject property. Based on the site assessments performed and review of available environmental data for the subject property and surrounding properties, RSK recommends that an environmental subsurface assessment should be performed for the subject property in order to identify any contamination that exists beneath the building. As part of the subsurface assessment, RSK suggests that a vapor intrusion assessment should be performed.

Preliminary Budget:

Item	Quantity	Estimated Cost
Limited-Focused Phase II Environmental	Entire	\$4,800.00
Subsurface Investigation		

10.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13 FINDINGS AND RECOMMENDATIONS MADE BY AN RSK ENVIRONMENTAL CONSULTANT:

Asbestos Containing Materials (ACM)

Asbestos is the generic name for a group of naturally occurring hydrated mineral silicates that are characterized by fibers or bundles of fine single crystal fibers. The New York City Department of Environmental Protection defines asbestos containing materials as "any material which contains more than one percent asbestos by weight." Asbestos materials were used for many years in a variety of ways in building construction due to its excellent acoustic insulating and thermal barrier properties. The durability of asbestos fibers and their small size and fibrous shape make asbestos an unusual environmental contaminant. Water infiltration contact during routine maintenance and age are major factors breaking down asbestos containing materials and creating exposure problems. According to the Environmental Protection Agency and included in the publication #EPA 560/5-85-024 "Guidance for Controlling Asbestos Containing Materials (ACM) in Buildings "asbestos containing materials are found in three forms: (1) Sprayed or troweled on ceilings and walls and structural steel; (2) in insulation around hot and cold piping, ducts, boilers and tanks; and (3) in a non-friable state in products such as ceilings/ floor tiles, wallboards and outside materials such as shingles and roofing materials in general, ACM in the first two categories is of greatest concern, especially if it is friable, causing the materials to release fibers into the air.

Presumed Asbestos Containing Material (PACM)

Due to the age of the structure, RSK assumes that building-ACM may exist; however, visually, no ACM was identified.

In the event of change in present status, e.g., demolition, alteration, modification, all suspect materials should be analyzed and verify free of any ACM by a certified asbestos investigator.

Lead Based Paint (LBP)

Paint samples were <u>NOT</u> taken for lead content during our site reconnaissance. However, in older buildings it is likely that lead based paint was used within the multi-layered painted surfaces. (Lead base paint was banned in 1978). Lead paint can be hazardous if digested, especially by small children.

During our site reconnaissance, no signs visually of chipped/flaking or peeling paint was identified within the building.

In the event of change in present status, e.g., demolition, alteration, modification, all suspect materials should be analyzed and verify free of Lead by a certified inspector.

Lead in Drinking Water

The Property is connected to the municipal potable water supply provided by City of New York. According to the New York City 2016 Drinking Water Supply and Quality Report, the drinking water supplied to the Property is compliant with state and federal standards, including those for lead and copper.

Radon

Radon is a colorless, odorless, radioactive gas. Radon comes from the natural decay of uranium that is found in nearly all soils. Radon typically moves through the ground and into building through cracks and openings in the foundation. The USEPA has developed a "Map of Radon Zones" indicating the levels of radon concentrations from testing and aerial surveys conducted in all counties in New York State. The U.S. Environmental Protection Agency's Map of Radon Zones identified the subject property as in Kings County a radon zone Level 3. Level 3 signifies that the average predicted radon level indoors is less than 2 picocuries per liter and this is the lowest level in the state. This level compares favorably with the EPA action level of 4.0 picocuries per liter as the guideline (it should be noted that current radon information and EPA Action Levels are designated for residential spaces only and commercial and industrial facilities are not subject to EPA's Action Level of 4 picocuries per liter as the guideline and definitive information concerning radon gas in an individual building can only be obtained through long term testing).

Mold

Molds are a class of fungi and have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials and thrive in humid environments. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth.

During our site reconnaissance, RSK performed a limited visual inspection for the noticeable presence of mold. RSK observed no visually noticeable indications of suspected mold affected ceiling areas within the building.

Wetlands

RSK reviewed available information regarding wetlands on the subject property, including National Wetlands Inventory online GIS mapping. RSK made general site observations for readily observable potential wetland characteristics. RSK did not observe surface water bodies or any evidence of potential wetlands on or adjacent to the subject property.

11.0 AFFIRMATIONS OF INSPECTION PERSONNEL

RSK Environmental Group LLC has conducted this Phase I Environmental Survey as an aid in determining the presence of potentially toxic or hazardous chemicals or substances as of the date of inspection. Observations are made herein, and conclusions drawn are not to be considered as a warranty or guarantee and are based solely upon those areas directly visible and observable, without the removal or alterations of any item or structure and reflect conditions as on the day of inspection.

RSK Environmental Group LLC, their principals and employees are indemnified for any future changes or conditions of deterioration in or on the subject property. In as much as each has made not guarantees of the premises, expressed or implied in connection with this report, any liability, which each may have, shall be limited to the fee for the inspection of the property.

User Reliance

This Phase I Environmental Site Assessment (ESA) Report is for the benefit of 880 Rogers LLC and this report may not be relied upon by any other person or entity without the written consent of RSK Environmental Group, LLC.

Only if written agreement has been executed granting the right to utilize this report, no third party which obtains all of portion of this report shall have any rights of recourse or recovery under any course of action against RSK Environmental Group, LLC., its officers, employees, vendors, successors or assigns.

Reliance is provided in accordance with RSK's Standard Phase I Environmental Site Assessment Contract and this report is for the benefit of Expeditor Group and its successors and assigns. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of RSK Environmental Group, LLC.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

880 ROGERS AVENUE BROOKLYN, NY 11226

COORDINATES

Latitude (North): 40.6489870 - 40° 38' 56.35" Longitude (West): 73.9525010 - 73° 57' 9.00"

Universal Tranverse Mercator: Zone 18 UTM X (Meters): 588565.1 UTM Y (Meters): 4500108.5

Elevation: 47 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/13/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 6 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/12/2018 has revealed that there are 56 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 20 NY UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 3 NY VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/12/2018 has revealed that there are 8 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY DRYCLEANERS: A listing of all registered drycleaning facilities.

