PFAS PARAMETER SUMMARY

Parameter	Acronym	CAS Number
PERFLUOROALKYL CARBOXYLIC ACIDS (PFCAs)		
Perfluorooctadecanoic Acid	PFODA	16517-11-6
Perfluorohexadecanoic Acid	PFHxDA	67905-19-5
Perfluorotetradecanoic Acid	PFTA	376-06-7
Perfluorotridecanoic Acid	PFTrDA	72629-94-8
Perfluorododecanoic Acid	PFDoA	307-55-1
Perfluoroundecanoic Acid	PFUnA	2058-94-8
Perfluorodecanoic Acid	PFDA	335-76-2
Perfluorononanoic Acid	PFNA	375-95-1
Perfluorooctanoic Acid	PFOA	335-67-1
Perfluoroheptanoic Acid	PFHpA	375-85-9
Perfluorohexanoic Acid	PFHxA	307-24-4
Perfluoropentanoic Acid	PFPeA	2706-90-3
Perfluorobutanoic Acid	PFBA	375-22-4
PERFLUOROALKYL SULFONIC ACIDS (PFSAs)		
Perfluorododecanesulfonic Acid	PFDoDS	79780-39-5
Perfluorodecanesulfonic Acid	PFDS	335-77-3
Perfluorononanesulfonic Acid	PFNS	68259-12-1
Perfluorooctanesulfonic Acid	PFOS	1763-23-1
Perfluoroheptanesulfonic Acid	PFHpS	375-92-8
Perfluorohexanesulfonic Acid	PFHxS	355-46-4
Perfluoropentanesulfonic Acid	PFPeS	2706-91-4
Perfluorobutanesulfonic Acid	PFBS	375-73-5
FLUOROTELOMERS		
1H,1H,2H,2H-Perfluorododecanesulfonic Acid	10:2FTS	120226-60-0
1H,1H,2H,2H-Perfluorodecanesulfonic Acid	8:2FTS	39108-34-4
1H,1H,2H,2H-Perfluorooctanesulfonic Acid	6:2FTS	27619-97-2
1H,1H,2H,2H-Perfluorohexanesulfonic Acid	4:2FTS	757124-72-4
PERFLUOROALKANE SULFONAMIDES (FASAs)		
Perfluorooctanesulfonamide	FOSA	754-91-6
N-Ethyl Perfluorooctane Sulfonamide	NEtFOSA	4151-50-2
N-Methyl Perfluorooctane Sulfonamide	NMeFOSA	31506-32-8
PERFLUOROALKANE SULFONYL SUBSTANCES		
N-Ethyl Perfluorooctanesulfonamido Ethanol	NEtFOSE	1691-99-2
N-Methyl Perfluorooctanesulfonamido Ethanol	NMeFOSE	24448-09-7
N-Ethyl Perfluorooctanesulfonamidoacetic Acid	NEtFOSAA	2991-50-6
N-Methyl Perfluorooctanesulfonamidoacetic Acid	NMeFOSAA	2355-31-9
PER- and POLYFLUOROALKYL ETHER CARBOXYLIC ACIDS		
2,3,3,3-Tetrafluoro-2-[1,1,2,2,3,3,3-Heptafluoropropoxy]-Propanoic Acid	HFPO-DA	13252-13-6
4,8-Dioxa-3h-Perfluorononanoic Acid	ADONA	919005-14-4
CHLORO-PERFLUOROALKYL SULFONIC ACIDS		
11-Chloroeicosafluoro-3-Oxaundecane-1-Sulfonic Acid	11Cl-PF3OUdS	763051-92-9
9-Chlorohexadecafluoro-3-Oxanone-1-Sulfonic Acid	9Cl-PF3ONS	756426-58-1
PERFLUOROETHER SULFONIC ACIDS (PFESAs)		
Perfluoro(2-Ethoxyethane)Sulfonic Acid	PFEESA	113507-82-7
PERFLUOROETHER/POLYETHER CARBOXYLIC ACIDS (PFPCAs)		
Perfluoro-3-Methoxypropanoic Acid	PFMPA	377-73-1
Perfluoro-4-Methoxybutanoic Acid	PFMBA	863090-89-5
Nonafluoro-3,6-Dioxaheptanoic Acid	NFDHA	151772-58-6

Project Number:	0204391	**Report Date:**	01/12/22

GLOSSARY

Acronyms

DL - Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the limit of quantitation (LOQ). The DL includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

EDL - Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).

EMPC - Estimated Maximum Possible Concentration: The concentration that results from the signal present at the retention time of an analyte when the ions meet all of the identification criteria except the ion abundance ratio criteria. An EMPC is a worst-case estimate of the concentration.

EPA - Environmental Protection Agency.

LCS - Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LCSD - Laboratory Control Sample Duplicate: Refer to LCS.

LFB - Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.

LOD - Limit of Detection: This value represents the level to which a target analyte can reliably be detected for a specific analyte in a specific matrix by a specific method. The LOD includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

LOQ - Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

Limit of Quantitation: The value at which an instrument can accurately measure an analyte at a specific concentration. The LOQ includes any adjustments from dilutions, concentrations or moisture content, where applicable. (DoD report formats only.)

MDL - Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

MS - Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. For Method 332.0, the spike recovery is calculated using the native concentration, including estimated values.

MSD - Matrix Spike Sample Duplicate: Refer to MS.

NA - Not Applicable.

NC - Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.

NDPA/DPA - N-Nitrosodiphenylamine/Diphenylamine.

NI - Not Ignitable.

NP - Non-Plastic: Term is utilized for the analysis of Atterberg Limits in soil.

NR - No Results: Term is utilized when 'No Target Compounds Requested' is reported for the analysis of Volatile or Semivolatile Organic TIC only requests.

RL - Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.

RPD - Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.

SRM - Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

STLP - Semi-dynamic Tank Leaching Procedure per EPA Method 1315.

TEF - Toxic Equivalency Factors: The values assigned to each dioxin and furan to evaluate their toxicity relative to 2,3,7,8-TCDD.

TEQ - Toxic Equivalent: The measure of a sample's toxicity derived by multiplying each dioxin and furan by its corresponding TEF and then summing the resulting values.

TIC - Tentatively Identified Compound: A compound that has been identified to be present and is not part of the target compound list (TCL) for the method and/or program. All TICs are qualitatively identified and reported as estimated concentrations.

Report Format: DU Report with 'J' Qualifiers

Project Name:	545 CONEY ISLAND AVE.	**Lab Number:**	L2169533
Project Number:	0204391	**Report Date:**	01/12/22

Footnotes

1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Difference: With respect to Total Oxidizable Precursor (TOP) Assay analysis, the difference is defined as the Post-Treatment value minus the Pre-Treatment value.

Final pH: As it pertains to Sample Receipt & Container Information section of the report, Final pH reflects pH of container determined after adjustment at the laboratory, if applicable. If no adjustment required, value reflects Initial pH.

Frozen Date/Time: With respect to Volatile Organics in soil, Frozen Date/Time reflects the date/time at which associated Reagent Water-preserved vials were initially frozen. Note: If frozen date/time is beyond 48 hours from sample collection, value will be reflected in 'bold'.

Initial pH: As it pertains to Sample Receipt & Container Information section of the report, Initial pH reflects pH of container determined upon receipt, if applicable.

PAH Total: With respect to Alkylated PAH analyses, the 'PAHs, Total' result is defined as the summation of results for all or a subset of the following compounds: Naphthalene, C1-C4 Naphthalenes, 2-Methylnaphthalene, 1-Methylnaphthalene, Biphenyl, Acenaphthylene, Acenaphthene, Fluorene, C1-C3 Fluorenes, Phenanthrene, C1-C4 Phenanthrenes/Anthracenes, Anthracene, Fluoranthene, Pyrene, C1-C4 Fluoranthenes/Pyrenes, Benz(a)anthracene, Chrysene, C1-C4 Chrysenes, Benzo(b)fluoranthene, Benzo(j)+(k)fluoranthene, Benzo(e)pyrene, Benzo(a)pyrene, Perylene, Indeno(1,2,3-cd)pyrene, Dibenz(ah)+(ac)anthracene, Benzo(g,h,i)perylene. If a 'Total' result is requested, the results of its individual components will also be reported.

PFAS Total: With respect to PFAS analyses, the 'PFAS, Total (5)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA and PFOS. In addition, the 'PFAS, Total (6)' result is defined as the summation of results for: PFHpA, PFHxS, PFOA, PFNA, PFDA and PFOS. For MassDEP DW compliance analysis only, the 'PFAS, Total (6)' result is defined as the summation of results at or above the RL. Note: If a 'Total' result is requested, the results of its individual components will also be reported.

The target compound Chlordane (CAS No. 57-74-9) is reported for GC ECD analyses. Per EPA,this compound "refers to a mixture of chlordane isomers, other chlorinated hydrocarbons and numerous other components." (Reference: USEPA Toxicological Review of Chlordane, In Support of Summary Information on the Integrated Risk Information System (IRIS), December 1997.)

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Data Qualifiers

A - Spectra identified as "Aldol Condensates" are byproducts of the extraction/concentration procedures when acetone is introduced in the process.

B - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).

C - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.

D - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.

E - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

F - The ratio of quantifier ion response to qualifier ion response falls outside of the laboratory criteria. Results are considered to be an estimated maximum concentration.

G - The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Report Format: DU Report with 'J' Qualifiers

Project Name:	545 CONEY ISLAND AVE.	**Lab Number:**	L2169533
Project Number:	0204391	**Report Date:**	01/12/22

Data Qualifiers

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

V - The surrogate associated with this target analyte has a recovery outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Z - The batch matrix spike and/or duplicate associated with this target analyte has a recovery/RPD outside the QC acceptance limits. (Applicable to MassDEP DW Compliance samples only.)

Report Format: DU Report with 'J' Qualifiers

Project Name:	545 CONEY ISLAND AVE.	**Lab Number:**	L2169533
Project Number:	0204391	**Report Date:**	01/12/22

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

The following analytes are not included in our Primary NELAP Scope of Accreditation:

Westborough Facility
EPA 624/624.1: m/p-xylene, o-xylene, Naphthalene
EPA 625/625.1: alpha-Terpineol
EPA 8260C/8260D: NPW: 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene, Azobenzene; SCM: Iodomethane (methyl iodide), 1,2,4,5-Tetramethylbenzene; 4-Ethyltoluene.
EPA 8270D/8270E: NPW: Dimethylnaphthalene,1,4-Diphenylhydrazine, alpha-Terpineol; SCM: Dimethylnaphthalene,1,4-Diphenylhydrazine.
SM4500: NPW: Amenable Cyanide; SCM: Total Phosphorus, TKN, NO2, NO3.

Mansfield Facility
SM 2540D: TSS
EPA 8082A: NPW: PCB: 1, 5, 31, 87,101, 110, 141, 151, 153, 180, 183, 187.
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.
Biological Tissue Matrix: EPA 3050B

The following analytes are included in our Massachusetts DEP Scope of Accreditation

Westborough Facility:

SUBMITTAL LETTER

To: UNKNOWN DECEMBER 10, 2021

Re: GPRS FINDINGS REPORT

50 HINCKLEY PL, BROOKKYN, NY

Thank you for the opportunity to serve you on your project. Please refer to the job summary report that is sent separately from this document for additional notes related to our site visit. Included with this submittal email, please find the document list below which includes a link to download your files from our database:

Document List:

COPIES	DATE	DESCRIPTION	LINK
1	12/10/2021	PDF Aerial Overlay - Open with PDF reader	PDF
1	12/10/2021	PDF Aerial Overlay with Icons - Open with PDF reader	PDF
1	12/10/2021	KMZ file - Open with Google Earth	KMZ
1	12/10/2021	SHP files - For use in CAD or GIS software	SHP

As an additional service, we also provide CAD drawings and can even use your existing drawings as background linework for our files. If you have already ordered CAD as a deliverable option, the CAD will be delivered as a separate submittal, typically in the next few days. If you would like CAD as a deliverable and have not yet requested it, please reach out to us to get a quote to have the service added to your job by replying to this email or giving me a call.

As a reminder, we do not provide surveying or engineering services at GPRS. The data provided is at mapping quality for general reference only. The GNSS/GPS locators that we utilize are certified for sub-meter accuracy and locations were attained by our project managers that are not surveying professionals. Some of the documents we provide with our deliverable have embedded location and elevation data that should be used at your own risk due to accuracy limitations listed above. If survey and design level accuracy is needed, you will need to hire a licensed surveyor in that state to pick up field markings to provide you with the desired data separate from GPRS. This letter is subject to our Terms and Conditions which are listed and incorporated by reference here: https://gp-radar.com/terms-conditions.

Please let me know if you have any questions, concerns, or additional requests. I look forward to working with you again soon.

Thank you!
Raymond Williams

PO Num	0200894

Lead Technician LAMANNO, TYLER **Phone** 732-672-9340 **Email** tyler.lamanno@gprsinc.com

Thank you for using GPRS on your project. We appreciate the opportunity to work with you. If you have questions regarding the results of this scanning, please contact the lead GPRS technician on this project.

EQUIPMENT USED

The following equipment was used on this project:

- Underground Scanning GPR antenna. Typically capable of detecting objects up to 8' deep or more in ideal conditions but maximum effective depth can vary widely and depends on site and soil conditions. Depth penetration is most commonly limited by moisture and clay/conductive soils. Depths provided should always be treated as estimates as their accuracy can be affected by multiple factors.
- Electromagnetic Pipe and Cable Locator. Detects electromagnetic fields. Used to actively trace conductive pipes and tracer wires, or passively detect power and radio signals traveling along conductive pipes and utilities. Depths provided should always be treated as estimates as their accuracy can be affected by multiple factors.

