1.0 INTRODUCTION

Bison Environmental, LLC (Bison) has performed a Phase 1 Environmental Site Assessment (ESA) of the property located at 819 Bedford Avenue in Brooklyn, Kings County, New York and identified as Block 1734, Lot 61 (hereinafter referred to as “the property” or “the site”).

Bison’s work was conducted on behalf of Finwise Bank and the United States Small Business Administration.

The Phase 1 ESA was conducted in accordance with the scope and limitations of ASTM Standard Practice E 1527-13 (the “Standard Practice”), and thus meets the requirements of the EPA’s “All Appropriate Inquiry” (AAI) standard. This Phase 1 ESA also incorporates procedures described in the new ASTM E1527-21 Standard (EPA has not yet approved E1527-21 for compliance with AAI). Any exceptions to, or deletions from, the Standard Practice and any limitations of this assessment (including any data gaps) are described in Section 8.0 of this report.

This report presents a summary of the work conducted, and Bison's findings and conclusions.

2.0 OBJECTIVE

The objective of the Phase 1 ESA is to identify, to the extent feasible pursuant to the processes described herein, "recognized environmental conditions", as defined in the Standard Practice, in connection with the property. The Standard Practice defines a recognized environmental condition as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The term recognized environmental condition is not intended to include "controlled recognized environmental conditions" which are defined in the Standard Practice as: A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by a regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The term recognized environmental condition is not intended to include "historical recognized environmental conditions" which are defined in the Standard Practice as: A past release of any hazardous substance or petroleum product that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The term recognized environmental condition is not intended to include de minimis conditions. The Standard Practice defines a de minimis condition as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

3.0 SCOPE OF WORK

The Scope of Work (SOW) for Bison's Phase 1 ESA of the property was conducted pursuant to ASTM Standard Practice E1527-13/E1527-21. Accordingly, the SOW consists of four general components: (1) records review, (2) site reconnaissance, (3) interviews, and (4) evaluation and reporting of the findings, as described in the following sections.

3.1 Records Review

The following "reasonably ascertainable" and "practically reviewable" records from "standard historical sources" (all terms are as used in the Standard Practice) were obtained and reviewed.

- An EDR Radius Map™ Report with Geocheck®, dated December 2, 2022, containing the federal and state databases specified to be searched in the Standard Practice, at the search radii specified in the Standard Practice, obtained from Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut (note that the EDR Radius Map Report also includes several supplemental databases searched by EDR).
- A Certified Sanborn® Map Report, dated December 2, 2022, also obtained from EDR, which contains historic Sanborn maps of the property and surrounding area dated 1887, 1904, 1918, 1935, 1947, 1950, 1965, 1977, 1979, 1980, 1981, 1982, 1984, 1986, 1987, 1989, 1991, 1992, 1993, 1995, 1996, and 2001 through 2007.
- An EDR City Directory Abstract Report, dated December 2, 2022, also obtained from EDR, which lists historical property occupants based on review of telephone directories.
- Information contained in various online databases available on the New York State Department of Environmental Conservation (NYSDEC) website (dec.ny.gov).
- Information on the property and surrounding properties available on the NYSDEC DEC Info Locator website (gisservices.dec.ny.gov).
- Property data and a tax map available from the New York City website (nyc.gov).
- Physical setting information such as the USGS topographic map (Brooklyn, NY) of the property and surrounding area, a geologic map of the Lower Hudson Region of New York, and the information contained in EDR's Geocheck Report provided with Radius Map Report.

Review of historic aerial photographs and historic United States Geological Survey (USGS) topographic maps of the property and surrounding area was not performed as review of historic aerial photographs and historic topographic maps for properties less than 0.06 acres in size in densely developed urban areas that have been developed for more than 100 years does not typically yield any useful or new information.

A chain of title was not provided for Bison's review.

The above listing satisfies the Standard Practice requirement for listing of published references.

3.2 Site Reconnaissance

The site reconnaissance included a visual inspection of the property and "drive-by/walk-by" inspection of readily accessible exterior parts of adjacent properties on December 12, 2022 for: current property and surrounding property use and indications of past use; presence of PCB-containing items; aboveground and underground storage tanks (ASTs and USTs); potable water, heating and septic systems and wells; sumps, pits, ponds, lagoons; solid and hazardous substances/wastes management; and discharges of these substances, as well as waste water and storm water discharges.

3.3 Interviews

Ms. Noon Gourfain, the trustee of the irrevocable trust which owns the property, accompanied Bison on the site reconnaissance and served as the "key site manager," as defined in the Standard Practice, and was interviewed regarding property history and use.

As the report is being prepared for a bank as part of a loan for a real estate transaction involving the property, an interview of a specific user of this report is not applicable.

No specific past owners or past operators likely to have useful information were identified to Bison for interviews. It is unlikely any former owners or operators would be able to be readily located, and thus information from them would not be reasonably ascertainable.

3.4 Reporting

Reporting, including evaluation of data gathered as part of the other components and preparation of this report on the results of the Phase 1 ESA, generally conformed to the recommended format following the Standard Practice including those matters, verbiage, certifications, and opinions required pursuant to various provisions of the Standard Practice.

4.0 PURPOSE AND RELIANCE

As stated in Section 1.0, Bison's work was conducted on behalf of Finwise Bank and the United States Small Business Administration. The primary purpose of this Phase 1 ESA is to determine if any further investigation is needed prior to financing being authorized. Finwise Bank and the United States Small Business Administration may rely on this report for that purpose. The required reliance letter is issued concurrently with this report.

Others may not rely upon this report without written acknowledgment by Bison. No responsibility or liability is assumed by Bison if this report is used for other purposes or used by other entities.

5.0 FINDINGS

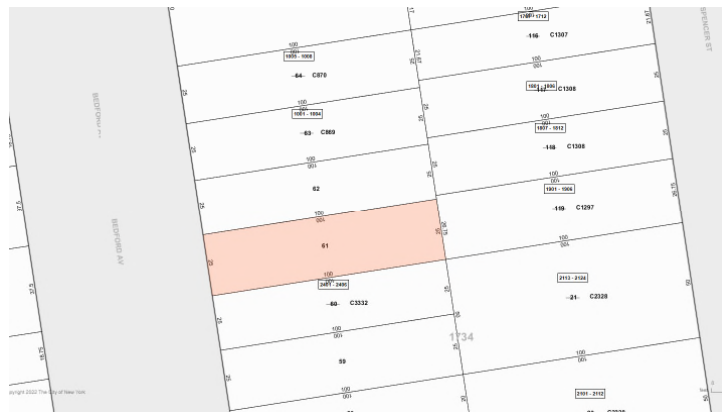

5.1 Site Description

5.1.1 Location and Description

The property is located at 819 Bedford Avenue in Brooklyn, Kings County, New York and identified as Block 1734, Lot 61. The property is a rectangularly shaped lot and consists of a two-story building with a basement and a rear yard area. The first floor of the building is used as storage and the second floor is an apartment. The basement is used for storage and houses utility meters. New York City Finance Department records list the Building Class as “S1- Primarily 1 Family with 1 S ore or Off”, the lot size as 25 feet by 100 feet (2,500 square feet or approximately 0.057 acres), and the building size as 25 feet by 46 feet (1,150 square feet). The aerial photograph from google.com showing the property is shown below.

A portion of the tax map from the New York City website showing the property is shown below with the property shaded pink.

Pictures are below. The picture on the left in the first row is of the front of the building, looking east from across Bedford Avenue. The picture on the right in the first row is of the rear of the building and the yard area, looking west from the eastern end of the property. The picture on the left in the second row is of the first floor storage area. The picture on the right in the second row is of the second floor apartment area.

5.1.2 Physical Setting

The location of the property plotted on a portion of the USGS Brooklyn, NY topographic quadrangle is provided in Appendix 1. The property is approximately 30 feet above mean sea level. The general topographic gradient in the area is to the north-northeast.

Surface water drainage is by overland flow to stormwater inlets in surrounding streets and infiltration. Shallow ground water flow in the area presumably follows surface topography and would thus be to the north-northeast, although there may be local variations. Based on the EDR Geospatial report, soils on the property are mapped as Urban Land, a designation used for areas which have been extensively developed for an extended period and the development has disturbed

the natural soil profile. Chatfield gravelly sandy loam. The property is mapped as being underlain by the clay, silty clay, sand, and gravel of the Upper Cretaceous-aged Raritan Formation.

5.1.3 Property Ownership and Current and Past Property Use

Property Ownership

The property data sheet obtained from the New York City website is provided in Appendix 2. The property data sheet indicates that the Peter Gourfain Irrevocable Trust owns the property. Ms. Gourfain stated Peter Gourfain is her father who passed away in May 2022 and that he had owned the property since 1982. Previous ownership is uncertain. As stated in Section 3.1, a chain of title for the property was not provided to Bison for review.

Current Property Use

Ms. Gourfain stated her father had used the first floor as his art studio and antique storage area and had lived in the apartment on the second floor since he acquired the property in 1982 until he passed away in May 2022.

Past Property Use

Past use of the property based on the review of the Sanborn map report and city directories is discussed below.

A copy of the Certified Sanborn Map Report obtained from EDR is provided in Appendix 3 (note the resolution is reduced to decrease file size of this report). Note the red mark on the maps is placed by EDR to aid in locating the property and does not necessarily directly correspond to the property boundaries. The 1887 Sanborn map, the date of the earliest available map depicting the property, and the subsequent Sanborn maps, depict the current building. The building description on the Sanborn maps is summarized on the table below.

Year	Description
1887 and 1904	The building is split into two sections, each labeled “S” (i.e., an undifferentiated store).
1918	The building is split into two sections, one labeled “auto top and wind shield factory” and the other labeled “S”.
1935	The building is split into two sections, one labeled “A” (i.e., garage) and the other labeled “S”.
1947	The building is split into two sections, each labeled “S”.
1950	The building is split into two sections, one labeled “auto rep” and the other labeled “S”.
1965	The building is labeled “signs”
1977 through 2007	The building is labeled “W” (i.e., a warehouse).

In addition, the 1887, 1904, 1918, and 1935 Sanborn maps show a small building on the eastern end of the property. The building is marked with the symbol for a stable on the 1887 and 1904 Sanborn maps and is labeled “storage” on the 1918 and 1935 Sanborn maps. No items of environmental significance such as symbols for gasoline tanks, areas labeled as hazardous substance storage areas, etc., were identified on the property on the Sanborn maps. No property usage labels indicating uses with inherently significant potential to raise the environmental risk level of the property, such as dry cleaning, chemical manufacturing, service station, etc., were identified on the property on the Sanborn maps.

A copy of the City Directory Abstract report is provided in Appendix 4. Listings for this area of Brooklyn were available for various years dating back to 1928. The listings for 819 Bedford Avenue are shown in the excerpt from the abstract below. None of the listings were obviously for uses that would be expected to have an inherently higher potential to increase the environmental risk level at the property (such as service station, chemical manufacturing, etc.).

819 BEDFORD AVE

<u>Year</u>	<u>Uses</u>
2017	PETER GOURFAIN
2014	PETER GOURFAIN
2009	PETER GOURFAIN
2005	H Gourtain Peter
2004	PETER GOURFAIN
2000	PETER GOURFAIN
1997	GOURFAIN Peter
1994	GOURFAIN, PETER
1992	GOURFAIN PETER
1976	CRUEZ M
1973	Cruezm M
1965	Kilroy For Signs Inc Kilroy Truck Lettering & Spraying
1960	KILROY FOR SIGNS INC KILROY TRUCK LETTERING & SPRAYING Kilroy For Signs Inc Kilroy Truck Lettering & Spraying
1949	Bens Auto Ignition Reprs
1945	Goldberg Louis batry soce LG Batry Co
1940	Handelman A tires
1934	FRIEDMAN HYMAN H
1928	PROGRESS AUTO WRECKING CO

Based on the above, no current or past uses of the property that would have an inherently significant potential to result in a recognized environmental condition at the property were identified during the completion of the Phase 1 ESA. A portion of the building appears to have formerly been used for auto repair and truck lettering. However, there are no indications of underground storage or any lifts with subgrade fluid reservoirs.

5.1.4 Current Environmental Liens and Activity and Use Limitations

No environmental liens or activity and use limitations on the property were identified during completion of the Phase 1 ESA.

5.1.5 Current and Past Surrounding Property Use

The immediately surrounding area is used for residential and commercial purposes (e.g., other warehouses, stores, etc.), as is typical of this section of Brooklyn. The area has been developed and used for similar purposes since at least the 1880s.

5.1.6 Heating, Water Supply, and Wastewater Systems

Natural gas-fired units are used to heat the building. No indications of former oil-heat systems were observed. Remnants of a wood stove were present in the yard area. Ms. Gourfain stated her father occasionally used the wood stove to heat the first floor.

Water supply is via the municipal supply system. Wastewater disposal is via the municipal sewer system.

5.2 Records Review

Results of physical setting sources acquisition and review (e.g., geological maps and topographic maps) are provided in Section 5.1.2. Results of historical use sources acquisition and review (e.g., historic maps and city directories) are provided in Sections 5.1.3 and 5.1.5. Other records reviewed are discussed in the following sections.

5.2.1 State and Federal Databases

A copy of the Radius Map Report obtained from EDR is provided in Appendix 5. The address of 819 Bedford Avenue is listed on one database, as shown in the excerpt from the Radius Map Report below.

<u>SITE NAME</u>	<u>ADDRESS</u>	<u>DATABASE ACRONYMS</u>
LOT 61,TAXBLOCK 1734	819 BEDFORD AVENUE	NY E DESIGNATION

Based on the Radius Map Report, several of the lots on Block 1734 have an E-Designation. The screen shot below from the New York City Office of Environmental Remediation webpage (nyc.gov/site/oer/remediation/e-designation.page) describes the E designation.

The screenshot shows the NYC Office of Environmental Remediation website. The header includes the NYC logo, the text "Office of Environmental Remediation", and links for "Español", "Translate", and "Text-Size". The navigation bar has links for "Remediation", "Community", "Grants", "Safe Land", and "Contact", along with a search bar. Below the navigation bar, there are two buttons: "Voluntary Cleanup" and "E-Designation". The "E-Designation" button is highlighted. The main content area has the heading "E-Designation" and the subheading "What is an E-Designation?". The text explains that a property with an E-designation means that, as a consequence of a zoning action, a property has environmental requirements relating to air, noise or hazardous materials that must be investigated and addressed before an owner can obtain a building permit for the property's redevelopment. It also states that OER manages three E-designations:

- **Hazardous materials:** This will require soil testing, and if contamination is confirmed, a remedial action plan must be approved by OER before development can proceed, and the plan must be implemented to the satisfaction of OER before occupancy is allowed.
- **Noise:** This will require the installation of a specific window/wall attenuation and alternate means of ventilation. A remedial action plan must be approved by OER before development can proceed, and the plan must be implemented to the satisfaction of OER before occupancy is allowed.
- **Air:** This requirement may limit the boiler fuel to natural gas or specify location of the boiler stack. A remedial action plan must be approved by OER before development can proceed, and the plan must be implemented to the satisfaction of OER before occupancy is allowed.

The excerpt from the Radius Map report below shows the property falls into the underground gasoline storage tanks testing protocol, which are part of the hazardous materials category (see screen shot from New York City website below the excerpt from the Radius Map Report).

APPENDIX C. TABLE 1 – CITY ENVIRONMENTAL QUALITY REVIEW (CEQR) ENVIRONMENTAL REQUIREMENTS: (E) DESIGNATIONS						
CITY ENVIRONMENTAL QUALITY REVIEW (CEQR) ENVIRONMENTAL REQUIREMENTS						
Table 1 – (E) Designations						
<p><i>Tax lot</i> changes that may have occurred since the establishment of a particular (E) Designation may not be reflected in this table. If the property in question is located on the same <i>tax block</i> as an (E) designation, review of the related CEQR documentation is recommended. For convenience, for (E) designations applied to a condominium, the condominium billing tax lot number is displayed instead of the individual condominium unit tax lot numbers.</p> <p><i>Application No.</i> – refers to a ULURP or non-ULURP application (containing six numbers followed by a three- or four-letter suffix) for a zoning text map or text amendment, special permit, authorization, or certification or to a Board of Standards and Appeals application (containing the letters "BZ") for a special permit or variance.</p> <p><i>Lot Remediation Date</i> – refers to the date of the duly issued notice from the NYC Office of Environmental Remediation indicating that no investigative/remedial work is required for any current or future development of the lot.</p> <p>* Underground gasoline storage tanks included in category of hazardous materials contamination as of 6/16/94.</p> <p>** Indicates that a tax lot with multiple development sites is partially remediated.</p>						
E-No.	CEQR No.	Description	Tax	Tax Lots	Lot	

The multiple lots on Block 1734 are covered by the E-Designation for underground gasoline storage tanks testing protocol because a gasoline service station formerly existed at the northwest corner of the Block; that former service station has been completely redeveloped into residential and commercial use. This e-designation means that the property would have to go through a testing protocol approved by the city prior to the property being redeveloped. This is a zoning requirement and not a recognized environmental condition at the property, as there is no record of underground storage tanks being present at the property. Given that the actual service station has been redeveloped, it is unlikely any testing the city would require would identify any contamination at the property.

The address of 819 Bedford Avenue is not listed on any of the other databases specified to be searched in the Standard Practice, or on any of the supplemental databases searched by EDR.

Numerous sites in the surrounding area were listed on various databases specified to be searched in the Standard Practice, or on supplemental databases searched by EDR. This is common in heavily developed urban areas. However, based on review of information in the Radius Map Report and from the various NYSDEC websites, these sites are unlikely to result in a recognized environmental condition at the property given their distance from the property, location side or down gradient of the property, case status (e.g., case is listed as closed), nature of the listing (e.g., a no longer regulated hazardous waste generator), or some combination of these facts.

5.2.2 NYSDEC and Local Information

The property is not listed in the Spill Incident, Site Remediation, or Petroleum Bulk Storage databases available on the web site. No information which would raise the environmental risk level of the property was identified during review of the DEC Info Locator website.

Information from the New York City website is discussed in various sections of this report.

5.2.3 Prior Environmental Reports

No prior reports were provided to Bison for review.

5.3 Site Reconnaissance

Findings of the site reconnaissance are discussed below.

5.3.1 USTs, ASTs, and Other Underground Structures

No indications of current or former USTs, such as fill and/or vent pipes, tank manways, feed and/or return lines, tank gauges, or dispenser pumps (or indications of former dispenser pumps) were observed. No ASTs or indications of former ASTs, such as tank pads or tank saddles, were observed. No indications of current or former hydraulic lifts with sub-grade fluid reservoirs, oil/water separators, or any other underground structures were observed.

5.3.2 Suspected PCB-Containing Items

No suspected PCB-containing items, such as liquid-cooled transformers were observed.

5.3.3 Hazardous Substance Use/Hazardous Waste Generation

No containers marked as holding, or having held, hazardous wastes were observed. No hazardous substances were observed.

5.3.4 Discharges

No indications of the material surface discharge or potential discharge of hazardous substances or wastes, such as materially oil-stained/discolored soil, asphalt, or concrete, stressed vegetation, unusual odors, etc., were observed.

5.3.5 Fill Material

No indications of the large-scale placement of foreign fill material were observed.

5.3.6 Pits/Ponds/Lagoons

No open-bottomed pits, lagoons, or similar surface structures used for uncontained waste storage and/or disposal were observed.

5.3.7 Solid Waste Generation

Solid waste is stored in bags put to the curb on the designated pickup day. Observed solid waste was consistent with the property use.

5.4 Non-Scope Considerations

This Phase 1 ESA was not intended to be a full-scale assessment of “non-scope considerations” or “additional considerations” as defined by the Standard Practice including, but not limited to, asbestos-containing materials (ACM), lead-based paint (LBP), wetlands/flood hazards, radon, etc. However, brief review of the below-listed items was conducted.

No friable suspected ACM was observed. Thus, ACM is not of concern.

All observed paint was in good condition. Thus, LBP is not of concern.

Based on the EDR Geotcheck report, there are no wetlands at the property and the property is not in a Flood Hazard Area.

According to the EDR Geotcheck report, Kings County is located within EPA Radon Zone 3 (meaning average radon concentrations are below 2 pCi/L); EPA has three radon zones with 1 being highest risk (average above 4 pCi/L) and 3 being lowest risk (average below 2 pCi/L). Thus, radon is not of concern.

5.5 Interviews

5.5.1 Information Provided by Key Site Manager

Information from Ms. Gourfain is discussed in various sections of this report. In addition, Ms. Gourfain stated the following related to the property (all responses are “to the best of his knowledge”):

- She is not aware of any prior environmental reports on the property.
- There are no environmental liens or Activity and Use Limitations on the property.
- She is not aware of any spills, releases, or environmental cleanups that have taken place at the property.
- She is not aware of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; or (3) any notices from any governmental entity regarding any possible

violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

- She has no specialized knowledge or experience that would provide important information about previous ownership or uses of the property that may be material to identifying recognized environmental conditions.
- She has no information regarding adjoining properties that may be material to identifying recognized environmental conditions.
- There are no obvious indicators that point to the presence or likely presence of contamination at the property.
- She is not aware of any “helpful documents.”
- There is no reduction in value of the property for environmental reasons.

5.5.2 Information Supplied by User

As stated in Section 3.3, as the report is being prepared for a bank as part of a loan for a real estate transaction involving the property, an interview of a specific user of this report is not applicable.

6.0 CONCLUSIONS

Bison has performed a Phase 1 ESA, in conformance with the scope and limitations of ASTM Standard Practice E 1527-13/E1527-21, of the property located at 819 Bedford Avenue in Brooklyn, Kings County, New York and identified as Block 1734, Lot 61. Any exceptions to, or deletions from, the Standard Practice, any limitations of this assessment, and any data gaps, are described in Section 8.0.

This assessment has revealed no recognized environmental conditions, as defined in Section 2.0, in connection with the property. The risk of contamination at the property is so minimal that no further investigation is warranted.

The following four areas/issues of potential concern were evaluated and determined to not represent recognized environmental conditions.

- **Current and Past Uses of Subject Property:** Based on the site reconnaissance and review of Sanborn maps and city directories, no current or past uses of the subject property that would have an inherently significant potential to cause a recognized environmental condition at the subject property were identified during the Phase 1 ESA. A portion of the building appears to have been formerly used for auto repair and truck lettering. However, there are no indications of underground storage or any lifts with subgrade fluid reservoirs.
- **Current and Past Use of Surrounding Properties:** Based on the site reconnaissance and review of the Radius Map Report, Sanborn maps, city directories, and NYSDEC websites, no current or past uses of surrounding properties that would have inherently significant potential to cause a recognized environmental condition at the subject property were identified during the Phase 1 ESA.
- **Presence of Property on E-Designation Database:** As discussed in Section 5.2.1, the property is listed on the E-Designation database, as are most of the lots in Block 1734. The multiple lots on Block 1734 are covered by the E-Designation for underground gasoline storage tanks testing protocol because a gasoline service station formerly existed at the northwest corner of the Block; that former service station has been completely redeveloped into residential and commercial use. This e-designation means that the property would have to go through a testing protocol approved by the city prior to the property being redeveloped. This is a zoning requirement and not a recognized environmental condition at the property, as there is no record of underground storage tanks being present at the property. Given that the actual service station has been redeveloped, it is unlikely any testing the city would require would identify any contamination at the property.

- **Sites in Surrounding Area Identified on Various Databases:** As stated in Section 5.2.1, numerous sites in the surrounding area were listed on various databases specified to be searched in the Standard Practice, or on supplemental databases searched by EDR. This is common in heavily developed urban areas. However, based on review of information in the Radius Map Report and from the various NYSDEC websites, these sites are unlikely to result in a recognized environmental condition at the property given their distance from the property, location side or down gradient of the property, case status (e.g., case is listed as closed), nature of the listing (e.g., a no longer regulated hazardous waste generator), or some combination of these facts.

None of the non-scope considerations addressed (see Section 5.4) are of material concern.

7.0 DECLARATION AND SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

All aspects of this Phase 1 ESA, including the site reconnaissance, data gathering and evaluation, and report preparation, were performed by George Guzdek, PG, General Manager of Bison Environmental, LLC. Mr. Guzdek is a licensed Professional Geologist in Pennsylvania (license # PG000409G), is licensed in UST closure and subsurface evaluation in New Jersey (license # 0010703), has a B.A. in Geology from the State University of New York at Buffalo, has worked in the environmental consulting industry since 1988, and has successfully completed or supervised the completion of over 1,500 Phase 1 ESAs. Based on this education, training and experience, Mr. Guzdek makes the following declaration.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40CFR312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40CFR312.

A professional profile fully detailing my experience and qualifications will be provided to the user of this report upon request.

George Guzdek, PG – General Manager
Bison Environmental, LLC

8.0 DATA GAPS, LIMITATIONS OF ASSESMENT AND EXCEPTIONS TO STANDARD PRACTICE

8.1 Data Gaps

The following data gaps were identified:

- Past owners and operators were not identified to Bison for interviews. It is unlikely former owners and operators would be able to be readily located, and thus information from them would not be reasonably ascertainable. Based on information gathered during other portions of this Phase 1 ESA this is not considered a significant data gap.
- A chain of title was not provided for Bison's review. Based on information gathered during other portions of this Phase 1 ESA this is not considered a significant data gap.
- Due to the limited availability of records such as historic maps and aerial photographs, there are some intervals of past use of the property research that exceed 5 years. Based on the use of the property determined by available records reviewed as part of this Phase 1 ESA, this is not considered a significant data gap.

8.2 Limitations

The following limitations apply to this Phase 1 ESA:

- The findings and conclusions discussed herein are based on conditions as of the date of the site reconnaissance on December 12, 2022. Bison shall not in any way be responsible for changes in site conditions, changes in any local, state, or federal regulations, or changes in the ASTM Standard Practice that occur after this date.
- In preparing this report, Bison has relied upon certain information provided by federal, state, and local agencies and other parties (e.g., EDR) referenced herein and as applicable on information contained in the files of federal, state, and local agencies (including websites) available to Bison at the time of the Phase 1 ESA. Per the Standard Practice Bison has assumed that the information provided is complete and accurate, but that information has not been independently verified. Bison cannot guarantee that information provided by, or available from, others (including regulatory agencies) is complete or accurate and Bison shall not in any way be held responsible for errors or omissions in information provided by others.
- Bison assumes that all people interviewed during the Phase 1 ESA were truthful in their responses. Bison also assumes that other parties would have made all required notifications and disclosures, such as discharge notifications. However, Bison cannot guarantee that other parties have been truthful and that other parties would have made required notifications and

disclosures, and Bison shall not in any way be held responsible for misinformation provided by others, or for the failure of others to make required notifications and disclosures.

- Terms not specifically defined in this report are as used in the Standard Practice.
- Where access to, or visible observation of, portions of the property was unavailable or limited, Bison renders no opinion as to the presence of hazardous materials or petroleum products. In addition, Bison renders no opinion as to the presence of indirect evidence relating to hazardous materials or petroleum products where direct observation of the interior walls, floor, or ceiling of a structure on the property was obstructed by objects or coverings on or over these surfaces.
- The SOW was not intended to determine compliance with environmental laws, as applicable, or to serve as an audit of the present operator's internal practices and compliance therewith associated with worker and community right to know and/or OSHA programs.
- The SOW was not intended to determine what permits, licenses, approvals, or testing may or may not be needed as part of property development, redevelopment, or property renovations. In addition, the SOW was not intended to determine if all required permits, licenses, and approvals were obtained prior to the construction and/or demolition of the current and/or former structures.
- The SOW was not intended to be an assessment of geotechnical suitability of soils and/or fill material at the property.
- The SOW was not intended to be a building condition survey (e.g., assessment of integrity of roofing or structural members, adequacy of electrical service, conditions of utilities, etc.).
- This Phase 1 ESA was not intended to be a full-scale assessment of "non-scope considerations" or "additional considerations" as defined by the Standard Practice including, but not limited to, asbestos-containing materials (ACM), lead-based paint (LBP), wetlands/flood hazards, radon, etc., but only a brief review of the non-scope considerations discussed in Section 5.4.
- No Phase 1 ESA can wholly eliminate uncertainty regarding the potential for environmental concern in connection with a property. The findings and conclusions expressed herein do not entirely rule out the presence of areas of potential or actual environmental concern at the site. The possible presence of unknown USTs can never be completely ruled out. This report is not intended to be a warrant or guarantee of any kind, expressed or implied, that the site is free from contamination.

8.3 Exceptions To, Or Deletions From, Standard Practice

There were no exceptions to, or deletions from, the Standard Practice.

Notes

Mailed to you each January, the Notice of Property Value (NOPV) will tell you our determination of your property's market and assessed values. It will also list the tax exemptions you currently receive and will provide you with a formula to estimate your property tax amount for the coming year.

The NOPV is not a bill and does not require payment.

For help reading and understanding your NOPV, refer to the property tax guides available at <http://nyc.gov/assessments>.

For information about challenging the amount of your assessed value, visit the New York City Tax Commission <http://nyc.gov/html/taxcomm>.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Bison Environmental, LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Exclusive Recovered Govt. Archives

NY RGA HWS..... Recovered Government Archive State Hazardous Waste Facilities List

EXECUTIVE SUMMARY

NY RGA LF..... Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 21 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 08/08/2022 has revealed that there are 10 NY SHWS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/08/2022 has revealed that there are 44 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 28 NY UST sites within approximately 0.25 miles of the target property.

NY CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is

EXECUTIVE SUMMARY

1 NY CBS UST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the NY VCP list, as provided by EDR, has revealed that there are 27 NY VCP sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/08/2022 has revealed that there are 21 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 100 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there are 4 PFAS ECHO sites within approximately 0.25 miles of the target property.

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 5 EDR MGP sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NASSAU GAS	SKILLMAN AVE	NW 0 - 1/8 (0.116 mi.)	M162	363

BU-NASSAU BRANCH	KENT AVE AND CROSS,	NW 1/2 - 1 (0.913 mi.)	432	1405

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 5/12/04 - AUSTIN - TRANSFERRED FROM MULQUEEN TO TIPPLE - END 8/23/05 - Raphael Ketani. Case transferred to Jeff Vought. 7/23/09- File Review by Intern EM Ibeh. The file being reviewed in SP# 9605522, PIN# 94724, spill date 7/30/96 on 823 Bedford Ave, Williamsburg, Brooklyn. Caller remarks from Spill report states that owner put 55gal. drum of oil out in the street that tipped over spilling oil. A search of PBS tank registrations produced 15 tanks below 1100gallons for the property with PBS# 2-322148 that were removed in 1993. No spills were found. Owner type as per PBS printed 7/30/96 is listed as corporate/commercial and the operator is listed as Fredrick Freedman with address below: Adfreed Oil Co. Inc 823 Bedford Ave Brooklyn NY 11205 P. 718.855.0512 Pictures taken on the day of the spill show a cordoned area of the sidewalk of the affected building and beyond it, covered in layer of sand and a drum of oil in front of the building on a patch of oil-stained concrete. 7/30/96: Letter from DEC to Milro Associates, Inc authorizing them to transport 7 drums of non-hazardous petroleum contaminated soil to their facility for proper storage until laboratory analysis of samples collected are performed and proper disposal arrangements made. 2 Non- hazardous waste manifests showing disposal of non-hazardous absorbents (speedy-dry sand and pads). 7/30/96- ISR to Bureau of Spill Response. 8/21/96- EcoTest Laboratories soil sample analytical report: Oil sample extracted and analyzed on 8/01 contained low viscosity lubricating oil, gasoline, kerosene and fuel oil analyzed by NYSDOH Method 310.13. Soil sample extracted 8/06 and analyzed 8/07 contained <5000ppm kerosene and fuel oil, low viscosity lubricating oil analyzed by NYSDOH Method 310.13 and no presence of gasoline. Petroleum products were not broken down into their respective constituent compounds for comparison by TAGM cleanup objectives. Oil sample analyzed contained heavy metals in minimal concentrations, <2.5ppm, except for Chromium and Lead, which were 3.6ppm and 3.8ppm respectively. Oil sample analyzed thereafter contained 1.6ppm Cr and 0.47ppm Pb with Aroclor, analyzed by EPA Method 608, at <5ppm. 8/22/01- Initial Demand letter from NYSOAG to Mr., Lazar Mauskopf of 683 Bedford Ave, Brooklyn re: 823 Bedford Ave, Brooklyn stating that the State has determined him liable for the cleanup and removal costs incurred by the New York Environmental Protection and Spill Compensation Fund. 8/22/01- Initial Demand letter from NYSOAG to A&M Baking Goods, Inc, 683 Bedford Ave, Brooklyn re: 823 Bedford Ave, Brooklyn stating that the State has determined them liable for the cleanup and removal costs incurred by the New York Environmental Protection and Spill Compensation Fund. 7/30/09- As per Bechard of OAG, the responsible parties were Lazar Mauskopf and A&M Baking Goods of 683 Bedford Ave, Brooklyn settled in 2002 and all costs to the spill fund were covered. 08/17/09-Vought-Vought and Ibeh reviewed site with DEC Austin and spill closed as spill was on concrete sidewalk and on concrete in basement (as per photographs and ISR) and spill cleaned by state contractor including application and recovery of absorbents. Ibeh spoke with NYSOAG Bechard and NYSOAG settled with responsible party (A&M Baking Goods). Spill closed by Vought. Need for final ISR

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact Name: MATT BUTLER
DEC Memo: "2/17/2017 - Feng - Duty Desk. Spoke to Matt Butler of SpeedWay (732-738-2924, MButler1@SpeedWay.com). SpeedWay is selling the property and is removing the entire PBS system. Contaminated soil was found in the fillport area. At this time, the pipes and dispensers were removed and no contamination has been encountered. (4) tanks have been removed so far and the process still ongoing to remove the rest. No problem in these areas except the fillport. They will excavate the contaminated soil in the fillport area as much as possible and will collect endpoint samples. Not known the future use by the new owner, but probably would know when the closure report is submitted. No vapor complaints so far, not hear anything from their contractors. They liveloaded/stockpiled the soil generated. The stockpiled will be covered with plastic and will be disposed offsite very soon. Planned to finish the work, i.e. tanks system removal and over-excavation by next week. A Tanks Closure report will be submitted to DEC spill response and PBS. Informed Matt that the spill is transferred to K. Patel, the runner of the day. Discussed with K. Patel and J. Vought. spill to be assigned to K. Patel. 2/21/2017 - Feng - Sent SpeedWay CSL requiring the removal of the contamination

01/14/1991 as gasoline tank failed a test due to leak at nipple
connected to the tank. case closed. spill #: 9200519 was reported on
04/14/1992 as gasoline tank failed due to loose coupling. case
closed. spill #: 9506480 was reported on 08/25/1995 due to findings
of soil contamination during tank upgrade. total of forty-four (44)
tanks (36 - 550 gal tanks, 4 - 4,000 gal tanks, 2 - 2,000 gal tanks,
1 - 1,000 gal tank and 1 - 550 gal tank) were removed. total of 1,400
tons of contaminated soil was removed and groundwater monitoring
wells were installed for remediation. case closed. spill #: 0307159
was reported on 10/07/2003 as 50 gal gasoline spilled possibly due to
overfill. case closed and merged with spill #: 9506480. Speedway LLC.
property owner 105 Fieldcrest Ave., 5th Floor Suite 505 Edison,
NJ 08837 Attn. Matthew Butler Ph. (732) 738-2924 (732) 306-2751
email: mbutler1@speedway.com 03/09/17-Hiralkumar Patel. received
email from Joseph Rennie (at 5:06 PM on 03/08/17) from Envirotrac
including link to tank closure report. abstract: - removed five (5)
4,000 gal double-walled fiberglass gasoline USTs and one (1) 600 gal
double-walled fiberglass waste water UST - USTs appeared in good
condition, with no visible holes observed - endpoint soil samples of
the UST excavation were collected from the sidewalls of the
excavation at approx. 12 ft bg - PID readings of sidewall samples
collected ranged from 0 ppm at several sidewall sampling locations to
1,283 ppm at SW-5 - holes were chipped through a concrete slab to
collect bottom samples ----- - bottom soil samples from
underneath the former USTs were collected at approx. 15-16 ft bg -
PID readings of bottom samples collected ranged from 0.1 to 5.6 ppm -
removed all vent lines, product dispenser islands along with
dispensers and associated product lines were removed - small area of
impacted soil, with PID reading of 17.8 ppm, was observed beneath
dispenser island #3 - endpoint soil samples were collected from
beneath the five former dispensers - endpoint soil samples were
collected from product line trenches beneath elbows, tees, and along
product lines at approx. 15 ft increments - endpoint soil samples
were collected from vent line trenches approx. 24 ft apart - total of
130.95 tons of pea gravel and soil were removed - only areas of soil
impact that were observed were beneath dispenser island #3 and under
the former remote fills along the north sidewall of the excavation
and both areas were over-excavated to remove impacted soils - limited
area of petroleum impacted soil remains in the area between the
sample location SW-5 and the sidewalk - proposed future development
plans for the property includes the construction of a six-story mixed
use building with a basement that will cover the entire site. the
property is anticipated to be used for commercial/retail and
residential use - proposed deed restriction to limit use of the
ground floor and any subsurface floors to commercial/retail use, with

residential use only on the upper floors; and installation of a vapor barrier and vapor mitigations system - found contamination in endpoint sidewall sample SW-5 only soil analyticals (ppb):
-----SW-5 12 ft
Benzene-----180* Toluene-----1,380
Ethylbenzene-----4,330 Xylene-----31,400
1,2,4-Trimethylbenzene-----32,700 1,3,5-Trimethylbenzene-----11,000
Naphthalene-----4,580 * - higher MDL reviewed quarterly report from EnviroTrac under spill #: 9506480. multiple on- and off-site monitoring wells were installed. the nearest well to endpoint sidewall sample SW-5 was MW-10, which was within 15 ft distance. based on groundwater flow direction, well MW-7 on north sidewalk of Park Ave was located in downgradient position from endpoint sidewall sample SW-5. based on quarterly monitoring data, no contamination was found in groundwater samples from MW-7 or MW-10.
1:25 PM:- left message for Matt. 03/10/17-Hiralkumar Patel. 9:12 AM:- sent email to Matt. asked him to provide details about site developer, detailed development plans including vapor mitigation methods and status on deed restriction. email copied to Joe.
03/15/17-Hiralkumar Patel. received message from Matt (at 10:25 AM on 03/14/17). 11:11 AM:- left message for Matt. 03/16/17-Hiralkumar Patel. 11:04 AM:- received call from Matt. he mentioned that currently they have signed contract for property sale and buyer is planning to build a mixed use building. Matt mentioned that property sale could occur by first week of April. asked him to provide new owner's contact info, once property is transferred. Matt mentioned that due to 'e' designation on property, buyer is already in contact with OER. Matt inquired if a new spill number is needed for previously known groundwater impact noted during investigation under 'e' designation. informed him that the subject spill case will be kept open and no need for new spill number, unless new information found at the site. 05/12/17-Hiralkumar Patel. 12:54 Pm:- received email from OER Shaminder including OER comments on DRAFT RIR. 06/01/17-Hiralkumar Patel. downloaded work plan/reports from NYC OER EPIC. as per Phase I dated Nov. 2016, site has been developed since at least 1887 when it was developed with a two-story residence on the north side of the property, a shed on the northeast corner, and a three-story residence on the southwest corner of the site. the central portion of the site was undeveloped at this time. by 1904, the site was subdivided into five separate tax lots with one two-story residence, and four 4-story mixed use buildings present along Bedford Ave and Park Ave. by 1947, the two-story residence on the southwest corner of the site was no longer present and the four-story mixed use buildings along Bedford ave were now vacant. by 1950, there were four single-story buildings present along Bedford and Park Ave with parking on the east side of the site. the site remained generally unchanged inn 1965 except the south side of the site was used for tire storage and southwestern most building along Bedford Ave was occupied by a church. by 1977, the site was redeveloped into a filling station with a single-story building present on the southeast corner and a tank field present on the southwest corner of the site along Bedford Ave. summary of Phase II report dated 01/20/2017: - three soil borings (SB1 through SB3) were installed to a depth of 25 ft bg - below the asphalt pavement, the onsite soil consisted primarily of brown silty sand with some gravel and large cobbles which were intermittently encountered from the surface to 20 ft bg - some pockets of soil with red brick and/or

GAS STATION (Continued)

S120700581

glass fragments were observed in soil from the surface to approx. 10 ft bg - no visual or olfactory evidence of contamination was detected in any of the samples collected - depth to groundwater at the site was approx. 22 ft bg - due to no evidence of contamination, soil samples were collected from shallow (0-5 ft) interval and at the water table interface (20-25 ft) - minor VOCs (less than 135 ppb total BTEX) noted in deeper soil samples summary of RIR dated May 2017: - site is currently vacant but was occupied by a gasoline filling station as recently as Feb. 2017 - the onsite buildings, structures, pump islands, USTs and the piping associated with tank and pump islands were removed between Feb. 13-22, 2017 - proposed future use of the site will include a new 6-story mixed use commercial and residential building with a full cellar - cellar will consist of commercial space and residential accessory space - first and second floor will consist of commercial space, residential space and parking space - third to sixth floor will consist of residential space - cellar level will require excavation to 10.5 ft bg throughout the entire site. additional excavation will be required for the installation of footers and an elevator pit - elevation of the site is approx. 26-28 ft above mean sea level - installed eight (8) soil borings (SB1 through SB8) to a final depth of 10-15 ft bg - stratigraphy of the site generally consists of brown sandy-silty fill material from the surface to 4-8 ft bg followed by gravelly, silty sand mixtures to a depth of at least 15 ft bg - large concrete pad was encountered at approx. 12-13 ft bg below the former tank storage area on the north side of the site - large cobbles or bedrock was encountered at approx. 10-12 ft bg on the southeastern portion of the site - two soil samples were retained from each soil boring representing the shallow 0-5 ft interval and deep 8-10 ft interval except for at SB5 where the deeper interval soil sample was collected at 9-12 ft - sixteen (16) soil samples and one (1) duplicate soil sample were collected - minor VOCs noted in soil samples: max. 1,430 ppb total BTEX in 0-2 ft bg in SB8 - three (3) 1-inch temporary well points (MW1 through MW3) were installed - well MW1 was installed to a depth of 30 ft bg, with screen from 20 to 30 ft; groundwater found at 26.49 ft bg - well MW2 was installed to a depth of 25 ft bg, with screen from 15 to 25 ft; groundwater found at 24.68 ft bg - well MW3 was installed to a depth of 30 ft bg, with screen from 20 to 30 ft; groundwater found at 26.08 ft bg - groundwater flows to the north-northwest - no free phase product was observed within the three monitoring wells - three (3) groundwater and one (1) duplicate sample were collected - contamination noted in groundwater samples groundwater analyticals (ppb):

-----MW2-----MW3
Benzene-----430
Ethylbenzene-----620-----65
Xylene-----670
1,2,4-Trimethylbenzene-----860-----27
1,3,5-Trimethylbenzene-----430-----49
Naphthalene-----900-----180 - installed six (6)

soil vapor implants (SV1 through SV6) to a depth of 10 ft bg - collected soil-vapor samples from five soil-vapor probes (SV1, SV3, SV4, SV5 and SV6) - soil vapor sample from SV2 could not collected because the vapor point flooded - minor VOCs (less than 100 ug/m3) and CVOCs (less than 8 ug/m3) noted in soil-vapor samples 06/02/17-Hiralkumar Patel. 2:56 PM:- discussed with DEC Vought and OER Shaminder. as site had multiple motor fuel tanks in past and

S120700581

impact noted in groundwater at downgradient corner of the site, there is possibility of soil contamination on-site from historical use. Shaminder mentioned that OER has asked installation of 20 mil vapor barrier underneath the site. need to discuss vapor mitigation efforts with NYSDOH. Robert M. Bennett Environmental Business Consultants Ph. (631) 504-6000 Ext. 116 (631) 626-1702 (C) Fax (631) 924-2870 email: rbennett@ebcincny.com 6/5/17-Vought-Assisting DEC Patel with spill. Vought called to discuss site with NYSDOH Walz and NYSDOH Walz out of office for next two days. Due to scheduled meeting with OER and developer today, Vought discussed site conceptually with NYSDOH Hughes. Vought discussed development plans (foundation slab with vapor barrier, clean soil samples from removal of most recent tank system, groundwater concentrations most likely within natural attenuation ranges, presence of at least 36 550-gallon USTs as per PBS for which there is no assessment data on file, and fact that groundwater was contaminated and as such there must be soil contamination somewhere on site as there was a pathway for which soil contamination affected groundwater to also become contaminated). NYSDOH Hughes agreed that either a passive SSDS (with future SVI study) or active SSDS be proposed as part of development. Vought called OER Chawla and informed him of same and OER Chawla will let developer know that either a passive SSDS with SVI or active SSDS must be included in work plan. OER Chawla also to indicate that DEC may require additional sidewalk well installation. Vought communicated same to DEC Patel. 06/05/17-Hiralkumar Patel. 10:45 AM:- received email from OER Shaminder. he discussed with developer who agreed with following remedy: - excavation of entire property to 12 ft bg - minimum 20 mil vapor barrier - installation of an active SSDS - additional groundwater monitoring well in the sidewalk to monitor natural attenuation 1:20 PM:- sent email to OER Shaminder including a site map with two proposed well locations. informed him that these wells are needed to monitor groundwater down gradient of former endpoint sidewall sample SW-5 and monitoring well MW2. email copied to DEC Vought, DOH Nathan and OER Horace. 06/13/17-Hiralkumar Patel. received email from OER Shaminder (at 12:49 PM on 06/12/17). he mentioned that proposed RAWP includes the following: - Track 4 excavation entire property to 10.5 plus feet - two new monitoring wells for future monitoring as required by DEC - vapor barrier - composite cover; and - active SSDS as required by NYSDOH 07/11/17-Hiralkumar Patel. downloaded final RAWP and RAWP Stipulation List from OER EPIC. the entire site will be excavated to a depth of 10.5 ft bg and fifteen (15) endpoint samples will be collected for lab analysis. remedial action under the subject spill will consist of installation and monitoring of off-site groundwater wells. these off-site wells will be installed after building demolition and wells will be monitored quarterly. an active SSDS and 20-mil thick vapor barrier will be installed beneath the building. 2:21 PM:- sent email to OER Shaminder and asked him to inform once the on-site building is demolished and off-site wells are installed. email copied to OER Horace. 09/18/17-Hiralkumar Patel. received email from OER Horace (at 12:17 PM on 08/30/17) including copy of email from Robert dated 08/25/17. Robert mentioned that they encountered some material from the northeast corner of the site that had elevated PID readings (100-400ppm). the material was not heavily impacted, there was no staining or significant impacts detected; only elevated PID readings and slight odors. EBC collected waste characterization samples to finalize disposal facility as current disposal facility does not