A review of the NY DRYCLEANERS list, as provided by EDR, and dated 03/07/2018 has revealed that there are 3 NY DRYCLEANERS sites within approximately 0.25 miles of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

FLATBUSH STATION A A	NOSTRAND AVE. WINTHR	NNE 1/2 - 1 (0.566 mi.)	202	449

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MASCIA J AUTO SERVIC	865 ROGERS AVE	NNE 0 - 1/8 (0.039 mi.)	C14	43

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Region: 2 DER Facility ID: 65386

DEC Memo: "12/8/2005: James Merlo, the coordinator for NYC Schools contacted

Joe White with information. Mr. Merlo is trying to located the closure report for this site. If he is unable to locate the report he may send in a certification that the work has been completed to close out the spill. 12/16/2005: Joe White checked the PBS database and the 15000 gal tank was closed in place as of 8/1/2004. We need to obtain the report for this closure. 01/04/2006: The PBS database has PBS# 2-355364 tank 1 documented as closed in place per date of 8/1/2004 which is subsequent to the date of this spill report. No quantity was listed in this spill report with the tank test failure. Therefore the closed out documentation in the PBS database is sufficient in closing out this spill. 1/30/2006: Joe White received a closure report for this spill indicating that are criteria were met and no further work was required. The report is from the Lewis Berger Group, Inc and is dated January 13,2006. It has been scanned into the DEC electronic

filing system."

Remarks: "Caller tested tank. Tank failed. PBS not available at time of call."

D001 Waste code:

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF Waste name:

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS Waste name:

> CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Registry ID: 110004483363

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Date form received by agency: 01/01/2006

Site name: SNIDER FORMAL WEAR

Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 05/22/1987

Site name: SNIDER FORMAL WEAR Classification: Small Quantity Generator

. Waste code: D000
. Waste name: Not Defined

Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE,

CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND

1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND

SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

wall. smelled oil at wall. no odors inside basement. Ms. Admas has this problem since jan. 07. she reported this problem to her developer and develoor applied some kind of black paint on wall. spoke with Hanry (718-812-7366), next door owner (67 E 28th Street). Hanry also had same problem but he sealed basement wall. Ms. Adams Ph. (718) 513-4547 alternate addresses: 2802 Albemarle Rd, 55-75 spoke with Mr. Dafna at Sk-Td Development. Sk-Td development baught this property from Y2K Interiors Corp about four years ago. there was a factory when they baught the site. Sk-Td demolished that building and developed 23- three family houses. each three story unit owned by different person. Tommy Dafna Sk-Td Development, LLC. 80-02 Kew Gardens Road Suite # 606 Kew Gardens, NY 11415 Ph. (718) 312-3400 Fax (718) 312-3401 email: kimmii_gohar@yahoo.com 08/22/07-Hirlakumar Patel. sent letter to Mr. Dafna and Ms. Adams requiring soil delineation and cleaning in basement including sealing of basement wall and floor. letter emailed to Mr. Dafna. 08/27/07-Hiralkumar Patel. received call from Ms. Adams. she spoke with developer and they are ready to do required work. Ms. Adams asked to send list of contractors to developer. sent email to Mr. Dafna with list of environmental contractors and asked to provide company's name by Aug. 31st, 2007. 08/29/07-Hiralkumar Patel. received message from Ms. Adams. left message for Ms. Adams. 09/06/07-Hiralkumar Patel. left message for Mr. Dafna to provide company's name who will do required soil investigation. 09/11/07-Hiralkumar Patel. received call from Sabarina from Mr. Dafna's office. she mentioned that ABC tank is going on-site tomorrow for sampling. 09/17/07-Hiralkumar Patel. received message from Mark Robins (631-462-5866) from Hydrotech. he is going to look at property tomorrow morning. 09/19/07-Hiralkumar Patel. received message from Sabarina. they have hired Hydrotech for required investigation. 09/27/07-Hiralkumar Patel. received call from Racheal from Hydrotech. they will do soil testing next week. they will run samples for 8021 method instead of 8260. 09/28/07-Hiralkumar Patel. received work plan from Hydrotech. sent email to Hydrotech approving proposed work plan. 10/22/07-Hiralkumar Patel. received report from Hydrotech. abstract: - did six borings; four inside basement and two outside along basement wall where oil stain was found - samples inside basement were screened to depth of 8 ft below basemet floor - samples outside building were screened to depth of 16 ft below grade - no VOC contamination found - few SVOCs found over limit but minor contamination - groundwater at site is about 20 ft bg 10/24/07-Hiralkumar Patel. received call from Sabarina from Sk-Td. they sealed basement wall where water leak was observed. no more leak found. Hydrotech sealed floor holes which they punched to take soil samples. left message for Ms. Adams. 10/26/07-Hiralkumar Patel. spoke with Ms. Adams. she is happy with cleanup. no more oil/water leak into basement and basement wall and floor has been sealed. based on submitted documents, case closed."

Date form received by agency: 06/04/1997

Site name: NYC FIRE DEPT ENGINE CO 248

Classification: Small Quantity Generator

Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: X003

. Waste name: OTHER STATE REGULATED WASTES [i.e., DIESEL FUEL, GASOLINE AND HOME

HEATING OIL]

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

. Waste code: D000
. Waste name: Not Defined

Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110004411100

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

DEC Memo: "Site is a former Verizon property. Tank has been pulled and

Envirotrac is doing a closure report. 10/19/12 TJD File review. Envirotrac has submitted a closure report detailing remedial work at this property - currently being divested by Verizon and is in contract for sale. As part of this process all tanks on the property were being removed under Envirotrac's oversight. AARCO was retained as a sub-contractor and removed a total of (7) tanks from the property including (4)550 previously abandonned gasoline UST's, (1)275 in service waste oil AST, (1)3K in service FO UST and (1)2,500 previously abandonned FO UST. With the exception of the 2,500 FO UST all tanks were reported in good condition with no reported discharges

all tanks were reported in good condition with no reported discrete to the environment. Spill report is associated with soil

contamination identified beneath the previously abandonned 2,500 gallon FO UST - Envirotrac & AARCO reports the aforementioned tank removals and associated remedial work occurred between August 13th & August 22, 2012. A total of 27.48 tons of petroleum impacted soils were excavated and properly disposed of during the remedial process. No VOCs and/or SVOCs were detected above the analytical reporting limits in any of the post-excavation samples collected from the 3,000-gallon and four (4) 550-gallon UST areas. VOCs and SVOCs detected above the analytical reporting limits in the post-excavation samples collected from the former 2,500-gallon UST area were at concentrations below their respective unrestricted soil cleanup objectives. All required closure documentation has been received. No

further action is required at this time."