Work Performed

Ground Penetrating Radar Systems performed the following work on this project:

Underground Utility

The scope of work included scanning the specified area to locate underground utilities. A tracer signal was sent along any accessible metallic utility or tracer wire, and the area was scanned with GPR to locate any additional targets. The locations of any detected utilities and anomalies were marked directly at the site with paint, flags, stakes, or other appropriate means, and results were reviewed with onsite personnel unless otherwise noted.

- The total area scanned was approximately 35000 square feet.
- 35,000 sf open-air vacant lot (former parking lot)
- The effective depth of GPR will vary throughout a site depending on surface and soil conditions. In this area, the maximum effective GPR depth was approximately 3 feet.

Job Summary

Job Date : 12/3/2021

- GPR and EM wand use to locate potentially utilities on site.

  GPR struggled to see anything past 3 feet. Terrain is different in some areas.

  GPR Data revealed debris in the ground in a few different location. It's not consistent enough for me to believe that it's pipe of any sort. Since I was unable to determine what it could be it is marked in pink.

  EM wand who is used to passively scan the area in search of any electrical lines underground. I was unable to pick up any potential lines within the scope.

  I recommend staying at least 3 feet away from all marks on site. I also recommend handshaking the first 2 feet if possible.

  Detailed info to follow in the formal report.

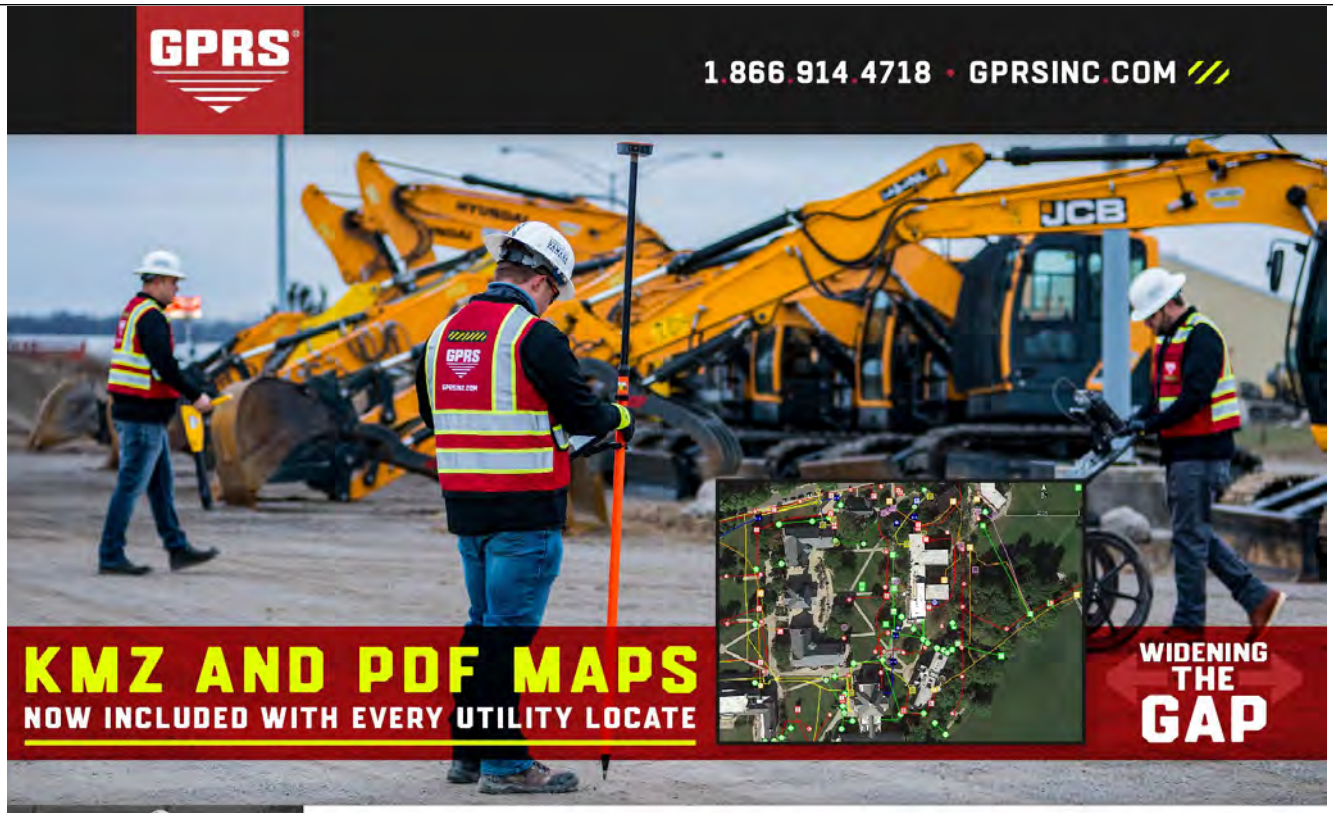
Job Summary

Job Date : 12/3/2021



UTILITY LOCATING

To ensure the overall timely success of your project, utility detection is critical to any construction project where subsurface excavation is planned. If this critical first step is ignored, the risk for injury increases, budget overruns can multiply and your schedule can be delayed.

VIDEO PIPE INSPECTION

Video Pipe Inspection (CCTV) is a service used to inspect underground water, sewer and lateral pipelines. VPI is a great tool for investigating cross-bores, structural faults and damages, and lateral line inspection.

CONCRETE IMAGING

With new build construction and renovation projects, the likelihood of needing to cut or core concrete is high. There is an inherent risk of striking rebar, conduits, and post tension cables during the cutting or coring process. Our industry-leading concrete scanning services can mitigate the risks associated with saw cutting and core drilling concrete slabs.

MAPPING & MODELING

As-built utility maps, structural as-built drawings, and facility maps are actually meant to be “as-intended” drawings as the construction process or renovations can cause deviations to the original plan. GPRS can create a comprehensive facility map that contains precise as-built conditions – giving you peace of mind by knowing exactly what exists on your property.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Haley & Aldrich on Apr 04, 2024.

TARGET PROPERTY

545 Coney Island Avenue & 50 Hinckley Place
Brooklyn, NY 11218

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

Site Name:

545 Coney Island Avenue & 50
545 Coney Island Avenue & 50
Brooklyn, NY 11218
EDR Inquiry # 7614937.3

Client Name:

Haley & Aldrich
600 South Meyer Ave Suite 100
Tucson, AZ 85701-0000
Contact: Rachel Freeman

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Haley & Aldrich were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Borough Superintendent

CERTIFICATE WILL BE NULL AND VOID IF ALTERED IN ANY MANNER OR ADDITIONS ARE MADE THERETO.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

545 CONEY ISLAND AVENUE & 50 HINCKLEY PLACE
BROOKLYN, NY 11218

COORDINATES

Latitude (North):	40.6443400 - 40° 38' 39.62''
Longitude (West):	73.9699940 - 73° 58' 11.97''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	587092.1
UTM Y (Meters):	4499575.5
Elevation:	45 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/29/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SILVER ROD DRUG CO Site ID: 0201585 EPA Id: NYD063855076	114 BEVERLY ROAD	WSW 1/4 - 1/2 (0.466 mi.)	AM261	808

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 11/06/2023 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 01/24/2024 has revealed that there are 54 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 26 NY UST sites within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following:

EXECUTIVE SUMMARY

Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 01/24/2024 has revealed that there are 18 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 43 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the NY VAPOR REOPENED list, as provided by EDR, and dated 01/01/2022 has revealed that there is 1 NY VAPOR REOPENED site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 10 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 29 UST FINDER sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was K FOLEY / / : WILL EXCAVATE, ISOLATE AND RETEST THIS MAYBE 548 CONEY ISLAND AVE. NEED TO VERIFY. REPORTED AS 453 CONEY ISLAND AVE. 9/16/03 Two more quarters and will submit closure if levels stay low. 12/1/03 Reassigned from Sangesland to Foley. Reference spill #9308834. Added waste oil to material spilled due to address spill #9308834. 1/26/04 Received update report from Northeast Environmental Solutions(NES, 1/23/04). DTW is 37-38'bgs. Groundwater results do not contain BTEX/MTBE above GWQS. Additional sampling will be performed in March

SHELL OIL (Continued) **S100781957**

2004. If March 2004 samples indicate consistent low conc of dissolved MTBE, site closure will be proposed. 7/12/04 Received update report (NES, 5/4/04) on 5/10/04. Groundwater monitoring of on-site wells has not shown any BTEX/MTBE over last four quarters.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was K FOLEY 10/10/95: This is additional information about material spilled from the translation of the old spill file: TTF. 1/28/04 Reference spill #9308834. To be investigated and remediated under spill #8707829. Added waste oil to material spilled under spill #8707829. UST closure report prepared by Envirotrac(2/28/95)showed minor exceedances for SVOCs within the waste oil tank field.
Remarks:	NO OTHER AGENCIES - POSSIBLE VENT PROBLEM - WILL ISOLATE AND RETEST.

DEC Memo: SEEPAGE IN SEEMS IN WASTE OIL TANK: ON CONCRETE ONLY AND WILL BE VACCED OUT AND HAVE STOPPED
PUTTING OIL IN

SHELL OIL (Continued) **S100781957**

Remarks: 7/13/07 - Raphael Ketani. A 275 gal. waste oil tank was discovered to be leaking at the seams today. I spoke to the station manager, Cuneynt Erdal (718) 435-0099. Mr. Erdal said that the station is owned by Shell. The bottom seam corroded. He believes it's from people urinating on the tank as the tank stinks badly and he knows people go there in the middle of the night. He has stopped putting oil in the tank and has spread absorbent around the tank. He said it's not a quick leak and is manageable. He said some seepage was noticed several days ago, but he called in the spill only today as Shell told him to do so. He said that the station was inspected by Veronica Zhune of DEC Region 2 Spills on March 2007 and everything was fine. I asked him about the concrete pavement the tank is sitting on. He said it is in good shape with no cracks or damage. He said he called 1-866-HIGH-SHELL, Evan at the Engineering Department of Shell. He said that Island Tank will replace the tank. Mr. Erdal added that J.B. Waste Oil will come on monday and drain the tank. 7/16/07 - Raphael Ketani. I called Mr. Erdal today. He said that the tank was completely drained and he isn't letting anyone put anything in it. I asked him whether the seepage became worse. He said it remained a slow seepage. Based up my conversations with Mr. Erdal, I am closing the spill case.

DEC Memo:	Not reported
Remarks:	10/21/04 Update from Matt Schneck, NES: NES was on-site to oversee the removal of an underground hydraulic lift. Upon removal, impacted soils were observed. It appeared the soil was impacted by hydraulic fluid from the lift. We expanded the hole in the floor of the building so that we could excavate as much soil as possible, but we were limited by the presence of the building, overhead restrictions, etc. We excavated as much as we could (approximately 10 yards of soil) and collected endpoints. We are waiting for the laboratory results for the endpoint samples we collected. After we receive the results, I will send a letter summarizing activities and provide recommendations. 11/23/04 Closure request submitted by NES during meeting with Rob Rule, Shell. Shell contracted Island Pump and Tank to excavate and remove one hydraulic lift cylinder. Excavation and removal was conducted 10/11-10/12-04. The lift was in poor condition, multiple areas were corroded and multiple perforations visible. Soils beneath the hydraulic lift were excavated (4'wideX6'longX10'deep) and screened by PID. The PID did not identify the presence of VOCs. Soils at 10' did not appear stained and did not exhibit a petroleum odor. An endpoint was collected at 10'bgs from beneath the lift. Analysis was done by 8270, 418.1 and 8015B. Post-ex sampling indicated concentrations of all targeted SVOCs below detection limits. Diesel Range Organics were detected at 209mg/kg. TPH was detected at 374mg/kg.

