Subject: ASTM Phase I Environmental Site Assessment
Proposed 2074-2080 McDonald Avenue Development
2074-2080 McDonald Avenue
Brooklyn, New York

Ladies and Gentlemen:

The enclosed report presents the results of a Phase I Environmental Site Assessment (Phase I) conducted at the above-referenced property, located at 2074-2080 McDonald Avenue, in Brooklyn, New York (herein referred to as the "subject property"). This work was performed by H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) in accordance with our proposal to Emerald Developers dated May 30, 2025, as authorized on June 5, 2025 ("Agreement"). This Phase I was conducted in conformance with the scope and limitations of the ASTM International (ASTM) E1527-21 Standard Practice for Environmental Site Assessments.[1]

The objective of a Phase I is to assess whether known and/or suspect recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) are associated with the subject property, as defined in the ASTM E1527-21 Standard.

Thank you for the opportunity to perform these services for you. Please do not hesitate to contact us if you have any questions or comments.

Sincerely yours,
H & A OF NEW YORK ENGINEERING AND GEOLOGY, LLP

Elizabeth R. Fitzgerald
Project Manager

Mari C. Conlon
Senior Associate

[1] The ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-21 Standard) as referenced in Code of Federal Regulations Title 40 Part 312 (the All Appropriate Inquiries Rule).

Executive Summary

H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) has performed a Phase I Environmental Site Assessment (Phase I) of the property located at 2074-2080 McDonald Avenue in Brooklyn, New York (herein referred to as the "subject property"). The scope of work was performed for Emerald Developers and is described and conditioned by our proposal dated May 30, 2025. This Phase I was performed in conformance with the scope and limitations of the ASTM International (ASTM) E1527-21 Standard and All Appropriate Inquiries (AAI) Rule.

SUBJECT PROPERTY DESCRIPTION

The subject property is located at 2074-2080 McDonald Avenue in the Gravesend neighborhood of Brooklyn, New York, and is identified as Block 6680, Lots 39 and 42 on the New York City Tax Map. The property consists of two tax lots totaling approximately 0.72 acres (31,480 square feet) and is situated within a mixed commercial and residential zoning district (R5B/C4-4L). The subject property is bordered by a recycling center and residential buildings to the north; Avenue S, followed by Brooklyn Union Gas Co. and a public health facility to the south; McDonald Avenue and an elevated Metropolitan Transportation Authority (MTA) subway platform, followed by residential buildings to the east; and Lake Street, followed by an ambulance service and residential buildings to the west.

The subject property has been assigned an environmental E-Designation (E-662) under City Environmental Quality Review (CEQR #21DCP132K), effective October 2022. The E-Designation includes requirements related to noise (window-wall attenuation and alternative means of ventilation) and air quality (heating, ventilation, and air conditioning [HVAC] fuel limited to natural gas, exhaust stack location limitations, window-wall attenuation, and alternative ventilation).

The subject property location is shown on Figure 1, and existing features are shown on the Site Map provided as Figure 2.

OBJECTIVE

The objective of a Phase I is to assess whether recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) are associated with the subject property. Our conclusions are intended to help the user evaluate the business environmental risk associated with the subject property. Our opinion regarding a REC's potential impact on the subject property is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, our experience evaluating similar sites, and on our understanding of the client's intention to redevelop the property.

SIGNIFICANT DATA GAPS

Our ability to identify and evaluate RECs at the subject property is conditioned upon significant data gaps identified as part of this Phase I. The ASTM E1527-21 Standard defines a significant data gap as a data gap that affects the ability of the Environmental Professional to identify a REC.

No significant data gaps were identified during the performance of this Phase I. Thus, it is our opinion that sufficient information was obtained to identify subject property conditions indicative of releases or threatened releases of hazardous substances and petroleum hydrocarbons. Our opinion is limited by the conditions prevailing at the time our work is performed and the applicable regulatory requirements in effect.

RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines a REC as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

The following RECs listed below were identified in connection with the subject property:

REC #1: Former Uses and Conditions on Subject Property

Sanborn maps identify the following historical uses on the subject property: a junk shop (1950s) and two manufacturing buildings, including a clothing manufacturing facility (1950) and a welding facility (late 1960s through mid-1970s). Manufacturing operations may have involved the use of process chemicals, such as dyes, degreasers, or oils; the former junk shop may have included the handling or storage of discarded materials and equipment potentially containing hazardous substances, such as lubricants, batteries, or electrical components. Due to the nature of these operations and the absence of documentation confirming that environmental impacts are not present, these historical uses of the subject property are considered RECs.

REC #2: Former Uses on Adjacent and Surrounding Properties

Several historical and current uses on adjacent and nearby properties may present a potential for contaminant migration onto the subject property. The east-adjacent Prospect & Coney Island Railroad has operated since the late 1800s and may have contributed petroleum products, polycyclic aromatic hydrocarbons (PAHs), or heavy metals associated with historic rail operations. The Flatbush Coal Co., located north and upgradient at 49–57 Lake Street, operated from the early 1930s through at least 2007 and may have released coal-related contaminants such as PAHs and metals. An auto repair facility at 2060 McDonald Avenue, active since at least 1993, may be a source of petroleum or solvent-related impacts. Additionally, the American Asbestos Manufacturing Co., identified at 2046–2058 McDonald Avenue in the City Directory in 1945 and on the 1950 Sanborn Map and, may have contributed asbestos-containing materials or other hazardous substances. Due to the nature of these operations and their upgradient location, these off-site uses are considered RECs.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines a CREC as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

CRECs were not identified in connection with the subject property.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines an HREC as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls. A historical recognized environmental condition is not a recognized environmental condition.

The following HREC listed below was identified in connection with the subject property:

HREC #1: Closed Spill Case Associated with a Petroleum Release at Subject Property

Regulatory records identify a 2005 spill (New York State Department of Environmental Conservation [NYSDEC] Spill No. 0508184) at the subject property involving the release of approximately 2 ounces of non-polychlorinated biphenyl (PCB) oil resulting from a capacitor can fire at the Con Edison Bensonhurst substation. The spill was contained on site, did not impact sewers or waterways, and cleanup was completed the following day. The case was closed by NYSDEC on November 30, 2005. No sampling or further action was required.

NON-SCOPE CONSIDERATIONS

ASTM does not define the term “other finding;” however, Haley & Aldrich of New York utilizes the category to indicate conditions of potential risk that are not clearly defined in the ASTM Standard. While not considered RECs, Haley & Aldrich of New York identified the following other findings:

Other Finding #1: Subject Property Housekeeping

Within the high school building on the subject property, a maintenance storage closet was observed to be disorganized and contained several containers of cleaning and maintenance products. Some of the containers were inadequately sealed and improperly stored. Notably, a can of paint had spilled onto the floor, leaving a hardened film that extended to the rear of the closet. No floor drains or cracks in the slab were observed in the vicinity of the spill area. In addition, a circular opening was observed in the concrete slab in the basement of the Lot 42 building. Discoloration was noted in the immediate vicinity; however, no petroleum products or hazardous substances were stored nearby, and no odors were detected at the time of the site visit. The discoloration may be associated with former equipment or historical building use.

Other Finding #2: Urban Fill

The overburden at the subject property is classified as Urban Land, which refers to soils that have been altered by human activities, thus making them unidentifiable. Typically, these soils have been mixed with other materials, such as brick and concrete (urban fill), and characteristics can only be determined by an on-site investigation.

SUMMARY AND RECOMMENDATIONS

In summary, we identified two RECs, one HREC, and two Other Findings during this Phase I.

The remainder of this report contains additional information regarding the Phase I, the resulting findings summarized above, and limitations affecting this report.

Continued Viability of Environmental Site Assessment

In accordance with the ASTM E1527-21 Standard, the following components of the Phase I Report must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction:

1. Interviews with owners, operators, and occupants. Completed on: June 9, 2025
2. Searches for recorded environmental cleanup liens (a user responsibility). Completed on: June 4, 2025
3. Reviews of federal, tribal, state, and local government records. Completed on: June 6, 2025
4. Visual inspections of the subject property and of adjoining properties. Completed on: June 9, 2025
5. The declaration by the Environmental Professional responsible for the assessment or update (refer to Section 9). Completed on June 20, 2025.

1. Introduction

This report presents the results of an ASTM International (ASTM) Phase I Environmental Site Assessment (Phase I) conducted at 2074-2080 McDonald Avenue located in Brooklyn, New York (herein referred to as the "subject property"). The approximately 31,480-square-foot subject property comprises two lots: Lot 42 is a two-story school occupied by YDE Girls High School, and Lot 39 is a two-story commercial building occupied by an interior design office/retail space on the ground level and a recreation/events space utilized by the neighboring school. The subject property is shown on the Project Locus, Figure 1. This Phase I was conducted in consideration of Emerald Developers' intention to redevelop the property.

1.1 OBJECTIVE

The objective of a Phase I is to assess whether recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) are associated with the subject property by evaluating site history, interviews, existing conditions, current site use, and current and former uses of adjoining properties, as well as potential releases at surrounding properties that may impact the subject property. Our conclusions are intended to help the user evaluate the business environmental risk associated with the subject property.

The ASTM E1527-21 Standard defines a REC as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The definitions of RECs, CRECs, and HRECs are included in the Glossary section of this report.

1.2 SCOPE OF SERVICES

This Phase I was performed by H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) in conformance with the scope and limitations of the ASTM E1527-21 Standard and All Appropriate Inquiries (AAI) Rule and in accordance with our proposal dated May 30, 2025 ("Agreement"). The Phase I limitations are attached hereto as Appendix A.

As part of this Phase I, Haley & Aldrich of New York conducted visual observations of site conditions and of abutting property use, and interviewed a key site manager and applicable tenant representatives (subject property reconnaissance); reviewed federal, state, tribal, and local environmental database information, federal and state environmental files, previous reports (if identified and provided), and site historical use records; and formulated conclusions regarding the potential presence and impact of RECs.

1.3 NON-SCOPE CONSIDERATIONS

The ASTM E1527-21 Standard includes the following list of "additional issues" that are non-scope considerations outside of the scope of the ASTM Phase I practice: asbestos-containing materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality related to release of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint unrelated to releases into the environment, lead in

drinking water, mold or microbial growth conditions, polychlorinated biphenyl (PCB)-containing materials, naturally occurring radon, regulatory compliance, substances not defined as hazardous substances (emerging compounds), and wetlands. These items were not included in this Phase I of the subject property.

The assessment of the presence of PCBs is limited to those potential sources specified in the ASTM E1527-21 Standard as "electrical or hydraulic equipment known or likely to contain PCBs…to the extent visually and or physically observed or identified from the interview or records review."

1.4 LIMITING CONDITIONS/DEVIATIONS

Haley & Aldrich of New York completed this Phase I in substantial conformance with the ASTM E1527-21 Standard. In our opinion, no additions were made to, or deviations or deletions made from, the ASTM work scope in completing this Phase I.

1.5 USER RESPONSIBILITIES

The completion of this Phase I is only one component of the process required to satisfy the AAI Rule. In addition, the user must adhere to a set of user responsibilities as defined by the ASTM E1527-21 Standard and the AAI Rule. User responsibilities are discussed in Section 6.6 of this report. A user seeking protection from Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability as an innocent landowner, bona fide prospective purchaser, or contiguous property owner must complete all components of the AAI process in addition to meeting ongoing obligations. AAI components, CERCLA liability relief, and ongoing obligations are discussed in the AAI Rule and in Appendix X1 of the ASTM E1527-21 Standard.

2. Site Description

A description of the subject property is detailed in the sections below. Refer to Figure 1 for a Project Locus and Figure 2 for a Site Plan showing relevant subject property features and adjacent properties.

2.1 SITE OWNERSHIP, LOCATION, AND VICINITY DESCRIPTION

Site Description		
Owner	Lot 39 – Jackson 2064 McDonald LLC Lot 42 – Jackson Ex 2 Avenue S LLC	
Current Subject Property Use	Lot 39 – Interior design office/retail space (ground floor) and recreational/event space affiliated with the high school (second floor) Lot 42 – High school	
Size	31,480 square feet	
Building Square Footage	Lot 39 – approximately 15,500 square feet Lot 42 – approximately 8,750 square feet	
USGS 7.5-Minute Topographic Map	Coney Island, NY-NJ, 2010	
Site County	Kings County	
Zoning	R5B/C4-4L: Mixed residential and commercial	
Parcel Information	Brooklyn (Borough 3), Block 6680, Lots 39 and 42	
Utilities	Water:	City of New York
	Sewerage:	New York City Department of Environmental Protection (NYCDEP)
	Electricity:	Con Edison
	Gas/Oil/LPG:	Public Service Enterprise Group Inc. (PSEG)
Heating/Cooling System	Lot 39 – Electric heat and central air conditioning Lot 42 – Electric heating and cooling (window units)	

Site Vicinity Description		
General Area Description	Mixed residential and commercial	
Adjoining Property Description	North:	Recycling Center and residential buildings
	East:	McDonald Avenue and an elevated Metropolitan Transportation Authority (MTA) subway platform, followed by residential and commercial buildings
	South:	Avenue S, followed by Brooklyn Union Gas Co. and a public health facility
	West:	Lake Street, followed by an ambulance service and residential buildings

2.2 PHYSICAL SETTING

Subsurface explorations and/or hydrogeologic investigations were not performed for this Phase I. Subject property geology and hydrology were evaluated on the basis of readily available public information or references, and/or based upon our experience and understanding of subsurface conditions in the vicinity of the subject property. It is unknown to what extent localized variations in groundwater depth and flow occur on the subject property.

Physical Setting		Source(s)
Topography Summary	The subject property is generally flat, with a gentle slope to southwest.	1, 2
Subject Property Elevation (El.)	Approximate El. 22	2
Overburden Soils	Soil is described as Urban Land, which refers to soils that have been altered by human activities, thus making them unidentifiable. Typically, these soils have been mixed with other materials, such as brick and concrete (urban fill), and characteristics can only be determined by an on-site investigation.	3
Bedrock Formation	Raritan Formation	3
Depth to Bedrock	Approximately 750 feet below ground surface (bgs)	4
Depth to Groundwater	Approximately 10 to 20 feet bgs	3
Surface Water Flow Direction	Surface water appears to flow toward the southwest based on the observed surface topography.	1, 2

Physical Setting		Source(s)
Regional Groundwater Flow Direction	Regional groundwater flows to the southwest toward the Gravesend Bay.	2
Nearest Surface Water Body	Gravesend Bay is located approximately 1.6 miles to the southwest of the subject property.	2

3. Previous Reports

Previously prepared reports for the subject property were not identified or provided as part of this assessment

4. Subject Property History

Haley & Aldrich of New York assessed past usage of the subject property and adjoining properties through a review of:

- Sanborn Fire Insurance Maps dated 1895, 1906, 1930, 1950, 1968, 1969, 1976, 1980, 1981, 1983, 1986, 1987, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006, and 2007;
- Topographic Maps dated 1897, 1898, 1900, 1947, 1955, 1966, 1979, 1995, 2013, 2016, and 2019;
- Aerial Photographs dated 1924, 1951, 1954, 1961, 1966, 1976, 1984, 1994, 2002, 2006, 2011, 2015, 2019, and 2022;
- City Directories dated 1928, 1934, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980, 1985, 1992, 1995, 1997, 2000, 2005, 2010, 2014, 2017, and 2020;
- Municipal records; and
- Interviews with subject property personnel.

Copies of information obtained from historical references reviewed are included in Appendix B. Unless otherwise noted below, per the ASTM standard, sources were reviewed dating back to 1940 or first developed use, whichever is earlier, and at five-year intervals if the use of the property has changed within the time period.

4.1 SUBJECT PROPERTY

The subject property was first developed by the late 1800s with two one-story residential buildings and a well house. By the early 1930s, a new one-story structure, identified as a laundry facility, had been constructed in the northern portion of the property. By the 1950s, the laundry facility had been converted to a junk shop and two one-story buildings for manufacturing use had been constructed, one of which was identified as a clothing manufacturing facility. By the late 1960s, the junk shop was repurposed as a welding space. The former manufacturing buildings were identified as a two-story school and a two-story loft, and a construction storage shed had been developed on the property. By the mid-1970s, two one-story warehouse structures had been constructed on the western portion of the property, while the eastern portion remained in use as a school. These structures remain in place and are currently occupied by a garage, an interior design office/retail space, and YDE Girls High School.

The table below provides a detailed summary of pertinent information from the historical sources reviewed.