S120700581

accept soil with more than 50 ppm on PID. 09/26/17-Hiralkumar Patel. 8:58 AM:- received email from Robert. he mentioned that they noted some deep petroleum impacts on the southwest corner of the site which extends below the proposed bottom of excavation. the proposed bottom of excavation is 12 feet below grade and impacts were encountered as deep as 22-24 ft and they appear to extend deeper. additionally, groundwater is present at approximately 24.5-26.5 ft below grade and impacts likely extend to the water table. due to the vertical depth of impacts, Robert proposed minor changes to the Remedial plan to address the impacts. he plans to use oxidant treatment to the open excavation, backfilling with clean soil after removing a bulk of impacted soil and installing a permanent monitoring well to observe the effectiveness of oxidant treatment/bulk removal and to monitor trends over time. 9:42 AM:- sent email to Robert and asked him to submit site map with approx. location where contamination noted. email copied to OER Horace. 10:25 AM:- received email from Robert including a site map which shows area of contamination in southeast corner, but previous email stated contamination noted in southwest corner. 1:47 PM:- sent email to Robert and asked him to confirm where deeper contamination noted: southwest or southeast? email copied to OER Horace. 1:52 PM:- received email from Robert confirming that deeper contamination noted in southeast corner of the site. 09/27/17-Hiralkumar Patel. 8:40 AM:- visited site and met Rob, James Bellew and Tovia Kohn. the north half section of the site has been dug down to 12 ft depth. Rob mentioned that during work, they noted some contamination in west-central section (not southeast or southwest as previously mentioned) of the site. they noted contamination to a depth of approx. 22 ft bg, but no samples were collected. asked Mr. Kohn to delineate contamination prior to any comments on remediation/monitoring plan. Tovia Kohn **construction manager** Ph. (917) 624-0299 email: tovia@prestigenyllc.com James Bellew Ramboll Environ **2nd env. contractor working at site** Ph. (973) 286-4277 (347) 640-2759 email: jbellev@ramboll.com 12:27 PM:- sent email to Rob and asked to confirm location where deeper contamination noted. email copied to OER Horace and James. 12:40 PM:- received email from Rob. he confirmed that deeper contamination was noted in west-central section. he will send a delineation plan (including installation of soil boring and well) tomorrow morning and delineation work will occur on 09/29/17. 09/29/17-Hiralkumar Patel. received email from Rob (at 4:44 PM on 09/28/17) including a site map with proposed delineation boring/well location. Rob proposed to install one well MW-5 in west-central portion. more borings will be installed if impact noted during installation of MW-5. Rob proposed to analyze samples for VOCs. 8:37 AM:- left message for James and informed him that soil samples must be collected for analysis during boring installation. 8:39 AM:- sent email to (and left message for) Rob and informed him that soil samples must be collected for analysis during boring installation. email copied to James. 8:49 AM:- sent email to Rob and asked him to analyze samples for VOCs and SVOCs. 10:01 AM:- received call from Rob. he confirmed that samples will be collected for VOC/SVOC analyses. asked Rob to also collect soil samples from borings with evidence of contamination to document subsurface condition. 10/17/17-Hiralkumar Patel. received email from James (at 11:40 AM on 10/16/17) including investigation report. summary: - subsurface soils at the site consist of brown sandy-silty fill material from the surface to a depth of about 4-8 ft bg. gravelly, silty-sand is present immediately below this layer to at

Naphthalene-----470 received message from Ed Russo (at 2:37 PM on 10/16/17) from EnviroTrac. 1:41 PM:- left message for Ed. 2:07 PM:- spoke with James. he mentioned that based on investigation results, property owner has decided to excavate remaining contamination and collect endpoint samples. the newly installed well MW-5 will be re-gauged for any product. informed James that remediation in the area of MW5 will be managed under the subject spill case. 2:10 PM:- spoke with Ed and informed him about discussion with James. 11/07/17-Hiralkumar Patel. 2:10 PM:- sent email to James, Rob and Tovia and asked them about updates on remediation of soil contamination noted around well MW-5. 11/14/17-Hiralkumar Patel. 8:08 AM:- received email from James. he mentioned that Speedway will submit document soon. 11/21/17-Hiralkumar Patel. 3:16 PM:- received email from Joseph Rennie (joer@envirotrac.com) from EnviroTrac including a spill closure request report link. report summary: - site development activities included removal of soil across the site to the depth of the proposed building basement (approx. 12 ft) - total of 1,698 tons of petroleum hydrocarbon contaminated soil from the most recent UST system was segregated and disposed by Speedway - additional soil was excavated to depths of 20 ft and 26 ft bg as per site map, 25 ft by 38 ft area around well MW5 was excavated and endpoint sidewall samples were collected at 20 ft depth and bottom sample was collected at 26 ft depth. no contamination noted in endpoint samples. as per chain-of-custody, endpoint samples were collected on 10/18/17. 11/30/17-Hiralkumar Patel. 9:13 AM:- spoke with Rob at EBC. he mentioned EBC managed soil removal in the area of MW5. there was no groundwater noted in the excavation. the well MW5 was not gauged during excavation activities. Rob mentioned that they have asked construction crew not to destroy well MW5 and planning to keep well in foundation. asked Rob to gauge and sample well MW5 and based on groundwater sample result, the department may require installation of a third off-site well (two off-site wells were required to monitor groundwater based on previous sampling results) and closure of well MW5 to prevent penetration through the vapor barrier. Rob mentioned that they tried to install previously approved off-site wells, but there is space restriction due to ongoing construction activities. off-site wells will be installed, when

S120700581

possible. 12/08/17-Hiralkumar Patel. 11:28 AM:- received message from Joe Rennie from EnviroTrac. 12:25 PM:- spoke with Joe. he inquired about spill closure based on results of endpoint samples collected from excavation in area around well MW5. informed Joe that the subject spill case will not be closed at this time as the Department requires groundwater monitoring via installation of off-site monitoring wells based on endpoint sample results after removal of motor fuel tanks and results of remedial investigation (report dated May 2017). also informed him that EBC had submitted a RAWP (dated June 2017) including installation of two monitoring wells for future monitoring, vapor barrier and an active SSDS. 02/28/18-Hiralkumar Patel. 9:58 AM:- received email from Edward Russo from EnviroTrac with groundwater investigation work plan proposing 1) installation of two (2) 2-inch diameter wells with 15 ft of screen, 2) collection of soil samples during well installation from highest PID and deepest dry, and 3) collection of groundwater samples, for two quarters, from one existing and two new wells for VOC analysis only. based on results of previous sampling, groundwater sample analysis for VOCs only is acceptable, but the work plan needs to be revised as the proposed wells are across the street and between 50 and 100 ft away from the site. wells should be installed on sidewalk adjacent to the site. 1:21 PM:- sent email to Ed and asked him to submit a revised work plan including proposed wells on sidewalk adjacent to the site. also asked him to include location of existing well on the map. email copied to John Engdahl (jjengdahl@speedway.com) and Joe (EnviroTrac). 2:09 PM:- received email from Ed. he mentioned that due to ongoing construction, a construction fence takes up a good portion of the sidewalk. in addition, a canopy is installed over the sidewalk to protect pedestrians during construction. as a result, drilling on the site (south) side of Park Avenue isn't possible at this time. 2:10 PM:- received call from Ed and Joe from EnviroTrac. Ed mentioned that due to sidewalk canopy as part of site's redevelopment, they won't be able to install wells on sidewalk along the site for another year. Joe also mentioned about previous spill closure based on historical groundwater data. prior to finalizing further requirements, suggested them to collect another groundwater sample from well MW5. Ed agreed to that and will collect groundwater sample from existing well MW5. 03/30/18-Hiralkumar Patel. 8:49 AM:- sent email to Ed inquiring update on GW sampling from existing well MW-5. email copied to John Engdahl (Speedway) and Joe (EnviroTrac). 04/12/18-Hiralkumar Patel. 10:32 AM:- spoke with Joe. he mentioned that the monitoring well MW-5 has been removed during construction activities. 05/03/18-Hiralkumar Patel. 12:43 PM:- spoke with Rob. he mentioned that building structure has been constructed, but cellar floor foundation has not been poured yet. they recently excavated last section. entire site has been dug down to 12 ft bg. vapor barrier has been installed behind foundation wall and supporting columns. horizontal portion of vapor barrier and SSDS will be installed beneath cellar floor in near future. no petroleum contamination found in 14 endpoint soil samples collected at the site. Rob mentioned that EnviroTrac will install proposed monitoring wells. during investigations since Feb. 2017, petroleum contamination was noted in endpoint sidewall sample SW-5, northeast corner (well MW-2) and west-central (MW-5) section of the site. groundwater flows to the north. during remediation under spill # 9506480, 1) well MW-10 was installed in close proximity to sample location SW-5 and well MW-7 was installed across Park Ave, downgradient of SW-5, 2) wells MW-6 and MW-9 were installed in

S120700581

northeast area and well MW-8 was installed across Park Ave, downgradient of NE corner of the site, and 3) wells MW-4, MW-11 and MW-10 in northwest corner of the site were downgradient of recent well MW-5. based on site maps and results of endpoint samples after removal of recent tank systems in Feb. 2017, contamination noted in MW-5 area could be result of leak from old 550 gal tank systems which were removed in 1995. site maps indicates presence of former remote fills in NE corner of the site, but those tank systems were removed in 1995. fill ports for recent tank systems were adjacent to the tanks. results of groundwater samples from previous wells MW-4, MW-6, MW-7, MW-8, MW-9, MW-10 and MW-11 shows less than 250 ppb of total BTEX after Oct. 2011. spill # 9506480 was closed on 03/21/14. based on review of all available information, previously proposed monitoring wells are needed to monitor groundwater condition adjacent to the site. previously, EBC proposed installation of two wells, but a third well is also needed to monitor condition noted in area of MW-5. 1:11 PM:- left message for Ed. 05/04/18-Hiralkumar Patel. 11:26 AM:- received message from Joe from EnviroTrac. 05/07/18-Hiralkumar Patel. 9:02 AM:- spoke with Joe and informed him that the Department requires groundwater monitoring/sampling via installation of minimum of three permanent wells: one well near the northeast corner of the site (on south sidewalk of Park Ave), one well at intersection of Park Ave and Bedford Ave (south sidewalk of Park Ave) and one well on west side of the site (on east sidewalk of Bedford Ave). Joe mentioned that EnviroTrac (on behalf of Speedway) will install required monitoring wells once on-site scaffolding are removed and then EBC (on behalf of property owner) will monitor/sample these wells. a revised work plan will be submitted for review. 05/15/18-Hiralkumar Patel. received email from Ed (at 10:43 AM on 05/14/18) including a revised work plan. - three (3) 2-in dia. off-site monitoring wells will be installed with a 15 ft of screen that will bridge the water table (noted approx. 20-23 ft bg) - wells will be installed after removal of sidewalk scaffolding/safety canopies - soil samples will be collected from highest PID and deepest dry interval, and analyzed for VOCs CP-51 list - groundwater samples will be collected and analyzed for BTEX/MTBE - wells will be surveyed - a report will be submitted after monitoring/sampling of three wells for two quarters 793-801 Bedford Realty LLC. **property owner** c/o The Jay Group Inc. 199 Lee Avenue, Suite 211 Brooklyn, NY 11211 Attn.: Joel Kohn PH. (718) 963-0536 (347) 578-3749 email: joel@jaygroupny.com 05/16/18-Hiralkumar Patel. 9:03 AM:- sent letter to Mr. Butler and Mr. Kohn approving groundwater investigation work plan dated 05/14/18. letter emailed to Mr. Butler, Mr. Kohn, OER Shaminder, Ed and Robert. 08/13/18-Hiralkumar Patel. received email from Ed (at 3:35 PM on 08/10/18) stating that drilling/well installation work is scheduled for August 13 through August 16. 08/29/18-Hiralkumar Patel. 10:15 AM:- spoke with Robert. he mentioned that Speedway has installed monitoring wells. 10/22/18-Hiralkumar Patel. 2:04 PM:- sent email to Ed inquiring update on groundwater investigation report. email copied to OER Shaminder, Mr. Kohn, John Engdahl (jjengdahl@speedway.com) and Joe Rennie (joer@envirotrac.com). 10/23/18-Hiralkumar Patel. received email from Ed (at 5:27 PM on 10/22/18) stating that 2 rounds of groundwater sampling will be conducted from the newly installed wells prior to report submission. the 1st round of sampling was completed in September and the 2nd sampling event is scheduled for December. 03/27/19-Hiralkumar Patel. 8:45 AM:- sent email to Ed inquiring

update on groundwater investigation report. email copied to OER Shaminder, Robert (EBC), Mr. Kohn, John (speedway) Joe (EnviroTrac). 03/28/19-Hiralkumar Patel. received email from Ed (at 4:03 PM on 03/27/19) including subsurface investigation/spill closure report. summary: - in Aug. 2018, three (3) off-site wells (MW-1A through MW-3A) were installed - found signs of contamination (PID/olfactory) near water table in wells MW-1A (which is closer to previous on-site well MW5; 804.7 ppm on PID) and MW-3A (near site's northeast corner and former on-site well MW2; 871.2 ppm on PID) - based on field observations, soil samples were collected at groundwater interface (highest PID) from three wells; an additional soil sample from 9-11 ft interval collected from MW-2A - collected three groundwater samples in Sept. 2018 and also in Dec. 2018 - soil samples were analyzed for VOCs only - groundwater samples were analyzed for BTEX + MTBE only - found some VOC contamination in soil sample at groundwater interface from MW-3A (3,650 ppb total BTEX, max. 4,790 ppb 1,2,4-Trimethylbenzene) - found some contamination in groundwater sample from MW-3A (3,833 ppb total BTEX in Sept. 2018 and 1,625 ppb total BTEX in Dec. 2018) EnviroTrac requested spill closure based on: - historical groundwater monitoring data under spill #: 9506480 - removal of tank system and 130.95 tons of soil during tank removal in Feb. 2017 - removal of 9,055.3 tons of soil from the site during redevelopment activities, leaving no source soils for any future groundwater impacts - deed restriction limited use of the ground floor and any subsurface floors to commercial/retail use, with residential use only on the upper floors - property deed required installation of a vapor barrier and vapor mitigation system 9:32 AM:- sent email to Ed/Robert. informed them that no further investigation/remediation is required at the site based on review of all available information. also informed them that the spill case will be closed upon receipt of a RAR (including details about installation of vapor barrier and an active SSDS). email copied to OER Shaminder, Brian Davis (bcdavis@speedway.com), joel@JayGroupNY.com and Joe. 05/21/19-Hiralkumar Patel. 1:04 PM:- received email from OER Shaminder including link to RAR. site development includes construction of a 6-story mixed use building with a full cellar. the entire site footprint was excavated to 12 feet bgs. the cellar of the new development include office space, storage and utilities. remedy included: - excavation and removal of soil exceeding Track 4 Site-Specific SCOs to a depth of 12 below grade. additional excavation was performed to 15 feet for the elevator pit - excavation and removal of petroleum hotspot (DB-1) - removal of 6 underground storage tanks (five 4,000-gallon and one 600-gallon) - collection and analysis of 15 end point samples (some contamination was noted in endpoint sample EP-8, but no further remediation is needed based on result of endpoint soil/groundwater samples collected from nearby area of DB-1) - installation of a vapor barrier system - construction of a composite cover consisting of a 6-inch thick concrete building slab - installation and operation of an active SSDS - deed Restrictions - E Designation for future permits - site management plan that includes 1) operation and maintenance of engineering controls (composite cover, vapor barrier, SSDS), 2) periodic inspections of institution controls and engineering controls, and 3) certification of engineering and institution controls (yearly report submission including results of inspections and monitoring well sampling) 05/22/19-Hiralkumar Patel. 10:20 AM:- sent email to OER Shaminder and informed him that case can be closed

unless NYSDOH requires any indoor air sampling/SSDS monitoring. email copied to DOH Nathan and OER Hanna. 10:31 AM:- spoke with OER Shaminder about proposed monitoring well sampling as part of site management plan. Shaminder mentioned that they require site management plan only for vapor mitigation components (vapor barrier/SSDS) and does not require groundwater sampling. inclusion of groundwater sampling in site management plan is incorrect and he will send a revised site management plan (or an email) confirming this change. 11:08 AM:- received email from DOH Nathan confirming no further requirements. 05/29/19-Hiralkumar Patel. 10:45 AM:- received email from OER EPIC including a copy of Notice of Satisfaction issued by NYCOER. 1:02 PM:- sent email to OER Shaminder and asked him to submit a revised site management plan. 06/04/19-Hiralkumar Patel. received email from OER Shaminder (at 10:13 AM on 06/03/19) including link to RAR with revised SMP. revised SMP states that three on-site wells will be closed and abandoned. case closed based on review of available information."

Remarks: "unknown amount spilled. clean up is on going."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was
SUN 1/12/06: Reviewed the third triannual 2005 update report dated
1/9/06. Samples taken on 11/18/05. Max BTEX 680ppb (MW5), max MTBE
120 ppb (MW6). Plume located on northern corner of the property and
no off-site delineation. Sent off-site delineation required letter.
1/26/05: 1/25/06 meeting with Quantum, NYSDEC, and ET. We will wait
one more quarter to investigate the peak in concentration in MW-5 and
MW-6. 6/5/06: Received first triannual update report. ORC socks
installed in MW 5 and 6 on 2/24/06. Max BTEX 328 in MW5, max MTBE 85
in MW6. Depth to water 21-25 ft. Closure was requested. 8/28/06:
Reviewed March - June 2006 update report. Wells sampled on 6/15/06.
Large increase in BTEX concentration in MW5. Max BTEX 1180 in MW5,
max MTBE 165 ppb in MW5. ORM socks will be replaced in August 2006.
9/27/06: Spill 06-01468 was opened on the property directly
downgradient, 791 Bedford Avenue. Sent letter to Hess requesting
additional delineation downgradient of the site due 11/29/06.
11/2/06: Spill 0601468 was consolidated with this spill. Residual
BTEX contamination remains on 791 Bedford Avenue. 12/18/06: Emailed
Hess to followup on status of off-site delineation. Received email
from Hess: Hess requests that the DEC provide all available
information including analytical results, sampling depths and
locations, figures and reports related to the off-site contamination
observed on the auto yard property. The information is necessary to
evaluate potential off-site delineation. 1/17/07: Meeting on 1/16/07
with Hess, Delta, NYSDEC. A FOIA request was submitted for
downgradient spill. 1/23/07: Received update report. Wells sampled on
10/2/06. Max BTEX 354 ppb (MW5), max MTBE 54 ppb (MW5). ORC socks in
MW 5 and 6. Triannual sampling. 2/22/07: Received email from Aaron:
We are still awaiting FOIA response from our January 12th request.
4/26/07: Received update report. Wells sampled on 2/23/07. Max BTEX
755 ppb (MW5). Max MTBE 45 ppb (MW5). Report states that downgradient
site has cVOCs and metal impact which Hess could not be a source of.
However, downgradient site has no soil VOC impact, while it does have
low level VOC groundwater impact. 9/4/07: Reviewed site status
report. General decreasing trend. Wells sampled on 6/26/07. Max BTEX
33 ppb (MW6). Max MTBE 7 ppb (MW6). NFA requested. 2/11/08: Reviewed
August 2007 to November 2007 Site Status Report. Wells sampled on
October 5, 2007. Max BTEX 520 ppb (MW5), max MTBE 17 ppb (MW5).
Triannual groundwater monitoring and sampling will continue. 5/14/08
- Carlson: Meeting on 5/7/08 with Hess and Envirotrac. The Department
requested the installation of two sidewalk wells. Wells sampled on
2/26/08. Low dissolved concentrations. 9/8/08 - Carlson: Reviewed
update report. Low dissolved concentrations. Emailed Hess/Envirotrac
- IP for delineation wells due on October 8th. 10/15/08 - Carlson:

SPEEDWAY 7810 (Continued)

1000263768

Received workplan for the installation of two downgradient wells on the north side of Park Avenue. Approved well locations by email. 10/22/08 - Carlson: Meeting with Hess/Envirotrac. The Department requested confirmatory soil borings be completed. RIR due by end of year. 11/6/08 - Carlson: Issued delineation workplan approval letter. 3/5/09 - Carlson: Received notification that well installation is scheduled for 3/9/09. 3/11/09 - Carlson: Received update report. Confirmatory soil boring data showed low level impact remains in SB1. 3/18/09 - Carlson: Meeting with HESS/Envirotrac. Access denied for off-site delineation. Quarterly gauging requested. 4/6/09 - Carlson: Emailed Ed Russo to get contact information for off-site owner. 4/8/09 - Carlson: Received email from John Schenkewitz with name of off-site owner. Hess does not feel comfortable installing wells in this location due to conflict with off-site owner. 7/3/09 - Carlson: Received June 2009 update report. Low dissolved concentrations. 8/19/09 - Carlson: Meeting held with Hess and Envirotrac. Install approved monitoring wells as borings with temporary piezometers only, due to access issues with off-site property owner. 10/21/09 - Carlson: Reviewed September 2009 Update Report. Low level dissolved concentrations remain. No update on off-site delineation. 10/30/09 - Carlson: DEC Tibbe contact off-site owner (Isaac Genuid, 347-495-9584). Mr. Genuid will provide access for sidewalk well installation. 12/3/09 - Carlson: Witnessed off-site well installation on Park Avenue. 1/7/10 - Carlson: Reviewed December 2009 update report. Low dissolved concentrations. Off-site well installation data to be reported in next quarterly report (March 2010). 1/27/2010 - Carlson: Meeting with Hess. 4/21/2010 - Carlson: Reviewed March 2010 update report. Off-site wells installed - clean. Spike in groundwater concentrations in MW5 and MW6. Confirmatory soil borings completed in 11/2008 showed residual soil impact in these areas. Issued letter requiring RAP in 30 days. 7/13/2010 - Carlson: Reviewed update report. RAP received - submitted separately. 8/3/2010 - Carlson: Reviewed delineation workplan/RAP. Two boring, one monitoring well, two AS wells proposed. Soil borings will be completed as monitoring wells if soil impact is encountered. STRE will be conducted. Issued approval letter. 3/3/11 - Obligado - I reviewed the 3Q10 report. Maximum benzene concentration is 157 ug/L. Max MTBE is 5.8 ug/L in MW6. Maximum BTEX is 206 ug/L in MW6. 4/11/11 - Obligado - Hess submitted a closure petition. I reviewed and rejected the petition. They have not yet implemented the approved RAP. I emailed a letter to Ed Russo cc to John Engdahl requiring implementatino of the approved RAP. 8/17/11 - Obligado - Email from Ed Russo. They will implement STRE event next week and submit a report in September. 9/7/2012 - 1Q2012, 6/29/2012, by EnviroTrac. The groundwater was sampled on 4/17/2012. DTW 20.66 to 25.59. Flows to north. NO LNAPL. The next sampling will be in 7/2012. Hess to evaluate historical soil, groundwater and STRE data to determine remedial efficiency. MW-9, 15.9J BTEX, 2.8 MTBE. MW-5, 0.40J BTEX, 200 MTBE. MW-6, 3.98J BTEX, MTBE ND. MW-10, 3.79J BTEX, 1.5 MTBE. 11/6/2012 - 2Q2012, 9/28/2012, by EnviroTrac. The groundwater was sampled on July 31, 2012. DTW 21.73 to 25.87. Flows to north. MW-5, 20.83 BTEX, 110 MTBE. MW-6, 149.7 BTEX, 0.76J MTBE. MW-4, 28.06J BTEX, MTBE ND. The next sampling will be in October 2012. Hess to evaluate historical soil, groundwater and STRE data to determine remedial efficiency. 2/1/2013 - 3Q2012, 12/31/2012, by EnviroTrac. The groundwater was sampled on 10/9/2012. DTW 21.73 to 25.87 feet. NO LNAPL. Flows to north. MW-5, 28.25J BTEX, 34.5 MTBE. MW-6, 116.9 BTEX, 1.5 MTBE. The next sampling

1000263768

will be in 1/2013. Hess to conduct 6 STRE in area of concern beginning 1/2013. 9/24/2013 - 4Q2012, 3/29/2013, by EnviroTrac. The groundwater was sampled on 1/14/2013. On 1/3/2013, STRE on MW-5 and MW-6. DTW 22.11 to 26.22 feet. Flows to north. NO LNAPL. MW-5, 94.7 BTEX, 29.2 MTBE. MW-6, 36.5J BTEX, 0.68J MTBE. 1Q2013, 6/28/2013, by EnviroTrac. The groundwater was sampled on 4/16/2013. Based on the groundwater sampling data, MW-1, MW-2 and MW-3 will be removed from the sampling plan. MW-9, 255 BTEX, 26.2 MTBE. MW-5, 288.8 BTEX, 10.4 MTBE. MW-6, 56.3 BTEX, 1.2 MTBE. On 2/20 and 4/10/2013, STRE on MW-5 and MW-6. MW-5/AS-1, PID reading 1,046 ppm. MW-6/AS-2, PID reading 2,000 ppm. 3/14/2014 - Conference among OER Shaminder Singh and Shana Holberton, DEC J. Vought and J. Feng. The station will be rebuilt into a new station. Vapor barrier and SSDS will be installed for the new convenience store. 3/20/2014 - Discussed with J. Vought. Spill is closed based on: 1) Source removal, i.e. (36) 550-gallon previously abandoned gasoline USTs, (4) 4,000-gallon gasoline USTs, (2) 2,000-gallon gasoline USTs, (1) 1,000-gallon fuel oil UST, (1) 550-gallon waste water UST and all associated dispensers, piping and remote fills were removed in 8/1995. 2) A total of 1,400 tons of petroleum impacted soil was removed offsite for disposal during the USTs removal activities. 3) Subsurface investigation as 11 monitoring wells, two Air Sparge wells and 3 soil borings have been installed. The extent of soil and groundwater contamination has been delineated at this time. 4) The soil boring SB-1 was found to have remaining soil contamination at 24-25 feet where at the smear zone. Downgradient well MW-6 nearby show low and downward trend in BTEX concentration suggest that the soil contamination possibly no longer contribute to groundwater contamination. 5) No groundwater contamination has been found in the downgradient wells MW-7 and MW-8 since their installation. It suggest that the contamination plume is contained onsite. 6) The maximum BTEX 100.5J ug/L and 39.9 ug/L MTBE was detected in MW-5 on 1/6/2014. The groundwater has been demonstrated a significant reduction in contamination levels. Groundwater monitoring data showing downward trend which suggest attenuation is occurring. 7) The site will be re-developed as a new station, vapor barrier and SSDS will be installed for the new convenience store. No change use of the property has been aware of at this time. 8) The residual contamination notification language will be included into the Spill Closure Letter. 3/21/2014 - Spill closure letter to Hess and copied EnviroTrac and OER."

Remarks:

"UPGRADE OF TANKS IN PROCESS - SOIL FOUND TO BE CONTAMINATED PROBABLY FROM OLD LEAKING TANK - WILL BE REMOVING ALL CONTAMINATED SOIL"

DEC Memo: "01/16/08-Vought-Received call from Sarah Schonfeld (718-802-9292) who works for owner. As per Sarah she sent in TTF that showed tank to be tight. TTF results submitted and looking for case closure. Vought to inquire to DEC Falvey if TTF acceptable and spill can be closed. Vought spoke with Falvey and confirmed that tank system tested tight and site visit revealed that only fill line ran underground. As per Falvey tank was AST and concrete was in good condition and no source of odors were found and no further complaints were received. Spill closed due to no impact to soil and groundwater after agreement by

Remarks: DEC Falvey. Vought sent NFA to: Sam One Realty LLC 199 Lee Avenue Suite 305 Brooklyn, NY 11211 Fax: (718)802-1154"

"FDNY called in complaint about this building. They visited the site 8 times in 2 years responding to petroleum odors. No spill is visible. J. Krimgold asked that I follow up with a PBS inspection. No spills were observed during the inspection. There was a strong petroleum odor in the hallway on the first floor. No odors were detected in the tank room or the boiler room. One resident, who's door was in the vicinity of the odor stated that she has been living there since September and did not notice the odor until the building received heating oil deliveries. According to Rich Jones, the super, the last delivery was about 2 weeks ago. The tank is aboveground and wrapped in concrete without weepholes. There was limited information available on the tank and pipe system because there were no plans or tank labels available. It appears there is no secondary containment and the tank room has an open floor drain. According to Abe, the building manager, the tank was last tested for tightness about three years ago. The following violations were found on the PBS inspection: 1. Registration certificate not posted. 2. Fill port not color coded. 3. No secondary containment on the tank. 4. No labeling at the fill port. 5. No as built plans. 6. Unmetered tank without alternative leak detection. An administrative settlement conference is scheduled for 12/19/07 in LIC. bf 12/19/07-Vought-Spoke with DEC Falvey and conference ongoing and he will have responsible party tightness test fill line as this may be suspected source."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site Description: "Location: The 85 Skillman Street site (Site) is located in the Bedford-Stuyvesant section of Brooklyn. The site is bounded by commercial/residential properties and Park Avenue to the north, residential properties, a fire station and Bedford Avenue to the east, commercial, vacant property and Myrtle Avenue to the south and Skillman Street to the west. Site Features: The site is identified as 85 Skillman Street, Section 3, Block 1900, Lot 16 on the NYC tax map.

Env Problem:

Lot 16 encompasses approximately 0.19 acres of property and includes former lots 14, 15, 16 and 17, that were consolidated into one through a lot merger. The site was formerly vacant property covered with crushed stone and gravel and used as a parking lot. Current Zoning and Land Use: The site is zoned M1-2/R6A in a mixed use zoning district. This mixed use district permits a mixture of residential and non-residential (commercial, community, light manufacturing) uses in the same building. After remediation, the site has been developed for restricted residential use as a multi-story apartment building with a basement. Past Use of the site: All of the lots which now make up the site parcel were developed as residential properties at one time. Former lot 17 on the north side was redeveloped for industrial use as a sheet metal facility for a short period around 1950, an auto repair facility and then as a junk storage or storage facility. The structure on this lot was demolished around 1978, however the lot continued to be used as a small junkyard up until recently. The residence on former lot 16 was demolished around 1965. Residential structures on former lots 14 and 15 were demolished around 1981. Since the demolitions, former lots 14, 15 and 16 have been used for parking. Site Geology and Hydrogeology: The topography of the site and the surrounding area slopes gently to the northwest towards the New York Shipyard and the East River. The ground level elevation on the property is approximately 33 feet above mean sea level. The site is underlain by a layer of historic fill that is approximately 2 to 7 feet thick starting just below the ground surface. The historic fill generally consists of silty-sand, brick, wood, concrete and other debris. The native soils below the historic fill consist of brown silty-sand. The approximate depth to groundwater is 31 feet below ground surface (bgs) in the area. Regional groundwater contour maps indicated that the groundwater flow should be to the northwest towards the East River. However, contrary to this, monitoring well water level measurements appear to indicate that the site area flow is in a southeasterly direction. Additional research indicates that groundwater flow, particularly on the eastern half of the site, may be influenced by the MTA's six subway dewatering wells located in the Nostrand and Marcy Avenue area 1,600 feet to the east of the site." "Remediation at the site is complete. Prior to remediation, the primary contaminants were PCBs in soil, as well as lead and polycyclic aromatic hydrocarbons in soil. Minimal amounts PCBs were also detected in groundwater. Remedial actions have been achieved unrestricted soil cleanup objectives, PCBs are no longer present in groundwater and no environmental easement or site management plan are necessary. The text below remains for information. Nature and Extent of Contamination: Soil - A total of 17 soil samples were initially collected at the site. Twelve of these samples were collected from six borings at two different depth intervals (0 to 2 and 6 to 8 feet) in each boring. Two soil samples were collected at the groundwater interface in two of the borings. Additionally three shallow hand-augured soil samples were collected at a suspected hotspot area in the NE corner of the site. At the request of the USEPA, eight additional soils samples (B7 to B14) were collected from 0 to 2 feet below grade to further delineate the horizontal extent of soil with PCB concentrations greater than 50 ppb. The shallow soils on northern lot 17 and on the western half of lot 16 were impacted by polychlorinated biphenyls (PCBs). PCB (Aroclor 1254) were found in the range of 0.51 to 150 parts per million (ppm) in the 0 to 2 foot depth interval. The shallow soils throughout the site have also been

S113916513

impacted by metals and polycyclic aromatic hydrocarbons (PAHs). Lead was found in the range of 450 to 5,300 ppm and individual PAHs from non-detectable to 18 ppm. No volatile organic compounds (VOCs) were encountered during the RI Except at one location where metals and PAHs were found in fill materials, there was no contamination, including PCBs found above unrestricted use SCOs in the deeper (6 to 8 foot) native soils. The RI report cited the presence of subsurface electrical equipment located in the northeast corner of the property as the possible source of the PCB contamination. The metals and PAH contamination found throughout the site, appears to be indicative of typical historic fill in NYC. Remediation consisted of excavation and disposal of contaminated soil, followed by confirmation sampling. Initially, areas of soil containing PCBs above 40 ppm (PCB Hot Spot) and PCBs between 1 ppm and 40 ppm (PCB Cold Spot) were divided into grids and sampled individually to ensure PCB removal. Upon completion of PCB soil removal, and after removal of the remaining historic fill and clean soil necessary for building construction, nine endpoint samples were taken. These indicated that no exceedances of unrestricted soil cleanup objectives for PCBs, metals, VOCs, SVOCS or pesticides remain at the site. Groundwater - PCE and TCE were initially found in groundwater at two monitoring well locations on the eastern side of the property. Both compounds were above the groundwater standards of 5.0 ppb for each and were believed to originate from an off-site source. The maximum PCE concentration was 26 ppb and the maximum TCE concentration was 38 ppb. Filtered samples of groundwater exceeded SCGs for sodium and manganese as well as for iron, which are commonly found in shallow groundwater in this region and are not considered site specific contaminants of concern. PCBs were also found in groundwater in three of the monitoring wells. Concentrations ranged from 1.5 to 2.3 ppb. Based on the fact that PCBs were not detected in the deeper soils, the depth to groundwater and the installation of the wells in contaminated boreholes, the RI report attributed the PCBs in groundwater to cross-contamination during monitoring well construction. All four wells were removed during construction. After remediation, four groundwater wells were re-installed at the site. The groundwater was sampled twice and did not contain PCBs. Although the PCE and TCE were attributed to an off-site source, groundwater was also sampled for VOCs. While the PCE in the first well was 26 ppb, the TCE decreased by 60 percent to a final concentration of 12 ppb. In the second well, the groundwater concentrations of both PCE and TCE decreased by over 90 percent (to 1.9 and 1.3 ppb respectively). Soil Vapor - During the remedial investigation, soil vapor on the property was found to contain low levels of several volatile organic compounds. The PCE concentrations found in soil vapor were less than 1.0 micrograms per cubic meter and TCE was not detected in the soil vapor. No remedial measures were necessary to address soil vapor onsite. "

Health Problem:

"Remedial actions completed at the site have eliminated all potential exposures to site-related contamination."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "10/02/06-Vought-Off hours responder. Vought called Hileman and spill entering basin for tree on sidewalk. Vought performed site visit with DEC Zhune and spill was approximately 2 gallons of waste oil that affected 2 square feet of sidewalk and spill occurred during heavy rains preventing infiltration of petroleum into soil and tree. Inspection of construction site through fence showed no large spill and no large source of product (most likely 5 gallons or less). Vought placed sand on sidewalk and called Hileman and construction company and informed them of situation: Shoshana Managment 131 Tehama Street Brooklyn, NY 718-851-6089 Spill closed by Vought due to no significant impact to subsurface and small amount of spill."
Remarks: "UNKNOWN PETROLEUM LEAKING FROM BENEATH CONSTRUCTION BARRIER."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MANHOLE 2114 (Continued)

S104653529

Remarks: manhole, leaked from 3C uncapped cable end. Found oil from same 3C cable on 6/6/00. Cable had been capped and cleanup completed on 6/8/00. Cap was off same cable and leaked again. No joint regulator in hole. Cleanup will be completed <1ppm PCB as before. Cleanup completed by double washing with slix. Liquids removed by tanker, solids by vactor and disposed of as hazardous for lead only. Leaking cable corrected by #9.
"LEAK FROM A CABLE IN THE MANHOLE. CON ED 131777. 1 QUART ON 150 GALS OF WATER. NO CALL BACK REQUESTED."

Historic Generators:

Receive Date: 20160205
Handler Name: CONTROL ELECTROPOLISHING CORP
Federal Waste Generator Description: Large Quantity Generator
State District Owner: NY
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20220509
Handler Name: CONTROL ELECTROPOLISHING CORP
Federal Waste Generator Description: Small Quantity Generator
State District Owner: NY
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: No
Electronic Manifest Broker: No

Receive Date: 19990708
Handler Name: CONTROL ELECTROPOLISHING CORP
Federal Waste Generator Description: Not a generator, verified
State District Owner: NY
Large Quantity Handler of Universal Waste: No
Recognized Trader Importer: No
Recognized Trader Exporter: No
Spent Lead Acid Battery Importer: No
Spent Lead Acid Battery Exporter: No
Current Record: No
Non Storage Recycler Activity: Not reported
Electronic Manifest Broker: Not reported

Receive Date: 20060101

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Spiller Extension: Not reported
DEC Region: 2
DER Facility ID: 314980
DEC Memo: "06/01/06-Vought-Daytime duty desk officer. Spill assigned to DEC Piper (daytime runner). Vought called and spoke to Danny Singh (fax 718-857-2100) and as per Singh owner is: Myer Stern 545 Broadway Suite 1C Brooklyn, NY 11206 Cell 718-599-5569 Fax 718-599-5632 Contaminated soil found on top of 8000-gallon #4 fuel oil UST which was removed. Contamination found at 6' below grade. Soil being stockpiled on plastic sheeting. Site will be overexcavated and samples sent for disposal analysis. Groundwater very deep at site. Site will be developed as six family residential site and is E designated. This site is lot 3 and lot 1 is E designated and NYCDEP requests lot 3 to be part of E designation review. NYCDEP contact is Tyrell Estes (718-595-4473 fax 718-595-4479). Previous Phase II investigation performed. Spill number on Lot #1 is 0601468. DEC requires STIPULATION AGREEMENT due to development issues of site: 1)endpoint samples 2)vapor barrier and possible sub-slab depressurization system 3)delineation 3)submission of PBS registration. Vought called Myer Stern and left message to return to DEC Piper. STIPULATION sent with above requirements with cc to DEP and Singh. 6/2/06- DEC Piper sent STIP. 6/15/06- DEC Piper left message for ted at Don Carlo Env. requesting callback. 8/21/06- DEC Piper received signed STIP agreement, w/ Myer Stern. 9/26/06- DEC Piper responded to site. Don Carlo and owner on site to witness excavation of contaminated soils. Soil was stockpiled. 5 Endpoints colled and waiting for 14-48 hr turnaround to determine if additional excavation is needed. 10/27/06- DEC Piper reviewed closure request. As per report and analytical, this spill is closed. See e-docs if warranted."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MIKE DAUGHTERTY

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 150-830: 10-20-03 20:10HRS B. THORNGREN (NETWORKS) REPORTS FOUND 10 GALLONS OF UNKNOWN OIL ON 50 GALLONS OF WATER IN V 3323, (FDR 6B55). AT THIS TIME OIL APPEARS TO BE CONTAINED AND NO SEWERS OR WATERWAYS WERE AFFECTED. VAULT SHOWS MINUS MIN AND HISTORICAL RECORDS INDICATE 5.0 PPM. NO SEWER CONNECTIONS OR SUMP IN THIS STRUCTURE BUT THERE IS A DRAIN (NOT A WEEP HOLE) GOING TO ADJACENT VAULT WHICH IS ABANDONED AND IN THAT STRUCTURE PUMP WAS DISCONNECTED AND NOT RUNNING AND CONTAINED WITH NO OIL IN THAT STRUCTURE. NO SAMPLE WILL BE TAKEN UNTILL FEEDER IS TAKEN OFF. AT THAT TIME WILL TRY TO GET SAMPLE FROM VS3323 AND ALSO WILL PRESSURE TEST. THIS UNIT IS A G.E WITH CAPACITY OF 410 GALLONS AND IT WAS INSTALLED IN 1960. ALSO AT THIS TIME ENV OPS CREW WERE DISPATCHED TO LOCATION AND WILL BEGIN TO SET ZONES AND TREAT THIS A A 50-499 CLEANUP. UPDATE 10-20-03 21:00HRS B. THORNGREN REPORTS, AN UPDATE OF OIL SPILL IS NOW ADDITIONAL 10 GALLONS WHICH NOW MAKES IT 20 GALLONS. 10-20-03 21:10HRS OVER 50 TANKER ORDERED FOR 23:00HRS 10-20-03 21:45HRS EPA# NYP 004 115 929. 20-AUG-2003 2315HRS THORNGREN REPORTS PRESSURE TESTED FAILED PRESSURE TEST. TOOK PCB SAMPLE FROM TRANSFORMER. DIPPED TRANSFORMER FOUND LEVEL 2 INCHES BELOW MIN. 10-20-03 23:30HRS R. JAMES REPORTS, AT 21:50HRS D.E.P INSPECTOR R. DIAZ AND MAHENDRA RAMNARINE ARRIVED ON LOCATION, THEY WERE SHOWN THE SPILL AREA AND VAULT AND TOLD OF THE CLEANUP PLANS THEY HAD NO PROBLEMS WITH PLANS AND LEFT LOCATION AT 23:20. AT 23:00HRS ERT PAUL WALSH ARRIVED AND WAS SHOWN SPILL AREA AND BREIFED ON CLEANUP PLANS. AT 22:15HRS FOD ARRIVED ON LOCATION GAVE FEEDER TO EQUIPMENT GROUP. TANKER ARRIVED AT 23:00HRS. R. JAMES LEAVING LOC AT 23:30HRS 10-21-03 03:40HRS V. DINEEN REPORTS, TANKER DRAINED OIL OUT OF STRUCTURE, ENV OPS MADE A PATH TO VALVE. STARTED TO DRAIN VAULT 20 MINUTES AGO, CAPACITY IS 410 GALLONS OF OIL AND WILL UPDATE INCIDENT WHEN COMPLETED., 10-21-03 03:51 HRS LAB SEQ# 03-08617-001 7 PPM 10-21-03 05:25HRS V. DINEEN REPORTS, TOOK OUT 470 GALLONS FROM VS AND STRUCTURE. ALL LIQUIDS WERE CONTAINED TO STRUCTURE. TANKER AND EQUIPMENT GROUP WILL BE LEAVING LOCATION. B. BROWN - O.S. - ENV. OPS., REPORTS PARTIAL CLEANUP COMPLETED. BQE & ASTORIA TANKER ON LOC TO DRAIN TRANSFORMER. TAG REMAINS PENDING TRANSFORMER REMOVAL. 10/20/03=1545HRS O.S. SEDA #85210 NETW.REPORTS FUTHER INVESTIGATION FOUND FULL ASBESTOS ABATEMENT IS REQUIRED. FOUND 20 STONES ,36 SHELFs AND TERMINAL COVER'S MEASURING (22 1/2 X 11 X 17 1/2) TOTAL SQUARE FEET OF 12..4. NETWORKS WILL BE FILEING WITH DEP. UPDATE: 25-NOV-2003 0255HRS SCOTT REPORTS DOUBLE WASHED WITH BIOGEN 760 REMOVED ALL LIQUIDS NO SUMP IN STUCTURE. PARTIAL CLEANUP. TAG REMAINS PENDING ABATEMENT. AND REMOVAL OF UNIT. Update - 11/25/03 1900hrs S. Afour, networks reports asbestos abatement done. Cut secondary cable from transformer. Transformer can now be removed and replaced. Area safe. Tag remains in place pending removal and final clean up. 3/5/04 1355HRS N.DREVITCH ENVIR OPPS REPORTS TRANSFORMER REMOVED CLEANUP COMPLETED .DOULBED WASHED STRUCTURE USING BIOGEN 760.FOUND NO SUMP IN STRUCTURE. REMOVED ENVIR TAG#34940 "

Remarks:

"spill is 20 gallons mixed with 150 gallons of water in a transformer vault. Vault # 3323. Clean up is in progress. Con Edison #150830"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This gasoline spill case has been reassigned from DEC (Sigona) to Rommel on January 7, 2004. Jones - March 2006 - Reporter's and Spill location phone numbers no longer in service. Recommend return to region 1. Next step: Establish contact with current occupant of the site or track down former owner. 5/16/2006 - Mike - Could not find a contact for current site occupant. Contacted Protest Enterprises who had the same old information the Spill Report states, However Protest the company who did the test has records that tank was tested again on the same day which the tank passed. Also stated there was no spill."

Remarks: "TESTED TANK, TANK FAILED"

DEC Memo: "09/23/2011-Zhune spoke to Kevin Brussee from Environmental Business

Consultant 631-504-6000 He said. They are doing Phase II for potential purchaser. They found one UST not properly abandoned. Yesterday they did boribgs around the tank and found soil contaminated. They went 20' down and found a gray sheen in the groundwater interface. They collected soil and groundwater samples. 05/14/12-Zhune called to Kevin Brussee. He said the site has been accepted into the Brownfield program. He also said Mandy Yau is the project manager for this site. 05/14/12- Zhune spoke to Jane O'Connell she request to assign this spill to Mandy Yau. "

Remarks: "Caller advised during inspection of property found a leaking fuel tank unknown amount of oil spilled into soil. Clean up is pending."

DEC Memo:

"3/27/07 bf: Spoke with Matt of Associated Environmental (631)234-4273. Epoxy patch from previous repair at top of tank was problem. Tank is AST. They plan on having the tank cleaned out, inspected, remove epoxy, and weld a steel patch to tank. Then tank will be tightness tested. They plan on starting work next week. One problem is getting a tanker to be dedicated to the building while the repairs are made. Petroleum Tank Cleaners will be doing repairs and testing in conjunction with Associated. Sent ttf letter to: David Rochlitz 544 Park Avenue Brooklyn, NY 11205 7/13/07 On 7/12/07, received call from Antionette Ollivierre of American Environmental Associates and Solutions (718)209-0653. She requested a call back. Called her back today. I faxed her a copy of the ttf letter dated 3/27/07. fax:(718)622-5807. bf 9/20/07 Received call from Aron Weinstein tesla Environmental 732-904-4618. Called him back at 2:45 PM. He will send email letting me know where project stands. Tank is encased in concrete and there may be structural concerns regarding the building. A Phase II was done on the property and eight borings were done. I told him I need to see those. I asked him why the tank failed and he could not answer except that the Horner EZ 3 should not be allowed. He was on a cell phone and was hard to hear. bf 11/13/07 On 11/8/07, received call from Donna of ABC Tank. Ph.(718)272-2800 Fax.(718)272-3147. She requested any paperwork regarding the spill. I sent her the ttf letter and the spill report. Called her back, but she is not in until Thursday. bf 3/4/08 Site inspected on 2/29/08. NOV issued. Received call to day from John of Gianco (contractor doing tank test/repair). I faxed ttf letter to him. Fax: (631)952-5975. bf 4/2/08 Signed order hand-delivered with check for \$1100 panalty. bf 4/30/08 Received faxed letter on 4/9/08 from John Sinatra of Gianco, dated 4/8/08, to Robert Hoffman. Tank passed pressure test over the weekend holding 7 pounds of air. No contamination was found on, near, or surrounding the tank. It is his belief that the tank can be out online as a backup. 6/19/08 Called Robert Hoffman requesting tank test report. He faxed letter to close spill, not report. Sent tt return letter to him since document is not a tank test report. bf 7/1/08 Received passing test report on 6/30/08. NFA. bf"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Updated By: JEBROWN

Site Description: "Location: The Skillman Street Holder Station is located in an urban area, at 7 Skillman Street, Brooklyn, NY. Site Features: The 7 Skillman Street parcel is completely covered by a two-story building. This building is used as a banquet/catering hall. Current Zoning/Use: The property is currently in active use as a banquet hall, and is zoned for mixed use, which includes residential, commercial, and light industrial uses. The surrounding parcels are currently used for a combination of commercial and residential purposes. The nearest residential building is approximately 150 feet to the southwest. Past Use of the Site: Two manufactured gas storage holders were constructed at the site between 1887 and 1904. These holders were operated solely as gas distribution holders, and no gas production facilities were present. At some point prior to 1935, gas storage operations ceased and the holders were demolished. The site remained under the ownership of the Brooklyn Union Gas Company until sometime prior to 1947. Upon being sold the property was used for automobile parking and storage. By 1950, the site was used as an automobile repair facility which remained until at least 1993. In 2003, the existing building was developed into a catering hall, which is presently in operation. Site Geology and Hydrogeology: The site is underlain by fill material, alluvial sands, glacial outwash and bedrock at depth. Groundwater is typically found at approximately 7 to 16 feet below ground surface (bgs), and flows generally to the west-northwest. "

Env Problem: "Based upon investigations conducted to date, the primary contaminants of concern are the volatile organic compounds (VOCs)

K - SKILLMAN ST. STATION (Continued)

S109321184

benzene, toluene, ethylbenzene and xylene (together known as BTEX), and styrene; polycyclic aromatic hydrocarbons (PAHs); and metals.