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110059779388

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Tank Info:

SHELL STATION #138602 (Continued) **U003074400**

Tank Number: 011
Tank Id: 48332
Material Code: 0022
Common Name of Substance: Waste Oil/Used Oil

Equipment Records:

E00 - Piping Secondary Containment - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
G09 - Tank Secondary Containment - Modified Double-Walled (Aboveground)
I03 - Overfill - Automatic Shut-Off
K00 - Spill Prevention - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
H02 - Tank Leak Detection - Interstitial - Manual Monitoring
D00 - Pipe Type - No Piping
L00 - Piping Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)
J00 - Dispenser - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 07/01/1994
Capacity Gallons: 250
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: MJGRIFFI
Last Modified: 05/09/2022

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Address:	524 CONEY ISLAND AVE
Spiller Company:	999
Contact Name:	CHARLES GUDER
DEC Memo:	During excavation contaminated soil was discovered. Clean up is in progress.
Remarks:	3/23/15-Vought-Duty desk officer. Searched PBS and no listing for site. Searched spills database and noted that closed spill #9012044 (for gasoline odors at closed gas station) at same site was for Getty station and also closed spill #8606820 (for a tank tightness failure). Vought called TRC Guder (Ph:212-221-7822 email:CGuder@TRCSOLUTIONS.com) and site will be developed as school and they found two USTs during excavation and they were closed with no impacts. They also found another UST (hydraulic or waste oil) and they noted contaminated soil and excavated approximately 20 yards of soil and collected five endpoint soil samples. Depth of sampling was 7-8'bg and site will be excavated to a depth of 10'. They are installing a vapor barrier and an active SSDS. Groundwater at expected depth of 45'bg that was measured during Phase II.Site is not E-designated. Letter should be addressed to: Mr. Robert Kanaparthi New York School Construction Authority 30-30 Thomson Avenue Long Island City, NY 11101-3045 Ph:(718)472-8502 email: SKANAPARTHI@nycsca.org 3/25/15-Vought-Drafted letter dated 3/24/15

FUTURE PUBLIC SCHOOL (Continued) **S117851412**

that required: complete delineation of contaminatin and collection of endpoint samples; submission of a site assessment including collection of a groundwater sample from the former tankfield, submission of vapor and moisture mitigation techniques to be used in site development and submission of a PBS application (if applicable). Letter signed by DEC Mahat after discussion of site and letter added to D2 by Vought. Sent email to TRC Guder and SCA Kanaparthi with cc to Mahat and email that noted Charlie, As we spoke about yesterday, attached below is the Department s requirement letter an original of which is in the mail to Bob Kanaparthi (copied above). Please send all reports and inquires to the spill Project Manager, Santosh Mahat, who is also copied above. You can also reach Santosh at 718-482-4038.Thanks. 6/2/15: Mahat DEC Mahat contacted Mr. Guder about the spill progress. He mentioned that the site was over excavated and end point samples are all clean. He verbally mentioned that samples were clean and he is working on a spill closure report. DEC is waiting for a spill closure report. 10/1/15: Mahat DEC Mahat talked to Kevin at TRC and he will provide a closure report on the spill case. 10/6/15: Mahat DEC Mahat received an email update from Kevin A. MaGuinness, PG : Email : Good morning Santosh. The Spill Report will be submitted to Mike Wagner at SCA by Friday of this week. Kevin Kevin A. McGuinness, PG Principal Environmental Scientist?Department Leader 1430 Broadway, 10th Floor, New York, NY 10018 T: 212.221.7822 Ext. 103 - F: 212.221.8396 - C: 914.318.2145 LinkedIn - Twitter - Blog - www.trcsolutions.com DEC is waiting for a closure report on the spill case. 8/31/16: Mahat e/c : DEC Mahat sent an email to Kevin asking for the report and the Email address for Mike Wagner. 9/12/2016 - V. Brevdo Spill Case is transferred from Spill Prevention and Response to Remediation Section B due to project manager Santosh Mahat departure to the other DEC Program, as per 9/9/16 discussion between Randall Austin and Vadim Brevdo. VB 9/12/16 - Raphael Ketani. Due to a caseload realignment, the spill case was assigned to me today. 9/19/16 - Raphael Ketani. I sent an email to Robert Kanaparthi, NYCSCA, 30-30 Thomson Avenue, LIC, 11101-3045, (718) 472-8502, SKANAPARTHI@nycsca.org. In the email, I asked for the remediation report for the site. 9/23/16 - Raphael Ketani. Kevin Boger, PE of TRC (1430 Broadway, 10th Floor, NY, 10018, (212) 221-7822 x116/cell (631) 617-0087/KBoger@trcsolutions.com) sent me the TRC Spill Closure Report dated 10/6/15. I reviewed the Spill Closure Report. The school is presently under construction and will designated Public School 338K. The site used to contain two 2 story buildings, a one story car repair shop and storage garage, a used car lot, vacant lots and two vacant residential buildings. A Langan Engineering Phase II dated 4/30/10 indicated the possibility of 5 USTs in the southeast corner of the site. However, a geophysical survey didn't find any anomalies. On 3/19/15, investigative excavating was taking place in the southeast corner of the site when a UST was struck, badly damaged and leaked oil. The UST measured 3 feet in diameter and 5 feet long. On 3/20/15, the tank was cleaned and removed. Also on this date, 4 soil sidewall samples and 1 bottom sample were taken after the pit which had contained the tank was over excavated. A total of 20 tons of contaminated soil was sent to Clean Earth of Carteret, NJ. The soil analytical results for VOCs and SVOCs were entirely non-detect, except for the sample from the east sidewall. This sample had many analyte hits, but they were all below the CP-51 unrestricted residential standards. As a result of my review of the Spill Closure Report, I determined that any residual

FUTURE PUBLIC SCHOOL (Continued) **S117851412**

contamination would not be a threat to the public or the environment. Therefore, I closed the spill case effective 9/23/16. A spill closure letter was sent to Mr. Kanaparthi.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Tank Info:

Tank Number:	001
Tank Id:	31677
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

L09 - Piping Leak Detection - Exempt Suction Piping
G03 - Tank Secondary Containment - Vault (w/o access)
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
B00 - Tank External Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None
H99 - Tank Leak Detection - Other
I04 - Overfill - Product Level Gauge (A/G)
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Spiller Address:	Not reported
Spiller Company:	001
Contact Name:	Not reported
DEC Memo:	Caller reports unknown amount of unknown oil / gasoline spilled at the intersection. Unknown further info. No cleanup company has been contacted as of yet. (Coney Island Ave)
Remarks:	10/06/05-Vought-Called Steven Varber (212-251-9475) and another resident from the neighborhood and site has had reoccuring problems with houskeeping issues. Current issue is waste oil pan left in place overnight under truck that is filled with oil from oil change. Sand was placed around pan. Vought referred case to ECO's to perform site visit and issue possible citations for illegal discharge. Vought also needs site address so PBS and Spills database check can be performed. 10/13/05-Vought-Received call from ECO Fetterman and returned call. Vought spoke to Fetterman and he will be performing a site visit this weekend and will contact DEC Vought if soil contamination in found. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Piper as per DEC Austin. 7/7/06- DEC Piper performed site visit due to unknown status of site. Additionally site was a former gas station. There was evidence of staining on street and parking lot, however no pools of oil/ product were observed. Use is currently a hardware/variety store with a paved lot. Piper contacted previous owner and as per conversation, all tanks were removed accordingly. PBS Dept. had sufficient info to close tanks in database, no visible issues at site, no associated spills at hte site, this spill is closed.

Contact Name:	MEGAN PHILLIPS
DEC Memo:	Neighbor's tank is now leaning on Megan's house and poured oil on ground and under house. Tank still has product.
Remarks:	pumped out 11/09/2012 by Miller. 100 gallons removed. pumped out 11/10/2012 by ECM. 50 gallons removed. pumped out 11/11/2012 by . 10 gallons removed. DECPiper visited site. Tank from neighboring property at 210 E 8th Rd. tipped over and spilled into crawlspce. Odors present inside home. PID reading with windows open all day was 2.0 ppm, however soils under residence in crawlspace where tank tipped was 117 ppm. Residents are staying with family members nearby. Edward and Megan Phillips - 718- 309-3841 and 40 respecively. They have hired Env lawyer to contact neighbors insurer to have remediation done. Lawyer will contact DEC Piper in coming days. 1-8-13- CSL sent. In edocs. 7/21/22- DEC Piper visited site. House has been lifted and put on concrete piles. I spoke with mrs. Phillips who said she does not smell any odors any more and that her husband will call with any questions. Based on info, no further action is required. This spill is closed.

DEC Memo:	Came off the 24hr. clock at 17:25. 55 gal of material recorded as 4 ppm PCB onto a concrete floor. Transformer has been removed from manhole. Need to order another tanker before clean up can be completed. CONED# 154759
Remarks:	e2mis no 154759 Hickey reports while on location to do a removal and replacement of the unit found transformer oil leaking from fin.

MANHOLE #478 (Continued) **S106698093**

Approximately 1 gallon of oil has leaked onto dirt on concrete floor of structure. Historical records indicate 4ppm dated 2002. This is a jumbo unit and the mfr tag reads unit holds 427 gallons transformer oil. Sample to be taken. Update - 8/6/04 - 1725hrs B Brown Env Ops OS reports >50 tanker removed 370 gallons of oil from unit. Mfr tag reads unit holds 425 gallons. States spill is now 55 gallons which leaked from fin into structure. Clean up is still proceeding as 50-499. Unit was removed from structure. 8/06/2004 21:00 HRS. -- PCB RESULTS 7 PPM, AROCLOR 1260, LAB SEQ # 04-06246-001 RECEIVED PCB RESULTS FOR SOIL GRAB : <1.0 PPM, LAB SEQ # 04-06252-001. UPDATE 8-7-04 02:10HRS A. ADLER REPORTS, FIVE BARRELLS PICKED UP BY ASTORIA, HOLE WAS COMPLETED BY CLEAN HARBORS. STRUCTURE WAS DOUBLE WASHED AND NO SUMPS FOUND, NEW UNIT WAS INSTALLED AND JOB IS 100% COMPLETED.

DEC Memo:	2/24/11-Vought-Primary off-hours responder. Called Advanced Tank Services (Jeff McKenzie Ph:800 440 8265 Fax:888-303-5323) for more information including whether wet or dry leak and confirm size of tank as 1000-gallons as per spill report (no PBS registration on file). Vought left message with answering service (Diane) to have Jeff return call to DEC with more information. Owner as per Property Tax Records is: Mr. Jacob Goodman 1203 Beverly Road Brooklyn, NY Vought received message from John (Operations Manager at ATS) that leak was below product line and that the cause of the failure was either a hole in the tank or a supply/return line issue. Vought called John and tank is UST he performed one soil sample to groundwater. No evidence of soil contamination or groundwater contamination. Depth of boring is about ten feet. ATS recommending isolate and retest. Tightness test is being performed as part of potential property purchase. 2/28/11-Vought-Called ATS McKenzie for confirmation of owner address. Vought drafted CSL and sent out to Goodman at above address with cc via fax to ATS McKenzie. 3/1/11-Vought-Received call from family friend Sigal Sharabi (Cell:646-644-2300) who noted that Jacob Goodman passed away years ago and that wife if elderly and sensitive to stress. Vought noted requirement of immediately emptying the tank and either soil investigation of tank and line removal. Vought provided her contact number for ATS McKenzie and faxed her spill contractor contact list. She will discuss issue with childrem of Goodmans and have them or she will return call to DEC. 3/2/11-Vought-Received call from Dennis Ross(Luzon Ph:845-434-7805) and he was called Sigal. He spoke with Gary Harris who noted that product was above product leak . He will provide estimate. Vought noted that either email or fax must be immediately submitted clarifying whether leak is above or below product level (as per 2/24) email. 3/3/11-Vought-Called and left message for ATS John to return call with status of tank empyting due to failure or conirfmation that leak was dry leak. Vought received callback from John who insisted that leak was below the product line. Vought called Dennis Ross and he noted that he had not received authorization to remove product from tank from Sigal and that he had placed a call to ATS Gary as well. Vought called Sigal and noted increased fustration and that tank must be emptied by COB today and to return call as soon as tank was emptied. Sigal returned call and notified Vought that she was going to notify attorney for Property owners and call Vought back with contact information. Vought received callback from Siegal who noted that she had spoken with owner attorney and owners sister is issuing money order to have ABC Tank remove product from UST. Seigal will update or have ABC Tank (Pete) update DEC when tank has been emptied. DEC requires: 1)TTF letter

TANK TEST FAILURE (Continued) **S110769600**

2)possible PBS registration 4/7/11-Vought-Called Sigal for update and temp tank was set up and UST was emptied by ABC Tank (Chris cell:347-397-8298 office:718-927-0351 Fax:718-272-3147). Vought called ABC and left message for Chris to return call so that report can be submitted. Vought also faxed ABC (Chris) copy of TTF letter dated 2/28/11. 5/3/11-Vought-Received faxed report on 4/8 from ABC Tank (Donna) that included cover letter and tightness test report. As per report on 3/8 ABC dug up to expose the top of the tank and isolated tank from lines and tested each separately. Tank passed tightness test while vent line failed. ABC tank completed replacement of the vent line and retested the system and system tested tight as per EZ3 Locator test. As per report There was no evidence of contamination observed at the site during the digging of the tank and the replacement of the vent line . Spill closure requested. Spill closed by Vought and Spill Closure Letter sent to above address with cc to ABC Tank. Vought called Donna and informed her of faxed spill closure letter.

DEC Memo:	tank overflowing and employee was hosing spill down with hose, and pushing overflow into drain below Not reported
Remarks:	7/27/2018 - Feng - Duty Desk. Randy is out. Talked to Andre Obligado and will give this to the ECO for site inspection. As per A. Obligado, the violation is involved with drain and DEP shall be notified. Notified to NYCDEP Janet (212-689-1520). Case No. 186616716. She will give it to the Industrial Waste team. Briefed ECO reception. They will send someone out for inspection. 7/27/2018 - Feng - received a call from ECO Connor Dodge. They inspected the site and found no violations. A little sheen was observed in the drain though. There is a waste oil tank in the basement, but did not observe any oil spill present. I told him that NYCDEP was notified about the drain and DEP might inspect the drain. No actual spill. The drain issue has been notified to the DEP. Spill is closed.