Dates	Description of Subject Property	Sources
1800s to early 1900s	The subject property was occupied by two one- to two-story residential buildings and a one-story shed. The 1985 Sanborn map identifies a small structure near the shed labeled as a well house, and in 1906, the one-story shed is identified as a kitchen.	Sanborn Fire Maps, Topographic Maps, City Directories
Early 1930s to late 1940s	By the early 1930s, the two residential structures on Lot 39 were no longer depicted, and an addition had been constructed on the residential building on Lot 42. A one-story structure labeled as a laundry facility was developed in the northernmost portion of the subject property on Lot 39. City Directories also noted Cook & Guido Roofers / Cook Lous Roofers operating on Lot 42 in 1945.	Sanborn Fire Insurance Maps, Topographic Maps, City Directories, Aerial Photographs,
Early 1950s to mid-1960s	By the early 1950s, the former residential structure is no longer depicted, the former laundry facility is identified as a junk shop, and two one-story buildings labeled for manufacturing use were added, including one on Lot 42 was identified as a clothing manufacturing facility.	Sanborn Fire Insurance Maps, Topographic Maps, Aerial Photographs, City Directories
Late 1960s to early 1970s	By the late 1960s, the former junk shop on Lot 39 was labeled as a welding space; the clothing manufacturing facility on Lot 42 had been converted to a two-story school (St. Simon & St. Jude Academy); the former manufacturing building on Lot 39 was identified as a two-story loft; and a construction storage shed had been added on Lot 39.	Sanborn Fire Insurance Maps, Topographic Maps, Aerial Photographs, City Directories
Mid-1970s to Present	By the mid-1970s, two one-story warehouse structures had been developed on the western portion of Lot 39, while the eastern portion remained occupied by a school; specifically, YDE Girls High School. These warehouse structures remain in place and are currently used as a garage and an interior design office/retail space.	Sanborn Fire Insurance Maps, Topographic Maps, Aerial Photographs, City Directories, Site Reconnaissance

4.2 ADJOINING PROPERTIES

The table below provides a summary of pertinent information from the historical sources reviewed regarding adjacent properties:

Dates	Description of Adjacent Properties	Sources
1800s to early 1900s	North: Three-story “Knapps Hotel” South: Avenue S, marked as “not opened,” followed by a residential structure and a shed. East: Gravesend Avenue and an aboveground railroad station identified as “Prospect Park & Coney Island Railroad,” followed by a one- and two-story building. West: Lake Street, marked as “not opened,” followed by vacant lots	Sanborn Fire Maps, Topographic Maps,

Dates	Description of Adjacent Properties	Sources
Early 1930s to late 1940s	North: Two-story residential structure and a one-story poultry building with a shed. Further north, properties were notably used as the American Asbestos Manufacturing Co. as well as Flatbush Coal & Oil Co. South: No changes identified East: An aboveground railroad station was constructed above Gravesend Avenue, followed by vacant lots and commercial structures. West: Properties west of Lake Street Lake Steet are developed with residential structures and one commercial structure on the intersection of Avenue S and Lake Street.	Sanborn Fire Insurance Maps, Topographic Maps, Aerial Photographs, City Directories
Early 1950s to early 1980s	North: The former American Asbestos Manufacturing Co. no longer operated by 1968. No other changes identified. South: No changes identified East: Former Lake Street is identified as McDonald Avenue. In the late 1960s, a filling station was present on the eastern side of McDonald Avenue (northeast-adjacent to the subject property) and formerly vacant lots are developed with a two-story loft structure. The filling station operation ceased and was replaced by an office by 1976. West: A factory and a manufacturing facility are depicted on properties west of Lake Street.	Sanborn Fire Insurance Maps, Topographic Maps, Aerial Photographs, City Directories
Mid-1980s to Present	North: The former poultry building functioned as an auto repair shop by 1993. The Flatbush Coal & Oil Co. was noted on Sanborn maps through 2007 but the facility currently appears to operate as a CrossFit gym. South: The property south of Avenue S was occupied by a transit yard and playground by 1983, and by 1992, the playground area was developed with a two-story school building. East: No changes identified West: No changes identified	Sanborn Fire Insurance Maps, Topographic Maps, Aerial Photographs, City Directories

5. Environmental Records Review

5.1 ENVIRONMENTAL DATABASE RECORDS SEARCH

Haley & Aldrich of New York used an electronic database service[2], to complete the environmental records review. The database search was used to identify properties that may be listed in the referenced agency records, located within the ASTM-specified approximate minimum search distances as shown in the table below. A description of each database searched is provided in Section 11.2 of this report. The complete environmental database report is provided in Appendix C. Pertinent information obtained from the database is summarized in Section 5.3.

Database Searched	Approximate Minimum Search Distance	Subject Property Listed?	Number of Sites within Search Distance[1]
1. NPL Sites	1 mile	No	0

18. Orphan Site List[3]	Site & Adjoining	No	0

Notes:

1. *Some sites may be included on multiple databases.*
2. *Formerly the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database.*
3. *Haley & Aldrich of New York also searched the Orphan Site List provided in the database report for the subject property and sites adjoining the subject property. Orphan sites are those that, due to incorrect or incomplete addresses, could not be mapped.*

[2] Examples of electronic database services are EDR/Lightbox and ERIS.

5.2 ADDITIONAL ENVIRONMENTAL RECORDS OR FILE REVIEW

To supplement the environmental record search, we contacted the following state and local government agencies and searched applicable online databases. If copies of the documents reviewed were obtained, pertinent material is included in Appendix C. Relevant information obtained is included in the appropriate sections of the report and/or discussed in Section 5.3. Adjacent properties were also included in requests for additional information if a significant incident or release was identified.

Agency	Request Sent or Files Searched		Files Exist and are Available for Review	Files Reviewed
	Subject Property	Adjoining Properties		
NYSDEC[2]	Yes	Yes	Yes	Yes (online)
New York State Department of Finance City Registry[3]	Yes	No	Yes	Yes (online)
New York City Department of Buildings (NYCDOB)[4]	Yes	No	Yes	Yes (online)
New York City Department of Health (NYCDOH)[5]	Yes	No	N/A	N/A
Fire Department of New York (FDNY)[6]	Yes	No	N/A	N/A
New York City Department of Environmental Protection (NYCDEP)[7]	Yes	No	N/A	N/A
New York City Office of Environmental Remediation (NYCOER)[8]	Yes	No	No	N/A

***Notes**:*

1. *To date, no responses have been received from the Freedom of Information Act (FOIA) requests noted above. Based on the information obtained through our interviews with key site personnel and our review of other records, it does not appear that responses to the FOIA requests should affect our conclusions regarding RECs on the subject property. However, when a response is received, it will be forwarded to Emerald Developers, LLC, and if it affects our conclusions regarding the subject property, Emerald Developers, LLC will be informed.*
2. *The NYSDEC maintains information regarding spills, PBS, including USTs and aboveground storage tanks (ASTs), and investigation/remediations overseen by New York State regulatory programs.*
3. *The New York State Department of Finance City Registry maintains information regarding property transactions, including deeds, leases, and mortgage documents. Records were reviewed in the online database.*
4. *The NYCDOB maintains information regarding violations, complaints, certificates of occupancy, elevator records, asbestos assessments, and permits.*
5. *The NYCDOH maintains information regarding environmental concerns for public health.*
6. *The FDNY maintains information regarding underground storage tanks (USTs) and emergencies/fire episodes.*
7. *The NYCDEP maintains information regarding wastewater discharge and boilers. Documents for the subject property were not available in the online database.*
8. *The NYCOER maintains information regarding investigation/remediations, manages the New York City Voluntary Cleanup Program (VCP), and assists with guidance through all the City Environmental Quality Review (CEQR) requirements. The subject property was not listed in the NYCOER database.*

5.3 DETAILED DESCRIPTION OF RELEVANT INFORMATION

5.3.1 Subject Property

Listing	Description	Potential Impact
NY Spills	Regulatory records identify a 2005 spill (NYSDEC Spill No. 0508184) at the subject property involving the release of approximately 2 ounces of non-PCB oil from a capacitor can fire at the Con Edison Bensonhurst substation. The spill was contained on subject property, did not impact sewers or waterways, and cleanup was completed the following day. The case was closed by NYSDEC on November 30, 2005. No sampling or further action was required.	The spill case achieved regulatory closure with no indication of residual contamination or required controls; therefore, it is considered an HREC.
NYC Office of Environmental Remediation (OER)	This subject property is listed in the NYCOER database under Site ID 23TMP1440K and 24EA-N013K. The subject property has been assigned an environmental E-designation (E-662) for noise (window wall attenuation and alternative means of ventilation), and air quality (heating, ventilation, and air conditioning [HVAC] fuel limited to natural gas, exhaust stack location limitations, window wall attenuation, and alternative ventilation) resulting from CEQR, effective October 2022 (CEQR #21DCP132K).	A listing in the NYC OER database alone does not necessarily indicate an environmental concern; however, satisfaction with the E-Designation requirements is subject to review and approval by the NYCOER prior to redevelopment.
Land Use	The NYC Land Use Database, curated by the New York City Department of City Planning (NYCDCP), includes data on land use within New York City. The subject property at Lot 42 is categorized under public facilities and institutions. Lot 39 is categorized under commercial and office buildings. According to relevant documents, no cleanup was required.	A listing in this database does not necessarily indicate an environmental concern.

5.3.2 Nearby Sites

Several sites were listed in the database report within the applicable search radii or identified in regulatory records reviews. Due to their location with respect to the subject property (on the opposite side of a hydrogeologic barrier, distance from the site, location of the site relative to inferred groundwater flow, subsurface utilities and building levels, etc.), or their status (closed-out release, etc.), several of the sites are not likely to adversely affect the subject property and are not discussed herein. Only those sites adjacent to the subject property and sites with a potential to have impacted the subject property are discussed below. The complete database report and relevant records review information is included in Appendix C.

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
Con Edison 2058 McDonald Avenue (0.005 miles north)	RCRA NonGen/NLR, FINDS	A Con Edison Manhole, located north adjacent to the subject property, is listed in the Resource Conservation and Recovery Act (RCRA) database as a Non-Generator/No Longer Regulated (NLR) facility previously classified as a Large Quantity Generator (LQG) in 2014. No violations are associated with this listing. This property is also listed in the FINDS and Manifest databases with multiple shipments of hazardous waste (lead) recorded in 2018.	Due to the lack of violations and documented releases associated with these listings, it is not anticipated to adversely affect the subject property.
Spill Number 0310828 86 Lake Street (0.017 miles west)	NY Spills	Spill #0310828 was reported on a west-adjacent property on December 19, 2003, due to diesel fuel leaking onto the street and driveway from a tanker truck. The spill was cleaned up, and the area was sanded. This spill case was closed on December 22, 2003.	Since this property is cross-gradient of the subject property and the spill cases have received regulatory closure, it is not anticipated to adversely affect the subject property.
Con Edison Lake Street and Avenue S (0.01 miles southwest)	RCRA NonGen/NLR FINDS ECHO, NY Manifest	A Con Edison Manhole, located southwest adjacent to the subject property in the intersection of Avenue S and Lake Street, is listed in the RCRA database as a NonGen/NLR facility for the former generation of hazardous waste at this location as a LQG in 2015. This property is also listed in the FINDS databases with no violations listed.	Due to the lack of violations and documented releases associated with these listings, it is not anticipated to adversely affect the subject property.
Quentin Rd & McDonald Ave Avenue S & McDonald Avenue (0.01 miles south)	NY Spills	Spill No. 9405845 was recorded on July 26, 1994, due to a petroleum release at the intersection of Quentin Road (Avenue S) and McDonald Avenue, located south-adjacent to the subject property. The spill was attributed to an unknown source and was closed by NYSDEC on February 15, 1995. No violations or further action were documented.	Since this property is located hydraulically downgradient of the subject property and the spill case has received regulatory closure, it is not anticipated to adversely affect the subject property.
NEVA Cleaners Tailoring & Laundry 353 Avenue S (0.0028 miles south)	Historic Cleaner	In 1996, a dry cleaner occupied a property located south-adjacent to the subject property, across McDonald Avenue.	The presence of a dry cleaner alone, without evidence of a release or environmental concern, does not constitute a REC.

Property Name & Location	Database/ Record Identified	Description	Potential Impact to Subject Property
Con Edison 2067 McDonald Avenue (0.017 miles east)	Manifest	A Con Edison located at 2067 McDonald Avenue, south-adjacent to the subject property, is listed in the NY Manifest database for the off-site transport of approximately 3,000 pounds of hazardous waste (lead-contaminated liquid) in 2022. This location is also listed in the RCRA and FINDS databases, with no violations reported.	Due to the absence of violations or documented releases, this listing is not anticipated to adversely affect the subject property.
Con Edison – Manhole 38633 (0.02 miles northeast)	RCRA LQG/Manifest	A Con Edison manhole located east-northeast-adjacent to the subject property at 2055 McDonald Avenue is listed in the RCRA database as a LQG of hazardous waste (lead) as of 2017. The location is also listed in the NY Manifest database for the off-site transport of hazardous waste. No violations or releases are reported in connection with either listing.	Due to the absence of violations or documented releases, this listing is not anticipated to adversely affect the subject property.

5.4 VAPOR MIGRATION

The ASTM E1527-21 Standard states that "for the purposes of this practice, “migrate” and “migration” refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." Thus, this section specifies whether or not we perceive a risk of vapor migration to the subject property.

To assess a vapor migration risk, Haley & Aldrich of New York conducted a detailed review and analysis of the site-specific environmental database report and/or other reasonably ascertainable records to assess whether:

1. Off-site properties have documented chlorinated volatile organic compound (VOC) contamination located, specifically, the edge of the contamination plume, within 100 feet of the subject property boundary; or
2. Off-site properties have a documented volatile petroleum hydrocarbon (VPH) contamination plume within 30 feet of the subject property boundary.

Based on our records review, it is unlikely that a potential source of vapor migration currently exists beneath the subject property.

6. Subject Property Reconnaissance and Key Personnel Interview(s)

A site visit to observe subject property conditions was conducted by Kassidy O'Connor and Elizabeth Fitzgerald of Haley & Aldrich of New York on June 9, 2025. Access to the subject property was provided by owner representative, Steve Dwight.

Haley & Aldrich of New York personnel observed accessible interior areas of the subject property building(s), including communal areas, basement areas, mechanical spaces, attics, and tenant spaces. Haley & Aldrich of New York also observed the exterior portions of the subject property, including the property boundaries, and observed adjoining property conditions from the subject property boundaries and/or public thoroughfares. No weather-related conditions or other conditions that would limit our ability to observe the subject property or adjoining properties occurred during our site visit.

An interview with Steve Dwight, the owner representative, was performed in conjunction with the site visit. Per the ASTM Standard, past owners, operators, and occupants of the subject property who are likely to have material information regarding the potential for contamination at the subject property shall be contacted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. Haley & Aldrich of New York was not provided with contact information to interview past owners and/or operators at the subject property. Based upon historical data collected from other sources, this potential data gap is not expected to adversely impact the results of this assessment.

The findings of the site visit and interviews are discussed below. Subject property photographs are included in Appendix D.

ASTM E1527-21 Standard Section 10.8 requires that, prior to the site visit, the current subject property owner or key site manager and user, if different from the current owner or key site manager, be asked if there are any helpful documents that can be made available for review. Building floor plans for the subject property were provided and reviewed as part of this Phase I ESA.

6.1 CURRENT USE OF THE SUBJECT PROPERTY

The subject property is currently occupied by two primary tenants. Lot 42 is occupied by YDE Girls High School, which utilizes the entire two-story structure for educational purposes, including classrooms, offices, and a faculty lounge.

Lot 39 is currently occupied by an interior design office/retail space in the northeastern portion of the building at the ground level. The second floor of the building functions as a recreation and events space, which is used in affiliation with the adjacent high school.

6.2 GENERAL DESCRIPTION OF STRUCTURES

The subject property is improved with two two-story structures that encompass the majority of the site footprint. The structure on Lot 42 is used as a high school and includes a partial cellar that houses mechanical and electrical equipment and an unused attic space. The building includes multiple classrooms, administrative offices, and staff facilities. The school operation extends into the southern portion of Lot 39 via an enclosed walkway that runs through a small courtyard, providing access to additional classrooms and offices.

The structure on Lot 39 is a two-story building with a vacant cellar. The ground-floor unit is currently occupied by an interior design office/retail space. The second floor functions as a recreation room and events center that is affiliated with the high school. A roll-up door on the second floor provides access to an exterior fire escape. The cellar beneath Lot 39 is currently vacant and accessible through a storm door located on the sidewalk on McDonald Avenue. The northwestern portion of Lot 39 contains an unused garage space.

A circular opening was observed in the concrete slab in the basement of the Lot 42 building. Discoloration was noted in the immediate vicinity; however, no petroleum products or hazardous substances were stored nearby, and no odors were detected at the time of the site visit.

6.3 USE, STORAGE, AND DISPOSAL OF PETROLEUM PRODUCTS AND HAZARDOUS MATERIALS

Petroleum products and/or hazardous materials were observed or reported to be used, stored, and/or disposed of at the subject property as described below.

Other petroleum/hazardous materials observed at the subject property included:

Petroleum Product or Hazardous Substances	Quantity Stored & Container	Storage Location	Use	Disposal	Observations/ Evidence of release
Outdoor Cleaner	1 gallon	Storage closet	Cleaning	Unknown	No
Primer	5-gallon bucket, 1-quart container	Storage closet	Painting, Maintenance	Unknown	No
Floor and Patio Cleaner	1 gallon bucket	Storage closet	Maintenance	Unknown	No
Latex Paint	5-gallon bucket, 1-gallon bucket	Storage closet	Maintenance	Unknown	Yes
Wood Primer	1-gallon bucket	Storage closet	Maintenance	Unknown	No
Forest Pine Cleaner and Deodorant	5-gallon bucket	Storage closet	Maintenance	Unknown	No
Bleach	1-gallon container	Maintenance closet	Maintenance	Unknown	No

Building maintenance and repair products and cleaning chemicals were observed inside the storage closet and break room on Lot 39. Evidence of poor housekeeping was noted in the storage closet where paint had been spilled on the floor and appeared to have spread throughout the area. No floor drains were observed in the vicinity of the release, and it is unlikely that the material migrated into the subsurface. However, the condition is noted due to substandard housekeeping practices.

