DAILY FIELD REPORT

Samples Collected:

- None.

CAMP Activities:

- Air monitoring was performed at one upwind and one downwind location during ground intrusive activities. Two 15-minute average concentration of volatiles organic compounds (VOCs) or 15-minute average concentration of particulate matter smaller than 10 microns in diameter (PM10) exceeded the action levels.
    - No exceedance today.
    - PM10 and VOC data were not recorded at the upwind monitoring station at 8:45am due a battery outage. No odors or dust were observed during this time. The battery was replaced and data collection resumed at 9:00am.
    - CAMP monitoring was not performed between 5:00pm and 7:00pm due to inclement weather (heavy rain). No odors or dust were observed during this time, and no ground intrusive activity was conducted after 5:00pm.

Activities Planned for Coming Week:

- Contractor will continue work on building foundation.
- Excavation for west elevator shaft.
- Trucking soil for disposal.
