PHASE I ENVIRONMENTAL SITE ASSESSMENT

36 Frost Street
Brooklyn, New York 11211

May 23, 2025

Touchstone Environmental Geology, PC appreciates the opportunity to work for 36 Frost Street, LLC at the property located at 36 Frost Street, in Brooklyn, New York.

This report was completed according to the terms and conditions authorized by you the Client. This report has been completed in conformance with the ASTM Standard E1527-21.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined. We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report.

Very Truly Yours,

X_____
Rachel Ataman, PG
President

1.0 EXECUTIVE SUMMARY

At the request of 36 Frost Street, LLC, Touchstone Environmental Geology, PC has performed a Phase I Environmental Site Assessment (ESA) of the property located at 36 Frost Street in Brooklyn, New York, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions (RECs)* in connection with the Subject Property, defined in ASTM Practice E 1527-21 as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-21.

The Subject Property is a 0.17-acre rectangular tax lot located at 36 Frost Street (Block 2736, Lot 20) in Brooklyn, Kings County, New York. It is improved with a one-story industrial/manufacturing building with a mezzanine, totaling approximately 7,487 square feet. Constructed in 1972, the building occupies the entire lot and includes a warehouse on the first floor and office space on the mezzanine level. It is currently vacant, most recently occupied by Metro Group – Response Electric Division. The building is heated with natural gas overhead blowers in the warehouse and a rooftop natural gas HVAC system heats and cools the remaining areas. There is no basement, and no industrial or manufacturing operations are currently conducted on-site.

1.1 Findings, Opinions, Conclusions, and Recommendations

Touchstone has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1537-21 of 36 Frost Street in Brooklyn, Kings County, New York (Block 2736, Lot 20). Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report.

This assessment has revealed the following evidence of RECs in connection with the Subject Property:

REC 1: HISTORICAL USE OF THE SUBJECT PROPERTY

- City Directory records indicate the Subject Property has been occupied by residential tenants (1934-1970), Wexler Tool & Die Corp (1976), Carlyle Products Inc (1985), Caccamo Woodworking Corp (1992-2005), and Response Electric (2020-

2017). Historical Sanborn Fire Insurance Maps show the development of residential and commercial/storage buildings from at least 1887 through 1942 including a rag storage building, and an accessory garage building in circa 1942, residential buildings and a parking lot in at least 1965, and the current building layout in 1972. Additionally, a review of NYC DOB records indicates the Subject Property was used for metal fabrication in at least 1976. Based on the historical operation of the property for light industrial uses including Wexler Tool & Tie Corp (1976), Caccamo Woodworking Corp (1992-2005) and Metal Fabrication (1976) the historical use of the Subject Property may have impacted upon it environmental quality and it is considered to represent a **recognized environmental condition (REC)**.

REC 2: E-DESIGNATION AT THE SUBJECT PROPERTY

- An E-designation (E-138) for Hazardous Materials and Air Quality was assigned to the Subject Property by the New York City Department of City Planning (NYCDCP) as part of the Greenpoint-Williamsburg Rezoning (City Environmental Quality Review [CEQR] No. 04DCP003K). E Designation E-138 established a notice of environmental requirements pertaining to hazardous materials and air quality (No operable window and/or air intakes limitations; Underground Gasoline Storage Tanks* Testing Protocol) that must be addressed to the satisfaction of the New York City Office of Environmental Remediation (NYC OER) prior to obtaining building permits for future alteration/redevelopment. The E-138 documentation indicates the E-Designation was determined based on the presence of a historic motor freight station/auto repair shop on-Site. Touchstone submitted a FOIL request to the NYC OER for further information regarding the E-designation listing. As of the date of this report, Touchstone has not received a response from the NYC OER. The E designation at the Subject Property is considered to represent a **recognized environmental condition (REC)**.

The following *considerations outside the scope of ASTM Practice E 1527-21* were identified in connection with the Subject Property:

OUTSIDE SCOPE ITEM 1: ACM

- Touchstone conducted a limited visual screening survey for the presence of asbestos-containing materials (ACM) at the Subject Property. Touchstone identified friable ACM in the form of sheetrock/joint compound composite material, , and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, sheet vinyl flooring and associated mastic, and various construction mastics and caulking. These materials were observed to be undamaged and in good condition at the time of assessment. Please note that this survey was limited to

visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Based on the condition of suspect ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. Suspect ACM do not present a problem when maintained in good condition. However, additional sampling, removal, and disposal arrangements may be necessary should building construction or renovation activities be conducted. Asbestos is a consideration outside the scope of ASTM E 1527-21 and is not considered a recognized environmental condition (REC).

2.0 INTRODUCTION & SCOPE OF WORK

2.1 Introduction

Touchstone Environmental Geology, PC (***"Preparer"***) has been retained by 36 Frost Street, LLC (The ***"User"***) to perform a Phase I Environmental Site Assessment at 36 Frost Street in Brooklyn, New York. The property will hereafter be referred to as the ***"Subject Property"***. This report documents the findings, opinions, and conclusions of the Phase I ESA of the property located at 36 Frost Street in Brooklyn, New York.

The purpose of a Phase I Assessment is to characterize the environmental quality of the Subject Property through the determination of the presence of Recognized Environmental Conditions (RECs). As defined by the American Society of Testing and Materials (ASTM), a REC is, defined in ASTM Practice E 1527-21 as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-21.

To this end, Touchstone Environmental Geology, PC has collected information through a number of sources including, but not limited to: a property and neighborhood inspection by trained environmental personnel, a review of historical and current information collected from various federal, state, county and municipal agencies and personnel interviews with Site representatives. Firms subcontracted by Touchstone Environmental Geology, PC and the User may have collected some information used in this report. Some or all of the Assessment has been performed or supervised by environmental professionals as required by 40 CFR Part 310. The procurement of Title and Judicial Records for Environmental Liens and/or Activity and Use Limitations ("AULs") by Touchstone Environmental Geology, PC is beyond the scope of this practice (ASTM E1527-21) and investigation.

2.2 Scope of Work

The general activities of the Phase I Assessment included the performance of the following tasks:

1. A detailed inspection of the Site and its general vicinity.
2. A review of all reasonably ascertainable regulatory agency documents.
3. A neighborhood hazardous waste survey utilizing Federal and State databases.

4. A review and evaluation of reasonably ascertainable geologic and hydrogeologic reference materials.
5. Interviews with representatives of the Site.
6. ASTM E2600 vapor encroachment screening.
7. Preparation of a Phase I Environmental Site Assessment.

The Phase I ESA was performed in accordance with both ASTM E 1527-21 and the AAI Rule except where noted in Section 2.3. As required by ASTM & AAI, the user has supplied information that has been relied upon by Touchstone Environmental Geology, PC in the rendering of findings, conclusions, and opinions, except where indicated in Section 2.3 or elsewhere in the report.

2.3 Limitations, Deviations and Exceptions

This Phase I Assessment is not intended to address the soil/groundwater quality at the Subject Property for general Site characterization or waste disposal purposes. This Phase I Assessment in not intended to evaluate the fair market price of the property if it is not affected by hazardous or petroleum products.

Portions of this report have been prepared utilizing information provided by third party sources or the user. As such, Touchstone Environmental Geology, PC relies upon these sources and has recorded findings, conclusions and opinions based upon this information. Touchstone Environmental Geology, PC cannot attest to the accuracy of this information but where possible had attempted to verify the information.

With respect to conditions outside the scope of the ASTM Standard, Touchstone observations are limited to physical observations and review of published data. Unless otherwise stated, no sampling for Asbestos Containing Materials, Lead Based Paint, Drinking Water, Radon, Mold, or Wetlands was conducted.

2.4 Special Terms and Conditions

This report can be relied upon by only the parties stated on the transmittal letter on the front of this report. Touchstone's liability to purchaser wishing to use this report is limited to the cost of the report. Amendments to Touchstone's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. Payment for the report is made by, and Touchstone's contract extends to 36 Frost Street, LLC only, in accordance with Touchstone's Terms and Condition and Touchstone's scope of work.

2.5 Data Gaps

Any data gaps identified herein, as defined by ASTM Practice E1527-21 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

2.6 Deviations

No deviations from the recommended scope of ASTM Standard E 1527-21 were performed as part of this Phase I ESA with the exception of any additional services noted in Section 2.2 Scope of Services.

2.7 User Reliance

This Phase I Environmental Site Assessment Report is for the benefit of 36 Frost Street, LLC and this report may not be relied upon by any other person or entity without the written consent of Touchstone.

Only if written agreement has been executed granting the right to utilize this report, no third party which obtains all of portion of this report shall have any rights of recourse or recovery under any course of action against Touchstone, its officers, employees, vendors, successors, or assigns.

Reliance is provided in accordance with Touchstone's Standard Phase I Environmental Site Assessment Contract and this report is for the benefit of 36 Frost Street, LLC and its successors and assigns. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of Touchstone.

3.0 SUBJECT PROPERTY DESCRIPTION

Touchstone was contracted by 36 Frost Street, LLC to conduct a Phase I Environmental Site Assessment (Phase I ESA) at the property identified as identified as 36 Frost Street in Brooklyn, Kings County, New York (herein referred to as the Subject Property). The Subject Property is identified as Block 2736, Lot 20.

3.1 Subject Property Ownership, Location, and Subject Property Description

According to the New York City Department of Finance (NYC DOF), the Subject Property is currently owned by LAUBEC 36, LLC. The Subject Property is located at 36 Frost Street in Brooklyn, New York, and totals approximately 0.17 acres. The Subject Property is located on the south side of Frost Street.

Figure 1 – Location Map depicts the location of the Subject Property on a street map of Brooklyn, New York. **Figure 2 – Site Plan** depicts the configuration of the Subject Property and adjoining properties.

Property Summary	
Property Name:	36 Frost Street
Subject Property Address:	36 Frost Street
Historical Addresses:	34, 36, and 38 Frost Street
Subject Property City, Town, State, Zip Code:	Brooklyn, New York 11211
Parcel ID:	Block 2736, Lot 20
Acreage:	0.17
Parcel Shape:	Rectangular
Building Description:	One-story 7,487-square foot industrial and manufacturing building with a mezzanine.
Electrical Provider:	Consolidated Edison
Natural Gas Provider:	National Grid
Trash Hauler:	New York City Department of Sanitation
Water Source:	New York City Department of Environmental Protection
Wastewater Disposal:	Municipal Sewer
Heating Source:	Natural Gas
Emergency Generator:	N/A
Current Use(s):	The Subject Property building is currently vacant and contains a warehouse on the first floor and office space on the mezzanine level.
Historical Use(s)	Residential tenants (1934-1970), Wexler Tool & Die Corp (1976), Carlyle Products Inc (1985), Caccamo Woodworking Corp (1992-2005), and Response Electric (2020-2017).

The Subject Property building occupies the entirety of the property and is bound to the north by a concrete paved sidewalk. The Subject Property building was constructed in 1972. There is no basement present beneath the existing structure. The Subject Property building is heated with natural gas overhead blowers in the warehouse area and the remainder of the building is heated and cooled with a natural gas HVAC system located on the roof. There are currently no industrial or manufacturing operations conducted at the Subject Property.

3.2 Adjacent Land Use

The Subject Property is located in a residential and commercial area. The following properties are identified immediately adjacent to the Subject Property:

Direction	Adjacent Parcel Information	Regulatory Agency Listings
North	Frost Street, followed by residential buildings (33-37 Frost Street) and a mixed-use residential and commercial building (39 Frost Street).	RCRA NONGEN/NLR, E MANIFEST, MANIFEST, NYC OVER, E DESIGNATION (31-33 Frost Street)
East	An industrial and manufacturing building occupied by a recording studio (The Sound City / Monthly Rehearsal Music Studios, 40 Frost Street).	NYC LAND USE, E DESIGNATION
Southeast	A residential building (55 Withers Street).	None Identified
South	A residential building (53 Withers Street), an unlicensed parking lot (51 Wither Street), and an industrial and manufacturing building (49 Withers Street).	None Identified
Southwest	A mixed-use residential and commercial building (47 Withers Street).	None Identified
West	A residential building (32 Frost Street).	None Identified

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties. Adjacent properties identified in the regulatory databases are further discussed in Section 5.1 of this report.

3.3 Environmental Setting

The environmental setting for the Subject Property is presented in the table below:

Environmental Setting Sources	
Topography:	According to the United States Geological Survey (USGS) Brooklyn, NY 7.5 Minute Series topographic map, the Subject's topographic elevation is approximately 16 feet above sea level. The Subject Property is relatively flat with a slight downward slope to the north northwest. The topography of the area is best described as flat. No outcrops of bedrock were noted during the Site Reconnaissance.
Geology:	The Subject Property is located within the Embayed section of the Coastal Plain physiographic province, which is characterized by areas of low relief and consists of Cretaceous Coastal Plain sediments, primarily clay, sand, and gravel, that overlie igneous and metamorphic rocks that crop out in Connecticut. The surface of these rocks slopes to the southeast, and the overlying Coastal Plain sediments slope and thicken in the same direction. Quaternary glacial deposits, primarily out-wash sand and gravel, cover the Coastal Plain sediments on Long Island to depths of as much as 600 feet.
Soil:	No bedrock outcroppings were observed at the Subject Property. According to the Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS) website (http://websoilsurvey.nrcs.usda.gov/app/), the dominant soil composition in the vicinity of the Subject Property is classified as Urban land, tidal marsh substratum, 0 to 3 percent slopes (UmA). According to the Environmental Data Resources, Inc. (EDR) GeoCheck Physical Setting Source Summary, the dominant soil composition in the vicinity of the Subject Property is classified as Urban Land. Urban land is characterized by a non-homogeneous distribution of soil and fill types. Excavation and backfilling for building foundations, utility conduits, subway systems and other construction results in a varied subsurface profile. In this setting, estimation of local subsurface parameters such as permeability, moisture content, and organic fraction is not feasible without site-specific testing data.
Surface Waters:	There are no bodies of water on or adjacent to the Subject Property. The nearest body of water is the East River, located approximately 3,839 feet northwest of the Subject Property.
Wetlands:	According to the National Wetlands Inventory, US Department of Interior, Fish and Wildlife Service, no federally regulated wetlands were identified on the Subject Property. Additionally, Touchstone Environmental Geology, PC, did not observe vegetation characteristic of wetlands at the Subject Property. No wetland habitats are located within 0.25 miles of the Subject Property.
Hydrogeology:	Under natural, undisturbed conditions, shallow groundwater flow generally follows the topography of the land surface and on this basis the topography suggests that groundwater flow across the Subject Property is

Environmental Setting Sources	
	towards the northwest in the direction of the East River. According to the USGS Depth to Groundwater in the New York Metropolitan Area map, the depth to groundwater at the Subject Property is estimated to be approximately 11 to 20 feet below land surface.

4.0 USER PROVIDED INFORMATION

The following section summarizes information provided by 36 Frost Street, LLC with regard to this Phase I Environmental Site Assessment. As of the date of this report, the User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The User Questionnaire is further discussed in Section 8.0.

4.1 Title Records

Title record information associated with the Subject Property has not been provided by The User, 36 Frost Street, LLC.

4.2 Environmental Liens and Activity and Use Limitations

The User, 36 Frost Street, LLC has provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property.

4.3 Specialized Knowledge

The User, 36 Frost Street, LLC provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. Touchstone Environmental Geology, PC was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property.

4.4 Commonly Known or Reasonably Ascertainable Information

The User, 36 Frost Street, LLC has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

4.5 Valuation Reduction for Environmental Issues

The User, 36 Frost Street, LLC has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

4.6 Owner, Property Manager, and Occupant Information

The User, 36 Frost Street, LLC provided contact information for the Subject Property owner, manager and/or occupants.

4.7 Reason for Performing Phase I ESA

The User, 36 Frost Street, LLC retained Touchstone Environmental Geology, PC to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-21, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is presented in **Appendix A**.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, Touchstone Environmental Geology, PC uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	**Approximate Minimum Search Distance**	**Subject Property Listed**	**Off-site Listings Within Search Distance**
Federal NPL Sites	1.0 mile	No	**2**
Federal Delisted NPL Sites	0.5 mile	No	0
Federal CERCLIS Sites	0.5 mile	No	**1**
Federal CERCLIS NFRAP Sites	0.5 mile	No	**2**
Federal RCRA CORRACTS Sites	1.0 mile	No	0
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	**Yes**	**1**
Federal Engineering / Institutional Control Sites	0.5 mile	No	0
Federal ERNS Sites	Property	No	NA
State and Tribal equivalent NPL Sites	1.0 mile	No	**28**
State and Tribal Spills Sites	0.125 mile	No	**27**
State and Tribal Landfill or Solid Waste	0.5 mile	No	**1**

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	**Approximate Minimum Search Distance**	**Subject Property Listed**	**Off-site Listings Within Search Distance**
Disposal Sites			
State and Tribal Leaking Storage Tank Sites (regulated and unregulated)	0.5 mile	No	**29**
State and Tribal Registered Storage Tank Sites	0.25 to 0.50 miles	No	**51**
State and Tribal Engineering / Institutional Control Sites	0.5 mile	No	**7**
State and Tribal Voluntary Cleanup Sites	0.5 mile	No	**90**
State and Tribal Brownfield Sites	0.5 mile	No	**23**
Local Lists of Registered Storage Tanks	0.5 mile	No	0
FINDS, ECHO, MANIFEST, NYC LAND USE, E DESIGNATION	Property	**Yes**	N/A

5.1.1 Federal Agency Database Records

National Priority List (NPL)
The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act.

Delisted National Priority List (NPL)
The National Oil and Hazardous Substance Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Superfund Enterprise Management System (SEMS)
SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Action (CERCLA). SEMS also contains sites that are either proposes to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for the possible inclusion of the NPL.

SEMS-Archive

SEMS-Archive tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS-NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-Archive sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA).

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post

remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Emergency Response Notification System (ERNS)
ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property.

5.1.2 State and Tribal Agency Database Records

State and Tribal equivalent CERCLIS Sites
State and tribal equivalent CERCLIS databases were searched for sites located within 1.0 mile of the Subject Property.

State and Tribal Spills Sites (Spills)
A review of available Spills databases was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property or any sites within 0.125 miles.

State and Tribal Landfill Sites and Solid Waste Disposal Sites
The state and tribal landfill and solid waste disposal site databases identify active or inactive landfill and transfer station facilities, as well as open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

State and Tribal Leaking Storage Tank Sites
Leaking Storage Tank Sites are properties where releases of hazardous substances or petroleum products from underground storage tanks (USTs) and/or aboveground storage tanks (ASTs) have been identified and reported to state, tribal, or local agencies.

State and Tribal Registered Storage Tanks
The State Registered Storage Tanks database is a listing of sites with registered above ground and/or underground storage tanks.

State and Tribal Engineering Control / Institutional Control Registries
The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or

affect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State and Tribal Voluntary Cleanup Sites

The Voluntary Cleanup Program (VCP) Properties database identifies low threat level properties with either confirmed or unconfirmed releases, for which the project proponents have requested that Department of Toxic Substances Control (DTSC) oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

State and Tribal Brownfield Sites

Brownfields are properties for which the expansion, redevelopment, or reuse may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Listing as a Brownfield site or a property that may be within a larger designated Brownfield area, does not necessarily indicate the property itself is contaminated.

Local Lists of Registered Storage Tanks

The Local Registered Storage Tanks database is a listing of sites with registered above ground and/or underground storage tanks.

5.1.3 Federal, State and Tribal Database Records Summary

Subject Property Listings:

Facility Name:	LOT 20, TAXBLOCK 2736; CACCAMO WOODWORKING CORP
Address:	36 Frost Street
Distance:	Subject Property
Direction:	NA
Hydrogeologic Position:	NA
Databases Listed:	NYC LAND USE, E DESIGNATION; FINDS
Identification Number(s):	CEQR No. 04DCP003K, E-No. E-138
Comments	An E-designation (E-138) for Hazardous Materials and Air Quality was assigned to the Subject Property by the New York City Department of City Planning (NYCDCP) as part of the Greenpoint-Williamsburg Rezoning (City Environmental Quality Review [CEQR] No. 04DCP003K). E Designation E-

	138 established a notice of environmental requirements pertaining to hazardous materials and air quality (No operable window and/or air intakes limitations; Underground Gasoline Storage Tanks* Testing Protocol) that must be addressed to the satisfaction of the New York City Office of Environmental Remediation (NYC OER) prior to obtaining building permits for future alteration/redevelopment. The E-138 documentation indicates the E-Designation was determined based on the presence of a historic motor freight station/auto repair shop on-Site. Touchstone submitted a FOIL request to the NYC OER for further information regarding the E-designation listing. As of the date of this report, Touchstone has not received a response from the NYC OER. The E designation at the Subject Property is considered to represent a **recognized environmental condition (REC)**. The Subject Property identified as Caccamo Woodworking Corp is listed in the FINDS database under Registry ID 110019466629. The EPA FRS Facility Detail Report indicates no NAICS Codes were returned and the SIC code description is listed as "WOOD PRODUCTS, NOT ELSEWHERE CLASSIFIED" (2499). Based on the type listing, this listing is considered unlikely to represent a current environmental concern.

Facility Name:	CON EDISON SERVICE BOX: 11824
Address:	38 Frost St
Distance:	Subject Property
Direction:	NA
Hydrogeologic Position:	NA
Databases Listed:	RCRA NON-GEN / NLR, FINDS, ECHO, MANIFEST
Identification Number(s):	EPA ID NYP004310512, Registry ID 110056508970
Comments	Con Edison at the Subject Property (38 Frost Street) is listed in the RCRA NONGEN / NLR, FINDS, ECHO, and MANIFEST databases. Con Edison is listed as a verified non-generator in the year 2013 under EPA ID NYP004310512. Con Edison reportedly generated small quantities of hazardous waste in 2013. The NY MANIFEST database indicates Con Edison generated approximately 100-gallons of lead hazardous waste in 2013. Based on the association of the listings with Con Edison and the type of waste generated, these listings are considered unlikely to represent an environmental concern.