6.4 OTHER SUBJECT PROPERTY OBSERVATIONS

The table below summarizes items that were observed and/or reported at the subject property during the site visit other than those items related to use, storage, and/or disposal of petroleum or hazardous materials (described in Section 6.3 above). If items were observed or reported, they are further described either in the table or below.

Description	Observed or Reported at Time of Site Visit	Observations/Comments
Potable Water Supply	Yes	Potable water supply available in both buildings on subject property.
Nearest Drinking Water Source	No	
Sewage Disposal System	No	
Septic System	No	
Unidentified Storage Containers	No	
Wastewater Discharge	No	
Stormwater Discharge	No	
Odors	No	
PCBs Associated with Electrical or Hydraulic Equipment	No	
Elevators (Traction or Hydraulic)	No	
Vehicle Maintenance Lifts	No	
Emergency Generators	No	
Sprinkler System Pumps	No	
Heating System	Yes	Electrical heating units in both properties.
Cooling System	Yes	Electrical window units in high school on Lot 42. Central air is present in the Interior Design building on Lot 39.
Stains or Corrosion on Floors, Walls, or Ceilings	Yes	Discoloration was noted on the concrete slab in the basement of the Lot 42; however, no petroleum products or hazardous substances were stored nearby, and no odors were detected at the time of the site visit.
Floor Drains	Yes	Located throughout the high school in storage closets and break rooms. An exposed opening, approximately 12-inches in diameter, was observed in the concrete slab in the basement of the high school.
Sumps	No	
Catch Basins	No	
Pits, Ponds, Lagoons, and Pools of Liquid	No	
Stained Soil or Pavement	No	
Stressed Vegetation	No	
Solid Waste and Evidence of Waste Filling	No	
Dry Wells	No	
Monitoring Wells	No	
Water Supply Wells	No	
Irrigation Wells	No	
Injection Wells	No	
Abandoned Wells	No	

6.5 ADJOINING PROPERTY OBSERVATIONS

Adjoining properties include a recycling center and residential buildings to the north, Avenue S and a gas company building to the south, McDonald Avenue and an elevated subway platform to the east, and Lake Street, followed by an ambulance service and residential buildings to the west.

6.6 USER RESPONSIBILITIES

The AAI Rule requires that the user of the report consider the following:

- Whether the user has specialized knowledge about previous ownership or uses of the subject property that may be material to identifying RECs;
- Whether the user has determined that the subject property's title contains environmental liens or other information related to the environmental condition of the property, including engineering and institutional controls and Activity and Use Limitations (AULs), as defined by ASTM;
- Whether the user is aware of commonly known or reasonably ascertainable information about the subject property including whether or not the presence of contamination is likely on the subject property and to what degree it can be detected; and
- Whether the user has prior knowledge that the price of the subject property has been reduced for environmentally related reasons.

While such information is not required to be provided by the Environmental Professional(s), the information can assist the Environmental Professional in identifying RECs. The AAI Final Rule (Code of Federal Regulations Title 40 [40 CFR] Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for one of the Landowner Liability Protections (LLPs) to CERCLA liability.

A copy of the completed user responsibilities questionnaire is provided as Appendix E.

7. Findings and Opinions

7.1 SIGNIFICANT DATA GAPS

Our ability to identify and evaluate RECs at the subject property is conditioned upon significant data gaps identified as part of this Phase I. The ASTM E1527-21 Standard defines a significant data gap as a data gap that affects the ability of the Environmental Professional to identify a REC.

No significant data gaps were identified during the performance of this Phase I. Thus, it is our opinion that sufficient information was obtained to identify subject property conditions indicative of releases or threatened releases of hazardous substances and petroleum hydrocarbons. Our opinion is limited by the conditions prevailing at the time our work is performed and the applicable regulatory requirements in effect.

7.2 RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines a REC as: (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Our opinion regarding a REC's potential impact on the subject property is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, our experience evaluating similar sites, and on our understanding of the client's intended use for the subject property.

The following RECs listed below were identified in connection with the subject property:

REC #1: Former Uses and Conditions on Subject Property

Sanborn maps identify the following historical uses on the subject property, including a junk shop (1950) and two manufacturing buildings, including a clothing manufacturing facility (1950) and a welding facility (late 1960s through mid-1970s). Manufacturing operations may have involved the use of process chemicals, such as dyes, degreasers, or oils; the former junk shop may have included the handling or storage of discarded materials and equipment potentially containing hazardous substances, such as lubricants, batteries, or electrical components. Due to the nature of these operations and the absence of documentation confirming that environmental impacts are not present, these historical uses of the subject property are considered RECs.

REC #2: Former Uses on Adjacent and Surrounding Properties

Several historical and current uses on adjacent and nearby properties may present a potential for contaminant migration onto the subject property. The east-adjacent Prospect & Coney Island Railroad has operated since the late 1800s and may have contributed petroleum products, polycyclic aromatic hydrocarbons (PAHs), or heavy metals associated with historic rail operations. The Flatbush Coal Co.,

located north and upgradient at 49–57 Lake Street, operated from the early 1930s through at least 2007 and may have released coal-related contaminants such as PAHs and metals. An auto repair facility at 2060 McDonald Avenue, active since at least 1993, may be a source of petroleum or solvent-related impacts. Additionally, the American Asbestos Manufacturing Co., identified at 2046–2058 McDonald Avenue in the City Directory in 1945 and on the 1950 Sanborn Map and, may have contributed asbestos-containing materials or other hazardous substances. Due to the nature of these operations and their upgradient location, these off-site uses are considered RECs.

7.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines a CREC as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

CRECs were not identified in connection with the subject property.

7.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527-21 Standard defines an HREC as "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls. A historical recognized environmental condition is not a recognized environmental condition.

The following HREC listed below was identified in connection with the subject property:

HREC #1: Closed Spill Case Associated with a Petroleum Release at Subject Property

Regulatory records identify a 2005 spill (NYSDEC Spill No. 0508184) at the subject property involving the release of approximately 2 ounces of non-PCB oil resulting from a capacitor can fire at the Con Edison Bensonhurst substation. The spill was contained on site, did not impact sewers or waterways, and cleanup was completed the following day. The case was closed by NYSDEC on November 30, 2005. No sampling or further action was required.

7.5 DE MINIMIS CONDITIONS

The ASTM E1527-21 Standard defines a *de minimis* condition as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. The ASTM E1527-21 Standard notes that conditions determined to be *de minimis* are not recognized environmental conditions.

De minimis conditions were not identified in connection with the subject property.

7.6 OTHER FINDINGS

ASTM does not define the term “other finding;” however, Haley & Aldrich of New York utilizes the category to indicate conditions of potential risk that are not clearly defined in the ASTM Standard. While not considered RECs, Haley & Aldrich of New York identified the following other findings:

Other Finding #1: Subject Property Housekeeping

Within the high school building on the subject property, a maintenance storage closet was observed to be disorganized and contained several containers of cleaning and maintenance products. Some of the containers were inadequately sealed and improperly stored. Notably, a can of paint had spilled onto the floor, leaving a hardened film that extended to the rear of the closet. No floor drains or cracks in the slab were observed in the vicinity of the spill area. In addition, a circular opening was observed in the concrete slab in the basement of the Lot 42 building. Discoloration was noted in the immediate vicinity; however, no petroleum products or hazardous substances were stored nearby, and no odors were detected at the time of the site visit. The discoloration may be associated with former equipment or historical building use.

Other Finding #2: Urban Fill

The overburden on the subject property is classified as Urban Land, which refers to soils that have been altered by human activities, thus making them unidentifiable. Typically, these soils have been mixed with other materials, such as brick and concrete (urban fill), and characteristics can only be determined by an on-site investigation.

8. Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E1527 of 2074-2080 McDonald Avenue, the subject property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report.

This assessment has revealed no evidence of RECs in connection with the subject property, except for the following:

- **REC #1:** Former Uses and Conditions on Subject Property
- **REC #2:** Former Uses on Adjacent and Surrounding Properties
- **HREC #1:** Closed Spill Case Associated with a Petroleum Release at Subject Property
- **Other Finding #1**: Subject Property Housekeeping
- **Other Finding #2:** Urban Fill

Refer to Section 7.2 above for our opinion regarding the REC, HREC, and Other Findings listed above.

9. Environmental Professional Certification

The undersigned declare the following:

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312; and

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Elizabeth R. Fitzgerald
Project Manager

Mari C. Conlon, P.G.
Senior Associate

10. Credentials

This Phase I report was prepared by Kassidy O'Connor under the direct supervision of Elizabeth Fitzgerald and Mari Cate Conlon, who served as the Environmental Professional(s) for this project. Qualification information for the project personnel is provided below.

ELIZABETH FITZGERALD
Project Manager
Elizabeth Fitzgerald is a Project Manager at Haley & Aldrich of New York with more than 10 years of experience conducting Phase I, Phase II Environmental Site Investigations, and site characterization to determine the risk and extent of soil contamination and hazardous materials in the New York City area.

MARI CATE CONLON, P.G.
SENIOR ASSOCIATE
Mari Cate Conlon, P.G., is a Senior Associate at Haley & Aldrich of New York and a licensed Professional Geologist in the state of New York with more than 11 years of experience conducting Phase I and Phase II Environmental Site Assessments.

11. Glossary and Other Descriptions

11.1 GLOSSARY

All Appropriate Inquiry (AAI) — that inquiry constituting "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in CERCLA, 42 U.S.C. §9601(35)(B), that will qualify a party to a commercial real estate transaction for one of threshold criteria for satisfying the LLPs to CERCLA liability (42 U.S.C. §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

Business Environmental Risk — a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

Controlled Recognized Environmental Condition (CREC) — a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Significant Data Gap — a data gap that affects the ability of the Environmental Professional to identify a recognized environmental condition.

De Minimis Conditions — a condition related to a release that generally does not present those conditions which "do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." The ASTM E1527-21 Standard notes that conditions determined to be *de minimis* are not recognized environmental conditions.

Environmental Professional — a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b).

Historical Recognized Environmental Condition (HREC) — a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls. A historical recognized environmental condition is not a recognized environmental condition.

Key Site Manager — the person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the subject property.

Material Threat — an obvious threat which is likely to lead to a release and that, in the opinion of the Environmental Professional, would likely result in impact to public health or the environment.

Orphan Site — (not ASTM E1527-21 definition) — sites that could not be mapped due to poor or inadequate address information.

Recognized Environmental Condition (REC) — (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.

11.2 DESCRIPTIONS OF DATABASES SEARCHED

Numerous regulatory databases were searched during this Phase I. Each database reviewed is described in the database report presented in Appendix C. Those databases required by the E1527-21 Standard are identified below.

NPL Sites: The National Priorities List (NPL) is a list of contaminated sites that are considered the highest priority for cleanup by the U.S. Environmental Protection Agency (USEPA).

1. **Delisted NPL Sites:** The Delisted NPL is a list of formal NPL sites formerly considered the highest priority for cleanup by the USEPA that met the criteria of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) for deletion from the NPL because a no further response was appropriate.

2. **CERCLIS Sites:** The Comprehensive Environmental Response, Compensation, and Liability Act Information System (CERCLIS) list identifies sites which are suspected to have contamination and require additional investigation to assess whether they should be considered for inclusion on the NPL.

3. **CERCLIS-NFRAP Sites:** CERCLIS-NFRAP status indicates that a site was once on the CERCLIS List but has No Further Response Actions Planned (NFRAP). Sites on the CERCLIS-NFRAP List were removed from the CERCLIS List in February 1995 because, after an initial investigation was performed, no contamination was found, contamination was removed quickly, or the contamination was not significant enough to warrant NPL status.

4. **Federal ERNS:** The Federal Emergency Response Notification System (ERNS) list tracks information on reported releases of oil and hazardous materials.

5. **RCRA non-CORRACTS TSD facilities:** The Resource Conservation and Recovery Act (RCRA) non-CORRACTS TSD Facilities List tracks facilities which treat, store, or dispose of hazardous waste and are not associated with corrective action activity.

6. **RCRA CORRACTS TSD facilities:** The RCRA CORRACTS TSD Facilities list catalogues facilities that treat, store, or dispose of hazardous waste and have been associated with corrective action activity.

7. **RCRA Generators:** The RCRA Generator list is maintained by the USEPA to track facilities that generate hazardous waste.

8. **Federal Institutional Controls/Engineering Controls:** The Federal Institutional Control list and Engineering Control list are maintained by the USEPA. Some Institutional Control and Engineering Control information may not be made publicly available and therefore will not be included on this registry.

9. **State and Tribal Equivalent NPL/CERCLIS Sites:** The ASTM E1527-21 Standard requires searching "State and Tribal Equivalent NPL Sites." In New York the equivalent NPL is the Inactive Hazardous Waste Disposal Sites, which is maintained by the NYSDEC.
10. **State and Tribal Equivalent CERCLIS Sites:** The ASTM E1527-21 Standard requires searching "State and Tribal Equivalent NPL Sites." In New York, the equivalent NPL is the Inactive Hazardous Waste Disposal Sites, which is maintained by the NYSDEC.
11. **State and Tribal Registered Storage Tanks:** The NYSDEC maintains a list of aboveground and underground storage tanks registered with the NYSDEC PBS Program.
12. **State and Tribal Landfills and Solid Waste Disposal Sites:** The NYSDEC maintains a list of regulated waste disposal sites.
13. **State and Tribal Leaking Storage Tanks:** The NYSDEC maintains a list of Leaking Storage Tanks (LUST/LAST). The LUST/LAST lists are a listing of release sites that have an Underground or Aboveground Storage Tank listed as the source.
14. **State and Tribal Institutional Controls/Engineering Controls:** The NYSDEC maintains a list of sites with Institutional or Engineering controls in place.
15. **State and Tribal Voluntary Cleanup Sites:** The NYSDEC maintains a list of Voluntary Cleanup sites.
16. **State and Tribal Brownfield Sites:** The NYSDEC maintains a list of Brownfield sites which includes properties where redevelopment or reuse may be compromised by the presence or presumed presence of hazardous materials or petroleum.

APPENDIX A
Phase I Environmental Site Assessment Limitations

APPENDIX A

Haley & Aldrich of New York Limitations

Environmental site assessment (Phase I Environmental Site Assessment) reports prepared by Haley & Aldrich of New York are for the sole and exclusive use of its Client. Haley & Aldrich of New York represents that the Phase I Environmental Site Assessment was prepared in accordance with the ASTM International (ASTM) Standard E1527-21 entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM E1527-21). The findings, opinions, conclusions, and information contained in the ASTM E1527-21 Phase I Environmental Site Assessment are limited to, and solely based upon, information reasonably ascertainable by at the time the ASTM E1527-21 Phase I Environmental Site Assessment was completed.

All users of this E1527-21 Phase I Environmental Site Assessment are bound to the terms and conditions and limitations contained in the accompanying Proposal, Terms and Conditions, and Limitations for this ASTM E1527-21 Phase I Environmental Site Assessment. The findings, opinions, conclusions, and information contained in this report are based solely on the Scope of Services provided pursuant to the Proposal and its attachments and the information reasonably ascertainable by Haley & Aldrich of New York at the time the ASTM E1527-21 Phase I Environmental Site Assessment was completed. Haley & Aldrich of New York has not performed any additional observations, investigations, studies, or other testing not specified in the Scope of Services. Haley & Aldrich of New York shall not be liable for the existence of any condition the discovery of which would have required the performance of services not authorized under the Scope of Services.

This ASTM E1527-21 Phase I Environmental Site Assessment is prepared for the exclusive use of Haley & Aldrich of New York's client in connection with the subject property for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject property. There are no intended beneficiaries other than Haley & Aldrich of New York's client. Haley & Aldrich of New York shall owe no duty whatsoever to any other person or entity by issuing the ASTM E1527-21 Phase I Environmental Site Assessment. Use of this ASTM E1527-21 Phase I Environmental Site Assessment by any person or entity, including by Haley & Aldrich of New York's client, for a purpose other than for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject property is expressly prohibited unless such person or entity obtains written authorization from Haley & Aldrich of New York indicating that the ASTM E1527-21 Phase I Environmental Site Assessment is adequate for such other use. Use of this ASTM E1527-21 Phase I Environmental Site Assessment by any person or entity for such other purpose without written authorization by Haley & Aldrich of New York shall be at such person's or entity's sole risk and shall be without legal exposure or liability to Haley & Aldrich of New York.

Haley & Aldrich of New York may authorize third-party reliance on the ASTM E1527-21 Phase I Environmental Site Assessment by providing reliance letters to third party(ies) provided that the third party(ies) agree: (1) to use the ASTM E1527-21 Phase I Environmental Site Assessment only for the purpose of assessing the potential or existing environmental contamination liabilities associated with real property; (2) to be bound by the terms and conditions and limitations contained in the ASTM E1527-21 Phase I Environmental Site Assessment report and the proposal and its Attachments, Terms and Conditions, and Limitations; (3) to accept the form and substance of Haley & Aldrich of New York's reliance letter; and (4) to deliver to Haley & Aldrich of New York a signed copy of a reliance letter by an authorized representative of the relying party, within thirty (30) days after said reliance letter is

provided to the relying party, signifying the relying party's acceptance of the aforementioned conditions. Upon Haley & Aldrich of New York's receipt of the signed reliance letter by the relying party(ies), the relying party(ies) will be authorized to rely on Haley & Aldrich of New York's ASTM E1527-21 Phase I Environmental Site Assessment for the limited purpose of identifying potential or existing environmental contamination liabilities associated with the subject property. The relying party(ies) agree(s) to bind each of its respective successors and assigns to the aforementioned Terms and Conditions.