HOLLYWOOD CAR WASH (Continued) **S121099088**

through the DEC website
"Report an Environmental Violation Online" or sent directly by the complainant to an OPP dispatch mailbox: Who Did It: Hollywood car wash 482 coney island ave Brooklyn ny What Occurred: I was in getting a oil change on my car when i looked down into the basement there was a oil tank overflowing onto the ground and going into a drain on the floor When Did It Occur: It was Wednesday May 24 2017 County: Unknown Municipality: Brooklyn Location Or Address: Hollywood car wash 482 coney island ave Brooklyn ny How Did It Occur: Complainants Name: Complainants Phone: Complainants Email: Date of Submittal: 05/24/2017

Remarks: 05/24/17-Hiralkumar Patel. 9:20 PM:- spoke with car wash operator who confirmed no discharge of any oil from the storage tank. 05/26/17-Hiralkumar Patel. 8:30 AM:- visited site. met Drew Hershowitz, car wash owner. inspected basement under a repair shop. basement has multiple square tanks for motor oil and used oil. noted signs of oil spill on basement floor as a results of overfill of one of the waste oil tank. noted oil on waste oil tank and on floor near the tank. also noted thin layer of oil on basement floor in area between the tank and basement sump. a power wash machine was found in the basement by the leaking tank and it looked like the basement floor was recently powerwashed. inspected basement sump and found no oil in it. asked Mr. Hershowitz to immediately stop using the possibly leaking tank, immediately pump out liquid from the tank and test all the tank systems. also asked him to cleanup and properly dispose off remaining contaminated materials. Drew Hershowitz Ph. (347) 783-8118 email: hollywoodcarwash@gmail.com 05/30/17-Hiralkumar Patel. reviewed NYC ACRIS, NYC DOB and NYC Property Tax records and noted that the oil change business is located on lots #: 15 and 16 on block #: 5341. these two lots owned by different entity. address for block #: 5341 / lot #: 15 - 482 Coney Island Ave address for block #: 5341 / lot #: 16 - 484 Coney Island Ave no records of any PBS or spills found for both properties: 482 & 484 10:59 AM:- left message for Drew. 12:40 PM:- spoke with Mr. Russell, owner’s representative for both lots. informed him about oil spill, leaking tank and unregistered tank systems at the site. Church & Coney Corp. **owner of lot #: 15** 325 North Macquesten Parkway Corp. **owner of lot #: 16** c/o Arthur Russell, ESQ. 661 Franklin Avenue Nutley, NJ 07110 Ph. (973) 661-4545 email: arthur@attorneyrussell.com 1:32 PM:- sent letter, including PBS application and instructions, to Mr. Russell requiring spill cleanup, tank tightness test and PBS registration. asked him to immediately submit PBS registration application, and spill cleanup report by the end of 07/14/17. letter emailed to Mr. Russell and Drew. 06/08/17-Hiralkumar Patel. 12:31 PM:- received call from Rene Lewis from Alliance Mechanical. he is on-site for tank system test. he will submit report. 06/29/17-Hiralkumar Patel. 1:59 PM:- received email from Moran Hershowitz from Hollywood Car Wash including tightness test result for three (3) 750 gal waste oil tanks and copy of PBS application for three waste oil tanks. the test result indicates presence of underground tanks, but waste oil tanks are located aboveground. the PBS application includes three waste oil tanks, but does not include any information about motor/lube oil tanks. also no information submitted about cause of release, summary of cleanup activities and disposal manifests. 2:34 PM:- sent email to

HOLLYWOOD CAR WASH (Continued) **S121099088**

Mr. Hershowitz and asked him to submit a detailed report including scaled site map with location of all existing tank systems, cause of petroleum release, summary of cleanup activities, contaminated material disposal manifest (if applicable) and tank system tightness test result. also asked him to submit revised tank system test results as the one submitted indicates underground tanks and a revised PBS application as it does not include any information about motor/lube oil tanks. email copied to Mr. Russell and Rene. 07/17/17-Hiralkumar Patel. received email from Rene (at 6:54 PM on 07/14/17) including same incomplete report. - page # 1 of the report is incomplete - waste oil removal manifests are missing - tank tightness test reports are confusing: inside the parenthesis it indicates underground storage tank and piping passed, but outside the parenthesis, report states opposite - report is missing scaled site map including all tank systems - report is missing information about cause of petroleum release noted during site inspection and action taken to clean it - report is missing disposal manifest for any contaminated soil/sand/water removed during spill cleanup - PBS application does not include any information about motor/lube oil tanks at the site 10:54 AM:- sent email to Mr. Russell and asked him to submit a revised report. email copied to Rene and Mr. Hershowitz. 12:40 PM:- received email from Mr. Hershowitz including letter from Lorco Petroleum Services. Gene Blumetti from Lorco mentioned that they remove used oil from the site. 07/24/17-Hiralkumar Patel. 1:11 PM:- received call from Rene. explained him about incorrect/incomplete info in previously submitted report. Rene will send revised report soon. 07/25/17-Hiralkumar Patel. 7:30 AM:- received email from Rene including revised tank system test results. 09/26/17-Hiralkumar Patel. 3:42 PM:- received email from Eric Santos including a letter from Gasoline & Automotive Service Dealers Ass'n, Ltd (GASDA). Wayne Bombardiere of GASDA mentioned that Mr. Santos will be resolving issues raised in PBS application and TJO Tank Testing and Environmental will be handling all other issues. Eric Santos email: ericgasda@optimum.net Ph. (516) 371-6201 Ext. 102 (347) 424-7807 (C) Wayne Bombardiere Deputy Executive Direction Gasoline & Automotive Service Dealers Ass'n, Ltd. Ph. (516) 371-6201 Fax (516) 371-1579 09/27/17-Hiralkumar Patel. 1:23 PM:- sent email to Mr. Santos and asked him to submit work schedule. 1:58 PM:- spoke with Mr. Bombardiere. he mentioned that work is in progress at this time and he will ask Eric to call back. 09/28/17-Hiralkumar Patel. 1:48 PM:- received email from Eric including copy of PBS application. Eric mentioned that PBS application will be sent to Albany for processing. PBS application includes total of eight tanks: - two (2) 750 gal waste oil ASTs, in-service, installed in Dec. 2006 - one (1) 750 gal motor oil AST, in-service, installed in Dec. 2006 - three (3) 1,000 gal motor oil ASTs, in-service, installed in Dec. 2006 - one (1) 500 gal motor oil AST, in-service, installed in Dec. 2006 - one (1) 500 gal transmission fluid AST, in-service, installed in Dec. 2006 10/10/17-Hiralkumar Patel. received email from Mr. Hershowitz (at 3:17 PM on 10/09/17) including a letter. Mr. Hershowitz mentioned that spill was caused by the overfilling of spill bucket. he also mentioned that minor spills in future will be cleaned up using speedie dry and waste will be picked up by Lorco Petroleum Services. 10/11/17-Hiralkumar Patel. case closed based on review of all available information. 3:00 PM:- sent spill closure letter to Mr. Russell. letter emailed to Mr. Russell, Mr. Hershowitz and Mr. Santos.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

B99 - Tank External Protection - Other
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
C01 - Pipe Location - Aboveground

Tank Location:	Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1987
Capacity Gallons:	2500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	MJGRIFFI
Last Modified:	05/09/2022
Material Name:	#2 fuel oil (on-site consumption)

DEC Memo: UPON RENOVATION OF ABOVE SITE SOIL CONTAMINATION WAS DISCOVERED. SAMPLES WERE TAKEN WHICH SHOWED

MOBIL OIL-#17-FCB (Continued) **1000553842**

ELEVATION OF HYDROCARBONS. INVESTIGATION IS CONTINUING AND PLANS MADE FOR REMEDIATION ARE IN
PROGRESS.

Remarks: Received groundwater monitoring report (Jan.-Mar.'05) on May 10, 2005. This spill case was reassigned from Park to Grathwol in April 2005. This spill case was reassigned from DEC (Sigona) to Rommel on 02/10/2004. 12/07/04 Site managed in Central Office by Chun Park. Rommel This spill site cleanup has been consolidated under Spill No. 0013022. The DEC has determined that the revised proposal for two (2) off-site soil borings to be completed as monitoring wells by Groundwater & Environmental Service, Inc (GES), dated July 17, 2003 is acceptable. This revised proposal for two soil borings/monitoring wells addressed DEC's verbal comments on the proposed Site Investigation Work Plan (SIWP), dated December 17, 2002. The DEC provided verbal comments to GES at the site, during a PBS inspection on July 10, 2003. Based on the DEC's review of the revised site diagram for the SIWP, the DEC has determined that these proposed boring locations will be satisfactory, and should provide additional data necessary to properly define the vertical and horizontal extent of off-site contamination. ExxonMobil must submit the results of the borings and well installations proposed by Groundwater & Environmental Service, Inc (GES), in a Subsurface Investigation Report prepared in accordance with Section No. 3, paragraph 3.14 of the Division of Environmental Remediation's Draft DER-10 Technical Guidance for Site Investigation and Remediation, dated December 2002. This Subsurface Investigation Report must be submitted to the DEC for review and approval by October 20, 2003. greater than greater than greater than Jennifer Rommel 08/23/04 11:13AM greater than greater than greater than Please delineate both on and off site. Thank you. greater than greater than greater than Tammy Michels 08/19/04 0:PM greater than greater than greater than Ms. Rommel, Attached is an electronic copy of the subject report. At the time the report was mailed to you we were having computer problems and I was not able to send an electronic copy. I apologize for any inconvenience. Tammy L. Michels Project Manager Assistant Geologic Services Corporation 20 Peachtree Court, Suite 0 Holbrook, New York 11741 Toll Free: 877 218 6956 Tel: 631 285 6684 Fax: 631 285 6692 tmichels@ny.gsc-global.com www.gsc-global.com See also 0401502. Rommel 10/15/09 - Haggerty: assumed Spill management April 2010 - The Soil Vapor Extraction/Air Sparging treatment system is operating without problems. Sent EM an email requiring further delineation to the southeast. 2 additional delineation wells installed in April. LPH deteceted in off-site well. EM collect sample for fingerprinting analysis. June 2010 - System was shut down briefly to retro-fit noise suppression. System again operational. LPH detected in off-site well classified as weathered gasoline. Delineation of off-site LPH may be necessary. August 2010 - QMR due by end of the month. EM will be running the SVE/AS system one month on, one month of to try to increase recovery. January 2011 - site divested to BOLLA EM REALTY March 2011- spoke with new owner's consultant, Arcadis (Peter Morris). Plan is to continue alternating SVE/AS system one month on, one month off to maximize recovery April 2011: sent email to consultant to prepare a work plan to delineate off-site product and develop a better off-site product recovery method. May 2011 - approved work plan for additional delineation of off-site LPH (greater than 100ft away from the property) and perform HIT events to collect gw/ vapor from the MW with off-site LPH August 2011 - additional delineation points installed but haven't received

MOBIL OIL-#17-FCB (Continued) **1000553842**

the report yet November 2011 -product no longer present in off-site well MW-20 but they are still going to utilize the VTE events quarterly on that well December 2011- SSUR under review. They propose injecting sulfate to the off-site contamination based on the anoxic conditions and sulfate demand in the gw January 2012 - approved sulfate injections. PM had conference call with Arcadis' Technical Innovation Group April 2012 - injections completed for off-site on Slocum December 2012 - SVE/AS system is running one month on, one off but has achieved ~90% reduction on-site. System permanently shutdown. A second round of sulfate injections was completed in September for off-site contamination. At this point, more contamination exists in off-site groundwater October 2013 - approved injection report. Little impact on dissolved concentrations which suggests the solution didn't reach there target intervals or the sulfate requires additional time, we will wait for 4 quarters to evaluate the injection results. December 2014 - sulfate injections from 2012 had little impacts. On-site remediated by the SVE/AS system. The Spill would be closed if not for the off-site dissolved impacts on Slocum. December 2015 - The recalcitrant dissolved impacts remaining on Slocum years after the on-site source was remediated appear related to NAPL trapped in pore space off-site acting as a residual source. The off-site properties between the station property and the dissolved impacts observed on Slocum are privately owned and treating it isn't feasible. The RP' consultant performed an exposure assessment demonstrating the plume demonstrates an overall decreasing trend and with the on-site source material remediated and no down-gradient receptors, they propose NFA. March 18, 2016 - Spill Closed

DEC Memo:	THIS WAS A LINE TEST FAILURE: UNDER DISPENSER 1-2 BETWEEN THE FLEX HOSE AND SHEER VALVE: P GRAVEL WAS IMPACTED BUT WITHIN DISPESNER PAN:
Remarks:	1/5/07 called Patrick Mozi of Crompco 1-800-646-3161. Crompco was dispatched due to a failure determined by V/R. Crompco determined the failure to be under dispenser between the flex hose and the shear valve. Very little petroleum observed in the pea gravel of the dispenser pan. Crompco conracted Island Pump and Tank to make repairs and they were made. Repairs were made and Crompco retested the lines and they passed. Leak detectors were also tested and they were functioning normally. NFA. bf

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	03/25/11- Zhune spoke to Vitoria Stoodard 631-321-4670 from Protest Environmental She said the tank failed the test with gross dry leak. There was no product spilled. It was only a tank test (bank refinance). Tank is 1500 gallons UST. PBS# 2-609197 11/8/2011 Sangesland spoke to woman in property manager's office 718-972-9188 e-mail sent to property manager: ylschwartz@optonline.net: ********** RE: Tank Test Failure at 717 Ave C, Brooklyn - March 25, 2011 1,500 gal - #2 Oil Tank Mr. Schwartz, The NYSDEC has an open spill violation case for this property dated 3/25/2011. - Spill#1012855 If the tank has been repaired and retested, please forward a statement with the following data: 1) Tank Test Passing Report 2) Statement of what work was done to the tank to make it now pass. 3) Statement that NO CONTAMINATION OR SPILL WAS FOUND DURING REPAIRS. When we get a report with these items, this case will be closed out. Thanks, Steve Sangesland P.E. Environmental Engineer NYSDEC Region 2 - Spills Unit ********** 3/20/2012 Document submitted by property owner (see eDocs) says the gasket on the tank top was replaced and the tank was retested and passed.
Remarks:	dry leak - repair/retest pending

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 02/10/2004. This spill site also represents Spill Nos. 9414370, 9413602 and 9615013. 2/5/04 Current PBS owner Cumberland Farms. Bureau B, unassigned, due to low priority. Transferred from R-2 on April 27, 2005. Formerly R-2, unassigned. 12/7/05 JAA: Transferred file back to R2, Jon Kolleeny, as it a Cumberland Farm site. Note: Sadique Ahmed did a quick file review on 10/6/05- found PBS # 2-346497. 04/03/06: Transferred spill case from Sadique Ahmed to J. Kolleeny. - JK 04/12/06: Based on available information, this spill does not appear likely to pose a significant threat to the environment or public. In consultation with my supervisor Koon Tang, it was decided to close the spill case. - J. Kolleeny
Remarks:	ELEVATED P.I.D. READINGS found in soils during site investigation.