Adjoining Property Listings:

Facility Name:	MHL CAPITAL PARTNERS LLC, 31 FROST STREET, LOT 36, TAXBLOCK 2731
Address:	31 Frost Street, 31-33 Frost St

Distance:	Adjacent (80-96 ft)
Direction:	North
Hydrogeologic Position:	Down-gradient
Databases Listed:	RCRA NON-GEN / NLR, E MANIFEST, MANIFEST, NYC OER, E DESIGNATION
Identification Number(s):	EPA ID NYR000238535
Comments	The adjoining property to the north is listed as a completed NYC OER Site. The NYC OER database indicates the property is in the Site Management phase. According to a review of the NYC OER database, the remediation of the Site included the excavation and removal of 610 tons of soil/fill, the collection of 10 soil endpoint samples which met Track 4 SCOs, the installation of a 20-mil Stego Wrap vapor barrier beneath the slab-on-grade portion of the building and Grace Preprufe 300R waterproofing/vapor barrier beneath the elevator pit up to grade, and the submission of a Site Management plan for long-term management of residual contamination including plans for inspection, maintenance, and certification of the ECs and ICs, and reporting at a specified frequency. MHL Capital Partners LLC at the property is additionally listed in the RCRA NON-GEN / NLR database as a verifies non-generator in the year 2019 under EPA ID NYR000238535. MHL Capital Partners LLC reportedly generated large quantities of lead hazardous waste in 2018. The NAICS code is listed as New Housing Operative Builders (236117). No violations were found. Based on the completed remediation of the property and the type of waste generated, the listing of the adjoining property in the NYC OER database is considered unlikely to represent an environmental concern.

Facility Name:	LOT 23, TAXBLOCK 2736
Address:	40 Frost Street
Distance:	Adjacent (9 ft)
Direction:	East
Hydrogeologic Position:	Cross-gradient
Databases Listed:	NYC LAND USE, E DESIGNATION
Identification Number(s):	E-138
Comments	An E-designation (E-138) for Hazardous Materials and Air Quality was assigned to the adjoining property to the east by the New York City Department of City Planning (NYCDCP) as part of the Greenpoint-Williamsburg Rezoning (City Environmental Quality Review [CEQR] No. 04DCP003K). E Designation E-138 established a notice of environmental requirements pertaining to hazardous materials and air quality (No operable window and/or air intakes limitations; Underground Gasoline Storage Tanks* Testing Protocol) that must be addressed to the satisfaction

	of the New York City Office of Environmental Remediation (NYC OER) prior to obtaining building permits for future alteration/redevelopment. The E-138 documentation indicates the E-Designation was determined based on the presence of a historic motor freight station/auto repair shop on-Site. The E designation at the adjoining property to the east is considered unlikely to represent an environmental concern. The adjoining property to the east, 40 Frost Street, is identified on the NYC LANDUSE database. The NYC LANDUSE database indicates the Subject Property is zoned M1-2/R6B: Mixed Manufacturing & Residential Districts with a building class of "F5: Factory and Industrial Buildings - Light Manufacturing." No further information is provided. This listing is considered unlikely to represent an environmental concern.

Nearby Properties:
No nearby Federal, State, Local and Tribal Agency Database listings of concern were identified.

5.2 Regulatory Agency Documents

Freedom of Information Act (FOIA) requests were issued to the following regulatory agencies with respect to the Subject Property. All reasonably ascertainable municipal records are provided with this report. **Appendix B** provides copies of the regulatory agency documents.

- New York City Department of City Planning
- New York City Department of Buildings
- New York City Department of Environmental Protection
- New York State Department of Environmental Conservation
- New York City Office of Environmental Remediation
- On-line Research of the Property

New York City Department of City Planning
Touchstone reviewed available tax files regarding the Subject Property at the New York City Department of City Planning (NYC DCP) website (https://zola.planning.nyc.gov/). The NYC DCP Subject Property identifies the property as 36 Frost Street, Brooklyn, NY (Block 2736, Lot 20) which contains 7,487-square feet. The NYC DOP website indicates the Subject Property contains one one-story industrial and manufacturing building which was constructed in 1972 and contains 7,487 gross square feet. The Subject Property owner is identified as LAUBEC 36, LLC.

New York City Department of Buildings

Touchstone reviewed available files regarding the Subject Property from the New York City DOB for information regarding past uses of the Subject Property. The NYC DOB identifies the Subject Property as 34 and 36 Frost Street in Brooklyn, New York (Block 2736, Lot 20). The Subject Property is identified as containing office buildings. The following Certificates of Occupancy (COs) are on file for the Subject Property:

- CO dated October 16, 1958: The CO indicates the Subject Property (36 Frost Street) containing vacant land used as a parking lot for motor vehicles. The CO further indicates the parking lot was used in association with a trucking company at 49 Frost Street.

- CO dated June 14, 1976: The CO indicates the Subject Property (36-38 Frost Street) contained a one-story building with a mezzanine. The first floor was used for the fabrication of metal products and accessory offices were located on the mezzanine. The CO further indicates a loading berth was located inside the building and lists the use of the subject property as "fabrication or metal products with accessory offices."

Permits for alterations are on file for the Subject Property dated 1935, 1941, 1953, 1958, and 1987; demolition permits are on file dated 1958 and 1971, an unsafe building permit is on file dated 1934, and a new building permit is on file dated 1969. No oil burner permits are on file for the Subject Property. An elevator application is on file for the Subject Property dated 1969, however, no elevator records are identified on the NYC DOB website.

There are no open Complaints, Violations-DOB, or open Violations-OATH/ECB on file for the Subject Property. The Subject Property is identified as an E-Designation Site for Hazmat and Air.

The historical use of the Subject Property for metal fabrication is considered to represent a **recognized environmental condition (REC)**.

New York City Department of Environmental Protection

Touchstone submitted an online request to the New York City Department of Environmental Protection (NYCDEP) for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property in accordance with the FOIA. The DEP has responded to our FOIA indicating that a diligent search for our request did not locate any records.

Additionally, the New York City DEP boiler permits database was researched (https://a826-web01.nyc.gov/DEP.BoilerInformationExt/). No boiler permits were identified for the

Subject Property Block and Lot; however, the following permit was identified for the Subject Property block and lot (Block 2736, Lot 20):

- Application ID PA053994, Application Type: Certificate to Operate – Industrial, Type of Equipment: Spray booth Area, Business Type: Industrial Spray booth, Expiration Date: 01/08/2002 Owner: CACCAMO Woodworking Corp.

New York State Department of Environmental Conservation

Touchstone has submitted an online request to the New York State Department of Environmental Conservation (NYSDEC) for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property in accordance with the Freedom of Information Act (FOIA). The NYSDEC has responded to our FOIA indicating that a diligent search of the files maintained by the DEC produced no responsive records.

New York City Office of Environmental Remediation

Touchstone has submitted an online request to the New York City Office of Environmental Remediation (NYC OER) for information regarding the E-Designation listing at the Subject Property in accordance with the Freedom of Information Act (FOIA). The NYC OER has responded to our FOIA indicating a diligent search for our request did not locate any records and that general information for E-Designation E-138 is available on the OER's website. A review of the NYC OER website indicates that the Subject Property has E-Designations for Hazardous Materials and Air Quality under E-138.

Online Research

An online search of the Subject Property address, 36 Frost Street, Brooklyn, New York, indicates that the Subject Property is occupied by an electrician (Metro Group – Response Electric Division).

6.0 SITE HISTORY

6.1 Current and Former Operations

Touchstone determined the history of the Subject Property dating back to 1940 or its first developed use. The Subject Property is currently owned by LAUBEC 36, LLC who purchased the property in 2010. The historical use of the Subject Property and surrounding area is summarized in the following sections.

6.2 Historical Documents Review

The historical document review focused on aerial photographs, topographic maps, Sanborn fire insurance maps, city directories, historical environmental reports, and local agency records.

Historical Fire Insurance maps depict the historic use of the Subject Property over time. Historical Fire Insurance Maps can also include the location of suspect gasoline tanks. A search for historical fire insurance maps depicting the Subject Property and its vicinity were available from Environmental Data Resources, Inc. (EDR). A copy of the fire insurance maps is provided in **Appendix C**. Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. Historical topographic maps may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. Historical aerial photographs and topographic maps were available for view at NetROnline (https://www.historicaerials.com/viewer). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in **Appendix D**.

The findings are outlined in the Historical Records Review and the Resource Materials Summary Tables below:

Resource Materials Summary		
Years	**Subject Property**	**Adjacent Properties**
Aerial Photographs		
1954 – 1966	Appears to be developed with several buildings/structures.	A roadway is present to the north of the Subject Property. Adjoining properties appear to contain buildings or series of buildings.
1980 – 2017	Appears to be developed with the current building.	No significant changes with the exception of a parking lot to the south of the Subject Property building.
2019 – 2022	No significant changes.	The adjoining properties to the north appear to contain the current building layouts. No other significant changes.
Topographic Maps		
1889 – 1891	No structures or features appear to be depicted.	A roadway is present to the north of the Subject Property. Adjoining properties to the west and northwest appear to be partially shaded to indicate development. Adjoining properties to the north, east, southwest, south, and southeast appear vacant, no structures or features are depicted.
1898 – 1948, 1959 – 1961	The Subject Property appears to be shaded black to indicate development.	Adjoining properties appear to be shaded black to indicate development.
1958, 1966 – 1999	The Subject Property appears to be shaded red to indicate development.	Adjoining properties appear to be shaded red to indicate development.
2013 – 2023	No structures or features appear to be depicted. The area is no longer shaded red to indicate development.	No structures or features appear to be depicted on the adjoining properties. The area is no longer shaded red to indicate development.
Fire Insurance Maps		
1887	Developed with a vacant building, two residential buildings, two one-story structures, one two-story structure, and one building labeled roofing. The addresses of the buildings are 34, 36 and 38 Frost Street.	A roadway (Frost Street) is present to the north of the Subject Property. Adjoining properties to the west, north, southeast, and south appear to contain residential buildings; the adjoining property to the east contains a vacant building and a residential building; and the adjoining property to the southwest contains a commercial building and a residential building.

Resource Materials Summary		
Years	**Subject Property**	**Adjacent Properties**
1905 - 1916	Developed with three residential buildings. two storage buildings, and several one-story and two two-story structures. The addresses of the buildings are 34, 36 and 38 Frost Street.	Adjoining properties appear to contain commercial and residential buildings.
1942	No significant changes.	Adjoining properties to the east (40 Frost Street) and south southwest (49 Withers Street) contain auto repair shops. No other significant changes.
1951	Developed with three residential buildings, an accessory garage building, and a building used for rag storage. The addresses of the buildings are 34, 36 and 38 Frost Street.	The adjoining property to the east (40 Frost Street) contains an auto repair shop, the adjoining property to the southwest (47 Withers Street) is occupied by an undertaker, and the adjoining property to the south southwest (49 Withers Street) contains a private garage building. No other significant changes.
1965	Developed with two residential buildings on the western portion of the property (34 Frost Street) and a parking lot on the remainder of the property (36 and 38 Frost Street).	The adjoining property to the east (40 Frost Street) is occupied by a motor freight station building and the adjoining property to the south southwest (49 Withers Street) contains a private garage and beverage depot. No other significant changes.
1978 – 1983	Developed with the current one-story building identified as a manufacturing building. The building continues to have multiple addresses (34, 36 and 38 Frost Street).	The adjoining property to the west (32 Frost Street) contains a warehouse building; the adjoining property to the south (51 Withers Street) appears vacant. No other significant changes.
1986 – 1991	No significant changes.	The adjoining property to the south (51 Withers Street) appears to contain a parking lot. No other significant changes.
1993 – 2007	No significant changes.	The adjoining property to the south southwest (49 Withers Street) contains an auto repair shop and beverage depot. No other significant changes.

City Directory Search (Subject Property)

The potential tenants of concern are identified for the Subject Property are listed in the table below:

STREET DIRECTORY SUMMARY – SUBJECT PROPERTY		
36 FROST STREET		
Year(s)	**Issues Noted**	**Occupants**
1976	**Yes**	WEXLER TOOL & DIE CORP
1985	No	CARLYLE PRODUCTS INC
1992, 1995, 1997	**Yes**	CACCAMO WOODWORKING CORP
2000	**Yes**	CACCAMO WOODWKG, CACCAMO WOODWORKING CORPORATION
2005	**Yes**	CACCAMO WOODWORKING CORP

The address 34 Frost Street is listed in the city directory in 1934, 960, 1965 and 1970. During these times, there are only residential listings.

The address 38 Frost Street is not listed in the city directory. However, based on information obtained from alternative sources, including Sanborn Fire Insurance Maps and historical building department records, the absence of city directory listings for this address is not expected to impact the findings of this Phase I Environmental Site Assessment and is not considered a significant data gap.

6.3 Historical Operations Summary

According to a review of historical Sanborn Maps and Aerial Photographs, the Subject Property appears to have been developed with residential and commercial/storage buildings from at least 1887 through 1942, was developed with residential buildings, a rag storage building, and an accessory garage building in circa 1942, residential buildings and a parking lot in at least 1965, and was developed with the current building layout in 1972. The City Directories indicate the Subject Property was occupied by residential tenants between 1934 and 1970 and commercial tenants from at least 1976 through 2017. The following environmentally sensitive listings were identified for the Subject Property:

- City Directory records indicate the Subject Property has been occupied by residential tenants (1934-1970), Wexler Tool & Die Corp (1976), Carlyle Products Inc (1985), Caccamo Woodworking Corp (1992-2005), and Response Electric (2020-2017). Historical Sanborn Fire Insurance Maps show the development of residential and commercial/storage buildings from at least 1887 through 1942 including a rag storage building, and an accessory garage building in circa 1942, residential buildings and a parking lot in at least 1965, and the current building layout in 1972. Additionally, a review of NYC DOB records indicates the Subject Property was used for metal fabrication in at least 1976. Based on the historical operation of the property for light industrial uses including Wexler Tool & Tie Corp (1976), Caccamo Woodworking Corp (1992-2005) and Metal Fabrication (1976) the historical use of the Subject Property may have impacted upon its environmental quality, and it is considered to represent a **recognized environmental condition (REC)**.

The Subject Property building is currently occupied by an electrician (Metro Group – Response Electric Division).

The Subject Property is located in a historically well-developed area of Brooklyn, New York. Adjacent properties were predominantly used for residential and commercial purposes.

Based upon the City Directory review, environmentally sensitive listings were not identified for the adjacent properties with the exception of the following:

- **49 Withers Street**: According to the City Directories, the adjacent property to the south located at 49 Withers Street was occupied by a woodworking and finishing company in at least 2020. A review of Sanborn Maps indicates the property operated as an auto repair shop in the years 1942 and 1993 through 2007 and as a private garage in the years 1951 through 1979. No spills or releases are associated with the adjoining property. Based on the absence of spills or releases, the historical operation of the adjoining property to the south is considered unlikely to represent an environmental concern.

- **40 Frost Street:** According to the City Directories, the adjacent property to the east located at 40 Frost Street was occupied by auto repair shops from at least 1928 through 1949. A review of Sanborn Maps indicates the adjoining property to the east (40 Frost Street) operated as an auto repair shop in the years 1928 through 1951 and as a motor freight station in at least 1965. No spills or releases are associated with the adjoining property. Based on the absence of spills or releases, the historical operation of the adjoining property to the east is considered unlikely to represent an environmental concern.

6.4 Previous Studies

Touchstone Environmental Geology, PC was not provided with any reports regarding the Subject Property.

6.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

6.6 Environmental Liens and Activity and Use Limitation

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

7.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Touchstone Environmental Geology, PC on May 16, 2025. The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Unimproved portions of the Subject Property were observed along the perimeter and in a general grid pattern in safely accessible areas. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise. Photographs of the Site Reconnaissance are provided in **Appendix E**.

Date of Inspection:	May 16, 2025
Touchstone Personnel:	Rachel Ataman
Site Representative(s) and Title(s):	Mr. Jose Nunez, Subject Property Real Estate Agent
Weather:	Partly sunny and approximately 76º Fahrenheit

During the survey, representative tenant spaces, mechanical spaces, and/or equipment and building components were observed. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

7.1 Site Reconnaissance

The following is a list of specific areas of environmental concern that were investigated by Touchstone personnel during the Site Reconnaissance:

Site Reconnaissance		
Feature	**Identified on Subject Property**	**Identified on Adjoining Properties**
Hazardous Substances and Petroleum Products	No	No
Waste Generation, Storage, and Disposal	**Yes**	No
Underground Storage Tanks	No	No
Aboveground Storage Tanks	No	No
Oil Containing Equipment and Polychlorinated Biphenyls (PCBs)	**Yes**	No

The following pertinent information was obtained during the Subject Property Site Reconnaissance:

7.2 Hazardous Substance and Petroleum Products

7.2.1 Hazardous Substances and Petroleum Products (identified uses):
Touchstone observed no evidence of suspect hazardous substances or petroleum products. Additionally, Touchstone did not identify any evidence of significant leaks, spills, or the improper storage or handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property.

7.2.2 Hazardous Substances and Petroleum Products (unidentified uses):
Touchstone did not observe evidence of hazardous substances or petroleum product containers at the Subject Property that were not in connection with identified uses.

7.2.3 Unidentified Substance Containers
Touchstone observed no evidence of unidentified substances at the Subject Property.

7.3 Waste Generation, Storage and Disposal

Touchstone identified the following waste streams at the Subject Property:

Classification	Type of Waste / Generation Process	Type of Storage / Location	Disposal Method / Contractor
Non-Regulated Waste	Solid Waste / Routine Site Operations	Dumpsters in Warehouse	New York City Department of Sanitation
Non-Regulated Liquid Waste	Sanitary Sewage / Routine Site Operations	N/A – Municipal Sewer	New York City Department of Environmental Protection

7.4 Underground Storage Tanks (USTs) & Aboveground Storage Tanks (ASTs)

7.4.1 Existing Storage Tanks
No evidence of existing USTs and ASTs was identified.

7.4.2 Former Storage Tanks
No evidence of former storage tanks was identified.

7.5 Oil-Containing Equipment and Polychlorinated Biphenyls (PCBs)

No potential PCB containing equipment was identified in the building with the exception of a hydraulic lift in the warehouse. No stains, odors, or spills were identified around the base of the hydraulic lift. Based on the absence of stains, odors, or spills, the presence of the hydraulic lift is considered unlikely to represent a significant environmental concern.

7.6 Additional Site Conditions

The following is a summary of additional observations made during the Site Reconnaissance:

Additional Site Conditions	
Interior Drains, Trenches, Sumps	No
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	No
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No

8.0 INTERVIEWS AND CLIENT / USER-PROVIDED INFORMATION

During the course of the Phase I Assessment, interviews were conducted with respect to the operation and history of the site and a Client/User Questionnaire was provided. As of the date of this report, the User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property.

8.1 Interviews

In accordance with ASTM E1527-21, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

8.1.1 Interview Summary

Ms. Ataman was accompanied by Mr. Jose Nunez, the Subject Property real estate agent, during the Site Reconnaissance. Mr. Nunez had only been affiliated with the Subject Property for a short period of time at the time of the Site Reconnaissance. Mr. Nunez reported that the warehouse portion of the building is heated with gas overhead blowers and the remainder of the building is heated and cooled with an HVAC system located on the roof.

8.1.2 Past Owners, Operators, and Occupants

Touchstone did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

8.1.3 Interviews with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

8.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the Subject Property. According to ASTM E1527-21 certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs

by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to Touchstone. Touchstone assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

9.0 VAPOR ENCROACHMENT SCREENING

Touchstone Environmental Geology, PC performed a vapor encroachment screening in accordance with ASTM E1527-21. This screening is not intended to satisfy the requirements of ASTM E2600-15.

The purpose of the screening is to determine if there are any potential chemicals of concern (COC) that may migrate as vapors into the vadose zone of the property as the result of contaminated soil and/or groundwater on or near the property. The scope of this screening was limited to visual observations and review of environmental database report and did not include the collection and laboratory analysis of air samples.

The results of the vapor encroachment screening indicate the historic use of the Subject Property for light industrial purposes may have impacted upon its vapor quality.

City Directory records indicate the Subject Property has been occupied by Wexler Tool & Die Corp (1976), Carlyle Products Inc (1985), Caccamo Woodworking Corp (1992-2005), and Response Electric (2020-2017). Additionally, a review of NYC DOB records indicates the Subject Property was used for metal fabrication in at least 1976. Based on the historical operation of the property for light industrial uses including Wexler Tool & Tie Corp (1976), Caccamo Woodworking Corp (1992-2005) and Metal Fabrication (1976) the potential for vapor impacts exists and the historical use of the Subject Property represents a potential vapor encroachment condition (PVEC) and a **recognized environmental condition (REC)**.

Additionally, the results of the Vapor Encroachment screening indicate that the historical and current adjacent property usage is unlikely to be impacting upon the vapor quality beneath the Subject Property.

10.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-21

10.1 Asbestos Containing Material (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable ACM are those which can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

Touchstone conducted a limited visual screening survey for the presence of asbestos-containing materials (ACM) at the Subject Property. Touchstone identified friable ACM in the form of sheetrock/joint compound composite material, , and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, sheet vinyl flooring and associated mastic, and various construction mastics and caulking. These materials were observed to be undamaged and in good condition at the time of inspection. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Based on the condition of suspect ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. Suspect ACM do not present a problem when maintained in good condition. However, additional sampling, removal, and disposal arrangements may be necessary should building construction or renovation activities be conducted. Asbestos is a consideration outside the scope of ASTM E 1527-21 and is not considered a recognized environmental condition (REC).