This ASTM E1527-21 Phase I Environmental Site Assessment reflects subject property conditions observed and described by records available to Haley & Aldrich of New York as of the date of ASTM E1527-21 Phase I Environmental Site Assessment preparation. The passage of time may result in significant changes in subject property conditions, technology, or economic conditions, which could alter the findings and/or recommendations of the ASTM E1527-21 Phase I Environmental Site Assessment. Accordingly, Haley & Aldrich of New York's client and any other party to whom the ASTM E1527-21 Phase I Environmental Site Assessment is provided recognize and agree that Haley & Aldrich of New York shall bear no liability for deviations from observed conditions or available records after the time of ASTM E1527-21 Phase I Environmental Site Assessment preparation. Haley & Aldrich of New York makes no express or implied representation that the information contained in the E1527-21 Phase I Environmental Site Assessment has continued viability after 180 days of the ASTM E1527-21 Phase I Environmental Site Assessment's completion date, and any use or reliance on the ASTM E1527-21 Phase I Environmental Site Assessment after 180 days of the ASTM E1527-21 Phase I Environmental Site Assessment's completion date by Haley & Aldrich of New York's client or any other authorized person or entity will be at that party's sole risk and without liability to Haley & Aldrich of New York.

Notwithstanding anything contained herein, Haley & Aldrich of New York shall not be liable for any claim or damage arising from environmental contamination liabilities that occurred on the subject property after the effective date of the ASTM E1527-21 Phase I Environmental Site Assessment. Likewise, Haley & Aldrich of New York shall not be liable for any existing or future property owner's failure to satisfy any continuing obligation for CERCLA liability protection or under the Federal Environmental Protection Agency's All Appropriate Inquiries rule.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Haley & Aldrich, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 401 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

2074-2080 MCDONALD AVENUE
BROOKLYN, NY 11223

COORDINATES

Latitude (North):	40.6021200 - 40° 36' 7.63''
Longitude (West):	73.9729650 - 73° 58' 22.67''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	586895.6
UTM Y (Meters):	4494886.0
Elevation:	22 ft. above sea level

NY RGA LF ---------- Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2

RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 02/03/2025 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 02/02/2025 has revealed that there are 15 NY LTANKS sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 10 NY UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/02/2025 has revealed that there are 8 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 55 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that

there are 6 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 11 UST FINDER sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not

limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	06/02/10-Vought-Primary off-hours responder. Vought called and spoke to NYCDEP Alex Castro (Cell:347-865-1238) and he received call from DEC investigator of spill. Spill is 10 wide area of contaminated soil around a heating oil fill port in a sidewalk between 36 Colin Place and 40 Colin Place. Castro was not sure which residence was owner of the fill port and the possible UST. The fill port was approximately 1.5' away from 40 Colin Place and 4' away from 36 Coline Place. Castro spoke to the owner of 36 Colin Place (who wished to remain anonymous but noted odors from the contaminted soil) and he said that he converted to gas when he bought the home years ago. The owner of 36 Colin Place also noted that for the past ten years he observed no spill at the fill port and it just appeared recently. As per Castro he knocked on the door of 40 Colin Place, a woman answered and when he stated he was from DEP regarding the spill, no one opened the door and no further response was received from the occupants. Vought checked PBS and Spills and no listings found for 36 or 40 Colin Place. DEC Piper to perform site visit as he will be in neighborhood on 6/3/10. Owner info as per ACRIS: Erica Dweck (husband is Nathan) 40 Colin Place Brooklyn, NY 11223 and Alex Missry 36 Colin Place Brooklyn, NY 11223 06/03/10-Vought-Spoke with DEC Piper who performed site visit this morning and spoke with Erica Dweck and noted that she should hire contractor to properly abandon UST (may be a 550 or 1000 gallon tank). Dweck agreed that she would hire contractor to abandon UST. Vought sent CSL out as per Piper with 30 month deadline to Dweck at address above and assigned spill to Piper as he performed site visit and impending transfer of Vought to Section A.

DWECK RESIDENCE (Continued) **S110488212**

8-4-11- Info request sent.2nd attempt 03-03-2017- Info request sent. 3rd attempt 8/11/21- DEC Piper reviewed case file. Spill is 11 years old, initial complaint was a stain from an old tank. Thank is unregulated. Additional threat is minimal. This spill is administratively closed.

Remarks: Caller reporting that he found oil seeping up from the ground inbetween 2 residences. Unknown source.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 122-562: 1/20/99-10:00HRS N. FRUSTACIA-14757-A MECH-NETWORKS-FOUND APPRX 1 GAL OF HEATING OIL COMING FROM BUILDING STANDPIPE. ****3RD PARTY INVOLVEMENT****-OIL OVERFLOWED AFTER DELIVERY OF HEATING OIL TO BUILDING ONTO SIDEWALK AND THEN INTO VAULT 2572- MR FRUSTACIA FOUND OIL COMPANY HAD PLACED DIAPERS TO CONTAIN OIL. SUMP PUMP IN HOLE BUT OIL MINDER CAUSED PUMP TO SHUT DOWN AUTOMATICALLY. MR. FRUSTACIA MANUALLY DISCONNECTED PUMP. NO JOINT REGULATOR IN VAULT. PLUMBING COMING FROM TRAP SEEMS TO BE GOING INTO CUSTOMER'S BUILDING. MR. FRUSTACIA TOOK SAMPLE AND PLACED ENV TAG 08317. WILL NEED TO TAKE 3 SAMPLES-1 FOR FLASHPOINT, 1 FOR OIL ID, AND 1 FOR PCB. WHEN MR FRUSTACIA CALLS BACK HE WILL BE NOTIFIED OF 2 ADDITIONAL SAMPLES AND WILL NEED TO GET ACCESS TO BUILDING AND TRY TO DETERMINE TYPE OF PLUMBING GOING INTO BUILDING. DOES NOT SEEM TO BE COMING FROM ANY COMPANY EQUIPMENT. FDR IN VAULT SHOWS JAN 1, 1951 AND 147PPM. UPDATEJAN-20-1999 1600HRS CAMPANILE O/S NETWORKS REPORTS HIM AND ZALLOUGHI ARRIVED AT 1500HRS THEY BROKE OPEN PIPES ON SUMP PUMP IN VAULT AND FOUND NO TRACE OF OIL, WENT INTO 705 BEDFORD AVE AND TRACED OUT PIPES. AND FOUND AN OIL TANK THAT BELONGS TO BLDIN THE SAME ROOM WHERE THE SUMP PUMP ORIGINATES . FOUND TRACES OF OIL IN ROOM. IT APPEARES TO BE COMING FROM OLD OIL TANK. NOTIFIED JOE BELIEVED TO BE SUPT (WOULD NOT GIVE LAST NAME) FROM S&W KNITTING MILL. WE RECOMEND DEP BE NOTIFIED OF SITUATION IN OIL TANK ROOM. MR CAMPANILE RECOMENDS THAT SUPT SHOULD CLEAN UP HIS ROOM. UPDATE ***** 1-20-99 LAB SEQ# 99-00596 <1.0 ALSO, SQ# 99-00598 OIL ID INDICATES THE PRESENCE OF A SUBSTANCE SIMILAR TO A LIGHT FUEL OIL. 16-FEB-1999 17:44 -- A.WALKER #55495, BKLYN ENV OPS, REPORTS CLEANUP COMPLETED WITH SLIX AT 16:00 HRS & E/S TAG #08317 REMOVED. Also, e2mis no. 122-564: 1/20/99 10:00HRS-***3RD PARTY INCIDENT***N. FRUSTACIA-14757 A MECHANIC-NETWORKS FOUND APPRX 1 PINT OF HEATING OIL ON 750 GALLONS OF WATER IN VAULT 2601 F/O 2 LYNCH STREET-COMING FROM OIL STANDPIPE FROM BUILDING AFTER OIL COMPANY MADE DELIVERY-NO PLUMBING IN THIS VAULT-THIS VAULT IS CONNECTED TO V 2572-INCIDENT #122562. THIS IS CONTAINED-NO SUMP IN THIS VAULT.FDR 6B50 INSTALLED 1/1/84 AND SHOWS 10 PPM-DOES NOT LOOK AS THOUGH THIS IS COMING FROM COMPANY EQUIPMENT. TOOK SAMPLE FOR FLASHPOINT-OIL ID-AND PCB. update****** LAB SEQ # 99-00597 <1.0 ALSO 99-00599-001 I.D IS NOT POSSIBLE DUE TO THE DEGRADED QUALITY OF THE MATERIAL RECOVERED. 16-FEB-1999 17:44 -- A.WALKER #55495, BKLYN ENV OPS, REPORTS CLEANUP COMPLETED WITH SLIX AT 14:30 HRS & E/S TAG #08303 REMOVED.
Remarks: THERE WAS A HEATING OIL DELIVERY AT THAT LOCATION. THE SPILL ENDED UP IN VAULT 2572 AND IS 1 GAL ON 1000 GAL OF WATER AND VAULT 2601 IS 1 PT ON 750 GAL OF WATER.THE SUMP PUMP IN BOTH VAULTS ARE NOT RUNNING.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 12/23/2003 - Sangesland received this call from Tom Kunkel's office. Anna Vindigni is somehow handicapped and called the Regional Director about the longterm smell of oil in her apartment. (Ground floor of a 3 family house). Originally spill came in on DeMeo's watch, but he's out for 2 weeks and the woman is in Coney Island area, so case is forwarded to Krimgold. 12/24/2004.J. Krimgold called Anna Vindigni. No answer. 2/10/04. J.Krimgold visit the site. Tenants on the Ground floor denied access to the apartment. Observed a newly installed vent line and a fill port outside the house at 7-8' from

RESIDENCE (Continued) **S106124590**

the nearest window. No evidence of a spill was found outside. NFA.

Remarks: SIDE ENTRANCE APARTMENT. THERE WAS A TANK THAT LEAKED AT THE LOCATION AND IT WAS REPLACED IN OCTOBER. THE TECHNICIAN WHO REPLACED IT TOLD THE CALLER THAT SHE SHOULD BE CAREFUL AS THE FUMES COULD CAUSE HER BREATHING PROBLEMS. SHE STILL SMELLS THE ODOR AND HAS RECENTLY HAD BREATHING TESTS DONE.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001

NYC DEPT OF EDUCATION - PUBLIC SCHOOL 215K (Continued) **U003396175**

Tank Id: 45969
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
E00 - Piping Secondary Containment - None
G03 - Tank Secondary Containment - Vault (w/o access)
K00 - Spill Prevention - None
L09 - Piping Leak Detection - Exempt Suction Piping
D00 - Pipe Type - No Piping
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
H05 - Tank Leak Detection - In-Tank System (ATG)
I04 - Overfill - Product Level Gauge (A/G)
F00 - Pipe External Protection - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 09/17/1931
Capacity Gallons: 5000
Tightness Test Method: NN
Date Test: Not reported

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	62496
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
J02 - Dispenser - Suction Dispenser
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
E00 - Piping Secondary Containment - None
F01 - Pipe External Protection - Painted/Asphalt Coating
K01 - Spill Prevention - Catch Basin
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
I02 - Overfill - High Level Alarm
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
G02 - Tank Secondary Containment - Vault (w/access)

Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Tank Info:

Tank Number: 001
Tank Id: 3536

16-24 SLOAN PL (Continued) **U003384302**

Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G03 - Tank Secondary Containment - Vault (w/o access)
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping
H99 - Tank Leak Detection - Other
I04 - Overfill - Product Level Gauge (A/G)
C03 - Pipe Location - Aboveground/Underground Combination
J02 - Dispenser - Suction Dispenser
B00 - Tank External Protection - None
E02 - Piping Secondary Containment - Vault (with Access)
F00 - Pipe External Protection - None

Tank Location: Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 10/10/1953
Capacity Gallons: 7500
Tightness Test Method: NN
Date Test: Not reported

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110064172988

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The New York Department of Environmental Conservation Facility Information System (FIS) database houses all information about facilities that are regulated or of environmental interest to the state of New York.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. Another tank test failure was reported 13 days later (7/25/89) for this site(Spill Number 8904068). The second spill was closed in 2003 due to a lack of info. Ten of twelve 550 gallon tanks were closed on 8/1/89. This would seem to indicate that there was a real leak. This one may need to be investigated. Need to call owner to see if records are available. 07/02/09. ACRIS record search showed transfered of the ownership on Feb 1, 2000 to Rafael and April Levi. JK. 07/13/09. Moses Ajoku visited this site. The property located at the corner of McDonald Ave and Quentin Rd. No evidence of abandoned tanks. Property currently used as an auto repair shop and parking. According to the current owner all tanks were removed circa 2000 by the previous owner (see affidavit in eDocs). Owners cotact info: phone 718-336-6076 cell 917-279-8685 fax 347-492-3885 Address: 1 Woodside Ave, Brooklyn, NY 11223 JK. 7/15/09. Joe (Rafael's brother)

1906 MCDONALD AVENUE - TTF (Continued) **S106703345**

called to discuss the issue. He is hopping to find documents that showed that soil was clean after tanks removal, if unsucssesfull then to hire contractor to perform soil sampling. According to him, GW should not be an issue due to an anticipated depth of ~30ft. Old TTF letter (by certified mail) was sent to Mr. Rafael Levi (owner). JK. 8/17/12 Spill re-assigned to T. Demeo as per RSE. bf 10/09/14-Hiralkumar Patel. alternate address: 1902-1908 McDolands Ave PBS #: 2-336637. as per PBS record, the site has/had following tanks: - two (2) 550 gal 'other' product USTs, in-service - ten (10) 550 gal gasoline USTs, removed in Aug. 1989 other spill # 8904068 was reported on 07/25/1989 due to tank test failure of four (4) 550 gal gasoline tanks. case was closed in Mar. 2003 due to lack of recent info. found following documents on edocs for the subject spill and PBS:

Record Upd:	01/27/2025
Updated By:	CXMAYCOC
Site Description:	"Location: The site is located at 579 Kings Highway in Brooklyn, an urban area. The site is bounded on the south by Kings Highway, on the east by a 2 story mixed commercial/residential building, on the north by single family residential properties along East 5th Street, and on the west by a 2 story commercial building. Site Features: The Site currently consists of a 2 story mixed use building with a dry cleaner on the 1st floor and a residential apartment on the 2nd floor. The site is a RCRA Small Quantity Generator with USEPA ID# NYD982275224. Current Zoning and Land Use: The site is zoned R6A which allows for a

I.D.A. CLEANERS (Continued) **S121933843**

mix of residential and commercial buildings. Past Use of the Site: The site has been used as a dry cleaner since at least 1981. According to the NYSDEC Air Facility Registration Certificate ID# 2-6107-00152, the site is operating one 4th generation machine using PCE solvent. According to the last Part 232 dry cleaning compliance report, the facility uses between 15 and 30 gallons of PCE per month and is currently in compliance. Site Geology and Hydrogeology: The site is underlain by fine-medium sand down to approximately 25 ft bgs. Groundwater is encountered at approximately 18 ft bgs and flows to the south."

Env Problem:	"Nature and Extent of Contamination: A Soil Vapor Intrusion investigation at a nearby spill site at 587 Kings Highway (Spill # 9901118) identified the dry cleaning solvent tetrachloroethylene (PCE) in sub-slab soil vapor at concentrations of 440 ug/m3, 240 ug/m3 and 11 ug/m3. PCE's daughter product trichloroethene (TCE) was identified at 12 ug/m3 in one sample. PCE was identified in one indoor air sample in that building s basement at a concentration of 32 ug/m3. The off-site well MW-13, which is the closest well to the dry cleaner site, had PCE in groundwater at a maximum concentration of 8.6 ug/L. No PCE was detected in soil samples or groundwater samples collected on the 587 Kings Highway site. Additional soil vapor samples were collected from the sidewalk in front of 3 buildings located between the spill site (587 Kings Highway) and the IDA Cleaners (579 Kings Highway). These samples had detectable concentrations of PCE and TCE. Sample SV-1 at 581 Kings Highway had PCE at 700 ug/m3 and TCE at 2.1 ug/m3. Sample SV-3 at 585 Kings Highway had PCE at 230 ug/m3 and TCE at 0.79 ug/m3. "
Health Problem:	"As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

Town:	New York City
Record Added Date:	04/16/2009
Record Updated Date:	02/08/2011
Update By:	MOBARRIE
Site Description:	"Location: The site includes properties around a BCP site (c224126) located at 402 Avenue U. This site is an off-site project associated with the on-site BCP project as well as Spill No. 85-03707. Site Features: The site does not have definite boundaries since it is an off-site project associated with an on-site BCP. The area of concern includes the down gradient properties of the BCP site. Current Zoning/Use: Since the site is a collection of properties down gradient of the BCP project, it includes both public and private land (public sidewalk and private residences). The focus of the remedial investigation includes the residential properties adjacent to the BCP project. Historical Uses: Based on historical Sanborn fire insurance maps, the on-site BCP project was used as a gasoline filling station (former Getty S/S 247). The historic uses of the surrounding properties are unknown at this time. Site Geology and Hydrogeology: Groundwater in the vicinity of the site flows in a south-southwest direction. "
Env Problem:	"Nature and Extent of Contamination: Petroleum constituents were detected in soil, groundwater, and soil vapor samples from the on-site BCP project. However, all contaminations were addressed within the property boundaries under the approved Remedial Action Work Plan. The remedial actions included excavation and off-site disposal, in-situ chemical oxidation, and monitored natural attenuation. The off-site properties were believed to be contaminated based on data collected during the on-site investigation. The Responsible Party conducted an off-site investigation and included collection of soil and groundwater samples. The results of this sampling event showed that contamination does not exist on the adjacent, down gradient property at concentrations exceeding applicable standards. Special Resources Impacted/Threatened: No special resources have been identified in the vicinity of the site. Significant Threat: The on-site BCP was determined to pose a significant threat to human health and the environment. The off-site project was created as a result of such determination."
Health Problem:	"A health assessment will be provided when sufficient information becomes available for the area of concern."