Soil- The subsurface soil exceedances for on-site VOCs (BTEX) were slightly above unrestricted soil cleanup objectives (USCOs), though no samples exceed the restricted residential SCOs. However sampling of soil beneath the site was limited due to the inability to access much of the property with a drill rig, and a source area of higher contaminant concentrations may be present beneath the buildings. Adjacent to the site, in a sample collected beneath Skillman Street at a depth of approximately 27 feet where evidence of coal tar was observed, the concentration of toluene was 160 ppm, ethylbenzene was 220 ppm, and xylenes were 840 ppm in subsurface soil. Styrene was also detected at this location at a concentration of 400 ppm. There were no detections of chlorinated solvents or total cyanide in soil above unrestricted SCOs either on or off-site. The PAH exceedances above unrestricted SCOs consisted of benzo(b)fluoranthene, benz(a)anthracene, benzo(a)pyrene, chrysene, indeno(1,2,3-cd)pyrene, and naphthalene. Adjacent to the site the concentration of naphthalene was 1000 ppm (at 27 feet below ground surface). The only inorganics to exceed unrestricted SCOs were lead and mercury, although neither exceeded the restricted residential SCOs in soil.

Groundwater - Samples collected from monitoring wells located both on-site (temporary sampling points) and off-site exceeded groundwater quality standards (GWQS) for benzene, toluene, ethylbenzene, xylenes (BTEX) compounds, naphthalene, chlorinated VOCs, cyanide, and metals. On-site, benzene ranged from 13 to 5,600 ppb (GWQS of 1 ppb), toluene at 20,000 ppb (GWQS of 5 ppb), ethylbenzene at 12,000 ppb (GWQS of 5 ppb), xylenes at 9,400 ppb (GWQS of 5 ppb), isopropyl benzene at 420 ppb (GWQS of 5 ppb), styrene at 82 ppb (GWQS of 5 ppb), cis-1,2-dichloroethene at 9.2 ppb (GWQS of 5 ppb), naphthalene at 5,600 ppb (GWQS of 10 ppb), total cyanide at 240 ppb (GWQS of 200 ppb), chromium at 380 ppb (GWQS of 50 ppb), and lead at 280 ppb (GWQS of 25 ppb). Elevated BTEX and naphthalene also indicate the possible presence of MGP-related contaminants in the subsurface beneath the building. Off-site, detections of benzene range from 100 ppb to 410 ppb; toluene from 79 ppb to 1,100 ppb; ethylbenzene from 32 ppb to 930 ppb; xylenes from 100 ppb to 3,900 ppb; tetrachloroethene (PCE) from 5.6 to 9,400 ppb; trichloroethene (TCE) from 140 to 1,900 ppb; vinyl chloride from 200 to 380 ppb; cis-1,2-dichloroethene from 600 ppb to 8,000 ppb; isopropyl benzene from 64 ppb to 420 ppb; styrene from 82 ppb to 1,800 ppb; and naphthalene from 62 ppb to 5,600 ppb. There were also eight inorganic compounds that exceeded the groundwater standards in both on-site and off-site wells. These compounds were copper, iron, magnesium, manganese, nickel, selenium, sodium, and thallium, all of which are not associated with the former MGP operations.

Soil Vapor - Soil vapor samples collected from the site contained elevated levels of both MGP-related and non-MGP-related compounds. The MGP-related detections included benzene at 35 ug/m3; toluene at 96 ug/m3; ethylbenzene at 12 ug/m3; xylenes at 40 ug/m3; 1,2,4-trimethylbenzene at 12 ug/m3; and nonane at 8.4 ug/m3. The non-MGP constituents included PCE at 12,000 ug/m3, TCE at 1,200 ug/m3, and cis-1,2-dichloroethene at 1,500 ug/m3.

Indoor Air - The contaminants present in soil vapor at elevated levels were detected at much lower concentrations in indoor air. The highest concentration of the BTEX compounds was toluene at 6.3 ug/m3. PCE was detected at a concentration of 0.66 ug/m3; TCE at 0.21 ug/m3; and ethanol at 450 ug/m3. The ethanol concentrations in indoor air were

approximately an order of magnitude larger than the soil vapor concentrations, indicating the source to be within the building. No indoor air guidance values were exceeded for any compound. The owners of the affected property have been notified where mitigation or monitoring of impacts to indoor air is required. In 2018, several monitoring wells were sampled for PFAS and 1,4-dioxane as part of the Department's Emerging Contaminants initiative. Perfluorooctanoic acid (PFOA) and perfluorooctanesulfanoic acid (PFOS) were reported at concentrations of up to 180 and 45 parts per trillion (ppt), respectively, exceeding the 10 ppt screening levels for groundwater for each. Individual PFAS exceeding the 100 ppt screening level included perfluorohexanoic acid (PFHxA) at a concentration of 208 ppt. Total PFAS, including PFOA and PFOS, were reported at concentrations of up to 817 ppt, which is above the 500 ppt screening level for total PFAS in groundwater. An Interim Site Management Plan (ISMP) is in place that governs soil disturbance and the required groundwater monitoring. "

Health Problem: "Direct contact with contaminants in the soil is unlikely because the site is covered with buildings and pavement. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in the groundwater may move in to the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Mitigation has been recommended to address the potential for people to inhale contaminants in indoor air of the onsite building due to soil vapor intrusion. Environmental sampling indicates that soil vapor intrusion is a concern for off-site buildings which are occupied. "

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name:	FORMER GUTTA PERCHA AND RUBBER MANUFACTURING SITE
Address:	43 FRANKLIN AVENUE
City,State,Zip:	BROOKLYN, NY 11205
Program:	BCP
Site Code:	630814
Acres:	0.809
HW Code:	C224351
SWIS:	2401
Town:	New York City
Record Added Date:	01/06/2022
Record Updated Date:	01/31/2022
Update By:	AMSERVIS
Site Description:	"Location: The Site s address is 43 Franklin Avenue, Brooklyn, NY 11205. The Site is located in Kings County, New York and is identified as Brooklyn Block 1885, Lot 15 and is currently vacant and is approximately 0.809-acres in size (35,250 square feet). There are no structures on the Site. The Site is bound to the north by an auto parts store followed by a mixed-use commercial/office building, to the east by Skillman Street followed by commercial/industrial buildings, to the south by multi-family residential buildings, and to the west by Franklin Avenue followed by a seafood distribution center and a hotel. The Site is located within a mixed-use area characterized by low-rise commercial, industrial, and residential buildings. The Site is located within an urban area of Bedford-Stuyvesant, Brooklyn characterized by multi-story mixed-use residential and commercial buildings and industrial-use developments. The Metropolitan Transit Authority (MTA) subway G line is located approximately 2,640 feet to the northwest at the corner of Marcy Avenue and Flushing Avenue. The Brooklyn Navy Yard Basin is located about 3,500 feet west-northwest of the Site. Site Features: The Site is a 0.809-acre rectangular-shaped lot, is paved with an impervious surface (asphalt), and secured with a 10-foot high locked chain link fence with barbed wire installed on the post caps. The Site is currently vacant. Access to the Site is from both Franklin Avenue and Skillman Street. There are no structures on the Site. Current Zoning and Land Use: According to the New York City Planning Commission Zoning Map 12d, the Site is located within a residential and manufacturing zoning district (R6A and M1-2) with Mandatory Inclusionary Housing (MIH). The proposed development of this property is consistent with the current zoning. As a result of the CEQR process, Block 1885, Lot 15 was assigned an environmental E-Designation (E-395) for hazardous materials, and air quality (HVAC limited to natural gas and exhaust stack location limitations)

effective 05 May 2017 (CEQR #16DCP121K). Satisfaction of the E-Designation requirements is subject to review and approval by the NYCOER to obtain a NTP or NNO prior to obtaining building permits. Past Land Use: The Site was developed in the late 1800s and was part of the Gutta Percha & Rubber Manufacturing Company, a rubber manufacturing and thermoplastic dental filling company. Early Sanborn Maps depict several small buildings on the Site with rooms designated for packing, pressing, and storage. Historical maps identify at least six storage tanks of unknown contents at the Site. Additionally, it is unknown if the storage tanks are above grade or below grade. Tank sizes are not identified with the exception of one, 60,000-gallon tank. In addition, Sanborn Maps dated 1904, 1918, and 1921 depict an 8-inch diameter well in the center of the Site while the property operated as a rubber manufacturing company. By the late 1940s, operations of the Gutta Percha & Rubber Manufacturing Company ceased and the buildings were razed leaving the Site as a vacant lot. The lot has been vacant since at least the 1960s, and most recently operated as a parking lot (operations ceased October 2021). Site Geology and Hydrogeology: The Site is underlain by historical urban fill predominantly consisting of light brown to dark brown medium to fine sand with trace amounts of silt and clay and varying amounts of loose gravel, brick and asphalt. The urban fill was observed from surface grade to depths extending approximately 6.5 to 7 ft bgs in each soil boring. The urban fill layer was underlain by a potential native layer consisting of brown to orangebrown, medium to fine sand with varying amounts of coarse sand, silt, gravel, and intermittent clay lenses. The topography of the Site and the surrounding area slopes north towards the Brooklyn Navy Yard Basin and the East River. The ground level elevation on the property is approximately 16 feet above MSL. During the December 2021 RI, groundwater was encountered at depths ranging from about 17 to 18 ft bgs. "

Env Problem:

"Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available."

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FOLEY 03/17/03 REASSIGNED FROM TIBBE TO VOUGHT. 12/29/03 Reassigned from Vought to Foley. Bill Wolf Petroleum site. 2/24/04 File review(KMF): 2/19/99 UST closure report submitted by National Environmental for 13X550gal unleaded gas USTs. USTs were removed in June 1997. 1044 tons of contaminated soil was removed. 3 soil samples were taken from the excavation which exhibited VOC concentrations above STARS guidance. On 10/29/98, National installed 3 borings. Samples were retrieved in 2' intervals from 4' to 32' bgs. Groundwater was not encountered within 32'. No groundwater samples collected. 9/29/04 Met with B. Cohen(Certilman Balin Attorneys), B. Beck(Consultant, National Env.) with J. Rommel and L. Oliva. B. Beck stated that Tyree did the post-ex sampling which showed VOC contamination. B. Beck to provide post-ex data and possibly a proposal for additional work by 11/19/04. 2/2/06: Case reassigned to Andersen. Soil borings performed by National Environmental in area of USTs were all clean. No gw contacted at 32 feet bgs. Candidate for closure. 2/7/06: Case closed."

Remarks:

"CALLER STATES COMPANY IS REMOVING TANKS AND THERE IS A HEAVY ODOR OF GASOLINE. COMPANY ON SITE WILL TAKE CARE OF CLEAN UP. CALLER DOES NOT NOW NOTIFIER'S COMPANY OR PHONE NUMBER. "

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 4544
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

C01 - Pipe Location - Aboveground
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
I05 - Overfill - Vent Whistle

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - In Place
Pipe Model: Not reported
Install Date: Not reported
Capacity Gallons: 4000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MJGRIFFI

SWIS: 2401
Town: New York City
Record Added Date: 05/22/2014
Record Updated Date: 01/22/2018
Update By: DJEVANS
Site Description:

"Location: The site is located in the Bedford-Stuyvesant section of Brooklyn. The site is generally rectangular in shape with 193 feet of frontage along Bedford Avenue. The site is comprised of a single tax parcel (Block 1886, Lot 44). The site is approximately 0.46 acres in size. Site Features: Now that contamination has been removed, construction of a 7-story mixed-use commercial-residential building, which will cover the entire site, is underway. Current Zoning and Land Use: The current use of the site is vacant, zoned mixed commercial (M1-2 / R6A zoning) use. Past Use of the Site: According to Sanborn maps the southern portion of the site was occupied by a carriage repository in 1904 while the northern portion was occupied by single family homes. By 1918 the southern portion became occupied by a 50-car garage with underground gasoline tanks. By 1947 auto sales and service was added to the front portion of the garage. In 1950 the rear portion of the site remained residential. Sometime between 1965 and 1977 the homes on the northern portion were removed and replaced with a 1-story building identified as used auto sales. The use of the site remained as auto sales and auto repair through 1993 when the buildings were shown as vacant. The gas tanks remained on all the maps from 1918 through 1996. Site Geology and Hydrogeology: The elevation of the site ranges from 19 to 21 feet above the National Geodetic Vertical Datum (NGVD). The area topography gradually slopes to the north. Soil at the site is described as historic fill materials to a depth ranging from 4 to 6 feet below the surface followed by native silty-sand and gravel. The depth to groundwater beneath the Site is approximately 12 feet below grade and flows to the southwest toward dewatering wells at a subway station. "

Env Problem:

"Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were petroleum-related VOCs, including ethylbenzene, n-propylbenzene, xylene, and 1,3,5-Trimethylbenzene (1,3,5-TMB) which exceeded the unrestricted use soil cleanup objectives (UUSCOs). Metals (copper, lead, mercury, and zinc) were also detected in the soil exceeding UUSCOs. Remedial actions have successfully achieved soil cleanup objectives for unrestricted use. Low level VOCs found in soil vapor were addressed by the extensive site excavation (source removal) and following a soil vapor intrusion evaluation, no further actions were necessary to address exposures related to soil vapor intrusion."

Health Problem:

"Remedial actions are complete and have eliminated the potential for

Site Description: "This site was terminated. Plume track down 224251 identified 735 Bedford Avenue/12 Spencer Street at the source of CVOC contamination. The plume trackdown project was originally called the Spencer Street Groundwater plume trackdown. The name was changed to 735 Bedford Avenue in 2018. The plume trackdown project was generated based on information collected on the public sidewalk of Spencer Street between Flushing Avenue and Park Avenue. The project area is located on the western extent of Long Island, in the New York City Borough of Brooklyn, in the northern section of the Bedford/Stuyvesant neighborhood. The area of investigation includes Spencer Street and Bedford Avenue, south of Flushing Avenue. The surrounding area is predominantly industrial/commercial with mixed commercial and residential properties. The area of investigation is approximately 1.3 miles east southeast of the East River. Location The Site is located in the Bedford Stuyvesant section of Kings County. The Site is located in the City of New York and Borough of Brooklyn. The Site is rectangular shaped spanning between Bedford Avenue and Spencer Street with 25 feet of frontage along both Bedford Avenue and Spencer Street. The north and south sides of the property are bordered by residential buildings. The west side is bordered by the Bedford Avenue and the east side by Spencer Street. Site Features The Site is improved with a multi-story commercial building with one half accessible by Bedford Avenue and the other half accessible on Spencer Street. There is currently a cellar level below the 735 Bedford Avenue portion of the site. Current Zoning and Land Use The property is currently zoned M1-2. M1 districts are often buffers between M2 or M3 districts and adjacent residential or commercial districts. M1 districts typically include light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. Nearly all industrial uses are allowed in M1 districts if they meet the stringent M1 performance standards. Offices, hotels and most retail uses are also permitted. The current use of the building as office space is in compliance with the zoning. Surrounding land use includes multi-family residential properties to the north, commercial / retail / office use to the west, residential and commercial (warehouses) to the south and commercial (warehouses) to the east. The area surrounding the property is highly urbanized and predominantly consists of older industrial / commercial buildings with mixed use (retail / residential) buildings along main corridors such as Bedford Avenue Flushing Avenue and Park Avenue. There are ten

schools located within 1,200 feet of the Site including Bnei Shimon Yisroel of Sopron approximately 450 feet to the east. There were no nursing homes or hospitals identified within 1,000 feet of the Site. Past Use of the Site The environmental history of the subject property was previously investigated through the review of Federal and State Environmental databases, Environmental Sanborn Fire Insurance maps, NYC Department of Building records and the NYC Department of Finance databases. According to the review of these sources the Site has been developed since at least 1887 with a residential home through at least 1904. In 1918 the property is shown to be redeveloped with a 1story building identified as a carriage and auto repair shop. The present 3-story building is shown by 1935. The use from 1935 to 1965 is shown as storage. From 1977 to 1989 the building is labeled with an M which refers in general to manufacturing. From 1991 to 1996 the use is not specified. The Requestor purchased the property in March 2015. The investigation of this brownfield site is the result of the 735 Bedford Ave. (Site #224251) (aka Spencer Street Groundwater Plume) groundwater plume trackdown. Site Geography and Geology Subsurface soils at the Site consist of historic fill materials to a depth of approximately 1 to 5 feet below grade followed by native silty-sand and clay. According to the USGS topographic map for the area (Brooklyn Quadrangle), the elevation of the property is approximately 20 feet above mean sea level. The topography within the immediate area slopes gradually from south to north. Groundwater occurs beneath the Site at a depth of approximately 15 feet below grade under water table conditions. Based on groundwater flow maps on properties in the vicinity, groundwater flow is generally east. However, the groundwater flow direction was determined from groundwater elevation measurements taken on the Site show the flow direction to be from the south east to the northwest in the eastern half of the Site. The Site is not located within a designated flood zone area. "

Env Problem:

"Background: 224281 was identified as a potential source for contamination outlined in a plume track down identified as Spencer Street GW (Site 224251). As part of an off-site investigation performed upgradient to BCP site C224204 (11 Spencer) groundwater samples were collected showing high concentrations of chlorinated volatile organic compounds (CVOCs). Tetrachloroethene (PCE) was detected at 120,000 parts per billion or ppb (compared to a groundwater standard of 5 ppb), trichloroethene was detected at 38,000 ppb (compared to a groundwater standard of 5 ppb) and 1,1,1-trichloroethane was detected at 86,000 ppb (compared to a groundwater standard of 5 ppb). These elevated values located as part of an up-gradient plume led to the creation of P-Site Spencer Street GW. In the summer of 2017 Environmental Assessment Remediation (EAR) on behalf of the Department performed the plume track down. Four (4) monitoring wells (MW-1 to MW-4) were installed to delineate the plume. Concentrations of PCE ranged from 150,000 ppb in MW-3 to 0.33 ppb in MW-1 (compared to a groundwater standard of 5 ppb). Along with the groundwater analysis, five (5) soil samples were collected from four locations (MW-1 through MW-4) at the water table interface and/or the depth interval exhibiting indication of impact. PCE in soil samples ranged from 4,200,000 ppb in MW-3 to 0.7 ppb in MW-4 (compared to commercial soil cleanup objective (CSCO) of 150,000 ppb). C224282: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), some metals, and polychlorinated biphenyls (PCBs) as part of a

S123159094

limited subsurface investigation performed by Environmental Business Consultants (EBC) on behalf of the property owner. Sub slab soil Vapor samples were collected and analyzed for VOCs. Based upon the limited investigation conducted to date, the primary contaminants of concern are tetrachloroethene (PCE), trichloroethene (TCE), and 1,2-dichloroethene (1,2-DCE). Soil Based on the investigations completed to date, chlorinated VOCs are detectable in soil. Maximum concentration of PCE in soils collected on site are 4.2 ppm (unrestricted use soil cleanup objective (UUSCO) is 1.3 ppm). Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, and Dibenzo(a,h)anthracene were detected above CSCO objectives throughout the site. Groundwater PCE [maximum concentration 45,000 parts per billion (ppb), standard 5 ppb], TCE (9,100 ppb max, 5 ppb standard), 1,2-dichloroethene (4,200 ppb max, 5 ppb standard), and well as 1,1,1-TCA, 1,1-DCA, and 1,1-DCE were detected above the NYSDEC GA Groundwater Quality Standards. Sub-slab soil vapor and indoor air CVOCs were detected in the sub slab vapor and indoor air samples. Further evaluation of the results is required to determine if monitoring or mitigation is necessary on-site. "

Health Problem: "People are not expected to come into contact with contaminated soil or groundwater because the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The on site commercial building is occupied and actions are recommended to address potential exposures associated with soil vapor intrusion. Additional investigation is needed to determine whether additional actions may be needed to address the potential for exposure associated with soil vapor intrusion off-site."

(unrestricted use soil cleanup objective (UUSCO) is 1.3 ppm). Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, and Dibenzo(a,h)anthracene were detected above CSCO objectives throughout the site. Groundwater PCE [maximum concentration 45,000 parts per billion (ppb), standard 5 ppb], TCE (9,100 ppb max, 5 ppb standard), 1,2-dichloroethene (4,200 ppb max, 5 ppb standard), and well as 1,1,1-TCA, 1,1-DCA, and 1,1-DCE were detected above the NYSDEC GA Groundwater Quality Standards. Sub-slab soil vapor and indoor air CVOCs were detected in the sub slab vapor and indoor air samples. Further evaluation of the results is required to determine if monitoring or mitigation is necessary on-site. "

Health Problem: "People are not expected to come into contact with contaminated soil or groundwater because the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The on-site commercial building is occupied and additional investigation is needed to determine whether actions may be needed to address the potential for exposure associated both on and off-site."

SWIS: 2401
Town: New York City
Record Added Date: 12/17/2014
Record Updated Date: 08/24/2021
Update By: HMDUDEK
Site Description: "Location The Site is located in the Bedford Stuyvesant section of Kings County and is comprised of three tax parcels identified as Block 1716, Lots 20, 21 and 24 on the New York City Tax Map. The combined lots total 18,774 square feet (0.43 acres). The Site has 167.25 ft of street frontage on Spencer Street and 75 feet of street frontage on Flushing Avenue. The area surrounding the Site includes commercial to the south and west, mixed-use (1st floor retail) properties to the east, residential properties to the northwest, and commercial / industrial properties to the north. Site Features The Site is currently vacant with no structures present and is not being used. An 8-foot high construction fence borders the property on the north and west sites to prevent unauthorized access. Current Zoning and Land Use The property is currently zoned M1-2. M1 districts are often buffers between M2 or M3 districts and adjacent residential or commercial districts. M1 districts typically include light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. Nearly all industrial uses are allowed in M1 districts if they meet the stringent M1 performance standards. Offices, hotels and most retail uses are also permitted. Certain community facilities, such as hospitals, are allowed in M1 districts

only by special permit, but houses of worship are allowed as-of-right. Surrounding land use includes commercial to the south and west, mixed-use (1st floor retail) properties to the east, residential properties to the northwest, and commercial / industrial properties to the north. The area surrounding the property is highly urbanized and predominantly consists of older industrial/ commercial buildings with mixed use (retail / residential) buildings along main corridors such as Bedford Avenue, Flushing Avenue and Park Avenue. There are eight schools located within 1,200 feet of the Site including Bnei Shimon Yisroel of Sopron approximately 200 feet to the east (see Figure 5). There were no nursing homes or hospitals identified within 1,000 feet of the Site. Past Use of the Site Lot 21 was originally developed prior to 1887 with a 2-story residential home along Spencer Street and a stone yard which fronted on Flushing Avenue. The most recent building was constructed in 1935 and was used as a garage. By 1947, the main portion of the building was used as a sheet metal works with the Spencer Street portion used as a private garage. By 1950 the private garage became part of the sheet metal works and was used for painting and spraying and making wire and wire products. The building remained in this use through at least the 1990's. Lot 20 was originally a storefront but has been a vacant lot used for parking since 1935. Lot 24 was used as a lumber shed in 1918, then as a tire shop from 1935 to 1950, storage from 1965 to 1996. The current owner purchased the property in March 2015. The buildings on lot 21 and 20 were demolished in 2018?. Site Geology and Hydrogeology Subsurface soils at the site include a silty non-native fill with ash and other rubble which varies in depth from 1 to 5 feet. A fine silt, and in some locations clay, is present beneath the fill at a depth of approximately 3 to 5 feet. Crushed rock and coarse sand grading to fine sand and silt is present below the fill and silt and extends to the water table (10 to 15 feet bgs). This is followed by a medium to coarse sand to a depth of 20 feet with cobbles and coarse sand observed in the vicinity of the source area from 20 to 50 feet below grade. The groundwater flow direction as determined from on-site groundwater elevation measurements is north and east. A site location map is attached as Figure 1. "

Env Problem:

"Nature and Extent of Contamination : Soil: A Focused Subsurface Site Investigation was conducted in July 2014 and a Supplemental Focused Subsurface Investigation was conducted in September 2014. The primary contaminant of concern in soil is PCE. PCE was detected at all 46 reported on-site soil sampling locations, at a maximum of 32 parts per million (ppm) in one of the soil samples collected from a boring that was installed near the concrete degreasing pit within the building. This concentration exceeds both the Unrestricted Use soil cleanup objective (UUSCO) of 1.3 ppm and the Protection of Groundwater SCO (1.3 ppm). No petroleum-related volatile organic compounds (VOCs) were detected in soil at concentrations exceeding the UUSCOs. Additional soil samples were collected in 2015, 2016 and 2017. During that investigation, the highest concentration of PCE was detected in MWC2 (2/22/17) at 900 ppm at 11/12 feet below grade surface. Contaminants of concern have also been detected in off-site soil samples collected to the north and west of the BCP site. Adjacent BCP sites abut the Site to the east. Additional delineation of off-site impacted will be required as part of the RAWP. Groundwater: Multiple investigations were performed on-site from 2014 to 2019. Groundwater samples have been collected from nineteen monitoring wells. Several compounds were detected well above

S117362879

standards in groundwater during the Focused Subsurface Site Investigation. PCE was detected at a maximum of 47,000 parts per billion (ppb) (standard of 5 ppm), TCE at a maximum of 250 ppb (standard of 5 ppm), DCE at a maximum of 260 ppb (standard of 5 ppm), and 1,1,1-TCA at a maximum of 3,100 ppb (standard of 5 ppm). During a supplemental investigation, toluene was detected at a maximum of 66,000 ppb (standard of 5 ppm). Supplemental groundwater samples were collected in 2017. CVOs were the primary contaminants of concern. PCE was detected at a maximum concentration of 120,000 ppb (standard of 5 ppm), TCE at a maximum concentration of 38,000 ppb (standard of 5 ppm), DCE at a maximum concentration of 4,200 ppb (standard of 5 ppm), and 1,1,1-TCA at a maximum concentration of 86,000 ppb (standard of 5 ppm). Contaminants of concern have also been detected in off-site groundwater samples collected to the north and west of the BCP site. Adjacent BCP sites about the Site to the east. Additional delineation of off-site impacted will be required as part of the RAWP. Soil Vapor and Indoor Air: Sub-slab vapors containing PCE and TCE have been found beneath the building slab at levels as high as 1.6 million micrograms per meter cubed (ug/m3) and 82,000 ug/m3, respectively. These same compounds have been detected within the indoor air in the building on Lot 21 (prior to demolition), with PCE observed as high as 80 ug/m3 and TCE observed as high as 30.8 ug/m3. These concentrations represent a concern for soil vapor intrusion with respect to any on-site buildings that will be built and nearby offsite buildings. Neighboring lots were analyzed for soil vapor intrusion as part of the remedial investigations. Lot 26 had maximum sub-slab concentrations of PCE and TCE a5.47 ug/m3 and 3,000 ug/m3 respectively. Indoor air concentrations of PCE and TCE within Lot 26 resulted maximum concentrations of 14.4 ug/m3 and 0.84 ug/m3 respectively. "

Health Problem:

"Access is restricted by a fence. People may contact contaminants in soil by walking on the site, digging, or otherwise disturbing the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The site is currently vacant and redevelopment is planned. The potential exists for the inhalation of site contaminants due to soil vapor intrusion for future on-site buildings. Action is recommended to address potential exposures at an adjacent building. Additional investigation is needed to determine whether actions are needed to address soil vapor intrusion in other off-site structures."

Contact Name:

FRANK GALDUN

DEC Memo:

"09/15/14-Hiralkumar Patel. alternate addresses: 476-478 Flushing Avenue no other spills or PBS record found. 12:57 PM:- spoke with Frank. as part of property transaction, a phase I and phase II investigations were conducted at former sheet metal factory. the site is currently vacant. during phase II investigation, PCE (50 ppm) and toluene (60 ppm) are found in groundwater. asked Frank to submit copy of investigation reports. 09/24/14-Hiralkumar Patel. 2:53 PM:- spoke with Mark Mandell, property owner's representative. asked him to submit copy of Phase I and Phase II reports for review. Mr. Mandell asked to send request in email. Mark Mandell **property owners representative** Mandell Mandell LLP. 80-02 Kew Gardens Road, Suite 606 Kew Gardens, NY 11415 PH. (718) 427-2191 Fax (718) 427-2193 email: mark@mandellmandell.com 3:09 PM:- sent email to Mr. Mandell and asked to submit copy of available environmental investigation reports for review. 3:23 PM:- left message for Alan Brooks, whose name is listed in last property tax bill from NYC Finance. as per NYC Finance record, property is owned by I. T. F. Corp. I. T. F. Corp. **property owner as per NYC Finance** c/o Alan Brooks Brooks & Cantor LLP. 3000 Marcus Avenue, Sutie 2E4 New Hyde Park, NY 11042-1005 Ph. (516) 326-6767 Fax (866) 344-7288 email: brooksea@optonline.net 3:30 PM:- sent email to Mr. Brooks with copy of email previously sent to Mr. Mandell. asked Mr. Brooks to submit copy of available environmental investigation reports for review. 09/25/14-Hiralkumar Patel. 7:04 AM:- received email from Frank including draft copy of Focused Subsurface Site Investigation report and Supplemental Focused Subsurface Site Investigation report. Frank mentioned that these reports were made for Merritt Environmental, who subcontracted them. abstract of focused subsurface site investigation report: - site consists multiple lots on two block: 1. Block# 1716 / Lot# 24 (and 25, as per tax lot) (1-9 Spencer St, 466-468 Flushing Ave) - approx. 2,500 sq. ft. vacant located at the southeast corner of the intersection between Flushing Ave and Spencer St 2. Block# 1716 / Lot# 20 (15 Spencer St) and 21 (11 Spencer St, 476-478 Flushing Ave) - one large 20,000 sq. ft. vacant one-story former manufacturing building with no basement used in large part for sheet metal manufacturing ----- 3. Block# 1716 / Lot# 15 (25 Spencer St) and 16 (23 Spencer St, 28-32 Walworth St) - one approx. 4,000 sq. ft. single-story manufacturing/warehouse building that is currently contains a seafood distributor 4. Block# 1716 / Lot# 14 (27 Spencer St) - approx. 7,000 sq. ft exterior stockyard used by the seafood distributor 5. Block# 1715 / Lot# 29 (12 Spencer St, 735 Bedford Ave) - vacant three-story commercial building with a full basement - site elevation is estimated at roughly 20 ft above mean sea level - Phase I conducted by Merritt Engineering - Phase I indicated historical underground benzene storage tank, evidence of a former aboveground storage tank containing TCE and at least two historical gasoline USTs at 476 Flushing Ave (former sheet metal manufacturing facility) ----- GPR survey found one subsurface anomaly resembling a UST at the Flushing Ave side of the former sheet metal manufacturing building, and possible UST fill pipe in vacant lot (lot #: 24/25) - one 07/21/14, total of 16 borings (B1 through B16) were installed on lots associated with this project - borings B15 and B16 were installed in the basement of building at 12 Spencer St (lot #: 29), to a maximum depth of 3 ft below basement floor where refusal encountered - during field activities, it was observed that all equipment and other items associated with former operations within

S117362879

the sheet metal manufacturing building had been removed - a large concrete-lined pit is located within this building and its former use was unknown. however, a former employee of the manufacturing operations said that the pit was a former dipping tank for cleaning metal with solvents - former worker also recalled possible dumping of water solvent at the southeast corner of the open stockyard at south end of the site ----- groundwater was encountered at approx. 13 ft bg - a distinct solvent odor was detected in soil and groundwater samples collected from boring B10, which was located nearest to the concrete pit in the sheet manufacturing building - due to field evidence of possible contamination, two soil samples were collected from boring B10 - groundwater samples were collected from borings B1, B6, B7, B8, B9, B10 and B14 - found chlorinated solvent contamination in soil and groundwater samples soil analyticals:

-----B10 9-10 ft PCE-----32,000

groundwater analyticals:

TCE-----44-----41-----71-----11-----23-

-----250-----6 abstract of supplemental focused subsurface

site investigation report: - additional six (6) soil borings were installed (B17 to B22) to investigate groundwater quality - shallow and/or deeper groundwater samples were collected from borings, based on its location in reference to borings installed during previous investigation - shallow groundwater samples were collected from the water table zone (13-17 ft bg) and deeper samples were collected from 31-35 ft bg groundwater analyticals:

-----B18-----B18-----B19-----B22 13-17

ft 30-34 ft 31-35 ft 31-35 ft Toluene-----66,000-----860

TCE-----19-----35-----16 -

boring B19 was installed near previous boring B10 and only deeper groundwater sample was collected from B19 as shallow sample was collected from B10 earlier - toluene release may hve originated from a small flammable materials storage room at the west side of the 11 Spencer St building. this area was formerly used for spray painting metal products other spill #: 9311586 was reported on 12/28/1993 at 25 Spencer Street (lot #: 25) due to dumping issue. case closed. ----- PBS #: 2-356913 is recorded for 21-23 Spencer Street (lot #: 16). as per PBS record, building 23 had one (1) 1,000 gal #2 oil UST and two (2) 275 gal #2 oil ASTs. the UST was removed in Oct. 1993 and the ASTs were converted to non-regulated use. ----- 2:01 PM:- spoke with Victoria at Merritt Engineering and asked for copy of Phase I report. she mentioned that someone from her office will call back. 09/26/14-Hiralkumar Patel. 10:04 AM:- received email from Maryann Wegh (mwegh@merritttec.com) of Merritt Engineering including link to Phase I report. abstract of Phase I: - on-site investigation was conducted on 07/07/14 - property currently consists of a four (4)

1-story vacant and one (1) occupied commercial manufacturing warehouse buildings, located on a combined plot size of approx. 33,724 sq. ft. - the buildings were constructed circa 1931 - database review indicated 550 gal UST for Benzene and a 275 gal AST for TCE (CBS #: 2-000024) were registered to 476 Flushing Ave (aka 11 Spencer St) ----- as per CBS record, the Benzene UST was removed in May 1992 and the TCE AST was removed in Jan. 1995 ----- there appears to be two (2) underground gasoline tanks which are no longer in use buried in the 1-9 Spencer St AKA 476-478 Flushing Ave front driveway on Spencer St and under the ground floor slab of 476-478 Flushing Ave - sanborn map for 1935 shows a gasoline tank present at the 476-479 Flushing Ave - a gasoline fill box which is no longer in use was noted in the parking lot next to the 11 Spencer st building - surface oil staining was noted throughout 13-15 Spencer St and 476-478 Flushing Ave - there is a 2,000 gal #2 oil AST located in the basement of the Flushing Ave building but the size of the tank could not be confirmed due to flooding - RCRA Non Generator, EPA ID #: NYD001287671 - Delta Metal Products Co. - 476 Flushing Ave - historical use of 1-15 Spencer St and 466-468 and 476-478 Flushing Ave consisted of a junkyard, shed, manufacturing, sheet metal works and paint spraying ----- two (2) 275 gal #2 oil ASTs are located in the basement of 12 Spencer St discussed with DEC Jane O'Connell. after reviewing the data, she asked to transfer case to her name. 7/3/15 Greco assigned as PM of spill #1406369. Spill will be addressed under 11 Spencer Street BCP Site. 5/27/21 - reassigned to Aaron Fischer. See site no. C224204. (JHO)"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

HW Code: 224239
Record Add: 06/23/2016
Record Upd: 11/08/2021
Updated By: HMDUDEK
Site Description: "This site is being managed under BCP site C224239. "
Env Problem: "Nature and Extent of Contamination: The chlorinated solvent compounds tetrachloroethylene (PCE) and its breakdown products trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE), as well as other volatile organic compounds (VOCs) were detected in soil and groundwater samples during investigation in December 2007. Soil Chlorinated solvents were detected in one soil sample collected from above the water table at concentrations exceeding unrestricted use soil cleanup objectives: PCE (4.3 parts per million, or ppm) and TCE (0.87 ppm). Groundwater Chlorinated solvents were detected in all four groundwater samples collected at the site: PCE ranges from 17 to 30,845 parts per billion, or ppb; TCE ranges from 31 to 48,675 ppb; and cis-1,2-DCE ranges from 7 to 164,000 ppb. Non-chlorinated VOCs were detected in one groundwater sample (MW-2): toluene (75,488 ppb), ethylbenzene (4,393 ppb) and xylene (17,405 ppb). Significant Threat: A significant threat determination will be made following completion of a site characterization."
Health Problem: "As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

block bounded by Flushing Avenue to the north, Walworth Street to the east, Park Avenue to the south, and Spencer Street to the west. The subject property occupies an area of 3,910 square feet (0.089 acres) in the northeastern portion of a city block. The property is rectangular shaped with 78 feet of frontage along Walworth Street. The north, south and west sides of the property are bordered by warehouses and commercial / industrial buildings. Two Brownfield sites with co-mingled contaminant plumes adjacent to the target property. 11 Spencer Street (C224204) to the west and 480 Flushing Avenue (C224259) to the north. Site Features: The site is improved with a 3,910 square foot one-story masonry building constructed in approximately 1982. The building is divided into two sections each with its own access to the outside; the north section was used as warehouse space and the south section was used as a prayer room. The building is currently vacant. Current Zoning and Land Use: The property is currently zoned M1-2. The site is zoned for light industrial uses, such as repair shops and wholesale service, offices, retail and certain community facilities, such as hospitals, are allowed in M1 districts only by special permit. The proposed project, which includes a community facility, is compatible with the surrounding land use and will be in compliance with the current zoning. Past Use of the Site: The historic use of the site includes a storefront building, garage and residence from sometime prior to 1887 to sometime before to sometime before 1965 when a two-story residence remained on the south side of the site and a single-story warehouse used for chemical drum storage was present on the north side of the site. By 1977, the two-story residence was no longer present, and the single-story chemical drum storage warehouse remained on the north side of the site. By 1982 the site was redeveloped with a single-story paint mixing warehouse. The site was utilized as community gathering space and prayer room prior to entering the Brownfield Cleanup Program. The site and adjacent properties have remained generally unchanged through the current day. This site was originally a P site (Former Techtronics Ecological Site, Site No. 224239). The site then entered the BCP program in March 2018 to complete the remedial investigation and remedy. Site Geography and Geology: The geologic setting of Long Island is well documented and consists of crystalline bedrock overlain by layers of unconsolidated deposits. According to geologic maps of the area created by the United States Geologic Survey (USGS), the bedrock in this area of Brooklyn is an igneous intrusive classified as the Ravenswood grano-diorite of middle Ordovician to middle Cambrian age. Unconsolidated sediments overlie the bedrock and consist of Pleistocene aged sand, gravel and silty clays, deposited by glacial-fluvial activity. Non-native fill materials consisting of dredge spoils, rubble and / or other materials have historically been used to reinforce and extend shoreline areas and to raise and improve the drainage of low-lying areas. Subsurface soils at the site consist of historic fill materials to a depth of approximately 4 to 6 feet below grade. Silty sand and gravel are present immediately below this layer. According to the USGS topographic map for the area (Brooklyn Quadrangle), the elevation of the property is approximately 20 feet above mean sea level. Depth to groundwater is approximately 13 feet below grade. The topography within the immediate area slopes gradually from south to north. The groundwater flow direction as determined from on-site and off-site groundwater elevation measurements is east-southeast. The site is not located within a

Env Problem: designated flood zone area. The nearest moderate risk flood zone is located 800 feet to the northwest and the nearest high risk flood zone is located 950 feet to the northwest. "

"Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Soil vapor was analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern include chlorinated VOCs, SVOCs and metals in soil, chlorinated VOCs in groundwater, and chlorinated VOCs in soil vapor. Soil Chlorinated Volatile Organic Compounds (CVOCs) were detected above Protection of Groundwater Soil Cleanup Objectives (PGSCO) and Restricted Residential Soil Cleanup Objectives (RRSCO). The highest concentrations of tetrachloroethene (PCE) are 3,200 parts per million (ppm) (PGSCO: 1.3 ppm and RRSCO: 19 ppm), and trichloroethene (TCE) are 200 ppm (PGSCO: 0.47 ppm and RRSCO: 21 ppm). SVOCs and Metals were also detected above RRSCOs. The highest concentrations of lead are 8,970 ppm (RRSCO: 400 ppm), mercury are 5.2 ppm (RRSCO: 0.81 ppm), benzo(a)anthracene are 4 ppm (RRSCO: 1 ppm), benzo(a)pyrene are 3.3 ppm (RRSCO: 1 ppm), benzo(b)fluoranthene are 3.1 ppm (RRSCO: 1 ppm) and Indeno(1,2,3-C,D)Pyrene are 2.9 ppm (RRSCO: 0.5 ppm). Perfluorooctanesulfonic acid (PFOS) was measured in soil at concentrations ranging from 0.00478 part per billion (ppb) to 26.8 ppb, which is below the guidance value for restricted residential use of 44 ppb. Perfluorooctanoic acid (PFOA) was measured in soil at concentrations ranging from 0.00043 part per billion (ppb) to 0.915 ppb, which is below the guidance value for restricted residential use of 33 ppb. Data does not indicate any off-site impacts in soil related to this site. Groundwater - Groundwater samples collected at the site exceeded the Ambient Water Quality Standards (AWQSs) for PCE at a maximum concentration of 58,000 ppb (AWQS is 5 ppb), TCE was detected at a maximum concentration of 69,000 ppb (AWQS is 5 ppb), and cis-1,2-dichloroethene was detected at a maximum concentration of 120,000 ppb (AWQS is 5 ppb). PFOS was detected above the maximum contaminant limit (MCL drinking water standard) of 10 parts per trillion (ppt) at a maximum concentration of 12.51 ppt. PFOA was not detected at concentration exceeding the MCL. Data indicates off-site impacts in groundwater related to this site. Off-site impacts will be further delineated during remediation. Soil Vapor, Sub-Slab Soil Vapor and Indoor Air - Chlorinated VOCs were detected in soil vapor samples, including TCE at a maximum concentration of 488,000 micrograms per cubic meter (ug/m3) and PCE at a maximum concentration of 590,000 ug/m3. Chlorinated VOCs were detected in indoor air samples including TCE at a maximum concentration of 1,570 ug/m3 and PCE at a maximum concentration of 3,690 ug/m3. Data indicates there is potential for off-site impacts in soil vapor related to this site. "

Health Problem: "People may contact contaminated soils or groundwater if they dig below the surface. Contaminated groundwater at the site is not used for drinking or other purposes and this site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The site is currently vacant and redevelopment is planned. The potential exists for the inhalation of

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE

Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 9/8/99 On site. Wolf Landau, owner of site, 1-800-543-5007 212-966-3404 Phil DeBlasi Tyree 516-249-3150 ext 352 Wolf's contractor excavating for footing of five residential bldgs on northern portion of property. Phil handed DEC analytical from boring that were performed along northern portion of property all clean. Phil was getting hits from his mini rae meter - but no odors. When DEC rechecked same soil with PID, no detection whatsoever. JMR 9/9/99-Spoke to Lou from Tyree, who is proposing addtl Geoprobe investigation on the station property to investigate the impact to groundwater and the installation of permanent monitoring wells along the perimeter on the sidewalk to monitor the groundwater. I recommended the complete source removal in the areas where tank pull endpoints were hot. JMR 3/13/0 REASSIGNED FROM ROMMEL TO VOUGHT. 1/6/03-Vought-Spoke to Dr. Youssefnia (516-338-0626) (718)997-8688 who is working owner who was requesting site information. Vought sent him a copy of the FOIL request. Dr Youssefnia stated that according to a building expediter he was working with, a building was already on-site. 1/29/2004-Vought-File review by Vought: Tank Closure

