Brooklyn, New York 11221

Attention: Mr. Joe Lowy

Subject: ASTM Phase I Environmental Site Assessment
667 Kent Avenue/25 Hooper Street
Brooklyn, New York 11249

Dear Mr. Joe Lowy:

The enclosed report presents the results of a Phase I Environmental Site Assessment (Phase I) conducted at the above-referenced property, located at 667 Kent Avenue/25 Hooper Street in Brooklyn, New York (herein referred to as the "subject property"). This work was performed by H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York), in accordance with our proposal to Kent Ave Property LLC dated 14 May 2024 ("Agreement") as authorized on 15 May 2024. This Phase I was conducted in conformance with the scope and limitations of the ASTM International (ASTM) E 1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process as referenced in 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule).

The objective of a Phase I is to assess whether known and suspect "recognized environmental conditions" (REC), historical RECs (HREC) or controlled RECs (CREC) is associated with the subject property, as defined in the ASTM E 1527-21 Standard.

Thank you for the opportunity to perform these services for you. Please do not hesitate to contact us if you have any questions or comments.

Sincerely yours,
H & A OF NEW YORK ENGINEERING AND GEOLOGY, LLP

Elizabeth R. Scheuerman
Project Manager

James M. Bellew
Principal

\\haleyaldrich.com\share\CF\Projects\0211142\Deliverables\1. Phase I ESA\2024-0820 667 Kent Ave_25 Hooper St - ASTM Phase I ESA_D.docx

Executive Summary

H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) has performed a Phase I Environmental Site Assessment (Phase I) of the 667 Kent Avenue/25 Hooper Street property in Brooklyn, New York (herein referred to as the "subject property"). The scope of work is described and conditioned by our proposal dated 14 May 2024. This Phase I was performed for Kent Ave Property, LLC who seeks to redevelop the property. This Phase I was performed in conformance with the scope and limitations of the ASTM International (ASTM) E 1527-21 Standard and Rule[1].

SUBJECT PROPERTY DESCRIPTION

The subject property, defined as Block 2197, Lots 3 and 15on the New York City Tax Map, occupies a total area of about 55,478 square feet (sq ft) and is located within the Williamsburg neighborhood of Brooklyn, New York, a M1-2/R6 residential district characterized by residential, commercial, and light industrial use properties. The subject property on Lot 3 and Lot 15 is operated by NAP Industries Inc. (NAP Industries), a light manufacturing facility for commercial printing and unlaminated plastic bag and pouch production consisting of two buildings totaling 55,478 sq ft.

The subject property is bound to the northwest by Keap Street, followed by multi-story residential buildings; to the northeast by a multi-story religious facility and a multi-story office building; to the southeast by a synagogue, followed by Hooper Street; and, to the southwest by Kent Avenue.

Based on our understanding at this time, the subject property is under a rezoning effort to transition to construct a new mixed-use building for commercial and residential.

OBJECTIVE

The objective of a Phase I is to assess whether "" (REC), (HREC), and controlled RECs (CREC) are associated with the subject property. Our conclusions are intended to help the User evaluate the "" associated with the subject property. Our opinion regarding a REC's potential impact on the subject property is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, our experience evaluating similar sites, and on our understanding of the client's intention to redevelop the site for residential use.

RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-21 Standard defines a REC in part as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a of a future release to the environment."

The following RECs were identified in connection with the subject property:

[1] American Society for Testing and Materials (ASTM) E 1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process as referenced in 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule) ("ASTM E 1527-21 Standard"). Specified terms as are used in ASTM E 1527-21 are highlighted in blue in this report and defined in the Glossary at the end of the report text.

REC #1: Known Contamination at Subject Property

Soil and groundwater contamination were identified at the subject property in 2009 during an investigation conducted by ARCADIS on behalf of National Grid, the former owner of the gas holder station. This investigation was required under an Administrative Order on Consent with New York State Department of Environmental Conservation (NYSDEC) to investigate soil and groundwater relative to the former gasification system. Groundwater results identified concentrations of benzene, a Manufactured Gas Plant (MGP)-related constituent; 2-ethylhexl, plasticizer; and, metals above Ambient Water Quality Standards (AWQS). Polycyclic aromatic hydrocarbons (PAHs) and metals were identified in soil samples at concentrations above Unrestricted Use Soil Cleanup Objectives (UUSCOs); and, free cyanide was present, but at concentrations below the UUSCO. Previous reports indicate black staining and odors observed in soils 15 to 20 feet (ft) below ground surface (bgs) in the former gas holder area. One chlorinated volatile organic compound (CVOC), tetrachloroethene, was detected in three soil samples analyzed during a 2022 partial investigation of the subject property.

Due to the presence of known contamination in soi and groundwater at the subject site and pending remedial action, this is considered a REC.

REC #2: Former Use of Subject Property as Manufactured Gas Plant

The northern portion of the subject property was occupied by a MGP Site with a gas holder from the late 1800s through the mid-1930s. Initial gas plant operations were performed under Nassau Gas Works, then later transitioned to Brooklyn Union Gas Co. MGP operations ceased sometime between 1935 and 1947. The gas manufacturing process involved the heating of coal and/or petroleum products to produce a gas mixture. By-products of the manufactured gas process include coal tar, volatile organic compounds (VOCs) and semi-volatile organic compound (SVOCs), which were identified in soil and/or groundwater during previous investigations conducted at the Site, indicative of a potential former release.

REC #3: Violations Associated With The Handling Of Hazardous Materials At Subject Property

The subject property is identified in the Resource Conservation Recovery Act (RCRA) database as a 'Significant Noncomplier' and has high priority air violations that have yet to return to compliance. Open violations are related to the handling and disposal of hazardous waste and pollutant air emissions. Due to industrial manufacturing operations at the subject property and the handling/transport/disposal of hazardous materials, coupled with the out of compliance status since 2010, this is considered a REC.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-21 Standard defines a CREC as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

CRECs were not identified in connection with the subject property.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-21 Standard defines an HREC as an environmental condition "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

HRECs were not identified in connection with the subject property.

DE MINIMIS CONDITIONS

The ASTM E 1527-21 Standard defines *de minimis* conditions as those conditions which "do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." The ASTM E 1527-21 Standard notes that "conditions determined to be *de minimis* are not recognized environmental conditions."

De minimis staining was observed on the concrete floor in the garage area located on the southern portion of Lot 15.

OTHER FINDINGS

The term "other finding" is not defined by ASTM; however, Haley & Aldrich uses the term to indicate areas of contingent risk that are not clearly defined by the ASTM Standard. Other findings were not identified at the subject property.

SUMMARY AND RECOMMENDATIONS

In summary, three RECs were identified in connection with the subject property during this Phase I.

The remainder of this report contains additional information regarding the Phase I, the resulting findings summarized above, and limitations affecting this report.

Continued Viability of Environmental Site Assessment

In accordance with the ASTM E1527-21 Standard, the following components of the Phase I Report must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction:

- Interviews with owners, operators, and occupants. Completed on: 29 May 2024
- Searches for recorded environmental cleanup liens (a user responsibility). Completed on: 16 May 2024
- Reviews of federal, tribal, state, and local government records. Completed on: 16 May 2024
- Visual inspections of the subject property and of adjoining properties. Completed on: 29 May 2024
- The declaration by the Environmental Professional responsible for the assessment or update (refer to Section 9). Completed in August 2024

1. Introduction

H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) has performed a Phase I Environmental Site Assessment (Phase I) of the 667 Kent Avenue/25 Hooper Street property located in the Williamsburg neighborhood of Brooklyn, New York (herein referred to as the "subject property"). The scope of work is described and conditioned by our proposal dated 14 May 2024. This Phase I was prepared for Kent Ave Property LLC. Based on our understanding at this time, the subject property is under a rezoning effort to transition to construct a new mixed-use building for commercial and residential.

1.1 OBJECTIVE

The objective of a Phase I is to assess whether "recognized environmental conditions (, , and are associated with the subject property by evaluating site history, interviews, existing observable conditions, current site use, and current and former uses of adjoining properties as well as potential releases at surrounding properties that may impact the subject property. Our conclusions are intended to help the User evaluate the "" associated with the subject property.

RECs are defined in the ASTM E 1527-21 Standard as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or under conditions that pose a of a future release to the environment." The definitions of RECs, HRECs, and CRECs are included in the Glossary section of this report.

1.2 SCOPE OF SERVICES

This work was performed by Haley & Aldrich of New York and this Phase I was performed in conformance with the scope and limitations of the ASTM E 1527-21 Standard and All Rule[2] and in accordance with our proposal to Kent Ave Property LLC dated 14 May 2024 ("Agreement") as authorized on 15 May 2024. The Phase I limitations and Agreement are attached hereto as Appendix A.

As part of this Phase I, Haley & Aldrich of New York conducted visual observations of site conditions and of abutting property use (site reconnaissance); reviewed federal, state, tribal, and local environmental database information, federal and state environmental files, previous reports (if identified and provided), and historical site use records; and formulated conclusions regarding the potential presence and impact of RECs.

1.3 NON-SCOPE CONSIDERATIONS

The ASTM E1527-21 Standard includes the following list of “additional issues” that are non-scope considerations outside of the scope of the ASTM Phase I practice: asbestos-containing materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality related to release of hazardous substances or petroleum products into the

[2] American Society for Testing and Materials (ASTM) E 1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process as referenced in 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule) (“ASTM E 1527-21 Standard”). Specified terms as are used in ASTM E 1527-21 are highlighted in blue in this report and defined in the Glossary at the end of the report text.

environment, industrial hygiene, lead-based paint unrelated to releases into the environment, lead in drinking water, mold or microbial growth conditions, polychlorinated biphenyl (PCB)-containing materials, naturally-occurring radon, regulatory compliance, substances not defined as hazardous substances (emerging compounds), and wetlands. These items were not included in this Phase I of the subject property.

Note that PCBs may be present in miscellaneous building materials, such as caulking, sealants, insulation and sound dampening materials, paint, gaskets, roofing and siding materials, waterproofing compounds, enamel coatings, and other chemical products manufactured prior to 1979. Evaluating the subject property building for potential PCB-containing building materials and possible PCB-containing materials other than "electrical or hydraulic equipment known or likely to contain PCBs" was outside the scope of this Phase I.

1.4 LIMITING CONDITIONS/DEVIATIONS

Haley & Aldrich of New York completed this Phase I in substantial conformance with the ASTM E1527-21 Standard. In our opinion, no additions were made to, or deviations or deletions made from, the ASTM work scope in completing this Phase I.

1.5 USER RESPONSIBILITIES

The completion of this Phase I is only one component of the process required to satisfy the AAI Rule. In addition, the user must adhere to a set of user responsibilities as defined by the ASTM E1527-21 Standard and the AAI Rule. User responsibilities are discussed in Section 6.6 of this report. A user seeking protection from Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability as an innocent landowner, bona fide prospective purchaser, or contiguous property owner must complete all components of the AAI process in addition to meeting ongoing obligations. AAI components, CERCLA liability relief, and ongoing obligations are discussed in the AAI Rule and in Appendix X1 of the ASTM E1527-21 Standard.

2. Site Description

A description of the subject property is detailed in the sections below. Refer to Figure 1 for a project locus and Figure 2 for a site plan showing relevant site features and adjacent properties.

2.1 SITE OWNERSHIP, LOCATION, AND VICINITY DESCRIPTION

Site Description		
Owner	Kent Ave Property LLC	
Operator/Occupant	NAP Industries	
Size	The subject property is 55,478 square feet (sq ft) total. Lot 15 is 22,741 sq ft; Lot 3 is 32,737 sq ft.	
Building Square Footage	The subject property is improved by two adjoining industrial buildings, occupying a total of 55,478 sq ft.	
USGS 7.5 Minute Topographic Map	Brooklyn, 2019	
Site County	Kings	
Zoning	The subject property is located in a M1-2 manufacturing zoning district in which residences are permitted.	
Parcel Information	Block 2197, Lot 3 and Lot 15	
Utilities	Water:	City of New York
	Sewerage:	New York City Department of Environmental Protection
	Electricity:	Consolidated Edison
	Gas/Oil/LPG:	National Grid
Heating/Cooling System	Natural gas-fired heating units	

Site Vicinity Description		
General Area Description	The subject property is located in the Williamsburg neighborhood of Brooklyn, New York. Adjoining parcels are used for residential, religious, commercial, and industrial purposes, with the surrounding area generally consisting of residential, commercial, and light industrial use.	
Adjoining Property Description	Northeast	A multi-story religious office building and Wythe Ave
	Northwest	Keap Street, followed by multi-story residential buildings
	Southeast	A multi-story public religious facility and a multi-story office building followed by Hooper Street. FDNY occupies the lot directly across the garage of Lot 15 on Hooper St.
	Southwest	Kent Avenue followed by a warehouse/shipping logistics facility.

2.2 PHYSICAL SETTING

Subsurface explorations and/or hydrogeologic investigations were not performed for this Phase I. Subject property geology and hydrology were evaluated on the basis of readily available public information or references and/or based upon our experience and understanding of subsurface conditions in the vicinity of the subject property. It is unknown to what extent localized variations in groundwater depth and flow occur on the subject property.

Physical Setting		Source
Topography Summary	The subject property is generally flat with a gentle slope to the southwest, towards Kent Avenue	1,3
Subject Property Elevation (El.)	Approximately 16-21 feet (ft) above mean sea level	1
Urban Land	Soil is described as Urban Land, which refers to soils that have been altered by human activities, thus making them unidentifiable. Typically, these soils have been mixed with other materials, such as brick and concrete (urban fill), and characteristics can only be determined by the on-site investigation.	2
Bedrock Formation	Bedrock underlying the subject property is part of the Raritan Formation, which consists of Cretaceous aged coastal plains deposits.	4
Depth to Bedrock	Greater than 100 ft below ground surface (bgs)	2,4
Depth to Groundwater	Approximately 14 ft bgs	2
Surface Water Flow Direction	Surface water appears to flow to the southwest based on observed surface topography.	2
Regional Groundwater Flow Direction	Regional groundwater flows to the southwest towards the Navy Yard Basin.	1
Nearest Surface Water Body	The Wallabout Channel is located approximately 1,300 ft northwest of the subject property.	1, 5

3. Previous Reports

To date, the following investigation/remediation reports have been prepared for the subject property. A summary of pertinent information from each report is provided below:

- **Site Characterization Oversight, 46 Keap Street (Langan, December 2009)**
  - Langan conducted oversight during an ARCADIS investigation that was conducted on behalf of National Grid in July 2009. National Grid, the former owner of the gas holder station, was required under an Administrative Order on Consent with New York State Department of Environmental Conservation (NYSDEC) to investigate soil and groundwater relative to the former gasification system. A portion of this investigation was conducted off-site of the subject property at 46 Keap Street (Lot 3).
  - Arcadis installed three soil borings, SB-5 through SB-7, within the interior of the building on Lot 15 and converted SB-6 into a temporary well point. Additionally, four borings, MW-1 through MW-4, were installed within offsite exterior sidewalk areas and converted into monitoring wells. The soil borings were advanced to 45 ft bgs.
  - A total of 10 soil samples were submitted for analysis. Seven of the soil samples were collected between 0 to 5 ft bgs. Three of the soil samples were collected from 15 to 25 ft bgs. The soil samples were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and cyanide.
  - Soil analytical results reported concentrations of SVOCs, specifically polycyclic aromatic hydrocarbons (PAHs), and barium and lead above applicable standards in the soil samples collected between 0 to 5 ft bgs. Analytical results also reported detections of benzene, naphthalene, and cyanide in soil, but not above applicable standards.
  - Groundwater was reportedly encountered at approximately 12 to 13 ft bgs.
  - Groundwater samples were analyzed for VOCs, SVOCs, Priority Pollutant List (PPL) metals, and cyanide. Manufactured Gas Plant (MGP)-related constituents, including benzene and ethanol, exceeded the Ambient Water Quality Standards (AWQS) in the groundwater sample collected 16 ft bgs in the former gas holder area SVOC bis(2-ethylhextyl)phthalate exceeded NYSDEC AWQS in the groundwater sample collected from the onsite temporary well point TMW-6.
  - Langan stated that based on the limited focus of the site investigation on the former gas holder location, conclusions regarding overall on-site impacts could not be presented.
- **Phase I Environmental Site Assessment, 667 Kent Avenue and 46 Keap Street (Global Realty Services Group, March 2022)**
  - Global Realty Services Group (GRS Group) performed a Phase I Environmental Site Assessment (ESA) for the subject property in 2022. GRS Group identified one REC based on long term industrial use at the subject property, partially performed prior to the promulgation of regulations regarding hazardous waste storage and disposal and tank maintenance and removal, as well as more recent industrial operations and violations associated with hazardous waste.

- **Phase II Environmental Assessment Limited Subsurface Investigation, 667 Kent Avenue and 46 Keap Street (GRS Group, 2022)**
  - GRS Group performed this limited subsurface investigation to screen for potential impacts to soil from identified areas of concern in order to evaluate the related likelihood of a significant release of chemicals of concern.
  - GRS Group installed four soil borings as part of the investigation. Two soil borings, SB-1 and SB-2, were located on the subject property. Two soil borings, SB-3 and SB-4, were located in the sidewalk offsite.
  - Analytical results reported mercury and acetone above Part 375 Protection of Groundwater Soil Cleanup Objectives (PGWSCOs) but below the commercial use soil cleanup objectives (CUSCOs) for acetone and mercury.
  - Based on the lack of usable groundwater in the New York City area, lack of groundwater detected in the soil borings, and lack of impact at greater depths for the mercury detected, GRS Group concluded that no further investigation was warranted for the RECs identified in the ESA.

Copies of the environmental reports summarized below are provided in Appendix B.

4. Subject Property History

Haley & Aldrich of New York assessed past usage of the subject property and adjoining properties through a review of:

- Sanborn Fire Insurance Maps dated 1887, 1904, 1918, 1922, 1928, 1935, 1947, 1950, 1965, 1977, 1979, 1980, 1981, 1982, 1984, 1986, 1987, 1989, 1991, 1992, 1993, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006, and 2007.
- Aerial Photographs dated 1924, 1943, 1951, 1954, 1961, 1966, 1974, 1976, 1980, 1984, 1991, 1994, 2006, 2011, 2015, and 2019.
- Topographic Maps dated 1897, 1898, 1900, 1947, 1956, 1967, 1979, 1995, 2013, 2016, and 2019.City Directories dated1928, 1934, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980, 1985, 1992, 1995, 1997, 2000, 2005, 2010, 2014, 2017, 2020
- Municipal records including certificates of occupancy as described in Section 5.2.

Copies of information obtained from historical references reviewed are included in Appendix C. Unless otherwise noted below, per the ASTM standard, sources were reviewed dating back to the late 1800s or first developed use, whichever is earlier, and at 5-year intervals, if the use of the property changed within the time period.

4.1 SUBJECT PROPERTY

The northern portion of the subject property was occupied by a MGP Site with a gas holder from the late 1800s through the mid-1930s. Initial gas plant operations were performed under Nassau Gas Works, then later transitioned to Brooklyn Union Gas Co. by the early 1900s. The southern portion of the subject property was occupied by a chrome steel works facility in the late 1800s, consisting of a foundry, rolling mill and gas producers. Chrome steel operations ceased by the late 1910s, and the southern portion of the subject property was taken over by Bramhall Deane Co., a heavy cooking appliances manufacturer and copper smelter, which maintained ownership through the mid-1930s. The 1918 Sanborn Map identifies a UST along Keap Street during Bramhall Deane Co. operations. By the mid-1930s, Eastern Can Co. Inc., a metal can manufacturing facility, occupied the southern portion of the subject property. Eastern Can Co. Inc. took over site-wide operations sometime between 1935 and 1947, at which time former gas plant operations in the northern portion of the property ceased and the area with the former gas holder was redeveloped with the existing one-story structure with a mezzanine and utilized for metal can manufacturing in conjunction with the remainder of the subject property. Metal can manufacturing operations continued through the mid-1960's or later, at which time subject property operations are no longer identifiable on historic sources until the late 1970s. City Directories generated by Electronic Data Resources Inc. (EDR) indicate NAP Industries, a plastic label and bag manufacturing facility, as the subject property occupant beginning in 1976. No significant changes to subject property features or use are noted since 1976 and the subject property continues to operate as a plastic label and bag manufacturing facility under NAP Industries.

The table below provides a detailed summary of pertinent information from the historical sources reviewed:

Dates	Description of Subject Property	Sources
Late 1880s to Early 1910s	The subject property is identified as operated by Nassau Gas Light Co., and by 1904 as Brooklyn Union Gas Co. Nassau Branch. Lot 3 contained a chrome steel works, foundry, rolling mill, and gas producers. Lot 15 contained a gasholder. The eastern portion of Lot 15 which abuts Hooper Street was identified as a wagon house; by 1904, it was identified as a pickling room.	Sanborn Maps,
Late-1910s to mid-1930s	The subject property is identified as being operated by Bramhall Deane Co., manufacturing of heavy cooking appliances, and Brooklyn Union Gas Co. Nassau Branch. Lot 3 contained the operations of Bramhall Deane Co. which included a gasoline tank on the northern portion near Keap Street and copper smelting on the western portion near Kent Avenue. Lot 15 contained the gasholder of the Brooklyn Union Gas Co. Nassau Branch. The eastern portion of Lot 15 which abuts Hooper Street was identified to be a portion of a fur dressing facility.	Sanborn Maps, Aerial Photographs
Mid-1930s to 1950s	By 1935, the gasholder was reportedly no longer operational and began to be demolished. The subject property was identified as being operated by Bramhall Deane Co. and Eastern Can Co. Inc. By the 1940s, Bramhall Deane Co. was no longer identified at the subject property and the entire subject property was identified as operated by Eastern Can Co. Inc. The eastern portion of Lot 3 contained the operations of Bramhall Deane Co. until the 1940s. Lot 3 was identified to contain a machine shop and a shipping area with a mezzanine level. A boiler room, sprinkler, and water heater were identified in the central portion of Lot 3 near Keap Street. The gasoline tank was no longer identified as of 1947. Lot 15 was identified to contain a machine shop included a raised floor area and a mezzanine area.	Sanborn Maps, Aerial Photographs, Municipal Records
1960s	By 1965, the subject property was no longer identified as Eastern Can Co. Inc., however it continued to be identified to contain a factory, storage, and office space for metal can manufacturing.	Sanborn Maps, Aerial Photographs, Municipal Records
1970s to Present	In 1976, the subject property began to be operated by NAP Industries, a plastic printing and products manufacturer. NAP Industries continues to operate the subject property.	Sanborn Maps, Aerial Photographs, City Directories, Municipal Records

4.2 ADJOINING PROPERTIES

The table below provides a summary of pertinent information from the historical sources reviewed regarding adjacent properties:

Dates	Description of Adjacent Properties	Sources
Late 1880s - early 1930s	Northeast: The 1887 Sanborn Map depicts Appleton Mission, multiple three-story dwellings, and "Livery and Boarding" all facing Wythe Avenue. By 1904 the dwellings are mostly converted to stores, and the "Livery and Boarding" is depicted as "JF Scholes Trucking" with carriage house and feed storage. This "JF Scholes Trucking" facility is identified as "Atlas China Co" by 1935. Northwest: Storefronts including Davidson Steam Pump Co., lumber, and a pattern and storage shop in 1887. Between 1918 and 1935 this area served as a foundry, M.T. Davidson Pump Works, a disinfectant shop, Cheesman & Elliott Paint Works, and auto shop garage. Southeast: Metropolitan Mirror Works, a ventilator, office space, and coal shed between 1904 and 1935 followed by Hooper Street. Lot 33 is identified as a Stone Yard in the late 1880's and later in the 1930's as an oil storage lot. Southwest: H.F. Burroughs & Co. Brick Yard in 1908 later identified as Crater Fuel Corp in 1935.	Sanborn Maps
Late 1930s-mid-1960s	Northeast: Between 1947 and 1960, the individual dwellings and storefronts merged to form a single MFG. Northwest: The Sanborn map of 1950 depicts the location of "M.T. Davidson Pump Works" as "Polar Fur Dyeing Corp. The "Cheesman Elliot Paint Factory" remains in operation on the corner of Keap and Kent Avenue. Southeast: By 1965, the "Metropolitan Mirror Works" appears to no longer be in operation and is replaced by storage. Across from the garage on Hooper Street, FDNY Engine Co 211, 231, & 119 is depicted in the previously vacant Block 2203 Lot 16. Southwest: Kent Avenue followed by Economy Hy-Heat Coal Co Inc. The Sanborn map of 1947 indicates the U.S. Navy began operation of the area.	Sanborn Maps, Aerial Photographs
Late 1960s-Present	Northeast: The MFG remains unchanged in Sanborn maps until the most recent map in 2007. From 2001-2007, the unit on the corner of Wythe and Keap (52-62 Keap Street) is depicted as a preschool. Northwest: The 1982 Sanborn Map depicts the conversion of the entire lot beyond Keap Street into multiple triplexes. These remain unchanged until the most recent 2007 Sanborn Map and aerial photographs of 2019. Southeast: Lots 1 & 33 are listed as storage/vacant until the most recent 2007 Sanborn map. The Fire Department Engine Company 211 still occupies the lot directly across Hooper Street from Lot 15's garage. Southwest: Beyond Kent Ave, the lot owned by the U.S. Navy is depicted as "Labor Industry Corp. of Kings" in Sanborn maps from 1977. In 1986, the lot is depicted as "Brinks Inc (Iron)."	Sanborn Maps, Aerial Photographs, Municipal Records

5. Environmental Records Review

5.1 ENVIRONMENTAL DATABASE RECORDS SEARCH

Haley & Aldrich of New York used the electronic database service Environmental Data Resources (EDR) to complete the environmental records review. The database search was used to identify properties that may be listed in the referenced agency records, located within the ASTM-specified approximate minimum search distances as shown in the table below. A description of each database searched is in provided in Appendix D. The complete environmental database report is provided in Appendix D. Pertinent information obtained from the database is summarized in Section 5.3 below.

Database Searched	Approximate Minimum Search Distance	Subject Property Listed?	Number of Sites within Search Distance[1]
1. NPL Sites	1 mile	No	0
2. Delisted NPL Sites	0.5 mile	No	0
3. CERCLIS[2] and CERCLIS-NFRAP Sites	0.5 mile	No	5
4. Federal ERNS	Site only	No	Not Applicable
5. RCRA non-CORRACTS TSD Facilities	0.5 mile	No	0
6. RCRA CORRACTS TSD Facilities	1 mile	No	3
7. RCRA Generators	Site & Adjoining	Yes	1
8. Federal Institutional/Engineering Controls	Site Only	No	Not Applicable
9. State/Tribal Equivalent NPL Sites	1 mile	No	0
10. State/Tribal Equivalent CERCLIS[2] Sites	0.5 mile	No	0
11. State/Tribal Registered Storage Tanks	Site & Adjoining	No	0
12. State/Tribal Landfills and Solid Waste Disposal Sites	0.5 mile	No	1
13. State/Tribal Leaking Storage Tanks	0.5 mile	No	33
14. State/Tribal Institutional Controls/ Engineering Controls	Site Only	No	Not Applicable
15. State/Tribal Voluntary Cleanup Sites	0.5 mile	Yes	11
16. State/Tribal Brownfield Sites	0.5 mile	Yes	12
17. Orphan Site List[3]	Site & Adjoining	No	1

Notes:

1. *Some sites may be included on multiple databases.*
2. *The US EPA retired the CERCLIS database in October 2013. In January 2016, the Superfund Enterprise Management System (SEMS), which replaces the CERCLIS database, became active. The CERCLIS database records search included as part of this assessment includes currently ascertainable data from the SEMS and SEMS-Archive databases as reported through the database vendor.*
3. *Haley & Aldrich of New York also searched the List provided in the database report for the subject property and sites adjoining the subject property. Orphan sites are those that, due to incorrect or incomplete addresses, could not be mapped.*

5.2 ADDITIONAL ENVIRONMENTAL RECORDS OR FILE REVIEW

To supplement the environmental record search, we contacted the following state and local government agencies and searched applicable online databases. If copies of the documents reviewed were obtained, pertinent material is included in Appendix D. Relevant information obtained is included in the appropriate sections of the report and/or discussed in Section 5.3 below. Adjacent properties were also included in requests for additional information if a significant incident or release was identified. Those adjacent properties reviewed for this assessment include:

Agency	Request Sent, or Files Searched		Files Exist and are Available for Review	Files Reviewed
	Subject Property	Adjoining Properties		
New York State Department of Environmental Conservation[2]	Yes	No	No	No
New York City Department of Finance City Registry[3]	Yes	No	No	No
New York City Department of Buildings[4]	Yes	No	Yes	No
New York City Department of Health[5,1]	Yes	No	No	N/A
Fire Department of New York[6,1]	Yes	No	No	N/A
New York City Department of Environmental Protection[7,1]	Yes	No	No	Yes (online)
New York City Office of Environmental Remediation[8,1]	Yes	No	No	N/A
United States Environmental Protection Agency[1]	Yes	No	No	N/A

Notes:

1. *To date, no responses have been received from the Freedom of Information Act (FOIA) requests noted above. Based on the information obtained through our interviews with key site personnel and our review of other records, it does not appear that responses to the FOIA requests should affect our conclusions regarding RECs on the site. However, when a response is received, it will be forwarded to Kent Ave Property LLC and, if it affects our conclusions regarding the site, Kent Ave Property LLC will be informed.*
2. *The New York State Department of Environmental Conservation (NYSDEC) maintains information regarding spills, petroleum bulk storage (PBS), including USTs and above ground storage tanks (AST), and investigation/remediations overseen by New York State regulatory programs. A response has not yet been received from the NYSDEC.*
3. *The New York City Department of Finance City Register maintains information regarding property transactions, including deeds, lease, and mortgage documents. Records were reviewed in the online database.*
4. *The New York City Department of Buildings (NYCDOB) maintains information regarding violations, complaints, certificates of occupancy, elevator records, asbestos assessments, and permits. Records were reviewed in the online database, which included Certificates of Occupancy for the subject property.*
5. *The New York City Health Department maintains information regarding environmental concerns for public health. A response has not yet been received from the NYCDOH.*
6. *The Fire Department of New York maintains information regarding underground storage tanks (USTs) and emergencies/fire episodes. A response has not yet been received from the FDNY.*
7. *The New York City Department of Environmental Protection maintains information regarding wastewater discharge and boilers. A response has not yet been received from the NYCDEP.*
8. *The New York City Office of Environmental Remediation maintains information regarding investigation/remediations, manages the New York City Voluntary Cleanup Program, and assists with guidance through all the City Environmental Quality Review (CEQR) requirements.*

5.3 DETAILED DESCRIPTION OF RELEVANT INFORMATION

5.3.1 Subject Property

The subject property is listed in the following databases:

Listing	Description	Potential Impact
RCRA LQG, Manifest, FINDS, ECHO	NAP Industries Inc., located at 667 Kent Avenue, is identified in the RCRA database as an active LQG (EPA ID 110000882787) with several unresolved violations related to the handling of hazardous wastes during current and historic industrial manufacturing activities at the subject property. The subject property is also identified in manifest databases since the early 2000s under this same EPA ID for hazardous waste disposal at Republic Environmental Systems (Pennsylvania) LLC. Hazardous wastes identified in association with the subject property include ignitable (D001), barium (D005) and spent nonhalogenated solvents (F003 and F005). More than 90 federal and state violations related to transportation and disposal of hazardous waste issued to the subject property between 2010 and 2018 and the RCRA database identified the subject property as a "Significant Noncomplier" that have yet to return to compliance. The subject property is listed AIR databases for permitting activity and pollutant emissions (Facility ID 110000882787) between 1985 and 2016 and has been issued several 'High Priority Violations' consistently for at least three years.	The subject property is identified in the RCRA database as a 'Significant Noncomplier' and has high priority air violations that have yet to return to compliance. Open violations are related to the handling and disposal of hazardous waste and pollutant air emissions. Due to industrial manufacturing operations at the subject property and the handling/ transport/ disposal of hazardous materials, coupled with the out of compliance status since 2010, this is considered a REC.
FTTS, HIST FTTS	The subject property appears in FIFRA/TSCA Tracking System (FTTS) and the Historic FTTS databases related to inspection and compliance under EPA laws.	The violations associated with these databases include fines due to late EPCRA reporting and do not necessarily indicate an environmental concern.
NYC LAND USE	25 Hooper Street is identified as an Industrial & Manufacturing facility within the NYC Land Use Database.	A listing in these databases does not necessarily indicate an environmental concern.
PFAS ECHO	The subject property appears in the PFAS Enforcement & Compliance History Online database related to NAP Industries Inc. being categorized as a Plastic and Rubber Manufacturing industry.	A listing in this database does not necessarily indicate an environmental concern.
EDR MGP	The subject property is identified in an EDR database of manufactured gas plants.	A listing in this database does not necessarily indicate an environmental concern.

5.3.2 Nearby Sites

Several nearby sites were listed in the database report within the applicable search radii or identified in regulatory records reviews. Due to their location with respect to the subject property (on the opposite side of a hydrogeologic barrier, distance from the site, location of the site relative to inferred groundwater flow, or their status (closed out release, etc.), these sites are not likely to adversely affect the subject property and are not discussed herein. The complete database report and relevant records review information are included in Appendix D.

5.4 VAPOR MIGRATION

The ASTM 1527-21 standard states that "for the purposes of this practice, "migrate" and "migration" refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." Thus, this section specifies whether or not we perceive a risk of vapor migration to the subject property.

To assess a vapor migration risk, we conducted a detailed review and analysis of the site-specific environmental database report and/or other reasonably ascertainable records to assess whether:

1. Off-site properties have documented chlorinated VOC contamination located within 100 feet of the subject property, or
2. Off-site properties have documented volatile petroleum hydrocarbon contamination within 30 feet of the subject property.

Based on our records review, we have not identified any potential sources for vapor migration within 100 feet of the subject property.

6. Subject Property Reconnaissance and Key Personnel Interview(s)

Subject property reconnaissance was conducted by Philip DiNardo and Andrea Lee of Haley & Aldrich of New York on 29 May 2024. Access to the subject property was provided by Shulem Sternhill, the Owner's representative and Chief Operating Officer of NAP Industries Inc., the current operator of the subject property.

Haley & Aldrich of New York personnel observed accessible interior areas of the subject property buildings. Haley & Aldrich of New York also observed the exterior portions of the subject property, including the property boundaries, and observed adjoining property conditions from the subject property boundaries and/or public thoroughfares. No weather-related conditions or other conditions that would limit our ability to observe the subject property or adjoining properties were encountered during reconnaissance, with the exception of miscellaneous equipment and materials staged on the floor, impeding the ability to see certain areas of the floor. This is not considered a significant data gap.

The subject property is located in the Williamsburg neighborhood of Brooklyn, which is defined by residential, commercial, and light industrial use properties. The subject property is improved with an active manufacturing facility comprised of two connected warehouse structures accessible by man doors and roll-up bay doors. Haley & Aldrich of New York personnel observed 55-gallon drums containing hazardous waste comprised of spent solvent from manufacturing processes throughout the subject property near manufacturing processing areas. Approximately 10 totes with 275-gallon-capacity containing a solvent identified as a blend of n-propanol and n-propyl acetate were observed in storage and manufacturing process areas. Ink rooms containing paint storage were also observed. Details on the maintenance, storage and conditions observed are provided in the table below in Section 6.4.

An interview with Shulem Sternhill of NAP Industries, the , was performed as part of site reconnaissance. Mr. Sternhill stated that the subject property is an active a manufacturing facility. Current manufacturing processes include lamination and printing of plastic labels and bags, requiring the use, disposal and storage of hazardous materials such as inks, adhesives, and solvents. Mr. Sternhill stated that the facility actively generates hazardous waste in the form of spent solvents produced as a byproduct of manufacturing processes. Spent solvents are temporarily stored inside the building in 55-gallon drums and picked up to be disposed of at an approved facility approximately every two weeks. Mr. Sternhill stated that ownership of the subject property had changed within the past two years.

ASTM E 1527-21 Standard Section 10.8 requires that, prior to the site visit**,** the current subject property owner or key site manager and User, if different from the current owner or key site manager, be asked if there are any helpful documents that can be made available for review. Documents were not provided.

The findings of the site visit are discussed below. Subject property photographs are included in Appendix E.

6.1 CURRENT USE OF THE PROPERTY

The subject property is currently operated by NAP Industries Inc., a plastic label and bag manufacturing facility.

6.2 GENERAL DESCRIPTION OF STRUCTURES

The subject property is improved by two one-story warehouses with a mezzanine area. The buildings are accessible by man doors and bay doors along Keap Street, Kent Avenue, and Hooper Street.

6.3 ADJOINING PROPERTY OBSERVATIONS

The subject property is bound to the northwest by Keap Street, followed by multi-story residential buildings; to the northeast by a multi-story religious facility and a multi-story office building; to the southeast by a synagogue, followed by Hooper Street; and, to the southwest by Kent Avenue.

The adjoining properties did not exhibit the potential to adversely impact the subject property.

6.4 USE, STORAGE, AND DISPOSAL OF PETROLEUM PRODUCTS AND HAZARDOUS MATERIALS

Petroleum products and hazardous materials were observed or reported to be used, stored, and/or disposed of at the subject property as described below.

A fill port labeled 'Fuel Oil' and a vent pipe were observed on the northwest façade of the building along Keap Street in the northern portion of the subject property. A partial cellar is located inside the building adjacent to the fill port and vent pipe. No staining or indications of a release were observed in the half cellar.

Petroleum products and hazardous materials observed at the subject property included:

Petroleum Product or Hazardous Substances	Quantity Stored & Container	Storage Location	Use	Disposal	Observations/ Evidence of Release
N-propanol, N-propyl acetate	About 10 275-gallon totes	Manufacturing process areas throughout building	Used in manufacturing processes to laminate and print plastic labels	Transported by third party under hazardous waste manifest to off-site facility for disposal as hazardous waste. Pick-ups occurred approximately two times per month	None observed
Spent solvents	About 25 55-gallon drums	Central portion of Lot3.	Spent solvents produced as a byproduct from manufacturing processes	hazardous waste picked up Approximately every two weeks	None observed

Most containers were stored on raised pallets in secondary containment. Few drums near active processing areas were situated directly on the floor; however, these containers were observed to be in good condition with no evidence of leaks or nearby floor drains.

6.5 OTHER SUBJECT PROPERTY OBSERVATIONS

The table below summarizes items that were observed and/or reported at the subject property during the site visit other than those items related to the use, storage, and disposal of petroleum or hazardous

materials (described in Section 6.3 above). If items were observed or reported, they are further described either in the table or below.

Description	Observed or Reported at Time of Site Visit	Observations/Comments
Potable Water Supply	N/A	
Nearest Drinking Water Source	No	
Sewage Disposal System	N/A	
Septic System	No	
Unidentified Storage Containers	No	
Wastewater Discharge	No	
Stormwater Discharge	No	
Odors	Yes	Odors were observed near areas of spent solvent waste collection within the warehouse facility.
PCBs Associated with Electrical or Hydraulic Equipment	No	
Elevators (Traction or Hydraulic)	No	
Vehicle Maintenance Lifts	No	
Emergency Generators	No	
Sprinkler System Pumps	No	
Heating System	Yes	Natural gas-fired heating units
Cooling System	Yes	Overhead industrial drum fans
Stains or Corrosion on Floors, Walls, or Ceilings	Yes	*De minimis* staining was observed on floor slab within the garage area in the southern portion of Lot 15.
Floor Drains	Yes	Floor drains were observed in the warehouse on the subject property. No sheen or odors were present in the vicinity of the floor drains. Drums were not stored in the vicinity of the floor drains observed.
Sumps	No	
Catch Basins	No	
Pits, Ponds, Lagoons, and Pools of Liquid	No	
Stained Soil or Pavement	No	
Stressed Vegetation	No	
Solid Waste and Evidence of Waste Filling	No	
Dry Wells	No	
Monitoring Wells	No	
Water Supply Wells	No	
Irrigation Wells	No	
Injection Wells	N/A	
Abandoned Wells	No	

***Notes**:*

1. *N/A items are those that were not observed or reported and/or not anticipated to be present given the nature of the site (e.g., building features not present on an undeveloped property).*

6.6 USER RESPONSIBILITIES

The AAI Rule requires that the user of the report consider the following:

- Whether the user has specialized knowledge about previous ownership or uses of the subject property that may be material to identifying RECs;
- Whether the user has determined that the subject property's title contains environmental liens or other information related to the environmental condition of the property, including engineering and institutional controls and Activity and Use Limitations (AULs), as defined by ASTM;
- Whether the user is aware of commonly known or reasonably ascertainable information about the subject property including whether or not the presence of contamination is likely on the subject property and to what degree it can be detected; and
- Whether the user has prior knowledge that the price of the subject property has been reduced for environmentally-related reasons.

While such information is not required to be provided by the Environmental Professional(s), the information can assist the Environmental Professional in identifying RECs. The AAI Final Rule (Code of Federal Regulations Title 40 [40 CFR] Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for one of the Landowner Liability Protections (LLPs) to CERCLA liability.

Haley & Aldrich of New York was not provided with a completed user responsibilities questionnaire.