Update By:	JHOCONNE
Site Description:	"This Brownfield Cleanup Program (BCP) Application is for remediation and redevelopment of the Foundation for Torah Studies Project, a .22 acre vacant property located on Block 7219 Lot 1 designated by New York City Department of Assessment and is located at 402 Avenue U in Brooklyn, NY, Kings County (the Site). This property is located on a commercial street with residential neighborhood. The property directly to the north consists of a 2-story residential building. The

FOUNDATION FOR TORAH STUDIES PROJECT (Continued) **S128906104**

property to the south consists of a 3-story residential home. The property directly to the west consists of a 7-story residential and a commercial building. The property directly to the east is vacant. Along Avenue U store fronts are present on the first levels of residential buildings. Historically, the Site was utilized as a Getty service station for approximately 40 years. The service station operated for 40 years before it was converted to an automotive maintenance facility and most recently a synagogue. The Underground Storage Tanks (USTs) associated with the service station were abandoned in place during July 1992. The proposed development will be a 6-story, 10,000 square foot residential building. The building will consist of both condo units and a synagogue. A full cellar will be situated beneath the building. One portion of the Site will be an open space capped with asphalt, which will be used as an access area in the rear of the proposed building. Known or suspected contaminants listed are petroleum and volatile organic compounds (VOCs). These contaminants have impacted the soil, groundwater, and soil gas. New York State Department of Environmental Conservation (NYSDEC) and New York State Department of Health (NYSDOH) determined this Site poses a significant threat to the environment and human health based upon Remedial Investigation results. This information was subsequently conveyed to the public through the use of fact sheets. A Brownfield Cleanup Agreement (BCA) has been executed by NYSDEC on 12/05/07. A Remedial Action Work Plan (RAWP) has been approved and Remedial Actions started on February 25, 2008. The RAWP calls for excavation and off-Site disposal of contaminated soil and USTs, Groundwater Bioremediation with Oxygen-Releasing Compounds (ORCs), and quartering monitoring of groundwater. Additional remediation is needed to achieve a Track 1 cleanup based on contaminated soil discovered at the bottom of the excavation. A RAWP Addendum was submitted to the Department on 12/19/08. This plan was then subsequently approved on 01/09/09. A Soil Bioremediation Program will be implemented to treat contaminated soil in the interim unsaturated zone with ORCs. Remedial activities were completed as of September 2009. A Track 1 cleanup has been achieved. However, quarterly monitoring of groundwater will continue for 2 years after the issuance of the Certificate of Completion. Certificate of Completion was issued on December 24, 2009. "

Env Problem: "A remedial investigation conducted in 2007 revealed contamination in all 3 media: soil, groundwater, and soil vapor. Volatile Organic Compounds (VOCs) and Semi-volatile Organic Compounds (SVOCs) are present in soils at the water table interface and extend from north central portion of the Site between abandoned Underground Storage Tanks (USTs) and Avenue U, to the southern portion of the Site. The total VOCs concentrations in soil ranged from none detected to 632,310 ug/kg Analytical data suggested that groundwater plume consisting of dissolved VOCs (xylenes, ethylbenzene) is present beneath the Site and beneath sidewalls of East 2nd Street. The total VOCs concentrations within the groundwater plume ranged from 12,400 ug/L in the downgradient portion of the Site to 201.30 ug/L. Investigations revealed that levels of soil vapor are present at the Site and beneath the sidewalls adjacent to the West of the Site, and East 2nd Street. Organic vapors, such as trimethylbenzenes and xylenes, were detected in soil vapor samples. Major on-Site vapor constituents included dichlorodifluoromethane (1,860 mcg/m3) and toluene (1,150 mcg/m3). And major off-Site vapor constituent consisted of toluene (53.7 mcg/m3). This Site has an active Spill #

FOUNDATION FOR TORAH STUDIES PROJECT (Continued) **S128906104**

85-03707 associated with the former Getty service station. The service station operated for 40 years before it was converted to an automotive maintenance facility. A total of 13 USTs were abandoned in-place. A Stipulation Agreement was executed between New York State Department of Environmental Conservation (NYSDEC) and Getty Properties, Corp. on 03/28/06. NYSDEC and New York State Department of Health (NYSDOH) determined this Site poses a significant threat to the environment and human health based upon Remedial Investigation results. This information was subsequently conveyed to the public through the use of fact sheets. A Brownfield Cleanup Agreement (BCA) has been executed by NYSDEC on 12/05/07. A Remedial Action Work Plan (RAWP) has been approved and Remedial Actions started on February 25, 2008. The RAWP calls for excavation and off-Site disposal of contaminated soil and USTs, groundwater bioremediation with Oxygen-Releasing Compounds (ORCs), and quartering monitoring of groundwater. During the course of the development, all contaminated soil (approximately 5,946 tons) along with 13 USTs were excavated and properly disposed of off-Site. The excavation extended to 14 feet below grade. A Groundwater Bioremediation Program consisted of the injection of an estimated 660 pounds of ORCs through 36 injection points. The goal was to reduce the concentration of dissolved petroleum constituents in groundwater. The performance of the Groundwater Bioremediation Program was evaluated through quarterly monitoring events. As of April 2009, the quarterly sampling events indicated the gasoline compounds within the plume have decreased to non-detected levels. Sampling activities, however, will continue for 2 years after the issuance of the Certificate of Completion.
Additional remediation was needed to achieve a Track 1 cleanup based on contaminated soil discovered at the bottom of the excavation. A RAWP Addendum was submitted to NYSDEC on 12/19/08. This plan was then subsequently approved on 01/09/09. The Addendum called for the implementation of a Soil Bioremediation Program to treat contaminated soil in the interim unsaturated zone with ORCs in a slurry form. The groundwater level has been decreased from 12 feet below grade to 19 feet below grade as a result of the dewatering activities. The Soil Bioremediation Program was implemented in 2 phases from 20 feet below grade to 14 feet below grade. The first phase consisted of 66 injection points over a grid pattern consisting of 8 rows, spread 5 feet apart. The second phase consisted of 16 injection points over a grid pattern of 3 rows, spared 10 feet apart. A total of approximately 738 pounds of ORCs mixed with 120 gallons of water was injected. The performance of the soil bioremediation program was assessed through soil sampling from the 5 sampling ports installed within the foundation slab. A sampling event was conducted in April 2009, which was 5 months following the initial injections. The first round of post-remedial soil sampling results documented that the soil has met the Unrestricted Use Soil Cleanup Objectives. NYSDEC subsequently determined that no additional sampling is needed. Remedial activities were completed as of September 2009. A Track 1 cleanup has been achieved. However, quarterly monitoring of groundwater will continue for 2 years after the issuance of the Certificate of Completion. "

Health Problem: "All contaminated soil have been removed allowing unrestricted future use of the site. Since the area is provided with public water it is unlikely that anyone will exposed to site contaminants in drinking water. "

DEC Memo:	05/07/18 - Lakhani A prospective buyer, who is currently in contract for the site, performed a Phase I and II. The site is intended to be redeveloped into a school which will cover the entire 13,000 sq. ft. lot. The Phase I revealed that tanks exist on the northwestern portion of the property. According to Sanborn maps, there are four (4) tanks on the property expected to have held or hold gasoline and/or diesel. Historically, the site was a car wash, car rental, and diner. Currently, a single building exists on the site. As a part of the Phase II, PVE Engineering, the consultant, installed five (5) borings and sampled the soils and groundwater. Low concentrations of VOC/SVOCs were discovered in the groundwater (10 - 50 ppb). The soil was observed to have no VOC/SVOC exceedances. However, PID readings above the water table are approximately 1000 ppm. Demolition is planned for August 2018. As per the Phase I, the current owner of the property is 166 King Rio LLC. PVE Engineering Christopher B. Brown, P.G. Ph (Hudson Valley): 845-454-2544 Ph (NYC): 646-602-4999 Cell: 914-475-2650 Email: cbrown@pve-llc.com 05/25/18 - Lakhani The site is intended to be entered into the NYC VCP. 166 King Rio LLC 8649 17th Avenue Brooklyn, NY 11214 Findings: 1. We found evidence of tanks on site northwest corner of the property referenced in the Sanborn Fire Insurance maps, and geophysical survey demonstrated something in the subsurface, can t confirm they re tanks at this time, but the anomaly is in the right location. 2. Elevated PID readings observed in the soil borings. No petroleum compounds detected in soil samples from the suspected UST area but our investigation consisted of only a few borings. 3. VOCs were detected in groundwater at concentrations exceeding standards. Soil sample results are as follow: benzene less than 110 ppb(SB-1, 17'-20'bgs), MTBE less than 220 ppb(SB-1, 17'-20'bgs). Groundwater results are as follow: isopropylbenzene 32 ug/L(TWM-1), n-butylbenzene 36 ug/L(TWM-1),

174 KINGS HIGHWAY (Continued) **S121985867**

sec-butylbenzene 13 ug/L(TWM-1).
Vapor results are as follow: carbon tetrachloride less than 1.26 ug/m3 (SS-1), m/p-xylene 6.25
ug/m3(SS-1), PCE 8.21 ug/m3(SS-1), TCE less than 1.07 ug/m3(SS-1), vinyl chloride less than 0.511
ug/m3(SS-1), 1,2,4-trimethylbenzene 28.9 ug/m3(SV-1), 1,3,5-trimethylbenzene less than 9.83
ug/m3(SV-1), acetone 165 ug/m3(SV-1), carbon tetrachloride less than 12.6 ug/m3(SV-1), ethylbenzene
15.1 ug/m3(SV-1), m/p-xylene 59.5 ug/m3(SV-1), o-xylene 21 ug/m3(SV-1), PCE less than 13.6
ug/m3(SV-1), toluene 40.3 ug/m3(SV-1), TCE 14.3 ug/m3(SV-1), vinyl chloride less than 0.511
ug/m3(SV-1), 1,2,4-trimethylbenzene 18 ug/m3(SV-3), 1,3,5-trimethylbenzene less than 9.82
ug/m3(SV-3), acetone 71 ug/m3(SV-3), carbon tetrachloride less than 12.6 ug/m3(SV-3), ethylbenzene
less than 8.69 ug/m3(SV-3), m/p-xylene 28.4 ug/m3(SV-3), o-xylene 9.95 ug/m3(SV-3), PCE less than
13.6 ug/m3(SV-3), TCE less than 10.7 ug/m3(SV-3), vinyl chloride less than 5.11 ug/m3(SV-3),
1,2,4-trimethylbenzene less than 104 ug/m3(SV-2), 1,3,5-trimethylbenzene less than 104 ug/m3(SV-2),
acetone 534 ug/m3(SV-2), benzene less than 67.7 ug/m3(SV-2), carbon tetrachloride less than 133
ug/m3(SV-2), ethylbenzene less than 92.1 ug/m3(SV-2), m/p-xylene less than 184 ug/m3(SV-2), MTBE
less than 76.4 ug/m3(SV-2), methylene chloride less than 184 ug/m3(SV-2), o-xylene less than 92.1
ug/m3(SV-2), PCE less than 144 ug/m3(SV-2), toluene 80.6 ug/m3(SV-2), TCE less than 114
ug/m3(SV-2), vinyl chloride less than 54.2 ug/m3(SV-2). Soil borings reveal that the depth to
groundwater is approx. 15'bgs. 06/20/18 - Lakhani OER Project #18TMP1382K PM: Caleb Bailey 11/13/18
- Lakhani OER Pong emailed that during the May 2018 remedial investigation, a spill was called in
based on elevated PID readings (max 1391 ppm) and petroleum odors in deeper soils in the
northwestern portion of the property where there are suspect USTs related to the historic use of
the property as an auto garage and car wash. Groundwater samples showed five (5) VOCs and two (2)
SVOCs above GQS. Soil vapor samples showed elevated petroleum-related compounds, total BTEX max of
1466 ug/m3 and moderate chlorinated VOCs, TCE at 14.3 ug/m3 and PCE max of 29.4 ug/m3. The proposed
development consists of a charter school with a partial basement and outdoor playground. The entire
18.400 sq. ft. site will be excavated 3' for the new building foundation with deeper excavation to
12' for the basement. RIR (PVE, 10/2018) - Depth to groundwater ranges from 14.6' to 15'bgs.
Groundwater flow is estimated to be from south to north across the site. Because the development is
a future school, the developer and consultant were already planning on installing a vapor barrier

174 KINGS HIGHWAY (Continued) **S121985867**

and an active SSDS for protective measures. 11/14/18 - Lakhani As per NYSDOH Walz, the SSDS will be
enough to be protective, along with a site management plan to ensure the system continues to be
protective. 06/13/19 - Lakhani The applicant committed to excavating to groundwater (15 feet) in
the NW corner of site. Development only calls for excavation to 5 feet for slab-on-grade building.
Due to extensive SOE required to perform bulk removal to 15 feet, the applicant is requesting
reconsideration this requirement. To date: - Spill was called during the RI due to free product
found well TMW-1 and odor in well TMW-5, both near the USTs. - Five 550-gallon USTs have been
removed thus far from the site with an additional two USTs to be removed tomorrow. - The five USTs
were contained in a vault found at a depth of 5 feet. Bottom endpoint samples at 8 feet (below the
concrete slab) and sidewalls samples were collected. - Samples were also collected from test pits
installed between 12 to 15 feet bgs with two of these beneath the former USTs (see attached
figure). - Bottom endpoint and sidewall samples will be collected from the area of the two other
USTs. - These samples will be analyzed with the final UST samples collected tomorrow. - At this
time, no petroleum contaminated soil has been encountered and no elevated PID readings, staining,
or odors were noted during removal of the five USTs. 07/05/19 - Lakhani DEC Lakhani approved the
change in excavation depth in the NW portion of the site from 15’ to 5’ for the footings of the
slab on grade building. However, DEC Lakhani did require to install a MW in the area around TMW-1
after excavation to remove the tank and for the purpose of the development is complete. 07/24/19 -
Lakhani All tanks in the northwest corner of the site have been removed and the area backfilled.
The consultant is working to prepare a tank closure report and will installed the monitoring well
and SSDS as committed to previously. Samples were collected from sidewalls and bottoms of the
former tank field. Results indicated concentrations below UUSCOs. 08/05/19 - Lakhani - Spill being
transferred to Sekhon. 08/20/19 - Lakhani During the process of driving piles and removing part of
the old foundation they discovered what appeared to be petroleum contaminated soil which had an
elevated PID reading. Since then they have stockpiled the material on site and have taken a sample
from the stockpile and are waiting for results. Also they have installed a temp monitoring well up
gradient of where the original free product was found during the RI, this will be removed once they
get approval to put a well in the side walk. 1/21/21- Sekhon PBS (2-612963) Closure report -
DECDOCS Seven (7) 550-gallon USTs were pumped of their contents

174 KINGS HIGHWAY (Continued) **S121985867**

(oil/water mixture), cut, cleaned,
and removed from the site for disposal. 2. Two (2) approximately 200-gallon USTs containing oil
were found to have leaked their contents during excavation. Tanks and petroleum-contaminated soils
were excavated, temporarily staged on poly sheeting, and removed from site for disposal. A total of
approximately 229 tons of petroleum contaminated material was excavated and disposed of off-site.
3. No VOCs were identified at concentrations exceeding CP-51 SCOs in any of the sixteen (16) post
excavation soil samples collected. 4. SVOCs were identified in only two (2) of the sixteen (16)
samples collected at a concentration exceeding CP-51 SCOs, along the bottom and eastern sidewalls
of excavation from Tanks #8 and #9. 2/3/21 - Sekhon RP asked to submit remedial closure report.
5/14 - Sekhon Closure report DECDOCs. 5/18/21 - Sekhon Soil was excavated to a depth of 4 feet from
grade beneath the area of the new building, and to a depth of 12 feet in the cellar area.
Additional excavation was completed in the following areas: UST excavation area and hotspot area.
The hot spot was excavated to a depth of 6 feet bgs in order to remove elevated concentrations
identified during the Remedial Investigation in the vicinity of the proposed playground
area.Collected and analyzed ten (10) end-point samples, which included four (4) endpoint samples
(EP-1 through EP-4) across the site and one (1) hot-spot endpoint sample set, consisting of four
(4) sidewalls (EP-5-W, E, N, and S) and one (1) bottom endpoint sample (EP-5-B) to determine
attainment of SCOs. Track 4 SCOs were achieved. Based upon submitted report, case closed.