Report-March 1998-Tyree Organization(Joe Rennie-631-249-3150). Reason for tank closure was property divestment. Excavation and removal of three (4000-gallon) gasoline USTs west of station building, twelve (550-gallon) gasoline USTs located west of station building(previously abandoned with water), three (550-gallon) steel USTs located on southwest corner of property (previously abandoned with water), one (1000-gallon) fuel oil UST(previously abandoned) located southeast of station building, one (550-gallon) fuel oil UST located adjacent to Bedford Ave, and one (550-gallon) waste oil UST located north of station building. Surrounding property is residential/commercial. Gasoline service station located across Flushing Ave southwest of site. Soil analyticals show up to 2250ppb xylene(ASW3), 607ppb MTBE(ASW3), 2330ppb benzene(ASW4), 17800ppb naphthalene(ASW4), 1120ppb benzene(ASW5), 21800ppb naphthalene(ASW5), 93.1ppb benzene(ASW6), 5640ppb naphthalene(ASW6), 3280ppb xylene(ASW8) and 132ppb MTBE(ASW10). All ASW samples from gasoline excavation. Soil analyticals also show 116000ppb phenanthrene(HL1) and 2940ppb ethylbenzene(HL2). All HL samples are from hydraulic lifts. 254.63 tons of soil were excavated and removed (disposal manifest provided) in Dec 1997. 1309.06 tons of soil were excavated and removed in Feb 1998 (disposal manifest provided). Email to DEC(O'Dowd) from Tyree(Devaux)-12/9/98. New property owner is Wolf Landau. Subsurface Investigation Report-Tyree Org-5/24/99. Nine soil borings performed north of gasoline excavation. Soil analyticals show 7950ppb xylene(B6 6-8'), 60400 1,2,4-Trimethylbenzene(B6 6-8'), 5660 1,3,5-Trimethylbenzene(B6 6-8'). No water samples taken. Email from Tyree(Louis Drozd) to DEC(O'Dowd)-9/3/99. Tyree requests environmental officer onsite to avoid potential conflicts with respect to underpinning of site which has already begun. Progress Report (Tyree)-11/4/99. Approximately 50% of the entire excavation has been completed. During the excavation of the northwest end of the property, a concrete vault containing two 550-gallon steel riveted tanks was discovered . Tanks were removed. Impacted soil observed approximately 8-10 feet below grade around the tank excavation area. Excavation of impacted soil to depth of 12'. Geoprobe investigation planned for 11/99 around old tank field. Email from Tyree(Drozd) to DEC(Rommel)-11/29/99. Two borings performed in areas suspected of having highest contamination . A full report will be submitted. Letter from DEC(Rommel) to Getty(Ochotororena)-11/30/99. Currently the owner has constructed the foundation walls but significant soil and groundwater contamination still exists at the site . Therefore the Department does not recommend that construction of a residential building continues on top of high concentrations of petroleum that currently exist in soil and the shallow groundwater . The Department required: 1)submission of soil endpoint analyticals 2)submission of a workplan including full delineation of soil and groundwater contamination, source removal, installation of a vapor barrier, long term remediation proposal for groundwater. Rommel spoke to Samuel Salamon (917-903-9813) and explained that significant contamination still exists on site and that construction of residential building is not recommended. Salamon indicated that he spoke with Drozd who assured him that soil was clean and ok for construction. Email from Tyree(Drozd) to DEC(Rommel)-11/30/99. To date, Tyree has organized the disposal of approximately 800 yards of additional impacted soil since the beginning of excavation activities in August 1999. Impacted soil was observed primarily in the area north of the sand fill next to the former tank field. Impacted soil was removed to a depth of 14'

below grade. Letter from DEC(Rommel) to Getty(Ochotorena)-11/30/99. The Department does not recommend that construction of a residential building continues on top of the high concentrations of petroleum that currently exist in the soil and shallow groundwater . The Department requires: submission of endpoint analyticals, submission of a workplan including delineation of soil and groundwater contamination (including five wells in the sidewalk along Flushing avenue, Bedford Ave and along the eastern portion of the property), source removal, installation of a vapor barrier and horizontal piping for later biological treatment/passive venting/SVE and long term remediation proposal for groundwater contamination. Once the source material has been removed and the vapor barriers have been installed construction of the foundation can continue . Copy of letter also sent to Landau. Email fro Tyree(Drozdz) to DEC(Rommel)-12/1/99. We would like to request a cease of construction order, directed to the property owner, as dictated by the state . Letter from Tyree(Drozdz) to DEC(Rommel)-12/2/99. Further delineation scheduled for 12/3/99. Tyree will evaluate requirements in in 11/30/99 letter and provide a response upon client approval. 800 yards of additional soil was excavated. As per DEC request, the impacted soil in this area was removed to a depth of approximately 14 feet below grade in the areas of gross contamination, directly above the groundwater interface . Soil/groundwater borings were conducted in the area of the highest observed contamination (B-2 and B-3). Other boring attempts were unsuccessful due to unstable and confined site conditions that limited equipment access . Further site delineation will be conducted on December 3, 1999 . Soil analyticals show 21800ppb ethylbenzene(B2 15-17'), 95800ppb xylene(B2 15-17'), 39100ppb xylene(B3 10-12'), 45000ppb toluene(B3 15-17'), 69000ppb ethylbenzene(B3 15-17') and 243000ppb xylene(B3 15-17'). Remedial Action Plan(Tyree)-12/23/99. Plan involving additional removal of grossly impacted soils to the groundwater interface, followed by short term land farm type bioremediation project, concluded with installation of a process controlled, enzyme enhanced bioremediation . Required horizontal piping will installed. Final stages of excavation/removal process will be followed by the installation of a horizontal piping gallery and a groundwater recovery well. Clay at site may inhibit SVE. A geomembrane liner will be installed to ensure no vapor migration into above residence. Letter from DEC(Rommel) to Tyree(Drozdz)-1/7/00. DEC has reviewed RAP. DEC staff is currently reviewing the bioremediation portion of the proposal and will provide comments in the near future . DEC approves the proposed additional soil excavation and monitoring well installation . Letter also noted additional borings may be required. Well Installation Report (Tyree)-1/2/00. Tyree has succsesfully installed four monitoring wells in the sidewalks on Bedford and Flushing Avenues . Apparent groundwater flow to the southeast. Groundwater analyticals show 8.9ppb benzene(W1), 34.7ppb toluene(W1), 180ppb xylene(W1), 38ppb napthalene(W1), 14ppb MTBE(W2), 28.5ppb MTBE(W3), 71.4ppb benzene(W-4) and 161ppb MTBE(W-4). Letter from DEC(Rommel) to Getty(Ochotorena)-2/18/00. DEC approves the bioremediation portion of the RAP pending the ammendment of the following: 1)The reinjected water must meet one of the following criteria: it must meet wastewater limits for groundwater discharge and the area in which the injection is taking place is hydraulically controlled by a system that prevents migration of contaminated groundwater beyond the boundaries of the containment zone 2)inclusion of a performance monitoring plan via establishment of a baseline

fingerprint chromatogram of the groundwater prior to treatment to see if there is a shift in the chromatogram after treatment starts, analysis must also be performed for dissolved oxygen, 8260/8270 and GC/MS fingerprints. DEC recommends sampling every two weeks initially 3)additional installation of monitoring wells east of W-4, south of W-4, west of W-1, south of W-3. Letter also included STIPULATION AGREEMENT. Letter from Tyree(Drozdz) to DEC(Rommel)-1/22/00. Due to unforeseen litigation between the property owners and our client, further work has been put on hold until a resolution to pending legal issues has been resolved. Groundwater Results-The Praetorian Group-8/8/00. Performed groundwater and soil analysis of well samples and boring samples for Mr. Landau. It is our considered opinion that the contamination has not progressed beyond the perimeter of the property bordered by Bedford Avenue or Flushing Avenue. During sampling strong gasoline odor noted in MW2, MW4 and MW5. Groundwater analyticals show 28ppb naphthalene(MW-2), 400ppb MTBE(MW2), <100ppb benzene(MW2), 16ppb MTBE(MW3), 2ppb benzene(MW4). Business Card: Wolf Landau, Conintental Sportwear, 135 West 27th Street, NYNY 10001 Letter from Praetorian Group(Pat D'Agnese-718-359-5826)-11/27/00. We are pleased to offer this outline of our proposed RAP . Our plan calls for measured applications of our bacterial enzyme product. We will install an irrigation and vapor extracting system that will allow the The Praetorian Group to treat the site further, if necessary . Proposal also to install horizontal slotted piping across the excavation. Letter from Cosmos Environmental (Alexander Avrasen-516-374-7890). I would like to inform you that for reasons not under our control, Cosmos Environmental Services is delayed with the installation of a soil vapor recovery system . Letter also attached from Cosmos to Landau-5/2/01. Despite numerous requests the area designated by you for the installation of a SVES shed is still covered with trees and debris I specifically requested that our office be notified regarding the date and time of the installation of subsurface portions of the concrete enclosures for the elevators and the foundation walls. No notification was made of this work and this work has been completed without our presence I observed some parts of the installed pipework broken and or missing . 1/29/04-Vought-After file review NYSDEC requires: 1)signing of Stipulation agreement 2)delineation east of W-4, south of W-4, west of W-1 and south of W-3 3)current status of underground piping and recovery wells 4)immediate sampling of monitoring wells 5)surrounding area property and use sketch 6)immediate PID survey of basement. Vought called Landau (212-966-3404) with requirements and left message to return call to DEC. Vought called Dr. Yousefnia and left message to return call to DEC. Vought sent certified STIPULATION AGREEMENT including above requirements on 1/2/04. 1/2/04-Vought-Spoke with Wolf Landau who has claimed responsibility for site investigation and remediation. Vought sent STIP to Landau with 3/2/04 deadline. 3/10/04-Vought-Called Landau and Stipulation deadline extended to 4/12/04 due to FOIL review process. If Stipulation not received by 4/12 case will be referred to DEC legal. 4/2/04-Vought-Received signed Stipulation Agreement by Wolf Landau dated 4/2/04. Stip implemented by DEC Kunkel on 4/9/04. Vought faxed copy of Stip to Landau. 5/13/04-Vought-Spoke to Dr. Youssefnia and he stated that DEP was also involved in review process (Callista Nazaire project manager -718-595-4401 fax 718-595-4479). Vought left message for Callista to return call to DEC. Vought called Wolf Landau and left message repeating Corrective action plan requirements and requirement of complete investigation by

6/9/04. 5/14/04-Vought-Received call back from Callista and no file on record with DEP. Vought faxed Callista copy of spill report and awaiting DEP response. Vought spoke to Wolf Landau and repeated 6/6/04 deadline for submission of investigation report.
6/10/04-Vought-Called Wolf Landau with regards to Investigation report and Landau agreed that if DEC did not receive report by 6/23/04 it would be referred to DEC Legal. 06/11/04-Vought-Received proposed workplan from New York Petroleum and Drilling (Dr. Youssefnia 800-958-1941) dated 6/1/04. Submitted herewith is our proposed scope of work and cost estimate to complete an environmental investigation at the following properties, 713-723 Bedford Avenue . All excavation and construction on the existing six story building has been completed . The following tasks will be performed to rule out any possible contamination...1.Conduct a detailed air monitoring program through the entire basement...with a volatile screening device 2.A professional engineer will investigate the basement concrete, foundation, elevator pits, any cracks, pipes utility etc. . Complete soil borings to the depth of 8-12 feet or water interface. Collect and analyze two soil samples according to workplan specifications. Vought arranged office meeting with Landau, Youssefnia and DEC legal.
6/14/04-Vought-Soil, Water and Air Investigation Plan (NY Petroleum and Drilling Iradj Youssefnia) dated June 14, 2004. The purpose of this workplan is to meet DEC/DEP requirements pertaining to soil sampling at the site. Proposal for four Geoprobe soil borings. No site plan with proposed locations included. If no elevated OVM readings or visual staining is observed, the sample will be collected 0-2 feet and 8-10 feet below grade . Air monitoring program will be conducted using a Century Model OVA 128 Organic Vapor analyzer... .
06/24/04-Vought-Reviewed workplan. According to STIP Investigation Summary due on April 2, 2004. Interview with consultant revealed that building is already occupied. As a result: 1)case may be referred to DEC legal for enforcement upon results of 7/1/04 meeting 2)Site visit is scheduled to look for vapor impacts and well locations 3)notification will be made to DEP Cabbagestalk and NYCDOB Phyllis Arnold due to E designation and current occupancy 5)monthly indoor air sampling as per NYSDOH guidance will be required 6)current status/sampling of SVE piping 6)installation of delineation wells east of W-4, south of W-4, west of W-1 and south of W-3 and sampling of current wells 7)determination of actual and not apparent groundwater flow direction 8)submission of endpoint analyticals from final terminus of excavation including depth and location of samples collected 9)site plan with proposed boring locations 10)soil sampling procedures of highest PID reading/deepest dry soil sample as stated in 2/6/04 letter. 6/25/04-Vought-Sent email to Caggabestalk(NYCDEP) asking if current occupation of buildings violates E designation and the certificant of occupancy (if there is one). Site visit by Vought. Site occupied by seven story residential apartment building with some apartments already occupied. Monitoring wells still in sidewalk. East of site is Universal Springs with no signs of vents or remote fills. South of site is seven story residential apartments of same age and build (possibly same developer and owner). Pride gasoline station located to the southwest and residential apartments under construction to the west. North of site is two story commercial building with no vents or remote fills. Inspected basements and sumps of 713, 717 and 723 Bedford Avenue and top floor of 723 Bedford Avenue. No PID readings or olfactory evidence noted. Poured concrete foundation with no signs of vapor pathways. According to site

representative (Mr. Soloman) residents moved in two months ago. 6/28/04-Vought-Fowarded 6/25/04 email to NYCDOB Phyllis Arnold for notification purposes as per her request during 6/24/04 NYCDOB/DEC teleconference. 7/1/04-Vought-Meeting at DEC with DEC Vought, Rommel, Nagi, Oliva and Landau, Youseffnia, Masonette and Vann(attorney 212-389-7810). Investigation Summary will be received by DEC by 8/16/04 meeting all requirements of 2/6/04 DEC letter. 8/10/04-Spoke with Billy Masonette and all wells will be located across street. Drilling will begin tomorrow and DEC will receive report by 8/31/04. 8/30/04-Vought-Received message from Billy Masonette that drilling will occur next week and was delayed due to necessity of markouts. 9/2/04-Vought-Received message from Billy Masonette that wells were installed and will be sampled. 9/8/04-Vought-Called Masonette and required him to submit a formal deadline extension request including a submittal date of Investigation Summary Report. Vought spoke to Masonette and he will send in required letter. 9/17/04-Vought-Called Masonette (646-523-1646) and left him a message to have him submit a Investigation Summary Report/Remedial Action Workplan and also inquired about extension request letter. DEC will only grant extension till 10/4. 10/7/04-Vought-Letter from NYCDEP(Caggabgestalk) to DOB dated 7/14/04. I am writing to inform...DOB...that the hazardous materials and noise E designation requirements for 723 Bedford Avenue...have not been metbuilding permits should not have been issued for the site(i.e. Certificate of Occupancy) . The developer should submit a Phase I ESA along with detailed description of the residential development and construction activities to DEP for review . 10/7/04-Vought-Letter from NY Petroleum Drilling to DEC Vought dated 9/29/04. Four monitoring wells installed after setback by Keyspan . We are finalizing thre rest of the project for the mentioned property once we have gather all the information needed we will submit(sic) a report to your agency . Vought called Petroleum Drilling and left message to return call with submittal date. 10/21/04-Vought-Called Masonette for submittal date. 11/8/04 Spoke to Youssefnia. Expect report by 11/15/04. (KMF) 11/18/04-Vought-Phase II Report (NY Petroleum and Drilling Corp. Billy Masonette) dated 11/2/04. Installation of four additional monitoring wells. The conditions on the existing wells on site W-3 and W-4 was poor, no cap was inplace and the piping for these two wells was broken. Report recommends that we can conclude that no further investigation or test is needed on the property . Groundwater analyticals show 20ppb MTBE(W2), 6ppb toluene(W2), 6ppb xylene(W2), 7ppb xylene(W4), 37ppb MTBE(W7). Don Carlo Environmental in conjunction with allied waste services removed from the property approximately 1200 tons of contaminated soil . A total of 53 readings (OVA) were taken in the entire building. There were no elevated readings detected . DEC requires: 1)site plan with well locations 2)continued quarterly groundwater monitoring 2)determination of groundwater flow direction 3)notification of next sampling event so DEC can be present. Vought sent letter with above requirements on 11/22/04. 12/13/04-Vought-Received message from Masonette that he will be sending in site plan. 1/20/05-Vought-Called Masonette for update on above requirements and left message to call back DEC with status update. 2/2/05-Vought-Received message from NYCDEP asking for outstanding requirements. Vought returned call and left message that determination of groundwater flow direction and continued groundwater monitoring still required. 3/25/05-Vought-Spoke to Terrell Estes (NYCDEP) who requested copy of most recent letter. Vought faxed

letter on 3/25/05. 9/23/05- FILE TRANSFERRED FROM VOUGHT TO OBLIGADO
2/1/06 - Obligado - called Masonette to inquire about ground water
monitoring at the site. PHone number not in service. Called Mr.
Landau - He said that the work was done, however the consultant
(Masonette-Petroleum Drilling Company) who did the work has been in
the hospital. He will contact Masonette and will direct him to call
back the DEC to give update as to status of the work. 3/20/06 -
Obligado - After discussion with Joe Sun, decide to close spill based
on low concentrations in last sampling round - Groundwater
analyticals show 20ppb MTBE(W2), 6ppb toluene(W2), 6ppb xylene(W2),
7ppb xylene(W4), 37ppb MTBE(W7). "
Remarks: "SOIL CONTAMINATION FOUND DURING TANK UPGRADE. SOIL TO BE STOCKPILED
AS NECESSARY. CORRECT SPILL DATE IS 10/30/97. ORIGINAL SPILL ASSIGNED
TO O'DOWD."

BROWNFIELDS:

Name: 480 FLUSHING
Address: 480 FLUSHING AVENUE
City,State,Zip: BROOKLYN, NY 11205
Program: BCP
Site Code: 578363
Acres: 0.102
HW Code: C224259
SWIS: 2401
Town: New York City
Record Added Date: 10/16/2018
Record Updated Date: 09/15/2021
Update By: HMDUDEK
Site Description:

"Location The site (a.k.a. Former Techtronics B, Site No. 224259). is in the Bedford Stuyvesant section of Brooklyn in the City of New York and is comprised of a single tax parcel totaling 4,450 square feet (0.102 acre). The site is rectangular in shape with 50 feet of frontage on Flushing Avenue and 89.25 feet of frontage on Walworth Street. The north side of the property is bordered by Flushing Avenue, and the east side is bordered by Walworth Street. The west and south property lines are bordered by two NYSBCP sites; the 11 Spencer site to the west and the 8 Walworth site to the south. Site Features The site is currently vacant with no structures and is not being used. An 8-foot-high construction fence borders the property on the north and west sites to prevent unauthorized access. Current Zoning and Land Use The property is currently zoned M1-2. M1 districts are often buffers between M2 or M3 districts and adjacent residential or commercial districts. M1 districts typically include

Map ID

FORMER TECHTRONICS SITE B (Continued)

S121933852

light industrial uses, such as woodworking shops, repair shops, and wholesale service and storage facilities. M2 districts buffer light industrial zones (M1) and zones which are occupied by heavy industrial use (M3) (i.e. power plants, solid waste transfer facilities and recycling plants). Nearly all industrial uses are allowed in M1 districts if they meet the stringent M1 performance standards. Offices, hotels and most retail uses are also permitted. Certain community facilities, such as hospitals, are allowed in M1 districts only by special permit, but houses of worship are allowed as-of-right. The site is currently vacant with no structures present and is not being used. Surrounding land use includes commercial and mixed-use (retail / residential) properties along the north side of Flushing Avenue, commercial / office use to the west, commercial (warehouses) properties to the south and to the east. The area surrounding the property is highly urbanized and predominantly consists of older industrial / commercial buildings with mixed use (retail / residential) buildings along main corridors such as Bedford Avenue, Flushing Avenue and Park Avenue. There are ten schools located within 1,200 feet of the site including Bnei Shimon Yisroel of Sopron approximately 150 feet to the east. There were no nursing homes or hospitals identified within 1,000 feet of the site. Past Use of the Site The environmental history of the subject property was previously investigated through the review of Federal and State Environmental databases, Environmental Sanborn Fire Insurance maps, NYC Department of Building records and the NYC Department of Finance databases. According to the review of these sources the property was developed sometime prior to 1887 with two 2-story residences in the southern portion of the Lot with the northern portion vacant. A 1-story building was constructed on the northern portion which is shown as broom manufacturers supply till 1950. Based on sources provided, a 1 story building was constructed in 1965 and identified as paint mixing . The northern building is shown as storage or warehouse. Both buildings remain unchanged till 2016 when the north building was demolished. The south building was demolished in 2018. The property was known to be most recently used by an auto repair shop and a fish market. A site characterization of the site was completed under the project name Former Techtronics B (Site No. 224259). After the site characterization the site entered the brownfield program as 480 Flushing. Site Geology and Hydrogeology Subsurface soils at the site consist of historic fill materials to a depth of approximately 1 foot below grade followed by native silty-sand and clay. According to the USGS topographic map for the area (Brooklyn Quadrangle), the elevation of the property is approximately 16 feet above mean sea level. The topography within the immediate area slopes gradually from south to north. Groundwater was reported to be present under semi-confined conditions at approximately 12-14 ft below grade. Based upon the site characterization, groundwater flow was reported to be northwest. Neighboring sites indicate a east by north east groundwater flow. The site is not located within a designated flood zone area."

"Nature and Extent of Contamination: Surface Soil: A Site Characterization was performed in 2017 under an Order from the NYS Department of Environmental Conservation. A set of two (2) surface soil samples were collected from four (4) locations across the site. The samples were collected from 0-2 inches bgs and 2-12 inches bgs. Tetrachloroethene (PCE) was detected at a maximum concentration of 16 parts per million (ppm). This concentration exceeds both the

S121933852

Unrestricted Use soil cleanup objective (UUSCO) of 1.3 ppm and the Protection of Groundwater SCO (PoGWSCO) (1.3 ppm). Subsurface Soil: During the 2017 Site Characterization, eight (8) soil borings were installed across the site. Samples were collected and analyzed at areas of observable impact and at the groundwater interface. PCE was detected at a maximum concentration 99 parts per million (ppm)(UUSCO: 1.3 ppm and PoGWSCO: 1.3 ppm). The following VOCs and Semi-Volatile Organic compounds were also detected in subsurface soils: Benzo(a)anthracene (260 ppm max, standard 1 UUSCO), Benzo(a)pyrene (230 ppm, standard 1 UUSCO), Benzo(b)fluoranthene (280 ppm, standard 1 UUSCO), Benzo(k)Fluoranthene (100 ppm, standard 0.8 UUSCO), Phenanthrene (800 ppm, standard 1 UUSCO), Dibenzo(a,h)anthracene (37 ppm, standard 0.33 UUSCO), Indo(1,2,3-cd)pyrene (140 ppm, standard 0.5 UUSCO). Brick and coal fragments were observed in shallow soil at some of the soil borings collected, suggesting the presence of urban fill. Groundwater: As part of the Site Characterization three (3) monitoring wells were installed and sampled. PCE was detected at a maximum concentration of 2,400 parts per billion (ppb), (standard 5 ppb), TCE was detected at a maximum concentration of 350 ppb (5 ppb standard), and 1,2-dichlorethene was detected at a maximum concentration of 340 ppb (5 ppb standard). Soil Vapor: The site is currently undeveloped. Three soil vapor samples were collected on-site with elevated concentrations of chlorinated VOCs. Max concentrations of PCE are 40.6 micrograms per cubic meter (ug/m3), TCE 1470 ug/m3 and vinyl chloride 7.77 ug/m3. "

Health Problem: "Access is restricted by a fence. People may contact contaminants in soil by walking on the site, digging, or otherwise disturbing the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The site is currently vacant and redevelopment is planned. The potential exists for the inhalation of site contaminants due to soil vapor intrusion for future on-site buildings. Additional investigation is needed to determine whether actions are needed to address soil vapor intrusion in off-site structures."

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Program: BCP
Site Code: 568007
Acres: Not reported
HW Code: C224264A
SWIS: 2401
Town: New York City
Record Added Date: 03/16/2018
Record Updated Date: 06/07/2021
Update By: JHOCONNE
Site Description: "The area of concern subject to this work is considered off-site from BCP site No. C224264 Former NY Cleaning and Dyeing and reflects the investigation and possible remediation of contamination that may have migrated from that site. This work is being carried out as provided for under the Environmental Conservation Law Section 27-1411.5. Please see C224264 for further information regarding the status of the site in the Brownfield Cleanup program. Location: The Site includes properties around the BCP Site (C224264) located at 376-378 Flushing Avenue. This Site is an off-site project associated with the on-site BCP project as well as Spill No. 1609531. Site Features: The Site does not have definite boundaries since it is an off-site project associated with an on-site BCP project. Potentially impacted areas from the BCP Site Former NY Cleaning and Dyeing include the residential apartment building to the west and the three story commercial building to the east. The off-site areas are not necessarily limited to these areas. Current Zoning and Land Use: The Site is currently zoned M1-2 for manufacturing. The potentially impacted areas from the Former NY Cleaning and Dyeing Site (BCP: C224264) include a residential apartment building to the west and a three story commercial building to the east. Potential for further migration include downgradient impacts from the on-site BCP Site. Past Use of the Site: The Site has not yet been identified for its past historic use. The property potentially impacting the Site but not limited to, The Former NY Cleaning and Dyeing BCP site was

S126369652

historically used for several manufacturing and commercial processes including auto repair shops, storage facilities, and sheet metal works that occupied the BCP site from 1928-1940s. By the 1940s, a commercial dry cleaning plant (NY Cleaning and Dyeing) occupied Lot 48; vehicle storage and NY Cleaners-Uniform Rental services occupied Lot 40 of the site until the late 1980s. Currently, the site is occupied by a door and molding warehouse and a catering hall. Site Geology and Hydrology: Based on the information collected during the investigation of C224264, the soil beneath the site includes silt, sand non-native fill with brick, concrete, coal and other rubble associated with historic fill approximately 5 feet below grade. A native sand and clay layer is present below the historic fill to depths of approximately 12 feet below grade. The evaluation of the surrounding area is approximately 16 feet above the National Geodetic Vertical Datum (NGVD). The areas topography gradually slopes to the west. The depth to groundwater beneath the Site is approximately 9 to 13 feet below grade. Local groundwater flow is to the east. The nearest surface water body is Wallabout Channel, which is approximately 0.5 miles northwest. "

Env Problem: "During the on-site Remedial Investigation for site C224264, soil and groundwater samples were collected and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, PCBs, and pesticides. Soil vapor samples were analyzed for VOCs. Based upon the results of the RI, the primary contaminants of concern for on-site include vinyl chloride, trichloroethene (TCE) and tetrachloroethene (PCE). Contamination can likely be attributed to activities associated with the historic use of the site for manufacturing activities. Further investigation is needed to fully delineate the extent of off-site contamination. "

Health Problem: "Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available."

BROWNFIELDS:

Name:	FORMER NY CLEANING AND DYEING SITE
Address:	376-378 FLUSHING AVENUE
City,State,Zip:	BROOKLYN, NY 11205
Program:	BCP
Site Code:	555285
Acres:	0.882
HW Code:	C224264
SWIS:	2401
Town:	New York City
Record Added Date:	07/25/2017
Record Updated Date:	12/30/2020
Update By:	AMSERVIS
Site Description:	"Location: The Former NY Cleaning and Dyeing Site is located in an urban area located in the Bedford Stuyvesant section of Brooklyn (Kings County), New York. The site is comprised of two tax parcels (Block 1884, Lots 40 and 48) totaling 0.8822 acres. The site fronts on Flushing Avenue to the north, Franklin Avenue to the east, and Little Nassau Street to the south. Site Features: The site is being redeveloped into a mixed commercial-residential building. Previously, Lot 40 was a one-story commercial building approximately 13,250 sqft in size, occupied by a door and molding company. Lot 48 was a three 2-story commercial buildings occupied by a catering hall, a warehouse for the door and molding company on Lot 40, and office space. According to the NYC Department of Buildings, the current buildings were constructed in 1924 (Lot 48) and 1966 (Lot 40). Current Zoning and Land Use: The site is currently zoned R7A for residential use, with a C2-4 overlay which allows for commercial use. The area immediately surrounding site consists of a three-story commercial building to the southeast and a residential apartment building to the west. Past Use of the Site: The buildings present on the site are in use as a wood door and molding manufacturer and warehouse (Lot 40, p/o Lot 48) and a catering hall (p/o Lot 48). Lot 40 appears to have been redeveloped by 1928 with the existing one-story building identified as Priemo Garage. By 1945 the building was used by Metropolitan Distributors for the storage of ice cream and delivery trucks. From 1928 to 1934, 380 Flushing Avenue (Lot 48) was used as an auto body fabricator while two 1-story buildings, identified as an

FORMER NY CLEANING AND DYEING SITE (Continued)

S122449226

auto body repair and a paper company, were located in the western portion of the Lot. A sheet metal works was identified on a portion of Lot 48 from 1928-1940. By 1940, a commercial dry cleaning plant (NY Cleaners and Dyeing) occupied all of Lot 48. Based on the 1966 Certificate of occupancy, describing Lot 40 as being used for commercial vehicle storage and trucking terminal, the lack of city directory listings for this lot between 1949 and 1992 and the history of common ownership with Lot 48 by Uniform Rentals Inc., it is probable that both lots were part of the NY Cleaners-Uniform Rental operation with lot 40 being used to store and service the company's vehicle fleet from 1949 through 1986-1987. Although not reflected in the Sanborn Maps, the City Directory listings identify 376 Flushing Ave. (lot 40) as Alexander Supply (door and molding warehouse) in 1997 and 378 Flushing Ave (portion of lot 48) as Exclusive millwork in 1992. Exclusive Door and molding currently occupies both 376 and 378 Flushing Avenue. Therefore, the laundry operations and fleet maintenance garage vacated prior to these dates, most likely in 1986-1987 when Uniform Rentals sold the lots. Site Geology and Hydrology: The elevation of the site is approximately 16 feet above the National Geodetic Vertical Datum (NGVD). The area topography gradually slopes to the west. The depth to groundwater beneath the Site, as determined from field measurements, is approximately 9 to 13 feet below grade. Local groundwater flow is to the east. The nearest surface water body is Wallabout Channel, which is located approximately 0.5 miles from the site. "

Env Problem:

"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern in soil and groundwater consist of petroleum related VOCs. Low levels of chlorinated solvents were found in soil vapor. Remedial actions have successfully achieved soil cleanup objectives for unrestricted use. Short-term groundwater monitoring is being managed under a Site Management Plan. "

Health Problem:

"Remedial actions are complete and measures are in place to prevent people from coming in contact with any residual contamination."

Name: FORMER ARKANSAS COMPANY, INC. SITE
Address: 74 WALLABOUT STREET
City,State,Zip: BROOKLYN, NY 11211
Program: BCP
Site Code: 478229
Acres: 0.890
HW Code: C224172
SWIS: 2401
Town: New York City
Record Added Date: 01/25/2013
Record Updated Date: 08/04/2021
Update By: SMQUANDT
Site Description: "Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction."
Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Residual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills."
Health Problem: "People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway."

Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Residual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills."

Health Problem: "People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

Updated By: LSZINOMA
Site Code: 478229
Site Description: "Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater

occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Residual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills."

Health Problem: "People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

Dt rec updated: 08/03/2020
Updated By: LSZINOMA
Site Code: 478229

Site Description: "Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction."

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Residual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being

S112138864

handled by Region 2 Spills."

Health Problem: "People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

ANDY LOCKWOOD

DEC Memo:

"12/19/2012-Potential BCP candidate. Subsurface investigation is being done to collect more data for BCP application. Andy Lockwood from P.W. Grosser indicated that they had a prequalification meeting with DEC BCP few weeks ago. Andy Lockwood will send the report to VZ.(sr) 03/25/13-Zhune called and spoke to Andy Lockwood from PW Grocery Consult 631-589-6353. He said they submitted the application to Brownfield program. They will know by April 10, 2013 whether or not they are going to be accepted. 06/13/13 Jonathan Greco sent the following email: The referenced spill site at 74 Wallabout Street in Brooklyn has been accepted into the Brownfield Cleanup Program as site #C224172. With your permission, I would like to reference this in the DEC Remarks section of the UIS and change myself to the project manager for the spill site. 07/09/14 The source of the spill has been determined to be a leaking UST located on the western portion of the site. The UST and free product located on-site will be addressed under the BCP (Site Code C224172). Off-site remediation of the floating product is at least being partially remedied by the BCP Volunteer, but it is expected that their efforts will not fully resolve the off-site issue, and further work may be conducted by the State and/or the RP under the Spills program following completion of the BCP. 11/7/14 On-site work has been completed and site construction is underway. Though bailing of product was conducted at two wells on many occasions, product is still present. Any further actions will be undertaken under Spills program. (Greco 11/7/14) 4/4/16 - Callout to determine off-site extent and address product off-site to be done FY 2016/17. 09/18/17-Hiralkumar Patel. DEC Austin assigned this case for remediation of off-site groundwater impact from a BCP site. 10/27/17-Hiralkumar Patel. searched current and former tax lot maps and noted that the subject site was on Block #: 2261 / Lot #: 1. the subject site was owned by B.C.G. Sales, Inc. from July 1977 to Aug. 2012. alternate address: 74-88 Wallabout Street, 743-755 Kent Ave, 377-391 Flushing Ave PBS #: 2-612240. as per PBS record, the site had nine (9) 1,000 gal diesel USTs, removed in Jan. 2014. but as per reports included in BCP file, PBS application was submitted to register following tanks: - seven (7) 1,000 gal diesel USTs - one (1) 550 gal gasoline UST - one (1) 3,000 gal #2 oil UST other spill # 0307065 was reported on 10/04/2003 due to discharge of natural gas line condensate as old gas main punctured during installation of a new gas line. case closed. summary of available investigation reports from BCP #: C224172: 1) Phase I Environmental Site Assessment Report dated 10/12/2006: - review of available Sanborn maps did not indicate the presence of any buried tanks on the subject site - the subject site was utilized in the past by a bakery shop, a soap company, a wood working company, a lumber company, a shelving company, a chemical company, a paint and varnish manufacturing company, a rope manufacturing company, a plastic processing company, a cleaner industries company and warehouse and household chemical distributing company - in 2006, there were four (4) possible fill ports noticed inside the northern portion of the warehouse area on the main floor of the building - in 2006, there was a capped fill port and a vent pipe noticed along the western exterior wall of the building. according to the property owner, the capped fill port and the vent pipe were associated with an AST that was removed from the building in the past - in 2006, there was a hydraulic elevator motor noticed inside the northern portion of the warehouse area on the main floor of the building. there was hydraulic

S112138864

oil staining and speedi dry noticed in the vicinity of the hydraulic elevator motor 2) Supplemental Phase II Environmental Site Assessment dated Jan. 2013: - review of historical Sanborn map performed as part of Phase I ESA indicated that two gasoline UST existed inside the building ----- Phase I report states that no buried tanks were noted on Sanborn maps - a limited Phase II investigation was conducted in northern half of the site in Jan. 2007 - in Dec. 2006, a geophysical survey was conducted. GPR profiles collected within northeast corner of the building appeared to be consistent with the size and shape of six (6) 550 gal USTs. additionally, six vent lines (connected to the suspected USTs) were located on the northeast corner of the building - in Dec. 2006, eight (8) soil borings (SB-1 through SB-8) were installed in the vicinity of the suspected USTs on the northeast corner of the building, in the storage area and the asphalt parking lot - boring SB-1 was installed to 6 ft bg where fuel oil odors were detected and refusal encountered - boring SB-2 was installed to 16 ft bg - boring SB-3, SB-4 and SB-6 were installed to 12 ft bg - boring SB-5 and SB-7 were installed to 5 ft bg where refusal encountered - boring SB-8 was installed to 6 ft bg, where slight odors were detected and refusal encountered - one soil sample was collected from each boring, except borings SB-5 and SB-7 (as per table 1, samples were collected from depths between 6 and 11 inches, boring logs suggest that samples may have collected from depths between 6 and 11 ft) ----- in Jan. 2007, groundwater samples (GW-1, GW-2 and GW-3) were collected from borings SB-2, SB-3 and SB-4 (11-13 ft bg) ----- no contamination found in soil or groundwater samples collected in Dec. 2006 - supplemental Phase II investigation was conducted in Dec. 2012 - in Dec. 2012, eight (8) soil borings (SB009 through SB016) were installed - shallow soils, ranging from 0-8 ft bg were characterized as mostly non-native, historic fill material consisting of brown silty sands. deeper soils, ranging from 8-20 ft bg were characterized as mostly gray, low-plasticity, silty clay ----- petroleum like odor was observed in soil from SB009 (4-16 ft), SB014 (0-12 ft), SB015 (0-12 ft) and SB016 (0-12 ft) - visual staining was observed in soils from SB016 (8-12 ft) - in Dec. 2012, two groundwater samples (GW011 and GW013) were collected - in Dec. 2012, three (3) 2-in monitoring wells (MW001, MW002 and MW003) were installed with 10 ft of screen. screens were set 7 ft into and 3 ft above the water table at the time of installation - approx. 1 ft of LNAPL, similar to gasoline, was detected and observed in MW002, located on the southwestern corner of the site ----- groundwater samples were collected from two wells MW001 and MW003 - in Dec. 2012, three soil vapor samples were collected - no contamination found in soil, groundwater or soil vapor samples - well MW002 was installed near boring SB009 where strong petroleum odors were noted below 8 ft depth - as per well logs, screen in wells MW001 and MW003 were installed below water table 3) Progress Report No. 3 dated 02/27/2014: - nine USTs were removed between 01/08/14 and 01/21/14 - as per tank removal affidavit dated 01/16/14, total of eight (8) 1,000 gal #2 oil USTs and one (1) 3,000 gal #6 oil UST were removed, but as per PBS application dated 05/20/14 shows seven (7) 1,000 gal diesel USTs, one (1) 550 gal gasoline UST and one (1) 3,000 gal #2 oil UST - the seven (7) 1,000 gal USTs were in group located in northeast corner of the site - the 550 gasoline UST was located along northern property line in western portion of the site - the 3,000 gal (#2 or #6 oil) UST was located in west-central portion of the site - 3,060 gal of residual

74 WALLABOUT ST LLC (Continued)

S112138864

liquid and 14 drums of tank bottoms removed - total of 21 endpoint samples (EP001 to EP 021) were collected from northeast corner of the site where 7 USTs were located in group - four endpoint sidewall samples were collected from location of tank #8 (gasoline UST - SW005 to SW008) and tank #9 (#2 or #6 oil UST - SW001 to SW004) - all samples were collected at 6 ft depth - no contamination found in endpoint samples, but detection limits were high for sidewall sample SW004 which was taken from west sidewall of #2/#6 oil tank excavation

4) Remedial Investigation Report dated 04/30/14: - a geophysical survey conducted on 07/09/13 - due to reinforced concrete, suspect tanks could not be confirmed within eastern interior of the building - cut and capped fill/vent lines were noted on west exterior wall. there was no indication that the lines went beneath the building slab and were likely connected to an AST at one time - an anomaly consistent with a UST was located in the north parking lot perpendicular to the sidewalk of Wallabout street (tank # 8) - on 08/28/13, during removal of the former buildings concrete foundation, one additional anomaly (tank #9) was identified in the southwestern portion of the property ----- total of fifteen (15) pits and one concrete vault were identified - fourteen of the fifteen pits were determined to have concrete walls and bottoms - FD016 was determined to have an earthen bottom - several of the structures appeared to discharge into the large concrete vault and several of the structures were piped in the direction of the municipal sewer system - seven (7) soil borings (SB017 through SB023) were installed to a depth of 16 ft bg - shallow soils, ranging from 0 to 8 ft bg were characterized as mostly non-native, historic fill material consisting of brown silty sands. deeper soils, ranging from 8 to 15 ft bg were characterized as mostly gray, low-plasticity, silty clay - no contamination noted in soil samples - four (4) 2-in observation wells (OB001 through OB004), with 10 ft of screen, were installed to determine horizontal extent of LNAPL in the vicinity of MW002 - two (2) 2-in monitoring wells (MW004 and MW005), with 10 ft of screen, were installed - based on well gauging results, groundwater beneath the site flows towards the west-northwest ----- groundwater samples were collected from three temporary groundwater sampling points (SB020, SB021 and SB022), two monitoring wells (MW004 and MW005) and one observation well (OB003) - on 09/18/13, LNAPL found in two monitoring wells and three observations wells - source of LNAPL is likely related to UST identified in the southwest portion of the property - no contamination noted in groundwater samples - four (4) soil vapor sampling points (SV004 through SV007) were installed - found Benzene (821 ug/m3) and TCE (143 ug/m3) in soil-vapor samples product thickness on 09/18/13: MW002-----2.48 ft MW005-----4.95 ft OB001-----4.91 ft OB002-----sheen OB004-----0.02 ft 5) Site Management Plan dated Dec. 2014: - nine USTs were removed - seven USTs (Tank 1 through 7) were identified within a subsurface concrete encasement in the northeast corner of the property - Tank 8 was located in the northwest corner (as per site map, tank was along northern property line in western portion) of the property and found to be encased in concrete ----- Tank 9 was located in southwest corner (as per site map, tank was in west-central portion) of the property ----- the USTs were found to be in poor condition with corrosion holes visually observed in Tanks # 4, 6 and 9 ranging in size up to 1/2 inch in diameter - groundwater was encountered beneath Tank #8 and 9 and LNAPL was visually observed on the water table - there was no signs

S112138864

of petroleum impact beneath the northeast tanks - since there was no evidence of a discharge and there was no groundwater beneath the USTs in the northeast corner of the property, discrete center line soil samples were collected from beneath the former location of the USTs (total 21 samples) - since there was evidence of a discharge and groundwater was encountered beneath Tank # 8 and 9, sidewall samples were collected (total 8 samples) - soils were excavated to a minimum depth of 10 ft bg within the footprint of the proposed building - soils were excavated to 8 ft bg in the portion of the site to be used for the future school expansion ----- LNAPL removed through dewatering and VEFR events - LNAPL migration mitigated through the use of the steel sheeting installed at the property's perimeter ----- installed a vapor barrier/water proofing membrane under the building's foundation as per Final Engineering Report/Construction Completion Report dated 12/10/14, total of 18,900 gal of LNAPL/groundwater was removed from (excavation and wells) the site. DEC issued a Certificate of Completion on 12/23/14. Andy Lockwood PW Grosser **BCP consultant** Ph. (631) 589-6353 (516) 315-9238 email: AndyL@pwgrosser.com B.C.G. Sales, Inc. **owner from July 1977 to Aug. 2012** Moshe Gewurtz / Dov Kurland **info from online records** 751 Kent Avenue Brooklyn, NY 11211 Ph. (718) 596-4000 Northland LLC. / Starwood LLC. / 74 Wallabout LLC. **property owners/developers** review of Phase I report (dated 10/12/2006), Supplemental Phase II ESA (dated January 2013) and RIR (dated 04/30/2014) suggests that presence of heating oil (#2 or #6) UST in west-central portion of the site was not known until removal of former building concrete foundation. ----- phase I report from Middleton Env. mentioned that review of available Sanborn Fire Insurance Maps did not indicate the presence of any buried tanks on the subject site. but site history section of supplemental Phase II report from PWGC states that a review of historical Sanborn Fire Insurance Map performed as part of the Phase I ESA indicated that two gasoline underground storage tank (UST) existed inside the building. ===== 1:57 PM:- spoke with Andy at PW Grosser and inquired him about well gauging data. Andy believes that off-site wells were free of product after on-site remediation/dewatering and all wells have been closed. he will send documents for review. 2:33 PM:- received email from DEC Forster including daily reports 07/23/14 to 09/1/14. 3:08 PM:- received email from Ryan Morley (ryanm@pwgrosser.com) including two daily reports (both dated 09/16/14) and a site map (dated 09/18/13). both daily reports have same date (09/16/14) at top, bottom of pages include different dates (09/16/14 and 09/17/14). Ryan mentioned that last two gauging events occurred in Sep. 2014 before work was completed in Dec. 2014. product thickness (in ft):

09/16/14-----0.01-----0.82 09/17/14-----0.02-----0.81
10/30/17-Hiralkumar Patel. 8:54 AM:- spoke with Andy. he confirmed that daily reports submitted on 10/27/17 are from two different days and last well gauging occurred in Sept. 2014. 11/01/17-Hiralkumar Patel. received email from Ryan Morley (at 1:41 PM on 10/31/17) from PW Grosser stating that wells MW005, OB003 and OB004 are currently viable at the site. 11/13/17-Hiralkumar Patel. 4:08 PM:- sent email to Jennifer Lawrence at Environmental Assessment & Remediation including a standby contractor authorization form for gauging of three existing off-site wells, removal of any LNAPL found, sampling of groundwater for VOC/SVOC analyses and report preparation/submission. asked Jennifer to schedule well gauging work. 4:21 PM:- sent email to Melissa Hass at TestAmerica including a standby contractor authorization form for VOC/SVOC and fingerprint analyses of groundwater/product samples. 11/15/17-Hiralkumar Patel. 12:21 PM:- received email from Jennifer. she mentioned that Erin Quell will be managing this project, and well gauging has been scheduled for tomorrow. 11/16/17-Hiralkumar Patel. 12:30 PM:- visited site with DEC Lin and met Michael Ford (EAR technician). three monitoring wells (MW005, OB003 and OB004) were gauged and found product in well MW005. product thickness could not be found due to it's viscosity. product samples have been collected for waste characterization/fingerprint analyses. 1:11 PM:- spoke with Erin. based on field observations, asked Erin to schedule three weekly VEFring followed by well regauging. also asked her to replace damaged well cap (OB003) and well cover plate (MW005). Erin mentioned that weekly VEFring will be scheduled after receiving product sample results. 12/01/17-Hiralkumar Patel. 9:31 AM:- received email from Erin including waste characterization sample results. report did not include result of fingerprint analysis. 12/06/17-Hiralkumar Patel. 11:14 AM:- received email from Erin. she mentioned that first VEFring will occur tomorrow by Island Pump and Tank. 12/07/17-Hiralkumar Patel. 9:46 AM:- received call from Erin. she mentioned that vacuum truck is in area, but could not remove product from the impacted well due to parked vehicles. asked Erin to have crew wait for sometime and pump out well if parking space become available. also asked her about result of fingerprint analysis and replacement of damaged well cap/cover. Erin mentioned that product sample collected on 11/16/17 was not analyzed for fingerprinting. she will check with on-site tech and ask to collect product sample today, if necessary tools are available, otherwise product sample will be collected next time. she will also schedule well repair during next visit. 12:30 PM:- received call from Erin. she mentioned that crew was able to remove product from well MW-5. crew used interface probe capable of gauging thick product and noted 6.5 ft product in the well prior to pump out. crew conducted multiple pump outs with approx. 15 minutes intervals in-between and gauged well between pump outs. total of 6 pump outs were conducted. at the end, 0.4 ft of product noted in the well. asked Erin to schedule next pump out in afternoon on 12/14/17. 1:13 PM:- left message in general mail box at Rabsky Development, entity listed as owner in DOB permit application filed on 06/19/13. Rabsky Development **owner listed in DOB application submitted in 2013. 505 Flushing Avenue Brooklyn, NY 11205 Attn.: Simon Dushinsky / Raphael Ph. (718) 246-4762 email: rabskygroup@thejnet.com 1:22 PM:- sent email to Erin and asked her to schedule next pump in afternoon on 12/14/17. also asked her to collect product sample for fingerprint analysis and repair damaged wells during next pump out. email copied

to Jennifer. 12/08/17-Hiralkumar Patel. 9:52 AM:- spoke with Sam (347-761-2185), building super and requested assistance to reserve some parking spots near well MW5 on 12/14/17. Top Quality Management **building management** 199 Lee Avenue #286 Brooklyn, NY 11211 Attn.: Esty **property manager** Ph. (718) 522-6582 Ext. 103 10:02 AM:- spoke with Erin. she confirmed next pump out on 12/14/17. 3:38 PM:- received email from Erin including data tables summarizing groundwater gauging data and VEFRing event on 12/07/17. Erin mentioned that manhole covers can not be secured because the tabs have been broken of the rings and they have to replace the entire manhole to fix it. 12/12/17-Hiralkumar Patel. 2:56 PM:- approved invoice (# 46288085) from TestAmerica for waste characterization analysis. 12/14/17-Hiralkumar Patel. 1:40 PM:- received message from Erin. 1:42 PM:- spoke with Erin. she mentioned that 2.8 ft of product was noted in well MW005 at beginning. product sample has been collected for fingerprint analysis. the well was vacuumed out for about 30 minutes. crew has been gauging well for 40 minutes after pump out and found no more product accumulation. asked Erin not to continue pump out today and to schedule weekly pump out until further notice. 12/15/17-Hiralkumar Patel. 3:07 PM:- received email from Erin including updated table summarizing data collected to date. 12/21/17-Hiralkumar Patel. 1:10 PM:- received call from Erin. Island Pump gauged wells and found 1.41 ft product in well MW005. after VEFRing for 45 minutes, no more product noted in the well. based on decreased amount of product in the well, next VEFRing will occur after two weeks. 12/27/17-Hiralkumar Patel. 9:25 AM:- received email from Erin including updated table summarizing data collected to date. she mentioned that Island Pump will be at site at noon on 01/04/18. 12/28/17-Hiralkumar Patel. 1:25 PM:- received email from Erin including fingerprint result. lab report indicates that sample contained a petroleum product within most closely resembles degraded #4 oil. ----- 01/03/18-Hiralkumar Patel. 1:45 PM:- received call from Erin. she mentioned that tomorrow's VEFR event has been cancelled due to snow forecast. 01/08/18-Hiralkumar Patel. 1:24 PM:- received email from Erin stating that next vacuum event has been scheduled for 01/11/18. 01/10/18-Hiralkumar Patel. 1:38 PM:- approved invoice (# 46289471) from TestAmerica for fingerprint analysis. 01/11/18-Hiralkumar Patel. 12:15 PM:- visited site and met Mike (EAR). on-site wells were gauged and found 0.75 ft of product in well MW-5. well MW-5 was VEFRred for approx. 30 minutes. no product noted in well when re-gauged 15 minutes after VEFRing. well MW-5 will be VEFRred again today. 2:03 PM:- received call from Erin. asked her to continue weekly VEFRing. 01/16/18-Hiralkumar Patel. received email from Erin (at 4:17 PM on 01/15/18) including updated table summarizing data collected to date. next gauging will occur on 01/18/18. 01/22/18-Hiralkumar Patel. 12:59 PM:- received call from Erin. 0.75 ft of product was found in well MW-5 prior to VEFRing on 01/18/18. after 45 minutes of VEFRing, well was recharged with 0.05 ft of product. 01/25/18-Hiralkumar Patel. received email from Erin (at 9:57 AM on 01/24/18) including updated table summarizing data collected to date. 02/01/18-Hiralkumar Patel. 1:37 PM:- received call from Erin. she mentioned that crew from EAR and Island Pump responded were on-site to gauge and VEFR the well. EAR technician noted upto 0.47 ft of product in the well at the beginning. no product was noted in the well 15 minutes after first round of VEFRing. Erin mentioned that towards the end of work, an another vehicle struck the vacuum truck. driver of the other vehicle tried to escape after the

S112138864

accident. no-one was hurt in the accident, but the vacuum truck was damaged and need to be towed. Erin also mentioned that crew had to park vacuum truck in the 'no parking' zone due to parking issues near the well location. 1:44 PM:- spoke with DEC Karen Quinn who handles contract payments. informed Karen about accident at the site and damaged vacuum truck. 1:56 PM:- approved invoice (# 121292-121299) from EAR for work performed (project review, well gauging/product recovery, and lab coordination) between 11/14/17 and 11/30/17. 02/09/18-Hiralkumar Patel. 9:49 AM:- approved invoice (# 121685-121704) from EAR for work performed (project review, well gauging/product recovery, and coordination) between 12/01/17 and 12/31/17. 02/12/18-Hiralkumar Patel. 9:46 AM:- sent email to Erin and Jennifer including a revised standby contractor authorization form. 1:23 PM:- received email from Erin stating that next well gauging/VEFRing will occur on 04/14/18. 02/14/18-Hiralkumar Patel. 10:10 AM:- received email from Erin including groundwater gauging data table. 12:33 PM:- received call from Erin. she mentioned that wells at the site will not be gauged today as crew working at another site. asked Erin to gauge/VEFR wells next week. 03/05/18-Hiralkumar Patel. 12:44 PM:- approved invoice (# 122366-122379) from EAR for work performed (project review, well gauging/product recovery, and coordination) between 01/01/18 and 01/31/18. 03/14/18-Hiralkumar Patel. 3:11 PM:- received email from Erin stating that well gauging/VEFRing will occur tomorrow. 03/22/18-Hiralkumar Patel. received email from Erin (at 11:56 AM on 03/21/18). VAC event scheduled for today has been cancelled due to weather. 03/30/18-Hiralkumar Patel. 10:59 AM:- received email from Erin including well gauging data table. 0.48 ft of product noted in well MW-5 on 03/29/18. 04/02/18-Hiralkumar Patel. discussed available well gauging data with DEC Austin. due to continuous accumulation of product in well MW-5, he asked to review available reports under BCP # C224172 to find details about soil profile and site-specific groundwater flow direction. based on review of available on-site investigation data, more monitoring well(s) may be needed downgradient of the site. 04/03/18-Hiralkumar Patel. 12:09 PM:- spoke with Erin and asked to hold future well gauging/VEFRing activities until further notice. 04/05/18-Hiralkumar Patel. 2:38 PM:- approved invoice (# 123114-123127) from EAR for work performed (project review, well gauging/product recovery, and coordination) between 2/1/18 and 2/28/18. 05/10/18-Hiralkumar Patel. 9:18 AM:- approved invoice (# 123783-123802) from EAR for work performed (project review, well gauging/product recovery, coordination and waste disposal) between 02/21/18 to 03/30/18. 2:33 PM:- sent email to Erin including revised standby contractor authorization form. 06/11/18-Hiralkumar Patel. 10:56 AM:- approved invoice (# 124479-124486) from EAR for project review/coordination between 04/01/18 and 04/30/18. 06/19/18-Hiralkumar Patel. review of available reports indicates presence of degraded #4 oil in monitoring well MW005 which is located down-gradient of former on-site heating oil tank #9. there is conflicting info about grade of fuel oil stored in tank #9: tank removal affidavit shows storage of #6 oil, but PBS application shows storage of #2 oil. 9:58 AM:- sent email to Erin and asked her to schedule well gauging/VEFRing (last gauging was three months ago on 03/29/18). 06/28/18-Hiralkumar Patel. 12:50 PM:- received email from Erin. they gauged wells today and found approx. 1.2 ft of product in well MW-5. 06/29/18-Hiralkumar Patel. discussed with DEC Obligado. based on review of available information, Obligado

74 WALLABOUT ST LLC (Continued)

S112138864

agreed with replacement of existing well MW-5 with a larger diameter well and passive product recovery using absorbent socks.