7. Findings and Opinions

7.1 DATA GAPS

Our ability to identify and evaluate RECs at the subject property is conditioned upon identified as part of this Phase I. Haley & Aldrich of New York was not provided with a completed user responsibilities questionnaire. This is considered a data gap; however, based upon historical data collected from other sources, this potential data gap is not expected to adversely impact the results of this assessment. Thus, it is our opinion that sufficient information was obtained to identify subject property conditions indicative of releases or threatened releases of hazardous substances and petroleum hydrocarbons. Our opinion is limited by the conditions prevailing at the time our work is performed and the applicable regulatory requirements in effect.

7.2 RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-21 Standard defines a REC in part as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

Our opinion regarding a REC's potential impact on the subject property is based on the scope of our work, the information obtained during the course of our work, the conditions prevailing at the time our work was performed, the applicable regulatory requirements in effect at the time our work was performed, our experience evaluating similar sites, and on our understanding of the client's intended use for the subject property.

The following RECs were identified in connection with the subject property:

REC #1: Known Contamination At Subject Property

Soil and groundwater contamination were identified at the subject property in 2009 during an investigation conducted by ARCADIS on behalf of National Grid, the former owner of the gas holder station. This investigation was required under an Administrative Order on Consent with NYSDEC to investigate soil and groundwater relative to the former gasification system. Groundwater results identified concentrations of benzene, a MGP-related constituent; 2-ethylhexl, plasticizer; and, metals above Ambient Water Quality Standards (AWQS). Polyaromatic hydrocarbons and metals were identified in soil samples at concentrations above Unrestricted Use Soil Cleanup Objectives (UUSCOs); and, free cyanide was present, but at concentrations below the UUSCO. Previous reports indicate black staining and odors observed in soils 15 to 20 ft bgs in the former gas holder area. One chlorinated VOC, tetrachloroethene, was detected in three soil samples analyzed during a 2022 partial investigation of the subject property.

Due to the presence of known contamination in soi and groundwater at the subject site and pending remedial action, this is considered a REC.

REC #2: Former Use of Subject Property as Manufactured Gas Plant

The northern portion of the subject property was occupied by a Manufactured Gas Plant (MGP) Site with a gas holder from the late 1800s through the mid-1930s. Initial gas plant operations were performed under Nassau Gas Works, then later transitioned to Brooklyn Union Gas Co. MGP operations ceased sometime between 1935 and 1947. The gas manufacturing process involved the heating of coal and/or petroleum products to produce a gas mixture. By products of the manufactured gas process include coal tar, VOCs and SVOCs, which were identified in soil and/or groundwater during previous investigations conducted at the subject property, indicative of a potential former release.

REC #3: Violations Associated With The Handling Of Hazardous Materials At Subject Property

The subject property is identified in the RCRA database as a 'Significant Noncomplier' and has high priority air violations that have yet to return to compliance. Open violations are related to the handling and disposal of hazardous waste and pollutant air emissions. Due to industrial manufacturing operations at the subject property and the handling/transport/disposal of hazardous materials, coupled with the out of compliance status since 2010, this is considered a REC.

7.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-21 Standard defines a CREC as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

CRECs were not identified in connection with the subject property.

7.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-21 Standard defines an HREC as an environmental condition "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

HRECs were not identified in connection with the subject property.

7.5 DE MINIMIS CONDITIONS

The ASTM E 1527-21 Standard defines *de minimis* conditions as those conditions which "do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." The ASTM E 1527-21 Standard notes that "conditions determined to be *de minimis* are not recognized environmental conditions."

De minimis staining was observed on the concrete floor in the garage area located on the southern portion of Lot 15.

7.6 OTHER FINDINGS

The term “other finding” is not defined by ASTM; however, Haley & Aldrich of New York uses the term to indicate areas of contingent risk that are not clearly defined by the ASTM Standard. Other findings were not identified at the subject property.

8. Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E 1527 of 125 3rd Street, in Brooklyn, New York, the property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report.

This assessment has revealed evidence of three RECs in connection with the subject property.

9. Environmental Professional Certification

The undersigned declare the following:

We declare that, to the best of our professional knowledge and belief, we meet the definition of as defined in §312.10 of 40 CFR Part 312 and

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Elizabeth R. Scheuerman
Project Manager

James M. Bellew
Principal

10. Credentials

This Phase I report was prepared by Elizabeth Scheuerman, under the direct supervision of James Bellew, who served as the Environmental Professional for this project. Qualification information for the project personnel is provided below.

James M. Bellew is a Principal at Haley & Aldrich of New York with strong environmental background and thirteen years of experience in bedrock, soil, and groundwater investigation with a focus on remedial design and implementation.

Elizabeth Scheuerman is a Project Manager at Haley & Aldrich of New York with more than 9 years of experience conducting environmental investigations, including Phase I Environmental Site Assessments, to determine the risk and extent of soil contamination and hazardous materials.

11. Glossary and Other Descriptions

All Appropriate Inquiry (AAI) — that inquiry constituting "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in CERCLA, 42 USC §9601(35)(B), that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the LLPs to CERCLA liability (42 USC §9601(35)(A) & (B), §9607(b)(3), §9607(q); and §9607(r)), assuming compliance with other elements of the defense.

Business Environmental Risk — a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

Controlled Recognized Environmental Condition (CREC) – a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Data Gap — a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit) and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

De Minimis Conditions — conditions that do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

Environmental Professional — a person, meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b).

Historical Recognized Environmental Condition (HREC) — a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Key Site Manager — the person identified by the owner or operator of a property as having good knowledge of the uses and physical characteristics of the property.

Material Threat —a physically observable or obvious threat that is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in an impact to

public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance, and which shows evidence of damage. The damage would represent a material threat if it were deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Orphan Site — (not ASTM E 1527-21 definition) — sites that could not be mapped due to poor or inadequate address information.

Recognized Environmental Condition (REC) — the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized as environmental conditions.

11.1 DESCRIPTIONS OF DATABASES SEARCHED

Numerous regulatory databases were searched during this Phase I. Each database reviewed is described in the database report presented in Appendix D. Those databases required by the ASTM E 1527-21 Standard are identified below.

1. **NPL Sites:** The National Priorities List (NPL) is a list of contaminated sites that are considered the highest priority for cleanup by the US Environmental Protection Agency (USEPA).
2. **Delisted NPL Sites:** The Delisted National Priorities List (NPL) is a list of formal NPL sites formerly considered the highest priority for cleanup by the USEPA that met the criteria of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) for deletion from the NPL because a no further response was appropriate.
3. **CERCLIS Sites:** The Comprehensive Environmental Response, Compensation, and Liability Act Information System (CERCLIS) list identifies sites which are suspected to have contamination and require additional investigation to assess whether they should be considered for inclusion on the NPL.
4. **CERCLIS-NFRAP Sites:** CERCLIS-NFRAP status indicates that a site was once on the CERCLIS List but has No Further Response Actions Planned (NFRAP). Sites on the CERCLIS-NFRAP List were removed from the CERCLIS List in February 1995 because, after an initial investigation was performed, no contamination was found, contamination was removed quickly, or the contamination was not significant enough to warrant NPL status.
5. **Federal ERNS:** The Federal Emergency Response Notification System (ERNS) list tracks information on reported releases of oil and hazardous materials.
6. **RCRA non-CORRACTS TSD facilities:** The Resource Conservation and Recovery Act (RCRA) non-CORRACTS TSD Facilities List tracks facilities which treat, store, or dispose of hazardous waste and are not associated with corrective action activity.
7. **RCRA CORRACTS TSD facilities:** The RCRA CORRACTS TSD Facilities list catalog facilities that treat, store, or dispose of hazardous waste and have been associated with corrective action activity.

8. **RCRA Generators:** The RCRA Generator list is maintained by the USEPA to track facilities that generate hazardous waste.

9. **Federal Institutional Controls/Engineering Controls:** The Federal Institutional Control list and Engineering Control list are maintained by the USEPA. Some Institutional Control and Engineering Control information may not be made publicly available and therefore will not be included on this registry.

10. **State and Tribal Equivalent NPL/CERCLIS Sites:** The (ASTM E 1527-21 Standard) requires searching "State and Tribal Equivalent NPL Sites." In New York, the equivalent NPL is the Inactive Hazardous Waste Disposal Sites, which is maintained by the NYSDEC.

11. **State and Tribal Registered Storage Tanks:** The NYSDEC maintains a list of aboveground and underground storage tanks registered with the NYSDEC Petroleum Bulk Storage program.

12. **State and Tribal Landfills and Solid Waste Disposal Sites:** NYSDEC maintains a list of regulated waste disposal sites.

13. **State and Tribal Leaking Storage Tanks:** NYSDEC maintains a list of Leaking Storage Tanks (LUST/LAST). The LUST/LAST lists are a listing of release sites that have an Underground or Aboveground Storage Tank listed as the source.

14. **State and Tribal Institutional Controls/Engineering Controls:** NYSDEC maintains a list of sites with Institutional controls or Engineering controls in place.

15. **State and Tribal Voluntary Cleanup Sites:** NYSDEC maintains a list of Voluntary Cleanup sites.

16. **State and Tribal Brownfield Sites:** NYSDEC maintains a list of Brownfield sites which includes properties where redevelopment or re-use may be compromised by the presence or presumed presence of hazardous materials or petroleum.

APPENDIX A
Phase I Environmental Site Assessment Limitations

APPENDIX A

H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) Limitations

Environmental site assessment (Phase I Environmental Site Assessment) reports prepared by H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) are for the sole and exclusive use of its Client. Haley & Aldrich of New York represents that the Phase I Environmental Site Assessment was prepared in accordance with the ASTM International (ASTM) Standard E1527-21 entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM E1527-21). The findings, opinions, conclusions, and information contained in the ASTM E1527-21 Phase I Environmental Site Assessment are limited to, and solely based upon, information reasonably ascertainable by Haley & Aldrich of New York at the time the ASTM E1527-21 Phase I Environmental Site Assessment was completed.

All users of this E1527-21 Phase I Environmental Site Assessment are bound to the terms and conditions and limitations contained in the accompanying Proposal, Terms and Conditions, and Limitations for this ASTM E1527-21 Phase I Environmental Site Assessment. The findings, opinions, conclusions, and information contained in this report are based solely on the Scope of Services provided pursuant to the Proposal and its attachments and the information reasonably ascertainable by Haley & Aldrich of New York at the time the ASTM E1527-21 Phase I Environmental Site Assessment was completed. Haley & Aldrich of New York has not performed any additional observations, investigations, studies, or other testing not specified in the Scope of Services. Haley & Aldrich of New York shall not be liable for the existence of any condition the discovery of which would have required the performance of services not authorized under the Scope of Services.

This ASTM E1527-21 Phase I Environmental Site Assessment is prepared for the exclusive use of Haley & Aldrich of New York's client in connection with the subject property for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject property. There are no intended beneficiaries other than Haley & Aldrich of New York's client. Haley & Aldrich of New York shall owe no duty whatsoever to any other person or entity by issuing the ASTM E1527-21 Phase I Environmental Site Assessment. Use of this ASTM E1527-21 Phase I Environmental Site Assessment by any person or entity, including by Haley & Aldrich of New York's client, for a purpose other than for the purpose of assessing the potential or existing environmental contamination liabilities associated with the subject property is expressly prohibited unless such person or entity obtains written authorization from Haley & Aldrich of New York indicating that the ASTM E1527-21 Phase I Environmental Site Assessment is adequate for such other use. Use of this ASTM E1527-21 Phase I Environmental Site Assessment by any person or entity for such other purpose without written authorization by Haley & Aldrich of New York shall be at such person's or entity's sole risk and shall be without legal exposure or liability to Haley & Aldrich of New York.

Haley & Aldrich of New York may authorize third-party reliance on the ASTM E1527-21 Phase I Environmental Site Assessment by providing reliance letters to third party(ies) provided that the third party(ies) agree: (1) to use the ASTM E1527-21 Phase I Environmental Site Assessment only for the purpose of assessing the potential or existing environmental contamination liabilities associated with real property; (2) to be bound by the terms and conditions and limitations contained in the ASTM E1527-21 Phase I Environmental Site Assessment report and the proposal and its Attachments, Terms

and Conditions, and Limitations; (3) to accept the form and substance of Haley & Aldrich of New York's reliance letter; and (4) to deliver to Haley & Aldrich of New York a signed copy of a reliance letter by an authorized representative of the relying party, within thirty (30) days after said reliance letter is provided to the relying party, signifying the relying party's acceptance of the aforementioned conditions. Upon Haley & Aldrich of New York's receipt of the signed reliance letter by the relying party(ies), the relying party(ies) will be authorized to rely on Haley & Aldrich of New York's ASTM E1527-21 Phase I Environmental Site Assessment for the limited purpose of identifying potential or existing environmental contamination liabilities associated with the subject property. The relying party(ies) agree(s) to bind each of its respective successors and assigns to the aforementioned Terms and Conditions.

This ASTM E1527-21 Phase I Environmental Site Assessment reflects subject property conditions observed and described by records available to Haley & Aldrich of New York as of the date of ASTM E1527-21 Phase I Environmental Site Assessment preparation. The passage of time may result in significant changes in subject property conditions, technology, or economic conditions, which could alter the findings and/or recommendations of the ASTM E1527-21 Phase I Environmental Site Assessment. Accordingly, Haley & Aldrich of New York's client and any other party to whom the ASTM E1527-21 Phase I Environmental Site Assessment is provided recognize and agree that Haley & Aldrich of New York shall bear no liability for deviations from observed conditions or available records after the time of ASTM E1527-21 Phase I Environmental Site Assessment preparation. Haley & Aldrich of New York makes no express or implied representation that the information contained in the E1527-21 Phase I Environmental Site Assessment has continued viability after 180 days of the ASTM E1527-21 Phase I Environmental Site Assessment's completion date, and any use or reliance on the ASTM E1527-21 Phase I Environmental Site Assessment after 180 days of the ASTM E1527-21 Phase I Environmental Site Assessment's completion date by Haley & Aldrich of New York's client or any other authorized person or entity will be at that party's sole risk and without liability to Haley & Aldrich of New York.

Notwithstanding anything contained herein, Haley & Aldrich of New York shall not be liable for any claim or damage arising from environmental contamination liabilities that occurred on the subject property after the effective date of the ASTM E1527-21 Phase I Environmental Site Assessment. Likewise, Haley & Aldrich of New York shall not be liable for any existing or future property owner's failure to satisfy any continuing obligation for CERCLA liability protection or under the Federal Environmental Protection Agency's All Appropriate Inquiries rule.

Re: Site Characterization Oversight
46 Keap Street
Brooklyn, New York
Langan Project No.: 170084302

Dear Mr. Freund:

We are pleased to present our site characterization oversight summary for 46 Keap St property. Our findings and conclusion are based on soil and groundwater samples collected during the ARCADIS BBL's (ARCADIS) July 2009 preliminary environmental investigation at the above-referenced site. In addition, our findings are compared to the results of the ARCADIS Soil and Groundwater Sampling Interim Data Results Letter, dated 13 October 2009 (Attachment A). Both data, Langan and Arcadis, are presented herein.

Project Background

The 46 Keap Street property (Site) is located in Brooklyn, NY in the middle of the city block bordered by Keap Street on the northwest, Wythe Avenue on the northeast, Hooper Street on the southeast, and Kent Avenue on the southwest. The Site currently consists of a single story warehouse building housing a light manufacturing operation. A site location map is attached as Figure 1.

The Site was once the location of a Brooklyn Union Gas Company manufactured gas holder distribution station known as the Keap Street Station. The Site is under an Administrative Order on Consent (AOC) with the New York State Department of Environmental Conservation (NYSDEC). The AOC requires National Grid, the legacy owner of the Keap Street gas holder station to conduct a characterization of the onsite soil and groundwater relative to the former gasification system.

Preliminary Environmental Investigation

ARCADIS, on behalf of National Grid, conducted the preliminary environmental investigation at the Site between the 2nd and 23rd of July 2009. ARCADIS's soil investigation consisted of drilling of three interior (SB-5 through SB-7) and four sidewalk borings (MW-1 through MW-4).

The groundwater investigation included installing a temporary well within one of the completed interior borings (SB-6) and four permanent wells within the completed exterior borings. The approximate locations of the borings and wells are shown in the attached Figure 2 – Boring Location Plan.

ARCADIS's subcontractor, Boart Longyear, installed the borings to 45 feet (ft) below ground surface (bgs) using a Boart Longyear 100C sonic rig. The interior borings were installed on the 2nd and 3rd July 2009 and the exterior borings were installed on the 6th and 7th July 2009. ARCADIS field personnel screened the soil samples with a photo-ionization detector (PID) for the presence of total organic vapors and collected select soil samples for laboratory analysis. After the completion of the borings, ARCADIS installed a temporary well within interior boring SB-6, collected a groundwater sample, and immediately removed the well. This interior temporary well was not included in the ARCADIS Work Plan, dated October 2007 (revised January 2008) that was approved by the NYSDEC but was added in response to Nap Industries representative's request in the Spring of 2009. The collection of this groundwater sample was included in the field work by ARCADIS to provide information on the groundwater directly beneath the building. This would allow for comparison to the results from the exterior wells to allow for a more comprehensive overview of the subsurface conditions relative to the gas holder station. ARCADIS collected the groundwater samples from the four exterior monitoring wells on 23 July 2009 for laboratory analysis. ARCADIS submitted all of their samples to the laboratory TestAmerica of New Jersey.

Langan's Observations and Findings

Langan was on site part-time during ARCADIS's preliminary environmental investigation to provide independent observations of the ARCADIS's field work procedures, to conduct independent soil and groundwater characterization, and to collect select soil and groundwater samples for laboratory analysis.

Observations of ARCADIS Field Work Procedures

Langan was present on-site to observe the installation of interior boring SB-5 (the first boring of the investigation) and exterior wells MW-4 and MW-2. The sonic rig drilling procedure that was used during this investigation was to advance the three-inch diameter macro-core sampler ten ft into the subsurface and then to immediately advance the casing to the same depth as the macro-core sampler. Langan field personnel noted that the soil samples collected utilizing this method were heated in the drilling process to a point that the soil was hot to the touch and visibly steaming once exposed to the air. Langan discussed with the on-site ARCADIS project manager that the heating of the soil could drive off any VOCs present before collection for laboratory analysis. Mr. Arco agreed to modify the drilling technique for the remaining borings to advance the casing with surface supplied water injected between the macro-core and

casing; this technique would assist in reducing the overall soil sample temperature. In addition, Langan informed ARCADIS that the PID that they were using, a RAE system MiniRAE 2000, was adversely affected by the high humidity content of the recovered soil samples. The Langan field person also noted that the selected approach to drilling significantly disturbs the deposition of the soil, precluding the accurate identification of soil stratification indications.

Langan was present on-site to observe the collection of groundwater samples from the interior temporary monitoring well installed in SB-6 and the exterior permanent monitoring wells MW-2 and MW-3. ARCADIS collected the SB-6 groundwater samples with a bailer without prior purging of the temporary well. The resulting groundwater samples from this temporary well were visibly high in silt and sand content. ARCADIS purged exterior wells MW-2 and MW-3 with a Grundfos impellor pump and recorded water quality parameters until the parameters were stable. During the groundwater sample collection in MW-2, the relatively high silt content "locked" the pump twice, which resulted in groundwater collected for semi-volatile and cyanide analysis having greater silt content than the groundwater collected for the volatile analysis. Sampling logs for the groundwater samples collected from MW-2 and MW-3 are included in Attachment B – Groundwater Sample Field Information Forms.

Analytical Results

Langan Soil Results

Langan created boring logs of SB-5, MW-2 and MW-4 based on field observations. Langan used ARCADIS notes from the top five ft to complete the boring logs as these strata were previously excavated as part of the utility clearance excavation. In these three borings, native material (i.e. not fill material) was encountered immediately below the floor and sidewalk slabs. This material consisted of silty sand that transitioned to well-graded sand as the depth increased. There were no indications of historical fill, free product, staining, or odors. The highest PID screening value was 1.4 parts per million (ppm), which was found directly below the floor slab in SB-5. Langan boring logs of SB-5, MW-2 and MW-4 are included in the Attachment C – Boring Logs.

Langan field personnel arrived after boring SB-6 was completed. This was due to the fact that the commencement of drilling activities occurred earlier than previously scheduled. Based on the recovered soil samples, Langan noted that historical fill comprised of brick and sand appeared to extend to 15 ft bgs and that black stained silty sand with odor was found between 15 and 20 ft bgs. PID screening in this boring did not indicate the presence of VOCs. Transcribed boring logs from ARCADIS are included in Attachment D.

Langan collected representative soil samples from 20 to 25 ft bgs in boring SB-5 (sample SB5-20-25), 15 to 20 ft bgs in boring SB-6 (sample SB6-15-20) and 26 to 27 ft bgs in MW-2 (MW 2-SB-26-27). Langan's soil and groundwater samples were placed in laboratory-supplied containers, stored in ice-chilled coolers, and shipped under chain-of-custody protocol to

Spectrum Analytical Laboratory in Agawam, Massachusetts. Spectrum is certified by the New York State Department of Health (NYSDOH) Environmental Laboratory Accreditation Program (ELAP). The samples were analyzed for the following parameters: volatile organic compounds (VOCs) by United States Environmental Protection Agency (EPA) Method 8260, semi-volatile organic compounds (SVOCs) by EPA Method 8270, and cyanide by EPA Method 9012A.

The VOC and SVOC results were compared to the NYSDEC Technical and Administrative Guidance Memorandum (TAGM) Recommended Soil Cleanup Levels (RSCOs). The cyanide results were compared to the NYSDEC Part 375-6.8(a) Unrestricted Use Soil Cleanup Objective (SCO) for that compound.

The results for sample SB5-20-25 indicate non-detect for VOCs, SVOCs, and cyanide. The results for sample SB6-15-20 indicate detections of benzene, naphthalene and cyanide; however, these concentrations are below applicable NYSDEC TAGM standards. The results for MW-2-SB-26-27 indicate total SVOCs of 19,808 parts per billion (ppb) and non-detect for VOCs and cyanide. The soil analytical results are shown in attached Table 1- Summary of Detected VOCs, SVOCs, and Cyanides in Soil Samples. The laboratory reports are included in Appendix E – Laboratory Reports.

ARCADIS Soil Results

The soil sample results from the ARCADIS field investigation indicate similar analytical results to Langan's soil samples. It should be noted that these were not split soil samples but were collected from the same lithology as the ARCADIS soil samples. Therefore, since they are not split samples, there may be slight differences between analytical data sets. The soil sample results for SB-5 (20-25 fbg) indicate non-detect for VOCs, SVOCs and cyanide, agreeing with Langan's soil sample results. ARCADIS also analyzed for metals, which were non-detect.

The soil sample collected by ARCADIS from SB-6 (15-20 fbg) indicates non-detect for VOCs, SVOCs, metals and cyanide. Langan's results indicate the presence of the VOCs benzene, naphthalene and cyanide.

Limited concentrations of SVOCs, inorganic compounds and/or cyanide were detected in all the soil samples collected from SB-5, SB-6 and SB-7. No VOCs were detected above regulatory limits in these soil samples. These concentrations are typical of fill material and not MGP impacts, which would have reported concentrations significantly greater than presently indicated. A review of the ARCADIS soil boring logs indicate that no odor or staining was noted in the borings and PID readings were zero. The analytical results are presented in their letter report (Attachment A). The sampling interval in MW-2 was 4.5 to 5 fbg and 5 to 10 fbg. Results indicated non-detect for VOCs, SVOCs, cyanide with limited metals impacts in the deeper sample (mercury). Langan's sampling interval for MW-2 was 26 to 27 fbg.

Langan Groundwater Results

Langan collected duplicate groundwater samples from the interior temporary well installed in SB-6 (sample SB6-070309) and exterior monitoring wells MW-2 (MW2-090723) and MW-3 (MW3-090723) after ARCADIS collected their groundwater samples. These groundwater samples were placed in a cooler with ice and submitted to the laboratory for analysis. Since temporary well SB-6 was not purged, the sample for cyanide was filter by the laboratory prior to analysis. The laboratory results were compared to the NYSDEC Technical & Operational Guidance (TOGS) Series 1.1.1 Ambient Water Quality (AWQ) Standards.

The groundwater sample collected from the temporary monitoring well installed in SB-6 was found to have TOGS VOC exceedances for benzene and ethanol and a SVOC exceedance for Bis(2-ethylhexyl)phthalate. The groundwater results for MW-2 and MW-3 indicate the presence of methyl tert-butyl ether (MTBE) with concentrations of 33.5 micrograms per liter (µg/l)

The groundwater analytical results are shown in the attached Table 2 – Summary of Detected VOC, SVOC and Cyanides in Groundwater Samples.

ARCADIS Groundwater Results

The groundwater results indicate trace concentrations of SVOCs, mainly poly-aromatic hydrocarbons (PAHs) in select groundwater samples with elevated concentrations elevated concentrations of metals in the grab groundwater sample from SB-6. The elevated metal concentrations in SB-6 are most likely attributed to the turbidity of the sample. ARCADIS samples were not tested for MTBE. SB-6 also reportedly contained VOCs (benzene) and SVOCs (bis(2 ethylhexyl) phthalate). The results from MW-2 indicate non-detect for VOCs, SVOCs and cyanide and limited metals (iron and manganese). Similar results are indicated for MW-3 except for trace concentrations of SVOCs. Again, MTBE was not analyzed for in these samples. The results agree with Langan's results except for the presence of MTBE (Langan).

CONCLUSIONS

The results of the soil samples collected from the interior soil borings indicate limited impacts to the soil at the discrete sampling depths of 20 to 25 ft bgs (SB-5) and 15 to 20 ft bgs (SB-6). However, the soil boring logs from these two soil borings did not indicate impacted zones in the soil column. This was further confirmed by these soil sample results. The soil sample collected from exterior boring MW-2 (26 to 27 ft bgs) did indicate the presence of SVOCs (Langan); however, the concentration is significantly below the applicable standard. Based on these limited results, the subsurface soil does not appear to be impacted with either historical MGP use or current use of the Site.

The groundwater results from the interior temporary well (SB-6) had benzene and toluene (Langan) detections above the applicable standards. The results from two of the four exterior wells that Langan sampled, MW-2 (up-gradient) and MW-3 (down-gradient), indicated MTBE concentrations above the applicable standard. The presence of the benzene and toluene (SB-6 temporary well) in the groundwater beneath the Site and MTBE (Langan) in the exterior groundwater beneath the adjacent sidewalks could indicate nearby off-site petroleum/gasoline spills. This conclusion is further supported by the lack of these parameters in the limited on-site soil samples we collected.

These conclusions are based on both Langan and ARCADIS soil and groundwater analytical results which are similar in most reports for this investigation. As noted earlier, split soil samples were not collected which may account for the variation in Langan's and ARCADIS's analytical results. The presence of MTBE in the off-site wells and not on-site may be due to multiple off-site spills that are affected by groundwater flow gradients. Because of the limited focus of the site investigation on the former gas holder location, conclusions regarding overall on-site impacts cannot be presented at this time.

Please contact me at (212) 479 5441 if you have any questions.

Sincerely,
Langan Engineering and Environmental Services, P.C.

ARCADIS Letter Report

nationalgrid

October 13, 2009

Mr. Jacques Freund
Vice President
NAP Industries, Inc.
667 Kent Avenue
Brooklyn, NY 11211

Re: Soil and Groundwater Sampling Interim Data Results
Former Keap Street Holder Station Site
46 Keap Street, Brooklyn, New York

Dear Mr. Freund:

This letter has been prepared to provide you with analytical results of soil and groundwater samples collected on and near 46 Keap Street, Brooklyn, NY. The data were collected in July 2009 as part of a Site Characterization (SC) that National Grid is completing under a New York State Department of Conservation (NYSDEC)/New York State Department of Health (NYSDOH)-approved work plan dated January 2008. As you are aware, an Administrative Order on Consent (the Order) between National Grid and the New York State Department of Environmental Conservation (NYSDEC) requires National Grid to conduct the SC because a remote gas holder, used to store manufactured gas, was located on the property at 46 Keap Street.

Summary of Sampling Activities

The NYSDEC-approved scope of work consisted of:

- drilling three soil borings (SB-5, SB-6, and SB-7) at 46 Keap Street;
- installing four monitoring wells (MW-1 through MW-4) in the sidewalks near 46 Keap Street;

- based on discussions with your consultant, Langan Engineering & Environmental Services, and concurrence of the NYSDEC, collecting one "grab" groundwater sample for laboratory testing from the boring (SB-6) located within the footprint of the former gas holder; and

- collecting groundwater samples from each monitoring well for laboratory testing (total of four groundwater samples and one duplicate sample).

As discussed in our March 12, 2009 letter to you, soil borings were drilled using roto-sonic drilling techniques. Soil borings were drilled to approximately 43 or 45 feet below grade, depending on location. Each monitoring well was installed using schedule 40 PVC and 15-feet long, 0.02-inch slotted well screens. Screens for monitoring wells MW-1 through MW-3 were installed approximately 10 to 25 feet below grade and the screen for monitoring well MW-4 was installed from approximately 20 to 35 feet below grade. The locations of the borings and wells are shown on the attached figure. Soil boring and monitoring well logs are provided in Attachment 1.

Collected samples were analyzed as follows:

- All samples were analyzed for volatile organic compounds (VOCs) by United States Environmental Protection Agency (USEPA) Method 8260B

- All samples were analyzed for semi-volatile organic compounds (SVOCs) by USEPA Method 8270C

- All samples were analyzed for Priority Pollutant List (PPL) Metals by USEPA Method 6000/7000

- Groundwater samples were analyzed for total cyanide by USEPA Method 9012

Samples were analyzed by TestAmerica Laboratories of Shelton, Connecticut, a New York State Department of Health (NYSDOH) Environmental Laboratory Approval Program- (ELAP-) certified laboratory. Table 1 provides a comparison of validated soil sample results to the NYSDEC Part 375 Restricted Use Commercial and Restricted Use Residential Soil Cleanup Objectives (SCOs). Table 2 provides a comparison of the validated groundwater sample results to NYSDEC TOGS 1.1.1 Class GA Ambient Water Quality Standards and Guidance Values (Class GA Standards and Guidance Values). A summary of the results is provided below.

General Observations

- Soil beneath the building generally consists of up to approximately 25 feet (at SB-7) of fill underlain by fine to coarse sand.
- The water table was encountered at approximately 12 to 13 feet below grade.
- Black staining and an odor were observed in SB-6 at depths between 15 and 20 feet below grade. Otherwise, no visual impacts were observed in soil samples retrieved at other boring and wells locations.
- Headspace screening measurements (using a photo-ionization detector [PID]) of continuously collected soil samples were all non-detect for borings beneath the building and 1 part per million (ppm) or less for well borings drilled in the sidewalks.

Soil Analytical Results

A summary of the soil analytical results is provided below. Please refer to Table 1 for the detailed results in comparison to applicable SCOs.

- Only two samples (SB-6 [4-5'] and SB-7 [3-4']) contained polycyclic aromatic hydrocarbon (PAHs) at concentrations slightly above both SCOs. While associated with MGPs, PAHs are formed during the incomplete burning of fossil fuel, garbage, or any organic matter; consequently PAHs are ubiquitous, especially in urban environments.

- Two samples (SB-5 [1-2'] and SB-6 [4-5']) contained inorganic compounds (barium or lead) at concentrations above the SCOs. Both samples were collected from the fill material.

- Trace levels of free cyanide were detected in three soil samples (SB-5 [1-2'], SB-6 [15-20'], and SB-7 [3-4']) at concentrations well below both SCOs for this compound.

Groundwater Analytical Results

A summary of the groundwater analytical results is provided below. Please refer to Table 2 for the detailed results in comparison to Class GA Standards and/or Guidance Values.

- Trace levels of VOCs were detected in the grab sample collected from SB-6 at approximately 16 feet below grade. The concentration of benzene exceeded its Class GA Standard of 1 parts per billion (ppb). Benzene is a MGP-related constituent, but is also present in numerous petroleum products. VOCs were not detected in any groundwater samples collected from monitoring wells.

- Trace concentrations of SVOCs were detected in each groundwater sample. The sample from MW-3 contained concentrations of six SVOCs (all PAHs) above Class GA Standards/Guidance Values and the grab sample from SB-6(16') contained one compound (bis[2-ethylhexl]phthalate) slightly above its Class GA Standard. Bis(2-ethylhexl)phthalate is a plasticizer ubiquitous in the environment and is not a known MGP-related constituent. Groundwater from MW-1, MW-2, and MW-4 did not contain concentrations of SVOCs above Class GA Standards or Guidance Values.

- Numerous metals were detected in the sample from SB-6 at levels above Class GA Standards or Guidance Values. This is not surprising given the turbid nature of the grab sample.

Groundwater samples from each monitoring well contained concentrations of iron and manganese above the Class GA Standard for each compound. Iron and manganese are naturally occurring metals that are often observed at elevated levels, particularly in areas where abundant fill is present. Iron and manganese are not typically considered a constituent of concern at MGP sites.

- Total cyanide was detected in groundwater from SB-6 below its Class GA Standard. Total cyanide was not detected in groundwater sampled from the monitoring wells.

Closing

Concentrations of some VOCs, SVOCs, and metals were detected in soil and/or groundwater samples collected during the SC. However, the levels appear to be low and only a few compounds were detected slightly above applicable NYSDEC criteria. The concentrations of metals detected in the samples are likely the result of the presence of fill beneath the building. Although some of the metals concentrations in the groundwater grab sample appear elevated, the levels are attributed to the turbidity of the sample. While these results have not yet been presented to the NYSDEC, it does not appear the former holder has had significant adverse affects on the soil and groundwater beneath and around your building. We expect that a draft Site Characterization Report will be submitted to the NYSDEC in the coming weeks.

National Grid appreciates your cooperation throughout the duration of the SC work. Please do not hesitate to contact myself or Mr. Roger Cawley if you have any questions.

Sincerely,

Donald Campbell
Project Manager

Notes/Remarks

Pump seized up twice during sample collection, once after the collection of the VOCs bootles and once after the collection of the CN bottle.

Approximately 20 gallons of additional purge water was pumped out after the VOC sample was collected.

This well has a significant quantity of silt entrained in the groundwater.

Authorized by:

Hanibal C. Tayeh, Ph.D.
President/Laboratory Director

Technical Reviewer's Initial:

Spectrum Analytical holds certification in the State of New York for the analytes as indicated with an X in the "Cert." column within this report. Please note that the State of New York does not offer certification for all analytes.
Please note that this report contains 44 pages of analytical data plus Chain of Custody document(s). When the Laboratory Report is indicated as revised, this report supercedes any previously dated reports for the laboratory ID(s) referenced above. Where this report identifies subcontracted analyses, copies of the subcontractor's test report is available upon request. This report may not be reproduced, except in full, without written approval from Spectrum Analytical, Inc.

Spectrum Analytical, Inc. is a NELAC accredited laboratory organization and meets NELAC testing standards. Use of the NELAC logo however does not insure that Spectrum is currently accredited for the specific method or analyte indicated. Please refer to our "Quality" web page at www.spectrum-analytical.com for a full listing of our current certifications and fields of accreditation. States in which Spectrum Analytical, Inc. holds NELAC certification are New York, New Hampshire, New Jersey and Florida. All analytical work for Volatile Organic and Air analysis are transferred to and conducted at our 830 Silver Street location (NY-11840, FL-E87936 and NJ-MA012).

Please contact the Laboratory or Technical Director at 800-789-9115 with any questions regarding the data contained in this laboratory report.

CASE NARRATIVE:

The sample temperature upon receipt by Spectrum Analytical courier was recorded as 2.3 degrees Celsius. The condition of these samples was further noted as received on ice. The samples were transported on ice to the laboratory facility and the temperature was recorded at 2.0 degrees Celsius upon receipt at the laboratory. Please refer to the Chain of Custody for details specific to sample receipt times.

An infrared thermometer with a tolerance of +/- 2.0 degrees Celsius was used immediately upon receipt of the samples.

If a Matrix Spike (MS), Matrix Spike Duplicate (MSD) or Duplicate (DUP) was not requested on the Chain of Custody, method criteria may have been fulfilled with a source sample not of this Sample Delivery Group.

See below for any non-conformances and issues relating to quality control samples and/or sample analysis/matrix.

EPA 335.4

Laboratory Control Samples:

9070474-BS2

The spike recovery for this QC sample is outside the established control limits. The sample results for the QC batch were accepted based on LCS/LCSD or SRM recoveries within the control limits.

Cyanide (total)

SW846 8260B

Blanks:

9070450-BLK1

Analyte quantified by quadratic equation type calibration.

Vinyl chloride

SW846 8260B

Laboratory Control Samples:

9070435-BS1

Analyte out of acceptance range in QC spike but no reportable concentration present in sample.

Ethyl tert-butyl ether
Tert-amyl methyl ether

9070435-BSD1

Analyte out of acceptance range in QC spike but no reportable concentration present in sample.

Ethyl tert-butyl ether
Tert-amyl methyl ether

9070450-BS1

Analyte quantified by quadratic equation type calibration.

Vinyl chloride

9070450-BSD1

Analyte quantified by quadratic equation type calibration.

Vinyl chloride

9070545-BS1

Analyte out of acceptance range in QC spike but no reportable concentration present in sample.

Ethyl tert-butyl ether

The spike recovery for this QC sample is outside the established control limits. The sample results for the QC batch were accepted based on LCS/LCSD or SRM recoveries within the control limits.

Tert-amyl methyl ether

9070545-BSD1

Analyte out of acceptance range in QC spike but no reportable concentration present in sample.

Ethyl tert-butyl ether

The spike recovery for this QC sample is outside the established control limits. The sample results for the QC batch were accepted based on LCS/LCSD or SRM recoveries within the control limits.

1,1,2-Trichlorotrifluoroethane (Freon 113)

SW846 8260B

Samples:

S906307-CCV1

Analyte percent drift/percent difference is greater than 30%, data is accepted due to all CCC analytes passing within the 20% Drift/Difference criteria

Hexachlorobutadiene
Tert-amyl methyl ether

This affected the following samples:

SB5-20-25

S906332-CCV1

Analyte quantified by quadratic equation type calibration.

Vinyl chloride

S906388-CCV1

Analyte percent drift/percent difference is greater than 30%, data is accepted due to all CCC analytes passing within the 20% Drift/Difference criteria

Tert-amyl methyl ether

This affected the following samples:

SB6-15-20

SA97344-03 *SB6-070309*

Analyte quantified by quadratic equation type calibration.

Vinyl chloride

SA97344-04 *Trip-070609*

Analyte quantified by quadratic equation type calibration.

Vinyl chloride

SW846 8270C

Laboratory Control Samples:

9070434-BS1

Analyte out of acceptance range in QC spike but no reportable concentration present in sample.

Notes and Definitions

CAL1	Analyte quantified by quadratic equation type calibration.
CAL2	Analyte percent drift/percent difference is greater than 30%, data is accepted due to all CCC analytes passing within the 20% Drift/Difference criteria
E	The concentration indicated for this analyte is an estimated value. This value is considered an estimate (CLP E-flag).
J	Detected above the Method Detection Limit but below the Reporting Limit; therefore, result is an estimated concentration (CLP J-Flag).
QC2	Analyte out of acceptance range in QC spike but no reportable concentration present in sample.
QM9	The spike recovery for this QC sample is outside the established control limits. The sample results for the QC batch were accepted based on LCS/LCSD or SRM recoveries within the control limits.
U	Analyte included in the analysis, but not detected
BDL	Below Detection Limit - Analyte NOT DETECTED at or above the minimum detection limit
BRL	Below Reporting Limit - Analyte NOT DETECTED at or above the reporting limit
dry	Sample results reported on a dry weight basis
NR	Not Reported
RPD	Relative Percent Difference

A plus sign (+) in the Method Reference column indicates the method is not accredited by NELAC.

Laboratory Control Sample (LCS): A known matrix spiked with compound(s) representative of the target analytes, which is used to document laboratory performance.

Matrix Duplicate: An intra-laboratory split sample which is used to document the precision of a method in a given sample matrix.

Matrix Spike: An aliquot of a sample spiked with a known concentration of target analyte(s). The spiking occurs prior to sample preparation and analysis. A matrix spike is used to document the bias of a method in a given sample matrix.

Method Blank: An analyte-free matrix to which all reagents are added in the same volumes or proportions as used in sample processing. The method blank should be carried through the complete sample preparation and analytical procedure. The method blank is used to document contamination resulting from the analytical process.

Method Detection Limit (MDL): The minimum concentration of a substance that can be measured and reported with 99% confidence that the analyte concentration is greater than zero and is determined from analysis of a sample in a given matrix type containing the analyte.

Reportable Detection Limit (RDL): The lowest concentration that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions. For many analytes the RDL analyte concentration is selected as the lowest non-zero standard in the calibration curve. While the RDL is approximately 5 to 10 times the MDL, the RDL for each sample takes into account the sample volume/weight, extract/digestate volume, cleanup procedures and, if applicable, dry weight correction. Sample RDLs are highly matrix-dependent.

Surrogate: An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. These compounds are spiked into all blanks, standards, and samples prior to analysis. Percent recoveries are calculated for each surrogate.