Remarks: gas tanks on northwest side of property - cleanup pending - part of transaction - nyc oer involved

DEC Memo:	DEC needs test results that pump is OK 2/11/08: Chanda reassigned this spill. This site is related to another spill (Spill # 0750245, P.S 237K, 50 Avenue P, Brooklyn, NY)which is handling by Chanda. 2/11/08:Chanda has reviewed the Subsurface Investigation Report prepared by Tyree Brothers Environmental Services, Inc., dated April 2007 for the above referenced site and has the following comments: * The groundwater (GW) analytical results showed elevated

(Continued) **S107521753**

levels of total VOCs for monitoring wells MW-1, MW-2, MW-3, MW-5, MW-6 and MW-7. The levels of BTEX concentrations ranged from 13.4 ppb to 4,578 ppb. The levels of MTBE concentrations ranged from MDL to 6,060 ppb. The high total VOC concentrations indicated that the GW had been contaminated and thus, are required to be remediated and monitored. 2/12/08: Chanda discussed with Joe Sun (supervisor), and sent a letter with STIP and generalized Corrective Action Plan via certified mail to RP (Scott Hanley). 2/28/08: Chanda received a call from Tyree Brothers (Mattue Boeckel Ph. 631-249-3150) regarding the STIP letter. He stated that Getty Marketing has a universal consent order with DEC. Chanda discussed with Joe Sun (NYSDEC) regarding the STIP and concluded that universal consent order is the active for this spill. Therefore, disregard the current STIP. 3/17/08: Chanda called Mattue Boeckel (Ph.631-249-3150) Tyree, regarding the site updated status. He stated that he will be submitting an investigation work plan to DEC for review and approval. He has a schedule last week of this month. 4/17/08: Chanda called Mattue Boeckel (Ph. 631-249-3150), Tyree Environmental, requiring that an investigation work plan must be submitted as soon as possible but no later than 4/30/08. 5/13/08: Chanda received a phone call from Mattue Boeckel (Ph. 631-249-3150) regarding the investigation report for this site. He stated that the investigation report is completed and his supervisor is currently reviewing. The investigation report will be submitted to DEC within this week. The deadline is extended to 5/19/08. 5/15/08: Chanda received an electronic copy of the Groundwater Quarterly Report dated April 2008, prepared by Tyree Environmental Corporation. (see eDocs) 6/11/08: Chanda has reviewed the Quarterly Monitoring Report and has the following comments: -GW monitoring wells (MW-1 through MW-7) were monitoring and sampling on 3/28/08. The depths of groundwater were measured ranging from 17.02 feet to 18.86 ft bgs. The groundwater flow direction is southeast. - The groundwater (GW) analytical results (3/28/08) showed elevated levels of VOCs for monitoring wells MW-1, MW-2, MW-3, MW-5, MW-6 and MW-7. The levels of BTEX concentrations ranged from 1.0 ppb to 94.0 ppb. The levels of MTBE concentrations ranged from MDL to 20 ppb. 6/12/08: Chanda sent a letter to RP and his consultant, requiring that the next Quarterly Report be submitted to DEC by July 15, 2008 for review and approval. 6/23/08: Chanda received a Quarterly Monitoring Report dated June 2008, prepared by Tyree Environmental Corporation. 7/8/08: Chanda has review the quarterly monitoring report and has the following information: -On 6/4/08, Tyree

(Continued) **S107521753**

Environmental gauged and sampled all monitoring wells (MW-1 through MW-7) -Liquid-phase hydrocarbons (LPH) were not detected in the monitoring wells gauged. -Groundwater analytical results as follows: Date: 3/28/08 MW-1 MW-2 MW-3 MW-4 MW-5 MW-6 MW-7 BTEX (ppb)----------30---------52--------94--------22---------21--------61--------1 MTBE (ppb)----------MDL--------2----------MDL------19---------MDL-------MDL--------20 Date: 6/4/08 BTEX (ppb)----------233-------1-----------199-------796-------36---------228-------MDL MTBE (ppb)----------MDL-------MDL---------MDL--------14--------MDL--------MDL-------2 7/9/08: Chanda sent a letter to RP and his consultant, requiring that the next quarterly groundwater monitoring report be submitted to DEC by 10/1/08 for review. 10/15/08: Chanda received a quarterly report dated October 2008. This report indicated that total BTEX in groundwater are ND to 412 ppb and MTBE is ND to 85 ppb. The next quarterly report be submitted to DEC by 1/31/09. 07/12/2010: This spill was transferred to A. Doronova. AD 10/26/2010: Called and spoke with Mr. Boeckel. Asked him to submit all missing pdf copies of the previous reports. AD 11/22/2010: Received an e-mail from Tyree: Good Afternoon, As per your request attached are the quarterly reports from 2008. The rest will follow in separate e-mails. Matthew G. Boeckel Environmental Scientist III Tyree 208 Route 109, Suite 100 Farmingdale, New York 11735 Tel 631-249-3150 x-241 Fax 631-249-3281 Cell 508-922-9044 DL the submitter pdf copies to eDocs. AD 04/11/2011: Sent the following e-mail to Mr. Boeckel: Dear Mr. Boeckel: Please be advised that from now on, one hard copy of the report and one its PDF copy on a CD should be submitted to DEC in one mail package. Please, do not submit electronic copies of the reports via e-mail. Also, all missing PDF copies of the reports for 2009 and 2010 should be submitted to DEC in a timely manner. Thank you. AD 04/13/2011: Received an e-mail from Mr. Boeckel: Good Morning, The disk with the 2009 - 2010 reports went out this morning. Let me know if you need anything further. Thank you and have a good day. Matthew G. Boeckel Environmental Scientist III Tyree 208 Route 109, Suite 100 Farmingdale, New York 11735 Tel 631-249-3150 x-241 Fax 631-249-3281 Cell 508-922-9044 AD 04/15/2011: Received the disk with 8 reports for 2009 and 2010. DL all reports to eDocs. Changed site priority to P2. AD 07/13/2011: Received a Quarterly Monitoring Report for the period April-June 2011. Will review. PDF copy of the report is missing. To request its submission. AD 08/31/2011: Reviewed the report. The report states that Tyree Environmental gauged and sampled all seven monitoring wells

(Continued) **S107521753**

(MW-1 through MW-7) on June
21, 2011. Depth to groundwater ranged from 16.28' to 18.07' bgs. GW flow direction was to
south-southwest. LNPL was not detected in the monitoring wells gauged. Total BTEX ranged from from
ND in well MW-2 to 844ppb in well MW-7. Tyree recommends to continue quarterly GW monitoring, next
sampling scheduled for September 2011. AD 09/23/2011: Received a Quarterly Monitoring Report for
the period July - September 2011. Will review. PDF copy of this report is missing as well. To
request its submission. AD 11/04/2011: Reviewed the report. The report states that Tyree
Environmental gauged and sampled seven monitoring wells (MW-1 through MW-7) on September 9, 2011.
Depth to groundwater ranged from 15.08' to 16.91' bgs. GW flow direction was to south-southwest.
LNPL was detected in the monitoring wells and ranged from 0.02' in well MW-7 to 0.06' in well MW-6.
Total BTEX ranged from from ND in well MW-2 to 126ppb in well MW-1. Tyree recommends to continue
quarterly GW monitoring, next sampling scheduled for December 2011. AD 2/1/2012 Getty portfolio
transferred to KGH 3/14/2013 KGH meets with Tyree/Getty to discuss remedial progress on various
sites. Tyree PM Matt Boekel makes the case for closure on Getty #229. KGH agrees to review files
and consider the path forward. Dissolved BTEX has been reduced significantly. Source of middle
distillate issue during construction/dewatering at school property next door unclear. Agree to
discontinue GW sampling but continue monitoring for NAPL. 4/2013 - Received Quarterly Monitoring
Report and Closure Request. KGH denies closure and requests continued monitoring for heating oil
along property boundary. Heating oil distribution does not correlate well with on-site operations.
4/6/2016 - KGH on-site with Antea/Getty to confirm absence of NAPL (heating oil) from monitoring
wells. Project management has been transferred from Tyree to Antea. Tim Fisher of Antea opens wells
and confirms in KGH presence no heating oil in on-site wells. Dissolved gasoline issues previously
resolved. KGH agrees to close spill #0709362 upon receipt of well closure documentation. 4/12/2016
- KGH receives notification that all wells associated with spill #0709362 have been properly
abandoned. As such, The Department concurs that No Further Action is required and Spill #0709362
has been closed in the Spills Database. NFA. KGH. 4/2013 - Received Quarterly Monitoring Report.

CON EDISON (Continued) **S104951194**

GRECO This spill site has been transferred from DEC Sigona to Remedial Bureau B, on August 4, 2003. Spill site cleanup consolidated under spill No. 9007363. Reassigned from sulivan to sigona on 10/27/00 DEC's comments regarding the proposed Site Optimization Work Plan (SOWP) for an existing Air Sparge & Soil Vapor Extraction System (AS/SVES) at ExxonMobil Service Station,1935 Coney Island Avenue, Brooklyn, N.Y. (The Site). The proposed SOWP was prepared by Groundwater & Environmental Services, Inc., dated December 18, 2002 to address the repair of a remediation system for on-site soil and groundwater contamination. The remediation of the soil and groundwater is required by the DEC pursuant to a Stipulation Agreement executed on September 19, 1997. The current AS/SVES has been shut down since December 2001 due to system malfunctions. The proposed SOWP and implementation schedule is acceptable to DEC, as a modification to Corrective Action Plan (CAP) pursuant to paragraph 6, of the Stipulation Agreement. However, the DEC has determined that the vertical and horizontal extent of petroleum contamination has not been adequately investigated and remediated pursuant to paragraph 2, of the Stipulation Agreement. Based on the results of the DEC's site visit on February 24, 2003, and evaluation of GES investigation reports submitted to the DEC, additional investigatory and remedial actions are required to comply with the Stipulation Agreement, 6 NYCRR Part 611 and Article 12 of the New York State Navigation Law (NL). May 2009: Staff (J. Greco)met with ExxonMobil regarding the persistent delays in performing the planned investigation of a suspected historic tank farm on the property. The delays in the investigation are tied to delays in a planned demolition and rebuild of the service station. ExxonMobil will be preparing a revised investigation plan that will allow the needed work to be performed while the staion is still in operation. That plan is to be submitted in early July, 2009. 10/2009 Investigation work aimed at determining the continuing source of groundwater contamination is scheduled to begin during the week of November 9th. This work will include several borings in the vicinity of the current pump island in an effort to find a historic tank field. If the tanks are found, ExxonMobil will be required to temporarily shut down the gas station operation and remove the leaking tanks. 11/2009 Staff was notified that there are three man ways in the location where the tank investigation was to have been performed, and ExxonMobil's contractor has determined that this is clear evidence of the presence of underground storage tanks. Staff has communicated with ExxonMobil via email that there is an expectation that these tanks will need to be excavated and contaminated soils will need to be removed. ExxonMobil is to send a clear statement of their intentions by the end of November, 2009. OGC has been alerted to the matter and will put together an order for the site. 12/09 ExxonMobil has requested more time to determine their optinos for moving forward on the site. Staff responded to their request and let them know that a month extension was too long and a statement of their intentions was required by mid-December. ExxonMobil has not yet responded. OGC is still working on their consent order for the site. 1/10 OGC has forwarded a consent order to ExxonMobil to perform the removal of a dormant tank farm discovered in the late fall of 2009. The tank farm is thought to be the cause of persistent contamination detected in a monitoring well on the site boundary. No response from ExxonMobil has been received as yet. 3/10 OGC has forwarded a consent order to ExxonMobil to perform the removal of a dormant tank farm discovered in the late fall of 2009.

CON EDISON (Continued) **S104951194**

The tank farm is thought to be the cause of persistent contamination detected in a monitoring well on the site boundary. No response from ExxonMobil has been received as yet. (No change from 1/10) 3/10 4/10 ExxonMobil has offered to perform a limited investigation within the newly discovered dormant tank area beneath the pump island at this facility. Coupled with the investigation would be the expansion of the already-existing AS/SVE system into the area. In light of the slow progress on the consent order for this facility, staff plans upon approving this expansion as an interim action. 4/10 4/30/10 Staff sent comments on EM's proposal to expand AS/SVE system. Staff indicated this would be considered an interim step only, and that there was no committment from the NYSDEC that additional activities would not be required under the forthcoming Consent Order. 4/30/10 5/30/10 No formal response has been received as of this writing. 6/22/10 Staff approved a plan to investigate the former tank field, as well as to expand the existing SVE system at the site. The rationale for the expansion is that work within the tank area will cause the station to shut down for several days, and it is economically beneficial to perform the expansion now, rather than wait for test results. 7/27/10 ExxonMobil is finalizing details on upcoming tank investigation. Field work will be conducted during August, 2010. 8/30/10 ExxonMobil is having difficulty coordinating a station shut-down date with the operator of the facility (he does not wish to miss revenues from late summer/Labor Day). A meeting is planned with EM and the operator for early September to finalize a date for the tank investigation. A date for the planned work will be available after the meeting. 9/29/10 Exxonmobil was unable to meet with the station operator to finalize a date for the tank investigation in September and has rescheduled the meeting for October 6th. 10/26/10 Exxonmobil was able to meet with the station operator to discuss a date for the tank investigation. The investigation is tentatively planned for November, 2010. 11/30/10 ExxonMobil was unable to get the permit for excavating the tank area during Novemnber, they are now targeting mid-December to perform the work at the dormant tank area. 1/31/11 ExxonMobil was able to perform an investigation into the status of dormant tanks beneath the pump island at this site during mid-January, 2011. Verbal results indicated that 3 of 5 tanks had been properly decommissioned (i.e., closed in place and filled with a concrete slurry), while two other tanks were full of a water/gasoline mixture. The two tanks that had not been properly closed were to be pumped out, cleaned and filled with a slurry, but ExxonMobil has not confirmed this action as yet. No results have been received from the small scale soil boring program that was to accompany this investigation as yet. NYSDEC was alerted by letter on January 19, 2011 that this station had been sold to Bolla EM Realty, LLC., and that Bolla will be undertaking all remedial efforts in the future. 2/3/11 ExxonMobil clarified via email received 1/31/11 that the AS/SVE work that had been scheduled to occur along with the tank investigation was not performed. This work is to be carried out by Arcadis, however, no schedule has been provided at this point. 03/25/2011 Arcadis has proposed performing a step test on the existing AS/SVE system in hope of determining if the system can be optimized for better performance. If optimization cannot be done, they will evaluate adding new lines to the system, or possibly ceasing operation in lieu of other technologies (e.g., chemox injections). A work plan for optimization was submitted and approved in March. 9/29/11 ExxonMobil has requested to shut down the

CON EDISON (Continued) **S104951194**

AS/SVE system, as attempts at optimization did not lead to increased TVPH recovery. All monitoring wells have shown a marked reduction in BTEX concentrations in the past year, with the most contaminated well being at 127 ug/l BTEX (down from 25 mg/l in recent past). Agreed to temporary shut down of system, to be followed by monitoring of select wells for rebound. If wells do not show rebound in the next two quarters, the site would be considered for closure. JG 7/17/12 The consultant for the site owner is planning on requesting closure of the spill in August. Contaminant levels are much lower than in the past, but have showed some rebound from the September post, above. It remains to be seen whether closure is merited. 9/19/2012 Received Spill Closure Request and Exposure Asessment from consultant on September 10, 2012. Document adequately makes the case that No Further Action is needed at this time. Initial BTEX concentrations were as high as 60,000 ppm, but these have been reduced to levels that are much less than a part per million over a period of sampling events. Closeout letter sent on September 19, 2012. JG 9/19/12

Remarks: (2) LINES TESTED, PETROTITE TEST, FAILED WITH A LEAK RATE OF -.015GPH & GROSS LEAK, GASERVICES INC TO MAKE REPAIRS & RETEST, RETESTED ON 1/5/91 & PASSED PETRO TITE.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was GRECO This spill site has been transferred from DEC Sigona to Remedial Bureau B, on August 4, 2003. Spill site cleanup consolidated under spill No. 9007363. Reassigned from O'Dowd to Sigona on 10/27/00 DEC's comments regarding the proposed Site Optimization Work Plan (SOWP) for an existing Air Sparge & Soil Vapor Extraction System (AS/SVES) at ExxonMobil Service Station,1935 Coney Island Avenue, Brooklyn, N.Y. (The Site). The proposed SOWP was prepared by Groundwater & Environmental Services, Inc., dated December 18, 2002 to address the repair of a remediation system for on-site soil and groundwater contamination. The remediation of the soil and groundwater is required by the DEC pursuant to a Stipulation Agreement executed on September 19, 1997. The current AS/SVES has been shut down since December 2001 due to system malfunctions. The proposed SOWP and implementation schedule is acceptable to DEC, as a modification to Corrective Action Plan (CAP) pursuant to paragraph 6, of the Stipulation Agreement. However, the DEC has determined that the vertical and horizontal extent of petroleum contamination has not been adequately investigated and remediated pursuant to paragraph 2, of the Stipulation Agreement. Based on the results of the DEC's site visit on February 24, 2003, and evaluation of GES investigation reports submitted to the DEC, additional investigatory and remedial actions are required to comply with the Stipulation Agreement, 6 NYCRR Part 611 and Article 12 of the New York State Navigation Law (NL).