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the building would have been thoroughly surveyed and sampled. Touchstone did not observe ACM inside accessible areas of the building; however, based upon the age of the building suspect ACM may be present in inaccessible areas including but not limited to roofs, pipe chases, behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems.

10.2 Lead Based Paint (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm') or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act. In accordance with the scope of work for this assessment, no testing of the painted surfaces was conducted.

Based upon the non-residential use of the existing building and in accordance with the scope of work for this assessment, a lead-based paint (LBP) survey was not conducted at the Subject Property.

10.3 Lead in Drinking Water

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, the USEPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing such as lead solder, brass, bronze, and other lead containing alloys. The USEPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg/L).

Municipal water service is provided to the Subject Property by the New York City Department of Environmental Protection. Potable water is reportedly obtained from 19 reservoirs and three controlled lakes spread across a nearly 2,000-square-mile watershed. The watershed is located upstate in portions of the Hudson Valley and Catskill Mountains that are as far as 125 miles north of the city. New York City's water supply system is composed of two primary surface water supplies called the Catskill/Delaware and Croton. Based upon review of the 2024 New York City Drinking Water Supply and Quality Report, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, Touchstone did not conduct lead-in-drinking water sampling at the Subject Property.

10.4 Radon

Radon is a colorless, odorless, radioactive gas. Radon comes from the natural decay of uranium that is found in nearly all soils. Radon typically moves through the ground and

into buildings through cracks and openings in the foundation.

The EPA Map of Radon Zones indicates that Kings County is located within a Zone 3 radon area. Zone 3 is defined as an area that has a low potential for radon gas, with a predicted average indoor radon screening level less than 2.0 picoCuries per liter (pCi/L). The EPA recommended Action Level for radon is 4.0 pCi/L.

Based upon the low potential for radon gas and in accordance with the scope of work for this assessment, Touchstone did not conduct a limited short-term radon screening at the Subject Property.

10.5 Emerging Compounds

Per- and Poly-fluoroalkyl Substances, collectively PFAS, are an emerging class of environmental contaminants that have been receiving regulatory attention for the past several years. Based on their unique physical and chemical properties, widespread use in a variety of common consumer products, persistence and mobility in the environment, and toxicity to human health, releases of PFAS compounds to soil and groundwater represent a growing concern for environmental assessment and cleanup. PFAS have been used since the 1940s in many everyday consumer products. It is presumed that almost everyone has been exposed to some level of PFAS and have some residual level of PFAS in their blood stream. On the industrial side, PFAS compounds are used to manufacture plastics, coat paper and cardboard products, insulate wire, as a mist suppressor for electroplating, in photography and film products manufacturing and much more. PFAS compounds are also the primary agents in fire-fighting foams.

The United States Environmental Protection Agency (USEPA) has not yet designated PFAS as a hazardous substance under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA); however, individual states are adopting policies and regulations to address PFAS, including establishing Maximum Contaminant Levels (MCLs) for PFAS in drinking water and developing soil and groundwater standards. PFAS compounds were evaluated in relation to current and historic uses of the Subject Property and surrounding properties that might be known or suspected to have utilized PFAS in their operations. This report does not include an evaluation of PFAS compounds.

11.0 DISCUSSION OF RESULTS

Touchstone has performed a Phase I Environmental Site Assessment (Phase I ESA) in conformance with the scope and limitations of ASTM Practice E1537-21 of 36 Frost Street in Brooklyn, Kings County, New York (Block 2736, Lot 20). Any exceptions to, or deletions from, this practice are described in Section 2.3 of this report.

11.1 Data Gaps

A data gap is defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interview (for example, an inability to interview the key site manager, regulatory officials, etc.). A significant data gap is a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

This assessment has not revealed any significant data gaps in connection with the Subject Property.

11.2 Historic Recognized Environmental Conditions (HRECs)

An HREC is defined as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

This assessment has not revealed any HRECs in connection with the Subject Property.

11.3 Controlled Recognized Environmental Conditions (CRECs)

A CREC is defined as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

This assessment has not revealed any evidence of CRECs in connection with the Subject Property.

11.4 Recognized Environmental Conditions (RECs)

A Recognized Environmental Condition (REC) is defined as(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

This assessment has revealed the following evidence of RECs in connection with the Subject Property:

- **REC 1: HISTORICAL USE OF THE SUBJECT PROPERTY**

  City Directory records indicate the Subject Property has been occupied by residential tenants (1934-1970), Wexler Tool & Die Corp (1976), Carlyle Products Inc (1985), Caccamo Woodworking Corp (1992-2005), and Response Electric (2020-2017). Historical Sanborn Fire Insurance Maps show the development of residential and commercial/storage buildings from at least 1887 through 1942 including a rag storage building, and an accessory garage building in circa 1942, residential buildings and a parking lot in at least 1965, and the current building layout in 1972. Additionally, a review of NYC DOB records indicates the Subject Property was used for metal fabrication in at least 1976. Based on the historical operation of the property for light industrial uses including Wexler Tool & Tie Corp (1976), Caccamo Woodworking Corp (1992-2005) and Metal Fabrication (1976) the historical use of the Subject Property may have impacted upon its environmental quality, and it is considered to represent a **recognized environmental condition (REC)**.

- **REC 2: E-DESIGNATION AT THE SUBJECT PROPERTY**

  An E-designation (E-138) for Hazardous Materials and Air Quality was assigned to the Subject Property by the New York City Department of City Planning (NYCDCP) as part of the Greenpoint-Williamsburg Rezoning (City Environmental Quality Review [CEQR] No. 04DCP003K). E Designation E-138 established a notice of environmental requirements pertaining to hazardous materials and air quality (No operable window and/or air intakes limitations; Underground Gasoline Storage Tanks* Testing Protocol) that must be addressed to the satisfaction of the New York City Office of Environmental Remediation (NYC OER) prior to obtaining building permits for future alteration/redevelopment. The E-138 documentation indicates the E-Designation was determined based on the presence of a historic motor freight station/auto repair shop on-Site. Touchstone submitted a FOIL request to the NYC OER for further information regarding the E-designation listing.

As of the date of this report, Touchstone has not received a response from the NYC OER. The E designation at the Subject Property is considered to represent a **recognized environmental condition (REC)**.

11.5 De Minimis Conditions

A de minimis condition is defined as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies.

This assessment has not revealed any evidence of any de minimis conditions in connection with the Subject Property.

11.6 Business Environmental Risks (BERs)

A BER is defined as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated.

This assessment has not revealed any evidence of BERs conditions in connection with the Subject Property.

11.7 Considerations Outside the Scope of ASTM Practice E 1527-21

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water, radon, mold, and wetlands. Considerations outside the scope of ASTM E 1527-21 are not considered to represent recognized environmental conditions (RECs).

The following *considerations outside the scope of ASTM Practice E 1527-21* were identified in connection with the Subject Property:

- **OUTSIDE SCOPE ITEM 1: ACM**

  Touchstone conducted a limited visual screening survey for the presence of asbestos-containing materials (ACM) at the Subject Property. Touchstone identified friable ACM in the form of sheetrock/joint compound composite material, , and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, sheet vinyl flooring and associated mastic, and various construction mastics and caulking. These materials were observed to be undamaged and in good

condition at the time of assessment. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems. Based on the condition of suspect ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. Suspect ACM do not present a problem when maintained in good condition. However, additional sampling, removal, and disposal arrangements may be necessary should building construction or renovation activities be conducted. Asbestos is a consideration outside the scope of ASTM E 1527-21 and is not considered a recognized environmental condition (REC).

12.0 RECOMMENDATIONS

Based upon the findings of this investigation, Touchstone recommends the following:

- **REC 1:** A subsurface investigation should be performed at the Subject Property to determine if historical operations have impacted upon its environmental quality.

- **REC 2:** The Subject Property has an E-Designation (E-138) for "No operable window and/or air intakes limitations; Underground Gasoline Storage Tanks* Testing Protocol," which was added as part of the Greenpoint-Williamsburg Rezoning (CEQR 04DCP003K). This means that before any redevelopment or renovation takes place, an environmental assessment and review by the New York City Office of Environmental Remediation (NYC OER) is required to determine whether the current and/or past use of the property has affected the subsurface, and if additional investigation or remediation is needed. Because of this E-Designation, the NYC OER must issue a Notice to Proceed before the property can be redeveloped. If development is planned in the near future, then Touchstone recommends any subsurface investigations be coordinated with the NYCOER prior to their implementation.

- **OUTSIDE SCOPE 1:** Touchstone recommends the development and implementation of an Asbestos Operations and Maintenance (O & M) Plan for the Subject Property. This O&M Plan provides the procedures and guidelines that, when used during facility cleaning, maintenance, and general operations, will minimize human exposure to asbestos fibers and minimize release of asbestos fibers to the environment. This O&M Plan is a long- term management approach. Touchstone additionally recommends that a comprehensive asbestos inspection be conducted prior to significant renovation or demolition of the buildings.

13.0 CREDENTIALS & DECLARATION

13.1 Credentials

In accordance with ASTM Practice E1537-21, the credentials of those personnel directly involved with the production of this Phase I are provided with this report. **Appendix F** provides a copy of the personnel credentials.

13.2 Environmental Professional Declaration

We declare that to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in 40 CFR Part 312.21(d). We have the specific qualifications based on education, training, and experience to access a property of the nature, history and setting of the Subject Property. Only where indicated we have developed and performed the AAIs in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

15.0 EXCLUSIONS & DISCLAIMER

The observations described in this report were made under the conditions stated therein. The conclusions presented in the report were based solely upon the services described therein, and not on scientific tasks or procedures beyond the scope of described services or the time and budgetary constraints imposed by the Client.

In preparing this report, **Touchstone Environmental Geology, PC**, may have relied on certain information provided by state and local officials and other parties referenced therein, and on information contained in the files of state and/or local agencies available to **Touchstone Environmental Geology, PC**, at the time of the subject property assessment. Although there may have been some degree of overlap in the information provided by these various sources, **Touchstone Environmental Geology, PC**, did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this subject property assessment.

Observations were made of the subject property and of structures on the subject property as indicated within the report. Where access to portions of the subject property or to structures on the subject property was unavailable or limited, **Touchstone Environmental Geology, PC**, renders no opinion as to the presence of non-hazardous or hazardous materials, or to the presence of indirect evidence relating to a nonhazardous or hazardous materials, in that portion of the subject property or structure. In addition, **Touchstone Environmental Geology, PC**, renders no opinion as to the presence of hazardous materials, or the presence of indirect evidence relating to hazardous materials, where direct observation of the interior walls, floors, or ceiling of a structure on a subject property was obstructed by objects or coverings on or over these surfaces.

Touchstone Environmental Geology, PC, did not perform testing or analyses to determine the presence or concentration of asbestos at the subject property or in the environment of the subject property under the scope of the services performed.

The conclusions and recommendations contained in this report are based in part, where noted, upon the data obtained from a limited number of soil samples obtained from widely spaced subsurface explorations. The nature and extent of variations between these explorations may not become evident until further exploration. If variations or other latent conditions then appear evident, it will be necessary to reevaluate the conclusions and recommendations of this report.

Any water level reading made in test pits, borings, and/or observation wells were made at the times and under the conditions stated in the report. However, it must be noted that fluctuations in the level of groundwater may occur due to variations in rainfall and other

factors different from those prevailing at the time measurements were made.

Except as noted within the text of the report, no qualitative laboratory testing was performed as part of the subject property assessment. Where such analyses have been conducted by an outside laboratory, **Touchstone Environmental Geology, PC**, has relied upon the data provided, and has not conducted an independent evaluation of the reliability of the data.

The conclusions and recommendations contained in this report are based in part, where noted, upon various types of chemical data and are contingent upon their validity. The data have been reviewed and interpretations were made in the report. As indicated within the report, some of the data may be preliminary "screening" level data and should be confirmed with quantitative analyses if more specific information is necessary. Moreover, it should be noted that variations in the types and concentrations of contaminants and variations in their flow paths may occur due to seasonal water table fluctuations, past disposal practices, the passage of time, and other factors. Should additional chemical data become available in the future, the data should be reviewed, and the conclusions and recommendations presented herein modified accordingly.

Chemical analyses have been performed for specific constituents during the course of this subject property assessment, as described in the text. However, it should be noted that additional chemical constituents not searched for during the current study may be present in soil and/or groundwater at the subject property.

This report was prepared solely for the use of the Client/User and is not intended for use by third parties. Unauthorized third parties shall indemnify and hold **Touchstone Environmental Geology, PC**, harmless against any liability for any loss arising out of, or related to, reliance by any third party on any work performed hereunder, or the contents of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 03/27/2025 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MEEKER AVENUE PLUME	***MEEKER AVENUE***	***ENE 1/4 - 1/2 (0.482 mi.)***	***0***	***11***
NEWTOWN CREEK	***SOUTH END OF IVY HIL***	***E 1/2 - 1 (0.963 mi.)***	***0***	***16***
Cerclis ID:: 206282				
EPA Id: NYN000206282				

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS

site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MEEKER AVENUE PLUME	***MEEKER AVENUE***	***ENE 1/4 - 1/2 (0.482 mi.)***	***0***	***11***

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 17 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/03/2025 has revealed that there are 28 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 12/11/2024 has revealed that there is 1 NY SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/02/2025 has revealed that there are 29 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 28 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/02/2025 has revealed that there are 27 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 72 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: NYP004146817

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/30/2025 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 25 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 15 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 84 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 NY HSWDS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CITY BARREL	421 MEEKER STREET	ENE 1/8 - 1/4 (0.245 mi.)	AP493	1376

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 12/31/2019 has revealed that there are 121 NY MANIFEST sites within approximately 0.25 miles of the target property.

NY MGP: From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel for heating, cooking, and lighting. Today, the New York State DEC is overseeing the investigation and cleanup of contamination left behind from these plants.

A review of the NY MGP list, as provided by EDR, and dated 12/02/2024 has revealed that there are 2 NY MGP sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 4 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	6/21/2011: In support of a Remedial Investigation being conducted at the former Klink Cosmo Cleaners site (DEC ID No. 224130, located at 364 Richardson Street), DEC monitoring well DEC-048 was being gauged for sampling. This well is located on the south side of Withers Street between Morgan and Vandervoort Avenues, and is located 2 blocks south of the Klink Cosmo site adjacent to the Joseph H. Lowenstein and Sons chemical works. The Department consultant (URS Corporation) noted the presence of 0.03' of petroleum product in the well. Based on this discovery, the DEC PM directed URS personnel to call in a spill. (Harrington) 5/30/14 -

WELL DEC-048 (Continued) **S111065041**

Austin - Spill transferred from
Rahman to Mahat for followup with URS on what happended with this monitoring well - end 6/22/15:
Mahat Left a voice message to Tim inquiring more information about the spill and its progress.
3/2/2016: The Department's consultant (URS) has gauged monitoring well DEC-048 five (5) times since
the original discovery of product in June 2011 (10/17/2011, 7/23/2012, 2/25/2013, 12/12/2014, and
12/7/2015). No measurable product has been noted since June 2011. In addition, monitoring wells
located in the vicinity (DEC-032, DEC-045, DEC-046, DEC-066, and DEC-091) have never shown any
measurable product. Spill closed. (Harrington)

Remarks: DEC Site #2-24-130. 0.03 of a foot thick of oil in the well on top of water.

Environmental Interest/Information System:

The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	ANTHONY MARIANO
Latitude:	Not reported
Longitude:	Not reported
DEC Memo:	2 - 275 gal tanks near the front of the building basement (probably NOT the source of the problem) Another building behind this one is vacant and had a water main break. Water flooded across the property line into this building. The basement was pumped out. Then they dug a hole in the floor near the rear of the basement to install a sump pump. The next day a mix of water with an oil sheen campe up thorugh the floor. Anthony Mariano from Milro will schedule a site visit with Ryan Piper in the next couple of days. 02/12/09-Hiralkumar Patel. spoke with Anthony at Milro. he mentioned that due to water main brake, basement at the subject site was flooded

RESIDENCE (Continued) **S109414939**

with water and had sheen on
it. FDNY Hazmat and DEP responded to the site. after initial cleanup, sump pumps set up in couple
of rooms in basement. lateron sheen was observed on water in sump in bedroom which is adjacent to
boiler room. Anthony also mentioned that there is a vacant building behind subject site which was
gas station in past and owner suspect that oil coming from this vacant building. C.F.A., Inc.
building owner 2977 Mandalay Beach Wantagh, New York 11793 Attn.: Carmine Infante **President**
PH. (516) 779-2534 (C) email: italym31@aol.com spoke with Mr. Infante. he baught building in 2003
and site has two 275 gal #2 oil ASTs in basement. tanks are located towards front end of building
and oily water coming through foundation in back of the basement. Mr. Infante mentioned that there
is an abandoned gas station (64 Frost Street, Brooklyn) behind his building and suspect leak at the
gas station. visited site at 11 AM. met Carmine. found odors and sheen on water inside sump located
in bedroom. no odors noticed in other part of basement. basement apartmet is not continuously
occupied as Carmine lives in this basement apartment for couple of days in month. boiler room
located behind bedroom. one sump located in boiler room. two other sumps located in room behind
bathroom, on north side of boiler room. supply line for tank system at the site, runs aboveground
and didn't found any spill in visible areas. no spill noticed under tank location. Carmine removed
concrete and some soils from boiler room as was impacted with contaminated water. removed soil
stockpiled in backyard of the building, which is behind abandoned gas station site. asked Carmine
to backfill sumps to avoid any odors inside building. Carmine choose to backfill sumps in bedroom
and in boiler room. will keep sumps in adjacent room to the boiler room. also asked Carmine to test
his tank system to confirm tightness of the system. there is another commercial property (297
Meeker ave/56 Frost Street) between the subject site and the gas station site. inspected gas
station site also. found excavated area in front of on-site stores. this excavated area could be
location of previous gasoline/diesel tanks. also found signs of borings on concrete surface in
front of stores. gas station located at 64-66 Frost Street at the intersection of Frost street and
Meeker Ave. owner of abandoned gas station site: Paul Joffe Paul's LLC 318 Grand Street Brooklyn,
NY 11211 Ph. (718) 486-6916 according to building department permit record, Mr. Joffe applied for
permit to convert service station into dinning location. found two spill cases reported at the gas
station site. 1. 9601530: tank test failure reported on 04/30/1996. case still open. 2. 9806871:

RESIDENCE (Continued) **S109414939**

spill called in by citizen on 09/04/1998 about abandoned tanks; tipped over. spill closed on
02/26/2003. received call from Mr. Carter from Mr. Joffe's office. informed him about situation and
asked him to provide all documents regarding spill case at the gas station site. Nathan Carter Ph.
(718) 486-6804 02/18/09-Hiralkumar Patel. received fax from Carmine with letter from Century
Utility Systems, Inc, who tested two 275 gal AST systems and found tanks tight. spoke with Carmine.
he mentioned that he will keep sump in bedroom but will cover it and seal it from top. asked
Carmine to seal sump property to avoid any odors inside building. based on result of tank test and
suspecting upgradient spill at abandoned gas station, case closed. refer to spill #: 9601530.
03/13/09-Hiralkumar Patel. spoke with Carmine. told him that groundwater under gas station is not
flowing towards his property so whatever sheen was observed on water in sump, could be coming from
somewhere else. he mentioned that no more sheen observed in sump. suggest him to close sump to
prevent flooding in basement with contaminated water.

Remarks: CALLER STATES THAT A WATER MAIN BROKE RESULTING IN HIS BASEMENT BEING FLOODED. THERE IS A SHEEN ON THE WATER, THE SUMP WAS IMPACTED.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was K FOLEY 3/14/03 REASSIGNED FROM TIBBE TO VOUGHT. 12/1/03 Transferred from Vought to Foley. 10/16/06 reassigned from Foley to Tang. (Sun) 11/06/08: This spill case transferred from K. Tang to J. Kolleeny. Recommended to Vadim Brevdo that this spill be added to MTBE Pilot Project, Vadim agreed. - J. Kolleeny 02/05/09: Contacted Jay Semelmacher (emergency contact on PBS form, #2-247405). He didn't have any information regarding the site and suggested sending a letter to Spartan Petroleum. Spartan Petroleum Corp. 333 New Hyde Park Road Suite 201 New Hyde Park, NY 11042 (JK/KG) 02/09/09: Letter sent to Spartan requiring: 1. Tank closure assessment report, 2. Explanation of the cause of the release, 3. Subsurface investigation report, including a site location map and a site plan showing the former and current locations of underground storage tanks and soil and groundwater sampling locations. A North arrow and scale bar must be included on the site plan. If no tank closure report was prepared or no subsurface investigation previously conducted, the Department requires that a work plan for a site assessment including a soil and groundwater investigation be prepared and submitted. The work plan should include a site location map and a site plan showing proposed soil and groundwater sampling locations, as well as current and former tank locations. A North arrow and scale bar must be included on the site plan. Report due 03/19/2009. (JK/KG) 02/12/09: Rec'd letter dated 02/10/2009 from Kevin Kleaka of Impact Environmental stating that this spill has already been closed. Included was the UST Closure Report prepared by Impact dated 10/6/2004 and the No Further Action Letter dated 10/7/2004. Upon review of the documents, the spill was closed by Kevin Hale (central office) in 2004. At that time, this spill was not closed in the NYSDEC database. The spill is now closed in the database and the UST closure report and NFA letter have been uploaded to eDocs. (JK/KG)
Remarks:	GEO PROBE SURVEY ON SITE, FOUND CONTAMINATION.