07/02/18-Hiralkumar Patel. discussed with DEC Austin. instead of expanding existing well MW-5, he asked to install three additional wells: one on east sidewalk of Kent Ave and south of existing well MW-5, one on east sidewalk on Kent Ave north of existing well MW-5, and one on west sidewalk of Kent Ave down-gradient of existing well MW-5. 07/09/18-Hiralkumar Patel. 12:39 PM:- sent email to Erin including a site map with possible off-site well location markings. 12:39 PM:- spoke with Erin. informed her that the department requires off-site wells to further delineate groundwater impact. asked her to install 4 inch diameter wells to a depth of at least 20 ft bg, with 15 ft of screen. as current PIN lab contracts have expired and new contracts are being negotiated, asked Erin to install wells now only if they can find lab as sub-contractor, otherwise wells should be installed once PIN lab contracts are approved. informed her that soil must be screened and sampled (# of soil samples will depends of field indication of impact) for 8260/8270 analysis. based on findings of product on groundwater, either groundwater samples should be collected for 8260/8270 analyses or product sample should be collected for fingerprint analysis. Erin mentioned that they may request for sidewalk closing permit (if possible) due to parking issues in the area. 07/10/18-Hiralkumar Patel. received email from Erin (at 4:31 PM on 07/09/18) summarizing off-site groundwater investigation discussed yesterday. she inquired if groundwater from well development needs to be drummed. 9:11 AM:- spoke with DEC Lisa Lewis about status on approval of lab contracts. she mentioned that lab contracts are being reviewed and approval may occur in couple of months. 9:19 AM:- sent email to Erin and asked her to proceed with off-site well installation as discussed yesterday. asked her to drum and properly dispose groundwater from well development.

07/11/18-Hiralkumar Patel. 8:28 AM:- approved invoice (# 125307-125308) from EAR for project review/coordination in May 2018.

08/17/18-Hiralkumar Patel. 1:14 PM:- approved invoice (# 126103-126106) from EAR for project review/coordination/VEFR in June 2018. 09/11/18-Hiralkumar Patel. 9:21 AM:- approved invoice (# 126789-126797) from EAR for planning for additional well installation work. 10/05/18-Hiralkumar Patel. 2:11 PM:- approved invoice (# 127774-127780) from EAR for disposal of contaminated water. (DEC Karen OKed typo in work date on page # 18). 10/11/18-Hiralkumar Patel. 9:59 AM:- received call from Erin inquiring about following: - need for trip blank/field blank: yes during new well installation - type of container for VOC analysis: asked Erin to use simple glass jars for VOC analysis (any result less than 200 ppb will be flagged biased low) - # of product sample: product sample from each new well (if found) and from one existing wells (to compare results between existing and new well) - need for TICs for VOCs/SVOCs: no

10/12/18-Hiralkumar Patel. 10:17 AM:- sent email to Melissa at TestAmerica including a revised standby contractor authorization form (due to a new contract #). 10/18/18-Hiralkumar Patel. 12:16 PM:- sent email to Erin including a sidewalk permit request letter.

10/29/18-Hiralkumar Patel. 2:00 PM:- visited site and met Joy Sauer (516-983-6549) and crew from ADT drilling. EAR completed well (MW-6) installation west side of Kent Ave. no high PID readings were noted but some stained soil (not necessarily petroleum impacted) was noted below water table. 10/30/18-Hiralkumar Patel. 9:30 AM:- visited site and met Joy. at the time of inspection, crew was installing well

74 WALLABOUT ST LLC (Continued)

S112138864

(MW-7) east side of Kent Ave, north of existing well MW-5. no PID readings were noted until 7.5 ft bg, but noted more than 15,000 ppm on PID between 7.5 and 12.5 ft depth. petroleum odors were noted in soil below 7.5 ft depth. asked Joy to collect multiple soil samples (one above water table, one at groundwater interface and one towards end of boring) from each boreholes. based on high PID readings during installation of well MW-7, inspected site 12 Franklin Ave which is located up-gradient of well MW-5 and has oil tank. site 12 Franklin Ave has an AST on saddles and no signs of spill noted from the tank. building representative mentioned that the tank was installed prior to 1983. also inspected sump pit located in underground garage at the subject site. the sump pit is located along Wallabout St (site's northern boundary), in central section. no product/sheen was noted in the sump. no petroleum odors were noted in the garage. 1:07 PM:- received call from Erin. she mentioned that crew completed drilling of the third well (MW-8) on east side of Kent Ave, south of existing well MW-5. less than 300 ppm was recorded on PID in soil below 7.5 ft depth, but free phase product was noted in soil. Erin mentioned that the PID meter was recalibrated prior to installation of well MW-8. based on field observations and PID readings during installation of MW-8, Erin suspects some sort of issue with PID meter during installation of well MW-7 (meter read more than 15,000 ppm in soil in MW-7, but less than 300 ppm in soil in MW-8 even with free product in MW-8). based on available information, asked Erin for following: - multiple soil samples from each boreholes (sampling depths were discussed based on PID values and boring depth) - groundwater sample from all wells where no product noted - product sample from all wells where noted - VEFRRing of impacted wells next week 11/02/18-Hiralkumar Patel. received email from Erin (at 6:06 PM on 10/31/18). she mentioned that EAR plans to return to the site the week of November 12 for fingerprinting and groundwater sampling. the plan is to gauge for DTW/DTP and collect groundwater samples from OB003, OB004, MW005, MW006, MW007 and MW008. fingerprinting samples will be collected from all wells with product. she inquired about well survey and groundwater samples from wells with product. sent email to Erin (at 7:00 AM on 11/01/18) and informed her that no need for well survey at this time, and not to collect groundwater samples from wells with product. 11/14/18-Hiralkumar Patel. 12:42 PM:- received email from Erin. they gauged and sampled on-site wells and noted product in well MW005 (1.75 ft) and sheen on purged water from OB003 and OB004. 3:08 PM:- received email from Erin including result of soil samples collected during installation of well MW006 (5-10 ft and 10-12.5 ft bg) on 10/29/18. no contamination noted in soil samples from MW006. 3:13 PM:- received email from Erin including result of soil samples collected during installation of wells MW007 and MW008. two soil samples were collected from both wells. no contamination noted in soil samples except 1,600 ppb Benzene in soil sample from 5-7.5 ft depth in MW008. 11/19/18-Hiralkumar Patel. 2:41 PM:- received email from TestAmerica including result of product fingerprint analysis. product sample was collected from well MW005 on 11/08/18. sample contained petroleum product which most closely resembles #6 fuel oil. 11/23/18-Hiralkumar Patel. 2:49 PM:- approved invoice (# 128471-128476) from EAR for project coordination in Sept. 2018. 11/27/18-Hiralkumar Patel. 2:36 PM:- received email from Erin including result of groundwater samples collected on 11/08/18. groundwater samples were collected from wells MW-X (blind duplicate sample as per email from Erin dated 12/07/18), OB003, OB004, MW006,

S112138864

side of Kent Ave (in wells MW005, MW007 and MW008). DEC legal issued a letter on 05/03/19 to representative of 376 Flushing Ave with following comments (in reference to free phase product at 74 Wallabout St): - the department will undertake all NAPL recovery and vacuum recovery activities in existing well MW005 - the volunteer (BCP applicant for 376 Flushing Ave) will install a sentinel monitoring well on north side of Flushing Ave approx. 75 ft east of the corner of the new building constructed on the Former Arkansas Site (74 Wallabout St). the well should be screened across the observed water table and should be constructed with at least 15 ft of screen below the water table. the well should be 4 in. in dia. to allow for NAPL recovery if necessary. - should NAPL be observed to have migrated into the sentinel well following the initiation of dewatering on the site (376 Flushing Ave), the department will identify any specific actions to abate or mitigate the movement of contamination, which shall be undertaken by the volunteer (376 Flushing Ave) 05/13/19-Hiralkumar Patel. 7:57 AM:- approved invoice (# 133002-133007) from EAR for project review/coordination conducted in month of Mar. 2019. 05/15/19-Hiralkumar Patel. 11:56 AM:- received email from Joy including summary of well gauging/vac event conducted on 04/04/19, 04/11/19, 04/18/19, 05/02/19 and 05/09/19. no gauging activities occurred between 12/20/18 and 04/04/19. after Dec. 2018, product noted in wells MW005 (0.58 to 1.68 ft), MW007 (0.01 to 0.16 ft) and MW008 (0.03 to 0.58 ft). discussed available well gauging/product recovery data with DEC Austin, and decided to continue monthly well gauging/VEFRing. 3:08 PM:- sent email to Joy and asked her to continue monthly well gauging/vacuum recovery and data submission until further notice. 06/05/19-Hiralkumar Patel. 8:48 AM:- received email from DEC Zheng stating that sentinel well (under BCP #: C224264) will be installed on 06/07/19. 06/06/19-Hiralkumar Patel. 9:18 AM:- approved invoice (# 133932-133944) from EAR for project coordination/VEFR conducted in month of Apr. 2019. 06/07/19-Hiralkumar Patel. 11:17 AM:- received email from Joy including summary of well gauging/vac event conducted on 06/06/19. found product in well MW005 (0.81 ft) and MW008 (0.04 ft). 07/05/19-Hiralkumar Patel. 12:51 PM:- approved invoice (# 134788-134802) from EAR for project coordination/VEFR conducted in month of May 2019. 08/26/19-Hiralkumar Patel. received email from Joy (at 2:06 PMon 08/05/19) including summary of well gauging/vac event conducted on 07/11/19 and 08/01/19. on 07/11/19, product noted in wells MW005 (0.93 ft), MW007 (0.31 ft) and MW008 (0.31 ft). on 08/01/19, product noted in wells MW005 (0.82 ft), MW007 (0.19 ft) and MW008 (0.16 ft). DEC Jane sent email (at 4:07 PM on 08/13/19) to Joy approving weekly gauging of wells MW006, MW008, OB003 and OB004; in reference to dewatering activities at adjacent BCP site (C224264). 9:34 AM:- approved invoice (# 135328-135337) from EAR for project coordination/VEFR conducted in month of June 2019. 2:56 PM:- sent email to Joy and asked her to gauge all monitoring wells weekly using interface probe. 08/30/19-Hiralkumar Patel. 2:33 PM:- received email from Joy including weekly gauging data for Aug. 2019. during weekly gauging, all wells were gauged except MW005 and MW007. found product in well MW008 during all four weekly gauging (between 0.16 and 0.29 ft). 09/03/19-Hiralkumar Patel. 9:40 AM:- spoke with Joy and asked her to continue weekly gauging of all wells and monthly VAC of impacted wells. 09/10/19-Hiralkumar Patel. received email from Joy (at 4:52 PM on 09/09/19) including well gauging data table/hydrographs. data suggests that wells OB-003, OB-004, MW-005

following condition: Additional Permit Conditions: The following activities will be completed and monitoring implemented prior to beginning pumping operations and will continue until pumping operations cease: A. Install Sentry Wells " The applicant will install sentinel monitoring wells on the west side of Kent Avenue approximately 50 feet and 100 feet north of the corner of Flushing Avenue to monitor drawdown between 347 Flushing Avenue and the Former Arkansas Company, Inc. BCP site. The wells should be screened across the observed water table and should be constructed with at least 15 feet of screen below the observed water table. The wells should be 4 in diameter to allow for NAPL recovery if necessary. Applicant will arrange for surveying of the well elevation in the same datum as the existing wells. B. Daily Monitoring Using Sentry Wells: " The applicant will monitor the water table elevation in the monitoring well prior to commencing dewatering activities, and then daily during dewatering activities. Monitoring results will be reported on a weekly basis to: Hiralkumar Patel, NYSDEC Division of Environmental Remediation, Spill Response Section hiralkumar.patel@dec.ny.gov C. Contingency Plan: " Should NAPL be observed to have migrated into the sentinel wells following the initiation of dewatering on the site, the Department will identify any specific actions to abate or mitigate the movement of contamination, which shall be undertaken by the applicant. Ariel stated that the driller attempted to install the sentry wells today (11/02/20), but found a sewer pipe (which are not regularly marked up by the 811 service) along the way. the sidewalk was marked out with electric and gas lines, many of which feed the buildings. 11/09/20-Hiralkumar Patel. 3:02 PM:- spoke with Ariel at AMC Eng. he stated that the driller tried to install wells along the curb line. asked him to check site for possibility of well installation closer to building on west sidewalk of Kent Ave. also asked him to provide their client's contact info. 11/12/20-Hiralkumar Patel. received email from Erin (at 3:48 PM on 11/11/20) including weekly gauging data collected on 11/04/20. wells OB003, OB004 and MW006 were not gauged. product found in well MW005 (0.26 ft), MW007 (1.37 ft) and MW008 (0.19 ft). impacted wells were VEFRred on 11/04/20. 11/19/20-Hiralkumar Patel. received email from Ariel (at 7:02 PM on 11/18/20) including well logs. two (2) 4-inch wells (MW-1 and MW-2) were installed (for dewatering at 347 Flushing Ave) to a depth of 20.5 ft bg, with 15 ft of screen from 5.5-20.5 ft depth. 1:37 PM:- approved invoice (# 141233) from EAR for project coordination/well gauging conducted in month of Sept. 2020. 1:57 PM:- sent email to Ariel and asked him to submit scaled site map with well locations and well locations pics (if available). 11/24/20-Hiralkumar Patel. 10:09 AM:- received email from Pat including weekly gauging data collected on 11/11/20 and 11/16/20. no product was noted in wells OB003 (not accessible on 11/16/20), OB004 and MW006. product was found in well MW005 (0.63 and 0.68 ft), MW007 (0.09 and 0.11 ft) and MW008 (0.07 and 0.14 ft). 12/01/20-Hiralkumar Patel. received email from Ariel (at 3:47 PM on 11/30/20) including a well location map and daily log. two 4-inch wells (MWN and MWS) were installed along west side of Kent Ave. both wells were gauged daily (except weekends) since 11/17/20 and no product was found in both wells. wells MWS, MWN and MW-006 are located on west sidewalk of Kent Ave. wells MWS and MWN were installed by AMC Engineering as part of dewatering activities at site 347 Flushing Ave. well MW-006 was installed by EAR (DEC contractor) as part of groundwater delineation for the subject site. from the northwest corner of the intersection

Ext. 152 email: goetz@enviro-asmnt.com 06/02/21-Hiralkumar Patel. received email from Weronika (at 7:16 PM on 05/28/21) from AMC Eng. including daily well log for period up to 05/28/21. two wells MWN and MWS were gauged daily (except weekends) and no product was found in both wells. received email from Steve (at 4:18 PM on 06/01/21) from EAR including weekly gauging data collected on 05/25/21. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was found in well MW005 (3.17 ft), MW007 (4.94 ft) and MW008 (1.47 ft) {- this high numbers are due to technician's misunderstanding.} impacted wells were VEFRred on 05/25/21. 10:35 AM:- visited site and met Steve. EAR crew had finished gauging wells prior to arrival to the site. Steve mentioned that product was found in only two wells: approx. 0.4 ft in MW5 and 0.18 ft in MW-7. Steve also stated that high product thickness noted during well gauging on 05/25/21 is actually result of technician's misunderstanding and not actual product thickness. Steve mentioned that the next VEFRring will occur in last week in June. asked him to schedule well gauging/VEFRring in presence of DEC personnel as may need to open/gauge two wells (MWN and MWS) on west side of Kent Ave, installed by AMC Eng. 12:24 PM:- sent email to Weronika requesting access to wells MWN and MWS during well gauging/VEFRring (possibly on 06/22/21). email copied to DEC Jane, Steve, Ariel and joel@empirebrooklyn.com. 06/03/21-Hiralkumar Patel. 10:48 AM:- received email from Steve including weekly gauging data collected on 06/02/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.40 ft) and MW007 (0.18 ft). 06/04/21-Hiralkumar Patel. 9:59 AM:- received email from Weronika from AMC Eng. including daily well log for period up to 06/03/21. no product was found in both wells MWN and MWS. 06/07/21-Hiralkumar Patel. 11:15 AM:- received email from Steve confirming next VEFRring schedule at 10 AM on 06/22/21. 06/11/21-Hiralkumar Patel. 8:26 AM:- received email from Weronika from AMC Eng. including daily well log for period up to 06/09/21. no product was found in both wells MWN and MWS. 06/15/21-Hiralkumar Patel. received email from Steve (at 4:26 PM on 06/14/21) including weekly gauging data collected on 06/09/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.45 ft) and MW007 (0.24 ft). 2:15 PM:- approved invoice (#141747) from EAR for project coordination/well gauging conducted in month of Apr. 2021. 06/21/21-Hiralkumar Patel. received email from Steve (at 2:11 PM on 06/18/21) including weekly gauging data collected on 06/16/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.77 ft) and MW007 (0.49 ft). 3:32 PM:- received email from Weronika from AMC Eng. including daily well log for period up to 06/17/21. no product was found in both wells MWN and MWS. 06/22/21-Hiralkumar Patel. 9:00 AM:- visited site and met Jason (EAR) and Aerial (AMC Eng.). gauged existing wells (OB003, OB004, MW006, MW007, MW008, MWN and MWS). no product noted in wells except MW005, MW007 and MW008 (minute amount). 06/24/21-Hiralkumar Patel. 12:33 PM:- received email from Steve from EAR including weekly gauging data collected on 06/22/21. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was found in well MW005 (0.78 ft), MW007 (0.50 ft) and MW008 (0.01 ft). impacted wells were VEFRred on 06/22/21. 06/25/21-Hiralkumar Patel. 10:28 AM:- received email from Weronika from AMC Eng. including daily well log for period up to 06/25/21. no product was found in both wells MWN and MWS. 07/06/21-Hiralkumar Patel. received email from Weronika (at 5:06 PM

AM:- approved invoice (#142018) from EAR for project coordination/well gauging conducted in month of Aug. 2021. 10/25/21-Hiralkumar Patel. received email from Steve (at 5:11 PM on 10/21/21) including weekly gauging data collected on 10/20/21. well OB004 was found dry. no product was noted in wells OB003 and MW006. product was found in wells MW005 (0.12 ft), MW007 (0.93 ft) and MW008 (0.03 ft). wells MW005, MW007 and MW008 were VEFRred on 10/20/21. 10/28/21-Hiralkumar Patel. 2:02 PM:- sent email to Steve and inquired him about sudden change in product thickness in wells MW005 and MW007 (suspecting possible swap of data). 4:15 PM:- received email from Steve. he mentioned that the data in the report is as per the tech s field sheet, so it s not a transcription error. though the measurements and product thickness calculations appear mismatched when compared to the previous data. Steve inquired if need to swap numbers and submit revised report. 4:27 PM:- sent email to Steve. asked him not to change data, but to confirm numbers with field tech and then provide explanation for higher product thickness measurement in well MW007. 11/12/21-Hiralkumar Patel. received email from Steve (at 12:32 PM on 11/11/21) including weekly gauging data collected on 10/27/21, 11/04/21 and 11/10/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.40, 0.22 and 0.15 ft), MW007 (0.25, 0.16 and 0.63 ft) and MW008 (none, trace and 0.45 ft). Steve looked into the increased product thickness reported during the 10/20/21 VEFR event. there were no transcription errors while tabulating the field data. additionally, he has confirmed with the technician that MW-007 and MW-005 were not switched. as such, reported variations of product thickness are likely a result of groundwater table elevation fluctuations. 11/12/21-Hiralkumar Patel. 3:01 PM:- received email from Weronika from AMC Eng. including daily well log for period up to 11/05/21. no product was found in both wells MWN and MWS. 11/16/21-Hiralkumar Patel. 12:10 PM:- approved invoice (#142088) from EAR for project coordination/well gauging conducted in month of Sept. 2021. 11/22/21-Hiralkumar Patel. received email from Steve (at 4:17 PM on 11/19/21) including weekly gauging data collected on 11/19/21. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product was found in wells MW005 (0.86 ft), MW007 (0.24 ft) and MW008 (0.13 ft). 11/24/21-Hiralkumar Patel. received email from Steve (at 5:17 PM on 11/23/21) including weekly gauging data collected on 11/23/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.82 ft), MW007 (0.15 ft) and MW008 (0.45 ft). wells MW005, MW007 and MW008 were VEFRred on 11/23/21. 12/02/21-Hiralkumar Patel. received email from Aerial (at 5:59 PM on 12/01/21) from AMC Eng. including daily well log for period up to 11/22/21. no product was found in both wells MWN and MWS. 12/09/21-Hiralkumar Patel. 8:40 AM:- approved invoice (#142160) from EAR for project coordination/well gauging conducted in month of Oct. 2021. 12/13/21-Hiralkumar Patel. 2:07 PM:- received email from Steve including weekly gauging data collected on 12/01/21 and 12/08/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.11 and 0.77 ft), MW007 (0.38 and 1.68 ft) and MW008 (none and 0.25 ft). 12/20/21-Hiralkumar Patel. 2:50 PM:- received email from Steve including weekly gauging data collected on 12/16/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.36 ft), MW007 (0.38 ft) and MW008 (trace). 12/21/21-Hiralkumar Patel. 9:15 AM:- visited site to witness well gauging, but EAR technician had already gauged wells earlier today. he noted 0.19 ft of product in well MW007

S112138864

and 0.32 ft of product in well MW005. the EAR technician mistakenly wrote well MW007 as well MW005, and well MW005 as well MW007. asked him to correct well notations. 9:39 AM:- spoke with Steve at EAR about change in well notations by technician. asked him to make note in gauging table about possible swap of data between wells MW005 and MW007 for past couple of weeks. 12/23/21-Hiralkumar Patel. received email from Steve (at 5:02 PM on 12/22/21) including weekly gauging data collected on 12/21/21. no product was noted in wells OB003, OB004, MW006 and MW008. product was found in wells MW005 (0.32 ft) and MW007 (0.19 ft). Steve mentioned at the end of data table that MW005 and MW007 may have been mistaken for each other during gauging/VEFR events. wells MW005 and MW007 were VEFRred on 12/21/21. 01/04/22-Hiralkumar Patel. 11:53 AM:- received email from Steve including weekly gauging data collected on 12/30/21. well OB003 was inaccessible. no product was noted in wells OB004, MW006 and MW008. product was found in wells MW005 (0.11 ft) and MW007 (0.22 ft). 01/07/22-Hiralkumar Patel. received email from Steve (at 4:06 PM on 01/06/22) including weekly gauging data collected on 01/05/22. no product was noted in wells OB003, OB004, MW006 and MW008. product was found in wells MW005 (0.19 ft) and MW007 (0.16 ft). the report includes a revised table with gauging data from Jan. 2021. the hydrographs show data from Dec. 2017. discussed with DEC Austin and DEC Jane O'Connell regarding alternative options to resolve this case. based on well gauging/VEFRing data since Dec. 2017, it was decided to 1) stop weekly gauging of existing monitoring wells, 2) continue monthly well gauging/VEFRing, and 3) explore options (feasibility / cost analysis) for excavation of grossly contaminated soil. 11:13 AM:- sent email to Ms. Singer, property manager requesting a call back to discuss possible excavation activities in front of the building entrance along Kent Ave. Top Quality Management **building management** 199 Lee Avenue #286 Brooklyn, NY 11211 Attn.: Esty Singer Ph. (718) 522-6582 Ext. 103 email: esinger@topqualitymanagement.com 11:31 AM:- sent email to Steve including a revised standby contractor authorization form. asked him to stop weekly well gauging activities, but to continue monthly well gauging/VEFRing. also asked him to explore option for excavation of grossly contaminated materials. email copied to Jennifer. 01/10/22-Hiralkumar Patel. 10:27 AM:- received email from Steve confirming receipt of the revised standby contractor authorization form. 01/13/22-Hiralkumar Patel. 1:10 PM:- received call from Dini (property manager) and Mendy (Dini's supervisor). Mendy mentioned that Dini manages that property now. informed them about spill history and current impact under the sidewalk in front of building entrance. asked Mendy about possibility of soil excavation in front of building's entrance. he mentioned that there is about six weeks window when kids in building go out for camping. informed him that Steve from EAR will contact building management to discuss possibility and process of soil excavation to expedite remediation. Top Quality Management **building management** 199 Lee Avenue #286 Brooklyn, NY 11211 Attn.: Dini **property manager** Ph. (718) 522-6582 Ext. 103 email: maint4@topqualitymanagement.com Mendy email: mendy@topqualitymanagement.com 1:24 PM:- spoke with Steve and informed him about discussion with building management. asked him to contact building manager to discuss possibility/process of excavation. 1:44 PM:- sent email to Dini with Steve's contact details. informed her that Steve will contact building management to discuss excavation process. email copied to Mendy and Steve.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. Also See Spill Nos. 8902747 and 9611420 for further site history. On 5/17/2001, DEC Sigona & Rossan performed a site inspection at 569 Myrtle Avenue, PBS No. 2-600866. The site was under construction, and being developed into a new state-of-the art gas station. Met with Mike Buscemi, Maximum Distributors, 556 Central Avenue, Bethpage, New York, 11714 (516)933-0700. Mike said the tank removal and installation was supervised by a Licensed NYFD, contractor and plans were filed and approved by NYFD by Charles Nalbano of Maximum Distributors. The owner of the station is Ivan Muller (718)871-0097. Mike's been working on the station for 8-9 months. They removed a number of 550's and 4,000 gallon USTs in 2000. Phoenix Environmental supervised closure activities and documented a closure report on tank removal. 631-864-4200. Ivan Muller, 1616 48th Street, Brooklyn, N.Y. 718-366-2259. Mike Buscelli toured the site and showed where the tanks were installed and piping systems. The tanks were reportedly double walled FRP with leak detectors. Mr. Buscelli will send copy of plans and results of Phoenix site assessment to DEC. DEC Sigona called Mike Buscemi on Monday May 21, 2001, and left message requesting an update on status of site assessment/tank closure report and copy of installation plans. They said he would be contacted and would reply ASAP. On May 23, 2001, the DEC (Sigona) received a copy of the engineering plans for the new tanks and a laboratory test report from EcoTest Laboratories, dated

U001854648

June 16, 2000. The test results indicate that petroleum contaminated soils were found during the field sampling performed by Phoenix Environmental. The information submitted by Maximum Distributors does not include all of the information we requested. Mr. Buscemi suggested that we contact the owner for additional information. At this point, the DEC has determined that the EcoTest Laboratory report along with the notification by Phoenix Environmental to the DEC Spill hotline will satisfy one of the requirements of a site assessment under EPA 40 CFR 280.72: identification of the release of a regulated substance by an owner or operator closing an UST. However, additional investigation is warranted and required by Article 12 of the Navigation Law (NL) because the report indicates that the groundwater may have been contaminated following the closure of the gasoline and used oil USTs. The EcoTest laboratory test results cannot be used in place of a complete tank closure report or a site assessment. On May 23, 2001, The DEC (Sigona) sent a letter to Ivan Muller requiring the facility owner to hire a qualified environmental consultant to prepare a valid tank closure and site assessment report, if they have not done so already. These reports must be developed in accordance with 40 CFR 280.72 and DEC's SPOTS Memo No. 14, entitled, Site Assessments at Bulk Storage Facilities, dated August 1, 1994. The DEC plans to inspect this facility after the tanks have been installed to ensure that the plans have been properly implemented. DEC requested that 569 Myrtle LLC submit a copy of the tank closure report, a complete site assessment, and waste manifests for the disposal of petroleum contaminated soils, by June 15, 2001. 12/05 - Further investigation needs to be performed. 4/1/09 - Austin - Transferred from Needs Reassignment to Patel for further work to remediate and close - end 04/17/09-Hiralkumar Patel. visited site. its a citgo gas station with a store at the intersection of Myrtle Ave and Classon Ave. owner was not available at the site. Ivan **property owner** Ph. (718) 871-0097 Amna Kirmani **store manager** Ph. (718) 783-3744 received message from Ivan. 06/04/09-Hiralkumar Patel. alternate addresses: 569-577 Myrtle Ave, 184-190 Classon Ave other spills: 9611420, 8902747 PBS #: 2-600866. as per PBS record, site had nine 550 gal and one 4,000 gal gasoline USTs and one 275 gal other oil UST. all tanks removed in April 2000 and replaced with two 10,000 gal gasoline UST and one 8,000 gal diesel UST. currently active tanks were tested in March 2006. Station owner: 569 Myrtle Ave LLC 1616 48TH Street Brooklyn, NY 11204 Attn.: Ivan Muller Ph. (718) 871-0097 (347) 234-1786 Fax (718) 871-9350 email: ivanmuller1@gmail.com reviewed old file.

-** spill #: 8902747 was reported on 06/15/1989 as five 550 gal tank systems failed tightness test. case closed and was referred to spill # 0003150. spill #: 9611420 was reported on 12/17/1996 as gas fumes were reported in sewer. case was reported by FDNY at 579 Myrtle ave (FDNY building). after further investigation found that site at 569 Myrtle Ave could be the source of gas odors in sewer. case closed and was referred to spill # 0003150. - in May 2001, someone from senator Velmanette Montgomery's office had made an inquiry regarding an abandoned gas station at Myrtle ave & Classen ave - as per notes from 9611420, site had 10- 550 gal and one 4,000 gal USTs - Maximum Distributors removed 550 gal and 4000 gal tanks - Phoenix Environmental supervised closure activities and documented a closure report on tank removal - on 05/22/01, received fax from Phoenix environmental with copy of sample analyticals; three soil samples

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

TIPPLE 10/11/05 Talked with Liviu Rada at DEP (212-897-2674). He said that closeout documentation would be sent in the mail but did not receive. Bishop 11/30/07. TTF letter was sent to Mr. Penny Theodorelys (NYC DEP). JK. 09/01/09. J.Krimgold reviewed the letter submitted by NYC DEP dated 11/20/07 and signed by Penny Theodorelys. Based on the documentation submitted attached to the letter a 1080 gal heating oil UST was removed on June 25, 2007. No visual or odor contamination was found during tank closure. Case closed. "

DEC Memo: "This spill was transferred from DEC Sigona to Rommel on 2/2/04. This spill site has been consolidated under Spill No. 0010852. DEC Sigona called Kevin Murphy Tyree on 1/2/2001. Kevin said he would send the results of the investigation to DEC Sigona. They are finding mainly heavy metals, solvents and light ends. There is a proposal to address the whole site. There has been several investigations according to Mr. Murphy but they could not locate a spill number. This site is adjacent to #6 fuel oil spill investigation and cleanup at Best Metro

Towel and Linen, Koscuisko street, Brooklyn. On May 21, 2001, DEC Sigona received addendum to subsurface investigation, dated May 14, 2001, along with subsurface investigation, dated March 2001, by Tyree Bros Environmental Services. Sent letter to RP on July 6, 2001. Responsible Party: Dekalb Acquisition Entity, LLC c/o Octagon Properties 35-11 35th Avenue Long Island City, New York 11106 ATT: Mr. John Ritter, Property Manager RE: DEC Spill Investigation Nos. 8603320, 8603330, 8603465, 9000511, 9303221, 9304164 & 0010852 - Dekalb Acquisition Entity, LLC, 585 Dekalb Avenue, Brooklyn, N.Y. (The Site) - Petroleum Bulk Storage (PBS) No. 02-456748. 1993 groundwater sampling from monitoring well No. MW-6, reported concentrations of 1,100 and 2,100 ppb for trichloroethene exceeded the toxic characteristic threshold for hazardous waste of this constituent. Also, mercury and zinc were detected above DEC's recommended cleanup levels when compared to Technical & Administrative Guidance Memorandum (TAGM) Determination of Soil Cleanup Objectives and Cleanup Level's, dated January 24, 1994 There are a number of previous spill reports which must be addressed in the site investigation reports. The following is a summary of previous spill reports listed for this site: Spill No. 8603320 - August 1986 Tank Test Failure for UST Spill No. 8603330 - August 1986 Tank Test Failure for UST Spill No. 8603465 - August 1986 - 2 x 12,000 gallon fuel oil and chemical USTs failed Tank Tests. Spill No. 9000511 - April 1990 - 250 gallon diesel spill from tank overflow. Spill No. 9303221 - June 1993 - Spill of Hazardous Waste from overflow tank. Spill No. 9304164 - July 1993 - Spill of liquid sewage contaminated with lead spilled near UST Area No. 4. Spill No. 0010852 - January 2001 - Discovery of gasoline and diesel contaminated soils during subsurface investigation. It is my understanding that there have been prior site investigations performed in 1993 and 1997, by other consultants. We would need to review these reports, along with any relevant materials to determine whether the above referenced spill cases can be properly closed by the DEC 2/8/05 Received a call from Vinny at Island Tank who indicated that he met Ed Rossan on site during an inspection and gave reports to Ed. Rommel 3/22/06 - Received call from Theodore W. Firetog, Esq. requesting information with regards to spill. Firetog stated that he worked for the current property owner and that a Home Depot had been built on the site. The NYSDEC requested information with regards to any work completed on the site. Firetog responded that his client is gathering the information and will forward to the NYSDEC. Upon receipt of this information a spill review will need to be completed. 7/13/06 - Received Environmental Report on site from Theodore W. Firetog, Esq. Report states that spill site was sampled prior to be regraded and subsequently paved. Groundwater results show no evidence of petroleum contamination in spill area of concern. Spill closed. Sent letter to Firetog and Dekalb Acquisition (RP) on 7/25/06. "

Site Description:

"Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. The site has been re-developed into a multi-story residential and commercial structure. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. Current Zoning and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory, a furniture manufacturer, and a chemical factory. At some point in

Env Problem:

their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum contamination was also detected in the on-site soil, likely from leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "

"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination did not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80 ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab samples taken in newly constructed on-site buildings detected PCE at concentrations as high as 441

micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

Site Code: 495614

Site Description: "Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. The site has been re-developed into a multi-story residential and commercial structure. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. Current Zoning and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory, a furniture manufacturer, and a chemical factory. At some point in their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum contamination was also detected in the on-site soil, likely from

Env Problem:

leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "

"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination did not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80 ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab samples taken in newly constructed on-site buildings detected PCE at a concentrations as high as 441 micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not

detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80 ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab samples taken in newly constructed on-site buildings detected PCE at a concentrations as high as 441 micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not

detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

Site Description: "Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. The site has been re-developed into a multi-story residential and commercial structure. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. Current Zoning and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory, a furniture manufacturer, and a chemical factory. At some point in their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum contamination was also detected in the on-site soil, likely from

Env Problem:

leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "

"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination did not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. Site Description: "Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. The site has been re-developed into a multi-story residential and commercial structure. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. Current Zoning and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory, a furniture manufacturer, and a chemical factory. At some point in their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum contamination was also detected in the on-site soil, likely from

Env Problem:

leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "

"Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination did not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80 ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab samples taken in newly constructed on-site buildings detected PCE at a concentrations as high as 441 micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not

detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

SAWYER This spill site has been consolidated under Spill No. 9803773. This spill cleanup is under a stipulation agreement. DEC (Sigona) received report by CA Rich Consultants on July 21, 1998. There is an investigation by DEC with a State Funded Contractor (Milro) related to sewer contamination along DeKalb Ave behind the facility. D 7/20/04 - Sawyer - Spill transferred from Sigona to Sawyer. 2/7/06- DEC Piper spoke w/ Rich at CA Rich Consultants. As per conversation there was a large amount of #6 oil under ground. They had installed a recovery system though no longer maintain it due to non-payment. The impacted area is ~200 sq feet and product was as thick as a couple feet at one time. He will provide the latest report before dropping them. Case referred to Koon Tang due to free floating product on GW interface. 2/13/06 - After review of the case file, the 6 oil plume is no longer impacting the sewer system. A significant amount of oil has been recovered and the recovered rate has slowed to less than 50 gal/Month, based on the latest monitoring report dated Dec. 2003. Will assign it to low priority (P3) for now. - KST 07/25/2012 - V. Brevdo Received e-mail from Charles Sosick of Environmental Business Consultants: Vadim, The above referenced Spill no. is related to a 6 oil spill and was under active remediation by the former owner in accordance with an approved RAP. The new owner wants to complete the remediation of the site and has replaced / upgraded some of the equipment. Please let me know who is assigned to the Site. I believe it was last being handled by Koon Tang and before that it was Anthony Sigona. Thanks. Charles B. Sosik, P.G. Principal EBC Environmental Business Consultants Ph: 631.504.6000 ext. 112 Fax: 631.924.2870 Cell: 631.357.4927 csosik@ebcincny.com V. Brevdo replied to Charles Sosik via e-mail: Dear Mr. Sosik, I am a new project manager for this spill case. I will work with new owner of the site and Environmental Business Consultants towards completion of the remedy at the site to bring it into a spill closure mode. I would like to see your proposals regarding further course of action at the site. I would like to inform you that the main criteria we (Division of Environmental Remediation, Petroleum Spill Remediation program) are looking at when making a spill closure decision are as follows: free product must be removed, grossly contaminated soil with visible staining must be removed, source of contamination must be removed, concentrations of contaminants in soil and groundwater are either at the levels of cleanup guidance values or higher but within acceptable range to DEC, no migration of contaminant off site occurs, remaining contamination is contained, no threat of exposure to vapors from remaining contamination exists, and site poses no further threat to human health and environment. We also use engineering controls such as vapor barriers and SSDS system where necessary. I would like you to be cognizant that when you / your client requests / recommends closure of this spill case, I would like to see a Spill Closure Report submitted which would address aforementioned criteria and explain how these criteria are met. If you have questions regarding this matter, please contact me via phone or e-mail. Respectfully, Vadim Brevdo 08/14/2012 - V. Brevdo Received and reviewed August 13, 2012 letter project status update from Charles B. Sosik of Environmental Business Consultants, (631-504-6000 ext 112) Consultant for New Kosciusko LLC V. Brevdo 08/14/2012 - V. Brevdo At the request of Alan Blank (ABlack@walkerdunlop.com), representative of financing institution sent him the following e-mail: From: Vadim Brevdo [mailto:vxvbrevdo@gw.dec.state.ny.us] Sent: Tuesday, August 14, 2012 1:11 PM To: Alan Blank Cc: Charles Sosik; Josh West Subject: RE: 45

Kosciusko Street, Brooklyn, NY NYSDEC Spill No. 98-03773 Dear Mr. Blank, As you requested, this is to confirm that there is currently no violations of Environmental Conservation Law or New York State Navigation Law with regard to the subject property. Remedial activity at this petroleum spill case site will continue with periodic progress reports submitted to the Department by the Environmental Business Consultants on behalf of New Kosciusko LLC until the remedial action is completed. If you have any further questions regarding this matter, please contact me via telephone or e-mail. Respectfully, Vadim Brevdo 12/11/2014 - V. Brevdo e-mail to Charles Sosik of EBC consultants at 'csosik@ebcincny.com': December 11, 2014 Dear Mr. Sosik: Your August 13, 2012 correspondence, which described project status at the time, stated the following: Remedial activity will continue with periodic progress reports submitted to the Department until the remedial action is completed. It appears that the Department has not received aforementioned progress reports. Would you please update me on the status of the project and whether you intend to submit final remedial action report and spill case closure petition? This spill case has been open for a long time, and I need to know if there is any environmental or human health benefit in keeping this case open. If you trust that it is not appropriate to submit final remedial report and spill closure petition, please explain the reasons which are preventing such submission/petition. If you agree that spill case closure is appropriate at this time, please prepare final remediation report and spill case closure petition and submit them to my attention. Also, I would appreciate if you provide contact information (telephone number, address and e-mail address for your client on this project (the Responsible Party and/or the current owner of the property)). I look forward to hearing from you at your earliest convenience. Thank you. Vadim Brevdo, P.E. Environmental Engineer 3 New York State Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 718.482-4928 Vadim.Brevdo@dec.ny.gov 04-09-2015 NYSDEC wrote a letter inquiry to Kosciuszko Plaza LLC, current site owner requesting submission of the final engineering report and spill closure petition, if appropriate. Copied EBC Consultants, Mr. Charles Sosik on the letter. VB 08-03-2018 As per Remediation Section B Chief Vadim Brevdo, this spill case is reassigned from Vadim Brevdo to MD. S. Hoque as project manager effective on August 3, 2018. -MDH 9/27/2018-M.Hoque: Spoke to Charile Sosik(631.504.6000) of EBC consultants and discussed the project status. He told that the UST removed from the site and completed the building construction. I told him that the Department needs to receive an updated remedial action completion report along with a spill closure email/letter. He will meet to his client next week and will get back to the Department. MDH An email sent to Charlie Sosik, EBC: Thu 9/27/2018 1:23 PM Spill # 9803773.2018.09.27-Best Metropolitan- 45 Kosciusko Street, Brooklyn, NY. Hi Charlie: Thank you for taking time earlier today to discuss project for the Former Best-Metropolitan Towel & Linen Supply Co., Inc. 45 Kosciusko Street, Brooklyn, NY. It is my understanding from our conversation that the EBC Consultants conducted groundwater monitoring for removal of free product (petroleum) from the site. Your August 13, 2012 correspondence, which described project status at the time, stated the Remedial activity will continue with periodic progress reports submitted to the Department until the remedial action is completed. The Department has not received aforementioned progress reports. On April 9, 2015, the Department sent a letter to the Kosciuszko Plaza