SECTION 1: OVERVIEW

Property Name	Nap Industries
Property Address	667 Kent Avenue and 46 Keap Street, Brooklyn, NY 11249
Building Area	59,597 SF (Source: Tax Assessor Information)
Units	One
% of Units Inspected	50
Property Area	1.27 acre(s) (Source: Tax Assessor Information)
Year Built	1873 and 1946 (Source: Tax Assessor Information)
Current Use	Light manufacturing
Historical Use	A foundry, gas production company, metals manufacturing, and machine shop.
Known Release	None
Suspected Release	Yes - Long term industrial use
Regulatory Records	Regulatory records were found for the subject Property, and evidence of related concerns was identified.
AULs	No Activity and Use Limitations were identified.
Engineering Controls	No Engineering Controls were identified.
Environmental Liens	Research of environmental liens was beyond the scope of this Assessment.

DRAFT

1.1 Summary Tables - Conclusions & Recommendations

Recommendations and Costs

Conclusions	*Summary*	*Action Recommended?*	*Cost*
REC	A Recognized Environmental Condition was identified as a result of long term industrial use identified in review of historical records; and potential bulk petroleum storage.	Phase II	$TBD
CREC	None	None	$0
HREC	None	None	$0
Opinion	Identified conditions indicate environmental impact to the Property.	See above	$0
Data Gaps	No data gaps were identified which would be likely to impact our conclusions.	None	$0

Recommendations and Costs for Additional Services

Issue	*Summary*	*Action Recommended?*	*Cost*
Asbestos	Suspect materials were observed to be in good condition. All suspect materials should be handled with due caution and in accordance with applicable regulations.	None	$0
Lead-Based Paint	Based on the date of construction of the current improvements, lead-based paint may be present at the Property. Painted surfaces were observed in generally good condition.	None	$0
Drinking Water	Drinking water is supplied by the New York City Department of Environmental Protection and is reported to be in compliance with applicable regulations.	None	$0
Radon	The Property is located in an area designated by the USEPA as Radon Zone 3, an area with predicted average indoor radon concentrations less than 2.0 picoCuries per liter of air (pCi/L), below the concentration at which the USEPA typically recommends additional action.	None	$0
Mold	No visual or olfactory evidence was identified to indicate current or past mold growth or moisture intrusion likely to result in mold growth.	None	$0
Wetlands	No wetlands were identified at the Property.	None	$0

1.2 Data Gaps

No significant data gaps were encountered during completion of this assessment. Data gaps occur when, despite good faith efforts, the consultant is unable to identify information required to satisfy objectives of the assessment. Data gaps may result from incompleteness in any of the activities required by the ESA Standard. The ESA Standard requires that data gaps be identified in the report when they significantly impact the ability of the consultant to identify Recognized Environmental Conditions at the Property. Limiting Conditions identified in this report are not considered to significantly impact our ability to satisfy the objectives of this assessment.

1.3 Limiting Conditions

GRS Group encountered the following limiting conditions in completion of the work:

- Due to the volume of equipment and product stored within the building, some wall and floor surfaces could not be observed. Features may be present which were not observed.

DRAFT

- GRS Group forwarded FOIA requests to the Fire Department of the City of New York (FDNY) but has received no response. GRS Group telephoned FDNY on February 18, 2022, but was informed that related information can be provided only through the FOIA process.
- GRS Group forwarded a pre-survey questionnaire to obtain information from the Key Site Contact. The completed questionnaire was not returned. Information provided by someone familiar with the Property can be important to the identification of environmental risks.

1.4 Executive Summary

1.4.1 Identified RECs

One Recognized Environmental Condition was identified as a result of our assessment. Long term industrial use, partially performed prior to the promulgation of regulations regarding hazardous waste storage and disposal and tank maintenance and removal, as well as more recent industrial operations and violations associated with hazardous waste, represent a REC and further action appears warranted.

1.4.2 Current Use

The subject property consists of a 1.27-acre, irregular shaped parcel located on the east corner of the intersection of Kent Avenue and Keap Street in the Borough of Brooklyn, City of New York, Kings County, NY.

The subject property is developed with Nap Industries, a light manufacturing facility consisting of two buildings totaling 59,597 square feet. The current occupant, NAP, prints labels on plastic packaging and plastic bags and manufactures plastic labels. Onsite operations involve the use and storage of inks and adhesives during the printing and manufacturing process.

Onsite operations involve the use of inks and adhesives stored in 5 to 55 -gallon drums. The storage and use of some of these substances results in the generation of regulated or hazardous wastes and the subject property is identified as a current RCRA Large Quantity Generator (LQG) of hazardous waste.

1.4.3 Historical Uses of Property and Adjoining Properties

Based on the review of available historical information, the Property appears to have been developed for industrial use from at least 1887, and possibly 1872, to the present. By 1887 through 1904, Sanborn fire insurance maps indicate that a chrome steel works occupied the existing Property building at 667 Kent Ave. Evidence of the historical use or storage of heating oil at the Property was identified during review of Sanborn Fire Insurance maps that indicated a gasoline tank under the floor of 667 Kent Avenue circa 1887 to 1935. In addition, New York

DRAFT

City Department of Buildings records list oil boiler applications dated 1946 for 46 Keap Street and 1947, 1948, 1952, 1974, and 1986 for 667 Kent Avenue. The owner of the Property for approximately 40 years, Maurice Lowi, stated that there are no tanks at the Property during the Property reconnaissance. The 667 Kent Avenue building was occupied by a heavy cooking appliance manufacturing company by 1918 then the 667 Kent Avenue was occupied by the heavy cooking appliance manufacturing company and a metal can manufacturing company by 1935.

The 46 Keap Street portion of the subject property was improved with a Gasometer and a gas manufacturing plant operating under various names from at least 1887 until as late as 1935. The current 46 Keap Street was constructed in 1946 and both Property buildings were occupied by a metal can manufacturing company. From 1965 through 2007, the Property buildings were occupied by manufacturing flats. City directory listings identify previous tenants of the Property to have included Metropolitan Mirror and Glass Company (1929-1949) and Nap Industries (1976-2005) at 667 Kent Avenue.

Long term (approximately 150 years) industrial use represents a significant environmental concern. Although the potential for impact associated with historic gas production was investigated during a limited soil and groundwater sampling event in 2009, the remaining areas of the subject property were not investigated. In addition, the 2009 investigation appears to have been limited in extent, identified onsite groundwater contamination from a possible offsite source, and recommended additional action; however, reports indicating that additional investigation was performed were not available for review.

As discussed above, review of available historic information indicates that in addition to the former gas production facility, onsite operations have included a chrome steel works and rolling mill, foundry, metal appliance manufacturing, and can manufacturing dating back to the late 1800s. In addition, permitting records identify the possible prior use of heating oil tanks based on oil boiler applications for both addresses. The 1918 and 1935 Sanborn maps depict a Gasol tank under the floor in the central portion of the subject property; however, the disposition of this tank was not identified in the 2009 report or in subsequent maps. Long term industrial use, partially performed prior to the promulgation of regulations regarding hazardous waste storage and disposal and tank maintenance and removal, as well as more recent industrial operations and violations associated with hazardous waste, represent a REC and further action appears warranted.

The general vicinity largely consisted of a mix of manufacturing facilities and dwellings from 1887 to the present. Residential development was noted to the north and manufacturing facilities were noted to the east, south, and west from circa 1887 to 1950. Only manufacturing facilities were noted in the surrounding area until the current multifamily buildings to the west were constructed in 1985. None of the historical occupants of nearby properties are expected to have conducted activities likely to have resulted in adverse environmental impacts to the subject Property.

DRAFT

1.4.4 Regulatory Review

The following regulatory records were identified for the subject property:

Nap Industries Inc. / Kent Avenue Facility, 667 Kent Avenue, is listed in the RCRA-LQG, ICIS, AIRS, Manifest, FTTS, Hist FTTS-LQG, ECHO, and FINDS databases. According to the RCRA-LQG database, the hazardous waste generated at the Property is spent nonhalogenated solvents from folding paperboard box manufacturing; coated paper bag and pouch manufacturing; stationary product manufacturing; stationary, tablet, and related product manufacturing; commercial gravure printing; commercial flexographic printing; and books printing. Additional wastes generated were indicated as ignitable and barium. Violations were noted during compliance inspections in 2010, 2018, and 2019 and the subject property appears to have returned to compliance for most of them. Some of the violations were described as Significant Non Complier.

A release was not identified in association with the current occupant or operations; however, Property management should ensure that the occupant is in compliance with applicable hazardous waste generation and disposal operations.

The AIRS database listing is associated with an air emissions permit in effect for onsite operations since at least the late 1980s. The FTTS and HIST FTTS listings are associated with Emergency Planning and Community Right to Know (EPCRA) requirements. The FINDS and ECHO databases are associated with the RCRA, AIRS, and ICIS listings, as well as additional compliance databases. Information in the Manifest database indicates that wastes have been removed from this site under manifest. Listing on these databases does not indicate that a release has occurred onsite.

Keap Street Station; Keap Street, Wythe Avenue, Hooper Street, Kent Avenue; is listed in the EDR Manufactured Gas Plant (MGP) database. Manufactured gas plants were coal or oil fueled facilities that produced gas. Coal tar was produced as a byproduct at many of these facilities and had the potential to impact the subsurface. Based on review of historical Sanborn Fire Insurance Maps, as discussed in Section 5.3.3, a manufactured gas company was located at 46 Keap Street form circa 1887 through 1935. The current improvements at that address were constructed in 1946.

GRS Group was provided with a limited subsurface investigation performed in the area of the former gas production facility in 2009. The report was prepared for the National Grid, which is considered the responsible party for the former plant. The 2009 report included analysis by two companies, Langan and Arcadis, of the same area. Langan concluded that soil was not adversely by the former gas facility. However, the Langan report indicated that groundwater has been impacted with contamination above New York state guidelines from an off site source. Langan further concluded that further investigation was required to delineate the off site contamination. No additional reports were provided and it was not clear if additional investigation has been performed. The subject property was not identified in any databases which report releases.

DRAFT

The following regulatory records were identified for adjoining properties:

- Various adjacent/adjoining property addresses are listed on the RCRA-LQG, RCRA Non-Gen, MANIFEST, FINDS, and ECHO databases under the name Con Edison and/or various Con Edison Service Box and / or Manhole numbers. These listings are administrative in nature and relate to the maintenance of utility-owned electrical equipment. The SPILLS listings each have case closed status. Based on the nature of the listings and/or regulatory status; these listings do not represent a REC to the Property.
- Engine Co. 211 FDNY/Ladder 119, at 26 Hooper Street, and beyond Hooper Street to the south, was listed in the NY SPILLS, UST, and AST databases. Information in the UST database indicates that a fuel oil UST, two diesel USTs, and three gasoline USTs were removed or closed in place in 1997. This is an active AST site. The SPILLS database listing indicates that soil impact was identified in 1997. The SPILL was closed in 1998. Based on regulatory status and lack of reported groundwater impact, this site is not expected to represent a REC for the Property.

1.4.5 Data Gaps

No Significant Data Gaps were encountered during completion of this assessment.

1.5 Conclusions

1.5.1 Recognized Environmental Conditions

The term "Recognized Environmental Condition" means (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment, (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment, or (3) the presence of of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 and E 1527-21 of 667 Kent Avenue and 46 Keap Street, Brooklyn, NY, the "Property". Any exceptions to or deletions from this practice are described in Section 2.7 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the Property, except for the following:

- Long term historic industrial uses as well as evidence of historic tanks and/or bulk petroleum storage and a lack of information regarding disposition of prior tanks.

DRAFT

1.5.2 Controlled Recognized Environmental Conditions

The ESA Standard defines a Controlled Recognized Environmental Condition as "*a Recognized Environmental Condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations).*" The required control may be as simple as assuring the property is not used for residential purposes, or may require more active measures such as the prohibition of other activities or maintenance of engineering controls. Under these conditions, a REC continues to exist at the subject property. However, that the ESA Standard does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the control(s).

No Controlled Recognized Environmental Conditions were identified.

1.5.3 Historical Recognized Environmental Conditions

A Historical Recognized Environmental Condition may be identified when a *"previous release of hazardous substances or petroleum products affecting the subject property has been addressed to the satisfaction of the applicable regulatory authority or authorities and meets criteria for unrestricted use without subjecting the subject property to any controls.*"

No Historical Recognized Environmental Conditions were identified.

1.5.4 De Minimis Environmental Conditions

De minimis conditions are conditions related to a release that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not Recognized Environmental Conditions nor Controlled Recognized Environmental Conditions.

No de minimis environmental conditions were identified as a result of activities or conditions at the subject or nearby properties.

1.6 Additional Services

Additional services were provided to evaluate non-ASTM considerations as identified in Section 2.3. Evidence of related conditions of concern was identified during the completion of the Assessment as follows:

- Asbestos-Containing Materials (ACMs) - Suspect ACMs identified at the Property were found to be in good condition.

DRAFT

- Lead-Based Paint (LBP) - Suspect LBP was identified at the Property. Painted surfaces were observed to be in generally good condition.

1.7 Recommendations

GRS Group recommends the following additional actions:

- A Phase II should be conducted to evaluate potential subsurface impacts resulting from long term industrial use and underground storage tank systems previously in use at the Property.

DRAFT

SECTION 2: INTRODUCTION

This Phase I Environmental Site Assessment was performed by GRS Group for Ulmer & Berne LLP and was prepared by GRS Group Field Professional, Patrice Piton. It was reviewed by Senior Reviewer, Rebecca Bleakley.

2.1 Purpose and Use

This assessment along with findings, conclusions, and recommendations (collectively, the Assessment) is intended to support the evaluation of Property by our Client prior to acquisition of the Property. GRS Group has performed the agreed services in order to identify Recognized Environmental Conditions (RECs). The supporting work was not intended to be exhaustive or to guarantee the identification of every possible issue of potential concern, and may not be construed as a warranty or guarantee of any kind.

Unless expressly identified herein, all provided opinions, conclusions, and recommendations presume that the Property occupancy and use will remain as observed at the time of our site reconnaissance and that no significant renovation, subdivision, conversion to condominiums or similar change will occur. This report will be invalidated in the event of such activities.

This report is the intellectual property of GRS Group, and may not be used or relied upon without GRS Group's express written authorization. Unauthorized use of this report is a violation of GRS Group's legal rights. Any unauthorized use of this report shall be subject to civil and criminal penalties and shall be responsible to indemnify, defend and hold GRS Group harmless from any and all losses, damages, and claims arising, in any part, from such use. When allowable under contract, GRS Group may authorize additional parties to rely on the results of this assessment. Unless otherwise agreed in writing, such parties shall be considered as parties to the agreement under which the work was performed.

DRAFT

2.2 Scope of Assessment

This assessment was conducted in accordance with an agreement governing the nature, scope, intent and purpose of the work, and is consistent with the scope and limitations of ASTM E 1527-13 and E 1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, the "ESA Standard" and any additional requirements identified in the agreement under which the work was performed.

Since GRS Group's responsibilities are limited by the agreed scope of work, an understanding of activities not included within that scope of work is important to proper use of the information contained in this Report. Some clarification of the work performed is provided below, but a more complete list of inherent limitations is provided in Appendix C.

- No environmental site assessment can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions in connection with a property. The ESA Standard identifies a balance between competing goals to reduce uncertainties within reasonable constraints of time and cost, and this assessment is intended to reduce, but not

eliminate, uncertainty regarding the potential for Recognized Environmental Conditions in connection with the property within reasonable limits of time and cost. The User of the Report should be thoroughly familiar with the ESA Standard in order to assure an appropriate understanding of limitations inherent in the agreed scope of services.

- In some cases conditions encountered during completion of the Assessment, for example, limited access portions of the Property can influence our ability to fulfill the objectives of the assessment. Where applicable, such limiting conditions are identified in the report. Also, certain work is specifically excluded by the ESA Standard. Unless expressly identified in the agreement for services, all tasks identified by the ESA Standard as "Non-Scope Considerations" are excluded from this Assessment.

- Reconnaissance conducted during this assessment was limited to accessible areas of the Property and specific areas identified in this Report. Accordingly, conditions may exist which were not identified as a result of our assessment and which may impact our conclusions concerning the condition of the Property. Any conditions known or discovered which were not identified during the completion of this assessment should be reported to GRS Group upon discovery and may impact the conclusions and recommendations of this Report.

- When provided by the client, GRS Group has considered "User Provided Information" in completion of this Assessment; however, GRS Group has no control over such information and cannot guarantee the User's satisfaction of requirements for All Appropriate Inquiry (AAI).

- Limited information concerning regulatory compliance was utilized in the preparation of this Assessment; however, the work is not intended as a compliance audit and may not be relied upon or utilized as evidence of regulatory compliance.

- The certification of AAI included in this report is intended to reflect all tasks required of the Environmental Professional in accordance with 40 CFR 312, EPA's rule on All Appropriate Inquiry.

2.3 Additional Services

The presence of 'environmental' conditions such as asbestos-containing materials, lead-based paint, lead in drinking water, wetlands, endangered species, elevated radon concentrations, etc. can result in liabilities for property owners and disrupt planned operations or cash flow and is generally beyond the scope of a Phase I assessment as defined by the ESA standard. The following additional services have been performed at the request of our Client. Any services not identified below are

DRAFT

expressly excluded from this assessment. All work described is in the context of and subject to the principles underlying the ESA Standard.

Recommendations

The ESA Standard requires the consultant to provide recommendations when the consultant is unable to obtain information which they would expect to significantly impact their ability to identify recognized environmental conditions. Many clients also look to the consultant for recommendations to address business risks. This can be problematic since the reason for engaging the assessment and risk appetite can vary significantly from client to client. Some clients are primarily concerned with the identification of direct evidence of a release, while others are concerned to understand every possibility of a release. This distinction can significantly impact the consultant's recommendations. In simplified form, the ESA Standard defines a recognized environmental condition as the likely release of hazardous substances. A recognized environmental condition is neither restricted to known releases nor intended to include any possibility of a release. Unless otherwise requested by the client, our report will include recommendations as required by the ESA Standard along with our opinion of additional assessment necessary to assess the significant release or likely release of a hazardous substance or petroleum product at the property. The Client should carefully review and consider all recommendations to assure an understanding of the underlying concerns and verify that any recommendations are consistent with their unique appetite for risk.

Asbestos-Containing Building Materials

During the completion of the site reconnaissance, GRS Group looked for building materials commonly believed to contain asbestos. This assessment provides a screening for the presence of asbestos-containing materials to assist in the understanding of business risks associated with the Property, but is not intended and may not be used for the satisfaction of regulatory requirements and is not a suitable replacement for pre-demolition or other more in-depth studies.

Radon

GRS Group has reviewed Radon maps and other necessary and readily available information concerning average radon concentrations in the area of the Property. Site-specific sampling was not completed to verify radon concentrations at the Property.

Lead-Based Paint

During the completion of the site reconnaissance, GRS Group looked for finished surfaces to which lead-based paint (LBP) is commonly applied. This assessment provides a screening for the presence

DRAFT

of lead-based paint to assist in the understanding of business risks associated with the Property, but is not intended and may not be used for the satisfaction of regulatory requirements and is not a suitable replacement for pre-demolition or other more in-depth studies.

Drinking Water

GRS Group contacted the drinking water supplier to obtain information concerning compliance with applicable Federal regulations.

Mold

Material and readily apparent evidence of the presence of mold which is identified during the completion of the Assessment is described in the report. No comprehensive mold assessment has been conducted. Our assessment is based solely upon observations made during the completion of this ESA. A mold and moisture survey should be completed if more comprehensive information is desired.

2.4 Reliance

RESTRICTED USE AND RELIANCE - THIS REPORT WAS PREPARED BY GRS GROUP FOR THE SOLE USE AND BENEFIT OF OUR CLIENT IN ACCORDANCE WITH THE PROVISIONS OF OUR CONTRACT AND MAY NOT BE USED OR RELIED UPON BY ANY OTHER PARTY WITHOUT THE EXPRESS WRITTEN CONSENT OF GRS GROUP.

2.5 Methodology

Recognized Environmental Conditions (REC)

Criteria for the identification of Recognized Environmental Conditions vary substantially across the industry. Some Environmental Professionals identify Recognized Environmental Conditions whenever there is a possibility of impact to a property, while others identify Recognized Environmental Conditions only when presented with direct evidence that a release has occurred. The ESA Standard defines a Recognized Environmental Condition as "(1) *the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment, (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment, or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment."* By this definition, the mere possibility of a release fails to fulfill the definition of a Recognized Environmental Condition. GRS Group considers both the known and likely presence of hazardous materials and conditions indicative of a release in identifying Recognized Environmental Conditions. The possible presence of hazardous materials or the mere possibility of a release does not typically represent a Recognized Environmental Condition.

Controlled Recognized Environmental Conditions (CREC)

The ESA Standard defines a Controlled Recognized Environmental Condition as "*a Recognized Environmental Condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations).*" The required control may be as simple as assuring the property is not used for residential purposes, or may require more active measures such as the prohibition of other activities or maintenance of engineering controls. Under these conditions, a REC continues to exist at the subject property. It is important to understand; however, that the ESA Standard does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the control(s). In addition, a past release that previously qualified as a CREC may no longer constitute a CREC at the time of the Phase I ESA if new conditions or information have been identified such as a change in regulatory criteria, a change of use at the subject property, or a subsequently identified contamination migration pathway that was not previously known or evaluated.

Historical Recognized Environmental Conditions (HREC)

A Historical Recognized Environmental Condition may be identified when a *"previous release of hazardous substances or petroleum products affecting the subject property has been addressed to the satisfaction of the applicable regulatory authority or authorities and meets criteria for unrestricted use without subjecting the subject property to any controls.*" Note that Recognized Environmental Conditions identified previously which have been investigated with no evidence of a release found would no longer be classified as Recognized Environmental Conditions or Historical Recognized Environmental Conditions, since it has been demonstrated that no release has occurred.

Vapor Encroachment

In general, the principles and methodology of Tier 1 Screening as described in ASTM E2600-15 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" were utilized to identify whether Vapor Encroachment Conditions (VEC) are present at the subject property. This evaluation is based entirely upon information discovered during the completion of this Phase I assessment and is intended solely to aid in the identification of Recognized Environmental Conditions.

2.6 Terminology

User - The ESA Standard defines the "User" of the report as the party seeking to have the Phase I ESA completed, including a potential purchaser of the subject property, a potential tenant of the subject property, a current owner of the subject property, a lender, or a property manager. In addition to obtaining an acceptable Phase I ESA report prepared by an Environmental Professional,

DRAFT

any User seeking to obtain Landowner Liability Protections (LLP) ro CERCLA liability is subject to certain User Responsibilities that are defined in the Federal All Appropriate Inquiries Rule and the ESA Standard, as further addressed in Section 4.0 of this report.

Hazardous Material - The ESA Standard defines the terms *hazardous substance* and petroleum products, however, the terms are often used in conjunction, resulting in an awkward phrase where a simpler term would be desirable. The term hazardous material is used in this report to include both hazardous substances and petroleum products as those terms are defined by the ESA Standard.

Material Threat of a Release - There is sometimes confusion regarding the meaning of the phrase "material threat of release." A *material threat* is defined in the ESA Standard as "an obvious threat which would likely result in impact to impact to public health or the environment." The material threat of a release is used in consideration of the likelihood of a future release and has no application in consideration of a historical release.

2.7 Deviations

The ESA Standard characterizes issues that are beyond the scope of assessment as Non-Scope Considerations. Any inclusion of these issues or considerations in this assessment is described earlier in this Section: Scope of Assessment. The inclusion of this work is limited to the scope identified in the agreement under which the work was performed, is subject to underlying principles and limitations of the ESA Standard, and shall not be construed as evidence of a responsibility to evaluate other such issues or considerations.

The ESA Standard allows written interview of property owners and occupants but is structured in a way which promotes oral interview of State and/or Local Government Officials. Nonetheless, many state and government officials will provide information only upon receipt of written requests submitted under the Freedom of Information Act. Information requested or received as a result of such requests may be employed in this assessment in lieu of oral interviews of state and local government officials.

2.8 Special Terms and Conditions

This Assessment has been performed in accordance with an agreement governing the nature, scope, extent, and purpose of the work. Any conflicting provisions of that agreement supersede the provisions of other requirements referenced herein.

DRAFT

SECTION 3: PROPERTY DESCRIPTION

Property Name	Nap Industries
Property Address	667 Kent Avenue and 46 Keap Street, Brooklyn, NY 11249
Building Area	59,597 SF (Source: Tax Assessor Information)
Property Area	1.27 acre(s) (Source: Tax Assessor Information)
Year Built	1873 and 1946 (Source: Tax Assessor Information)
Current Use	Light manufacturing
Number of Buildings	Two
Routes of Property Access	From Kent Avenue to the west or Keap Street to the north.

DRAFT

3.1 Legal Description

According to records of the New York City Department of Finance Automated City Register Information System (ACRIS), the Property is identified as Assessor's Parcel Number (APN) Block 2197, Lots 3 and 15. The Property's legal description is listed included in Appendix D.

3.2 Reconciliation of Property Data

Improvements observed at the Property are consistent with information provided at the time of our engagement. No significant deviations were identified.

3.3 Site and Vicinity General Characteristics

The Property is located in an area characterized by a mix of residential and commercial land use. Adjoining properties include multifamily residential neighborhoods to the north and east. Light industrial, institutional, and commercial land uses was noted to the south and west.

The terrain in the area is generally level, with a slight downward slope to the west. No surface water bodies were observed on or adjacent to the subject property. The nearest surface water feature is Wallabout Channel approximately 0.25 mile to the northwest.

3.4 Current Use

The subject property is developed with Nap Industries, a light manufacturing facility consisting of two buildings totaling 59,597 square feet. The subject property is occupied by a plastic label and bag printing facility.

3.5 Description of Improvements

Building	Nap Industries
Construction	The buildings are constructed of CMU load-bearing walls and interior wood framing.
Exterior Finishes	Brick veneer
Interior Finishes	Painted drywall walls and ceilings, suspended ceiling tile, and exposed brick walls
Parking	Municipal surface parking is provided adjacent to the west along Kent Avenue and adjacent to the north along Keap Street.
Amenities	None
Heating Fuel	Natural gas
Drinking Water Provider	New York City Department of Environmental Conservation
Waste Water Disposal	New York City Department of Environmental Conservation
Solid Waste Disposal	New York City Department of Sanitation

DRAFT

SECTION 4: CLIENT PROVIDED INFORMATION

A party seeking to establish Landowner Liability Protections to CERCLA liability must complete a*ll appropriate inquiries into the previous ownership and uses of the subject property consistent with good commercial and customary practice* , as defined by the federal All Appropriate Inquiry (AAI) rule outline in 40 CFR Part 312. This Phase I ESA report prepared by an Environmental Professional fulfills one requirement of the AAI rule. In addition, the AAI rule lists additional User Responsibilities that must be completed by, or on behalf of, the User of the report, including:

- Research into the existence of environmental cleanup liens and Activity and Use Limitations
- Consideration of specialized knowledge or experience of the "user"
- Consideration of commonly known or reasonably ascertainable information about the subject property
- Consideration of the relationship of the purchase price to fair market value, and
- Consideration of the degree of obviousness of the presence or likely presence of contamination.

During completion of the Phase I ESA, the Environmental Professional is required to inquire to the User about each of the circumstances listed above. Any such information provided by the User must be included in the ESA report. However, such information is not required to be provided by the User to the Environmental Professional,

GRS Group has requested responses to these inquiries from our Client, as well as any other relevant information or documents that can assist in the identification of Recognized Environmental Conditions.

Summary of Client Provided Information

No related information was provided by the Client. As a purchaser, the client must consider these questions prior to acquisition of the Property in order to qualify for defenses to CERCLA liabilities; however there is no regulatory requirement for the submission of such information to the environmental professional. To the best of our knowledge, the Client has no prior involvement with the Property, so would not be expected to be in possession of meaningful information. As a result, no related data gap has been identified.

4.1 Owner, Property Manager, and Occupant Information

No additional documentation was provided by the Property Owner, Property Manager or any occupant.

DRAFT

SECTION 5: RECORDS REVIEW

5.1 Physical Setting Records

5.1.1 Topography

Description	*Findings*	*Source*
Configuration	Relatively flat	Site Observations
Elevation	20 feet above mean sea level	Topographic Maps
Surface Water	No surface water is located along the Property boundaries	Site Observations

5.1.2 Geology

Description	*Findings*	*Source*
Formation	Raritan	United States Geological Survey Mineral Resources On-Line Spatial Data
Permeability	Moderate	United States Geological Survey Mineral Resources On-Line Spatial Data

5.1.3 Hydrology

Description	*Findings*	*Source*
Primary Aquifer	Northern Atlantic Coastal Plains Aquifer System	United States Geological Survey (USGS) Groundwater Atlas of the United States
Estimated first depth to groundwater	12-13 feet below surface grade	2009 Subsurface investigation
Gradient	Toward the west and southwest	Inferred from elevation, site observations and proximity to surface water.

5.2 Regulatory Records Review Summary

Regulatory records provide an important source of information concerning the current and historical use of hazardous materials at the subject and nearby properties. In order to satisfy ESA Standard requirements for the review of regulatory information, GRS Group obtained aggregated data from a commercial service specializing in the organization and reporting of regulatory information.

DRAFT

The information therein was reviewed by GRS Group. Further discussion is provided in the following report sections for all listings of the subject property, all listings of adjoining properties, and listings of other properties deemed to pose a potential risk of impacts to the subject property based on proximity, gradient relationship, or the nature and extent of known releases of hazardous substances or petroleum products.

The complete database search report is attached in Appendix I, including the agency supplying the data, and the date of the last update.

5.2.1 Subject Property Listings

Nap Industries Inc. / Kent Avenue Facility, 667 Kent Avenue, is listed in the RCRA-LQG, ICIS, AIRS, Manifest, FTTS, Hist FTTS-LQG, ECHO, and FINDS databases. According to the RCRA-LQG database, the hazardous waste generated at the Property is spent nonhalogenated solvents from folding paperboard box manufacturing; coated paper bag and pouch manufacturing; stationary product manufacturing; stationary, tablet, and related product manufacturing; commercial gravure printing; commercial flexographic printing; and books printing. Additional wastes generated were indicated as ignitable and barium. Violations were noted during compliance inspections in 2010, 2018, and 2019 and the subject property appears to have returned to compliance for most of them. Some of the violations were described as Significant Non Complier.

A release was not identified in association with the current occupant or operations; however, Property management should ensure that the occupant is in compliance with applicable hazardous waste generation and disposal operations.

The AIRS database listing is associated with an air emissions permit in effect for onsite operations since at least the late 1980s. The FTTS and HIST FTTS listings are associated with Emergency Planning and Community Right to Know (EPCRA) requirements. The FINDS and ECHO databases are associated with the RCRA, AIRS, and ICIS listings, as well as additional compliance databases. Information in the Manifest database indicates that wastes have been removed from this site under manifest. Listing on these databases does not indicate that a release has occurred onsite.

Keap Street Station; Keap Street, Wythe Avenue, Hooper Street, Kent Avenue; is listed in the EDR Manufactured Gas Plant (MGP) database. Manufactured gas plants were coal or oil fueled facilities that produced gas. Coal tar was produced as a byproduct at many of these facilities and had the potential to impact the subsurface. Based on review of historical Sanborn Fire Insurance Maps, as discussed in Section 5.3.3, a manufactured gas company was located at 46 Keap Street form circa 1887 through 1935. The current improvements at that address were constructed in 1946.

DRAFT

GRS Group was provided with a limited subsurface investigation performed in the area of the former gas production facility in 2009. The report was prepared for the National Grid, which is considered the responsible party for the former plant. The 2009 report included analysis by two companies, Langan and Arcadis, of the same area. Langan concluded that soil was not adversely by the former gas facility. However, the Langan report indicated that groundwater has been impacted with contamination above New York state guidelines from an off site source. Langan further concluded that further investigation was required to delineate the off site contamination. No additional reports were provided and it was not clear if additional investigation has been performed. The subject property was not identified in any databases which report releases.

Review of available historic information indicates that in addition to the former gas production facility, onsite operations have included a foundry, can manufacturing, and can manufacturing dating back to the late 1800s. Long term industrial use partially performed prior to the promulgation of regulations regarding hazardous waste storage and disposal, as well as more recent industrial operations and violations associated with hazardous waste represent a REC and further action appears warranted.

DRAFT

5.2.2 Adjoining Property Listings

The following regulatory records were identified for adjoining properties:

- Various adjacent/adjoining property addresses are listed on the RCRA-LQG, RCRA Non-Gen, MANIFEST, FINDS, and ECHO databases under the name Con Edison and/or various Con Edison Service Box and / or Manhole numbers. These listings are administrative in nature and relate to the maintenance of utility-owned electrical equipment. The SPILLS listings each have case closed status. Based on the nature of the listings and/or regulatory status; these listings do not represent a REC to the Property.
- Engine Co. 211 FDNY/Ladder 119, at 26 Hooper Street, and beyond Hooper Street to the south, was listed in the NY SPILLS, UST, and AST databases. Information in the UST database indicates that a fuel oil UST, two diesel USTs, and three gasoline USTs were removed or closed in place in 1997. This is an active AST site. The SPILLS database listing indicates that soil impact was identified in 1997. The SPILL was closed in 1998. Based on regulatory status and lack of reported groundwater impact, this site is not expected to represent a REC for the Property.

A release is known to have occurred at the following properties; however, regulatory "closure" has been granted. Closure is normally granted only after off-site impacts have been investigated and controlled or corrected. As a result, no related impact is expected and these properties do not represent Recognized Environmental Conditions for the subject Property:

- Corner of Kent Avenue and Keap Street, located adjacent west, listed in the SPILLS databases, SPILLS case closed June 2001.

- Manhole 60639, 712 Wythe Ave, located adjacent north, listed in the SPILLS databases, SPILLS case closed January 2018.
- Brinks Inc, 63rd 52 Kent Avenue, located adjoining south, listed in the SPILLS, , UST, and AST databases, SPILLS cases closed May 1992 and January 2019

5.2.3 Regional Contamination

No regional contamination has been identified within the target search area.

5.2.4 Listings for Other Properties Within Target Search Area

Regulatory records were identified for the following properties that are unlikely to impact the subject Property because of their down-gradient or cross-gradient locations. As a result, no related impact is expected and these properties do not represent Recognized Environmental Conditions for the subject Property:

- Amoco/Gas Station/Hewes Service Station, 677-687 Kent Avenue, approximately 260 feet south, listed in the EDR Historical Auto Stations database, SPILLS, LTANKS, UST, and AST databases. LUST case designated No Further Action in August 2012. Two SPILLS cases were closed in 2004 and 2019. One spill appears to remain open and undergoing groundwater monitoring. Information in the database report indicates that the subject property is topographically cross-gradient relative to the subject property. Based on distance and inferred gradient, this site does not appear to represent a significant environmental concern for the subject Property.

None of these additional listed sites are expected to impact the subject property, based on one or a combination of the following factors: distance, gradient relationship, absence of reported releases, or regulatory closure of known release cases. Consequently, none of the remaining listings represent Recognized Environmental Conditions for the subject property.

5.2.5 Unmapped Records

Reports of regulatory records for the subject and surrounding Properties are compiled from data files published by public agencies. Data contained in those records is not always adequate to allow available mapping programs to correctly identify the Property.

Review of the names and address information for unmapped properties revealed no evidence of records likely to be associated with the Property.

DRAFT

5.2.6 Evaluation of Vapor Encroachment Conditions

In general, the principles and methodology of Tier 1 Screening as described in ASTM E2600-15 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" were utilized to identify whether Vapor Encroachment Conditions (VEC) are present at the subject Property. Our evaluation is based entirely upon information discovered during the completion of this Phase I assessment and is intended solely to aid in the identification of Recognized Environmental Conditions.

The regulatory records identified in Section 5.1 were further reviewed using the EDR VEC App to determine if known sources of contamination are present within the areas of concern defined in E2600-15. Based on the estimated direction of groundwater flow, the Area of Concern (AOC) was adjusted to the following parameters:

- 1/10 mile up-gradient for petroleum hydrocarbon chemicals of concern (COCs)
- 1/3 mile up-gradient for non-petroleum COCs
- 100 feet down-gradient for all COCs
- 365 feet cross-gradient for all COCs

Based on the judgment of the Environmental Professional, the AOC may have been further adjusted to reflect commonly known information about subsurface soil permeability and the presence of preferential pathways for vapor migration, such as subsurface utility corridors. In addition, data regarding historical activities and land uses in the vicinity were evaluated to identify any additional likely sources of COCs that were not identified in the regulatory records identified in Section 5.1.

As described in Section 5.2.1 and 5.3, long term industrial use has included heavy manufacturing and the possible bulk petroleum storage onsite. GRS Group has recommended additional investigation to determine if the subject property has been impacted.

5.2.7 Additional Environmental Record Sources

The following additional environmental record sources were reviewed:

Area of Concern	*Agency/Record Source*	*Summary of Findings*
Fire Department	Fire Department of the City of New York (FDNY)	GRS Group forwarded a FOIL request to the FDNY but has received no response as of the date of this report.
Environmental Department	New York City Department of Environmental Protection (NYCDEP)	Based on review of online NYCDEP online records associated with SPILLS and LTANKS, no records were available for the Property.

DRAFT

Area of Concern	*Agency/Record Source*	*Summary of Findings*
State Environmental Department	New York State Department of Environmental Conservation (NYSDEC)	No records were found for the Property via a search of NYSDEC online records.
Oil and Gas Exploration	New York State Department of Environmental Conservation (NYSDEC)	Based upon a review of mapping resources and on-site observations, there is no evidence of oil and natural gas exploration or extraction at the Property.
Mining	New York State Department of Environmental Conservation (NYSDEC)	Based upon a review of mapping resources and on-site observations, there is no evidence of mineral resources exploration or extraction at the Property.
Housing	New York City Department of Housing Preservation Development (NYCHPD)	Based on review of online of NYCHPD online records, no records of environmental concern were identified for the Property.

5.3 Historical Use of Property and Adjoining Properties

5.3.1 Summary

Based on the review of available historical information, the Property appears to have been developed for industrial use from at least 1887, and possibly 1872, to the present. By 1887 through 1904, Sanborn fire insurance maps indicate that a chrome steel works occupied the existing Property building at 667 Kent Ave. Evidence of the historical use or storage of heating oil at the Property was identified during review of Sanborn Fire Insurance maps that indicated a gasoline tank under the floor of 667 Kent Avenue circa 1887 to 1935. In addition, New York City Department of Buildings records list oil boiler applications dated 1946 for 46 Keap Street and 1947, 1948, 1952, 1974, and 1986 for 667 Kent Avenue. The owner of the Property for approximately 40 years, Maurice Lowi, stated that there are no tanks at the Property during the Property reconnaissance. The 667 Kent Avenue building was occupied by a heavy cooking appliance manufacturing company by 1918 then the 667 Kent Avenue was occupied by the heavy cooking appliance manufacturing company and a metal can manufacturing company by 1935.

The 46 Keap Street portion of the subject property was improved with a Gasometer and a gas manufacturing plant operating under various names from at least 1887 until as late as 1935. The current 46 Keap Street was constructed in 1946 and both Property buildings were occupied by a metal can manufacturing company. From 1965 through 2007, the Property buildings were occupied by manufacturing flats. City directory listings identify previous tenants of the Property to have included Metropolitan Mirror and Glass Company (1929-1949) and Nap Industries (1976-2005) at 667 Kent Avenue.

DRAFT

Long term (approximately 150 years) industrial use represents a significant environmental concern. Although the potential for impact associated with historic gas production was investigated during a limited soil and groundwater sampling event in 2009, the remaining areas of the subject property were not investigated. In addition, the 2009 investigation appears to have been limited in extent, identified onsite groundwater contamination from a possible offsite source, and recommended additional action; however, reports indicating that additional investigation was performed were not available for review.

As discussed above, review of available historic information indicates that in addition to the former gas production facility, onsite operations have included a chrome steel works and rolling mill, foundry, metal appliance manufacturing, and can manufacturing dating back to the late 1800s. In addition, permitting records identify the possible prior use of heating oil tanks based on oil boiler applications for both addresses. The 1918 and 1935 Sanborn maps depict a Gasol tank under the floor in the central portion of the subject property; however, the disposition of this tank was not identified in the 2009 report or in subsequent maps. Long term industrial use, partially performed prior to the promulgation of regulations regarding hazardous waste storage and disposal and tank maintenance and removal, as well as more recent industrial operations and violations associated with hazardous waste, represent a REC and further action appears warranted.

The general vicinity largely consisted of a mix of manufacturing facilities and dwellings from 1887 to the present. Residential development was noted to the north and manufacturing facilities were noted to the east, south, and west from circa 1887 to 1950. Only manufacturing facilities were noted in the surrounding area until the current multifamily buildings to the west were constructed in 1985. None of the historical occupants of nearby properties are expected to have conducted activities likely to have resulted in adverse environmental impacts to the subject Property.

Historical Heating Fuel - The buildings are currently heated with natural gas fired units. Evidence of the historical use or storage of heating oil at the Property was identified during review of Sanborn Fire Insurance maps that indicated the presence of a gasoline tank under the floor of 667 Kent Avenue circa 1887 to 1918. In addition, New York City Department of Buildings records list oil boiler applications dated 1946 for 46 Keap Street and 1947, 1948, 1952, 1974, and 1986 for 667 Kent Avenue. The owner of the Property for approximately 40 years, Maurice Lowi, stated that there are no tanks at the Property during the Property reconnaissance.

Fill Materials - Review of a prior subsurface investigation report performed for the northern portion of the subject property (the former gas manufacturing facility) identified the presence of historical fill comprised of brick and sand in one area of the subject property; however, native soil was noted in other areas of the subject property.