DEC Memo:	5/7/2012 - KGH Spoke to Charlie Sossik of EBC. Site is a vacant gas station (over a decade) and the site of closed spill #9414922. Residual soil contamination encountered outside the footprint of former excavation during Phase Two Investigation for prospective buyer. Photo of site from Google Earth entered into EDOCs. According to EBC groundwater beneath the site was clean providing further evidence that remedial efforts at the site were largely successful. For further information please refer to spill # 9414922. Spill Closed. KGH
Remarks:	old gas station - large amount in soil - history spill - clean up pending - underground tanks - were removed a while ago old spill # 94-14922

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	JOHN SCHRETZMAYER
Latitude:	40.7176696
Longitude:	-73.9496103
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 3/19/2003 - JZ/DO: The caller was hired for a site subsurface investigation for property re-finance. Soil and GW samples was analyzed with EPA method 8260 and found contaminations. This site is currently a warehouse. There is no tank evidence. It was a dry cleaner at this location in history. There is no dry cleanner solvents found during the site assessment. Next property is a DEP's repair shop. DO has requested site assessment report snet to Sangesland. The current owner info: Fratelli Ricatto Developement, 391 Leonard Street, Brooklyn, NY 11211-1301. 11/15/05 called John Schretzmayer and left message to call me. J Lister 11/17/05 spoke with John Schretzmayer (516-658-5304) and he will send work plan. J Lister 10/30/06 Reassigned from Lister to Sun. (MS) 11/27/06 Reviewed Groundwater Monitoring and Sampling Plan dated 10/11/06 and submitted by Hydro Tech Environmental (contact: Mark E. Robbins phone: 631-462-5866). Faxed letter report on 11/27/06 requiring the following: It must be demonstrated that groundwater contaminant concentrations are decreasing to Groundwater Quality Standards in a reasonable time frame. Therefore, the Department requires that one (1) more round of groundwater monitoring and sampling be performed as well as an Exposure Assessment/Sensitive Receptor Survey, before the above referenced spill can be considered for closure. VOC contamination is only observed in 2 of the 5 wells onsite and are obviously decreasing over time, however one more sampling event will confirm natural attenuation.(JS/MS) 2/12/07: NYSDEC received Exposure Assessment Report and latest groundwater analytical results on 2/9/07 and is reviewing. (JS/MS) 2/14/2007: Upon receipt and review of the Exposure Assessment Report as well as the results of the latest groundwater sampling event for this site, submitted by Hydro Tech, this spill site has been closed and a No Further Action letter has been sent to the property owner and consultant. The following is a brief summary of factors supporting this action. As stated in the

59-65 FROST STREET (Continued) **S106012371**

Report; the source of contamination has been removed, no significat receptors or exposure pathways
are present at the site, and a 90% decrease in overall VOC concentration has been observed over
time. Only limited VOC contamination remains (1,3,5 and 1,2,4 Trimethylbenzene= 8.57 and 6.7 ug/L,
respectively) in one monitoring well. No further action is needed, spill case is closed. (JS/MS)

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: 01/22/10-Hiralkumar Patel. spoke with Chris (at 4:05 PM on 01/21/10) at NYC DEP. Chris mentioned
that he went to site, but site was locked. he smelled odors in area. 7:30 AM:- visited site. met
Afifa Mahmood, construction supervisor/property manager. Afifa mentioned that odors coming from a
strom drain catch basin located at the intersection of Union Ave and Richardson Street. walked
through contrucstion site. currently piles being installed for new 7 story residential building
with no basement. as per Afifa, elevator pit will go down to 5 ft bg and there will be a vapor
barrier installed. found water in couple of holes in site, but no sheen or petroleum odors from
excavation holes. Afifa mentioned that they are dewatering excavation holes into a concrete well
which is located on-site and once they install piles, they put water back into hole. no dewatering
into city sewer system. Afifa asked to contact their architect Robert Jakel about any environmental
investigation work prior to construction. inspected catch basin at the intersection of Union ave
and Richardson street. found mixed odors in area. current project includes three lots (Block: 2731;
Lot #s: 1, 45 and 47) and owner baught these properties in 2008 and at that time all lots were
empty lot (no buildings on-site). Block/Lot - 2731/1:- addresses: 568-580 Union Ave, 2-16
Richardson St, 1-9 Frost St Block/Lot - 2731/45:- address: 13-15 Frost Street Block/Lot - 2731/47:-
address: 11 Frost Street 568 Union Ave LLC. **property owner** c/o Heatherwood Communities LLC.
managment company 1737 Veterans Memorial Highway Islandia, NY 11749 Attn.: Afifa Mahmood
property manager Ph. (718) 963-0635 Fax (718) 963-0435 email: afifa@heatherwoodapartments.com
568union@heatherwoodapartments.com Robert Jakel **architect** Ph. (212) 219-9733 Ext. 15 9:02 AM:-
left message for Mr. Jakel. found PBS record at 568 Union ave property. no spills history at 568
Union Ave. no PBS or spill records found at 11 Frost Street or 13-15 Frost street. PBS #:-
2-610135. as per PBS record, 568 Union Ave site had one 4,000 gal #6 oil UST which was removed on
01/29/06. 9:57 AM:- spoke with Mr. Jakel. he mentioned that Phase I was done during property
transaction and there were no recognized conditions that may require Phase II, so Phase II was
never conducted. 10:00 AM:- spoke with Holly at Heatherwood. she has Phase I report and will send
copy next week. Holly O'Brien Heatherwood Communities, LLC. PH. (631) 234-1600 Ext. 243 from NYCDOB

CONSTRUCTION/EXCAVATION SITE (Continued) **S110139781**

website found that all three lots has E restriction for Hazmat. 10:08 AM:- spoke with Afifa. she
mentioned that Phase II was done by previous owner before property transaction. asked Afifa to send
copy of Phase I and Phase II for review. 10:46 AM:- received email from Ms. O'Brien with copy of
Phase II report. Phase II report was prepared by Don Carlo in April 2007. abstract: - did GPR
survey and found no underground anomalies - eleven soil borings (B-1 through B-11) were installed
to depht of 12 ft bg where groundwater found - soil was screened every four feet and found no PID
readings - collected two soil samples from each borings: one at 0-4 ft and second at 8-12 ft depth
(groundwater interface) - collected total of three groundwater samples from borings B-1, B-4 and
B-8 where temporary well points installed to depth of 14 ft bg - fill material encountered
throughout site from 0-4 ft - found heavy SVOCs and metals in soil samples and groundwater sample -
no VOC contamination found in any samples except Naphthalene (max: 1,000 ppb in B-6 at 8-12 ft
depth) Ms. O'Brien will send copy of Phase I, RAP and CHASP. 01/25/10-Hiralkumar Patel. 3:39 PM:-
received Phase I and RAP from Afifa. Based on submitted documents, case closed.

Remarks: ANON. 311 CALL TO DEP, REPORTING HEAVY SMELL OF PETROLEUM PRODUCT IN THE AIR AT ABOVE LOCATION. REPORTED LATE DUE TO MISCOMMUNICATION W/IN DEP.

Program:	BCP
Site Code:	508516
Acres:	Not reported
HW Code:	C224178A
SWIS:	2401
Town:	New York City
Record Added Date:	06/01/2015
Record Updated Date:	10/21/2019
Update By:	GWBURKE
Site Description:	"Location: Former Driggs Plywood off-site is an undefined area near the on-site area where additional investigation is planned. The off-site area is within a residential area immediately north of the Former Driggs Plywood (Driggs) Brownfield site at 11 Jackson Street in the Williamsburg section of Brooklyn (Kings County). Site Features: The site is a urban residential area of single-family houses immediately north of Driggs. Current Zoning and Land Use: Jackson Street intersects with Meeker Avenue at the southeast corner of the site. Meeker Avenue is a commercial corridor that runs under the Brooklyn-Queens Expressway. Immediately north and behind the site is a street of single family homes. Nearby, there is significant redevelopment that is occurring or has recently been completed that largely consists of multi-story, multi-unit residential buildings. Past Use of the Site: The on-site area was first developed sometime prior to 1887 as three residential lots. Circa 1962 until about 1973, Driggs Plywood operated at the site. From the early 1950s through 2007 the three lots were combined as one and occupied by a building

FORMER DRIGGS PLYWOOD CORP. - OFF-SITE (Continued) **S128906187**

labeled lumber storage that encompassed the entire lot. Arnmart Beer Distributors occupied a portion of the site in the late 1990s and Car Fashion Seat Covers operated on site in the 2000s. The building is currently vacant but was most recently occupied by a charter bus maintenance/repair garage in the western half of lot and a metal fabrication shop on the east. Site Geology and Hydrogeology: Subsurface soils at Driggs include a mixture of silty non-native fill to approximately 6 feet below grade followed by sandy-silt to approximately 10 feet below grade. Groundwater table at the site is approximately 8 feet below surface grade within the native silty-sand. Based upon regional contour maps groundwater flow is expected to be west toward the East River."

Env Problem:	"Nature and Extent of Contamination: Relative to the on-site area of the Former Driggs Plywood BCP site, various VOCs were detected in on-site soil vapor. PCE and TCE were detected at maximum concentrations of 8,270 g/M3 and 12,300 g/M3, respectively. No off-site investigation work has been conducted yet. The on-site soil and groundwater data don t show evidence of significant contamination, but the elevated VOCs in soil vapor indicate the potential for an as-yet undetected on-site source. Soil vapor samples will be collected on-site following remediation of the on-site area; based on that data it will be determined if off-site soil vapor sampling is needed."
Health Problem:	"People are not drinking contaminated groundwater because the area is served by a public water supply not affected by the site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling indicates that soil vapor intrusion represents a concern for on and off-site structures and additional evaluation is necessary to determine the potential for exposure to contamination in this media."

Site Code:	483489
Site Description:	"Location: The BCP site is located in the Williamsburg section of Brooklyn (Kings County) at 11 Jackson Street at the intersection with Meeker Avenue where it runs under the Brooklyn-Queens Expressway. Site Features: Prior to redevelopment, the site contained one one-story building covered the entire 0.20 acre site. Redevelopment consisted of construction of a eight-story multi-family apartment building with surface parking behind the building. Current Zoning and Land Use: The site is zoned R6-Residential. In 2005 the site was rezoned from M1-2 industrial to R6-Residential as part of the Greenpoint-Williamsburg Rezoning Action to provide opportunities for the development of residential uses on underutilized and vacant land and legalize existing non-conforming uses. Jackson Street intersects with Meeker Avenue at the southeast corner of the site. Meeker Avenue is a commercial corridor that runs under and parallel to the Brooklyn-Queens Expressway. Immediately north and behind the site is a street of single family homes. Nearby, there is significant redevelopment that is ongoing or has recently been completed that largely consists of multi-story, multi-unit residential buildings. Past Use of the Site: The site was first developed sometime prior to 1887 as three residential lots. Circa 1962 until about 1973, Driggs Plywood operated at the site. From the early 1950s through 2007 the three lots were combined as one and occupied by a building labeled lumber storage that encompassed the entire lot. Arnmart Beer Distributors occupied a portion of the site in the late 1990s and Car Fashion Seat Covers operated on site in the 2000s. Site Geology and Hydrogeology: Subsurface soils at the site include a mixture Groundwater table at the site is approximately 8 feet below surface grade within the native silty-sand. Groundwater flow is generally westerly toward the

FORMER DRIGGS PLYWOOD CORP. (Continued) **S108076630**

East River."

Env Problem: "Nature and Extent of Contamination: Remediation of the site is complete. The remedial action consisted of excavation across the entire site to approximately five feet below grade. Post excavation confirmatory sampling showed that on-site meets Track 2, restricted residential use soil cleanup objectives to a depth of at least 15 feet. There were three monitoring wells at the site; one compound, bis(2-ethylhexyl)phthalate, was detected in groundwater just above its groundwater standard. Only one other semi-volatile organic compound (SVOC) and two VOCs (MTBE and PCE) were detected in groundwater, but at concentrations well below their respective standards. In the filtered groundwater samples analyzed for metals, only naturally occurring iron, sodium, magnesium and manganese were above standards."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site."

Site Description: "Location: The BCP site is located in the Williamsburg section of Brooklyn (Kings County) at 11 Jackson Street at the intersection with Meeker Avenue where it runs under the Brooklyn-Queens Expressway. Site Features: Prior to redevelopment, the site contained one one-story building covered the entire 0.20 acre site. Redevelopment consisted of construction of a eight-story multi-family apartment building with surface parking behind the building. Current Zoning and Land Use: The site is zoned R6-Residential. In 2005 the site was rezoned from M1-2 industrial to R6-Residential as part of the

FORMER DRIGGS PLYWOOD CORP. (Continued) **S108076630**

Greenpoint-Williamsburg Rezoning Action to provide opportunities for the development of residential uses on underutilized and vacant land and legalize existing non-conforming uses. Jackson Street intersects with Meeker Avenue at the southeast corner of the site. Meeker Avenue is a commercial corridor that runs under and parallel to the Brooklyn-Queens Expressway. Immediately north and behind the site is a street of single family homes. Nearby, there is significant redevelopment that is ongoing or has recently been completed that largely consists of multi-story, multi-unit residential buildings.
Past Use of the Site: The site was first developed sometime prior to 1887 as three residential lots. Circa 1962 until about 1973, Driggs Plywood operated at the site. From the early 1950s through 2007 the three lots were combined as one and occupied by a building labeled lumber storage that encompassed the entire lot. Arnmart Beer Distributors occupied a portion of the site in the late 1990s and Car Fashion Seat Covers operated on site in the 2000s. Prior to redevelopment, the site was most recently occupied by a bus maintenance facility in the western half of the lot and a metal fabrication shop on the east. Site Geology and Hydrogeology: Subsurface soils at the site include a mixture Groundwater table at the site is approximately 8 feet below surface grade within the native silty-sand. Groundwater flow is generally westerly toward the East River."

Env Problem: "Nature and Extent of Contamination: Remediation of the site is complete. The remedial action consisted of excavation across the entire site to approximately five feet below grade. Post excavation confirmatory sampling showed that on-site meets Track 2, restricted residential use soil cleanup objectives to a depth of at least 15 feet. There were three monitoring wells at the site; one compound, bis(2-ethylhexyl)phthalate, was detected in groundwater just above its groundwater standard. Only one other semi-volatile organic compound (SVOC) and two VOCs (MTBE and PCE) were detected in groundwater, but at concentrations well below their respective standards. In the filtered groundwater samples analyzed for metals, only naturally occurring iron, sodium, magnesium and manganese were above standards."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site."

Site Code: 483489
Site Description: "Location: The BCP site is located in the Williamsburg section of Brooklyn (Kings County) at 11 Jackson Street at the intersection with Meeker Avenue where it runs under the Brooklyn-Queens Expressway. Site Features: Prior to redevelopment, the site contained one one-story building covered the entire 0.20 acre site. Redevelopment consisted of construction of a eight-story multi-family apartment building with surface parking behind the building. Current Zoning and Land Use: The site is zoned R6-Residential. In 2005 the site was rezoned from M1-2 industrial to R6-Residential as part of the Greenpoint-Williamsburg Rezoning Action to provide opportunities for the development of residential uses on underutilized and vacant land and legalize existing non-conforming uses. Jackson Street intersects with Meeker Avenue at the southeast corner of the site. Meeker Avenue is a commercial corridor that runs under and parallel to the Brooklyn-Queens Expressway. Immediately north and behind the site is a street of single family homes. Nearby, there is significant redevelopment that is ongoing or has recently been completed that largely consists of multi-story, multi-unit residential buildings. Past Use of the Site: The site was first developed sometime prior to 1887 as three residential lots. Circa 1962 until about 1973, Driggs Plywood operated at the site. From the early 1950s through 2007 the three lots were combined as one and occupied by a building labeled lumber storage that encompassed the entire lot. Arnmart Beer Distributors occupied a portion of the site in the late 1990s and Car Fashion Seat Covers operated on site in the 2000s. Prior to redevelopment, the site was most recently occupied by a bus maintenance facility in the western half of the lot and a metal fabrication shop on the east. Site Geology and Hydrogeology: Subsurface soils at the site include a mixture Groundwater table at the site is approximately 8 feet below surface grade within the native silty-sand. Groundwater flow is generally westerly toward the East River."
Env Problem: "Nature and Extent of Contamination: Remediation of the site is complete. The remedial action consisted of excavation across the entire site to approximately five feet below grade. Post excavation confirmatory sampling showed that on-site meets Track 2, restricted

FORMER DRIGGS PLYWOOD CORP. (Continued) **S108076630**

residential use soil cleanup objectives to a depth of at least 15 feet. There were three monitoring wells at the site; one compound, bis(2-ethylhexyl)phthalate, was detected in groundwater just above its groundwater standard. Only one other semi-volatile organic compound (SVOC) and two VOCs (MTBE and PCE) were detected in groundwater, but at concentrations well below their respective standards. In the filtered groundwater samples analyzed for metals, only naturally occurring iron, sodium, magnesium and manganese were above standards."

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site."

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	11/13/2013: Mahat A phone call was made to Ms. DEB Shapiro (AKRF INC @ 646.388.9544) regarding the spill. It is a historic spill. The site is an e-designated site and OER is leading the further investigation. AKRF discovered soil and GW contamination during the phase II. 1950 sand map informed the site used to be a gas station. They have not discovered the exact location of the tank but possible of having it on the Southern site. Further investigation is required and DEC is awaiting more information from AKRF and OER. 10/11/16 - Austin - Spill transferred from Mahat (who left the program) to Piper - end

DEC Memo:	3/11/03 - SAMUEL- File available in active unassigned spill files. 4/3/06 Diaz - Next Steps - February 2000 Investigation report stated further investigation & possible remedial work recommended. Verify & conduct work or close site. 6/28/07. J.Krimgold reviewed and approved IWP submitted by FPM Group (631-737-6200)on June 27, 2007. The plan calls for 4 soil/gw samples around tanks excavation pit 5/21/08. email from FPM's Ben Cancemi informed that excavation and sampling activities will commence on 5/22/08. 02/12/09-Hiralkumar Patel. contamianted groundwater (with sheen) was discovered under basement floor at 684 Lorimer Street, site located behind subject gas station. based on location of both sites, contamination under house at 684 Lorimer street might be orinigated from subject gas station site. based on recent findings, case transferred from DEC Jacob to DEC Patel. found following documents for the subject site: - tank closure environmental site assessment, Nov. 1999 - subsurface investigation report, Feb. 2000 - subsurface investigation work plan, Jun. 27, 2007

FROST & MEEKER AVE (Continued) **S102232676**

- subsurface investigation report and remedial action plan, Sep. 10, 2007 abstract of tank closure report, Nov. 1999: - total of eight 550 gal and one 3000 gal USTs were removed including all pipings and portions of pump islands - all of the tank in very good condition and exhibited no evidence of corrosion - five of the tanks were empty, and three tanks were filled with concrete - 3000 gal tank contained approx. 1300 gal of water and petroleum products - total of eight soil and water samples were collected after tank removal - depth to groundwater ranged from 14-16 ft bg <--------- - according to fire department record, in Nov. of 1984, the eight 550 gal tanks failed the official 10 year test - in sept. of 1985, three 550 gal were purged and filled with concrete - one pump was removed and all associated lines were sealed - highest PID readings were noted at an average depth of 10 to 15 ft <---------- - fine to medium sized grain sand with clay lenses were found to a level of 12 to 14 ft bg - a layer of one foot in thickness of peat-like material intermixed with clay occurred at about 16 ft bg - found xylene contamination in east and north sidewall samples - found contamination in groundwater samples soil analyticals: --------Xylene North----4,600 East----13,500 groundwater analyticals: ----------west bottom pit------east bottom pit Benzene----------160----------230 Toluene----------200----------230 Ethylbenzene--------97----------120 Xylene----------1,410----------1,520 Naphthalene--------390----------640 MTBE----------1,900----------2,300 abstract of subsurface investigation report, feb. 2000: - eight borings (B1 thru B8) were advanced and collected soil and groundwater samples from borings - borings B1, B2 and B5 thru B8 were advanced in the immediate vicinity of the former tank field and borings B3 and B4 advanced near the west property line - groundwater found at 10 ft depth- soil samples collected at 8-10 ft depth from each boring except boring B4 where no sample collected; additional soil sample collected from boring B1 at 0-4 ft depth - high PID reading found during borings - contamination found in soil and groundwater samples PID readings: ----------0-4-------4-8-------8-10 B1----------1,120-----1,160------1,190 B5----------110--------20---------55 B6----------2,010 B7----------640 soil analyticals: ----------B1----------B1----------B6 0-4 ft 8-10 ft 8-10 ft Benzene----------<250 Xylene----------25,000---------5,300----------1,200 1,2,4-Trimethylbenzene--14,000 1,3,5-Trimethylbenzene--23,000---------3,200 groundwater analyticals: ----------GW1-----GW-3-----GW-4-----GW-5-----GW-6----- GW-7-----GW-8 Benzene---------- --------2,900 Toluene----------520---------- ----------540 Ethylbenzene----------120------160----- -260----1,700 Xylene----------360----------640------420----2 ,000---15,000 Naphthalene---------- -140------700 MTBE----------260------180------830------120----1,