LLC and cc d to EBC requesting to evaluate the current status of the remediation project and submit a final remediation report and spill case closure petition. However, no report or any other correspondence has been submitted to the Department, either from EBC or Kosciuszko Plaza LLC . The Department needs to receive an updated remedial action/completion report whether the remedial action was completed to address closure of the historic spill case, and whether remedial activity may be needed to continue to accomplish the remedial objectives. Also, this is my understanding that you will meet to your client next week and will get back to the Department with a recommendation for closing the spill case. I would appreciate if you provide an updated information to the Department. I look forward to work with you and your client to complete remediation and ultimately closure of the historic spill case # 9803773. Please acknowledge receipt of my email. If you have any questions or would like to discuss these matters, please feel free to contact me. Thanks, MD S. Hoque, 11/1/2018-M.Hoque: Called to Charlie but he was not in the office. Left msg to receptionist to call me back.(MDH) 7/27/2021-M. Hoque: On July 27, 2021, Heather Moran-Botta, Sr. Project Manager of PWGC, a new consultant for the site called me. She said that after deceased of Charlie, the PWGC took over the site from the previous consultant CA Rich to complete site remediation. PWGC is scheduled to visit the site to gauge the wells and do an inspection on 8/3/2021. I directed the consultant to gauge the site wells and update to DEC. (MDH) 10/14/2021-M.Hoque: On October 14, 2021, the consultant, PWGC informed DEC that well gauging has been conducting and additional rounds of VEFR will starting this week and scheduled for the next three weeks. (MDH) 10/20/2021-M.Hoque: Contaminated soil was discovered during drilling of test borings adjacent to a closed-in-place 5,000-gallon UST and an active 15,000-gallon no. 6 fuel oil UST at this facility. Five soil borings and four monitoring wells were installed to investigate the extent of the spill and the source of the release. The contractor CA Rich identified the abandoned 5,000-gallon UST as the spill source. No VOCs or SVOCs were found in soil above standards. A Stipulation Agreement was executed with Best Metropolitan Towel & Linen Supply Company in April 1999. DEC approved a work plan proposing installation of a fluid recovery system with pneumatic pumps in two wells near the 5,000-gallon UST. CA Rich performed product recovery until December 2003, recovering a total of 2,850 gallons of oil. From 2003 to 2008, the system was maintained by the Best Metropolitan facility s staff. In 2008, Best Metropolitan sold the property, and the new owner upgraded the product recovery system. Environmental Business Consultants (EBC) conducted monthly well monitoring and product recovery until 2012. In April 2015, DEC required the new owner, Kosciuszko Plaza LLC, to submit a status report. In July 2021, the new owner s consultant, P.W. Grosser Consulting (PWGC) contacted DEC and proposed to gauge the existing wells and conduct product recovery by VEFR. DEC approved this proposal. On October 14, 2021, PWGC informed DEC that two VEFR events have been conducted, and another event is scheduled for the end of October. PWGC will then submit a product recovery report for DEC review. (MDH) 1/24/2022-M. Hoque: On January 24, 2022, Kris Almskog, PG, Vice President of the PWGC informed DEC that Ms. Heather Moran-Botta is no more working with PWGC. Kris Almskog told DEC that site remediation has been completed and a remedial action report is being prepared. Kris Almskog will send a RAR to DEC for review soon. (MDH) 3/2/2022-M.Hoque: On February 16, 2022, PWGC submitted a well

gauging and product recovery report. Between August and December 2021, well gauging and VEFR were conducted on seven occasions. LNAPL thicknesses in site wells varied from 7.22 feet in August to 0.13 foot in December 2021. Each VEFR event recovered from 40 to 200 gallons of an LNAPL/water mixture. The report requested spill closure. On March 1, 2022, DEC denied this request and directed PWGC to continue well gauging and product recovery until LNAPL has been eliminated to the extent feasible. The next VEFR event is scheduled for the second week of March 2022. After the event, PWGC will submit a progress report for DEC review..(MDH) 4/5/2022-M. Hoque: The email below from the consultant- From: Kris Almskog Sent: Tuesday, April 5, 2022 8:34 AM To: Hoque, MD S (DEC) Cc: Yoel Barminka ; Usman Chaudhry ; Gitty Feldman ; Anshel Friedman ; Brevdo, Vadim (DEC) Subject: RE: Spill No. 9803773-Best Metropolitan- 45 Kosciusko Street, Brooklyn, NY MD S. Hoque, Hope all is well. As discussed several weeks ago, PWGC is continuing to remediate the residual LNAPL in the onsite well network. Although previous remedial efforts have been successful, there is still a small amount of residual weathered No 6 fuel oil LNAPL in 2 of the monitoring wells. Over the past several weeks, PWGC has been utilizing absorbent socks, left suspended in the well for several days to remove the residue LNAPL. When the absorbent socks are pulled out, they are coated in heavy viscous black LNAPL. In addition, we have tried on several occasions to recover LNAPL with specialty product recovery bailers designed to recover only LNAPL and not water (the check valve density is designed only to capture LNAPL). These efforts have not been successful in removal of LNAPL. We think it is because there is not sufficient LNAPL thickness in the wells to be captured in the bailers. However, the viscosity of the weathered No 6 fuel oil has made accurate measurement of the LNAPL thickness extremely difficult. The residual LNAPL is very tacky (with a consistency of molasses) and even lowering bailers and depth to water gauges down the well becomes difficult because the inside of the casing is so sticky. We will be continuing to use the absorbent socks and attempt LNAPL recovery with the bailers over the next few weeks and hope to be able to visually confirm lack of significant LNAPL on the water table in the coming weeks. Thanks for your continued cooperation with this project. Kris Almskog, PG - Vice President w. 631.589.6353 M. 516.807.6899 f. 631.589.8705 6/8/2022-M. Hoque: A spill closure report received and being reviewed. (MDH) 6/16/2022-M. Hoque: Comments on the RAR/spill closure request sent to the consultant. DEC requests another round round of gauging to see product thickness from sheen to clear. (MDH) 7/15/2022-M. Hoque: Received a weekly site status updates: From: Kris Almskog Sent: Friday, July 15, 2022 9:50 AM To: Hoque, MD S (DEC) Cc: Usman Chaudhry ; Yoel Barminka ; Anshel Fridman ; Gitty Feldman Subject: RE: Spill No. 9803773-Best Metropolitan- 45 Kosciusko Street, Brooklyn, NY MD S. Hoque, Here is an update on the remedial efforts at 45 Kosciusko Street, Brooklyn. Dates of absorbent sock change outs 6/26 :socks (MW-2, MW-3) stained approx. 2 , LNAPL thickness in well too difficult to measure 6/28 :socks (MW-2, MW-3) stained approx. 2 , LNAPL thickness in well too difficult to measure 7/2 : MW-2 socks stained approx. 1 , MW-3 sock stained approx. 2 , LNAPL thickness in well too difficult to measure 7/6 : socks (MW-2, MW-3) stained approx. 1 , LNAPL thickness in well too difficult to measure New events 7/9 : ocks MW-2 stained approx. 1 , MW-3 stained approx. 0.5 , LNAPL consistency is getting more watery (less thick), inside of socks are not as saturated with oil as previously seen, LNAPL gauged

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Contact Name: CHRIS SAWYER
DEC Memo: "7/24/2006 - Sangesland spoke to Cris Sawyer at Housing Authority. Housing Authority hired a contractor to pull a tank at this site. During the tank pull, the contractor punched a hole in the bottom of the tank and contaminated soil came up from the ground into the tank. Contractor: Primary Contractor - Vamco Sheet Metal Co, 3090 Rt 9 Coldspring NY Sub Contractor on site - Hudson Meridian Construction Group Hudson Meridian Contact: Mr. Louis Gasparre 917-574-9078 Steve Kraszewski in Monitor section knows about this site. Sawyer asked the contractor to: Pump out bottom of tank and then Dewater the site. 07/25/06: Staff visited the site to witness the removal of one 30K UST which will be replaced by another 30KI double-walled fiberglass coated tank. A second tank, also 30K remains next to the pit, closed in place and filled with concrete slurry. This replacement work is part of the NYCHA Consent Order Schedule C compliance. NYCHA will be performing a site assessment for both tanks. End-point samples will be collected from the excavation pit and additional borings will be placed around the closed-in-place UST. Chris Sawyer was on-site with Ganette Fleming. I instructed them to locate the fill port and fill line and take boring samples from each. One of the borings must go to GW and a GW sample be collected. Two composite end-point samples are required along the sidewall of the excavated tank. Crew has not finished removing the cut pieces of the tank, work will be finished by weeks end. - SK A CSL was sent on 08/03/06 02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann. 07/03/09 - J.Kann - reports for UST closure submitted for Tank 1 and Tank 2. soil samples collected had no VOCs above RSCOs (most were undetected), but a few PAHs were slightly above the RSCOS. No groundwater sample was collected, despite DEC request of 7/25/06. Email sent to R. Trocchio on July 3, 2009 indicating that the a groundwater sample should be collected. 11/4/09 - J.Kann - Additional work performed by Langan. Once boring advanced down to 50 feet. Two consecutive samples were submitted to the laboratory for analysis. No SVOC or VOC exceedences. Spill closed. "

DEC Memo: "7/26/2005 Sangesland spoke to Christopher DeCarlo (cell #201-694-4943) with Flemming Lee Shue Environmental Consulting. Approx. 20 years ago this site was a gasoline station. There is no DEC - PBS or Spill history for the site. Chris DeCarlo works for the new owner of a property which is now under construction. Apparently the former owner dug out the tanks and left a pit. Now that the new owner has started construction, approx 8 ft below the bottom of the pit they found floating gasoline product. They are in the process of removing product and contaminated soil. Since the consultant knew the DEC procedure and had already started, no contaminated soil letter

was sent. 7/26/2005 Sangesland - a second Spill Report came in on this site (#0505029). A vapor complaint from a neighbor with the smell of gasoline (95 degree temp today). Sangesland left a voice mail with Chris DeCarlo at Flemming Shue asking him to confirm that the stock piled material is covered and as much Vapor Abatement as possible has been done. 9/19/05-Reassigned to A. Obligado. (Sun) 9/19/05- Obligado- Reviewed fax from Christopher De Carlo of Fleming Lee Shue consultants dated 9/8/05 requesting case manager be assigned to site. Called De Carlo to give him contact info. DeCarlo stated that they completed excavation of soil and taken clean soil endpoint samples. GW sample from bottom of excavation is 18 ppm MTBE and 3.9 ppm benzene. Asks if they can request closure of spill number. Tell him the NYSDEC needs to see the UST closure report before a judgement can be made. DeCarlo says report is in progress and NYSDEC should receive it shortly. 9/19/05 - Obligado - Follow up phone conversation with De Carlo. Ask him to send DEC foundation and vapor barrier details. Inquire about site status - site construction on hold pending permit for excavation. Ask him not to begin construction until the department reviews designs and UST excavation results. 10/28/05 - Obligado - Received phone call from De Carlo, says he had sent DEC Remedial Action Report and was waiting for DEC response. Told him that haven't seen report yet, and to email pdf of report. 10/31/05 - Obligado - review Remedial Action Report. 5 gasoline USTs removed previously, no records of soil disposal or analyticals. Upon beginning of FLShue's involvement of the site, the USTs had already been removed and an excavation 3 to 4 ft deep was on site. Continued excavation to 9-10 ft bgs. Excavated laterally until no contaminated soil encountered. 354 tons of soil removed from site. Soil results show no VOC exceedences in endpoint samples, only PAH exceedences in one soil sample, SB-2. Ground water sample collected from bottom of excavation show 3.9 ppb benzene and 18 ppb MTBE. Building construction will include 20 mL high polypropylene vapor barrier. Request NFA based on low concentrations and vapor barrier. Call Chris and leave message. Sent email approving building construction. Need to discuss closure. 11/3/05 - Obligado - Call Chris De Carlo (212) 675-3225, left message "

Contact Name: BRIAN
DEC Memo: "05/28/10-HRAHMED-Responded to the site as Day-Time-Runner. Met with Bryan Shaw (917 547 0926) from Warren Panzer who are the environmental Consultant for the site and Greg Folk (631 466 6405) from CowDay who are doing the excavation at the site. During excavation they ruptured top of an old abandoned 1080 gal heating oil UST. The tank has some residual oil inside. Noticed no visible contaminated soil. Ask them to hire a contractor to pump out the residual oil from the tank immediately. Afterwards they will pullout the tank excavate the contaminated soil and collect end point samples to confirm the cleanup. A CSL was sent to PRATT institute with the following requirements: 1) Collect endpoint samples from the excavation 2) Register the tank properly 06/16/10-Received closure report from Bryan Shaw of Warrenpanzer. As per the report, on 5/28/10 one 1080 gal tank was discovered 4 ft below grade. The tank was partially filled with oily water mix. Some oily water mix did spill into soil beneath. The tank was pumped out empty the same day. On 6/1/10 the tank was pulled out from the ground. As per visual, olfactory and PID screening the side wall of the excavation was not impacted by oil. they took three endpoint samples from three side walls. They could not collect soil sample from the fourth side because it was a brick wall. To remove the impacted soil from beneath the tank they extend the excavation upto 26 ft below grade and collected a bottom soil sample. All of the end point samples were

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND DEC Sigona sent a letter for info on tank testing procedures on 10/24/2002 as duty officer. LETTER SENT TO: CABS NURSING HOME CO. INC. 270 NOSTRAND AVENUE BROOKLYN, NY 11205 ATTN: LEE LYNCH FOR TANK TEST FAILURE. 4/8/2003 Sangesland spoke with John Leddy of Protest 800-439-8265 He said they pulled out the 10,000 gal #2 Oil UST along with approx 500 tons of contaminated soil. Three sides of the pit will probably have clean endpoints, one side alongside the building will not have clean endpoints. They were not able to dig further along that side because of gas/electric utility lines and the building foundation. Sangesland requested a close out report with Photos, statement about why they couldn't dig any further and all endpoint samples. Also required is a groundwater sample from

03/02/07. spoke with Mr. Balinco, property manager. he doesn't know anything about contamination soil at site. this property occupies block between Ryerson st and Grand Ave (main office). building area along Ryerson st is vacant since 1999, which was found with contaminated soil. asked Mr. Balinco to find out tank closure report. Yaniv Balinco Moishe's Self Storage 32 Grand Avenue Brooklyn, NY 11205 Ph. (718) 237-9735 Fax (718) 237-9771 email: ybalinco@moishesselfstorage.com 03/08/07-Hiralkumar Patel. tried to reach Mr. Balinco but he is on vacation and will be back on 03/27/07. 06/14/07-Hiralkumar Patel. PBS #: 2-602131. as per PBS record, site had two 5000 gal #2 oil USTs and were removed in 2000. from city records, property owner: Ryerson Street Realty Corp. 450 W 15th Street New York, NY 10011-7097 and alternate addresses: 35-57 Ryerson street, 315-333 Park Avenue, 32 Grand Avenue. sent letter to Mr. Balinco at 32 Grand Avenue and also to Ryerson St Realty corp requiring soil/groundwater investigation in area of previously removed tanks. letter emailed to Mr. Balinco. 06/26/07-Hiralkumar Patel. letter, that was sent to Ryerson St Realty corp address, came back undelivered. 07/25/07-Hiralkumar Patel. spoke with Mr. Balinco. he didn't received any letter. sent copy of previously sent letter to Mr. Balinco at different email address (brooklynstorage@moishes.com). 08/20/07-Hiralkumar Patel. received call from Mr. Bartley from Accutech. he mentioned about tank closure report dated Oct. 18, 2000. asked Mr. Bartley to submit that report. James Bartley Accutech Environmental Services Ph. (732) 739-6444 Ext. 14 08/27/07-Hiralkumar Patel. received report from James. abstract: - report prepared on Oct. 18, 2000 - Accutech removed one 12,000 gal #2 UST and one hydraulic lift and abandoned one 12,000 #2 oil UST - western UST (UST #1) was located immediately adjacent to the footings of a loading dock existing on the adjacent property - was determined that the removal of UST #1 would seriously undermine the footings of loading dock, so UST #1 was abandoned-in-place with cement slurry - eastern UST (UST #2) was removed - stained soil was observed around the fill pipes of both USTs and on the bottom of the UST's excavation - groundwater was not encountered in the bottom of the UST's common excavation at approx. 16 ft bg - 8 inch thick concrete anchor slab, on which the USTs were installed, was found on the bottom of the UST's excavation - sandy clay found from 2 ft to 10 ft and silty clay was found from 10 ft to 16 ft depth - tops of the UST's were located approx. 3.5 ft bg - no holes were found in UST #2 - stained soil was removed from the northern, eastern and southern sidewalls and the bottom of the excavation - excavated was extended vertically to approx. 16 ft bg in the eastern portion of the excavation, between the edge of the anchor slab and the building foundations - UST #1 was inspected in place. no holes were observed on the exposed top and eastern side of UST #1 - hydraulic lift, located immediately adjacent to the eastern sidewall of the UST's excavation, was corroded and stained soil was observed on top, around and beneath the hydraulic lift - total of 113.47 tons of contaminated soil was removed - collected a total of 14 post-excavation soil samples from sidewalls and bottom of the UST's and hydraulic lift's common excavation - samples were analyzed via TCLP methods - found SVOC contamination in all samples and VOC contamination in one sample P-1, bottom sample under hydraulic lift discussed with DEC Krimgold. as excavation done below tank bottom and no groundwater was encountered, after reviewing analytical data, Krimgold asked to close the case. case closed."

Site Description: "The "Organics/Suciac Block" site is located in the central portion of the Pfizer Inc. facility in the Williamsburg section of Brooklyn, NY. Gerry Street, Harrison Avenue, Union Avenue and Wallabout Street border this block. The site was first developed for chemical manufacturing between 1854-1888. Operations continued there until 1989 and all buildings were demolished by March of 1995. The Organic/Suciac block is situated within a high-density, mixed urban/commercial/ industrial zone. Pfizer decommissioned the Organic/Suciac block with the intent to utilize it for future

redevelopment and/or beneficial use. As part of the decommissioning process, all buildings were demolished. The present concrete slab is continuous throughout the Block and varies in thickness from 0.5 and 1.5 feet. In 1997, waste from the site was excavated and disposed off site, which included 18.12 tons of mercury and lead hazardous soils. Also, a total of 1,930 tons of benzene hazardous soils were excavated and disposed off-site. In 1999/2000, the excavated soil (approximately 420.3 tons) was classified as a petroleum contaminated non-hazardous material, and was transported off-site and disposed. Institutional Controls: On June 22, 2001, Pfizer presented the deed restrictions for recording in the Kings County Registrar s Office. These restrictions state that unless additional response actions are performed at the Site to allow its use for residential purposes, the Site shall be prohibited from being used for purposes other than industrial, commercial and/or recreational purposes without the expressed written permission from the Department. "

Site Description:

"Location: The site is located in the Broadway Triangle section of Brooklyn and is comprised of four tax parcels totaling 71,305 square feet (1.63 acres). The irregular shaped site occupies a full block bounded by Wallabout Street, Harrison Avenue, Union Avenue and Walton Street. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Current Zoning and Land Use: The western portion of the site is zoned R8A while the central portion is zoned R7D and the eastern portion is zoned R7A. Each of these zoning designations allow for residential uses. Surrounding land use includes residential apartment buildings to the west, residential apartment buildings and a public school (IS 318) to the north, commercial warehouses, residential buildings and a private school to the east and the Former Pfizer Site C BCP site (site no. C224288) and a charter school to the south. Past Use of the Site: From 1887 through 1918, the site was comprised of mixed commercial and residential properties, including a synagogue, a church, a Mission, laundry, tailor shops and bakeries. A portion of the storage yard of an iron works factory that was replaced by a bottling facility by 1904 was also present at the southwestern-most corner of the site. By 1947, an adhesive manufacturing facility operated in the south-central region of the site at 255/257 Wallabout Street (later Pfizer Building 47), and a lumber yard was present at the west end of the site. A taxi garage located at 249 through 253 Wallabout Street (later Pfizer Building 52) maintained two gasoline underground storage tanks (USTs) and a five-story residential building with delivery services at ground level, located at 58/60 Walton Street, was serviced by a 2,000-gallon fuel oil tank installed in the sidewalk. Pfizer started using the western region of the site circa 1954 for employee parking and warehousing purposes. The residential buildings along Harrison Avenue were demolished between 1959 and 1961 and replaced by more parking space for Pfizer employees. A small sheet metal workshop was also present at 262 Wallabout Street, close to the southeast corner of the site. By 1977, the majority of the

Env Problem:

eastern region of the site had been redeveloped into a parking lot and Pfizer used most of the site for parking and warehousing purposes. The small sheet metal workshop was demolished by 1986 and, between 1991 and 1992, the entire block had been razed and has remained vacant to date. Site Geography and Geology: Subsurface soils consist of historic fill materials to a depth of approximately 7 to 10 feet below the surface, followed by silty-clay and fine sand. According to the USGS topographic map for the area (Central Park Quadrangle), the elevation of the property is approximately 16 feet above mean sea level. The area topography is generally flat with little relief and no significant elevation changes. Groundwater occurs beneath the site at a depth of approximately 6-10 feet below grade under perched water table conditions. Based on previous studies performed at the site, groundwater flow is generally to the east. The site is not located within a designated flood zone area. "

"Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs) and lead in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil is being managed under a Site Management Plan. Prior to Remediation Soil and groundwater were analyzed for emerging contaminants (ECs), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based upon investigations conducted to date, the primary contaminants of concern include lead and SVOCs. Soil SVOCs and metals exceeding Unrestricted Use Soil Cleanup Objectives (UUSCOs) were detected in soils throughout the site. SVOCs and metals were found to exceed UUSCOs down to 8 feet below ground surface (ft bgs). A total of 5 locations where levels of lead exceeded the hazardous waste threshold were identified across the site. For SVOCs, the maximum concentration of benzo(a)anthracene was 32 parts per million (ppm) as compared to the UUSCO of 1 ppm, benzo(a)pyrene was 25 ppm (UUSCO is 1 ppm), benzo(b)fluoranthene was 23 ppm (UUSCO is 1 ppm), chrysene was 30 ppm (UUSCO is 1 ppm), and indeno(1,2,3-cd)pyrene of 13 ppm (UUSCO is 0.5 ppm). For metals, the maximum concentration of lead was 4,310 ppm (UUSCO is 63 ppm), mercury was 15.7 ppm (UUSCO is 0.18 ppm), arsenic was 81.1 ppm (UUSCO is 13 ppm), and barium was 5,910 ppm (UUSCO is 350 ppm). Only two VOCs (acetone and methyl ethyl ketone) were detected at concentrations slightly exceeding the UUSCOs; however, these are common lab artifacts and are not considered to be site-specific contaminants of concern. Several pesticides were detected at concentrations nominally exceeding their respective UUSCOs, including 4,4-DDD at 0.035 ppm (UUSCO is 0.0033 ppm) and 4,4-DDE at 0.080 ppm (UUSCO is 0.0033 ppm). For PCBs, the maximum concentration of PCB-1260 was 0.18 ppm (UUSCO is 0.1 ppm). Emerging contaminants (ECs) were also detected in soil samples collected from the shallow intervals down to 17 ft bgs. For example, the maximum concentrations of perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS) were 378 parts per trillion (ppt) and 2,490 ppt, respectively. Data does not indicate any off-site impacts in soil related to this site. Groundwater Concentrations of naturally occurring metals were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS). The maximum concentration of iron was 871 parts per billion (ppb) (AWQS is 300 ppb), manganese was 43,900 ppb (AWQS is 300 ppb), and sodium was 193,000 ppb (AWQS is 20,000 ppb). ECs were also detected in

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

FORMER PFIZER SITE A (Continued)

S123159099

groundwater samples. The maximum concentrations of PFOA and PFOS are 204 parts per trillion (ppt) and 154 ppt, respectively. No VOCs, PCBs or pesticides were detected at concentrations exceeding the applicable AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor Trichloroethene (TCE) was detected in soil vapor at concentrations up to 50.5 micrograms per cubic meter. Data does not indicate any off-site impacts in soil vapor related to this site. "

Health Problem: "Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining contamination."

Site Code: 576972

Site Description: "Location: The site is located in the Broadway Triangle section of Brooklyn and is comprised of four tax parcels totaling 71,305 square feet (1.63 acres). The irregular shaped site occupies a full block bounded by Wallabout Street, Harrison Avenue, Union Avenue and Walton Street. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Current Zoning and Land Use: The western portion of the site is zoned R8A while the central portion is zoned R7D and the eastern portion is zoned R7A. Each of these zoning designations allow for residential uses. Surrounding land use includes residential apartment buildings to the west, residential apartment buildings and a public school (IS 318) to the north, commercial warehouses, residential buildings and a private school to the east and the Former Pfizer Site C BCP site (site no. C224288) and a charter school to the south. Past Use of the Site: From 1887 through 1918, the site was comprised of mixed commercial and residential properties, including a synagogue, a church, a Mission, laundry, tailor shops and bakeries. A portion of the storage yard of an iron works factory that was replaced by a bottling facility by 1904 was also present at the southwestern-most corner of the site. By 1947, an adhesive manufacturing facility operated in the south-central region of the site at 255/257 Wallabout Street (later Pfizer Building 47), and a lumber yard was present at the west end of the site. A taxi garage located at 249 through 253 Wallabout Street (later Pfizer Building 52) maintained two gasoline underground storage tanks (USTs) and a five-story residential building with delivery services at ground level, located at 58/60 Walton Street, was serviced by a 2,000-gallon fuel oil tank installed in the sidewalk. Pfizer started using the western region of the site circa 1954 for employee parking and warehousing purposes. The residential buildings along Harrison Avenue were demolished between 1959 and 1961 and replaced by more parking space for Pfizer employees. A small sheet metal workshop was also present at 262 Wallabout Street, close to the southeast corner of the site. By 1977, the majority of the eastern region of the site had been redeveloped into a parking lot and Pfizer used most of the site for parking and warehousing purposes. The small sheet metal workshop was demolished by 1986 and, between 1991 and 1992, the entire block had been razed and has remained vacant to date. Site Geography and Geology: Subsurface soils consist of historic fill materials to a depth of approximately 7 to 10 feet below the surface, followed by silty-clay and fine sand. According to the USGS topographic map for the area (Central Park Quadrangle), the elevation of the property is approximately 16 feet above mean sea level. The area topography is generally flat with little relief and no significant elevation changes. Groundwater

occurs beneath the site at a depth of approximately 6-10 feet below grade under perched water table conditions. Based on previous studies performed at the site, groundwater flow is generally to the east. The site is not located within a designated flood zone area. "

Env Problem: "Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs) and lead in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil is being managed under a Site Management Plan. Prior to Remediation Soil and groundwater were analyzed for emerging contaminants (ECs), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based upon investigations conducted to date, the primary contaminants of concern include lead and SVOCs. Soil SVOCs and metals exceeding Unrestricted Use Soil Cleanup Objectives (UUSCOs) were detected in soils throughout the site. SVOCs and metals were found to exceed UUSCOs down to 8 feet below ground surface (ft bgs). A total of 5 locations where levels of lead exceeded the hazardous waste threshold were identified across the site. For SVOCs, the maximum concentration of benzo(a)anthracene was 32 parts per million (ppm) as compared to the UUSCO of 1 ppm, benzo(a)pyrene was 25 ppm (UUSCO is 1 ppm), benzo(b)fluoranthene was 23 ppm (UUSCO is 1 ppm), chrysene was 30 ppm (UUSCO is 1 ppm), and indeno(1,2,3-cd)pyrene of 13 ppm (UUSCO is 0.5 ppm). For metals, the maximum concentration of lead was 4,310 ppm (UUSCO is 63 ppm), mercury was 15.7 ppm (UUSCO is 0.18 ppm), arsenic was 81.1 ppm (UUSCO is 13 ppm), and barium was 5,910 ppm (UUSCO is 350 ppm). Only two VOCs (acetone and methyl ethyl ketone) were detected at concentrations slightly exceeding the UUSCOs; however, these are common lab artifacts and are not considered to be site-specific contaminants of concern. Several pesticides were detected at concentrations nominally exceeding their respective UUSCOs, including 4,4-DDD at 0.035 ppm (UUSCO is 0.0033 ppm) and 4,4-DDE at 0.080 ppm (UUSCO is 0.0033 ppm). For PCBs, the maximum concentration of PCB-1260 was 0.18 ppm (UUSCO is 0.1 ppm). Emerging contaminants (ECs) were also detected in soil samples collected from the shallow intervals down to 17 ft bgs. For example, the maximum concentrations of perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS) were 378 parts per trillion (ppt) and 2,490 ppt, respectively. Data does not indicate any off-site impacts in soil related to this site. Groundwater Concentrations of naturally occurring metals were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS). The maximum concentration of iron was 871 parts per billion (ppb) (AWQS is 300 ppb), manganese was 43,900 ppb (AWQS is 300 ppb), and sodium was 193,000 ppb (AWQS is 20,000 ppb). ECs were also detected in groundwater samples. The maximum concentrations of PFOA and PFOS are 204 parts per trillion (ppt) and 154 ppt, respectively. No VOCs, PCBs or pesticides were detected at concentrations exceeding the applicable AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor Trichloroethene (TCE) was detected in soil vapor at concentrations up to 50.5 micrograms per cubic meter. Data does not indicate any off-site impacts in soil vapor related to this site. "

Health Problem: "Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining contamination."

Site Description: "Location: The site is located in the Broadway Triangle section of Brooklyn and is comprised of four tax parcels totaling 71,305 square feet (1.63 acres). The irregular shaped site occupies a full block bounded by Wallabout Street, Harrison Avenue, Union Avenue and Walton Street. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Current Zoning and Land Use: The western portion of the site is zoned R8A while the central portion is zoned R7D and the eastern portion is zoned R7A. Each of these zoning designations allow for residential uses. Surrounding land use includes residential apartment buildings to the west, residential apartment buildings and a public school (IS 318) to the north, commercial warehouses, residential buildings and a private school to the east and the Former Pfizer Site C BCP site (site no. C224288) and a charter school to the south. Past Use of the Site: From 1887 through 1918, the site was comprised of mixed commercial and residential properties, including a synagogue, a church, a Mission, laundry, tailor shops and bakeries. A portion of the storage yard of an iron works factory that was replaced by a bottling facility by 1904 was also present at the southwestern-most corner of the site. By 1947, an adhesive manufacturing facility operated in the

S123159099

south-central region of the site at 255/257 Wallabout Street (later Pfizer Building 47), and a lumber yard was present at the west end of the site. A taxi garage located at 249 through 253 Wallabout Street (later Pfizer Building 52) maintained two gasoline underground storage tanks (USTs) and a five-story residential building with delivery services at ground level, located at 58/60 Walton Street, was serviced by a 2,000-gallon fuel oil tank installed in the sidewalk. Pfizer started using the western region of the site circa 1954 for employee parking and warehousing purposes. The residential buildings along Harrison Avenue were demolished between 1959 and 1961 and replaced by more parking space for Pfizer employees. A small sheet metal workshop was also present at 262 Wallabout Street, close to the southeast corner of the site. By 1977, the majority of the eastern region of the site had been redeveloped into a parking lot and Pfizer used most of the site for parking and warehousing purposes. The small sheet metal workshop was demolished by 1986 and, between 1991 and 1992, the entire block had been razed and has remained vacant to date. Site Geography and Geology: Subsurface soils consist of historic fill materials to a depth of approximately 7 to 10 feet below the surface, followed by silty-clay and fine sand. According to the USGS topographic map for the area (Central Park Quadrangle), the elevation of the property is approximately 16 feet above mean sea level. The area topography is generally flat with little relief and no significant elevation changes. Groundwater occurs beneath the site at a depth of approximately 6-10 feet below grade under perched water table conditions. Based on previous studies performed at the site, groundwater flow is generally to the east. The site is not located within a designated flood zone area. "

Env Problem:

"Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs) and lead in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil is being managed under a Site Management Plan. Prior to Remediation Soil and groundwater were analyzed for emerging contaminants (ECs), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based upon investigations conducted to date, the primary contaminants of concern include lead and SVOCs. Soil SVOCS and metals exceeding Unrestricted Use Soil Cleanup Objectives (UUSCOs) were detected in soils throughout the site. SVOCs and metals were found to exceed UUSCOs down to 8 feet below ground surface (ft bgs). A total of 5 locations where levels of lead exceeded the hazardous waste threshold were identified across the site. For SVOCs, the maximum concentration of benzo(a)anthracene was 32 parts per million (ppm) as compared to the UUSCO of 1 ppm, benzo(a)pyrene was 25 ppm (UUSCO is 1 ppm), benzo(b)fluoranthene was 23 ppm (UUSCO is 1 ppm), chrysene was 30 ppm (UUSCO is 1 ppm), and indeno(1,2,3-cd)pyrene of 13 ppm (UUSCO is 0.5 ppm). For metals, the maximum concentration of lead was 4,310 ppm (UUSCO is 63 ppm), mercury was 15.7 ppm (UUSCO is 0.18 ppm), arsenic was 81.1 ppm (UUSCO is 13 ppm), and barium was 5,910 ppm (UUSCO is 350 ppm). Only two VOCs (acetone and methyl ethyl ketone) were detected at concentrations slightly exceeding the UUSCOs; however, these are common lab artifacts and are not considered to be site-specific contaminants of concern. Several pesticides were detected at concentrations nominally exceeding their respective UUSCOs, including 4,4-DDD at 0.035 ppm (UUSCO is 0.0033 ppm) and

4,4-DDE at 0.080 ppm (UUSCO is 0.0033 ppm). For PCBs, the maximum concentration of PCB-1260 was 0.18 ppm (UUSCO is 0.1 ppm). Emerging contaminants (ECs) were also detected in soil samples collected from the shallow intervals down to 17 ft bgs. For example, the maximum concentrations of perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS) were 378 parts per trillion (ppt) and 2,490 ppt, respectively. Data does not indicate any off-site impacts in soil related to this site. Groundwater Concentrations of naturally occurring metals were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS). The maximum concentration of iron was 871 parts per billion (ppb) (AWQS is 300 ppb), manganese was 43,900 ppb (AWQS is 300 ppb), and sodium was 193,000 ppb (AWQS is 20,000 ppb). ECs were also detected in groundwater samples. The maximum concentrations of PFOA and PFOS are 204 parts per trillion (ppt) and 154 ppt, respectively. No VOCs, PCBs or pesticides were detected at concentrations exceeding the applicable AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor Trichloroethene (TCE) was detected in soil vapor at concentrations up to 50.5 micrograms per cubic meter. Data does not indicate any off-site impacts in soil vapor related to this site. "

Health Problem: "Remedial actions are complete and measures are in place to prevent people from coming in contact with remaining contamination."

S123159099

above mean sea level. The area topography is generally flat with little relief and no significant elevation changes. Groundwater occurs beneath the site at a depth of approximately 6-10 feet below grade under perched water table conditions. Based on previous studies performed at the site, groundwater flow is generally to the east. The site is not located within a designated flood zone area. "

Env Problem: "Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs) and lead in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil is being managed under a Site Management Plan. Prior to Remediation Soil and groundwater were analyzed for emerging contaminants (ECs), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based upon investigations conducted to date, the primary contaminants of concern include lead and SVOCs. Soil SVOCs and metals exceeding Unrestricted Use Soil Cleanup Objectives (UUSCOs) were detected in soils throughout the site. SVOCs and metals were found to exceed UUSCOs down to 8 feet below ground surface (ft bgs). A total of 5 locations where levels of lead exceeded the hazardous waste threshold were identified across the site. For SVOCs, the maximum concentration of benzo(a)anthracene was 32 parts per million (ppm) as compared to the UUSCO of 1 ppm, benzo(a)pyrene was 25 ppm (UUSCO is 1 ppm), benzo(b)fluoranthene was 23 ppm (UUSCO is 1 ppm), chrysene was 30 ppm (UUSCO is 1 ppm), and indeno(1,2,3-cd)pyrene of 13 ppm (UUSCO is 0.5 ppm). For metals, the maximum concentration of lead was 4,310 ppm (UUSCO is 63 ppm), mercury was 15.7 ppm (UUSCO is 0.18 ppm), arsenic was 81.1 ppm (UUSCO is 13 ppm), and barium was 5,910 ppm (UUSCO is 350 ppm). Only two VOCs (acetone and methyl ethyl ketone) were detected at concentrations slightly exceeding the UUSCOs; however, these are common lab artifacts and are not considered to be site-specific contaminants of concern. Several pesticides were detected at concentrations nominally exceeding their respective UUSCOs, including 4,4-DDD at 0.035 ppm (UUSCO is 0.0033 ppm) and 4,4-DDE at 0.080 ppm (UUSCO is 0.0033 ppm). For PCBs, the maximum concentration of PCB-1260 was 0.18 ppm (UUSCO is 0.1 ppm). Emerging contaminants (ECs) were also detected in soil samples collected from the shallow intervals down to 17 ft bgs. For example, the maximum concentrations of perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS) were 378 parts per trillion (ppt) and 2,490 ppt, respectively. Data does not indicate any off-site impacts in soil related to this site. Groundwater Concentrations of naturally occurring metals were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS). The maximum concentration of iron was 871 parts per billion (ppb) (AWQS is 300 ppb), manganese was 43,900 ppb (AWQS is 300 ppb), and sodium was 193,000 ppb (AWQS is 20,000 ppb). ECs were also detected in groundwater samples. The maximum concentrations of PFOA and PFOS are 204 parts per trillion (ppt) and 154 ppt, respectively. No VOCs, PCBs or pesticides were detected at concentrations exceeding the applicable AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor Trichloroethene (TCE) was detected in soil vapor at concentrations up to 50.5 micrograms per cubic meter. Data does not indicate any off-site impacts in soil vapor related to this site. "

SWIS: 2401
Town: New York City
Record Added Date: 09/10/2018
Record Updated Date: 03/08/2022
Update By: AMSERVIS
Site Description: "Location: The site is located in the Broadway Triangle section of Brooklyn and is comprised of four tax parcels totaling 71,305 square feet (1.63 acres). The irregular shaped site occupies a full block bounded by Wallabout Street, Harrison Avenue, Union Avenue and Walton Street. Site Features: The site is currently undergoing redevelopment into a residential apartment building. Current Zoning and Land Use: The western portion of the site is zoned R8A while the central portion is zoned R7D and the eastern portion is zoned R7A. Each of these zoning designations allow for residential uses. Surrounding land use includes residential apartment buildings to the west, residential apartment buildings and a public school (IS 318) to the north, commercial warehouses, residential buildings and a private school to the east and the Former Pfizer Site C BCP site (site no. C224288) and a charter school to the south. Past Use of the Site: From 1887 through 1918, the site was comprised of mixed commercial and residential properties, including a synagogue, a church, a Mission, laundry, tailor shops and bakeries. A portion of the storage yard of an iron works factory that was replaced by a bottling facility by 1904 was also present at the southwestern-most corner of the site. By 1947, an adhesive manufacturing facility operated in the south-central region of the site at 255/257 Wallabout Street (later Pfizer Building 47), and a lumber yard was present at the west end of the site. A taxi garage located at 249 through 253 Wallabout Street (later Pfizer Building 52) maintained two gasoline underground storage tanks (USTs) and a five-story residential building with delivery services at ground level, located at 58/60 Walton Street, was serviced by a 2,000-gallon fuel oil tank installed in the sidewalk. Pfizer started using the western region of the site circa 1954 for employee parking and warehousing purposes. The residential buildings along Harrison Avenue were demolished between 1959 and 1961 and replaced by more parking space for Pfizer employees. A small sheet metal workshop was also present at 262 Wallabout Street, close to the southeast corner of the site. By 1977, the majority of the eastern region of the site had been redeveloped into a parking lot and Pfizer used most of the site for parking and warehousing purposes. The small sheet metal workshop was demolished by 1986 and, between 1991 and 1992, the entire block had been razed and has remained vacant to date. Site Geography and Geology: Subsurface soils consist of historic fill materials to a depth of approximately 7 to 10 feet below the surface, followed by silty-clay and fine sand. According to the USGS topographic map for the area (Central Park Quadrangle), the elevation of the property is approximately 16 feet above mean sea level. The area topography is generally flat with little relief and no significant elevation changes. Groundwater occurs beneath the site at a depth of approximately 6-10 feet below grade under perched water table conditions. Based on previous studies performed at the site, groundwater flow is generally to the east. The site is not located within a designated flood zone area. "

Env Problem: "Post-Remediation Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs) and lead in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted

residential use. Residual contamination in the soil is being managed under a Site Management Plan. Prior to Remediation Soil and groundwater were analyzed for emerging contaminants (ECs), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based upon investigations conducted to date, the primary contaminants of concern include lead and SVOCs. Soil SVOCs and metals exceeding Unrestricted Use Soil Cleanup Objectives (UUSCOs) were detected in soils throughout the site. SVOCs and metals were found to exceed UUSCOs down to 8 feet below ground surface (ft bgs). A total of 5 locations where levels of lead exceeded the hazardous waste threshold were identified across the site. For SVOCs, the maximum concentration of benzo(a)anthracene was 32 parts per million (ppm) as compared to the UUSCO of 1 ppm, benzo(a)pyrene was 25 ppm (UUSCO is 1 ppm), benzo(b)fluoranthene was 23 ppm (UUSCO is 1 ppm), chrysene was 30 ppm (UUSCO is 1 ppm), and indeno(1,2,3-cd)pyrene of 13 ppm (UUSCO is 0.5 ppm). For metals, the maximum concentration of lead was 4,310 ppm (UUSCO is 63 ppm), mercury was 15.7 ppm (UUSCO is 0.18 ppm), arsenic was 81.1 ppm (UUSCO is 13 ppm), and barium was 5,910 ppm (UUSCO is 350 ppm). Only two VOCs (acetone and methyl ethyl ketone) were detected at concentrations slightly exceeding the UUSCOs; however, these are common lab artifacts and are not considered to be site-specific contaminants of concern. Several pesticides were detected at concentrations nominally exceeding their respective UUSCOs, including 4,4-DDD at 0.035 ppm (UUSCO is 0.0033 ppm) and 4,4-DDE at 0.080 ppm (UUSCO is 0.0033 ppm). For PCBs, the maximum concentration of PCB-1260 was 0.18 ppm (UUSCO is 0.1 ppm). Emerging contaminants (ECs) were also detected in soil samples collected from the shallow intervals down to 17 ft bgs. For example, the maximum concentrations of perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS) were 378 parts per trillion (ppt) and 2,490 ppt, respectively. Data does not indicate any off-site impacts in soil related to this site. Groundwater Concentrations of naturally occurring metals were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS). The maximum concentration of iron was 871 parts per billion (ppb) (AWQS is 300 ppb), manganese was 43,900 ppb (AWQS is 300 ppb), and sodium was 193,000 ppb (AWQS is 20,000 ppb). ECs were also detected in groundwater samples. The maximum concentrations of PFOA and PFOS are 204 parts per trillion (ppt) and 154 ppt, respectively. No VOCs, PCBs or pesticides were detected at concentrations exceeding the applicable AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor Trichloroethene (TCE) was detected in soil vapor at concentrations up to 50.5 micrograms per cubic meter. Data does not indicate any off-site impacts in soil vapor related to this site. "

DER Facility ID: 253754
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was
TIPPLE 4/14/04 Tipple conducted a site visit,the tank was in the
process of being cut for removal, contaminated soils were stockpiled
for removal, excavation exhibited brown soils with occasional bits of
coal mixed in with the soil. Tipple had the bachhoe operator grab a
bucket of soil in an area of what appeared to be coal and the black
pieces were indeed coal. Tipple proceeded to screen the soil and
attained a reading of 0 on the PID. Documentation will follow.
06/19/06: This spill is transferred from Mr. Koon Tang to Q. Abidi.
Called Tony Gilber at (212)647-7422 left message to call me back
regarding information of spill. 11/06/06: Called Mr. Tony Gilder and
talked about information of spill. He said he will find by
Environmental Group and he will call me back -QA 11/07/06: Mr. Ron
Leclair called me and said As soon as he will get the report and
documents regarding spill he will fax it to me for closing the spill.
-QA 11/17/06: Mr. Ron LeClair (ENSR CO) called and said to me that he
is going to send me waste manifest report and soil sample report by
mail. -QA 12/06/06: Called Mr. Ron LeClair at (718)636-3579 and left
message to call me back regarding spill information. -QA 02/20/07:
Called Mr. Ron Leclair to discuss regarding the spill. I asked him
to take soil sample at the fill port (because in previous soil
sample, xylene was very high) and to take groundwater sample around
the tank. If they don't take soil and groundwater sample spill will
remain open. Mr. Ron Leclair said he will take soil and groundwater
samples and lab results will come back he will fax me all the
analytical results. -QA 04/12/07: Sent letter to owner Mr. Kevin
Tassey and also sent a copy of the letter to Mr. Ron LeClair (ENSR)
to resolve open spill case. The Department requires collection of a
groundwater sample near the former tank location, to evaluate
potential impacts to groundwater. Either a permanent well should be
installed, or a temporary well. Soil sampling for lab analysis should
be performed during well installation. A report summarizing the soil
and groundwater sampling results should be prepared and submitted.
The report should provide a scaled site diagram indicating the North
direction, and should include an appropriate recommendation for

Remarks: further action. Entered letter in e-Doc. -QA 05/04/07: Received e-mail from Mr. LeClair regarding spill about conservative estimate for installing the groundwater monitoring well in pratt institute. I have discussed this spill case with my supervisors Mr. Jon Kolleeny and Mr. Vadim Brevdo. After considering the 85-foot depth to groundwater and the fact that only one compound was found to exceed TAGM 4046 in the end-point samples, it seems unlikely that the residual soil contamination from # 6 fuel oil could have caused a significant impact to groundwater. Therefore, I closed this spill and replied to Mr. LeClair by e-mail that this spill is closed. -QA " "WHILE REMOVING TANK FOUND CONTAMINATED SOIL: PULLED TANK OUT AND PLACED ON PLASTIC: "