DEC Memo:	proposal is out for repairs and retest. PTC will notify dept if they are not contracted . TTF letter on hold. 05/12/14-Hiralkumar Patel. alternate address: none. other spill # 0811357 was reported on 01/14/09 as 10 gal #2 oil spilled onto pavement due to overfill. case closed. PBS #: 2-374253. as per PBS record, the site has following active tanks: - one (1) 20,000 gal #2 oil UST, installed in Sep. 1970 - one (1) 275 gal diesel AST in contact with soil, installed in Sep. 1970 PBS registration expired on 10/06/12. a NYC DOB permit was approved on 04/22/02, for installation of an emergency generator and fuel storage tank. 11:11 AM:- spoke with Ray at PTC. during system test, they found dry leak. an isolation test has been scheduled for 05/14/14. 11:14 AM:- spoke with Mr. Scherman, property manager. he

(Continued) **S109414421**

mentioned that they rarely use oil tank and last oil delivery was for about 1,000 gal in Jan. 2014. currently, the tank has about 500 gal oil in it. informed him about expired PBS registration. Israel Lefkowitz **property owner** Palm Garden Nursing Home 1689 48th Street Brooklyn, NY 11204 Palm Gardens Center for Nursing & Rehabilitation 615 Avenue C Brooklyn, NY 11218 Attn.: Avi Scherman **on-site rep** Ph. (718) 633-3300 Ext. 273 email: avi1@mail.com 11:38 AM:- sent email to Mr. Scherman including PBS application. informed him that the registration must be renewed immediately. 09/02/14-Hiralkumar Patel. 12:14 PM:- spoke with Mr. Scherman. he has sent PBS application 3 times and got rejected due to missing/improper paperwork. he has sent it again. he has spoken with Mark at PTC this morning and waiting for cost estimate to conduct further investigation/cleanup, as leak found in remote fill line during isolation test. Mr. Scherman mentioned that they are planning to close this tank in-place, after required investigation/cleanup. 12:38 PM:- sent TTF to Mr. Scherman and property owner requiring report submission by the end of 10/31/14. letter emailed to Mr. Scherman. 11/12/14-Hiralkumar Patel. reviewed PBS record. registration has not been renewed yet. the PBS application was returned on 08/14/14 as UST is overdue for tightness test. 9:21 AM:- left message for Mr. Scherman. 9:26 AM:- left message for Jimmy Martinez (917-681-5947), who is point-of-contact as per recently submitted PBS application. 11:27 AM:- received message from Mr. Scherman. he mentioned that they are waiting for cost estimate from contractor and will start work soon. 01/08/15-Hiralkumar Patel. reviewed PBS record. PBS registration has not been renewed yet. 10:17 AM:- left message for Mr. Scherman (who is out of office till 01/13/15) stating that required documents must be submitted by the end of 01/16/15 to avoid enforcement. 10:26 AM:- left message for maintenance department at the site. 01/09/15-Hiralkumar Patel. 10:00 AM:- visited site. met with Jimmy Martinez, director of maintenance. he provided copy of tank only test dated 06/30/2014. the tank only was found tight. the 20,000 gal tank is located under the driveway. the fill box is locked and the tank is currently out of service. the tank is located along the side of the building and supply/return lines cross the foundation wall. fill box is about 15-18 ft from the tank. site has dual phase burner. Mr. Martinez mentioned that site owner has decided to close the tank in-place. based on available information, asked Mr. Martinez to investigate the fill and vent lines. as tank will not be used again, strongly suggested him to collect and analyze soil samples from underneath the tank to confirm no petroleum release from the tank anytime in past. 01/13/15-Hiralkumar Patel. 3:53 PM:- received message from Mr. Scherman. he mentioned that the tank will be closed-in-place using cement on 01/15/15. they will also collect samples along underground lines. 01/15/15-Hiralkumar Patel. 11:41 AM:- received message from Goldie from NYC Tank Testing. Goldie NYC Tank Testing Ph. (718) 731-7011 email: goldie@nyctanktestinginc.com 11:43 AM:- spoke with Goldie. she inquired about number of samples required through tank's bottom which is 34 ft long. informed her that based on tank only test result dated 06/30/14, the department does not require any sampling through tank's bottom. but as the tank will not be used again, the department strongly recommends collection of soil samples from beneath the tank to confirm no release from the tank in past. if owner decides to collect samples, asked her to collect one soil sample from each end and one from middle of the tank. informed her that the department requires investigation of the

underground portion of the lines connected to the tank. recommended her to expose and remove underground lines and any associated contamination. asked her to provide work schedule for possible site inspection during field work. 12:00 PM:- spoke with Mr. Scherman about discussion with Goldie. he has some documents from PTC and will send it for review. 12:21 PM:- received email from Mr. Scherman including work tickets and invoices from PTC. on 05/15/14, PTC pumped out and cleaned the tank. during tank cleaning, crew found an old cut on tank. on 06/30/14, PTC did isolation test. tank, supply and return lines passed the isolation test. leak was found in fill and vent lines. 12:31 PM:- spoke with Mark at PTC. he confirmed that tank only, supply and return lines passed an isolation test. he also confirmed that there was no repair work done on tank prior to isolation test. during isolation test, fill and vent lines failed the test. 12:36 PM:- received call from Abby from NYC Tank Testing. he mentioned that DEC Falvey has rejected the tank system test report. asked him to discuss with DEC Falvey to resolve PBS issues, prior to tank closure. informed him that investigation is required along fill and vent lines, based on available information. 12:49 PM:- spoke with Mr. Scherman. informed him that prior to tank closure, they have to resolve any pending PBS issues. recommended him to collect samples through tank's bottom and remove all underground piping and any associated contamination. he agreed with recommendations. he will call back with work schedule, once PBS issues are resolved and mark out done. 07/14/15-Hiralkumar Patel. received email from Goldie (at 1:28 PM on 07/13/15) including results of soil samples along remote fill line. three soil borings (# 1, 2 and 6) were installed around fill port and three borings (# 3, 4 and 5) were installed along the fill line. soil samples were collected between a depth of 39 to 67 inches. minimal oil and odors were detected in three borings around the fill port. three composite samples were analyzed: sample #1 was composite of soil samples from borings 3, 4 and 5; sample #2 was composite of shallow soil samples from borings 1, 2 and 6; sample #3 was composite of deeper soil samples from borings 1, 2 and 6. no contamination noted in soil samples. 07/20/15-Hiralkumar Patel. based on result of isolation test and soil samples along fill line, case closed. 2:41 PM:- sent SCL to Mr. Scherman. letter emailed to Mr. Scherman and Goldie.

Remarks: 20,000gal tank

230 OCEAN PARKWAY (Continued) **U001837451**

Tank Info:

Tank Number:	02
Tank Id:	56721
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
C01 - Pipe Location - Aboveground
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
I02 - Overfill - High Level Alarm
L09 - Piping Leak Detection - Exempt Suction Piping
F00 - Pipe External Protection - None
I05 - Overfill - Vent Whistle
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	03/01/1996
Capacity Gallons:	2500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	MJGRIFFI

DER Facility ID:	335993
DEC Memo:	9/5/07 Called Peter Mirsakov (718)645-1196. Reason for tank failure is unknown. Told Mr. Mirsakov that tank must be emptied immediately. he has proposal to excavate, isolate and repair. Building uses gas heat and oil is used when temperature drops below 15 degrees F. I faxed him the letter, fax: 718-645-9529. Sent ttf letter to him at: Yeshiva Shaare Torah 1680 Coney Island Avenue Brooklyn, NY 11230 bf 9/19/07 Received message from Bob Urban of Pro Test 631-321-4670. The system was isolated, excavated and repaired. Tank and piping passed test yesterday. He will forward a letter to me soon. bf 10/9/07 Received call from Peter Mirsakov of Yeshivat Shaare Torah. He wanted to know status of spill and of tank test. I did not receive anything, so he will fax the report to me. He faxed letter from Bob Urban of Pro Test and a passing tank tightness test. The ventline and stickline failed. The lines were replaced. No visible evidence of contamination. NFA. bf 10/11/07 Received phone call from P. Mirsakov. He requested NFA letter. I sent it to him by fax and mail. bf

DEC Memo:	cleanup pending - open spill number that is being used for remediation
Remarks:	01/I spoke with Pal Pingile, station owner. He will have his environmental consultant call me regarding the spill case.(sr) 01/17/13-Consultant: Impact Environmental, Kristin 631-269-8800, 631-664-6616. Spoke with Kristin Camardella. Shallow soil contamination discovered while installing well as part of SVE system installation for existing long term case 0909627. Soil samples taken for analysis.(sr) 03/07/13 Performed site visit, spoke with Paul Pingle over the phone as he was not present at the site. He told me that he will have his consultant send me the soil delineation plan by tomorrow, 03/08/13.(sr) 05/06/2013 Status report from ARCADIS in edocs. During pre-clearing activities associated with the site, air sparge/soil vapor extraction (AS/SVE)system well installation grey stained soil with strong odor at 24 inches below surface was encountered.PID reading was around 840 ppm. The soil exhibited grey staining.Lab results indicated that four total BTEX constituents

BOLLA EM REALTY LLC # 12666 (DBA MOBIL) (Continued) **1000553831**

exceed CP-51 guidance value. A soil delineation work plan is in preparation as per ARCADIS,in order to determine the extent of the shallow soil contamination at this newly discovered area of impact.(sr) 07/23/13 Soil delineation work plan in edocs, approved.(sr) case assigned from DEC Rahman to DEC Patel. 09/19/13-Hiralkumar Patel. alternate adddresses: 378-394 Coney Island Ave, 843-849 Caton Ave PBS #: 2-157589. as per PBS record, the site has/had following tanks: - five (5) 4,000 gal gasoline USTs, in-service, installed in Aug. 1987 - one (1) 250 gal waste oil AST on saddles, in-service, installed in Mar. 2006 - fourteen (14) 550 gal gasoline USTs, removed in Aug. 1987 - one (1) 550 gal #2 oil UST, removed in Aug. 1987 - one (1) 1,000 gal #2 oil UST, removed in Dec. 1992 - one (1) 550 gal waste oil UST, removed in Mar. 2006 - one (1) 550 gal other product UST, removed in Aug. 1987 other spills: 9108598, 0513868, 0909627 spill # 9108598 was reported on 11/12/1991 due to tank test failure of #2 oil tank. case closed. spill # 0513868 was reported on 03/03/2006 due to findings of soil contamination during removal of 550 gal waste oil UST. no contamination noted in endpoint samples. case closed. spill # 0909627 was reported on 11/30/2009 due to findings of contamination during well installation. case still open and under remediation. DEC Ralph Keating is managing the case. 09/20/13-Hiralkumar Patel. 11:55 AM:- spoke with DEC Ralph Keating, project manager for remediation case # 0909627. as soil delineation is not completed, both cases are handled separately. Ralph mentioned that if contamination noted around SVE point requires long term remediation, then the subject spill should be closed and merged with remediation case. 12:08 AM:- spoke with Dave at Arcadis. they did subsurface investigation in Aug. and found soil contamination extending to a depth of approx. 56 inches below grade. contamination extended to the area where dispenser island are located. due to subsurface utilities and existing tank system, they could not finish horizontal delineation. Dave mentioned that there is rebar concrete slab at the depth of 24 inches bg. Arcadis is working for both current owner/operator (Bolla) and previous operator (Exxon). Dave is preparing delineation report and proposing soil excavation. he will submit report by the end of 09/30/13. asked Dave to submit contact information for current owner, operator and previous operator. as contamination extended to the dispenser island, current operator tested five gasoline tank systems on 08/17/13 and found all system tight. 1:17 PM:- received email from Dave. he mentioned that Exxon Mobil was the former property owner and as part of property transfer, Bolla took on all responsibility for any and all site wide impacts, old or new. Bolla EM Realty, LLC. **property owner** 809 Stewart Avenue Garden City, NY 11530 Attn.: Paul Pingle Ph. (516) 240-8657 Fax (516) 512-6556 email: paul@bollaoil.com Dave Tracy **consultant for property owner and Exxon** ARCADIS U.S., Inc. PH. (860) 533-9955 Fax (860) 645-1090 email: david.tracy@arcadis-us.com 11/06/13-Hiralkumar Patel. received email from Dave (at 11:59 AM on 11/05/13) including investigation report. abstract of report dated 03/08/13: - during pre-clearing activities associated with air sparge/soil vapor extraction system well (SVE-3) installation, the fiel staff encountered grey stained soil with a strong hydrocarbon odor approx. 24 inches bg - depth to groundwater at the site is approx. 40 ft bg - PID reading of soil at 24 inches bg was 840 ppm - installed two hand auger soil borings in the area immediately adjacent to the SVE-3 pre-clear location for soil sampling - refusal encountered at both boring locations at approx.