700----7,200 abstract of subsurface investigation report, Sep., 2007:
- four soil boring were installed to final depth of 15 ft bg - soils encountered at the property generally consisted of fine to medium grained sand with gravel and trace amount of silt and clay from just below grade to the top of blue-green clay layer - the top of the blue-green clay layer was evident in all of the borings at depths ranging from approx. 12.5 to 14.5 ft bg - the blue-green clay layer showed no indications of potential contamination and was not fully penetrated by any of the borings - staining and petroleum odors were generally observed in the soils from all of the borings in an interval near the water table surface, which was generally encountered at 8 to 8.5 ft bg - interval of staining/odor was variable in thickness and ranged from approx. one foot at boring B4 to approx. 7 ft at boring B1 - PID readings in stained soils generally ranged between 10 and 60 ppm - groundwater samples collected from each borings - no free-phase product was observed in any borings - found contamination in soil and groundwater samples soil analyticals: ----------B1 (7-8 ft depth)

1,3,5-Trimethylbenzene--------370 abstract of remedial action plan, Sept. 2007: - proposed to excavate impacted soils in the vicinity of boring B1 - based on relatively low levels of groundwater impact, its apparently limited extent, and the apparent absence of free-phase product, no groundwater remediation recommended - three groundwater wells are proposed to be installed for groundwater flow direction determination - each well will be installed to a depth of no more than 14 ft, so as not to penetrate the clay underlying the property - each well will be installed with 10 ft of screen summary: - groundwater found at different depths: 14-16 ft during tank removal, 10 ft during subsurface investigation in 2000 and at 8.5 ft during subsurface investigation in 2007 - no groundwater flow direction available - no permanent wells installed at the site - heavy soil and groundwater contamiantion found during each investigation - contamination found in all sides of previous tank location - DEC Jacob issued RAP approval letter on Oct. 4, 2007 <---------- - as per email from Ben Cancemi from FPM group, excavation according to approved RAP was scheduled on 05/22/08 <-------- Paul's LLC **site owner** 318 Grand Street Brooklyn, NY 11211 Attn.: Paul Joffe Ph. (718) 486-6916 (O) (917) 693-3292 (C) email: pauljoffe@pauljoffe.com according to building department permit record, Mr. Joffe applied for permit to convert service station into dinning location. found

FROST & MEEKER AVE (Continued) **S102232676**

another spill case reported at the gas station site. - 9806871: spill called in by citizen on 09/04/1998 about abandoned tanks; tipped over. spill closed on 02/26/2003. left message for Mr. Joffe. received call from Mr. Carter from Mr. Joffe's office. informed him about situation. Mr. Carter doesn't know much about this site but will ask Mr. Joffe to call back. Nathan Carter Ph. (718) 486-6804 02/13/09-Hiralkumar Patel. left message for Mr. Joffe. left message for Ben Cancemi, consultant who was going to perform remedial activities. Ben T. Cancemi, CPG FPM Group Ph. (631) 737-6200 Fax (631) 737-2410 email: b.cancemi@fpm-group.com 02/17/09-Hiralkumar Patel. received call from Ben from FPM Group. they excavated contaminated soil to water table in front of stores and installed three monitoring wells in June 2008. but haven't got authorization to sample these wells. Ben mentioned that endpoint sample analyticals were clean. asked Ben to submit sample analytical summary table and scaled site map with locations of endpoint samples and wells. also asked him to include approx. location of tank and dispenser islands. received email from Ben with sample analytical summary table with site plan showing endpoint sample and well locations. site plan shows that wells were installed in front of stores on-site. but no well observed during site visit, but found some fresh patches in concrete (which could be location of wells). received call from Mr. Joffe. asked him to submit remedial action report by the end of March 06, 2009. he mentioned that area between his property and houses along Lorimer street is a commercial property at 297 Meeker Ave which is a paint shop. 02/18/09-Hiralkumar Patel. received email from Ben. they will do well sampling on 02/20/09. 02/20/09-Hiralkumar Patel. visited site. met Mr. Joffe and John (FPM group). monitoring wells found in front of store. groundwater was found around 6-7 ft bg. found sheen on water from each wells. will submit sample analyticals and groundwater flow direction. during site visit, noticed an auto repair shop at 59 Frost Street. met store manager. site has one 275 gal waste oil AST. tank is not registered. asked manager to register tank. sent email to DEC Jacob regarding un-registered waste oil tank at 59 Frost St. no parts cleaning operation at the auto repair shop. Billy Alex Unique Auto Repair 59 Frost St Brooklyn, NY 11211 PH. (718) 387-7537 Fax (718) 384-6180 email: uniqueauto59@gmail.com during site visit, Mr. Joffe mentioned that site at 297 Meeker Ave runs from Meeker Ave to Frost Street, between the subject gas station and house at 684 Lorimer st where contaminated water was found. Mr. Joffe mentioned that there is painting business at 297 Meeker Ave. owner's address for 297 Meeker Ave, from property shark: Wanda Berry 56 Frost St. Brooklyn, NY 11211 Ph. (516) 627-4245 owner's address for 297 Meeker Ave, from ACRIS: Wanda Berry PO Box 131 Manhasset, NY 11030-0131 02/23/09-Hiralkumar Patel. received email from Mr. Joffe. he found from NYC DOB that site across frost st was dry cleaner and had seven 1000 gal USTs. 03/06/09-Hiralkumar Patel. received remedial action report from Ben. abstract: - 186.34 tons of contaminated soils were excavated from southern portion of the former UST area and in proximity to the location of a reported former fuel dispensing island - two endpoint bottom samples and four endpoint sidewall samples collected from excavation - found some contamination in endpoint bottom sample from north end of excavation - additional soil was removed from the north end and collected additional endpoint bottom sample - sidewall samples were taken at 7 ft bg and bottom samples taken at 11 ft bg (means bottom endpoint samples were taken below water table) - three monitoring wells (MW-1 through MW-3) were

FROST & MEEKER AVE (Continued) **S102232676**

installed in proximity to the former soil boring locations B1 through B3 (borings that done during subsurface investigation in 2007) - well MW-2 installed at previous boring B1 and MW-3 installed at previous boring B3 - wells were installed to a depth of approx. 14 ft bg and completed with ten feet of screen - groundwater was found at around 8 ft depth <---------- - site-specific groundwater flow direction is to the northeast <---------- - no free-phase product or other visible indications of potential contamination were observed - found MTBE contamination in all three wells ---------MTBE MW-1------12 MW-2-----150 MW-3------50 report missing scaled site map. 03/13/09-Hiralkumar Patel. spoke with Ben at FPM. asked him to subimt scaled site map with all previous sampling/well locations. asked Ben about any dewatering as soil was removed from below water table also. Ben mentioned that water was coming into excavation so slowly. they were removing soil from excavation and wait till water from excavation bucket drain out before loading soil for disposal. so no dewatering happened. summary: during all previous investigations, highest contamination was found towards the west end of property, in close proximity to existing well MW-2. and MW-2 is the downgradient well at the property edge. based on results of high soil and groundwater contamination in area of MW-2 and groundwater flow direction, requires off-site groundwater investigation. requires off-site well downgradient from existing well MW-2. spoke with Mr. Joffe. explained him findings of previous investigations and asked him for one more well downgradient from well MW-2. sent letter to Mr. Joffe requiring delineation of possible soil and groundwater contamination, downgradient from well MW-2. letter emailed to Mr. Joffe and Ben. 03/27/09-Hiralkumar Patel. received email from Mr. Cancemi with site map including location of proposed downgradient well. 03/30/09-Hiralkumar Patel. received email from Mr. Cancemi. he is planning to install well on April 08, 2009. sent email to Mr. Cancemi approving proposed location. 05/11/09-Hiralkumar Patel. 1:35 PM:- received report from Mr. Cancemi. abstract: - off-site well installed (MW-4), about 20 ft downgradient from well MW-2 - well installed to a depth of approx. 14 ft bg with 10 ft of screen - soil generally consisted of fine to medium-grained silty sand with gravel and trace amount of clay. brick, wood, coal, ash and concrete fragments were noted in the entire screen interval, but were more abundant in the top five ft of boring - faint petroleum odors and PID responses were noted on soils from 8 to 9 ft interval; no odor or PID noticed in other intervals - groundwater was found at approx. 7.5 ft bg <-------- - one soil sample collected just above water table and one at 8-9 ft depth (below water table) - no free product observed in any wells on site - groundwater flow towards northeast <--------- - 1,400 ppb of MTBE found in soil sample at 8-9 ft depth - 98 ppb of MTBE found in groundwater sample from MW-4 05/29/09-Hiralkumar Patel. 10:46 AM:- sent letter to Mr. Joffe requiring surrounding area site map (with possible off-site source) and quarterly groundwater monitoring and sampling for a period of one year (including wells gauging during each sampling events to define site specific groundwater flow direction). letter emailed to Mr. Joffe and Mr. Cancemi. 09/24/09-Hiralkumar Patel. 3:20 PM:- spoke with Ben. they submitted proposal to Mr. Joffe but hasn't heard back. 3:22 PM:- spoke with Mr. Joffe. he will ask Ben to conduct groundwater sampling. 09/29/09-Hiralkumar Patel. 12:13 PM:- received email from Ben. he will sample wells on 10/01/09. he mentioned that previous samples were analyzed for VOCs only as gasoline spill was the cause.

FROST & MEEKER AVE (Continued) **S102232676**

he asked whether SVOC analysis needed for groundwater samples. 12:45 PM:- sent email to Ben to analyze samples for VOCs only. 12/01/09-Hiralkumar Patel. 3:26 PM:- spoke with Mr. Joffe. he spoke with Ben today. Ben is preparing report. asked Mr. Joffe to submit report by the end of 12/11/09. 12/02/09-Hiralkumar Patel. 11:20 AM:- received quarterly groundwater sampling reprt from Ben. sampled all four wells in Oct. 2009. minor MTBE contamination found in samples. will sample all wells again in Jan. 2010. 12:42 PM:- sent email to Ben asking to submit next quarterly report by end of Feb. 2010. email copied to Mr. Joffe. 12/11/09-Hiralkumar Patel. 11:20 AM:- received email from Ben including site map showing surrounding area use. 01/25/10-Hiralkumar Patel. 3:41 PM:- received message from Daniel Cole (212-341-0964) from NYC DEP. he mentioned that subject site is e-designated and currently reviewing closure report. Mr. Cole wants to know spill status. 01/26/10-Hiralkumar Patel. 2:40 PM:- received email from Ben. they collected second round of groundwater sampling last week and will submit second quarterly report once lab data is available. 3:06 PM:- spoke with Mr. Cole. Mr. Cole asked if DEC requires anything more than quarterly monitoring. informed Mr. Cole that the department may require additional work based on quarterly groundwater sampling reports. Mr. Cole mentioned that owner did air monitoring. asked Mr. Cole to send copy of air monitoring report. he will email the report. 02/11/10-Hiralkumar Patel. 8:23 AM:- received second quarterly report from Ben. minor MTBE contamination found in groundwater samples (MW-3: 20 ppb, MW-4: 40 ppb). will sample wells in Apr. 2010. 05/12/10-Hiralkumar Patel. 1:56 PM:- received third quarterly report from Ben. minor MTBE contamination found in groundwater samples (MW-3: 23 ppb, MW-4: 57 ppb). will sample wells in July 2010. 08/05/10-Hiralkumar Patel. 8:57 AM:- received fourth quarterly report from Ben. minor MTBE contamination found in groundwater samples (MW-3: 20 ppb, MW-4: 25 ppb). based on submitted documents, case closed. 2:50 PM:- spill closure letter emailed to Mr. Joffe. email copied to Ben.

Remarks: caller belives its a bad line - 5 - 550 gal tanks manifolded together

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Excavated on a construction site. Found an area of petroleum contaminated soil. They also found bits of metal (former drum?) Excavated about 2 ft below water table. Then they let the hole sit for a day and then saw NO sheen on the puddle. 6ft x 8ft x 8ft deep. 4 endpoints from each edge by the water were taken. A few days later, there is still no sheen on the water. Currently waiting for lab report. 10/15/12 Email from Bryan Zieroff at AKRF says the following: To summarize our call: Evidence (i.e. odors, PID readings, staining) of petroleum contamination was encountered in soil while excavating a utility trench at a construction site. The soil in question was removed from the ground and placed on and under poly sheeting. The excavation was expanded until there was no evidence of petroleum contamination remaining in the excavation. The final excavation size measured approximately 6 feet wide by 10 feet long by 6 to 7 feet deep. Groundwater was encountered at 6 feet below grade. After completing the excavation work, there was no evidence of petroleum contamination observed on groundwater. Four endpoint samples (one from each excavation sidewall) were collected at the water table interface for analysis of Part 375 parameters. Waste profile samples were collected from the stockpiled soil, and the soil will be disposed of in accordance with all applicable regulations after facility approval. The State requested that a copy of the laboratory report be forwarded upon receipt. The laboratory report and a site sketch showing sampling locations are attached. VOCs and PCBs were not detected. Four pesticides were detected at concentrations below Part 375 residential criteria. Several SVOC and Metals compounds were detected at concentrations that were consistent with background concentrations documented by laboratory data from soil samples collected during a Phase II investigation. The laboratory detections, along with

CONSTRUCTION SITE (Continued) **S112226865**

the fact that lighter petroleum-type SVOCs were not detected, indicate that the petroleum
contamination has been removed. See eDocs for lab report and site sketch. **********
Based on excavation work done and endpoints take, spill case is closed out.

Remarks: IMPACTED SOIL IN EXCAVATION, CLEANUP PENDING.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHITOMIRSKY TRANSFERRED FROM Y.KRIMGOLD. 8-3-2005 Reviewed report received by NYSDEC on June 13, 2005. The report stated that free product is present in wells MW-2 and MW-4. Petroleum absorbent socks have been replaced several times in both wells. Also, the report stated that in July 2001, laboratory analysis identified the product as kerosene. In addition, the report stated that the most likely off-site source is the upgradient neighboring property, which was known to have underground storage tanks. A letter was sent to DDC/URS to inform the City that at NYSDEC request, an investigation was performed at the neighboring property (Spill #0130048, 407 Leonard Street). The investigation results showed no signs of contamination and the spill report for that property was closed. Therefore, the Department requested that DDC/URS repeat the fingerprint analysis of the free product in wells MW-2 and MW-4, and investigate alternative sources for the free product contamination.AZ 9-28-2005 Staff received and reviewed a monitoring report from the City s contractor which stated that free product is present in several wells. The report suggested that the most likely off-site source is the up-gradient neighboring property, which has underground storage tanks. Staff responded that an investigation was performed, at DEC s request, at the neighboring property (Spill #0130048, 407 Leonard Street). The investigation results showed no signs of contamination and the spill report for that property was closed. Staff asked the City to repeat the petroleum fingerprint analysis to help determine the source of the product. This analysis indicated that the product is likely kerosene. Although kerosene tanks were never present at the site, NYFD has practice of mixing kerosene and diesel fuel. There is a diesel AST in the basement of the facility. Staff asked Jane Staten (URS)to investigate the possibility of leakage from the diesel AST into the subsurface through underground lines or other conveyances. AZ 9/26/2006 The site was transferred from URS to Greyhawk on January 1, 2006. In July 2006 Greyhawk reported that due to the lack of documentation from the previous CM, Roux performed a reconnaissance visit to the site. Eight of nine monitoring wells were

(Continued) **S102619299**

located and gauged. MW-08 was
probably destroyed during ongoing construction activities at the neighboring property. MW-04
continues to contain free product at 0.16'. Absorbent socks in wells MW-04 and MW-02 were replaced.
AZ 12-07-2006 Staff received and reviewed a monitoring reports from Roux dated September 22 and
November 20, 2006. November report states that Gw sampling was not conducted for April through June
2006 because Greyhawk mistakenly considered the spill closed. Free phase (kerosene) was detected in
MW-02(0.03') and MW-04(0.23') during July-September quarterly monitoring event. MW-08 could not be
located. Roux recommended reduce frequency of gw sampling and reporting from quarterly to
semi-annual since dissolved phase remains only in MW-09, continue quarterly gaging of wells,
continue using absorbent socks, conduct additional investigation to determine potential sources of
kerosene product (work plan will be submitted to DEC), attempt to locate MW-08. DEC concurred.
MW-08 should be located or replaced. AZ 12/22/2006 At the meeting with DDC/Greyhawk on 12/12/2006
DEC inquired about the remedial progress at this site. Greyhawk will advance a few borings to
resolve this issue. They will submit a work plan. AZ 2/13/2007 An e-mail was sent to DEC/Roux: Roux
recommended reducing frequency of groundwater sampling to semi-annual at this site. Also, Roux
proposed that well MW-08 should be located and sampled in their November 2006 Report. As far as I
know, MW-8 has not been located. Well MW-8 should be located and sampled. When sampling results
from MW-8 are submitted to DEC, frequency of groundwater sampling will be reviewed. AZ 2/14/2007
Telephone conversation with Brian Morrissey on 2/13/2007: Brian informed me that MW-8 was last
sampled in 2002 and exhibited 15 ppb of total VOC. This information was not included in Roux's
quarterly report. Based on this information I approved Roux recommendation for semi-annual
groundwater sampling. However, due to the presence of free product at this site, groundwater
sampling schedule should be restored to quarterly if dissolved phase contamination appears in more
wells. An e-mail was sent to Brian Morrissey (Roux). AZ 6/21/2007 Reviewed report for the site
dated April 11, 2007, and received on April 26, 2007. Roux recommended conducting additional site
investigation to determine potential sources of kerosene. They proposed collecting soil and gw
samples from borings in the alley located between the firehouse building and the adjacent
property's degreasing pit. No permanent wells were proposed. UST near Leonard Street belongs to
what site? I left a message for B. Morrissey (Roux) asking clarification for the work plan. AZ

(Continued) **S102619299**

6/22/2007 Conversation with Brian Morrissey regarding the proposed Work Plan. I rejected the proposed Work Plan since it did not propose any permanent well installations. Also, I consider, that number of soil borings is excessive. Two wells should be installed in place of proposed boring RXSB07-RXSB09. Also, two wells should be installed between the degreasing pit and the potential site of previous USTs. MW-8 should be either located or re-installed. I requested information regarding diesel fill ports, gasoline fill ports and previous USTs depicted on the plan. Do they belong to the Fire Department or to the adjacent property? Roux will submit a revised work plan and the requested information. AZ 2/11/2008 An e-mail was sent to Roux/DDC/VB/Greyhawk: I have reviewed Semi-Annual Monitoring Report for the above site submitted in November 2007. The report included the revised Work Plan. However, DEC comments were only partially taken into account. DEC requested installation of two wells between potential site of the previous USTs and the degreasing pit. These wells were not proposed by Roux. Also, DEC requested information regarding ownership of the diesel fill ports, gasoline fill ports and previous USTs depicted on the plan. This information has not been provided to DEC. These deficiencies should be corrected and modified Work Plan with the requested information submitted to DEC. AZ 2/12/2008 Conversation w/Brian Morrissey (Roux). Brian suggested installing two wells in the alleyway as the first step in the investigation. After these wells are installed and sampled, a decision will be made by DEC regarding installation of two additional off property wells at the adjacent property as per DEC's previous request. Also, Roux will provide DEC with the information regarding UST locations at EC 229 property and information regarding the ownership of the former USTs as well as diesel and gasoline fill ports in conjunction with the first stage of the investigation. AZ 10-31/2008 An e-mail was sent to Roux/DDC/Greyhawk/V.B.: I have reviewed Semi-Annual Monitoring Report for the above site for the period of July 2007 to June 2008 and dated August 4, 2008. Based on the report, the additional site investigation, approved by DEC in February 2008, has not been performed. The submitted investigation plan is approved and should be performed without delay. After proposed wells/borings are installed, a decision will be made by DEC regarding installation of two additional off site wells at the adjacent property as per DEC's previous request. According to the PBS records, a 2,000 galllon fuel oil tank was closed in place at the site. A 550 gallon diesel tank is in active status at the site. Locations of these tanks and their fill ports should be

(Continued) **S102619299**

indicated on the plan. Also,
location of 275 gallon gasoline tank fill ports should be indicated on
the plan. AZ 12-21-2009
Additional investigation work plan approved by DEC on February 11,
2008, February (ASIWP) has not
been performed. According to Roux it will be performed by the incoming
construction management
firm. Intermittent kerosene product is observed in MW-4 and MW-02. An
investigTION REQUESTED BY
NYSDEC (Spill #0130048, 407 Leonard Street) DEC determined that
product in MW-2 mnd MW-4 doesn't
appear to be from this potential upgradient source. Roux will continue
to use absorbent socks. AZ
8-25-2010 An e-mail was sent to LiRo S. Frank: I have reviewed Site
Turn-Over Status Report. Result
of the additional investigation which was approved by DEC should be
sent to the Department. Well
MW-01 could be removed from the sampling program.Wells M-06 and MW-07
should be replaced. AZ
12-21-2010 An e-mail was sent to LiRo S. Frank, V. Brevdo, F. Ashkan:
Dear Steve, I have reviewed
semi-annual sampling/quarterly monitoring and additional investigation
report for this site. The
report proposed continuation of sampling and adding SVOC analysis to
groundwater sampling protocol.
Also, report suggested hot spot shallow excavation at boring RXSB-04.
These proposals are approved.
LiRo recommended removal of wells MW-01 and MW-07 from the sampling
program and reduction of
gauging to semi-annual, since product has not been observed since
2008. These recommendations are
approved. The Responsible Party and Contractors are responsible for
the safe execution of the Work
Plan. Elevated levels of soil and dissolved groundwater contamination
exist at this site. A series
of 11 injection wells were installed at the site. PermeOx slurry was
injected in each well.
Consultants submitted additional site investigation plan which has
been approved by DEC. In June
2010 LiRo performed the revised Additional Revised Investigation Plan.
Elevated PID readings and
petroleum odor was noted in all seven borings mainly between 5 and 15
ft. bgs.VOC and SVOC
concentrations exceeded TAGM soil guidance. Contamination is present
just above and at the
groundwater table interface. LiRo recommended conducting hot spot
shallow excavation to remove VOCs
in soil. DEC approved this recommendation. AZ 6-28-2011 Reviewed
report for the site dated March
31, 2011. Soil samples collected indicate shallow SVOC contamination
above and at groundwater
table. Soil below gw table do not indicate contamination. LiRo
proposed to conduct hot spot
excavation at boring RXSB-04 and DEC approved it in December 2010.
Free phase product was detected
in RXMW-01 (0.01') and MW-04 (0.22') in November 2010. The product was
identified as gasoline. Due