DEC Memo: "7/30/13 - Austin - We received a report of a cable installation contractor working for Pratt Institute hitting a Con Ed Electrical Feeder line in the location of Ryerson Ave and Willoughby Ave in Brooklyn (the neighborhood just south of the Brooklyn Navy Yard, outside the Con Ed Greenwood sub-station). The damaged dielectric fluid (non-PCB)-cooled power supply line released approximately 18,000 gals of this fluid to the ground, street, and adjoining sewers. NYCDEP is on scene assessing the routes of the sewers (to a treatment plant or direct storm?). Con Ed is bringing out its contractors to conduct the line repair and contain/clean up the spill. DEC Spills staff (Patel) is en route to the location. 1700 hr. update from DEC Patel, who is at the scene: Westmoreland Construction, a contractor hired by Pratt Institute to install a sub-surface fiber optic cable in a courtyard between two Pratt Institute buildings, first excavated and then drilled to conduct this installation. When they drilled adjacent to a trench they dug, at approximately 11:40 this morning, they hit a 138 kV jacketed oil cooled feeder line owned by Con Edison. Oil escaped under pressure, and migrated into the adjoining trench. From there it permeated the soil and migrated into a manhole chimney of a NYCDEP combined sewer. That sewer either goes to the Newtown Creek or the Red Hook municipal STPs (NYCDEP said the impacted sewer was in a drainage area border zone, so it could go to either plant). The dielectric fluid migrating into the manhole is dripping into it at the rate of 2 gals/hour. The dielectric fluid did not run onto the roadway, or impact any street catch basins, as was originally reported. Nor is the 18,000 gal reported release quantity been confirmed at this point. No injuries occurred from this event, nor did any power outages occur (the feeder goes to another sub-station from the Greenwood facility). Con Edison has brought on vacuum trucks, and have already filled one 1500 gal

tanker with dielectric fluid from the excavated trench. They are also staging operations to open up the ground along the feeder line, and will work this evening to place the clamp on the leak point. DEC Spills staff has left the scene, but will return later this evening to inspect the excavated damaged pipeline, and to get a better sense for how for the fluid permeated the soil in the vicinity of the leak. DLE has indicated that they may have an ECO investigate the cause of this event. - end 07/30/13-Hiralkumar Patel. 3:30 PM:- visited site. met Michael Pillig (ConEd), Robert Duffy (ConEd), Anthony Natale (ConEd) and Glenn Gordon (Pratt Institute). Pratt Institute was installing a fiber optic cable between two buildings, located on east (North Hall) and west (ISC Building) side of the Ryerson Street (brick alleyway). Ryerson Street is located within Pratt's facility. as part of the project, contractor dug two trenches: one on east side and one on west side of the Ryerson Street. to install cable under the street, contractor started horizontal drilling at about 5 ft bg. horizontal drilling started from western trench (on ISC Building side). prior to drilling/excavation, area was maked out by company named Premier. Premier was hired by Pratt, but it is also ConEd's vendor. ConEd confirmed that area was marked out clearly. ConEd mentioned that there are two high pressure 138 kV feeder lines run under the Ryerson Street, in north-south direction, between two sub-stations: Vernon Blvd and Greenwood. at 11:40 AM, ConEd's control room received alert regarding oil spill from the western feeder line # 31232. the automated system reduced pressure on leaking line. during horizontal drilling, the western feeder line was hit and started leaking. as feeder line was not far from the western trench, leaked oil started accumulating into the western trench. some of the oil overflowed into nearby surface drain on Ryerson Street, which ends into sewer system in middle of the street. ConEd responded and started pumping oil from the western trench. ConEd checked the sewer manhole and found dripping from the drain pipe (about 2 gal/hour). they immediately put boom in sewer and hung bucket underneath the drain pipe to collect dripping oil. cable was immediately put out of service, but flow of dielectric fluid was not stopped to prevent any damage to internal cable. so oil is still leaking at this point. as these feeder lines connects two sub-stations and are not supply lines to any facility, there was no power outage in any of the Pratt's building. ConEd crew started excavating western side of the street to locate leaking pipe. after hand clearing top surface, crew started soil removal using guzzler truck. one 1,500 gal vac truck was filled with oil. product removal, from western trench, was continued using second vac truck. the North Hall is at lower elevation than the ISC Building. based on surface elevation, Mike and Mr. Gordon inspected basement cafeteria in North Hall. no impact noted inside the building. no oil noted in eastern trench either. met with Alex Castro of NYC DEP. he mentioned that the sewer line on Ryerson Street, close to leak area, is a combined sewer line that ends into sewer treatment plant. as the area is near border line between two zone (Newtown Creek and Red Hook), Alex was not sure which treatment plant receives sewer fluid from this area. Glenn Gordon Executive Director Planning, Design, Construction & Facilities Management Pratt Institute 200 Willoughby Avenue Brooklyn, NY 11205 Ph. (718) 399-4435 (O) (732) 213-5440 (C) Fax (718) 399-4412 email: ggordon3@pratt.edu 9:22 PM:- spoke with Mike. he confirmed that leak was located and clamped at 5:45 PM. they will excavate further for permanent repair. 07/31/13-Hiralkumar Patel. 10:15 AM:- spoke with Mike. he mentioned

CON EDISON (Continued)

S113819679

that further investigation needed prior to permanent repair. they need to check for any damage to cable inside the leaking feeder line. Mike mentioned that they will freeze portion of the feeder line and will do further testing. feeder line will be freezed using liquid nitrogen. this investigation may take upto a week. soil remediation will begin only after permanent repair to the line. Mike mentioned that they recovered total of 2,520 gal of oil. ConEd will do inventory to find out total amount of oil released. 10:17 AM:- received email from Bob from ConEd including pics. one of the pic shows bucket under the drain pipe, into sewer. 3:10 PM:- visited site. met ConEd crew. they were excavating at the intersection of Ryerson St and Willoughby Ave and intersection of Ryerson Street and De Kalb Ave. feeder line at these two intersections will be freezed via circulating liquid nitrogen around it. once pipe freezes at two points, internal cable will be inspected for any damage. no oil found in western trench. inspected small alley at basement level, between cafeteria in North Hall and outside building yard towards Ryerson St. no oil seepage noted in sub-grade alley. found heavily impacted soil within western trench. observed drain pipe within excavation to feeder line. also found other pipes, in and outside of the feeder line excavation area. based on available information, changed spill address from Ryerson St and Willoughby Ave to 200 Willoughby Ave - I/F/O North Hall Building . 08/07/13-Hiralkumar Patel. 12:52 PM:- spoke with Dennise at ERT. sample results shows less than 1 ppm PCB. no other update in emis report. 12:55 PM:- left message for Mike. 1:28 PM:- spoke with Mike. they freeze the section of the feeder line and checked internal cable which was found damaged. for cable repair and permanent repair to feeder line, they expanded excavation around the leak area. currently, excavation around leak area is 20 ft long by 8 ft wide and about 8 ft deep. to expand excavation around leak point, ConEd had to backfill the western trench for fiber optic cable. after repairing the internal cable and completing permanent repair to the leaking feeder line, freeze will be removed and pipe will be filled with oil. after necessary socking period, further testing will be conducted prior to restoring power. this process will take another week. once the line is back in-service, ConEd will re-open the western trench for soil remediation. Mike has took some samples from the final excavation around leak point and waiting for results. 08/09/13-Hiralkumar Patel. 9:30 AM:- visited site. ConEd crew was conducting permanent repair to leaking line. inspected basement cafeteria. no signs of oil seepage noted in cafeteria. 08/14/13-Hiralkumar Patel. 1:29 PM:- left message for Bob Duffy. 1:43 PM:- spoke with Harman at ERT. asked him to submit results of soil samples collected from leak area excavation. 08/15/13-Hiralkumar Patel. 2:01 PM:- received call from Bob. they finished repair of leaking line. they are planning to start soil remediation in western trench where leak noted initially. Bob mentioned that total of 3,982 gal of oil was leaked out of the line and they recovered total of 2,520 gal of liquid from excavation. asked Bob to submit results of soil samples collected from excavation for leak repair. 2:23 PM:- received email from Bob including sample results. soil samples were collected from east, north and south sidewalls and from bottom of the excavation around the leak area. bottom soil sample was collected at 8 ft depth. found less than 1,910 ppm THC in soil samples. 09/11/13-Hiralkumar Patel. 7:20 AM:- received email from Bob. he mentioned that remediation is completed. he will submit report. 10/02/13-Hiralkumar Patel. 11:04 AM:- left

delivery of 9.3 gal of oil. when owner reached home, she smelled oil in building and call fire dept. fire dept. did initial cleanup and suggest owner to stay in building keeping windows open. the gas boiler at property was shut off. owner called petro, and petro delivery crew was on site yesterday neight and put some speedy dry at spill location. oil ran down on steps and reached to cement floor which doesn't have any cracks and basement has one drain pipe but it is not open. no soil/drain/sewer affected. owner bought this house three years ago and they haven't have any contact number for previous owner. when previous owner changed from oil to gas, they never plugged fill port with cement from outside. Petro did possible cleanup yesterday neight and they were on site today morning doing final cleanup. Spoke with Nick Chronopolos (718-628-3305), who is a contact person at Petro daytime. Nick gave me Herry Caim's number (917) 416-9310 who was doing cleanup at site. spoke with Herry and he told me that they just finished the cleanup. no cracks on floor at spill. no sewer/drain affected. they have scrubbed out area. little odor in building, but he asked owner to keep windows/doors open for while to get odor out. spoke with owner, and asked her to plug the fill port with cement, but petro has already did it. no complaints from owner. Owner: Izize Idemudia (347) 416-5784 all cleaned up. case closed. 03/13/06-Hiralkumar Patel. case reopened because of owner's complaints about odor in building. received call from owner on Saturday Mar. 11 complaining odor in basement as well as in hallway upstairs. asked owner to keep basement door open which is at street level. visited site. found oil odors in basement and it was strong. and little strong in hallway. there were so many spots that oil was absorbed. it was not a solid concrete. it was carpet like floor and when rugged foot, it was peeled off. oil soaked underneath it. there were two access points to basement. one is solid door at street level and other door opens in hallway. asked owner to keep door at street level open and keep door in hallway close. as basement doesn't have any windows, there was no air circulation. it was around 10'*10' area. basement room has washing machine and gas heater and those are at elevated level on concrete slab. fill port was plugged with cement and other end of fill pipe open in stairway leading to basement. last 4 steps are also affected with side wall. I met with Nick (Cell: 516-779-9513), delivery manager on site. he called Milro for cleaning. contact at Milro is Mr. Gordan (516-805-0424) Nick Chronopoulos Delivery Manager (718) 628-3305 FAX: (718) 628-3325 Gordan Sandtorv Milro (516) 805-0424 FAX: (516) 379-4596 Spoke with Gordan at Milro. they did powerwash at site on saturday. Gordan found that it was not solid concrete but was paint. he will discuss about soil borings at site with Petro. sent letter to Harold Caim at Petro requesting delineation of soil contamination, end point sampling from limit of excavation & installation of vapour barrier. faxed letter to Harold at Petro and Gordan at Milro. sent copy of letter to home owner Ms. Idemudia. Spoke with Nick and asked him to take soil samples from location and find out level and depth of contamination. as he was telling me that oil hasn't reach more than one feet in depth. i asked him to take samples and will work according to lab results. 03/15/06-Hiralkumar Patel. REceived call from Ms. Idemudia. she was complaining about odor in basement as well as in hallway even after powerwash on saturday Mar. 11 2006. but this time it is not as strong as it was previous. Milro is on site to take soil samples. i have asked Ms. Idemudia to give my number to person from Milro and ask him to call me back. Ms. Idemudia Daytime Number: (646) 247-4142

Spoke with Mr. Gordan from Milro who is at site doing soil borings. as he did 3 borings and he found contamination. as he was suggesting, he will remove as much soil as possible till he reach limit of building foundation. then he will take end point samples and run for VOCs and SVOCs. based on lab results, they will go further. Gordan or Paul from Milro will be in touch regarding updates. Spoke with Nick at Petro and asked him to call Gordan regarding required steps to clean area. as Nick is out of office from Friday Mar 17, we can contact Harry Caim. 03/20/06-Hiralkumar Patel. Received call from Paul from Milro. he is planning to go out on site for further excavation and he thinks that they will finish excavation upto feasible limit tomorrow and will take soil samples. they going to send samples to lab on 10 days turnover. i have asked him to call me once they reach end of excavation about visual observations and PID readings. and later he let me know once he has lab results. 03/13/06-Hiralkumar Patel. Received call from Anthony from Milro. he got lab results and haven't found any contamination in endpoint samples. he is preparing final report and send me soon. he is going to fax me lab results only for review. they had dug out upto limit and found no odor in building at end of excavation. area is backfilled. 04/18/06-Hiralkumar Patel. Received report from Milro. - Milro excavated approximately 7 cubic yards of oil contaminated soil and drbris from the property. - Depth to groundwater in the area is approx. 32 ft below grade. groundwater was not encountered during excavation. - excavated area was backfilled with clean sand and the area restored to its original condition. - one endpoint sample and one composite sidewall sample taken from excavation. - no contamination detected in any samples. report doesn't show anything about vapor barrier installation. spoke with Anthony and he told me that they have installed it, but forgot to include in report. he will send me that in email. Received updtated report from Anthony about vapor barrier installation. - The concrete slab was restored to its original condition and epoxy sealed to prevent residual odors from migrating into the basement. based on available information, case is closed. NFA letter sent out to Petro. copy faxed to Milro and Petro. Copy send out to Owner for reference."

Update By: JHOCONNE
Site Description: "Location The site is located at 334 Wallabout Street in the Brooklyn Triangle section of Brooklyn, NY. The site is comprised of four tax parcels totaling approximately 110,040 square feet (2.55 acres). The irregular shaped site occupies a full block with approximately 485 feet of frontage along Wallabout Street, 200 feet of frontage on Harrison Avenue, 225 feet of frontage on Union Avenue and 600 feet of frontage on Gerry Street. Site Features The site is currently vacant, paved, and surrounding by an 8-foot high chain-link fence with one gate on Wallabout Street. The surrounding area comprises residential and commercial uses, including two schools in the immediate vicinity. Current Zoning and Land Use The western portion of the site is zoned R8A, the central portion is zoned R7D, and the eastern portion is zoned R7A (all residential use). The site is currently used for the storage of scaffolding and related construction equipment. Surrounding land use includes residential apartment buildings to the west, former Pfizer Site A (BCP site no. C224284) to the north, commercial warehouses, residential buildings and a private school (Bais Ruchel High School) to the east; and a charter school (Beginning with Children) to the south. The closest school (Bais Ruchel High School) is located 60 feet to the east. The charter school is located 70 feet to the south and PS 318 is located 375 feet to the north. Past Use of the Site The historic use of the site includes residential homes, the Pfizer chemical works and varnish manufacturing in 1887-1918, a lumber yard and the Pfizer chemical works in 1935. By 1947 the Pfizer chemical works occupied the entire property and continued to do so through 1995 when the buildings were demolished. Site Geology and Hydrogeology Subsurface soils at the site consist of historic fill materials to a depth of approximately 4 to 9 feet below ground surface (bgs) followed by a native silt and clay layer. The elevation of the site is approximately 18 feet above mean sea level. The area topography is generally flat with little relief and no significant elevation changes. Bedrock was not encountered during previous site investigations. Groundwater is present at depths of approximately 8 to 13 feet bgs under perched water table conditions. Groundwater flow is generally west to southwest. The site is not located within a designated flood zone area. Groundwater in this area of Brooklyn is not used as a source of potable water. "

Env Problem: "Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals,

polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil and in groundwater. Soil - VOCs exceeding protection of groundwater soil cleanup objectives (PGWSCOs), including chlorobenzene at 3.20 parts per million (ppm) (PGWSCO is 1.1 ppm) and sec-butylbenzene at 16 ppm (PGWSCO is 11 ppm), were detected selected locations. SVOCs exceeding restricted residential soil cleanup objectives (RRSCOs) were detected in soil throughout the site including benzo(a)anthracene at 61.6 ppm compared to RRSCO of 1 ppm, benzo(a)pyrene at 57.5 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene at 45.7 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene at 44.9 ppm (RRSCO is 3.9 ppm), chrysene at 54.4 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 9.54 ppm (RRSCO is 0.33 ppm), fluoranthene at 113 ppm (RRSCO is 100 ppm), and indeno(1,2,3-cd)pyrene at 31.3 ppm (RRSCO is 0.5 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including arsenic at 39.90 ppm (RRSCO is 16 ppm), barium at 825 ppm (RRSCO is 400 ppm), cadmium at 4.48 ppm (RRSCO is 4.3 ppm), copper at 3,990 ppm (RRSCO is 270 ppm), lead at 5,290 ppm (RRSCO is 400 ppm), and mercury at 290 ppm (RRSCO is 0.81 ppm). Perfluorooctanesulfonic acid (PFOS) was measured in soil at concentrations ranging from 0.42 parts per billion (ppb) to 0.95 ppb, exceeding the guidance value for unrestricted use of 0.88 ppb. Data does not indicate any off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including benzene at a maximum concentration of 11.6 ppb compared to the AWQS of 1 ppb, chlorobenzene at 1,750 ppb (AWQS of 5 ppb), isopropylbenzene at 67.8 ppb (AWQS of 5 ppb), naphthalene at 56.3ppb (AWQS of 10 ppb), n-butylbenzene at 7.2 ppb (AWQS of 5 ppb), and n-propylbenzene at 66 ppb (AWQS of 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 0.070 ppb, benzo(b)fluoranthene at 0.050 ppb, benzo(k)fluoranthene at 0.060 ppb, and chrysene at 0.130 ppb compared to their respective AWQS of 0.002 ppb. Dissolved metals were detected at concentrations exceeding the AWQS, including chromium at 1,030 ppb (AWQS of 50 ppb), nickel at 109 ppb (AWQS of 100 ppb), antimony at 9.60 ppb (AWQS of 3 ppb), arsenic at 129 ppb (AWQS of 25 ppb), and mercury at 1.20 ppb (AWQS of 0.7 ppb). PFOS and PFOA were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) with PFOS at a maximum concentration of 185 ppt and PFOA at 79.8 ppt. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Petroleum and chlorinated VOCs were detected in soil vapor samples. The maximum concentration of petroleum VOCs included toluene at 2,100 ug/m3. The maximum concentration of chlorinated VOCs included tetrachloroethene at 97 ug/m3, and trichloroethene at 65 ug/m3. Data does indicate any off-site impacts in soil vapor related to this site. "

Health Problem:

"The site is completely fenced, which restricts access, and covered by pavement; therefore direct contact with contaminants in the soil is unlikely. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas

from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern, however, the potential exists for indoor air impacts from site contaminants in any future on-site buildings. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings."

Site Description:	"Location The site is located at 334 Wallabout Street in the Brooklyn Triangle section of Brooklyn, NY. The site is comprised of four tax parcels totaling approximately 110,040 square feet (2.55 acres). The irregular shaped site occupies a full block with approximately 485 feet of frontage along Wallabout Street, 200 feet of frontage on Harrison Avenue, 225 feet of frontage on Union Avenue and 600 feet of frontage on Gerry Street. Site Features The site is currently vacant,

Summary:

paved, and surrounding by an 8-foot high chain-link fence with one gate on Wallabout Street. The surrounding area comprises residential and commercial uses, including two schools in the immediate vicinity. Current Zoning and Land Use The western portion of the site is zoned R8A, the central portion is zoned R7D, and the eastern portion is zoned R7A (all residential use). The site is currently used for the storage of scaffolding and related construction equipment. Surrounding land use includes residential apartment buildings to the west, former Pfizer Site A (BCP site no. C224284) to the north, commercial warehouses, residential buildings and a private school (Bais Ruchel High School) to the east; and a charter school (Beginning with Children) to the south. The closest school (Bais Ruchel High School) is located 60 feet to the east. The charter school is located 70 feet to the south and PS 318 is located 375 feet to the north. Past Use of the Site The historic use of the site includes residential homes, the Pfizer chemical works and varnish manufacturing in 1887-1918, a lumber yard and the Pfizer chemical works in 1935. By 1947 the Pfizer chemical works occupied the entire property and continued to do so through 1995 when the buildings were demolished. Site Geology and Hydrogeology Subsurface soils at the site consist of historic fill materials to a depth of approximately 4 to 9 feet below ground surface (bgs) followed by a native silt and clay layer. The elevation of the site is approximately 18 feet above mean sea level. The area topography

"The site is completely fenced, which restricts access, and covered by pavement; therefore direct contact with contaminants in the soil is unlikely. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Because the site is vacant the inhalation of site-related contaminants due to soil vapor intrusion does not represent a current concern, however, the potential exists for indoor air impacts from site contaminants in any future on-site buildings. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings."

Summary:

"Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), per- and polyfluoroalkyl substances (PFAS), and pesticides. Based upon investigations conducted to date, the primary contaminants of concern for this site include VOCs, SVOCs, and metals in soil and in groundwater. Soil - VOCs exceeding protection of groundwater soil cleanup objectives (PGWSCOs), including chlorobenzene at 3.20 parts per million (ppm) (PGWSCO is 1.1 ppm) and sec-butylbenzene at 16 ppm (PGWSCO is 11 ppm), were detected selected locations. SVOCs exceeding restricted residential soil cleanup objectives (RRSCOs) were detected in soil throughout the site including benzo(a)anthracene at 61.6 ppm compared to RRSCO of 1 ppm, benzo(a)pyrene at 57.5 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene at 45.7 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene at 44.9 ppm (RRSCO is 3.9 ppm), chrysene at 54.4 ppm (RRSCO is 3.9 ppm), dibenzo(a,h)anthracene at 9.54 ppm (RRSCO is 0.33 ppm), fluoranthene at 113 ppm (RRSCO is 100 ppm), and

FORMER PFIZER SITE C (Continued)

S121343849

indeno(1,2,3-cd)pyrene at 31.3 ppm (RRSCO is 0.5 ppm). Several metals were detected at concentrations exceeding the RRSCOs, including arsenic at 39.90 ppm (RRSCO is 16 ppm), barium at 825 ppm (RRSCO is 400 ppm), cadmium at 4.48 ppm (RRSCO is 4.3 ppm), copper at 3,990 ppm (RRSCO is 270 ppm), lead at 5,290 ppm (RRSCO is 400 ppm), and mercury at 290 ppm (RRSCO is 0.81 ppm). Perfluorooctanesulfonic acid (PFOS) was measured in soil at concentrations ranging from 0.42 parts per billion (ppb) to 0.95 ppb, exceeding the guidance value for unrestricted use of 0.88 ppb. Data does not indicate any off-site impacts in soil related to this site. Groundwater - VOCs were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS), including benzene at a maximum concentration of 11.6 ppb compared to the AWQS of 1 ppb, chlorobenzene at 1,750 ppb (AWQS of 5 ppb), isopropylbenzene at 67.8 ppb (AWQS of 5 ppb), naphthalene at 56.3 ppb (AWQS of 10 ppb), n-butylbenzene at 7.2 ppb (AWQS of 5 ppb), and n-propylbenzene at 66 ppb (AWQS of 5 ppb). SVOCs were detected at concentrations exceeding the AWQS including benzo(a)anthracene at a maximum concentration of 0.070 ppb, benzo(b)fluoranthene at 0.050 ppb, benzo(k)fluoranthene at 0.060 ppb, and chrysene at 0.130 ppb compared to their respective AWQS of 0.002 ppb. Dissolved metals were detected at concentrations exceeding the AWQS, including chromium at 1,030 ppb (AWQS of 50 ppb), nickel at 109 ppb (AWQS of 100 ppb), antimony at 9.60 ppb (AWQS of 3 ppb), arsenic at 129 ppb (AWQS of 25 ppb), and mercury at 1.20 ppb (AWQS of 0.7 ppb). PFOS and PFOA were detected above the maximum contaminant level (MCL) of 10 parts per trillion (ppt) with PFOS at a maximum concentration of 185 ppt and PFOA at 79.8 ppt. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor - Petroleum and chlorinated VOCs were detected in soil vapor samples. The maximum concentration of petroleum VOCs included toluene at 2,100 ug/m3. The maximum concentration of chlorinated VOCs included tetrachloroethene at 97 ug/m3, and trichloroethene at 65 ug/m3. Data does indicate any off-site impacts in soil vapor related to this site. "

Tank Info:

Tank Number: 006
Tank Id: 32160
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
H00 - Tank Leak Detection - None
I00 - Overfill - None
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser

Tank Location: Partially buried tank (tank with 10% or more below ground).... Tank is less than 90% above grade, partially buried.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: 12/01/1969
Capacity Gallons: 550
Tightness Test Method: NN
Date Test: Not reported

DEC Memo: "3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 9/26/03 SHAR addendum for installation of extraction well, EW-1, and monitoring well, MW-5 received. 11/25/03 Reassigned from Vought to Foley. 12/8/03 Received Feasibility Pilot Testing, Analysis, and Report for SVE (Delta, 12/3/03) which concludes SVE is a viable option. 3/19/04 3Q2003 monitoring report received. DTW 7-10'bgs. Total BTEX from ND(MW-6, MW-7) to 231,200ppb(MW-3). MTBE from 5.1ppb to 77,100ppb(MW-3). 0.76' LNAPL in MW-3 and 0.02' in MW-4. 3/19/04 4Q2003 monitoring report received. Total BTEX from ND(MW-6) to 106,670(MW-3). MTBE from 4ppb(MW-7) to 77,500ppb(MW-3). 0.82' LNAPL in MW-3 and 0.16' in MW-4. 4/16/04 1Q2004 monitoring report received. Total BTEX from ND(MW-6 and MW-8) to 111,640ppb(MW-3). MTBE from ND(MW-8) to 77,500ppb(MW-3). 0.55' LNAPL detected in MW-3. 5/7/04 Portfolio meeting: Tanks were abandoned in place and found to be filled with concrete slurry. Adjacent to grade school. Pilot performed on MW-5 for MPE. Tight soils. Off-site wells, MW-7 and MW-8 OK. To submit RAP in a couple weeks. 0.3-0.6' of LNAPL detected. Install SVE first to address potential vapors to school. 5/26/04 Mailed stip. Due back 6/28/04. 6/29/04 Stip fully executed by T. Kunkel. 8/6/04 Received 2Q04 monitoring report. 0.37' LNAPL in MW-3. BTEX from ND(MW-6,7,8) to 74,490(MW-4). 8/31/04 Received Investigation Summary Report dated 8/27/04. 10/8/04 Mailed response to ISR. Requested borings/wells along Hewes Street, crossgradient of MW-4 and MW-5 and along the east side of Kent Avenue, downgradient of MW-3. Report due 12/15/04. 10/18/04 Cross-reference spill #9903413 for waste oil tank failure. Waste oil added to material spilled. 10/29/04 Received RAP and pilot test data for SVE. RAP does not address groundwater impacts. 10/29/04 Issued sidewalk access letter for installation of three monitoring wells 1) one along the east side of Kent Ave.(MW-9) 2) two on the south side of Hewes St.(MW-10, MW-11). Report due 12/15/04. 12/16/04 Received Subsurface Assessment Report for three additional wells installed on 11/15/04. Contaminated soils detected in MW-9 at 9.5-10.5'bgs. MW-10 and MW-11 had clean soil and gw. DTW 9.5-12.5'bgs. On 10/21/04, a round of GW samples were collected. MW-1 (0.5') and MW-3 (0.24') both contained LNAPL. DTW 7.17-9.67'bgs during 12/10/04 survey. Total BTEX ranged from ND(MW-7, MW-10, MW-11) to 415600ppb(MW-3). MTBE from ND(MW-8, MW-10, MW-11) to 272000ppb(MW-3). 1/3/05 Spoke to A. Lapine. Will send me a letter as an addendum to the RAP addressing groundwater concerns (will install PRBs to address free product simultaneously). Would like to install SVE and monitor groundwater. 1/17/05 B. Fisher will send out RAP

U001839388

addendum letter 1/18. 1/20/05 Received RAP addendum dated 1/18/05. The addendum addresses Delta's proposal to passively collect LNAPL from on-site MWs and to evaluate the potential need to address on-site dissolved-phase impacts in GW upon effective operation of the SVE system. A passive skimmer will be installed in MW-1(4 well). MW-3 and MW-4 are 1 wells and LNAPL recovery is not practical. However, LNAPL thickness will be monitored quarterly to ensure LNAPL thickness does not change. 1/21/05 Issued letter approving RAP and RAP addendum. 3/28/05 Update from B. Fisher: SVE blower is on order and should be here within the next week or so. Have begun construction of the SVE shed in the shop. Once the blower is received, they will complete the trenching of the extraction wells. Installed the passive skimmer in MW-1. System to be installed by mid to late April. 4/27/05 Portfolio meeting- Across from Brooklyn Navy Yard. Contamination discovered during divestment. New owner (Mark Sapozhnikov) in 3/01. Source is tank mat (abandoned tanks with concrete slurry). Grace school is upgradient but adjacent. Currently constructing SVE system. System should be operating within the next two weeks. Passive skimmer operating in MW-1. 6/28/05 4Q04- 0.50' LNAPL detected in MW-1 and 0.24' in MW-3. BTEX from ND(MW-6,7,10,11) to 103750ppb(MW-3). MTBE from ND(MW-10,11) to 64500ppb(MW-3). 10/4/05 1Q05- DTW 7.24 to 9.55'bgs. 0.36' LNAPL detected in MW-1 and 0.11' in MW-3. BTEX from ND(MW-6,10,11) to 113890ppb(MW-3). MTBE from ND(MW-10,11) to 75400ppb(MW-3). 2Q05- DTW 6.69-8.96'bgs. 0.05' LNAPL detected in MW-3. BTEX from ND(MW-6,8,10,11) to 120740ppb(MW-3). MTBE from ND(MW-8,10,11) to 50300ppb(MW-3). 12/6/05 3Q05 - DTW 7.09-9.02'bgs. 0.03' LNAPL in MW-1. BTEX from ND(MW-6,8,10,11) to 124500ppb. MTBE from ND(MW-8,10,11) to 48900ppb(MW-3). 3/16/06 Met with BP and Delta. Divested in 2001. Abandoned tanks were not removed due to proximity to adjacent grade school building. Historically, MW-3 produced 3-4gal LNAPL which was extracted and hasn't reappeared since. In 1Q05, the owner detected product in the interstitial space of the mid-grade and sampled. Delta suspects that the tanks are out of compliance. Start-up of SVE is pending Con Ed upgrade within the next couple of weeks. 4/26/06 4Q05 - DTW 6.6-9.11'bgs. 0.05' LNAPL in MW-1 and 0.03' LNAPL in MW-3. BTEX from ND(MW-6,8) to 153020ppb(MW-3). MTBE from ND(MW-10) to 36100ppb(MW-3). 6/8/2006 - Feng - project reassigned to RJFeng. (RJF) 12/27/2006 - Feng - 2Q2006, 11/21/2006, by Delta. Groundwater sampled and gauged 4/14/2006. 11/14 monitoring wells were sampled. DTW 6.63' to 9.32' bg. Flows West-Northwest. LNAPL in MW-1 (0.31'), and MW-3 (0.27'). MW-1, 24,374 ppb BTEX, 277 ppb MTBE. MW-2, 1,163 ppb BTEX, 6,160 ppb MTBE. MW-3, 122,800 ppb BTEX, 45,000 ppb MTBE. MW-4, 93,660 ppb BTEX, 147 ppb MTBE. MW-5, 1,857 ppb BTEX, 24.1 ppb MTBE. MW-6, BTEX ND, 11.6 ppb MTBE. MW-7 was destroyed 1Q2005. MW-8, Dry. MW-9, destroyed 1Q2006. MW-10, 16.2 ppb BTEX, less than 1 ppb MTBE. MW-11, 605 ppb BTEX, less than 1 ppb MTBE. MW-12, 1,212 ppb BTEX, 65.2 ppb MTBE. MW-13, 934 ppb BTEX, 32.1 ppb MTBE. MW14, 22,950 ppb BTEX, 3,320 ppb MTBE. (RJF) 12/28/2006 - Feng - 3Q2006, 12/11/2006, by Delta. Groundwater sampled and gauged 7/27/2006. 11/14 monitoring wells were sampled. DTW 6.72' to 9.01' bg. Flows West-Northwest. LNAPL in MW-1 (0.14'), and MW-3 (0.09'). MW-1, 21,886 ppb BTEX, 334 ppb MTBE. MW-2, 1,239 ppb BTEX, 3,880 ppb MTBE. MW-3, 136,520 ppb BTEX, 18,200 ppb MTBE. MW-4, 75,610 ppb BTEX, 3,030 ppb MTBE. MW-5, 1,478 ppb BTEX, 13.3 ppb MTBE. MW-6, BTEX ND, 12.9 ppb MTBE. MW-7 was destroyed 1Q2005. MW-8, Dry. MW-9, destroyed 1Q2006. MW-10, ND, less than 1 ppb MTBE. MW-11, 4.95 ppb BTEX, 0.60 ppb MTBE. MW-12, 102 ppb BTEX, 4.2 ppb MTBE. MW-13, 1,750 ppb BTEX,

21.4 ppb MTBE. MW14, 15,782 ppb BTEX, 1,950 ppb MTBE. (RJF) 3/6/2007
- Feng - 4Q2006, 2/15/2007. Groundwater sampled and gauged
10/19/2006. 12/12 monitoring wells were sampled. DTW 5.80' to 10.73'
bg. Flows north-northwest. No LNAPL. MW-1, 23,637 ppb BTEX, 276 ppb
MTBE. MW-2, 1,008 ppb BTEX, 905 ppb MTBE. MW-3, 123,860 ppb BTEX,
17,900 ppb MTBE. 36,210 ppb BTEX, 310 ppb MTBE. MW-5, MW-6, MW-8, and
MW-10 are low in BTEX and MTBE. MW-12, 2,326 ppb BTEX, 37 ppb MTBE.
MW-13, 782 ppb BTEX, 9.5 ppb MTBE. MW-14, 12,791 ppb BTEX, 1,160 ppb
MTBE. Email Delta for the updates and status of the SVE system. (RJF)
3/6/3007 - email from D. Taylor. It's been some difficulties running
the SVE. Multiple site visits were required to refine the system
operation to the point that could maintain operation for more than a
few days after each O&M visit. It is now running at both wells (SVE-1
and SVE-2) on a consistent basis without the shutdown issues that had
in the past. O&M report will be submitted in 2 weeks. (RJF) 4/19/2007
- Feng - Portfolio meeting with BP and Delta. The site was excavated
and installed new tanks in the south and north portion. Plan to
excavate more soil source. The SVE only to address the vapor issue
for the school. It was used to have LNAPL in MW-1 and EFR events
performed until no recovery. Delta will wait until the completion of
the new gas station and will re-install the well-network. RAP
addendum will be submitted. (RJF) 7/24/2007 - Feng - Tank Closure
Report, 5/18/2007, by LongShore Environmental Inc.. On April 24,
2007, 4 (4,000-gallon) gasoline double-wall steel USTs and 1
single-wall steel 550-gallon Waste Oil UST were removed. The USTs
were located in the west and northwest portion of the property. The
tanks were in good condition. For the 4,000-gallon USTs excavation, 6
composite sidewall soil samples and 1 bottom sample were collected.
Soil sample 4K-South Sidewall (east) at 7 feet bg, 500 ppb Benzene,
11,000 ppb Ethylbenzene, 24,000 ppb Toluene, 83,000 ppb Xylenes,
2,500 ppb MTBE, 300,300 ppb Total VOCs. 4K-West Sidewall, 20,690 ppb
Total VOCs. Following endpoint sampling, the excavation was expanded
both vertically and horizontally for the installation of the new
tanks. Approximately 594.7 tons of soil was removed from the site.
For the 550-gallon waste oil UST excavation, no impact was observed
and all soils were returned to the excavation. 4 composite sidewall
samples and 1 bottom sample were taken. Some slight exceedance of
SVOCs were detected. LongShore recommended that the residual impacted
soils be managed under the ongoing remediation effort under spill
00-09318. Email KE (BP) for updates of the site. (RJF) 7/27/2007 -
Feng - 1Q2007, 5/3/2007. Groundwater sampled 1/5/2007. All 11
monitoring wells were sampled. DTW 6.55' to 9.18' bg. Flows to
north-northwest. No LNAPL. MW-1, 9,721 ppb BTEX, 87.5 ppb MTBE. MW-2,
964 ppb BTEX, 912 ppb MTBE. MW-3, 103,250 ppb BTEX, 10,200 ppb MTBE.
MW-4, 25,460 ppb BTEX, 50 ppb MTBE. MW-5, 729 ppb BTEX, 9.3 ppb MTBE.
MW-6, BTEX ND, 9.3 ppb MTBE. MW-10, MW-11, ND. MW-12, 544 ppb BTEX,
26.2 ppb MTBE. MW-13, 1,240 ppb BTEX, 19.6 ppb MTBE. MW-14, 8,887 ppb
BTEX, 1,070 ppb MTBE. (RJF) 11/28/2007 - Feng - 2Q2007, 8/29/2007.
Groundwater sampled 4/5/2007. 10/11 monitoring wells were sampled.
DTW 6.42' to 9.13' bg. Flows to northwest. LNAPL in MW-1 (0.03').
BTEX range ND to 101,490 ppb (MW-3). MTBE range ND to 5,230 ppb
(MW-3). 3Q2007, 10/29/2007. Groundwater sampled 7/12/2007. 8/11
monitoring wells were sampled. DTW 6.90' to 9.29' bg. Flows to
northwest. LNAPL in MW-1 (0.31'). BTEX range ND to 70,040 ppb (MW-3).
MTBE range ND to 3,520 ppb (MW-3). 4Q2007, 11/16/2007. Groundwater
sampled 10/4/2007. 9/11 monitoring wells were sampled. DTW 6.99' to
9.29' bg. Flows to north-northwest. LNAPL in MW-1 (0.28'). BTEX range

BP SERVICE STATION #24485 (Continued)

U001839388

ND to 73,790 ppb (MW-3). MTBE range ND to 3,150 ppb (MW-3). Remedial Action Plan Addendum, 11/2/2007, submitted by Delta. Between 5/31 and 6/5/2007, EnviroTrac, under the observation of Delta and on behalf of BP, performed soil over-excavation activities on the southern portion of the subject site. The soil was over-excavated to a depth of 10.5 feet bgs, and the over-excavation measured approximately 27 feet long by 20 feet wide. The location of over-excavation was determined based on known soil impacts in the area and due to the ineffectiveness of the on-site SVE system. Groundwater depth was measured in the excavation to be 10.5 feet bg. Total of 297.52 tons of soil was disposed at the Clean Earth of Philadelphia as non-hazardous waste, manifests provided. 6 endpoint samples were collected at 8.5'-9' bg. SW-14, 471,060 ppb BTEX, 723,350 ppb total VOCs. SW-15, 204,810 ppb BTEX, 367,570 ppb total VOCs. SW-16, 37,141 ppb BTEX, 89,975 ppb total VOCs. No bottom sample was collected due to the presence of groundwater. Spoke with David Greffenius (Delta). The abandoned tanks may still in place, they were not removed due the structural restriction. The SVE system is shutdown because it has low/none recovery and that's why the soil excavation at that area was performed. Biweekly bailing of the LNAPL in MW-1 is performing, will be confirmed later on. DEC required additional delineation of downgradient of MW-1 to see the movement of LNAPL. Once the investigation is done, RAP for the entire site will be required. (RJF) 11/29/2007 - Feng - Letter to Kevin Endriss (BP). DEC requires LNAPL recovery, further downgradient delineation, RAP for the entire site. A brief investigation work plan to be submitted by 1/14/2008. (RJF) 1/2/2008 - Feng - Investigation Work Plan submitted by Delta via email. (RJF) 1/22/2008 - Feng - Reviewed Investigation Work Plan. EFR events will be conducted on MW-1 to remove LNAPL. 2 additional monitoring wells will be installed at the former MW-4 and MW-9 locations respectively. And a revised RAP will be submitted upon the completion of groundwater sampling of the newly installed monitoring wells. There is a building located north to the site and no groundwater monitoring wells can be installed to the north of MW-1. DEC emailed to Delta and required the EFR event to be started immediately. (RJF) 1/23/2008 - Feng - Email from Igor Goldstein (Delta). Monthly EFR events will be conducted. Investigation Work Plan is approved. Letter to BP and Delta. Required RIR and RAP to be submitted by 3/24/2008. (RJF) 2/1/2008 - Feng - sidewalk permit letter to Delta for installation of MW-16. (RJF) 2/13/2008 - Feng - 1Q2008, 2/7/2008. Active service station. The monitoring well network was gauged and sampled on 1/18/2008 as part of the quarterly sampling schedule. The site is being remediated via the current operation of an installed SVE system. 10 wells were gauged. DTW 6.48' to 9.07' bg. Flows to north-northeast. LNAPL in MW-1 (0.06'). 8 wells were sampled. BTEX range ND to 57,100 ppb (MW-3). MTBE range ND to 4,900 ppb (MW-3). (RJF) 4/15/2008 - Feng - Reviewed the Remedial Investigation Report, dated 3/24/2008, by Delta, pdf copy. On February 20 and 27, 2008, Associated Environmental installed two 2-inch diameter monitoring wells MW-15 and MW-16. MW-15 located southwest to the former tank field area and MW-16 at the sidewalk along Kent Ave. MW-15, final well depth at 18 feet, DTW 9 feet, 10 feet of 0.01-inch slotted schedule screen, set screen bottom at 16.5 feet. MW-16, final well depth at 15 feet, DTW 5 feet, 10 feet of screen set screen bottom at 12 feet. No soil sample taken. On 3/12/2008, the wells were gauged and no LNAPL detected. Two groundwater samples were collected. MW-15, ug/L, 2,100 benzene, 8,300

U001839388

toluene, 3,700 ethylbenzene, 13,000 xylenes, 27,100 total BTEX, 430 MTBE. MW-16, 510 benzene, 15,000 toluene, 2,300 ethylbenzene, 10,000 xylenes, 27,810 BTEX, 57 MTBE. LNAPL in MW-1 recovery were conducted. 1/30/2008, EFR event, 0.5 gallon of LNAPL and 1,450 gallons of petroleum impacted groundwater was extracted. 2/18/2008, hand bailing, 0.01 feet of LNAPL. 2/26/2008, EFR event, 2,005 gallon of petroleum impacted groundwater was extracted. 3/19/2008, hand bailing, no LNAPL. RAP will be submitted 4/18/2008. (RJF) 5/5/2008 - Feng - Reviewed Revised Remedial Action Plan, dated April 18, 2008. The Revised RAP calls for monthly EFR events on MW-1 and MW3. EFR effluent air will be sampled on monthly basis. Groundwater gauging and sampling will be quarterly. Letter to K. Endriss (BP) requiring the revised RAP to include the MW-15 and MW-16 area. Revision to be submitted 6/5/2008 (30 days). (RJF) 5/8/2008 - Feng - Conference call with K. Endriss (BP), G. Hinshalwood and I. Goldstein (Delta). The proposed revised RAP only for treating the source area. Delta will see 2 more quarters of sampling of MW-15 and MW-16 as well as the geochemical sampling to decide what remedy to propose. Delta will submit an addendum letter for conditionally approve the revised RAP. (RJF) 5/9/2008 - Feng - Reviewed the Revised RAP Addendum Letter, dated 5/8/2008 by Delta. Approve Revised RAP with the Addendum Letter. Approval letter to BP and Delta. (RJF) 6/16/2008 - Feng - Letter from Delta, 6/12/2008. On 5/29/2008, EFR event was conducted at MW-1 and found MW-3 to be an 1-inch diameter well and the size is not suitable for use in EFR events. Delta will continue EFR at MW-1 and install a 2-inch or 4-inch well in the MW-3 area. Schedule of well installation will be informed. (RJF) 6/18/2008 - Feng - Portfolio meeting with BP and Delta. The new well will put in as near the MW-3 as possible, will be 4-inch well. Utility will be marked out next week. (RJF) 10/27/2008 - Remedial Progress Report, dated 9/29/2008, by Delta. On 7/16/2008, MW-17 was installed. 4-inch diameter, closed to MW-3. Total depth 19 feet, groundwater was encountered at 10 feet. 15 feet of 0.02 slotted schedule 40 PVC screen. Monthly EFR events from May to 8/2008 on MW-1. Monthly EFR on MW-17 from 7/2008 to 8/2008. A total of 5,255 gallons of water was extracted and disposed. No measurable LNAPL in MW-1 during bailing event from 3/2008 to 9/2008. Groundwater was sampled for bio-parameters. Delta will propose RAP for bio-stimulation by 10/15/2008. They will provide work plan to EPA for their approval also. (RJF) 10/29/2008 - 2Q2008, 4/25/2008, by Delta, by Delta. Active service station. the monitoring well network was gauged and sampled 4/17/2008. The site is being remediated via monthly EFR events. First round of gauging and sampling event of the two new monitoring wells MW-15 and MW-16. 12 wells were gauged. Trace LNAPL in MW-1. DTW 6.66' to 8.88' bg. Flows to north-northeast. 10 wells were sampled. BTEX range ND to 62,900 ug/L (MW-3). MTBE range ND to 6,200 ug/L (MW-3). (RJF) 3/4/2009 - 3Q2008, 11/13/2008, by Delta. Active Service Station. The monitoring well network was gauged and sampled on 7/21 and 7/25/2008 as part of the quarterly sampling schedule. The site is being remediated via monthly EFR events. Also worth noting that this was the first round of gauging and sampling of one new monitoring wells (MW-17) which was installed on 7/18/2008. In addition, groundwater samples for geochemical parameters were also collected during this monitoring event. 13 wells were gauged. LNAPL in MW-1 (0.02'). DTW 5.64' to 9.34' bg. Flows to north-northeast. 9 wells were sampled. 4 wells were not sampled, MW-1 with LNAPL, MW-10, MW-12 and MW-16 insufficient sample volume. BTEX range ND to 57,100

ug/L (MW-3). MTBE range ND to 6,200 (MW-3). 4Q2008, 11/20/2008, by Delta. Active service station. The monitoring well network was gauged and sampled on 10/14/2008. The site is being remediated via Multi Fluid Recovery events. 13 wells were gauged. No LNAPL. DTW 7.11' to 9.80' bg. Flows to north-northeast. 13 wells were sampled. BTEX range ND to 68,900 ug/L (MW-3). MTBE range ND to 6,000 ug/L (MW-3). (RJF) 3/23/2009 - Reviewed the Work Plan Bio-Stimulation Remediation Pilot Study, dated 10/15/2008, by Delta. The Work Plan calls for the application of 1,760 pounds of magnesium sulfate at a starting concentration of 55,000 mg/L in a single monitoring well MW-15. Monitoring program including gauge for the DTW, sulfate, sulfide, DO and pH immediately upon completion of the addition activities and 3 days after the addition, and weekly for 5 weeks. Groundwater will be monitored biweekly following the current procedure for 2 rounds and then continue quarterly. The Work Plan is approved. Report summarizing the pilot study and the recommendation for further corrective action will be submitted by 6/2009. Letter to BP and Delta. (RJF) 7/24/2009 - 2Q2009, 7/17/2009, by EnviroTrac. BP Service station. The monitoring well network was gauged and sampled on 4/20/2009. 12 wells were gauged. LNAPL in MW-3 (0.10'). DTW 6.20 to 9.37 feet bgs. Flows to north-northeast. 11 wells were sampled. MW-3 with product and MW-6 were not sampled. Max benzene 2,500 ug/L (MW-17). Max BTEX 27,930 ug/L (MW-15). Max MTBE 1,900 ug/L (MW-17). 7/24/2009 - Reviewed Drilling and Well Abandonment Work Plan, dated June 25, 2009, by Delta. Delta proposes to abandon EW-1 and install MW-18 close to EW-1. Email to Delta for another well at the proximity of EW-2. Revised work plan due within 30 days. (RJF) 8/20/2009 - send email to Gordon Hinshalwood (Delta) letting them go ahead with the installation of 2 wells to replace EW-1 and EW-2 as we agreed to during the meeting with BP on 7/30/2009. SHARA due 11/2009. (RJF) 12/15/2009 - reviewed the Drilling and Well Abandonment Work Plan revision, dated 9/10/2009, by Delta. Delta will abandon 2 extraction wells EW-1 and EW-2, and will replace them with 2 new monitoring wells. SHARA will be in by 11/2009. (RJF) 4Q2009, 1/12/2010, by EnviroTrac. BP service station. The monitoring well network was gauged and sampled on 10/26/2009. 15 wells were gauged. LNAPL in MW-3 (0.26'). DTW 7.11-9.46' bg. Flows to north-northeast. 14 wells were sampled. MW-3 was not sampled due to product. Max benzene 1,400 ug/L (MW-17). Max BTEX 31,330 ug/L (MW-19). Max MTBE 1,100 ug/L (MW-17) 1Q2010, 4/9/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 1/15/2010. 15 wells were gauged. LNAPL in MW-3 (0.02'). DTW 7.30-9.56' bg. Flows to north-northeast. 14 wells were sampled. Max benzene 2,400 ug/L (MW-17). Max BTEX 24,870 ug/L (MW-19). Max MTBE 710 ug/L (MW-17). 4/21/2010 - Reviewed Subsurface Hydrocarbon Assessment Report Addendum, dated 12/3/2009, by Delta. On October 11, 2009, EnviroTrac advanced 2 soil borings MW-18 and MW-19 to depth of 16 feet using Geoprobe 6620 DT hollow stem auger and direct push macro core sampling unit. 3 soil samples were collected. unit in ug/kg. MW-18 (9.5-10'), PID 13.4 ppm, 76J benzene, 4,500 xylenes, 14,471 total VOCs, 2,600 benzo(b)fluoranthene, 1,600 benzo(k)fluoranthene, 2,300 chrysene, 38,360 total SVOCs. MW-18 (12.5-13'), PID 59.4 ppm, 100J benzene, 1,557 total VOCs, 114 total SVOCs. MW-19 (12.5-13'), PID 1,195 ppm, 3,600 toluene, 16,700 xylenes, 26,000 1,2,4-trimethylbenzene, 9,500 1,3,5-trimethylbenzene, 64,190 total VOCs, 2,313 total SVOCs. The 2 wells were set and developed on 10/12/2009, and the wells were surveyed on 12/1/2009. On 10/26/2009, all the monitoring wells were gauged. LNAPL in MW-3

(0.18'). DTW 7.11' (MW-6) to 9.46' (MW-13). All the wells were sampled. BTEX range 0.53 ug/L (MW-11) to 31,330 ug/L (MW-19). MTBE range ND (MW-6, MW-10, MW-11 and MW-16) to 1,100 ug/L (MW-17). unit in ug/L. MW-18, 130 benzene, 760 toluene, 100 ethylbenzene, 1,220 xylenes, 2,210 BTEX, 110 MTBE, 12J n-propylbenzene, 240 1,2,4-trimethylbenzene, 91 1,3,5-trimethylbenzene, 580 naphthalene, 3,243 total VOCs, 0.42J benzo(a)anthracene, 0.31J benzo(a)pyrene, 0.45J benzo(b)fluoranthene, 0.16J benzo(k)fluoranthene, 0.13J indeno(1,2,3-cd)pyrene, 360 naphthalene, 406 total SVOCs. MW-19, 430 benzene, 20,000 toluene, 1,700 ethylbenzene, 9,200 xylenes, 31,330 BTEX, 16 MTBE, 140 isopropylbenzene, 440 n-propylbenzene, 22J p-isopropyltoluene, 3,700 1,2,4-trimethylbenzene, 1,100 1,3,5-trimethylbenzene, 86J n-butylbenzene, 1,200 naphthalene, 38,034 total VOCs, 960 naphthalene, 963 total SVOCs. 4/23/2010 - email comments on SHARA to Delta. 1) rose diagram; 2) surrounding sketch; 3) check possible delineation at the commercial building and the school, and definite delineation around MW-19. work plan due 5/2010. 6/2/2010 - 2Q2010, 5/18/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 4/14/2010. 15 wells were gauged. NO LNAPL. DTW 6.50-8.73' bg. Flows to north-northeast. 15 wells were sampled. Max benzene 1,000 ug/L (MW-3). Max BTEX 47,700 ug/L (MW-3). Max MTBE 2,100 ug/L (MW-3). 7/29/2010 - Enhanced Bioremediation Pilot Summary, dated May 31, 2010, by Delta. On October 26, 2009, all the wells were gauged for DTW, and presense of INAPL. Note that 0.18 feet of INAPL in MW-3. All the wells were sampled for baseline. On 11/3/2009, 460 lbs of magnesium sulfate was mixed with 1,000 gallons of water and gravity feed into MW-15 over a four hour period. 11/4/2009, sulfate sampled. MW-15, 5,420 mg/L. MW-18, 1,520 mg/L. MW-12, MW-16 and MW-14 also exhibit elevated sulfate concentrations compared to the baseline analysis, while the other wells MW-2, MW-5, MW-6, MW-10, MW-11 and MW-19 did not. The sulfate concentration in application monitoring well MW-15 initially spiked from less than 1.5 mg/L to 5,420 mg/L within the first 24 hours, and then gradually decreased to 75.2 mg/L after 80 days. In conclusion, the application was not exceed the boundary limit of 250 mg/L sulfate; the increase of sulfate in MW-10 was most likely indicative of background sulfate concentrations; only 6 wells were affected from the application point; elevated concentrations of sulfate in the application well consistently dissipated during the 80 days. 8/2/2010 - email comments on the pilot summary. 1) product in MW-3; 2) full scale work plan by 8/2010; 3) keep monitoring all the wells to ensure that there is no exceedances of the 250 mg/L criteria. 08/06/2010: This spill was temporarily (for 6 months) transferred to A. Doronova. - AD 08/09/2010: Received an e-mail: Ms. Doronova: Attached please find a work plan for the above-referenced site detailing our plans for a full-scale sulfate solution application. Please let me know if you have any questions. gh Gordon Hinshalwood, PhD- North American Operations Delta Consultants, an Oranjewoud N.V. Company Direct +1 914 495 9933 - USA Toll Free 800 477 7411 ghinshalwood@deltaenv.com - www.deltaenv.com DI the pfd copy of WP to eDocs. Will review. AD 10/2010: Discussed the WP with J. KOLEENY and M. Tibbe of DEC. Arranged a conference call with G. Hinshalwoog of Delta. AD Mr. Hinshalwood was not available for a conference call. M. Tibbe left him a message. AD 01/05/2011: Received a groundwater Monitoring Report for 4th quarter of 2010. DL pdf copy to eDocs. Will review. AD 4/8/2011 - spill transferred back to JFeng. 6/2/2011 - 3Q2010, 12/16/2010, by Delta. Groundwater samples were collected 7/26/2010.