BOLLA EM REALTY LLC # 12666 (DBA MOBIL) (Continued) **1000553831**

20-22 inches bg - at one of the boring location, field staff vacum-cleared the hole and observed a subsurface concrete slab with a visible sheen present on top of the concrete slab - soil above the concrete slab was visibly stained and exhibited a strong hydrocarbon odor - soil sample from just above the concrete slab was submitted for BTEX + MTBE + ethanol - found 1,350 ppm on PID in soil sample soil analyticals: ----------SVE-3------Duplicate
Benzene----------18,000---------28,000
Toluene----------790,000------1,200,000
Ethylbenzene-----310,000--------430,000
Xylene---------2,000,000------2,800,000 abstract of shallow soil investigation report dated 11/05/13: - advanced 26 hand-augered soil borings throughout the south and south central portion of the site - deepest boring (A-16) was advanced to 56 inches bg, where refusal was encountered - due to presence of subsurface concrete slab, the numerous different utilities encountered, as well as health and safety concerns associated with utilizing a direch-push rig in close proximity to the dispensers and dispenser lines, borings were not advanced using direct-push technology - subsurface concrete slab was encountered at borings A-2, A-8, A-10, A-20 and A-25 - extent of the subsurface slab may occupy larger area; however, copper/steel pipe was encountered in several borings (A-3, A-5, A-12, A-17, A-22 and A-23) at approx. 13 inches bg - subsurface copper/steel piping only appeared to exist in short lengths with no apparent continuity - PID field readings indicates that the soil impact increase from south to north - maximum PID reading of 3,954 ppm was observed at boring A-21 at a depth range of 18-25 inches bg - boring A-21 was located immediately south and west of the station fuel conveyance lines and dispensers, respectfully - due to logistical and health and safety concerns, boring was not advanced to the north of A-21 location - total of 29 soil samples were analyzed for BTEX + MTBE soil analyticals:
----------A-2----------A-3----------A-4----------A-13----------A-14 19-22 in. 17-21 in. 16-19 in. 8-13 in. 16-22 in.

Toluene----------350,000----------1,500----------7,600
Ethylbenzene------180,000--------4,800-------38,000----------10,000
Xylene----------1,200,000----------770------170,000---------4,900-------140,000
----------A-16----------A-21----------A-21----------A-22----------A-25 22-28 in. 18-25 in. 46-54 in. 12-16 in. 20-24 in.
Benzene----------5,100
Toluene----------9,400-------260,000----------840
Ethylbenzene--------31,000-------110,000---------1,600---------2,400---------6,000
Xylene----------800,000-----1,400,000--------20,000----------690---------7,100 11/12/13-Hiralkumar Patel. 2:26 PM:- spoke with Dave and inquired about future plans. he mentioned that property owner has not discussed about further steps yet. 2:34 PM:- left message for Mr. Pingle. 11/13/13-Hiralkumar Patel. 11:27 AM:- received call from Mr. Pingle and Kevin Kleaka (Impact Env.). Mr. Pingle mentioned that soil contamination noted near dispensers is probably occurred when ExxonMobil was on-site. currently they are discussing with ExxonMobil and insurance companies to resolve dispute about responsibility, which can be done by 12/09/13. Mr. Pingle

BOLLA EM REALTY LLC # 12666 (DBA MOBIL) (Continued) **1000553831**

mentioned that Bolla purchased this property in 2011. Kevin Kleaka Impact Environmental Ph. (631) 269-8800 email: KKleaka@impactenvironmental.com 11/26/13-Hiralkumar Patel. as approved by DEC Austin and DEC Janet Brown, case assigned to DEC Keating. July 22, 2014 - V. Brevdo. Spill Case reassigned to Remedial Section B Region 2 as per discussion between R. Cozzy and V. Brevdo (discussion was both verbally and via e-mails). VB 07/25/2014 - e-mailed Arcadis, Mr. David Tracy, informed I am a new project manager for this spill case. VB **also refer spill #: 0909627.** 08/06/2014 - V. Brevdo Project Status Summary: Mobil Service Station, 378 Coney Island Avenue, Brooklyn (Spill Nos. 0909627 & 1214643) There are currently two open spill cases at this site. The Spill No. 0909627 is related to the groundwater impacts with ethylbenzene and xylenes present along the east and southeast portions of the site. A RAWP was prepared by Arcadis (an environmental engineering consultant for the Bolla EM Realty, LLC current site owner) and approved by the Department on October 4, 2012. RAWP provided for installation of an AS/SVE system that will target groundwater impacts in the aforementioned portion of the site. The installation of the system began in January 2013. During system installation activities shallow highly impacted soil was encountered along the southern portion of the site that halted the system installation activities and resulted in opening of the second Spill Case No. 1214643. Since the discovery of the shallow soil impacts, Arcadis has continued quarterly groundwater monitoring with the system installation subcontractors on standby. As outlined in November 2013 Soil Investigation Report, there are a number of unknown utilities in the area of shallow soil impacts, including a large concrete pad present at 2.5 feet below grade. Currently, Bolla EM realty is working to address the new shallow soil impacts. As the shallow soil impacts are directly in the area of the planned AS/SVE system conveyance pipe installation location as well as the system well installation location, Arcadis cannot move forward with the remediation system installation until the shallow soil impacts are addressed. Arcadis advised the Department on July 31, 2014 that they expect that the shallow soil impacts will be addressed within reasonable period of time, and they will continue to work with the Department to implement the remediation of the site and accomplish closure of these two spill cases. 08/26/2014 - V. Brevdo Arcadis (David Tracy) submitted The August 2014 Site Status Update Report. System installation activities remain on hold as the shallow soil impacts reported under NYSDEC Case No. Number 12-14643 have yet to be addressed. ARCADIS will continue to work with Bolla on this matter until it is resolved. VB 12/09/2014 - V. Brevdo e-mail from Arcadis: Mr. Brevdo, The November 2014 Site Status Update Report for Service Station #12666, located at 378 Coney Island Avenue, Brooklyn, New York is attached for your use. Please don t hesitate to contact me should you have any questions or need additional information. Best regards, Dave Tracy - Staff Environmental Scientist - david.tracy@arcadis-us.com ARCADIS U.S., Inc. - 160 Chapel Rd Suite 201 - Manchester, CT, 06042 O. 860.533.9955 - F. 860-645-1090 www.arcadis-us.com Professional Affiliate/ ARCADIS of New York, Inc. ARCADIS, Imagine the result 12/09/2014 - V. Brevdo e-mail to Arcadis: December 9, 2014 Dear Mr. Tracy: I completed a cursory review of the November 2014 Site Status Update Report for Service Station #12666, located at 378 Coney Island Avenue, Brooklyn, New York. It is my understanding that the BTEX concentrations in 5 (five) on site groundwater monitoring wells

BOLLA EM REALTY LLC # 12666 (DBA MOBIL) (Continued) **1000553831**

showed a significant increase in September 2014 sampling event as compared with the concentrations detected in June 2014 sampling event. It was on July 31, 2014 when we discussed the status of Bolla resolving the matter of financing the shallow impacted soil remediation and/or other matters that may be holding the launch of AS/SVE system. The November 2014 Site Status Update Report, section Upcoming Activities states that System installation activities remain on hold as the shallow soil impacts reported under NYSDEC Case No. 12-14643 have yet to be addressed. ARCADIS will continue to work with Bolla on this matter until it is resolved. Please be advised that the New York State Department of Environmental Conservation (Department) is concerned about the amount of time that it takes to resolve the aforementioned matter and the fact that installation of the AS/SVE system is still on hold. Four (4) months delay in resolving shallow impacted soil remediation combined with the fact that the Department was not informed of any substantial progress accomplished on this matter, and the fact that BTEX concentrations in groundwater on site have increased in September of 2014 only further exacerbates Department s concern. I am hereby respectfully requesting that you forward this e-mail correspondence to appropriate Bolla representatives for their information and, hopefully, action to resolve this matter and commence site remediation. If remediation does not commence on site within the 90 days of this date, the Division of Environmental Remediation may select to refer this case to the Department s Office Of General Counsel for legal enforcement action. Contact me if you have questions. Respectfully, Vadim Brevdo, P.E. Environmental Engineer 3 New York State Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 718.482-4928 Vadim.Brevdo@dec.ny.gov 12/10/2014 - V. Brevdo Received a telephone call from David Tracy (860-533-of Arcadis and had a conversation about my e-mail of 12/09/2014. I reiterated to Mr. Tracy that I want Arcadis to convey Department’s position and forward my 12/09/2014 e-mail to Bolla, or if Arcadis can not forward my e-mail, give me contacts for Bolla and I will contact Bolla myself. I asked that Mr. Tracy let me know within reasonable time of their communicatins with Bolla on this matter - lack of progress on installation of AS/SVE or remediation of surface soils (Spill 12-14643). Mr. Tracy explained that Arcadis was not retained to address surface soils. I responded that it would be quite uncommon situation if two different consultants are retained to work on two spill cases on the same property, but that is Bolla’s decision. I retiretated I am looking for good faith efforts from Bolla to move this project forward. If there is no good will on part of Bolla and no progress is shown within next 90 days, the DER may have to refer this case to OGC for legal enforcement. Irequested Mr. Tracy to convey the Department’s position and concern to Bolla, forward my 12/09/2014 e-mail to Bolla, and let me know of the outcome in a timely manner. Mr. Tracy expressed commitment to convey my 12/09/2014 e-mail to Bolla and inform me in a timely manner of the outcome. V.B. 03/16/2015 - V. Brevdo Current Project Status: On March 13, 2015, Arcadis submitted Soil Excavation Work Plan for the Department s review and approval. Bolla will complete a limited and shallow soil excavation along the south-central portion of the site. This process will be completed by initially excavating an area with the approximate dimensions of 11 by 32 feet with a total depth of approximately 5 feet. Excavation activities will be performed by Bolla, with environmental oversight provided by Impact Environmental.

BOLLA EM REALTY LLC # 12666 (DBA MOBIL) (Continued) **1000553831**

Based on field observations, Impact Environmental will direct the size of the excavation area as needed in order to address the soil impacts to the extent feasible. Subsurface concrete slab will be penetrated and, if deemed necessary, removed to facilitate the investigation of the potential presence of USTs located beneath the slab. Should improperly abandoned USTs be encountered, they will be either removed and disposed of, or properly closed in place. In addition, Impact will evaluate the soils under the southern portion of the existing dispenser for the presence of petroleum contamination and, if deemed necessary, the soil will be removed. If required, the existing dispensers and associated product lines will be locked out and temporarily removed to allow sufficient excess to the subsurface. Appropriate delineation and post excavation verification soil sampling will be conducted. Soil Management plan is included as part of the Soil Excavation Plan. Community Air Monitoring Plan is also included to protect workers and nearby communities from potential exposure to soil particulates and contaminants. Soil excavation activities are tentatively scheduled to commence during the last week of March 2015. A post-excavation report will be submitted to the Department within 90 days of the work completion. The Department approved Soil Excavation Work Plan on March 16, 2015. VB 04-13-2015 - V. Brevdo Christine Camardella of Impact Environmental called and stated that the excavation of surface soils was scheduld to commence today, however, due to some problems with obtaining DOB permit, the work is delayed. According to Ms. Camardella, the nature of delay is that more paperwork needs to be submitted to DOB to obtain permit. Ms. Camardella agreed to keep the Department updated on the status of DOB permit and excavation. V.B. 05-12-2015 - V. Brevdo Impact Environmental submitted well decommissioning letter for MW-6, as it is located within excavation area. After excavation is completed, a replacement well will be installed. VB 05-14-2015 - V. Brevdo Arcadis submitted May 14, 2015 Site Status Update Report. Arcadis submitted May 2015 Site Status Update Report to the Department on May 14, 2015. Groundwater monitoring was conducted at the site on March 9, 2015. No free product was detected in any of the wells during this monitoring event. All monitoring results remained within historic ranges. MTBE was not detected and BTEX was detected below standards in some wells but higher than standards in other wells. The next quarterly groundwater sampling event is scheduled for June 2015. VB 08-07-2015 - V. Brevdo Arcadis submitted Site Status Update Report (SSUR) to the Department on August 6, 2015. SSUR summarized the activities completed from April through June 2015. On June 19, 2015, eight (8) monitoring wells were gauged and sampled. No free product was detected in any of the wells during this monitoring event. MTBE was not detected during this and previous sampling events. The total BTEX concentration in one well (MW-1) displayed a significant increase from previous data. Arcadis will continue to closely monitor the trends at this well location. The next quarterly groundwater sampling event is scheduled for September 2015. On July 17, 2015, Impact Environmental, (second environmental engineering consultant for Bolla retained to address surface soil contamination) informed the Department that the DOB permits required for the excavation activities on site are still pending. Bolla/Impact are expecting permit approval in August 2015. The remediation system installation is scheduled to begin once the soil remediation is complete. VB 01-06-2016 - V. Brevdo On January 5, 2016, the Department has requested Bolla to inform the Department on the status of DOB permit