(Continued) **S102619299**

to the presence of free phase, quarterly gauging will be conducted. Monthly vacuum truck extraction in wells MW-02, MW04, and RXMW-01 will be conducted for a period of 3 months. AZ 1-9-2012 Reviewed semi-annual report dated October 5, 2011. The shallow ho spot excavation approved by DEC on Dec. 21, 2010 in the vicinity of boring RXSB-04 is scheduled for completion in Fall/Winter 2011. The following email was sent to S. Frank/ F. Ashkan and V. Brevdo: Dear Steve, I have reviewed semi-annual/quarterly report for February- September 2011 and dated October 2011. The report stated that measurable product was detected in MW-04 and was ranging from 0.01 to 0.03 feet. Currently petroleum absorbent socks are in three wells. LiRo proposed reducing groundwater sampling from semi-annual to annual. Due to the presence of free phase product this proposal is rejected. Sampling should be performed semi-annually. Also, LiRo proposed to remove several monitoring wells from the site monitoring program. The site is monitored only twice a year. The wells proposed for removal exhibited VOC contaminants in the past and located in important monitoring locations. Therefore, these wells should be monitored. LiRo proposed suspending SVOC analysis. This proposal is approved. AZ 12-6-2012 Reviewed semi-annual monitoring report dated June 26, 2012. The report stated that elevated VOCs above RSCO were detected in boring RXSB-04 from 5' to 6'. Free phase product is intermittently reported in wells MW-02,MW-04,RXMW-02. Product removal has been accomplished by both EFR and absorbent socks. LiRo will submit an excavation bid package for excavation in the vicinity of boring RXSB-04 in the third quarter of 2012. AZ 6-18-2013 Reviewed semi-annual monitoring report dated January 17, 2013. LiRo will complete a shallow hot-spot excavation in the vicinity of boring RXSB-04. An excavation bid package was submitted and excavation is scheduled for the first quarter of 2013. AZ 1-30-2014 Reviewed semi-annual monitoring report dated June 27, 2013. LiRo completed a shallow hot-spot excavation in the vicinity of boring RXSB-04 in March 2013. A total of 9.82 tons of impacted soil were removed. Confirmatory soil samples were collected. The analytical data indicates that the elevated VOCs at boring RXSB-04 were remediated as a result of the excavation. Free phase product is'intermittently reported in well MW-02, MW-04, RXMW-01 and RXMW-02. Product removal has been accomplished by both EFR and petroleum absorbent socks. AZ 6-10-2014 Reviewed semi-annual monitoring report dated December 10, 2013. Free phase product was reported in wells MW-04 and RXMW-01. Product removal has been accomplished by both EFR and petroleum absorbent socks. Two EFR events were completed

(Continued) **S102619299**

and approximately 165 gallons
of a mixture of free phase product and groundwater were removed. AZ 3-09-2015 Reviewed semi-annual
monitoring report dated MAY 13, 2014. For this monitoring period, MW-04 reported measurable
thickness (0.10') of free phase product during the October 2013 gauging. Product removal has been
accomplished by both EFR and petroleum absorbent socks. No free phase product was reported in
February 2014. AZ 6-15-2015 Reviewed semi-annual monitoring report dated October 13, 2014.
Free-phase product was reported in monitoring well RXMW-01 during both monitoring events (May 14,
2014 and August 2014). LiRo to utilize either EFR or petroleum absorbent socks to address
free-phase product. AZ 12-22-2015 Reviewed semi-annual monitoring report dated May 29, 2015.
Free-phase product was reported in monitoring well MW-04 during in December 2014. LiRo will remove
all petroleum socks from the site wells. If no free-phase product is measured for a period of six
months, LiRo will petition for a spill closure. AZ 8-25-2016 Reviewed semi-annual monitoring report
dated Jan. 7, 2016. Free-phase product was reported in monitoring wells MW-04 and RXMW-01 during
June 2015 gauging. LiRo will place petroleum socks back into the site wells. Free-phase product
thickness ranged from 0.02' to 0.08'. AZ 8-25-2016 Reviewed semi-annual monitoring report received
on July 8, 2016. Free-phase product was reported in monitoring wells MW-04 and RXMW-01 during
August 2015 gauging. No free-phase product was recorded since then. Petroleum socks were removed to
determine if free-phase product will return. AZ 3-24-2017 Reviewed semi-annual monitoring report
received on 12-28-2016. Free-phase product was reported in monitoring wells MW-04 and RXMW-01
during May 2016 gauging. Petroleum absorbent socks were re-installed in both wells. The socks were
changed during Septemebr 2016 groundwater sampling event. The following email was sent to S. Frank
and V. Brevdo: Dear Steve, I have reviewed a semi-annual monitoring report for the above site
received on December 28-2016. I concur with LiRo s proposal to remove two upgradient monitoring
wells (MW-09 and MW-03) from the Site Monitoring Program for groundwater sampling. AZ 5-22-2018
Reviewed a semi-annual monitoring report received on December 13,2017. Free-phase product was
reported in monitoring wells MW-04 and RXMW-01 during May 2017 gauging event. EFR was performed on
May 19, 2017 on wells MW-04 and RXMW-01 with a total of 32 gallons of groundwater/product mixture
removed. Measurable free-phase product was reported in well RXMW-01 at 0.05 ft. thick on September
13, 2017. AZ 1-16-2019 Reviewed a semi-annual monitoring report dated July 5,2018. No free-phase

(Continued) **S102619299**

product was measured during this monitoring period. On March 2, 2018, LiRo returned to the site to remove the sock and sample RXMW-01. LiRo will remove the petroleum absorbent socks from two wells to determine if free-phase product returns. AZ 8-7-2019 I have reviewed a semi-annual monitoring report dated December 24,2018. The petroleum absorbent socks were removed from two wells in May 2018, to determine if free-phase product returns. As a result, free-phase product returned and was measured consistently during this monitoring period. The product thickness between the two wells ranged from 0.01'and 0.27' thick. Free-phase product was measured on one occasion in well MW-02 at a thickness of 0.02'. A total of 112-gallons of mixture of oil and groundwater was removed. AZ 11-6-2019 I have reviewed a semi-annual monitoring report dated July 23,2019. The petroleum absorbent socks were removed from two wells in May 2018, to determine if free-phase product returns. As a result, free-phase product returned and was measured consistently. The product thickness ranged from 0.08' and 0.58' in December 2018, and 0.16'and 0.27' respectively in wells RXMW-1 and MW-04 in April 2019. A total of 425-gallons of mixture of oil and groundwater was removed between November 2018 and April 2019. AZ 4-23-2020 I have reviewed a semi-annual monitoring report dated January 20,2020. LiRo recommends performing Surfactant Enhanced Product Recovery (SEPR) in select wells (MW-04 and RXMW-01) in conjunction with EFR on downgradient wells in an effort to mobilize free-phase product and remove it from the formation. LiRo will submit an SEPR Injection Work Plan for NYSDEC approval. AZ 4-24-2020 The following email was sent to S. Frank and V. Brevdo: Dear Steve, LiRo recommends performing Surfactant Enhanced Product Recovery (SEPR) in select wells in conjunction with EFR on downgradient wells in an effort to mobilize free-phase product and remove it from the formation. I approve this recommendation. Please submit a Work Plan for this injection. Sincerely, Alexander Zhitomirsky 8-10-2020 I reviewed a Semi-Annual Monitoring Report and Surfactant Enhanced Product Recovery (SEPR) Work Plan for the period of November 2019 through April 2020, and dated July 6, 2020. The petroleum absorbent socks were removed from wells MW-04 and RXMW-01 in May 2018. Free phase product returned following removal of the socks and was measured in both wells during this monitoring period. The product thicknesses between the two wells ranged between 0.00 and 0.33 feet thick during this monitoring period. Because free-phase product continued to be present, the petroleum absorbent socks were re-installed in both well in January 2020 and were changed as needed through March 2020. EFR was conducted

(Continued) **S102619299**

monthly during this
monitoring period (November 2019 through February 2020) to remove
free-phase product. A total of
274-gallons of mixture of oil and groundwater was removed between
November 2019 and February 2020
while a total of 1,642-gallons of oil/groundwater have been removed
via EFR since May 2011. During
this monitoring period (as of March 2020) due to the COVID-19
pandemic, the FDNY had suspended all
activities from any FDNY facility. As a result, no EFR and/or product
gauging was conducted for the
remainder of the monitoring period .On June 19, 2020, LiRo received
permission from FDNY to resume
field activities at FDNY facilities. In the January 20, 2020 SAMR,
LiRo recommended Surfactant
Enhanced Product Recovery (SEPR) in select wells to address residual
free-phase product. On April
24, 2020, the NYSDEC approved the January 20, 2020 recommendation and
requested LiRo submit a SEPR
Work Plan for NYSDEC approval.The SEPR plan utilize a mixture of
E-Mulse-3 (formally VeruSOL) by
EthicalChem, LLC along with a low dose of Hydrogen Peroxide (up to 1%)
to facilitate non-aqueous
phase liquid (NAPL, i.e., free-phase product) removal via extraction
during SEPR. SEPR
implementation includes low doses of Hydrogen Peroxide simultaneously
injected with the surfactant
(E-Mulse-3). The surfactant lowers the interfacial tension and
decreases the capillary forces
which keep the NAPL in place, resulting in greater mobility of the
NAPL phase. The simultaneously
injected Hydrogen Peroxide helps loosen the NAPL and provides
buoyancy, facilitating NAPL transport
towards extraction wells. The proposed SEPR plan will address NAPL
impacts in existing wells MW-02,
MW-04, RXMW-01 and RXMW-02. The E-Mulse-3 and Hydrogen Peroxide can be
mixed together within the
same batch tank. The order of material in a tank will consist of
potable water first, followed by
the peroxide, then surfactant. The injections will be followed by
extraction of NAPL and
groundwater via vacuum truck. Vacuum will be applied to all four
injection wells and if needed, in
downgradient wells MW-01, MW-03 and MW-06R. The following e-mail was
sent to S. Frank and V.
Brevdo: Dear Steve, In the Work Plan dated July 6, 2020, LiRo
recommended Surfactant Enhanced
Product Recovery (SEPR) in select wells to address residual free-phase
product. The SEPR plan
utilize a mixture of E-Mulse-3 (formally VeruSOL) by EthicalChem, LLC
along witha low dose of
Hydrogen Peroxide (up to 1%) to facilitate non-aqueous phase liquid
(NAPL, i.e., free-phase
product) removal via extraction during SEPR. I approve this Work Plan.
The Responsible Party and
its contractors are solely responsible for the safe execution of all
invasive work performed at the

(Continued) **S102619299**

site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alexander Zhitomirsky 2-22-2021 I reviewed a semi-annual monitoring report dated 12-24-2020. The report stated that Historically, MW-02, MW-04 and RXMW-01 contain intermittent free-phase product. Intermittent product removal has been accomplished by both EFR and petroleum absorbent socks. Typically, once the socks have been removed, product would reappear in one to three well locations. During this monitoring period, access to the site was restricted between March 2020 and June 2020 by FDNY due to the COVID-19 pandemic. EFR (via vacuum truck) was conducted on July 10, 2020. Due to NYCDDC budget revisions (for the remainder of the 2021 fiscal year), free-phase product removal may occur using a peristaltic pump. LiRo removed free-phase product with a peristaltic pump on October 20, 2020 from well MW-04. Free-phase product removal via peristaltic pump will replace vacuum truck removal by LiRo s subcontractor as budgetary costs dictate and based on product thickness levels and frequency. A total of 267-gallons of mixture of oil and groundwater was removed between July 2020 and October 2020 while a total of 1,909-gallons of oil/groundwater mixture have been removed via EFR/and or pumping since May 2011.
Currently, the only petroleum-related impact at the site is free-phase product. In order to advance possible closure of Spill No. 9703488, LiRo recommended Surfactant Enhanced Petroleum Recovery (SEPR) injections in the SAMR (January 20, 2020). The NYSDEC approved this remedial action on April 24, 2020 and requested a work plan for approval. A SEPR Work Plan was included in the monitoring report (SAMR), dated July 6, 2020. The plan recommended the injection of surfactant along with a low concentration hydrogen peroxide mixture. The mixture would be injected into existing wells MW-02, MW-04, RXMW-01 and RXMW-02. EFR via vacuum truck would be utilized in conjunction with the injections to recover free phase product and surfactant. The NYSDEC approved the SEPR Work Plan on August 10, 2020. However, due to NYCDDC budget revisions, the injections have been postponed until after June 2021. AZ 10-14-2021 I have reviewed a semi-annual report

(Continued) **S102619299**

dated June 24, 2021. During this monitoring period (November 2020 through April 2021) free-phase product was measured on only two occasions (February 2021) in well MW-04 at thicknesses of 0.01 and 0.05 feet. Petroleum absorbent socks are installed in three wells and were changed as needed through April 2021. The petroleum absorbent socks have been removed in the past from wells containing product to determine if product would return. Typically, once the socks have been removed, product would reappear in one to three well locations. EFR (via vacuum truck) was last conducted on July 10, 2020. Due to NYCDDC budget revisions (for the remainder of the 2021 fiscal year, through June 2021), free-phase product removal will occur using a peristaltic pump. LiRo removed free-phase product from well MW-04 with a peristaltic pump on February 19, 2021. Free-phase product removal via peristaltic pump will replace vacuum truck removal by LiRo s subcontractor as budgetary costs dictate and based on product thickness levels and frequency. A total of 6-gallons of mixture of oil and groundwater was removed between in February 2021, while a total of 1,915-gallons of oil/groundwater mixture have been removed via EFR/and or pumping since May 2011. LiRo will continue monthly free-phase product removal via EFR, peristaltic pump, and/or petroleum absorbent socks. Implementation of the SEPR Work Plan will proceed upon receipt of funding (tentatively 3Q2021). AZ 6-3-2022 Reviewed a report dated January 18, 2022.Product removal (via peristaltic pump) was conducted during this monitoring period on May 25, 2021, at monitoring well MW-04. A total of 5-gallons of mixture of free-phase product and groundwater was removed. No EFR (via vacuum truck) was completed during this monitoring period due to lack of significant measurable free-phase product post the May 2021 removal event. A sheen (not measurable) was noted in wells in MW-02, MW-04, and RMW-01 during purging in September 2021 as part of the groundwater sampling event. During this monitoring period (May 2021 through October 2021) free-phase product was measured on three occasions (between May and June 2021) in well MW-04 at thicknesses of 0.17, 0.13, and 0.02 feet, respectively. Petroleum absorbent socks are installed in three wells and were changed as needed through October 2021. AZ 6-30-2023 Reviewed a report for the period of May 2022 Through October 2022. In February 2022, the NYSDEC approved Surfactant Enhanced Petroleum Recovery Injection Work Plan was implemented. The SEPR injections consisted of injecting a total (per well) of 25-gallons of 34% Hydrogen Peroxide, 28-gallons of Emulse 3 (proprietary surfactant) and 947-gallons of potable water into existing monitoring wells

(Continued) **S102619299**

MW-02, MW-04, RXMW-01, and RXMW-02. EFR (via vacuum truck) was performed in conjunction with and for five consecutive days following last injection event between February 7, 2022, and February 18, 2022. Routine groundwater sampling was completed in September 2022. The September 2022 sampling event represents the second sampling event post SEPR injections. Five of the six groundwater samples collected reported VOC concentrations above AWQSGVs. The five groundwater samples from wells MW-02, MW-03, MW-04, RXMW-01 and RXMW-02 reported one VOC constituent (p-Isopropyltoluene) above its respective guidance value. During this monitoring period, measurable free phase product was not observed during any of the seven groundwater gauging events (May 20, 2022, June 21, 2022, July 5, 2022, July 11, 2022, August 4, 2022, September 8, 2022, and October 12, 2022). AZ 12-1-2023 Reviewed a report for the period of November 2022 through April 2023. Free-phase product has not been reported in site wells post Surfactant Enhanced Petroleum Recovery (SEPR) injections. Based on the absence of free-phase product, it is interpreted that the injections were successful in addressing free-phase product. Groundwater samples were collected December 6, 2022, February 14, 2023, February 20, 2023, and April 5, 2023. The four sampling events represent the third through six sampling events post SEPR injections. Five of the six groundwater samples collected reported VOC concentrations above AWQSGVs. The five groundwater samples from wells MW-02, MW-03, MW-04, RXMW-01 and RXMW-02 reported one VOC constituent (p-Isopropyltoluene) above its respective guidance value. One sample (April 2023) from RXMW-01 reported Naphthalene at a concentration slightly above its guidance value. February 20, 2023, results: The p-Isopropyltoluene concentrations were 6,200 ug/L in well MW-02, 19 ug/L in well MW-03, 3,900 ug/L in well MW-04, 5,200 ug/L in well RXMW-01, and 3,800 ug/L in well RXMW-02. AZ 5-2-2024 Reviewed a report for the period of May 2023 - October 2023.EFR was conducted on May 15, 2023, June 12, 2023, July 10, 2023, August 14, 2023, September 26, 2023, and October 9, 2023. The site is on a semi-annual sampling frequency. On October 17, 2023 (Sampling event)- 0.20 feet was measured in RXMW-01. AZ 10-21-2024 Reviewed a report for the period of November 2023 through April 2024. Groundwater removal (via vacuum truck) was conducted during this monitoring period on December 4, 2023, February 5, 2024, March 7, 2024, and April 4, 2024. A total of approximately 725-gallons of groundwater was removed from monitoring wells MW-02, MW-03, MW-04, MW-06R, RXMW-01 and RXMW-02 during this monitoring period. Free-phase product had not been reported in site wells post SEPR injections through May 2023. In June

(Continued) **S102619299**

2023, free-phase product was measured in well MW-02 on two occasions at 0.02 and 0.04 feet thick. No free-phase product was measured in this well through April 2024. Free-phase product was measured in well RXMW-01 on four occasions since September 2023. This includes September 26, 2023 (0.10 feet), October 17, 2023 (0.20 feet), February 5, 2024 (0.20 feet), and March 7, 2024 (0.15 feet). These represent the first measurements of free-phase product at RXMW-01, post SEPR injections in 2022.Monthly EFR will be completed to address elevated groundwater VOC concentrations and/or free-phase product. Supplemental groundwater gauging and sampling will be a part of the EFR program. AZ

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Neighbor in #76 Richardson says there is construction on this corner property and there is oil coming under the fence onto the sidewalk and street. Construction notices identify: HSD Contruction LLC Simon Dushinsky - 718-246-4762 Property is across the street for a Fire House and an orange traffic cone is on the oil spill. 05/01/13-Zhune visited the site. No visual and olfatory evidence of petroleum was found. Spill closed.
Remarks:	black oil on side walk leaking from a demolished building site

DEC Memo:	10/14/09-Zhune called Michelle Lortz from Westin Solutions (732)417-5821. Left a message 10/28/09- Michelle called and said the City of New York is renovating the pool located on Bayard and Lorimer St. Westin Solutions performed a Phase II. The report will be send next month. Project Manager Barry Schaartc 718-391-1333 with New York City Department of design

INSIDE MCCARREN POOL (Continued) **S110044008**

and Construction.
11/13/09-Zhune spoke to Barry from DDC. He said Westin Solution is one of their contractor. They
are doing Environmental soil Investigation(Phase II) at this site.
The NYSParks owns this site.
They want to rivise the use of the pool in the property. Westin
Solution found mild contamination
around the UST Tank. The report will be sent in 3 weeks. 12/06/11-
Jason Hayes called to say that
they removed the 2500 gallons and took endpoint samples. They also abondoned in place the 10000
gallons tank. Report is being reviewed by Marty Rowland. 06/18/12-
Phase II submitted by Weston
Solutions of New York dated December 1,2009 The following conclusions were presented: Underground
Storage Area #1 (10000 -Galloons UST).- the soil and groundwater analytical results did not
identified evidence of an impact to soil and groundwater associated with the 10000 gallon oil
UST(UST Area 1). As per the report the elevated TAL metals in groundwater (GW-1) collected to
investigate this UST are atributable to the presence of fill.
Underground Storage Area #2 (2500
-Galloons UST).- Elevated concentrations of VOCs Toluene(34 ug/l), SVOCs (benzo (a) anthracene,
(benzo (b) fluoranthene, benzo (K) fluoranthene, Chrysene, Fluoranhtene, Indeno(1,22,3-cd)pyrene
and pyrene) and metals (antimony, arsenic, barium, beryllium, cadmium, chromium, copper, iron,
lead, magnesium, mercury, nickel, selenium, sodium, and zinc were detected in groundwater sample
(GW-04) collected to investigate the former 2500 gallon UST (UST Area 2). Propose Excavation Area
#1.- The soil analytical results of the samples collected from borings SB-09, SB-10, SB-11, SB-12,
SB-13, SB-14, SB-15, SB-16, SB-17 and SB-18 in the proposed excavation Area #1 y Area #2 identified
the following SVOCs ((benzo (a) anthracene, benzo (a) pyrene, benzo (b)fluoranthene,benzo
(k)fluoranthene, chrysene, dibenzo (a,h) anthracene and Indeno(1,22,3-cd) and the following metals
(arsenic, barium, cadmium, calcium, chromium, copper, lead, mercury, magnesium, nickel and zinc) at
concentration eceeding the limit acceptable. Elevated concetrations of SVOCs ((benzo (b)
fluoranthene, benzo (K) fluoranthene, benzo (k)fluoranthene, Chrysene, Fluoranhtene,
Indeno(1,22,3-cd)pyrene and pyrene and metals(antimony, arsenic, barium, beryllium, cadmium,
chromium, copper, iron, lead, magnesium, mercury, nickel, selenium, sodium, and zinc) were detected
in the groundwater sample collected from GW-5 (Excavation Area 2) at concentration exceeding the
standards. In Filled pool Area. The soil analytical results of the samples collected from borings
SB-19 and SB-20 in the filled pool area identified SVOCs, metals at concentrations exceeding the

