

SITE OBSERVATION REPORT

PROJECT No.: 170747001 PROJECT: C224398 – 1709 Surf Avenue LOCATION: 1709 Surf Avenue, Brooklyn, New York	CLIENT: Coney Island Associates Phase 3 LLC c/o BFC Partners	DATE: Wed, June 25, 2025 WEATHER: Clear, 85-105°F Wind: SE 1-4 mph TIME: 7:10 am to 6:15 pm
CONTRACTOR'S EQUIPMENT: Doosan DL 300 Loader Doosan DX300LC Excavator Bobcat S590 Skid Steer Bobcat E45 Mini Excavator CAT 345C Excavator CAT 350L Excavator Mixing Tank Flexible Hosing and High-Volume Water Pump	PRESENT AT SITE: RAWP Implementation Day 70 Environmental (Langan) – Mike Pinnella General Contractor (BFC Construction) Foundation Contractor (Precise Contracting [Precise]) Deep Foundation Contractor (RYC Turbos Corp.)	
OBSERVATIONS, DISCUSSIONS, TEST RESULTS, ETC.: Langan was present to oversee implementation of the November 20, 2024 Remedial Action Work Plan (RAWP) and March 27, 2025 In-Situ Groundwater Treatment Remedial Design Plan for Brownfield Cleanup Program (BCP) Site No. C224398 at 1709 Surf Avenue. Observed activities were as follows: Site Activities - Precise continued implementation of the contingency groundwater treatment plan in the southern part of the site. Precise mixed about 1,200 gallons of PetroFix™ with 2,600 gallons of hydrant water. Then, about 540 pounds of Electron Acceptor (EA) blend was mixed with the diluted PetroFix™. The remedial product was mixed using a drill mixer inside an approximately 1,000-gallon mixing tank. Flexible hosing and a high-volume water pump were used to apply the remedial product to the base of the excavation at about 10 feet below grade surface (bgs). Following the application of the reagent product, the about 140-foot-long by 80-foot-wide excavation was backfilled with 1 foot of pipe sand to about 9 feet below grade surface (bgs). Backfilled pipe sand was imported from Braen Stone of Sparta, located in Lafayette, New Jersey or was taken from previously backfilled areas. This includes an about 20-foot-long by 18-foot-wide by 5-foot-deep area and an about 25-foot-long by 25-foot-wide by 5-foot-deep area in the southwestern and southern parts of the site, respectively. - Precise paused dewatering through the temporary dewatering system. Sampling - No samples were collected.

SITE OBSERVATION REPORT

CAMP Activities

- Langan performed community air monitoring at the perimeter of the site at two locations (one downwind and one upwind) and included air monitoring for particulate matter for particulates less than 10 µm in diameter (PM10) and volatile organic compounds (VOC). Particulate and VOC concentrations did not exceed the action levels established in the site Community Air Monitoring Program (CAMP). Fugitive dust or odors associated with intrusive activities were not observed.
 - The upwind and downwind CAMP stations experienced equipment malfunctions starting at 12:45pm due to high temperatures. Stations were shut down to allow for cooling and will be restarted on the following workday. No dust or odors were apparent on-site during this time.

Anticipated Activities

- Precise will continue site wide excavation and offsite disposal of non-hazardous fill/soil.
- Precise will continue to import approved backfill.
- Langan will continue to collect endpoint and sidewall samples from remedial subgrade across the site.
- Langan will continue implementation of the contingency groundwater treatment plan.

SITE OBSERVATION REPORT

Material Tracking

- Thirteen truckloads of pipe sand (297.37 tons) were imported from Braen Stone of Sparta located in Lafayette, New Jersey.
- No material was exported from the site.

MATERIALS EXPORT SUMMARY						
Facility Name	Clean Earth Carteret		Clean Earth Carteret		Clean Earth New Castle	
Location	Carteret, New Jersey		Carteret, New Jersey		New Castle, Delaware	
Type of Material	Non-hazardous fill/soil - Standard		Non-hazardous fill/soil - Elevated		Non-hazardous fill/soil	
Today	Number of Loads	Approx. Volume (CY)	Number of Loads	Approx. Volume (CY)	Number of Loads	Approx. Volume (CY)