DEC Memo:	JMR Site inspection 11/20/95: Station is now operated as a Texaco as of approx 7/95. Owner is still Arista Auto Sales. GOC never notified DEC of transfer of property. Mixture of gasoline and water in fill for regular u/l UST. Steve Muller of ASR 212-809-1110 to forward copies of old reports. Albany assignment: rddecand 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Ketani) for review and closure - end 10/30/06 - Raphael Ketani. The site was a Gaseteria and then became a Texaco. According to the NYC Property Tax records, the present owners are 120 Kings Highway, LLC, 942 79 Street, Brooklyn, 11228-2614. According to Property Shark, the notices go to: 120 Kings Highway Realty, Ltd., 120 Kings Highway, Brooklyn, 11214-1510. The block and lot are: 06253/0029. The PBS registration is #2-480290 and all 10 tanks have been removed. There is no phone number for 120 Kings Highway in the phone book and the number on the PBS is out of service. I did manage to call up Roberto Porcele of Gaseteria at (718) 782-4200. However, he said Gaseteria just rented the property.

120 KINGS HIGHWAY (Continued) **S102672368**

He said he had searched for records for the property in the past, but he had nothing. I sent a CSL letter to 120 Kings Highway, LLC. 11/8/06 - Raphael Ketani. Today I received a letter with attachments from Spanakos and Spanakos, the attorneys for 120 Kings Highway, LLC. The letter included a copy of the 4/1/05 response letter to Ms. Mastroianni of DEC Div. of Environmental Enforcement, 625 Broadway, Albany, a copy of a $1000 check for penalties for failing to register the gas station, and a copy of the Order on Consent which instituted the penalties. The attorneys stated in their cover letter that they paid the $1000 penalty. I will send a letter to them explaining that the 10/30/06 letter from DEC is in regard to a different matter, the investigation of a gasoline release and its cleanup/remediation. I will add that they are still obligated to fulfill this requirement and are subject to additional penalties. 11/16/06 - Raphael Ketani. John Michael Spanakos called me to say that he found an old investigation report for the site that states no contamination was found. He said that the drilling company was D. K. Drilling and the report was signed off by Mr. Banner, P.E. He said that the report indicates groundwater was found at 21 feet and TD was at 27 feet. However, when I asked whether there were any laboratory analytical results, Mr. Spanakos said No. I told him I needed the analyticals showing that there was no contamination. Otherwise I would have no documentation to close the case. 11/20/06 - Raphael Ketani. Mr. Vassilios Georgiadis (718) 753-6862 called. He said he was a relative of the owners and wanted to resolve the open spill case matter. He said he had the analytical results for the site investigation that took place in November 1999. He FAXed me the analytical results. There were no hits for any of the 6 soil samples. I told him that based upon the analytical results, I am closing the spill case. He asked for a letter to this effect. I sent him one. 7/9/14 - Raphael Ketani. Shaminder Chawla (212) 442-3007, Deputy Director of the Mayor's Office of Environmental Remediation, sent me an e-mail stating that the site was going to be investigated environmentally prior to development. He wrote that he had a Phase II work plan in hand. I replied that the DEC would like this work plan and the name of the present owner. I also asked him to keep me abreast of the situation regarding whether contamination is found.

Site Description:	"Location: The Site is located in the Homecrest section of Brooklyn,

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

NY and is identified as Block 7184, Lot 26 on the New York City Tax Map and is addressed as 2586-2608 Coney Island Avenue and 97-107 Lancaster Avenue. The Site is approximately 20,145-square feet and is bound by Avenue W to the north, Lancaster Avenue to the south, and Coney Island Avenue to the east. Site Features: the Site is currently developed with a one-story commercial building (2590 Coney Island Avenue) occupied by Walgreens and Walgreens Pharmacy on the southern half of the lot and asphalt-paved areas throughout the remainder of the lot. Onsite operations consist of typical commercial retail and parking operations, and associated property maintenance. Site occupation is limited to staff and customer occupancy during scheduled commercial operating hours which are from 7 am to 12 am for the general store and 9 am to 9 pm for the pharmacy. The building is unused during non-operational hours, except for scheduled maintenance or repairs. Current Zoning/Use(s): The present zoning is 28C (commercial). The Site is bordered by a commercial retail operation, medical office operations, and residential tenants to the north across Avenue W; a gas station and residential tenants to the south across Lancaster Avenue; multiple commercial retail stores, medical offices, residential tenants, the NYC Police Department - 61st Precinct, and a Daycare to the east across Coney Island Avenue; and residential tenants to the west. An elementary and high school are located approximately 420 feet northwest of the Site and another Daycare is located approximately 460 feet north of the Site. No additional child daycare centers, hospitals, or schools are located within 500 feet of the Site. Historical Use(s): The site was formerly occupied by three businesses: the Flotteron Hardware Store in the southern portion of the Site; a lumber company with large storage areas in the center of the Site; and the Franklen Auto Garage with an adjacent storage area in the northern part of the Site. A 275-gallon heating oil above-ground storage tank (AST) was depicted on the western half of the Flotteron Hardware Store, a 550 gallon underground storage tank (UST) was present in the southeast corner of the lumber company and a 200 gallon waste oil UST was situated in the northwest corner of the Franklen Auto Garage. Site Geology and Hydrogeology: The site is about 14 feet above mean sea level. From the boring logs in the April 2012 RI Report prepared by Galli Engineering, the upper few feet of soil is reported to consist of medium brown clay which is underlain by fine brown sand. However, the September 2006 Limited Subsurface Investigation Report prepared by Bureau Veritas identifies the upper 4 feet of soil as silty sand, underlain by at least 8 feet of gravelly sand. Groundwater occurs under unconfined water table conditions, and ranges from 11 to 15 feet below grade. Groundwater locally flows from northeast to southwest across the site. The groundwater is part of the regional water table."

Env Problem: "Nature and Extent of Contamination: Soil - Soil was sampled for VOCs only. Petroleum odors and elevated PID readings were detected in soils at locations near the waste oil UST. Elevated concentrations of PCE (max. 5 ppm), TCE (0.11 ppm), and cis-DCE (max. 0.26 ppm) were detected in the central part of the former Franklen Auto Garage. Groundwater - VOCs in groundwater include benzene (max. concentration 16 ppb), toluene (41 ppb), ethylbenzene 21 ppb), total xylene (113 ppb), total trimethylbenzene (72 ppb), MTBE (1200 ppb), PCE (170 ppb), and TCE (9.7 ppb). Soil Vapor - Soil vapor results indicated low levels of petroleum and chlorinated VOCs with total concentrations of benzene, toluene, ethylbenzene and xylene (BTEX)

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

	ranging from 45.8 ug/m3 to 90.24 ug/m3. PCE was detected at concentrations ranging from 3.1 ug/m3 to 57.4 ug/m3. TCE was detected at concentrations ranging from 0.97 ug/m3 to 1.6 ug/m3. Carbon tetrachloride, cis-1,2-dichloroethene, 1,1-dichloroethene, 1,1,1-trichloroethene, and vinyl chloride were not identified above laboratory detection limits. Indoor air results indicated carbon tetrachloride at concentrations detected in the basement ranging from 0.811 ug/m3 to 1.47 ug/m3, and concentrations on the ground floor ranging from 0.585 ug/m3 to 0.654 ug/m3. Carbon tetrachloride was also detected in the ambient background sample at 0.541 ug/m3. Carbon tetrachloride was not detected in any of the soil, groundwater or soil vapor samples collected at the Site. Significant Threat: Evaluation of significant threat will be made following completion of additional investigation."
Health Problem:	"As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

DEC Memo:	Sangesland spoke to John Stanline of Clayton Group (environmental firm) Sangesland requested written confirmation that the spill was associated with a longterm groundwater problem and NOT a surface spill. Mr. Stanline forwarded a copy of the field notes which confirms the free phase contamination was found in a GW sample taken at the site. The water samples from this well were sent out for lab testing. Results of this testing will be forwarded to the potential purchaser for the site. If DEC would like to see these results, they will need to contact current owner (Gene Flotteron) directly at 917-880-0128. Another option for DEC Remediation would be to hold off taking any action on this site until the owner wants to move forward with the sale. By that time the various consultants should have completed their work and all the proper documents needed should be available to close out the case. 11/1/06 - Clayton Group did not submit any report for soil and/or GW sampling results. No evidence of a actual release that has impacted

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

the groundwater or soil.
Spill closed. - KST 06/24/08: Spill reopened due to contamination documented in Phase II, dated
9/7/06 but submitted on 06/16/08. Sent letter to perform investigation. MCT 11/12/10 - spill
re-assigned from Tibbe to Joe O'Connell 12/6/10 - sent email to presumed property owner to confirm
ownership and request historic reports/information (JOC) 11/3/11 - Raphael Ketani. I have restarted
spill case #0604377, Commercial Property at 2586 Coney Island Avenue, Brooklyn and have begun my
review of the e-docs. The spill occurred on 7/19/06 and was reported to the DEC on the same day.
The nature of the spill was the discovery of sheen on the groundwater during a due diligence
investigation. The site is block and lot 7184 and 26. According to ACRIS, there is a deed dated
6/22/07. It shows the seller as Eugene Flotteron, Jr. and the buyer as 2586-2608 Coney Island
Avenue, LLC, 5 Rosedale Avenue, Staten Island, NY, 10312. Property Shark lists the prime address as
2608 Coney Island Avenue with alternates as 2586 Coney Island, 2590 Coney Island, and 97-107
Lancaster Avenue. The site is a one story commercial building that occupies the entire eastern end
of the block and is bordered by Lancaster Avenue (south), Avenue W (north) and Coney Island Avenue
(east). I searched for PBS and Spill cases using all of the addresses, but the only one I found was
for the existing spill case (#0604377). According to Kim Flotteron, Esq. (732) 877-1500/cell (917)
601-4406, she, her uncle, Eugene Flotteron, Jr. and her aunt, Jane Killcullen, are the only owners
of the property. Correspondences are through Ms. Flotteron. As described in the 1/23/09 work plan,
the site used to contain an auto shop in the northern area with a 200 gal. waste oil UST and 4
lifts, a lumber yard in the central area with a 550 gal. gasoline UST and a 275 gal. #2 oil AST in
the basement, and a hardware store (owned by Eugene Flotteron) in the southeast area. From my
review of the documents in the e-docs, I have put together the following time line: 7/19/06 -
Clayton Group Services did a limited subsurface investigation and found that soil samples SB-1 and
SB-2 had exceedences 8/2006 - Clayton Group did a Phase I 9/7/06 - Clayton Group did a limited
subsurface investigation and found impacts from the hydraulic lifts, the former service operations
and the UST in the northwest corner 1/2008 - Eugene Flotteron and Unicorp National Development
enter into a lease agreement to build a Walgreens, B&A Demolition and Removal is hired to tear down
the building 2/2008 - Galli Engineering is hired and is told that the 550 gal. UST, the drums and
the AST were removed, Galli performs a remedial cleanup for the drums and the UST, Galli takes end

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

point samples and groundwater samples and digs three trenches in the northern part of the property
in order to determine whether the 200 gal. UST and the lifts had been removed - they find nothing
3/2008 - Galli submits a Remedial Closure Report and states that there is groundwater contamination
in the northern part of the property - 5700 ppb PCE at SS-2A, no organics in groundwater, basement
of lumber yard excavated, area of concern in north NOT excavated, excavated in area that had been
cleared of contamination 7/2008 - Galli makes a report to the DEC regarding the groundwater
contamination and the case is reopened, the DEC makes comments on the report 8/2008 - Galli submits
a response document to the DEC comments and also submits a RIWP 10/2008 - Galli submits the revised
(October 2008) RIWP 11/11/08 - Galli performs soil borings - PID readings 52.4 ppm at MW-1 (15-20
feet), 21.8 ppm at MW-2 (5-10 feet), no product 11/20/08 - Galli installs 3 wells 1/2009 - DEC
approves the October 2008 RIWP 5/2009 - Galli samples the groundwater wells 6/2009 - Galli submits
the RIR 1/2010 - Galli resubmits the RIR 3/17/10 - Galli e-mail to DEC - 2 wells found intact
8/24/10 - Galli e-mail to DEC - will resample wells and install new one 3/2011 - Galli replaces
MW-2 and repairs MW-1 and MW-3 5/2011 - all of the wells are developed and an attempt is made to
sample them 6/2011 - Galli successfully samples all of the wells on 6/6/11 and 6/16/11 - no product
is seen I reviewed the 7/18/11 Remedial Investigation Report for Activities in May 2011.
Groundwater samples were taken from the 3 wells during June 2011. MTBE was found in the groundwater
at MW-2 (448ppb) and at MW-3 (205ppb). PCE and TCE were found at MW-1 (43ppb and 9.73ppb). All of
the other VOCs were non-detect. 11/4/11 - Raphael Ketani. I spoke to Frank Gehrling (ger-ling) of
Galli Engineering (631) 271-9292/cell (516) 205-8438 regarding the site and the remediation
history. He said that there is a functioning Walgreens on site now. I asked him whether
contaminated soil was ever removed in the former car service area of the site. He said that it
wasn't. I told him that the DEC has determined that more soil borings are necessary in this area in
order to determine where the MTBE and the PCE are coming from. I told him that the DEC will require
a work plan specifying additional soil borings and a schedule for groundwater monitoring. I told
him that I will send these requirements in a letter to Ms. Flotteron and as an e-mail to him. He
said that sounded fine. I drafted a letter to Mr. Flotteron, c/o Ms. Flotteron in which the DEC
requests that a work plan be submitted for performing more soil borings in the northern part of the
site and a schedule of groundwater sampling. The letter was sent to

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

Hassan Hussein, Supervisor of
the Hazardous Materials Unit, for his approval. 11/7/11 - Raphael Ketani. Mr. Hussein approved the
letter and it was sent out today. 12/13/11 - Raphael Ketani. Ms. Flotteron called and asked whether
the consultants had sent the work plan for the site. I told her that I hadn't received it and that
it was due last friday (12/9/11). She said that she will contact them and get it to the DEC. Frank
Gehrling of Galli Engineering (631) 271-9292 sent me the Remedial Work Plan dated 12/9/11. I began
my review. 12/14/11 - Raphael Ketani. The plan proposes to install two additional wells. MW-5 in
the northeast corner, the planting area, and MW-4 in the southwest corner, the pedestrian entrance
apron of the parking lot. Six soil borings will be performed north, east and south of MW-1. Soil
samples and groundwater samples will be collected. I found the plan to be acceptable and I sent Mr.
Gehrling an e-mail stating so and asking that the work start as soon as possible. 1/3/12 - Raphael
Ketani. Ms. Flotteron left me a message requesting a letter stating that the 12/9/11 had been
approved. 1/4/12 - Raphael Ketani. I sent Ms. Flotteron the work plan approval letter. I set a
deadline of February 3, 2012 for submission of the SIR. 2/2/12 - Raphael Ketani. Mr. Galli of Galli
Engineering sent me an e-mail requesting the deadline for submitting the SIR be extended to March
13, 2012. I wrote back that the DEC had approved the extension. I also added Ms. Flotteron (732)
877-1500/cell (917) 601-4406 to the recipient list for this e-mail. 3/14/12 - Raphael Ketani. I
received the Long Island Analytical Lab 2/16/12 soil and groundwater report and began my review.
The samples were collected on 2/10/12. The samples were collected form borings SB-1,1A to SB-6,6A,
and MW-4, 4A, MW-5 and 5A. All of the soil and groundwater results were non-detect, except for the
following soil hits: SB-2: 26.1 ppb MTBE SB-6: 3340 ppb PCE, 146 ppb ethylbenzene, 921 ppb total
xylenes, 213 ppb n-propylbenzene, 166 ppb 2-chlorotoluene, 449 ppb 4-ethyltoluene, 103 ppb
4-chlorotoluene, 1000 ppb 1,3,5-trimethylbenzene, 998 ppb 1,2,4-trimethylbenzene, 3300 ppb
1,4-diethylbenzene, 1210 ppb naphthalene (total volatiles 11,846 ppb) SB-6A: 128 ppb TCE, 5060 ppb
PCE, 321 ppb ethylbenzene, 611 ppb total xylenes, 92 ppb isopropylbenzene, 394 ppb n-propylbenzene,
287 ppb 1,3,5-trimethylbenzene, 288 ppb 1,2,4-trimethylbenzene, 1500 ppb 1,2,4,5-trimethylbenzene
(total volatiles 8681 ppb) I compared the results for SB-6 and SB-6A to the restricted use
commercial soil cleanup standards in Part 375 which are in ppm. I used this standard as the site
was a former car service station and is presently a commercial site. 3/26/12 - Raphael Ketani. I