Multiple wells with high level of BTEX and relatively high MTBE. The next scheduled sampling for April 2012. 6/29/2012 - reviewed Drilling Work Plan, dated 6/11/2012, by Antea Group. Proposed 2 additional monitoring wells and 6 soil borings. The borings are to assess the soil quality in areas where historical data showed hydrocarbon impacts and/or soil data has not been evaluated. 2 wells are proposed to enhance the well network and further delineate the gw impacts previously identified at the site, intended to target those area adjacent to existing monitoring well MW-19 and former MW-8, as well as to the east of formerly abandoned USTs. Email with 14 comments to BP/Antea. see eDoc. Revised work plan by the end of July 2012. 8/27/2012 - 2Q2012, 6/29/2012, by Antea Group. The groundwater was sampled on April 9, 2012. The next sampling will be in July 2012. MW-1, 1,111 BTEX, 16 MTBE. MW-3, 45,800 BTEX, 1,100 MTBE. MW-5, 297 BTEX, 14 MTBE. MW-12, 123 BTEX, 9.9 MTBE. MW-14, 386 BTEX, 2.1 MTBE. MW-15, 11,420 BTEX, 47 MTBE. MW-16, 4,302 BTEX, 2.3 MTBE. MW-17, 7,920 BTEX, 250 MTBE. MW-18, 1,550 BTEX, 49 MTBE. MW-19, 19,620 BTEX, less than 10 MTBE. 10/10/2012 - Reviewed the Addendum to Work Plan for Additional Delineation, dated 7/31/2012, by Antea Group. 5 soil borings and 3 wells are proposed. Email to BP/Antea I am confused about which work plan do you want me to approve? Your email still attached the one dated 6/11/2012. And I have the revised one dated 7/31/2012 which you responded to our comments. Let me know. I am ok with your response on most of the parts. But I still insist to see delineation in those two buildings area next to the station as I put in the comment 2 and comment 7. MW-7 is far from the station which located across Kent Ave from the station but it still had shown MTBE during the monitoring of its time. I was just trying to say that distance might not a problem for the contaminant to migrate in this case. And if you look at the history of MW-1, MW-2 and MW-12 which located at the edge of the station property, they had high hit in their history. And one of these two building is a 3-story school. So yes, I insist to see the delineation to be done there. 11/30/2012 - 3Q2012, 09/27/2012, by Antea Group. The groundwater was sampled on July 26, 2012. The next sampling will be in October 2012. MW-1, 1,570 BTEX, 30 MTBE. MW-3, 48,300 BTEX, 1,200 MTBE. MW-5, 434 BTEX, 20

BP SERVICE STATION #24485 (Continued)

U001839388

active NYSDEC case number 00-09318, he was concerned whether the material in his basement was attributed to that open case. We've been out to his property, gauged the nearby wells, screened the rooms with a PID, and we collected a few samples of the material, which have been sent to a lab for forensic analysis. NYSDEC case number 00-09318, has been associated with a historical gasoline release at the retail station. Based on an overall absence of the elevated PID readings that would accompany gasoline-range hydrocarbons, and absent this update forensics data, we have yet to find a link between this material and the open spill number. Note that the current owner/operator of the retail station does have a permitted 6,000 gallon Fuel Oil UST. That said, we intend to work with the tenant of 33 Hewes Street, to clean out the basement of the accumulated material so that we might be able to further understand its origin. We thought you should be aware of this. Please give me a call with any questions. We'll let you know more as this develops. DEC Feng spoke to Mr. Chan Miller (347-538-9294) at 35 Hewes Street. The building is used as a Jewish elementary school. About 1 month ago, he found oil in his basement. His basement is about 15'x 15' and the oil was about 1-2 inches in depth flooded in the basement. He contacted BP and BP responded to the incident Wednesday last week. Between the incident and the time BP came, Mr. Miller had some guy from a lab took a few samples on 1/7/2016 and lab results show it is fuel oil/diesel/#2 oil. The basement is used for boiler room and sprinkler system. There are sumps/drain/sewage in the basement. He and his people cleaned up the basement today with mops and wipes. There is no smell/odor in the basement or the entire building. There is no tank at all for this building. He is in the school during the day 9:00am to 4:00pm if inspection is needed. Discussed with J. Vought and sent email to BP Nick Onufrak and Antea Gorup Chris Meyer Nick and Chris, I just spoke with the owner, Mr. Chan Miller (347-538-9294). He stated that there was 1 to 2 inches of oil in his basement which is used for boiler room and sprinkler system. He indicated that the building is used for elementary school. He stated that there were no vapors in the basement or in the entire building. The basement was cleaned up by Mr. Miller and his people today with mops and wipes. As the site is an elementary school, we want to ensure timely investigation/remediation. We are sending a responder, possibly Kumar Patel (copied above, 646-201-1488) tomorrow for a site inspection. Please let us know the schedule to monitor and clean up the basement. If possible, please have the current tenant/owner provide the tightness test data for the 6,000-gallon fuel oil UST at the location of the BP retail station. Please provide the forensic sampling report as soon as it is available. We are also discussing this site with our PBS unit who may visit the BP station as well to ensure all is in working order. email to K. Patel the PBS record, 2013 inspection report and the 4Q2015 monitoring report of the BP station at 677-87 Kent Ave for tomorrow's inspection. 1/27/2016 - As per J. Vought, spill 15-10501 is added into UIS for 35 Hewes Street, Brooklyn. Conference call among Nick Onufrak of BP, Kumar Patel, Jeff Vought and June Feng. K. Patel stated that during this inspection this morning he did not see any oil drops. The basement is filled with sewage smell. The building kitchen is in the area and he suspected that is the kitchen grease trap. Mr. Miller will hire a plumber to check the sewage system. Nick has concern regarding the old abandoned USTs that near the school area but could not be removed due to structural integrity. Nick shall have the forensic report by Friday

and he will share that with DEC as soon as it becomes available. email from Kumar Patel to DEC Vought and Feng I inspected site 35 Hewes Street this morning and met Mr. Miller. We walked through dining area and kitchen on first floor on our way to the basement. No petroleum odors noted in dining area or kitchen, but noted sewage/grease trap odors at the basement hatch which is inside the kitchen area. Found water on basement floor with strong sewage kind smell. No sign of petroleum product (sheen or odors) noted in the basement. Mr. Miller confirmed absence of petroleum odors in the building. Based on field observations, recommended him to have grease and sewer trap checked by a plumber. email to NYSDOH and NYCDOH Dear Mike, Nathan, and Chris, On 1/26/2016, we received an email from BP and their consultant, Antea Group, stating that they had been contacted by a tenant of 35 Hewes Street who had observed fuel oil in the basement of their building. The building is used as a Jewish elementary school. BP and Antea Group is managing a long term petroleum remediation project of gasoline contamination associated with an active BP gas station located at 677-87 Kent Ave which is immediately adjacent to 35 Hewes Street. Antea Group has gauged nearby monitoring wells at the BP station, screened 35 Hewes Street with PID meter, and collected product samples from 35 Hewes Street for forensic analysis. Antea Group noted that they had not found to date that they were the source of the seepage but still intended to clean up the basement for further inspection of the possible seepage source. We spoke with the school representative who noted that there were no odors in the basement or the entire building. According to BP, the forensic report shall be available this Friday. Kumar Patel from our Unit inspected the site this morning and met with the school representative. He noted no petroleum odor but did note sewage/grease trap odors at the basement hatch which is inside the kitchen area. Water on the basement floor was found with strong sewage smell. No sign of petroleum product (sheen or odors) were noted in the basement. The school representative also confirmed the absence of petroleum odors in the building during his inspection. Kumar recommended the school have the grease and sewer trap be checked by a plumber and the representative agreed to have it performed. Kumar noted the address on the building is 35 Hewes Street. I checked the NYCDOB database and alternative addresses for this location included 33-39 Hewes Street, 35 Hewes Street and 671 Kent Ave. I also checked ACRIS and the address in the deed and mortgage agreement is 33 Hewes Street. Let us know if you have any questions/comments, need additional information, or think a NYCDOH inspection is warranted Thank you as always, 2/29/2016 - 1Q2016, 2/29/2016. Groundwater was sampled 1/21/2016. LNAPL in MW-3 (0.4') and MW-17 (0.04'). MW-1, 190 BTEX. MW-5, 170 BTEX, 25 MTBE. MW-8A, 6,340 BTEX. MW-13, 402 BTEX, 11 MTBE. MW-15, 8,480 BTEX, 42 MTBE. MW-24, 2,604 BTEX, 16 MTBE. 5/31/2017 - Feng - This spill is transferred from June Feng to Jeffrey Vought as per Jeffrey Vought. 12/12/17 - Austin - Assigned from Vought to Feng - end 1/30/2018 - Feng - Reviewed Monitoring Report 4Q2017, 1/24/2018, by ARCADIS. MW-22 was detected with product the first time, 1.89 feet. Arcadis is doing investigation to find the source of the product. email to Sahithi Rondla Sahithi, I reviewed the monitoring report and noticed that MW-22 was detected with product the first time. Regarding the findings of the investigation for the source of the product, you mentioned spill 15-10501. As I know, the school building did not have any tank back then. I checked the PBS record, no registration as of today. Back then, when DEC inspected the site when the incident occurred, the inspector noted there was sewage odor in the basement but no sign of petroleum. He then recommended for the grease trap be checked by a plumber. As you said, the product was estimated to be 6-7 years (+/- 2 years) old. It seems not matches the new unweathered product. You mentioned the product from upgradient of MW-22, Manhole 59638. The spill number is 05-06675. According to DEC notes, it is a Con Ed spill. 2 gallons of unknown oil on top of 60 gallons of water. It has been cleaned up by removing the product and re-capping the leaking 3c cable. The spill was then reclassified as dielectric fluid spill. Spill was closed on 1/10/2008. Have you checked to make sure that the monitoring well detected with product is the MW-22? Confirmed the monitoring well was not damaged or unlocked when it was gauged/sampled? MW-22 has been non-detected almost all the time since its installation in 2013. However, there is a closed-in-place tank field in the southeast corner of the site. The monitoring wells, MW-4, MW-15, MW-19, MW-8A, around the abandoned tank field have been either had product or high dissolved of VOCs concentration. MW-22 is located near the area. MW-22 is not upgradient all the time, if you check the flow direction, it varied or you may say it has been flowed to all direction. It shouldn't be surprised if you see detection in that monitoring well MW-22. Have you compared this product to the product from other wells that currently have product, e.g. MW-3 and MW-17, and the diesel product the station is selling? Have you done any product removal since its discovery to see if there is any return of the product? I recommend to do the product removal immediately before it migrates and dissolves more in groundwater while you continue to investigate for the source of the product. Email from Sahithi Rondla

BP SERVICE STATION #24485 (Continued)

U001839388

Ms. Feng, We are pretty sure about identification of the well, MW-22. The well was found to be intact with manhole cover and J-plug. I agree this well is in close proximity to former abandoned tankfield. However based on Antea's Soil Boring investigation in April 2016, a total of four soil borings were advanced (SB-20, SB-21, SB-22, SB-23) to assess the subsurface soils between the adjacent property to the northeast (school) and the subject site and two temporary monitoring wells (SB-20 and SB-22) were installed to further assess groundwater conditions. VOC concentrations in excess of NYSDEC CP-51 Soil Cleanup Guidance for Gasoline Impacted Sites were identified in one of the borehole locations (SB-20); SVOC concentrations in excess of NYSDEC CP-51 Soil Cleanup Guidance for Fuel Oil Contaminated Sites were not identified in any of the four borehole locations. Laboratory results indicated that soil impacts identified along the northeast property boundary in the area of SB-20 are likely attributed to current BP assigned spill number 00-09318. Laboratory analysis performed on the two groundwater samples collected from temporary wells SB-20 and SB-22 identified several VOC concentrations above the GWQS in SB-20, but no GWQS exceedances in SB-22. Laboratory analysis identified several SVOC concentrations above the GWQS in the groundwater samples collected from SB-20 and SB-22. LNAPL was not detected in temporary monitoring wells (SB-20 and SB-22) during the assessment. Note that SB-23 is the closest boring to MW-22. Soil analytical data from SB-23 was clean. We compared the fingerprinting results from MW-22 to onsite historic LPH. LPH samples collected at MW-1 (Oct. 2004), MW-3 (March 2001 and Jan. 2013), and MW-8A (Jan. 2013) characterized by Torkelson Geochemistry in Antea Report as moderately weathered to weathered premium grade gasoline (no mention of diesel being present in any sample). However to clarify your question, we did not analyze diesel from existing service operations as we do not believe is required due to the location of current tank field. Coincidentally we are the site today performing 1st Qtr 2018 GW monitoring event. Per your suggestion, we will bail the LPH from MW-22. However I would like to clarify that though we are bailing, Arcadis on behalf of our client, BP is not accepting the responsibility of LPH in MW-22, as we believe is not related to current open spill number 00-09318 at this time. Arcadis is still conducting further investigation into this. As I mentioned on the call, I will summarize the results of the chromatograms in a letter next week for your review. 5/7/2018 - Feng - 1Q2018, 4/24/2018, by Arcadis. Monitoring on 1/30/2018. on 7/25/2019. DTW 7.00 feet (MW-24) to 13.28 feet (MW-23). MW-3, 0.15' LNAPL. MW-8A, 1,263E BTEX. MW-14, 779 BTEX. MW-15, 1,523 BTEX, 24 MTBE. MW-17, 17,540 BTEX, 93 MTBE. MW-18, 620 BTEX, 22 MTBE. MW-22, no LNAPL. MW-24, 629 BTEX, 71 MTBE. 12/11/2019 - Feng - email from Sahithi of Arcadis Ms. Feng, Just wanted to provide you an update on activities mentioned in RAP for the aforementioned site :
-Arcadis installed Dual phase extraction (DPE) wells on November 6th & 7th ,2019 as stated in RAP submitted to NYSDEC dated July 24,2019.
-RAP outlines implementing first week long DPE event within 60 days following the DPE well install . So technically ,first DPE event should have been conducted before January 7,2019 -However due to upcoming holiday season, subcontractor scheduling and other logistics, Arcadis will delay this implementation by a week. Arcadis is scheduled to conduct this work during week of January 13,2019. I hope NYSDEC has no objection to our extension request by a week s time. Feng replied no objection. 3/20/2020 - email from Sahithi Rondla Ms. Feng, Per RAWP dated July 2019, Arcadis conducted 2 of 5-day DPE events so far in January & February 2020. However we are having to suspend March 2020 event because of ongoing global Covid-19 crisis. As you know this site operates as gas station in NY where the epicenter for Covid-19 currently is and we are having difficulty with staffing and dealing with logistics related to maintaining the separation distance based on the scope of work & on site business operations. I hope you understand our current situation and be assured that Arcadis will immediately mobilize to the site to conduct 3rd week long DPE event as soon as conditions improve. I will continue to keep you posted about our plans. In the meantime, please do not hesitate to let me know if you have any questions or concerns. Feng reply to Sahithi Rondla Sahithi, I understand. Everybody please stay healthy and safe! 4/2/2020 - Feng - 4Q2019, 1/27/2020, by Arcadis. Monitoring on 10/24/2019. DTW 7.70 (MW-24) to 15.45 (MW-23). LPH was recovered from MW-3, MW-17 and MW-22. The recovered LPH was stored in an onsite drum for subsequent offsite disposal at a EPA approved disposal facility. MW-2, 117 BTEX, 11 MTBE. MW-3, 0.66' LNAPL. MW-5, 90.6 BTEX. MW-8A, dry. MW-14, 1,275 BTEX. MW-15, 3,291 BTEX, 24 MTBE. MW-17, 0.02' LNAPL. MW-18, 1,830 BTEX, 20 MTBE. MW-19, 366 BTEX. MW-22, 0.15' LNAPL. MW-24, 1,219 BTEX, 77 MTBE. 5/11/2020 - Feng - 4/14/2020 email from S. Rondla. Due to COVID-19 pandemic, 2Q2020 field work, i.e. groundwater monitoring and 3rd DPE event pilot test, will be defer to later in the quarter until current situation gets stable. 6/8/2020 - Feng - 1Q2020 and VTE Event Summary Report, 5/29/2020, by Arcadis. Monitoring on 2/12/2020 and 3/16/2020. As of 3/16/2020 MW-1, less than 9 BTEX, 3 MTBE. MW-2, less than 14.5 BTEX, 3 MTBE. MW-3, dry. NO LNAPL. MW-4, abandoned well. MW-5, 74.4 BTEX, 7 MTBE. MW-6, less than 9 BTEX, 4 MTBE. MW-7, abandoned well. MW-8, abandoned well. MW-8A, dry. MW-9, abandoned well. MW-10, less than 9 BTEX, less than 1 MTBE. MW-11, less than 8 BTEX, less than 1 MTBE. MW-12, dry. MW-12A, less than 9 BTEX, 13 MTBE. MW-13, dry. MW-14, 7.2J BTEX, 2 MTBE. MW-15, 344J BTEX, 10 MTBE. MW-16, could not sample due to damaged well inner casing. MW-17, 6,290 BTEX, 36 MTBE. MW-18, 343 BTEX, 11 MTBE. MW-19, 3.7J BTEX, 2 MTBE. MW-22, less than 8.7 BTEX, less than 1 MTBE. NO LNAPL. MW-23, less than 9 BTEX, less than 1 MTBE. MW-24, 2,478 BTEX, 12 MTBE. DPE-1, 550 BTEX, 21 MTBE. DPE-2, 557 BTEX, 10 MTBE. 6/22/2020 - Feng - Reviewed VTE Event Summary. -Between November 6 and November 7, 2019, Arcadis oversaw the installation of 2 extraction wells (DPE-1 and DPE-2) by Hawk Drilling. -Drilled using hollow stem auger drill rig to 25 feet.

-4-inch diameter, 15 feet of 0.02-inch slotted screen, 5 feet riser.
-Each DPE wells includes a 5-foot sump so that pump intake can be adjusted during the VTE events to maximize mass recovery -2 multi-day VTE events were conducted in first quarter 2020, 1/20-23/2020, and 2/24-28/2020. -MW-3, MW-5, MW-8A, MW-15, MW-17, MW-18, MW-19 and MW-22 were used as observation -interface probe was used to collect depth to water and depth to product reading -a top-loading pneumatic pump was installed in each extraction well with the pump intake positioned near the bottom of the well screen. -the pneumatic pumps were turned on to begin groundwater extraction -vacuum blower was turned on to begin soil vapor extraction -reading were collected every 60 min throughout the day -water discharge line from each pneumatic pump was run to a 250-gallon water storage tank and will be pumped to vac truck for disposal once it is full by Lorco Petroleum in Elizabeth, NJ. -the truck-mounted vacuum blower effluent line was connected to (2) 375-lb vapor-phase granular activated carbon (VGAC) units in series to allow extracted soil vapor to be treated before discharge to atmosphere. -DPE-1 recharge rate 5 gallons per minute -DPE-1 drawdown was limited to 1 ft -DPE-2 recharge less than 0.5 gpm -higher recharge rate in DPE-1 may be due to its presence of a former excavation -DPE-2 may be the representative of actual groundwater recharge rate at the site. -total 12,775 gallons of groundwater was extracted during the two VTE events. -max drawdown DPE-1 (1.2 feet), DPE-2 (6.1 feet), MW-15 (0.5 feet), MW-18 (1.0 feet), MW-3 (dry), MW-17 (0.4 feet), MW-5 (0.1 feet). MW-19 (0.4 feet), MW-8A (dry), MW-22 (0.0 feet). -vacuum applied in DPE-1 and DPE-2 from 4.9 in Hg to 6.3 in Hg. -air flow rates in DPE-1 and DPE-2 from 87 scfm to 132 scfm -all the monitoring wells, except MW-22, recorded induced vacuum during the VTE. -ROI is 35 feet. -DPE-1 mass recovery ranged 41 to 51 lbs/day -DPE-2 mass recovery ranged 16 to 25 lbs/day -total 196 lbs of vapor phase TPH were removed during the 2 VTE events Based on the high soil vapor mass recovery rates observed in DPE-1 and DPE-2 during the 2nd VTE event, Arcadis proposes additional VTE events at the site to continue removal of VOC mass from the subsurface. 3/2/2021 Feng - Monitoring 4Q2020, 1/29/2021, by Arcadis. Monitoring on 10/29/2020. DTW 6.78 (MW-24) to 13.60 (MW-23) below top of the casing. Water flows to east at hydraulic gradient of 0.03 feet per foot. LNAPL in DPE-1 (0.14) the first time. 0.4 gallons of LPH was recovered from the well via hand bailing using disposable bailers. LPH was sampled on 11/10/2020. LPH samples were collected from DPE-1 and MW-3 to identify the chemical composition and age o the LPH and to determine if the LPH observed in both wells have resemble to each other. LPH in MW-3 contained weathered premium grade gasoline, consistent with the historical fingerprinting analyses conducted in 2001 and 2013. LPH in DPE-1 contained weathered regular grade gasoline and had different composition to LPH detected historically in MW-1, MW-3 and MW-8A. Arcadis will proceed with mobile DPE events starting January 2021 but modifying the technology by using Catalytic Oxidizer unit instead of vapor phase carbon units for off gas treatment. MW-1, 338 BTEX, 22 MTBE. MW-2, < 3 BTEX, < 1 MTBE. MW-3, 0.16 LNAPL. 189,000 BTEX, 2,320 MTBE. MW-4, abandoned 7/2007. MW-5, not sampled due to rain water flooding the well. MW-6, not sampled annually. MW-7, well not sampled since 1/2005. MW-8, well abandoned 1/2007. MW-8A, not sampled due to insufficient water volume. MW-9, well abandoned 4/2006. MW-10, sampled annually. MW-11, sampled annually. MW-12, dry. MW-12A, < 3 BTEX, 5.9 MTBE. MW-13, inaccessible due to tire piles. MW-14, 849 BTEX, 3.7 MTBE. MW-15, 28.7 BTEX, 13.1

Hazardous Waste Summary:

Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D009
Waste Description: MERCURY

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2,

TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F003

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F005

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

U002

Waste Description:

2-PROPANONE (I) (OR) ACETONE (I)

Waste Code:

U031

Waste Description:

1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code:

U044

Waste Description:

CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code:

U080

Waste Description:

METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Waste Code:

U112

Waste Description:

ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

Waste Code:

U115

Waste Description:

ETHYLENE OXIDE (I,T) (OR) OXIRANE (I,T)

Waste Code:

U122

Waste Description:

FORMALDEHYDE

Waste Code:

U134

Waste Description:

HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Waste Code:

U154

Waste Description:

METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code:

U188

Waste Description:

PHENOL

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Record Add: 11/18/1999
Record Upd: 11/13/2012
Updated By: BXANDERS

Site Description:

"Location: Naval Station - Brooklyn is located in a flat industrial area within the New York Naval Shipyard in the Williamsburg section of Brooklyn, north of Flushing Avenue, between Clinton Avenue and Williamsburg Place. Site Features: The East River is 1500 feet west of the site. There are two working electrical substations at the site which have three transformers employing dielectric fluid which formerly contained PCBs. Each of the substations is contained within an area surrounded by concrete walls. They are located in the northern portion of the property, adjacent to the property line. Current Zoning/Use(s): Industrial Historic Use(s): A 1987 Phase I investigation showed that the PCB content of the dielectric fluid in the transformers ranged from 250 to 590 parts per million (ppm). Transformer spills stained slabs and soil located beneath the transformers, with soil contamination ranging from 0.5 to 870 ppm. The PCB containing transformers were subsequently retro-filled. Remedial work began in the summer of 1994 and concluded in 1995 and included power-washing the transformers and stained slabs and removing hazardous levels of PCB contaminated soils. The areas were then backfilled with crushed stone and secured. Three monitoring wells were installed to determine whether PCBs had contaminated the groundwater beneath the site at Building 7. Three rounds of groundwater samples collected in September 1996, December 1996, and March 1997, showed no detectable concentrations of PCBs. It was determined that further monitoring at this site was not warranted. In July 2012 NYSDEC placed an Environmental Notice on the Transformer Area which requires written approval from NYSDEC prior to any disturbance or excavation of the soil, proper management and/or disposal of any contaminated materials exposed or removed, and prior approval by NYSDEC for any change in use. The Transformer Area has been delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State."

Env Problem:

"Nature and Extent of Contamination: Remediation at the site is complete, to extent that the Navy was able to work around the active transformers. The primary contaminants of concern at the site, PCB's, were addressed by the removal action completed in 1995. Due to the location in a walled transformer yard beneath the crushed stone site

cover, and the limited amounts remaining in the soil, residual PCB contamination in the soils will not impact the East River. Three rounds of groundwater samples were non-detect for PCBs. Special Resources Impacted/ Threatened: None "

Health Problem: "Since some contaminated soils remain at the site below concrete or clean backfill, people will not come in contact with contaminated soils unless they dig below the surface materials. In addition, the site is fenced, which restricts public access. "

Site Code: 55915

Site Description: "Location: Naval Station - Brooklyn is located in a flat industrial area within the New York Naval Shipyard in the Williamsburg section of Brooklyn, north of Flushing Avenue, between Clinton Avenue and Williamsburg Place. Site Features: The East River is 1500 feet west of the site. There are two working electrical substations at the site which have three transformers employing dielectric fluid which formerly contained PCBs. Each of the substations is contained within an area surrounded by concrete walls. They are located in the northern portion of the property, adjacent to the property line. Current Zoning/Use(s): Industrial Historic Use(s): A 1987 Phase I investigation showed that the PCB content of the dielectric fluid in the transformers ranged from 250 to 590 parts per million (ppm). Transformer spills stained slabs and soil located beneath the transformers, with soil contamination ranging from 0.5 to 870 ppm. The PCB containing transformers were subsequently retro-filled. Remedial work began in the summer of 1994 and concluded in 1995 and included power-washing the transformers and stained slabs and removing hazardous levels of PCB contaminated soils. The areas were then backfilled with crushed stone and secured. Three monitoring wells were installed to determine whether PCBs had contaminated the groundwater beneath the site at Building 7. Three rounds of groundwater samples collected in September 1996, December 1996, and March 1997, showed no detectable concentrations of PCBs. It was determined that further monitoring at this site was not warranted. In July 2012 NYSDEC placed an Environmental Notice on the Transformer Area which requires written approval from NYSDEC prior to any disturbance or excavation of the soil, proper management and/or disposal of any contaminated materials exposed or removed, and prior approval by NYSDEC for any change in use. The Transformer Area has been delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State."

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete, to extent that the Navy was able to work around the active transformers. The primary contaminants of concern at the site, PCB's, were addressed by the removal action completed in 1995. Due to the

location in a walled transformer yard beneath the crushed stone site cover, and the limited amounts remaining in the soil, residual PCB contamination in the soils will not impact the East River. Three rounds of groundwater samples were non-detect for PCBs. Special Resources Impacted/ Threatened: None "

Health Problem: "Since some contaminated soils remain at the site below concrete or clean backfill, people will not come in contact with contaminated soils unless they dig below the surface materials. In addition, the site is fenced, which restricts public access. "

EMS Map Link: <https://fudsportal.usace.army.mil/ems/inventory/map?id=56453>
Eligibility: Eligible
Has Projects: Yes
NPL Status: Not on the NPL
Property History: As per Declaration of Taking dated 29 January 1941, the Department of the Navy obtained 2.638 acres fee. On 15 April 1975, the Department of the Navy conveyed 2.638 acres fee to GSA. As per quitclaim deed dated 4 June 1979, GSA conveyed 0.294 acre fee to the Department of Health and Hospitals Corporation (HHC) of the City of New York. Said deed did not contain any recapture or restoration clauses but did contain a restrictive clause (to be used public health purposes for a period of thirty years -from the date of conveyance). As per quitclaim deed dated 22 February 1985, GSA conveyed 2.344 acres fee to the City of New York. Said deed did not contain any recapture, restoration or restrictive clauses. On 8 September 1986, the 0.294 acre fee reverted back to GSA because of a breach of contract by HHC. GSA is still the owner of record of the 0.2 94 acre fee.

Description: The Navy Barracks are located in the County of Kings, Borough of Brooklyn, City of New York, State of New York. The site is bounded on the North by Flushing Avenue, on the South by Park Avenue, on the East by Vanderbilt Avenue and on the West by Clermont Avenue. The site was improved by a six story concrete building utilized as a military prison and three story brick building used as barrack and for administrative purposes. The NYC Department of Corrections is used as the Brooklyn Correctional Facility. The former military prison building and associated utilities are beneficially used by the present owner the New York City Department of Corrections. The former Navy barrack and administrative building is abandoned and owned by GSA.

Site Description:

"The Kent Avenue Generating Station Site is located in Brooklyn, NY. It is along the waterfront (Wallabout Channel, trib to East River) on the west side of Kent Avenue, south of the intersection with Division Avenue. The site is the location of the former Kent Avenue Generating Station, which has since been demolished. Excepting activities

related to building demolition and property rehabilitation, with respect to current use the site is considered inactive. The uses of the surrounding parcels are varied: across Kent Avenue is a NYC Park (Roberto Clemente Ballfield); immediately to the south is the Brooklyn Navy Yard 13 Acre Parcel Site (NYSDEC Site No. 224019A); immediately to the north across Division Avenue are commercial uses; properties to the northeast and to the southeast appear to have residential uses. Prior uses that appear to have led to site contamination include discharges during the period of operation of the power plant and on-site re-use of prior demolished structures as fill material. A number of environmental investigations of the property have occurred including a Phase II (2000) and other investigations focused on particular issues or areas of the site from 2006 to present. Reclassified to N. See V00732 - Kent Avenue Station Site. Work to be done under VCA Amendment."

Env Problem: "This site has been successfully remediated. The information on the remedy is included under site V00732. The following description was true during the early stages of work at this site. The primary contaminants of concern at the site known at the time include PCBs, asbestos, various metals, petroleum constituents and PAHs. Investigations indicate SCG exceedances of PCB and petroleum compounds in sediments/ sludge contained in a large concrete structure (known as the ash pit); asbestos, metals and PAHs in subsurface soils/fill; and an area of groundwater petroleum contamination in the southwest corner of the property. The significance of the contamination needs to be determined."

Date Record Updated: 06/18/2021
Updated By: DJEATON
Site Description:

"Location: The site is located in a mixed-use area along the Brooklyn waterfront. It is bounded by Kent Avenue to the east, Wallabout Channel to the west, Division Avenue to the north, and the Brooklyn Navy Yard to the south. Site Features: The site has been sold to a developer but is still currently vacant and open. In the subsurface, a large concrete-lined pit is present in the northwest corner of the site and along the edge of the Wallabout Channel. A large concrete slab which is part of a former power plant foundation occupies the center of the site. The slab has been covered with clean fill. Current zoning/use. The site is zoned for industrial use but is currently vacant. It is surrounded by commercial buildings and multiple occupancy residences. Past Use of the Site: The site was previously an electrical generating station and substation from 1906 until the late 1990s. The site was razed from 2007 to 2009. The main sources of contamination were the concrete-lined ash pit storage area and by-products of the electrical generating process which are scattered across the site. Site Geology and Hydrogeology: The site is underlain by a 5 to 10 foot layer of fill material. Under the fill are intermingled layers of silt and sand down to roughly 100 feet below grade. Beneath the silt and sand is a clay confining unit. The water table lies roughly 8 feet below the ground surface. Based on the site's proximity to the Wallabout channel, groundwater levels are probably tidally influenced. The far western edge of the site is built out on piles over the bank of the Wallabout Channel. "

Env Problem: "Active Remediation at the site is complete. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs) in soil, volatile organic compounds (VOCs) in groundwater and polychlorinated biphenyls (PCBs) in the ash pit sediments. "

Health Problem: "The site is completely fenced, which restricts public access. Persons who dig below the ground surface may come into contact with contaminants in the subsurface soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential

been handled by a National Grid Contractor. I am awaiting a report from National Grid documenting the clean-up. Any additional asbestos material will be handled under the existing VCA (V00732) 3/31/2011 - MacNeal - The spill is closed. The date of closure is the date that correspondence was received from National Grid which contained air monitoring reports and a waste manifest which confirmed proper disposal of the asbestos which was released. Those items have been placed in edocs. "

Remarks: "While taking bore samples has a release into the atmosphere. Location is a former ConEd site."

S105586296

parcel site includes the former Building 419 transformer substation area and two former drum storage areas. The site surrounds Wallabout Channel (barge basin) on three sides. The 224019A site deals with only 5.89 acres of the parcel, and excludes the former coal gasification plant known to have existed at the remaining 3.5 acres of the site. Those 3.5 acres have been designated as a separate site and given the ID number of 224019B. Also excluded from the original 13 acres are an approximate 3.61 acres of land under water, which have been excluded from the original site definition. Current Zoning and Land Use: The site is zoned for commercial and industrial uses, and is currently used for vehicle and materials storage. The surrounding area includes industrial, commercial and residential uses. Past Use of the Site: The site was used in support of ship building and repair activities. Support actions included waste storage at the two drum storage areas, and power distribution at the transformer substation. The railroad siding area was used for the loading and unloading of materials and fuels. These uses, as well as historic filling practices throughout the waterfront, have led to demonstrable levels of lead, Polycyclic Aromatic Hydrocarbons (PAHs) and/or polychlorinated biphenyls (PCB) contamination. Site Geology and Hydrogeology: The site is underlain by historic fill to a depth of approximately fifteen feet in many areas. Beyond the fill material is a silt sand, then sand unit down to a depth of approximately 100 feet where the Gardiners Clay is found. Groundwater occurs at depths of approximately five feet, and flow is generally to the north and west towards the East River. "

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds and PCBs in the soil. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil is being managed under a Site Management Plan."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

Site Description:

"Location: This site is on the north-east portion of the Brooklyn Navy Yard Development Corp. Industrial Park (BNYDC) and is a portion of the site (224019A) which had been operated by the NYC Sanitation Department is currently being redeveloped by Steiner Studios into a new roadway and elevated parking lot. The site is bordered by the East River on the north and west, by Kent Avenue on the east, and by the rest of BNYDC site on the south. Site Features: The 13-Acre parcel site includes the former Building 419 transformer substation area and two former drum storage areas. The site surrounds Wallabout Channel (barge basin) on three sides. The 224019A site deals with only 5.89 acres of the parcel, and excludes the former coal gasification plant known to have existed at the remaining 3.5 acres of the site. Those 3.5 acres have been designated as a separate site and given the ID number of 224019B. Also excluded from the original 13 acres are an approximate 3.61 acres of land under water, which have been excluded from the original site definition. Current Zoning and Land Use: The site is zoned for commercial and industrial uses, and is currently used for vehicle and materials storage. The surrounding area includes industrial, commercial and residential uses. Past Use of the Site: The site was used in support of ship building and repair activities. Support actions included waste storage at the two drum storage areas, and power distribution at the transformer substation. The railroad siding area was used for the loading and unloading of materials and fuels. These uses, as well as historic filling practices throughout the waterfront, have led to demonstrable levels of lead, Polycyclic Aromatic Hydrocarbons (PAHs) and/or polychlorinated biphenyls (PCB) contamination. Site Geology and Hydrogeology: The site is underlain by historic fill to a depth of approximately fifteen feet in many areas. Beyond the fill material is a silt sand, then sand unit down to a depth of approximately 100 feet where the Gardiners Clay is found. Groundwater occurs at depths of approximately five feet, and flow is generally to the north and west towards the East River. "

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds and PCBs in the soil. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil is being managed under a Site Management Plan."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

Site Code: 57818

Site Description: "Location: This site is on the north-east portion of the Brooklyn Navy Yard Development Corp. Industrial Park (BNYDC) and is a portion of the site (224019A) which had been operated by the NYC Sanitation Department is currently being redeveloped by Steiner Studios into a new roadway and elevated parking lot. The site is bordered by the East River on the north and west, by Kent Avenue on the east, and by the rest of BNYDC site on the south. Site Features: The 13-Acre parcel site includes the former Building 419 transformer substation area and two former drum storage areas. The site surrounds Wallabout Channel (barge basin) on three sides. The 224019A site deals with only 5.89 acres of the parcel, and excludes the former coal gasification plant known to have existed at the remaining 3.5 acres of the site. Those 3.5 acres have been designated as a separate site and given the ID number of 224019B. Also excluded from the original 13 acres are an approximate 3.61 acres of land under water, which have been excluded from the original site definition. Current Zoning and Land Use: The site is zoned for commercial and industrial uses, and is currently used for vehicle and materials storage. The surrounding area includes industrial, commercial and residential uses. Past Use of the Site: The site was used in support of ship building and repair activities. Support actions included waste storage at the two drum storage areas, and power distribution at the transformer substation. The railroad siding area was used for the loading and unloading of materials and fuels. These uses, as well as historic filling practices throughout the waterfront, have led to demonstrable levels of lead, Polycyclic Aromatic Hydrocarbons (PAHs) and/or polychlorinated biphenyls (PCB) contamination. Site Geology and Hydrogeology: The site is underlain by historic fill to a depth of approximately fifteen feet in many areas. Beyond the fill material is a silt sand, then sand unit down to a depth of approximately 100 feet where the Gardiners Clay is found. Groundwater occurs at depths of approximately five feet, and flow is generally to the north and west towards the East River. "

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds and PCBs in the soil. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil is being managed under a Site Management Plan."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 12/01/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/09/2023
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 12/01/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/09/2023
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/27/2022

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/27/2022	Source: EPA

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

PFAS 3: PFAS Environmental Site Remediation List

Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Fluoropolymer coatings are blends of resins and lubricants used in products such as water-repellent clothing, furniture, adhesives, paint and varnish, food packaging, heat-resistant non-stick cooking surfaces and insulation of electrical wires. Chemicals in this group include perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS).

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

UTM Y (Meters):	4505308.0
Elevation:	31 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14115940 BROOKLYN, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile West
Site Name:	Naval Station Ny
Site EPA ID Number:	NY5170022250
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	14 feet in a well located 1 mile southeast of the site.
Hydraulic Connection:	Information is not available about the hydraulic connection between the surficial aquifer (upper glacial till) and underlying aquifer(s). Bedrock is present at an estimated depth of 100 feet.
Sole Source Aquifer:	A sole source aquifer is present at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Mesozoic
System:	Cretaceous
Series:	Upper Cretaceous
Code:	uK (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

BISON ENVIRONMENTAL, LLC

December 21, 2022

Mazel Mit Brucha 104, LLC
51 Forest Road #316-160
Monroe, NY 10950
Attention: Zalmen Leibowitz

Subject: Reliance Letter
Phase 1 Environmental Site Assessment (ESA)
819 Bedford Avenue (Block 1734, Lot 61)
Brooklyn, New York 11205

Dear Mr. Leibowitz:

Bison Environmental, LLC (Bison) has completed a Phase 1 ESA on the subject property, the results of which were contained in our December 15, 2022 report to Finwise Bank and the United States Small Business Administration.

We understand that Mazel Mit Brucha 104, LLC has been provided with a copy of the December 15, 2022 Phase 1 ESA report. Bison Environmental, LLC acknowledges that Mazel Mit Brucha 104, LLC, its successors and/or assigns, may rely on the contents of that report, and all the conclusions and recommendations contained therein, as if: (1) Mazel Mit Brucha 104, LLC contracted directly with Bison Environmental, LLC for the report; and (2) Bison Environmental, LLC originally prepared the report for, and addressed the report to, Mazel Mit Brucha 104, LLC. This reliance is subject to the technical limitations expressed in the report and limited to the extent of our Professional Liability/Errors and Omissions insurance coverage (E&O). I enclose proof of Bison's E&O coverage.

This letter is not an update or modification to the December 15, 2022 Phase 1 ESA report. Bison Environmental, LLC makes no representation or warranty, expressed or implied, that the condition of the subject property on the date of this letter is the same as the condition of the subject property described in the December 15, 2022 Phase 1 ESA report.

Please contact me with any questions or if you require additional information.

Sincerely,
BISON ENVIRONMENTAL, LLC

A handwritten signature in cursive script, appearing to read "George Guzdek".

George Guzdek, PG
General Manager

Enclosure: Bison Environmental Certificate of Insurance

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)

02/16/2022

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an **ADDITIONAL INSURED**, the policy(ies) must have **ADDITIONAL INSURED** provisions or be endorsed. If **SUBROGATION IS WAIVED**, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).