BOLLA EM REALTY LLC # 12666 (DBA MOBIL) (Continued) **1000553831**

and status of soil excavation work. On January 6, 2016 Bolla informed the Department that the DOB permit needed for surface soil excavation work has been obtained, and Bolla is working with consultant(s) on scheduling a work plan preconstruction meeting/conference call which will include developing a field work mobilization schedule. Arcadis submitted Site Status Update Report (SSUR) to the Department on January 5, 2015. SSUR summarized the activities completed from July through September 2015. On September 21, 2015, ten (10) monitoring wells were gauged and sampled. No free product was detected in any of the wells during this and previous monitoring events. MTBE was not detected during this and previous sampling events. The total BTEX concentrations were below standards in five (5) monitoring wells and above standards in other five (5) wells. The total BTEX concentration in two wells (MW-1 and MW-7) displayed a significant increase from previous data. Arcadis will continue to closely monitor the trends at these well locations. The next quarterly groundwater sampling event was scheduled for December 2015. VB 01-12-2016 - V. Brevdo On January 7, 2016, Impact Environmental confirmed that the work outlined in the Soil Excavation Work Plan dated March 2015 is expected to commence by March 15, 2016. A pre-construction meeting is scheduled for March 1, 2016. VB 02-29-2016 - V. Brevdo E-mail notification from Impact Environmental: Mr. Brevdo, I just wanted to let you know that we are still meeting tomorrow for the pre-construction meeting at the above-referenced Site. Your presence is not warranted, it really is just to discuss logistics, schedule and soil disposal. As of right now the start date is still March 15th, I will let you know if anything changes. Thank you. Christine Camardella Project Manager IMPACT ENVIRONMENTAL welcome to solid ground www.impactenvironmental.com Corporate Headquarters 170 Keyland Court - Bohemia - NY - 11716 T - 631.269.8800 F - 631-269-1599 VB 03-14-2016 - V. Brevdo Received an e-mail from Impact Environmental: Mr. Brevdo, Just wanted to let you know that we are still on schedule to start the work at the above-referenced Site tomorrow at 8:00 am. I will let you know what we find once we have removed all the concrete and can determine if there are USTs. Let me know if you have any questions. Thank you. Christine Camardella Project Manager IMPACT ENVIRONMENTAL welcome to solid ground www.impactenvironmental.com Corporate Headquarters 170 Keyland Court - Bohemia - NY - 11716 T - 631.269.8800 F - 631-269-1599 03-14-2015 - V. Brevdo Replied to Ms. Camardella of Impact Environmental: Ms. Camardella: Thank you for providing a notice of the upcoming work. I will make a note of it in the project records. I will be awaiting for an information / report from you on the findings. Contact me if you have questions. Thank you, Vadim Brevdo Vadim Brevdo, P.E. Environmental Engineer 3, Division of Environmental Remediation New York State Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 P: (718) 482-4928 - F: (718) 482-6390 - vadim.brevdo@dec.ny.gov www.dec.ny.gov - - 03-16-2016 - V. Brevdo Inspected the site at 11:30 a.m. Met on site with Christine Camardella of Impact Environmental and Mr. Singh of Bolla. Bolla and Impact are conducting implementation of an approved work plan for remediation of the surface soil. Eight USTs were excavated and are on-site. Contaminated soil is being removed. Visual inspection of excavation does not appear to show free product but almost a normal looking soil with some spots of minor-to-medium soil contamination. VB 03-22-2016 - V. Brevdo Soil remediation activities at the Site commenced on March 15, 2016 as outlined in the March 2015 Soil Excavation Work Plan and

BOLLA EM REALTY LLC # 12666 (DBA MOBIL) (Continued) **1000553831**

approved by the Department on March 16, 2015. Bolla Construction is conducting the Site work which is being overseen by Impact. The soil remediation activities conducted from March 15 to March 22, 2016 include the following: Removal of concrete in the southern portion of the site, along Caton Avenue to investigate contaminated soil and concrete encountered in this area; Removal of impacted soil and stockpiling; Discovery and Removal of eight (8) 550-gal USTs encased in concrete; Removal of Liquids and Water-Petroleum Sludge from said USTs via vacuum-truck by Lorco Petroleum as stand-by contractor; Transport of excavated contaminated soil to an approved disposal facility in Cartaret, New Jersey; Screening of soil and collection of sidewall/bottom endpoint samples in the excavation area; Cleaning out and rinsing of the USTs for removal by Adler Environmental; Removal of concrete on the sidewalk of the Caton Avenue and removal of additional contaminated soil from sidewalk excavation; Backfilling of the excavated areas with clean gravel; Repair and Restoration of the sidewalk along Caton Avenue; Implementation of the Community Air Monitoring Plan; Implementation of the Dust Control Measures to prevent soil particle from leaving the site. Soil remediation work continues and the report will be submitted to the Department upon completion. Arcadis continues implementation of the groundwater sampling at the site and submitted Site Status Update Report on March 22, 2016. Arcadis is currently reviewing NYSDEC-approved AS/SVE Remedial Action Plan to determine if design modifications are warranted given the time that has elapsed since RAP approval. Should Arcadis determine that design modifications are warranted, a RAP addendum will be provided to the Department outlining proposed modifications. Arcadis intends to resume remedial activities immediately following completion of the shallow soil excavation by Bolla and Impact. VB 05-31-2016 - V. Brevdo On March 21, 2016, eight monitoring wells were gauged and sampled. From March 15 through 21, 2016, Impact Environmental, on behalf of Bolla, completed the on-site shallow soil excavation activities as outlined in the March 16, 2015, Department-approved Soil Excavation Work Plan. During the soil excavation activities eight improperly abandoned USTs were encountered and subsequently removed. Following their removal, the USTs were cleaned and removed from the site for proper disposal. The Soil Excavation Report is in preparation for submittal to the Department in June 2016. As a result of the remediation activities, the AS/SVE system design is under review with a Remedial Action Plan Amendment scheduled for submittal to the Department in June 2016. The next quarterly groundwater sampling event is scheduled for June 2016. VB 09-05-2016 - V. Brevdo On August 5, 2016, on behalf of Bolla, Arcadis submitted a Soil Excavation Report. The Report summarized the excavation activities associated with Spill Case No. 1214643 which took place from March 15, 2016 through March 18, 2016, and from March 21, 2016 through March 22, 2016. Arcadis recommended closure of Spill Case No. 1214643 based on the following information: lack of olfactory observations when the extent of the excavation was reached; lack of visual staining at the extent of the excavation; low to non-detect PID readings on the excavation sidewalls and floor; depth to groundwater being approximately 39-47 feet bgs.; maintained asphalt and/or concrete cap at the site to prevent infiltration; excavated to the extent possible due to existing structures, utilities, dispenser islands, and adjacent roadways; physical tank removal of eight 550-gal USTs; and 354.61 tons of petroleum impacted soil and 2,745 gallons of petroleum-impacted liquid removed. The

BOLLA EM REALTY LLC # 12666 (DBA MOBIL) (Continued) **1000553831**

Department reviewed the Soil Excavation Report and Spill Case Closure Request and closed spill case (soil remediation) effective May 8, 2016. Groundwater remediation continues under the Spill No. 0909627. 08-05-2016 - V. Brevdo e-mail to Arcadis regarding closure of spill 1214643: Mr. Tracy: As I am reviewing the August 2016 Soil Excavation Report I am inclined to proceed in the following manner: upon completion of the report review tentatively on Monday, August 8, 2016, I will proceed (pending unexpected discoveries) with the closure of the spill case no. 1214643. As this closure pertains to remediation of the soil only, the spill case no. 0909627 will remain open. Furthermore, as spill closure letter contains language regarding abandonment of groundwater monitoring wells on site, which is not applicable in this case as we need to continue remediation of the groundwater and need wells, I will not issue a spill case closure letter for closing spill 1214643. I will only close spill in the database with relevant explanations reflective of this e-mail. Spill Closure letter will be issued when closure of spill 0909627 is accomplished. Let me know if the above course of action is acceptable to you and if we are on the same page on this matter. Thank you. Vadim Brevdo Mon 8/8/2016 8:41 AM e-mail from Arcadis: Hello Vadim, Thank you for your review of the soil excavation soil. I agree with your logic and, as such, agree with the proposed course of action. Thank you, Dave 08-08-2016 V. Brevdo e-mail to Arcadis: Mr. Tracy, thank you. Spill Case No. 12-14643 (soil remediation) is closed effective today. Groundwater remediation continues under the spill no. 0909627. Contact me if you have questions. Vadim Brevdo

DEC Memo:	FOUND CONTAMINATED SOIL WHILE REMOVING OLD TANK
Remarks:	03/03/06-Hiralkumar Patel. Spoke with Christine at Geologic who are consultant to Exxon-Mobile. when they were removing 550 gal waste oil UST from location, crew found oil stains in soil. she was unable to get PID at soil because it was wet by snow. Responsible person at property is Ms. Melissa Tacchino. they have took end point samples from excavation and will get lab results within ten days. excavation has been backfilled with clean soil. CSL has not been sent out because they already took out samples from location and will submit report once they have result. 03/16/06-Hiralkumar Patel. Left message for Christine. she is out of office and will be back tomorrow. 03/20/06-Hiralkumar Patel. Left message for Christine. Spoke with Christine, she hasn't received lab results yet. once she has it she will call me. Christine is planing to run Sensitive Receptor Survey. 03/24/06-Hiralkumar Patel. Left message for Christine. 03/28/06-Hiralkumar Patel. Left message for Christine. 04/04/06-Hiralkumar Patel. Left message for Christine. 04/06/06-Hiralkumar Patel. Left message for Christine. 04/21/06-Hiralkumar Patel. Left message for Christine. 04/24/06-Hiralkumar Patel. Spoke with Christine. they are preparing report and will submit by end of May. asked her to send lab results with site plan including sampling locations in fax today. she will fax me these documents. Received lab results of five soil samples through fax from Christine. no contamination found in any sample. 05/17/06-Hiralkumar Patel. Received site plan through fax from Christine. but it is not clear. 06/01/06-Hiralkumar Patel. Left message for Christine. 06/09/06-Hiralkumar Patel. Left message for Christine. 06/29/06-Hiralkumar Patel. Left message for Christine. 06/30/06-Hiralkumar Patel. Received final closure report. based on report, case closed.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

DEC Memo:	9/14/2010 - Spoke to Bob at ProTest. He said system failed, any further info DEC should contact Property Manager. 9/14/2010 -Voicemail message at Bob Jalen Mgt asking for callback on this site. Spill/Site Background: 1)Prior TTF (Spill #8807797)was never dealt with and DEC eventually Administratively Closed the case in 2003 due to lack of information. 2) PBS required a tank test by 4/16/2009 - Tank was not tested until 8/26/2010 3) Tank Test on 8/26/2010 Failed - Unknown current status. Still in service? Repairs? Retest? 11/9/2010 Voicemail with Prop. Mgt asking for callback. 2/22/2011 Finally spoke to Bob at Prop Mgt. No repair/investigation/isolate work has been performed yet. He will hire someone within the next 1-2 days. ***Due to lack of response and problems with PBS, case forwarded to DEC Legal** 2/23/2011 Bob Prop Mgr at Bob Jalen Mgt hired ABC Tank (Chris) 718-272-2800 to dig down, expose lines and tank top. Isolate tank & retest. Determine problem and make repairs. 3/21/2011 Chris at ABC said they isolated the 5,000 gal tank and it failed. On 3/7/2011 3 hours of welding, manways repaired, retested the tank and it past. All lines were isolated retested and past. Only problem was around the manway on the top of the tank. ABC Tank will perform an Official EZ Test on the system to confirm passing. Photos will be taken. Chris said there was no contamination found at/near the leak area. 10/26/2011 Sangesland left a voice message with Chris at ABC Tank asking for the closure report. 11/2/2011 Sangesland received a letter/retest from ABC Tank saying repairs were made to the fill and vent lines, system retested and passed. No contamination was found. Spill Case Closed 5-6-14 - Dupigny - Notes from Sangesland Chris at abc tank did work at site March 2011 but DID NOT sibmit documents 2-10-11- steave left voice message with prop. mgr. asking for call back 2/15 - 2nd message with prop. Mgr.

DEC Memo:	Sangesland spoke to FD rep. NYC Fire Dept called to a home by homeowner. Oil Company: TTT Transport - (Office address: 4416 18th Ave, Brooklyn NY 11204) Oil company made a miss Delivery to a wrong address. They pumped several hundred gallons of heating oil into a buried/abandoned tank associated with the home at 431 East 4th St, Brooklyn. Unsure if tank is leaking or what the condition is of the soil around the tank. 4/13/07 - Raphael Ketani. I made a site visit