"Caller advised found contaminated soil after removal of tank. Clean

up is complete."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 394106

DEC Memo: "8/25/10-HRAHMED-PBS#2-044873 Assinged to DEC Sangesland for routine

followup. 8/05/2015: Rashad Spill transferred from Sangesland to Rashad as per RSE. 8/17/2015: Rashad Spill report caller remarks manhole covered. Nothing leaking. As per NYC building records 110-118 Martense Street does not have an alternate address (110 Martense Street). According to PBS# 2-044873 there is a 2,000 gallon #2 fuel AST. The tank installation date was 1/1/2014. One prior spill case#9310315 dated 11/24/1993, case was closed on 11/30/1993. According to PBS the property owner is: 110 Martense Realty Owner LLC 320 Roebling Street #205 Brooklyn, NY 11211 No documents found in D2. 8/18/2015: Rashad Emailed Carrie: After reviewing the spill report for 110-118 Martense Street, Brooklyn NY spill#1005782 dated 8/24/2010. I would like to request the following information: Failed system test report. Test results for supply/return and vent/fill lines. Property owner information. 8/20/2015: Rashad Carrie replied on 8/19/2015: Please see attached tank service report as requested. If you have any questions, please do not hesitate to contact us. Attached document is Aboveground Storage Tank Inspection Report Summary. Document uploaded to D2. Tank test summary is written for 2,500 gallon tank on August 24th, 2010, PBS registration only indicates a 2,000 gallon tank which was installed in 1/1/2014. Tank test report indicates In conclusion, the tank tested at 110-118 Martense Street, Brooklyn, NY has failed because a leak was detected in the tank or associated piping that exceeds 0.10 gallons per hour. PBS eDOC from August of 1986 lists a 2500 gallon tank, product stored was either No. 1,2, or 4 fuel oil. Additional PBS eDoc found dated 6/19/02 indicating a 2000 gallon tank storing either No. 1, 2 or 4 fuel oil, action listed was #4 which is information Correction, it is unclear which information was changed however capacity is now listed as 2000, in previous PBS registration from 1986 it was listed as 2500 gallons. However owners are also different and this is what is indicated on PBS report under transaction type. 8/27/2015: Rashad From previous PBS report dated 9/16/1986 there was a 2500 gallon tank is presumed to be the same tank that failed per ATS report (report indicated 2500 gallon tank) and is no longer listed on new PBS registration. The new PBS registration has a 2000 gallon tank registered with the date of installation 1/1/2014. The 2500 gallon tank was located above ground. The new 2000 gallon tank is also aboveground and has aboveground piping per PBS registration. Based upon records the new 2000 gallon tank replaced the old 2500 gallon tank, it is unclear when the old tank was closed. Due to age of case (over 5 years), new tank replacement, and aboveground tank/piping. spill will be administratively closed as per TTF Processing and

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Site name: MACORIS SERVICE CENTER Classification: Small Quantity Generator

Waste code:

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

> LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

<u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "1/5/06-Hiralkumar Patel. This spill has already reported before and the old case number is 0501111. Here is the details of that case.

********************************* Tank Test Failure Letter sent to PBS

Address: PBS #2-608750 Sears, Roebuck and Co. 3333 Beverly Road Hoffman Estates, IL 60179 Attn: Scott Demuth 06.29.05//SR..Sharif spoke with George Williams. He said they will fix the tank tomorrow and send all relevant documents to DEC.Sent a letter, again. 10.06.05 SR// Rec'd a letter and tank test fail report from James Lucci,978-834-0798 saying that they will take out the tank and

currently working with the bids.

******* 1/5/06-Hiralkumar Patel. I spoke with Mr. David at LFR Inc., when they dig out tank, they found hole at bottom of the tank and contamination at supply pipe. FAx. to David: (847) 695-7799 I got call from Maria Haffer at LFR Inc. She is the person who is investigating the site. they have dug out soil and filled in roll container convered with plastic. they going to investigate this soil soon. Contact information: Maria Haffer 35 Columbia Road. Branchburc NJ 08876 PH. (908)526-1000 (o) (905)500-1482 (c) FAx.(908)526-7886 She will send me a report from laboratory, once she get it. 1/10/05-Vought-Received call from DEC Patel that he was contacted by Haffer during his training out of region. Vought returned call and spoke to Haffer and heating oil tank was removed. Lab samples will be sent in for EPA Methods 8260/8270 and report will be received to DEC by 3/1/05. 02/24/06-Hiralkumar Patel. Left message for Maria at LFR 02/27/06-Hiralkumar Patel. Spoke with Ms. Haffer and she will email me lab results. 02/28/06-Hiralkumar Patel. Received analytical data through email from Ms. Haffer. Abstracts of report: six soil samples (UST-1, UST-2, UST-3, UST-4, UST-8 & UST-9) and two water sample (trip blank & field blank) - no VOCs found in any sample, SVOCs found in all six soil samples. following compounds are exceeding TGAM limit. - sample UST-8 : o-Xylene-> 7.4 ppb (MDL: 3.3) - sample UST-1 : Benzo[a]Pyrene -> 247 ppb (limit 61 ppb) - sample UST-2: Benzo[a]anthracene -> 643 ppb (limit 224 ppb), Chrysene -> 847 ppb (limit 400 ppb), Benzo[a]pyrene -> 586 ppb, - sample UST-3: Benzo[a]pyrene -> 239 ppb - sample UST-4 : Benzo[a]pyrene -> 173 ppb - sample UST-8: Benzo[a]anthracene -> 570 ppb, Chrysene -> 820 ppb, Benzo[a]pyrene -> 624 ppb - sample UST-9 : Benzo[a]pyrene -> 182 ppb as this data doesn't contain site plan, i asked Ms. Haffter to send that. Received email from Maria and she is done with report and we will get it probably tomorrow, 03/02/06-Hiralkumar Patel, Received email from Ms. Haffer. she is waiting to get scrap metal receipt from