5.3.2 Aerial Photographs

The following aerial photographs were reviewed:

Source	*Year*
EDR	1924, 1943, 1951, 1954, 1961, 1966, 1974, 1976, 1984, 1994, 1994, 2006, 2009, 2013, 2017

Summary (of Aerial Photographs)

Subject Property - The Property appears developed with the existing building at 667 Kent Avenue and a building typical of a gas holder at 46 Keap Street on the 1924 and 1943 aerial photographs. Both Property buildings were noted on the 1951 through 2017 aerial photographs.

Nearby Properties - The general vicinity of the Property was largely developed with large scale manufacturing, residential, and commercial facilities on each historical aerial photo.

5.3.3 Fire Insurance Maps

The following fire insurance maps were reviewed:

Source	*Year*
EDR	1. 1887, 1904, 1918, 1922, 1928, 1935, 1947, 1950, 1965, 1977, 1979, 1980, 1981, 1982, 1984, 1986, 1987, 1989, 1991, 1992, 1993, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006, 2007

DRAFT

Summary (of Fire Insurance Maps)

Subject Property - By 1887 through 1904, Sanborn fire insurance maps indicate that a chrome steel works occupied the existing Property building at 667 Kent Ave. Onsite features include a foundry, melting oven, gas house, and rolling mill. That building was occupied by a heavy cooking appliance manufacturing company by 1918. The 667 Kent Avenue address was then occupied by the heavy cooking appliance manufacturing company and a metal can manufacturing company by 1935.

The 46 Keap Street area was improved with a large Gasometer occupied by the Nassau Gas Light Co. from as early as 1887 until as late as 1935. By 1946 through 1950, the current 46 Keap Street was constructed and both Property buildings were occupied by a metal can manufacturing company. From 1965 through 2007, the Property buildings were occupied by manufacturing flats. Notations on the maps indicate that the 46 Keap building was developed in 1946. At least a portion of the 667 Kent building is indicated as developed in 1872.

The 1918 and 1935 maps depict a "Gasol" tank under the floor in the northeastern corner.

Nearby Properties - The general vicinity largely consisted of a mix of manufacturing facilities and dwellings from 1887 to the present. Residential development was noted to the north and manufacturing facilities were noted to the east, south, and west from circa 1887 to 1950. Only manufacturing facilities were noted in the surrounding area until the current multifamily buildings to the west were constructed in 1985.

5.3.4 Property Tax Files

Property tax records were reviewed on the the New York City Department of Finance Automated City Register information System (ACRIS) on-line database. The Property is identified as Parcel Block 2197, Lots 3 and 15 containing 1.27 acres. The improvements are listed as developed in 1930 and 1946 and land use is noted as Industrial. The current owner is identified as Nap Industries and Kolel Damsek Eliezer, Inc, which acquired the Property in 1994 and 2010. No records of environmental concern were identified.

5.3.5 Recorded Land Title Records

Research and review of recorded land title records was beyond the scope of our assessment.

5.3.6 USGS Topographic Maps

The following topographic maps were reviewed:

Quad	*Year*
EDR	1897, 1898, 1900, 1947, 1956, 1967, 1979, 1995, 2013, 2016, 2019

DRAFT

Summary (of Topographic Maps)

Subject Property and Nearby Properties - The topographic maps dated 1897 through 1995 each depict the Property and surrounding areas as shaded to indicate a general area of dense, urban development. Numerous industrial structures and railroad spurs are shown to the southwest and are part of the US Navy Shipyard. The most recent topographic maps dated 2013 to 2019 only depict topographic features and major roadways, with no site-specific improvements shown.

5.3.7 Local Street Directories

The following street directories were reviewed in completion of this Assessment:

- New York Telephone - 1928, 1940, 1945, 1949, 1960, 1965, 1970, 1973, 1976, 1980
- R.L. Polk - 1934
- NYNEX Information Resources Co. - 1985, 1992, 1997
- Cole Information Services - 1994, 1999, 2000, 2004, 2009, 2014, 2017
- Hill Donnelly Information Services - 2005

Subject Property - City directory listings identify previous tenants of the Property to have included Metropolitan Mirror and Glass Company (1929-1949) and Nap Industries (1976-2005) at 667 Kent Avenue. A student was listed as residing at 46 Keap Street on the 1934 city directory. The Gold Nut Co. was identified at the historic address of 34 Keap in 1980

Nearby Properties - An oil refining company and additional manufacturing facilities were listed adjacent to the east in 1934 through 1945. Light manufacturing facilities were noted adjacent to the east on the 1949 to 1992 directories. Manufacturing facilities were listed adjoining to the west from 1928 to 1934 as well as residential listings from 1934 through 2017. A congregation was noted adjacent north from 1994 to 1999 and a Brinks was noted adjoining south from 1994 to 2017.

5.3.8 Building Department Records

GRS Group visited the local building department to review records for the Property. Our review was limited to permit and inspection records, since archived plans were not available.

Our review revealed:

- The current improvements at 667 Kent Avenue (649-667 Kent Avenue / 26-42 Keap Street) were constructed prior to 1918.
- The current improvements at 46 Keap Street (44-54 Keap Street / 25 Hooper Street) were constructed prior in 1946.

DRAFT

- Certificates of Occupancy for 667 Kent Avenue (649-667 Kent Avenue / 26-42 Keap Street) dated 1931, 1954, and 1976.
- Certificates of Occupancy for 46 Keap Street (44-54 Keap Street / 25 Hooper Street) dated 1937, 1946, and 1996.
- Permits were issued for 667 Kent Avenue (649-667 Kent Avenue / 26-42 Keap Street) for oil burner applications dated March 1947, 1947, 1952, 1974, and 1986.
- Permits were issued for 46 Keap Street (44-54 Keap Street / 25 Hooper Street) for oil burner applications dated 1946.
- A permit was issued for 46 Keap Street (44-54 Keap Street / 25 Hooper Street) for two natural gas fired HVAC units dated 2005.

Evidence of the historical use or storage of heating oil at the Property was identified during review of New York City Department of Buildings records. Oil boiler applications dated 1946 for 46 Keap Street and 1947, 1948, 1952, 1974, and 1986 for 667 Kent Avenue were noted. The owner of the Property for approximately 40 years, Maurice Lowi, stated that there are no tanks at the Property during the Property reconnaissance.

5.3.9 Zoning/Land Use Records

Zoning maps reviewed online show the Property to be zoned M1-2 for Manufacturing use.

5.3.10 Other Historical Sources

No other relevant historical records for the subject property were found or reviewed during the completion of this assessment.

5.3.11 Prior Assessments

The following prior assessment reports were provided for our consideration:

- National Grid – Keap Street Data Usability Summary Report - Arcadis - 2009
- Site Characterization Oversight - Langan Engineering and Environmental Services - 2009

The above listed reports are regarding 46 Keap Street, a former gas manufacturing plant for which National Grid is the responsible party. The Langan report includes analysis of the Arcadis subsurface investigation. Langan concluded that soil was not adversely by the former gas facility. However, the Langan report indicated that groundwater has been impacted with contamination above New York state guidelines from an off site source. Langan further concluded that further investigation was required to delineate the off site contamination.

DRAFT

5.3.12 Data Failure

No Data Failure was encountered during the completion of this assessment. The earliest research date was 1940 or earlier and the Property was undeveloped at that time. Research intervals of more than five years were encountered during our review of historical sources; however, activities at the Property were found to be consistent at the beginning and end of these extended research intervals. In accordance with ASTM criteria, such intervals do not constitute data failure.

DRAFT

SECTION 6: SITE RECONNAISSANCE

No conditions or improvements of environmental concern were observed during our reconnaissance of the Property. GRS Group's site reconnaissance of exterior areas included observation of the Property from nearby streets, and along the perimeter of the Property, and periphery of each building. Open areas of the Property were traversed at intervals of approximately 100 feet. Interior observations included all common spaces, maintenance facilities, and storage areas, as well as office space and light manufacturing space.

Site Observations

Property Evaluator	Patrice Piton	Escorted by	Leo Steinberg
Date	February 17, 2022	Escort title	Human Resources Manager
Weather	Sunny	Temperature	65 degrees F

6.1 Common Concerns

Observations of conditions and improvements indicative of environmentally-sensitive activities and materials, if any, are summarized in the following table.

Concern	*Present?*	*Comments*
Above Ground Storage Tanks	No	
Drums/Totes/Bulk Containers	Yes	Adhesives and inks
Dry Wells	No	
Electrical Transformers	No	
Floor Drains	No	
Grease Trap	No	
Hydraulic Equipment	No	
Hazardous Material Use	Yes	Adhesives and inks
Other Suspect Containers	No	
Petroleum Products	No	
Pits, Ponds, and Lagoons	No	
Processes of Concern	Yes	Manufacturing
Septic System	No	
Separator/Clarifier/Settlement Tank	No	
Solid Waste Dumping/Landfills	Yes	Various dumpsters
Stained Soil	No	

DRAFT

Concern	*Present?*	*Comments*
Staining/Corrosion	No	
Stockpiled Soils	No	
Stressed Vegetation	No	
Subsidence	No	
Strong, Pungent or Noxious Odors	No	
Sumps	No	
Surface Repairs (e.g. UST removal)	No	
Underground Pipeline	No	
Underground Storage Tanks	No	
Wastewater/Stormwater Discharge Features (exc. Sanitary Sewage)	No	
Wells	No	

Processes of Concern - The current occupant, NAP, prints labels on plastic packaging and plastic bags and manufactures plastic labels. Onsite operations involve the use and storage of inks and adhesives during the printing and manufacturing process.

Hazardous Materials - The Property is involved in the use of chemicals and hazardous substances in the form of retail-sized containers of routine cleaning and maintenance products as well as 5 to 55 -gallon drums of adhesives and inks as well as totes of adhesive. The observed substances appeared to be appropriately stored and handled. The storage and use of some of these substances results in the generation of regulated or hazardous wastes and the subject property is identified as a current RCRA Large Quantity Generator (LQG) of hazardous waste. Review of the regulatory database report indicates that violations of RCRA regulations have been issued to the current occupant during compliance inspections in 2010, 2018, and 2019. Some violations appear to remain open. A release was not identified in association with the current occupant or operations; however, Property management should ensure that the occupant is in compliance with applicable hazardous waste generation and disposal operations.

Staining/Corrosion - GRS Group observed staining on the concrete floor within the storage and manufacturing areas. The staining appeared to be due to small drips during normal use. GRS Group did not observe evidence of floor drains or other access to the subsurface in the areas of staining.

6.2 Additional Concerns

No additional concerns were identified during the site reconnaissance.

DRAFT

6.3 Adjoining Properties

The occupants, uses and activities described in the following table were observed at adjoining properties during the site reconnaissance:

Direction	*Activities*	*Comments*
North	Decorium catering company (698-716 Wythe Ave and 56-62 Keap Street)	No impact is expected.
South	Kent Avenue followed by a Brinks facility (652 Kent Avenue and 15 Washington Avenue)	No impact is expected.
East	Congregation Satmar (669 Kent Avenue and 1-19 Hooper Street) and a commercial office building (27-43 Hooper Street and 718-720 Wythe Avenue)	No impact is expected.
West	Keap Street followed by multi-family residential land uses.	No impact is expected.

No evidence of the use or storage of hazardous materials, or surface staining or other indications of hazardous substance spills or releases, was observed along the adjoining property boundaries.

DRAFT

SECTION 7: INTERVIEWS

Position	*Name*	*Company*	*Title*	*Contact Information*	*Interview Date*
Current Owner	Maurice Lowi	Nap Industries	Owner	718-541-1246	February 17, 2022
Other	Leo Steinberg	Nap Industries	Human Resources Manager	718-541-1246	February 17, 2022

Key Site Manager

The Key Site Manager has been associated with the Property for 40 years. He had no knowledge of past contamination or cleanup activities, and was unaware of any release or areas of concern associated with the Property.

Current Occupants

As identified in the table above, GRS Group interviewed the owner / tenant at the Property. Discussion of onsite storage and use is contained in Section 6.1.

Past Owners and Occupants

Interview of past owners and occupants is typically performed when adequate information concerning past activities at the Property is not available from other sources. No interview of past owners or occupants was necessary for the completion of this assessment.

Neighboring Property Owners and Occupants

Interview of neighboring property owners was not necessary in our assessment of historical activities at the Property.

Local Government Officials

Building Department - GRS Group researched New York City Department of Buildings records online. Based on the records reviewed, which have been incorporated elsewhere in this report, former tanks were identified at the Property. Discussion of the records reviewed is contained in Section 5.3.8.

Fire Department - GRS Group contacted the local fire department by phone. The desk clerk indicated that requests for information are normally handled through the FOIA process. GRS Group has submitted a FOIA request, the results of which are pending.

DRAFT

SECTION 8: ADDITIONAL SERVICES

Assessment of the following Non-ASTM considerations was performed:

8.1 Asbestos-Containing Building Materials

Asbestos-containing building materials may be present at the Property. Asbestos has historically been present in a wide variety of building materials, although the use of asbestos-containing materials significantly decreased after 1981. The building was constructed in the late 1800s and 1946, at a time when the use of asbestos-containing building materials was common.

During completion of the site reconnaissance, GRS Group identified materials that may contain asbestos, including vinyl floor tile and mastic, drywall and joint compound, ceiling tiles, construction mastics, and roofing systems. These materials were found to be in good condition. No friable or damaged suspect ACM was observed at the Property.

All suspect materials should be handled with due caution and in accordance with applicable regulations.

8.2 Lead-Based Paint

The Property was constructed at a time when the use of lead-based paints was common. Lead-based paint may be present at the Property; however, painted surfaces were observed to be generally undamaged, and new finishes are likely to have been applied over lead-based paint in regularly used areas. In addition, the Property does not provide long-term residential occupancy. As a result, the possible presence of lead-based paint does not represent a significant threat to human health. Sanding and abrasion of painted surfaces should be avoided, and the potential presence of lead-based paint should be considered in future renovation activities; however, no additional action is recommended at this time.

8.3 Drinking Water

Drinking water is supplied by the City of New York and is reported to be in compliance with applicable regulations. A copy of the most recent water quality report published by the City of New York is provided in Appendix N.

8.4 Radon

The Property is located in an area designated by the USEPA as Radon Zone 3, an area with predicted average indoor radon concentrations less than 2.0 picoCuries per liter of air (pCi/L), below the concentration at which the USEPA typically recommends additional action. No sampling was performed to determine site-specific radon concentrations.

DRAFT

8.5 Mold

Leo Steinberg, Human Resources Manager, was interviewed during our assessment and had no knowledge of past or present areas of mold growth or moisture intrusion at the Property or of related tenant complaints. During our site reconnaissance, no visual or olfactory evidence was identified to indicate current or past mold growth or moisture intrusion likely to result in mold growth.

8.6 Wetlands

Based on GRS Group's review of the U.S. Fish & Wildlife Service National Wetlands Inventory Wetlands Mapper, no wetlands were identified at the Property.

8.7 Other Services

Flood Zone - GRS Group reviewed a Flood Insurance Rate Map (FIRM) published by FEMA for the subject property vicinity. According to FIRM panel # 3604970204F dated 9/5/2007, the western portion of the property is located within Flood Zone X Shaded, and area of flood hazard.

A copy of the FIRM is attached in Appendix N.

DRAFT

SECTION 9: CERTIFICATION

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in section 312.10 of 40 CFR 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject Property.

We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312 except as follows:

- GRS Group made the additional inquiries to the User of the report, as required under section 312.22 of 40 CFR 312. However, responses to these questions were not provided by the User, and 40 CFR Section 312 does not require that this information be provided to the environmental professional. However, in order to qualify for innocent landowner, contiguous property owner, or bona fide prospective purchaser protections under CERCLA, any User of this report must independently conform with these requirements.

C: Scope of Work

DRAFT

Exclusions from and Limitations of the ESA Standard

General

The following information concerning exclusions from the ESA standard is provided for clarification and is not intended to reduce or limit similar clarifications contained within the ESA Standard. Certain inherent limitations in the ESA Standard are discussed here; however, the reader should review the full standard in order to assure an appropriate understanding of work.

Principles of the ESA Standard

Considerations Beyond Scope—The use of this practice is strictly limited to the scope set forth in this section. Section 13 of this practice identifies, for informational purposes, certain environmental conditions (not an all- inclusive list) that may exist on a property that are beyond the scope of this practice but may warrant consideration by parties to a commercial real estate transaction. The need to include an investigation of any such conditions in the environmental professional's scope of services should be evaluated based upon, among other factors, the nature of the property and the reasons for performing the assessment (for example, a more comprehensive evaluation of business environmental risk) and should be agreed upon between the user and environmental professional as additional services beyond the scope of this practice prior to initiation of the environmental site assessment process

CERCLA Requirements Other Than Appropriate Inquiry—This practice does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for the LLPs (for example, the duties specified in 42 U.S.C. §9607(b)(3)(a) and (b) and cited in Appendix X1, including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations (AULs), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations).

Other Federal, State, and Local Environmental Laws—This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Users are cautioned that federal, state, and local laws may impose environmental assessment obligations that are beyond the scope of this practice. Users should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on the property that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

Practically Reviewable—information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the property or a geographic area in which the property is located are not generally practically reviewable. Most databases of public records are practically reviewable if they can be obtained from the source agency by the county, city, zip code, or other geographic area of the facilities listed in the record system. Records that are sorted, filed, organized, or maintained by the source agency only chronologically are not generally practically

DRAFT

reviewable. Listings in publicly available records which do not have adequate address information to be located geographically are not generally considered practically reviewable. For large databases with numerous records (such as RCRA hazardous waste generators and registered underground storage tanks), the records are not practically reviewable unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of sites to be identified within a given zip code. In these cases, it is not necessary to review the impact of all of the sites that are likely to be listed in any given zip code because that information would not be practically reviewable. In other words, when so much data is generated that it cannot be feasibly reviewed for its impact on the property, it is not practically reviewable.

Reasonably Ascertainable—information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

Non-Scope Considerations

(Excerpted from the ESA Standard)

The following are identified as "Non-Scope Considerations under the ESA Standard. Unless expressly identified in the agreed proposal for services, all tasks identified below are excluded from this Assessment.

13.1 General:

13.1.1 Additional Issues—There may be environmental issues or conditions at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of this practice (the non-scope considerations). As noted by the legal analysis in Appendix X1 of this practice, some substances may be present on a property in quantities and under conditions that may lead to contamination of the property or of nearby properties but are not included in CERCLA's definition of hazardous substances (42 U.S.C. §9601(14)) or do not otherwise present potential CERCLA liability. In any case, they are beyond the scope of this practice.

13.1.2 Outside Standard Practices—Whether or not a user elects to inquire into non-scope considerations in connection with this practice or any other environmental site assessment, no assessment of such non-scope considerations is required for appropriate inquiry as defined by this practice.

13.1.3 Other Standards—There may be standards or protocols for assessment of potential hazards and conditions associated with non-scope conditions developed by governmental entities, professional organizations, or other private entities.

13.1.4 Compliance with AULs—Parties who wish to qualify for one of the LLPs will need to know whether they are in compliance with AULs, including land use restrictions that were relied upon in connection with a response action. A determination of compliance with AULs is beyond the scope of this practice.

DRAFT

13.1.5 List of Additional Issues—Following are several non-scope considerations that persons may want to assess in connection with commercial real estate. Some common non-scope considerations are discussed further in Appendix X1 and Appendix X5. No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive:

13.1.5.1 Asbestos-Containing Building Materials,

13.1.5.2 Biological agents,

13.1.5.3 Cultural and historic resources,

13.1.5.4 Ecological resources,

13.1.5.5 Endangered species,

13.1.5.6 Health and safety,

13.1.5.7 Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment,

13.1.5.8 Industrial hygiene,

13.1.5.9 Lead-Based Paint,

13.1.5.10 Lead in Drinking Water,

13.1.5.11 Mold,

13.1.5.12 Radon,

13.1.5.13 Regulatory compliance, and

13.1.5.14 Wetlands

DRAFT

Activity Exclusions

- Accessing manholes or utility pit
- Entering of plenum, crawl, or confined space areas (however, the field observer should observe conditions to the extent easily visible from the point of access to the crawl or confined space areas, provided such points of access are readily accessible), determination of previous substructure flooding or water penetration unless easily visible or if such information is provided
- Walking on pitched roofs, or any roof areas that appear to be unsafe, or roofs with no built-in access, or

- determining any roofing design criteria
- Testing and design of equipment
- Collection of samples except as identified in the agreement under which the work is performed.
- Removing, relocating, or repositioning of materials, ceiling, wall, or equipment panels, furniture, storage containers, personal effects, debris material or finishes; conducting exploratory probing or testing; dismantling or operating of equipment; or disturbing personal items or property, that obstructs access or visibility,
- Preparing engineering calculations to determine any the adequacy or compliance of systems and components,
- Reporting on subterranean conditions
- Entering or accessing any area of the premises deemed to potentially pose a threat of dangerous or adverse conditions with respect to the field observer's health or safety, or to perform any procedure, that may damage or impair the physical integrity of the property, any system, or component.
- Compliance with any federal, state, or local statute, ordinance, rule or regulation including, but not limited to, fire and building codes, life safety codes, environmental regulations, health codes, zoning ordinances, compliance with trade design standards, or standards developed by the insurance industry.
- Compliance of any material, equipment, or system with any certification or actuation rate program, vendor's or manufacturer's warranty provisions, or provisions established by any standards that are related to insurance industry acceptance/approval, such as FM, State Board of Fire Under-writers, etc.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GRS | Corteq were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Historical Topo Map Report

02/11/22

Site Name:	Client Name:
Nap Industries	GRS | Corteq
667 Kent Avenue & 46 Keap St	300 Spectrum Center Drive, Suite 145
Brooklyn, NY 11249	Irvine, CA 92618
EDR Inquiry # 6857351.4	Contact: Tony Mueller

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by GRS | Corteq were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

DRAFT

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/20/2021 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 8 RCRA-LQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 01/06/2022 has revealed that there are 14 NY SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 01/31/2022 has revealed that there are 36 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal registered storage tanks

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 19 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 44 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the NY HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there are 3 NY HSWDS sites within approximately 0.5 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 01/01/2019 has revealed that there are 68 NY MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 8 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
OSHA ESTABLISHMENT
HAZARDOUS WASTE BIENNIAL REPORTER
AIR MAJOR
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ZHAO/TIBBE 10/18/2002 17:30 - NYC Fire Dept. responded to scene. It was a trafic accident. The saddle tank of the tractor traler with a capacity of 50 gallons leaked after the accident. Fire Haz Mat stopped leak and removed rest Diesel from tank. Street clean up conducted by Fire Department. No further action required by FD to either DEC or Sanitation Department. According to NYFD, only small portion leaked to street. There was no drain or manhole involved. Clean up was completed by Fire Department. jz"
Remarks:	"traffic accident - 50 gal spill - spill to the pavement and also to a catch basin - "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"3/20/19-Zhune spoke to Mark Hewes. Mark sent the following email-On 3/18/2019 I received DEC inspection Report to determine Hewes Service Station Facility(PBS# 2-337900) compliance with New York State's PBS regulations. Spill was observed in under dispenser containment. I reported Spill (# (1812462) on March 20, 2019.To correct the above, prevent further spills, investigate the source and cause of the spill, licensed contractor Alvin Petroleum Systems, Inc. has been contracted by Hewes Service Station. For preliminary check 2 technician was at the Station on March 19, 2019; found traces of petroleum at the pump 5-6's pan. Alvin Petroleum technician's team will arrive to the site on Friday, March 22, 2019 to start the job to bring Hewes Service Station into compliance. After completing the job Contractor will submit necessary documents to DEC. Sincerely 03/28/19 - Lakhani Pumps 5 and 6 were leaking diesel from the meter. The meters were replaced on 03/27/19. The leak was stopped and the spill was contained and cleaned. 03/29/19 - Lakhani Alvin Petroleum Systems checked all (4) dispenser pans. They found (3) dispenser pans clean. They found the dispenser pan where the #5/6 dispenser is located had a small amount of diesel. They found a slight leak on the meter and

DRAFT

GAS STATION (Continued) **S123662032**

tightened up bolts. They also found a slight leak on the union on #5. Alvin replaced the union and found no leaks. They cleaned up the dispenser pan. Alvin was called back on 03/27 on the meter on #5 leaking again. They replaced the meter and cleaned the pan. Spill is closed."

Remarks: "discovered during inspection"

DEC Memo:	"3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 9/26/03 SHAR addendum for installation of extraction well, EW-1, and monitoring well, MW-5 received. 11/25/03 Reassigned from Vought to Foley. 12/8/03 Received Feasibility Pilot Testing, Analysis, and Report for SVE (Delta, 12/3/03) which concludes SVE is a viable option. 3/19/04 3Q2003 monitoring report received. DTW 7-10'bgs. Total BTEX from ND(MW-6, MW-7) to 231,200ppb(MW-3). MTBE from 5.1ppb to 77,100ppb(MW-3). 0.76' LNAPL in MW-3 and 0.02' in MW-4. 3/19/04 4Q2003 monitoring report received. Total BTEX from ND(MW-6) to 106,670(MW-3). MTBE from 4ppb(MW-7) to 77,500ppb(MW-3). 0.82' LNAPL in MW-3 and 0.16' in MW-4. 4/16/04 1Q2004 monitoring report received. Total BTEX from ND(MW-6 and MW-8) to 111,640ppb(MW-3). MTBE from ND(MW-8) to 77,500ppb(MW-3). 0.55' LNAPL detected in MW-3. 5/7/04 Portfolio meeting: Tanks were abandoned in place and found to be filled with concrete slurry. Adajcent to grade school. Pilot performed on MW-5 for MPE. Tight soils. Off-site wells, MW-7 and MW-8 OK. To submit RAP in a couple weeks. 0.3-0.6' of LNAPL detected. Install SVE first to address potential vapors to school. 5/26/04 Mailed stip. Due back 6/28/04. 6/29/04 Stip fully executed by T. Kunkel. 8/6/04 Received 2Q04 monitoring report. 0.37' LNAPL in MW-3. BTEX from ND(MW-6,7,8) to 74,490(MW-4). 8/31/04 Received Investigation Summary Report dated 8/27/04. 10/8/04 Mailed response to ISR. Requested borings/wells along Hewes Street, crossgradient of MW-4 and MW-5 and along the east side of Kent Avenue, downgradient of MW-3. Report due 12/15/04. 10/18/04 Cross-reference spill #9903413 for waste oil tank failure. Waste oil added to material spilled. 10/29/04 Received RAP and pilot test data for SVE. RAP does not address groundwater impacts. 10/29/04 Issued sidewalk access letter for installation of three monitoring wells 1) one along the east side of Kent Ave.(MW-9) 2) two on the south side of Hewes St.(MW-10, MW-11). Report due 12/15/04. 12/16/04 Received Subsurface Assessment Report for three additional wells installed on 11/15/04. Contaminated soils detected in MW-9 at 9.5-10.5'bgs. MW-10 and MW-11 had clean soil and gw. DTW 9.5-12.5'bgs. On 10/21/04, a round of GW samples were collected. MW-1 (0.5') and MW-3 (0.24') both contained LNAPL. DTW 7.17-9.67'bgs during 12/10/04 survey. Total BTEX ranged from ND(MW-7, MW-10, MW-11) to 415600ppb(MW-3). MTBE from ND(MW-8, MW-10, MW-11) to 272000ppb(MW-3). 1/3/05 Spoke to A. Lapine. Will send me a letter as an addendum to the RAP addressing groundwater concerns (will install PRBs to address free product simultaneously). Would like to install SVE and monitor groundwater. 1/17/05 B. Fisher will send out RAP

HEWES SERVICE STATION (Continued) **U001839388**

addendum letter 1/18. 1/20/05 Received RAP addendum dated 1/18/05. The addendum addresses Delta's proposal to passively collect LNAPL from on-site MWs and to evaluate the potential need to address on-site dissolved-phase impacts in GW upon effective operation of the SVE system. A passive skimmer will be installed in MW-1(4 well). MW-3 and MW-4 are 1 wells and LNAPL recovery is not practical. However, LNAPL thickness will be monitored quarterly to ensure LNAPL thickness does not change. 1/21/05 Issued letter approving RAP and RAP addendum. 3/28/05 Update from B. Fisher: SVE blower is on order and should be here within the next week or so. Have begun construction of the SVE shed in the shop. Once the blower is received, they will complete the trenching of the extraction wells. Installed the passive skimmer in MW-1. System to be installed by mid to late April. 4/27/05 Portfolio meeting- Across from Brooklyn Navy Yard. Contamination discovered during divestment. New owner (Mark Sapozhnikov) in 3/01. Source is tank mat (abandoned tanks with concrete slurry). Grace school is upgradient but adjacent. Currently constructing SVE system. System should be operting within the next two weeks. Passive skimmer operating in MW-1. 6/28/05 4Q04- 0.50' LNAPL detected in MW-1 and 0.24' in MW-3. BTEX from ND(MW-6,7,10,11) to 103750ppb(MW-3). MTBE from ND(MW-10,11) to 64500ppb(MW-3). 10/4/05 1Q05- DTW 7.24 to 9.55'bgs. 0.36' LNAPL detected in MW-1 and 0.11' in MW-3. BTEX from ND(MW-6,10,11) to 113890ppb(MW-3). MTBE from ND(MW-10,11) to 75400ppb(MW-3). 2Q05- DTW 6.69-8.96'bgs. 0.05' LNAPL detected in MW-3. BTEX from ND(MW-6,8,10,11) to 120740ppb(MW-3). MTBE from ND(MW-8,10,11) to 50300ppb(MW-3). 12/6/05 3Q05 - DTW 7.09-9.02'bgs. 0.03' LNAPL in MW-1. BTEX from ND(MW-6,8,10,11) to 124500ppb. MTBE from ND(MW-8,10,11) to 48900ppb(MW-3). 3/16/06 Met with BP and Delta. Divested in 2001. Abandoned tanks were not removed due to proximity to adjacent grade school building. Historically, MW-3 produced 3-4gal LNAPL which was extracted and hasn't reappeared since. In 1Q05, the owner detected product in the interstitial space of the mid-grade tank and sampled. Delta suspects that the tanks are out of compliance. Start-up of SVE is pending Con Ed upgrade within the next couple of weeks. 4/26/06 4Q05 - DTW 6.6-9.11'bgs. 0.05' LNAPL in MW-1 and 0.03' LNAPL in MW-3. BTEX from ND(MW-6,8) to 153020ppb(MW-3). MTBE from ND(MW-10) to 36100ppb(MW-3). 6/8/2006 - Feng - project reassigned to RJFeng. (RJF) 12/27/2006 - Feng - 2Q2006, 11/21/2006, by Delta. Groundwater sampled and gauged 4/14/2006. 11/14 monitoring wells were sampled. DTW 6.63' to 9.32' bg. Flows West-Northwest. LNAPL in MW-1 (0.31'), and MW-3 (0.27'). MW-1, 24,374 ppb BTEX, 277 ppb MTBE. MW-2, 1,163 ppb BTEX, 6,160 ppb MTBE. MW-3, 122,800 ppb BTEX, 45,000 ppb MTBE. MW-4, 93,660 ppb BTEX, 147 ppb MTBE. MW-5, 1,857 ppb BTEX, 24.1 ppb MTBE. MW-6, BTEX ND, 11.6 ppb MTBE. MW-7 was destroyed 1Q2005. MW-8, Dry. MW-9, destroyed 1Q2006. MW-10, 16.2 ppb BTEX, less than 1 ppb MTBE. MW-11, 605 ppb BTEX, less than 1 ppb MTBE. MW-12, 1,212 ppb BTEX, 65.2 ppb MTBE. MW-13, 934 ppb BTEX, 32.1 ppb MTBE. MW14, 22,950 ppb BTEX, 3,320 ppb MTBE. (RJF) 12/28/2006 - Feng - 3Q2006, 12/11/2006, by Delta. Groundwater sampled and gauged 7/27/2006. 11/14 monitoring wells were sampled. DTW 6.72' to 9.01' bg. Flows West-Northwest. LNAPL in MW-1 (0.14'), and MW-3 (0.09'). MW-1, 21,886 ppb BTEX, 334 ppb MTBE. MW-2, 1,239 ppb BTEX, 3,880 ppb MTBE. MW-3, 136,520 ppb BTEX, 18,200 ppb MTBE. MW-4, 75,610 ppb BTEX, 3,030 ppb MTBE. MW-5, 1,478 ppb BTEX, 13.3 ppb MTBE. MW-6, BTEX ND, 12.9 ppb MTBE. MW-7 was destroyed 1Q2005. MW-8, Dry. MW-9, destroyed 1Q2006. MW-10, ND, less than 1 ppb MTBE. MW-11, 4.95 ppb BTEX, 0.60 ppb MTBE. MW-12, 102 ppb BTEX, 4.2 ppb MTBE. MW-13, 1,750 ppb BTEX,

21.4 ppb MTBE. MW14, 15,782 ppb BTEX, 1,950 ppb MTBE. (RJF) 3/6/2007 - Feng - 4Q2006, 2/15/2007. Groundwater sampled and gauged 10/19/2006. 12/12 monitoring wells were sampled. DTW 5.80' to 10.73' bg. Flows north-northwest. No LNAPL. MW-1, 23,637 ppb BTEX, 276 ppb MTBE. MW-2, 1,008 ppb BTEX, 905 ppb MTBE. MW-3, 123,860 ppb BTEX, 17,900 ppb MTBE. 36,210 ppb BTEX, 310 ppb MTBE. MW-5, MW-6, MW-8, and MW-10 are low in BTEX and MTBE. MW-12, 2,326 ppb BTEX, 37 ppb MTBE. MW-13, 782 ppb BTEX, 9.5 ppb MTBE. MW-14, 12,791 ppb BTEX, 1,160 ppb MTBE. Email Delta for the updates and status of the SVE system. (RJF) 3/6/3007 - email from D. Taylor. It's been some difficulties running the SVE. Multiple site visits were required to refine the system operation to the point that could maintain operation for more than a few days after each O&M visit. It is now running at both wells (SVE-1 and SVE-2) on a consistent basis without the shutdown issues that had in the past. O&M report will be submitted in 2 weeks. (RJF) 4/19/2007 - Feng - Portfolio meeting with BP and Delta. The site was excavated and installed new tanks in the south and north portion. Plan to excavate more soil source. The SVE only to address the vapor issue for the school. It was used to have LNAPL in MW-1 and EFR events performed until no recovery. Delta will wait until the completion of the new gas station and will re-install the well-network. RAP addendum will be submitted. (RJF) 7/24/2007 - Feng - Tank Closure Report, 5/18/2007, by LongShore Environmental Inc.. On April 24, 2007, 4 (4,000-gallon) gasoline double-wall steel USTs and 1 single-wall steel 550-gallon Waste Oil UST were removed. The USTs were located in the west and northwest portion of the property. The tanks were in good condition. For the 4,000-gallon USTs excavation, 6 composite sidewall soil samples and 1 bottom sample were collected. Soil sample 4K-South Sidewall (east) at 7 feet bg, 500 ppb Benzene, 11,000 ppb Ethylbenzene, 24,000 ppb Toluene, 83,000 ppb Xylenes, 2,500 ppb MTBE, 300,300 ppb Total VOCs. 4K-West Sidewall, 20,690 ppb Total VOCs. Following endpoint sampling, the excavation was expanded both vertically and horizontally for the installation of the new tanks. Approximately 594.7 tons of soil was removed from the site. For the 550-gallon waste oil UST excavation, no impact was observed and all soils were returned to the excavation. 4 composite sidewall samples and 1 bottom sample were taken. Some slight exceedance of SVOCs were detected. LongShore recommended that the residual impacted soils be managed under the ongoing remediation effort under spill 00-09318. Email KE (BP) for updates of the site. (RJF) 7/27/2007 - Feng - 1Q2007, 5/3/2007. Groundwater sampled 1/5/2007. All 11 monitoring wells were sampled. DTW 6.55' to 9.18' bg. Flows to north-northwest. No LNAPL. MW-1, 9,721 ppb BTEX, 87.5 ppb MTBE. MW-2, 964 ppb BTEX, 912 ppb MTBE. MW-3, 103,250 ppb BTEX, 10,200 ppb MTBE. MW-4, 25,460 ppb BTEX, 50 ppb MTBE. MW-5, 729 ppb BTEX, 9.3 ppb MTBE. MW-6, BTEX ND, 9.3 ppb MTBE. MW-10, MW-11, ND. MW-12, 544 ppb BTEX, 26.2 ppb MTBE. MW-13, 1,240 ppb BTEX, 19.6 ppb MTBE. MW-14, 8,887 ppb BTEX, 1,070 ppb MTBE. (RJF) 11/28/2007 - Feng - 2Q2007, 8/29/2007. Groundwater sampled 4/5/2007. 10/11 monitoring wells were sampled. DTW 6.42' to 9.13' bg. Flows to northwest. LNAPL in MW-1 (0.03'). BTEX range ND to 101,490 ppb (MW-3). MTBE range ND to 5,230 ppb (MW-3). 3Q2007, 10/29/2007. Groundwater sampled 7/12/2007. 8/11 monitoring wells were sampled. DTW 6.90' to 9.29' bg. Flows to northwest. LNAPL in MW-1 (0.31'). BTEX range ND to 70,040 ppb (MW-3). MTBE range ND to 3,520 ppb (MW-3). 4Q2007, 11/16/2007. Groundwater sampled 10/4/2007. 9/11 monitoring wells were sampled. DTW 6.99' to 9.29' bg. Flows to north-northwest. LNAPL in MW-1 (0.28'). BTEX range

HEWES SERVICE STATION (Continued) **U001839388**

ND to 73,790 ppb (MW-3). MTBE range ND to 3,150 ppb (MW-3). Remedial Action Plan Addendum, 11/2/2007, submitted by Delta. Between 5/31 and 6/5/2007, EnviroTrac, under the observation of Delta and on behalf of BP, performed soil over-excavation activiites on the southern portion of the subject site. The soil was over-excavated to a depth of 10.5 feet bgs, and the over-excavation measured approximately 27 feet long by 20 feet wide. The location of over-excavation was determined based on known soil impacts in the area and due to the ineffectiveness of the on-site SVE system. Groundwater depth was measured in the excavation to be 10.5 feet bg. Total of 297.52 tons of soil was disposed at the Clean Earth of Philadelphia as non-hazardous waste, manifests provided. 6 endpoint samples were collected at 8.5'-9' bg. SW-14, 471,060 ppb BTEX, 723,350 ppb total VOCs. SW-15, 204,810 ppb BTEX, 367,570 ppb total VOCs. SW-16, 37,141 ppb BTEX, 89,975 ppb total VOCs. No bottom sample was collected due to the presence of groundwater. Spoke with David Greffenius (Delta). The abandoned tanks may still in place, they were not removed due the structural restriction. The SVE system is shutdown because it has low/none recovery and that's why the soil excavation at that area was performed. Biweekly bailing of the LNAPL in MW-1 is performing, will be confirmed later on. DEC required additional delineation of downgradient of MW-1 to see the movement of LNAPL. Once the investigation is done, RAP for the entire site will be required. (RJF) 11/29/2007 - Feng - Letter to Kevin Endriss (BP). DEC requires LNAPL recovery, further downgradient delineation, RAP for the entire site. A brief investigation work plan to be submitted by 1/14/2008. (RJF) 1/2/2008 - Feng - Investigation Work Plan submitted by Delta via email. (RJF) 1/22/2008 - Feng - Reviewed Investigation Work Plan. EFR events will be conducted on MW-1 to remove LNAPL. 2 additional monitoring wells will be installed at the former MW-4 and MW-9 locations respectively. And a revised RAP will be submitted upon the completion of groundwater sampling of the newly installed monitoring wells. There is a building located north to the site and no groundwater monitoring wells can be installed to the north of MW-1. DEC emailed to Delta and required the EFR event to be started immediately. (RJF) 1/23/2008 - Feng - Email from Igor Goldstein (Delta). Monthly EFR events will be conducted. Investigation Work Plan is approved. Letter to BP and Delta. Required RIR and RAP to be submitted by 3/24/2008. (RJF) 2/1/2008 - Feng - sidewalk permit letter to Delta for installation of MW-16. (RJF) 2/13/2008 - Feng - 1Q2008, 2/7/2008. Active service station. The monitoring well network was gauged and sampled on 1/18/2008 as part of the quarterly sampling shedule. The site is being remediated via the current operation of an installed SVE system. 10 wells were gauged. DTW 6.48' to 9.07' bg. Flows to north-northeast. LNAPL in MW-1 (0.06'). 8 wells were sampled. BTEX range ND to 57,100 ppb (MW-3). MTBE range ND to 4,900 ppb (MW-3). (RJF) 4/15/2008 - Feng - Reviewed the Remedial Investigation Report, dated 3/24/2008, by Delta, pdf copy. On February 20 and 27, 2008, Associated Environmental installed two 2-inch diameter monitoring wells MW-15 and MW-16. MW-15 located southwest to the former tank field area and MW-16 at the sidewalk along Kent Ave. MW-15, final well depth at 18 feet, DTW 9 feet, 10 feet of 0.01-inch slotted schedule screen, set screen bottom at 16.5 feet. MW-16, final well depth at 15 feet, DTW 5 feet, 10 feet of screen set screen bottom at 12 feet. No soil sample taken. On 3/12/2008, the wells were gauged and no LNAPL detected. Two groundwater samples were collected. MW-15, ug/L, 2,100 benzene, 8,300