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

finished my review of the documents that had been sent by Mr. Gehrling (631) 271-9292. These documents included a 3/13/12 map showing the location of SB-6 and a letter dated 3/13/12 from Mr. Gehrling stating that the DEC approved work was ongoing. I drafted a letter for the review of Mr. Hussein stating that more exploratory borings needed to be performed in the vicinity of SB-6 and that the PCE and 1,3,5-trimethylbenzene contamination needed to be delineated, dug out and then end point samples taken. 3/28/12 - Raphael Ketani. The letter was approved by Mr. Hussein and was sent out to Ms. Flotteron. 3/30/12 - Raphael Ketani. Ms. Flotteron, Mr. Gehrling, Chuck Wittle (president of Unicorp - developer of the Walgreens) from Gehrling and myself had a conference call regarding the soil analytical results for SB-6 and SB-6A. Chuck pointed out that the Part 375 standards were in ppm and were much higher than the 5060 ppb of PCE (Part 375 commercial standard 150,000 ppb) and 128 ppb of TCE (Part 375 commercial standard 200,000 ppb) in the soil sample from SB-6A and the 3340 ppb of PCE in the soil sample from SB-6. I told everyone that I will have to review all of the data again. Chuck also said that the area had already been dug out. I asked him why there were chlorinated solvents hits if this area was supposed to be clean. He said that he wasn't sure. Both Chuck and Mr. Gehrling told me that they will send a closer report. 4/6/12 - Raphael Ketani. I tried to contact Ms. Flotteron (732) 877-1500/cell (917) 601-4406 regarding my review of the case file data. However, I could only leave a message that the soil results were fine for a commercial use site, but the groundwater results were too high and that something would need to be done about them. [7/18/11 Remedial Investigation Report for Activities in May 2011. Groundwater samples were taken from the 3 wells during June 2011. MTBE was found in the groundwater at MW-2 (448ppb) and at MW-3 (205ppb). PCE and TCE were found at MW-1 (43ppb and 9.73ppb). All of the other VOCs were non-detect.] Next, I spoke to Mr. Gehrling (631) 271-9292/cell (516) 205-8438. He said that another round of groundwater samples were taken a couple of weeks ago. The DEC will receive these results soon. 4/24/12 - Raphael Ketani. Today I received the Remedial Investigation Report dated April 19, 2012 from Galli Engineering. The soil data were the same as had been presented in the Long Island Analytical Lab report dated 2/16/12. However, Table 3 contained groundwater analytical data from the 3/22/12 sampling event. Elevated MTBE results were present for MW-1, MW-2, MW-4 and MW-5, but MW-2 was non-detect. At MW-1, PCE had dropped to 17 ppb and TCE had risen to 19 ppb. PCE was now showing up at very low concentrations at

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

MW-2 and MW-4. Aside from this, the soil boring locations were not indicated on the maps, the well locations weren't numbered except on the first site plan, the groundwater contours did not include measurements for MW-4 and MW-5, and each map was too busy (too much information) to easily view. From my review of the Report, it appeared that the PCE and TCE had their origin on site. The MTBE concentrations suggested that the contaminant maybe coming from upgradient, but this was not clear. I drafted a response letter for Mr. Hussein to review. The letter requested that the PCE and TCE contamination be dug up at SB-6 as it is affecting the groundwater, that additional groundwater monitoring wells be installed to further delineate the MTBE contamination, that all figures contain labels for the wells and be limited in detail to the basic property appearance (building location, parking area without parking spots indicated, no architectural or engineering or survey notations), and that all future work plans and reports be submitted either on CDs or as pdf files by e-mail. 4/30/12 - Raphael Ketani. Ms. Flotteron (732) 877-1500/cell (917) 601-4406 called regarding progress on reviewing the 4/19/12 Remedial Investigation Report. I told her that the DEC had reviewed the report and had put together a draft response letter. I explained to her that the letter we will require that the PCE and TCE contamination be dug up at SB-6 to remove the source of the groundwater contamination and that the MTBE contamination be further delineated. Ms. Flotteron stated that the source of the MTBE was the spill at the 61st Precinct across the street. I told her that I needed an exact address in order to check for any spills at the precinct and to see what progress was being made in resolving the spills. She said that she will get this information for me. I found the spill cases for the 61st Precinct site. They are #9501657 and #9708271. The first spill case involved a leaking gasoline UST. The second involved a leaking fuel oil UST. Alex Zhitomirsky of DEC Region 2 was the case manager. I spoke to him about his site. He showed me a report which was submitted this year. In the report, the consultants described tank and soil excavation, chemical treatment of the soil and soil vapor extraction using an SVE system. The report also contained the analytical results for an October 2011 groundwater sampling event. The results were entirely non-detect. So groundwater contamination was not flowing to the Walgreens site. Mr. Zhitomirsky told me that he is about to close both spill cases as the site has been remediated. The letter was approved by Mr. Hussein and was sent out. A deadline of June 1, 2012 was

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

set for submission of the additional work plan. 5/1/12 - Raphael Ketani. Chuck Wittle from UNICORP called. He was responding to the Department's letter dated 4/30/12 in which excavation was being requested for the location at SB-6 and the installation of more groundwater wells to delineate the MTBE contamination. Mr. Wittle explained that he didn't understand why the PCE contamination was present at SB-6. I told him that the site used to be a car service station and that someone must have cleaned some auto parts with something containing PCE. I told him that, in order to get rid of the PCE in the groundwater, he had to get rid of the PCE source at SB-6 - otherwise the groundwater contamination will never end. He asked why the DEC can't accept the commercial soil standards for the site for PCE and TCE (SB-6 had up to 5060 ppb of PCE - Part 375 commercial standard 150,000 ppb; and 128 ppb of TCE - Part 375 commercial standard 200,000 ppb). I responded that each site in New York State has to be cleaned up to pre-spill conditions - the CP-51 standards. Mr. Wittle said that he had already spent a tremendous amount of money and his funds were almost exhausted. I told him that this was not the Department's concern and that the additional work we are requesting is simply part of the effort that needs to be made to clean up a contaminated site. With this, the conversation ended. 5/29/12 - Raphael Ketani. Richard Galli (631) 271-9292 had left a message requesting a meeting between the owners of the property and the DEC. I asked him what the meeting would be about. He said to discuss the request by DEC to have off site wells installed and to dig up the parking lot around SB-6. I told Mr. Galli that the precinct to the north is not the site of the MTBE contamination that was found on site. I added that I had seen the latest groundwater monitoring report for this upgradient site and the results were clean. Mr. Galli said that there never was a gas station on site. I told him that there was a car service station at the site before there was a Walgreen. He asked how enough gasoline could have been spilled onto the site without there being a gas station. I told him that the spilling could have taken place a little at a time as the cars were serviced over many years. I added that even if this is not what happened, no one has proven that there is an off site source. A number of off site wells have to be installed to see whether a source exists uprgradient. Mr. Galli then suggested that the PCE and TCE at SB-6 be managed by injecting ORC, rather than tearing up the parking lot. I told him that the extent of the PCE and TCE contamination will have to be found. However, we had no problem with using chemical treatments to remediate the chlorinated solvents. I asked him for a

FORMER FRANKLEN AUTO GARAGE (Continued) **S108058662**

work plan and the conversation
ended. 7/11/12 - Raphael Ketani. A meeting took place today between one of the owners of the site,
the owner's consultants, the property developer for Walgreens and staff from the DEC (see the
attendance list in e-docs. Ms. Flotteron stated that a lot of money had been spent and that each
time they do some work, more work is required. They would like to see an end to the project. Staff
from the DEC pointed out that there was still PCE and MTBE contamination on site and that the
owners had been asked to delineate the contamination. Staff from DEC also stated that since there
is an on site source for the PCE, then this case has to be transferred from the oil spill group to
the brownfield/superfund group. This was explained more by Lou Oliva, Regional Attorney, and by
Jane O'Connell, Regional Hazardous Waste Engineer. The consultants asked more questions about how
the case would be managed once it is in the brownfield/superfund group. Ms. O'Connell responded to
their questions. Among the work items that would have to be performed are PCE contamination
delineation, determining whether the MTBE is from an on site source or off site and conducting a
soil vapor survey on site and off site. As a result of the presence of the on site PCE source, the
case is being transferred to the brownfield/superfund unit of Region 2 effective immediately. Ms.
O'Connell will determine who will be the case manager in her group for the site. 7/30/12: Close -

Updated By: DRGARDNE
Site Description: "Location: The 0.74-acre site is located at 2569 Shell Road in the Gravesend neighborhood of Brooklyn and is bounded to the south by a bowling alley, to the west by Shell Road followed by Metropolitan Transportation Authority s (MTA) Coney Island Maintenance & Overhaul Shop, to the north by a catering company, and to the east by residential properties. The site is located approximately 2,500 feet (half a mile) northeast of the headwaters of Coney Island Creek. Site Features: The site includes a building which is divided into three retail/commercial storefronts, as well as a warehouse at the northeastern corner of the building used by an adjacent business for food storage. The entire outdoor portion of the site footprint is covered with asphalt or concrete, except a small grassy area at the rear of the facility. Current Zoning and Land Use: The site is currently zoned M1-1 manufacturing with the OP Special Ocean Parkway District overlay. Current land use within the area is a mix of residential, commercial, and light industrial facilities. Past Use of the Site: Historic maps indicate earliest site improvements being the northern portion of the on-site building which was constructed sometime between 1930 and 1950. This building was utilized as a furniture manufacture and lacquer spraying facility in 1950. The building was occupied by a cellophane bag manufacturer and printing facility circa 1968. Beginning in 1976 the building was used for general manufacturing. The southern portion of the building was shown as newly construction in 1988 and occupied by the lighting manufacturer ATS Lighting Inc. ATS Lighting/Decor by Dene occupied both sections of the building until 2018, and the current dance studio began occupancy sometime between November 2019 and September 2020. Site Geology and Hydrogeology: The site is underlain by fill material and the upper glacial aquifer. The aquifer consists of Pleistocene glacial outwash deposits composed mostly of fine to coarse sand and gravel. Gardiners clay underlies the glacial units at an approximate depth of 40 to 120 feet below grade and is recognized as a confining unit. Groundwater was not encountered during the previous investigation, which went to a depth of 10 feet below grade. In general groundwater flow in the area is to the east and northeast, although the groundwater flow at the site may differ. Coney Island Creek s watershed drainage is dominated by shallow groundwater discharge, CSO and MS4 discharges, and overland flow."
Env Problem: "Nature and Extent of Contamination: In June 2021, soil samples were collected as part of an EPA Site Inspection (SI) evaluation of the D

DECOR BY DENE (Continued) **S130462530**

cor by Dene site. A total of 13 soil samples were collected from four on site boreholes which were advanced to a depth of 10 feet below grade. Groundwater was not encountered, therefore samples could not be collected and analyzed. Site Characterization will be performed at the site in the future to further investigate contamination. Soil The semi-volatile organic compounds (SVOCs) acenaphthene and di-n-butylphthalate were detected by EPA in surface samples, up to 0.21 parts per million (ppm) and 0.75 ppm, respectively. The pesticides 4,4 DDD and 4,4 DDT were detected by EPA in surface soil samples at 0.0056 ppm and 0.012 ppm, respectively. The metals antimony and mercury were detected by EPA in surface soil samples up to 55 ppm and 2.2 ppm, respectively. "

Health Problem:	"As information for this site becomes available, it will be reviewed by the NYSDOH to determine if site contamination presents public health exposure concerns."

DEC Memo:	DEC Piper spoke with caller. Soil contamination based on soil samples. Site is a gas station and the tanks and pumps are being removed for a sale of the property. -removed the four existing gasoline USTs (registered under PBS 2-205842) and have been collecting soil samples per DER-10. -One of the dispenser samples exceeded CP-51 criteria for select VOCs, leading to Spill #20-08080 being opened for an historic release. No sign of product or oil has been seen in any of the excavations as yet. -The Site has an E-Designation and we will be performing a Phase II investigation which will be reported to OER for development approvals at a later date. 7/18/22-Lin-Approximately 560 tons of contaminated soil were removed from the former remote fill port source area to extent practicable (sloped excavation to 18' bgs). Three (3) supplemental soil borings were advanced and six (6) temporary wells were installed to further delineate the spill. One (1) recovery well (RW-1) were installed to 37' bgs within the center of the source area. A

AMOCO (Continued) **S102232665**

series of eight (6) dual phase extraction events were implemented to remove petroleum impacted
groundwater and soil vapor. Persulfox was injected into the subsurface through 37 temporary
injections points and PetroFix was injected through 61 temporary injection points. The downgradient
well (TW-2) was monitored to determine the effectiveness of the remediation. The groundwater data
from the site has demonstrated decreasing trends where total VOCs are are below or just above 1,000
ug/l. No free product was ever encountered in any of the wells. The engineering controls at the
site includes the installation of a 20 mil vapor barrier and an active SSDS below the building.
Case closed. OER 21TMP0279K

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database
This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Elevation:	22 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14105972 CONEY ISLAND, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

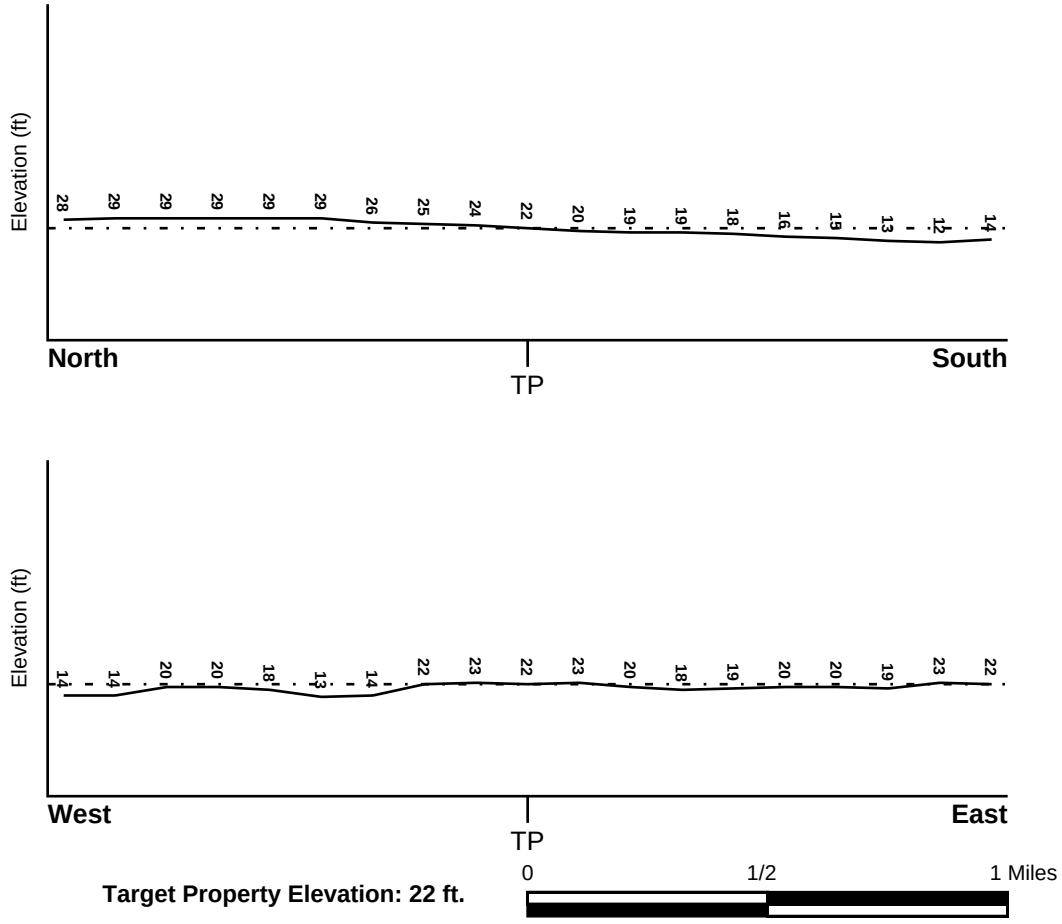

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
3604970351F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

3604970354F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CONEY ISLAND	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

System:	Quaternary
Series:	Pleistocene
Code:	Qp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Basement	1.370 pCi/L	88%	10%	2%

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

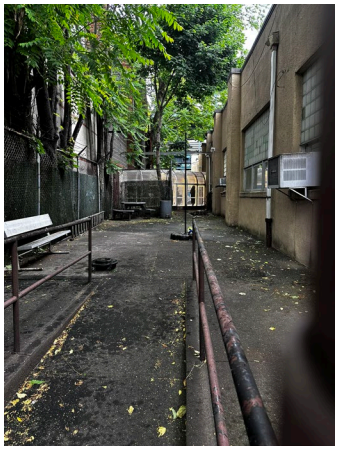

Photo 15: View of courtyard between Lots 39 and 42, facing west.

APPENDIX E
User Responsibility Questionnaire

Attachment II

User Responsibilities Questionnaire
All Appropriate Inquiries Under ASTM E1527-21

Date: June 5, 2025
Subject Property Name: 2074-2080 McDonald Avenue
Address: 2074-2080 McDonald Avenue, Brooklyn, New York
Prepared By: Volvy Landau

In order to qualify for one of the Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct "All Appropriate Inquiry" (AAI), which includes consideration of the following information (if available). Though it is not required that this information be provided to the environmental professional for the completion of the ASTM E1527-21 Phase I Environmental Site Assessment, failure of the user to consider this information could result in a determination that AAI is not complete.

(1.) **Environmental cleanup liens that are filed or recorded against the subject property (40 CFR 312.25).**
Are you aware of any environmental cleanup laws against the subject property that are filed or recorded under federal, tribal, state, or local law? If yes, give a description and attach copies of the liens.

No.

(2.) **Activity and land use limitations that are in place on the subject property or that have been filed or recorded in a registry (40 CFR 312.26).**
Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property or have been filed or recorded in a registry under federal, tribal, state, or local law?

No.

(3.) **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**
As the user of this Phase I Environmental Site Assessment do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No.

(4.) **Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29).**
Does the purchase price being paid for this subject property reasonably reflect the market value of the subject property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

No.

(5.) **Commonly known or reasonably ascertainable information about the subject property (40 CFR 312.30).** Are you aware of commonly known, or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the subject property*?*

No.

(b.) Do you know the specific chemicals that are present or once were present at the subject property?

No.

(c.) Do you know of spills or other chemical releases that have taken place at the subject property?

No.

(d.) Do you know of any environmental cleanups that have taken place at the subject property?

No.

(6.) **The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).** As the user of this Phase I Environmental Site Assessment, based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?