subcontractor before sending hard copy of the report. she send me soft copy. Abstracts of report: - tightness test performed on Apr. 27, 2005, which was failed. - one corrosion hole was observed in center at bottom of tank. - upon removal of UST, the concrete pad was observed to be free of visible staining. - heavy surface corrosion and several small corrosion holes were observed in the supply piping near the connections to UST. - no impacted soil was observed beneath the hole in UST, however, petroleum-impacted soil was observed at the east end of UST below the supply piping. - approx. 31 tons of petroleum-impacted soil was excavated from beneath the supply piping and transported to Clean Earth of Carteret, Inc. in NJ. - no VOCs were detected in samples. - on Dec. 30, 2005 LFR received work permit Job NO.: 302057967 from NYCDOB for UST closure. - NYSDEC was also notified in writing about tank closure. - UST was uncovered, accessed, and cleaned prior to removal from excavation. - appro. 150 gal of pumpable liquid was removed from UST to facilitate cleaning. liquid transported to New York Oil Recory, INc. in Brooklyn. non-pumpable bottom sludge and wastewater generated during the UST cleaning activities were transported to Clean Earth of New Jersey, NJ - top of tank was located approx. 3.5 feet below surface grade. - the excavation extended to the Site building foundation to North, to the Stairwell leading to the basement and to active electrical utilities to the East, and to a large concrete vault for previously closed USTs to the South. there were no limiting factor to the West. - due to the proximity of nearby active subsurface utilities, approx. 8-10 ft supply piping had to be left in place. - this piping was drained then sealed with concrete at the interior boiler room wall and in the vicinity of active utilities. - cleaned UST and piping were transported to Hugo Neu Schnitzer East in Jersey City, NJ for disposal as scrap metal. - petroleum-impacted soils didn'g intersect the water table and the water table was not encountered during UST removal activities. - because the concrete pad, on which tank was located, was not visibly impacted and removal would have jeopardized the building foundation and nearly utilities, this structure was left in place. - soil samples UST-1 through UST-4 were collected from the base of UST excavation immediately adjacent to the four sides of subsurface concrete pad, approx. 9.5-10 ft bg. - soil sample UST-8 was collected immediately below the supply piping location, approx. 3.0-3.5 ft bgs, at the point where it was capped. - soil samples UST-9 was collected at the base of petroleum-impacted soil excavation, approx. 9.0-9.5 ft bgs. - excavation was backfilled to grade with the previously clean soils and with imported fill material provided by Redhook Crusher of Brookly, NY. - no VOCs were detected in samples. some SVOCs were out of limit. - if no. 2 fuel oil was the source of impacts, concentractions of lighter VOCs and SVOCs would also be present, which is not the case at this site. the data indicates that these elevated SVOCs are most likely related to commercial/industrial nature of the site and vicinity and not the operation of 5000 gal UST. 03/03/06-Hiralkumar Patel. Received final report from LFR. as contamination level is slightly higher than limit case is closed."

Remarks:

"TANK WAS PULLED TODAY AND A HOLE WAS FOUND IN THE TANK. THE TANK SIZE WAS 5000 GALLONS. MINOR AMOUNT OF SOIL CONTAMINATION WAS FOUND AT THE PIPE. THERE WAS ALSO A FAILED TANK TIGHTNESS DONE ON THIS TANK AND IT WAS REPORTED. HOWEVER,. THE CALLER DOES NOT HAVE THE SPILL NUMBER. THE ADDRESS IS THE SAME FOR BOPTH SPILL NUMBERS. HAS NOT BEEN CLEANED UP, SOIL WILL BE REMEDIATED TOMORROW"

from Petroleum. met Mr. Calebmungo (917-655-7440), super at building. super doesn't know size of tank or tank registration as he started his job on 11/01. tank is underground. boiler room is close to tank location, found countinous flow of oil coming out from wall, which is close to tank, into boiler room. vacuum truck was on scene. Israel Weinderger 55 Linden LLC 95 Delancey Street New York, NY 10002 PH. (212) 254-4374 FAX (212) 353-0564 spoke with Chris (347-865-9917), previous super. Chris worked at site for about 3 months during summer. Chris also doens't know the size of tank as he never used oil. building has both oil and gas burner and they used gas during summer. spoke with Joe at Petroleum today, they have pumped out tank. it is 5000 gal tank. as per Joe, oil stopped coming out through holes into boiler room once they emptied out tank. sent out CSL, requiring tank test, soil/groundwater delineation and endpoint samples, to Mr. Weinderger. letter faxed to Mr. Weinderger and to Joe (Ph. 718-624-4842, FAx 718-858-4268) at Petroleum. 11/17/06-Hiralkumar Patel. visited site while visiting other site in neighbourhood. met super at building, found floor in boiler room in very bad condition. also found oil/water coming into tank. 11/21/06-Hiralkumar Patel. called management office for Mr. Weinderger. operator told me that Ms. Giovanna will call me back, a person handling maintanence department. received call from Ms. Giovanna. she doesn't know anything about oil spill, she transferred to Mr. Weinderger, who transferred to Charlie. spoke with Charlie Krause (917-295-0572). they have hired ATS for tank testing. explained Mr. Weinderger and Charlie that soil investigation and contamianted soil removal required in boiler room also as floor is in bad condition, as per Mr. Weinderger, they took over this property recently and doing renovation. asked Charlie to send company's name and number who will going to do soil investigation and cleanup, with copy of signed proposal. 11/22/06-Hiralkumar Patel. received message from Charlie. ATS will do tank test next week. 11/27/06-Hiralkumar Patel. received message from Charlie. ATS will do tank test on 11/29/06. 11/28/06-Hiralkumar Patel. received call from Tony Maricic (908-518-0732) from OII Tank Service. Mr. Maricic was contacted by property manager for tank removal. Mr. Maricic is doing business of tank removal in NJ. he doesn't have any license in NY State. asked Mr. Maricic to contact FDNY and NYCDOB for information about license required to remove oil tank. Mr. Maricic will call back. 11/29/06-Hiralkumar Patel. received message from Charlie. spoke with Charlie. Charlie is dealing with PTC and Oil tank service. once he decided about which company will do further work, he will send copy of signed proposal. 12/06/06-Hiralkumar Patel. received call from Charlie. he got proposal from different companies and once he decides who will going to do cleanup, he will send copy of signed proposal. 12/11/06-Hiralkumar Patel. received message from Charlie. they have hired Eastmond for further cleanup. 12/12/06-Hiralkumar Patel. received copy of signed contract from Charlie. Eastmond will do tank removal work and will remove any contamination. 12/16/06-Hiralkumar Patel. received call from Charlie. he will check with Isaac about starting date of tank removal and contaminated soil removal work. 12/21/06-Hiralkumar Patel. received message from Issac (Cell: 646-879-6703) from Eastmond. spoke with Isaac. they will start tank removal probably next week. 12/28/06-Hiralkumar Patel. received message from Isaac. he is at site. they have removed tank and found hole in tank, he will remove contaminated soil and will take endpoint samples. 02/12/07-Hiralkumar Patel. received closure report from

Isaac. abstract: - removed 5000 gal #6 oil tank - removed 10 cubic yard contaminated soil - took three endpoint bottom samples Isaac took three bottom samples and haven't took any sidewall samples. asked him about leak through wall inside boiler room. he was believing that oil was coming from emergency door close to vent pipe. explained him that oil was seeping through wall inside boiler room and also during second site visit, i observed cracks in boiler room floor where oil was reached after leakage. Isaac will meet at site at 3 PM tomorrow. 02/14/07-Hiralkumar Patel. visited site. spoke with super. he mentioned that Eastmond excavated area close to boiler room wall. spoke with Isaac. as per him, tank was about 3 ft away from boiler room wall and spill was probably happened because of overfilling. no oil stains found in boiler room. based on available documents and site visits, case closed. NFA sent to Israel. letter faxed to Israel and Isaac."