HEWES SERVICE STATION (Continued) **U001839388**

toluene, 3,700 ethylbenzene, 13,000 xylenes, 27,100 total BTEX, 430 MTBE. MW-16, 510 benzene, 15,000 toluene, 2,300 ethylbenzene, 10,000 xylenes, 27,810 BTEX, 57 MTBE. LNAPL in MW-1 recovery were conducted. 1/30/2008, EFR event, 0.5 gallon of LNAPL and 1,450 gallons of petroleum impacted groundwater was extracted. 2/18/2008, hand bailing, 0.01 feet of LNAPL. 2/26/2008, EFR event, 2,005 gallon of petroleum impacted groundwater was extracted. 3/19/2008, hand bailing, no LNAPL. RAP will be submitted 4/18/2008. (RJF) 5/5/2008 - Feng - Reviewed Revised Remedial Action Plan, dated April 18, 2008. The Revised RAP calls for monthly EFR events on MW-1 and MW3. EFR effluent air will be sampled on monthly basis. Groundwater gauging and sampling will be quarterly. Letter to K. Endriss (BP) requiring the revised RAP to include the MW-15 and MW-16 area. Revision to be submitted 6/5/2008 (30 days). (RJF) 5/8/2008 - Feng - Conference call with K. Endriss (BP), G. Hinshalwood and I. Goldstein (Delta). The proposed revised RAP only for treating the source area. Delta will see 2 more quarters of sampling of MW-15 and MW-16 as well as the geochemical sampling to decide what remedy to propose. Delta will submit an addendum letter for conditionally approve the revised RAP. (RJF) 5/9/2008 - Feng - Reviewed the Revised RAP Addendum Letter, dated 5/8/2008 by Delta. Approve Revised RAP with the Addendum Letter. Approval letter to BP and Delta. (RJF) 6/16/2008 - Feng - Letter from Delta, 6/12/2008. On 5/29/2008, EFR event was conducted at MW-1 and found MW-3 to be an 1-inch diameter well and the size is not suitable for use in EFR events. Delta will continue EFR at MW-1 and install a 2-inch or 4-inch well in the MW-3 area. Schedule of well installation will be informed. (RJF) 6/18/2008 - Feng - Portfolio meeting with BP and Delta. The new well will put in as near the MW-3 as possible, will be 4-inch well. Utility will be marked out next week. (RJF) 10/27/2008 - Remedial Progress Report, dated 9/29/2008, by Delta. On 7/16/2008, MW-17 was installed. 4-inch diameter, closed to MW-3. Total depth 19 feet, groundwater was encountered at 10 feet. 15 feet of 0.02 slotted schedule 40 PVC screen. Monthly EFR events from May to 8/2008 on MW-1. Monthly EFR on MW-17 from 7/2008 to 8/2008. A total of 5,255 gallons of water was extracted and disposed. No measurable LNAPL in MW-1 during bailing event from 3/2008 to 9/2008. Groundwater was sampled for bio-parameters. Delta will propose RAP for bio-stimulation by 10/15/2008. They will provide work plan to EPA for their approval also. (RJF) 10/29/2008 - 2Q2008, 4/25/2008, by Delta, by Delta. Active service station. the monitoring well network was gauged and sampled 4/17/2008. The site is being remediated via monthly EFR events. First round of gauging and sampling event of the two new monitoring wells MW-15 and MW-16. 12 wells were gauged. Trace LNAPL in MW-1. DTW 6.66' to 8.88' bg. Flows to north-northeast. 10 wells were sampled. BTEX range ND to 62,900 ug/L (MW-3). MTBE range ND to 6,200 ug/L (MW-3). (RJF) 3/4/2009 - 3Q2008, 11/13/2008, by Delta. Active Service Station. The monitoring well network was gauged and sampled on 7/21 and 7/25/2008 as part of the quarterly sampling schedule. The site is being remediated via monthly EFR events. Also worth noting that this was the first round of gauging and sampling of one new monitoring wells (MW-17) which was installed on 7/18/2008. In addition, groundwater samples for geochemical parameters were also collected during this monitoring event. 13 wells were gauged. LNAPL in MW-1 (0.02'). DTW 5.64' to 9.34' bg. Flows to north-northeast. 9 wells were sampled. 4 wells were not sampled, MW-1 with LNAPL, MW-10, MW-12 and MW-16 insufficient sample volume. BTEX range ND to 57,100

HEWES SERVICE STATION (Continued) **U001839388**

ug/L (MW-3). MTBE range ND to 6,200 (MW-3). 4Q2008, 11/20/2008, by Delta. Active service station. The monitoring well network was gauged and sampled on 10/14/2008. The site is being remediated via Multi Fluid Recovery events. 13 wells were gauged. No LNAPL. DTW 7.11' to 9.80' bg. Flows to north-northeast. 13 wells were sampled. BTEX range ND to 68,900 ug/L (MW-3). MTBE range ND to 6,000 ug/L (MW-3). (RJF) 3/23/2009 - Reviewed the Work Plan Bio-Stimulation Remediation Pilot Study, dated 10/15/2008, by Delta. The Work Plan calls for the application of 1,760 pounds of magnesium sulfate at a starting concentration of 55,000 mg/L in a single monitoring well MW-15. Monitoring program including gauge for the DTW, sulfate, sulfide, DO and pH immediately upon completion of the addition activities and 3 days after the addition, and weekly for 5 weeks. Groundwater will be monitored biweekly following the current procedure for 2 rounds and then continue quarterly. The Work Plan is approved. Report summarizing the pilot study and the recommendation for further corrective action will be submitted by 6/2009. Letter to BP and Dleta. (RJF) 7/24/2009 - 2Q2009, 7/17/2009, by EnviroTrac. BP Service station. The monitoring well network was gauged and sampled on 4/20/2009. 12 wells were gauged. LNAPL in MW-3 (0.10'). DTW 6.20 to 9.37 feet bgs. Flows to north-northeast. 11 wells were sampled. MW-3 with product and MW-6 were not sampled. Max benzene 2,500 ug/L (MW-17). Max BTEX 27,930 ug/L (MW-15). Max MTBE 1,900 ug/L (MW-17). 7/24/2009 - Reviewed Drilling and Well Abandonment Work Plan, dated June 25, 2009, by Delta. Delta proposes to abandon EW-1 and install MW-18 close to EW-1. Email to Delta for another well at the proximity of EW-2. Revised work plan due within 30 days. (RJF) 8/20/2009 - send email to Gordon Hinshalwood (Delta) letting them go ahead with the installation of 2 wells to replace EW-1 and EW-2 as we agreed to during the meeting with BP on 7/30/2009. SHARA due 11/2009. (RJF) 12/15/2009 - reviewed the Drilling and Well Abandonment Work Plan revision, dated 9/10/2009, by Delta. Delta will abandon 2 extraction wells EW-1 and EW-2, and will replace them with 2 new monitoring wells. SHARA will be in by 11/2009. (RJF) 4Q2009, 1/12/2010, by EnviroTrac. BP service station. The monitoring well network was gauged and sampled on 10/26/2009. 15 wells were gauged. LNAPL in MW-3 (0.26'). DTW 7.11-9.46' bg. Flows to north-northeast. 14 wells were sampled. MW-3 was not sampled due to product. Max benzene 1,400 ug/L (MW-17). Max BTEX 31,330 ug/L (MW-19). Max MTBE 1,100 ug/L (MW-17) 1Q2010, 4/9/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 1/15/2010. 15 wells were gauged. LNAPL in MW-3 (0.02'). DTW 7.30-9.56' bg. Flows to north-northeast. 14 wells were sampled. Max benzene 2,400 ug/L (MW-17). Max BTEX 24,870 ug/L (MW-19). Max MTBE 710 ug/L (MW-17). 4/21/2010 - Reviewed Subsurface Hydrocarbon Assessment Report Addendum, dated 12/3/2009, by Delta. On October 11, 2009, EnviroTrac advanced 2 soil borings MW-18 and MW-19 to depth of 16 feet using Geoprobe 6620 DT hollow stem auger and direct push macro core sampling unit. 3 soil samples were collected. unit in ug/kg. MW-18 (9.5-10'), PID 13.4 ppm, 76J benzene, 4,500 xylenes, 14,471 total VOCs, 2,600 benzo(b)fluoranthene, 1,600 benzo(k)fluoranthene, 2,300 chrysene, 38,360 total SVOCs. MW-18 (12.5-13'), PID 59.4 ppm, 100J benzene, 1,557 total VOCs, 114 total SVOCs. MW-19 (12.5-13'), PID 1,195 ppm, 3,600 toluene, 16,700 xylenes, 26,000 1,2,4-trimethylbenzene, 9,500 1,3,5-trimethylbenzene, 64,190 total VOCs, 2,313 total SVOCs. The 2 wells were set and developed on 10/12/2009, and the wells were surveyed on 12/1/2009. On 10/26/2009, all the monitoring wells were gauged. LNAPL in MW-3

HEWES SERVICE STATION (Continued) **U001839388**

(0.18'). DTW 7.11' (MW-6) to 9.46' (MW-13). All the wells were sampled. BTEX range 0.53 ug/L (MW-11) to 31,330 ug/L (MW-19). MTBE range ND (MW-6, MW-10, MW-11 and MW-16) to 1,100 ug/L (MW-17). unit in ug/L. MW-18, 130 benzene, 760 toluene, 100 ethylbenzene, 1,220 xylenes, 2,210 BTEX, 110 MTBE, 12J n-propylbenzene, 240 1,2,4-trimethylbenzene, 91 1,3,5-trimethylbenzene, 580 naphthalene, 3,243 total VOCs, 0.42J benzo(a)anthracene, 0.31J benzo(a)pyrene, 0.45J benzo(b)fluoranthene, 0.16J benzo(k)fluoranthene, 0.13J indeno(1,2,3-cd)pyrene, 360 naphalene, 406 total SVOCs. MW-19, 430 benzene, 20,000 toluene, 1,700 ethylbenzene, 9,200 xylenes, 31,330 BTEX, 16 MTBE, 140 isopropylbenzene, 440 n-propylbenzene, 22J p-isopropyltoluene, 3,700 1,2,4-trimethylbenzene, 1,100 1,3,5-trimethylbenzene, 86J n-butylbenzene, 1,200 naphthalene, 38,034 total VOCs, 960 naphalene, 963 total SVOCs. 4/23/2010 - email comments on SHARA to Delta. 1) rose diagram; 2) surrounding sketch; 3) check possible delineation at the commercial building and the school, and definite delineation around MW-19. work plan due 5/2010. 6/2/2010 - 2Q2010, 5/18/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 4/14/2010. 15 wells were gauged. NO LNAPL. DTW 6.50-8.73' bg. Flows to north-northeast. 15 wells were sampled. Max benzene 1,000 ug/L (MW-3). Max BTEX 47,700 ug/L (MW-3). Max MTBE 2,100 ug/L (MW-3). 7/29/2010 - Enhanced Bioremediation Pilot Summary, dated May 31, 2010, by Delta. On October 26, 2009, all the wells were gauged for DTW, and presense of lNAPL. Note that 0.18 feet of lNAPL in MW-3. All the wells were sampled for baseline. On 11/3/2009, 460 lbs of magnesium sulfate was mixed with 1,000 gallons of water and gravity feed into MW-15 over a four hour period. 11/4/2009, sulfate sampled. MW-15, 5,420 mg/L. MW-18, 1,520 mg/L. MW-12, MW-16 and MW-14 also exhitbited elevated sulfate concentrations compared to the baseline analysis, while the other wells MW-2, MW-5, MW-6, MW-10, MW-11 and MW-19 did not. The sulfate ncentration in application monitoring well MW-15 initially spiked from less than 1.5 mg/L to 5,420 mg/L within the first 24 hours, and then gradually decreased to 75.2 mg/L after 80 days. In conclusion, the application was not exceed the boundary limit of 250 mg/L sulfate; the increase of sulfate in MW-10 was most likely indicative of background sulfate concentrations; only 6 wells were affected from the application point; elevated concentrations of sulfate in the application well consistently dissipated during the 80 days. 8/2/2010 - email comments on the pilot summary. 1) product in MW-3; 2) full scale work plan by 8/2010; 3) keep monitoring all the wells to ensure that there is no exceedances of the 250 mg/L criteria. 08/06/2010: This spill was temporarily (for 6 months) transferred to A. Doronova. - AD 08/09/2010: Received an e-mail: Ms. Doronova: Attached please find a work plan for the above-referenced site detailing our plans for a full-scale sulfate solution application. Please let me know if you have any questions. gh Gordon Hinshalwood, PhD- North American Operations Delta Consultants, an Oranjewoud N.V. Company Direct +1 914 495 9933 - USA Toll Free 800 477 7411 ghinshalwood@deltaenv.com - www.deltaenv.com Dl the pfd copy of WP to eDocs. Will review. AD 10/2010: Discussed the WP with J. MW-19, 13,300 ug/L BTEX, less than 5.0 ug/L MTBE. 5/1/2012 - 1Q2012, 3/28/2012, by Antea Group. Groundwater was sampled on 1/18/2012. MW-1, 0.01' of LNAPL. Multiple wells with high level of BTEX and relatively high MTBE. The next scheduled sampling for April 2012. 6/29/2012 - reviewed Drilling Work Plan, dated 6/11/2012, by Antea Group. Proposed 2 additional monitoring wells and 6 soil borings. The borings are to assess the soil quality in areas where historical data showed hydrocarbon impacts and/or soil data has not been evaluated. 2 wells are proposed to enhance the well network and further delineate the gw impacts previously identified at the site, intended to target those area adjacent to existing monitoring well MW-19 and former MW-8, as well as to the east of formerly abandoned USTs. Email with 14 comments to BP/Antea. see eDoc. Revised work plan by the end of July 2012. 8/27/2012 - 2Q2012, 6/29/2012, by Antea Group. The groundwater was sampled on April 9, 2012. The next sampling will be in July 2012. MW-1, 1,111 BTEX, 16 MTBE. MW-3, 45,800 BTEX, 1,100 MTBE. MW-5, 297 BTEX, 14 MTBE. MW-12, 123 BTEX, 9.9 MTBE. MW-14, 386 BTEX, 2.1 MTBE. MW-15, 11,420 BTEX, 47 MTBE. MW-16, 4,302 BTEX, 2.3 MTBE. MW-17, 7,920 BTEX, 250 MTBE. MW-18, 1,550 BTEX, 49 MTBE. MW-19, 19,620 BTEX, less than 10 MTBE. 10/10/2012 - Reviewed the Addendum to Work Plan for Additional Delineation, dated 7/31/2012, by Antea Group. 5 soil borings and 3 wells are proposed. Email to BP/Antea I am confused about which work plan do you want me to approve? Your email still attached the one dated 6/11/2012. And I have the revised one dated 7/31/2012 which you responded to our comments. Let me know. I am ok with your response on most of the parts. But I still insist to see delineation in those two buildings area next to the station as I put in the comment 2 and comment 7. MW-7 is far from the station which located across Kent Ave from the station but it still had shown MTBE during the monitoring of its time. I was just trying to say that distance might not a problem for the contaminant to migrate in this case. And if you look at the history of MW-1, MW-2 and MW-12 which located at the edge of the station property, they had high hit in their history. And one of these two building is a 3-story school . So yes, I insist to see the delineation to be done there. 11/30/2012 - 3Q2012, 09/27/2012, by Antea Group. The groundwater was sampled on July 26, 2012. The next sampling will be in October 2012. MW-1, 1,570 BTEX, 30 MTBE. MW-3, 48,300 BTEX, 1,200 MTBE. MW-5, 434 BTEX, 20

HEWES SERVICE STATION (Continued) **U001839388**

MTBE. MW-12, 231 BTEX, 16 MTBE. MW-13, 1,276 BTEX, 22 MTBE. MW-14, 1,457 BTEX, 2.7 MTBE. MW-15, 15,830 BTEX, 57 MTBE. MW-16, 2,753 BTEX, less than 2.5 MTBE. MW-17, 8,300 BTEX, 220 MTBE. MW-18, 1,539 BTEX, 52 MTBE. MW-19, 18,790 BTEX, less than 5.0 MTBE. 1/8/2013 - call from Chris Meyer of Antea Group. They did the drilling work according to the work plan except the PMW-20 and former MW-7 area due to the utilities/subsurface infrastructure. Will submit the investigation report. 12/17/2012 - email from Chris Meyer of Antea Group We are currently planning to conduct the indoor air survey and inventory at the school this Wednesday. In addition to collecting the PID readings you ve requested, we will also be completing the attached building questionnaire. 8/5/2013 - 4Q2012, 2/28/2013, by Antea Group. The monitoring was done on 12/11/2012. MW-1, 894 BTEX, 44 MTBE. MW-3, 61,600 BTEX, 1,000 MTBE. MW-5, 413 BTEX, 17 MTBE. MW-10, 20.5 BTEX. MW-11, 29.2 BTEX. MW-12, 67.2 BTEX, 16 MTBE. A Mr. Miller (847.538.9294) contacted Antea Group, by way of the neighboring gas station 677-87 Kent Avenue, Brooklyn NY when he observed what he believed to be fuel oil in the basement of the building. As 677-87 Kent Avenue is the location of

HEWES SERVICE STATION (Continued) **U001839388**

active NYSDEC case number 00-09318, he was concerned whether the material in his basement was attributed to that open case. We ve been out to his property, gauged the nearby wells, screened the rooms with a PID, and we collected a few samples of the material, which have been sent to a lab for forensic analysis. NYSDEC case number 00-09318, has been associated with a historical gasoline release at the retails station. Based on an overall absence of the elevated PID readings that would accompany gasoline-range hydrocarbons, and absent this update forensics data, we have yet to find a link between this material and the open spill number. Note that the current owner/operator of the retail station does have a permitted 6,000 gallon Fuel Oil UST. That said, we intend to work with the tenant of 33 Hewes Street, to clean out the basement of the accumulated material so that we might be able to further understand its origin. We thought you should be aware of this. Please give me a call with any questions. We ll let you know more as this develops. DEC Feng spoke to Mr. Chan Miller (347-538-9294) at 35 Hewes Street. The building is used as a Jewish elementary school. About 1 month ago, he found oil in his basement. His basement is about 15'x 15' and the oil was about 1-2 inches in depth flooded in the basement. He contacted BP and BP responded to the incident Wednesday last week. Between the incident and the time BP came, Mr. Miller had some guy from a lab took a few samples on 1/7/2016 and lab results show it is fuel oil/diesel/#2 oil. The basement is used for boiler room and sprinkler system. There are sumps/drain/sewage in the basement. He and his people cleaned up the basement today with mops and wipes. There is no smell/odor in the basement or the entire building. There is no tank at all for this building. He is in the school during the day 9:00am to 4:00pm if inspection is needed. Discussed with J. Vought and sent email to BP Nick Onufrak and Antea Gorup Chris Meyer Nick and Chris, I just spoke with the owner, Mr. Chan Miller (347-538-9294). He stated that there was 1 to 2 inches of oil in his basement which is used for boiler room and sprinkler system. He indicated that the building is used for elementary school. He stated that there were no vapors in the basement or in the entire building. The basement was cleaned up by Mr. Miller and his people today with mops and wipes. As the site is an elementary school, we want to ensure timely investigation/remediation. We are sending a responder, possibly Kumar Patel (copied above, 646-201-1488) tomorrow for a site inspection. Please let us know the schedule to monitor and clean up the basement. If possible, please have the current tenant/owner provide the tightness test data for the 6,000-gallon fuel oil UST at the location of the BP retail station. Please provide the forensic sampling report as soon as it is available. We are also be discussing this site with our PBS unit who may visit the BP station as well to ensure all is in working order. email to K. Patel the PBS record, 2013 inspection report and the 4Q2015 monitoring report of the BP station at 677-87 Kent Ave for tomorrow's inspection. 1/27/2016 - As per J. Vought, spill 15-10501 is added into UIS for 35 Hewes Street, Brooklyn. Conference call among Nick Onufrak of BP, Kumar Patel, Jeff Vought and June Feng. K. Patel stated that during this inspection this morning he did not see any oil drops. The basement is filled with sewage smell. The building kitchen is in the area and he suspected that is the kitchen grease trap. Mr. Miller will hire a plumber to check the sewage system. Nick has concern regarding the old abandoned USTs that near the school area but could not be removed due to structural integrity. Nick shall have the forensic report by Friday

HEWES SERVICE STATION (Continued) **U001839388**

and he will share that with DEC as soon as it becomes available. email from Kumar Patel to DEC Vought and Feng I inspected site 35 Hewes Street this morning and met Mr. Miller. We walked through dining area and kitchen on first floor on our way to the basement. No petroleum odors noted in dining area or kitchen, but noted sewage/grease trap odors at the basement hatch which is inside the kitchen area. Found water on basement floor with strong sewage kind smell. No sign of petroleum product (sheen or odors) noted in the basement. Mr. Miller confirmed absence of petroleum odors in the building. Based on field observations, recommended him to have grease and sewer trap checked by a plumber. email to NYSDOH and NYCDOH Dear Mike, Nathan, and Chris, On 1/26/2016, we received an email from BP and their consultant, Antea Group, stating that they had been contacted by a tenant of 35 Hewes Street who had observed fuel oil in the basement of their building. The building is used as a Jewish elementary school. BP and Antea Group is managing a long term petroleum remediation project of gasoline contamination associated with an active BP gas station located at 677-87 Kent Ave which is immediately adjacent to 35 Hewes Street. Antea Group has gauged nearby monitoring wells at the BP station, screened 35 Hewes Street with PID meter, and collected product samples from 35 Hewes Street for forensic analysis. Antea Group noted that they had not found to date that they were the source of the seepage but still intended to clean up the basement for further inspection of the possible seepage source. We spoke with the school representative who noted that there were no odors in the basement or the entire building. According to BP, the forensic report shall be available this Friday. Kumar Patel from our Unit inspected the site this morning and met with the school representative. He noted no petroleum odor but did note sewage/grease trap odors at the basement hatch which is inside the kitchen area. Water on the basement floor was found with strong sewage smell. No sign of petroleum product (sheen or odors) were noted in the basement. The school representative also confirmed the absence of petroleum odors in the building during his inspection. Kumar recommended the school have the grease and sewer trap be checked by a plumber and the representative agreed to have it performed. Kumar noted the address on the building is 35 Hewes Street. I checked the NYCDOB database and alternative addresses for this location included 33-39 Hewes Street, 35 Hewes Street and 671 Kent Ave. I also checked ACRIS and the address in the deed and mortgage agreement is 33 Hewes Street. Let us know if you have any questions/comments, need additional information, or think a NYCDOH inspection is warranted Thank you as always, 2/29/2016 - 1Q2016, 2/29/2016. MW-24, 2,604 BTEX, 16 MTBE. 5/31/2017 - Feng - This spill is transferred from June Feng to Jeffrey Vought as per Jeffrey Vought. 12/12/17 - Austin - Assigned from Vought to Feng - end 1/30/2018 - Feng - Reviewed Monitoring Report 4Q2017, 1/24/2018, by ARCADIS. MW-22 was detected with product the first time, 1.89 feet. Arcadis is doing investigation to find the source of the product. email to Sahithi Rondla Sahithi, I reviewed the monitoring report and noticed that MW-22 was detected with product the first time. Regarding the findings of the investigation for the source of the product, you mentioned spill 15-10501. As I know, the school building did not have any tank back then. I checked the PBS record, no registration as of today. Back then, when DEC inspected the site when the incident occurred, the inspector noted there was sewage odor in the basement but no sign of petroleum. He then recommended for the grease trap be checked by a plumber. As you said, the product was estimated to be 6-7 years (+/- 2 years) old. It seems not matches the new unweathered product. You mentioned the product from upgradient of MW-22, Manhole 59638. The spill number is 05-06675. According to DEC notes, it is a Con Ed spill. 2 gallons of unknown oil on top of 60 gallons of water. It has been cleaned up by removing the product and re-capping the leaking 3c cable. The spill was then reclassified as dielectric fluid spill. Spill was closed on 1/10/2008. Have you checked to make sure that the monitoring well detected with product is the MW-22? Confirmed the monitoring well was not damaged or unlocked when it was gauged/sampled? MW-22 has been non-detected almost all the time since its installation in 2013. However, there is a closed-in-place tank field in the southeast corner of the site. The monitoring wells, MW-4, MW-15, MW-19, MW-8A, around the abandoned tank field have been either had product or high dissolved of VOCs concentration. MW-22 is located near the area. MW-22 is not upgradient all the time, if you check the flow direction, it varied or you may say it has been flowed to all direction. It shouldn t be surprised if you see detection in that monitoring well MW-22. Have you compared this product to the product from other wells that currently have product, e.g. MW-3 and MW-17, and the diesel product the station is selling? Have you done any product removal since its discovery to see if there is any return of the product? I recommend to do the product removal immediately before it migrates and dissolves more in groundwater while you continue to investigate for the source of the product. Email from Sahithi Rondla

HEWES SERVICE STATION (Continued) **U001839388**

Ms. Feng, We are pretty sure about identification of the well,MW-22. The well was found to be intact with manhole cover and J-plug. I agree this well is in close proximity to former abandoned tankfield. However based on Antea s Soil Boring investigation in April 2016, a total of four soil borings were advanced (SB-20, SB-21, SB-22, SB-23) to assess the subsurface soils between the adjacent property to the northeast(school) and the subject site and two temporary monitoring wells (SB-20 and SB-22) were installed to further assess groundwater conditions . VOC concentrations in excess of NYSDEC CP-51 Soil Cleanup Guidance for Gasoline Impacted Sites were identified in one of the borehole locations (SB-20); SVOC concentrations in excess of NYSDEC CP-51 Soil Cleanup Guidance for Fuel Oil Contaminated Sites were not identified in any of the four borehole locations. Laboratory results indicated that soil impacts identified along the northeast property boundary in the area of SB-20 are likely attributed to current BP assigned spill number 00-09318. Laboratory analysis performed on the two groundwater samples collected from temporary wells SB-20 and SB-22 identified several VOC concentrations above the GWQS in SB-20, but no GWQS exceedances in SB-22. Laboratory analysis identified several SVOC concentrations above the GWQS in the groundwater samples collected from SB-20 and SB-22. LNAPL was not detected in temporary monitoring wells (SB-20 and SB-22) during the assessment. Note that SB-23 is the closest boring to MW-22.Soil analytical data from SB-23 was clean. We compared the fingerprinting results from MW-22 to onsite historic LPH . LPH samples collected at MW-1 (Oct. 2004), MW-3 (March 2001 and Jan. 2013), and MW-8A (Jan. 2013) characterized by Torkelson Geochemistry in Antea Report as moderately weathered to weathered premium grade gasoline (no mention of diesel being present in any sample). However to clarify your question, we did not analyze diesel from existing service operations as we do not believe is required due to the location of current tank field. Coincidentally we are the site today performing 1st Qtr 2018 GW monitoring event. Per your suggestion, we will bail the LPH from MW-22. However I would like to clarify that though we are bailing, Arcadis on behalf of our client ,BP is not accepting the responsibility of LPH in MW-22 ,as we believe is not related to current open spill number 00-09318 at this time. Arcadis is still conducting further investigation into this. As I mentioned on the call, I will summarize the results of the chromatograms in a letter next week for your review. 5/7/2018 - Feng - 1Q2018, 4/24/2018, by Arcadis. Monitoring on 1/30/2018. DTW 7.26 (MW-24) and 13.75 (MW-23). MW-3, 1.08'. MW-15, 0.13', for the first time, 22,030 BTEX, 28 MTBE. MW-17, 0.05'. MW-22, 1.5'. LPH was bailed from MW-22 and stored in an onsite drum for offsite disposal. MW-1, 69 BTEX, 10 MTBE. MW-5, 17 BTEX, 11 MTBE. MW-8A, 1,518 BTEX. MW-14, 1,207 BTEX, 2 MTBE. MW-16, 560 BTEX. HEWES SERVICE STATION (Continued) **U001839388**

on 7/25/2019. DTW 7.00 feet (MW-24) to 13.28 feet (MW-23). MW-3, 0.15' LNAPL. MW-8A, 1,263E BTEX. MW-14, 779 BTEX. MW-15, 1,523 BTEX, 24 MTBE. MW-17, 17,540 BTEX, 93 MTBE. MW-18, 620 BTEX, 22 MTBE. MW-22, no LNAPL. MW-24, 629 BTEX, 71 MTBE. 12/11/2019 - Feng - email from Sahithi of Arcadis Ms. Feng, Just wanted to provide you an update on activities mentioned in RAP for the aforementioned site : -Arcadis installed Dual phase extraction (DPE) wells on November 6th & 7th ,2019 as stated in RAP submitted to NYSDEC dated July 24,2019. -RAP outlines implementing first week long DPE event within 60 days following the DPE well install . So technically ,first DPE event should have been conducted before January 7,2019 -However due to upcoming holiday season, subcontractor scheduling and other logistics, Arcadis will delay this implementation by a week. Arcadis is scheduled to conduct this work during week of January 13,2019. I hope NYSDEC has no objection to our extension request by a week s time. Feng replied no objection. 3/20/2020 - email from Sahithi Rondla Ms. Feng, Per RAWP dated July 2019, Arcadis conducted 2 of 5-day DPE events so far in January & February 2020. However we are having to suspend March 2020 event because of ongoing global Covid-19 crisis. As you know this site operates as gas station in NY where the epicenter for Covid-19 currently is and we are having difficulty with staffing and dealing with logistics related to maintaining the separation distance based on the scope of work & on site business operations. I hope you understand our current situation and be assured that Arcadis will immediately mobilize to the site to conduct 3rd week long DPE event as soon as conditions improve. I will continue to keep you posted about our plans. In the meantime, please do not hesitate to let me know if you have any questions or concerns. Feng reply to Sahithi Rondla Sahithi, I understand. Everybody please stay healthy and safe! 4/2/2020 - Feng - 4Q2019, 1/27/2020, by Arcadis. Monitoring on 10/24/2019. DTW 7.70 (MW-24) to 15.45 (MW-23). LPH was recovered from MW-3, MW-17 and MW-22. The recovered LPH was stored in an onsite drum for subsequent offsite disposal at a EPA approved disposal facility. MW-2, 117 BTEX, 11 MTBE. MW-3, 0.66' LNAPL. MW-5, 90.6 BTEX. MW-8A, dry. MW-14, 1,275 BTEX. MW-15, 3,291 BTEX, 24 MTBE. MW-17, 0.02' LNAPL. MW-18, 1,830 BTEX, 20 MTBE. MW-19, 366 BTEX. MW-22, 0.15' LNAPL. MW-24, 1,219 BTEX, 77 MTBE. 5/11/2020 - Feng - 4/14/2020 email from S. Rondla. Due to COVID-19 pandemic, 2Q2020 field work, i.e. groundwater monitoring and 3rd DPE event pilot test, will be defer to later in the quarter until current situation gets stable. 6/8/2020 - Feng - 1Q2020 and VTE Event Summary Report, 5/29/2020, by Arcadis. Monitoring on 2/12/2020 and 3/16/2020. As of 3/16/2020 MW-1, less than 9 BTEX, 3 MTBE. MW-2, less than 14.5 BTEX, 3 MTBE. MW-3, dry. NO LNAPL. MW-4, abandoned well. MW-5, 74.4 BTEX, 7 MTBE. MW-6, less than 9 BTEX, 4 MTBE. MW-7, abandoned well. MW-8, abandoned well. MW-8A, dry. MW-9, abandoned well. MW-10, less than 9 BTEX, less than 1 MTBE. MW-11, less than 8 BTEX, less than 1 MTBE. MW-12, dry. MW-12A, less than 9 BTEX, 13 MTBE. MW-13, dry. MW-14, 7.2J BTEX, 2 MTBE. MW-15, 344J BTEX, 10 MTBE. MW-16, could not sample due to damaged well inner casing. MW-17, 6,290 BTEX, 36 MTBE. MW-18, 343 BTEX, 11 MTBE. MW-19, 3.7J BTEX, 2 MTBE. MW-22, less than 8.7 BTEX, less than 1 MTBE. NO LNAPL. MW-23, less than 9 BTEX, less than 1 MTBE. MW-24, 2,478 BTEX, 12 MTBE. DPE-1, 550 BTEX, 21 MTBE. DPE-2, 557 BTEX, 10 MTBE. 6/22/2020 - Feng - Reviewed VTE Event Summary. -Between November 6 and November 7, 2019, Arcadis oversaw the installation of 2 extraction wells (DPE-1 and DPE-2) by Hawk Drilling. -Drilled using hollow stem auger drill rig to 25 feet.

HEWES SERVICE STATION (Continued) **U001839388**

-4-inch diameter, 15 feet of 0.02-inch slotted screen, 5 feet riser. -Each DPE wells includes a 5-foot sump so that pump intake can be adjusted during the VTE events to maximize mass recovery -2 multi-day VTE events were conducted in first quarter 2020, 1/20-23/2020, and 2/24-28/2020. -MW-3, MW-5, MW-8A, MW-15, MW-17, MW-18, MW-19 and MW-22 were used as observation -interface probe was used to collect depth to water and depth to product reading -a top-loading pneumatic pump was installed in each extraction well with the pump intake positioned near the bottom of the well screen. -the pneumatic pumps were turned on to begin groundwater extraction -vacuum blower was turned on to begin soil vapor extraction -reading were collected every 60 min throughout the day -water discharge line from each pneumatic pump was run to a 250-gallon water storage tank and will be pumped to vac truck for disposal once it is full by Lorco Petroleum in Elizabeth, NJ. -the truck-mounted vacuum blower effluent line was connected to (2) 375-lb vapor-phase granular activated carbon (VGAC) units in series to allow extracted soil vapor to be treated before discharge to atmosphere. -DPE-1 recharge rate 5 gallons per minute -DPE-1 drawdown was limited to 1 ft -DPE-2 recharge less than 0.5 gpm -higher recharge rate in DPE-1 may be due to its presence of a former excavation -DPE-2 may be the representative of actual groundwater recharge rate at the site. -total 12,775 gallons of groundwater was extracted during the two VTE events. -max drawdown DPE-1 (1.2 feet), DPE-2 (6.1 feet), MW-15 (0.5 feet), MW-18 (1.0 feet), MW-3 (dry), MW-17 (0.4 feet), MW-5 (0.1 feet). MW-19 (0.4 feet), MW-8A (dry), MW-22 (0.0 feet). -vacuum applied in DPE-1 and DPE-2 from 4.9 in Hg to 6.3 in Hg. -air flow rates in DPE-1 and DPE-2 from 87 scfm to 132 scfm -all the monitoring wells, except MW-22, recorded induced vacuum during the VTE. -ROI is 35 feet. -DPE-1 mass recovery ranged 41 to 51 lbs/day -DPE-2 mass recovery ranged 16 to 25 lbs/day -total 196 lbs of vapor phase TPH were removed during the 2 VTE events Based on the high soil vapor mass recovery rates observed in DPE-1 and DPE-2 during the 2nd VTE event, Arcadis proposes additional VTE events at the site to continue removal of VOC mass from the subsurface. 3/2/2021 Feng - Monitoring 4Q2020, 1/29/2021, by Arcadis. Monitoring on 10/29/2020. DTW 6.78 (MW-24) to 13.60 (MW-23) below top of the casing. Water flows to east at hydraulic gradient of 0.03 feet per feet. LNAPL in DPE-1 (0.14) the first time. 0.4 gallons of LPH was recovered from the well via hand bailing using disposable bailers. LPH was sampled on 11/10/2020. LPH samples were collected from DPE-1 and MW-3 to identify the chemical composition and age o the LPH and to determine if the LPH observed in both wells have resemble to each other. LPH in MW-3 contained weathered premium grade gasoline, consistent with the historical fingerprinting analyses conducted in 2001 and 2013. LPH in DPE-1 contained weathered regular grade gasoline and had different composition to LPH detected historically in MW-1, MW-3 and MW-8A. Arcadis will proceed with mobile DPE events starting January 2021 but modifying the technology by using Catalytic Oxidizer unit instead of vapor phase carbon units for off gas treatment. MW-1, 338 BTEX, 22 MTBE. MW-2, < 3 BTEX, < 1 MTBE. MW-3, 0.16 LNAPL. 189,000 BTEX, 2,320 MTBE. MW-4, abandoned 7/2007. MW-5, not sampled due to rain water flooding the well. MW-6, not sampled annually. MW-7, well not sampled since 1/2005. MW-8, well abandoned 1/2007. MW-8A, not sampled due to insufficient water volume. MW-9, well abandoned 4/2006. MW-10, sampled annually. MW-11, sampled annually. MW-12, dry. MW-12A, < 3 BTEX, 5.9 MTBE. MW-13, inaccessible due to tire piles. MW-14, 849 BTEX, 3.7 MTBE. MW-15, 28.7 BTEX, 13.1

HEWES SERVICE STATION (Continued) **U001839388**

MTBE. MW-16, not sampled due to damaged well casing. MW-17, 5,480 BTEX, 69.4 MTBE. MW-18, 1,190 BTEX, 14.8 MTBE. MW-19, 73.2 BTEX, 5.0 MTBE. MW-22, < 3 BTEX, < 1 MTBE. MW-23, not sampled due to rain water flooding well. MW-24, 130 BTEX, 39.3 MTBE. DPE-1, 18,100 BTEX, 261 MTBE. DPE-2, 810 BTEX, 15.3 MTBE."

Remarks: "SOIL AND GROUND WATER DETECTED DURING GEO-PROBE INVESTIGATION."