BILL VASQUEZ HOME (Continued) **S108639387**

and met Bill Vasquez, owner of the home (718) 853-5569. He said that some truck from TTT Transport came to his home and pumped oil into a tank under his driveway. He said that his neighbor tried to get the driver to stop, but the driver kept on pumping. Then the guy left. He said that when he called 311 , the fire department showed up and issued him a fine for having an unfilled abandoned tank with a usuable fill port. Mr. Vasquez showed me the summons. He also showed me a number of photostatic copies of documents from the delivery driver. These included the truck registration and various permits to haul oil and operate in NYC. The documents had many addresses for TTT Transport/Leasing. They were: 1) Roger Gross, TTT Leasing, 1274 49 St., Brklyn., 11219/NMFTA, Inc., 2220 Mill Rd., Alexandria, VA, 22314 (703) 838-1810 2) Roger Gross, TTT Trans Petro Inc., 4416 18 Ave., Brklyn., 11204 FAX (718) 377-4118 3) TTT Transport/Leasing, 160 Sullivan St., Brklyn., 11231 4) TTT Leasing, 261 Central Ave., Jersey City, NJ, 07307 5) TTT Transportation, 290 Larkin Drive, Monroe, NY, 10950 I inspected the basement with a ppb PID meter. There were no detectable vapors in the basement and no signs of staining or oil on the wall adjacent to the tank. While I was inspecting the basement, Mr. Vasquez heard someone drop a heavy piece of metal in his driveway. He said that the company to remove the oil had arrived. I asked him whether he had called them or whether they had been called by the oil company. Initially, he said he had called them, but later he said that he hadn't. Mr. Vasquez showed me a piece of paper with the name Anthony written on it and the name of his company, Best Tank, 150 Sullivan St., Brklyn., (718) 522-5100. We went upstairs and to the driveway and met Ivan, a worker from Best Tank. I asked him whether Best Tank and TTT were related, as they are very near each other (150 and 160 Sullivan St., respectively). He said No. Ivan pointed out to me that there were two ports for the tank, one for filling and one at the other end for sticking the tank. He said the tank is 1,080 gal. He measured the volume of the liquids and detected 26 1/2 total with 14 1/4 of water. He sent his drive and tanker truck away because he needed a truck with two compartments so that the oil and water can be held separately (he said they were going to sell the oil back to TTT Transport). Ivan said that Best Tank will clean the tank, fill it, and plug the fill port. Mr. Vasquez got ahold of Anthony of Best Tank and asked him who hired his company. He said Andrew Lipton had. He gave Mr. Vasquez the phone number for Mr. Lipton (845) 267-2400. Mr. Vasquez called Mr. Andrew Lipton and got clarification as regards what will happen today (removal of the oil). I spoke to Mr. Lipton and asked him whether he was the owner of TTT Transport. He said he was. I asked him what was the main address of his company. He said 290 Larkin Drive, Monroe, NY, 10950. I told him that I will send a CSL. 4/18/07 - Raphael Ketani. I drafted a CSL for the review of Randall Austin, Chief Spills Engineer Region 2. 4/20/07 - Raphael Ketani. I spoke to Mr. Vasquez regarding progress on the misdelivery to his tank. He sounded very excited and a bit confused. He complained that DEC was the only one that told him what he needs to do. He said that he is still trying to get a good price for the work. I told him that the work should include tank tightness testing and that this should happen before the tank is abandoned in place. He said he understood. I gave him the name and number of several companies and told him that these places do testing and abandonment, but DEC doesn't make recommendations. He said he will call them all. Mr. Vasquez called me back. He said he hired ABC Tank to do the tightness testing and the abandonment. I spoke to Donna at ABC and

BILL VASQUEZ HOME (Continued) **S108639387**

she confirmed that they will do the work. 4/23/07 - Raphael Ketani. Mr. Vasquez called and told me that the work will start tomorrow to test the tank and abandon it. 4/27/07 - Raphael Ketani. I received a FAX of the passing tank system test from Donna of ABC Tank. 5/2/07 - Raphael Ketani. I called up ABC Tank and spoke to Patricia. She looked up the work record for the site on her computer. She told me the following work had been done: pump out 230 gallons of water and oil, cleaned the tank, tested it successfully, and filled it with sand. Based upon the passing tank test report and my conversation with Patricia, I am closing the spill case.

Remarks: OIL WENT INTO AN UNDERGROUND TANK AND UNSURE HOW MUCH LEAKED IN GROUND

DEC Region:	2
DER Facility ID:	17126
DEC Memo:	assigned to C. Whitfield in backlog initiative. No file was received from the region. The property is a 6 or 7 story co-op (Property Shark indicates a 7th story was proposed to be added by 7/30/03) that appears to have been formed between 1985 - 1987; the structure was built in 1960. 11/28/05: PBS # 2-348848 indicates this 10,000 gallon tank for #6 fuel oil is registered through 4/19/08, and the certification was printed 7/18/03. Installation date is not given. Property Shark indicates (and the site management company confirmed)that a building permit was issued 11/10/2003 to abandon the existing buried fuel oil tank in favor of an above ground tank and switch to #2 fuel oil; this is not reflected in the PBS database. Waiting on call back from Better Mechanical, who actually did the work. Received the call back from Petroleum Tank Cleaners / Better Mechanical (Mark, who had been out with a heart bypass). The buried oil tank was filled with concrete. There is no surviving paperwork about the job; he indicated there was no contaminated soil. Closed per guidance issued with inititive. File material being sent back to the region was compiled from info on the UIS and publicly available sources.

DEC Memo: DE CPiper spoke with Phil Fazin. ABC to perform repairs. Restest to follow. 03-18-2015 - V. Brevdo This TTF Spill Case is re-assigned to Remediation Section B as per discussion with Chief of Spill Response on 03/17/2015. Case is further assigned to Mr. Jonathan Kolleeny as Project Manager. - VB 05/21/15: I contacted Phil Fazin (A1 Crown Corp, 516-375-5890), who performed tank test on 1/8/14, to ask why tank failed and what repairs were done to bring about passing test on 1/20/14. I sent email to Phil with attached spill rpt & passing tank test rpt (in DecDocs), writing: Phil, Nice speaking with you today. I ve attached spill rpt for a Tank Test Failure spill, case number 1309770, reported for property at 400 Marlborough Rd in Brooklyn. Spill rpt, dated Jan. 8, 2014, states that a leaking vent pipe was suspected as cause of tank test failure. I ve also attached a passing tank test rpt dated Jan. 20, 2014 (presumably a re-test after repairs were made). If you re able to locate any records indicating what cause of original test failure was, and/or indicating what repairs were made to enable tank system to pass re-test, that would help me close out this spill case. Your help is much appreciated. After

APARTMENT BLDG (Continued) **S116156800**

checking his records, Phil wrote back: Hi Jon, I tested it but another company retested it. When I tested it I could not find a vent. I think it was rotted off. I did job for ABC tank. They probably repaired it and maybe I was too busy and they hired a new company or owner... Call ABC and ask 718 272-2800. Thanks, Phil Fazin. I contacted ABC tank, but they only had record of testing tank on 1/8/14, when it failed. They pointed out that re-test was done by another company, presumably hired directly by property owner. - J. Kolleeny 06/02/15: On 5/29/15, I attempted to contact Abraham Wachsler of N.Y.C. Tank Testing Inc. (718-731-7011), who did tank re-test on 1/20/14 which passed, to ask what repairs, if any, were made to tank system to enable it to pass re-test. Left mssg. for Mr. Wachsler. On 6/2/15, Mr. Wachsler contacted me, saying that he did not make any repairs, just tested tank and it passed. I mentioned that previous tester was unable to find vent pipe and speculated that it may have rotted off, but Mr. Wachsler pointed out that 3rd page of passing tank test rpt (in DecDocs) shows site plan with vent pipe indicated in bldg alcove outside of boiler room. He also indicated he had no reason to believe tank released any oil to environment, and that if previous tester couldn't find vent, that would've cause tank to fail test (i.e., without implying any release occurred). Based on this information, it appears failure of first tightness test on 1/8/14 was related to tester's not finding vent pipe, and since tank then passed re-test on 1/20/14 without any repairs, it seems likely that TTF did not involve any release of petroleum to environment. Therefore, this spill case is closed. - J. Kolleeny

Remarks: Test failure believed to be leaking vent line. Repair and retest.

DEC Memo:	9/26/2005 Sangesland spoke with Edith Bedelle about the spill in her basement. Petro replaced the oil line, but did not clean up the subsurface spill. Mrs. Bedelle needs guidance on insurance company and clean up contractors. 09.29.05 SR// Sharif inspected the basement on 09.27.05. PETRO installed a new Burner for the boiler and a new oil line from the boiler to the tank. The old , rusted oil line is still there. Both line run aboveground. Oil soaked debrises piled up in different spots in the room which need to be removed and cleaned so that no more oil smell/contamination exist there. Sharif advised the homeowner to hire a contracter to clean and wash the boiler room.This does n't seems like extensive clean up job but cement carpeting on the floor might be needed to be replaced where the floor is badly impacted. 10/05/2005 Sangesland spoke with Kenneth at Petro concerning the clean up at the site. He says all work was completed, spill can be closed out. 10/17/2005 Issac from Eastmond called to say he finished the cleanup of this basement spill. All contamination removed, basement floor is now clean. Spill Closed

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER DEC Sigona sent a tank test notification letter on 10/15/2002. File on letter at Spills duty officer desk. 11/12/2003-Vought-Called ProTest and left message to return call to DEC with detailed work description. 1/7/04-Vought-Spill transferred from Vought to Austin. 01/27/04 - Sawyer - Spill transferred from Austin to Sawyer. 07/19/2005- Gupta- Spill transfered from Sawer to Gupta 11/3/05- Gupta called Holy Innocence church and talked to Ms. Sandra. Ms Sandra asked a Spill Report and provided FAX number 718-941-4931 to mail. Gupta Faxed the Foil Report. Expecting call from Mr. Msger Rollin Darbouze phone 718-941 9500. 09/1/2006 This case was transfer from Albany to Region #2. 09/5/06-Zhune called Monsenor Ollaih Dabouce (Ph: 718-469-9500). He will find out information and call me back. 12/4/06-Zhune called Monsenor O. Dabouce this # (718)469-9500 is not in service no further information has been reported. 12/4/06 Bob Urban from Pro Test sent tightness test results of both tanks and a letter saying The 5000 gallon wrapped #4 fuel oil tank in basement of tank had the manhole regasketed, the vent line replaced, and the remote fill replaced. The 5000 gallon fuel oil UST had vent line replaced, the stick line replaced, and the supply and return lines replaced. After these repairs were made booth tank systems passed the final tightness test. The notes in the file did not indicate that any contamination was present, If there has been contamination it would have been duly noted and properly reproted. This case was closed for V. Zhune
Remarks:	TANK FAILURE (2) AT ABOVE LOCATION. CHURCH HAS BEEN ADVISED OF RESULTS.

Site Description: Location: The 20,625 square foot (0.47 acre) site is located at 22 Caton Place in the Borough of Brooklyn, Kings County, NY in an urban area. Site Features: The Site currently consists of a vacant lot from which the previous building was reported to have been razed in 2007. Current Zoning/Use(s): The site is currently zoned as R7B R5B (residential) within the Ocean Parkway Special Zoning District, and is surrounded by residential uses. The Site has a NYC Restrictive Declaration (similar to E-Designation) for hazardous materials. Historic Use(s): The following information was obtained from a June 8, 2005 letter from NYCDEP to the NYC Department of City Planning. The Site was most recently occupied by a one story brick structure with a cellar which operated as a chalkboard/blackboard manufacturer. The historical on-site uses include a wire and metal forming company and a food warehousing company. Site reconnaissance during September 2003 observed one fill port in the front of the building and two vent pipes connected underground storage tanks (reported to be storing gasoline). An oil/water separator was also observed on site. In addition, a 2,000 gallon fuel oil UST was located adjacent to the gasoline USTs. Site Geology and Hydrogeology: Soil borings conducted in 2011 identified fill materials consisting of medium-grained sand with some gravel and brick fragments to a depth of approximately 8 feet below grade. Beneath the surface fill layer is sand and gravel to a depth of at least 28 feet below grade. Groundwater is present at a depth of approximately 42 feet below grade. The site did not qualify for addition to the Registry of Inactive Hazardous Waste Disposal Sites.

Env Problem: Nature and Extent of Contamination: Soil: The Site Characterization (SC) was performed in October of 2012 by Ten-En on behalf of Hudson Caton LLC. It consisted of advancement of eighteen soil borings and three test pits, installation of four groundwater monitoring well points and seven soil vapor points on-site, collection and laboratory analysis of eighteen soil, and nine groundwater samples for TCL VOCs and seven soil vapor samples for TO-15 VOCs. In prior investigations to the SC, some 45 soil, 5 groundwater and 4 soil vapor samples had been taken. There was only one reported exceedance of a CVOC, TCE, in soil and all groundwater samples had exceedances of groundwater standards for TCE. There were no VOCs detected in soil samples (taken during the SC) at levels above UUSCOs or PGSCOs. The three test pits revealed the presence of three (3) USTs, including one (1) 2,000-gallon capacity fuel oil UST and two (2) concrete-encased

22 CATON PLACE (Continued) **S111738320**

550-gallon capacity process USTs. Groundwater: Two (2) compounds, TCE and cis-1,2-dichloroethene (cis-1,2-DCE), were detected above the Class GA Standards in groundwater samples. Three (3) other VOCs, tetrachloroethene (PCE), acetone and chloroform, were also detected but at concentrations below the Class GA Standards. Acetone and chloroform were detected at estimated values. TCE was detected above the Class GA Standard of 5 ppb in all monitoring wells except well GW-2, which is located near the known USTs. Concentrations above the Class GA Standard during this sampling round ranged from 440 ppb in well GW-7, at the upgradient border, to 6.5 ppb in well GW1, located in the northeastern portion of the Site. Concentrations in wells GW-3, GW-5 and GW-8, all of which are immediately downgradient or cross-gradient to well GW-7, have concentrations between 110 and 220 ppb. Cis-1,2-DCE was detected above the Class GA Standard of 5 ppb in only one (1) monitoring well, GW-6,at 9.9 ppb, located in the southwest corner of the Site, downgradient from well GW-7. No SVOCs, pesticides, PCBs or metals were detected above the Class GA Standards. Soil Vapor: TCE was detected above the NYSDOH AGV of 5 ug/m3 in four (4) soil vapor samples, SG-5 through SG-8, at concentrations ranging from 14.8 to 315 ug/m3. These samples are located along the eastern upgradient border, the western downgradient border and the southwestern corner of the Site. The highest detected PCE concentration of 21.6 ug/m3 was located in sample SG-8 along the western border of the Site; this concentration is above the highest background level but below the NYSDOH AGV of 100 ug/m3. Several other VOCs, including 1,2,4-trimethylbenzene, 1,2-dichloroethane, acetone, carbon disulfide, cyclohexane, ethanol, hexane, MEK and methylene chloride were detected above the highest background levels; however, these concentrations do not appear to be indicative of source material. One (1) ambient air sample was collected. No evidence of chlorinated solvents was detected in the sample. Significant Threat: Based on review of the Site Characterization Report, NYSDEC has concluded that the site does not present a significant threat to human health or the environment.