Remarks: "enroute to clean up fire dept on scene"

DEC Memo: "send TTF letter 02/23/06 Feroze, PBS is 2-606599. TTF is sent to:

FLATBUSH 7TH DAY ADVENTIST 261 East 21th Street Brooklyn, NY 11226

03/14/06 Feroze, Mr.Jack piccinni (718-763-2000) sent me a letter that they will replace the pipe that have leak and test the tank again. They will also take soil sample for analysis. 03/15/06. Spill is transferred from Feroze to Kumer Patel. 03/31/06-Hiralkumar Patel. Received letter from Jack Piccinni. abstract of letter: - personally witnessed the failed test of #2 5000 gal tank - have been monitoring fuel consumption which is normal usage. - because of the instant negative response of test instruments, we believe the leak is at a dry air section of the piping above the tank high oil level. - have requested estimates from Petroleum Tank Cleaners and other environmental companies to pump and vapor free the tank for interior access. - will cap all piping and test tank and proceed to determine piping leaks. 04/21/06-Hiralkumar Patel. Spoke with Jack and he told me that they have hired Petroleum Tank to do isolation test. Petroleum has done test and found that tank is tight, but one of

lines is leaking. Petroleum will do line test once they get permission from owner as owner is thinking to do any further work after Ester. the person who is handling engineering work at church is George Pethuna (646-252-7112). Left message for George. called Petroleum and operator told me that she doesn't see any kind of work done in database. she transferred me to Mark as he is handling this. Left message for Mark. Spoke with Mark and as per him they have not been hired by owner to do further work, they did initial test and found that system is leaking, he hasn't heard after that.

found that system is leaking. he hasn't heard after that. 05/12/06-Hiralkumar Patel. Left message for George. Left message for Jack. 05/26/06-Hiralkumar Patel. Received call from Ellsworth Cross from CT Construction company. they worked at site in 2003 and put new concrete floor. Mr. Cross is planning to go on site in second week of Jun to open tank top as they left 6 hole in floor for tank access and will do isolation test. as per him, when they put new floor, there was stick line in manhole going to tank, and he thinks that this line is the cause of test failure. he will call back once have test result. Ellsworth Cross Ph. (860) 299-5040 (O) (860) 870-4778 (H) 07/06/06-Hiralkumar Patel. spoke to Mr. Cross. he has scheduled on july 13, 2006 for isolation test. will call back on friday july 14,

2006. 08/01/06-Hiralkumar Patel. spoke with Mr. Cross. he opened tank

top and found loose plug on stick well. they tighten this and will do system test again on thursday august 3rd, 2006. 08/29/06-Hiralkumar Patel. spoke with Mr. Cross. after tightening plug on stick well, they have tested each part separately and passed. after that Mr. Piccinni hired another company for whole system test and system passed. Mr. Cross doesn't have tank test result and asked to contact Mr. Piccinni. Left message for Mr. Piccinni. received message from Mr. Piccinni (646-302-5318). after repair work done, petroleum has tested tank and it passed. owner has some conflicts about sales tax on final bill from petroleum, but once he gets documents, he will forward it to the Department. 09/25/06-Hiralkumar Patel. left message for Mr. Piccinni. 09/26/06-Hiralkumar Patel. received call from Mr. Piccinni. he asked to call Petroleum. spoke with Diana at Petroleum. they have mailed documents. 11/08/06-Hiralkumar Patel. spoke with Mr. Piccinni. he asked to call Petroleum. spoke with Joe at Petroleum. he will check with Diana and will send documents. 11/16/06-Hiralkumar Patel. spoke with Diana at Petroleum. she will fax tank test result. spoke with Mr. Cross. asked him to send written explanation about cause of tank test failure. 12/01/06-Hiralkumar Patel. spoke to operator at Petroleum. Diana has faxed tank test result on 11/17, but i never received it. asked them to fax it again. 12/05/06-Hiralkumar Patel. received fax from Diana from PTC containing tank test result. tank system passed in test, spoke with Mr. Piccinni and asked him to send letter stating reason for failure during previous tank test. 12/12/06-Hiralkumar Patel. received letter from Mr. Piccinni stating reason for tank test was loose stick well plug. based on available information, case closed."

DEC Region: 2
DER Facility ID: 414875

DEC Memo: "01/27/12-Hiralkumar Patel. 12:55 PM:- spoke with Bob. he mentioned

that site has one 3,000 gal UST under the bank's basement floor. tank is 72 inches in diameter and had 45 inches of product at the time of the tank. test was inconclusive in reference to wet or dry leak. he mentioned that old supply/return lines are attached to the tank and that could be reason for tank test failure. 1:30 PM:- spoke with Shawn Granholm, facility manager at Astoria Federal Savings Bank. informed him that as the test was inconclusive, the department requires immediate action to find out the leak. asked him to either pump out the tank or perform an isolation test by the end of 01/30/11. informed him that if the tank only fails the isolation test then tank must be pumped out. he will talk to Protest. Shawn Granholm Facility Manager Astoria Federal Savings Bank Ph. (516) 327-7572 email: sgranholm@astoriafederal.com 01/30/12-Hiralkumar Patel. 3:37 PM:- received message from Bob. he mentioned that after cutting old supply/return lines from the tank, there is no more wet leak detected in the tank system. there is still a dry leak in the system and they will continue isolation test tomorrow. 01/31/12-Hiralkumar Patel. 4:32 PM:- spoke with Bob. he mentioned that the old supply/return lines were running aboveground except part of it runs underground when enters into floor to the tank. Protest exposed the entire underground portion of the old supply/return lines and found no contamination. during isolation test, they found dry leak in vent and remote fill line. currently, fill port has been plugged. Protest will replace leaking fill line. asked Bob to call back with schedule. 02/10/12-Hiralkumar Patel. 3:12 PM:- spoke with Bob. he has sent proposal for repair, but hasn't heard back yet. 3:14 PM:- left message for Mr. Granholm. 02/13/12-Hiralkumar Patel. 2:11 PM:received call from Mr. Granholm, they hired Protest and has applied for DOT permit. asked Mr. Graholm to call back with work schedule, once permit received. 02/23/12-Hiralkumar Patel. 9:14 AM:- received email from Bob. they have started repairing fill and vent lines and work will be finished by 02/28/12. 02/29/12-Hiralkumar Patel. 8:21 AM:- received email from Bob. they replaced remote fill line. a small damage in fill line at the foundation wall caused tank test failure. no contamination was found in entire trench. will do tank system test and submit a closure report. 03/13/12-Hiralkumar Patel. 3:13 PM:spoke with Mr. Granholm and asked him to submit closure report. he will talk to Protest. 3:15 PM:- sent email to Bob and Mr. Granholm and asked to submit report by the end of 03/19/12. 3:28 PM:- received email from Bob, he will submit report tomorrow, 03/14/12-Hiralkumar Patel. 10:51 AM:- received email from Bob including closure request.