Owner First Jefferson 24 West 57 Street, STE 504 NY, NY 10019 I also called the Site Contacts - Gary Raff 917-939-1571. I left a message to call back the DEC. or 718-260-2195. Steve Boroski - steve.borkoski@brinksinc.com garry.raff@brinksinc.com Tank has been taken out of service. Steve Boroski - steve.borkoski@brinksinc.com 614-593-2736 Scott - sein2woh.com 8/22/16-Scott Fein sent the following email Ms. Zhune, the Company has retained a consultant and is evaluating, contact the NYCFD authorization to proceed and is evaluating remedial options. I will keep you apprised of all developments. If you have any questions, please contact me. Thank you. 12/16/16-Scott sent the following email Ms. Zhune, in order to fully comp0let the project (remediation and tank decommissioning) the Company is required to obtain several permits from the NYCFD. WE hope to have the permits within the next six weeks. 4/25/18-Scott sent the following email Ms. Zhune, in response to your question, an overview follows. Brink s transports and safeguards currency and negotiable instruments in New York City. A secure facility was constructed for Brink s in Brooklyn to allow Brink s armored trucks to unload cash and negotiable instruments. Since security measures prevent armored trucks from being fueled outside the facility, two diesel dispensing pumps were installed inside the facility when the facility was first constructed. Each dispensing pump is (was) connected by a narrow underground pipe to an underground diesel storage tanks located immediately exterior to the building. At some point there was a pressure fluctuation in one of the underground pipes connected to one of the two diesel dispensers inside the facility. The pressure fluctuation was detected by the facility s Veeder-Root pressure monitoring system. As soon as the pressure fluctuation was detected, the dispenser was shut down and oil no longer flowed from the pipe that triggered the Veeder-Root system. The pressure fluctuation was promptly reported to NYSDEC and the FDNY. In an effort to identify the issue, the exterior tanks were tightness was tested by a state certified consultant (the tanks held pressure and passed the test). The facility then contacted the FDNY and NYC agencies and sought authorization to, (i) remove the exterior tanks and underground pipes and, (ii) allow a fuel company to fuel trucks inside the building from a mobile tank truck operated by Diesel Direct, a third-party vendor. Internal fueling of armored truck would obviate the need for underground tanks, interior dispensers and underground pipes, which for environmental reasons was desirable. FDNY advised that interior fueling would require an FDNY issued variance. A variance application was submitted to the FDNY. Over the past seven months in furtherance of the variance application, FDNY inspected the facility several times, and sought a considerable volume of information including engineering plans. Two weeks ago, FDNY advised that justification for a variance was not sufficient and a variance would not issue. The facility has decided after obtaining the necessary permit to have the exterior underground tanks and all associated piping completely removed in and outside the facility (and of course any remediation conducted subject to NYSDEC supervision) and, proceed with an alternate fueling process for its armored vehicles. We anticipate that the existing tanks and piping will be removed within the next two months. In the event there is evidence of a release, remediation will be conducted by a certified environmental consultant, and overseen by Tenen Environmental Consulting and NYSDEC. We will keep you apprised of all progress. If you have any questions, please contact me. 1/10/2019 - Feng - Duty Desk. Received spill 18-10357 at

PRIVATE RESIDENCE (Continued) **U003074285**

the same site reported by Tenen Environmental. Spoke to Kristin Meisner of Tenen Environmental. They have filed a pre-work notification to DEC PBS unit for tanks and piping closure and removal. Today they exposed the piping and found there was minor stain underneath the piping and had PID reading, so they reported the spill. There are (4) 4,000-gallon diesel USTs located in the parking lot and the piping are running to inside of the building. They haven't exposed the USTs yet. They have already flushed the pipes and the tanks, so no product right now. The tanks have been in services since 1985. No pre-classification soil samples have been done. Unsure if there was any other investigation has been done. Sometime next week they will start the tank removal process. They plan to overexcavate the soil and will collect soil endpoint samples. No plan for installation of new tanks, and no plan to develop the site. Kristin Meisner Tenen Environmental 646-606-2332 Ext. 104 KMeisner@Tenen-Env.com Searched database and found spill 15-05623 which was reported for line test failure. Briefed to and discussed with Veronica Zhune. The two spills will be consolidated under the old spill 15-05623. 5/14/19-Kristin Meisner from Tenen Environmental emailed the Spill and Tank Closure report dated 5/14/19. Based on the above tank closure activities, remedial activities and the results of the post remedial soil and groundwater samples, Tenen concludes the fallowing: . Four 4,000-gallon diesel USTs and two dispensers were properly decommissioned, accessible piping was removed and a portion of the underground piping was abandoned in place. . Petroleum impacted soil in the area of the dispensers was removed and disposed off-site; . All VOCs in soil were below the commercial Use SCOs and only one 1,2,3trichlorobenzene, was detected above the protection of groundwater SCOs; this compound was not detected in groundwater above the AWQS; . All SVOCs in soil are related to historic fill material; . All VOCs in groundwater were below the AWQS with the exception of five components at low concentrations that are associated with degraded petroleum releases; and, . two SVOCs in groundwater above the AWQS are not releated to a petroleum release. Spill Closed. "

Remarks: "failed line test - repair and retest clean up pending"

DEC Memo:	"1/10/2019 - Feng - Duty Desk. Spoke to Kristin Meisner of Tenen Environmental. They have filed a pre-work notification to DEC PBS unit for tanks and piping closure and removal. Today they exposed the piping and found there was minor stain underneath the piping and had PID reading, so they reported the spill. There are (4) 4,000-gallon diesel USTs located in the parking lot and the piping are running to inside of the building. They haven't exposed the USTs yet. They have already flushed the pipes and the tanks, so no product right now. The tanks have been in services since 1985. No pre-classification soil samples have been done. Unsure if there was any other investigation has been done. Sometime next week they will start the tank removal process. They plan to overexcavate the soil and will collect soil

DRAFT

BRINKS INC (Continued) **S123660065**

endpoint samples. No plan for installation of new tanks, and no plan to develop the site. Kristin Meisner Tenen Environmental 646-606-2332 Ext. 104 KMeisner@Tenen-Env.com Searched database and found spill 15-05623 which was reported for line test failure. Briefed to and discussed with Veronica Zhune. The two spills will be consolidated under the old spill 15-05623. "

Remarks: "active tank pull - "they've been flushed""

Contact Name:	CHAN MILLER
DEC Memo:	"1/26/2016 - Feng - email from BP Nick Onufrak to DEC Vought and Feng Hello June and Jeff, We received a call from the tenant of 33 Hewes Street, Brooklyn NY. A Mr. Miller (847.538.9294) contacted Antea Group, by way of the neighboring gas station 677-87 Kent Avenue, Brooklyn NY when he observed what he believed to be fuel oil in the basement of the building. As 677-87 Kent Avenue is the location of active NYSDEC case number 00-09318, he was concerned whether the material in his basement was attributed to that open case. We ve been out to his property, gauged the nearby wells, screened the rooms with a PID, and we collected a few samples of the material, which have been sent to a lab for forensic analysis. NYSDEC case number 00-09318, has been associated with a historical gasoline release at the retails station. Based on an overall absence of the elevated PID readings that would accompany gasoline-range hydrocarbons, and absent this update forensics data, we have yet to find a link between this material and the open spill number. Note that the current owner/operator of the retail station does have a permitted 6,000 gallon Fuel Oil UST. That said, we intend to work with the tenant of 33 Hewes Street, to clean out the basement of the accumulated material so that we might be able to further understand its origin. We thought you should be aware of this. Please give me a call with any questions. We ll let you know more as this develops. DEC Feng spoke to Mr. Chan Miller (347-538-9294) at 35 Hewes Street. The building is used as a Jewish elementary school. About 1 month ago, he found oil in his basement. His basement is about 15'x 15' and the oil was about 1-2 inches in depth flooded in the basement. He contacted BP and BP responded to the incident Wednesday last week. Between the incident and the time BP came, Mr. Miller had some guy from a lab took a few samples on 1/7/2016 and lab results show it is fuel oil/diesel/#2 oil. The basement is used for boiler room and sprinkler system. There are sumps/drain/sewage in the basement. He and his people cleaned up the basement today with mops and wipes. There is no smell/odor in the basement or the entire building. There is no tank at all for this building. He is in the school during the day 9:00am to 4:00pm if inspection is needed. Discussed with J. Vought and sent email to BP Nick Onufrak and Antea Gorup Chris Meyer Nick and Chris, I just spoke with the owner, Mr. Chan Miller (347-538-9294). He stated that there was 1 to 2 inches of oil in his basement which is

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

used for boiler room and sprinkler system. He indicated that the building is used for elementary school. He stated that there were no vapors in the basement or in the entire building. The basement was cleaned up by Mr. Miller and his people today with mops and wipes. As the site is an elementary school, we want to ensure timely investigation/remediation. We are sending a responder, possibly Kumar Patel (copied above, 646-201-1488) tomorrow for a site inspection. Please let us know the schedule to monitor and clean up the basement. If possible, please have the current tenant/owner provide the tightness test data for the 6,000-gallon fuel oil UST at the location of the BP retail station. Please provide the forensic sampling report as soon as it is available. We are also be discussing this site with our PBS unit who may visit the BP station as well to ensure all is in working order. email to K. Patel the PBS record, 2013 inspection report and the 4Q2015 monitoring report of the BP station at 677-87 Kent Ave for tomorrow's inspection. 1/27/2016 - As per J. Vought, spill 15-10501 is added into UIS for 35 Hewes Street, Brooklyn. Conference call among Nick Onufrak of BP, Kumar Patel, Jeff Vought and June Feng. K. Patel stated that during this inspection this morning he did not see any oil drops. The basement is filled with sewage smell. The building kitchen is in the area and he suspected that is the kitchen grease trap. Mr. Miller will hire a plumber to check the sewage system. Nick has concern regarding the old abandoned USTs that near the school area but could not be removed due to structural integrity. Nick shall have the forensic report by Friday and he will share that with DEC as soon as it becomes available. email from Kumar Patel to DEC Vought and Feng I inspected site 35 Hewes Street this morning and met Mr. Miller. We walked through dining area and kitchen on first floor on our way to the basement. No petroleum odors noted in dining area or kitchen, but noted sewage/grease trap odors at the basement hatch which is inside the kitchen area. Found water on basement floor with strong sewage kind smell. No sign of petroleum product (sheen or odors) noted in the basement. Mr. Miller confirmed absence of petroleum odors in the building. Based on field observations, recommended him to have grease and sewer trap checked by a plumber. email to NYSDOH and NYCDOH Dear Mike, Nathan, and Chris, On 1/26/2016, we received an email from BP and their consultant, Antea Group, stating that they had been contacted by a tenant of 35 Hewes Street who had observed fuel oil in the basement of their building. The building is used as a Jewish elementary school. BP and Antea Group is managing a long term petroleum remediation project of gasoline contamination associated with an active BP gas station located at 677-87 Kent Ave which is immediately adjacent to 35 Hewes Street. Antea Group has gauged nearby monitoring wells at the BP station, screened 35 Hewes Street with PID meter, and collected product samples from 35 Hewes Street for forensic analysis. Antea Group noted that they had not found to date that they were the source of the seepage but still intended to clean up the basement for further inspection of the possible seepage source. We spoke with the school representative who noted that there were no odors in the basement or the entire building. According to BP, the forensic report shall be available this Friday. Kumar Patel from our Unit inspected the site this morning and met with the school representative. He noted no petroleum odor but did note sewage/grease trap odors at the basement hatch which is inside the kitchen area. Water on the basement floor was found with strong sewage smell. No sign of petroleum product (sheen or odors) were noted in the

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

basement. The school representative also confirmed the absence of petroleum odors in the building during his inspection. Kumar recommended the school have the grease and sewer trap be checked by a plumber and the representative agreed to have it performed. Kumar noted the address on the building is 35 Hewes Street. I checked the NYCDOB database and alternative addresses for this location included 33-39 Hewes Street, 35 Hewes Street and 671 Kent Ave. I also checked ACRIS and the address in the deed and mortgage agreement is 33 Hewes Street. Let us know if you have any questions/comments, need additional information, or think a NYCDOH inspection is warranted Thank you as always, 1/27/2016 - email from Nathan Walz June So we aren t sure if it was fuel oil or really gasoline that was observed in the basement? Does the school heat with fuel oil, if so any signs of a leak from a tank located on school property? From a petroleum stand point it doesn t sound like there is a need for NYCDOH inspection since there are no odors that have been reported by any of the involved parties. Kumar Was there a strong odor of sewage or sewer gas thru out the building or only in the basement, just wondering if it was affecting where the students were? Thanks Nate email from K. Patel to N. Walz I did not notice oil tank in basement and strong sewer smell was in basement only. Hiralkumar Patel email from J. Feng to N. Walz Nathan, When I spoke to the school rep yesterday, he stated that they do not have any tanks at all for the building. I searched the PBS records, nothing was found for this location. BP/Antea indicated that they have collected samples when they responded to the incident. The sampling report shall be ready by this Friday, by then we may be able to confirm the type of material in the basement. Thank you, Email from N. Walz Okay thanks, think we should be all set unless there is a complaint from the school email from M. Hughes I spoke with Chris a short time ago, he has not seen these emails, tied up with other issues, but thinks this may be worth reporting to DEP and/or City DOH due to sewer odors. He will check email later and forward as appropriate. Allan out today and tomorrow. 1/28/2016 - email from Chris D'Andrea of NYCDOH Sewer gas odors may be handled by DEP or our Public Health Engineering Program (I copied the director Li Lily Huang). Occupants can call 311 to register a complaint and it will be routed to the appropriate group. -chris DEC Feng called Mr. Miller of the school (347-538-9294) and let him know that, as per NYCDOH's email, sewer gas odors may be handled by DEP or NYCDOH's Public Health Engineering Program. He shall call 311 to file a complaint and DEP/NYCDOH shall handle the complaint from there. Feng also advise Mr. Miller that the sampling report by BP shall be ready this Friday and will be shared with him when it becomes available. 1/29/2016 - received and reviewed Hydrocarbon Fingerprint Analysis and Evaluation Report, dated 1/28/2016, submitted by Antea Group. 3 product samples GS-D, GS-L and GS-M were collected and sent to Torkelson Geochemistry, Inc for fingerprint analysis. All 3 samples are most likely a moderately weathered middle distillate, either diesel fuel or fuel oil that was released 6+/-2 or 7+/-2 years ago. DEC Feng called Mr. Miller, the school rep and informed him the results of the fingerprint that the samples BP collected are most likely weathered diesel fuel or fuel oil. He confirmed again there is no smell in the building this morning, the sewer has been done, there is no more water/oil in the basement, no wetness/seepage in the walls. I asked him to call me if there is any water/oil returned and smell in the building. 2/2/2016 - email from Chris D'Andrea It does not appear that there was or is a fuel oil odor at this site or any

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

visual evidence of a spill. I am unclear on the meaning of these results. What was tested and a what levels was petroleum found? Are these simply trace levels that might be found in any NYC building that has or has historically used fuel oil to heat? Based on previous site visits, I don t see the need to inspect this location for fuel oil impacts. -chris Email from Mike Hughes The analysis is a chromatographic scan of three water samples I assume were taken from the basement, perhaps when sewer and/or gw was entering the basement. The chromatogram only provides a qualitative summary of the VOCs in the water. Based on the presence of C9 and higher aliphatic compounds the analyst thinks it is weathered fuel oil/kerosene. Our lab performs similar analysis but is often able to quantify the results. The presence of these aliphatic compounds do often result in odor complaints. The answer to your question that these might be found in any building that has heated with fuel oil is yes, however, our background study demonstrated what levels of petroleum vocs may be present that do not result in odors, hence our use of the background study for comparison. In this case odors were reported in the past suggesting petroleum contamination The lack of odors now seems to coincide with the mitigation of water penetration into the basement suggesting that the source of the odors was contaminated gw. In the end we would concur that a site visit by your office is not necessary at this time. June coordinated with the school to have them report any future odors/problems. If we need to discuss further let me know. Mike. email from Chris D'Andrea Thanks for the clarification Mike. No need for further discussion, let us know if you need any future assistance with this site. Thanks, Chris Email from Feng to all Thank you Mike for your prompt response. Just to clarify, according to the school rep, Mr. Miller, there were no odors in the basement or the building during the entire course of this incident. When Kumar Patel inspected the school the day after we were notified, he confirmed there was sewage smell at the basement hatch which is inside the kitchen area. The water on the basement floor was also found with strong sewage smell. Last Friday I spoke with Mr. Miller again and he confirmed the sewer problem was checked/fixed by a plumber, there was no water/oil in the basement and there was no wetness/seepage in the walls. He stated again that there was no smell in the building. I would like to confirm that DEC should not require further action at 35 Hewes Street unless water/oil returns to the school basement or any odor complaints are reported. DEC will continue to direct BP on the remediation of the adjacent BP station site spill (Spill 00-09318). Thank you again, email from Mike Hughes with no objection Thanks, correction noted! 3/28/2016 - Feng - Discussed with J. Vought. Feng talked to Mr. Chan Miller (347-538-9294), the school representative. He said everything is fine, nothing happened since the last time we talked. Feng advised him to call the DEC hotline 1-800-457-7362 if anything happens instead of calling me because I will on leave. As per J. Vought. The oily water has been cleaned up. DEC has inspected the site and no re-occurrence of the returning of water. DOHs has no further concerns. No further action is required at this time. Spill is closed in the database."

Remarks: "1/26/2016 - Email from BP Nick Onufrak to DEC Vought and Feng Hello June and Jeff, We received a call from the tenant of 33 Hewes Street, Brooklyn NY. A Mr. Miller (847.538.9294) contacted Antea Group, by way of the neighboring gas station 677-87 Kent Avenue, Brooklyn NY when he observed what he believed to be fuel oil in the basement of the building. As 677-87 Kent Avenue is the location of active NYSDEC

JEWISH ELEMENTARY SCHOOL (Continued) **S118461544**

case number 00-09318, he was concerned whether the material in his basement was attributed to that open case. We ve been out to his property, gauged the nearby wells, screened the rooms with a PID, and we collected a few samples of the material, which have been sent to a lab for forensic analysis. NYSDEC case number 00-09318, has been associated with a historical gasoline release at the retails station. Based on an overall absence of the elevated PID readings that would accompany gasoline-range hydrocarbons, and absent this update forensics data, we have yet to find a link between this material and the open spill number. Note that the current owner/operator of the retail station does have a permitted 6,000 gallon Fuel Oil UST. That said, we intend to work with the tenant of 33 Hewes Street, to clean out the basement of the accumulated material so that we might be able to further understand its origin. We thought you should be aware of this. Please give me a call with any questions. We ll let you know more as this develops."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no 154769 Brindisi found 3 qts unknown oil on 500 gallons water. Sample taken. Clean up pending test results. Lab Sequence Number: 04-06255-001: Aroclor 1260 < 1.0 ppm 8 Aug 04 This incident has not been completed to date because of access. The Manhole is located on an on-ramp to the Brooklyn Queens Expressway (BQE). Cars accelerate at this location as they go up the ramp. Doing this job at night will not help, because the cars only go faster. This job is also complicated by the fact that a large crane is currently parked on the shoulder of the ramp which further restricts traffic. Update: 8/30/04 - 0740 for MH 74032 F/O 66 Williamsburg St East (Incident #154769): The crane and construction material has been moved from this sight. An Environmental Crew sucked out the debris and water from the manhole, on the night of 29 Aug 04, before filling up their truck. The Crew will return to the location this evening. The environmental tag remains in place. UPDATE: 31-AUG-2004 0426HRS B BROWN AS PER E-MAIL Update for F/O 66 E Williamsburg St. (Inc #154769): MH 74032 was double washed with Biogen 760. The sump was found sealed. The environmental tag was pulled."
Remarks:	"3 QRTS UNKNOWN OIL ON 500 GALLONS OF WATER. NO TO ALL 5 QUESTIONS. LAB RESULTS LESS THAN 1 PPM. COMING OFF 24 HOUR PROGRAM DUE TO NOT HAVING ACCESS TO MANHOLE. CON ED REF # 154769."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

TAYLOR WYTHE HOUSES -NYCHA (Continued) **S102399504**

01/13/06: NYCHA spill report mentions that Site Assessment Report is available. Must inquire about report. - SK 07/07/06: NYCHA summary states that a site assessment is available, but not what kind or the date. NYCHA recommends the Department review this assessment. - SK 02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann. 06/05/17: J.Kann - GSIP for investigation at this site was approved in 2016. As per NYCHA at May 31, 2017 meeting, contractor has been selected for this work and will start work in summer 2017. Spill reassigned to Andre Obligado. 9/19/18 - Obligado - I reviewed the Phase II investigation report. 4 soil borings were advanced around the tanks. All soil samples were below CP-51 unrestricted clean up levels. Groundwater was not encountered during geoprobe work. This spill does not appear to be a threat to human health or the environment. Spill closed."

Remarks: "CONTAMINATED SOIL FOUND WHILE REMOVING TANK. UTB WILL BE CLEANING IT UP. MOHAN SHARMA IS UTB CONTACT AT (516) 326-1160. There are two 20,000 gallon USTs at this site both installed in 1974. One failed tightness testing on 10/8/97, and had been taken out of service. "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	10960
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	I04 - Overfill - Product Level Gauge (A/G)
	B00 - Tank External Protection - None
	C00 - Pipe Location - No Piping
	F00 - Pipe External Protection - None
	G03 - Tank Secondary Containment - Vault (w/o access)
	H00 - Tank Leak Detection - None
	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	J02 - Dispenser - Suction Dispenser
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	Not reported
Capacity Gallons:	3000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Record Add: 11/18/1999
Record Upd: 11/13/2012
Updated By: BXANDERS
Site Description: "Location: Naval Station - Brooklyn is located in a flat industrial area within the New York Naval Shipyard in the Williamsburg section of Brooklyn, north of Flushing Avenue, between Clinton Avenue and Williamsburg Place. Site Features: The East River is 1500 feet west of the site. There are two working electrical substations at the site which have three transformers employing dielectric fluid which formerly contained PCBs. Each of the substations is contained within an area surrounded by concrete walls. They are located in the northern portion of the property, adjacent to the property line. Current Zoning/Use(s): Industrial Historic Use(s): A 1987 Phase I investigation showed that the PCB content of the dielectric fluid in the transformers ranged from 250 to 590 parts per million (ppm). Transformer spills stained slabs and soil located beneath the transformers, with soil contamination ranging from 0.5 to 870 ppm. The PCB containing transformers were subsequently retro-filled. Remedial work began in the summer of 1994 and concluded in 1995 and included power-washing the transformers and stained slabs and removing hazardous levels of PCB contaminated soils. The areas were then backfilled with crushed stone and secured. Three monitoring wells were installed to determine whether PCBs had contaminated the groundwater beneath the site at Building 7. Three rounds of groundwater samples collected in September 1996, December 1996, and March 1997, showed no detectable concentrations of PCBs. It was determined that further monitoring at this site was not warranted. In July 2012 NYSDEC placed an Environmental Notice on the Transformer Area which requires written approval from NYSDEC prior to any disturbance or excavation of the soil, proper management and/or disposal of any contaminated materials exposed or removed, and prior approval by NYSDEC for any change in use. The Transformer Area has been delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State."
Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete, to extent that the Navy was able to work around the active transformers. The primary contaminants of concern at the site, PCB's, were addressed by the removal action completed in 1995. Due to the location in a walled transformer yard beneath the crushed stone site cover, and the limited amounts remaining in the soil, residual PCB contamination in the soils will not impact the East River. Three rounds of groundwater samples were non-detect for PCBs. Special Resources Impacted/ Threatened: None "
Health Problem: "Since some contaminated soils remain at the site below concrete or clean backfill, people will not come in contact with contaminated soils unless they dig below the surface materials. In addition, the site is fenced, which restricts public access. "

Remedial work began in the summer of 1994 and concluded in 1995 and included power-washing the transformers and stained slabs and removing hazardous levels of PCB contaminated soils. The areas were then backfilled with crushed stone and secured. Three monitoring wells were installed to determine whether PCBs had contaminated the groundwater beneath the site at Building 7. Three rounds of groundwater samples collected in September 1996, December 1996, and March 1997, showed no detectable concentrations of PCBs. It was determined that further monitoring at this site was not warranted. In July 2012 NYSDEC placed an Environmental Notice on the Transformer Area which requires written approval from NYSDEC prior to any disturbance or excavation of the soil, proper management and/or disposal of any contaminated materials exposed or removed, and prior approval by NYSDEC for any change in use. The Transformer Area has been delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State."
Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete, to extent that the Navy was able to work around the active transformers. The primary contaminants of concern at the site, PCB's, were addressed by the removal action completed in 1995. Due to the location in a walled transformer yard beneath the crushed stone site cover, and the limited amounts remaining in the soil, residual PCB contamination in the soils will not impact the East River. Three rounds of groundwater samples were non-detect for PCBs. Special Resources Impacted/ Threatened: None "
Health Problem: "Since some contaminated soils remain at the site below concrete or clean backfill, people will not come in contact with contaminated soils unless they dig below the surface materials. In addition, the site is fenced, which restricts public access. "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DRAFT

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

Control Type:	ENG
Date Record Added:	12/03/2014
Date Rec Updated:	08/03/2020
Updated By:	LSZINOMA
Site Description:	"Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction."
Env Problem:	"Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Resdiual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills."
Health Problem:	"People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

Updated By: LSZINOMA
Site Code: 478229
Site Description: "Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction."
Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all

DRAFT

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

petroleum product within the site boundaries. Resdiual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills."

Health Problem: "People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

Updated By: LSZINOMA
Site Code: 478229
Site Description: "Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction."
Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Resdiual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills."
Health Problem: "People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil

DEC Memo:	"12/19/2012-Potential BCP candidate. Subsurface investigation is being done to collect more data for BCP application.Andy Lockwood from P.W Grosser indicated that they had a prequalification meeting with DEC BCP few weeks ago. Andy Lockwood will send the report to VZ.(sr) 03/25/13-Zhune called amd spoke to Andy Lockwood from PW Grocery Consult 631-589-6353. He said they submitted the aplication to Brownfield program. They will know by Apri 10, 2013 weather or not they are going to be accepted. 06/13/13 Jonathan Greco sent the following email: The referenced spill site at 74 Wallabout Street in Brooklyn has been accepted into the Brownfield Cleanup Program as site #C224172. With your permission, I would like to reference this in the DEC Remarks section of the UIS and change myself to the project manager for the spill site. 07/09/14 The source of the spill has been determined to be a leaking UST located on the western portion of the site. The UST and free product located on-site will be addressed under the BCP (Site Code C224172). Off-site remediation of the floating product is at least being partially remedied by the BCP Volunteer, but it is expected that their efforts will not fully resolve the off-site issue, and further work may be conducted by the State and/or the RP under the Spills program following completion of the BCP. 11/7/14 On-site work has been completed and site construction is underway. Though bailing of product was conducted at two wells on many occassions, product is still present. Any further actions will be undertaken under Spills program. (Greco 11/7/14) 4/4/16 - Callout to determine off-site extent and address product off-site to be done FY 2016/17. 09/18/17-Hiralkumar Patel. DEC Austin

DRAFT

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

assigned this case for remediation of off-site groundwater impact from a BCP site. 10/27/17-Hiralkumar Patel. searched current and former tax lot maps and noted that the subject site was on Block #: 2261 / Lot #: 1. the subject site was owned by B.C.G. Sales, Inc. from July 1977 to Aug. 2012. alternate address: 74-88 Wallabout Street, 743-755 Kent Ave, 377-391 Flushing Ave PBS #: 2-612240. as per PBS record, the site had nine (9) 1,000 gal diesel USTs, removed in Jan. 2014. but as per reports included in BCP file, PBS application was submitted to register following tanks: - seven (7) 1,000 gal diesel USTs - one (1) 550 gal gasoline UST - one (1) 3,000 gal #2 oil UST other spill # 0307065 was reported on 10/04/2003 due to discharge of natural gas line condensate as old gas main punctured during installation of a new gas line. case closed. summary of available investigation reports from BCP #: C224172: 1) Phase I Environmental Site Assessment Report dated 10/12/2006: - review of available Sanborn maps did not indicate the presence of any buried tanks on the subject site - the subject site was utilized in the past by a bakery shop, a soap company, a wood working company, a lumber company, a shelving company, a chemical company, a paint and varnish manufacturing company, a rope manufacturing company, a plastic processing company, a cleaner industries company and warehouse and household chemical distributing company - in 2006, there were four (4) possible fill ports noticed inside the northern portion of the warehouse area on the main floor of the building - in 2006, there was a capped fill port and a vent pipe noticed along the western exterior wall of the building. according to the property owner, the capped fill port and the vent pipe were associated with an AST that was removed from the building in the past - in 2006, there was a hydraulic elevator motor noticed inside the northern portion of the warehouse area on the main floor of the building. there was hydraulic oil staining and speedi dry noticed in the vicinity of the hydraulic elevator motor 2) Supplemental Phase II Environmental Site Assessment dated Jan. 2013: - review of historical Sanborn map performed as part of Phase I ESA indicated that two gasoline UST existed inside the building ---------- Phase I report states that no buried tanks were noted on Sanborn maps - a limited Phase II investigation was conducted in northern half of the site in Jan. 2007 - in Dec. 2006, a geophysical survey was conducted. GPR profiles collected within northeast corner of the building appeared to be consistent with the size and shape of six (6) 550 gal USTs. additionally, six vent lines (connected to the suspected USTs) were located on the northeast corner of the building - in Dec. 2006, eight (8) soil borings (SB-1 through SB-8) were installed in the vicinity of the suspected USTs on the northeast corner of the building, in the storage area and the asphalt parking lot - boring SB-1 was installed to 6 ft bg where fuel oil odors were detected and refusal encountered - boring SB-2 was installed to 16 ft bg - boring SB-3, SB-4 and SB-6 were installed to 12 ft bg - boring SB-5 and SB-7 were installed to 5 ft bg where refusal encountered - boring SB-8 was installed to 6 ft bg, where slight odors were detected and refusal encountered - one soil sample was collected from each boring, except borings SB-5 and SB-7 (as per table 1, samples were collected from depths between 6 and 11 inches, boring logs suggest that samples may have collected from depths between 6 and 11 ft) ---------- - in Jan. 2007, groundwater samples (GW-1, GW-2 and GW-3) were collected from borings SB-2, SB-3 and SB-4 (11-13 ft bg) ---------- - no contamination found in soil or groundwater samples collected in Dec. 2006 - supplemental

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

Phase II investigation was conducted in Dec. 2012 - in Dec. 2012, eight (8) soil borings (SB009 through SB016) were installed - shallow soils, ranging from 0-8 ft bg were characterized as mostly non-native, historic fill material consisting of brown silty sands. deeper soils, ranging from 8-20 ft bg were characterized as mostly gray, low-plasticity, silty clay ---------- - petroleum like odor was observed in soil from SB009 (4-16 ft), SB014 (0-12 ft), SB015 (0-12 ft) and SB016 (0-12 ft) - visual staining was observed in soils from SB016 (8-12 ft) - in Dec. 2012, two groundwater samples (GW011 and GW013) were collected - in Dec. 2012, three (3) 2-in monitoring wells (MW001, MW002 and MW003) were installed with 10 ft of screen. screens were set 7 ft into and 3 ft above the water table at the time of installation - approx. 1 ft of LNAPL, similar to gasoline, was detected and observed in MW002, located on the southwestern corner of the site ------ - groundwater samples were collected from two wells MW001 and MW003 - in Dec. 2012, three soil vapor samples were collected - no contamination found in soil, groundwater or soil vapor samples - well MW002 was installed near boring SB009 where strong petroleum odors were noted below 8 ft depth - as per well logs, screen in wells MW001 and MW003 were installed below water table 3) Progress Report No. 3 dated 02/27/2014: - nine USTs were removed between 01/08/14 and 01/21/14 - as per tank removal affidavit dated 01/16/14, total of eight (8) 1,000 gal #2 oil USTs and one (1) 3,000 gal #6 oil UST were removed, but as per PBS application dated 05/20/14 shows seven (7) 1,000 gal diesel USTs, one (1) 550 gal gasoline UST and one (1) 3,000 gal #2 oil UST - the seven (7) 1,000 gal USTs were in group located in northeast corner of the site - the 550 gasoline UST was located along northern property line in western portion of the site - the 3,000 gal (#2 or #6 oil) UST was located in west-central portion of the site - 3,060 gal of residual liquid and 14 drums of tank bottoms removed - total of 21 endpoint samples (EP001 to EP 021) were collected from northeast corner of the site where 7 USTs were located in group - four endpoint sidewall samples were collected from location of tank #8 (gasoline UST - SW005 to SW008) and tank #9 (#2 or #6 oil UST - SW001 to SW004) - all samples were collected at 6 ft depth - no contamination found in endpoint samples, but detection limits were high for sidewall sample SW004 which was taken from west sidewall of #2/#6 oil tank excavation 4) Remedial Investigation Report dated 04/30/14: - a geophysical survey conducted on 07/09/13 - due to reinforced concrete, suspect tanks could not be confirmed within eastern interior of the building - cut and capped fill/vent lines were noted on west exterior wall. there was no indication that the lines went beneath the building slab and were likely connected to an AST at one time - an anomaly consistent with a UST was located in the north parking lot perpendicular to the sidewalk of Wallabout street (tank # 8) - on 08/28/13, during removal of the former buildings concrete foundation, one additional anomaly (tank #9) was identified in the southwestern portion of the property ---------- - total of fifteen (15) pits and one concrete vault were identified - fourteen of the fifteen pits were determined to have concrete walls and bottoms - FD016 was determined to have and earthen bottom - several of the structures appeared to discharge into the large concrete vault and several of the structures were piped in the direction of the municipal sewer system - seven (7) soil borings (SB017 through SB023) were installed to a depth of 16 ft bg - shallow soils, ranging from 0 to 8 ft bg were characterized as mostly non-native, historic fill material

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

consisting of brown silty sands. deeper soils, ranging from 8 to 15 ft bg were characterized as mostly gray, low-plasticity, silty clay - no contamination noted in soil samples - four (4) 2-in observation wells (OB001 through OB004), with 10 ft of screen, were installed to determine horizontal extent of LNAPL in the vicinity of MW002 - two (2) 2-in monitoring wells (MW004 and MW005), with 10 ft of screen, were installed - based on well gauging results, groundwater beneath the site flows towards the west-northwest ---------- - groundwater samples were collected from three temporary groundwater sampling points (SB020, SB021 and SB022), two monitoring wells (MW004 and MW005) and one observation well (OB003) - on 09/18/13, LNAPL found in two monitoring wells and three observations wells - source of LNAPL is likely related to UST identified in the southwest portion of the property - no contamination noted in groundwater samples - four (4) soil vapor sampling points (SV004 through SV007) were installed - found Benzene (821 ug/m3) and TCE (143 ug/m3) in soil-vapor samples product thickness on 09/18/13: MW002------2.48 ft MW005------4.95 ft OB001------4.91 ft OB002------sheen OB004------0.02 ft 5) Site Management Plan dated Dec. 2014: - nine USTs were removed - seven USTs (Tank 1 through 7) were identified within a subsurface concrete encasement in the northeast corner of the property - Tank 8 was located in the northwest corner (as per site map, tank was along northern property line in western portion) of the property and found to be encased in concrete --------- - Tank 9 was located in southwest corner (as per site map, tank was in west-central portion) of the property ---------- - the USTs were found to be in poor condition with corrosion holes visually observed in Tanks # 4, 6 and 9 ranging in size up to 1/2 inch in diameter - groundwater was encountered beneath Tank #8 and 9 and LNAPL was visually observed on the water table - there was no signs of petroleum impact beneath the northeast tanks - since there was no evidence of a discharge and there was no groundwater beneath the USTs in the northeast corner of the property, discrete center line soil samples were collected from beneath the former location of the USTs (total 21 samples) - since there was evidence of a discharge and groundwater was encountered beneath Tank # 8 and 9, sidewall samples were collected (total 8 samples) - soils were excavated to a minimum depth of 10 ft bg within the footprint of the proposed building - soils were excavated to 8 ft bg in the portion of the site to be used for the future school expansion ---------- - LNAPL removed through dewatering and VEFR events - LNAPL migration mitigated through the use of the steel sheeting installed at the property's perimeter ---------- - installed a vapor barrier/water proofing membrane under the building's foundation as per Final Engineering Report/Construction Completion Report dated 12/10/14, total of 18,900 gal of LNAPL/groundwater was removed from (excavation and wells) the site. DEC issued a Certificate of Completion on 12/23/14. Andy Lockwood PW Grosser **BCP consultant** Ph. (631) 589-6353 (516) 315-9238 email: AndyL@pwgrosser.com B.C.G. Sales, Inc. **owner from July 1977 to Aug. 2012** Moshe Gewurtz / Dov Kurland **info from online records** 751 Kent Avenue Brooklyn, NY 11211 Ph. (718) 596-4000 Northland LLC. / Starwood LLC. / 74 Wallabout LLC. **property owners/developers** review of Phase I report (dated 10/12/2006), Supplemental Phase II ESA (dated January 2013) and RIR (dated 04/30/2014) suggests that presence of heating oil (#2 or #6) UST in west-central portion of the site was not known until removal of former building concrete foundation. ----------

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

phase I report from Middleton Env. mentioned that review of available Sanborn Fire Insurance Maps did not indicate the presence of any buried tanks on the subject site. but site history section of supplemental Phase II report from PWGC states that a review of historical Sanborn Fire Insurance Map performed as part of the Phase I ESA indicated that two gasoline underground storage tank (UST) existed inside the building. ========== 1:57 PM:- spoke with Andy at PW Grosser and inquired him about well gauging data. Andy believes that off-site wells were free of product after on-site remediation/dewatering and all wells have been closed. he will send documents for review. 2:33 PM:- received email from DEC Forster including daily reports 07/23/14 to 09/1/14. 3:08 PM:- received email from Ryan Morley (ryanm@pwgrosser.com) including two daily reports (both dated 09/16/14)and a site map (dated 09/18/13). both daily reports have same date (09/16/14) at top, bottom of pages include different dates (09/16/14 and 09/17/14). Ryan mentioned that last two gauging events occurred in Sep. 2014 before work was completed in Dec. 2014. product thickness (in ft):

10/30/17-Hiralkumar Patel. 8:54 AM:- spoke with Andy. he confirmed that daily reports submitted on 10/27/17 are from two different days and last well gauging occurred in Sept. 2014. 11/01/17-Hiralkumar Patel. received email from Ryan Morley (at 1:41 PM on 10/31/17) from PW Grosser stating that wells MW005, OB003 and OB004 are currently viable at the site. 11/13/17-Hiralkumar Patel. 4:08 PM:- sent email to Jennifer Lawrence at Environmental Assessment & Remediation including a standby contractor authorization form for gauging of three existing off-site wells, removal of any LNAPL found, sampling of groundwater for VOC/SVOC analyses and report preparation/submission. asked Jennifer to schedule well gauging work. 4:21 PM:- sent email to Melissa Hass at TestAmerica including a standby contractor authorization form for VOC/SVOC and fingerprint analyses of groundwater/product samples. 11/15/17-Hiralkumar Patel. 12:21 PM:- received email from Jennifer. she mentioned that Erin Quell will be managing this project, and well gauging has been scheduled for tomorrow. 11/16/17-Hiralkumar Patel. 12:30 PM:- visited site with DEC Lin and met Michael Ford (EAR technician). three monitoring wells (MW005, OB003 and OB004) were gauged and found product in well MW005. product thickness could not be found due to it's viscosity. product samples have been collected for waste characterization/fingerprint analyses. 1:11 PM:- spoke with Erin. based on field observations, asked Erin to schedule three weekly VEFRing followed by well regauging. also asked her to replace damaged well cap (OB003) and well cover plate (MW005). Erin mentioned that weekly VEFRing will be scheduled after receiving product sample

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

results. 12/01/17-Hiralkumar Patel. 9:31 AM:- received email from Erin including waste characterization sample results. report did not include result of fingerprint analysis. 12/06/17-Hiralkumar Patel. 11:14 AM:- received email from Erin. she mentioned that first VEFRing will occur tomorrow by Island Pump and Tank. 12/07/17-Hiralkuamr Patel. 9:46 AM:- received call from Erin. she mentioned that vacuum truck is in area, but could not remove product from the impacted well due to parked vehicles. asked Erin to have crew wait for sometime and pump out well if parking space become available. also asked her about result of fingerprint analysis and replacement of damaged well cap/cover. Erin mentioned that product sample collected on 11/16/17 was not analyzed for fingerprinting. she will check with on-site tech and ask to collect product sample today, if necessary tools are available, otherwise product sample will be collected next time. she will also schedule well repair during next visit. 12:30 PM:- received call form Erin. she mentioned that crew was able to remove product from well MW-5. crew used interface probe capable of gauging thick product and noted 6.5 ft product in the well prior to pump out. crew conducted multiple pump outs with approx. 15 minutes intervals in-between and gauged well between pump outs. total of 6 pump outs were conducted. at the end, 0.4 ft of product noted in the well. asked Erin to schedule next pump out in afternoon on 12/14/17. 1:13 PM:- left message in general mail box at Rabsky Development, entity listed as owner in DOB permit application filed on 06/19/13. Rabsky Development **owner listed in DOB application submitted in 2013. 505 Flushing Avenue Brooklyn, NY 11205 Attn.: Simon Dushinsky / Raphael Ph. (718) 246-4762 email: rabskygroup@thejnet.com 1:22 PM:- sent email to Erin and asked her to schedule next pump in afternoon on 12/14/17. also asked her to collect product sample for fingerprint analysis and repair damaged wells during next pump out. email copied to Jennifer. 12/08/17-Hiralkumar Patel. 9:52 AM:- spoke with Sam (347-761-2185), building super and requested assistance to reserve some parking spots near well MW5 on 12/14/17. Top Quality Management **building management** 199 Lee Avenue #286 Brooklyn, NY 11211 Attn.: Esty **property manager** Ph. (718) 522-6582 Ext. 103 10:02 AM:- spoke with Erin. she confirmed next pump out on 12/14/17. 3:38 PM:- received email from Erin including data tables summarizing groundwater gauging data and VEFRing event on 12/07/17. Erin mentioned that manhole covers can not be secured because the tabs have been broken of the rings and they have to replace the entire manhole to fix it. 12/12/17-Hiralkumar Patel. 2:56 PM:- approved invoice (# 46288085) from TestAmerica for waste characterization analysis. 12/14/17-Hiralkumar Patel. 1:40 PM:- received message from Erin. 1:42 PM:- spoke with Erin. she mentioned that 2.8 ft of product was noted in well MW005 at beginning. product sample has been collected for fingerprint analysis. the well was vacuumed out for about 30 minutes. crew has been gauging well for 40 minutes after pump out and found no more product accumulation. asked Erin not to continue pump out today and to schedule weekly pump out until further notice. 12/15/17-Hiralkumar Patel. 3:07 PM:- received email from Erin including updated table summarizing data collected to date. 12/21/17-Hiralkumar Patel. 1:10 PM:- received call from Erin. Island Pump gauged wells and found 1.41 ft product in well MW005. after VEFRring for 45 minutes, no more product noted in the well. based on decreased amount of product in the well, next VEFRring will occur after two weeks. 12/27/17-Hiralkumar Patel. 9:25 AM:- received email from Erin including updated table summarizing data collected to date.