INSIDE MCCARREN POOL (Continued) **S110044008**

standards and the PBC Aroclor 1254 at 1.4 mg/kg in sample SB-19 and the Aroclor 1254 at 1.8 mg/kg
in sample SB-20. 11/17/10- Langan Engineering sent the spill Investigation report dated 11/15/10.
Langan Conducted investigation to delineate the extent of groundwater contamination in the
underground Storage Area #2. The field investigaton included geophysical survey, nine borings (EB-1
through EB-9 and the installation of three temporary monitoring wells (MW1, MW5 and MW7). The
report found that the 2500 UST could not be found by the geophysical survey in the underground
storage area #2. Petroleum impacts including staining and odors were identified in borings EB-1,
EB-2, EB-3, EB-5, EB-6, EB-8, EB-9. VOC's in groundwater were not detected in samples collected
from monitoring wells MW-1, MW-5, MW-7. 05/15/11- Langan Engineering sent the Suplemental
Subsurface Investigation Report dated 05/12/11. Langan conducted investigation in the lines in the
underground storage area #1 and #2. Four borings (PB-1 through PB-4 were installed to investigate
the lines in the 10000-gallon UST;. No VOCs were detected in any of the samples collected from
sample PB-1 through PB-4. SVOC's (Benzo a anthracene, Benzo a pyrene, naphthalene) were detected in
sample PB-1(7-9 feet) and SVOC's (Benzo (a)anthracene, Benzo (a)pyrene, benzo (b)
fluoranthene,benzo (k) fluoranthene and Chrysene) were detected in sample PB-4(5-7 feet) at
concentration exceeding the standard. Eight soil borings (PB-5 thrugh PB-12 were installed to
investigate the lines in the area of the 2500-gallon UST. No VOC's were detected in any of the soil
samples collected from boring PB-5 through PB-12. SVOCs (Benzo a anthracene, Benzo (a)pyrene.
benzo (b) fluoranthene, benzo (k) fluoranthene and Chrysene) were detected in soil samples
collected from borings PB-9 (13-15 feet), PB-19(8-10 feet),
PB-10(12-14 feet), PB-11A(13-14 feet),
PB12(8-10 feet), PB-12(12-14 feet). VOCs 1,2,4,5 tetrametylbenzene were detected in groundwater
sample collected from TMW-3 and TMW-4 and Benzene and naphthalene were found in groundwater sample
collected from TMW-5 in concentrations exceeding the limit.
12/17/2011- Langan Engineering sent the
UST and Spill Closure report dated December 13,2011. Six enpoint samples were collected following
the excavation and removal of the 2500-gallon UST. sample were collected from each sidewall and two
samples were collected from the bottom of the excavation. The soil analitycal result indicated no
VOC's exceedances, SVOCs exceedances were found in two of the six samples. The 10000-gallon UST was
abondoned in-place. No sample were collected since the subsurface around the tank has been
characterized by previous investigations and no evidence of

INSIDE MCCARREN POOL (Continued) **S110044008**

contamination has been identified.
06/05/2012- Langan Engineering sent the groundwater confirmation Sampling Report dated 06/01/2012.
Four confirmation grundwater samples around the former 2500-gallon UST were collected from four
borings (GW-A through GW-D). The ground water analytical results indicated no VOCS found above the
limit and SVOCs exceedances in the groudwater included benzo(b)fluoranthene, benzo (k)fluoranthene
and Chrysene all of the four groundwater samples and indeno (1,2,3-cd0pyrene in three of the
groundwater samples (GW-B, GW-C, GW-D). As per the report the exceedance of SVOC's in groudwater
are atributable to the presence of fill. Spill Closed.

Remarks: Soil borrings determined soil and contamination.Remidiation in progress.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Name: Not reported
Spiller Company: YONKERS CONST / CON ED
Spiller Address: Not reported
Spiller Company: 001
Contact Name: Not reported
Latitude: Not reported
Longitude: Not reported
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL Appendix B site #30
07/02/91: FEEDER LINE #61 FROM RAINEY SUBSTATION (35 VERNON BLVD) TO FARRAGUT SUBSTATION (89 JOHN
ST) - 5 LINE, APPROX 4 MILES = ~21,120 GALLONS OF DIELECTRIC OIL IN LINE (1.02 GALLONS PER FOOT).
CON ED (RICHARD BLACKMAN) DIRECTED YONKERS CONSTRUCTION TO PUMP OIL/WATER MIXTURE IN THE OPEN
EXCAVATION TO STORM SEWER. CONTAMINATED SOIL WAS REMOVED BY YONKERS CONST., NO TRANSPORTERS PERMIT.
CLEANED UP. 10/3/03 Additional indformation from old files indicates feeder 61 was hit by
contractor working on BQE project. 10/15/12 - draft SIWP reviewed and comment letter sent 10/12/12
(JOC) 05/30/13 - telecon with Con Edison and CDMSmith to discuss comments on work plan. Additional
historic documentation was found about the release, which included a sketch/drawing which
identified the location of the release along Meeker between Leonard and Frost Streets, and included
additional information which showed that the volume of the release ultimately was 8000 gallons
rather than the 500 gallons included in the other documentation, which was believed to be just a
prelinary estimate. One detail from the original report included that the pressure loss from the
feeder lead to a pothead failure in Rainey substation in Queens; Con Edison confirmed that the
failure did include a release; they provided a leak report number 64191 found in historic records
relating to that incident. It was agreed that they will provide this information to me for
follow-up outside the Appendix B program with another Con Edison operating group (probably
Substation Operations). Revised work plan expected imminently. (JOC) 11/6/13 - spoke with Con
Edison PM (Phelan) on 11/4; going to provide figures showing proposed boring locations for the
site, which were received via email later that day; reviewed and sent email reply to Con Edison's
Phelan today. As noted above, additional information on the lcoations of the releases had been
located by Con Edison; this release location is now shown as just north of the sidewalk on the
east-bound Meeker Avenue, roughly mid-way between between where Meeker Avenue intersects with
Leonard Street and Frost Street. The proposed investigation locations are around the area of the
leak; I requested a boring to groundwater be included on the northwest side, which is the expected

FEEDER 61 (Continued) **S103271742**

direction of groundwater flow. (JOC) 12/20/13 - received revised SIWP via FTP on December 16th.
(JOC) 12/30/13 - sent approval letter to Con Edison for SIWP today. Include condition for
resolution of laboratory SOP question - the SIWP had included the former SOP, while a subsequent
SOP for modified Method 8100 had been submitted for a separate project. The revised SOP had been
sent to DER's chemist for review and response expected soon. Con Edison PM (Mariani) replied that
he will work with their consultant on the SOP issue and the schedule. (JOC) 7/7/14 - The SOP issue
from above was resolved on March 6 with the approval of EQS' SOP for the method. Con Edison's PM
indicated a schedule would be sent by the end of March. Tentative draft schedule received 6/10.
Asked if he was intending to revise it or whether it was final; PM indicated that they cannot get
the schematics they need from National Grid and they intend to send in a revised schedule during
the week of June 30. No revised schedule was received. Sent follow-up email on schedule to PM
today. (JOC) 8/21 - met with Con Edison PM and section manager on 8/4 - discussed the need for
keeping up with schedules or providing explanations and proposed revisions. Received revised
schedule 8/18. Schedule approved. Utility clearance activities to start 9/29. (JOC) 9/29/14 - went
to site location 9/29 AM. Con Ed CM, CDM Smith, ADT and Diversified Geophysics at location. They
had measured off the distance to the location to the pile which impacted the feeder return (71 feet
from the corner of Frost St. toward Leonard St.)and were conducting the geophysical work. At this
point, gas had not been marked (under 753) along with sewer and water. CDM contacted Con Edison PM
(Mariani) and he indicated he would try to contact National Grid to get the markouts completed. CDM
(Krupka) indicated she was going to try to go to the NYCDEP Brooklyn office to obtain sewer
drawings/info. Plan is to meet back at location with all information on Thursday 10/2. (JOC)
9/30/14 - Con Edison followed up with National Grid One Call contact who indicated they will
complete the gas markouts. If not completed on time, site meeting re-scheduled to Monday 10/6.
(JOC) 10/16/14 - site meeting was re-scheduled to occur, and did, on 10/7. Tentative marked
locations SB-1 and SB-2 along curbline in street were acceptable, SB-1 was in the area of the
historic excavation. The tentative marked locations for the other three were all out in the middle
traffic lane or further, while the return lines (where the pile damaged the line) was closer to the
curb. Described that the outermost (SB-3) could move in to between where the other two were marked
(in the middle lane) roughly straight out perpendicular to the curb

FEEDER 61 (Continued) **S103271742**

from the marked location of
leak (the pile) and the other two should be moved in to between the feeder and the return lines.
Received email 10/14 PM asking about installation of additional wells at this location or to move
to other site spill (Graham/Driggs Avenue), but it was not clear on what was completed. Sent email
response seeking clarification, receiving response that 4 locations were completed and were going
to proceed with the work plan default for the well location for no contamination and was asking if
we should install another that was in the expected downgradient direction. Responded that it would
be useful to do so but also needed to complete the other location along the return (the fifth from
the work plan). Went to site 10/15 to confirm status and direction. Con Ed CM (Gribbons), CDM Smith
(Horn) and ADT on location. Went over the location for the remaining soil boring along the feeder,
and ADT tried a couple of ways to align the Vactor truck in the closed parking lane while trying to
avoid blocking access to the business on the corner of Frost. At the same time were going to
proceed with soil sampling and installing well at SB-1. First sample at 5 -10 feet poor recovery
(using SP direct push). Moist to wet rather shallow in SB-1, but first also peat (dry) below that.
Two depths with what appeared to be slightly stained and/or sheen-like. No PID, some odor but not
distinct. CDM Horn made calls and got approval to collected additional samples, which he did for
three depths. He would take sample from SB-4 along feeder via hand auger also, which had been
cleared down to a level that was distinctly below the fill/sand. Well was installed and water
measured at about 7 feet. (JOC) 1/13/16 - met at location with CDM Smith (Krupka and Horn), Con
Edison (Chang and Gribbons) and ADT (Miller and others for traffic control); Ms. Krupka provided
sheet with prior soil sample results. Impacts found identified as feeder 63 oil in boring B-2 below
SCO for non-mineral oil DF. Mr. Horn showed his notes from the investigation work showing the soil
boring locations completed. The plan was to put in another sample location on the west side of the
feeders but the nearest location marked out by the geophysical contractor had been in the shoulder
along the median three travel lanes north of the location. Ms. Krupka advised that the well
installed at B-1 was developed yesterday. Mr. Horn advised that it was very turbid initially but
cleared up; it was able to keep up with 0.5 gpm flow rate; no signs of petroleum. Requested they
put together the information they have in summary form about the work completed along with the
field drawings of the boring locations, depths of borings, etc to send to me and then we will

FEEDER 61 (Continued) **S103271742**

further discuss any other sampling locations. (JOC) 2/2 per the discussion on 1/13, received from
Ms. Krupka on 1/15 summary information on investigation completed to date including soil sample,
locations, depths and results; discussed the information with Ms. Krupka on 1/19 and sent follow-up
email for collection of sample from deeper interval at boring located east of the excavation open
at the time of the spill(SB-02) including the interval below 6.5 feet below grade to groundwater
which was found just deeper than this, per the SIWP scope, and installation of monitoring well at
SB-03 on the presumed downgradient side of the spill location which is located in the traffic lanes
of Meeker Avenue. Ms. Krupka later reported that the soil sample was collected at SB-2 on 1/22; the
work was delayed for two days due to the blizzard on 1/23 and the well was installed at SB-03 on
1/27; requested additional information on the installation on 1/27 and Ms. Krupka provided a
revised report on 1/28 for the 1/27 work including that while no obvious impacts were observed at
SB-03 while soil sampling, petroleum odor and sheen were observed in the well after installation;
Ms. Krupka provided report on 2/1 advising that the well was developed on 1/29. Sent email to Ms.
Krupka 2/1 requested to be advised on well sampling schedule so that I can be there if available.
(JOC) 2/9/16 - received email from Ms. Krupka advising that well sampling would occur on February
12th (JOC) 4/13/16 - Went to site location on Feb 12 to observe sampling; no one on location.
Contacted Ms. Krupka by telephone who advised that due to construction equipment that was blocking
the well at spill 30-2 on the prior day, 2/11, they switched sampling days and had sampled this
location on 2/11 and were sampling at location 30-2 at the time. Went to the location of 30-2 on
Graham south of Driggs and met with CDM’s Thomas Horn, who confirmed that the location on Meeker
had been sampled the prior day. Received email from Ms. Krupka Feb 26 which included that due to
their NYCDOT permit requirements they were going to have their contractor refurbish the street at
the location, which included for well abandonment. Called Con Edison’s PM Angel Chang to discuss
the well abandonment, advised him that since the Department did not have the final report we could
not say whether any other sampling might be needed. Received email 3/2 from Ms. Krupka advising
that they will be proceeding with road patching at this time but will schedule well abandonment for
a later date. Received email from Ms. Krupka 4/11 advising that the initial scope is completed and
wanted to verify they should be moving forward with the report. Replied to Ms. Krupka on 4/11 via
email that if there might be any need for any other work beyond the

FEEDER 61 (Continued) **S103271742**

initial scope, then that can be
done before the RIR; otherwise, proceed with the RIR. (JOC) 6/3/16 - received 4/25 email from Ms.
Krupka in response, providing draft groundwater data; reviewed and responded by email 5/2
confirming that they have started working on the report, and Ms. Krupka responded that they were.
(JOC) 10/26/2016 - V. Brevdo Due to Project Manager Joe O'Connell's promotion to the DMM, and per
discussions between Chiefs of Spill Prevention and Response and Remediation Section B, this spill
case is re-assigned to Remediation Section B. VB 02-27-2017 - V. Brevdo Con Edison Appendix B Site
30, Meeker Ave. between Leonard and Frost Streets & Graham Ave. and Driggs Ave., Broooklyn (Spills
No. 9103785 & 9113333) On February 21, 2017 Con Edison submitted Site Investigation Report and
Petition to Close Spill Cases associated with two releases of synthetic low viscosity dielectric
fluid from Con Edison Feeder 61 on June 28, 1991. The investigation and Remedial Investigation
Report were completed by CDM Smith in accordance with the December 2013 Department-approved Site
Investigation Work Plan. Spill 30-1 involved the release of an unknown volume, ranging from 500 to
8,000 gallons from the 5-inch feeder return line of Feeder 61 located on Meeker Avenue. Spill was
caused by a contractor working on the BQE rehabilitation project who augered through the line while
advancing an unauthorized piling. Dielectric fluid leaked into an adjacent open excavation which
was then re-excavated and shored. The line was repaired. Spill 30-2 involved the release of
approximately 5,000 to 6,000 gallons of synthetic low viscosity dielectric fluid from the Feeder 61
on July 18, 1991. The spill resulted from a leak between the joint reducer and the north manhole
wall located along Graham Avenue. Leak was repaired and following inspections between March 4, 2003
and January 4, 2010 determined that no residual contamination existed in the manhole. Repairs were
completed in 2006 and included breaking out all four walls and installing new link seals. The
following investigations were performed to determine if residual contamination from the dielectric
fluid remained in excess of cleanup criteria for dielectric fluid. Two separate investigative
activities were conducted between 2014 and 2016. Investigations included installation of 9 soil
borings and 3 groundwater monitoring wells. The results of the investigation of the aforementioned
two spill cases showed dielectric fluid was positively identified in soil samples collected at both
spill locations. However, concentrations of total petroleum hydrocarbons detected in soil samples
did not exceed the Department-approved soil cleanup criteria for dielectric fluids and no evidence

FEEDER 61 (Continued) **S103271742**

of sheen or product was identified in the groundwater at these locations. There was an absence of physical evidence of contamination such as odors or staining during investigation. The Department closed Spill Cases 9103785 & 9113333 on February 27, 2017. VB

Remarks: NYSDOT CONTRACTOR YONKERS CONSTRUCTION,SUBCONTRACTOR NICHELSON WAS EXCAVATING,DIELECTRIC OIL SPILLED FROM A 5 LINE @ 250-300 PSI,OIL LEAKED INTO AN ADJACENT OPEN EXCAVATION & CONTAMINATED SOIL.

DEC Memo:	Placed call into Denny Sing of Don Carlo Env. requesting callback and info. Need to send CSL. Owner as per Property Shark Vazquez, Alvaro 86 Havemeyer St Brooklyn NY 11211-3348 07/17/06 Rahman- As per Lisa from Don Carlo(718.857.3100), the property owner is 263 N Group LLC C/O Mr. Sam Pearl 80 Clay Street, Brooklyn, NY 11222. Ms. Lisa will get back to DEC with accurate info. 01/10/07 Rahman- Phase II report prepared by Don Carlo Env. Services Inc.Petroleum related VOC/SVOCs were not found in Phase II soil/ground water samples.Presence of only certain SVOCs(Benzo group)indicate that those are related with historic fill material.Heavy metals were found in ground water samples.In DCES's opinion, those matals came from the historic use of the site as a metal smelting and storage facility.The proposed development for the subject property is a five story residential building.Contaminated soil will be removed during the excavation for new foundation.A water proofing barrier will be incorporated in the foundation slub.The site is a NYC DEP E designated site.Spill closed due to absence of petroleum constituents in soil/ground water.Presence of heavy metals will be addressed as part of NYC DEP's requirement.
Remarks:	FOUND CONTAMINATED SOIL AT LOCATION

Tank Info:

Tank Number:	001
Tank Id:	180261
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	I05 - Overfill - Vent Whistle
	F02 - Pipe External Protection - Original Sacrificial Anode
	G00 - Tank Secondary Containment - None
	B04 - Tank External Protection - Fiberglass
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	H00 - Tank Leak Detection - None
	K00 - Spill Prevention - None
	A03 - Tank Internal Protection - Fiberglass Liner (FRP)
	C01 - Pipe Location - Aboveground
	J00 - Dispenser - None
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	06/13/1950
Capacity Gallons:	3000
Tightness Test Method:	-
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	05/02/2013

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is

395 LEONARD STREET RICHARDSON LLC (Continued) **1016144483**

used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD See file Eng. CO. 229 @ 75 Richardson Ave. 09/10/03. J.Krimgold spoke over the phone with Iradg Youssefinia from NY Petroleum, Inc. @ 251 Post Ave., Westbury, NY 11590 (516) 338-0626. He is a consultant/contractor preparing proposal to investigate this site for Mr. Morris Borenboum (new owner?). He will submit an investigation plan for the Departmental review. 6/16/2004 Attorney for new owner called to ask what needed to be done to close out the case. Sangesland told him to ask Krimgold. Attorney said he has a report from Dr. Yousefinia showing clean water and soil samples. Sangesland told him to mail in a copy of the report to Krimgold for review. 8/2/04. J.Krimgold has reviewed the Phase II report submitted by NY Petroleum and Driling Co. and dated 06/10/04. The report was not approved and a letter requesting to make corrections ans resubmit the report has been sent to Mr. Borenbaum and Mr. I Youssefnia. 11/01/04. J.Krimgold has reviewed a corrected report dated 09/16/04. The report still cannot be approved due to the lack of information (Phase I is missing). J.Krimgold requested an on-site meeting with a consultant. 12/03/04. J.Krimgold met with Mr. I. Youssefnia at the site and maped locations of additional soil borings. See also 0409303. Rommel 2/18/05. J.Krimgold reviewed the Ground Water Investigation report submitted on January 13, 2005 by NY Petroleum and Drilling Corp. Based on the findings of this and previouis reports no contamination was found at this property. NFA letter.
Remarks:	NYSDEC has performed a subsurface investigation on adjacent property Spill # 9703488 @ 75 Richardson Ave. and determined that the motor fuel storage systems located on this property might have been a source of contamination.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 5/19/99 SPOKE TO REED TUROFF (TRINITY CONSULTING - 718-257-8470) HE SAID THE OLD TANKS WERE PULLED IN APRIL. SINCE A PROBLEM WAS FOUND, NO NEW TANKS HAVE BEEN INSTALLED AND THE OWNER & OPERATOR ARE IN DISCUSSIONS AS TO WHO IS RESPONSIBLE AND WHAT WILL BE DONE. ACCORDING TO MR. TUROFF, THE OPERATORS ARE: KAY SINGH AND K. JANGI (718-388-3329). OWNERS ARE: DIMITRI (DAVID) SHTAIRMAN AND WALTER ROMANSKY (718-388-3464) 7/28/99 SPOKE WITH DIMITRI SHTAIRMAN - HE SAYS A NEW LEASE WAS SIGNED WITH KAY SINGH FOR THE STATION AND MR. SINGH AS OPERATOR IS RESPONSIBLE FOR ALL ENVIRONMENTAL WORK ON THE SITE. DIMITRI SAYS THAT ALL CONTAMINATED SOIL HAS BEEN DUG OUT AND REMOVED. HE SAYS END POINT SAMPLES OF THE OPEN HOLE WERE TAKEN BY ASTEM LAB INC (DR. NORMAN MUNROE 718-459-3770). RIGHT NOW THE SITE HAS A LARGE OPEN HOLE AND THEY ARE NOW WAITING FOR THE CONTRACTOR TO INSTALL THE NEW TANK & SYSTEM, BACKFILL AND REPAVE THE SITE. 8/10/99 - ASTEM LABORATORIES, INC. SUBMITTED A REPORT SHOWING 6 END POINT SAMPLES (1 EACH SIDE, 2 BOTTOM) TAKEN FROM PIT WHERE 550 TANKS WERE. ALL SAMPLES WERE TESTED FOR 8021 + MTBE. ALL RESULTS INDICATE BTEX AND MTBE WERE <50 PPB. CLOSE OUT (CPT SAYS OK)
Remarks:	CALLER STATES THAT DURING REMOVAL OF 550 GAL TANKS CONTAMINATED SOIL WAS FOUND.