DEC Memo: "TTF Letter (see eDocs) sent to property manager: Leon Maoucheri MAX

Management 600 Mamaroneck Ave Mamaroneck, NY 10543 800-371-5155 Case

switched to Tim DeMeo 9/12/12 TJD T/C with Anthony Lara from Riteway Tank Maintenance Corp - tank was emptied following the initial test failure. Tank was then entered and cleaned - lines were divorced from tank and retested. Tank passed a tank only test and combination vent line/stick port failed. Building is currently on temporary tanks (2 -275). UST has a 4,000 gallon capacity and is reported to be buried in courtyard with difficult access - owner requests permission to abandon in place and is in process of converting to gas. Riteway further states a total of (3) holes were previously drilled through tank bottom along centerline - samples were collected and submitted

to laboratory for analysis. Riteway reports all endpoint sample analysis were below RSCO and request permission to abandon UST. Based

upon information provided DEC authorized abandonnment of tank - spill to remain open until all required closure documentation has been received. 9/18/12 TJD File review. All required closure documentation has been received. No further action is required at this time. Spill

closed."

VOUGHT 1/30/2003-Vought-Tank test failure letter sent by fax and by mail to Elia Ruscio 2969 Avenue R Brooklyn, NY 11229. 2/6/2003 - Zhao: This tank is not currently registered under PBS program. According to Mark, Energy Stars Systems, application will be sent to the Dept. 11/13/2003-Spill transferred from Tipple to Vought. Phase II Report-6/9/2003 Environmental Systems Group 732-919-2092. Tank is located under the sidewalk in front of 521-27 Ocean Ave. Tank is a 2000-gallon #2 fuel oil UST. Site converted to natural gas so tank is empty and is no longer in use. Geoprobe sampling performed to a depth

of 12'(four feet two inches below tank invert). No groundwate encountered. Two borings performed to a depth of 20'. Six borings were performed and six samples were sent for 8021/8270 analyses. Soil analyticals show no TAGM 4046 Required Soil Cleanup Objective exceedances. Tank will be abandoned in place. Spill closed by Vought."

DEC Region: 2
DER Facility ID: 99578
DEC Memo: "Prior to

"Prior to Sept, 2004 data translation this spill Lead DEC Field was DEMEO 9/26/03 DDO Sawyer sent tank test failure letter. 3/26/06: CBN Called Alan Kurtz (718) 788-7900 and left a message to ask him to call me back. 7/26/06 - Mike - Spoke with Allan Kurtz who gave number for Empire Tank (718-627-5100). According to Kurtz an old tank was replaced with a new tank. At Empire, a David Stern mentioned that the work was subbed out to USA Tank. Stern said he has repeatedly asked USA to send in report. He said it will be sent in at some point. 10/29/10 - Austin - Reassigned from Scibelli in Albany to Ketani in Region 2 for following up and closing - end 11/9/10 - Raphael Ketani. The spill took place on 9/25/03 and involved a tank test failure. The site is block and lot 5056 and 40. According to the 2/18/88 deed in ACRIS, the owner is 590 Parkside Avenue HDFC, 590 Parkside Avenue, Brklyn, c/o TKR Property Services, Inc., 430 16th Street, Brklyn, 11215. The PBS registration is #2-608620. It lists 590 Parkside Owners, c/o TKR at 430 16th Street. The contact is Alan Kurtz at (718) 788-7900. There is a 3,000 gals. UST in service with #2 oil since 5/1/70. There are no E-docs and no paper file. I tried calling Empire Tank (718) 627-5100, but reached an operator at Approved Oil. She said that her company had merged with Empire Oil a few years ago. but she wasn't sure whether Empire Tank had been part of the company.

She put me through to the voice mail of Chris Fazio and I left a message requesting a cleanup report. I tried to contact Alan Kurtz (718) 788-7900, ext 227 at TKR, but I could only leave a voice message. Mr. Fazio called me back. He said that they didn't service the property at that time back in 2003. He added that Approved simply picked up the account as part of a larger account. He said that he didn't have any records. 11/22/10 - Raphael Ketani. I tried to reach Mr. Kurtz, but could only leave a phone message. A little while later, Mr. Kurtz (718) 788-7900, ext 227 called me back. He said that the tank failure had been taken care of a long time ago. A new tank was installed. I told him that the DEC didn't have a report regarding the tank failure. Also, I stated that there could be soil and groundwater contamination. Mr. Kurtz said that he will talk to Empire and find out whether they have the tank replacement and testing report. I told Mr. Kurtz that I had already talked to Empire and they told me there was no paperwork. Mr. Kurtz said that I may have talked to the wrong Empire. He will talk to Empire Service and get back to me. Mr. Kurtz sent me the tank test report (see E-docs) that pertains to the failure of the old tank. The failure was in the ullage (dry portion). The report indicates that groundwater was not found below the tank. 12/9/10 - Raphael Ketani. I spoke to Mr. Kurtz regarding the spill. I asked him whether there was any oil inside of the building as a result of the failure of the ullage. He said that, to the best of his memory, there was not. As the failure of the fuel system was in the ullage, and as Mr. Kurtz was pretty sure that there never was any sign of a release of oil inside of the building, I have determined that the threat to the public or the environment was minimal. Therefore, I am closing the spill case. "

DEC Memo:

"10/27/11 - Austin - Transferring this case from Ahmed to Ketani end 07/11/13 - Case is transferred from Ketani (Section C) to Brevdo (Section B) as per DER Region 2 decision. V. Brevdo 07/17/2013: This spill case was transferred to A. Doronova. - AD Put site priority as P0. AD Looked in the ACRIS database for the property ownership. According to ACRIS, this site belongs to Cumberland Farms, Inc. Sent the following e-mail to Chris Johnson of CFI: Dear Mr. Johnson: The NYSDEC has in its files open spill cases for the following properties: 1. NYSDEC Spill No. 0907625, Station #70227, 189 Pennsylvania Avenue, Brooklyn; 2. NYSDEC Spill No. 0905291, 90-02 Metropolitan Avenue, Queens; 3. NYSDEC Spill No. 0904510, 15411 Horace Harding Boulevard, Flushing; 4. NYSDEC Spill No. 0901625, Station #70220, 6743 Fourth Avenue, Brooklyn; 5. NYSDEC Spill No. 0901547. Station #70216, 3602 Snyder Avenue, Brooklyn, These spill cases were transferred to me. According to ACRIS database these properties belong to CFI, Inc. Please confirm the ownership of these sites by CFI, Inc., and if this is the case, please provide DEC with all information related to remediation and cleanup activities for these sites. Feel free to contact me if you have any questions. Thank you. Sincerely, Ainura Doronova AD 07/18/2013: Received the following e-mail from C. Johnson of CFI: Good morning, Bill Simmons of ECS will also be the consultant for these spills. We are working to gather information for these sites too. Thank you, Chris Christopher Johnson Senior Project Manager Office of the General Counsel Environmental Affairs Changed spill name to Cumberland Farms - CFI. AD 11/05/2013: Sent the following e-mail to Mr. Johnson of CFI: Dear Mr. Johnson: I am awaiting for the information regarding the following CFI sites: 1. NYSDEC Spill #1009352, CFI # 70223, 1938 Coney Island Avenue, Brooklyn; 2. NYSDEC Spill #0809132, CFI # 70224, 3031 Coney Island Avenue, Brooklyn; 3. NYSDEC Spill #0703743, 2338 31st Street, Astoria; 4. NYSDEC Spill #0702193, 115-05 Beach Channel Drive, Rockaway Park; 5. NYSDEC Spill #0701807, CFI #70225, 8779 Bay Parkway, Brooklyn; 6. NYSDEC Spill #9505634, 29-16 Francis Lewis Boulevard, Flushing. 7. NYSDEC Spill No. 0907625, Station #70227, 189 Pennsylvania Avenue, Brooklyn; 8. NYSDEC Spill No. 0905291, 90-02 Metropolitan Avenue, Queens; 9. NYSDEC Spill No. 0904510, 15411 Horace Harding Boulevard, Flushing; 10. NYSDEC Spill No. 0901625, Station #70220, 6743 Fourth Avenue, Brooklyn; 11. NYSDEC Spill No. 0901547, Station #70216, 3602 Snyder Avenue, Brooklyn. Any information regarding performed investigation and remediation actions related to these open spill cases, should be compiled into a summary report with conclusions and recommendations for further actions and submitted to the Department in a timely manner. If there is no such information, an investigation work plan should be submitted to DEC for its review and approval. Please feel free to contact me with your questions or comments. Sincerely, Ainura Doronova AD 11/07/2014: Received the following e-mail from CFI: Ainura. While researching the list of open spill cases you forwarded earlier in the week I was able

Distance EDR ID Number Elevation Site EDR ID Number Database(s) EPA ID Number

CUMBERLAND FARMS (Continued)

S109060338

to locate letters CFI had provided for two of the incidents. I will continue to research the other open spill incidents you inquired about but wanted to check in with you on the two case # s below to see if these could be closed out as in both cases there was no actual release of product to the environment but rather reportable operating conditions following which we were able to confirm no release occurred. I will provide you with updates on the remaining items as I am able. Spill Case# 0702193 Incident reported was an inventory reconciliation report that was out of tolerance for which a valid reason could not be identified at the time. Under the Regulations in effect a that time a tank tightness test was performed and it was confirmed that no release of product to the environment occurred. Attached is a copy of the closure letter CFI provided in 2009 which includes a copy of the passing test results. Spill Case# 0901547 Incident reported was liquid identified in a UST system containment structure. Upon responding to the incident CFI s contractor at the time Phoenix Environmental confirmed the liquid was Petroleum Contact Water and not virgin fuel from a leaking system component. A letter was provided to NYS DEC at the time detailing these fact and requesting the spill incident number be closed, Thanks John W. Collins Environmental Emergency Response Manager Office of the General Counsel Cumberland Gulf Group of Companies 100 Crossing Blvd. Framingham, MA 01702 Phone: 508-270-4494 Mobile: 978-979-3374 Email: JCollins@cumberlandgulf.com Website: www.cumberlandgulf.com Will review. AD 12/15/2014: Reviewed the submitted letter. It states that a spill number of 0901547 was assigned to the incident when liquid was identified in a UST system containment structure at the site. Upon responding to the incident CFI s contractor at the time (Phoenix Environmental) confirmed the liquid was Petroleum Contact Water and not virgin fuel from a leaking system component. It was reported that water was pumped from the areas. Phoenix Environmental was contracted to do the pump out of 5 gallons of a non-hazardous/non-reportable gas/water mix. The clean up was found to be successful and CFI requested that spill #0901547 be closed. The wording of the letter is vaque and needs to be clarified. Where the as/water mixture was found? Did they collected GW sample? Was it analyzed? AD 12/29/2014: Discused the site with J. Kolleeny. Called to CFI to speak with J. Collins. He was out of the office. AD 01/21/2015: Called and left a message to Mr. Collins. AD 01/29/2015: Called and spoke with J. Collins of CFI. Asked him to clarify the technical statement in CFI's letter from June 2009. He will try to get more info on the case. AD 02/19/2015: Sent the following e-mail to Mr. Johnson: Dear Mr. Johnson, DEC is awaiting for the information regarding NYSDEC spill cases for the following CFI sites: 1. NYSDEC Spill No.0809132, CFI # 70224, 3031 Coney Island Avenue, Brooklyn; 2. NYSDEC Spill No.0703743, 2338 31st Street, Astoria; 3. NYSDEC Spill No.0701807, CFI #70225, 8779 Bay Parkway, Brooklyn; 4. NYSDEC Spill No.9505634, 29-16 Francis Lewis Boulevard, Flushing. 5. NYSDEC Spill No.0907625, Station #70227, 189 Pennsylvania Avenue, Brooklyn; 6. NYSDEC Spill No.0904510, 15411 Horace Harding Boulevard, Flushing; 7. NYSDEC Spill No.0901625, Station #70220, 6743 Fourth Avenue, Brooklyn; 8. NYSDEC Spill No.0901547, Station #70216, 3602 Snyder Avenue, Brooklyn; 9. NYSDEC Spill No.9604417, 6743 Fourth Avenue, Brooklyn; An information regarding performed investigation and remediation actions, related to these open spill cases, should be compiled into a summary reports with conclusions and recommendations for further actions and submitted to the Department in a timely manner. If there is no such