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

she mentioned that Island Pump will be at site at noon on 01/04/18. 12/28/17-Hiralkumar Patel. 1:25 PM:- received email from Erin including fingerprint result. lab report indicates that sample contained a petroleum product within most closely resembles degraded #4 oil. ---------- 01/03/18-Hiralkumar Patel. 1:45 PM:- received call from Erin. she mentioned that tomorrow's VEFR event has been cancelled due to snow forecast. 01/08/18-Hiralkumar Patel. 1:24 PM:- received email from Erin stating that next vacuum event has been scheduled for 01/11/18. 01/10/18-Hiralkumar Patel. 1:38 PM:- approved invoice (# 46289471) from TestAmerica for fingerprint analysis. 01/11/18-Hiralkumar Patel. 12:15 PM:- visited site and met Mike (EAR). on-site wells were gauged and found 0.75 ft of product in well MW-5. well MW-5 was VEFRred for approx. 30 minutes. no product noted in well when re-gauged 15 minutes after VEFRring. well MW-5 will be VEFRred again today. 2:03 PM:- received call from Erin. asked her to continue weekly VEFRring. 01/16/18-Hiralkumar Patel. received email from Erin (at 4:17 PM on 01/15/18) including updated table summarizing data collected to date. next gauging will occur on 01/18/18. 01/22/18-Hiralkumar Patel. 12:59 PM:- received call from Erin. 0.75 ft of product was found in well MW-5 prior to VEFRing on 01/18/18. after 45 minutes of VEFRing, well was recharged with 0.05 ft of product. 01/25/18-Hiralkumar Patel. received email from Erin (at 9:57 AM on 01/24/18) including updated table summarizing data collected to date. 02/01/18-Hiralkumar Patel. 1:37 PM:- received call from Erin. she mentioned that crew from EAR and Island Pump responded were on-site to gauge and VEFR the well. EAR technician noted upto 0.47 ft of product in the well at the beginning. no product was noted in the well 15 minutes after first round of VEFRring. Erin mentioned that towards the end of work, an another vehicle struck the vacuum truck. driver of the other vehicle tried to escape after the accident. no-one was hurt in the accident, but the vacuum truck was damaged and need to be towed. Erin also mentioned that crew had to park vacuum truck in the 'no parking' zone due to parking issues near the well location. 1:44 PM:- spoke with DEC Karen Quinn who handles contract payments. informed Karen about accident at the site and damaged vacuum truck. 1:56 PM:- approved invoice (# 121292-121299) from EAR for work performed (project review, well gauging/product recovery, and lab coordination) between 11/14/17 and 11/30/17. 02/09/18-Hiralkumar Patel. 9:49 AM:- approved invoice (# 121685-121704) from EAR for work performed (project review, well gauging/product recovery, and coordination) between 12/01/17 and 12/31/17. 02/12/18-Hiralkuamr Patel. 9:46 AM:- sent email to Erin and Jennifer including a revised standby contractor authorization form. 1:23 PM:- received email from Erin stating that next well gauging/VEFRring will occur on 04/14/18. 02/14/18-Hiralkumar Patel. 10:10 AM:- received email from Erin including groundwater gauging data table. 12:33 PM:- received call from Erin. she mentioned that wells at the site will not be gauged today as crew working at another site. asked Erin to gauge/VEFR wells next week. 03/05/18-Hiralkumar Patel. 12:44 PM:- approved invoice (# 122366-122379) from EAR for work performed (project review, well gauging/product recovery, and coordination) between 01/01/18 and 01/31/18. 03/14/18-Hiralkumar Patel. 3:11 PM:- received email from Erin stating that well gauging/VEFRing will occur tomorrow. 03/22/18-Hiralkumar Patel. received email from Erin (at 11:56 AM on 03/21/18). VAC event scheduled for today has been cancelled due to weather. 03/30/18-Hiralkumar Patel. 10:59 AM:- received email from Erin

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

including well gauging data table. 0.48 ft of product noted in well MW-5 on 03/29/18. 04/02/18-Hiralkumar Patel. discussed available well gauging data with DEC Austin. due to continuous accumulation of product in well MW-5, he asked to review available reports under BCP # C224172 to find details about soil profile and site-specific groundwater flow direction. based on review of available on-site investigation data, more monitoring well(s) may be needed downgradient of the site. 04/03/18-Hiralkumar Patel. 12:09 PM:- spoke with Erin and asked to hold future well gauging/VEFRing activities until further notice. 04/05/18-Hiralkumar Patel. 2:38 PM:- approved invoice (# 123114-123127) from EAR for work performed (project review, well gauging/product recovery, and coordination) between 2/1/18 and 2/28/18. 05/10/18-Hiralkumar Patel. 9:18 AM:- approved invoice (# 123783-123802) from EAR for work performed (project review, well gauging/product recovery, coordination and waste disposal) between 02/21/18 to 03/30/18. 2:33 PM:- sent email to Erin including revised standby contractor authorization form. 06/11/18-Hiralkumar Patel. 10:56 AM:- approved invoice (# 124479-124486) from EAR for project review/coordination between 04/01/18 and 04/30/18. 06/19/18-Hiralkumar Patel. review of available reports indicates presence of degraded #4 oil in monitoring well MW005 which is located down-gradient of former on-site heating oil tank #9. there is conflicting info about grade of fuel oil stored in tank #9: tank removal affidavit shows storage f #6 oil, but PBS application shows storage of #2 oil. 9:58 AM:- sent email to Erin and asked her to schedule well gauging/VEFRring (last gauging was three months ago on 03/29/18). 06/28/18-Hiralkumar Patel. 12:50 PM:- received email from Erin. they gauged wells today and found approx. 1.2 ft of product in well MW-5. 06/29/18-Hiralkumar Patel. discussed with DEC Obligado. based on review of available information, Obligado agreed with replacement of existing well MW-5 with a larger diameter well and passive product recovery using absorbent socks. 07/02/18-Hiralkumar Patel. discussed with DEC Austin. instead of expanding existing well MW-5, he asked to install three additional wells: one on east sidewalk of Kent Ave and south of existing well MW-5, one on east sidewalk on Kent Ave north of existing well MW-5, and one on west sidewalk of Kent Ave down-gradient of existing well MW-5. 07/09/18-Hiralkumar Patel. 12:39 PM:- sent email to Erin including a site map with possible off-site well location markings. 12:39 PM:- spoke with Erin. informed her that the department requires off-site wells to further delineate groundwater impact. asked her to install 4 inch diameter wells to a depth of at least 20 ft bg, with 15 ft of screen. as current PIN lab contracts have expired and new contracts are being negotiated, asked Erin to install wells now only if they can find lab as sub-contractor, otherwise wells should be installed once PIN lab contracts are approved. informed her that soil must be screened and sampled (# of soil samples will depends of field indication of impact) for 8260/8270 analysis. based on findings of product on groundwater, either groundwater samples should be collected for 8260/8270 analyses or product sample should be collected for fingerprint analysis. Erin mentioned that they may request for sidewalk closing permit (if possible) due to parking issues in the area. 07/10/18-Hiralkumar Patel. received email from Erin (at 4:31 PM on 07/09/18) summarizing off-site groundwater investigation discussed yesterday. she inquired if groundwater from well development needs to be drummed. 9:11 AM:- spoke with DEC Lisa Lewis about status on approval of lab contracts. she mentioned that

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

lab contracts are being reviewed and approval may occur in couple of months. 9:19 AM:- sent email to Erin and asked her to proceed with off-site well installation as discussed yesterday. asked her to drum and properly dispose groundwater from well development. 07/11/18-Hiralkumar Patel. 8:28 AM:- approved invoice (# 125307-125308) from EAR for project review/coordination in May 2018. 08/17/18-Hiralkumar Patel. 1:14 PM:- approved invoice (# 126103-126106) from EAR for project review/coordination/VEFR in June 2018. 09/11/18-Hiralkumar Patel. 9:21 AM:- approved invoice (# 126789-126797) from EAR for planning for additional well installation work. 10/05/18-Hiralkumar Patel. 2:11 PM:- approved invoice (# 127774-127780) from EAR for disposal of contaminated water. (DEC Karen OKed typo in work date on page # 18). 10/11/18-Hiralkumar Patel. 9:59 AM:- received call from Erin inquiring about following: - need for trip blank/field blank: yes during new well installation - type of container for VOC analysis: asked Erin to use simple glass jars for VOC analysis (any result less than 200 ppb will be flagged biased low) - # of product sample: product sample from each new well (if found) and from one existing wells (to compare results between existing and new well) - need for TICs for VOCs/SVOCs: no 10/12/18-Hiralkumar Patel. 10:17 AM:- sent email to Melissa at TestAmerica including a revised standby contractor authorization form (due to a new contract #). 10/18/18-Hiralkumar Patel. 12:16 PM:- sent email to Erin including a sidewalk permit request letter. 10/29/18-Hiralkumar Patel. 2:00 PM:- visited site and met Joy Sauer (516-983-6549) and crew from ADT drilling. EAR completed well (MW-6) installation west side of Kent Ave. no high PID readings were noted but some stained soil (not necessarily petroleum impacted) was noted below water table. 10/30/18-Hiralkumar Patel. 9:30 AM:- visited site and met Joy. at the time of inspection, crew was installing well (MW-7) east side of Kent Ave, north of existing well MW-5. no PID readings were noted until 7.5 ft bg, but noted more than 15,000 ppm on PID between 7.5 and 12.5 ft depth. petroleum odors were noted in soil below 7.5 ft depth. asked Joy to collect multiple soil samples (one above water table, one at groundwater interface and one towards end of boring) from each boreholes. based on high PID readings during installation of well MW-7, inspected site 12 Franklin Ave which is located up-gradient of well MW-5 and has oil tank. site 12 Franklin Ave has an AST on saddles and no signs of spill noted from the tank. building representative mentioned that the tank was installed prior to 1983. also inspected sump pit located in underground garage at the subject site. the sump pit is located along Wallabout St (site's northern boundary), in central section. no product/sheen was noted in the sump. no petroleum odors were noted in the garage. 1:07 PM:- received call from Erin. she mentioned that crew completed drilling of the third well (MW-8) on east side of Kent Ave, south of existing well MW-5. less than 300 ppm was recorded on PID in soil below 7.5 ft depth, but free phase product was noted in soil. Erin mentioned that the PID meter was recalibrated prior to installation of well MW-8. based on field observations and PID readings during installation of MW-8, Erin suspects some sort of issue with PID meter during installation of well MW-7 (meter read more than 15,000 ppm in soil in MW-7, but less than 300 ppm in soil in MW-8 even with free product in MW-8). based on available information, asked Erin for following: - multiple soil samples from each boreholes (sampling depths were discussed based on PID values and boring depth) - groundwater sample from all wells where no product noted - product sample from all wells

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

where noted - VEFRring of impacted wells next week 11/02/18-Hiralkumar Patel. received email from Erin (at 6:06 PM on 10/31/18). she mentioned that EAR plans to return to the site the week of November 12 for fingerprinting and groundwater sampling. the plan is to gauge for DTW/DTP and collect groundwater samples from OB003, OB004, MW005, MW006, MW007 and MW008. fingerprinting samples will be collected from all wells with product. she inquired about well survey and groundwater samples from wells with product. sent email to Erin (at 7:00 AM on 11/01/18) and informed her that no need for well survey at this time, and not to collect groundwater samples from wells with product. 11/14/18-Hiralkumar Patel. 12:42 PM:- received email from Erin. they gauged and sampled on-site wells and noted product in well MW005 (1.75 ft) and sheen on purged water from OB003 and OB004. 3:08 PM:- received email from Erin including result of soil samples collected during installation of well MW006 (5-10 ft and 10-12.5 ft bg) on 10/29/18. no contamination noted in soil samples from MW006. 3:13 PM:- received email from Erin including result of soil samples collected during installation of wells MW007 and MW008. two soil samples were collected from both wells. no contamination noted in soil samples except 1,600 ppb Benzene in soil sample from 5-7.5 ft depth in MW008. 11/19/18-Hiralkumar Patel. 2:41 PM:- received email from TestAmerica including result of product fingerprint analysis. product sample was collected from well MW005 on 11/08/18. sample contained petroleum product which most closely resembles #6 fuel oil. 11/23/18-Hiralkumar Patel. 2:49 PM:- approved invoice (# 128471-128476) from EAR for project coordination in Sept. 2018. 11/27/18-Hiralkumar Patel. 2:36 PM:- received email from Erin including result of groundwater samples collected on 11/08/18. groundwater samples were collected from wells MW-X (blind duplicate sample as per email from Erin dated 12/07/18), OB003, OB004, MW006, MW007 and MW008. minor contamination noted in wells MW-X (1,033 ppb total BTEX) and OB003 (247 ppb total BTEX). 11/30/18-Hiralkumar Patel. 1:22 PM:- sent email to Erin including a revised standby contractor authorization form with increased budget. 12/07/18-Hiralkumar Patel. 1:44 PM:- sent email to Erin. asked her to gauge on-site wells (no product recovery at this time) and collect product sample, if noted in wells other than MW005. also asked her to submit detailed logs (including PID/visual/olfactory observations, soil type etc.) for recently installed monitoring wells. 1:57 PM:- approved invoice (# 129500-129517) from EAR for project coordination, mark-out and installation of wells MW006/MW007/MW008. 12/11/18-Hiralkumar Patel. 11:34 AM:- received call from Erin. she mentioned that technician went to site to gauge (no VEFRring) existing wells and noted product in wells MW005 (2 ft), MW007 (0.03 ft) and MW008 (0.01 ft). as last VEFR occurred in June 2018, asked Erin to VEFR existing wells next week. 12/12/18-Hiralkumar Patel. 1:36 PM:- approved invoice (# 4600006924M) from TestAmerica for analysis of soil samples collected during installation of wells MW006/MW007/MW008 (10/29/18 and 10/30/18), product sample from MW005 (11/08/18) and groundwater samples from existing wells (11/08/18). 12/13/18-Hiralkumar Patel. 11:12 AM:- spoke with Erin. asked her to submit an update report, after next week's VEFR event, including summary of work performed to date. 01/09/19-Hiralkumar Patel. 9:11 AM:- approved invoice (# 129959-129973) from EAR for project coordination and groundwater/product sampling work conducted in month of Nov. 2018. 02/06/19-Hiralkumar Patel. 1:09 PM:- approved invoice (# 131267-131279) from EAR for report preparation, well gauging and

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

VEFRring conducted in month of Dec. 2018. 03/01/19-Hiralkumar Patel. 2:48 PM:- approved invoice (# 131833-131841) from EAR for report preparation. 03/15/19-Hiralkumar Patel. received email from Joy (at 2:38 PM on 03/14/19) including site summary report. report includes summary of field activities conducted between Nov. 2017 and Dec. 2018. groundwater purging and field screening were not conducted on OB003, OB004 and MW005 due to sheen in well OB003/OB004 and measureable LNAPL in MW005. product sample from MW005 was collected for fingerprint analysis on 12/14/17 and 11/08/18. on 12/1/17, sample contained a petroleum product which most closely resembles degraded #4 fuel oil. on 11/08/18, sample contained a petroleum product which most closely resembles #6 fuel oil. silty clay was noted below 5 ft depth during installation of wells MW006, MW007 and MW008. lab report shows higher VOC detection in duplicate groundwater sample (MW-X: 1,033 ppb total BTEX) from well OB003 (247 ppb total BTEX). also, there was sheen noted on groundwater sample from OB003. during well gauging and VEFRring in Dec. 2018, product was noted in wells MW005 (1.5 to 2 ft), MW007 (0.03 to 0.13 ft) and MW008 (0.01 to 0.02 ft). 03/25/19-Hiralkumar Patel. 10:14 AM:- sent email to Joy and asked her to schedule weekly vac events for four weeks, beginning with first week of Apr. email copied to Jennifer and Robert. 04/11/19-Hiralkumar Patel. 10:25 AM:- approved invoice (# 132579-132588) from EAR for waste disposal and report preparation/submission, conducted in month of Feb. 2019. 05/06/19-Hiralkuma Patel. representative of property at 376-378 Flushing Ave (BCP #: C224264) submitted permit application for dewatering at their site. site 376 Flushing Ave is located south of Flushing Ave, across the street from the subject site (74 Wallabout St). the department staff (legal, spills and section A) discussed proposed dewatering plans internally and with the applicant due to possibility of migration of free phase product noted on east side of Kent Ave (in wells MW005, MW007 and MW008). DEC legal issued a letter on 05/03/19 to representative of 376 Flushing Ave with following comments (in reference to free phase product at 74 Wallabout St): - the department will undertake all NAPL recovery and vacuum recovery activities in existing well MW005 - the volunteer (BCP applicant for 376 Flushing Ave) will install a sentinel monitoring well on north side of Flushing Ave approx. 75 ft east of the corner of the new building constructed on the Former Arkansas Site (74 Wallabout St). the well should be screened across the observed water table and should be constructed with at least 15 ft of screen below the water table. the well should be 4 in. in dia. to allow for NAPL recovery if necessary. - should NAPL be observed to have migrated into the sentinel well following the initiation of dewatering on the site (376 Flushing Ave), the department will identify any specific actions to abate or mitigate the movement of contamination, which shall be undertaken by the volunteer (376 Flushing Ave) 05/13/19-Hiralkumar Patel. 7:57 AM:- approved invoice (# 133002-133007) from EAR for project review/coordination conducted in month of Mar. 2019. 05/15/19-Hiralkumar Patel. 11:56 AM:- received email from Joy including summary of well gauging/vac event conducted on 04/04/19, 04/11/19, 04/18/19, 05/02/19 and 05/09/19. no gauging activities occurred between 12/20/18 and 04/04/19. after Dec. 2018, product noted in wells MW005 (0.58 to 1.68 ft), MW007 (0.01 to 0.16 ft) and MW008 (0.03 to 0.58 ft). discussed available well gauging/product recovery data with DEC Austin, and decided to continue monthly well gauging/VEFRring. 3:08 PM:- sent email to Joy and asked her to continue monthly well gauging/vacuum recovery and

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

data submission until further notice. 06/05/19-Hiralkumar Patel. 8:48 AM:- received email from DEC Zheng stating that sentinel well (under BCP #: C224264) will be installed on 06/07/19. 06/06/19-Hiralkumar Patel. 9:18 AM:- approved invoice (# 133932-133944) from EAR for project coordination/VEFR conducted in month of Apr. 2019. 06/07/19-Hiralkumar Patel. 11:17 AM:- received email from Joy including summary of well gauging/vac event conducted on 06/06/19. found product in well MW005 (0.81 ft) and MW008 (0.04 ft). 07/05/19-Hiralkumar Patel. 12:51 PM:- approved invoice (# 134788-134802) from EAR for project coordination/VEFR conducted in month of May 2019. 08/26/19-Hiralkumar Patel. received email from Joy (at 2:06 PMon 08/05/19) including summary of well gauging/vac event conducted on 07/11/19 and 08/01/19. on 07/11/19, product noted in wells MW005 (0.93 ft), MW007 (0.31 ft) and MW008 (0.31 ft). on 08/01/19, product noted in wells MW005 (0.82 ft), MW007 (0.19 ft) and MW008 (0.16 ft). DEC Jane sent email (at 4:07 PM on 08/13/19) to Joy approving weekly gauging of wells MW006, MW008, OB003 and OB004; in reference to dewatering activities at adjacent BCP site (C224264). 9:34 AM:- approved invoice (# 135328-135337) from EAR for project coordination/VEFR conducted in month of June 2019. 2:56 PM:- sent email to Joy and asked her to gauge all monitoring wells weekly using interface probe. 08/30/19-Hiralkumar Patel. 2:33 PM:- received email from Joy including weekly gauging data for Aug. 2019. during weekly gauging, all wells were gauged except MW005 and MW007. found product in well MW008 during all four weekly gauging (between 0.16 and 0.29 ft). 09/03/19-Hiralkumar Patel. 9:40 AM:- spoke with Joy and asked her to continue weekly gauging of all wells and monthly VAC of impacted wells. 09/10/19-Hiralkumar Patel. received email from Joy (at 4:52 PM on 09/09/19) including well gauging data table/hydrographs. data suggests that wells OB-003, OB-004, MW-005 and MW-008 are being influenced by the nearby dewatering. received email from Joy (at 5:09 PM on 09/09/19) including well gauging data/VAC recovery summary. all wells were gauged on 09/05/19 and product was noted in wells MW005 (1.10 ft), MW007 (0.61 ft) and MW008 (0.29 ft). product was recovered using vacuum from three affected wells. 09/16/19-Hiralkumar Patel. received email from Joy (at 6:44 PM on 09/13/19) including weekly well gauging data. all wells were gauged on 09/13/19 and product was noted in wells MW005 (0.96 ft), MW007 (0.61 ft) and MW008 (0.26 ft). 9:28 AM:- approved invoice (# 136185-136193) from EAR for project coordination/VEFR conducted in month of July 2019. 09/23/19-Hiralkumar Patel. received email from Joy (at 6:14 PM on 09/20/19) including weekly well gauging data. all wells were gauged on 09/20/19 and product was noted in wells MW005 (0.98 ft), MW007 (0.59 ft) and MW008 (0.19 ft). Pat Benedetto EAR Ph. (631) 447-6400 Ext. 159 email: benedetto@enviro-asmnt.com 10/03/19-Hiralkumar Patel. 2:58 PM:- received call from Pat. he mentioned that they visited the site today for well gauging/VEFRing, but could only gauge the wells due to parking issue. asked Pat to VEFR wells during next weekly event. 10/07/19-Hiralkumar Patel. received email from Pat (at 4:01 PM on 10/04/19) including weekly gauging data. he mentioned that wells MW006, MW007 and MW008 were removed from hydrographs as these wells were never surveyed and casing elevations have not been established. all wells were gauged on 09/26/19 and 10/03/19. on 09/26/19, product was noted in wells MW005 (1.04 ft), MW007 (0.63 ft) and MW008 (0.28 ft). on 10/03/19, product was noted in wells MW005 (0.05 ft), MW007 (0.60 ft) and MW008 (1.12 ft). 8:53 AM:- sent email to Pat and asked him to survey missing

product was noted in well MW006. product was noted in well MW005 (0.65 ft), MW007 (0.53 ft) and MW008 (0.12 ft). 03/30/20-Hiralkumar Patel. 3:20 PM:- received email from Pat inquiring if they should continue well monitoring/VEFRring. 04/01/20-Hiralkumar Patel. 1:04 PM:- spoke with DEC Jane who mentioned that construction at nearby BCP site (376 Flushing Ave) is considered essential as affordable housing building is being built at the site. as such, dewatering at the BCP site will continue. 1:14 PM:- sent email to Pat and informed him that dewatering at BCP site will continue. as such, asked him to continue weekly well monitoring/monthly VEFRring, only if it is done as per applicable guidance in reference to COVID-19. email copied to DEC Jane, DEC Wendi, DEC Austin and Jennifer (EAR). 03/27/20-Hiralkumar Patel. 3:07 PM:- received email from Pat including weekly gauging data collected on 03/25/20. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted in well MW005 (1.71 ft), MW007 (0.48 ft) and MW008 (0.05 ft). 04/15/20-Hiralkumar Patel. 2:15 PM:- received email from Pat including weekly gauging data collected on 04/03/20 and 04/09/20. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted in well MW005 (0.89 ft and 0.92 ft), MW007 (0.42 ft and 0.29 ft) and MW008 (0.07 ft and 0.04 ft). 04/16/20-Hiralkumar Patel. 11:15 AM:- approved invoice (# 140775) from EAR for project coordination/well gauging conducted in month of Feb. 2020. 04/24/20-Hiralkumar Patel. 2:20 PM:- received email from Pat including weekly gauging data collected on 04/17/20 and 04/22/20. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was noted in well MW005 (1.18 ft and 1.41 ft), MW007 (0.54 ft and 0.89 ft) and MW008 (0.03 ft and 0.16 ft). 05/04/20-Hiralkumar Patel. 2:22 PM:- received email from Pat including weekly gauging data collected on 04/29/20. well OB003 was inaccessible and OB004 was found dry. no product was noted in well MW006. product was noted in well MW005 (1.24 ft), MW007 (0.40 ft) and MW008 (0.03 ft). 05/08/20-Hiralkumar Patel. 2:10 PM:- received email from Pat including weekly gauging data collected on 05/06/20. well OB003 was inaccessible and OB004 was found dry. no product was noted in well MW006. product was noted in well MW005 (0.85 ft), MW007 (0.40 ft) and MW008 (0.03 ft). 05/11/20-Hiralkumar Patel. 12:02 PM:- approved invoice (# 140848) from EAR for project coordination/well gauging conducted in month of Mar. 2020. 05/15/20-Hiralkumar Patel. 2:03 PM:- received email from Pat including weekly gauging data collected on 05/14/20. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product was noted in well MW005 (0.98 ft), MW007 (0.42 ft) and MW008 (0.06 ft). 05/27/20-Hiralkumar Patel. 1:41 PM:- received email from Pat including weekly gauging data collected on 05/21/20. no product was noted in wells OB003, OB004 and MW006. product was noted in well MW005 (0.13 ft), MW007 (0.71 ft) and MW008 (1.09 ft). 06/01/20-Hiralkumar Patel. 2:12 PM:- received call from Erin Quell from EAR. she mentioned that due to current COVID-19 situation and parking issues in the area, they were not able to vacuum out wells since 03/05/20. Erin inquired if they should call vacuum truck from Island during next visit. suggested Erin to have EAR technician visit the site in morning to confirm parking availability for the vacuum truck and then call the truck, if Island Pump can respond on short notice. 06/10/20-Hiralkumar Patel. 9:47 AM:- received email from Erin including weekly gauging data collected on 05/28/20. well OB003 was not accessible due to garbage pile, well OB004 was found dry and no product was noted in well MW006. product

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

was noted in well MW005 (1.21 ft), MW007 (0.63 ft) and MW008 (0.11 ft). 06/15/20-Hiralkumar Patel. 10:41 AM:- approved invoice (# 140914) from EAR for project coordination/well gauging conducted in month of Apr. 2020. 07/07/20-Hiralkumar Patel. 2:36 PM:- received email from Erin including weekly gauging data collected on 06/05/20, 06/10/20, 06/18/20, 06/25/20 and 07/01/20. wells OB003 and OB004 were either found dry or no product. no product was noted in well MW006. product was noted in well MW005 (between 0.80 and 1.39 ft), MW007 (between 0.27 and 1.04 ft) and MW008 (between 0.02 and 0.12 ft). 07/10/20-Hiralkumar Patel. 10:10 AM:- approved invoice (# 140981) from EAR for project coordination/well gauging conducted in month of May 2020. 07/16/20-Hiralkumar Patel. 1:25 PM:- received email from Erin including weekly gauging data collected on 07/09/20. well OB003 was not accessible. no product was noted in wells OB004 and MW006. product was noted in well MW005 (1.30 ft), MW007 (0.85 ft) and MW008 (0.11 ft). Erin mentioned that they were able to schedule a VAC event on 07/09/20, but did not VAC from MW008 due to safety concerns. EAR technician had to repeatedly ask residents, including children, to leave the vicinity of the work zone as they were just curious, but they were not adhering to social distancing and kept trying to look into the wells while tech was working. 07/30/20-Hiralkumar Patel. received email from Erin (at 4:28 PM on 07/29/20) including weekly gauging data collected on 07/15/20 and 07/21/20. no product was noted in wells OB003, OB004 and MW006. product found in well MW005 (0.78 and 1.28 ft), MW007 (0.25 and 0.61 ft) and MW008 (0.05 and 0.07 ft). 08/13/20-Hiralkumar Patel. 10:40 AM:- approved invoice (# 141048) from EAR for project coordination/well gauging conducted in month of June 2020. 08/06/20-Hiralkumar Patel. 9:36 AM:- received email from Erin including weekly gauging data collected on 07/31/20. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product found in well MW005 (1.11 ft), MW007 (0.55 ft) and MW008 (0.13 ft). 08/06/20-Hiralkumar Patel. 3:18 PM:- received email from Erin including weekly gauging data collected on 08/05/20 and 08/13/20. no product was noted in wells OB003, OB004 and MW006. product found in well MW005 (1.11 ft both times), MW007 (0.48 and 0.88 ft) and MW008 (0.05 and 0.10 ft). 08/24/20-Hiralkumar Patel. 1:06 PM:- received email from Erin including a form requesting approval to use AB Env. (instead of Island Pump & Tank due to some payment conflicts) as subcontractor for well vacuum events. 08/25/20-Hiralkumar Patel. received email from Erin (at 5:00 PM on 08/24/20) including weekly gauging data collected on 08/19/20. no product was noted in wells OB003, OB004 and MW006. product found in well MW005 (1.41 ft), MW007 (0.58 ft) and MW008 (0.09 ft). 08/27/20-Hiralkumar Patel. 12:42 PM:- sent email to Erin including signed form authorizing use of AB Env. as subcontractor for well vacuum events. 09/01/20-Hiralkumar Patel. 9:40 AM:- received email from Erin including weekly gauging data collected on 08/26/20. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product found in well MW005 (1.34 ft), MW007 (0.49 ft) and MW008 (0.06 ft). Erin mentioned that they will be on-site tomorrow (09/02/20) with AB Oil to conduct vacuum event. 09/04/20-Hiralkumar Patel. 10:15 AM:- received email from Erin including weekly gauging/VEFRring data collected on 09/02/20. no product was noted in wells OB003, OB004 and MW006. product found in well MW005 (0.68 ft), MW007 (1.43 ft) and MW008 (0.10 ft). 09/09/20-Hiralkumar Patel. 12:32 PM:- approved invoice (# 141112) from EAR for project coordination/well gauging conducted in month of July 2020.

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

09/10/20-Hiralkumar Patel. 2:40 PM:- received email from Erin including weekly gauging/VEFRring data collected on 09/09/20. no product was noted in wells OB003, OB004 and MW006. product found in well MW005 (0.02 ft), MW007 (0.10 ft) and MW008 (0.09 ft). 09/28/20-Hiralkumar Patel. 8:07 AM:- received email from Erin including weekly gauging data collected on 09/17/20 and 09/23/20. no product was noted in wells OB003 (not accessible on 09/17/20), OB004 and MW006. product found in well MW005 (0.76 and 1.52 ft), MW007 (0.26 and 0.72 ft) and MW008 (0.15 and 0.12 ft). 10/09/20-Hiralkumar Patel. 2:31 PM:- approved invoice (# 141171) from EAR for project coordination/well gauging conducted in month of Aug. 2020. 10/14/20-Hiralkumar Patel. 11:56 AM:- received email from Erin including weekly gauging data collected on 10/01/20 and 10/07/20. no product was noted in wells OB003 (not accessible on 10/07/20), OB004 and MW006. product found in well MW005 (0.57 and 0.51 ft), MW007 (0.31 and 0.25 ft) and MW008 (0.03 and 0.04 ft). wells were VEFRred on 10/07/20. 10/21/20-Hiralkumar Patel. 9:07 AM:- received email from Erin including weekly gauging data collected on 10/14/20. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product found in well MW005 (0.46 ft), MW007 (0.18 ft) and MW008 (0.17 ft). 10/30/20-Hiralkumar Patel. 12:15 PM:- received email from Erin including weekly gauging data collected on 10/21/20 and 10/28/20. well OB003 was inaccessible both times due to garbage. no product was noted in wells OB004 and MW006. product found in well MW005 (0.48 and 0.22 ft), MW007 (0.24 and 0.53 ft) and MW008 (0.11 and 0.15 ft). 11/02/20-Hiralkumar Patel. 2:26 PM:- DEC Jane forwarded email from Ariel Czemerinski of AMC Engineering regarding site 347 Flushing Ave. owner of site 347 Flushing Ave (which is approx. 425 ft west of the subject site) applied for a dewatering permit. DEC Division of Permits issued the dewatering permit on 11/08/2019 with following condition: Additional Permit Conditions: The following activities will be completed and monitoring implemented prior to beginning pumping operations and will continue until pumping operations cease: A.Install Sentry Wells " The applicant will install sentinel monitoring wells on the west side of Kent Avenue approximately 50 feet and 100 feet north of the corner of Flushing Avenue to monitor drawdown between 347 Flushing Avenue and the Former Arkansas Company, Inc. BCP site. The wells should be screened across the observed water table and should be constructed with at least 15 feet of screen below the observed water table. The wells should be 4 in diameter to allow for NAPL recovery if necessary. Applicant will arrange for surveying of the well elevation in the same datum as the existing wells. B.Daily Monitoring Using Sentry Wells: " The applicant will monitor the water table elevation in the monitoring well prior to commencing dewatering activities, and then daily during dewatering activities. Monitoring results will be reported on a weekly basis to: Hiralkumar Patel, NYSDEC Division of Environmental Remediation, Spill Response Section hiralkumar.patel@dec.ny.gov C.Contingency Plan: " Should NAPL be observed to have migrated into the sentinel wells following the initiation of dewatering on the site, the Department will identify any specific actions to abate or mitigate the movement of contamination, which shall be undertaken by the applicant. Ariel stated that the driller attempted to install the sentry wells today (11/02/20), but found a sewer pipe (which are not regularly marked up by the 811 service) along the way. the sidewalk was marked out with electric and gas lines, many of which feed the buildings. 11/09/20-Hiralkumar Patel. 3:02 PM:- spoke with Ariel at

AMC Eng. he stated that the driller tried to install wells along the curb line. asked him to check site for possibility of well installation closer to building on west sidewalk of Kent Ave. also asked him to provide their client's contact info. 11/12/20-Hiralkumar Patel. received email from Erin (at 3:48 PM on 11/11/20) including weekly gauging data collected on 11/04/20. wells OB003, OB004 and MW006 were not gauged. product found in well MW005 (0.26 ft), MW007 (1.37 ft) and MW008 (0.19 ft). impacted wells were VEFRred on 11/04/20. 11/19/20-Hiralkumar Patel. received email from Ariel (at 7:02 PM on 11/18/20) including well logs. two (2) 4-inch wells (MW-1 and MW-2) were installed (for dewatering at 347 Flushing Ave) to a depth of 20.5 ft bg, with 15 ft of screen from 5.5-20.5 ft depth. 1:37 PM:- approved invoice (# 141233) from EAR for project coordination/well gauging conducted in month of Sept. 2020. 1:57 PM:- sent email to Ariel and asked him to submit scaled site map with well locations and well locations pics (if available). 11/24/20-Hiralkumar Patel. 10:09 AM:- received email from Pat including weekly gauging data collected on 11/11/20 and 11/16/20. no product was noted in wells OB003 (not accessible on 11/16/20), OB004 and MW006. product was found in well MW005 (0.63 and 0.68 ft), MW007 (0.09 and 0.11 ft) and MW008 (0.07 and 0.14 ft). 12/01/20-Hiralkumar Patel. received email from Ariel (at 3:47 PM on 11/30/20) including a well location map and daily log. two 4-inch wells (MWN and MWS) were installed along west side of Kent Ave. both wells were gauged daily (except weekends) since 11/17/20 and no product was found in both wells. wells MWS, MWN and MW-006 are located on west sidewalk of Kent Ave. wells MWS and MWN were installed by AMC Engineering as part of dewatering activities at site 347 Flushing Ave. well MW-006 was installed by EAR (DEC contractor) as part of groundwater delineation for the subject site. from the northwest corner of the intersection of Flushing Ave and Kent Ave, the well MWS is 43 ft north of the intersection corner, well MWN is 102 ft north of the intersection corner and well MW-006 is approx. 162 ft north of the intersection corner. groundwater was found around 8 ft bg in well MW-006, around 11 ft bg in MWN and around 13 ft bg in MWS. 12/03/20-Hiralkumar Patel. 1:41 PM:- received email from Pat including weekly gauging data collected on 11/25/20 and 12/02/20. well OB003 was not accessible both times due to garbage. no product was noted in wells OB004 and MW006. product was found in well MW005 (0.68 and 0.48 ft), MW007 (0.26 and 0.09 ft) and MW008 (0.25 and 0.19 ft). 12/07/20-Hiralkumar Patel. received email from Ariel (at 6:33 PM on 12/04/20) including daily well log for period 11/17/20 to 12/06/20. two wells MWN and MWS were gauged daily (except weekends) and no product was found in both wells. 12/15/20-Hiralkumar Patel. 8:21 AM:- approved invoice (# 141296) from EAR for project coordination/well gauging conducted in month of Oct. 2020. 12/28/20-Hiralkumar Patel. received email from Ariel (at 6:16 PM on 12/26/20) including daily well log for period 12/06/20 to 12/25/20. two wells MWN and MWS were gauged daily (except weekends) and no product was found in both wells. 12/30/20-Hiralkumar Patel. 9:32 AM:- received email from Erin including weekly gauging data collected on 12/09/20. well OB003 was not accessible due to garbage. no product was noted in wells OB004 and MW006. product was found in well MW005 (0.69 ft), MW007 (0.39 ft) and MW008 (0.27 ft). impacted wells were VEFRred on 12/09/20. 01/13/21-Hiralkumar Patel. 1:55 PM:- approved invoice (# 141369) from EAR for project coordination/well gauging conducted in month of Nov. 2020. 01/05/21-Hiralkumar Patel. 1:14 PM:- received email from Erin

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

including weekly gauging data collected on 12/23/20. well OB003 was not accessible due to garbage. no product was noted in wells OB004 and MW006. product was found in well MW005 (0.37 ft), MW007 (0.28 ft) and MW008 (0.18 ft). 01/11/21-Hiralkumar Patel. received email from Ariel (at 5:55 PM on 01/08/21) including daily well log for period up to 01/06/21. two wells MWN and MWS were gauged daily (except weekends) and no product was found in both wells. 01/20/21-Hiralkumar Patel. 11:27 AM:- received email from Erin including weekly gauging data collected on 01/04/21 and 01/13/21. well OB003 was not accessible on 01/04/21 due to garbage. no product was noted in wells OB003, OB004 and MW006. product was found in well MW005 (0.49 and 0.55 ft), MW007 (0.25 and 0.43 ft) and MW008 (0.09 and 0.23 ft). impacted wells were VEFRred on 01/13/21. 02/03/21-Hiralkumar Patel. 3:33 PM:- received email from Erin including weekly gauging data collected on 01/20/21. no product was noted in wells OB003, OB004 and MW006. product was found in well MW005 (0.36 ft), MW007 (0.14 ft) and MW008 (0.07 ft). 02/08/21-Hiralkumar Patel. received email from Ariel (at 5:21 PM on 02/05/21) including daily well log for period up to 02/05/21. two wells MWN and MWS were gauged daily (except weekends) and no product was found in both wells. 11:11 AM:- received email from Erin including site pics. she stated that they went to the site last week for gauging, but wells were inaccessible due to snow and thick layer of ice. she inquired if she can send two technicians to the site to clear snow/ice and gauge wells. she has postponed well VEFRring to next week. 02/09/21-Hiralkumar Patel. 12:43 PM:- received call from Erin inquiring about snow removal activity under PIN contract. informed Erin that inquiry about snow removal expense coverage under PIN contract has been sent to contract division in central office. asked Erin to suspend this week's well gauging activity and wait for response from contract division regarding coverage of snow removal expense under PIN contract. DEC Austin discussed snow removal expense with central office who confirmed that snow removal expense will be covered as site access and maintenance would be part of the work. 2:09 PM:- sent email to Erin and asked her to send technicians to the site to clear snow/ice to access monitoring wells. asked her to gauge wells this week. email copied to Pat. 02/11/21-Hiralkumar Patel. 11:25 AM:- approved invoice (# 141455) from EAR for project coordination/well gauging conducted in month of Dec. 2020. 02/26/21-Hiralkumar Patel. 1:53 PM:- received email from Erin including weekly gauging data collected on 01/27/21 and 02/12/21. well OB003 was not accessible on 02/12/21 due to garbage. no product was noted in wells OB003, OB004 and MW006. no product was noted in well MW007 on 01/27/21. product was found in well MW005 (0.25 and 0.35 ft), MW007 (0.03 on 02/12/21) and MW008 (0.02 and 0.03 ft). 03/02/21-Hiralkumar Patel. received email from Erin (at 5:12 PM on 03/01/21) including weekly gauging data collected on 02/17/21 and 02/24/21. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product was found in well MW005 (0.54 and 0.28 ft), MW007 (0.34 and 0.02 ft) and MW008 (0.47 and 0.01 ft). impacted wells were VEFRred on 02/17/21. 03/04/21-Hiralkumar Patel. 9:25 AM:- approved invoice (# 141525) from EAR for project coordination/well gauging conducted in month of Jan. 2021. 04/09/21-Hiralkumar Patel. 9:48 AM:- approved invoice (#141600) from EAR for project coordination/well gauging/VEFRring/snow removal conducted in month of Feb. 2021. 03/22/21-Hiralkumar Patel. received email from Ariel (at 5:53 PM on 03/19/21) including daily well log for period up to 03/17/21. two wells MWN and MWS were gauged daily

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

(except weekends) and no product was found in both wells. 03/29/21-Hiralkumar Patel. 1:09 PM:- received email from Erin including weekly gauging data collected on 03/03/21, 03/10/21 and 03/17/21. no product was noted in wells OB003, OB004 and MW006. product was found in well MW005 (0.31, 0.24 and 0.40 ft), MW007 (0.08, 0.19 and 0.28 ft) and MW008 (0.04 and 0 ft). impacted wells were VEFRred on 03/17/21. 05/05/21-Hiralkumar Patel. received email from Erin (at 12:17 PM on 05/04/21) including weekly gauging data collected on 03/23/21, 03/29/21, 04/07/21, 04/14/21, 04/23/21 and 04/28/21. well OB003 was mostly inaccessible due to garbage. no product was noted in wells OB004 (which was found dry during Apr. gauging events) and MW006. product was found in well MW005 (0.19, 0.24, no data for 04/07, 1.09, 0.47 and 0.80 ft), MW007 (0.01, 0.03, trace, 0.48, 0.13 and 0.70 ft) and MW008 (trace, 0.02, trace, 0.08, 0.18 and 0.01 ft). impacted wells were VEFRred on 04/23/21. 05/14/21-Hiralkumar Patel. 9:40 AM:- approved invoice (#141672) from EAR for project coordination/well gauging conducted in month of Mar. 2021. 05/24/21-Hiralkumar Patel. received email from Weronika Patycka (at 5:00 PM on 05/21/21) from AMC Eng. including daily well log for period up to 05/21/21. two wells MWN and MWS were gauged daily (except weekends) and no product was found in both wells. Weronika Patycka AMC Engineering PH. (718) 545-0474 (718) 594-5841 email: wpatycka1@amc-engineering.com 05/26/21-Hiralkumar Patel. received email from Stephen Goetz (at 3:51 PM on 05/25/21) from EAR including weekly gauging data collected on 05/05/21, 05/12/21 and 05/19/21. well OB003 was found either dry or inaccessible due to garbage. no product was noted in wells OB004 (which was found dry in beginning of May) and MW006. product was found in well MW005 (0.51, 1.15 and 0.50 ft), MW007 (0.29, 0.41 and 0.23 ft) and MW008 (0.01, 1.19 and 0.13 ft). Stephen M. Goetz **new project manager** EAR PH. (631) 447-6400 Ext. 152 email: goetz@enviro-asmnt.com 06/02/21-Hiralkumar Patel. received email from Weronika (at 7:16 PM on 05/28/21) from AMC Eng. including daily well log for period up to 05/28/21. two wells MWN and MWS were gauged daily (except weekends) and no product was found in both wells. received email from Steve (at 4:18 PM on 06/01/21) from EAR including weekly gauging data collected on 05/25/21. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was found in well MW005 (3.17 ft), MW007 (4.94 ft) and MW008 (1.47 ft) {- this high numbers are due to technician's misunderstanding.} impacted wells were VEFRred on 05/25/21. 10:35 AM:- visited site and met Steve. EAR crew had finished gauging wells prior to arrival to the site. Steve mentioned that product was found in only two wells: approx. 0.4 ft in MW5 and 0.18 ft in MW-7. Steve also stated that high product thickness noted during well gauging on 05/25/21 is actually result of technician's misunderstanding and not actual product thickness. Steve mentioned that the next VEFRring will occur in last week in June. asked him to schedule well gauging/VEFRring in presence of DEC personnel as may need to open/gauge two wells (MWN and MWS) on west side of Kent Ave, installed by AMC Eng. 12:24 PM:- sent email to Weronika requesting access to wells MWN and MWS during well gauging/VEFRring (possibly on 06/22/21). email copied to DEC Jane, Steve, Ariel and joel@empirebrooklyn.com. 06/03/21-Hiralkumar Patel. 10:48 AM:- received email from Steve including weekly gauging data collected on 06/02/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.40 ft) and MW007 (0.18 ft). 06/04/21-Hiralkumar Patel. 9:59 AM:- received email from Weronika from AMC Eng. including daily well

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

log for period up to 06/03/21. no product was found in both wells MWN and MWS. 06/07/21-Hiralkumar Patel. 11:15 AM:- received email from Steve confirming next VEFRring schedule at 10 AM on 06/22/21. 06/11/21-Hiralkumar Patel. 8:26 AM:- received email from Weronika from AMC Eng. including daily well log for period up to 06/09/21. no product was found in both wells MWN and MWS. 06/15/21-Hiralkumar Patel. received email from Steve (at 4:26 PM on 06/14/21) including weekly gauging data collected on 06/09/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.45 ft) and MW007 (0.24 ft). 2:15 PM:- approved invoice (#141747) from EAR for project coordination/well gauging conducted in month of Apr. 2021. 06/21/21-Hiralkumar Patel. received email from Steve (at 2:11 PM on 06/18/21) including weekly gauging data collected on 06/16/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.77 ft) and MW007 (0.49 ft). 3:32 PM:- received email from Weronika from AMC Eng. including daily well log for period up to 06/17/21. no product was found in both wells MWN and MWS. 06/22/21-Hiralkumar Patel. 9:00 AM:- visited site and met Jason (EAR) and Aerial (AMC Eng.). gauged existing wells (OB003, OB004, MW006, MW007, MW008, MWN and MWS). no product noted in wells except MW005, MW007 and MW008 (minute amount). 06/24/21-Hiralkumar Patel. 12:33 PM:- received email from Steve from EAR including weekly gauging data collected on 06/22/21. wells OB003 and OB004 were found dry. no product was noted in well MW006. product was found in well MW005 (0.78 ft), MW007 (0.50 ft) and MW008 (0.01 ft). impacted wells were VEFRred on 06/22/21. 06/25/21-Hiralkumar Patel. 10:28 AM:- received email from Weronika from AMC Eng. including daily well log for period up to 06/25/21. no product was found in both wells MWN and MWS. 07/06/21-Hiralkumar Patel. received email from Weronika (at 5:06 PM on 07/02/21) from AMC Eng. including daily well log for period up to 07/02/21. no product was found in both wells MWN and MWS. received email from Steve (at 6:04 PM on 07/02/21) including weekly gauging data collected on 06/30/21. well OB003 was inaccessible. well OB004 was found dry. no product was noted in well MW006. product was found in well MW005 (0.37 ft), MW007 (0.21 ft) and MW008 (trace). 07/12/21-Hiralkumar Patel. received email from Weronika (at 4:31 PM on 07/09/21) from AMC Eng. including daily well log for period up to 07/09/21. no product was found in both wells MWN and MWS. received email from Steve (at 5:55 PM on 07/09/21) including weekly gauging data collected on 07/08/21. well OB003 was inaccessible. well OB004 was found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.37 ft) and MW007 (0.25 ft). 07/19/21-Hiralkumar Patel. received email from Weronika (at 4:01 PM on 07/16/21) from AMC Eng. including daily well log for period up to 07/16/21. no product was found in both wells MWN and MWS. 2:25 PM:- approved invoice (#141810) from EAR for project coordination/well gauging conducted in month of May 2021. 07/19/21-Hiralkumar Patel. 12:13 PM:- received email from Steve including weekly gauging data collected on 07/15/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.41 ft) and MW007 (0.12 ft). Steve mentioned that an absorbent sock was mistakenly placed in well MW007 which will be removed during next VEFRring event. 07/26/21-Hiralkumar Patel. received email from Steve (at 5:55 PM on 07/23/21) including weekly gauging data collected on 07/21/21. well OB003 was inaccessible. well OB004 was found dry. no product was noted in well MW006 and MW008.