DEC Memo:	Vought was on off hours 8/16/10 - Raphael Ketani. The spill was called in on 12/20/06 by the NYPD and Gabriel Kapur of the NYCDEP (917) 682-3753. The spill was large gas puddles on the surface of the site. The site is block and lot 2733 and 7. It was sold on 7/28/87 by Lawrence Sievers of 5 Mt. Logan Court, Farmingville, NY to Walter Romansky and Dimitri Shtairman of 2421 East 74 Street, Brklyn, NY. There are two PBS registrations. PBS #2-510793 is for the 278 Fuel Stop, Inc. It lists four 4,000 gal. USTs and one 550 UST as still active with gasoline and diesel. The 4,000 gal. tanks were installed in either 1972 or 1999. The 550 UST was installed in

GAS STATION/ 278 FUEL STOP (Continued) **S104648903**

1939. There were 4 USTs that
were closed and removed in 1939. The owner of the site is 278 Fuel
Stop, Inc. (718) 388-3329. The
contact is Kuldeep S. Sakota (718) 388-3329/(201) 548-1658. PBS
#2-611136 is for A-1 Auto Repairs,
Inc. It lists just a 275 gal. waste oil tank as being in service that
was installed in 6/1/08. The
owner of the site is Avtar Singh, 126 Berwood Drive, Linden, NJ 07036
(908) 486-0412. Mr. Singh is
also at (718) 388-3464. There is no paper file and there are no
E-docs. There are two other spill
cases, both of which were closed by Steve Sangesland of Spills. They
are #9900802 and #0310672.
Case #9900802 was opened on 4/21/99 and closed on 8/10/99. It was
based upon the discovery of oil
contaminated soil when they pulled the 550 gal. UST. The soil was dug
out and the end point samples
were below 50 ppb. Case #0310672 was opened on 12/16/03 and closed on
12/16/03. There was an
annonymous call regarding someone sweeping gas into the sewers.
8/25/10 - Raphael Ketani. I made an
unannounced site visit today. It was raining moderately, but I felt
that it would still be possible
to determine the site conditions. The site fronts on Leonard Street
and on Meeker Avenue, where it
parallels the Brooklyn Queens Expressway. There wasn't much to see
from the Leonard Street side.
There is a corrugated still building that opens onto Leonard Street.
It has a sloping roof (see
E-docs). The building was being used as a metal fabrication shop. The
floor was clean. Next, I went
to the Meeker Avenue side of 278 Fuel Stop. Even though it was
raining, I didn't see any sheen on
the pavement in the fueling area (see E-docs). There appeared to be
some small (about 6 diameter)
stains on the, but nothing else. Next, the gas station manager showed
me the repair area. The area
was largely try as it was mostly covered by a roof. There were several
trucks in and next to the
garage. I didn't see any free product on the pavement, but there were
some old stains. I told the
station manager to make sure that any spills that occur are cleaned up
quickly. After this, I left
the site. As the spills mentioned in the original spill report are no
longer present, and as there
appeared to be no new spills, I have determined that there is no
threat to the environment or the
public. Therefore, I am closing the spill case.

DEC Memo:	10/27/14-Hiralkumar Patel. alternate address: 98 Richardson Street PBS #: 2-510793, 2-611136 as per PBS # 2-510793, the site has/had following tanks: - four (4) 550 gal gasoline USTs, removed in Apr. 1999 - one (1) 550 gal waste oil UST, removed in Jun. 2009 - one (1) 4,000 gal gasoline UST, in-service, installed in Aug. 1972 - one (1) 4,000 gal gasoline UST, in-service, installed in Apr. 1999 - two (2) 4,000 gal diesel USTs, in-service, installed in Apr. 1999 as per PBS # 2-611136, the site has one (1) 250 gal waste oil AST on saddles, in-service, installed in Jun. 2008. PBS registration expired. other spills #: 9900802, 0310672, 0610686 spill

GAS STATION/ 278 FUEL STOP (Continued) **S104648903**

9900802 was reported on
04/21/1999 due to findings of soil contamination during removal of 550 gal tanks. case closed.
spill # 0310672 was reported on 12/16/2003 anonymously. caller stated that gas station is polluting
sewer system by a broken hose. case closed. spill # 0610686 was reported on 12/20/2006 due to
findings of oil puddles on surface. case closed. 12:42 PM:- spoke with Robert. he went to conduct a
tank system test, as required by FDNY. during inspection, he noted that a sensor in intertitial
space of the double wall diesel tank went off. he found about 2 gal diesel mixed water. site has
two manifolded diesel tanks. currently the tank in question is empty and isolated from the other
tank. fill box has been locked. further testing will be conducted and repairs will be made. FDNY
has been informed about possible leak in diesel tank. Walter Romansky / Dimitri Shtairman

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: see also two former closed spills #0801333 & #060249. OER received a community complaint and inspected the site yesterday. There were strong odors present at the site from both an impacted stock pile on the west side of the site as well as creosol and decomposing organics smell on the east side. Doug Harm (consultant) and Tucker (GC) we required immediate actions to be taken to take care of the problem. 5/29/14 - Austin - Reassigned from Rahman to Mahat - end 9/25/14: Mahat T/C : A phone call was received from the consultant of the potential buyer inquiring about the spill status. OER Voluntary clean up case number : 13CVCP086K DEC is waiting for a closure report from consultant. 10/7/14: Mahat DEC Mahat received a tank closure report from the contractor and it is uploaded on D2 for reference. 12/29/14: Mahat report review : DEC Mahat reviewed the UST. End point samples were below CP 51 guidnace value. All contaminated soil were removed from the site. No further investigation for remediation and deliniation is warrented by the Department. Hence, the spill case will be closed on the database and OER will continue with their program.
Remarks: possible historic spill - U/G tank also found in concrete - cleanup pending

215 NORTH 10TH STREET - OFF-SITE (Continued) **S123661448**

Record Added Date: 10/18/2018
Record Updated Date: 12/06/2022
Update By: JBSWARTO
Site Description: "The following Site Description is for the associated BCP on-site: Location: The site is located in an urban area in the Williamsburg section of Brooklyn (Kings County) on the northeast corner of North 10th Street and Roebling Street. Site Features: The site was formerly developed with two single-story industrial buildings and two smaller one-story structures, which are surrounded by parking areas. The buildings were demolished in May 2018. No water bodies are present on site. A mixed-use commercial and residential building was constructed on the site. Current Zoning and Land Use: The on-site is a parcel that was redeveloped within a special mixed use zoning district (M1-2/R6A), which is characterized by light industrial use (woodworking shops, repair shops, storage facilities) and allows for mixed-use residential buildings. The current on-site land use is a mixed-use commercial and residential building. The surrounding parcels are currently used for a combination of residential, commercial, transportation, and open park space. Past Use of the Site: A review of Sanborn Fire Insurance maps shows that the site was used for manufacturing and industrial operations that include a dry color and paint storage facility, a varnish research works, and a chemical warehouse. The 1942 Sanborn map also identified one benzene and two gasoline underground storage tanks (USTs). Prior uses of the site that appear to have led to contamination are the varnish research works and USTs, both of which are associated with the use of chlorinated solvents that have potential for release to the environment. Site Geology and Hydrogeology: Site elevation ranges from about 9 to 13 feet above sea level and gradually slopes downward to the east. The subsurface stratigraphy consists of historic fill to about 4 feet below grade surface (bgs), underlain by brown sand, red clay, brown clay, black gravel, and black/brown silt. Predominant geological surface features were not reported and bedrock was not encountered during the 2015 investigation. Depth to groundwater ranges from about 6 to 7 feet bgs and appears to flow towards the west. The site is located within a Zone AE designated flood zone, which is identified as a high risk flood area."
Env Problem: "Prior to completion of remediation: Soil contamination was not identified in off-site area. Groundwater was analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, Pesticides, and PFAS during the Site Characterization. Indoor air was analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for the site include PFOA, benzene, and methylene chloride. Groundwater Benzene and PFOA were found in the off-site area moderately exceeding their respective standards in groundwater (1 ppb and 10 ppt). The greater concentrations were seen in wells downgradient of the on-site and in the deeper monitoring wells (15-20 ft bgs). Indoor Air TCE, carbon tetrachloride, and methylene chloride were detected at elevated concentrations in indoor air. TCE was detected at elevated concentrations up to 2.7 ug/m3. Carbon tetrachloride was noted at a maximum concentration of 0.58 ug/m3 and methylene chloride was noted with a maximum concentration of 90 ug/m3. Post-Remediation: Remediation at the on-site is complete to Track 2 standards and received a COC in 2020. It did not require a site management plan. People are not exposed to the contaminated groundwater because the area is served by a unimpacted public water supply. Mitigation was

215 NORTH 10TH STREET - OFF-SITE (Continued) **S123661448**

	completed at the off-site area to control soil vapor intrusion. "
Health Problem:	"Direct contact with contaminants in the soil is unlikely because the majority of the site is covered with buildings and pavement. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for people to inhale site contaminants in indoor air due to soil vapor intrusion. "

DEC Memo:	2/27/2019 - Feng - Duty Desk. Spoke to DEP Okoli who found the spill while responding to a sewage complaint. He stated that it is a construction site and they are doing excavation now. There is heavy equipment which broke down and spilled oil on the soil. He could not quantify how big the spill is. He could not provide photo picture nor the contact information of any personnel at the site. NYCDEP Okoli 347-672-6059 Searched the database and found Spill 15-05078 and Superfund 224229. Talked to Jane O'Connell and she said the only active one is C224229 for this address. She had unsuccessful attempts to call Albany. She recommended to email Melissa Sweet and copied Eric Obrecht and John Swartwout. email to Melissa Sweet Hi Melissa, We received the above referenced spill reported this morning. I spoke to DEP Okoli who found the spill while responding to a sewage complaint. He stated that it is a construction site and they are doing excavation now. There is heavy equipment which broke down and spilled oil on the soil. He could not quantify how big the spill is. He could not provide photo picture nor the contact information of any personnel at the site. I searched the database and found Spill 15-05078 and Superfund 224229. I talked to Jane and she said the only active one is C224229 for this address. So I am asking if you can call the consultant PM to see what happened and if anything done to address the spill. If you need Region 2 staff to inspect the site, let us know. 2/27/19-Lin-Responded to site regarding report of an oil spill from DEP. Spoke to the site representative and was informed that someone tipped over a bucket of hydraulic oil (less than 5 gallons) last week. They did not notice the spill right away due to a

215 NORTH 10TH STREET - OFF-SITE (Continued) **S123661448**

snow event last week. They put down some speedy dry on the location of the spill. There was no
petroleum odor when I was on-site. Case closed.

Updated By: JHOCONNE
Site Description: "Location: The site is located at 215 North 10th Street in the Borough of Brooklyn, NY. The site is bordered on the south by North 10th Street with residential buildings on the opposite side of the street, to the west by a parking garage, to the north by a six story residential building, and to the east by Roebling Street with residential buildings on the opposite side of the street Site Features: The Site currently developed with one-story industrial building, two smaller one-story structures and parking areas. The Site is currently partially occupied by a motorcycle sales and service company and a marble importer/manufacturer. Current Zoning and Land Use: The site is currently zoned M1-2 (light manufacturing) with an R6A (residential) overlay. The site has a New York City e designation for hazardous materials as a result of recent rezoning from the previous MX8 zoning (heavy industrial use). Past Use of the Site: The Site appears to have been developed sometime prior to 1887 and has been occupied by various industrial uses including a dry color and paint storage, a varnish research works (which utilized two benzene tanks and a gasoline tank) and a chemical warehouse. The site is listed as an inactive facility in the Chemical Bulk Storage database as site no. 2-000052 for storage of muriatic acid, ammonium hydroxide and nitric acid. Site Geology and Hydrogeology: NYSDEC has not received any reports including these details. "
Env Problem: "SEE SITE NO C224229 FOR FUTURE UPDATES Nature and Extent of Contamination: Based on preliminary sampling, contaminants of concern include volatile organic compounds (VOCs) in soil, groundwater and soil vapor. Samples were analyzed for VOCs, semi-volatile organic compounds (SVOCs), metals, PCBs and pesticides. Soil A total of eleven (11) soil borings were installed and from which twenty-five (25) soil samples were collected for analysis. Petroleum and chlorinated solvent-related VOCs were identified in soil samples. Benzene was found at a maximum concentration of 5.7 parts per million (ppm), ethylbenzene at a maximum concentration of 10 ppm, 1,3,5-trimethylbenzene at a maximum concentration of 35 ppm, tetrachloroethylene (PCE) at a maximum concentration of 9.4 ppm, trichloroethylene (TCE) at a maximum concentration of 220 ppm,

215 NORTH 10TH STREET (Continued) **S121933833**

cis-1,2-dichloroethylene (cis-1,2-DCE) at a maximum concentration of 36 ppm, vinyl chloride (VC) at a maximum concentration of 0.46 ppm and naphthalene at a maximum concentration of 100 ppm. Groundwater As per the site map, total of four (4) monitoring wells were installed and sampled. Due to insufficient sample volume, only 3 of the wells were analyzed for VOCs (the likely downgradient well was not analyzed for VOCs). TCE was detected at a maximum concentration of 170 parts per billion (ppb), cis-1,2-DCE at a maximum concentration of 16 ppb, VC at a maximum concentration of 15 ppb and naphthalene at a maximum concentration of 31 ppb. Soil Vapor A total of six (6) soil-vapor probes were installed, including one location beneath the occupied on-site building. Petroleum and chlorinated solvent contamination noted in soil-vapor samples including PCE at a maximum concentration of 7730 micrograms per cubic meter (ug/m3), TCE at a maximum concentration of 243,000 ug/m3, cis-1,2-DCE at a maximum concentration of 11,000 ug/m3 and VC at a maximum concentration of 1650 ug/m3. Significant Threat: Determination of significant threat will be made following completion of the Site Characterization. "

Current Zoning and Land Use: The site

215 NORTH 10TH STREET (Continued) **S121933762**

is a parcel currently undergoing redevelopment within a special mixed use zoning district (M1-2/R6A), which is characterized by light industrial use (woodworking shops, repair shops, storage facilities) and allows for mixed-use residential buildings. The surrounding parcels are currently used for a combination of residential, commercial, transportation, and open park space. Past Use of the Site: A review of Sanborn Fire Insurance maps show that the site was used for manufacturing and industrial operations that include a dry color and paint storage facility, a varnish research works, and a chemical warehouse. The 1942 Sanborn map also identified one benzene and two gasoline underground storage tanks (USTs). Prior uses of the site that appear to have led to contamination are the varnish research works and USTs, both of which are associated with the use of chlorinated solvents that have potential for release to the environment. Site Geology and Hydrogeology: Site elevation ranges from about 9 to 13 feet above sea level and gradually slopes downward to the east. The subsurface stratigraphy consists of historic fill to about 4 feet below grade surface (bgs), underlain by brown sand, red clay, brown clay, black gravel, and black/brown silt. Predominant geological surface features were not reported and bedrock was not encountered during the 2015 investigation. Depth to groundwater ranges from about 6 to 7 feet bgs and appears to flow towards the west. The site is located within a Zone AE designated flood zone, which is identified as a high risk flood area."

Env Problem:

"Post-Remediation: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were SVOCs, trichloroethene, and its breakdown products, zinc, nickel, arsenic, mercury, and lead in soil and groundwater. Remedial actions have successfully achieved soil cleanup objectives for residential use to 15 feet below ground surface. Residual contamination in the soil and groundwater is being managed under an local groundwater controls. Prior to Completion of Remediation: Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals during the Remedial Investigation. Polychlorinated biphenyls (PCBs) and pesticides were also analyzed for during the preliminary investigation and were not found to exceed standards. Soil vapor was analyzed for VOCs. Based upon investigations conducted to date, the primary contaminants of concern for the site include trichloroethene (TCE) and its breakdown products, cis-1,2-dichloroethene (DCE) and vinyl chloride, lead, mercury, arsenic, and SVOCs (e.g. benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene). Soil-Metals, such as lead, mercury, and arsenic, were found across the Site in shallow and deep soils. Concentrations of arsenic found on Site (maximum of 95.4 parts per million [ppm]) significantly exceeded the soil cleanup objective (SCO) for unrestricted use (UUSCO) and restricted residential use soil cleanup objective (RRUSCO) (13 and 16 ppm respectively). Lead found on-site (maximum concentration of 5,630 ppm) exceeded the UUSCO and RRUSCO (63 and 400 ppm). Concentrations of mercury found on-site (maximum of 160 ppm) significantly exceeded the UUSCO and RRUSCO (0.18 and 0.81 ppm respectively). SVOCs (mostly polycyclic aromatic hydrocarbons (PAHs) were noted mainly in shallow soils throughout the site, and one deep soil location on the northern portion of the site. Concentrations of SVOCs, such as benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene had maximum concentrations ranging from of 5.1 ppm to 6.5 ppm which exceeded the UUSCO and RRUSCO (all contaminants are 1 ppm for both the UUSCO and

215 NORTH 10TH STREET (Continued) **S121933762**

RRUSCO). TCE was noted on the northern portion of the Site in shallow soils with a maximum concentration of 30 ppm which exceeds the 0.47 ppm UUSCO and the 21 ppm RRUSCO. Vinyl chloride was noted in shallow soils with a concentration of 1.6 ppm; which exceeds the 0.02ppm UUSCO and the 0.9 ppm RRUSCOs. Other volatile organic compounds noted that exceeded the UUSCO include 1,2,4-trimethylbenzene, methyl ethyl ketone, cis-1,2-dichlorothene (DCE), naphthalene, and tetrachloroethene. Groundwater - TCE (maximum concentration of 21 parts per billion [ppb]) and its associated degradation products (DCE at 40 ppb) are found in the groundwater on the central and southern portion of the site, exceeding the groundwater standard of 5 ppb. It is suspected that these contaminants may migrate off-site. Dense Non-Aqueous Phase Liquid (DNAPL) was noted in a central monitoring well (MW-3) during the preliminary investigation, but was not seen during the Remedial Investigation. SVOCs, such as benzo(a)anthracene (maximum of 0.45 ppb), chrysene (maximum of 0.48 ppb), and benzo(b)fluoranthene(maximum of 0.6 ppb), were noted to be greatest at the eastern (most downgradient) monitoring well (exceeding the standard of 0.002 ppb for all named contaminants), and potentially are migrating off-site. Contaminants in this class exceeded the groundwater standards in all wells. Metals, such as lead, mercury, and arsenic, were found across the Site in groundwater. Concentrations of total and dissolved arsenic were found to exceed (maximum of 120.6 ppb) the groundwater standard (25 ppb) in MW4. Concentrations of total lead (maximum of 359 ppb) were found to exceed the groundwater standard (25 ppb) in 16MW2 and 16MW3. Concentrations of total mercury were found to exceed (maximum of 20.05 ppb) the groundwater standard (0.7 ppb) in 16MW2. Additional metals found to exceed the groundwater standard were total and dissolved nickel and zinc. Soil Vapor - TCE was detected at significantly elevated concentrations, up to 243,000 micrograms per cubic meter (ug/m3). PCE was detected at significantly elevated concentrations up to 7,730 ug/m3. Carbon tetrachloride was noted at a maximum concentration of 6,350 ug/m3 and 1,1,1-trichloroethane was noted with a maximum concentration of 6,000 ug/m3. Soil vapor samples were collected at 6 feet below sidewalk grade. Additional soil vapor and soil vapor intrusion sampling is being conducted to determine whether actions are needed off-site to address exposures associated with soil vapor intrusion. "

Health Problem:	"Remedial actions are complete, and measures are in place to control the potential for coming in contact with contamination remaining at the site. Investigation and remediation of offsite contamination will be conducted under a separate program."

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
The Integrated Compliance Information System (ICIS) provides a

PS 126K - JOHN ERICSSON JR SCHOOL (Continued) **1005444371**

database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Tank Info:

Tank Number:	001
Tank Id:	34810
Material Code:	0002
Common Name of Substance:	#4 Fuel Oil (On-Site Consumption)

Equipment Records:

C03 - Pipe Location - Aboveground/Underground Combination
G02 - Tank Secondary Containment - Vault (w/access)
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
F01 - Pipe External Protection - Painted/Asphalt Coating
K00 - Spill Prevention - None

JUNIOR HIGH SCHOOL 126 - BROOKLYN K126 (Continued) **U003394340**

H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
J02 - Dispenser - Suction Dispenser
L00 - Piping Leak Detection - None
I04 - Overfill - Product Level Gauge (A/G)

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	03/22/1966
Capacity Gallons:	10000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	08/13/2015

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