information, an investigation work plans should be prepared and submitted to DEC for review and approval. Please feel free to contact me with your questions or comments. Sincerely, Ainura Doronova AD 11/16/2015: Sent the following e-mail to Mr. Johnson: Dear Mr. Johnson, DEC is awaiting for the information regarding open NYSDEC spill cases for the following CFI sites: 1. NYSDEC Spill No.0809132, CFI # 70224, 3031 Coney Island Avenue, Brooklyn; 2. NYSDEC Spill No.0703743, 2338 31st Street, Astoria; 3. NYSDEC Spill No.0701807, CFI #70225, 8779 Bay Parkway, Brooklyn; 4. NYSDEC Spill No.9505634, 29-16 Francis Lewis Boulevard, Flushing. 5. NYSDEC Spill No.0907625, Station #70227, 189 Pennsylvania Avenue, Brooklyn; 6. NYSDEC Spill No.0904510, 15411 Horace Harding Boulevard, Flushing; 7. NYSDEC Spill No.0901625, Station #70220, 6743 Fourth Avenue, Brooklyn; 8. NYSDEC Spill No.0901547, Station #70216, 3602 Snyder Avenue, Brooklyn; 9. NYSDEC Spill No.9602411, 137-21 Liberty Avenue, Queens; 10. NYSDEC Spill No.219-02 Horace Harding Boulevard, Queens; 11. NYSDEC Spill No.9604417, 6743 Fourth Avenue, Brooklyn; Any information regarding performed repair work, investigation and/or remediation actions related to these open spill cases, should be compiled into summary reports for each case with conclusions and recommendations for further actions and submitted to the Department in a timely manner by December 30, 2015. If there is no information on the performed actions, a suitable investigation work plans should be submitted to DEC for review and approval no later than January 30, 2016. Please feel free to contact me with your questions or comments. Sincerely, Ainura Doronova Response is due December 30, 2015. AD 11/19/2015: Received the requested information from ECS. Will review. AD 11/20/2015: Reviewed the submitted document. ECS is stating that on May 7, 2009 at around 2:30 PM, a vehicle backed into Dispenser 7-8 located on the southwestern portion of the Site, and broke the premium grade impact valve that caused gasoline to spray onto the concrete positive limiting barrier near the dispenser. The station attendant immediately shut down the pump and estimated less than 5 gallons was spilled to the concrete. Tyree Services of Farmingdale, New York arrived on-site at 4:30 PM, tightened the coupling to prevent any residual leaking until a replacement impact valve could be installed, and cleaned the concrete. Attached to the letter is the Tyree Services work order detailing their response actions. According to ECS, the supporting documentation provided adequately addresses the concerns of the NYSDEC that proper response actions were performed and completed, and that no release to the environment occurred. Therefore, CFI respectfully requests closure of Spill No. 09-01547. Provided information means that previous statement from ECS e-mail dated November 7, 2014 that a spill number of 0901547 was assigned to the incident when liquid was identified in a UST system containment structure at the site is related to different spill case. Taking into consideration the insignificant amount of the gasoline spilled (greater than 5g) on the concrete surface and prompt cleanup performed, DEC will close the case. AD 12/02/2015: Issued and sent a closure letter to Mr. Johnson of CFI. AD "

Brooklyn, NY 11210 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 01/03/2014 - V.Brevdo EcoSystems Strategies submitted Spill Closure Report for 75 East 21st Street, Brooklyn, New York - NYSDEC Spill 0912566. The Department reviewed Spill Closure Report, which recommended spill closure. Discussed project with Paul Ciminello of EcoSystem Strategies. Mr. Ciminello verified that he visited the site following opening of this spill case, and Mr. Ciminello observed only a very slight petroleum odor in the basement boiler room where the heating oil tank is located, which is very common for for such locations. No petroleum odor was observed in the main lobby of the building. V.B. 01/06/2014 - V. Brevdo January 6, 2014 75 East 21st Street, Brooklyn Spill Case No. 0912566 Spill Case Closure Decision AST which failed test has been removed. Consultant, Eco Systems Strategies concluded that: 1)The soil contamination is spatially limited. Field evidence indicated contamination in only one soil boring, and laboratory data confirmed that only one hydrocarbon exceeded its respective SCO: 2) Contamination is present in shallow soils beneath the building (3 feet below the basement floor), supporting the conclusion that groundwater is not likely to be affected (groundwater in this area is 20-25 feet below surface grade); 3) The impacted soils are beneath a concrete slab and virtually inaccessible given the presence of a replacement AST overlying the impacted soils; and 4) The impacted soils pose no significant threat to human health or the environment. VB The Department concurs with EcoSystems, Inc. aforementioned conclusions. Spill Case closed effective 01/06/2014."

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation: 47 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5940597 BROOKLYN, NY

Version Date: 2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

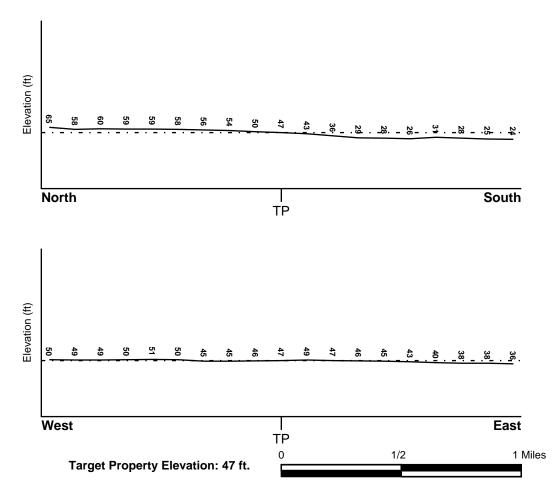

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

BROOKLYN YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 MAP ID
 FROM TP
 GROUNDWATER FLOW

 Not Reported
 GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Mesozoic Category: Stratified Sequence

System: Cretaceous Upper Cretaceous

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Soil Layer Information							
	Bou	ndary		Classif	ication		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam

loamy sand sandy loam fine sandy loam

Surficial Soil Types: silt loam

loamy sand sandy loam fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock

very gravelly - loamy sand

stratified sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by RSK ENVIRONMENTAL GROUP, LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING. WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.