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

product was found in well MW005 (0.66 ft). previously placed absorbent sock was removed from well MW007, so product was not recorded in well MW007. well MW005 was VEFRred on 07/21/21. 07/29/21-Hiralkumar Patel. received email from Steve (at 5:44 PM on 07/28/21) including weekly gauging data collected on 07/27/21. well OB003 was inaccessible. well OB004 was found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.37 ft) and MW007 (0.27 ft). 08/05/21-Hiralkumar Patel. received email from Steve (at 4:46 PM on 08/04/21) including weekly gauging data collected on 08/04/21. wells OB003 and OB004 were found dry. no product was noted in well MW006 and MW008. product was found in well MW005 (0.60 ft) and MW007 (0.32 ft). 08/06/21-Hiralkumar Patel. 2:02 PM:- received email from Weronika from AMC Eng. including daily well log for period up to 08/06/21. no product was found in both wells MWN and MWS. 08/10/21-Hiralkumar Patel. 10:30 AM:- approved invoice (#141876) from EAR for project coordination/well gauging conducted in month of June 2021. 08/17/21-Hiralkumar Patel. 1:24 PM:- received email from Steve including weekly gauging data collected on 08/11/21. well OB003 was found dry. no product was noted in wells OB004 and MW006. product was found in wells MW005 (0.58 ft), MW007 (0.27 ft) and MW008 (0.01). 08/20/21-Hiralkumar Patel. received email from Steve (at 5:23 PM on 08/19/21) including weekly gauging data collected on 08/18/21. well OB003 and OB004 were found dry. no product was noted in well MW006. product was found in wells MW005 (0.56 ft), MW007 (0.27 ft) and MW008 (0.01). wells MW005 and MW007 were VEFRred on 08/16/21. Steve mentioned that the onsite technician received a complaint from a resident regarding the condition of the manhole at MW-5. resident reported that a child was able to remove its manhole cover. upon reviewing the condition of each of the manholes, it was discovered that there are no manhole cover bolts or bolt receivers present at OB003, OB004, MW005, and MW006. additionally, there are no manhole cover bolts present at MW007 and MW008. as the bolt receivers are in place at these locations, Steve will instruct the tech to replace the missing bolts and re-tap the bolt receivers (if necessary) during the next weekly gauging event. 08/30/21-Hiralkumar Patel. received email from Steve (at 6:05 PM on 08/27/21) including weekly gauging data collected on 08/26/21. well OB003 and OB004 were found dry. no product was noted in well MW006. product was found in wells MW005 (0.47 ft), MW007 (0.31 ft) and MW008 (0.01). 09/02/21-Hiralkumar Patel. 12:25 PM:- received email from Steve including weekly gauging data collected on 09/01/21. well OB003 and OB004 were found dry. no product was noted in well MW006. product was found in wells MW005 (0.66 ft), MW007 (0.32 ft) and MW008 (trace). 09/03/21-Hiralkumar Patel. 1:19 PM:- received email from Weronika from AMC Eng. including daily well log for period up to 09/03/21. no product was found in both wells MWN and MWS. 09/09/21-Hiralkumar Patel. received email from Steve (at 5:29 PM on 09/08/21) including weekly gauging data collected on 09/08/21. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product was found in wells MW005 (0.48 ft), MW007 (0.19 ft) and MW008 (trace). 8:54 AM:- sent email to Steve requesting a call back to discuss issue about damaged well manholes/bolt receivers. 9:40 AM:- received call from Steve. he mentioned that they have replaced bolt receivers, but need to change few well manholes. asked Steve to repair/replace well components to make it secure/safe. 09/20/21-Hiralkumar Patel. received email from Steve (at 4:57 PM on 09/16/21) including weekly gauging data collected on 09/16/21. no

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.53 ft), MW007 (0.07 ft) and MW008 (trace). 09/22/21-Hiralkumar Patel. received email from Ryan Manen (rvanmanen@amc-engineering.com, at 11:28 AM on 09/21/21) from AMC Eng. including daily well log for period up to 09/20/21. no product was found in both wells MWN and MWS. 09/23/21-Hiralkumar Patel. 10:56 AM:- approved invoice (#141946) from EAR for project coordination/well gauging conducted in month of July 2021. 09/29/21-Hiralkumar Patel. received email from Steve (at 5:55 PM on 09/28/21). he mentioned that manholes for wells OB003, OB004, MW005 and MW006 have been replaced on 09/23-09/24. email includes pics also. 10/04/21-Hiralkumar Patel. received email from Steve (at 5:45 PM on 09/29/21) including weekly gauging data collected on 09/22/21 and 09/29/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.80 and 0.62 ft), MW007 (0.32 and 0.17 ft) and MW008 (0.05 and 0.01 ft). wells MW005, MW007 and MW008 were VEFRred on 09/22/21. received email from Weronika (at 11:02 AM on 10/01/21) from AMC Eng. including daily well log for period up to 10/01/21. no product was found in both wells MWN and MWS. 10/08/21-Hiralkumar Patel. received email from Steve (at 12:00 PM on 10/07/21) including weekly gauging data collected on 10/06/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.79 ft), MW007 (0.51 ft) and MW008 (0.01 ft). 10/13/21-Hiralkumar Patel. received email from Weronika (at 3:53 PM on 10/08/21) from AMC Eng. including daily well log for period up to 10/08/21. no product was found in both wells MWN and MWS. 10/20/21-Hiralkumar Patel. received email from Steve (at 5:36 PM on 10/18/21) including weekly gauging data collected on 10/14/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.89 ft), MW007 (0.34 ft) and MW008 (0.19 ft). 8:06 AM:- approved invoice (#142018) from EAR for project coordination/well gauging conducted in month of Aug. 2021. 10/25/21-Hiralkumar Patel. received email from Steve (at 5:11 PM on 10/21/21) including weekly gauging data collected on 10/20/21. well OB004 was found dry. no product was noted in wells OB003 and MW006. product was found in wells MW005 (0.12 ft), MW007 (0.93 ft) and MW008 (0.03 ft). wells MW005, MW007 and MW008 were VEFRred on 10/20/21. 10/28/21-Hiralkumar Patel. 2:02 PM:- sent email to Steve and inquired him about sudden change in product thickness in wells MW005 and MW007 (suspecting possible swap of data). 4:15 PM:- received email from Steve. he mentioned that the data in the report is as per the tech s field sheet, so it s not a transcription error. though the measurements and product thickness calculations appear mismatched when compared to the previous data. Steve inquired if need to swap numbers and submit revised report. 4:27 PM:- sent email to Steve. asked him not to change data, but to confirm numbers with field tech and then provide explanation for higher product thickness measurement in well MW007. 11/12/21-Hiralkumar Patel. received email from Steve (at 12:32 PM on 11/11/21) including weekly gauging data collected on 10/27/21, 11/04/21 and 11/10/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.40, 0.22 and 0.15 ft), MW007 (0.25, 0.16 and 0.63 ft) and MW008 (none, trace and 0.45 ft). Steve looked into the increased product thickness reported during the 10/20/21 VEFR event. there were no transcription errors while tabulating the field data. additionally, he has confirmed with the technician that MW-007 and MW-005 were not switched. as such, reported variations of product thickness are likely a result of

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

groundwater table elevation fluctuations. 11/12/21-Hiralkumar Patel. 3:01 PM:- received email from Weronika from AMC Eng. including daily well log for period up to 11/05/21. no product was found in both wells MWN and MWS. 11/16/21-Hiralkumar Patel. 12:10 PM:- approved invoice (#142088) from EAR for project coordination/well gauging conducted in month of Sept. 2021. 11/22/21-Hiralkumar Patel. received email from Steve (at 4:17 PM on 11/19/21) including weekly gauging data collected on 11/19/21. well OB003 was inaccessible. no product was noted in wells OB004 and MW006. product was found in wells MW005 (0.86 ft), MW007 (0.24 ft) and MW008 (0.13 ft). 11/24/21-Hiralkumar Patel. received email from Steve (at 5:17 PM on 11/23/21) including weekly gauging data collected on 11/23/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.82 ft), MW007 (0.15 ft) and MW008 (0.45 ft). wells MW005, MW007 and MW008 were VEFRred on 11/23/21. 12/02/21-Hiralkumar Patel. received email from Aerial (at 5:59 PM on 12/01/21) from AMC Eng. including daily well log for period up to 11/22/21. no product was found in both wells MWN and MWS. 12/09/21-Hiralkumar Patel. 8:40 AM:- approved invoice (#142160) from EAR for project coordination/well gauging conducted in month of Oct. 2021. 12/13/21-Hiralkumar Patel. 2:07 PM:- received email from Steve including weekly gauging data collected on 12/01/21 and 12/08/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.11 and 0.77 ft), MW007 (0.38 and 1.68 ft) and MW008 (none and 0.25 ft). 12/20/21-Hiralkumar Patel. 2:50 PM:- received email from Steve including weekly gauging data collected on 12/16/21. no product was noted in wells OB003, OB004 and MW006. product was found in wells MW005 (0.36 ft), MW007 (0.38 ft) and MW008 (trace). 12/21/21-Hiralkumar Patel. 9:15 AM:- visited site to witness well gauging, but EAR technician had already gauged wells earlier today. he noted 0.19 ft of product in well MW007 and 0.32 ft of product in well MW005. the EAR technician mistakenly wrote well MW007 as well MW005, and well MW005 as well MW007. asked him to correct well notations. 9:39 AM:- spoke with Steve at EAR about change in well notations by technician. asked him to make note in gauging table about possible swap of data between wells MW005 and MW007 for past couple of weeks. 12/23/21-Hiralkumar Patel. received email from Steve (at 5:02 PM on 12/22/21) including weekly gauging data collected on 12/21/21. no product was noted in wells OB003, OB004, MW006 and MW008. product was found in wells MW005 (0.32 ft) and MW007 (0.19 ft). Steve mentioned at the end of data table that MW005 and MW007 may have been mistaken for each other during gauging/VEFR events. wells MW005 and MW007 were VEFRred on 12/21/21. 01/04/22-Hiralkumar Patel. 11:53 AM:- received email from Steve including weekly gauging data collected on 12/30/21. well OB003 was inaccessible. no product was noted in wells OB004, MW006 and MW008. product was found in wells MW005 (0.11 ft) and MW007 (0.22 ft). 01/07/22-Hiralkumar Patel. received email from Steve (at 4:06 PM on 01/06/22) including weekly gauging data collected on 01/05/22. no product was noted in wells OB003, OB004, MW006 and MW008. product was found in wells MW005 (0.19 ft) and MW007 (0.16 ft). the report includes a revised table with gauging data from Jan. 2021. the hydrographs show data from Dec. 2017. discussed with DEC Austin and DEC Jane O'Connell regarding alternative options to resolve this case. based on well gauging/VEFRing data since Dec. 2017, it was decided to 1) stop weekly gauging of existing monitoring wells, 2) continue monthly well gauging/VEFRing, and 3) explore options (feasibility / cost analysis) for excavation of grossly contaminated

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S112138864**

soil. 11:13 AM:- sent email to Ms. Singer, property manager requesting a call back to discuss possible excavation activities in front of the building entrance along Kent Ave. Top Quality Management **building management** 199 Lee Avenue #286 Brooklyn, NY 11211 Attn.: Esty Singer Ph. (718) 522-6582 Ext. 103 email: esinger@topqualitymanagement.com 11:31 AM:- sent email to Steve including a revised standby contractor authorization form. asked him to stop weekly well gauging activities, but to continue monthly well gauging/VEFRing. also asked him to explore option for excavation of grossly contaminated materials. email copied to Jennifer. 01/10/22-Hiralkumar Patel. 10:27 AM:- received email from Steve confirming receipt of the revised standby contractor authorization form. 01/13/22-Hiralkumar Patel. 1:10 PM:- received call from Dini (property manager) and Mendy (Dini's supervisor). Mendy mentioned that Dini manages that property now. informed them about spill history and current impact under the sidewalk in front of building entrance. asked Mendy about possibility of soil excavation in front of building's entrance. he mentioned that there is about six weeks window when kids in building go out for camping. informed him that Steve from EAR will contact building management to discuss possibility and process of soil excavation to expedite remediation. Top Quality Management **building management** 199 Lee Avenue #286 Brooklyn, NY 11211 Attn.: Dini **property manager** Ph. (718) 522-6582 Ext. 103 email: maint4@topqualitymanagement.com Mendy email: mendy@topqualitymanagement.com 1:24 PM:- spoke with Steve and informed him about discussion with building management. asked him to contact building manager to discuss possibility/process of excavation. 1:44 PM:- sent email to Dini with Steve's contact details. informed her that Steve will contact building management to discuss excavation process. email copied to Mendy and Steve. 01/20/22-Hiralkumar Patel. 3:00 PM:- approved invoice (#142224) from EAR for project coordination/well gauging conducted in month of Nov. 2021. **impacted well is located exactly down-gradient of former heating oil (possibly #6 oil) UST. historic backfill material from 0 to 8 ft bg and silty clay from 8 to 15 ft bg.** DEC requires: 1) monthly gauging/VAC"

Remarks: "soil testings confirm loss in monitoring well"

Town:	New York City
Record Added Date:	01/25/2013
Record Updated Date:	08/04/2021
Update By:	SMQUANDT
Site Description:	"Location: The site is located at 74 Wallabout Street in Brooklyn, Kings County. The site extends from Wallabout Street on the north to Flushing Avenue to the south, and is approximately 0.89 acres in size. Site Features: The site formerly contained an approximately 44,700 square foot 2 to 3 story warehouse, an accessory at-grade parking and loading area at the northwest corner of the lot and a smaller fenced-in parking area at the southwest corner of the lot. The site is currently undergoing redevelopment, and the majority of the site is now covered by a building foundation. Current Zoning and Land Use: The subject site is zoned R7-1 (residential zoning district) with a C1-5 commercial overlay, permitting residential, commercial and community facility uses. The proposed use is for residential and commercial for the majority of the parcel, with a planned school expansion from the adjoining parcel. Past Use of the Site: The site was utilized in the past by a chemical manufacturer, furniture manufacturer, shelving company, paint and varnish manufacturer, lumber company, cable and rope company, packaging company, plastic processing company, and a housewares and household chemicals distributing company. Site Geology and Hydrogeology: Shallow soils, ranging from 0-8 feet below ground surface (bgs) were

DRAFT

FORMER ARKANSAS COMPANY, INC. SITE (Continued) **S113402002**

	characterized as mostly non-native, historic fill material consisting of brown silty sands. Deeper soils, ranging from 8-15 feet bgs were characterized as mostly gray, low-plasticity, silty clay. Groundwater occurs at the site at a depth of approximately 10 feet below ground surface. The flow is in a west/northwest direction."
Env Problem:	"Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds in soil, and floating petroleum product atop the groundwater table. Remedial action resulted attainment of the site specific cleanup objectives throughout the parcel, as well as the removal of all petroleum product within the site boundaries. Resdiual contamination in soil, and soil vapor, if any, is being managed under a Site Management Plan. Remediation associated with Spill #1213721 is being handled by Region 2 Spills."
Health Problem:	"People are not expected to come into contact with site related contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by public water supply that is not affected by this contamination. Because the site is vacant and undergoing remedial activities, soil vapor intrusion does not represent a current exposure pathway. Measures are in place to minimize the potential for vapor intrusion in buildings constructed at the site in the future and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY PMS/Shaw investigated site and recommended a dual-phase extraction system to address free product, soil contamination and dissolved-phase groundwater contamination. The system was installed in summer of 2005, and after delays caused by DEP site personnel, started up in the fall of '05, however, there were problems with electrical service and the system was shut down in October '05. It may have been re-started in November and run through December, but never received any system start-up report or data. PMS/Shaw ceased activity at the site in late 2005, and site was transferred to Greyhawk in early 2006. - J. Kolleeny 05/30/06: NYCDDC Consent Order Bi-Monthly Site Status Rpt indicates that Greyhawk/Roux performed gauging and sampling of monitoring wells in April 2006. A sheen was observed in MW-16, 0.9 ft. of product in DPE-8, and 0.45 ft. of product in MW-21 (this well is upgradient of site and product was ID'ed by Shaw as no. 2/no. 6 fuel oil, which they suspected was from an off-site source). GW sampling showed high levels of dissolved-phase contamination in MW-3 (11,146 ppb TVOCs), MW-8 (1,385 TVOCs), MW-9 (5,150), MW-10 (815), MW-13 (646) and MW-16 (1,193). Rpt notes that DPE system is currently inactive. Sent email (in eDocs) to Andy Ledins of Greyhawk asking that they re-start system (making any needed repairs and/or improvements), or if they believe system to be inadequate, that they prepare and submit an alternative plan to expedite cleanup of site. - JK 07/09/07: A DPE system has been installed at this site but start-up and operation of system have been prevented by NYCDEP who have repeatedly requested changes to the system and its treated water discharge location. Every time DDC consultants have met their demands, new demands are made. Meanwhile, on-going site monitoring (see reports in eDocs) continues to show free product in several wells and relatively high levels of dissolved-phase GW contamination in some wells. At meeting on 5/30/07 with DDC, Greyhawk & Roux, monitoring report for Oct. '06 - Mar. '07 was hand-delivered (in eDocs). I approved recommendations for removal of SVOCs from sampling program (due to general absence in samples), change in well gauging frequency from monthly to quarterly, and removal of wells MW-01, MW-04, MW-14, MW-15, MW-17 and MW-18 from monitoring/sampling program (well MW-06 was also requested for removal, but I asked that it be included in one more sampling round, after which if it is again ND, it can be dropped from program. Also agreed that DEC would look into setting up conference call involving DEC and DDC legal staff to discuss how to handle NYCDEP's lack of cooperation and resolve impasse. After meeting, Andy Ledins of Greyhawk mentioned that one possible way around problem would be to operate system primarily in slurping mode, so groundwater discharge

NYCDEP (Continued) **S103272814**

would not be an issue. On 7/9/07, I sent an email to Brian Morrissey of Roux and Andy Ledins asking if this was ever implemented, and for name of DEP contact. - J. Kolleeny 10/20/08: Reviewed April-Sept.'07 mon rpt, dated 12/21/07, and Oct.'07-June'08 mon rpt, dated 10/16/08, both by Roux (both in eDocs). April-Sept.'07 rpt confirms removal of wells MW-01, MW-04, MW-14, MW-15 MW-17 & MW-18 from GW sampling program as approved by DEC at meeting on 5/30/07; gives results of April '07 and Aug. '07 GW sampling events, showing high or moderate levels of VOCs in several wells and free product in 4 and 2 wells, resp.; rpt notes that operation of on-site DPE system will resume once sewer discharge connection is approved by DEP and built, and recommends removing wells MW-05, MW-06, MW-12 and MW-21 from sampling program. Oct.'07-June'08 rpt gives results of Dec.'07, March'08 and June'08 GW sampling events, showing high or moderate levels of VOCs in several wells and free product in 2, 3, and 3 wells, resp. During June'08 event, product was purged from MW-16 (0.4 gals) and DPE-08 (2.1 gals), absorbent sock was reinstalled in MW-21. Rpt recommends resuming operation of DPE system after repairs & modifications to system and after proposed sewer discharge pipe is connected to 12-inch sewer near intersect of Kent Ave & Little Nassau St., and recommends removing wells MW-05, MW-06 and MW-27/DPE-03 from GW sampling program. Sent email to Afsar Samani of DDC, cc's to Fatemeh Ashkan of DDC, Brian Morrissey of Roux, and Andris Ledins of Greyhawk: I have reviewed monitoring report for period October '07 through June '08 for this site, prepared by Roux Assoc. and dated 10/16/08. Report recommends (1) removing wells MW-05, MW-06 and MW-27/DPE-03 from GW sampling program, and (2) resuming operation of on-site DPE system after system modifications are complete and proposed system discharge pipe is connected to local sewer main near intersection of Kent Avenue and Little Nassau Street. These recommendations are approved. Please continue to keep me updated on status of remedial system at this site, and feel free to contact me if you have any questions. - J. Kolleeny 08/13/09: Reviewed monitoring rpt for July 2008 through April 2009, by Roux, dated 5/22/09 (in eDocs). Rpt states that on-site DPE system has been operating continuously since 4/1/09, after new transfer pump was installed. GW sampling in Dec.'08 showed moderate to high VOC levels in 7 wells, with worst contam in MW-03: 10,680 ug/L TVOCs. Free product was detected in 4 wells during rpt period, with greatest thickness obserbed in well MW-26/DPE-15 during Sept.'08 gauging event: 1.20 ft. Roux will continue to operate/monitor DPE system and continue quarterly GW sampling/gauging. Changed spill priority to P2. - J. Kolleeny 10/01/09: On 9/14/09, received email from Hassan Hussein of DEC R2 Div of Solid/Haz materials: Please provide details of remediation project at this facility. Info is needed to complete our recent haz waste compliance inspection. We need to know when remed system was installed, what waste streams are generated, what caused site contam, and where recovered materials are stored. I sent reply: Remed system at DEP Kent Avenue Shop is dual-phase extraction system. It is located in basement (equipment shed is in SE corner of basement). Construction of system began in 2003. System was started up in '05, but was shut down due to issues with NYCDEP, most notably their insistence that City construct dedicated line to carry system's treated water discharge to sewer main in street (rather than combining their discharge with facility's sewer discharge). System was started briefly several times since then and shut down after short periods, but has been running continuously since April '09.

NYCDEP (Continued) **S103272814**

Site contam was caused by gasoline & kerosene USTs, which leaked based on sampling of soil & GW in areas of tanks. Free petroleum product, I.D.'ed as mineral spirits, is present in several wells at site. System removes liquids and vapors from subsurface; these fluids are separated by moisture condenser. Recovered vapors are treated by passing through granular activated carbon & discharged to atmosphere. Vapor discharge is monitored with PID & sampled for lab analysis to ensure compliance with benzene discharge std. Recovered liquids go thru oil-water separator; free product goes to product holding tank, which is pumped out by vac truck when nearly full and transported to recycling facility. Water from oil-water separator passes thru GAC and is discharged to City's municipal sewer system. City's consultant has DEP permit for this discharge. You can find addt'l info about project in spills database. Hassan and I spoke on phone, he sent photos of 2 tanks at facility (in eDocs image folder), and I forwarded his questions/issues to Brian Morrissey of Roux Assoc., DDC's consultant. In response to questions about system, assoc. tanks, and vapors in equipment shed, Brian sent reply with attached IT Corp. RAP & design drawings (in eDocs): As requested, here is March 2001 Design Analysis Rpt & Remedial Design Work Plan by IT. Recovered product is periodically removed by AARCO with vac truck. Product recovery amount has not been substantial recently. Plans for replacement of vapor-phase carbon are in progress. I sent email to Brian: Thanks for RAP & diagrams. I have couple of questions: is product holding tank located in equipment enclosure in SE corner of basement? If so, is vent pipe routed to outdoors in some fashion? On 9/16/09, Brian sent email reply: Here are responses to questions in your email and our subsequent discussion: 1. Product recovered in oil/water separator is conveyed to & stored in tank T-1, 500-gal capacity AST, located in building but outside of treatment enclosure. AST is connected to vent line that runs to building exterior. 2. Recovered product that accumulates in T-1 is periodically removed with vac truck and taken to recycling facility. Copy of Jan. 2009 non-haz waste manifest is attached [in eDocs image folder]. Contact info for recycling facility: New York Oil Recovery Co., 94 Hausman St, Brooklyn, NY 11222,(718) 599-5120. 3. I spoke with Greyhawk regarding uncovered oil/water separator. We believe cover was temporarily removed for maintenance and operator neglected to reinstall cover at completion of activity. Greyhawk will direct its O&M subcontractor to ensure that cover will be on separator at all times except during maintenance tasks. 4. Since system commenced continuous operation, Greyhawk & Roux have not received any reports re: NYCDEP's concerns with vapors/odors. Treatment enclosure fan, which exhausted vapors out to garage area, has been shut off. There are no current plans to further address this issue. 5. I heard that DEC inspector inquired about registration status of 500-gallon AST and oil/water separator. Normally, process tanks including oil/water separators are not subject to tank registration requirements nor requirements of 6 NYCRR Parts 613 & 614. Based on my understanding of regs, there is no NYS requirement to register remedial system's AST or oil/water separator. Do you agree? On 9/22/09, I replied: Thanks for addt'l info and answers. About item 5, based on conversations with Jacob Krimgold, head of PBS Unit, I agree that process tanks storing petrol product recovered by remed system need not be registered. However, regarding vapors/odors, Haz Waste inspector was not so much concerned by complaints of vapors and odors from DEP staff at facility, he was concerned by strong and potentially

NYCDEP (Continued) **S103272814**

combustible petroleum vapors within system enclosure. I assume that if cover is kept on oil-water separator this would be less of problem, and that all electronics in system enclosure are non-sparking, or whatever appropriate term is. Is there anything else typically done to reduce vapors within such enclosure, and do you think that such vapors in this case are any cause for concern? On 10/01/09, Brian wrote back: Here is some info in response to your concerns regarding vapors & odors generated by operation of remed system at Kent Ave: 1. Equipment in treatment room is XP, that is rated for Class 1, Div. 2 atmosphere. 2. Current plan is to install carbon-based filter on room exhaust fan for odor control. 3. Greyhawk is at site today working with their subcontractor to ensure that maintenance of oil-water separator and waste generation/storage issues are properly attended to. Please let me know if you have any other questions. - J. Kolleeny 09/07/10: Reviewed Site Turn-Over Status Rpt by LiRo, dated 6/24/10 (in eDocs). Rpt states that DPE system had significant downtime between Nov. 2008 and March 2009; on 4/1/09, system resumed operation running on only one leg to reduce water influent flow. In Feb. 2010, LiRo replaced Greyhawk/Roux as CM/Consultant. Info provided to LiRo by Greyhawk in April 2010 indicated DPE system operated thru much of 2009; system air & water influent & effluent sampling was performed in Dec. 2009. O&M info indicated excessive bio-fouling of oil/water separator, must be cleaned regularly to keep system running. Rpt notes that last soil sampling was done in 2003, and states that addt'l sampling is needed to determine current conditions and evaluate system effectiveness. Free product is present in several wells and is recovered manually during quarterly monitoring. GW sampling in Jan. 2010 showed worst contam persists in SW area of site (although most wells in NE part of site weren't sampled), with MW-03 having 7,220 ug/L total VOCs (down from 10,680 ug/L in Dec. 2008), MW-09 having 2,783 ug/L tVOCs (up from 1,862 ug/L in Dec. 2008), MW-10 having 2,355 ug/L tVOCs (down from 2,719 ug/L in Dec. 2008), and MW-08 having 548 ug/L tVOCs (down from 1,123 ug/L in Dec. 2008). Rpt recommends continuing quarterly product recovery and semi-annual GW sampling; preparation of 6-month summary rpt and annual rpt with recommendations for changes as needed; performing a supplemental soil investigation to determine current soil conditions, providing data for evaluating system effectiveness and trunk line options; and submitting letter rpt with results of soil investig and system evaluation. - J. Kolleeny 12/13/10: Reviewed Quarterly Monitoring Rpt (June-Aug. 2010) by LiRo, dated 10/28/10 (in eDocs). GW data for June 2010 show high levels of dissolved-phase contam persist in southwest part of site. Well MW-03 had 9,612 ug/L total VOCs (up from 7,220 ug/L in Jan. 2010), MW-09 had 4,978 ug/L tVOCs (up from 2,783 ug/L in Jan. 2010), MW-10 had 1,961 ug/L tVOCs (down from 2,355 ug/L in Jan. 2010). On east side of site, well DPE-08 had 768 ug/L tVOCs (up from 110 ug/L in Jan. 2010) and MW-26 had 638 ug/L tVOCs (not sampled in Jan. 2010, but had 27 ug/L tVOCs in Dec. 2008). LiRo states that pre-remediation baseline soil data from July 2003 should be updated to evaluate DPE system effectiveness and help focus system operation, and rpt includes supplemental investigation work plan proposing 8 soil borings, with 3 possibly to be converted to monitoring wells, based on field observation of contam. I sent letter (in eDocs) to Afsar Samani of DDC, cc's to Fatemeh Ashkan of DDC and Steve Frank of LiRo, approving invest plan, but asking that one boring be moved to DPE-18 (which had high levels of VOCs in soil), that GW samples be collected from wells

NYCDEP (Continued) **S103272814**

MW-14, MW-15, MW-16 & MW-18 to supplement June 2010 GW data, and that system O&M data be included in summary rpt to help evaluate system's effectiveness and need for system modifications. - J. Kolleeny 12/23/10: [JK] Received System Shutdown Notification email from John Proios of LiRo: Site Name: DEP-Kent Ave Shop Date and Time of Shutdown: 12/22/10, 10:00 am Reason for Shutdown: Excessive iron fouling in moisture separator, oil/water separator, and filter canisters Corrective Action Required: Pressure washing and scrubbing at moisture separator, oil/water separator, and filter canisters Estimated Duration of Shutdown: 5 days 12/29/10: [JK] Received System Shutdown Notification email from Ian Hoffman of Envt'l Assessment and Remediations: Site Name: DEP-Kent Ave Shop Date and Time of Shutdown: 12/22/10, 10:00 am Reason for Shutdown: Excessive iron fouling in moisture separator, oil/water separator, and filter canisters Corrective Action Required: Pressure washing and scrubbing at moisture separator, oil/water separator, and filter canisters. Corrective action delayed due to weather delays, logistical constraints regarding vacuum truck access. Estimated Duration of Shutdown: 14 days 05/12/11: Reviewed Quarterly Mon Rpt & System Performance Rpt for period Sept.-Nov. 2010, dated 2/22/11, by LiRo (in eDocs). On-site DPE system operated ~86% of time, vapor and GW discharges were in compliance with discharge limits. No free product was detected in wells. Sept./Oct. 2010 GW sampling showed worst contam in several wells in vicinity of former USTs: MW-03 had 9,592 ug/L total VOCs (had 9,612 ug/L in June 2010), MW-09 had 3,356 ug/L tVOCs (down from 4,978 ug/L in June 2010), MW-10 had 2,944 ug/L tVOCs (up from 1,961 ug/L in June 2010). LiRo will conduct soil investig to obtain current data in Feb. 2011. Rpt recommends continued system O&M and GW Mon; rpt includes no proposals requiring DEC approval. - J. Kolleeny 08/22/11: Received System Shutdown Notification email from Ian Hoffman of Envt'l Assessment and Remediations: Site Name: DEP-Kent Avenue Shop Date and Time of Shutdown: Reported by LIRO 8/12/11 14:45:00 Reason for Shutdown: high level alarm at moisture separator and high level alarm at product tank (false alarm at product tank) Corrective Action Required: troubleshooting scheduled for Monday, 8/15 Estimated Duration of Shutdown: 2.5 days 08/29/11: Reviewed Quarterly Mon Rpt & System Performance Rpt for period Dec. 2010 thru Feb. 2011, dated 6/29/11, by LiRo (in eDocs). On-site DPE system operated ~82% of time, vapor and GW discharges were in compliance with discharge limits. Two wells in SE corner of site had measurable free product in Jan. 2011: DPE-01 had 0.02 ft, and DPE-08 had 0.05 ft. Soil investigation in Feb. 2011 found overall lower total VOC levels and smaller area of impact compared with July 2003 soil sampling data; however, sigificant levels of soil contam remain, esp. along E side of site. GW sampling in Jan. & Feb. 2011 showed worst contam in several wells in vicinity of former USTs in SW part of site: MW-03 had 9,020 ug/L total VOCs (down from 9,592 ug/L in Sept. 2010), MW-09 had 5,731 ug/L tVOCs (up from 3,356 ug/L in Oct. 2010), MW-10 had 2,296 ug/L tVOCs (down from 2,944 ug/L in Oct. 2010). Outlier well MW-15 (in NE corner of site) had 2,620 ug/L tVOCs in Feb. 2011, up from ND in Jan. 2011 and ~2 ug/L in Oct. 2010; LiRo suspects this result may be anomalous. Rpt proposes to reconfigure operation of DPE system by shutting off vapor extraction component of system in west and northeast areas of site, to focus vapor extraction in areas with high residual soil contam based on results of Feb. 2011 soil investigation. Specifically, LiRo proposes to shut off air vacuum component at wells DPE-06, DPE-07, DPE-11, DPE-17, and DPE-18

NYCDEP (Continued) **S103272814**

(rpt also proposes to shut off DPE-16, however, figures indicate that well has been destroyed, and this was confirmed by Steve Frank of LiRo on 8/29/11). I sent email (in eDocs) approving proposed system changes to Afsar Samani of DDC, cc's to Fatemeh Ashkan of DDC and Steve Frank of LiRo. - J. Kolleeny 01/17/12: Reviewed Qtrly Monitoring and System Performance Rpt for March-May 2011 by LiRo, dated 9/6/11 (in eDocs). On-site DPE system operated ~93.5% of rpting period. Vapor & GW discharges were in compliance with limits. Free product was observed in only one well, MW-09, but not enough to measure thickness (well was not sampled for dissolved VOCs). Feb. 2011 soil sampling showed high VOC levels in SE part of site, but total mass and extent of VOCs have decreased compared with historical maximums & distribution. May 2011 GW sampling showed highest dissolved VOCs persisting in wells near closed-in-place USTs. Well MW-03 had 9,514 ug/L total VOCs (up from 9,020 ug/l in Jan. 2011); well MW-10 had 2,730 ug/L tVOCs (up from 2,296 ug/L in Jan. 2011); all other wells sampled in May 2011 had less than 1,000 ug/L tVOCs (with several being ND). LiRo concludes DPE system is effectively reducing contam at site. LiRo will continue quarterly GW gauging & sampling, maintain DPE system ops & monitoring, continue to submit quarterly rpts, and reconfigure operation of system to focus on remaining areas with high VOC levels (as approved by DEC in Aug. 2011). - JK 05/11/12: Reviewed Qtrly Mon and Syst Performance Rpt for June-Aug. 2011 by LiRo, dated 1/4/12 (in eDocs). On-site DPE system operated ~76% of rpting period. Vapor & GW discharges were in compliance with limits. No measurable free product was detected in any wells during this period. August 2011 GW sampling showed high VOC levels persist in wells near closed USTs: MW-03 had 8,570 ug/L total VOCs (down from 9,514 in May 2011); MW-09 had 6,249 ug/L tVOCs (not sampled in May 2011 due to visible NAPL); MW-10 had 3,783 ug/L tVOCs (up from 2,730 ug/L in May 2011). LiRo concludes DPE system is effectively reducing contam at site. LiRo will continue quarterly GW gauging & sampling, maintain DPE system ops and monitoring, continue to submit quarterly rpts, and enact DEC approved changes to DPE system. - J. Kolleeny 07/24/12: Reviewed Qtrly Mon and Syst Performance Rpt for Sept. 2011 - Feb. 2012 by LiRo, dated 4/6/12 (in eDocs). On-site DPE system operated ~58% of time from Sept-Nov 2011, and ~70% of time from Dec. 2011 thru Feb. 2012. Vapor & GW discharges were in compliance with limits. No measurable free product was detected in any wells during this period. GW sampling performed in Nov./Dec. 2011 and again in Jan. 2012 showed high VOC levels persisting in wells near closed USTs: MW-03 had 7,393 ug/L total VOCs in Nov. 2011 (down from 8,570 ug/L in Aug. 2011), but went back up to 8,709 ug/L tVOCs in Jan. 2012; MW-09 had 3,952 ug/L tVOCs in Dec. 2011 (down from 6,249 ug/L in Aug. 2011), but went back up to 7,078 ug/L tVOCs in Jan. 2012; MW-10 had 1,558 ug/L tVOCs in Dec. 2011 (down from 3,783 ug/L in Aug. 2011) and decreased further to 801 ug/L tVOCs in Jan. 2012. LiRo concludes DPE system is operating effectively. They will continue quarterly GW gauging & sampling, maintain DPE system ops and monitoring (replacement of blower in progress), and continue to submit quarterly rpts. - J. Kolleeny 12/06/12: Reviewed Qtrly Mon and Syst Performance Rpt for March-May 2012 by LiRo, dated 8/21/12 (in eDocs). On-site DPE system operated only ~42% of rpting period, mainly due to 49-day shutdown caused by blower malfunction. Vapor & GW discharges were in compliance with limits. No measurable free product was detected in any wells during this period. GW sampling in April continued to show high VOC levels
